MORRISBURG — ONTARIO

MR. H. S. RYAN

Mr. H. S. Ryan, aged 36 years, son of Mr. S. P. Ryan, died at St. Michaels Hospital, Toronto, on Wednesday, February 17th, after an illness of about five weeks.

As soon as it became known to the relatives that his illness was of a serious nature, his father visited the hospital and remained with him until assured by his physican that he was out of immediate danger, when Mr. Ryan returned to his duties in Morrisburg. The improvement proved to be more apparent than real, however, for a few days after he arrived home, Mr. Ryan received word that all hopes for his son's recovery had been given up, and shortly afterwards he received the announcement of his death.

Deceased had resided in Toronto for several years, where he held a lucrative position with the Canadian Steel Co.

He is survived by his widow, four brothers and six sisters, namely: Bentley, James, Donald and Leonard; Irene, Eva, Mary, Nellie, Maggie, Mrs. J A. Rozon, and his father, Mr. S. P. Ryan.

The remains were conveyed to Morrisburg on Friday, February 9th and the service, which was held in St. Mary's Church on Saturday, was largely attended, the Town Council, of which Mr. S. P. Ryan is a member, attending in a body. Rev. J. V. Meagher officiated.

Those who attended the funeral from a distance were Dr. and Mrs. W. B. Cavanagh, Cornwall, Mr. A. Eamer, Cornwall; J. LaGru, J. Oudette, and P. Purcel, Dickinsons Landing; C. Kavanaugh, Prescott; Mrs. G. Lessard, Prescott;, Mr. L. Bear, Toronto.

The following gave spiritual offerings:

Mr. and Mrs. J. P. Gormely, Dr. and Mrs. W. B. Cavanaugh, Mrs. K. M McGannon, Messrs. M. A. Campbell, W. Coligan, D. J. Gordon, D. Abbay, E. Shea,, C. A. Kavanaugh, Mr. and Mrs. T. Coligan, Mr. and Mrs. Wm. Prendergast, Mrs. W. A. Biggs, Mr. and Mrs. J. A. Rozon, Mr. and Mrs. Routledge, Mr. and Mrs. L. Mallen, Mr. and Mrs. Moran Mr. and Mrs. G. Lessard, Miss K. McDonald, Mr. and Mrs. F. McDonald, Mr. and Mrs. Shea and family, Mr. and Mrs. W. J. Bear, Miss L. Hill, Mr. and Mrs. L. Bear, Mr. and Mrs. W. Millar, Mr. and Mrs. F. Annis, Miss A. Smith, Mr. and Mrs. B. Lagru, Mr. and Mrs. Turff, F. A. Walpole, B. Coligan, J. S. Legris, R. Coligan, W. J. Routledge, H. Coligan, A. F. Gilmore.

MRS. CATHERINE CASSELMAN

On Monday, February 5th, the death angel visited the home of Jesse J. Casselman, two miles east of Morrisburg, and bore away a loving mother to her eternal reward Her maiden name was Catherine Schwerdfeger. Her husband predeceased her nineteen years ago. She lived to the ripe age of 96 years and was but one week ill previous to her death. She leaves to mourn, three sons and one daughter, Melburn, Mrs. E. Lavis, Emery, and Jesse J.

She was converted to God, and as a consequence loved her Bible and the House of God. She was a regular attendant at prayer meeting as long as health permitted.

The funeral service, which was largely attended, was conducted in the home, by Rev. J. Price, H. M., preacher of Iroquois.

Service of God well done,
Thy glorious warfare's past,
The battle's fought, the victory's won,
And thou art crowned at last.

MRS. FRED DILLEN

The death occurred at her home in Antwerp, N.Y., on Saturday, Feb. 10th, of Mrs. Fred Dillen, daughter of the late Wesley Bowman of Williamsburg Township.

The late Mrs. Dillen was born in Williamsburg Township. Twelve years ago she was united in marriage to Mr. Fred Dillen, son of the late Mr. and Mrs. George Dillen of this town. A few years ago, they moved to Antwerp, N.Y., and became engaged in farming.

The deceased is survived by her husband and six small children.

The funeral took place at her home on Tuesday and remains were conveyed to Morrisburg, arriving on Thursday afternoon. They were placed in the vault.

Mr. H. E. Dillen of Brockville and Mr. O. P. Beckstead of Antwerp, N. Y., accompanied the remains here.

LOST

A Buffalo Robe. Will finder please return same to W. H. FETTERLY, Morrisburg, and receive reward.

NOTICE

Notice is hereby given that after the first publication of this notice, I will not be responsible for any debts contracted by anyone, except by a written order signed by me.

MRS. A. FETTERLY.

Morrisburg, February 2nd, 1923.

$10,000 FIRE AT ROWENA

A fire which will mean a loss of about $10,000 occurred at Rowena on the premises of Mr. Wm. Mullin Tuesday afternoon. In addition to the farm buildings, all the live stock and farm machinery were completely destroyed.

The fire was first discovered in the mow, about 1.30 p.m., by the men who were engaged in threshing, and by this time it had gained such headway that they were powerless to do anything towards checking it. The amount of insurance is about $4,000.

Among the live stock eleven horses, seventeen cows and thirty pigs were burned; also about sixty tons of hay; 1200 bushels of grain, two threshing machines, (one belonging to Mr. John Reddick; one grain grinder; one grain roller one disc drill; one manure spreader, two cultivators, two ploughs; two sleighs two wagons, one manure carrier, cars, ropes, harness, and two gasoline engines.

The men who were engaged in threshing lent all the assistance possible, under the circumstances, and although not effective, deserve great credit. A number narrowly escaped death, and are under the care of a physician, suffering from severe burns.

245 H. P. GENERATOR TAKING CARE OF 420 H.P. LOAD

If there ever was a time in the history of the village of Morrisburg when its citizens were of one mind on a subject, it is at present, on the subject of a better lighting and power service. In making this statement, we believe that we are voicing the feelings of 99 per cent of the residents of Morrisburg, and it is up to those interested to use the proper endeavor to win the other one per cent over to our way of thinking. We invite public discussion on this matter for which the columns of the Leader are open to those who wish to place their views before the public.

Personally, we are making use of both services, light and power, and it is the latter which prompts us to press for better service. It is a hand to mouth service for us, and even the hand is a poor servant when it is tied up.

It does not require expert judgment to realize that our source of electric energy is exhausted, and the source of supply being exhausted, there is but one thing left for the citizens to do—look for another source of supply. Should any one doubt for a moment that the time is ripe for a change, the figures below show the amount of energy our peak load represents, as compared with the amount of energy it is possible to generate:

The domestic peak load is more than 250 H.P. and the H. P. listed for manufacturing purposes is approximately 170, or a total of over 420 Horse Power. The capacity of the generator, in normal water conditions is 245 H.P.. From these figures one can, at a glance, gain some conception of what we are up against.

Is there any way out of this difficulty? This question should have been answered long before this by men residing in this community who have the ability to do so better than we can. We are vitally interested in this matter, however, and therefore voice our humble opinion.

To begin with, we must have an effective organization. In addition to the two members of our council who are on the Light and Power Committee, one citizen representing the light service, and one citizen representing the power service should form a committee to investigate another source of supply, and report to the Council. Should Hydro be the only other source of supply, it will be the duty of our Council to place at the disposal of the manufacturers, by arrangement with the Hydro Commission, the amount of power they may require for manufacturing purposes. The power generated at our local power house will then be available for the purpose which it was first intended—domestic purposes. Due consideration on the part of the power users, we feel sure, will convince them that though the cost of Hydro may be considerably more, they will gain more in the end than the difference in the cost. Increasing the rate of the domestic service a bit and lowering the actual rate of Hydro from the Commission, to the power users, might have the effect of equalizing an increased cost for standard service all around.

A number of citizens are advocating the meter system as a remedy for present ills. No doubt, the meter system would bring relief for the present, but it is impossible to regain standard voltage from a 245 H. P. generator carrying a 420 H.P. load, by installing the meter system. It is a matter of only a few years before the power users will have sapped up electric energy equal to the whole amount generated at our local plant, a condition which cannot be remedied until we have found another source of supply.

Having been convinced that we are seriously handicaped by this condition, any delay, for delay's sake or in the hope of bettering the present source of supply, must inevitably sound the dead march.

We Know a Farm Hand that Works For 30c a Week

Delco-Light is a farm hand that never eats, sleeps or tires.

It pumps all the water needed in both house and barns. It milks the cows, separates the cream and churns the butter.

And Delco-Light does all this work for about 30 cents a week.

Delco-Light also gives you bright, safe, clean electric light everywhere in the house and barns. It makes your home life brighter, happier, more comfortable.

Dependable Delco-Light is made in 25 styles and sizes—a size for every need. All models have the famous four-cycle, air-cooled, valve-in-head engine; only one place to oil. Over 140,000 satisfied users.

Let us tell you how you can secure Delco-Light on our easy time payment plan.

BLUE WATER

A TALE OF THE DEEP SEA FISHERMEN

BY FREDERICK WILLIAM WALLACE

Copyright by the Musson Book Company

CHAPTER SEVENTEEN—(Cont'd.)

For the rest of the week Frank busied himself around the buildings of the plant. A bridge was built across the creek in order to connect Ring's place with the new section, and Bill Dailey's little packet—still running and looking the same as she did in Shorty's boyhood days—was chartered to bring supplies for the proposed store. Captain Asa's funeral came off—all the Long Covers following the body to the little cemetery; and the day after the interment an auctioneer came up from Anchorville and sold the furniture and household goods. Frank and his uncle and Captain Ring went to Anchorville, and the papers of the Company were duly drawn up, though there was some little hitch owing to Frank's inability to produce the deeds of the property he had purchased from the deceased shipmaster.

"Of course," said the lawyer finally, "you may receive them within a few days, seeing that the transaction was only made within the last two weeks. At any rate you hold his receipt and you have given him your cheque for the amount. He was to write his notary about it, wasn't he?"

"Yes," replied Frank; "but I don't know who he is, or I'd ha' called an' seen him."

"Oh, well," returned the other, "I suppose it'll be all right. But I'll hold these papers until I hear from you."

While they were in town the three partners managed to scrape up a six-dory gang for the Lillian, and when they arrived back in the Cove Frank called Jules to one side.

"Waal, Sabot, ol' sock! An' how's Jessie Leblanc these days?"

Jules grinned. "Veree well, Frankee."

"Now, I cal'late you'll be wantin' t' git hitched up some day, eh?"

"Oh, lots of time—lots of time," answered the other. "I mus' git good job before I marry dat girl."

Frank laughed and slapped his old dory-mate on the back. "Waal, I've got a good job for you."

"What's dat? Down at de fish-house, Frankee?"

"No, sir. I'm not a-goin' t' make a flake bird out o' you, Sabot. I want you to go in th' vessel as skipper."

The big Frenchman gasped. "Skipper?" he ejaculated.

"Why, t' be sure," replied Frank. "You kin handle that vessel all right."

"But—but, Frankee, I'm no good off de shore," stammered the other. "I don't know how to navigate——"

"That's all right, Sabot. Uncle Jerry'll make th' first two or three trips with you, an' he'll show you th' ropes. It'll not take you long with the experience you've had."

"Oh, Frankee!"

"Now, we want her t' git out right away. Thar's a six-dory gang waitin' for her down to Anchorville, so git you down thar' to-morrow. Git yer stores aboard—John Watson's goin' as cook—an' bring her aroun' to th' Cove here. D'ye understand, Captain Galarneau?"

"Captain Galarneau?" Sabot rolled the title over on his tongue. "Captain! Oh, Shortee, but I'm please. I hope I be good skipper. I'm glad! I'm glad!" And he danced around and snapped his fingers in the exuberance of his delight, while Westhaver watched him with a secret pleasure at his friend's gratification.

"Can I go an' tell Miss Leblanc about dat, Frankee?"

Frank nodded. "Sure thing! Go ahead! You'll sure be able t' git a few kisses over that bit o' news. Run along now, or some other man'll be cuttin' ye out!"

And with a whoop of joy Jules snatched his hat and ran out of the house.

Westhaver watched him go. "Waal," he murmured, "ef any man deserves it, 'tis him. He's true as steel, that feller, an' it's me that knows it."

September passed in all its languor of cool nights and joyous sunlit days, and when October came in, tinging the foliage with the gold and brown of autumnal colors, there was a louder murmur in the crash of the surf on the rocky beach when the winds of the equinox blew inshore. The wharf and breakwater were completed; the buildings of the Long Cove Fish Company were painted and ready for business; a store had been constructed at the head of the wharf, and Frank had fixed up an office for himself at the rear.

With the completion of the harbor work, a general holiday was declared, and Long Cove gave itself up to rejoicing. Flags flew from the Fish Company's buildings; the upper floor of the store-house was scraped and waxed ready for a dance, and a sort of indoor picnic was held on the lower floor. It was a beautiful October day, with a fresh breeze ruffling the waters of the Bay, and when the Lillian was sighted coming up the coast there was a general exodus to the wharf-end to view the first large vessel entering the harbor of Long Cove. The schooner looked remarkably spick and span with her newly painted hull, houses, and deck gear. There were new dories upon her deck; her new mainmast was a splendid spar, fitted with a topmast from which flew a red flag with "Lillian" on it in white letters, and new lettering on the counter—LILLIAN OF ANCHORVILLE, N.S.

Long Dick Jennings, as harbor-master, was there in all his glory, and his termagant of a wife was strutting proudly by his side when the rangy fisherman greeted Captain Galarneau with a little speech, and presented him with a silver-mounted umbrella for being the first vessel master to open the new harbor. Of course, Frank was responsible for all this, and it was he who directed everything.

The Lillian was securely moored, and the Anchorville gang aboard of her followed their new skipper up to the buildings and participated in the fun. Everybody, young and old, men, women, and children, had congregated at the Cove from all up and down the coast, and the Company's grounds almost represented a country fair. There were running races, high jumping, dancing competitions, weight throwing, and even a dory race out in the Bay, which caused a great deal of excitement. In the breathing spells between his organizing duties, Frank gazed over the happy, laughing and shouting throng, and wished he had Lillian Denton by his side and viewing the fun.

In the evening a great "hop," or dance, was held in the storage loft, and in the light of the lanterns and with the fiddlers working full steam ahead the Long Covers tripped the light fantastic until the small hours. It was certainly a day of days in the settlement's calendar, and when a deputation of the guests came to thank him, Frank said that the gathering would be an annual affair—an assurance which was enthusiastically received.

Long Dick—almost three sheets in the wind—clasped Westhaver affectionately by the hand. "Shay, you ol' dog! You've done more t' wake up this place than any man I knows on, ye hev. Long Cove's a-goin' t' be some place after this, m'lad, an' 'tis you what's done it. You're my boy, Frank, an' I mus' shay I've enjoyed myself more t'day than ever I did sence I was shingle." Then in a confidential whisper. "Shay! This Lillian what th' vessel's named after—she ain't one o' them Bay County Irish women, is she?"

"No, Dick," laughed Westhaver.

"Das all ri' then," replied the other, looking around half-fearfully. "'Cause my ol' woman is one o' them, an' she's a terror, Frank—a holy old red-headed terror. I'd sooner see ye bunk along o' th' devil himself, horns, hoof, an' tail, than hev a Bay County Irisher for a wife. Steer clear o' them, son, 'cause I know!" And he winked knowingly as he strode home.

Before he retired that night Frank looked out of his bedroom window. The murmur of the surf on the beach below rose to his ears, and his eyes drank in the glory of the clear starlit sky. Below, everything was dark, and naught pierced the opacity of land and sea but the red light at the head of the wharf, a lantern hanging in the main-rigging of the Lillian, and the green starboard light of a sailing vessel standing up the Bay. For a pace he stared out into the night, and when at last he turned away he murmured, "Aye, Lily, we're started now. Everything is shapin' my way, so wish me smooth sailin' until th' day when I go to claim you, sweetheart!"

Next day while the partners were engaged in unloading salt out of the Lillian's hold, a team with two occupants seated in it came driving down the wharf road. Everybody knocked off to have a look at the strangers. "Who kin that be?" queried Captain Clark.

"Thar's Jim Henderson from Anchorville a-drivin'," answered a man; "but I don't know th' feller that's with him."

The visitors hitched their horse up at the office, and while the other remained seated, Henderson, the driver, came along to the group on the wharf.

"Is Captain Frank Westhaver here? Oh, you're th' man, sir! Waal, here's a party wants t' see ye, Cap'en. I've jest druv him over from town."

Frank handed his tally board over to Uncle Jerry and went up to the buggy. Its occupant was a clean-shaven, lantern-jawed man, with an exceedingly pale face and faded grey eyes. He looked at Westhaver, and spoke in a perky voice: "Captain Frank Westhaver?"

"Yes, sir!"

The other leaned forward in the seat. "Ah—ahem! You're the party who purchased the property of the late Asa Crawford, master mariner, of this place?"

"Lawyer by his talk," mentally noted Frank, and aloud, "Yes, sir. What about it?"

The other ignored the question. "Ah—ahem! You can prove your title to the property, Captain?"

"Yes!" replied the other, wondering what was in the wind.

"Have you got the deeds?" The stranger gazed hard at him.

"No—not yet," answered Westhaver. "But I expect they've bin put through all right."

The other nodded. "Ah—ahem! What have you to show that you purchased the property?"

Frank resented the interrogations. "What d'ye want t' know for?" he asked. "Who are you, anyway?"

The other gave a dry smile and handed Frank a card. "Pardon me—my card!"

"Wrigley an' Wrigley, Advocates and Public Notaries, Anchorville," Frank read. "Um! An' who are you representin'?"

"Ah—ahem!" The lawyer cleared his throat again. "My client is the legal heir to the Crawford estate, and he wishes to ascertain if the property has really been sold."

"Then you'll be representin'——"

"Captain Robert Morrissey, of Boston, and nephew of the deceased."

Westhaver knew it instinctively. "Waal," he said, "come into the office an' I'll show you my paper."

Frank produced the receipt written out by himd and signed by Captain Asa, and he also showed the stub of the cheque. The lawyer produced a note book and pencil. "You have no objections to me making a copy of this receipt?" he said.

"No!"

"And the number of your cheque was 'three,' and dated exactly the same date as this receipt—thirtieth day of August?"

"Yes!"

(To be continued.)

Minard's Liniment for Burns & Scalds

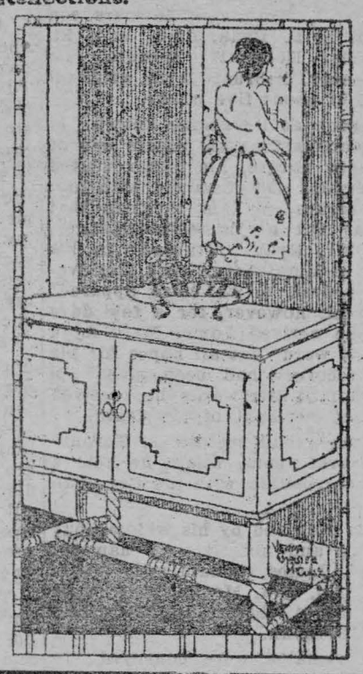
NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

HOME BEAUTIFUL

By DOROTHY ETHEL WALSH.

Confusing Reflections.



Decorations which bring confusion to the mind of the beholder are to be regretted. Reflections will many times bring turmoil into mental calm. There are welcome reflections and unwelcome ones, and to-day we wish to warn against the latter.

There is a generally accepted belief that a shining surface indicates a lack of wear, and therefore those who worship the "new" revel in tables which glisten, desks which take on somewhat the guise of mirrors and other articles which send forth piercing beams of light from their glazed coatings.

Such reflections belong to the unwelcome class. Why, for instance, should the floor be polished to such an extent that it mirrors the table legs? This confounds any structural value of the decorations. Where the floor should plainly spell strength and firmness it assumes the role of a limpid pool, and we are confused by the incongruity of its mask.

Soft, glossy surfaces are best. They show the wood to its best advantage, and never do they become officious and take unto themselves the task of showing you other articles of furniture reflected on their different planes.

The Woman of To-Day

Confession Is Good.

The writer of this could take you to a married couple who can boast that for six years unalloyed harmony has reigned in their home. Before that period, however, there was discord sufficient to spoil the note of perfect happiness.

Then there came to the wife an idea. Her conscience told her that by certain things she had said and done, and was in the habit of doing, she had contributed to the discord. And—not in any spirit of superior criticism—she knew that she could name the items of her husband's contribution.

Her idea was that she and he should exchange New Year resolutions—that there should be a joint reformation, following the admission that each had been to blame. So when he came home on New Year's Eve she had his meal ready to the minute—sometimes she kept him waiting; one of her faults was unpunctuality—greeted him with a smile, and was more like the girl he had married than she had been for months. He sensed the change, and it put him in good humor.

The meal over and cleared away quietly, she broached her idea for an exchange of resolutions, so that they might start the New Year happily and harmoniously. Each was to tell the other, candidly but calmly, of their faults. There were to be no arguments or counter-thrusts; but if conscience told them that the fault really existed a solemn resolution was to be made to end the fault or conquer the failing.

He, highly strung, and suffering in a very real sense from the discord in his home, responded gladly, his eyes ashine with eager hope.

"Tell me one of my faults, dear," she said gently.

And he told her, just as gently, that one was unpunctuality. He was away all day; for economy he had but the lightest of lunches. When he arrived at home in the evening he was tired and hungry. And many times she hadn't even peeled the potatoes. She admitted the fault, and made a resolve that in the future she would be punctual.

In turn, he admitted the fault of not talking to her. Once he had always told her of the day's doings, chatted of the world's happenings, and so on. Of late he had ceased that happy habit. Now he made a New Year's resolution to do as he once did.

And she promised not to "crash and clatter."

And he made a resolution to be tidy.

When the tale of resolves was complete his arm was round her, and she was crying softly as she snuggled up to him.

They kept their exchanged resolutions and were happy ever after.

To the tens of thousands of married couples who read this article the scriptural command might, in all reverence, be applied: "Go thou and do likewise." Admit your faults, exchange resolutions, and so make 1923 a really happy year.

A Timely Suggestion.

Cool nights suggest more bed covers. Old comforters can often be made to do double service by doing a little extra work on them. When the top is much worn, but the lining is in a good state of preservation, a new top can be pieced from extra pieces that we have laid by, either in a design or crazy work. Carefully launder the old comforter then tie on the top. Be sure to have the border come well over the edge of the old lining and whip down carefully. Old comforters too much worn to be used as covers can be made into very good mattress pads. Ten yards of outing will make the top and bottom, tied in the usual way. Much worn blankets used in the place of batting in making new comforters are very good.—Mrs. H. E. K.

A Cake and a Story.

I am a young girl eighteen years old and would rather do the baking than be off to a moving picture show as some girls would, but my motto is: "There is no disgrace in the Family Cook Book, so learn while you are young." My grandmother taught me this when I was a little girl and I am very thankful to her.

It certainly does take a lot of cake here, as I live on a 120-acre farm and with hired help, threshing men, unexpected company, and everything else included, a heap of baking has to be done. I have done most of the baking for the last five years, having been alone for weeks at a time. It makes one wonder sometimes what to bake, but when asking my brother he always says this one cake.

I have found it a good idea when making a cake with soda in it to add about one-quarter of a teaspoonful of baking powder. It makes it much better. The cake recipe I am sending you makes two large cakes and will keep moist longer than lots of others I have made. I find it a good idea to try a cake by dropping a little of the batter on a greased tin before putting the remainder of the batter in the larger tins for then, if your cake is too rich I find it a good idea to add a little more milk or water, or a little flour. It does not make the cake tough if you are careful how much you use. I always use a level teaspoonful or cupful unless otherwise specified.

I always like good cake and think it a helpful idea to pass them on to others. A number have asked for this cake recipe, and it is my favorite. I hope you will like it.

Marble Cake.

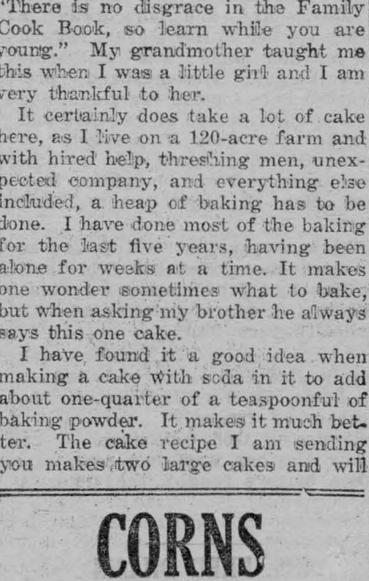
Light part: Whites of two eggs, 1 cup white sugar, ½ cup butter or lard, ½ cup sweet milk, 2 cups flour, 2 teaspoons baking powder.

Dark part: Yolks of two eggs, 1 cup brown sugar, 1-3 cup butter or lard, ½ cup sour milk, ½ cup molasses, ½ teaspoon cloves, ½ teaspoon allspice, 2 cups flour, 1 teaspoon soda.

Drop together and bake in a moderate oven about forty-five minutes. If you prefer you may use all lard with a pinch of salt instead of part of each.—B. D.

CORNS

Lift Off with Fingers



Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

Dye Silk Stockings Blouse or Sweater in Diamond Dyes

"Diamond Dyes" add years of wear to worn, faded skirts, waists, coats, stockings, sweaters, coverings, hangings, draperies, everything. Every package contains directions so simple any woman can put new, rich, fadeless colors into her worn garments or draperies even if she has never dyed before. Just buy Diamond Dyes—no other kind—then your material will come out right, because Diamond Dyes are guaranteed not to streak, spot, fade or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

The sap in a vine circulates with five times the force of blood through the most important bloodvessel in a horse's leg.

Minard's Liniment for Coughs & Colds.

Garden tulips were introduced into Britain through Holland in the 16th century.

Campana's Italian Balm

Prevents chapped hands, cracked lips, chilblains. Makes your skin soft, white, clear and smooth.

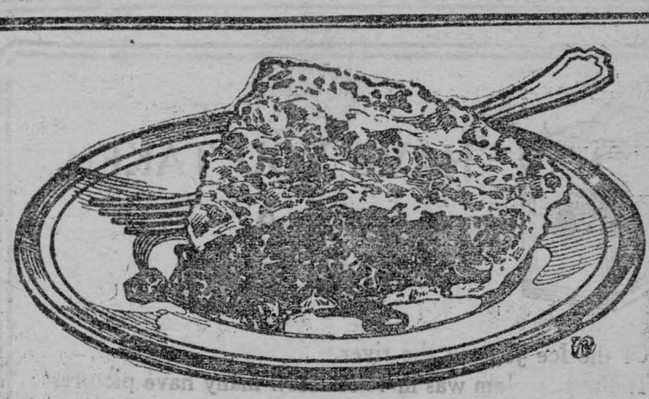
MOTHER! MOVE CHILD'S BOWELS

"California Fig Syrup" is Child's Best Laxative

Hurry Mother! A teaspoonful of "California Fig Syrup" now will thoroughly clean the little bowels and in a few hours you have a well, playful child again. Even if cross, feverish, bilious, constipated or full of cold, children love its "fruity" taste, and mothers can rest easy because it never fails to work all the souring food and nasty bile right out of the stomach and bowels without griping or upsetting the child.

Tell your druggist you want only the genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother, you must say "California." Refuse any imitation.



Luscious— Made With Raisins

—and already baked for you

SAVE the trouble and the time of baking pies at home, yet give your men folks pies that are exactly to their taste.

Master bakers and neighborhood bake shops in your city are making luscious *raisin* pie fresh every day. Your grocer or these bake shops can supply them.

Taste them and you'll know why there's no longer need to bake at home.

Crust that's light and flaky—tender, thin-skinned, juicy fruit, the juice forming a delicious sauce! There's nothing left to be desired in a pie.

Made with finest seeded Sun-Maid Raisins.

1560 calories of energizing nutriment per pound in practically predigested form. Rich in food-iron, also—good food for the blood.

Make cakes, puddings and other good foods with them.

You may be offered other brands that you know less well than Sun-Maids, but the kind you want is the kind you know is good. Insist, therefore, on *Sun-Maid* brand. They cost no more than ordinary raisins.

Mail coupon now for free book of tested Sun-Maid recipes.

LAUSANNE CONFERENCE FAILS TO RESTORE PEACE IN THE NEAR EAST

Three Months' Negotiations End in Collapse—Turks Reject Clauses Concerning Future Economic Regime and Allied Formula Dealing With Juridical Guarantees for Foreigners.

Lausanne, Feb. 4.—The European statesmen have failed to restore peace in the Near East, and the conference called for this purpose definitely collapsed to-night after desperate efforts to save it—efforts which were continued up to the very moment Lord Curzon's train left.

Never in the history of political conference were such amazing scenes witnessed as marked to-day's tragic ending of the negotiations which extended over almost three months. Practically the whole diplomatic world ran after Ismet Pasha, head of the Turkish delegation, trying to induce him to sign the treaty, but Mustapha Kemal's favorite general was immovable. He said "No" to all—British, French, Italians and unofficial representatives of the United States.

The United States representatives, Ambassador Child, Joseph C. Grew and Rear-Admiral Bristol, called upon him after the break, in an endeavor to save the conference, and Lord Curzon delayed his departure for half an hour in the hope that Ismet Pasha would change his mind, but all in vain.

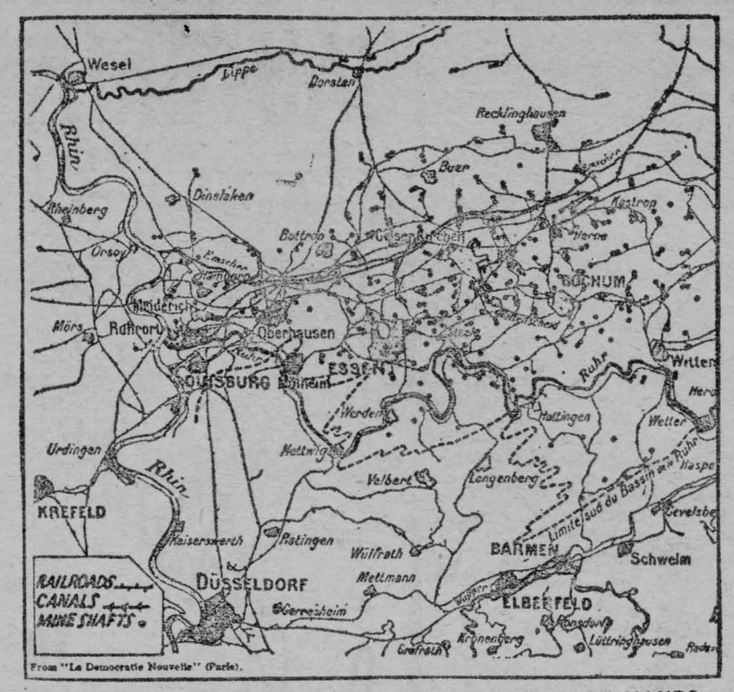
The conference failed because the Turks refused to accept the clauses concerning the future economic regime in Turkey and, to some extent, because they would not accept the Allied formula dealing with juridical guarantees for foreigners, which were to replace the existing extra-territorial privileges.

Briefly, the Turks wanted to strike from the treaty all clauses binding them to recognize contracts and concessions granted by the old Ottoman Empire. They maintained that they should be left free to study these questions and, if necessary, reopen negotiations concerning them with the interested countries and peoples.

They would not, they said, accept the economic burden imposed upon the new Angora Government by the old Turkish regime, which had handed out concessions right and left in the form of capitulations; they insisted that vast concessions had been granted without fair return and they wanted the right to revise all of them.

The Turks agreed to a formula whereby foreign legal advisers would be appointed to reframe the legal code and be empowered to receive complaints from foreigners that the law was unjustly administered, but insisted that the advisers be selected not by The Hague permanent court of international justice, but by neutral countries which had not participated in the Great War. They absolutely declined to give the advisers control over all the arrests of foreigners or domiciliary searches, maintaining this was a violation of their sovereignty.

Further concessions as to both economic and juridical affairs were submitted to Ismet Pasha at the last moment by the Allies, but he remained obdurate and declared that Turkey could not sign such a peace.



THE INDUSTRIAL HEART OF GERMANY IN FRENCH HANDS

The Ruhr area is estimated at about 1,234 square miles in extent, but something of its immense mineral wealth can be gathered from the above map. Each of the round black marks represents a mine shaft. The district has a population of four million, of which a half million are coal miners. In pre-war years its coal production was 113,000,000 tons a year. It has a visible reserve of 54 billion tons, and an estimated unmined reserve of 220 billion tons. Steel production in the year the war ended amounted to ten million tons. Over nine hundred million dollars is invested there.

The Morality of the Apple Barrel

BY W. M. MORRIS

W. M. Morris
Ontario School Trustees' and Ratepayers' Association.

I was travelling on the C.P.R. train to Regina last winter and entered into conversation with a business man from Calgary. After discussing general topics for some time, this gentleman informed me that the province of Ontario was losing a magnificent opportunity to trade with the western provinces because of her dishonesty. Having been a resident of Ontario all my life, and my parents before me, I displayed some resentment to the insinuation that the people of Ontario lacked so fundamental a trait of individual and national character. He proceeded, therefore, to prove the statement by telling me the story of his financial venture in the produce market. "I too," he said, "come from Ontario and regret the impression the West has of my native province as much as you do. I carried on a large produce business in a thriving town in Ontario for many years before coming West, and for some years purchased apples and other Ontario fruits for consumption in the province of Alberta. I was compelled to sell out the business a few years ago because of dishonesty on the part of the Ontario shipper.

"For instance," he said, "a friend of mine still carries on a large business in Calgary, buying from Ontario. A car load of apples arrived in Calgary in the fall of 1921 and on the arrival of this shipment my friend called me by telephone and informed me that this car load came from my home town and asked me if I would check over the names of the shippers for him, with recommendation of the apples he should buy. Knowing everyone in the town and for several miles around it, I was able to give him fairly accurate information re the character of the shippers and advised as to whose apples he would be safe in buying. He read the names over and the conversation that took place over the 'phone was something like this, 'Mr. A., I wouldn't buy anything he sells,' Mr. B., about fifty fifty with him,' 'Mr. C., you are safe in buying anything he ships.' He read off all the names of the shippers and I recommended about half of the apples in the car. He informed me later that he bought all the apples that were worth purchasing.

"That is what I mean when I say Ontario is dishonest. The pepole of the East cannot hope to build up a permanent trade in produce with the West while they practise such deceptive tactics in the packing of fruit. There is a great demand for apples, peaches and plums in the West and the East can grow these in abundance but it is a great loss to both provinces if people have no confidence in one another."

I was travelling on the train through Nova Scotia last June and in conversation with a commercial traveller, related the above story from the West. He immediately assured me that such would not be the case in Nova Scotia. He went on to say that $8,000,000 worth of apples were shipped from the Annapolis Valley to Great Britain in the fall of 1921 and he would guarantee that every box contained the apples represented. This gave me an opportunity of becoming on good terms with an audience of educationists in Truro and I congratulated the people of the Maritime Province for their integrity. The story was well received as human nature everywhere appreciates congratulations.

At the close of the meeting, however, a member of Parliament for the Annapolis Valley approached me with the remark, "That was a good story." I replied that I thought so myself. He said, "Let me tell you another one. I live in the Annapolis Valley and am a member of the local Legislature for one of the constituencies there. I have given a prize at the Fall Fair for some years, for the best packed barrel of apples. Last year the prize barrel was given to me as a present. I opened it in my cellar and was surprised to find that the apples were as represented for about one foot down and then the quality became worst until, when I reached the bottom of the barrel, the quality was so poor that I considered it hardly worth taking. You see the people of Nova Scotia are no more honest than those of Ontario. The reason the apples that were shipped to Great Britain were as represented, is because they are delivered through a co-operative selling agency and the agent claims the right to inspect any box. The packer of my apples apparently knew the difference between the treatment of a barrel of apples and a barrel of sermons—the latter may be turned up to get a fresh one, consequestly he took chances on disposing of a poor class in the bottom of the barrel."

Evidently human nature is much the same all over the world. It does not matter whether the deception is practised in the shipping of apples, in the selling of groceries, in practising a profession or serving in public office. If Ontario has lost the prospect of trade with the West because she is dishonest, the same lack of integrity in all the relationships of life will undermine both individual and national life.

People are in the habit of speaking of our vast material resources as if these things held the key to national greatness. A little thought will show that these things are valueless in themselves. As a matter of fact, they have been here for centuries waiting for human intelligence and skill to discover and develop them. Africa possesses untold potential riches and can boast of many centuries of history, but remains the Dark Continent. It is the human factor that counts most. We have infinite possibilities for service available in the talents of our children. What values our children may realize in efficiency and character will, in a great measure, be determined by the educational agencies established for the development of their talents and inspiration for service. The future of our country will be determined by the growth of the youth into men and women of skill, insight and vision, who will not only transmute our natural resources into wealth and prosperity, but will, at the same time, establish the nation in strength, righteousness and honor.

Righteousness exalteth a nation. It is standard of character that counts both in the individual and the nation. The German youth were given a scientific and intellectual training without a sufficient balance of moral character. Lacking this, they came near destroying the civilized world and themselves along with it. Scientific knowledge is a very dangerous weapon of self-destruction in the hands of a person of low moral standards. The first fundamental of national prosperity is individual integrity. Then people can have faith in each other.

Weekly Market Report

Toronto.

Manitoba wheat—No. 1 Northern, $1.24.

Manitoba oats—Nominal.

Manitoba barley—Nominal.

All the above track, Bay ports.

American corn—No. 2 yel., 87½c; No. 2, 86c.

Barley—Malting, 60 to 62c, according to freights outside.

Buckwheat—No. 2, 77 to 79c.

Rye—No. 2, 83 to 85c.

Peas—No. 2, $1.45 to $1.50.

Millfeed—Del., Montreal freights, bags included: Bran, per ton, $25; shorts, per ton, $27; middlings, $28.50; good feed flour, $2.

Ontario wheat—No. 1 white, $1.11 to $1.13, according to freights outside; No. 2, $1.03 to $1.10.

Ontario No. 2 white oats—45 to 47c.

Ontario corn—Nominal.

Ontario flour—Ninety per cent. pat., in jute bags, Montreal, prompt shipment, $5.10 to $5.20; Toronto basis, $5.05 to $5.15; bulk seaboard, $4.95 to $5.00.

Manitoba flour—1st pats., in cotton sacks, $7.10 per bbl; 2nd pats., $6.60.

Hay—Extra No. 2, per ton, track, Toronto, $14 to $14.50; mixed, $11 to $13; clover, $8 to $12.

Straw—Car lots, per ton, track, Toronto, $9.50.

Cheese—New, large, 27c; twins, 27½c; triplets, 28½c; Stiltons, 29c. Old, large, 29c; twins, 30c; Stiltons, 31c.

Butter—Finest creamery prints,, 43 to 45c; ordinary creamery prints, 40 to 41c. Dairy, 30 to 31c. Cooking, 22c.

Dressed poultry—Chickens, milk-fed, over 5 lbs., 34c; do, 4 to 5 lbs., 27c; do, over 5 lbs., 30c; do, 4 to 5 lbs., 25c; do, 2 to 4 lbs., 25c; hens, over 5 lbs., 28c; do, 4 to 5 lbs., 26c; do, 3 to 4 lbs., 25c; roosters, 25c; ducklings, over 5 lbs., 31 to 33c; do, 4 to 5 lbs., 25 to 28c; turkeys, young, 10 lbs. and up, 38c; do, old, 23c; geese, 21c.

Margarine—20 to 22c.

Eggs—No. 1 candled, 35 to 36c; selects, 38 to 40c; new laids, 45 to 46c; cartons, new laids, 47 to 48c.

Beans—Canadian, hand-picked, lb., 7½c; primes, 7c.

Maple products—Syrup, per imp, gal., $2.50; per 5-gal. tin, $2.40 per gal. Maple sugar, lb., 23 to 25c.

Honey—60-lb. tins, 12 to 12½c per lb., 5-2½-lb. tins, 13½ to 14½c per lb.; Ontario comb honey, per doz., $3.75 to $4.50.

Potatoes, Ontarios, No. 1, 90c to $1; No. 2, 85 to 90c.

Smoked meats—Hams, med., 26 to 28c; cooked ham, 38 to 40c; smoked rolls, 26 to 28c; cottage rolls, 32 to 35c; breakfast bacon, 32 to 35c; special brand breakfast bacon, 38 to 40c; backs, boneless, 36 to 42c.

Cured meats—Long clear bacon, 50 to 70 lbs., $20; 70 to 90 lbs., $19; 90 lbs. and up, $18; lightweight rolls, in barrels, $38; heavyweight rolls, in barrels, $35.

Lard—Pure tierces, 16½c; tubs, 17c; pails, 17¼c; prints, 18½c. Shortening tierces, 14½ to 15c; tubs, 15 to 15½c; pails, 15½ to 16c; prints, 17½ to 18c.

Heavy steers, choice, $7 to $7.50; butcher steers, choice, $6 to $6.50; do, good, $5.50 to $6; do, med., $5 to $5.50; do, com., $4 to $5; butcher heifers, choice, $6 to $6.50; do, med., $5 to $5.50; do, com., $4.25 to $4.75; butcher cows, choice, $4.50 to $5.25; do, med., $3 to $4; canners and cutters, $1.75 to $2.25; butcher bulls, good, $4 to $4.50; do, com., $2.25 to $2.50; feeder steers, good, $5.50 to $6; do, fair, $2.50 to $3.50; calves, choice, $11 to $12.50; do, med., $9 to $11; do, com., $5 to $8; milch cows, choice, $70 to $90; springers, choice, $80 to $100; lambs, choice, $11 to $12; sheep, choice, $6.50 to $7; do, culls, $3 to $4; hogs, fed and watered, $10 to $10.50; do, f.o.b., $9.25 to $9.75; do, country points, $9 to $9.50.

Hog quotations are based on the prices of thick, smooth hogs, sold on a graded basis, or selects, sold on a flat rate. Bacon selects, sold on the graded basis, bring a premium of 10 per cent. over the price of thick, smooth hogs.

Montreal.

Corn, American, No. 2 yellow, 91½ to 92c. Oats, Canadian western, No. 2, 63 to 64c; do, No. 3, 58 to 59c; extra No. 1 feed, 55 to 56c; No. 2 local white 53 to 54c. Flour, Man. spring wheat pats., firsts, $7.10; seconds, $6.60; strong bakers', $6.40; winter pats., choice, $6.50. Rolled oats, bag 90 lbs., $3.15 to $3.25. Bran, $26. Shorts, $28. Middlings, $33. Hay, No. 2, per ton, car lots, $14 to $16.

Cheese, finest easterns, 26c. Butter, choicest creamery, 41½ to 42c. Eggs, fresh, 48c; selected, 36c; No. 1 stock, 32c. Potatoes, per bag, car lots, $1 to $1.10.

Young cows, in good flesh, $4.25; com., $3.25 to $4; med. heifers, $4 to $4.50; cutter cows, $2.50 to $2.75; canners, $1.75 to $2; do, thin, $1.50; dairy type bulls, com., $3.50; do, good weight and fleshing, $4; veal calves, $9 to $10.50; better ones, $11 to $11.25. hogs, selects and good quality butcher, $11 to $11.25; thick fat heavy hogs, $10.25; western hogs of suitable weights, $10.50 to $10.75; sows, $8.50 to $9.50.

That the earth is much older than the sun is the opinion of a well-known scientist.

A Hockey Star

Goalkeeper Roach of the St. Pats hockey team, Toronto.

Veteran V.C. Dies.

Sergt. George Richardson, V.C., who was decorated for conspicuous bravery on the field at Cawnpore, India, in 1859, when he saved his officer's life by engaging six natives, five of whom he killed and the sixth he routed. At the time he had a broken arm and a wounded leg. He died last week at the age of ninety-two years, in a London, Ont., hospital.

Historic Mansion Burned by Irish Rebels

London, Feb. 4.—Moore Hall, the historic mansion near Claremorris, County Mayo, burned by Irish Republicans, was the property once of George Moore and was the scene of some of his best known novels. "The Lake" was laid about Moore Hall, which also figures prominently in the novelist's reminiscences.

The mansion in recent years has been the home of the writer's brother, Colonel Moore, a Free State Senator. His political activities led to the destruction of the building where the independence of the Connaught Republic was signed in 1798.

Poise.

An apt definition for poise is: The quality that keeps a hostess smiling when a departing guest holds the screen door open and lets the flies in.

FRENCH TROOPS AT BLACK FOREST EDGE

Cross Neutral Zone Set Up by Treaty and Take Baden Towns.

Berlin, Feb. 4.—A French detachment of cavalry, infantry and artillery left the Kehl Bridgehead opposite Strasbourg this morning and, crossing into the fifty kilometre neutral zone set up by the Treaty, occupied Appenweier and Offenburg, in Baden.

This gives the French control of the Frankfurt-Basle railway over which coal shipments were made to Switzerland, Southern Wurtemburg, Bavaria and Italy. It brings France to the edge of the Black Forest, Germany's chief timber resource, and strategically gives them control of Stuttgart across the forest.

The movement is declared to be a sanction for interrupting coke shipments from Czecho-Slovakia to France. It appears France protested against interruption of these shipments across Germany on January 27 and Germany replied yesterday that the interruption was due to the general disorganization of German traffic, which in turn was due to the Ruhr occupation. The Germans, however, admit they have been holding up the shipments.

The French charges this violated Article 321 of the Versailles Treaty, which stipulates that Germany must permit international traffic. But the Germans say it is not a violation as the French are to blame.

Whoever Won War, Britain Must Pay

A despatch from London says:—"If there is doubt about who won the war, there now remains no doubt who is to pay for it."

London is chuckling over this bon mot attributed to Sir John Simon, Liberal leader and prominent lawyer, apropos of the American debt settlement.

Belgium, which has promised Canada participation in its favored nations treaty arrangements, imported from the Dominion in the last fiscal year goods to the value of $202,866,000. The principal item was preserved fish, accounting for $178,226,000.

ONTARIO GOVERNMENT REVENUE FROM LIQUORS $4,000,000 YEARLY

A despatch from Toronto says:—A number of queries of general interest were answered on Friday by the Ministry in the Ontario Legislature. One of them, by revealing that the province in ten months had received $3,400,000 from the sale of liquor, suggested that Ontario can not with complete consistency point the finger of scorn at Quebec for participating in the liquor traffic. Another, by obtaining the amounts which the Amusement Tax had returned, showed how dearly the public was paying to the Ontario Treasury for its theatrical diversions.

In regard to the liquor traffic, Hon. Mr. Raney volunteered the following statistics: Value of stock on hand in dispensaries on October 31, 1921, $1,121,259; value of stock on hand in dispensaries on October 31, 1922, $734,078; receipts from sales during ten months ending October 31, 1922, $3,452,372.

Hon. Peter Smith detailed as follows the returns which the Amusement Tax had yielded in Toronto, Hamilton, Windsor and Ottawa during the years 1920, 1921 and 1922: Toronto, $602,749 in 1920; $630,333 in 1921; $599,743 in 1922. Ottawa, $67,245 in 1920; $70,288 in 1921; $75,125 in 1922. Hamilton, $125,919 in 1920; $127,393 in 1921; $112,724 in 1922. Windsor, $22,354 in 1920; $20,472 in 1921, and $17,572 in 1922.

The other questions were more briefly answered. R. T. Harding, K.C., was said to have already benefited to the extent of $22,948 from the public treasury for his labors in the timber probe. He claims, it was added, the further sum of $3,500. The number of loans made under the Community Halls Act was given as 20 and the amount involved as $5,700 during 1921 and $28.503 in 1922. The sum of $2,000 was said to have been loaned under the Co-operative Marketing Loan Act, only one loan having been made since the legislation's inception in 1920. Hon. Mr. Raney stated that one, Webb, was in temporary employ of the O. T. A. enforcement branch.

Hon. W. E. Foster

Hon. Peter Venoit

The resignation of the premier of New Brunswick came as a surprise last week, when he announced to a caucus of his supporters that the pressure of private business made it impossible for him to continue in that office. He is being succeeded by Hon. Peter Venict, Minister of Public Works.

Stinnes' Right Hand Man Arrested by French

London, Feb. 4.—Max Eathelte, manager of the Victoria Mines, and one of Hugo Stinnes' right hand men, has been arrested and sent to Muenster, says a despatch to The Times from Essen. The cause of this arrest is not known.

Four hours hard thinking exhausts the tissues as much as ten hours of manual labor.

FRANCE STATES TERMS FOR RENEWAL OF NEGOTIATIONS WITH GERMANY

Paris, Feb. 4.—It is possible this evening to give the following approximate summary of the conditions under which the French Government will reopen negotiations with Berlin:

FIRST, the initiative must come from Germany.

SECOND, Paris will insist Chancellor Cuno, or his successor if he resigns, as the French hope he will, will withdraw the disavowal of the Versailles Treaty as applying to France and Belgium. The Allied Military Control Mission in Germany must be given its old powers.

THIRD, all boycotting of French and Belgian nationals must cease.

When Premier Poincare is satisfied these conditions have been fulfilled, he is prepared to offer the Reich the French moratorium plan as recently modified to meet Italian and Belgian objections.

Under this scheme Germany must pay three billion gold marks or its equivalent in kind, within two years. During this period France will progressively evacuate the Ruhr militarily as Berlin succeeds in getting the German magnates to pay up. But the civilian control bureaus will remain indefinitely in the Ruhr, and at the first sign of German failure the troops will move in again.

This is merely a rough outline of what the French Government has worked out in the way of a reply when the Germans make their expected appeal. A powerful Allied official believes Germany will be forced to accept the French conditions within two weeks, but that the same situation may be expected to occur in about six months with Germany failing, voluntarily or through incipacity, in reparation payments.

But if Berlin should not yield by that time, France intends to apply further pressure, as time is now a vital issue to her, for she is getting no coal at all. Premier Poincare will about the middle of the month extend the present measures against sending Ruhr coal to unoccupied Germany to other articles vital to industry, such as iron, steel, textile and chemical products.

Mother and Her Baby Are Relieved of Eczema

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:

"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

DR. CHASE'S OINTMENT

Always Had Headaches

Liver Was Torpid and Bilious Spells Brought Sick Headaches —Lost Much Time, But is Now Completely Cured.

Here is convincing evidence that however much you may suffer from liver trouble and consequent biliousness there is cure in the use of Dr Chase's Kidney-Liver Pills.

Overeating is the most common cause of sluggish liver action. You lose your appetite, have distressing bilious spells, usually accompanied by headache and vomiting, the bowels become irregular, constipation and looseness alternating, digestion is upset and you get irritable and downhearted.

No treatment so quickly awakens the action of the liver and bowels as Dr. Chase's Kidney-Liver Pills. For this reason this medicine is wonderfully popular and has enormous sales.

Mr. Charles R. Tait, Newtown, N.B., writes: "I was nearly always troubled with headaches, and would often have to stop work for a day or two. I lost many a night's sleep every month with bilious sick headaches, and although I tried doctors' medicines, and also many other patent medicines, it was without success. When I had these headaches I would vomit, and could keep nothing on my stomach.

"I purchased a box of Dr. Chase's Kidney-Liver Pills from G. M. Fairweather, druggist, of Sussex, N.B., and after taking one box I was so much relieved that I continued to take them until I am now completely cured. My advice to anyone suffering from sick headaches is to try Dr. Chase's Kidney-Liver Pills and be completely cured."

Mr. A. S. Mace, J.P., endorses the above statement, and says:—"This is to certify that I am personally acquainted with Charles R. Tait, and believe his statement in every way to be true and correct."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, all dealers or Edmanson, Bates & Co., Limited, Toronto. Substitutes will only disappoint. Insist on getting what you ask for.

IN MEMORIAM

In loving memory of Miss Mary Campbell who died February 13th, 1922.

She has solved life's wonderful problem,
The deepest, the strangest, the last
And into the school of the angels,
With the answer forever has passed. -
How strange that, in spite of our questioning,
She maketh no answer, nor tells
Why so soon were lifes honoring laurels
Dispelled by God's immortelles.

How strange she should sleep so profoundly,
So young, so unworn by the strife;
How gentle she was and how brave;
Brought for her the rest and the crown.

God knew all about it, yet took her
Away from the on coming years,
How bright her possible future,
Yet put her to sleep in the grave.

God knew all about those who love her,
How bitter the trial must be;
And right through it all God is loving,
And knows so much better than we.

Inserted by Marion, Luella, Viola and Georgina Harper.

EASY TO CLEAN

Just use soap and hot water to clean SMP Enameled Ware. It is so clean and so pure. As smooth as china and as strong as steel. And no metal touches the food. Be sure you get

SMP Enameled WARE

CORNWALL GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by:

Fees from paying patients.

Grants from the Government and Municipalities.

Donations and subscriptions from Churches, Corporations, Societies and Individuals, the last being the largest source of revenue.

YOU ARE ASKED TO ASSIST IN THIS WORK

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

THE BANKRUPTCY ACT

TENDERS WANTED

WILLIAMSBURG COUNCIL

The Council met in Froats Hall, Williamsburg on Saturday, February 10th. Members all present. Minutes of previous meeting read and adopted. As the contracts for Hydro Electric power and light signed by several ratepayers in 1921, are of no further use the Clerk was authorized to return same to parties who signed them. The auditors report was received and adopted and the Clerk was instructed to have the abstract statement published. The Reeve and Clerk were authorized to sign and submit to the Minister of Highways for Ontario a petition for the payment of the statuary grant on the expenditure for township roads. Any person who has been assessed for a dog in 1923 and who gets rid of dog must appeal to the Court of Revision to have dog struck off of Assessment Roll otherwise no refund of dog tax will be allowed.

The Clerk was instructed to notify the parties assessed for the construction of the Osborne McMillan Drain giving them 30 days in which to pay their assessment after said date debentures will be issued.

By-Law No. 813 was passed for borrowing from the Molsons Bank certain monies to meet the current expenses until the taxes are collected. Ezra McMillan was re-engaged as township road superintendant at a salary of $750.00 per annum. The following orders and accounts were passed.

S. D. Thorpe, for County Board of Agriculture	$15.00
Ora McIntosh, salary and postage as tax collector	30.75
J. A. Reddick, cutting brush	6.75
George Hess, cutting brush	3.40
Ezra McMillan, part payment salary, Road Supt.	62.50
Ora Bouck, repairing bridge	1.00
Ivan Castagner, part payment on 25 cords stone	65.60
Wm. Gordier, salary as auditor	15.00
Levi Whitteker, salary as auditor	15.00
G. T. R. expense crossing gates for December	30.90
Municipal World, Assessor's supplies, dog tags, &c	55.73

The Council adjourned to meet again at Williamsburg on March 10 1923, at one o'clock p.m.

M. S. BECKSTEAD, Clerk.

MRS. ALMIRA SWERDFEGER

At her home near Morewood, there passed away on February 10th 1923 Mrs. Almira Swerdfeger, after a short illness of a week.

The deceased was united in marriage to Mr. Cephrenus Swerdfeger in 1848 and came to Morewood as a bride to live when the country was yet surrounded by bush. She was of a bright disposition, and always a welcome visitor, a most cheerful character in time of illness. Her husband predeceased her twenty years ago. She leaves to mourn her loss six sons and two daughters: Mr. Adam Swerdfeger, Nebraska, Mr. George Swerdfeger, Centralia, Wash-Mr. Cyphrenus Swerdfeger, Darlingford, Man.; Mr. Marcus Swerdfeger, Cardinal, Ont.; Mr. Herbert Swerdfeger, Morrisburg. Mr. Jacob Swerdfeger, at home. Mrs. R. A. Glasgow, North Winchester, Mrs. William McConnell, Morewood. There are twentyeight grandchildren and ten great grandchildren.

The funeral service was held at the Methodist Church by her pastor, Rev. H. S. Cooke. The pall--bearers were: The Messrs. Walter Coulthart Allen Steven, Frank Fraser, John McLeod, Ira Barrington and Thos. Moffatt.

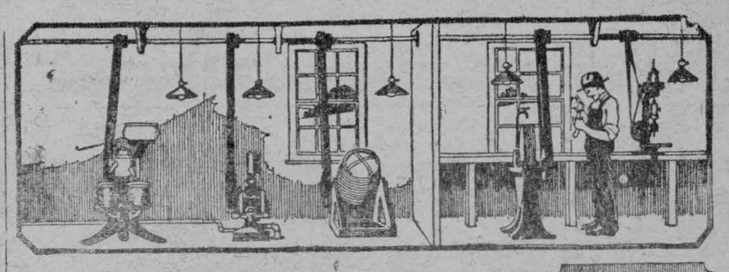
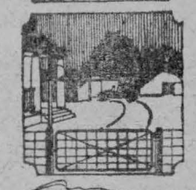
DISTRIBUTORS
MORRISBURG—O. P. SNYDER; Iroquois—Beach Milling Co.



When you see the "F" Power and Light Plant at work you will agree it is the handiest and most practical plant made.



It was designed first of all for producing electric light anywhere and everywhere—cheaply and well, and it does that job to perfection. It floods your home, shop, or other buildings with clean, brilliant light for a few cents a day, and still has power to spare.

When you examine it's sturdy construction, and mechanical simplicity, and note it's flexibility and ease of operation, you will wonder how it can be sold at the price.

We have no hesitation in telling you the demand for the "F" Plant all over the country is so great, that now is the time to install your plant if you want the advantages of Power and Light at low cost.

Come in any day and see the "F" Plant in operation, or send me a post card asking for a catalogue.

Pruning Apples For Profit.

A considerable number of fruit growers, knowing that sunlight should be admitted to the centre of the tree to keep up production, to get highly-colored fruit in the interior parts, believe it necessary to develop a tree with an open centre from the point of heading. Immediately after the tree is planted they remove the central or main branch and save some three to five branches radiating outward and upward from the point of heading. These three to five branches later become the main scaffold branches of the tree. This system of development does permit the entrance of sunlight and it results in a low-spreading tree, making possible economical pruning, spraying, thinning, picking, etc., but the trees are structurally weak and it is not uncommon to see main branches of bearing trees which have been trained in such a manner split out at the crotch. Furthermore, such trees are frequently more limited in bearing capacity than those trained somewhat differently.

The serious faults of the above system of training young tres may be avoided and at the same time the advantages may be retained if the so-called leader system of development is adopted. This system consists essentially of a central leader, extending upward to a height some six to seven feet from the ground and with six to nine main or scaffold branches distributed around and along the central branch from the point of heading to the top of the central leader. The leader is discontinued after the desired number of scaffold branches are obtained and the trees developed from that point essentially the same as an open centre one. Since it is not possible to get the desired number nor proper distribution of scaffold branches in one season, it is customary to select two or three of the scaffolds each year until the desired number is obtained. Two to four seasons are thus required to build the framework of such trees.

The scaffold branches of modified leader trees form strong crotches with the central leader or axis which seldom split. Pockets are seldom formed in crotches to collect leaves and dirt and eventually result in heart rot of the trunk as sometimes happens with open centre trees. Furthermore, it is better to have the upper part of the tree open to admit light to lower interior parts than it is to have the whole central portion of the tree open at the expense of fruiting capacity.

The question that the average fruit grower would like a definite, sound reply to to-day is "how heavily should trees be pruned between the time of planting and time of bearing?" or, worded differently, "should trees be left without any pruning except that given at planting time, until they have established the bearing habit; should they receive severe pruning throughout this non-bearing period, or should they receive some intermediate treatment?

Experiments, as well as observations, have proven that unpruned trees come into bearing earlier than pruned trees and that heavily pruned trees are older before they start bearing than lightly pruned trees. Furthermore, unpruned trees attain larger size in a given number of years than pruned trees and the more severely pruned trees attain less in size in, say, seven or eight years than lightly pruned ones. These facts lead some fruit growers to conclude that since unpruned trees come into bearing earlier, that such a practice is the most profitable one to follow. These growers contend that rather severe pruning may be given after the trees have the bearing habit well-established without interfering with production and that this treatment will in the course of some three or four years place the trees, that were not pruned during the first few years, in good condition.

Another group of fruit growers are not as particular about getting early fruit production as they are in building the strongest and sometimes the most ornamental kind of tree possible. They contend that the first four to six years should be devoted to the development of a strong framework that will support larger loads of fruit when the tree becomes old. In other words, they believe that heavier fruit production at an age of thirty years is more important than getting fruit on young trees two or three years earlier.

It would appear that moderate pruning of young apple trees is the safest practice to follow. It should result in the formation of a rather strong framework with scaffold branches well placed and should bring the trees into fruit production not more than one or two years later than no pruning. Surely the sacrifice of one or two years is not as important to the average fruit grower as is the building of a reasonably strong tree. Such a pruning should consist of rather heavy cutting back and thinning out at planting time; a removal of the longer growths originating from the central leader other than those intended for main scaffold branches and perhaps a light heading back to balance the tree after the first season's growth; a similar thinning out but less heading back after the second season's growth; a light pruning after the third season's growth, and very light thinning out of the previous season's growth thereafter until the tree has borne two or three crops. The thinning should, for the most part, be confined to the outer parts of the tree so as to admit sunlight and keep all parts of the tree functioning properly. Very few of the smaller growths in the interior of the tree should be removed.

In case one is growing some filler trees in between the permanent ones, I would recommend no pruning after the second growing season because these trees will probably not be retained for more than twenty years and we want to bring them into bearing just as early as possible and, furthermore, we are not interested in the formation of a particularly strong framework.

Bearing orchards are frequently seen in which trees have been stripped of all fruiting wood except near the ends of the branches. In other words, all the fruit is borne out on the ends of the branches instead of being distributed throughout the tree. In many trees there is no fruiting wood within a radius of twelve to fourteen feet from the head of the tree. It is understood that a branch can support more apples if they are distributed over its entire length, than if they are all clustered about the ends, probably six to twelve feet from the main trunk.

A scaffold branch should have several good lateral branches well spaced along its entire length, each lateral supporting its share of fruiting wood. Such a tree can support a given load to better advantage and carry a much larger crop of fruit. When pruning the young trees always leave fruiting wood if it is located where it will have a chance to develop. The tree will fruit earlier and heavier.

Fruiting wood may be developed in the course of three or four years in a tree in which the scaffold limbs are bare by the use of well situated water spouts by cutting them back from four to twelve inches in length to encourage the development of side branches. These in turn should be headed back the following year. After this, the heading back should be lessened to encourage the formation of fruit spurs. To make this operation successful it is essential that the trees be thinned about the outside to admit light sufficient to allow the development of fruit spurs and to color the fruit.

Pruning may be done any time during the dormant season. Possibly very slight preference should be given to late winter or early spring, so far as the trees are concerned, but if left until such a season the chances are very good that the work will not be completed because of rush of other farm practices. Consequently any favorable weather following the dropping of the foliage should be used for pruning.

Crude Oil to Kill Rats.

There is a remedy for the rat nuisance—one that is cheap and effectual. If crude oil (petroleum) is placed in the runs, the rats will leave the vicinity. If they are caught in their runs, so that they have to breathe the fumes for an hour or more they will be poisoned. Meat that contains petroleum can be used as bait to catch this offensive rodent. Experiments proved that rats which ate meat treated with crude oil died in fifteen minutes.

Ships, from time immermorial, have been infested with rats, and to these carriers of merchandise the rats owe their dissemination. The rats were formerly particularly destructive to cargoes of silk cocoons; but so effective is the crude oil remedy that one ship which had been carrying sugar, and as a consequence, whose bilge water was sweet and particularly attractive to rats, has been entirely rid of them. The remedy was applied after one cargo had been practically destroyed. The crude oil was added to the bilge water.

The gases produced by the evaporation of the crude oil are very inflammable when present in large quantities, but the amount necessary to use about barn or outbuildings would not endanger the property.—M. A. C.

It is said that Philip, one day having consulted the oracle at Delphi, received the answer, "Make coin thy weapons and thou'lt conquer all." He boasted that he had carried more places by money than arms; that he never forced a gate till after having tried it with a golden key; and that he did not think any fortress impregnable into which a mule laden with silver could find entrance.

How to Avoid Fires

Does an uncomfortable feeling assail you sometimes when the thought of flaming buildings flits across your mind? Do you often sense a feeling of relief when, driving home, you see in the distance your house and barn still standing where you left them, cool and whole?

I suspect we all have this uneasy experience at times. It lends to every farmer a keen, personal interest in the cause and prevention of destructive farm fires. The most common causes of fires are lightning, defective flues, defective lamps and lanterns, bonfires, steam threshing engines, spontaneous combustion, carelessness with gasoline, matches, fireworks, and cleaning compounds, kindling fires with kerosene, open gas flames, defective electrical wiring, and overheated stoves and furnaces.

When you have read this list, the natural remedy for each cause will probably suggest itself to you. Were it not for the tremendous loss of life and the staggering loss in property each year, I would stop here and say nothing. The property loss in Canada in 1921 was something like $3 per person, or about $25,000,000. Compare this with your personal property tax and then ask yourself how you like to pay it, for you do pay it in insurance premiums.

Of the fires that originate on the exterior of the building, fully 80 per cent. are preventable by lightning rods and fire-safe roof coverings. Simple, is it not? Compare the causes with the remedy and draw your own conclusions. If the entire exterior of the building is fire-proof in addition to lightning rods, practically all danger from outside sources will be stopped.

Inside fires are not so easily coped with on account of the careless manner in which a large majority of our frame houses are constructed. If all chimneys were built upon solid foundations, and were lined throughout with fire-clay liners, and a separate flue were provided for each opening—that is, one each for furnace, kitchen range, fireplace, auxiliary heater, etc.—there would be very few fires from this cause. Safe chimneys would prevent about 10 per cent. of farm fires.

Along with safe chimneys go safe stoves and furnaces. Overheating almost always occurs in bitter cold weather, and generally because of an undersized heater. In buying a furnace, always insist on one large enough to do the work. Furnace men, in competition, may try to sell an undersized furnace in order to beat their competitor's price. Do not be misled. Your comfort and safety are much more valuable than a few dollars.

How many times in a year do you pick up a newspaper and read the gruesome story, "Kindled Fire With Kerosene; Mother and Child Burned to Death; Residence Burned"?

The only solution to this is simply, don't do it. Be careful when using gasoline and cleaning compounds, benzine, or other highly inflammable and explosive fluids. Do not use them near (not in the same room) an open flame, lamp, stove, fireplace, or other source of ignition.

Open-flame lamps of whatever description should never be on swinging brackets that allow them to come in contact with your wall surfaces, curtains, window shades, garments, or other flimsy material. Store matches in safe containers, out of the reach of small children.

Always have electrical wiring done by competent persons. Be sure that all circuits are properly fused, and that there is a large cut-out switch.

A small hand fire-extinguisher in the kitchen, hall, upstairs hall, basement, garage, and one or two in convenient places in the barn may be worth their weight in gold some day. The chemical should be renewed at intervals, as directed by the makers.

Never go away and leave small children alone in a house with all doors locked. This practice has resulted in the loss of many a young life.

Do not store automobiles, motor trucks, tractors, or gasoline engines on a barn floor. These should always be stored in a building somewhat away from other buildings. Fire-proof garages are not a necessity, but are extremely desirable. Gasoline kept on hand in large quantities should always be placed in underground storage tanks or in a small building far enough away from all other buildings to avoid fire.

Why His Buildings Last.

John Hollet, a farmer well known to the writer, has an inexpensive method of keeping his farm buildings, some of which are forty years old, in good repair. There is not a swayed ridgepole nor a sunken corner in the bunch.

"My method of building protection, begun many years ago, has been a fixed habit ever since," Hollet explained recently. "Each year I take a few days to go over every building. Equipped with nails, a level, rule, and a flashlight, I commence at the foundation. I test with the rule and level for low corners and sagged floors. Then I measure to see that corner beams and studding are in good condition. I make my way carefully over the inside framework, ending my inspection in the attic and along the rafters. The chimney I examine closely, for a great deal of my work is found there.

"When any defect in the frame is noted, I repair it at once. Often a new brace is the remedy. Loose timbers are tightened with nails. In major troubles a lifting jack is used. Trap doors through the ceiling and in the chimney casings make it easy to get about. There are pulley hooks in the attic for raising heavy pieces.

"The barn and outbuildings are gone over easier, because the frame is entirely uncovered. A close inspection usually shows somthing in need of repairs. Windstorms spring and loosen the braces, and after a damp season the floors require nailing. The foundation also needs watching. Making my repairs promptly I can do without a carpenter, and the expense is slight.

"I estimate that my annual tour of inspection has saved me at least $400 in repair bills since coming to the farm. I am careful to keep the surface of my buildings well painted, but I have learned by experience that paint is a poor camouflage if the framework is neglected.—E. E. Couzens.

Waterproofing Leather.

Take the heel of an old rubber boot and chop it up fine, Put two or three tablespoonfuls of common lard into a dish, allow it to melt and come to a boil over a hot fire. While boiling, add the chopped rubber to the lard, and allow to boil until the lard has absorbed all the rubber it will. Take from the fire and let cool just enough so it will not burn the leather. Then give the shoes or other leather article a thorough coating of the rubberized lard and set aside for a few moments. The preparation will quickly be absorbed into the leather, after which give a second application, heating the preparation again if it has cooled. Shoes treated thus will be almost entirely waterproof for a month or six weeks. It is also a good plan to add a little neat's-foot oil to the hot lard, though this is not necessary. I have tested this method.—E. C. W.

Success is the accomplishment of what one sets out to do.

Many men are kept from making a success by the necessity for making dollars.

The water you give your cattle has to be warmed either by the cow or by you. If the cow warms it, it takes food; if you warm it, it takes wood. If food is cheaper than wood let the cow do it.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Why Do They Do It?

The man who beats his horse "to make him go" is, at the same time, doing something to himself of which he is entirely unaware. The man who so mistreats his horse has lowered himself beneath that of the animal he has misused.

The boy who kicks a dog "to hear him howl" is making a big mistake. At an early age he is allowing himself to be worse than any of the dumb, helpless creatures that he takes such pleasure in harming. This is the sort of boy—if not properly instructed in earlier years—who grows to be the man who beats his horse; aye, worse, he is the boy who grows to be the man who beats his wife and children.

"Why do they do it?" So easy to ask! Shall we not say, "How can we stop it?" There is a way, and it is not as difficult as one might think: When boys are very small the mothers and fathers should try to install in them a genuine love for animals, because no one wishes to harm a thing he really loves.

When a small boy who has not been taught—one can usually tell by his treatment of animals—is seen abusing an animal, we should tell him then, while he is hurting it, how to treat a dog, a cat, a horse; tell him, then, while he remembers his deed, that a dog will not love him if he kicks it, pulls its ears, or mistreats it in any way. Then point out someone, if possible, who loves the same dog—if it be a dog—he has just been hurting, and mark the love and devotion of that animal to its benefactor.

The average boy, deep down in his heart, likes animals. He will see the difference in treatment, and the difference in the dog's response to kindness and cruelty; if the boy has any good, common sense, he will doubtless begin to think, and the result will be a change in his treatment of animals.

Let us help every boy's natural liking of animals grow into love, and a great deal of cruelty will be killed at its birth.

INDIGESTION, GAS, UPSET STOMACH

Instantly! "Pape's Diapepsin" Corrects Stomach so Meals Digest

The moment you eat a tablet of "Pape's Diapepsin" your indigestion is gone. No more distress from a sour, acid, upset stomach. No flatulence, heartburn, palpitation, or misery-making gases. Correct your digestion for a few cents. Each package guaranteed by druggist to overcome stomach trouble.

Minard's Liniment for Rheumatism.

Drugs and Prohibition

By Rev. Peter Bryce.

"I believed in Prohibition, absolutely, but my faith is shaken," said a friend to me a few days ago. "The statement attributed to Judge Murphy," he continued, "in a letter in a morning paper last week, seems to make it clear that those deprived of liquor are turning to drugs, and the results are deplorable."

Judge Emily Murphy, in her book, The Black Candle, in the chapter devoted to "Prohibition and Drugs," makes it clear that she does not consider Prohibition to be the cause of increased addiction in drugs. She believes it is 'bad association and the urge of an illicit traffic seeking to profit by the sale of the habit-forming drugs that are the most potent causes for the growth of the evil." She further states: "In most places those deprived of liquor seek substitutes not in opium, cocaine or other allied drugs, but in raisin jack, home-made wines, jamaica ginger, paregoric, essences or moonshine." Another argument according to Judge Murphy, why drugs cannot be said to be a substitute for drink is the fact that such a large percentage of drug addicts are in their 'teens.

Many medical authorities confirm Judge Murphy's statement. Joseph C. Doane, M.D., the Chief Resident Physician of the Philadelphia General Hospital, states that from the testimony of their drug patients, there is no connection whatever between drug-disease and the inability to get liquor.

The New York City Health Department, in the year 1919-20, asked 1,403 drug patients the cause of their addiction. Only 1 per cent. came to it from alcoholic indulgence. The Secretary of the Rhode Island State Board of Health says: "We fail to find among the applicants for treatment any one formerly addicted to the free use of alcoholic beverages."

The City Health Officer of Jacksonville, Florida, reports that from the historics of addicts registered, "it appears that there is no relation between the habitual user of alcoholic liquor and the drug addict."

The Medical Committee of the Kiwanis Club, Vancouver, states: "Practically all observers state that there seems to be no special connection between the use of alcohol and the use of drugs. There is no evidence to show that the suppression of the use of alcohol increases to any appreciable extent the addiction to drugs, as drug addicts are rarely alcoholics."

Cora Frances Stoddard in her Preliminary Study on the relation between prohibition and drug addicts says: "Of 1,169 patients treated at the New York Narcotic Relief Station in one week (April 10-16, 1919), most of them were mere youths, nearly one-third of them are not out of their 'teens. One boy began at the age of thirteen." These youths are doubtless animated by a morbid desire to imitate what they believe to be the habits of the underworld and gunmen.

Dr. C. M. Crawford, the Ontario Hospital, Whitby, says: "Morphine and cocaine are responsible for certain type of mental disorder. There has been no increase so far as we can determine in either morphine addiction or cocaine addiction since prohibition came into effect."

Dr. G. H. Kirby, Medical Director of the New York State Hospitals, says: "Since prohibition has come into effect alcoholic mental disorders have practically disappeared, and further, morphine and cocaine addiction have not increased at all." He bases his statement on many thousands of cases.

If other causes have not shaken my friend's faith in prohibition, there is evidently no cause for the foundation of his faith being shaken by the facts regarding the drug traffic.

Advantage of a School Boys' Band and How to Start One.

By F. A. Tubbs, a Superintendent of School Music.

In starting a band, issue a call to all who are interested. Then lay out your scheme upon the blackboard, based upon what would be the proper proportion of each instrument in a band of fifty players.

Describe the instruments, manner of playing each, and the nature of the part played. Tell why a boy slow of movement and thought should not select a clarinet, which is entrusted to much the same work the violin has in the orchestra; why a boy with protruding teeth should not play an instrument with a cup mouthpiece; why a euphonium player should be very musical, of fairly good size, of good lung capacity, etc.

It is surprising hoy quickly the boys will agree with the leader in assigning instruments.

After the instruments are given out, each boy should have individual lessons until he can produce a tone recognizable as to pitch and can play the natural scale on his instrument. The group lessons should be given to supplement the private lessons.

Following this, the brass and reed sections should be rehearsed separately. This method of gradually increasing the size of the group until the full band is rehearsed keeps the interest at "white heat," and when the first full rehearsal is called every youngster is in place willing to do his best, which is an ordeal for the teacher. Private and group lessons are given after school hours, with band rehearsals twice each week from 7 to 8. The boys are allowed to "blow" a little before rehearsal, just as the symphony player is supposed to do before the concert.

When the director takes his stand the instruments are placed across the laps, all talking ceases and everybody is ready to hear what the director may have to say. The director seldom plays except to illustrate. The boys are taught to follow the baton and never allowed to overblow. The boys' band is of more interest in the homes of the members than any other organization in the town. The leader is consulted oftener by parents in regard to the band work than he is as teacher of other branches of school music. Most of the boys who are studying piano in the town derived their first interest in music through their band work.

Boys will play in a band when no interest can be aroused in the orchestra; however, that interest is apt to develop later in the musical ones. I believe there is no other means as great as the band in creating an interest on the part of the boy in all things musical in his school. The boys are also reminded of the great advantage the syllable reader has in playing a band instrument over the one who cannot sing by syllable. I have known several cases where boys have learned to sing by syllable in order that they might be able to play the band instrument the better.

The music rehearsed is never trash. The last number played at the close of the rehearsal is usually a popular song or ballad of the better class, given as a piece of pie might be given at the close of the meal. This popular number so dearly loved by the boys is always looked forward to, and if the rehearsal is drawing to a close and there is no sign of the popular number some one is sure to ask, "Don't we get any pie to-night?" and the pie is surely passed.

Rice paper is not made from the rice plant, but from the pith of a tree growing in Formosa.

WHEN NERVES ARE NEAR EXHAUSTION

The Right Thing to Do is to Take a Tonic for the Blood.

When you become so exhausted after a day's work that you cannot sleep, or sleep fails to refresh you, it is time to look after your health. Failure to act at once means a steady drain on your health reserve, which can result in but one thing—a nervous breakdown.

Do not wait for a breakdown. The treatment is simple enough if you do not let your condition become too far advanced. The treatment is one requiring an effective tonic to enrich the blood and feed the starved nerves. The most effective tonic known is Dr. Williams' Pink Pills, which act directly on the blood, and with proper diet have proved of the greatest benefit a nervous troubles and all conditions due to impoverished blood. Mrs. Mary Hanson, Braeside, Ont., has proved the value of Dr. Williams' Pink Pills and says:—"I was taken ill with what doctors whom I consulted called neuralgia of the tissues of the system. I was a complete wreck from constant pains in my body and limbs, dizzy headaches, fainting spells and constipation. So intense was the pain that at times it caused vomiting and I would have to go to bed for two or three days, only to get up so dizzy and so weak that I could not cross the bedroom without aid, and while these spells lasted I could keep nothing on my stomach. I doctored for almost a year, but with no beneficial results. Finally the last doctor who attended me said medicine would not benefit me. I must have perfect rest, and spend most of my time in the open air. He gave me very poor encouragement. Knowing that the mother of four children could not spend all her time in idleness, I told my husband I was through with doctors and was going to try some other remedies. I got one, but after taking it for a month found no benefit. Then I decided to try Dr. Williams' Pink Pills, and at the end of two weeks I found these were what I needed. With nerves worn threadbare from all the suffering of the past, I continued the use of Dr. Williams' Pink Pills for three months and by this time I was able to do most of my own housework. In fact I soon felt well and was able to do any kind of work without feeling tired. Since that time I have continued to do all my own work and have had no return of the dreadful pain I suffered before. I have recommended the pills in many cases and have always seen good result from their use."

You can get these pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The sea covers three-fourths of the earth's surface, or a total area of about 145 million square miles.

"Cascarets" 10c

For Sluggish Liver or Constipated Bowels

Clean your bowels! Feel fine!

When you feel sick, dizzy, upset, when your head is dull or aching, or your stomach is sour or gassy, just take one or two Cascarets to relieve constipation. No griping—nicest laxative-cathartic on earth for grown-ups and children. 10c a box. Taste like candy.

The Drawback

"I'm glad you don't like candy any better than you do."

"I 'spect I would only I get full too quick."

Flax Seed for Canada.

On account of the standstill of the flax industry in Ireland, an investigation is being made with a view to growing flax in Canada.

Man was plainly intended to work; else why when he asked for butter did nature give him a cow?

The word "stentorian" comes from the name of a Grecian herald named Stentor, whose voice, according to legend, was as loud as that of fifty men shouting together.

MRS. ANDERSON TELLS WOMEN

How Backache and Periodic Pains Yield to Lydia E. Pinkham's Vegetable Compound

Leslie, Sask.—"For about a year I was troubled with a distressing down-bearing pain before and during the periods, and from terrible headaches and backache. I hated to go to a doctor, and as I knew several women who had taken Lydia E. Pinkham's Vegetable Compound with good results, I finally bought some and took four bottles of it. I certainly do recommend it to every woman with troubles like mine. I feel fine now and hope to be able to keep your medicine on hand at all times, as no woman ought to be without it in the house."—Mrs. OSCAR A. ANDERSON, Box 15, Leslie, Sask.

Mrs. Kelsey Adds Her Testimony

Copenhagen, N. Y.—"I read your advertisement in the papers and my husband induced me to take Lydia E. Pinkham's Vegetable Compound to get relief from pains and weakness. I was so weak that I could not walk at times. Now I can do my housework and help my husband out doors, too. I am willing for you to publish this letter if you think it will help others."—Mrs. HERBERT KELSEY, R.F.D., Copenhagen, N. Y.

Sick and ailing women everywhere in the Dominion should try Lydia E. Pinkham's Vegetable Compound before they give up hope of recovery. C

A MAGNIFIED EXAGGERATION

The Watertown Herald of recent date contained the following report of the jam at Morrisburg.

Several persons are believed to have drowned, and thousands of dollars' worth of property has been destroyed by floods that poured from the ice-choked St. Lawrence river through the streets of Morrisburg today, washing through the United States customs offices and menacing the city's electric light plant.

Ice has filled the river bed to the level of the village streets, and unless prompt measures are taken the eastern part of Morrisburg will be in grave danger.

Government engineers from Quebec have been sent to the city and attempts will be made o dynamite the jam.

The locks and mechanism of the Morrisburg ship canal are buried beneath eight feet of grinding ice cakes, and for that reason dynamiting is hazardous.

Failure of the lighting plant has added to the terror of the flood and residents are moving to the highlands west of the city.

BOARD OF EDUCATION

The annual meeting of the Board of Education was held at the Collegiate Institute at 8 o'clock p.m.

The meeting was called to order by the Secretary.

Roll call showed the following members present: J. L. Casselman, J. H. Meikle, Thos. Coligan, W. J. Fetterly, Mrs. Ashton, Mrs. Hilliard George H. Merkley, A. H. Hunter, Rev. C. O. Carson

Nominations for chairman were called for:

Moved by A. H. Hunter, Rev. Carson, that J. L. Casselman be chairman of the Board for the ensuing year.—Carried.

Mr. Casselman assumed the chair.

Mrs. Hilliard, Thos. Coligan, that Mr. J. H. Meikle be vice-chairman.

Mrs. Hilliard, A. H. Hunter, that Mr. W. C Cochrane be re-appointed Treasurer at the same salary

Thos. Coligan, Rev. Carson, that J. M. Whittaker be re-appointed Secretary at the same salary.

George H. Merkley, J. H. Meikle, That James Laskey be re-appointed janitor of the Collegiate Institute at the same salary.

A. H. Hunter, Mrs. Ashton, that Chas. L. Baker be re-appointed janitor of the Public School and school attendance officer, at $400.

Mrs. Ashton, W. J. Fetterly, that Messrs. A. H. Hunter, Thos. Coligan and Rev. C O. Carson be re-appointed Collegiate Institute Committee.

Moved in amendment—

Thos. Coligan, A. H. Hunter, that J. H. Meikle, Rev. Carson and Mrs. Ashton, be appointed collegiate committee. Amendment carried.

W. J. Fetterly, Mrs. Ashton, that J. L. Casselman, Mrs. Hilliard and George H. Merkley be appointed Public School Committee.

A. H. Hunter, Mrs. Ashton, that the regular meeting of the Board be held in the Public Library every second Monday of each month at 7.30 p.m.

Rev. Carson, A. H. Hunter, that the Board now take up regular business.

Mrs. Ashton, George H. Merkley, that the minutes of the last regular meeting be adopted as read.

Accounts amounting to $2181.89 were passed.

Rev. Carson, W. J. Fetterly, that these accounts be received and paid.

Letter was read from the Counties Clerk advising the Board of the re-appointment of Rev. C. O. Carson as Trustee for the next three years.

Letter was read from the Village Clerk advising the Board of the re-appointment of Dr. G. M. Gorrell as trustee for the next three years and of the election of Jas. L. Casselman, Mrs. R. H. Ashton and Mrs. I. Hilliard as Trustees for the next two years.

Letter was read from W. M. Morris re the convention of Trustees and ratepayers and the appointing of a delegate.

M. C. I. Principal reported an enrollment for January of 143 and daily average attendance of 133.

Thos. Coligan, A. H. Hunter, that Rev. Carson be appointed delegate to the Convention.

Move in amendment.

J. H. Meikle, W. J. Fetterly, that Jas. L .Casselman be appointed delegate to the convention.

Amendment carried.

NO SERIOUS DAMAGE CAUSED BY ICE JAM IN ST. LAWRENCE

The ice jam which has been forming in the St. Lawrence during the last few weeks is gradually working up the river, and has reached the head of Corigan's Island opposite Morrisburg. The severe storm the early part of the week has caused a large quantity of ice to float down the river, and under favorable weather conditions, the jam is increasing rapidly. No one can predict, just what the outcome will be, but up to the present, the water has risen to a point which threatens to tie up the local power plant, which the engineer, Mr. George Stitt, has been operating under serious difficulty during the past few weeks.. The interrupted service has been met by adding low voltage lamps, as the 110 volt lamps are very dim.

The jam is attracting many of the citizens to the canal bank, and a number of Government Engineers are working along the river, verifying the data compiled in 1921, for the use of the International Commission, by natural developments at the present time.

A similar jam which occurred in February 1905, gradually worked up the St. Lawrence, reaching Morrisburg on February 15th, when the citizens, for the first time in history, drove over to Waddington on the ice.

For the benefit of our readers who are taking a keen interest in the present developments on the St. Lawrence, we reproduce below, a description of existing conditions during the period of the ice jam in 1905, which broke up on Saturday, March 25th.

* * * *

Since putting the above into type the power house has been closed down and the jam has passed Morrisburg. The water is steadily rising in the canal and is spilling over the lock gates.

To the village council, the Hydro Commission, the local Engineer, Mr. Stitt, and the Hydro Resident Engineer, Mr. Wm. Sutherland, the Leader, along with others, are grateful for the limited amount of Hydro turned on the town line, which makes it possible for us to resume operations.

The following is taken from our files, issue of February 16th, 1905.

The ice jam last Saturday night had reached up the river as far as Mr. Gus Dupraw's place. So fast did the floating ice descend the river and attach itself to the jam below that when Morrisburg awoke on Monday morning it was to find the St. Lawrence bridged from the end of the wharf across to the foot of Dry Island. In two hours' time the jam crept up to the lock and diagonally across the head of Dry Island. And then an interesting thing happened. What is known as Doran's Bay, a long, triangular sheet of still water jutting out from below the island of the same name, and covered with a thick cap of ice, swung out and down against the head of the jam. Thus in five minutes the lower water front of Morrisburg became bridged. The sight attracted many citizens to the canal bank, and several of the more daring spirits among the boys walked across to within a few yards of the American shore. The first to cross were: Charlie Hepburn (with pole in hand). Fred Fox, Peter McGillivray, Charlie Loucks, Proctor Chalmers, Willie Bockus, Kenneth Gillard, Willie Snyder. By Tuesday morning Doran's Bay was again filled up with ice, which stretched across from the foot of Doran's Island diagonally to the waterworks pump house. The channel at this place is so narrow and the water so swift that the pump house seemed in great danger of being damaged by the cakes of ice that were constantly floating down; but fortunately no large body of ice came along, and the house is saved for the present. Mr. Casselman deemed it safer, however, to remove his family across the canal, which was done. Yesterday the jam had crept up as far as the old Stearns wharf and half-way along the north shore of Dorans Island. From the pump house west to the head of the island the current is so swift and the channel so deep that ice lodged with much greater difficulty, nearly all of it being carried under and swept on down. The jam, however, is slowly but surely making its way up the river, and no one is bold enough to predict where it will stop. The rapids should not prove much of a barrier, because its usually turbulent surface is now quite smooth, as a result of the river rising so high. Another result of the rise in the water is that the canal is so full from the head down that the water has been pouring over the lock gates here for several days. Since the jam passed the lower part of the town the water level has been steadily going down, so that all danger of the power house the mills and other structures along the shore at this point being flooded seems past. What would happen, though, if a shove occurred at Doran's Island, causing the ice along the shore to pile up it is hard to say. Property would certainly be damaged, especially the pump house. So long as no more storms occur, and the weather stays cold, the ice that is now coming down can do no damage, should a storm occur and the weather get soft enough to start the big cakes up the river, the situation here would be serious.

In the meantime the bridge in front of Morrisburg is freezing more solid all the time, and the people on both sides of the river are crossing by the hundreds, mostly for the sake of having said they had walked across the St. Lawrence. Yesterday morning the Americans chopped out a regular road over the ice from near the head of Dry Island across to the canal bank, and down below the mills. The first rig to cross was driven by John Eamon and Luke Mallen. About the same time they started from this side, Dave Roach's rig left Dry Island for this side. Both drivers ran their horses all the way, but John got there first.

Misses Jean, Winnie, and Clara Gibson and Miss Mabel Edwards were the first ladies to cross the ice bridge.

The 14th and 15th of February, 1905, will certainly be remembered for many years to come as the first time the St. Lawrence was crossed on foot.

Many wild ducks, driven up the river by the onward march of the ice bridge, have tried to get back to their old haunts down the river by diving under the ice, and it is estimated that hundreds of the poor creatures have been drowned in this way.
