MORRISBURG—ONTARIO

AN INDUSTRIOUS MINISTER TOURS HIS KINGDOM

(Mail and Empire)

Hon. Geo. H. Challies is pursuing a course which should be followed by all new Ministers. He is familiarizing himself by personal visits with every branch of the two departments which he administers. As Provincial Secretary, he has charge of the penal institutions of the country, and his duties as Minister of Game and Fisheries are indicated by the name of that department.

It is understood that since his appointment as Provincial Secretary, some months ago, he has personally inspected most, if not all, of the institutions under his control. During the two weeks ended on August 25, he visited those located in Northern Ontario. He was impressed with the vast extent of the territory which they serve. The most outstanding among them is undoubtedly the industrial farm at Fort William, and he found this to be well managed. It effectively serves the double purpose for which it was intended. That is to say, while administering punishment for offences against the law, it seeks to provide the inmates with training which will enable them to earn their living. It is also a show and demonstration place for the splendid farming country lying about Fort William and Port Arthur. Canadians who have not visited the Thunder Bay district, would be surprised at the fine farms and splendid agricultural products to be found in the Slate River region and in other farming communities at the head of Lake Superior. A visit was paid to the district jail at Kenora, and it was found to be well managed. The Minister feels that he has now acquired a first-hand knowledge of the situation in New Ontario which will enable him to make such changes and improvements as may be necessary from time to time.

As already indicated, the Minister had a double purpose in visiting the north country. Besides looking at places of dentention, he investigated the activities carried on at various points by the Game and Fisheries Department. Accompanied by Mr. Donald McDonald, the Deputy Minister, he found that the present trout-rearing station at Sault Ste. Marie is inadequate to the demands made upon it. The pond is not sufficiently large to furnish the proper care that adult fish require while being retained for spawning purposes. It has therefore been decided to build an additional pond with complete drainage facilities, so that when spawning is taking place in the upper pond the lower pond can be drained and cleansed. This annual overhauling will keep the hatchery in good sanitary condition and make for the production of hardy fish which will survive the transfer to the waters of Algoma. It has also been determined to erect living quarters for the hatchery manager, close to the pond, in order that he may always have his eye on his work.

At Kenora the hatchery which was remodeled about two years ago, was found to be obtaining good results in the propagation of lake trout and brown trout. The brown trout are an imported breed which are being reared in growing numbers in different parts of the province. They are larger and stronger than speckled trout, and in the years to come they will prove a great addition to the game fish attractions of this province. The propagation of brown trout is also to be carried on at the Fort Frances hatchery and in the Rainy River District for distribution in the lakes and streams of that region, which are to-day without speckled trout. The Minister had the pleasure of opening the Dorion trout rearing station in the Thunder Bay District. This is henceforth to be the major trout rearing station of New Ontario. It has an excellent supply of fine water of the proper temperature. The plant is capable of rearing up to a million and a half speckled trout from the egg to the large-sized fingerling. The waste water from the hatchery stream is utilized to furnish electric light for the plant.

While in the north the Minister gave consideration to the patrol and protection of wild life in that part of the province lying between Cochrane and the National Transcontinental Railway and Moosonee, the new James Bay terminal of the T. & N.O. Railway. There is no thought however of any considerable expenditure on this project for the time being. We are glad to learn that the boards of trade and game protective associations throughout New Ontario are cordial in their appreciation of what the Government is doing in that part of the province, and that they are eager to cooperate in carrying out the conservation plans of the Game and Fisheries Department. The fine work done by Hon. Charles McCrea, as Minister of Game and Fisheries for many years, is being continued by the new Minister.

MR. CHAS. McCARTHY

Following an illness of several months' duration, there passed away at the family residence, Iroquois, on Monday evening, a much respected resident of that town, in the person of Charles McCarthy, in his 69th year

Deceased was born in the third concession of Matilda, where he spent his entire life, following farming, until he retired and moved to Iroquois twelve years ago.

About thirty years ago he married Annie Summers of Cardinal. To this union was born one son, John, who, with the sorrowing widow, are left to mourn. He is also survived by two sisters, Mrs. John Murphy of Ogdensburg, N.Y., and Mrs. Thos. Baere of Matilda.

The late Mr. McCarthy was possessed of a very kind and jovial nature, and had many warm friends who deeply regret his demise. In religion he was a Roman Catholic, and in politics a Liberal.

The funeral was held on Wednesday at 9 a.m. from the family residence to St. Cecilia's church, where Requiem High Mass was sung by Rev. Father Coyle. Interment was made in Prescott R.C. cemetery.

The large attendance at the funeral and the many spiritual and floral offerings bore silent testimony to the esteem in which deceased was held.

SEAWAY HEARINGS TO BEGIN SHORTLY

Washington, Sept. 1—The Senate Foreign Relations Committee's hearings on the St. Lawrence Waterway Treaty will begin about September 15, State Department officials predicted today.

Just before the adjournment of Congress in July, Chairman Borah of the Senate Committee obtained the adoption of a resolution authorizing recess hearings. If Borah has changed his plan to begin the meetings in mid-September, the State Department has not been informed.

Political interest will centre on the hearings in the midst of the presidential campaign. Governor Franklin D. Roosevelt and President Hoover have been in intermittent dispute over the justice of the treaty provisions to New York State.

Roosevelt wanted New York's Power Authority represented in the international negotiations. He complained that the Federal Government seeks to assess against power development on the river so great share of the cost that the state would be unable to compete with private industry in the sale of power.

When Borah appointed the St. Lawrence sub-committee, he expressed the opinion that no one would endeavor to make political capital of the hearings. He said they probably would take place in New York, Chicago and Washington. Asked whether Governor Roosevelt would be heard, Borah replied that anyone who desired could appear.

Water diversion is as controversial an issue as that relating to power. The treaty stipulates that the 1930 Supreme Court decision shall hereafter regulate the quantity of water diverted from Lake Michigan by the Chicago Drainage Canal. So long as diversion was fixed by the Supreme Court it could be changed by the court, but incorporation in a treaty would put the diversion decision beyond the jurisdiction of any purely American tribunal.

The treaty would permit the United States to increase its diversion in an emergency, subject to subsequent arbitration.

Officials hope to obtain treaty ratification at the short session of Congress. The work will cost $543,000,000. It is estimated that it will reduce freight by six cents a bushel on grain moving from lake ports to Europe. The waterway will make seaports of all Great Lake cities.

MANY FINES PAID IN POLICE COURT

A gentleman from Wyandotte, Pa., was taken before Magistrate McCormick on a charge of travelling on Highway No. 2 at a rate of 66 miles per hour. The charge was laid by Traffic Officer Rose. He pleaded guilty and was fined $10. and costs.

Another tourist from Kansas City, Missouri, travelling on Highway No. 2 at a rate of 55 miles per hour, also appeared, and paid $5. and costs.

Mr. Harold Marcellus, of Chesterville, paid $10. and costs for operating a motor vehicle without an operator's license.

A gentleman from Chesterville charged with being intoxicated in a public place, was also apprehended this past week-end, and contributed $10. and costs to the funds of the province.

STORM CAUSES MUCH DAMAGE

Damage estimated at several thousand dollars was caused Saturday afternoon and evening, when two storms broke over this district, following the extreme heat. During the first storm, about 4.30 p.m., a lightning bolt struck and burned two barns on the farm of Mr. Mike Casselman, about three miles north of Morrisburg. The barns were a total loss, together with the season's crops, which were stored in them. The damage is estimated at about $3500., partly covered by insurance.

At Kemptville, the first storm, which centered on the farm of Robt. MacKay, eight miles north, was accompanied by hail which broke 43 window-panes in his home and buildings, up-rooted several large trees, blew the ventilator off a barn, flattended a field of grain recently stocked and ruined a field of buckwheat. Ernest Fennel was caught with a team of horses, and before he could get shelter, the team ran away and travelled two miles before they were caught. Ten miles east, a large barn on the farm occupied by Leonard Simser, was struck by lightning and burned, with the season's crop and some livestock. Simultaneously, a barn filled with hay and owned by Andrew Smith, eight miles west of the village, was burned, after being struck with lightning.

Telephone lines on several rural exchanges were reported out of order due to the storm.

Farm Problems

Conducted by Prof. Henry G. Bell, Dept. of Chemistry, Ontario Agricultural College, Guelph

Question Box on Fall Wheat

1. Is there any profitable after-effect from fertilizers on wheat?

Ans. — Three years demonstration experimental tests conducted over the province by the Department of Chemistry, O.A.C., show an average increase of 11.1 bushels per acre in yield from the use of fertilizers. It is quite common to find from 200 to 375 lbs. of fertilizers used per acre on wheat. It is an established fact that the growing crop takes up only about 50% of the nitrogen and about 8 to 15% phosphoric acid applied in fertilizers. It is therefore apparent that much added plant food must remain in the soil for succeeding crops. Phosphoric acid not used by the wheat forms combinations with lime in sweet soils, and with iron and aluminum in sour soils. Potash likewise forms combinations with the soil and is lost in only minute quantities from soils to which it is applied.

Quotations from actual growers illustrate common experience.

"Where the phosphate and potash was applied last year a stand of red clover and timothy (following wheat) is much heavier. Valuing the whole field at 10, I would rate the crops on the different fertilized plots at 13 and 14."—W. C. B.—Galt.

"The demonstration field was seeded to clover and timothy. It is a good stand. You can plainly see where the fertilizer was sown." (in 1931).—G. deM., Woodstock

"Fertilized plots of last year were seeded to red clover. There is a marked difference where no fertilizer was used; not so thick and not so good a growth."—A. E. D., Tilbury.

"Early this spring the plots could be picked out of the field. The grass started to grow at least a week sooner than the rest of the field and had a much darker colour. Since the cattle were turned out they seem to prefer the plots that were fertilized, for there is usually some of them grazing there."—E. H., Milton.

Actual investigations by this department show the effects of fertilizer to continue for at least three years.

2. Is there danger of burning wheat when fertilizer is used?

Ans.—When a fertilizer is appliel through the grain drill attachment it is scattered through the soil at a depth at which the wheat seed is sown. The ordinary fertilizers sown at prevailing rates of 200 to 400 lbs. per acre certainly cannot injure the sprouting grain. At the rates quoted this would be about 2-3 oz. to 1 1-3 oz. per square yard, which would not provide enough fertilizer near the seed to injure it in any way. If double or triple strength fertilizer is used, however, greater care must be taken in the distribution, since this stronger fertilizer falling near the seed may tend to draw the moisture out of the seed and thereby injure it. Of course, double strength fertilizer is sown in smaller amounts.

3. Will fertilizers prevent winter killing?

Ans.—Additional plant food either in manure or fertilizers gives added strength to any growing crop. Inasmuch as the fertilized crop has this additional strength it can more successfully resist bad growing conditions.

Winter killing is largely the result of a heaving of the plants out of the ground. This is due to freezing and thawing. If the wheat field is poorly drained the freezing of the water will usually heave the wheat and clover plants out of the ground, causing considerable winter killing. Necessarily, the addition of fertilizers will not prevent such action. Many wheat growers have expressed their opinion on the effect of fertilizrs in combating winter killing throughout the past two years. Out of 73 inquiries sent to wheat growers, 48 have reported that the fertilized wheat came through better than the unfertilized. The following are typical replies:

"Would say that all plots wintered well. The fertilized plots show stronger growth."—T. McK., Pt. Robinson.

"The fertilized wheat wintered in splendid shape but the plots undertilized are in poor shape and badly winter killed."—T. J. W., Lakefield.

"Where I sowed fertilizer the wheat did not kill at all, but where there was no fertilizer you can see right to a row where it winter killed."—O. B., Pt. Hope.

"The unfertilized wheat is very thin and short and has a bad colour. These cold, dry winds seem to do more damage to the unfertilized wheat."—T. L., Zurich.

"The sections of fertilized grain are growing as are the unfertilized, but the strength and thickness of stand and the degree of healthy green color of the grain is very pronounced in favour of the fertilized. As you cross the rows you can see at once when you are on the fertilized grain and when not."—W. E. N., Peterboro.

Open Season For Partridge In Ontario is Promised

Fort William.—An open season for partridge in Ontario this Fall was promised by Hon. George H. Challies, Provincial Secretary and Minister of Game and Fisheries, at a meeting of the Thunder Bay Fish and Game Protective Association here. Mr. Challies said the dates and length of the season for shooting the birds, which have been under a protective act for some seasons, had yet to be decided.

The minister made another announcement of importance to the North when he stated he would recommend to the Cabinet Council the abolition of restrictions on fishing in the Nipigon River as applied to residents of the province, making it open to all, the same as other streams. At present a $10 license fee is charged for two weeks' privileges for aliens and $5 for residents.

Mr. Challies said that with the dorion rearing ponds in operation it would be no longer necessary to restrict the fishing in the Nipigon, which was the principal reason for the fee. He further stated that the Government would supplement work of the fish and game association in placing Hungarian partridge on the wild lands of the district. A number of parent birds were placed last Fall and excellent hatches are reported.

Swarm of Frogs Gives Illusion Road is Moving

Vancouver, Wash. — Hundreds of thousands of tiny frogs invaded Vancouver recently. Motorists on the Evergreen Highway said the frogs were so thick over some sections as to give the illusion that the road was in motion.

When the invasion began thousands of frogs left the river and headed for Vancouver Barracks, where they covered lawns, sidewalks and roads. Some of the streets in the downtown section were reached and the migration extended two miles east. The frogs travel in waves or "herds."

The only explanation advanced is that river and water conditions this season are exceptionally favorable for spawning.

163 Centenarians Found in Dominion

Ottawa.—There are 163 centenarians in Canada, of whom 89 are women and 74 men, according to census figures issued recently. Fifty live in Ontario, 26 in Nova Scotia, 22 in Quebec, 15 in Manitoba, 15 in British Columbia, 12 in Saskatchewan, 10 in Alberta, 7 in Prince Edward Island, 7 in New Brunswick and none in the Yukon or the Northwest Territories.

Mail to be Delivered By Air to Far North

Edmonton, Alta.—What is believed to be the first step toward the establishment of permanent post offices in the Northwest Territories is indicated in the last issue of the Post Office Bulletin, which announces the establishment of a mail service to the far north, including points on Great Bear Lake. At present the aviators plying between McMurray at the end of the railway and the non-post office points in the far north have been acting as mail carriers.

Under the new arrangement the nine different settlements on Great Bear Lake where the prospectors are now staking claims and mining radium pitchblende will receive mail regularly via the air route, as planes are operating almost daily to this point.

Non-Transparent Dress Is Edict for Teachers

Beauce Junction, Quebec — School teachers here must wear modest costumes of non-transparent material, buttoned to the neck with sleeves to the wrist and the skirt not higher than eight inches from the ground, decrees a resolution passed by Beauce Junction School Commission. The commission voted to continue the present salary rate for female school teachers of $225 per annum.

World Conference May Be Held Early January

Ottawa. — The Imperial Economic Conference an assured success, eyes of British economic experts gathered here are already turning to the World Economic Conference in London.

While no date is set it is expected that this will be convened as soon after the United States presidential election as is practical, late November at the earliest, but more likely immediately after the New Year. It is considered that what has been accomplished in Ottawa gives a distinct and timely lead to world economic co-operation.

Grass Strips to Check Fires And Pasture Cattle

Tallahassee, Fla. — Carpet grass is the newest weapon to be employed by the Florida Forest Service in forest-fire fighting. Plowed fire breaks, forty feet wide and four to six miles long, will be planted to carpet grass, which will be used as grazing for cattle and protection against the spread of fires.

These carpet grass strips also will bound and quarter a section of land.

READY FOR THE WORLD'S CHAMPIONSHIP SWIMMING MARATHON AT THE CANADIAN NATIONAL EXHIBITION AUG. 31st

The seven men shown above should all finish within the money. No. 1 is Isadore Spondor, now of Toronto, but formerly of Port Colborne, who has been a colorful figure in previous years: No. 2—George Young, Toronto, winner last year and also winner of the famous Catalina Island swim in which he was the only contestant to finish; No. 3—Warren Anderson, a powerful fellow from Sydney, N.S.; No. 4—Gianni Gambi, holder of many Italian records and winner of the 3-mile Men's Invitation Swim last year; No. 5—George Blagden Memphis, Tenn., who has made a good showing in former years; No. 6—Milton Potts of London, Ont., who is regarded as a strong contender; No. 7—Marvin Nelson of Fort Dodge, Iowa, winner in 1930, and holder of the record for the 15-mile course.

German Notes

Because little Willie let the porridge boil over 5,000 years ago, Prof. Johannes Gruess is now able to determine what the boy and his parents had for breakfast in the Stone Age. For on some pottery dating from that time, and found at Herkheim near Noerdlingen, traces of a certain kind of grain were discovered together with splinters of charcoal. From this has been deduced that the Stone Age people ground the corn, which they seem to have brought with them from Asia, and made porridge of it which was boiled in pots placed in a charcoal fire. Small causes ofttimes have great effects, the Germans say. Little Willie certainly never dreamed that the porridge he let burn, and for which he no doubt received a spanking, would occupy bearded professors in the age of airplanes and television.

QUAINTNESS IN NAMES.

Curious names surround Berlin. There is a forest called "Heaven" and a old monastery christened "Paradise," a hamlet "Look-around" and a village "Since-when." A forest "Dancehall" and a hamlet "Prettychimney." Some of the little hills must have been christened by a chef de cuisine. There are the "Bread Baking Oven Hills," the "Butter Hills"—and the "Sauerkraut Hills." Hurrying people traveling by car or train will probably never find them, but the patient hiker discovers many such quaint places with surprise and amusement.

GUIDEBOOKS GO LITERARY.

What better guidebook could be written than a description of the country by its best authors? Convinced that there is no happier method of interpretation the Literarische Welt, a literary weekly, invited some of Germany's greatest writers to contribute. It styled its compilation of essays "a lesson in seeing deeper and better with the poet's aid." Thomas Mann, one of the world's best known writers, tells of a spot northeast of Munich where he spends much of his time. "It is not a forest, and not a park, it is a fairy garden," he writes. "The wilderness is penetrated by crisscross paths. Just strips of flattened grass or gravel ruts, obviously not artificially made but created by walking on them, without one's knowing who did it. That Bauschan (his dog) and I should meet a man on them is a bewildering exception and my companion halts full of astonishment on such occasions and merely lets out one deep 'whoof' which comes pretty close to expressing my own feelings toward such an incident." Ricarda Huch, one of Germany's prominent women writers, depicts one of those sturdy medieval German cities. "Of all towns in Wesphalia, Muenster is the noblest, indeed, in all of Germany none equals it in this respect." The armor walls and turrets it has cast off. But the 'home gown' the town now wears still shows resemblance to an armor; its cut is severe and its jewels do not force themselves on the visitor."

FREE RIDES TO MARKET.

By motorcar to market may be a common thing in motorized countries such as the United States, but it was a luxury in Germany until recently. And it might have remained so for quite a long time had not an enterprising market hall management evolved an ingenious idea. It sent out little letters to the housewives in the neighborhood informing them that private cars would be placed at their disposal to take them to the market. And now every morning happy housewives are riding in luxurious limousines to buy apples and pears. All of a sudden, the distance to market has become much too short. But the eagerness to buy has doubtless multiplied. And the kind and clever thought as well as the money invested in gasoline appears to be bearing rich fruit as sales of fruit and sausage increase.

TELEPHONE TECHNIQUE.

If a loud shout of "Xantippe, Ypsilon, Zacharias" issues from a telephone boot in Berlin, visitors need not be alarmed. For it will be neither a college yell nor an election catchphrase. It will be merely a humble telephone user following the printed instructions which tell him how to get his number—under difficulties. The use of "key words" for letters which are not readily understood over the telephone is a practice which endures in most countries. But the thoughtful Reichpost, which controls the telephone system in Germany, provides two sets. If one desires to speak to Miss C. Smith in a nearby city and the operator does not understand the name, one explain "C as in Caesar, S-amuel, M-arie, I-da, T-heodor, H-einrich." But if Miss Smith happens to live in another country so that a long distance call is required, a different series of key words is provided. For the benefit of the operator it is now spelled: "C as in Casablanca, S-antiago, M-adagascar, I-talia, T-ripoli, H-avana." But even then one may not get the right connection—not if the young lady's name happens to be Catherine. For the "rules of speech" in the telephone book only show one alternative. It's "K, as in Katharina."—The Christian Science Monitor.

300-Mile Sand Hills Found in C. Australia

Adelaide, S. Aus.—Sand hills like gigantic furrows, each 300 miles long, were among the discoveries made by Dr. Cecil T. Madigan in Central Australia, according to records recently presented to the South Australia branch of the Royal Geographical Society. Mr. Madigan in the course of his expeditions has added 20,000 square miles to the map of Australia, these records show.

The most notable of Mr. Madigan's expeditions was that undertaken in 1929 when he explored the great desert in the heart of the continent by airplane. The actual area of the desert is about 28,000 square miles—bigger than Tasmania or Ceylon—nearly a quarter of it had been explored before Mr. Madigan's remarkable flight, which was the most extensive yet made in the world outside the polar regions.

This area has been named the Simpson Desert in recognition of the great financial assistance given by the then president of the Royal Geographical Society of Australia, Mr. Alan A. Simpson. Up till now the expedition to Central Australia has not resulted in the discovery of anything of economic value, but interesting scientific finds have been made. On the return journey Mr. Madigan proved that "Lake" Eyre is mostly solid land, with a slight coating of salt, instead of a salt swamp as more cautious observers had imagined for more than half a century.

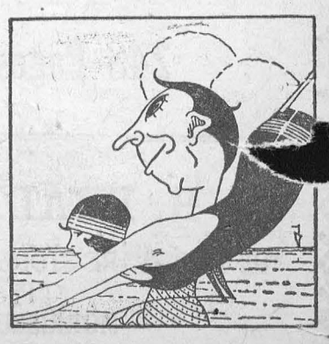
Glider Lands Itself As The Pilot Jumps

Wiesbaden.—Herr Pisse, a pilot of the flying school in Aachen, may become the first member of the Caterpillar Club to have made an escape from a glider plane. On a recent flight in his glider Cumulus he was seized by rising air currents and driven rapidly to an altitude of 6,000 feet, where the plane capsized. He fell out of the pilot's seat, but made a safe landing with a parachute.

Much to the amazement of the crowd watching the accident, the plane came circling down and made a perfect landing without anybody at the controls.

Spanish Women Pay Alimony

Madrid.—One of the most amusing aspects of the new Spanish divorce law is that women must pay alimony to their ex-husbands if the latter obtain the divorce. This presumes an equality of sexes which the new regime desires to attain but which certainly does not exist at present.



He—"Where did you learn to dive?"

She—"In divers places."

Little Time Gained by Reckless Driving

You may be surprised to find how little time is gained by weaving and reckless driving in traffic. The Rochester Police Department made a test over a recent period of one month. Every morning when traffic was heavy two cars were sent from Kodak Park to Police Headquarters. One drove as rapidly as possible without actually causing an accident. It weaved in and out of traffic and jumped lights when possible. The other was driven in a careful, prudent manner.

When the reports from the operation of these two cars over a period of a month were tabulated, it was found that the recklessly driven car had gained an average of a minute and a half overhalf over the other car on the three-mile traffic congested course. In other words, by endangering themselves and others, the drivers of the carelessly driven police cars had gained approximately a half minute in each mile.

One morning the police followed another car that was weaving in and out of traffic. When they located the owner at the end of his dangerous journey they found him in his office, his feet on the desk and the morning newspaper spread out before him. He had had no real reason for his speed.—Public Safety.

Mary—"Was he on his knees when he proposed?"

May—"No, indeed—I was on them."

THIS YEAR'S

CANADIAN NATIONAL EXHIBITION TORONTO

AUG. 26 to SEPT. 10

(INCLUSIVE)

AGAIN comes the great event to which hundreds of thousands look forward—the World's Largest Annual Exposition. The Exhibition of 1932 brings new exhibits—new features, new ideas, the wonders of Industry, Science, Art, Education, Sport, Agriculture, Pageantry, Recreation, Fashions, Travel, Engineering, Automotive and Music are presented inexpensively and comfortably.

OPENING DAY, Fri., Aug. 26.—Women's Marathon Swim for world championship, starts at 1 p.m. This is the women's sport feature of the year in which the greatest natators will compete for cash prizes and title of world's professional champion.

WARRIORS' DAY, Sat., Aug. 27.—Canada's largest veterans' parade and re-union. Military and Naval Review with 500 massed musicians. The magnificent pageant—"THE TRIUMPH" will be staged nightly by 1,500 performers, depicting the evolution of a great Empire—colourful costumes and martial music; Royal Canadian Dragoons in famous musical ride; thrilling pyrotechnic display.

England's oldest and finest all-brass band "BESSES-O'-TH'-BARN", and thirty other military and concert bands will play during the Exhibition.

The popular British sportsman **KAYE DON** will be present with his super-boat "MISS ENGLAND III", and visitors will also get a close-up view of the BRITISH SCHNEIDER CUP PLANE, holder of the official speed record of 388.67 m.p.h.

EXHIBITION CHORUS OF 2,000 VOICES appears in four concerts in the Coliseum on nights of Aug. 27, Sept. 1, 6 and 10.

MEN'S MARATHON SWIM, Wed. Aug. 31. Olympic natators in various events. Outboard Motorboat Races—Track Stars direct from this year's Olympic Games; Judging Competitions, Horses, Cattle, Sheep, Swine, Poultry; Flower Show; International Dog and Cat Shows; Trotting and Pacing Races and $6,000 Futurities.

Reduced fares on Bus Lines, Railroads and Steamships. Consult local agents.

Mail reservations now for Exhibition 2,000-Voice Chorus Concerts or Grandstand Pageant "The Truimph".

WILLIAM INGLIS, President.

H. W. WATERS, General Manager.

Man and His Diet

By I. M. Rabinowitch, in The McGill News (June, '31).

Although many causes may be assigned to the alleged deterioration of the human race, the unwise choice of foods is not one of the most important factors. Given an ordinary every-day diet—a diet balanced by the individual's preference for quality, variety, taste, and economy—it makes no difference what the healthy individuad eats. Most people need know very little about the ash content of their orange juice, the caloric value of bacon and eggs, or carbohydrate, fat, protein of mineral contents. In the selection of food man may still profitably heed the dictates of his instinct and experience.

Yet the gullibility of the average individual, particularly in matters of health, is notorious, and he is easily impressed by the recommendations of advertisers and pseudo-scientists with respect to certain foods. Orange growers, for instance, would have us believe that a large number of people are suffering from acidosis, and that the prevention and cure of this disease lies in the consumption of large amounts of orange juice. Now acidosis implies an acid reaction of the body tissues. The description of the physiological factors governing this reaction is a long story, but I may tell you that of all the mechanisms the human body possesses to combat disease, that which prevents acidosis is one of the most efficient we know of. Except in prolonged starvation and in a few serious illnesses, acidosis does not exist.

One cereal manufacturer would have us do away with coffee. Is coffee to lead to the deterioration of the human race? Life insurance companies, with their vast experience in mortalities and morbidities, might have some information on this subject. These companies, in order to prosper, must be very alert in investigating the health and habits of their applicants; they pool their information and take advantage of every medical advance, but I believe they have, as yet, to ask an applicant—Do you drink coffee?

The dairy industries would have us flood our tissues with milk. Is milk an indispensable part of the adult's diet? The answer may be found in the natural history of animal and man. Briefly, milk is supplied by the mammalian adult to its young, and this supply varies in different species from approximately one month to one year after birth. Thereafter, none of the species in the state of nature is furnished with milk. Milk, therefore, cannot be considered a natural food for the adult animal. Since these animals live and continue to propagate, it is obvious that the adult diet must contain all of the necessary food elements which are present in the maternal milk. Man's diet affords no exception to this rule.

Whole-wheat bread offers an example of psychological bias running contrary to experimental facts. Since milling became known, civilized man has tended to depart from the whole-wheat bread of his ancestors. In spite of all "bread reform" efforts to keep up the use of this product, white bread has almost universally displaced it among civilized peoples. With the advent of the Great War, Germany, and eventually the entire world, of necessity took to whole-wheat bread, but shortly afterward reverted largely to the white product. Insistence upon the use of whole-wheat bread has been based latterly upon its high content of a certain vitamin, its value in the relief of intestinal disorder, and its nutritional value. It might therefore be of interest to those who do not relish this article of diet, to know that Vitamin B is found in a variety of other and more attractive products, and as far as the intestinal disorder is concerned, other substances may be used more economically and efficiently. As for its nutritional value, the verdict is "not proven"; white flour is beyond any doubt a better source of energy. One of the sugars which whole-wheat bread contains, called pentose, yields about 25 per cent. less energy than the sugars of white flour. In addition, it has been shown that the proteins of bran are digested with great difficulty, and are only partly utilized. Whole-wheat bread is therefore uneconomical.

We now come to the vitamins. We are told in the advertisements that man has become his own arch-enemy by adopting a diet that deprives him of proper nourishment. Thus weakened, he is subject to all illnesses from which he now suffers. To protect ourselves against the ravages of civilization we must take tablets of vitamins in concentrated form. Foods must now be exposed to ultra-violet light if civilized man is to be protected against himself. When we read of similar practices among the Medicine-men of the Congo we call them fetishes and tabus.

The reaction of the medical profession in general, to the incorporation of vitamins in food, is succinctly put in The British Medical Journal of April 18th, 1931. Apropos of incorporation of vitamins in bread, the statement reads as follows:

It is possible that good results on the general health of the population might follow an increased consumption of Vitamin B, though the point is open to much controversy . . . It seems, on the whole, unlikely that the artificial addition of vitamins to bread would profit any but the firms who could advertise the article to the disadvantage of their rivals.

Because rats fed on a diet deficient in Vitamins B1 and B2 cease to gain weight and die in three weeks, it does not follow that we must eat foods exposed to ultra-violet rays. This experiment merely proves that these vitamins are a necessary part of food; but experiment has also shown that vitamins are very widely distributed in nature and our natural foods. We are told in one advertisement that one must become almost a student of the subject in order to obtain the proper supply of vitamins. May I suggest that one must be a very expert student on the subject to avoid them.

One can hardly dismiss this subject without mention of yeast—a product so prominent in the public eye at present. In spite of its well advertised high vitamin content, I believe I may state without hesitation that notwithstanding the endorsement of "the physician to former Spanish Royalty," a "noted Viennese hospital authority," and others, that good health and long life are still perfectly compatible without the daily consumption of a cake or two of this product. If you ask for an explanation of the use of these physicians' names, my answer is that all of these endorsements come from parts of Europe where the struggle for existence is at present acute.

I am not attempting to belittle the very valuable work which has been done in the science of nutrition. But as new facts are established the medical profession applies them where it believes they should be applied. The exercise of judgment is most important, for we now have definite experimental proof that excess quantities of at least one of the vitamins can do no harm, producing a condition not unlike that found in hardening of the arteries.

If left alone man will choose a variety and sufficient quantity of foods, and because of this variety and quantity his diet will contain all of the essential food elements. Modern comforts may at times tempt him to eat too much but he will eventually learn as insurance statistics show, that when he adds ten pounds to the beltline, he subtracts about one year from the life-line.

The American salegirl is probably the most snobbish person alive. In the shopping world, Price reigns supreme. The firm belief among all the $16-a-week girls seems to be that every customer is a millionaire. Why cannot salespeople be taught that it is better to make a $20 sale than not to make a $50 one?—Corothy Garesche Holland.

SHE WAS GETTING FATTER

Now Down to Normal

"I was putting on flesh very rapidly," writes a married woman, "and also suffering from constipation, and was very liverish. Three months ago a friend advised me to take a teaspoonful of Kruschen Salts in hot water every morning. I have kept this up regularly ever since, although I have been down to my normal weight (126 lbs.) for several weeks. I never felt better in my life, and I intend to carry on with Kruschen always. Several of my friends have remarked how slim I was getting and how well I was looking. After my having told them how it was done, they are doing the same."—(Mrs.) D. H.

Overweight arises frequently because the system is loaded with unexpelled waste, like a furnace choked with ashes and soot. Allowed to accumulate, this waste matter is turned into layer after layer of fat. The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes—but surely. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life!

Owl Laffs

Teacher (pointing to the map)—"Now, Willie, when you stand facing north you have on the right hand the great continent of Asia. What have you on your left?"

Willie—"A wart, but I can't help it, teacher."

You're getting along when you can remember the time when it was considered a luxury to be born in a hospital.

Don't Quit

When things go wrong, as they sometimes will,
When the road you're trudging seems all up-hill,
When funds are low and debts are high,
And you want to smile but you have to sigh,
When care is pressing you down a bit,
Rest if you must, but don't quit;
Life is queer with its twists and turns,
As every one of us sometimes learns,
And many a failure turns about,
When he might have won had he stuck it out.
Don't give up, though your pace is slow—
You may succeed with another blow.
Often the goal is nearer than
It seems to a faint and faltering man.
Often the struggler has given up,
When he might have captured the victor's cup.
And he learned too late, when the night slipped down,
How close he was to the golden crown.
Success is failure turned inside out—
The silver tint of the clouds of doubt.
And you can never tell how close you are,
It may be near when it seems afar;
So stick to the fight when you're hardest hit—
It's when things seem worst that you mustn't quit.

Son—"Dad, what's influence?"

Dad—"Influence, my son, is a thing you think you have until you try to use it."

Young Clerk—"Could you learn to love me, do you think, Josephine?"

Gay Young Stenographer — "Well, Napoleon, you never can tell. I learned short hand in six weeks."

A young man fell into a state of coma but revived before his friends could bury him. One of them asked what it felt like to be dead.

Young Man—"Dead! I wasn't dead, and I knew it because my feet were cold and I was hungry."

Friend—"But how did that make you sure?"

Young Man—"Well, I knew I would not be hungry in Heaven and my feet would not be cold in the other place."

Pastor—"You say you cannot get along with your husband? People must learn to bear and forbear. Did you every try heaping coals of fire on his head?"

Young Wife—"No, I never did. But I've tried boiling hot water."

Father (to son who has just spoken to a pretty girl)—"Do you know that girl?"

Son—"Know her? Wh, I'm engaged to her."

Father—"Heavens! Are you serious about her?"

Son — "Oh, no. Just a passing fiancee."

"Good-bye," said Sandy MacDonald, "and don't forget to take little Donald's glasses off when he isn't looking at anything."

German Invents Plane With Auxiliary Wings

Templehof, Germany.—A plane that "trims" its wings while in the air has undergone tests before aviation experts and the Berlin air police.

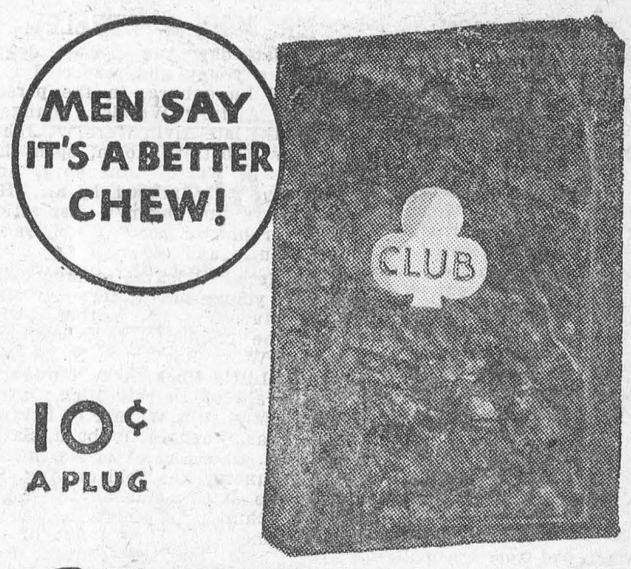
Professor Werner Schmeidler, Breslau mathematics teacher, is credited with the invention. His principle is carried out by attaching to the body of the plane two additional smaller wings which, when not needed, rest in the fuselage. It is claimed that the use of such valuable surfaces makes flying safe and more economical.

Demonstrations here showed that the inventor's plane, when starting with enlarged wings, rose within a few seconds. It required half the time to lift itself from the ground that an ordinary craft needed. The plane automatically increased its speed from seventy miles to ninety miles an hour when the auxiliary wings were removed during flight.

The extra spread also works as a brake when applied during the landing manoeuvre. The larger wing surface offers a strong resistance to the wind.

A FOUNDATION

How much more powerful a motive in human actions is love than fear! How much more readily does the heart of the man or of the child respond to kindness than to harshness! There is a very remarkable reflection attibuted to the Emperor Napoleon when, as an exile at St. Helena, he looked back on his past life. He is reported to have said, "My empire, and those of the other Great, Caesar, Charlemagne, were all founded on fear, and all have perished. There was only one based on love, that of the Great Author of Christianity; and that alone continues, and will endure."



CLUB CHEWING TOBACCO

Guarding the Great

Ministers of the Crown in Gt. Britain—and even Royal personages—have often been a little resentful of being dogged or having their homes guarded by detectives, though there are times when such precautions are very necessary.

But in some respects the full rigour of this guardianship is now being relaxed—as, for instance, at Chequers.

Mr. Ramsay MacDonald is probably responsible for the change at Chequers. But in getting the Home Secretary to consent to it he has been more fortunate than some past Premiers.

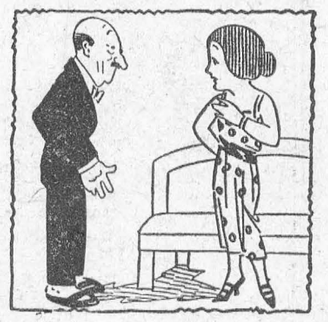
Gladstone, for instance, once demanded that the guard on Hawarden should be withdrawn, but Sir William Harcourt, who was then Home Secretary, refused, and the Premier had to submit.

At that time, as the Phoenix Park murders showed, the dangers of public life were very real, and Mr. Gladstone's guards must have had an anxious time. So had those of the late Earl Balfour, who often tried to dodge them.

Queen Victoria was also impatient of guards, and on one occasion informed the then Home Secretary, with great delight, that two "suspicious persons" had been arrested at Osborne. One of them was Prince Arthur, now the Duke of Connaught, and the other the Queen's maid.

But it is when foreign Royalties or statesmen from overseas come to this country that the most stringent precautions have to be taken. Mr. de Valera, for instance, was heavily guarded when he visited London recently.

The recent threats to put Miss England III out of action call attention to another aspect of the matter. There are fanatics who will attack a person or thing that happens to be in the public eye at the moment just to advertise their views. At the first aviation meeting ever held in Europe Anarchists tampered with some of the machines, and a number of crashes occurred.



Wifey—"I guess we had better change hotels."

Hubby—"Why?"

Wifey—"Everybody at this hotel has seen my gowns and heard your monologue."

The theatre like the church is one of the most conservative of our institutions. It follows and does not lead the crowd. Like the church, it is hostile to new ideas and yields to them slowly and reluctantly. But unlike the church, it does not find it necessary to justify its obscurantism by invocations of the supernatural. —Elmer Rice, Famous Playwright.

CHALLIES OPENS DORION TROUT REARING STATION

(Fort William Times-Journal)

Near the twin cities, in waters pure as crystal, a million and a half trout are being reared for distribution in the lakes and streams of Northwestern Ontario. These rearing ponds, located at Dorion, formally were opened yesterday afternoon by Hon. Geo. H. Challies, Ontario minister of game and fisheries, at a colorful and interesting ceremony.

In his opening address yesterday, the minister could not say enough of what was revealed in the completed Dorion rearing ponds, spring fed, cool, a veritable gem in the heart of the forest. Little can one imagine the extent of this new development, brought about through the energies of the Thunder Bay Fish and Game Protective Association and F.H. Spence, M.L.A.

Makes Address

"The department hatchery policy" said Mr. Challies, "is a progressive one, and has grown as a result of a need to replenish lakes and streams in order to supplement the work of nature in maintaining good fishing. It is not difficult to conceive of so many anglers on a body of water that natural production alone could not support good fishing. Since the restriction of the number of anglers is impossible, a re-stocking and restrictions in size limit, bag limit and season are the only possible solvents and it is believed, if artificial propagation is carried out along practical lines, properly guided from the scientific standard with due regard to conservation, dangers of depletion should be minimized.

"The establishment and development of the Normandale Trout Ponds in the year 1924 opened the way for the culture of large fingerling speckled trout. The process of carrying trout through the complete cycle from the egg to the adult stage has proven successful and is a principle which has received the support of many leading fish culturists. Within the last few years, the Ontario government has established five trout rearing stations. Today we have before us here in Dorion, the major trout rearing station of the province, if not of the Dominion.

"The volume of water obtained is more or less phenomenal, being over 4,000 gallons per minute. The temperature and quality of the water reported is excellent. It is quite evident that the Dorion trout rearing station may be considered a major station. You will notice the raceways are constructed so as to take care of graded stock, water being used only once through each raceway. Suitable pond space being available for adult fish from which spawn may be obtained this fall for the 1933 hatch. Barring accidents and disease which fish, like all other animals, are heir to, it is considered possible to rear at least 1,500,000 speckled trout from the egg to the large size fingerling. With the cooperation of the anglers, we may look forward to good fishing in Thunder Bay District."

In closing, Mr. Challies re-iterated his statement made at the noon-day luncheon given in his honor by the Thunder Bay Fish and Game Protective Association at the Royal Edward Hotel, in which he intimated that pressure was being brought to bear to open the Nipigon waters o anglers the same as any other stream with a smaller fee for non-residents.

MR. JOHN A. WERELEY

On Saturday Aug. 13th, death claimed a young and respected resident of Lunenburg, in the person of John Andrew Wereley, youngest son of the late Alvin Wereley. John, as he was better known, spent his lifetime at North Lunenburg, and will be greatly missed by all. His jolly ways and happy disposition won for him a host of friends, both young and old.

The deceased leaves to mourn his loss his young widow, formerly Miss Molly Murphy; his mother, with whom he resided; four brothers, Hillard W. of Rochester, N.Y., Wilson A., Little Rock, Ark., Claude G. and Gerald of Detroit Mich.; three sisters, Mrs. Ada Warner of Ottawa, Mrs. Chas. Bush of Torburn, Sask., and Mrs. Geo. Shaver of Northfield.

The funeral was held on Aug. 16, from his late residence to Willis' United Church, of which he was an ardent member. It was one of the largest held from that church. Rev. R.W. Carr officiated at the church and grave.

Interment was made in the family plot, Mattice's cemetery, South Lunenburg.

Floral offerings included: pillow, wife and mother; wreath, the family; sprays, Mrs. Ada Wallace and family Mr. and Mrs. Harry Dunn, Mr. and Mrs. Wilson Wereley, Mr. and Mrs. Ben Wood and Alice, Mr. and Mrs. H. Runions and family; cut flowers, the Misses Moke, Miss Ella Wereley, Mr. and Mrs. Elburn Wereley, Mr. and Mrs. Albert Adams, Mr. and Mrs. Willis Bush, Mr. and Mrs. Stanley Runions.

Letters of condolence were received from: the Adams sisters, Wales; Young Womens' Auxiliary, North Lunenburg; Mr. and Mrs. Willard Presely, Mr. A. Hunt and family, Berwick; Miss Elva Ouderkirk, Mr. and Mrs. Joseph Melroy, Crysler; Miss Margaret Hunt, nurse-in-training, Brockville.

Friends attended the funeral from St. Johns, Mich., Finch, Crysler, Avonmore, Morrisburg, Dickinson's Landing, Cornwall.

TOYES HILL

Milton Harper, of California, is spending some time with his parents, Mr and Mrs I.N. Harper.

Mr. and Mrs. Wm. Wright and daughter Doreen, of Dundela, spent Sunday with her parents, Mr. and Mrs. Leroy Geggie.

Mrs. L.G. Brooks and baby daughter, Betty Irene, left Sunday morning for Toronto, to join her husband there.

Orrie Wylie, of Brinston, took dinner on Sunday with his brother, Howard Wylie.

Mr. and Mrs. Herbert Hanson of Strader's Hill, took dinner on Sunday with their daughter, Mrs. Clifford Wylie.

Miss Leona Casselman spent a few days at Iroquois, guest at the home of her uncle, Howard Fawcett.

Miss Mildred Wylie spent Monday afternoon with her cousin, Miss Etha Armstrong, Inkerman.

Mrs. Chester Warren and dughter, Ethel, accompanied by Miss Hannah Blair, spent Thursday afternoon with Miss Mildred Wylie.

Mrs. Norman Durant and little son, of Ottawa, are spending a few days with her parents, Mr. and Mrs. Wm. Steele.

REGULATIONS REGARDING MIGRATORY BIRDS

The National Parks Service of the Department of the Interior, Ottawa, has just issued the regulations regarding Migratory Birds for the current year. A summary of the Regulations regarding Migratory Birds for the current year.

A summary of the Regulations as they apply to Ontario, follows:

OPEN SEASONS

DUCKS, GEESE, BRANT, RAILS, COOTS, WILSON'S or JACK-SNIPE

In that part of Ontario lying north and west of the French and Mattawa Rivers and also including all Georgia Bay waters; September 1 to December 15.

In that part of Ontario lying south of the French and Mattawa Rivers (but not including any portion of the Georgian Bay waters); September 15 to December 15.

EIDER DUCKS

North of the Quebec, Cochrane, Winnipeg line of the Canadian National Railways; September 1 to December 15.

WOODCOCK

September 15 to November 30.

CLOSED SEASONS

There is a closed season throughout the year on Wood Ducks, Swans, Cranes, Curlew, Willets, Godwits, Upland Plover, Black-bellied and Golden Plover, Greater and Lesser Yellow-legs, Avocets, Dowitchers, Knots, Oyster-catchers, Phalaropes, Stilts Surf-birds, Turnstones and all the shore birds not provided with an open season in above schedule.

There is a closed season throughout the year on the following non-game birds:

Auks, Auklets, Bitterns, Fulmars, Gannets, Grebes, Guillemots, Gulls, Herons, Jaegers, Loons, Murres, Petrels, Puffins, Shearwaters and Terns: and there is a closed season throughout the year on the following insectivorous birds: Bobolinks, Catbirds, Chickadees, Cuckoos, Flickers, Flycatchers, Grosbeaks, Hummingbirds, Kinglets, Martins, Meadowlarks, Nighthawks or Bull-bats, Nuthatchers, Orioles, Robins, Swallows, Shrikes, Swifts, Tanagers, Titmice, Thrushes, Vireos, Warblers, Waxwings, Whip-poor-wills, Woodpeckers and Wrens, and all other perching birds which feed entirely or chiefly on insects.

No person shall kill, hunt, capture, injure, take or molest any migratory game birds during the closed season: and no person shall sell, expose for sale, offer for sale, buy, trade or traffic in any migratory game bird at any time.

The taking of the nests or eggs of migratory game, miratory insectivorous and migratory non-game birds is prohibited.

The killing, hunting, capturing, taking or molesting of migratory insectivorous and miratory non-game birds, their nests or eggs, is prohibited.

The possession of migratory game birds killed during the open season is allowed in Ontario until March 31 following open season.

BAG LIMITS

Ducks 15, Geese 15, Brant 15, Rails, Coots and Gallinules 25 in the aggregate, Wilson's or Jack-Snipe 25, Woodcock 8, and not more than 125 Woodcock or 150 ducks in one season.

GUNS & APPLIANCES

The use of automatic (auto-loading), swivel or machine guns, or battery, or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, power-boat sail boat, wounded live birds as decoys, night light and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than sunrise or later than sunset is prohibited.

The penalty for violation of the Migratory Bird laws is a fine of not more than three hudred dollars and not less than ten dollars, or imprisonment for a term not exceeding six months, or both fine and imprisonment.

MARKET YOUR EGGS

Market your eggs at Schell's store and obtain the highest prices for trade. We pay .12, .15, .19.

"I Feel That The Bank of Montreal Has A Distinct Personality"

Said an old customer of the Bank recently: "In my opinion a bank has a personality just as positive and distinct as that of an individual."

The personality of the Bank of Montreal, created by its founders and perpetuated by their successors, is reflected in the substantial character of the clientele the Bank has drawn to it, and expresses itself through more than 600 Branches, which are so many points of contact with the people and the commercial life of Canada.

The elements which have gone into that intangible but very real thing —the personality of Canada's oldest bank—include the Bank's unwavering strength and conservatism, its helpful, efficient service, and its thorough knowledge of local conditions wherever it is represented.

Flaky Pie Crust

New Recipe—For two pie shells use 2 cups Purity Flour, ½ teaspoon salt, ½ cup shortening, ½ cup cold water. Mix flour and salt, cutting in the shortening until the mixture is like fine meal. Mix thoroughly with the water. Roll out thin, keeping it thoroughly dry. For extra rich pastry use half butter and half lard.

Send 30c for Purity Flour Cook Book.

PURITY FLOUR

PILES?

Can only be removed by eliminating the internal cause. NATURE'S PILE REMEDY is a harmless herbal treatment that for over twenty years has been successfully ending every form of piles, even after other remedies had failed. At all good druggists.

NATURE'S PILE REMEDY 6

None genuine without name A. W. Merrill

Reminiscences

The present Chinese hymn of the people is peculiar, says Sven Hedin, the Swedish explorer (in his great book "Across The Gobi Desert.") It does not contain a single word of politics, nationalism, patriotism, or actuality. Its words date from antiquity and are said to be four thousand years old. In all its astounding simplicity it reads:

"The clouds are very beautiful; they are white like cotton. The brightness of the sun and moon continues from day to day."

That is all.

* * *

Talk about slang!—From "This Side of Hell," being the lively story of Dan Edwards, "perfect old-time rip-snorter United States Army sergeant," as told to Lowell Thomas:

"You can bathe my apple tarts with red pepper if that old mess sergeant wasn't just about the foxiest old codger I had ever seen."

"You can put dishwater in my stew if a recruit was even given a second thought in that outfit."

"You can starch my underwear if he even put a hand on me."

"I'll eat mustard on my pie if the mess sergeant don't always blame the cook."

* * *

It really takes a sailor to spin a salty yarn. And no yarn has more tang to it than a salty 'un spun by an old sea-dog. Some beauties are told by Captain S. C. S. ("Sandy") McNeil, late skipper of the "Mauretania," in his jolly reminiscences "In Great Waters." Captain McNeil has recently "swallowed the anchor" after 47 years at sea—having reached the retiring age of sixty. And, naturally, he feels like a fish out of water.

* * *

Which adds joy to his yarn about one Captain who, having retired at the age of 62 after being in command of sailing ships for 37 years, decided to run the home—he had to command something or somebody. There were three daughters at home, very attractive girls and much sought after. It took the old sea-dog some weeks to realize that the only time he had seen the girls was, occasionally, at lunch or dinner-time, though not once at breakfast.

* * *

One morning, therefore, he was up early at 6 a.m., and took a stroll around the house. No one was about. He asked his wife when "the hands turned out?" and was told that it depended on what they had been doing. So he made his way to his daughters' bedrooms. Waking them he told them that they should be out on deck and dressed.

* * *

One girl started to argue with him, told him he was perfectly ridiculous, that he had been asleep for thirty years and it was time he woke up; would he please go out of the bedroom at once! That was like a red rag to a bull; and, with that, he pulled the bedclothes off the girl, went to each of the others and treated them in the same way. Then, upstairs to the maids' rooms, denounced them for skulkers, informed them that in future "all hands" would be roused at 5.30 a.m., and treated them the same.

* * *

His wife told him that a house could not be run like a ship; the maids gave notice and the daughters went off to stay with relations. After six months the old man went back to sea to the joy of his wife and daughters, and to his own intense relief.

* * *

Then there is the story of the Captain who was very keen on cleanliness on board ship, to the point of often being unreasonable and unfair. One day, in walking round the ship, he discovered some dust on a small ledge rather high up. Thinking that he would teach the responsible ones a sharp lesson, he placed a penny there. The following day, on inspection, he told the chief steward what he had done.

"I knew that ledge had been dirty a long time," he added, "it is never attended to."

With that, he reached up for his penny and drew down—two half-pennies. Some steward had seen him and passed word along.

* * *

What golf is to the maniac and tennis to the tennis pot-hunter, so is litigation to the Arab, says Major C. S. Jarvis, Governor of Sinai (in "Yesterday and To-day in Sinai"). There is not an Arab in Sinai who has not at least one unsettled case, and men of standing and repute have, as befits their position, six or seven. An Arab youth cannot lay claim to man's estate till he has a case to bring or defend against another.

* * *

When a criminal case is brought to trial before an Arab Court and it is impossible to prove the accused's guilt, the Sinai Arab will often pin his faith on the "Bishaa"—an interesting relic of the trial by ordeal. The ceremony opens with the heating of a heavy iron ladle over an open wood fire, where it remains until it is white-hot, when it is passed round to the assessors, who have to certify that its condition is satisfactory. The accused then steps forward and is given a cup of water with which to rinse his mouth.

* * *

The ladle is held out to him and, bending forward, he licks it with his naked tongue three times. He then submits his tongue to the Sheikh of the Bishaa and the three assessors for inspection, and if they detect any sign of burning the accused is found guilty. If, on the other hand, the tongue is unmarked he is declared not guilty and "leaves the Court without a stain on his character"—or on his tongue.

* * *

This ordeal appears at first sight to be a brutal and primitive ceremony (adds Major Jarvis), with nothing to recommend it, but it is based on a certain amount of common sense, as the Arabs contend that if a man is guilty he knows that he will be burned and his mouth becomes dry with fright, so that this actually happens. If, on the other hand, the man is not guilty he has no fear and his mouth and tongue have the normal amount of saliva that effectively prevents burning. Try it.

* * *

You never can tell!

Paderewski, when a pupil of the Warsaw Conservatory, played the trombone in the students' orchestra. This brought forth the following remark from his teacher:

"You foolishly waste time on that piano, which will never bring you anything; whereas with your good lips and lungs you'd be sure to get a position in the band at the variety show."
— From "Tromboners, Or Musical Anecdotage."

* * *

And again:

Paderewski, when quite unknown, went to London with letters of introduction to various musicians and notables. He never presented them. Years later he came across these letters and found one to a certain Prince. It read:

"The bearer, Ignace Paderewski, is a fiery young Pole and rather charming when he doesn't play the piano, for which he has little talent."

* * *

Stokowski received a letter addressed to him as:

"To the Commander of the Philadelphia Orchestra."

Country

Morning and night I bring
Clear water from the spring,
And through the lyric noon
I hear the larks in tune,
And when the shadows fall
There's providence for all.

My path of paven grey
Is thoroughfare all day—
For fellowship, till time
Bids us with candles climb
The little whitewashed stair
Above my lavender.
—By John Drinkwater.

Self

Show me the man you honour. I know by that symptom better than any other what kind of a man you are yourself; for you show me there what your ideal of manhood is, what kind of man you long inexpressibly to be.—Carlyle.

LIFE

Life without a plan.
As useless as the moment it began,
Serves merely as a soil for discontent
To thrive in. —Cowper.

How many minutes of the day do you spend with God?

Nipponese Make a Come-Back

Japan's famous field hockey team, defeated by British India, came back strong to trounce the United States 9 to 2 in a hard-fought contest. The nimble Nipponese took the lead after five minutes of play and were never threatened thereafter.

Sunday School Lesson

September 11. Lesson XI — Israel Journeying Toward Canaan—Numbers 10. 11-13, 29-36. Golden Text —Come thou with us, and we will do thee good.—Numbers 10: 29.

I. ON THE MARCH, vs. 11-13.
II. IN SEARCH OF A GUIDE, vs. 29-32.
III. THE UNFAILING GUIDE, vs. 33-36.

INTRODUCTION—Israel had learned much of God at Sinai; they would learn more in the vicissitudes of their later history. The time of their departure from Sinai had come. God had appointed them a mission in the world, a destiny to be fulfilled. They must be off to their God-appointed place in history. Further, just as the adoption of Mohammedanism later awakened among the Arabs an inner force which drove them out on the path of world-conquest, so there was kindled in the newly-formed nation of Israel at Sinai, such an elemental power that they were to be swept over the borders of the desert to invade the fertile lands of Canaan. Thus, early religion showed itself as a terrific power with an instinct for conquest; under the touch of Christ this power was to be transmuted into the world's greatest missionary force.

I. ON THE MARCH, vs. 11-13.

After a year's sojourn at Mount Sinai, Israel finally broke camp and took up the march. Their signal for marching was impressive. In a previous lesson we have seen that when God came down to commune with Moses in the tabernacle, a cloud descended and rested like a veil in front of the tablernacle, Exod. 33: 9. Elsewhere it is said that it was a pillar of cloud by day and a pillar of fire by night, Exod. 13: 21, 22. This cloud now became the divinely-appointed means by which the Israelites were guided in their desert journeys. The devout phantasy of Israel very beautifully conceived the clouds as the chariots on which God journeyed, Isaiah 19: 1 and Psalm 18: 10-14. It was natural for the Israelites to associate Jehovah's goings with the clouds, for his holy mount, Sinai, had been covered with a dense cloud, Exod. 19: 16. The point of emphasis, however, is that the choice of their route through the wilderness was in reality determined for them by God. Through his guidance they passed from the wilderness of Sinai to the wilderness of Paran—a journey of several days or stages, v. 12. Paran lay to the north of Sinai towards Canaan.

II. IN SEARCH OF A GUIDE, vs. 29-32.

Hobab, elsewhere called Jethro, had visited Moses previously at Mount Sinai, and Moses had shown him great deference, Exod. 18: 1-27. Moses now proposed that Hobab should accompany the Israelites as their guide to Canaan. The country through which they must go was desert and offered many dangers; its few inhabitants were for the most part, fierce and hostile like most sons of the desert; its oases and routes were unknown to Moses who was a stranger in these desolate regions. But Hobab was a Midianite, and to the Midianites belonged the greater part of the territory through which Israel must pass. Hobab would prove a most excellent guide. The invitation which Moses extended was enticing. It would be a pact of mutual benefit to both parties, for Hobab would be given a share in the promised blessing at the end of the journey. "It is Jehovah," said Moses, "who has promised prosperity to Israel," and since it is God who has promised, he will surely fulfill, v. 29. Hobab was homesick and declined the invitation. Even a nomad of the desert may feel the longing for home, v. 30. The invitation was repeated, and this time made more pressing. In the picturesque language of the desert Moses suggested that Hobab would serve them as "eyes." Whether Hobab finally yielded is not stated, for the account breaks off abruptly. Judges 1: 16 implies that he went with them.

III. THE UNFAILING GUIDE, vs. 33-36.

It was, surely, in a moment of weakness that Moses requested the company of Hobab en route. What need had he for a human guide when he had a divine one? God did not fail Israel. With his all-seeing eyes he spied out the oases which would form suitable camping-grounds for his people, v. 33. Throughout the journey God associated himself closely with the ark. The lifting of the ark, as a signal that the people should break camp and move forward, must have been an impressive sight. When Israel came into Canaan it was the custom to carry the ark into battle as the symbol of the divine presence.

"I don't care much for the men down here."

"What do you care so long as they care for you?"

A heart at leisure from itself
To sooth and sympathise.

Seedlings Flower Quickly In Electric Hot House

Seedlings only a few weeks old, but already in flower—such has been the experience of two grapefruit plants in the electric hothouse on the roof of the General electric research laboratory at Schenectady.

Under normal conditions, grapefruit plants are at least five years old, and more usually ten, and are at least a few feet high before they flower; but these plants are less than two inches high, have had their heads above the ground only a matter of days, and are still wearing their "baby" leaves. Their flowers are dwarfed, but otherwise normal. Cays Guy Bartlett of the company's News Bureau, in a press account:

"The early flowers are the result of X-ray treatment of the seeds, in the belief of C. N. Moore and C. P. Haskins, who are studying the effect of X-rays on plant life.

"One seed, exposed to 200,000-volt, 30-milliampere X-radiation for two minutes, produced a plant with normal leaf and flower coloration, but with leaves somewhat elongate and diminutive, and with a deficient root system.

"The other seed, subjected to the rays for eight minutes, produced a plant lacking in chlorohyl, or green coloring-matter (which effect frequently is encountered in citrus seedlings), but with the stamens of the flower of the proper golden color.

"The seeds were part of a quantity supplied to the laboratory by the College of Agriculture of the University of California, from stock ordinarily yielding most uniform plants. On March 8 they were rayed, after having been soaked in distilled water and dried; and on March 16 they were planted in seed flats within the electrically heated roof garden. Snow and winter were still in evidence, but within the structure the temperature was uniformly warm. On April 14 the plants began to sprout. Before the end of May the two flowers were in evidence, and on June 6 were in full bloom.

"Whether the tiny plants would have had full-size, or even dwarfed, fruit, will never be known. The experiments called for the removal of the pollen for use in additional experiments.

"'It is hardly thought, however,' said Mr. Haskins, 'that the flowers could have matured into fruit. And neither should it be concluded that early-flowering plants can be produced regularly by X-ray treatment. Other rayed seeds produced such obnormalities as twisted stems, double leaves, and blotches of white; and still others produced apparently normal seedlings. So far, it has been a matter of chance as to how the chromosomes and genes —those tiny but controlling factors of heredity—might be affected by the X-ray treatment of the seeds. Promising leads of many kinds have been obtained in the work that is being done with seeds, bulbs, and plants of many species, but it is too early to make definite statements regarding the results obtained'."

THE COMMON LOT

I would not live my life apart
In some sequestered place;
I would not seek a favored start
In life's exacting race,
But I the common lot would share,
And with my brethren do not dare.

I would not stand upon a peak
In loveless solitude,
No eminence would ever seek
Where those may not intrude
Who share the attributes which be
The birthright of humanity.

The common lot is all I ask,
The common road and role,
The common fare, the common task,
The common prize and goal—
And yet I would, with might and main,
Uncommon excellence attain.

—A. B. C.

One Mind

Lean not on one mind constantly,
Lest here one stood before, two fall.
Something God hath to say to thee
Worth hearing from the lips of all.
—Owen Meredith.

"My uncle in Venice is sending me a gondola. How am I going to play it?" "You don't play a gondola; you throw it over your shoulder like a shawl."

A Nervous World

One out of every four people in factories and offices is afflicted with "nerves," a word often used to describe a condition that is little understood.

Investigations made by Great Britain's Industrial Health Research Board show that the word "nerves" must be used to explain many human factors which hinder industrial efficiency. Says Watson Davis, managing editor of Science Service, in a Tri-weekly Feature (Washington):

"The British investigators ran up against the problem of nervousness symptoms when they looked into the matter of both trivial and serious accidents in industry. Those who are emotionally unstable have more accidents, and there is hope that they may be picked out by simple tests, such as the psychogalvanic reflex or a dotting-machine test. Since accident-prone people are dangerous both to themselves and to those around them, it is important to recognize 'nervous' people before they have accidents.

"The investigations in England have progressed so far that Dr. Major Greenwood, who tells of them in Human Biology, holds out hope that combined use of psychological tests and examinations by specially trained physicians will prove practical.

"Workers in offices where nervous tension is high will be interested in the finding that the 'nerves' of employers are more important to efficient work than the 'nerves' of the employees.

As to the cause of our nervous world to-day, Dr. Greenwood will not agree with those who argue that we are living at too fast a pace. 'In this age of the world,' says Dr. Greenwood, "'nerves' are more important than in the age of William the Conqueror not because the pace of life is faster than in 1066 but for the precisely opposite reason. It is so much slower. Life in old England may have been merrier, but it was certainly shorter than it is now, the struggle for bare existence keener Hardly any people in this country, speaking statistically, are in imminent peril of actual starvation. Millions of people now have leisure for reflection. They may not be acutely hungry, they are not in imminent peril of death, but they are insecure'."

Our Bird Bath

One of the most delightful things about a bird bath, even a simple, home-talent one such as ours, is the dazzling variety of birds which it attracts. During the early morning hours, ou garden seems to have been transformed into an aviary, filled with song and brilliance. A blue jay is usually the earliest arrival. He divides his time between the bath and the chinaberry tree which shades it; splashing around in the water, then darting to a low limb of the tree to ruffle his feathers and shake himself dry. Something about the temperature of the water evidently displeased him this morning, for he splashed only about a third of his usual time; and, as soon as he reached his perch, he voiced his complaint in a series of strident calls. He had scarcely flown away, however, when his place was taken by a cardinal, who trilled merrily for several moments, both before and after his morning dip. A number of cocky sparrows were next; and a flicker ran along the ground close by, awaiting his turn. A plaintive "Me-ow" made me peer anxiously around while my favorite Carolina wren was taking a drink. I soon discovered a sleek gray catbird, swinging on the brier-rose. A mocking-bird and a thrush paused a moment; and then came one who was a stranger to me. Rather a large bird, bright yellow in color, and apparently content to sit for hours on the rim of the bath and emit a peculiar clucking sound. He sent me hurrying indoors to find my bird book. However, I have discovered no picture yet which bears even a faint resemblance to him. And still he sits, contentedly clucking. What can he be?—C.C.

DUTIES

The every-day cares and duties which men call drudgery, are the weights and counterpoises of the clock of time, giving its pendulum a true vibration, and its hands a regular motion.—Longfellow.

LOCAL AND GENERAL

Master Robert Weagant of Hamilton is visiing his grandmother, Mrs. Walter Shannette.

* * *

Miss Bertha Funkhouser of Port Colborne is the guest of Mrs. W.A. Mehlenbacher.

* * *

Mr. Spencer Eager, of the staff of the Montreal Star, is holidaying in Morrisburg.

* * *

Masters Donald and Carl Casselman of Riverside East, spent the past week in Montreal, guests of Mr. and Mrs. P.H. Amey.

* * *

When looking around for homemade candy, just give Coligan's food store a visit. You'll come back.

* * *

Service in the Mission Hall Sept. 4th, commencing at 7.30 p.m. Speaker Rev. G.W. Rhodes.

* * *

Mr. and Mrs. Jack Holmes and children of Montreal, spent Sunday with relatives in town.

* * *

Mr. and Mrs. Jas. Mallen and children have arrived in town, and taken up residence on Union Street.

* * *

Hon. Geo. H. Challies and Mrs. Challies will spend the week-end at their home in town.

* * *

Mr. Fred Farlinger, of the Bank of Montreal, Mimico, Ont., is enjoying his holidays with his parents, Mr. and Mrs. F.E. Farlinger.

* * *

The many friends of Mrs. H.M. Ouderkirk will be pleased to learn that she is recovering favorably after her recent serious illness.

* * *

J.W. Marcellus, of Iroquois, is in Westport, organizing a grading station for the Department of Agriculture, to sell poultry on a graded basis.

* * *

Master Frederick Ault spent the week-end with his cousin, Sam Ault, at Winchester.

* * *

Mr. W.B. Lawson, K.C., has returned from the General Hospital at Kingston to his home in Chesterville, much improved in health.

* * *

Mr. and Mrs. S.H. Marshall and family leave this week for Galt, Ont., where they will take up residence.

* * *

Miss Doris Stubbs left yesterday for Toronto, where she will be the guest of Mr. and Mrs. Ben. McDonald for a few days.

* * *

Mrs. Roy Murdock and two little daughters enjoyed a trip by motor launch to the Thousand Islands, on Tuesday.

* * *

Word was received on Friday last of the sudden death in California of Dr. David Carson, an old resident of Cannamore, who went West about 1895. He was in his 68th year.

* * *

Word has come from Detroit, of the death of Mr. Threfley Clement, a Cannamore boy, which occurred on June 12th, in his 75th year.

* * *

Mr. Haldane Thomas Christie, a son of the late Mr. and Mrs. W.D. Christie, formerly of South Mountain, was accidentally killed in South Africa, when struck by a motor car. He was 65 years of age.

* * *

Mrs. Brady and Mrs. C.S. Babcock of Montreal, have returned from Canton, N.Y., after visiting their sister, Mrs. Sackrider. They were accompanied to Morrisburg by Mr. and Mrs. Henry Sackrider and Mrs. R.H. Sackrider, of Canton, for a short visit.

* * *

Mr. and Mrs. Jed Tuttle left on Tuesday for Lindsay, Ont., where they are visiting friends. They were accompanied by Bruce and Frances Tuttle to Bexley and Fenelon Falls, where they are engaged to teach school.

* * *

Miss Madeline and Mr. James Hogg have returned to their home in Barre, Vermont, after spending two weeks with their aunt and uncle Mr. and Mrs. John Ritchie. They were accompanied home by their parents, Mr. and Mrs. James Hogg.

* * *

Mrs. David Killens and two little daughters left for their home at Schumacher, Ont., on Thursday, after spending a month with her parents, Mr. and Mrs. Merch. Reid.

* * *

Rev. W.A. Mehlenbacher and daughter Grace, and Mrs. A.C. Mehlenbacher, are spending a week with relatives in Port Colborne. Rev. Mehlenbacher will attend the Luther League convention on Labor Day.

* * *

Mr. and Mrs. J.H. Wilson and son Walter of Gravesville, N.Y., Messrs Frank Steed and Douglas Peabody of Port Colborne, Ont., spent several days last week with Mrs. Mary Steed.

* * *

A total of 67,039 persons in Canada were in receipt of old age pensions on June 30, 1932, according to a return issued by the Department of Labor. The average pension amounted to slightly over $19. per month, the maximum allowed by law being $20. per month.

* * *

Upon checking the licenses of the automobiles last week, it was found that forty-one of the forty-eight states of the United States were represented at the Williamsburg outdoor clinic. Florida, California, Louisiana, Texas, New Mexico, Washington and Oregon are among the far-distant ones. Dr. Locke has a woman patient from London, England, taking treatments. Other continents such as South Africa and South America have heard of his miraculous cures, and are represented in the "ring" daily.

* * *

A sufferer from arthritis for the past two years, Mrs. Natalie Sumner Lincoln, of Washington, D.C., known as a writer of mystery stories and as the editor of the D.A.R. magazine since 1915, will shortly visit the Locke clinic at Williamsburg for treatment. Accompanied by Mrs. Marie W. Chamberlain of Washington, Mrs. Lincoln has been recently the guest of friends at Sackets' Harbour, N.Y.

* * *

Try home made candy, cakes and pies on sale at Coligan's food shop. They're the very best.

* * *

Mr. W.S.L. Merrill, who has been undergoing treatment in the Kingston General Hospital for the past six weeks, is reported much improved, and is expected home within the next couple of weeks.

* * *

Winchester lost one of its most enterprising citizens this week when Mrs. Geo. Armstrong moved with her family to take up residence in Kingston, where her daughter, Miss Evelyn, is studying at the University.

* * *

Miss Eleanor Becksted, R.N. of New York City, has arrived home, and is spending two weeks' holidays with her parents, Mr. and Mrs. E. Matt. Becksted. She was accompanied by Miss Maud Deeks, R.N., who spent the week-end with relatives in this vicinity.

* * *

Comfort McIntyre who was born in Kemptville 77 years ago is dead in Watertown N.Y., hospital, of injuries received a week ago when he fell while picking berries near Croghan, suffering a fracture of the skull. For the past 13 years, he had been employed at a manufacturing plant in Carthage as a night watchman.

* * *

Announcement is made that Rev. Gerald Hanley, of the staff of St. Mary's cathedral, Kingston, and Rev. S.B. Plunkett, who was curate of St. Mark's church, Prescott, for the past year, have been loaned to the archbishop of Vancouver for one year, and leave on Sunday to become members of the teaching staff of the new diocesan seminary in that city.

* * *

Reporting the State Hospital Alumni banquet held at the hospital this week, the newspaper gives Miss Rosa Stitt, daughter of Mr. and Mrs. Geo. Stitt, Morrisburg, credit for a well-rendered piano selection. Her many friends here are pleased to know of Miss Stitt's continued success in her chosen profession.

* * *

Mr. James McDonald, aged 42, a son of the late Myrtle McDonald and Catharine Clement, of Finch, died on August 21st, in California. To date, no particulars of the death have been received. Mr. McDonald is a former resident of Morrisburg, he having graduated from the local Collegiate.

* * *

To Miss Mary Laurin is awarded the highest promotion distinction in Morrisburg Public School. Notwithstanding her absence from class through illness, for more than a week at a time, this young lady obtained highest marks each month during the whole year, and was, at the opening of school on Thursday of this week, promoted to Junior 111 class with honours (without writing exams). In handing her the 1932 report card, her teacher paid her the highest compliment that can be bestowed upon a pupil—"You have established a new record in this school."

* * *

A quiet but pretty wedding was solemnized at the United Church parsonage, Iroquois, on Saturday afternoon last, by Rev. T. Knowles, when Miss Audrey Luella, daughter of Y. A. Riddell and the late Mrs. Riddell, town, became the bride of Goldwin Dunn, son of Mr. and Mrs. W.D. Dunn, Ottawa. The bride was attended by Miss Ella Jackson, while the groom was supported by Paul Gordon.

* * *

Notification has been sent through out Canada by the Department of Marine to radio dealers and repair shops, advising them that from Sept. 1st, the law will be strictly enforced in respect to the licensing of radio receiving sets.. A drive will be made to collect all license fees payable, with penalties for those who fail to carry out their responsibilities.

* * *

Died—At Waddington, N.Y., on Monday August 21st, Starr Wells, husband of Minnie Eamon, both former residents of Morrisburg, in his 74th year. Mr. Wells was at one time captain on the Morrisburg-Waddington ferry, and was well known throughout this district. The funeral was held in Waddington, and interment made in Ogdensburg cemetery.

* * *

There passed to his eternal reward Thursday mornng at 7 a.m., a very highly respected citizen of Mountain, in the person of Mr. Edward Scott, in his 76th year. He had gone to visit his daughter, Mrs. R. Hyndman, who resides near Spencerville, for a few days, when he was stricken with a stroke on Wednesday, and passed away on Thursday. His wife predeceased him about two weeks ago. He leaves to mourn his loss, two children, Mrs. Hyndman of Shanly and Mr. Ernest Scott of Scotts Factory.

CHURCH OF ENGLAND

SUNDAY SEPT. 4

St. James Church, Morrisburg—
11.00 A.M.—Holy Communion.
7.00 P.M.—Evensong.
Sunday School 9.45 A.M.
Wednesdays, 8.00 P.M., service of intercession for the sick.

Trinity Church, Riverside—
Sunday, Sept. 4
1.30 P.M.—Sunday School.
2.30 P.M.—Evensong.

After two month's vacation, the local Public School and Collegiate Institute re-opened on Thursday of this week. The staff of the Public School remains unchanged, with the Collegiate staff as follows: Mr. A.D. Campbell, B.A., principal, in charge of mathematics; Miss A.A. Boyd, M.A., science and commercial; Mr. Geo. C. Power, B.A., classics; Miss Margaret Fuller, B.A. English and history; Miss Doris Taddon, B.A., French and German; Miss Aura Graham, B.A., commercial.

* * *

Miss Margaret Storey and her brother, William, of Kemptville, were recently the recipients of a fine white gold wrist watch each, the donor being their uncle, the Hon. G.H. Ferguson, and the gifts were in recognition of their having passed their recent school examinations. The Kemptville Advance says that Margaret and Billy are both proud of their prizes, and possibly more so of their illustrious uncle.

There occurred at the home of Mr. Harvey Irving, Shanly, the death of Mrs. Archie Murphy, of Montreal, who came to spend the week-end with her sister, Mrs. Irving. In apparent good health, she retired and during the night was suddenly stricken with a heart attack, and within half an hour passed away. With her were her two children. Left to mourn her loss are her husband, Mr. Archie Murphy, two children, Archie and Nancy; two sisters, one in the West and Mrs. Harvey Irving of Shanly; one nephew, Willie Buchanan, Shanly, her mother, brother and sister in Scotland.

At a meeting of prominent conservative workers recently held at Brockville, there was formed The Eastern Ontario Conservative Association. This will mean that the Province will be divided into three organizations, namely, Central, with headquarters at Toronto; Western, with headquarters at London, and Eastern, with headquarters at Brockville. The Eastern Organization will take in the districts of Peterboro, Ottawa Valley and St. Lawrence Valley. The first annual meeting of the Eastern section will be held at Brockville, Wednesday, 5th October.

Just to what extent the news of Dr. Locke's miraculous cures is spreading was brought home to the writer during a short trip, which included some of the bordering towns across the river, recently. In the towns, villages, summer resorts, boat liveries and on the ferries, people were discussing the Locke clinic. We were told, and listened to many facts, which had actually been originally reported through the news columns of this paper. "What do you think of Dr. Locke's cures," we were asked. "Is it a sort of christian science cure?" "Not sure," we replied. "Laymen are not in a position to discuss intelligently medical science, nor the value of Dr. Locke's treatments. What the people in the community are most interested in is the verbal reports of the benefits derived by Dr. Locke's patients. We are not so much interested in HOW he did it, as we are in the fact that he did it." "Fifty per cent. of the passengers on this ferry," said the stranger, "are bound for Dr. Locke's clinic." "The Leader" also received a telephone message from a Toronto paper last week, asking us to verify reports of Dr. Locke's miraculous cures.

10.30 A.M.—Rev. W.E. Wright of Rosemount Central Church, Montreal, will preach.

11.40 A.M.—Sunday School and Adult Classes.

7 P.M.—Rev. W.E. Wright.

EDITOR AMAZED AT DOCTOR

On page four of the Morrisburg Leader of 26th August, there appears an article headed "Doctor Amazed at Locke Clinic".

This article sets forth the impressions of Dr. T.E. Kaiser, of Oshawa, after visiting Williamsburg and seein Dr. Locke at work.

Perhaps the whole gist of this article is summed up in the following extract: "My impression of the whole clinic left me not knowing whether to condemn or praise, whether to pass the whole thing up as a fake, or what to think. It was entirely different from anything I have ever seen or imagined."

It seems to me that this doctor would have been wiser to have kept quiet and not made it so plain that he cannot discern truth. Had he taken even a few moments to speak with the patients he would have speedily found whether or not "the whole thing was fake". Any doctor who can do what he has done and is doing is no faker. Dr. M.W. Locke has brought a badly crippled son of mine from the brink of the grave to a healthy state and moving limbs. Any man who dares to insinuate that Dr. Locke is a faker is not desirous of knowing the truth. There are none so blind as those who will not see.

There is no need to add to this. Hundreds, possibly thousands, who have benefited by the treatment of Dr. Locke will back me up. Seeing is believing, and it is regrettable that Dr. T.E. Kaiser has been so short sighted.

JAMES McDONALD,
Editor, Unity Courier,
Unity, Sask.

Ed. Note—Seldom does Scottie move by impulse, but when he does, it is with admirable determination. The distinguished writer of the above letter is the Editor of the Unity Courier, whose son is being successfully treated by Dr. Locke. Mr. McDonald therefore speaks with the courage of his convictions. Personally, we venture to say that the world-famous specialist will be able to look after himself, after the medical profession has written what they think of Dr. Locke's clinic. Meanwhile, "success" spells "defiance" to the critics.

ENTERTAINS TWELVE LADIES OVER EIGHTY YEARS OLD

Friday afternoon, Aug. 26th, Mrs. J. Will Smith, Iroquois, held a unique party when she entertained twelve ladies of that town, all over eighty years of age. Converting her spacious verandah into a drawing room, the guests were entertained there, where they overlooked the beautiful lawn of Mr and Mrs. Smith's residence.

Soon after their arrival, Miss Frances Tuttle, who was assisting in the entertainment, pinned on each lady a small bouquet of the choicest flowers. At refreshment time, while they were indulging in a cup o' tea the old song, "Auld Lang Syne," was heartily sung. On exhibition were many old photograph albums which the guests were interested in looking at through a magnifying glass. Many of their old friends' photos were in these albums. All noticed the change in style of gowns and head dress. Also on exhibition were petrified forms of mosses wood brought from Florida.

The Rev. Thos. Knowles, pas of Iroquois United Church, conveyed the guests to and from the party, and was heard in a short address, and lead in prayer, after all had joined in singing "God be with you till we meet again."
