MORRISBURG—ONTARIO

MORRISBURG CLAIMS WARDENSHIP FOR 1933

With the holding of nominations in many municipalities throughout the United Counties last week, whereby a number of the Reeves and Deputies were elcted by acclamation, the 1932 Counties' Council passes into history, while the 1933 governing body is yet in the making.

Among the members elected to represent the municipalities of the United Counties, as well as among those who elect them, there naturally centers a great deal of interest upon "who shall be the Warden for the ensuing year".

According to the system adopted about 75 years ago, whereby the Wardens are chosen in turn from each of the United Counties, the honour this year comes to Dundas County, and if the individual county is to follow the precedence of the United Counties in awarding the office to each municipality in turn, it is reasonable to expect that the honour shall be bestowed upon the Morrisburg Reeve this year. Practically every other municipality in this county has shared in the honour since Morrisburg last had a Warden representative, when Mr. M.J. Casselman was elected in 1903. According to the system at that time, which has since been changed, Mr. Casselman represented Morrisburg and Williamsburg in Counties' Council.

Since that time the following Reeves have been Warden of the United Counties:

1906—Mr. J.F. Cass of Winchester.
1909—Mr. Robt. Fraser of Winchester Township.
1912—Mr. M.S. Beckstead, Williamsburg Township.
1915—Mr. W.G. Timmins, Mountain Township.
1918—Mr. W.J. Fisher, Winchester.
1921—Mr. Wesley Hamilton, Chesterville.
1924—Mr. Geo. Smith, Iroquois.
1927—Mr. C.F. Marselis, Williamsburg Township.
1930—Mr. Ed. Strader, Iroquois.

While a number of names are mentioned for the office this year, it can be seen by a glance at the above list that the appointment should come to the capital of Dundas County.

There are other reasons, however, why the Morrisburg Reeve should be the choice this year, particularly if Mr. Foster, who has represented Morrisburg at the Board for the last three years, consents to stan another year.

Mr. Foster, Reeve of Morrisburg, is particularly well qualified for the office. Being Deputy Reeve of Matilda Township, he served as member of the Counties Council in 1893-4, under the capable wardenship of the late John Bennett, of Roxborough Township, having served two years as Councillor in Matilda previous to this, and nine consecutive years later, a total of thirteen years.

In 1905 Mr. Foster was appointed License Inspector by the Whitney Government, an office which he held for 23 years, when he was superannuated. During these years, the regulations connected with the office of Inspector prevented Mr. Foster from taking part in municipal matters, but when superannuated, the people of Morrisburg, recognizing his ability in dealing with municipal matters, at home as well as at Counties' Council, elected him Reeve, which office he has held for the last three years.

There are matters of great concern to the people of Morrisburg, as well as those of the United Counties, which have to be dealt with in 1933. No man is in a better position, by virtue of his knowledge of municipal affairs, and no man is in a better physical condition to stand this strain, than is Mr. Foster. The members of the Counties Council, and especially his fellow members from Dundas County, we feel sure, will not fail to show the Morrisburg representative that they recognize the ability of one of their oldest and most highly esteemed members, when the time for appointing their Chairman for 1933 has arrived, should Mr. Foster consent to stand for Reeve this coming year.

LAPIERRE—COULTHART

A very pretty but quiet wedding was solemnized in the Presbyterian Manse, Morewood, on Nov. 24th, 1932, when Donelda Coulthart, eldest daughter of Mr. and Mrs. Wm. Coulthart, Morewood, became the bride of Mr. Harry A. Lapierre, of Brockville. Rev. Mr. Nimmo performed the ceremony.

The bride looked charming in a gown of powder blue crepe, with beige accessories. Miss Jean Coulthart of Ottawa, and Mr. Albert Taylor of Morrisburg, acted as witnesses.

After the ceremony, the young couple returned to the home of the bride's parents, where dinner was served to immediate friends. Mr. and Mrs. Lapierre later motored to Morrisburg, where they boarded the train to spend their honeymoon in Montreal. The bride travelled in wine crepe dress, hat and accessories to match. Mr. and Mrs. Lapierre will take up residence in Brockville, where the groom has a position with the Metropolitan Life Insurance Co.

For some time past, both bride and groom have been popular residents of Morrisburg, and their many friends here join in wishing them success and happiness.

BELLEVILLE HONOURS LOCAL REPRESENTATIVE

The Hon. George H. Challies, who was the guest of honour at a banquet of the Association of Teachers and Instructors, held in Belleville this week, deliverd a very interesting address, the subject being "St. Lawrence Power Project."

"The Canadian" contains a two-column report of his speech, and adds:

"The Guest of Honor was Hon. G.H. Challies, Provincial Secretary and Minister of Game and Fisheries, a gentleman of such outstanding ability and worth that he was called to a position in the Cabinet within a year or two after his first election to the Legislature, while his attractive personality and cordial bon homie commend him to the esteem and good will of all with whom he comes into contact.

"Mr. Challies was introduced to the assembly by Mr. Chas. A. Cameron, a leading Belleville barrister, who comes from the same town, Morrisburg, and was a school mate and intimate companion of Mr. Challies in the days of their youth and early manhood."

PROJECT HAILED AS LIKELY KEY TO PROSPERITY

Washington, Nov. 30—The St. Lawrence waterway was pictured to a United States Senate foreign relations sub-committee today as the key to prosperity by spokesmen for four Western states and northern New York. Witnesses from Michigan, Wisconsin, Minnesota, and Indiana joined with representatives of northern New York cities in urging the committee to speed ratification of the treaty, which Canada and the United Sates signed last July, for the development of the channel to connect the Great Lakes with the sea.

Testimony of the New Yorkers was in direct conflict with that previously presented to the committee by spokesmen for shipping and industrial interests of New York city and Buffalo. They contended however, that they represented the public opinion of their state.

Governor Wilbur M. Brucker of Michigan, hailed the project as a way out of the business slump, saying the automobile industry looked to it hopefully and might lead the way back to normal conditions if assured the project would be carried through.

Brucker said the psychic effect of the project would be the greatest blow that could be dealt to improve "th sluggish economic situation."

Representing Governor Floyd B. Olson of Minnesota, Harry E. Boyle, district attorney at Duluth, testified the middle Western States believed the waterway would "greatly improve the economic condition" of the people.

"Cheaper transportation costs are a dire necessity, not only for Minnesota, but for the whole interior of the continent," he said.

Hugh J. McClearn, representing the Minnesota Great Lakes-St. Lawrence commission, testified the savings in transportation costs from the waterway to agriculture, mining and the lumber industries would "practically every year pay the cost of deepening this channel."

Former Governor Goodrich of Indiana, told the committee the opening of the waterway would "greatly stimulate the growth of industry" in his state and predicted it would bring similar benefits to other commonwealths.

Wisconsin was represented by Mayor Daniel W. Hoan of Milwaukee, and William George Bruce of the same city, represetning the Wisconsin deep waterway commission.

"Wisconsin is a solid unit as far as this project is concerned," Bruce said. Hoan urged that the committee approve a section of the treaty limiting water diversion at Chicago to 1,500 cubic feet a second.

FARMERS' CLUB SHOWS GOOD RESULTS

Cheques in payment of live stock shipped two weeks ago to the Canadian Live Stock Co-Operative, Ltd., Montreal, through the local Farmers' Club, were entirely satisfactory to all concerned. While the prices were not anything like what farmers should receive for their stock, owing to the low market, the returns were much greater than what farmers have been receiving when selling individually.

Hogs brought 4¼c per pound, from which is deducted 55c per cwt for freight charges, yard feeding, selling and Government inspection; while cattle brought 1¼c per pound less 40c per cwt. for expenses.

The next shipment will be on Monday Dec. 5th. Stock must be in yard before 11 a.m.

MR. WM. HENRY LAPOINT

The funeral of the late William Henry Lapoint, who passed away at his home in Aultsville, Tuesday Nov. 29th, 1932, was held Thursday afternoon from his late residence, thence to St. John's Lutheran Church. Interment was made in St. John's cemetery.

The late Mr. Lapoint was born May 30th, 1849. He leaves to mourn his widow, nee Marsellah Schwerdfeger; two children, Mrs. O. Lane of Aultsville, and William Henry Lapoint of Waddington; two brothers and three sisters: Reuben of Edmonton, Alta., Marcus of Perth, Mrs. Joseph Dischau, Peshtigo, Wisc., Mrs Claflin, Muchege, Okla. and Mrs. Festus Marcellus, Chesterville.

Voice of the Press

Canada, The Empire and The World at Large

CANADA

Editor Describes Horrors of a Motor Accident

Newspapers announced briefly that a motor car had run into a truck near Sarnia and that some of the occupants had been injured. Mr. A. R. Kennedy, editor of the Stratford Beacon-Herald, was in the immediate vicinity when the accident took place and helped to rescue the victims from the ruined car. They were a father, mother and young son. All three were badly hurt and are now in the hospital. The Stratford editor feels that not enough is said about such accidents, and that if more was said about them there would be less reckless driving on the public highways.

So he proceeded to write an editorial, a column and a half long and a column and a half wide, on the ghastly details of the affair—how it was pitch dark on a stormy night when the crash occurred; how the bleeding victims were taken from the motor; how they were carried to a neighboring farm; how difficult it was to reach a doctor; how the injured were finally carried to the Wyoming hospital, and how the farmer's wife fainted after they had been removed. The picture drawn by Mr. Kennedy is a tragic one. He speaks of gaping wounds and blood-soaked garments; of the moaning victims and of the pitifulness of the whole scene. He thinks that if the press would handle all motor accidents in the same way drivers would realize what it means to be in such accidents and that there would be an increase in careful driving and a consequent decrease in motor casualties.—Toronto Mail and Empire.

Charity

Governments cannot do everything in a crisis like this. The individual is bound to practice charity and the spirit of sacrifice much more than he does ordinarily. Those who are not unemployed, and who have not been too cruelly damaged by the crisis, and who still receive their salaries from week to week or from month to month should give proof of their generosity, even if this generosity can only be made at the cost of sacrifices.—Le Progres de Hull.

Prosperity and Depression

It would be a mistake to conclude that our normal state is one of prosperity. Dr. Thorp, of the National Bureau of Economic Research at Washington, prepared a table showing the condition of business since the year 1868. Between years of prosperity and depression and those which have seen both these elements, it works out this way: Depression, 20; prosperity, 24; divided, 20. Good years, lean years and those which lie in between seem to be rather evenly mixed. There is nothing in that table to act as a guarantee that good times will last or to indicate that periods of depression will not pass.—Stratford Beacon-Herald.

Becomes a Trail Blazer

Hats off to the much-denounced cigarette. It has taken the leadership in a movement away from high taxation that may earn a niche in the hall of fame. In a Canada weary of tax burdens the handy little smoke is the first to come forward with relief. Who knows but that the popularity of the excise tax reduction of two dollars per thousand will make converts all along the line of commodities until taxes and excises will be but an unpleasant memory in a happy land.—Toronto Telegram.

Canada Industrialized

Our manufacturing enterprises have developed with giant strides to the point when, to-day, this young country of ours despite its small population, is one of the most intensely industrialized countries in the whole world. . . The future of our industries is intimately related to the question of a market for our products. Whether we shall find the latter in the creation of a more extended domestic market or by way of agreements within the Empire, the great preoccupation of our Canadian manufacturers will always be to find a market for their articles. —La Presse, Montreal.

Supply and Demand

If Canada does not meet the demand for the goods on which she is offered preference, if she does not keep up a continuous supply of these goods and see that what she ships is of satisfactory quality, the market will not remain with her, preference or no preference.—Vancouver Province.

Killed By Mistake

Has any man any right to fire a shot without knowing what he is firing at? The tragedy which has haunted the woods this fall is almost unbelievable in its magnitude and its carelessness. A man is shot, the shooter taking him for a partridge. A man is shot, the hunter mistaking him for a bear. A woman is shot, the sportsman thinking he was firing at a moose. An ox is shot in mistake for something else. A man was shot as he went into the woods to drive his cattle home. A man moves the bushes and a shot brings him to the ground the shooter firing at the moment in hope of bringing down a moose. And so the tragic story unrolls itself, day after day, the wires bringing in their tale of dead and wounded.—Halifax Chronicle.

Use For Old Tires

Of the many varieties of scrap and waste materials for which there is a steady demand in Hong Kong and South China, one of the most important is wornout automobile tires. Ingenious and thrifty Chinese have observed that a sandal, just as comfortable as the locally made grass or straw sandal worn by the majority of natives, and with superior wearing and lasting qualities, can be cut out of used automobile tires, and a regular trade has developed in this commodity. Moreover, the excellent wearing qualities of this material has resulted in its adoption as soles for the conventional slipper worn by Chinese who can afford this type of footwear.—Brandon Sun.

THE EMPIRE

Sound Money

The poupnd is all right. It is the soundest unit of currency in the world to-day. Behind it are the character and resources of the British people. Nothing can destroy its value. But the foolish sayings of our public men and the irresponsible actions of isolated mobs can temporarily depress it.—London Daily Express.

Spending Wisely

Economy can never be a fault, but it must be sound economy, and most people are well aware—in their own conscience—of the distinction and where to draw the line. To cut off ordinary and normal expenditure on which the welfare of others depends, without necessity, in times like these, after the requirements of prudence have been reasonably met, is to do the State not service but disservice. The vast and still growing deposits at the banks are a sign that the Chancellor's exhortation to spend wisely is well-timed.—London Daily Telegraph.

The Farmers' Plight

Agriculture employs directly or indirectly 1,100,000 persons, so that it is the most important trade in the country. Its output of food is between £200,000,000 and £300,000,000 in value in an average year. The Government might well give the banks such guarantees as would enable them to grant immediate credit to the farmer. There need be no fear of subventioning inefficients. These have been weeded out long since. Only the best and shrewdest men remain after the years of depression through which agriculture has passed. But whatever is done must be done quickly if the tragedy of a million agricultural workers looking in vain for work in the coming winter is to be averted.—London Daily Mail.

The Empire's Sun-porch

The rate of exchange and the increased emphasis on Empire travel is bound to stimulate Empire resorts. And it must be remembered that these West Indies are the only Riviera that the Empire possesses. We are the natural Riviera for Canada and Great Britain. And we extend hearty welcomes to visitors from wherever they come.—Trinidad Guardian.

AMERICAN

Krueger's $250,000 Penthouse

We jumped at the chance, the other day, to see the much-talked-of penthouse of the late Ivar Krueger, at 791 Park Avenue. We had a fine time and wished you were there, because it's a hard thing to describe. It's a nine-room affair, not counting the servants' quarters. All the walls were painted by artists, not just workmen with brushes; they are Something. The lighting is indirect, complicated, and appalling. Bulbs hidden under the edges of the ceiling are controlled by a fantastic system of switches; rheostate concealed in the closet, regulate the intensity. Any room can be bathed in white, red, blue, or amber light, or any blending of these The match king was a great one for twiddling with lights. He could get daylight with white and amber, moonlight with white and blue; he could produce the tranquil light of stars and, by pulling enough switches, an effect something like the burning of Rome. Glass areas in the centres of the ceilings could also be made to glow like pools of fire or pools of blood. He liked red. At the head of his bed was a switch which he turned when he wanted to sleep; all the other lights went off and four soft red ones came on, one in each corner of the ceiling. Then the master slept, in the midst of his thousands of switches. Outside, in his remarkable housetop garden, the breeze stirred in his peach tree, his pear tree, his cherry tree, and his two tall weeping willows. — New Yorker.

Fined For Snoring in Church

Debrezin, Hungary. — Because he slept through the sermon and punctuated the discourse with snores, David Fekete, a merchant, was fined $12.50.

Beauty is a blossom of the unselfish soul.

In Season

"Cedar Jane," owned by Mr. Kennard of Newmarket, Eng., makes haste as she hurdles a high barrier bringing along a pheasant her master shot.

Fault-Finding

Are you inclined to be a faultfinder? If so, you may at once put away the idea that you will ever be either happy or generally beloved. The faultfinding, discontented individual is a perpetual cloud, constantly coming between us and the sun, we all try to give him or her a wide berth, for there is no more disagreeable companion; but perhaps most of all he is his own worst enemy, and so long as he wears the crooked spectacles of dissatisfaction he will see everything and everybody distorted, and the only thing on earth that is right or does right is himself, for the simple reason that himself he cannot see. He gets no happiness out of God's beautiful world; all things are either too long or too short; there is no satisfying the fault-find.er Are you inclined to put on these spectacles? Then don't. Some are born with them, others begin to put them on in fits of ill-temper, but beware how you put them on, they have a knack of stopping, and it requires a severe wrench to remove them. I never yet knew a fault-finder to be a loveable person.—M. K.

Police to Learn from Thrillers

The steady development of the detective novel from a loosely written and highly improbable, not to say impossible, story to a close-knit, logically reasoned, and ingeniously built-up work of fiction has been one of the most interesting features in the recent history of fiction. Men of the highest intelligence nowadays read detective stories for relaxation. And the leading novelists of the world are catering to their needs as never before.

It has remained for the Paris Surete, however, to discover in these tales something of real practical value. The Surete is now giving its secret service men a daily course in English and American detective fiction, in order that they may gain pointers thereby. This will come as a surprise to many people who have long been under the impression that the actual detective scoffs at the detective of fiction and that the methods of the former are very far removed from those attributed to the latter. But we live and learn.—Montreal Daily Star.

Oh, to be able to keep back the quick words that we so often speak, to suffer reproach and indignity and keep silent! But we only attain to this by constant vigilance, patience and prayer.

South Africa Wants Products of Dominion

A good hint to those actively interested in the export trade is contained in the current issue of the Commercial Intelligence Journal. Mr. G. R. Stevens, Canadian Trade Commissioner at Cape Town, writes that, for several reasons, there is a brisk demand among South African importers and manufacturers' representatives for agencies for Canadian products. Importers and agents are interested therefore in receiving and examining Canadian trade papers and commercial periodicals. Unfortunately, the majority of advertisers in such publications seldom publish the names of their overseas agent, nor do they state whether they wish to receive applications from would-be agents. As a result, the oversea importer does not know whether or not the advertiser is represented in his territory, and agents do not know whther there are any possibilities of securing agencies. In South Africa no reputable agent will apply for an agency which is already placed, and rather than risk such offence, many agents will forgo application when in doubt as to the position of any agency. The majority of advertisers in British and German trade papers supply the necessary information concerning their representation in very simple form.—Toronto Mail and Empire.

British Fair Opens Feb. 20

The British Industries Fair, which will open simultaneously in London and Bidmingham on Feb. 20 and continue until March 3, will be on a larger scale than ever before despite conditions of world trade. Exhibits are expected to occupy at least 750,000 square feet, 92 per cent. of which has already been booked. The London section will, as previously, include an extensive exhibition of textiles, pottery, leather and fancy goods, silver plate, sporting goods, glassware, giftwares and a greatly enlarged furniture and interior decorations section. The Birmingham division will be devoted to exhibits of the metal, electrical, hardware, construction and engineering industries.

Whether you be a man or woman you will never do anything in this world without courage. It is the greatest quality of the mind next to honor.

New President's Chauffeur

Perhaps the happiest chauffeur in America today is Monte Snyder of the big grin. When Mrs. Roosevelt moves into the White House, Monte will be at the wheel of the president's car.

Men Neglect Mouth Sanitation Resulting in Cancerous Growths

Higher Percentage of Cancer In Men Smokers Than Women --Daily Cleansing of Teeth and Mouth Imperative

This is just as preventable a disease as cancer of the skin. The sore spot due to the irritation of a tooth or the white patch of leucoplakia, the result of tobacco in any form, including snuff, is always present for some time before cancer develops. All one has to do when warned is stop tobacco or snuff and go to the dentist to have the teeth cleaned and smoothed, or the irritating plate changed. As a matter of fact a large number of people know and practice this to-day. In the last five years we have had ample evidence of the protective value of such knowledge. The modern woman who uses tobacco, chiefly in the form of cigarettes, very rarely develops cancer of the mouth, because this modern woman keeps her teeth clean, smooth and in good order, while the man, just as modern in other ways, still neglects his teeth, and the incidence of cancer of the mouth to-day is very much larger in men than in women.

Women have demonstrated to men that it is possible to smoke with very little risk of suffering from cancer of the mouth. When men learn this, they will protect themselves from many other diseases that depend upon the neglect of the teeth. Few women to-day use snuff, and these are living in regions less accessible to messages of this kind through the public press. But I wish to warn them that snuff used in the mouth as they use it is a very dangerous habit. When used in the nose it seems less dangerous.

Men and women who use tobacco in moderation and know the added danger of cancer if the teeth are neglected, may ultimately be protected from other threatening diseases which are caused by neglect of the teeth and neglect of daily cleaning of the mouth.

Us. S. Imports Parasites To Destroy Corn Borer

Lafayette, Ind.—Imported parasites are among the hopes of central states farmers for bringing the European corn borer under control, says G. A. Ficht, of the entomology department of the Purdue University agricultural experiment station.

Already some of the imported natural parasites of the borer are showing promise of establishing themselves and becoming numerous enough in Indiana to aid in borer control, he says.

One of the chief reasons for the destructiveness of the European borer in this country, Ficht points out, is the fact that it has been introduced here without the handicap of its native natural enemies which help keep it in check in Europe.

The American parasites that attack borers closely related to the European borer have not yet shown any appreciable tendency to transfer their activity to the visiting pest. So the native parasites are being imported from Europe and Asia by the United States Department of Agriculture.

Scientist Controls Mode Of Insect Reproduction

Ann Arbor, Mich.—Professor A. Franklin Shull, University of Michigan zoologist who, several years ago, succeeded in controlling the wing growth of certain insects, now can control the way in which they bear their young.

In experiments with aphids, known as plant lice or ant cows, Professor Shull pre-determined whether the aphids should be oviparous, that is, producing their young from eggs, or viviparous, producing their young alive.

Either kind could be converted into the other by treating the parents with different conditions of light and temperature. He also pre-determinded whether they should be parthenogenetic, reproducing without from fertilized eggs.

Farm Schools For Boys Prove Popular in U.S.

Ithaca, N.Y.—The response to the teaching of farming to farm and village boys in the United States from 1918 to 1931 shows an increase of 1,550 per cent in the number of pupils, 700 per cent in the number of schools and 500 per cent in the number of teachers, says Professor R. M. Stewart, of the New York State College of Agriculture.

In New York State the increase in this teaching, generally known as vocational agriculture, has been from eighteen teachers and about 1,000 pupils in 1918 to 184 teachers and schools and teachers with more than 4,000 pupils in 1931, he says.

Soviet to Form Academy of Arts

Moscow.—The establishment of a national Academy of Arts, with headquarters in Leningrad, has been decided upon by the government here. Its organization must be completed by the end of this year, the official resolution on the subject specified. Before the revolution there was such an academy in Russia, but it was not continued after the overthrow of Czardom.

Schoolboys Breed Butterflies

Duluth, Minn.—Four Duluth high school boys have turned a hobby of raising caterpillars into a profitable occupation. The boys started a caterpillar "farm" three years ago, gathering an assortment of rare butterflies, moths and caterpillars. This year they are raising about 1,000 caterpillars, which later will turn into butterflies and moths. The insects then are to be mounted and sold to entomologists. Rare specimens have been sold to numerous collectors.

Mines Trade Coal for Wood

Newcastle, England.—An exporting firm here has agreed to furnish 30,000 tons of coal to the Swedish state railways in return for an equal value in cut timber suitable for shoring up mine galleries. Recently 95,000 tons of coal were sold to inland on similar terms.

Children Learn Weaving Craft

London Exhibition Reveals Practical Value Underlying Training

London. — Aesthetic and practical values underlying home crafts as practiced by school children were revealed at an exhibition of weaving and related crafts held here under the auspices of the London Schools' Guild of Arts and Crafts.

The aim of the Guild is to cultivate in the child an appreciation of beauty; to encourage and develop the technique of the fingers; and to give him a cottage craft which, though intended as a hobby could at any time be turned to useful account.

The exhibition was an exhaustive display of all types of weaving done by school children in the London County Council area, and gave the impression that so long as the student can throw a shuttle he can pretty well make everything. Having learned to clean fleece spin it and dye it, the children then set to work to weave their own garments—dress lengths, coatees, scarves, caps and hat bands.

A toy caravan was entirely furnished with woven articles made by six-year-olds. Hammocks, mattresses, pillows, blankets, bedspreads, curtains, doll's clothes, and even horse-rug and broom were woven with extraordinary skill. Still younger infants had busied themselves in making table mats and dress ornaments, while two little girls of five and six joined forces in weaving a tea cozy.

Some of the children, not content with producing goods, turned their hand to writing short essays on the history of weaving, references to weaving found in the Bible, stories and poetry relating to the weaving craft, and songs of the weaver.

Collections of native and peasant weaving were assembled from all parts of the world, and specimens of work from Bosnia, Macedonia, India, Russia and Irak were shown in order that children might obtain fresh inspiration for their designs, and new ideas as to the possibility of color combination.

A valuable collection of Peruvian Indian cloth, being a mixture of headle loom weaving and tapestry, and believed to be over 1000 years old, was also shown proving how lasting were the beautiful dyes employed, and how durable the textiles.

King George Congratulates Aviatrix on Long Flight

Cape Town, South Africa.—"I congratulate you on your splendid achievement and I trust you are not too exhausted."

This was the message sent by the King to Amy Johnson, world's premier woman flier after a record-breaking flight from England.

The royal message was undelivered for some time. Amy was sleeping, a long round-the-clock sleep which came after 102 hours of terrific strain. During the trip she had snatched only five hours sleep. Her host deemed it wise to retain the telegram until such time as the victorious flier had wakened.

Hundreds of other messages of congratulations and thanksgiving for her safety were piling up but Amy was obvious to it all. The newspapers had come out with high editorial praise for the aviatrix and after pointing out the difficulties she had met with her oil filter and fearful weather proclaimed her achievement "not luck but pluck."

Three Years' Deportations From Canada Total 15,364

Ottawa.—For the three years ending March 31, 1932, a total of 15,364 persons were deported from Canada, according to a return tabled in the House of Commons recently. More than one-third, or 5,573, were English; while the next largest national group were Scots, who numbered 2,600.

The fiscal year of 1931-1932 showed the largest number of deportations—7,025, or nearly one-half of the total for the three years No information could be secured as to the numbers returned to their countries of origin at their own free will, or of those returned at private expense.

What's Wrong Puzzle

There are from fifteen to twenty mistakes in each of the cartoons which will appear weekly on this page. See if you can find them and then compare with list which will be published next week.

Words "dogs," "cats" and "allowed" incorrect on sign.

One handle missing from the wash boiler.

Word "cigarettes" misspelled.

Potatoes are not sold by the quart.

Word "Cider" mispelled.

Dog should not be in grocery.

Dollar sign not in correct place on shoes.

Shoes are not mates.

Pear sign is not on pears.

Bananas growing up-side down on stalk.

Mice do not come out where there are people.

Man has his hat on cross-wise.

Ducks are not kept on the shelves in a grocery.

Wheels do not match on small boy's wagon.

Small boy has nothing by which to pull his wagon.

Numbers on the clock are backwards.

The quality of RED ROSE makes it good value whichever price you pay 25

Owl Laffs

Wife (at desk)—"I've been asked for reference for our last maid. I've said she's lazy, unpunctual and impertinent. Now can I add anything in her favor?"

Husband—'You might say she's got a good appetite and sleeps well."

Monty's idea of a courageous and independent man is one who can go entirely through life with a full set of tonsils.

Tacks

How much alike people are in general outline, but how different in detail. If, as is said, Nature abhors a vacuum, why does she create so many? People who bury the hatchet don't need a marker to remember the burying place. Truth is stranger than fiction—also scarcer and less interesting. Amusement is the happiness of those who cannot think. Some women seek to attract attention by trying to look miserable. There's something good, even noble, about anyone who does his job well. Consider well your own faults and you will have less to say about the faults of others.

Get It Done

It isn't the job we intended to do,
Or the labor we've just begun,
That puts us right on the balance sheet,
It's the work we have really done.
Our credit is built upon things we do,
Our debit on things we shirk,
The man who totals the biggest plus
Is the man who completes his work.
Good intentions do not pay our bills,
It's easy enough to plan,
To wish is the play of an office boy,
To do is the work of a man.

When a man buys a round trip ticket he thinks he's covered all the expense of the trip, but he forgets that his wife will have to buy a trunkful of new clothes.

Sandy—'How much to the station?"

Taxi Driver—'Fifty cents, sir."

Sandy — "Does that include the charge for my bags?"

Taxi Driver—"I'll take those for nothing."

Sandy—"Excellent. Then I'll walk."

"Everybody has more or less trouble."

"Yes" answered the observant woman. "If a man can't find anything else to worry him, he goes to a ball game and gets highly indignant at the umpire."

Truth in a Nutshell

The reason some folks never have any luck is because they spend too much time wishing on a load of hay, or looking at the moon over their right shoulder.

Evelyn—"Oh, Jack's so wonderful—he's generous, polite, self-sacrificing, modest, religious and extremely affectionate. He doesn't smoke, gamble, drink or look at other women. But, just my luck, he's married."

Hattie—"Don't worry, dearie; no woman will stay married to a freak like that."

Mary—"I hear you intend to teach after you are graduated."

Carrie—"Yes, and I have the man already picked out.t'

A wealthy society lady had just engaged a new maid and was instructing her in the duties of waiting on the table.

Society Lady—"At dinner, Mary, you must remember always to serve from the left and take the plates from the right. Is that clear?"

New Maid—"Yes, ma'am. What's the matter, superstitious or something?"

Small child, in cinema, as picture of Gandhi appears on the screen—"Oh, Mummy, what is it?"

Mother—"Sh, dear."

Child, as Gandhi starts talking—"Oh, Mummy, it can talk!"

Just the Thing

A minister delivered a sermon of only ten minutes duration. At the conclusion he explained: "I regret to inform you, brethren, that this morning my dog playfully ate the portion of my sermon that I have not delivered. Let us pray."

After the service a man who was a member of another church shook the preacher's hand and said: "I should like to know when that dog of yours has pups. I'd like one to give to our minister."

Made to Measure

At a motor show a man and woman were discussing a popular four-seater of the baby type, the woman appearing to lay down the law and the man nodding—without any enthusiasm.

Suddenly he drew a tape from his pocket. He measured the door of the car and then turned to the woman.

"All right, Mary," he said. "Have it your own way! But that bus has either got to have larger doors or I've got to have a smaller mother-in-law."

Well Children

"Occasionally I give each of my five children BABY'S OWN TABLETS—I am sure that is why they never have any serious illness", writes Mrs. George Morley, Yarker, Ont. This sound advice is passed on to *all* Mothers.
BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child—see analyst's statement in each 25c package. Recommended by mothers for teething troubles, simple fevers, colic, digestive disorders, constipation, fretfulness. Easy to take as candy. 245

Couldn't Walk a Step

Credit Given Dr. Williams' Pink Pills For Ending Severe Attack of Rheumatism

Rheumatism Never Returned

"My father, a man past middle life, was suddenly stricken with rheumatism in the knees," writes Mrs. James Mitchell, St. Catharines, Ont. "So severe was the attack that he was unable to take one step without assistance. We concluded that the trouble was constitutional, so we procured a supply of Dr. Williams' Pink Pills. A decided improvement was noticed, and when three boxes had been taken the trouble had completely disappeared. He never had the slightest return of the rheumatism."

Dr. Williams' Pink Pills have proved wonderfully effective in numerous cases similiar to this one. When the blood stream becomes thinned, rheumatism attacks the system. Dr. Williams' Pink Pills actually create an abundance of new rich blood cells, which enrich the blood stream and revitalize the entire system. They're highly recommended for ALL rundown or nervous conditions. They are a great help to growing girls. Get the Pills at your Druggist's. 50c package.

Adjustable Slip

By HELEN WILLIAMS.

Illustrated Dressmaking Lesson Furnished With Every Pattern.

Obviously much study has been given to the designing of this costume slip for matrons.

It has a new idea in its wrapped closing which is quite an asset. You can adjust it to suit your figure. A narrow tie belt attached to front edges of the slip is passed through an opening at the right underarm seam. It is tied at the left side.

It's shadow proof!

It's made in a jiffy!

Style No. 2990 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust.

Size 36 requires 4½ yards of 35-inch material with 7 yards of binding.

HOW TO ORDER PATTERNS.

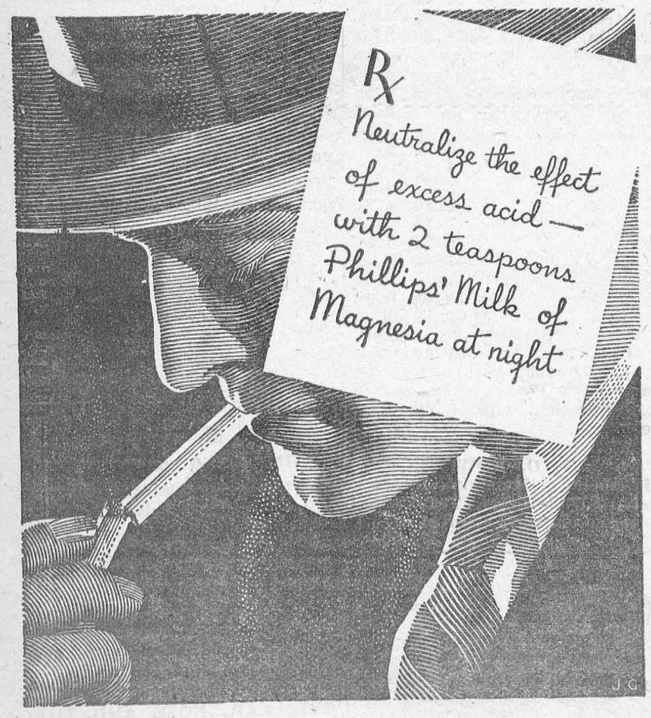
Write your name and address plainly, giving number and size of such patterns as you want. Enclose 15c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

IN TEARS WITH PAIN OF RHEUMATISM

"For six weeks," a woman writes, "I had rheumatism, mostly in my feet and wrists. In fact, I have been in tears with the pain. Owing to stomach trouble, I could not take any kind of medicine, as it made me feel sick. So a lady said I should try Kruschen Salts. I am very thankful that I did so, for now I feel completely restored. I have not been taking anything else, so it must be Kruschen that has relieved me."—Mrs. C.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

KEEPING FIT



"Made In Canada"

Indulgence in rich foods, tobacco, or anything else that piles up acid in the system should be offset with a little Phillips' Milk of Magnesia. This neutralizes the acidity and you feel fine. Plenty of men know there is nothing like it for "mornings after." Get the genuine; there's something about the Phillips formula, and the way Phillips' is made. Substitutes don't act the same.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Now You Know

A well-dressed, sane-looking man of forty-five or so was driving along Piccadilly in a bright roadster with the top down when suddenly he removed his hat, a new brown felt, and threw it away.

In case anybody saw this extraordinary gesture, we can explain how it happened.

The man, inclined to absent-mindedness, has two cars, the other one being a sedan. He thought he was in the sedan and had tossed his hat over his shoulder on to the back seat.

"What kind of a woman is Wilson's wife?" "The kind that talks on and on and on about things that leave her speechless."

"We can't pay you the $25.00 on this money order until you are identified."

"That's tough! There's only one

98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

ANNUAL DISTRICT DAIRY MEETING

The annual District Dairy Meeting for the County of Dundas was held at South Mountain, Nov. 16, 1932, and was well attended. The instructors gave a very favorable report. Mr. George Barr, Director of Dairying, addressed the meeting. Mr. Freeman Brown, of the Federal Grading Staff also gave a very good address. The Honorable George H. Challies, M.P.P., and Mr. A.C. Casselman, M.P., generously donated cups to the cheesemakers who made 100 per cent cheese in 1932. These cups were presented by J.J. Payne, secretary of the Iroquois Cheese Board. Those who received cups were Messrs A.H. Bolton, M. Murphy, W.T. Coleman, G. Martin and H. Mellon.

Mr. A.E. McGruer was unanimously elected Director for the coming year.

MR. ROLAND FROATS

The funeral of the late Roland Froats was held from St. John's Evangelical Lutheran Church, Riverside, Nov. 30th. Mr. Froats was in his 87th year, and had been a lifelong resident of this community, a thorough Christian and an honored and beloved citizen.

He leaves to mourn three sisters, Mrs. Daniel Schell and Mrs. Wm. Fetterly of Morrisburg, and Mrs. Matthew Marcellus of Aultsville, together with a wide cirle of friends. His wife predeceased him in July of this year.

Interment was made in St. John's cemetery.

BANK OF MONTREAL REPORT SHOWS MAINTENANCE OF USUAL STRONG POSITION

Featured by unusually strong liquid reserves and affording every reason for confidence, the Bank of Montreal annual statement makes its appearance at an opportune time. Financial conditions, not only in Canada but throughout the world, have been of an exceptional nature and on this account there will be a distinct feeling of satisfaction that the Bank of Montreal again reports to its shareholders the maintenance of its usual strength.

As was to be expected, due to the lessened industrial activity, there has been a slight falling off in a number of the accounts, as compared with a year ago, but this has been very moderate, in view of the general conditions. On the other hand, there has been a marked increase in the holdings of Government and other high grade bonds and debentures.

Total deposits continue at a satisfactory level, well above the $600,000,000 mark. The profit and loss account shows profits for the year considerably below those reported for the previous year. They were, however, sufficient to permit payment of dividens and other charges, and provide a further addition to profit and loss account.

Large Liquid Assets.

The annual statement, which is for the fiscal year to October 31st, and is presented in easily understandable form, appears elsewhere in this issue. It shows total assets of $769,166,272, as compared with $794,523,333 at the end of the previous year. Included among these are quickly available resources of $439,768,506, equal to 63.46 per cent of all liabilities to the public. They are up from $417,406,508 a year ago The principal accounts in the quickly available resources are represented by government and other bonds and debentures of a value of $266,729,664, up from $236,433,817 a year ago. Cash on hand and in Central Gold Reserves stands at $84,976,182.

During the period there has been a steady reduction in call loans, with the result that call loans outside of Canada are down to $20,071,135 from $28,252,802, while call loans in Canada now stand at $5,157,690 against $9,243,921 at the end of the previous year.

Current Business Quieter.

As a result of the lessened activity in industry and trade generally, current loans continued to recede from the higher levels of more active years and now stand at $302,931,269, as compared with $348,525,148 a year ago.

Deposits continue at a healthy level and would seem to indicate a desire on the part of Canadian depositors to maintain ample savings accounts during difficult periods. Total deposits are reported at $648,832,663, and compare with $669,047,251.

A particularly interesting feature of the report is that it shows total assets of $769,166,272 with which to meet payment of all liabilities to the public of $693,005,318, leaving an excess of assets over liabilities to the public of $76,160,9554.

Profit and Loss Account.

The profit and loss account reflects the smaller amount of business offering during the year. Total profits were $4,663,100, as compared with $5,386,379 in the previous year. The distributions made from profits were: dividends to shareholders $3,960,000; provision for taxes Dominion Government $457,671; reservation for bank premises $100,000, leaving a balance to be carried forward of $145,429. This amount, added to the balance of $1,103,427 carried forward at the end of the previous year, brought the total balance at the end of the fiscal year to $1,248,856.

The report will be submitted to shareholders at the annual meeting, which will be held at the head office of the Bank in Montreal on Monday, December 5th.

PILES Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c. stamp for postage.

NEWS AND INFORMATION FOR THE BUSY FARMER

The fourteenth Canadian Egg-Laying Contest got away to a good start at Ottawa in November. Most of he birds were received in excellent condition and appeared to be outstanding in quality.

Honey producers will be interested to learn that Canadian exhibitors captured eleven prizes in the honey section of the Imperial Fruit Show held in Bingley Hall, Birmingham, England, in October. These included one first, six seconds and four thirds.

Fuel Wood Industry Resumes in Ontario

"Another example of the Ontario farmer's ingenuity, under present conditions," commented J.A. Carroll, director, Markets Branch, Ontario Department of Agiculture, "is illustrated by the fact that he is using, bartering and selling wood for fuel. Until comparatively recently, the fuel wood industry had almost ceased. Today, however, it is a common sight to see wood being moved along country roads towards the city, or from one farm to another.

"In many cases where a direct sale of wood cannot be made, I understand that farmers have adopted the resourceful idea of using fuel wood to meet their bills or exchanging it for other products.

VISITS TO STOCK YARDS PROFITABLE TO PRODUCER

"If my advice were asked," commented Garnet H. Ducan, live stock investigator, Ontario Marketing Board. "I would suggest that those feeding for veal purposes could profit by frequent visits to the market. In this way the producer would acquire a knowledge of market requirements. Also, I would suggest that the producer compare his stock with that of others, rather than concentrate his entire attention on his own stock.

"Recently a quantity of calves was sought by a buyer from New York. he quality offered was the only feature that operated against a brisk market. As a matter of fact, 938 calves were offered, and only 75 of this number fould meet the required quality for export.

"This trade is open to the producer quality for export.

"This trade is open to the producer for a considerable portion of the year, nine months, and when a surplus of calves exist. There is no question, in my mind, that cultivating such a market, thus relieving congestion, is of vital importance to the producer."

Events of Interest

Dec. 6-7—Central Ontario Cheesemaers' Association Convention, Napanee.

Dec. 6-8—Ontario Provincial Winter Fair, Guelph, Ont.

Jan. 4-5—Eastern Ontario Dairymen's Ass'n Convention, Perth.

Jan. 11-12—The Western Ontario Dairymen's Convention, London.

Sugar Bush Licenses

While no fee is required for a license for a sugar bush or orchard, the Maple Products Act requires that all owners of sugar bush or orchard obtain a license for their operations not later than the end of December in each year. A great many applications for licenses or renewals have already been received by the Dominion Fruit Branch, and the value of these to producers becoming better known is doing much to develop and expand the industry.

Current Crop Report

According to reports from Middlesex, Brant and other counties, cattle have gone into winter quarters in better than usual condition, pastures never having been better than during the entire 1932 grazing season. Welland reports fall wheat going into winter in excellent condition, with fine top. Fall plowing operations were brought to a halt by cold weather in numerous districts. Lanark in Eastern Ontario reports that cattle have come into stables in lower condition than last year, and that with a scarcity of feed and a general overstocking on most farms, one would expect very thin cattle in the spring.

Grain Show Fees Reduced

A.H Martin, Ontario Secretary, World's Grain Show, has been advised by the authorities at Regina, that entry fees have been materially reduced. In classes where prize money amounts to $2,400 or more, the entry fee has been reduced from five to three dollars, and where the prize money totals less than $2,400, the entry fees are now $1.50 instead of $2.00.

The management felt that this charge would be more in keeping with present conditions, and that prospective exhibitors would welcome the reduction in fees. As a result of this action, a considerable increase is looked for in the number of exhibits in the competitive classes.

It Pays to Finish Hogs

The low price of pork and pork products very often results in the marketing of many unfinished hogs. This in turn forces the market to ever lower levels and results, in many cases, in losses to the producer, whereas the sale of a finished product would have shown a profit. In times of depression the advantages of marketing only superior quality products are even more marked than when prices are high. For example, in 1929 when hogs were selling for 12 cents per pound or more, the premium on a select hog was $1 or an increase in the value of a 200 pound hog of 4.17 per cent. In 1932, with a price of 4c per pound, the increase in value on a select hog is 12.5 per cent. Similarly, the percentage dockage on grades below bacon is increased with a decrease in hog prices.

Help in Share Renting

An excellent circular containing a brief but comprehensive discussion of the principles and conditions of share renting of farms has just been prepared by the Department of Agricultural Economics at O.A.C.

Anyone interested may secure a copy by writing to that department.

The two main plans of rental are set forth, namely crop share renting and livestock and crop share renting. Many modifications of these are suggested and discussed. Tables are given showing satisfactory proportional division of expenditures and returns as between landlord and tenant, under varying conditions of soil fertility, buildings and equipment, and market facilities. The circular also contains a form of agreement which should proce very useful, both to tenants and to those who have farms to rent, in helpinf to avoid some of the pitfalls common with loosely stated or with unwritten agreements.

The strength of a bank is determined by its history, its policy, its management and the extent of its resources. For 115 years the Bank of Montreal has been in the forefront of Canadian finance.

ANNOUNCEMENT

After managing for twenty-six years the Business College at Brockville, we have purchased the Kingston Business College, and are now conducting both schools.

New Year Term enrolment days will be January 2 and 3, 1933. We train stenographers, typists, bookkeepers, file clerks, bank clerks, civil servants, etc. and assist them to get positions. For information address:

W.T. ROGERS,
Brockville Business College,
R.H. METZLER,
Kingston Business College.

THE LEADER

SUBSCRIPTION RATES

$1.50 per year, strictly in advance, to any address in Canada; when not paid within three months, $2.00 per year to any address in Canada. Foreign subscriptions, $2.00 in advance. All subscriptions date from the first day of the month.

ADVERTISING RATES

Display or open advertisements, one insertion, 50c per inch; second and following insertions, 35c per inch; 200 inches and over, by contract, not over one year, 20c per inch. All Legal, Government, and Municipal display advertisements will be charged at 50c per inch, regardless of number of inches or number of insertions.

200 inches or more must be reserved at time of making contract in order to earn the 20c per inch rate and no rebate will be allowed the advertiser, should more than 200 inches be taken out within one year, without having been reserved by contract.

Should the advertiser fail to take out the number of inches contracted for, the amount of space used will be charged at the regular card rate in force at the time of making contract.

Lost, Found. To Let, Wanted. Articles for Sale, Etc., 5 lines and less, first insertion 50c; each subsequent insertion 35c.

NOTE—All small advertisements received by mail must be paid in advance.

Goverrment, Legal and Municipal Notices, By-Laws, Election Readers, Etc.—15c per line for the first insertion; 10c per line for each subsequent insertion; 12 lines to the inch.

Advertisements ordered for insertion without instructions will be published until instructions are received to discontinue same.

Notwithstanding anything to the contrary that may appear in the contract, cuts left in our possession more than 30 days after date of insertion will be destroyed.

LANGLEY'S Cleaners and Furriers now bring to you twice weekly service—Tuesday and Friday. Suit or top coat, $1.00; dresses cleaned exquisitely for $1.00. Dying a specialty.—A.B. McGANNON'S MILL-

Where Weight Counts

If you were a working man dependent upon a not too liberal supply of daily work to support your family, what would you think if your weight went down from 150 to 95 pounds?

Herbert was alarmed when this happened to him, but he did not want to take "time off" nor to spend money on himself. However, coughing and weakness had their effect and one day he had to be hurried to the Toronto Hospital for Consumptives. The experienced doctors at the hospital shook their heads when Herbert's weight was known —so little to build on!

However, patience, good nursing and complete rest have had the desired effect. His weight has increased twenty-two pounds, and he feels sure that he will be able to return to support his family at no distant date.

Financial assistance is urgently needed to continue the good work for many such as Herbert. Will you please lend your assistance by sending a generous contribution to G. A. Reid, 223 College St., Toronto 2,

Physicians Skill Is Taxed

Little gray-eyed Philip gazes at you hopefully, Perhaps you can mend his damaged toy? Yes, that can soon be done—but to help mend his damaged lungs, his weakened little frame, is a work of far greater moment.

It will tax all the care and skill of the kindly doctors and nurses of the Queen Mary Hospital for Consumptive Children to bring this about. However, there is hope ever for Philip, as there is for so many other little children who are being cared for in this institution.

Contributions to assist this great work are needed, however, and a gift of money from you will be most welcome. Please send it to G. A. Reid, 223 College St., Toronto 2.

Cook's Regulating Compound

A safe, reliable regulating medicine. Sold in three degrees of strength—No. 1, $1; No. 2, $3; No. 3, $5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor)

Pimples and Eczema Disappear the Skin Made Soft and Smooth by Using Dr CHASE'S OINTMENT

"I'll tell them not to come"

The Gordons had looked forward to this evening for weeks; their Dunvale cousins were to motor over for an oldtime reunion.

Yet here was Dora in spite of her determination to see it through, fit for no place else but bed.

"Don't worry" said Harry, "they'll not have left yet. I'll telephone and tell them not to come. We'll make it next week instead".

Long Distance, for big or little emergencies or as part of the daily routine, is always easy to use, quick and dependable.

The Green Murder Case

BY S. S. VAN DINE.

SYNOPSIS.

Philo Vance, with a hobby for solving mysteries, becomes interested in the Greene murders when District Attorney John Markham and Sgt. Heath are called in after the fatal shooting of Julia Greene and the wounding of her younger sister, Ada. Old Tobias Greene's widow, together with five children, Julia, Chester, Sibella, Rex and Ada (adopted) live in the old Greene mansion. Police investigations reveal nothing; then Chester is found shot dead seated in a chair in his room. Again footsteps are found to and from the entrance of the mansion. Ada goes to Markham's office and informs him that Rex has not told all he knows. Five minutes later word comes that Rex has been shot. A few hours later Dr. Von Blon reports the theft of poison from his satchel. Vance examines the old Greene library.

CHAPTER XXVII.—(Cont'd.)

Vance struck match after match as he carefully inspected the tops of the books, beginning at the highest shelf and systematically scrutinizing the volumes of each row. He had reached the second shelf from the floor when he bent over curiously and gave a second long look at two thick gray volumes. Then, putting out the match, he took the volumes to the window.

"The thing is quite mad," he remarked, after a brief examination. "These are the only books within arm's reach of the chair that have been handled recently. And what do you think they are? An old two-volume edition of Prof. Hans Gross' 'Handbuch fur Untersuchungsrichter als System der Kriminalistik,' or—to claw the title loosely into the vulgate—'A Handbook on the Criminal Sciences for Examining Magistrates'."

He gave Markham a look of facetious reproach. "I say, you haven't, by any chance, been spending your nights in this library learning how to ballyrag suspects?"

Markham ignored his levity. He recognized the outward sign of Vance's inner uneasiness.

"The apparently irrelevant theme of the book," he returned, "might indicate a mere coincidence between the visits of some person to this room and the crimes committed in the house."

Vance made no answer. He thoughtfully returned the books to their place and ran his eye over the remaining volumes of the bottom shelf. Suddenly he knelt down and struck another match.

"Here are several books out of place." I detected a subdued note of eagerness in his voice. "They belong in other sections; and they've been crowded in here a little out of alignment."

"Moreover, they're innocent of dust. . . . 'Pon my soul, Markham, here's a coincidence for your skeptical legal mind! Lend an ear to these titles: 'Poisons: Their Effects and Detection,' by Alexander Wynter Blyth, and 'Textbood of Medical Jurisprudence, Toxicology, and Public Health,' by John Glaister, professor of forensic medicine at the University of Glasgow. And here we have Friedrich Brugelmann's 'Uber hysteriche Dammerzustande,' and Schwarzwald's 'Uber Hystero—Paralyse and Somnambulismus.'—I say! That's deuced queer. . . . ."

He rose and walked up and down agitatedly.

"No—no; absolutely not," he muttered. "It simply can't be. . . . Why should Von Blon lie to us about her?"

We all knew what was in his mind. Even Heath sensed it at once, for, though he did not speak German, the titles of the two German books—especially the latter—needed no translation to be understood. Hysteria and twilight sleep. Hysterical paralysis and somnambulism! The gruesome and terrible implication in these two titles, and their possible relation to the sinister tragedies of the Greene mansion, sent a chill of horror over me.

Vance stopped his restless pacing and fixed a grave gaze on Markham.

"This thing gets deeper and deeper. Something unthinkable is going on here. Come let us get out of this polluted room. It has told us its gibbering, nightmarish story. And now we will have to interpret it—find some glimmer of sanity in its black suggestions. Sergeant, will you draw the curtains while I straighten these books? We'd best leave no evidence of our visit."

CHAPTER XXVIII.

(Wed., Dec. 1, 4.30 p.m.)

When we returned to Mrs. Greene's room the old lady was apparently sleeping peacefully and we did not disturb her. Heath gave the key to Nurse O'Brien with instructions to replace it in the jewel case, and we went downstairs.

Although it was but a little past 4 o'clock, the early winter twilight had already descended. Sproot had not yet lighted the lamps, and the lower hall was in semi-darkness. A ghostly atmosphere pervaded the house Even the silence was oppressive, and seemed fraught with the spirit of commination. We went straight to the hall table where we had thrown our coats, eager to get out into the open air.

But we were not to shake the depressing inuence of the old mansion so quickly. We had scarcely reached the table when there came a slight stirring of the portieres of the archway opposite to the drawing room, and a tense, whispered voice said:

"Mr. Vance—please!"

We turned, startled. There, just inside of the reception room, hiding behind the heavy draperies, stood Ada, her face a patch of ghastly white in the gathering gloom. With one finger placed on her lips for silence, she beckoned to us; and we stepped softly into the chill, unused room.

"There's something I must tell you," she said, in a half whisper, "something terrible! I was going to telephone you today, but I was afraid. . . . ." A fit of trembling seized her.

"Don't be frightened, Ada," Vance encouraged her soothingly. "In a few days all these awful things will be over. What have you to tell us?"

She made an effort to draw herself together, and when the tremor had passed she went on hesitantly.

"Last night—it was long after midnight—I woke, and felt hungry. So I got up, slipped on a wrap and stole downstairs. Cook always leaves something in the pantry for me. . ." Again she stopped, and her haunted eyes searched our faces. "But when I reached the lower landing of the stairs I heard a soft, shuffling sound in the hall—far back, near the library door. My heart was in my mouth, but I made myself look over the bannister. And just then—some one struck a match. . . ."

Her trembling began afresh, and she clutched Vance's arm with both hands. I was afraid the girl was going to faint, and I moved closer to her; but Vance's voice seemed to steady her.

"Who was it, Ada?"

She caught her breath and looked about her, her face the picture of deadly fear. Then she leaned forward.

"It was Mother! . . And she was walking!"

The dread significance of this revelation chilled us all into silence. After a moment a choked whistle escaped Heath; and Markham threw back his head like a man shaking himself out of an encroaching spell of hypnosis. It was Vance who first recovered himself sufficiently to speak.

"Your mother was near the library door?"

"Yes; and it seemed as though she held a key in her hand."

"Was she carrying anything else?" Vance's effort at calmness was only half successful.

"I didn't notice—I was too terrified."

"Could she, for instance, have been carrying a pair of goloshes?" he persisted.

"She might have been. I don't know. She had on her long Oriental shawl, and it fell down about her in folds. Maybe under the shawl. . . . Or she might have put them down when she struck the match. I only know I saw her—moving slowly. . . there in the darkness."

The memory of that unbelievable vision completely took possession of the girl. Her eyes stared, trance-like, into the deepening shadows.

Markham cleared his throat nervously.

"You say yourself it was dark in the hall last night, Miss Greene. Perhaps your fears got the better of you. Are you sure it might not have been Hemming or the cook?"

She brought her eyes back to Markham with sudden resentment.

"No!" Then her voice took on its former note of terror. It was mother. The match was burning close to her face, and there was a terrible look in her eyes. I was only a few feet from her—looking straight down on her."

Her hold on Vance's arm tightened, and once more her agonized gaze turned to him.

"Oh, what does it mean? I thought mother could never walk again."

Vance ignored her anguished appeal.

"Tell me this, for it's very important; did your mother see you?"

"I—don't know." Her words were scarcely audible. "I drew back and ran softly up the stairs. Then I locked myself in my room."

Vance did not speak at once. He regarded the girl for a moment, and then gave her a slow, comforting smile.

"And I think your room is the best place for you now," he said. "Don't worry over what you saw; and keep what you have told us to yourself. There's nothing to be afraid of. Certain types of paralytics have been known to walk in their sleep under the stress of shock or excitement. Anyway, we'll arrange for the new nurse to sleep in your room tonight." And with a friendly pat on the arm, he sent her upstairs.

After Heath had given Miss O'Brien the necessary instructions, we left the house and walked toward First Avenue.

"Vance!" said Markham huskily. "We've got to move quickly. That child's story opens up new and frightful possibilities."

"Couldn't you get a commitment for the old woman to some sanatorium tomorrow, sir?" asked Heath.

"On what grounds? It's a pathological case, pure and simple. We haven't a scrap of evidence."

"I shouldn't attempt it, in any event," interposed Vance. "We must not be hasty. There are several conclusions to be drawn from Ada's story, and if the thing that all of us is thinking should be wrong, we'd only make matters worse by a false move."

(To be continued.)

ACHES and Pains easily relieved

Aspirin will relieve your suffering harmlessly and in a hurry Swallow a tablet in a little water. The pain is gone.

It's as easy as that to be rid of the pain from an aching tooth; of headache from any cause. Muscular aches due to rheumatism, lumbago; to colds or strains, are easily overcome. Those unexplained pains of women are soothed away in an instant.

The modern way to relieve pain is with Aspirin. That is the way that modern medical men approve. They know Aspirin is safe—can do no harm. It does not depress the heart.

You will always find Aspirin in any drugstore, and if you read the proven directions and follow them you will always get relief. You will avoid lots of suffering if you just remember about Aspirin tablets. Be sure you get Aspirin and not a substitute.

'Aspirin" is a trade-mark registered in Canada.

SAIL CUNARD ANCHOR-DONALDSON

The Fine Art Of Letting Go

By LEWIS GASTON LEARY
in Scribner's Magazine

My wife and I are again passing through that difficult period of family life when dinner-table conversation with a high-school son resembles the cross-examination of a reluctant witness by opposing counsel. On the average it takes four courteous inquiries, plus two maternal pleadings and one stern paternal admonition, to drag out of him a sketchy bit of information about some inconsequential happening of the day.

While I must confess that this "none of your business" attitude toward a natural interest in the doings of our offspring sometimes irritates me, it does not worry me at all; for I realize that the unnecessary secretivenss of adolescence, and even its deliberately provocative challenges to parental authority, are by-products of an entirely wholesome instinct, the absence of which in any of my children would seriously disturb my peace of mind.

If the adult years are to be successful and happy, the adolescent period must be marked by the attainment of an emotional independence, a new sense of individualism, an entity of existence which is self-conscious and self-sustaining and not any longer rooted in the parental home. Therefore all normal young people are egotistical; for the fuller realization of the I in them is a vitally necessary accomplishment of the transition stage between childhood and maturity.

That annoying son of mine is too busy to analyze his present attitude, beyond concluding that he is old enough now to live his own life, make his own decisions, have his own private thoughts, and in general be treated like a man; but what he is really trying to do is to teach his individuality from us, so that instead of being "our son, William" he will be -- himself.

"When the time comes, thou shalt let thy children go." We children growing away from their dependence on us. Yet there comes a time when parents must do just that—for their children's sake.

With any relaxing of discipline, there is, of course, a chance that the children—who, after all, are not nearly so competent to deal with life's problems as they think they are—may come to harm. There is always the chance that any splendid adventure, like growing up, may go wrong. But if parental discipline is carried to the point where it stunts the new individualism of the teen age, then there is no question as to what will happen. The children will certainly come to harm.

So this is at once the hardest task and the crucial test of parenthood: not merely to let the children go when we are forced to do so, but to face bravely and cheerfully the fact that the time of their emancipation is at hand, and actually to help them break away from us.

In a far greater number of instances, however, than is generally realized, parents never come to the point where they are willing to abdicate their authority. A daughter of 35 must telephone home if a shopping expedition takes a half-hour longer than was expected. A man of 50 is referred to by his father as "only a thoughtless boy." There are parents who would be very indignant if their love for their children were questioned, and yet are not willing to sacrifice their own possessive pride and sense of power, so that their children may live their own lives in their own way.

Conflicts between fathers and sons over matters of family discipline have, in the aggregate, been responsible for a vast amount of sorrow. There are several ways in which such a struggle may issue. The ideal solution, of course, is for the two parties to talk the whole situation over, and, with mutual concessions, come to a satisfactory working agreement for the future. Sometimes the son wins a victory which is too premature and complete to be entirely safe for him. Sometimes the father wins a decisive victory, at the probable cost of a serious warping of his son's personality. More often, the son renders a submission which is only apparent; for the intinctive demand for independence is so insistent that, if denied recognition at home, it will almost certainly seek clandestine forms of self-expression.

The not uncommon type of adolescent love affair, at bottom, is often only a hastily and perhaps unconsciously chosen device for escaping from parental control. Many a girl, especially, rushes into marriage in order to free herself from what she considers intolerable conditions at home. To such a state of mind, marriage stands for an acknowledge maturity; she is less concerned with its obligations. In other words, her main object in marrying is not to get anywhere with her life, but just to get away from somewhere, namely, her home. It is no wonder that such marriages are not always successful.

Other marriages turn out badly because either the bride or the groom had failed to achieve the adult independence of the childhood home which is essential to a satisfactory wedded life. Marriage demands the shifting of the emotional focus of life from the parent to the mate. A man whose father or mother still holds the central place in his thought and affection is not prepared to make a success of the difficult business of being a husband, and a girl who comes to marriageable age still feeling a childish need of her parents stands very little chance of being able to adjust herself to living with a man.

And the tragedy of it lies in the fact that what these people wanted most was to become free from their parents so that they might live their own lives.

This is what my troublesome son wants at the present moment. What am I going to do about him?

It would be foolish for a father to lose any sleep because a son in his teens does not always spring to attention when he is spoken to, or to suspect him of being hellbent because he no longer tells everything that he does and thinks, or to let his own temper be ruined by the chronic grouching of adolescence; for, with all the clumsy, exaggerated and irritating manifestations of the revolt of youth, the worst thing that could happen would be for the revolt to fail.

So if this boy wants to follow his biggest brother on the varsity football team, I shall again take the chance of having a son crippled in body, rather than risk crippling his spirit. If he wants to go to sea, he will not have to run away; for I shall try to find him as good a berth as I did for his brother who shipped before the mast at the mature age of 16. If he falls in love with any girl whom I do not positively know to be a moron or a jailbrid, I shall take a chance on her being as wonderful as he thinks she is, or if not, on his finding that out without my assistance. And whenever he shows that I am somewhat off the center of his cosmos, I shall take a chance or my new position being the ideal one for me to occupy.

For, if he is ever going to make anything out of his life, he must learn how to solve his own problems; he must take his own risks and suffer for his own mistakes; he must pick his own chums, choose his own job, marry his own wife, and live in his own home In a word, "my son" must change into a man; and, because no one becomes a man over night, I agree with him that the best time for him to start trying to be one is right now.

O, sir, the truth, the truth! is't in the skies,
Or in the grass, or in this heart of ours?
But O the truth, the truth! the many eyes
That look on it! the diverse things they see,
According to their thirst for fruit or flowers.
—Meredith.

A man may justify his existence by doing a great deed, writing a great book, or delivering a great speech.

New Poetry

Macklecknoe, in the New Statesman and Nation, London, gives the following offering, which might well cause each country a moment of thought:

Patriotism For Prattlers

"Pray what is the test," little Henry inquired,
"For assessing a patriot's worth;
Since even a Socialist's often inspired
By a love for the land of his birth;

"And it doesn't seem true that one party alone
To the flag of its country pays deference?"
"But the depth of their love," said the Tory, "is shown
By its solid cash value in preference."

"We display," cried the Nazis, "our love for the State
By our flagrant contempt for its laws;
For the use of revolvers to silence debate
Is the mark of the patriot cause."

"A patriot's one," came a voice from Japan,
"Who is willing to steal for the nation,
And by flouting the League, to engender a plan
For a country's complete isolation."

"To distinguish," quoth Winston, "the wheat from the chaff,
I can give you an excellent test:
He will ham-string a peace for the sake of a laugh
And endanger his land for a jest."

"Alas!" sobbed the child, "I must forfeit my claim
To a patriot's rank, though a dull one;
For it seems that I value my country's fair fame
A great deal too much to become one."

Hospital

By Wilfred J. Funk

A little lad to-day will keep
A quiet tryst: he soon will sleep

In dreams: I pray he may not feel
The sharp bite of the searching steel:

He is so very young: he knows
The mystery of death he goes

With level eyes. Guard him to-day,
This hour, dear God, I kneel, I pray.

Be Proud of your Baking

You'll get a great thrill out of preparing new, delicious, economical dishes. The big, new Purity Cook Book contains 743 tested family recipes, each with a simple step-by-step method which assures success. A complete course in home cookery—bread, pastry, cakes, meats, salads, desserts — everything! Opens flat at any page, easily read type, grease proof cover. Took two years to complete. Very popular everywhere, thousands have already been sold. Well worth $2.00 a copy. Address: Western Canada Flour Mills Co. Limited, Dept. 207, Toronto, Ontario.

G. I. CHRISTIE, B.S.A., D.Sc., President.

WITH THE LONE SCOUTS

Our Uniform

To-day, as probably never before during our lifetimes, money is harder to obtain than we ever thought possible. Most people are hanging on tight to any cash that comes into their possession, and who can blame them?

There is not much money being spent on luxuries in these times, and for this reason Lone Scout Headquarters have not found it necessary to take on an extra secretary to sign and forward orders for Scout Uniform during the past few months.

Of course one can be a Scout without wearing a uniform, and we do not want you to think that it is imperative for you to have uniform when, perhaps, you cannot afford it. As long as you are a good Scout, living up to your Scout Promise and Law, we are satisfied.

We want, however, to keep before you the significance of the Scout uniform, and to show you how it has helped to a great degree in the romance of Scouting. The Scout Uniform is known and respected in all parts of the world and is a symbol of the ideals and activities for which our movement stands.

The general public has come to look upon a Scout as a boy who possesses better qualities of character and training than the average boy, and further, that he is a boy who is ready to help others and perform his duty readily and well at all time.

In the boy with the Scout hat, shorts and neckerchief they see the leaders of the future, and this uniform is something of which any Lonie can be justly proud, for it symbolizes the entire Boy Scout Organization, the "World Wide Brotherhood of Scouts," who will be the citizens of the future.

Every Lone Scout should, therefore, make it his ambition to possess a Scout Uniform, and he should obtain it if possible by his own efforts, and if necessary should purchase it one item at a time until it is complete.

The Christmas season is coming along, and it may be that some of you will receive gifts at that time. Let it be known that you would appreciate an article from the Scout catalogue, and so commence the foundation of your uniform in which you can take as much pride as any soldier of the Guards does in his dress clothes. A real Scout will take great care of his uniform and look upon it as a trust.

Duchess of Abercorn's Scout Test

When the Duchess of Abercorn opened a new Boy Scout Hall at Belfast by lighting a fire in the fireplace, she was given the Scout maximum of two matches. She proved herself a "good Scout" by using only one.

Recruiting

Probably each Lonie in Ontario knows several boys in his neighbourhood, who in his opinion would be benefitted by Scouting and who he probably would like to see enrolled as Lonies.

Maybe these boys would respond more readily if a letter was sent to them from Lone Scout Headquarters. If you know any such boys, will you not send us their names and addresses so that we can get into touch with them?

A personal word from you would also help a great deal.

Now Tibetan Boy Scouts

Troops of Tibetan Boy Scouts were discovered during a tour of the Himalayan mountain passes this summer by the Secretary of the Punjab Boy Scouts Association. Like Scouts elsewhere the Tibetan lads were performing many kinds of public service, including the building of protected springs where wayfarers can secure clean drinking water.

Promptness Averts Bridge Tragedy

The famous story of the Dutch boy who prevented a disastrous flood by plugging a hold in a dyke with his finger is recalled by the action of a Boy Scout, John Kirschel, of Southern Rhodesia. While fishing from a bridge over the Gwebi River the lad discovered a widening crack in a concrete pier. He immediately ran and reported, and the bridge was closed, averting probable tragedy. The Scout was highly commended by the government road department.

Deaf and Dumb Boys Become Scouts

Mackay Institute for the Deaf and Dumb now has its Scout Troop. The troop is sponsored by the Scouts of Trinity Memorial Church Troop.

Are you a Lone Scout? This branch of Scouting is open to all boys between the ages of 12 and 18 years who live in small villages or rural districts and who are unable to attend the meetings of regularly organized Scout Troops.

For full information write to The Boy Scouts Association, Lone Scout Department, 330 Bay Street, Toronto 2.—"Lone E."

Champion Corn-Husker

Takes his job by the ears—and wins a championship! Carl Seiler of Galva, Ill., is "right there" when it comes to husking corn. He husked thirty-six and ninety one-hundredth bushels in eighty minutes.

Sunday School Lesson

December 4. Lesson X.—Living with People of Other Races—John 4: 5-10; Acts 10: 30-35. Golden Text—Of a truth I perceive that God is no respecter of persons.—Acts 10: 34.

ANALYSIS.

I. RACE PREJUDICE AND HUMAN NEED, John 4: 5-10.

II. A SNOBBISH CHRISTIAN'S DREAM, Acts 10: 9-19.

III. THE DIVINE INTENTION, Acts 10: 28-35.

INTRODUCTION—Countee Cullen, the young Negro poet, tells about a visit he once made to Baltimore:

Once riding in old Baltimore,
Head filled, heart filled with glee—
I saw a Baltimorian—keep looking straight at me.
Now, I was eight—and very small;
And he—was no whit bigger . . .
And so I smiled, but he—stuck out his tongue
And called me "nigger."

Although I lived in Baltimore
From May until December—
Of all the things that happened there,
That's all that I remember.

The Spirit of Jesus has always had to face snobbery—racial, social, ecclesiastical.

I. RACE PREJUDICE AND HUMAN NEED, John 4: 5-10.

Notwithstanding the inhospitality of the Samaritans (Luke 9: 51-53) meet Jewish pilgrims going north went through the province of Samaria, v. 4. Only the strictest of them, such as the Pharisees, went round by Perea.

At noon (the sixth hour, Roman reckoning) Jesus and his party came to Jacob's well. It was an unusual hour for a woman to come for water, v. 7. Was it shame, or the severity of her more respectable sisters that sent her there when no one was likely to be about?

The tired stranger asked her for a drink. Her surprise (v. 9) at being thus addressed reflected the relationships that existed between Jew and Samaritan. The Jew had a profound contempt for the Samaritan with his mixed blood and impure religion. Northern Israel had intermarried with the foreign conquerors, and had adopted pagan religious customs. See 2 Kings, chap. 17. Because of this the Samaritan offer to help in building the Temple was contemptuously spurned, Ezra, chap. 4. Resentment brought reprisals. Mutual hatred was the consequence.

The appeal of human need overcame the woman's dislike and suspicion. In helping a hated Jew, she received from him the sympathy and inspiration for a better life which she so sorely needed. It was the spirit of Jesus breaking down the separating barriers of race prejudice.

Peter's dream changed the course of history for the early church. The "scattering abroad" of believers during the persecutions resulted in the growth, in many foreign centres, of the new faith. Peter, on a superintendent's tour, found himself confronted with the question, "How is a Christian to act toward a Gentile?" Jews had always looked upon Gentiles as "common," aliens from the commonwealth of Israel, strangers from the covenant of promise," outside the pale. They ate "unclean food. Hence eating together, and consequently all social intercourse, was impossible. The Gentiles retorted by ridiculing Jews for their abstinence from pork.

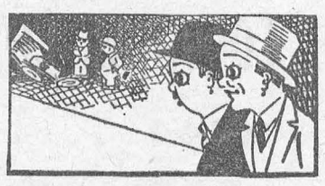
II. A SNOBBISH CHRISTIAN'S DREAM, Acts 10: 9-19.

Peter's problem about food, his hunger (v. 10), wove themselves into the fabric of his dream. In the sheet (v. 12), he began to notice all kinds of creatures, clean and unclean. He was amazed to hear the voice, which he so well remembered, commanding him to kill and eat. He had broken many a Pharisaic regulation in his day—including corn on the Sabbath, for example—but with food he was still a strict Hebrew. His abrupt refusal (v. 14) brought its emphatic and repeated reproof, vs. 15, 16. The Christian Jew was now to give up his old distinctions between meats clean and unclean. Any custom, no matter how useful in the past, which becomes a separating wall between people, must be removed. "This wall has no business here!" says the Nazarene Carpenter as he sees the wall which separates the members of his father's family in their own house. "Down it comes!" and with well-directed blows he swings his axe. See the vivid picture in Ephesians 2: 14.

When Peter was told that some Gentiles were at the door to see him, he said to himself, "There is the meaning of my dream." He made them welcome.

III. THE DIVINE INTENTION, Acts 10: 28-35.

Obedient to his heavenly vision, Peter set out for Cæsarea with the messengers of Cornelius. Realizing that his unheard-of action in going into a Gentile's home would certainly bring on a crisis in the church, he took with him several brethren from the church in Joppa. In Cornelius' house he made it clear to the assembled Gentiles that in coming to them he was breaking with a strict Jewish regulation. Nevertheless, he had done it deliberately (v. 29), "without gainsaying" means "without disputing or hesitation." God had shown him that they were all God's children, "brothers all."



"How did the accident happen?"
to the statements neither side was
"I can't make it out. According
In any way to blame."

The brave and wise perform great actions not so much on account of the rewards attending them, as on account of their own intrinsic excellence.—Cicero.

Some Chemistry of the Farm

By Henry G. Bell
Assoc. Prof. of Chemistry, O.A.C.

What breed of dairy cow gives the most and best quality milk? If you're a dairyman you can surely answer this question with about a hundred reasons. What is the best all round breed of poultry for the average Ontario farm? You no doubt have definite opinions on this subject—opinions backed by many good reasons. But when you come to discussing the things that make up the feed of the cow or the hen, or the elements that are found in their products—or bodies or feed, the familiarity ceases. That is the reason for this practical, homely talk about things.

Elements

Have you ever heard a person talking about the elements in feed or in a fertilizer, and you have wondered just what an element is? Chemists have studied what things are made of, and they have found a total of 87 elements. An element is a substance that cannot be reduced to, or divided into two or more component substances. For instance, iron, or gold, or silver, cannot be broken up into other components than iron and gold and silver. They may be melted or changed into iron or gold or silver utensils, but they are still the same pure elements.

Compounds

There are other materials in nature. If red or yellow mercuric oxide is heated, oxygen goes off as a colorless gas, and metallic mercury remains. The mercuric oxide is known as a compound.

Nearly all things we come in contact with in nature are compounds. Very few elements remain unattached and pure in nature. Elements exist in three different forms, viz.: solids, gases, liquids. Here are some of the common elements belonging to each class:

Solids—Iron (Fe), Gold (Au), Silver (Ag), Phosphorus (P) (from which we get phosphoric acid), Potassium (K) (from which we get potash), Sulphur (S), Lead (Pb), Copper (Cu).

Gases—Oxygen (O), Hydrogen (H), Nitrogen (N), Chlorine (Cl).

Liquids—Mercury (Hg).

Chemical Symbols

So that it will not be necessary to write long names of substances each time they occur in a reaction, chemists have agreed upon certain symbols which are usually the first letters of the names of the elements. For instance, H always stands for Hydrogen, O always stands for Oxygen, N always stands for Nitrogen, P always stands for Phosphorus. If P were used to stand for Potash it would lead to confusion, therefore the first letter of the latin name Kalium (K) is used to denote potassium.

Acids and Alkalis

There are certain compounds which dissolve in water and which have the power of turning blue litmus paper to a red color. These are called acids. Some of the commonest in farm operations are: Sulphuric acid (H_2SO_4), Hydrochloric acid (HC1), Nitric acid (HN03) and Acetic acid (CH_3COOH).

Other compounds have the power of deadening the effects of acids. These are known as bases. Some of the commonest encountered in farm operations are: Limewater Ca (OH)2, Ammonia water (NH_4OH), Caustic soda (NaOH), Caustic potash (KOH). These substances turn red litmus paper to blue. Their action is said to be alkaline.

Chemical Reaction

A common illustration of chemical reaction on the farm is seen where acid soil is corrected by the addition of limestone. Calcium carbonate ($CaCO_3$) or limestone is readily dissolved.. This forms Calcium hydrate CA(OH)2, which corrects the acidity of the soil. When acid phosphate is made phosphate rock is treated with sulphuric acid. This produces soluble or available phosphate, and calcium suluphate or land plaster. Superphosphate or acid phosphate as it used to be called, carries 16% to 20% available phosphoric acid (P_2O_5). Some folks are of the opinion that superphosphate is acid in its action, and that it makes the land sour. This is not the case. Superphosphate or acid phosphate is neutral in reaction. The calcium sulphate that it carries tends to liberate the potash of the soil.

Elements Are Combined to Form Compounds

The queston is sometimes asked, if nitrate of soda contains only 15% nitrogen, or 15 lbs. pure nitrogen to the hundred, why can't I buy pure nitrogen for my crops? One reason why pure nitrogen would be of on use for plantfood is that nitrogen is a gas and is not taken up by the leaf or stem of the plant. Nitrogen must enter the plant through the roots, and that in a dissolved form. Thus, nitrate of soda when dissolved in water can be taken up readily by the growing plant. Let every farmer and gardener remember this fact, the plant cannot use pure elements. The animal cannot assimilate or take into its own composition pure carbon or oxygen or hydrogen or sulphur or nitrogen or phosphorus or calcium or iron. Plantfoods must be carried in compounds in the soil, in manure and in fertilizers. Animal feeds must carry the elements in compounds known as carbohydrates proteins, fats and al-lied substances.

More of the common chemical compounds that farmers meet in their daily operations are.

Water—(H_2O), which composes 90 to 95% of farm crops (green). Water frequently contains dissolved calcium or magnesium carbonate which makes it hard. Hard water kills the power of soap to produce lather. Water may also contain compounds of iron potassium and sodium. Some of these may render the water unfit for domestic use. Other impurities of a bacterial nature more often render water unfit for farm use.

Sugar ($C_6H_{12}O_6$ or $C_{13}H_{22}O_{11}$), is found in the juice of sugar beets, in fruits and in the sap of the sugar maple tree and elsewhere.

Starch ($C_6H_{10}O_5$), is found in the kernels or seeds of all cereals, also in potatoes and artichokes.

Fat—Various forms, all built from C H and O. Fats are found in the oily part of seeds near the germ, in cream from which butter is made and in the flesh of most animals.

Proteins—Flesh and muscle builders containing C, H, O, and Nitrogen. The glutten of wheat, or the rubbery gummy part of dough is composed of proteins. Lean meat, hair, hoofs, horns also contain protein.

Amino-acids—many of which contain C. H. O. N. and Sulphur. These amino acids are closely connected with proteins.

Bone — contains Calcium, Oxygen and phosphorus.

These fragmentary outlines of chemistry, basic to common farm products and phenomena, will be followed by discussions of specific problems, from time to time.

Rare Plant Species

One of the oddest plant species in the world has been rediscovered in Madera Creek, in the Davis Mountains of western Texas, according to Science News Letter, a Science Service publication (Washington).

Dr. R. A. Studhalter of Texas Technological College at Lubbock has reported this find to The Scientific Monthly. We read:

"The plant is known as Riella, and has been given the English name 'ruffle plant,' because of its peculiar structure. It consists of a slender stem an inch or so in length, with a thin transparent green wing growing out at one side and curling over its end. The graceful undulations in this green wing caused one American botanist to describe it as 'a ruffle standing on end.'

"The plant has thus far been found in only two States, Texas and North Dakota. It grows only in sheltered canyons either submerge in shallow water or just above water-level. Since water in this Western country is not always a certainty in any one place, the plant has been very elusive, disappearing from a known habitat and reappearing suddenly elsewhere. Close relatives are known from the old world, growing in the same type of habitat: sheltered shallow waters in semiarid regions. Here also it is an extremely elusive plant."

"Isn't Jack ever going to propose?"

"I guess not, he's like an hour-glass."

"How's that?"

"The more time he gets the less sand he has."

The Novelist's Faculty of Invention

Fiction is digested experience, and a great novel is the reflection of a great man's sense of the world and of the people in it. It might seem from this to be a matter of indifference whether he conveys this discursively by trumpeting it through mouthpiece-characters and interpolated comment, or by presenting his sense of life pictorially and dramatically, making the characters and story the vehicle for expressing his profoundest reactions to experience. And in a sense it is indifferent. Only, if it is natural to a writer to express himself discursively, he had better think twenty times before using the novel as his vehicle. If discursive writing is his bent, then, whatever kind of writer he is, he is certainly not a novelist; and however beautiful, elegant, acute or timely his commentary, epigrams and discussions may be, the people in his book will go the way of all waxwork.

Carlyle could draw a portrait in a few sentences, even if it were only that of a man who had sat opposite him in a railway carriage or of someone he had read about, so that we now not only see that man (how lamely inexpressive seem engravings and photographs beside the text!), but are brought into touch with the very core of his being—at least as it was conceived by Carlyle himself. In addition to this unrivalled gift for vivid static presentment, he had also the power of revealing the dramatic clash of temperaments and aims, the incongruity between a man and his casual surroundings, and above all, everywhere and at all times, the novelist's sense of the inexhaustible picturesqueness and significance of detail. Carlyle could make the cut of a man's coat or the color of his shoe-heels seem profoundly symbolic. He could orchestrate the passions magnificently. Yet fiction was not his medium and he knew it.

Ruskin required a work of art, a castle, a cloud, a mountain, a tree, to release his imagination. . . . . And in discoursing he would show so vivid an apprehension of the honorable merchant, of the artist's intense experiences, of the noble gentleman, of the dignified mechanic, of the contented cottager, and also of the opposites of all these types, that it would seem he must have been able, had he chosen, to project them as living figures in a novel, expressing his vision of the world. But, like Carlyle, he could not invent.

Invention: that is the master quality of the novelist. A great novel, as I have said, is the reflection of a great man's experience of life; but it cannot be conveyed in the form of a novel unless the writer has this specific faculty of invention. He must be able to devise a constant flow of incidents which will exhibit his characters. This may seem a commonplace, but it is one usually overlooked by reviewers and entirely forgotten by many intelligent authors who take to novel-writing. . . . Reviewers and critics are seldom people with a talent for invention; on the other hand, they are usually appreciative of literary ability and cleverness. Consequently they overvalue those qualities to the prejudice of the story-teller's specific faculty, and they do not even discuss stories which exhibit that faculty, if those stories do not contain fine phrases or arresting comments.—Desmond MacCarthy, in "Criticism."

"This is the last time I shall bring this bill" said the enraged collector. "Thanks," replied the inpecunious debtor "You are so much more considerate than the other fellow; he said he was going to come again."

MUTT AND JEFF— By BUD FISHER

Cooking On a Short Wave Length.

LOCAL AND GENERAL

Mr. J. Clinton Fetterly of Oshawa motored to town and spent the week-end with Mrs. Fetterly and family.

* * *

Born—At Morrisburg, on Tuesday Nov. 29th, 1932, to Mr. and Mrs. Wilmott Wood, a daughter.

* * *

Miss Ada Kelly, B.A., of Oshawa, spent the week-end with Mrs. J. Clinton Fetterly.

* * *

Mr. Leo Locke, of the Canada Star Company's boat, "Casco," was a guest of his parents, Mr. and Mrs. Geo. Locke, this week.

* * *

Mrs. Manley Carnegie of Smiths Falls will arrive in Morrisburg on Sunday, to spend some time at the home of Capt. and Mrs. Luke Mallan.

* * *

Mrs. Gilbert Anderson and Mrs. Frank Coons left this week for Toronto, where they will spend the winter.

* * *

Messrs Arthur Nash, Morrisburg, and W.J. Forward, Iroquois, motored to Toronto last week and spent a couple of days at the Royal Winter Fair.

* * *

Mr. Robt. Merkley, who for the summer months was employed on the freighter, "John Holloway," arrived home this week, to spend the winter with his parents, Mr. and Mrs. A.F. Merkley.

* * *

Miss Evelyn Marsh, R.N., of Ottawa, spent the week-end at her home here. On her return to Ottawa, she was accompanied by her sister, Miss Muriel Marsh, who spent the week there.

* * *

Miss Arleen Barkley motored to Ottawa Tuesday, and spent the day with Mr. R.H. Merkley, who is recovering slowly from injuries received in an automobile accident early in November.

* * *

Unemployed men will be engaged as traffic officers for the various schools at Kingston to safeguard the children during the rush hours. The men will be given three days' work each week, and the money they receive will b applid to their rent undr direct relief.

* * *

PHOTOGRAPHS—The most personal of all Christmas gifts is your portrait, so solve your gift problems by having us make them for you. No appointment necessary, come any day. Studio open every day for business. —BECKSTED'S STUDIO, Iroquois, Ont.

* * *

Married—At Ottawa, Can., on Monday afternoon, Nov. 28, 1932, Grant Hubert, eldest son of Capt. Chas. H. Casselman, to Miss Vivien Olive Dillabough, granddaughter of Mr. and Mrs. Albert Becker. Rev. L.M. McCreery officiated.

* * *

When the rear axle of their car broke and caused the car to go into a spin and end up in the ditch near Kemptville Sunday afternoon, Miss Jean King, 20, of Prescott, was seriously inured, and her mother Mrs. Clarence King, and sister, Melba King, were less seriously injured.

* * *

J. Donald Brown, 24, Antwerp, N.Y., died last Saturday at the Mercy Hospital, Watertown, from a broken neck suffered when he tackled a player in the football games between the Antwerp High School eleven and the Canton High School team at Antwerp, Friday afternoon, Nov. 4.

* * *

The regular monthly meeting of the Matilda Women's Institute will be held on Thursday evening, Dec. 8th, at the home of Mrs. Wm. Lennox. Roll call, "Christmas Candies." There will be a demonstration on "Christmas Table Decoartions" by Miss Margaret Harkness, also a Christmas play.

* * *

The regular monthly meeting of the Women's Institute will be held in the Agricultural Office on Monday Dec. 5th, at 3 o'clock. Roll call to be answered with a Christmas Suggestion. A vocal solo by Mrs. Clinton Fetterly, and a paper by Mrs. McGillis, entitled, "Our Dominant Mood."

* * *

John Eastman, of Russell, is in a critical condition, suffering from injuries about the head and back, and his son, John, sustained a severe shaking up, when the truck in which they were returning home from Ottawa, skidded on the icy road and crashed down an embankment of the Castor river, breaking the thin ice and plunging into the water.

* * *

While there has been some delay in procuring the necessary materials for the renovating of the building to be used as a new talking picture theatre in Morrisburg, the management hope to announce the opening date very soon, which, we understand, will be on or about the 19th of December. Special entertainment is being provided for the opening night, contained in an announcement which will probably appear in this paper next week.

* * *

Toronto despatch: Declaring that "although the war is officially over, there are still too many suffering from the effects," Mayor W.J. Stewart declined the invitation to extend an official welcome to Count Von Luckner, famous German war raider, at the Empire Club here. "We desire to live in peace with all nations, but there are so many of our fellow-citizens suffering to give us sufficient cause to still remember the war. Personally, I have no desire, nor do I think my fellow citizens have, that I should go out and bid official welcome," he said.

Warning that the grasshopper pest in the Prairie Provinces will be worse next year than it was this summer was voiced today by Norman Criddle of the Entomological Laboratory, Treesbank, Man., who is in Ottawa attending the annual convention of the Entomological Society of Ontario. At present in the Prairie Provinces there are 150 grasshopper eggs to the square foot in some places, Mr. Criddle said, predicting that next summer the "plague" will be worse than ever.

* * *

The Ottawa Citizen of last week says: John Fawcett, of Morrisburg, passenger in an auto driven by his son Bert Fawcett, also of Morrisburg, suffered a cut on his forehead that required three sitches, when the auto and an O.E.R. bus in charge of R. Sheridan, 180 Bayswater Avenue, figured in a collision at the corner of Bank street and Carling avenue. No one in the bus was injured. Fawcett's car was badly damaged.

BADMINTON NOTES

Last Saturday the Capitol Badminton Club of Ottawa played the local club in a friendly tournament and the event proved most successful, both to the players and to the large number of spectators.

Many of the events were very closely contested, and an exceptionally good display of Badminton was seen. Play started in the afternoon and continued into the evening. About 6 P.M., the Ottawa players were entertained to afternoon tea at the Presbyterian tea and food sale.

The return tournament will be played in Ottawa, Wednesday Dec. 7th. The membership of the local club is approaching the fifty mark, and the game seems to be more popular than ever.

A LIFE SUBSCRIPTION

Enclosing the money for his subscription to The Leader, the president of a well established business firm in Manitoba, who is formerly from Dundas County, says: "Send me The Leader until you hear of my death."

ON WAY TO WILLIAMSBURG, PATIENT AND NURSE KILLED

Plaski, N.Y., Nov. 27—A crippled girl who was being taken by automobile to a famed Canadian doctor at the expense of friends in East Aurora, in the hope of restoring her health, and her Canadian nurse, are dead to-night, victims of a car crash two miles south of here.

The dead are:

Muray Kuczmanska, 23, Buffalo;

Eva Tanner, 28, nurse, Walkerton, Ont.

The car, a light coupe, skidded on a level stretch of road Saturday afternoon hit a culvert and bounded into a tree.

There were marks on the roadway indicating the brakes had been applied. The car came to a stop several feet off the ground, being held there by branches of the tree. It took nine men half an hour to get it down to remove the bodies. The identity of the women was established through a diary kept by Miss Kuczmanska.

They were bound for Williamsburg Ont., for an examination of Miss Kuczmanska by Dr. M.W. Locke, widely known orthopaedic surgeon. Funds were supplied by popular subscription at East Aurora, where Miss Kuczmanska had been cared for at a private sanatorium in which Miss Tanner was assistant superintendent. The patient had suffered for years from arthritis.

MISCELLANEOUS SHOWER

A miscellaneous shower was held on Thursday evening, Nov. 17th, at the home of Mrs. Colin MacGregor, Morewood, in honour of Miss Nelda Coulthart, bride-to-be. Mrs. Ernest McConnell assisted. Music was rendered, and contests enjoyed. The rooms were prettily decorated with pink and white streamers and potted plants, and about seventy-five guests were present.

The bride was invited to the parlour, and took her place under a canopy of bells and balloons, showered by confetti. Decorated baskets were brought in by Misses Gretta Faulkner and Mildred McConnell, loaded with most useful and beautiful gifts. After the gifts were viewed, the bride thanked all for their kindness and good wishes. The guests joined hands and sang "For She's A Jolly Good Fellow," and lunch was served. Everyone then took their departure, wishing the bride-to-be much happiness and joy in the future.

FOR SALE

NOTICE TO CREDITORS

IN THE ESTATE OF NELSON ARMSTRONG, late of the Village of Morrisburg, deceased.

Notice is hereby given that all persons having claims against the said Nelson Armstrong, who died on the ninth day of June, 1929, at said Morrisburg, are required to send by post prepaid, or deliver to the undersigned solicitor for the executor, their names and addresses and full particulars of their claims or accounts, and the nature of their securities.

And take notice that after the Twenty-seventh day of December, 1932, the executor will distribute the assets of the Estate among the persons enitled thereto, having regard only to the claims received and he will not be liable for said Assets to any person whose claim shall not have then been fyled.

Dated at Morrisburg, this Twenty-eighth day of November A.D. 1932.

HOWARD O. HESSELL,
Morrisburg Ont.
Solicitor for Irwin Hilliard, K.C.,
Executor.

IN MEMORIAM

In fond and loving memory of my dear friend, Mrs. Ora McIntosh, who departed this life on Dec. 5, 1930. Today recalls sad memories
Of a loved one gone to rest,
But the one who thinks of her today
Is the one who loved her best.
Sadly missed by Sammy Telford.

FIVE VICTIMS OF MOTOR CAR TRAGEDY

Two women were instantly killed and three others seriously injured at 9.40 Sunday morning when a car driven by Miss Constance Cottee, Apartment C, 1378 Yonge Street, Toronto, was struck by a Canadian Pacific Railway eastbound freight train on the Bloor Street level crossing at Islington.

Earlier in the day the five had set out for a visit to London, and as the car approached the crossing the driver, according to the police, appeared to hesitate, and, after coming to a standstill, again started, only to have the car struck by the oncoming train, which dragged it in an upright position for about fifty feet along the right-of-way.

The two killed were:

Marion Black, aged 29, of Apt. C, 1378 Yonge Street, Toronto, whose parents live in Almonte.

Jeannette Wilkinson, aged 20, of Annesley Hall, Victoria College, whose home is in Tillsonburg.

The three injured were:

Janet Murray, aged 20, of 394 Avenue Road, whose home is in New Glasgow, N.S.

Marion Clark, aged 29, of 5 Wilcox Street, Toronto, whose parents live in Sarnia.

Constance Cottee, aged 28, of 1378 Yonge St., Toronto, whose parents live in Woodstock.

The body of Miss Wilkinson was found in the ditch some fifty feet east of the crossing, while that of Miss Black was extricated from the overturned wreckage, along with the three injured women.

A call was put in for Dr. Emerson Bull and Dr. W.K. Fenton of Islington, who, after attending to the injured, had them removed to the Western Hospital, Toronto. Here it was found that Janet Murray had sustained critical head injuries, along with a possible fracture of the skull right hip and pelvis. Her condition is serious. Miss Cottee had her left leg fractured in five places, and her condition is considered critical, while that of Marion Clark, who sustained several fractured ribs, was not thought so serious.

From what can be learned, the five young women were on their way to visit a friend in London, and after the tragedy there remained one pitiful spectacle which bespoke their mission. Piled high on a bench at the Etobicoke police station, were numerous small parcels, carefully wrapped, and each bearing two or three initials. They were apparently intended as Christmas gifts, which now may never reach their intended recipients.

The train was in charge of Conductor J.A. Currie, and Engineer J. Carriere, both of Toronto. The latter told the police that he had noticed the car stop on the tracks and that he had immediately applied his brakes when the train was fully 100 feet west of the crossing. It was brought to a standstill, he stated, some fifteen car lengths east of the crossing. This was considered a remarkable feat by the police, inasmuch as the train consisted of 40 cars, all heavily loaded, and weighing between 9,000 and 10,000 tons.

According to a statement furnished by C.P.R. officials, the crossing is protected by two wig-wag signals, both of which were working when the accident took place. He also said that both the engine bell and whistles had been sounded as the train approached the crossing.

The bodies of Miss Black and Miss Wilkinson were identified, and removed to the Nash Undertaking Parlours at Islington. Dr. Emerson Bull, the coroner, ordered an inquest.

Miss Marion Black was the daughter of W.H. Black, of Almonte. About 15 years ago, Mr. Black was principal of the Morrisburg Public School, his son and daughter residing here with him, and attending public school here. Miss Black later graduated from the University of Toronto, and was employed on the staff of the Toronto Public Library, College Street.
