THE MORRISBURG LEADER

VOL. 94, NO. 41. MORRISBURG, ONTARIO, FRIDAY, OCTOBER 12th, 1956 $2.50 YR. IN CANADA; $3.50 IN U.S.A.

INSTALL OFFICERS OF ZETA AND I. O. O. F. LODGE

The evening of October 4th was the occasion of a joint and open installation of the officers of Zeta 311 IOOF and St. Lawrence Rebekah 373 of Morrisburg.

The D. D. P., Helen Starling Brockville District No. 1, and her staff, of Eastern Star 48 of Cornwall, installed the officers of St. Lawrence 373 in a very capable manner. J.P.N.G., Hulda Hummell; N.G., Reatha Riddell; V. G., Marguerite Clark; Rec. S. Margaret Bowman; Fin. S., Mildred Mattice; Treas., Mary Disotel; Warden, Bessie Beckstead; Cond., Verna Beckstead; Chaplain, Isabel York; I. G., Marguerite Duvall; O. G. Ruth Sturgess; Color Bearer, Blanch Smyth; Pianist, Eva Cassell; R.S.N G., Marian Thompson; L.S.N.G., Joyce Cassell; R.S.V.G., Rose Clark; L.S.V.G., Carrie Utman; The D.D.G. M. Keith Schell and his staff, Harmony District 51, of Williamsburg Lodge, then installed the officers of Zeta 311 in a very capable manner. Following the installation the Social Committee served luncheon to 160 members and guests.

The guests present were from Cornwall, Cardinal, Prescott, Brinston, Williamsburg, Morrisburg and district.

EASY FOR EVERYONE— C.S.B. INVESTMENT OPPORTUNITY

The very fact that Canada Savings Bonds are going on sale this month for the eleventh consecutive year is surely sufficient reason for everyone —even youngsters with a modest income — to take advantage of this government-guaranteed investment". So says Ken G. MacLuckie, B of M manager at Morrisburg, who believ that this year's CSB's are the best bonds of their kind to date.

"First," says Mr. MacLuckie, "they are absolutely safe, because you can redeem them any time at full face value, plus interest.

"Second, at a yield of 3.76 percent, if held to maturity, they have the highest return of any savings bond to date.

"Third, they are the easiest to buy of all investments, because for just five per cent down - you can purchase a bond, and pay the balance in easy monthly instalments over a year Just $2.50 down for a $50 bond—and less than a dollar a week pays the balance".

Mr. MacLuckie is urging everyo ie in Morrisburg who may be considering this "investment opportunity of the year" to act without delay. He says you can buy CSB's without any fuss or bother. You just fill out a simple application form at his office make your five per cent down payment and the B of M does the rest

TOWNSHIP COUNCIL DEFENDS STAND ON MATTICE DRAIN

Editor the Morrisburg Leader:

Dear Sir—We the Council of the Township of Wliliamsburg would like to take the power of the free press to reply to a statement made by Mr. Frank Powell in the last issue of this paper. We feel that out of fairness to ourselves, Mr. L. P. Stidwell, our Engineer and the many fair-minded ratepayers affected by the Mattice Drain and other drains throughout our fair township, that such a distorted statement should not go unanswered.

It has always been the policy of this council and of many councils of this township to follow the rules and regulations of the Municipal Drainage Act in regard to Municipal drains Section 80 Sub-Section (1) of the Municipal Drainage Act, R.S.O. 1950 compels councils upon receipt of a request of any one property owner of an an established Municipal Drain to have an Engineer examine and make a report on the required maintenanre of the drain. In the case of the Mattice Drain, this section of the Act was carried out in its entirety.

Upon study of this report on the Mattice Drain, it was noticed that several of the ratepayers were wrong ly assessed, and in order to right that wrong, Council followed Section 75 Sub-Section (1) of the Municipal Drainage Act in regard to the variation of assessments on this drain.

In regard to Mr. Powell's statement of the digging of test holes and of two inches of silt to be taken from the drain, I would like to quote from the Engineer's report on this drain. (Calculations reveal that 7,160 yards of earth and 1,990 yards of hardpan will require removal) quite a difference in the estimates we would think. The ditch which Mr. Powell states cost him only $50.00 is dug through a clean field where there was no brush, while where the ditch crosses his property it is filled with brush; also the drain will be much deeper than the cross furrow that he dug.

In regard to the cost $6,673.00 for the maintenance of the ditch, I think that this figure should be clarified. This is an estimate of the cost of the drain. The tender accepted for the digginp of the drain was approximately $900.00 lower than the estimate and with the Provincial Government paying one-third of the total cost of the drain, the actual cost figure would be about $3,848.50, quite a difference between figures, wouldn't you think?

We trust that this reply will change the thinking of any person who might have taken the statement of Mr. Powell as it was.

Thank you, Mr. Editor, for the use of this space.

Reeve and Members of the Council of the Township of Williamsburg.

MODEL PLANE CLUB FORMED IN MORRISBURG

The Morrisburg Model Kings have been formed by Mr. McKenzie. The club teaches the basic fundamentals of aeronautics, with a stress on fair play and sportsmanship.

The president is Gary Gillespie; secretary, Clarence Bell; public relations officer, Richard Casselman and technical adviser, Mr. McKenzie.

Refreshments are served at each and every meeting, which takes place in the members' homes on Tuesday nights at 7.30. Flying takes place on each Sunday at 1.30 p.m. at the ball field. Anyone wishing information, please contact either the secretary or the public relations officer.

UNEXPECTEDLY IN UU. S. A. SETH WIKANDER DIES

Seth V. Wikander, 56 of 456 Catalpa Ave., Jersey City, died at his home on September 26th, of a heart attack.

Born in Jersey City, he had lived in that vicinity since 1919. Mr. Wikander was a construction superintendent with the John W. Ryan Construction Company of New York City.

He was a member of the Overlook Lodge, AF & AM of Summit, and of the Carpenters Union of Jersey City since 1920.

Surviving, are his wife, Blanche Wells Wikander, formerly of Morrisburg; two sons, Richard S. at home and John L. stationed with the U. S. Air Force at Honolulu; a daughter, Miss Bettina Wikander t home.

Funeral service was held at the A. M. Runyon & Son Home for Services at 900 Park Avenue.

Husbands! Wives! Weak, Run-down, Old?

Thousands of couples are weak, tired, lack energy and pep; they feel run-down, old because bodies lack iron at 40, 50, 60. Try Ostrex Tonic Tablets today. Supplies invigorator you, too, may need to revitalize, stimulate, energize and build-up entire body. Feel years younger. "Get-acquainted" size costs little. Or start with big, popular "Economy" size and save 75¢. At all druggists.

DIAL INSTALLATION STARTED HERE THIS WEEK

Installation of dial telephones in Morrisburg homes, offices an stores started this week, marking another step forward in the many-sided preparation for the eonversion o the telephone system to dial operation.

S. W. Major, Bell Telephone manager for this region, stressed that the dial instruments would not operate until the actual cutover, and that in the meantime subscribers should continue to use their magneto telephones in the usual manner.

Dial telephones are being installed in advance so that all Morrisburg residents will be able to use the new dial system immediately following the cutover.

This change to dial operation will take place next spring. At that time all telephone numbers here will be changed. Conforming with a continent-wide number system these numbers will consist of the exchange name "KIngsdale 3" and four figures.

Meanwhile, construction of the new dial office building is rapidly progressing and is expected to be completed by the end of the year. The extension of outside wire and cable is also making good progress.

WELL KNOWN DISTRICT MERCHANT PASSES IN SIXTY-FIFTH YEAR

A well known Brinston and district merchant, Ernest Styles, died suddenly following a brief illness last Friday at his home. He was 65.

Born and educated at Morrisburg, he was the son of the late Mr. and Mrs. George Styles. He farmed in that area until 15 years ago, when he came to Brinston to take over the ownership and operation of one of the village's two main stores.

Surviving him are his wife, the former Ada May Gallinger; a daughter, Mrs. Robert Stevenson, of Brinston and one grandchild.

Funeral service was held Monday from his late residence to Christ Anglican Church, Dixon's Corners. The Rev. Ralph Smith officiated. Burial was made in Spruce Haven cemetery

DAVID LEWIS TO ADDRESS CANADIAN CLUB NEXT WED.

The second meeting for the year of the Morrisburg and District Canadian Club, will be held at the Club room on Wednesday, October 17th at 6.30 p.m., Standard Time.

The speaker will be Mr. David Lewis of Toronto, annd his topic will be "Toward a Moral Social System"

Mr. Lewis is a lawyer and a partner of Mr. E. B. Joliffe, Q.C., former leader in Ontario of the CCF Party. He has been recommended to the club by one of the former spepakers of note, who contacted him for the club, as a speaker of considerable ability and an interesting evening may be anticipated.

Please show your signed cards to the men on duty at the top of the stairs in order to facilitate their duties and be be sure to obtain a dinner ticket from them as the ladies make their count from these tickets which they collect at the tables.

LIBRARY CORNER

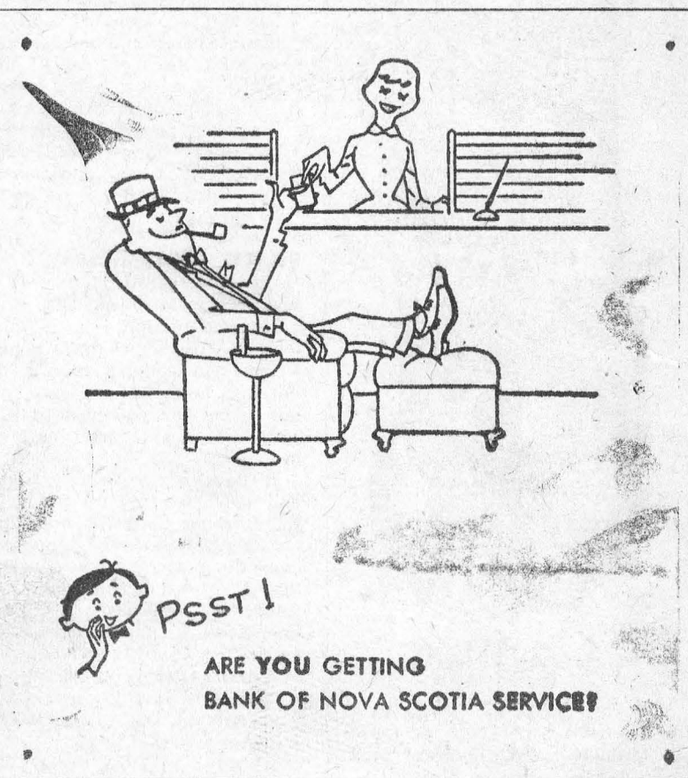
In the Travelling Library selection we have "The Phoenix Book of Badminton" by Eddy Cheong and Fred Brundle.

Novice and erpert will know badminton better by reading this book, written by an international champion and a good club player. It is both a history and a practical study of the game. Diagrams and photographs illustrate the main elements of style and everyone starting badminton will find here advice rich in experience, yet easy to understand.

HUNTERS URGED TO WEIGH IN BIG CATCHES

Duck Hunters, partridge hunters, and deer hunters are urged to not forget the contest being staged by the Morrisburg Fish and Game Protective Association. The annual contest for big ducks, grouse and deer is presently in full swing, and prizes will be awarded at the annual banquet expected to be held early in December.

There are classes for the biggest grouse, the biggest duck of any species, the biggest black duck, the biggest whistler duck, and the biggest deer.



THE HYDRO-ELECTRIC POWER COMMISSION OF ONTARIO

ST. LAWRENCE POWER PROJECT TOURS

FOR

RESIDENTS OF THE REHABILITATION AREA

Tours of the St. Lawrence Power Project for all interested parties living in the area affected by flooding, will be scheduled over the next few weeks on a district basis. Ontario Hydro is providing these educational tours for adults on Wednesday and Saturday afternoon.

Tours for High School Students are being conducted separately during this pepriod.

MORRISBURG AND DISTRICT RESIDENTS

Tours for residents of Morrisburg area will be held Wednesday, October 17th and Saturday, October 20th. On both afternoons, buses will pick up passeugers at the following locations:

COLONIAL COACH TERMINAL, CORNER OF HIGHWAYS NO 2 AND NO 31, 1.15 P.M.

Tours will include all work areas from Iroquois to Cornwall, and will be about three hours in length.

NOTE: Those wishing to take advantage of this opportunity to see the Power Project areea must telephone Morrisburg 546 on or before Tuesday, October 16th for Wednesday's tour or before October 19th for Saturday's tour.

Details regrading assembly points and depaprture times for the other communiiies and districts of the area, will be published as arrangements are comppleted.

Here is the Dial

You Will Be Using

In Morrisburg

NEXT SPRING

REMEMBER

If you have an EXTENSION TELEPHONE put in when our in staller calls to install your dial phone, he will put it in FREE OF CHARGE! The cost of an extra phone is only a dollar more per month. In colour, too, at slight additional cost.

By the time Morrinsburg is ready for dial service next spring, you'll be used to seeing this dial on your new telephone. Our men are on their rounds now, putting in the new sets and showing our customers how to dial.

Your new "Kingsdale 3" number will permit out-of-town operators in many areas to dial your number right from their switchboards —just as your operator will dial many long distance "2-letter 5-figure" numbers too. Eventually YOU will be able to dial distant "2-5" numbers from your home or office.

We know you'll like dial service — it's so fast and convenient. You'll find your telephone means more to you than ever before when you can dial.

S. W. MAJOR, Manager.

THE BELL TELEPHONE COMPANY OF CANADA

ANNE HIRST
Your Family Counselor

"Dear Anne Hirst: When my wife died three years ago, her parents offered to raise our little two-year-old boy, and I gladly consented. They have done a fine job with him, but now I am in a most uncomfortable predicament . . . I recently became engaged to a wonderful girl of 22, whom my wife knew, and we are planning to marry the first of the year. My parents-in-law, however, have violently and unexpectedly opposed the marriage, and for the first time in our affectionate relationship I am ill at ease.

"If we get married, shall we take the boy to live with us as, naturally, I want to do? Or shall I give up the girl and wait until I can find someone who pleases them, too? **TERRY"**

GO AHEAD

* You will have a hard time finding anybody who will please your wife's parents. It is not at all unusual that such a couple resent any girl taking their daughter's place; added to that, these two are naturally reluctant to give up their grandson. It is a two-way wrench that has caused much too much ill feeling in this world; revolving in their own small circle, they forget that life moves on and a good man is lonesome for a woman's companionship and for his son's. I hope you will go ahead with your plans.

* Your first consideration should be to see that your fiance and your boy get to know and like each other. Take him to visit her on week-end afternoons and plan engaging programs, so he will see her as part of them. She should do her best to win his confidence, and probably will succeed.

* As your parents-in-law see the child progressing happily in his new family life, I hope they will relax and accept her. This is the usual result in such a situation.

* * *

SHALL THEY MARRY?

"Dear Anne Hirst: I am a widower in my late 30's, with a young daughter. I have fallen in love with a girl of 20, whom I knew in college. She is divorcing her husband; we are not seeing each other until it is final, but I am sure she loves me.

"I have a comfortable home, and can give her the security she has not had. We are temperamentally attuned — in fact, everything seems so very right that I am wondering about the future! My marriage was not happy, so perhaps I am a bit fearful . . .

"I have read your column for a long time, and I would value your opinion. **ROGER"**

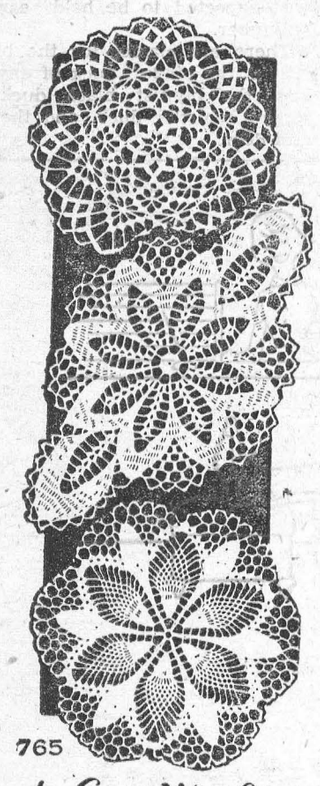
* Unless there is an obstacle to this marriage that you have not confided, I see no reason why you should not gladly go ahead with your plans.

* You and this girl both have had disillusioning experiences, which will make you appreciate each other all the more. She is fond of your little girl, and the child seems to welcome her friendship. If you are weighing the difference in your ages, to my mind they do not matter. You two are entirely compatible, with the same ideals and sensibilities, and your marriage should bring a serenity to three nice people.

* * *

In any troubled situation, consult Anne Hirst before you get too deeply involved. Her wide experience and warm sympathy are yours for the asking, and her counsel is safe to follow. Write her at Box 1, 123 Eighteenth Street, New Toronto, Ontario.

One-A-Day- Doilies



by Laura Wheeler

Thrifty! Easy! Takes less than a day to crochet each of these little doilies! Make them for your own home, for hostess gifts.

WHO NEEDS INTELLECT? — Her stay in New York "was an intellectual phase I went through," says Jayne Mansfield, who turns her back on the "egghead" life as she enters a sports car on the Hollywood, Calif., lot of the studio for which she works.

Magic Killed Him

Every day scores of human beings lose their lives by accident. Most accidents are due to commonplace causes but occasionally there are unusaul mishaps such as the Frenchman who dozed off in front of the fire. His wooden leg caught alight and he was fatally burned.

Consider the case of the man who was walking along with a bottle of acid in his pocket. Some boys were throwing stones and one hit the man's pocket. It didn't leave a mark on him, but it killed him. The bottle was broken, and the acid escaped and soaked into his body and in half an hour he was dead.

In Jamaica, a few month ago, a magician was performing at a social function. For one of his tricks he required the help of twelve strong men from the audience. He produced a rope which he placed round his neck and told six men to take one end of the rope while the other six took the other end.

At a given signal they were to start a tug o' war, with him in the middle. But something went wrong, the men pulled and the magician was strangled under the eyes of the horrified audience.

Not so long ago a man who wished to make a romantic conquest gave a girl some sweets which he had doctored with a love potion. The girl gave a piece to another girl. But the man had blundered, for instead of the love potion he had mistakenly used a powerful poison, and both girls died in agony.

QUEEN FOR A YEAR — Newly crowned Miss America of 1957 shows her regal trappings in Atlantic City. She's Marian Ann McKnight, who, unlike other beauty contest winners, does not plan to be an actress. Says the queen: "I think home life is more important than a movie career."

The SUNDAY SCHOOL LESSON

BY REV R BARCLAY WARREN BA BD

The Creation Story
Genesis 1: 1-5, 9-12, 26-28, 31

Memory Selection: And God saw everything that he had made, and, behold, it was very good. Genesis 1:31

For this last quarter of the year we have an unique series on thirteen of the great passages of the Bible ranging from Genesis to Revelation. Six of them are from the Old Testament and seven from the New Testament. Each has a unique message for Christian life and thought.

For this lesson we have the creation htory. A scientist once said, "There is no more possibility of the world being here as a result of chance than of Webster's Unabridged Dictionary resulting from an explosion in a printing plant." But from where did the world come? We read in Hebrews 11.3: "Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear." The Bible begins with the words, "In the beginning God." God was before matter.

When did God create the heavens and the earth? The Scriptures are indefinite as to the period of time covered by the first three verses. The Christian Century of March 3, 1954, contained a brief summary of an address in New Orleans by Dr. Edward McCrady, one of America's top nuclear physicists. We quote: "Science today is faced with the stark fact that creation occurred at a definite time, he said; studies in radioactivity measurements of time show that all the atoms of the universe suddenly came into being 5.07 billion years ago. Dr. McCrady expressed concern over the discovery that an atomic explosion does not just disperse or break up matter, but causes it to cease to exist." This estimate is in agreement with geological estimates.

Albert Einstein taught us that the fundamental units of matter are but pin points of energy — power. Whose power? The answer is in the Bible's first verse.

Man was the crowning work of God's creation. He did not evolve from a monkey. He was made in the image of God. The likeness is seen in the mental and moral features, such as reason, personality and free will. God is our Creator.

Modern Etiquette . . .

Q. Is it good form to state in an introduction, "I want to make you acquainted with, etc."?

A. This is considered very bad form, as is the other oft-used expression, "Shake hands with." It is much better to say, "Mr. Jones, Mr. Williams." or, "Mr. Jones, may I present Mr. Williams?"

Q. Should one always use the napkin before drinking from a glass of water at the dinner table?

A. Yes; this prevents any chance of leaving an unsightly smudge of food on the rim of the glass.

Q. What rules should be observed in typewritten social letters?

A. Single sheets of paper should be used, written on one side only. And your signature should always be written by hand.

CHRONICLES OF GINGER FARM
by Gwendoline P. Clarke

My goodness, our two wee grandsons have been here quite a bit lately — and I haven't said a word about them. Isn't that almost unbelievable — coming from a grandmother? Edward is only one week short of four months old and he is the happiest, most contented little fellow I ever knew. And that is not just the view of a doting grandmother. Many other people have said the same thing. Even his mother says he is easier to look after than Dave ever was in his baby days. David, of course, is no longer a baby. He is quite the little boy and very proud of his "brudder." Dee was quite worried before the baby arrived in case David might be jealous. But there isn't a sign of it, possibly because his parents have always been careful to give Dave a sense of possession — Edward is David's baby as well as mummy's; David's brother and David is given the privilege of helping to carry the cot or carriage into the house and to run around and get this and that for baby brother. So it is all working out very nicely and everybody is happy. It is very nice to have two little boys come to visit instead of one. One is better than none at all but an only child needs so much careful training if he is to grow up unselfish and unspoilt.

Well, I suppose there has been plenty of complaining about the unseasonably cold, wet weather. Yesterday was miserable and as Partner and I drove along No. 6 Highway and across country we noticed smoke coming from a good many chimneys, including the farmhouse belonging to friends in the Hespeler district whom we were visiting for the first time for over a year. That smoke curling upward from the chimney was a very welcome sign. The house was as warm as the welcome we received. This farm as one of the few where the grain harvest had been completed but of course there is still the silo to fill. I don't think I ever as in a country garden where there were so many beautiful flowers — almost every kind you could think of — annuals, perennials, shrubs — all with a profusion of bloom. The women-folk in that family certainly have a green thumb — but how they ever keep up with the work I don't know. It grieved me to look around and think that so much of "the glory of the garden" will soon be lost — it will take only one killing frost to do it.

While the women of the party were admiring gardens, turkeys, dogs and new-born calves the men were "walking" the farm — over the ravine and through the bush and the back fields, discussing the merits and disadvantages of the farm as a whole — as farmers always do when they get together.

Here, at Ginger Farm, there was a little extra activity this morning. The stock truck came in to take a cow and calf to market. Partner was anticipating a little trouble in loading the cow. But he needn't have worried. Livestock truckers are better equipped to deal with perverse animals than they used to be. A ramp with sides is lowered from the back of the truck to fit inside the stable door and the cattle, with a little persuasion from the rear, have no option but to walk into the truck. There is no excuse these days for livestock to arrive at the stockyards bruised and beaten. Thank goodness we have finally reached the stage when care is usually exercised so that our dumb animals are not subjected to needless suffering. Years ago I used to dread seeing a drover drive into the yard. I remember one drover Partner refused to do business with at all. He was excellent at selling but terribly rough with the cattle. We preferred a man — maybe not quite so smart but certainly more humane.

Our next worry will be selling the old hens — and that will be another story. Always, as soon as the first hen is caught the birds get scared and fly all over the place. Maybe the time will come when a specially wired in truck will be invented so that hens like cattle, could just be driven into the truck. I can't see any reason why some such contrivance couldn't be invented — with movable partitions for use in going from one call to another.

Partner is very busy these days rounding up useless wood lying around the place, such as neckyokes and whiffle-trees. They make excellent fuel for the fireplace. Of course the end pieces are salvaged for scrap iron. Like all other farm folk we have an awful accumulation of stuff, saved because "it might come in handy sometime." But after all what is the use of horse-drawn equipment after the the team is gone? Partner gave all his harness away a few years ago but there is still plenty of other stuff around — enough to keep the fireplace going for quite awhile.

Coating the inside of silver salt shakers with clear nail polish prevents tarnish and corrosion caused by the salt. When the polish is dry, prick the holes with a pin to allow the salt to flow freely.

Jane Ashley Says

"Corn Starch Makes Tastier Entrées"

BEEF PATTIES WITH ONION SAUCE

¼ cup MAZOLA Salad Oil
3 cups peeled, sliced onions
2 bouillon cubes
2 cups boiling water
2 tablespoons BENSON'S or CANADA Corn Starch
¼ cup cold water
¼ teaspoon salt
⅛ teaspoon pepper
1 pound minced beef
¾ teaspoon salt
⅛ teaspoon pepper

HEAT MAZOLA in deep frying pan.
ADD onions; cook over medium heat until deep brown, stirring well.
DISSOLVE bouillon cubes in boiling water; add slowly to browned onions.
MIX BENSON'S or CANADA Corn Starch with cold water; stir into onion mixture.
COOK until clear and thick, stirring constantly.
ADD salt and pepper; cover and keep hot.
COMBINE minced beef, salt and pepper.
SHAPE into six thick patties; pan fry or broil.
ARRANGE on platter; pour sauce over patties and serve immediately.
YIELD: 6 servings.

Automation Began Centuries Ago

There's nothing new! Wonder of the twentieth century, automation, first appeared in Britain nearly 200 years ago, when a man named Arkwright brought automation into the cotton industry and proved it would work for the good of everyone.

Arkwright, who started life as a barber, was run out of Preston by the guilds for cutting his price. For thirty years he lived on the edge of starvation, cutting hair, making wigs and doing odd jobs. His wife died of malnutrition and his children never wore boots.

His second wife had a bank balance, but they squandered it between them. And by the time he was middle-aged he had only one suit and that was so shabby that he never went out until it was dark.

He developed an idea for a spinning jenny — a machine that would spin carded cotton — and took it to a Preston philanthropist named Smalley. Smalley thought it was worth developing and paid Arkwright a weekly wage while he worked on the model.

In 1769 it was put on the market. Five years later Arkwright was wealthy but the most detested man in Lancashire.

Then he invented a machine that handled raw thread at one end and gave out woven thread at the other. This made him so famous and so powerful that he was able to persuade Parliament to remove the excessive tax on cotton.

The workers, however, could see nothing but poverty ahead of them. His machines cut down manpower by over one half. They threatened his life. So Arkwright fearlessly met them and promised that, if only they would be patient, there would be work for all of them, far more than they could cope with.

They didn't believe him. They threw stones at him, broke the windows of his home and even tried to smash his machines.

Arkwright was right and the workers were wrong. The tax relief made cotton goods cheaper, the new machines turned it out faster than ever before. Orders rolled in from all parts of the world — orders so huge that, without his machines, the industry could not have coped with them. Factories doubled and trebled their staffs, and Lancashire rode on the crest of the wave.

Ten years after inventing his spinning jenny Arkwright owned a string of mills in Chorley. Then a distastrous fire destroyed them all. A few years eariler such a catastrophe would have thrown hundreds of workers on the scrap heap for years, but the other mills were able to absorb them, while Arkwright still had sufficient money to build more mills at Nottingham and bring prosperity to that city too.

Before he died he was employing 5,000 people who, for the first time in their lives, knew the comfort of regular employment.

"My wife says that if I die she will remain a widow."

"She must think there's not another man like you."

"No. She's afraid there is."

CAN'T TOTEM — These kids couldn't budge 'em, no matter how hard they tried. Totems which make up this Alaska-style totem pole were carved on the spot. It brings good luck to a novelty shop proprietor, who finds it lures camera-toting tourists.

DOUBLE PLAY BALL — Bill Virdon of the Pirates is out at second as Junior Gilliam throws to first base to complete the double play in the first inning of the Brooklyn-Pirate game in Pittsburgh.

Candles And Honey Go Together

Usually a business goes from father or mother to son. In the case of John and Beatrice Ross, Proprietors of the Ross Candle House on Bearskin Neck, in Massachusetts, the parents are following a path blazed by their son — a path lined with beehives, and flowing not with milk and honey, but with beeswax and honey.

When the Rosses' son, Robert, was about 12, he went from their home in Lawrence, Mass., to North Andover on frequent visits to an uncle and there became interested in bees. He had hives in the orchard at his uncle's home where the bees had an abundance of fruit blossoms from which to make their honey. Later, he started hives at home in Lawrence and at the home of another uncle in Derry, N.H., where he spent some of his summers.

He extracted the honey and his mother sought ways to use the fragrant beeswax. She experimented with candlemaking and, one at a time, made 32 for disply at the Topsfield (Mass.) Fair. She worked till 3 o'clock in the morning to finish the lot before entering them in the fair. Her reward was first prize.

The trick in making hand-dipped candles is to get them smooth and perfectly shaped without "wrinkles" in them, Mrs. Ross explained.

At one time Robert had 300 hives in various places, including a summer camp where the family spent vacations. Beeswax accumulated and Mrs. Ross continued her candlemaking. She worked out a way of making two at a time, then three, and finally four. She exhibited at the Topsfield Fair gaain and again and began selling candles there and gathering in blue ribbons like a honey crop each season.

Then Mr. Ross devised for her a "machine" at which she can make 16 candles in an hour. "See Beeswax Candles Being Made Here" reads a sign in the window of the Ross Candle Shop which Mr. and Mrs. Ross are now operating for the second summer. On Saturdays when the largest number of visitors stroll along Bearskin Neck, lingering over the displays in the quaint little shops that hug either side of the lane, the Candle House will be crowded with eager watchers.

Mrs. Ross works over an electrically heated double boiler which Mr. Ross rigged up for her. Above it on a metal rod which extends up from it, there are supporting metal crossbars. On each end of these there is a strip of wood to which four candlewicks of equal length are tied, each with a small weight at the bottom. The crossbars turn on the center rod.

As one set of strings comes up from the liquid wax, drips, and dries, the bars are turned so the next four can go down. By the time the rods revolve so the first set of strings get another turn, the wax on these has dried sufficiently for the next dippping.

Thus the candles are made by the hand-dipping process with the aid of Mr. Ross' little device which multiplies the hourly production from one to 16. Each candle is dipped and dripped 50 times before it is completed.

The Rosses sell other candles as well as their own beeswax ones. Those of wax have the special virtue of standing without melting, through any kind of summer heat.

Mr. and Mrs. Ross also sell extracted wlidflower honey and honey spread, as well as comb honey, wtih various accessories for both honey and candles — attractive honey pots, candle holders, snuffers, and so forth. Brass is a perfect holder for the natural beeswax candle, says Mrs. Ross, because of the beautiful blending of the natural colors.

Mr. Ross and his son set up a solar extractor at their home in Lawrence to take the honey from the comb and melt the wax. In the melting process any dirt in the wax drops to the bottom, leaving the clear wax above. The capping wax with which the bees cap each cell of their comb is especially desirable and makes a candle of a richer nd unusual shade. The wax is, of course, merelted as it is needed for the candlemaking. (By Jessie Ash Arndt in the Christian Science Monitor.)

DISCOVERS HOME SKIN REMEDY

This clean stainless antiseptic known all over Canada as MOONE'S EMERALD OIL, brings sufferers prompt and effective relief from the itching distress of many skin troubles—Itching Eczema—Itching Scalp—Itching Toes and Feet, etc.

MOONE'S EMERALD OIL is pleasant to use and it is so antiseptic and penetrating that many old stubborn cases of long standing have yielded to its influence.

MOONE'S EMERALD OIL is sold by druggists everywhere. A real discovery for thousands who have found blessed relief.

Tools Of The Trade

Crippled by an incurable disease a clever crook devised a series of brilliant crimes and fashioned the keys which made them possible. Sentenced to three years' imprisonment recently he heard his fate impassively and then bequeathed his collection of instruments to Scotland Yard's Black Museum.

This museum contains a unique and weird collection of exhibits linked with violent crimes of the past.

The folding ladder used by Charles Peace for his burglaries and the concertina case he hid it in; knives and daggers used in various crimes; false arms and legs used in disguises; the hat and gloves belonging to Crippen and the boy's clothes worn by Ethel Le Neve when she fled with him to Canada—they are all there.

Among "tools of the trade" are assorted safebreakers' instruments, jemmies and keys. Other implements include hammers and saws and the mallet which Rouse used on an unknown man whose remains were found in a burned-out car.

But Scotland Yard is not the only police headquarters to have a crime museum. The Paris police also have an odd collection of curios. Here are queer-looking revolvers and knives and apparently harmless cane which contain a sword or stilletto designed to come free at a wrench.

Other walking sticks are merely disguised guns or contraptions from which hidden blades shoot out at the touch of a secret button.

Among all these grim weapons is a woman's stocking, a dainty thing but with one peculiarity: it has no toe. It was used by an enterprising French womas shoplifter.

Having selected an article, she dropped it on the floor, then, her movements screened by a long skirt, she slipped her foot out of her shoe, picked up the article with her toes and transferred it to a large pocket in her skirt!

There's an easy way and a messy way of painting a chair. You've probably been caught by the messy way — painting the outside of the legs and rungs first, then having to reach through to paint the inside parts. The easy way is this: Turn the chair upside down on a table and paint the underneath parts first. Put it back on its feet, then finish the legs. Next do the back. When you leave the top of the seat until the last, you can steady the chair while dabbing into difficult corners.

YOU CAN DEPEND ON

When kidneys fail to remove excess acids and wastes, backache, tired feeling, disturbed rest often follow. Dodd's Kidney Pills stimulate kidneys to normal duty. You feel better—sleep better, work better. Get Dodd's at any drug store. You can depend on Dodd's.

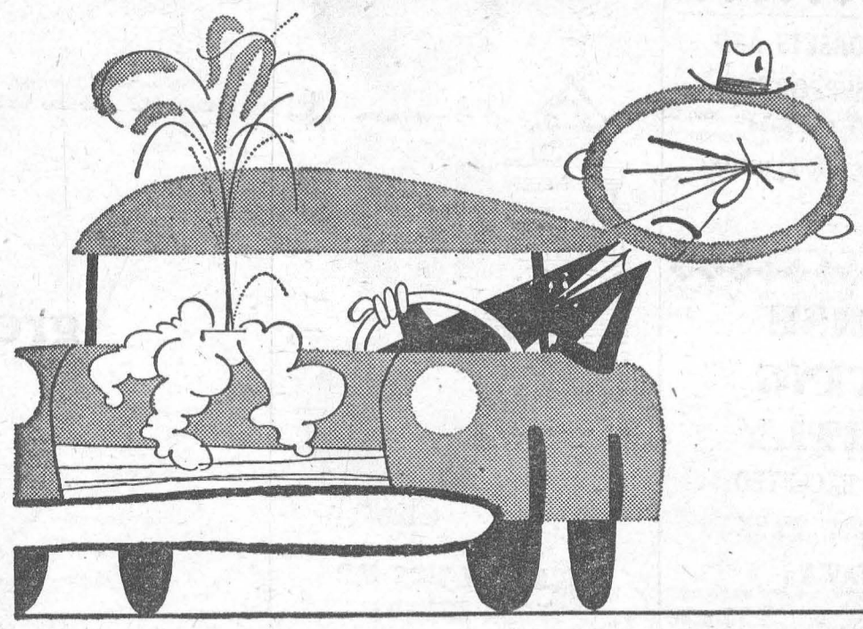
Don't stick Your neck out!



Insist on the anti-freeze that takes over where others stop

PRESTONE
BRAND ANTI-FREEZE

If you want your car to run smoothly and economically this winter, the cooling system has to work efficiently. Freeze-up protection is less than half the battle. Almost any anti-freeze prevents freezing—but "Prestone" Anti-Freeze guards against foaming, rust, clogging, ruinous corrosion—and will end overheating hazards which help cause low gas mileage and excessive piston wear.

So don't believe it if you hear that all anti-freezes are the same. Don't stick your neck way out. "Prestone" Brand Anti-Freeze with Polar Film gives you freeze-up protection PLUS . . . the cooling system conditioning you must have to keep your engine running smooth and easy all winter long.

Insist on "Prestone" Anti-Freeze! Look for the 'Green Tag' attached to the radiator, your assurance that "Prestone" Brand Anti-Freeze has been installed.

"Prestone," "Eveready" and "Prime" are registered trade marks.

Looking Ahead

WITH

JOHN A. D. ALGUIRE

Confidence is a great quality. Never before has it been so necessary to have confidence in ourselves, in our country, in our friends, in our jobs, in our future. Lose confidence and life becomes complicated and hopeless. Yet when it comes to planning one's future, confidence alone is not enough. We must also have foresight. Foresight to provide against the emergencies of life, against old age and the time when we shall no longer be able to earn our keep. Confidence in the future comes much more easily when we know that future is provided for. And of course the one way to provide for it is by means of life assurance. Life assurance today offers guaranteed future protection and security to more than sixty-five million citizens of North America. Take care of YOUR future too, by becoming a policyholder of the Sun Life of Canada.

For advice on all matters connected with life assurance consult:

MOSTLY WAGES

STEEL PRICES are not simply the aggregate of costs in a steel mill. Others also get paid, including those who work in iron mines, coal mines, limestone suarries, on railways, steamships, motor trucks, in sales offices, and elsewhere. In fact, all prices are mostly wages and salaries.

So there is an upward pressure on prices with every increase in wages, though investment in better equipment does help to absorb such wage increases.

No one can afford to be indifferent to rising industrial wage costs, for these tend to lead to higher prices. As users of steel in many forms, all farmers in particular are adversely affected when higher city wages raise production costs and selling prices.

COMING SOON:— THE ROSE TATOO (ADULT ENTERTAINMENT) and THAT CERTAIN FEELING.

WHAT PRICE ONE EGG?

Ever divide your production costs by the number of eggs produced? It's the price *you* pay to get one egg. Cut those costs with balanced feeding. Follow the XL (EXCEL) feeding programme—for economical egg production. Better feed means higher egg production—lower costs per dozen eggs. And the lower the costs, the greater *your* profits!

Cut Your Costs with XL (EXCEL)

Make your layers pay. Your birds need the added essential nutrients in XL (EXCEL) feeds—the proteins, minerals, vitamins. Cut your costs this way:—

Have us mix — 3 bags your grain—
1 Bag XL (EXCEL) 32% Egg Producer Concentrate.
or 4 bags your grain—
1 Bag XL (EXCEL) 35% Laying Concentrate.

Then—watch egg production go up and costs go down!
If you haven't your own grain—feed XL (EXCEL) Laying Mash.

XL EXCEL FEED SERVICE

BOUCK'S HILL FEEDS

We have a full line of XL Feeds, Mill Feeds and Fertilizers.

We are agents for Allis-Chalmers Tractors and Farm Machinery

Custom Grinding, Rolling and Mixing.

Do you need a

NEW TRACTOR?

If you need a new tractor on your farm, but haven't the ready cash to buy one ... FIL may be the answer to your need.

A B of M Farm Improvement Loan can put you at the wheel of the latest model very quickly. And there's nothing that saves money, time and work on a farm quite so much as a modern tractor.

If your proposition is sound, you can get a B of M Farm Improvement Loan for any type of equipment you need on your farm. Why not talk to your nearest B of M manager? He'll gladly show you how a Farm Improvement Loan can help you in your operations ... and how little it costs.

"MY BANK" TO 2 MILLION CANADIANS B of M

FIL — the fixer ... his full name is Farm Improvement Loan. Give him a chance to help fix up *your* farm ... he's economical, convenient, versatile. He can do almost anything in making *your* farm a better farm.

Beware Of The Short-Change Artists

By Irving Leiberman

Editor's Note: Sgt. Audley Walsh, one of the leading police authorities on swindles, estimates that professional short-changers gyp the public out of a hundred million dollars a year.

And it happens to everybody. To show how these cheap swindlers cheat the public, the Police Gazette has asked four typical victims to tell their own stories. Continued exposure of these shortchange swindlers will stop them from preying on unsuspecting victims.

* * *

I'm a truck driver and there's an all-night diner where I stop for a spot of coffee and doughnuts on my run between Chicago and Indianapolis. That is—where I used to stop, until I got wise to the shortchange gypping the little redheaded waitress was pulling off on all us guys.

She's a wisecracking gal, always ready with a joke, and she gives you that big smile and a lot of fast talk when you're getting your change.

Then one night, just before I got in my trailer, I just sort of happened to look at the change she had given me and did some quick figurin'. Two cups of coffee and two doughnuts added up to thirty cents. I'd given her a buck and got forty cents back, all in dimes and nickels.

"Hey," I said to myself, "I got thirty cents coming to me."

I started to go back, but I figured I'd look cheap and besides, I could be wrong.

But the next time I stopped at the diner that missing change stuck in my mind. When the waitress pulled the jokes while I was paying my check, I stopped to count the money I got back before I stuffed it in my pocket.

This time I was missing two-bits.

"Just a minute, Venus," I told her, "you shortchanged me a quarter."

She made a big fuss about looking at my check and recounting my change.

"Sorry, Mac," she said, flashing that big smile and handed me the two-bits, 'those big, brown eyes of yours take my mind off my business."

"Sure, sure," I says, 'but it's a pretty good business—for you."

I passed the word on to the other drivers I knew and they started checking their change. The redhead was working the same gyp on all of them.

So now we stop at another diner down the road where the waitress is honest and doesn't think a guy is dumb just because he drives a truck.

* * *

I'm a business man living in a small town a hundred miles from San Francisco. About once a month I go into the city to spend a day or two in the home office of my company.

One night after a late conference I took a cab to my hotel. It wasn't a long walk, but I was tired. When we got to the hotel, the meter read thirty-five cents, so I handed the cabbie two quarters and got out.

"Hey, mister," he hollered. "You owe me some money."

"I gave you half a buck."

He shook his head. "Here's what you gave me." The cabbie held out his hand. In it was a quarter and a nickel.

I was positive I had given him two quarters but I was tired and didn't want to argue. So I handed him another twenty-five cents.

The next night I took another cab after having dinner with friends. The fare was sixty cents. Remembering the night before, I counted my change carefully and handed the cabbie three quarters.

I had walked about ten feet toward the hotel when he hollered:

"What's the idea, buddy? You shortchanged me."

"I gave you seventy-five cents—sixty cents for the fare and fifteen cents tip."

"You made a mistake. Take a look."

He had two quarters and a nickel in his hand.

This time I got mad. "I made sure I gave you three quarters," I told the cabbie. "And that's what I gave you. Don't pull your racket on me."

He scrambled out of the cab and headed for me belligerently. "Don't call me a crook, you — — —."

I called a cop nearby and explained what had happened. He nodded as I filled in the details.

"It's an old one the hackies pull on tourists," he said. "I'll take care of this guy and thanks for telling me. This guy won't be driving hack for awhile."

The officer ordered the cabbie to get back in the car. "Come on, bud," he said angrily, "we're going down to the station house."

* * *

I work on the docks on New York City's East River and there's a bar where longshoremen hang out after wrestling tons of cargo all day.

The bartender's name is Harry. He's not working at the bar now and here's how it happened.

On payday we'd throw five, ten or twenty dollar bills at Harry to pay our tab. While we picked up the silver, Harry neatly stacked the bills and counted them twice. Then he handed the change across the bar.

What we didn't know for a long time was that when Harry tapped the bills on their edges to make the stack neat, he let the back bill drop behind the bar.

Harry let the bill stay on the floor until the customer left. If the guy noticed he was short a five or ten, Harry would pick it up off the floor and say:

"I'm sure gettin' clumsy in my old age. Sorry, Mac."

We tipped off the racket squad and they used marked bills to catch Harry. When they counted up the bills he had dropped back of the bar and later picked up. Harry had made $200 in three hours working what the cops call "The Drop Racket."

* * *

Best way to beat the short-change gyp according to police experts is: know the denomination of the bill you hand out for payment; re-count your silver and paper money before you leave the scene; never accept neatly folded bills without re-checking the amount.

If you are sure that you have been shortchanged and you are refused the correct amount, say that you are going to call a policeman. If you're dealing with a crook, he'll probably fork over your right change in a hurry.

From "The Police Gazette."

TOPPER OF THE TAILS—Inspired by the fur hats of Mongolian warriors is this cap of mink tails. A tassel of strung pearls cascades from the crown over the brow. The hat is typical of the Far Eastern motif in the winter collection of designer Simone Mirman, of London, England.

SCORCHED SKI-JUMPERS — Skiing was a mighty hot activity for Tom Spencer, above. At the first Western Ski-Jumping Championships at Mt. Baldy, competitors donned shorts and doffed shirts to withstand the torrid 102-degree heat. Coolly clad Spencer soared 64 feet in this particular jump to win the class A title.

TABLE TALKS

by Jane Andrews

"Until I was a grown woman and a grandmother, I never saw a cake that had less than four layers," a great-grandmother from the South told me recently. "In my father's home several cakes were baker every Saturday, since we had a great deal of week-end company. Every one of them had four layers."

This woman went on to describe the large colonial home in which she grew up and the kitchen which smelled so deliciously of coconut, chocolate, caramel, nuts, and baking cakes on Saturdays.

* * *

"The kitchen, which had once been across the yard from the house, as the kitchens of many Southern homes were, had been moved close to the house and was connected to it by a porch which ran along the side of the kitchen and pantry. Servants who felt they belonged to the family reigned supreme in the kitchen. One old man who had served the family for countless years, sat by the stove and fed it wood just at the right time to keep the temperature even for cake baking. Once the batter was in the oven, he never allowed us children to come near for fear a jolt would make the cakes fall."

* * *

As the girls in the family grew into young ladies, they were taught cake baking and frosting along with several other parts of the culinary art considered necessary to their education.

"Each week my sisters and I would have what was to us an exciting time deciding who should make what kind of cake," this woman told me. "My special favorite was chocolate cake with icing. One sister liked coconut, especially if we had fresh coconuts to shred and use; another sister was especially partial to hickory nut cakes and would start the night before, getting us all to crack and pick out the kernels so that she could mix them in a white cake batter. The unbroken kernels were saved for cake decoration," states a writer in The Christian Science Monitor.

* * *

When the four or five cakes were finished and arranged on the pantry shelf reserved for them, this woman and her sisters would stand back and admire their products much as an artist might look at his paintings, she said. Then, when the cakes were cut and served, their parents and friends would pass judgment on the lightness, the thickness of the icing, and the taste — and pride fo accomplishment would rise high!

* * *

A nut cake, baked in a fruit cake pan and made in this woman's home at the time she describes, was one favorite. Here is the recipe:

PECAN CAKE

½ pound butter
2 cups sugar
2 cups flour
6 eggs
½ cup fruit juice
¼ teaspoon salt
1 quart broken pecan meats
1½ pounds raisins
1 teaspoon nutmeg

Roll nuts and raisins in flour. Cream butter and sugar. Add eggs slowly one at a time, beating well after each addition. Add sifted flour and all other ingredients. Bake in 325°F. oven.

* * *

Times have changed in many ways since the days described above, but cake baking is still a time of sweet-smelling kitchens and creative opportunity for decorating favorite cases.

Here is a chocolate cake iced with peppermint and decorated with peppermint candy.

DEEP DARK CHOCOLATE CAKE

2 cups sifted cake flour
¾ teaspoon salt
4 squares unsweetened chocolate
¼ cup butter
2 cups sugar
2 egg yolks, unbeaten
1¾ cups milk
1 teaspoon vanilla
1 teaspoon soda

Sift flour once, measure, add salt, and sift again. Melt chocolate and shortening together over hot water. Turn into mixing bowl and cool to room temperature (this is important). Then add sugar and mix well. Add egg yolks and 1 cup of the milk; blend. Add flour and mix just until all flour is dampened. Then beat I minute at low speed of electric mixer or about 150 strokes by hand. Add vanilla and ½ cup more of the milk; mix until smooth. Dissolve soda in the remaining ¼ cup milk. Stir into batter quickly and thoroughly. (Batter will be thin.)

Pour batter into 2 round 9-inch pans, 1½ inches deep, which have been lined on bottom with paper. Bake at 350°F. 30 minutes or until cake springs back when touched lightly. Cake also may be baked in a 13x9x2 pan about 45 minutes.

Note: This cake may be mixed completely in a 2-quart double boiler. Melt chocolate and shortening in a double boiler and cool to room tetmperature. Proceed with mixing as directed above, using double boiler instead of a bowl. Bake as directed above.

Cool cake before frosting.

* * *

FLUFFY PEPPERMINT FROSTING

2 egg whites, unbeaten
1½ cups sugar
Dash of salt
⅓ cup water
2 teaspoons light corn syrup
¼ teaspoon peppermint extract
peppermint candies

Combine first 5 ingredients in top of double boiler. Beat about 1 minute or until thoroughly mixed. Then place over boiling water and beat constantly with sturdy egg beater (or at high speed of electric beater) 7 minutes, or until frosting will stand in stiff peaks. (Stir frosting up from bottom and sides of pan occasionally with rubber spatula or spoon.)

Remove from boiling water, pour at once into large bowl, add peppermint extract and beat 1 minute, or until thick enough to spread. Decorate with candy.

Making Homework Less Painful

Parents can't do a child's studying for him — but they can help. One important contribution they can make to the success of the school year is in arranging an ideal place for a boy or girl to do his homework.

The bedroom is the best spot since it is away from the distraction of family activities. But bedrooms are seldom bright and cheerful enough for study purposes and redecorating is usually called for.

Because most homework must be done at night, the prime consideration when decorating a bedroom study is light reflection, according to Wilfred Sinclair, C-I-L color consultant.

The ceiling should receive careful attention since it is the chief reflecting surface for artificial light. Paint it white, light ivory, cream beige or lemon yellow, the colors which toss back the most light, Mr. Sinclair suggests.

In choosing colors for walls, take into consideration the size of the room and the direction it faces. If windows are on the north or east, warmth will be added by using paint in yellow or reddish hues. If the room has a southern or western exposure, the cooler blues and greens are more suitable. Incidentally, those blues and greens make a small room appear larger.

A high gloss on a painted wall tends to reflect a harsh light, so flat paint with a velvety surface or easily-washed semi-gloss enamel is best for a study room.

The best color scheme in the world, however, won't save a child's eyesight if the lighting itself is inadequate. The lamp used for studying should have a large enough bulb and the desk should be low enough—or the chair high enough—so that little Johnny's nose isn't skimming the page of his book.

Well-designed desks are available in unfinished furniture departments of Canadian stores and can easily be painted to suit the decor of the bedroom. Even an old kitchen table might be used, disguised with a fresh coat of paint.

Pleasant study surroundings aren't guaranteed to produce straight A's on a report card. But they're worth a try.

Modern Beauties Have It Easy

Some of us are skeptical when we read the label on a jar of face cream or a tube of toothpaste. In this age of science we aren't to be taken in by old wives' remedies or cure-all concoctions based on nothing more solid than superstition.

But the fact is, beauty care today is on a scientific basis. Once a laboratory develops and tests a promising formula, living models try to prove its worth. Medical records are kept. Then it goes to the government, whose high standards must be met before the product sees a drug-store shelf. Ingredients are checked to be sure they are harmless and will achieve the reults claimed. It may take years for that little jar of cream to reach you, but when it does you may be sure it can do what it says it can—if you use it properly.

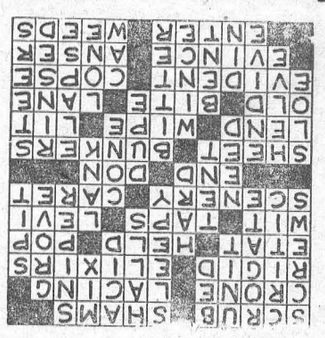
Helping Mother Nature is a big business today. Chemistry, medicine and industry all have a hand in it.

Those women who complain about the time and trouble it takes to apply modern beauty-aids should try this special concoction which was popular in the days of Marie Antoinette: Pulverize the wings and claws of a pigeon and mix well with lily petals and fresh eggs, add ground Mother-of-pearl and camphor distilled with musk. Apply liberally.

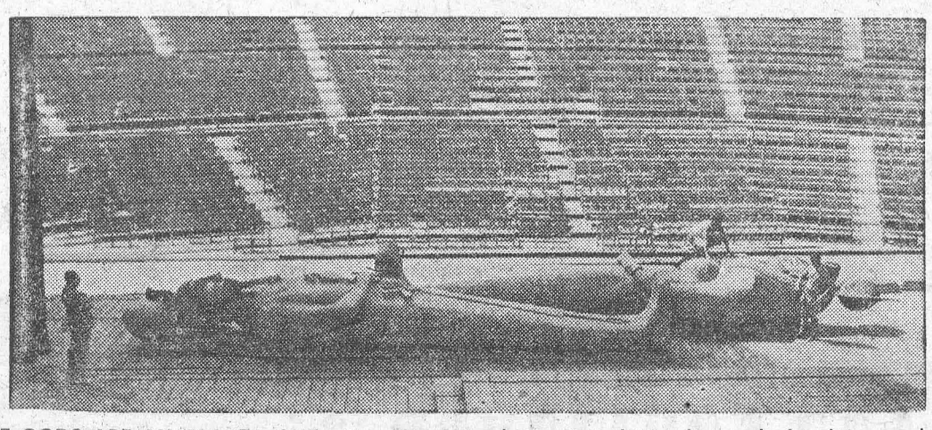
Today, we have public opinion behind us in our quest for glamor. In 18th century England, a touch of rouge could have sent us to jail! An incredible statute was passed by Parliament, reading in part: "All women of whatsoever rank or degree that shall seduce or betray into matrimony any of his majesty's subjects by scents, paints, cosmetic washes, artificial teeth, false hair, Spanish wool, iron stays, hoops, high-heeled shoes and bolstered hips, shall incur the penalty of the law in force against witchcraft and like demeanors, and the marriage upon conviction shall stand null and void."

Science has made it easy for us to look our best. A chemist with a formula has screened us from the danger of sunburn. Another has released us from the shackles of the overhead permanent-wave machine. Synthetic detergents have given us shampoos which leave hair clean and shiny in the hardest water. Our natural beauty has a valuable partner in the

Upsidedown to Prevent Peeking



OFFICIAL'S TIME OUT — President Eisenhower downs a soft drink during a time out from shaking hands and greeting guests.



THE GODS ARE ALL PLAYED OUT — Two giant-sized Egyptian deities lie ready for dis-assembling on a stage at the famed Caracalla Baths in Rome, Italy. The open-air opera season had just ended, and the statues are to be returned to the dusty warehouse whence they came. The ancient gods were seen in the opera "Aida", by Verdi.

"What A Funny Way To Die"

Some 18,800 feet up on the desolate Barun glacier in the Himalayas was the camp of the New Zealand Alpine Club's 1954 expedition, a solitary speck in a vast snow waste of peaks. Jim McFarlane and Brian Wilkins had been out surveying. Sir Edmund Hillary, 1953 conqueror of Everest, crawled out of his tent, searched the glacier for them, but saw nothing.

He'd told them to get back early, but now the afternoon was nearly gone, the weather was dull and gloomy. What could they be doing? At 5.30 Wilkins staggered back alone, his face covered with blood.

"Where's Jim?" Hillary asked.

"We fell down a crevasse. I got out, but Jim is still down there." They were nearing a crest on the glacier, he explained, when they stepped on a thin crust of snow and plunged into deep, loose snow, 60 feet down in the narrow bottom of a crevasse.

His snow glasses had cut his forehead and he had trouble keeping the blood out of his eyes. McFarlane had difficulty in moving at all, and would need help.

Wilkins had worked his way along the crevasse, wriggling through small ice passages, scrambling along a snowy ledge, cutting steps in the walls, and at last, after two hours' nerve-racking work, managed to claw his way to the surface.

Realizing that the hole in the glacier had to be found before darkness fell, Hillary bundled together ropes, food, water and two sleeping bags and set out with five Sherpas. It was almost dark when he found the hole, wriggled slowly over to it on his stomach, and shouted: "Hello, Jim!"

McFarlane called back faintly. He thought he'd broken a finger, and felt thirsty. Hillary lowered a rope, but McFarlane didn't seem able to get it. So he decided to have himself lowered on two ropes and tie McFarlane to one. The Sherpas could haul them up in turn.

Sir Edmund describes the ensuing ordeal in an epic chronicle of high endeavour, "East of Everest." As he dropped into the hole he realized that he had mistakenly tied the ropes round his waist instead of round his thighs. The rope was crushing his chest and restricting his breathing.

Slowly, in a series of heavy jerks, the Sherpas lowered him until he could touch one of the walls, then for some reason they stopped, leaving him hanging, gasping like a fish. Twisting frantically to ease the strain, he knew he couldn't last for long like that and began thinking: "What a funny way to die."

As the Sherpas still ignored his shouts to lower him farther, he called out for them to pull him up. He gained height as the Sherpas pulled with all their strength, then jammed under the crevasse's overhanging lip, the rope, cutting into the edge, holding him immovably

Tugging like madmen, they tried to wrench him free. He could feel his ribs bending under the rope pressure, and a sharp pain in his side. The smooth, slippery ice gave no purchase to his clawing hands, but he managed to get an arm over the top, then his other elbow, and they pulled him out "like a cork from a bottle."

When he had recovered he shouted down: "We may have to leave you down there for the night, Jim. If we lower down a couple of sleeping bags do you think you will be all right?" McFarlane replied weakly, yes, so the bags were lowered. This time he got the rope; so Hillary called down to him to tie it round him, then signalled the Sherpas to pull.

But again the rope stopped, with McFarlane jammed under the overhang as Hillary had been. Hillary tried jerking to free it—in vain. Stretching down, he just managed to touch McFarlane's hand. Then dreadful choking sounds told them that they'd have to lower him down again, quickly.

When he reached bottom Hillary shouted to Jim to crawl into the sleeping bags for the night, then anchored the rope-end solidly into the ice and started back to camp.

"I felt bruised and weak and it was painful to breathe," Hillary says, "but worse than this was the awful sense of shame in having to leave poor McFarlane sixty feet down in the ice."

At 4.30 a.m. he was up again to return to the hole, this time with Wilkins as well. Now there was a fall of driving snow which could prove disastrous. He shouted down, and to his intense relief heard McFarlane call out that he'd had a good night, but was feeling cold and thirsty. As there was now danger of dislodging the corniced edge and engulfing McFarlane, Wilkins offered to descend again by the route by which he'd escaped.

After making a sling for his thighs and arranging a code of signals ,they watched him climb into the second jagged hole fifty feet to the right. It seemed an eternity before he signalled to be pulled back. He'd reached McFarlane, he said, but only after great difficulty. The route was quite impossible for anyone unable to help himself.

Instead of getting into his sleeping bags, McFarlane had just draped them over his knees. He'd taken off his gloves, and his hands were cold and stiff. He was obviously suffering from concussion. Wilkins had tied a sling round him, and decided that the only chance was to lower a rope straight down the other hole and hope that Jim could clip it to the sling.

This was done, but again McFarlane stuck under the overhang, again he had to be lowered to the bottom. Now they decided to take the risk of cutting the edge away. Held on two ropes Wilkins and a Sherpa chipped away in small pieces, then they had another go at hauling him up. When yet again McFarlane jammed, Hillary, leaning hard out on the rope, stretched down, got a hand on the slings around his body, and with a mighty tug pulled him to safety.

His battered hands were whitish-blue, frozen stiff like claws, his feet hard and lifeless.

When the doctor was summoned from base he diagnosed mild concussion, badly bruised back with the chance of a minor fracture, very bruised ribs, frostbite in hands and feet and some fingers probably broken. Shortly afterwards, Hillary himself was down with a severe illness. It was a miracle both had not died.

How Can I?

Q.How can I keep berries fresh for a longer time?

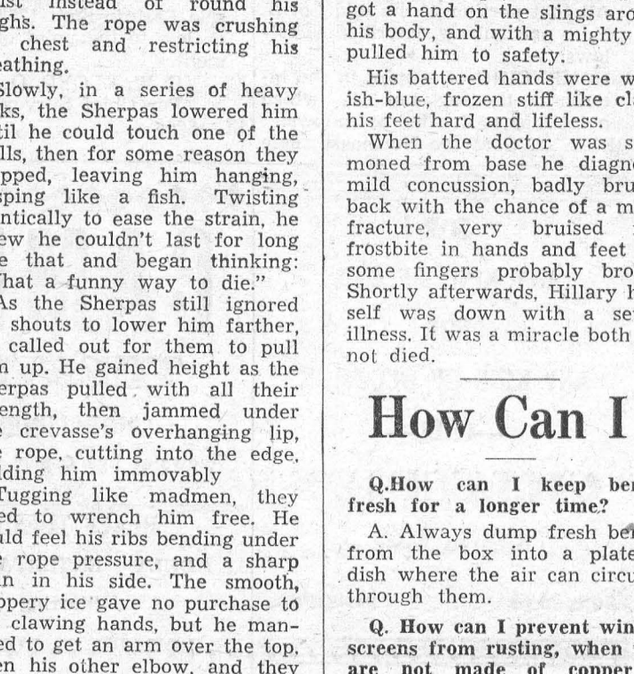
A. Always dump fresh berries from the box into a plate or dish where the air can circulate through them.

Q. How can I prevent window screens from rusting, when they are not made of copper or bronze?

A. Wipe them carefully with machine oil. The odor of the oil will also keep away mosquitoes and flies.

Q. How can I remove tar from linen?

A. Rub thoroughly with oil of turpentine, or lard, let it stand for awhile, and then wash in soap and hot water.



'TRAFFIC CASUALTY" — Minnie the Mannequin suffered multiple "fractures", including a broken back and was "scalped" when a woman driver plowed her car into a dress shop. Mrs. Ruby Warwick, the proprietor, found Minnie's "scalp"—a bright blonde wig—in the debris and promptly glued it back in place.

DON'T PASS THE BUCK — That's the message concerning fire prevention that this buck wants to convey to you concerning your conduct in the tinder-dry autumn woods. A long-time resident of Katahdin Stream camp ground, he seems to be studying one of the signs erected throughout the park system as a reminder to "keep Maine green".

THE FARM FRONT

by John Russell

Farmers are among the first do-it-yourself experts — from necessity. Many times in the past they have had to improvise to meet minor emergecies—but today they find modern tools and know-how ready to make their do-it-themselves jobs easier and farm living more pleasant.

* * *

Bringing this good news to farmers is the purpose of "Operation Farm Improvement," a program sponsored by the Thor Power Tool Company. Focus of the program will be a "research center for better farm living," a $250,000 "farm shop" at Huntley, Ill., northwest of Chicago.

* * *

To open the center to the public the Thor company invited Secretary of Agriculture Ezra Taft Benson to speak. In addition, more than 200 agricultural authorities from colleges and universities across the country have been asked to participate in a seminar on "Power Farming—a Better Way of Life."

* * *

In the Thor "model farm shop," set up on a 160-acre farm, more than 2,000 tools, machines, and accessories made by 50 different manufacturers have been assemoled for leisurely inspection.

"Many farmers have not realized that they now have enough machinery around the farm to warrant their owning specialized tools for maintenance," Neil C. Hurley, Jr., commented here to newsmen. "Today, with fewer farmers working bigger farms and feeding more and more people, it is increasingly important for them to save time — and make their work easier where they can.

* * *

"Many of them, without city worker factory experience, do not know that there are power tools that could help them," he said. Still others, he added, do not know that with some tools they could attempt major repairs and improvements to their homes.

* * *

Quoting Department of Commerce figures of 1950 that 4,319,000 farm homes out of 6,187,000 queried reported they do not have home plumbing, Mr. Hurley explained: "We want to show farmers that with tools they can cut three-inch holes through a wall or a concrete foundation; that they can go ahead with home plumbing or other improvements with the same kind of equipment they can use profitably in the barn for repairs."

* * *

Many farmers are aware, he acknowledged, that power equipment — power mowers, belt lifts for grain, grinders for forage, and so on — are worth far more than their cost in this period of high hired-man wages. But few, he argued, have realized that maintenance of this increasing investment in equipment is as vital as owning it. "The farmer is still making bailing-wire repairs in a jet-plane age," company representatives reiterated from time to time.

* * *

No one as yet is ready to set down on paper a "minimum list" of the tools the farmer presumably needs around the homestead, for every farmland region has its own specialized equipment. No one rack of tools could be expected to repair them all.

* * *

But the company nonetheless feels that several tools are basic. An electric drill is known by almost everyone as a tool almost as useful as a can opener. But fewer know, and this company plans to tell the farmland family, that an "impact wrench" may be even more practical. (Fitted with a drill, an impact wrench does not stall when it his rough going. Instead, a clutch mechanism continues to deliver pounding blows on the cutter, pushing it, without a reaction force on the operator, through thick wood or concrete.)

* * *

Electric sanders, pneumatic spike drivers, auto and tractor valve refacers, hoists, presses, and electric grinders are among the other items these experts recommend for a farm shopping list.

DRESSY DENIM—Once banished to heavy duty on farm and in factory, blue denim is taking a step up the ladder of fashion. Casual coat, above, has straight and narrow cut, with huge patch pockets.

What's A Garthman? Or A Fang Manager?

Napoleon described the English as a nation of shopkeepers, but that was because he never had a look into the government's new handbook called "Classification of Occupations."

Published by the Stationery Office and available to the public for 30 shillings, it lists the thousands of occupations by which Englishmen who are not shopkeepers earn their steak pies and Yorkshire puddings.

The occupations are listed according to industry but no description of the individual job is given, leaving the reader to make what he will of some curious — and often rather frightening—names.

What for example is a fang manager, a bogie man, a back stripper, a small bruiser, a lyncher, a sticker-up, and a head setter-out?

They are workers in the mining, pottery, and leather dressing industries.

A fang manager in coal mining looks after ventilation; a bogie man handles coal trucks; and a back stripper breaks coal underground.

A small bruiser in the metal industry pulverizes samples of ore with a hammer.

A lyncher fastens movable limbs in the soft toy trade. A sticker-up fixes pieces of pottery such as spouts on teapots; and a head setter-out stretches leather.

Then there are the gay sprites who toil at being joy loaders and bobby lads.

A joy loader loads coal onto trucks, and bobby lads measure work done by the miners.

Picture the thin miner, the fat boy, the endless rope boy, and the hip and valley maker.

The thin miner works on thin coal seams, the fat boy is a juvenile, unskilled general worker in the coal mines and the endless rope boy attaches or detaches the trucks to "endless" ropes. Hip and valley are names of curved roof tiles.

A pan doctor repairs conveyors in a coal mine and a puddler lays bricks above or below ground.

The mumbler is another name for a glassblower.

Then there are the trolloper and the whammeller. A trolloper catches shrimps on the east English coast and a whammeller fishes for salmon or sea trout in estuaries, using a special drift net.

Here's a riddle: What's a ruddleman? A hwsmon? A garthman?

Answer: a ruddleman brands sheep, a hwsmon is a headman on a Welsh farm and a garthman is a herdsman.

Tongue twisters are the stack thatcher and thistle spuddler on the farm.

No guesswork about the crow scarer, the Colorado bettle operator or the root grubber.

The warping worker clears out ditches.

For the chap who is a drowner, no sympathy and flowers. He just floods pasture and other land.

Other occupations are listed with what appears to be uncalled for editorial comment—the pushover man, rat assistant, thickset cutter, shoddy grinder, sleeper pickler.

Then from out of the charming past there are the whalebone straightener and the corset threader.

For further queries a "profession solutionist" is at your service.

Paid The Rent In Red Roses

A fine red rose, freshly plucked from the garden of the Port of London Authority in historic Seething Lane, was taken recently to the Mansion House and ceremonially handed to the Lord Mayor of London. A similar ceremony takes place every year, but few people know the origin of the custom and why the gift must always be a rose.

It is because way back in the fourteenth century a lovely woman defied the building regulations. She was the wife of Sir Robert Knollys, a distinguished knight who fought with the Black Prince at Crécy

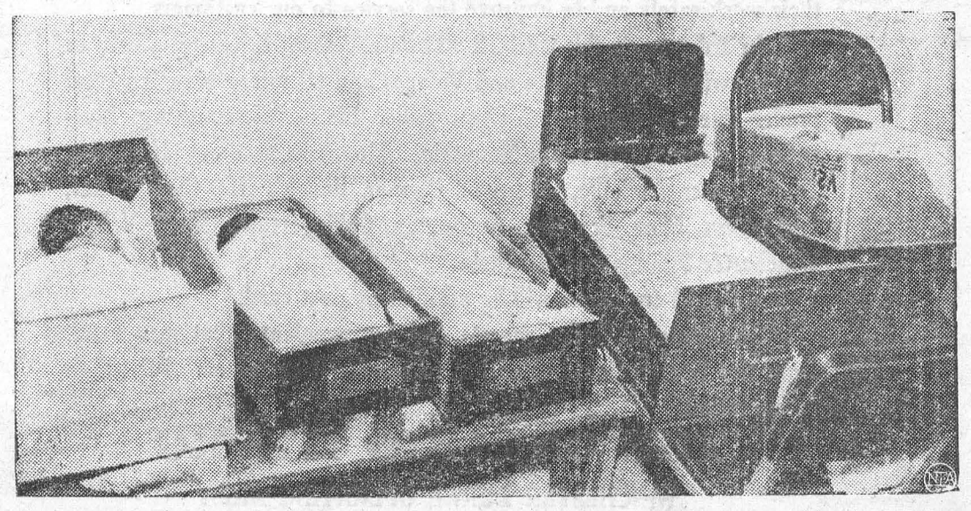
While he was away fighting in the wars, his wife decided to carry out a little improvement scheme in their garden. She had a footbridge built across the public way to connect two parts of the garden which was very close to Seething Lane.

As a result, the City authorities took swift action. They fined Sir Robert, ordering him to surrender to them every year a red rose picked from his garden.

Red roses were also used to pay rents centuries ago in England. In the reign of Edward I more than ten per cent of the recorded tenures were held on an annual rent of one red rose.

For this fall's bride who is busy planning a color scheme for her new home, here is a tip that will make things easier: choose the drapery material first. Then you can take your cue from the colors in the fabric when painting walls and selecting furnishings.

AWAY ALL SCOOTERS — Two adventurous ladies plan to cross the English Channel the "easy" way—on a water scooter. The show girls, Kay Harris, front, and Una Denton, will scoot from Calais to Dover—they hope. The machine has a speed of 20 knots, and will automatically slow and circle back if the riders fall off. The pair is shown, above, on practice run at Folkestone, England.



FILED FOR THE DURATION — The old hospital truism that more babies are born during stormy weather than on calm days got a big boost at Ryukyus Hospital on Okinawa during the recent Typhoon Emma. Some of the 14 new arrivals who blew in with the storm are shown in an emergency evacuation shelter, sound asleep in their desk-and-file-drawer beds. Cribs were brought from the hospital proper when the storm abated.

Local and General

Miss Lorraine Wells of Queen's University, Kingston and Miss Gail Wells of the staff of St. Catharines Public School, spent the week end with their parents, Mr. and Mrs. L. D. Wells, and Larry.

Oon't miss the great annual merchandising event — the Rexall 1c Sale at Wilson's Rexall Drug Store, Morrisburg, October 17-18-19-20, as advertised in Life Magazine.

BOBRN—At Winchester Memorial Hospital on Thursday, October 4th, to Mr. and Mrs. Gordon H. Wood, of Williamsburg, a daughter.

Mrs. Leo Laurin s spending a few weeks at Mount Kisco, N.Y., with her daughter, Miss Rita Laurin, R. N.

The Willing Workers of St. Paul's Lutheran Church are holding a Bazaar and Food Sale on December 8. Time and place to be announced later.

The event of the season. Get your winter supply of drugs and drug sundries now, and save — at the annual Rexall 1c Sale at Wilson's Rexall Drug Store — October 17-18-19-20. Hundreds and hundreds of items on sale. Two for the price of one, plus one cent.

Mr. and Mrs. Roy Schell left today for Debert N.S., where they will visit with their son Sgt. Fraser Schell, R.C.A.F., and Mrs. Schell and daughter. Sgt. Fraser Schell will leave shortly for a tour of duty overseas.

Visitors at Knox Manse last Sunday were Dr. David and Mrs. Hardwick and little daughters Koralee and Julia, from Ottawa, and James Austin Hardwick of Toronto.

Week end visitors with Mr. and Mrs. Arthur Laurin and family were Mrs. Mae Barnett of Ottawa; Mr. and Mrs. Russell Canning and family of Cardinal, Mr. and Mrs. Paul Laurin and family of Ottawa.

The Ladies Aid of St. John's Lutheran Church, Riverside, will hold a Food Sale and Bazaar at the Morrisburg Dairf on Saturday, October 20th.

Mr. and Mrs. Fred Casselman of Church Road, spent the Thanksgiving holiday on a motor trip to North Bay, New Liskeard and Haileybury, returning by way of Huntsville, and through Algonquin Park.

Don't miss the four big bargain days at Wilson's Drug Store Annual Rexall 1c Sale. Hundreds of items necessary in every home are available at two for the price of one plus one cent.

Everyone is invited to attend a reception sponsored by the Woodmen of the World at St. James Hall on Monday, October 22nd, to honor Mr. and Mrs. Carl Styles and Mr. and Mrs. Jay Carkner, who have been recently married. Will ladies please bring lunch. 41-2p

Miss Audrey Stoddart, R. N., on the staff if the Queensway General Hospital, Toronto, was visiting at her home Aultsville, Mr. and Mrs. Ewart Stoddart over the Thanksgiving week end.

Mr. and Mrs. Thomas Swerdfeger of Archer spent Sunday with Mr. and Mrs. Walter Cheley, Park Drive.

BORN— At the Memorial Hospital, Winchester, Ontario, on Sunday, September 30th, 1956 to Mr. and Mrs. Rae Weegar, Williamsburg, R. R. 1, a son.

BORN— At Winchester Memorial Hospital, on Thursday, September 27th, 1956, to Mr. and Mrs. Murray Paterson of Williamsburg, a daughter.

Mrs. A. W. Casselman of Montreal and Mrs. John Kidd of Beaconsfield visited at the home f Mr. and Mrs. John Benton, Williamsburg.

Mr. and Mrs. W. G. Pyper and Mrs. Harry Pyper of Montreal, Mr. A. E. Kelly and Miss Dorothy Kelly, R. N., of Ottawa, spent Sunday with Mr. and Mrs. P. J. Reddick and family.

Mr. and Mrs. Carman Defelco and son of Ottawa, spepnt Thursday with Mr. and Mrs. P. J. Reddick and family.

BORN—At the Memorial Hospital, Winchester, on Monday, October 8, to Mr. and Mrs. Emile Regnier, of Morrisburg, a son.

BORN— At the Memorial Hospital Winchester on Monday, October 8th, to Mr. and Mrs. Lionel Laprade, of Iroquois, a daughter.

IN MEMORIAM

HALL—In memorc of a loving mother, who passed away one year ago today, October 13th, 1955 and a loving father who passed away on November 22nd, 1947, Mr. and Mrs. Alfred Hall.
When through my tears of sorrow,
We see a curtain fall,
And knew my dearly loved ones
Has gone beyond our call,
We must have faith and confidence
In God and in His Way;
For He will raise the curtain
On a fairer scene some day.
When God called you to Heaven,
dear Dad and Mother,
The pain I suffered was so severe.
Down within my aching heart
There flowed a lake of tears.
That last farewell was very hard,
More than I can say.
I often feel so sad and blue.
Only those is left can tell how it feels to part
With loved ones. And to bid them a final farewell.
—Sadly Missed by Daughter, Ruby Casselman.

HALL—In loving memory of a dear mother, Mrs. Alfred Hall, who passed away October 13th, 1955, and a dear father, Alfred Hall, who passed away November 22nd, 1947.
While you, dear parents, rest and sleep,
Your memory I shall always keep.
Like falling leaves the years go by,
But memories of parents will never die.
—Ever remembered by
HAZEL and FAMILY

ROBINSON—In loving memory of Sadie E. Robinson, who passed away October 6th, 1951.
Sweet to remember her who once was here,
And, though absent, is just as dear.
—Sadly missed by husband, Edson and Family.

Ontario Hydro

NOTICE OF POWER INTERRUPTION

Sun. Oct. 14 1956

FROM 1.00 P.M. TO 5.00 P.M.

This interruption is necessary to permit maintenance men to do their work safely and to improve the service to our customers.

In order to do this work, it will be necessary to curtail power to the following Municipalities and Villages and all interconnecting rural feeder lines:—Winchester, Chesterville, Finch, Williamsburg, Morrisburg, Toyes' Hill, South Mountain, Mountain Station, Heckston, South Gower, Hallville, Inkerman, Dunbar, Bouck's Hill, Glen Becker, Froatsburn, Elma, Grantley, Newington, Gallingertown, North Valley, Winchester Springs and Goldfield.

All rural customers will be notified by post card.

The Ontario Hydro regrets any inconvenience that may result from this interruption and wishes to thank all customers for their co-operation.
