The Leader

XXXII No. 9 MORRISBURG, ONT. FRIDAY APRIL 8, 1932

LUMBER

We have just unloaded a carload of Spruce and Pine Assorted, choice quality, prices right. We also have in stock a car of Eastern Shingles, Extras, Clears and Second Clears.

Grass & Clover Seed

Our Grass and Clover Seeds have just arrived. Before purchasing elsewhere it might be of interest to you to get our prices. We will be selling the seed this year on a close margin.

We are still emphasizing the value of this feed. It is by far the best and cheapest feed in our warehouse to-day at $1.20.

EGGS

The market is strengthening somewhat. The big centres are getting keener on eggs as they find the quantity is not as great as last year. We buy according to Government Regulations and the eggs are candled and graded and top prices paid.

WE HANDLE ROOFING SUPPLIES, FENCING, ETC.

The MORRISBURG FEED & PRODUCE Co

MINUTES OF COUNCIL

Regular meeting of Council for April was held in the Town Hall Monday the 4th at 8 p.m.

Members all present.

There being no errors or omissions in the previous meetings as read, the Reeve declared them adopted.

Moved by Mr. Beckstead, seconded by Mr. Link, that the following arrears in taxes be deleted from the County Treasurer's records, the amounts having been paid the local Treasurer.

Blk. 11, lot 8, Gravel Road, $22.99, Cook Estate.

Blk. 9, lot 7, Main Street, $25.00, Edson Salmon.

Blk. 19, pt. 17, Gravel Road, $3.58, Leslie VanAllen.

Moved by Mr. Dain, seconded by Mr. Link, whereas Sun Oil Company, Limited, a body corporate having its head office at the city of Montreal, in the Province of Quebec, proposes to construct a wharf in the St. Lawrence River at or near the village of Morrisburg, and which wharf will be constructed in front of Lot No. 28 of the First Concession of the Township of Williamsburg, in the County of Dundas, and Province of Ontario, and the site for such wharf may be more particularly described as follows:

All and singular that certain parcel or tract of land and premises situate, lying and being adjacent to the Village of Morrisburg in the County of Dundas, and Province of Ontario, being composed of a river lot in the St. Lawrence which said river lot may be more particularly described as follows:

Commencing at an iron pin planted at the intersection of high water mark of the River St. Lawrence with a southerly projection of the eastern limit of Allison avenue, the said iron pin being distant 176 feet one inch, measured southerly along said projection from the northerly limit of King's Highway No. 2.

Thence north 59 degress 24 minutes, east 50 feet, more or less, to an iron pin;

Thence south 30 degress 36 minutes east 110 feet;

Thence south 59 degrees 24 minutes west 100 feet;

Thence north 30 degrees 36 minutes, west 110 feet more or less, to an iron pin;

Thence north 59 degress 24 minutes east 50 feet more or less to the place of beginning, containing by admeasurement one-fourth of one acre, more or less.

And whereas the said Company may be desirous of laying certain pipes and pipe lines along, under or across that certain Provincial Highway known as Highway No. 2 and may further be desirous of doing certain other acts in order to fully use and enjoy the said wharf when completed.

And whereas this Council is anxious and willing to assist, as far as possible, within its jurisdiction, the said Sun Oil Co. Ltd., to construct and complete the said wharf and in order that the said Company may have the full use and enjoyment of the same when completed.

Therefore, the said Municipal Council of the Village of Morrisburg enacts, ordains and resolves as follows:

1. That in so far as this Council has the power to grant such a right, the said Sun Oil Company, Limited, shall have the right to lay pipes and pipe lines along, under and across that portion ofthe said Provincial Highway No. 2 within a reasonable distance for the said wharf, and to do all things and to take all steps necessary to make full and complete use of all such pipes or pipe lines so laid, whether the same are connected directly with the said wharf or with the container tanks of the said Company or otherwise in use.

2. That this Council approves of the erection of the said wharf and agrees to do all things within its power and jurisdiction to enable the said Company to have full use and enjoyment of the said wharf and to assist the said Company to obtain any such rights as it may deem necessary in connection with the proper operation and use of the said wharf.

3. That this Council further agrees that it will in every way cooperate with the said Company and will so far as it has power pass all by-laws or resolutions and do all things in or to move effectually, give effect to the terms and conditions of this resolution, but said Council shall not be called upon to bear any expense connected therewith.

Moved by Mr. Dain, seconded by Mr. Link, that on and after May 1, next, all Tourist Inns using electric energy be charged the regular commercial rates and the Treasurer be so advised.

Moved by Mr. Link, seconded by Mr. Dain, that the Dunlop Rubber Co. be given an order for 100 feet Samson Double Jacket Fire Hose, couplings to be supplied as per sample, furnished price $1.00 per foot, freight charges prepaid.

Accounts to the amount of $1,393.25 were paid.

TOLL BRIDGE NEAR CORNWALL

Under the terms of a bill approved by the railway committee of the House of Commons yesterday, the Ottawa and New York Railway Company, and its lessee the New York Central, are empowered to enter into an agreement with a toll bridge company, for the planking of their railway bridge across the St. Lawrence river at Cornwall. It the work is carried through, according to evidence given before the committee, facilities will be provided for a very extensive vehicular traffic between the eastern section of Ontario and the state of New York. The cost was stated to be $125,000. It was stated that four ferries within a radius of 30 miles of Cornwall carry 150,000 cars in a season.

MRS. H. BLAIR SMITH

Death came with startling suddenness to Mrs. H. Blair Smith (nee Fannie May Zeron) when, after a very short illness, she passed away in Johns Hopkins Hospital, Baltimore, Maryland, on Tuesday April 5th. A letter written by Mrs. Smith to her parents, Mr. and Mrs. Jas. Zeron, a few days prior to her death in which she stated she was feeling remarkably well, served to intensify the shocking news contained in the telegram which had just been received.

Fannie May Zeron, second daughter of Mr. and Mrs. James Zeron, was born in Morrisburg, March 1, 1897. She received her early education in the local schools, and after graduating from the M.C.I., was engaged in the Civil Service, Ottawa, for three years, after which she entered the Johns Hopkins hospital, Baltimore, as nurse-in-training, graduating in 1927. In June of the same year, she was married to Mr. H. Blair Smith, of Baltimore, where they have since resided.

The sterling character and cheerful disposition which was called to its eternal reward so early in life will long be remembered by a host of friends, who extend to the bereaved relatives their heartfelt sympathy.

Mrs. Smith is survived by her husband; her parents; two sisters and three brothers: Mrs. L.J. Mellan, Morrisburg and Miss Olive Zeron, B.A. of Brockville; Sanford and Mahlon Zeron, Iroquois and Ernest Zeron, of Windsor.

The remains were conveyed to the home of her parents on Thursday, where the funeral will be conducted at 2.30 p.m. on Saturday, April 9th. Rev. Dr. MacRae will officiate, assisted by Rev. Mr. Knowles of Iroquois. The remains will be placed in the vault, to await burial in Fairview Cemetery.

MRS. PETER McGILLIVRAY

Mrs. Peter McGillivray, a former resident of Morrisburg, who for the past sixteen months has resided in Cornwall, with her family, died at the General Hospital there on Monday last, after a short illness.

Deceased was born in Aultsville in 1891, and after coming to Morrisburg, was united in marriage to Mr. Peter McGillivray, who predeceased her in 1928. A loving and conscientious mother, her death is particularly sad, coming as it does within six months of the accident in which her son, George, had his right arm so seriously injured that it had to be amputated. Left to mourn are also four other sons and one daughter, namely: Malcolm, Reginald, Jack, Archie, and Audrey, all at home. Three sisters are likewise left to mourn: Mrs. Wm. Beckstead and Mrs. Heber Hill, Cornwall, and Mrs. John Zeran, Aultsville.

The funeral service was held in the Church of the Good Shepherd, Cornwall, on Wednesday, after which the remains were conveyed to Morrisburg and placed in the vault.

BROCKVILLE COURT HAS UNIQUE SUIT

The slate for the Supreme Court assizes which opens at Brockville next Monday afternoon before Mr. Justice Wright contains no criminal or jury cases, and includes besides two actions for divorce, two other cases, one of which will make legal history in the province.

For the first time in Ontario courts, the executor of an estate is being sued for negligence arising out of an automobile accident in which the deceased, whose estate he is administrating, lost his life.

The case is that of William Ryder of Cornwall, who is suing for damages Daniel McLaren, also of Cornwall, administrator of the estate of Rev. Wm. R. Telford, former Cornwall clergyman, driver of a car which upset near Mallorytown on August 24 last, causing fatal injuries to Mr. Telford; to Mrs. William Ryder, and her 10-month-old son, Garth. The Ryder baby was instantly killed, while Mrs. Ryder and Rev. Mr. Telford died in hospital in Brockville a few hours after the accident.

Another case of much interest to residents of the district is that of Mrs. Vera Wilken, widow of Lloyd Wilken, of Iroquois, against James Milligan, of Iroquois, owner of a car driven by Miss Addie Bouck, aged 16 years, which collided with another car containing Mr. and Mrs. Wilken, and Mr. and Mrs. Donald Merkley, in Iroquois, on July 28th last. Mr. Wilken, accountant in the Bank of Montreal at Iroquois, was thrown against a tree and sustained a fracture of the skull which caused his death. Mrs. Wilken sued Milligan for damages at the Fall assizes in November last, and Mr. Justice Sedgwick, who reserved judgment at the time, later decided in favor of the plaintiff. The defendant, Milligan, appealed against the judgment, and a new trial was ordered, which will be taken up in the assizes at Brockville next week.

FOR SALE

Carload of Horses now for sale at Henderson's Livery Stable, Chesterville. All well broken; 4 to 8 years old; mostly mares; weighing from 1100 to 1500 pounds.

H.M. & A.S. ALLISON.

Exceptional Spring Used and New CAR VALUES

1931 Pontiac 4-door Sedan, low mileage, like new in every particular.

1931 DeSoto 4-door Sedan, run only 7600 miles, almost perfect, a real car for anyone who appreciates performance.

1931 McLaughlin-Buick Super De Luxe (new) at a saving of $370. off regular price.

1932 Chevrolet Special Sedan. The very latest and a brand new car only run from factory here.

1927 Chevrolet Coach in good condition.

ARTHUR FLYNN Morrisburg, Ont.

The Green Murder Case

BY S. S. VAN DINE.

SYNOPSIS.

Philo Vance, wealthy young bachelor and intimate friend of District Attorney John F. X. Markham, becomes interested in the Greene murder case. Julia Greene is killed and her younger sister, Ada, is wounded. Old Tobias Greene's widow, together with the five children, Julia, Chester, Sibella, Rex and Ada (an adopted daughter), all live in the old Greene mansion. Chester Greene is questioned.

CHAPTER II.

Markham eyed Vance with meditative curiosity. Not only had Vance's questioning of Green interested him keenly, but he knew, as a result of long experience, that Vance would not have made the suggestion had he not had a good reason for doing so. I was in no wise surprised surprised, therefore, when he turned to his restive visitor and said:

"Very well, Greene, I'll see what I can do in the matter. I'll probably be at your house early this afternoon. Please see that every one is present, as I'll want to question them."

Greene held out a trembling hand. "The domestic roster—family and servants—will be complete when you arrive."

He strode pompously from the room.

Vance sighed. "Not a nice creature, Markham—not at all a nice creature. I shall never be a politician if it involves an acquaintance with such gentlemen."

Markham seated himself at his desk with a disgruntled air.

"You think he knows, or suspects something?"

Vance gazed through the long window into the bleak sky beyond.

"I wonder," he murmured. Then: "Is Chester, by any chance, a typical representative of the Greene family? Of recent years I've done so little mingling with the elite that I'm woefully ignorant of the East Side nabobs."

Markham nodded reflectively.

"I'm afraid he is. The original Greene stock was sturdy, but the present generation seems to have gone somewhat to pot. Old Tobias the Third—Chester's father—was a rugged and, in many ways, admirable character. He appears, however, to have been the last heir of the ancient Greene qualities. What's left of the family has suffered some sort of disintegration. They're not exactly soft, but tainted with patches of incipient decay, like fruit that's lain on the ground too long. Too much money and leisure, I imagine, and too little restraint. On the other hand, there's a certain intellectuality lurking in the new Greenes. They all seem to have good minds, even if futile and misdirected. In fact, I think you underestimate Chester. For all his banalities and effeminate mannerisms, he's far from being as stupid as you regard him."

"I regard Chester as stupid! My dear Markham! You wrong me abominably. No, one. There's nothing of the anointed ass about our Chester. He's shrewder even than you think him. Those oedematous eyelids veil a pair of particularly crafty eyes. Indeed, it was largely his studied pose of fatuousness that led me to suggest that you aid and abet in the investigation."

Markham leaned back and narrowed his eyes.

"What's in your mind, Vance?"

"I told you. A psychic seizure—same like Chester's subliminal visitation."

Markham knew, by this elusive answer, that for the moment Vance had no intention of being more definite; and, after a moment of scowling silence, he turned to the telephone.

He called up Inspector Moran, the commanding officer of the Detective Bureau. After a brief conversation, he turned to Vance with a smile.

"Your friend, Sergeant Heath, has the case in hand. He happened to be in the office just now, and is coming here immediately."

In less than fifteen minutes Heath arrived. Despite the fact that he had been up most of the night, he appeared unusually alert and energetic. His broad, pugnacious features were as imperturbable as ever, and his pale blue eyes held their habitual penetrating intentness. He greeted Markham with an elaborate, though perfunctory, handshake; and then, seeing Vance, relaxed his features into a good-natured smile.

"Well, if it isn't Mr. Vance! What have you been up to, sir?"

Vance rose and shook hands with him.

"Alas, Sergeant, I've been immersed in the terra-cotta ornamentation of Renaissance facades, and other such trivialities, since I saw you last. But I'm happy to note that crime is picking up again. It's a deuced drab world without a nice murky murder now and then don't y' know."

"It's this Greene case, Sergeant," said Markham.

"I thought so. Heath sat down heavily and inserted a black cigar between his lips. "But nothing's broken yet. We're rounding up all the regulars, and looking into their alibis for last night. But it'll take several days before the check-up's complete. If the bird who did the job hadn't got scared before he grabbed the swag, we might be able to trace him through the pawnshops and fences. But something's rattled him, or he wouldn't have shot up the works the way he did. And that's what makes me think he may be a new one at the racket. If he is, it'll make our job harder." He held a match in cupped hands to his cigar, and puffed furiously. "What did you want to know about the prowl, sir?"

Markham hesitated. The Sergeant's matter-of-fact assumption that a common burglar was the culprit disconcerted him.

"Chester Greene was here," he explained, presently; "and he seems convinced that the shooting was not the work of a thief. He asked me as a special favor to look into the matter."

Heath gave a derisive grunt.

"Who but a burglar in a panic would shoot down two women?"

"Quite so, Sergeant." It was Vance who answered. "Still, the lights were turned on in both rooms, though the women had gone to bed an hour before; and there was an interval of several minutes between the two shots."

"I know all that," Heath spoke impatiently. "But if an amachoor did the job we can't tell exactly what did happen upstairs there last night. When a bird loses his head——"

"Ah! There's the rub. When a thief loses his head, d'ye see, he isn't apt to go from room to room turning on the lights, even assuming he knows where and how to turn them on. And he certainly isn't going to dally around for several minutes in a black hall between such fantastic operations, especially after he has shot some one and alarmed the house, what? It doesn't look like panic to me; it looks strangely like design. Moreover, why should this precious amateur of yours be cavorting about the boudoirs upstairs when the loot was in the dining room below?"

"We'll learn all about that when we've got our man," countered Heath doggedly.

"The point is, Sergeant," put in Markham. "I've given Mr. Greene my promise to look into the matter, and I wanted to get what details I could from you. You understand, of course," he added mollifyingly, "that I shall not interfere with your activities in any way. Whatever the outcome of the case, your department will receive entire credit."

"Oh, that's all right, sir." Experience had taught Heath that he had nothing to fear in the way of lost kudos when working with Markham. But I don't think, in spite of Mr. Vance's ideas, that you'll find much in the Greene case to warrant attention."

"Perhaps not," Markham admitted. "However, I've committed myself, and I think I'll run out this afternoon and look over the situation, if you'll give me the lie of the land."

"There isn't much to tell." Heath chewed on his cigar cogitatingly. "A Doctor Von Blon—the Greene family physician — phoned Headquarters about midnight. I'd just got in from an uptown stick-up call, and I hopped out to the house with a couple of the boys from the Bureau. I found the two women, like you know, one dead and the other unconscious—both shot. I phoned Doc Doremus, and then looked the place over. Mr. Feathergill came along and lent a hand; but we didn't find much of anything. The fellow that did the jobs musta got in by the front door some way, for there was a set of footprints in the snow coming and going, besides Doctor Von Blon's. But the snow was too flaky to get any good impressions. It stopped snowing along about 11 o'clock last night; and there's no doubt that the prints belonged to the burglar, for no one else, except the doctor, had come or gone after the storm."

"An amateur housebreaker with a front-door key to the Greene mansion," murmured Vance. "Extr'ordin'ry."

"I'm not saying he had a key, sir," protested Heath. "I'm simply telling you what we found. The door mighta been unlatched by mistake; or some one mighta opened it for him."

"Go on with the story, Sergeant," urged Markham, giving Vance a reproving look.

"Well, after Doc Doremus got there and made an examination of the older woman's body and inspected the younger one's wound, I questioned all the family and the servants—a butler, two maids and a cook. Chester Greene and the butler were the only ones who had heard the first shot, which was fired about half-past 11. But the second shot aroused Old Mrs. Greene—her room adjoins the younger daughter's. The rest of the household had slept through all the excitement; but this Chester fellow had woke 'em all up by the time I got there. I talked to all of 'em but nobody knew anything. After a coupla hours I left a man inside and another outside, and came away. Then I set the usual machinery going and this morning Captain Dubois went over the place the best he could for fingerprints. Doc Doremus has got the body for an autopsy, and we'll get a report tonight. But there'll be nothing helpful from that quarter. She was fired on from in front at close range—almost a contact shot. And the other woman—the young one—was all powder-marked, and her nightgown was burned. She was shot from behind—that's about all the dope."

(To be continued.)

Co-Eds Favour Roller-Skates

These two fair representatives of the Tuscon, Arizona University evidently enjoy the latest method of locomotion. Roller skating to classes!

March

Now I know that Spring will come again,
Perhaps tomorrow: however late I've patience
After this night following on such a day.

While still my temples ached from the cold burning
Of hail and wind, and still the primroses
Torn by the hail were covered up in it,
The sun filled earth and heaven with a great light
And a tenderness, almost warmth, where the hail dripped,
As if the mighty sun wept tears of joy.
But 'twas too late for warmth. The sunset piled.
Mountains on mountains of snow and ice in the west:
Somewhere among their folds the wind was lost,
And yet 'twas cold, and though I knew that Spring
Would come again, I knew it had not come,
That it was lost, too, in those mountains chill.

What did the thrushes know? Rain, snow, sleet, hail,
Had kept them quiet as the primroses.
They had but an hour to sing. On boughs they sang,
On gates, on ground; they sang while they changed perches
And while they fought, if they remembered to fight;
So earnest were they to pack into that hour
Their unwilling hoard of song before the moon
Grew brighter than the clouds. Then 'twas no time
For singing merely. So they could keep off silence
And night, they cared not what they sang or screamed;
Whether 'twas hoarse or sweet or fierce or soft;
And to me all was sweet: they could do no wrong.
Something they knew—I also, while they sang
And after. Not till night had half its stars
And never a cloud, was I aware of silence
Stained with all that hour's songs, a silence
Saving that Spring returns, perhaps tomorrow.

—Edward Thomas, in "Collected Poems."

Dropping into a chair in the club smoke-room, the bore announced that he had just purchased a new saloon. Another member looked over the top of his eye-glasses and inquired, icily: "Beer or billiards?"

Street Criers

What is the relation between street criers, and criers? Do certain words, or names, necessarily draw to themselves vendors, whose characters can be influenced by the sounds they utter in selling their wares; or do natures of a given sort instinctively select only those things whose names have a corresponding spirit of their own?

Some Max Mueller can perhaps answer the question; but anyone can observe the facts. They apply especially to newsboy s in the Latin countries. Passing Termini again—the hot spring of Himera—the papers were just out, and the voice of the little fellow at the window of the compartment with copies of The Hour was a long, musical drawl — "L'Oh-os-oh-oh — raaaa. L'Oh-oh-oh-oh—raaa . . .!" Very different from this cry was that of the lad selling Life. He cried out in a sharp staccato recitative, repeating very rapidly: "La Vita-Vita-Vita-Vit'-Vit'-Vat'!" Most lackadaisical of all was the older boy who had Sicilia. From scarcely opened lips and with dreamy eyes, he slowly intoned each syllable of the name, extending and amplifying and sweetening it, as a tender morsel of which he could not get enough, softening his e's and making his l's most liquid and mellifluous—"Seee-Sheeeeee—lllly-aaaaah!" — Arthur Stanley Riggs, in "Vistas in Sicily."

Music in Solitude

In this valley far and lonely
Birds sang only,
And the brook,
And the rain upon the leaves;
And all night long beneath the eaves
(While with soft breathing slept the house cattle)
The hived bees
Made music like the murmuring seas;
From lichened wall, from many a leafy nook,
The chipmunk sounded shrill his tiny rattle;
Through the warm day boomed low the droning flies,
And the huge mountain shook
With the organ of the skies.
—Richard Watson Gilder, in "Complete Poems."

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the color of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing, or tinting, I always use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that make you proud. Why, things look better than new when redyed with Diamond Dyes. They never spot, streak, or run. They go on smoothly and evenly, when in the hands of even a ten-year-old child. Another thing, Diamond Dyes never take the life out of cloth or leave it limp as some dyes do. They deserve to be called 'the world's finest dyes'!"

Seeding Sunflowers

(Experimental Farms Note)

It has been clearly demonstrated by various experiments that the date of seeding has a marked influence on the yield of various farm crops. With this in view, an experiment was started at the Dominion Experimental Farm, Nappon, N.S., in 1921, to determine the most suitable date of seeding sunflowers, whereby the greatest yields could be obtained.

The first seeding was made as early as the land could be prepared. This was followed by other seedings at weekly intervals until three or four seedings had been made.

The first seeding gave the highest yield six years of the ten that the experiment was under way, the second seeding two years and the third two years.

The average yield per acre of sunflowers harvested over the ten-year period was a follows:

Average tons per acre, 1st seeding 23.05; 2nd seeding, 20.81; 3rd seeding, 18.95; 4th seeding, 18.17. Average yield on a percentage basis, 1st seeding, 100.00; 2nd seeding, 90.28; 3rd seeding, 84.56; 4th seeding, 78.83.

A study of the weather conditions during the germination period each year shows that the highest yields were obtained from seedings which were followed by a week or more of warm weather with occasional showers. Cool weather during the germination period invariably resulted in lower yields. For example, in 1922 and 1923 the first seeding was followed by cool weather, while the third seeding came at a time when the weather and the soil were warmer and gave the highest yield.

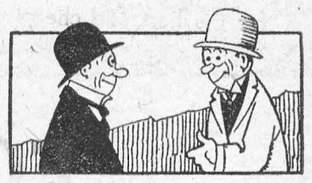
In 1924 and 1926 the first seeding was followed by cool, dull weather, while the second seeding giving the highest yield came just previous to a period of warm weather with occasional showers. During the six years wherein the first seeding gave the highest yield, the weather records showed that this seeding was followed by a period of warm weather, either accompanied by showers or immediately following them.

From these observations the following general conclusions may be drawn.—

1. Early seeding has given the highest average yield over a period of ten years.

2. Cool weather immediately following seeding will retard germination and apparently results in lower yields, particularly if the land is heavy and cold.

3. The best results will be obtained over a period of years by seeding as early as possible, providing the ground is warm and indications point to a period of warm weather immediately following.



Tom—"My home has been a perfect haven of peace lately. I've hit on a perfect scheme."

Jack—"That so, what is it?"

Tom—"I make my wife so mad she won't speak to me."

Shanghai-Berlin Air Service Planned

Nanking—A section of the the proposed Shanghai-Berlin air service was covered recently by the successful flight of the Eurasia No. 1 from Shanghai to Tihua capital of Sinkiang, and back.

Officials of the Sino-German aviation corporation, which is attempting to blaze the new trail, believed that this trip, when completed, will eventually be the longest air mail and passenger plane route in Asia. The route, as now planned, starts from Shanghai, going by way of Peiping, Yarshuiho, Tacheng, Tihua through Russia to Berlin a total distance of more than 10,000 kilometers. The trip would require one week.

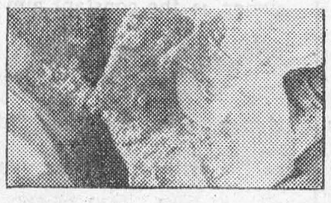
"SICK HEADACHE?"

IT is not necessary to give-in to headaches. It is just a bit old-fashioned! The modern woman who feels a headache coming on at any time, takes some tablets of Aspirin and heads it off.

Keep Aspirin handy, and keep your engagements. Headaches, systemic pains, come at inconvenient times. So do colds. You can end them before they're fairly started if you'll only remember this handy, harmless form of relief. Carry it in your purse and insure your comfort while shopping; your evening's pleasure at the theatre. Those little nagging aches that bring a case of "nerves" by day are ended in a jiffy. Pains that once kept people home are forgotten half an hour after taking Aspirin! You'll find these tablets always help. In every



package of Aspirin tablets are proven directions which cover colds, headaches, sore throat, toothache, neuralgia, neuritis, sciatica, and even rheumatism.

The tablets stamped Bayer won't fail you, and can't harm you. They don't depress the heart. They don't upset the stomach. So take them whenever you need them, and take enough to end the pain. Aspirin is made in Canada.

April 10. Lesson II—How Sin Begins —Genesis 2: 15-17; 3: 1-8. Golden Text—Watch and pray, that we enter not into temptation.—Matthew 26: 41.

ANALYSIS.

I. THE PROHIBITION, Gen. 2: 15-17.
II. THE TEMPTATION, Gen. 3: 1-5
III. THE SIN, Gen. 3: 6, 7.
IV. THE CONSEQUENCES, Gen. 3: 7, 8

INTRODUCTION—From the story of creation the Bible proceeds to the story of the garden. The connection between the two accounts is not important. It implies that God is concerned, not only with creating man, but with forming an ideal environment for him—an evidence of God's goodnes and loving care. What an enchanted garden it is, with trees that bestow knowledge and life, and animals that talk! This garden, like the far country in Christ's parable and the road which Christian traveled in Bunyan's "Pilgrim's Progress," belongs to the map of the soul rather than to that of the earth. The motive of the story is to explain the universal but mysterious fact of human sin with its dire consequences.

I. THE PROHIBITION, Gen. 2: 15-17.

Life in Eden, though pleasant, was not idle. There can be no genuine happiness without a worthy vocation. So Adam must tend the trees of the garden. In his life he was given a wide liberty of choice; he could eat of any of the trees of the garden. Without this freedom he could not fully express his personality. But there is a limit to human freedom. There was one tree of the garden which was not to be touched—the tree of the knowledge of good and evil. Just as the people of the Middle Ages sought for the fountain of eternal youth, so the ancients believed that certain trees would bestow knowledge, as certain waters would bestow life. Here the forbidden tree is surely to be understood as a symbol. It stood as a divine warning against human presumption. It said, "Thus far shalt thou go and no further." Knowledge of life and the world, which is won by the sacrifice of peace of mind and purity of heart, is both illicit and impious.

II. THE TEMPTATION, Gen. 3: 1-5

Never have the stages which lead to sin been depicted with such penetrating, psychological insight and with such simple, powerful strokes as here. Even an ideal environment is not proof against the possibility of sin. The serpent is not to be understood as the devil of Christian theology, although it became identified in later thought with him; it represents simply the agent by which an evil suggestion came to man. It commenced by exaggerating grossly God's prohibition, as though every tree of the garden were under the ban. It thus sought to create the impression that man's lot is unnecessarily hard through the severity of God. The serpent seemed more compassionate than God; life, under his management, would be less austere. At first the woman repelled the suspicion that God is unnecessarily harsh. She corrected the serpent; only one tree is prohibited. Ah, she was made to talk—and about the prohibited tree! The serpent now became very bold and branded God's word as false. "Ye shall not surely die," he said. God is, therefore, a tyrant who lays down a prohibition, not in the interests of Adam and Eve, but merely to restrain them from the happiness that might be theirs. Further, in eating the fruit of this tree there is a wondrous boon—the opening of the eyes. It makes one's soul to feel that one is going through life like a blind man, missing its priceless things. These were the suggestions sown in Eve's heart.

III. THE SIN, Gen. 3: 6, 7

The serpent, having done its work, disappeared. Eve's curiosity had been aroused. She looked at the tree and noticed what she had not previously observed, that the forbidden fruit was of pleasant appearance. Next, her desire was kindled. How glorious it must taste. How mysterious its power of bestowing knowledge! The fatal step was taken swiftly and thoughtlessly. Then, as sin loves company, Eve tempted Adam, and when woman tempts, man is powerless to resist.

"The opening of the eyes aptly symbolizes the awakening of conscience. So Newman says, 'They lost Eden, and gained a conscience.' The innocence of childhood was gone, and shame and fear came in its place. No doubt the moral maturity which an awakened conscience implies would have been reached, but more slowly, by the way of obedience. It is a familiar fact of life that the unhealthy growth is the more rapid. The child ages more quickly in ways of sin, and the bad boy usually knows much more of life's good and evil than the healthy, normal, right-minded boy of his own age."

IV. THE CONSEQUENCES, Gen. 3: 7, 8.

These early sinners had hoped to gain knowledge of the highest, but the knowledge they won was merely that they were naked! Sin produces shame. For they had now to cover themselves, and they chose fig-leaves. Sin also separates man from his God. In picturesque simplicity the story tells how God walked in his garden in the cool breezes of the morning and how Adam and Eve could not look into his searching eyes.

First Spring

Ah it is well that grass now light to emerald;
That hyacinths in purple and pink unfold;
That lilies lift in sheer and sudden whiteness,
While daffodils burst softly into gold.

For soon, across the earth, dull-hued as parchment,
A message must be written by a sun—
A message worthy of the fairest colors—
"The Lord is risen again! Lo, death is done!"
—Violet Alleyn Storey in the N.Y. Times.

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

Just another smart frock for "best" for that important age of 8, 10, 12 and 14 years.

This time a lovely deep blue with a sapphire cast silk crepe made the original. It's an adorable affair.

And it's really quite simple. It reflects the Victorian period in its quaint puffed sleeves and round lace trimmed neckline.

Style No. 2622 can be made at a very small outlay.

Vivid red crepe de chine is very effective.

Then again, perhaps you'd like it fashioned of a lovely cotton tweed in red and brown mixture. For the collar, cut the material on the bias and pipe around lower edge with red binding. Match the belt in leather to the collar.

Size 8 requires 2⅛ yards of 39-inch material with ¼ yard of 35-inch lace and 3 yards of 3-inch ribbon.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

New Breed of Cattle to be Developed

Known as Africanders, a herd of these strange-looking cattle has been purchased by the United States department of agriculture and will be crossed with Texas beef stock. W. H. Black went to Africa to select them.

Blue Predominates In New York Parade

Waists Uncertain But Neck Lines Are Definitely Higher

New York.—There was a distinct blue note in the traditional spring parade when fashionable New York and a great many country cousins strolled down Fifth Avenue.

The blue note was not due to overcast skies, but to the whim of the mysterious men and women—in Paris and New York or somewhere—who dictate what the well-dressed woman will wear.

If you're still in doubt, the W. D. woman will wear blue most of the time this season.

The styles displayed along the Avenue were emphatic. Hats were small, tipped over one ear. Rough woolen material of a loose weave was seen frequently and there were many striped costumes.

The stripes appeared to have invaded every phase of the new styles. They were usually three colors—red, white and blue or red white and black.

The hats were mostly blue, and oftentimes trimmed with red and white. Most of the dresses were a pale shade of blue, trimmed with pearl gray and with light blue slippers to match. Black costumes also were popular.

The silhouette was intriguing, broad at the shoulders and narrow at the hips. The waistline is still wavering between its natural level and a slightly higher point of the directoire period. This trend also has inspired higher neck lines, and in the smartest street dresses the neck line aproached the collar-bone.

American Professor Urges Adult Education

Adult education has become not only a necessity but an obligation, according to Professor A. Broderick Cohen, director of the evening and extension courses of Hunter College.

In a recent interview Professor Cohen declared: "It is an obligation of all parents to continue their studies, either by some more or less regular program at home or by participating in organized courses given by a college university or some other educational institution.

"Such organized study at home or in an educational institution is desirable even for the graduates of the college and the university. For those lacking college training such study is indispensable especially if the parent would fulfill his obligation to his child and keep abreast of the swiftly changing scientific and cultural aspects of our modern world.

"As the child grows older the need for the parent to continue his studies in order to keep up with the child is necessary."

Shift in Population Noted in Dominion

Ottawa.—Rural population to-day represents 46.20 per cent. of the total for the Dominion of Canada, compared to more than 50 per cent. in 1921, according to an official report based on the census taken last year.

The rural population to-day is 4,802,138 and the urban population 5,572,058. Comparatively figures a decade ago were 4,435,827 and 4,352,122 respectively. Thus, during the ten-year period the urban population increased by 1,219,936, or 28 per cent., and the rural population by only 366,311, or 7.6 per cent.

In the ten years the population of Canada increased by 1586,247, or 18.05 per cent. to the total of 10,374,196. During the same period the gain in the United States was 16.7 per cent. and in England and Wales somewhat less than 6 per cent.

Generally speaking the most pronounced movement from the country to the city is found in Eastern Canada, and in particular the industrial areas of Quebec and Ontario, although the tendency is spreading westward. Since the census was taken, in June of last year, governments in Canada have been giving attention to a back-to-the-land movement which has been instrumental in settling in agricultural employment on their own land or as employees, some 45,000 individuals who required no financial assistance but only some advice and guidance.

Royal Family's Taste in Books Extends Over Wide Range

London.—Prince George's confession that he has a keen appetite for novels, but is tired of their incessant harping on sex, is a reminder that he is the book lover of the royal family. He is as interested in first editions as his father is in stamp collecting.

The public life of the King and other members of the royal family leaves little time for light reading, although the King's partiality is toward the older novelists—Dickens, Thackeray and Scott, and occasionally Conrad. Biographies and historical romances are the Queen's favorites. The Prince of Wales likes Kipling, P. G. Wodehouse and Stephen Leacock. The Duke of York turns to serious and economic problems of the day.

Percy—"By jove! I've got an idea."

Betty—"Be kind to the little stranger."

Latest Advances of Science
Electric Plows Tested in Europe

Pills of Fertilizer—Germans Speed Cooking—New Radium Field To Be Developed in Canada

Some 200 electric plows are successfully operating in Europe. They are expensive but efficient. Costing as they do from $15,000 to $20,000 each, they are beyond the reach of the average farmer. In France they are rented. Community utilization seems to be the practice so that the power company by which a plow may be owned makes the most of its investment and the possibility of selling electric energy.

An electric plow travels along at the rate of about three miles an hour and covers as many as thirty acres a day. The cost of electric current at 2 cents a kilowatt-hour amounts to only 60 cents an acre. A contractor who owns a plow and hires himself out to farmers charges from $3.50 to $6 a day. Allowing the usual rate for interest on the investment depreciation and operating costs, he ought to make money.

There is nothing resembling the usual gasoline tractor. Two portable drums are set up at opposite ends of the field along a straight line. A steel rope from one drum is fastened to the rear of the plow and paid out as the plow travels along; a similar rope from the second drum is fastened to the front of the plow and does the actual hauling. At the end of the furrow the plow is turned around to begin the return journey and dig a new furrow. What was the paying-out drum now becomes the hauling drum. There is no overhead trolley. Current is supplied by cables paid out from reels.

Pills For Plants

Fertilizers are scattered over the land. It would be better if they could be drilled into the ground like seeds. Convinced that this is the correct principle, a Southern research organization has developed a method of making fertilizers in an entirely new way. The process was described by B. G. Klugh before the New York chapter of the American Institute of Chemists recently.

At first pellets about the size of homeopathic pills were considered, but the pharmaceutical equipment required to produce them was too intricate and expensive. It was decided to form a paste and to extrude it through very small apertures. Spaghetti-like strings came out, which were dried and then cut into granules an eighth of an inch long. Pills are thus obtained which can be forced into the ground in any desired dosage by means of a farmer's ordinary drilling machine. They are very hard and dense, and uniform in size and shape. The perfectly smooth outer surface presents so little area to the atmosphere that the absorption of moisture is slight. Even after four months there is little tendency of the pill to cake.

Speed Cooking

For all their easy-going ways, the Germans are speed-conscious, and for all their tradition, they are as much interested in modern home comforts as Americans.

Not only are they speeding up some of their trains, but there are signs that they want to cook in a hurry. What else would explain the marketing of a new "electric kitchen" with which, it is claimed, a full-size meal for five persons can be prepared in 45 minutes? The device, which is also said to make cooking cheaper consists of stewing pot, frying pan and coffee percolator, all of which operate by insertion of an electric plug. It was exhibited at the Leipzig Fair recently.

As for the home comfort, there was displayed at the fair a "central heating range" which can be used not only for cooking but for heating the entire house, doing away with the necessity for separate fireplaces or stoves in the various rooms, which is still a widespread custom in Germany and other European countries. This special range has three grates, one over the other. Only the top grate is used for cooking: the middle grate is intended for use in milder weather when the house requires only slight heating, and the bottom grate, where the flames are most intense, is for the winter.

Radium Refinery

The Canadian mining company, which sought, near Great Bear Lake, to find gold worth about $22 an ounce and discovered radium valued at well over $1,800,000 at present prices for the same amount, is planning to establish a refinery at the scene of the digging.

This will further reduce the great cost of getting the valuable pitchblende ore, containing the radium, out of the wild area by airplane. In connection with radium extraction, the company has engaged the services of a Belgian expert, Mr. Pochon, and on his return from Europe in June plans will be considered for a refinery. The plant will include crushing and grinding machinery, as well as the chemical equipment for readium extraction.

The Department of Mines at Ottawa is lending all possible assistance toward working out ways and means for the treatment of the radium-bearing ore. So far the government has received 600 pounds of ore for experimental purposes, and the company proposes to ship twenty tons of ore, now stored at Waterways, Alta., to Ottawa for further test purposes.

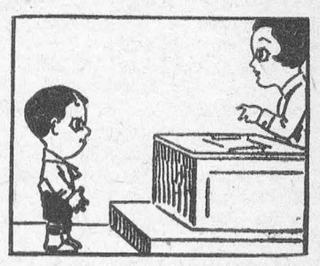
Water Power in Central Electric Stations

About 98 per cent. of the output of central electric stations in Canada according to the Dominion Water Power and Hydrometric Bureau, Department of the Interior, is generated from hydraulic installations. The proportion of hydraulic installation available for public use is steadiy growing to keep pace with the increasing demand for domestic, commercial and industrial energy. In all three of these fields new adaptations are increasing the demand. The development of the alternating current radio, electrical refrigeration, therapeutic appliances and general household devices in the domestic field; of improved commercial lighting and advertising in the commercial field; and of electro-chemical and electro-metallurgical processes in industry constantly increases the demand on the central electric stations.

At the present time there are 328 hydro-electric central stations in Canada with a total installation of 5,734,491 horsepower. Of these totals, 226 stations with an installation of 609 turbines of a combined capacity of 4,241,838 h.p. are owned by commercial organizations while municipal and other public organizations operate 102 stations which contain 242 turbines aggregating 1,492,653 h.p. The average installation of the commercial stations is 18,769 h.p. and the average capacity of their turbines 6,965 h.p., as compared with 14,634 h.p. and 6,168 h.p., respectively, for the municipal stations. Individual turbines vary in size from the 10 h.p. turbine used for hamlet lighting to the great 65,000 h.p. units of the Chute a Caron development on the Saguenay river.

Progress on the Big Bend Highway

Considerable progress has been made during the past year towards the completion of the Big Bend highway, the connecting link in the western half of the trans-Canada highway which follows the course of the Columbia River in British Columbia for almost 200 miles. On the eastern end, which is being constructed by the National Parks Service, Department of the Interior, sixty-two miles of road from Golden have now been graded and surfaced.



Teacher—"Henry, can you define a hypocrite?"

Henry—"Yessum, it's a kid wot comes to school wid a smile on his face."

WILLIAMSBURG COUNCIL

The Council met at Williamsburg on Saturday April 2nd, 1932. Members all present. Minutes of previous meeting read and adopted. By-Law No. 918 detaching the North 40 acres of lot 17, Con. 5, from School Section No. 6 and attaching same to School Section No. 21 was passed.

The following accounts were passed:

Allan Barkley, ground rent for stone pile	$ 4.00
Nettie Zeron, ground rent for stone pile	4.00
Frank Merkley, ground rent for stone pile	4.00
Nathan Tupper, ground rent for stone pile	4.00
Frank Wells, ground rent for stone pile	4.00
M.W. Locke, ground rent for stone pile	4.00
Robt. Colquhoun, ground rent for stone pile	4.00
C.N.R., crossing gates expenses, Feb. 1932	34.33
Ezra McMillan, pay on salary and trip to Toronto	145.00
Ezra McMillan, for coal and cartage	1.00
Walter Whitteker, work on road	4.50
Jas. Hesson, balance 1931 Twp. grant School Section 17	43.00
H.H. Casselman, quarantining, etc., Hepburn family	10.00
Marcella Casselman, relief of herself and family	17.00

The Council adjourned to meet again in Froats' Hall, Williamsburg, on Saturday May 7th, 1932, at one o'clock p.m.

M.S. BECKSTEAD, Clerk.

MR. J. FETTERLY

The funeral of Jeremiah Fetterley who died on Saturday March 26th, was held to the Grantley United Church on Tuesday afternoon, March 29th, with the pastor, Rev. G.N. Maxwell, officiating.

The late Mr. Fetterley was born in Williamsburg Township, 89 years ago, and had followed the occupation of farming in that vicinity all his life.

He leaves to mourn a family of five: one daughter, Mrs. Jas. Bocker, Buffalo; four sons, Olive, San Francisco, J.B. of St. Catharines, Earl W., Toronto and Roy H., on the homestead; also two brothers, Joshua of Grantley and Harold of Williamsburg; and four sisters, Mrs. C. Crites, Gallingertown; Mrs. Barnhart, Antwerp, N.Y.; Mrs. Shucks, Natural Bridge, N.Y. and Mrs. Summers of Winnipeg.

The remains were interred at Grantley.

ELMA

Syrup making is the order of the day.

James Barkley spent a day in Cornwall on business recently.

Mrs. Caroline Droppo, who has been on the sick list, is better and is about again.

Edgerton Barkley and other members of the family spent Thursday last in Ottawa.

Mr. J.W. McMartin, teacher, and family, who spent some months in Florida, returned in time for the opening of school after the Easter holidays, and in time to get a taste of Canadian winter.

Miss Helen Barkley was the guest of Miss Alice Beckstead over the week-end.

Service at the United Church on Sunday at 11 a.m. Sunday School at ten. Come and let us worship.

CORONER'S INQUEST

Details surrounding the death of John E. Moynes, 20-year-old bank teller of Aultsville, which occurred following an auto accident at Dickinson's Landing, early Monday morning, March 28th, were recounted at a Coroner's inquest, held at the Court House on Friday afternoon, and the jury returned a verdict of accidental death, attaching no blame to anyone. The inquest was quite brief, the main witness being Miss Marjory Stewart, 19-year-old Aultsville girl, who was with Moynes at the time of the accident, but was uninjured.

According to Miss Stewart's evidence, she and Moynes left Aultsville shortly after 8 o'clock Sunday right and drove to Cornwall intending to attend the midnight frolic at the Legion Hall. Upon arriving in town they spent some time with friends, and between 10.30 and 11 o'clock went to the Legion Hall but, as there was yet no evidence of dancing, they started on a drive down the East Front. They reached St Zotique about 12 o'clock, but had stopped for gas once and a couple of other times because of car trouble.

They remained at St. Zotique for about an hour and had potato chips. In response to continued questioning by Mr. Harkness, Miss Stewart said she thought Moynes had had a bottle of beer. They started home and had more car trouble which, Moynes told Miss Stewart, was caused by dirt in the gas. They stopped several times and had to wait before the car would run again. Upon their arrival at Cornwall it was very late, but they stopped at Bauman's, Miss Stewart thought that was the place, and had some sandwiches. They then left for home and Moynes was driving as fast as he could with the car in the condition it was. The road was very slippery.

Asked how the accident happened, Miss Stewart said she could not remember much. The car just swerved and she felt her companion wrench the wheel, and the next thing she knew her face was in water and she was partially out of the car. She got up, but fell into the water again. She then got up and looked for Moynes, and found him half in and half out of the car. She shook him but received no answer, and when she noticed blood coming from his nose, she ran to a nearby house and woke a man up.

Miss Stewart then told of people taking Moynes into the home of Mr. Frank Dishaw, but could remember nothing else until she awoke in the Dishaw home and found herself lying on a couch.

She was cross-examined by the Coroner, Dr. C.J. Hamilton, and emphatically declared that Moynes was not intoxicated at the time of the accident.

Dr. G.E. Moodie, Provincial Constable V.A. Taylolr and Dr. A.J. Gardiner also gave evidence.—Cornwall Standard.

BRINSTON

On Wednesday afternoon Master Denzil Locke entertained a number of his friends at a birthday party.

Miss Doris Pitt, of Brockville General Hospital, spent the week-end at her home here.

Mr. and Mrs. P.W. Payne and son Murray, of Westboro, spent the week-end with Mr. and Mrs. J.J. Payne.

A three-act melodrama, "The Old New Hampshire Home," is being prepared by the United Dramatic Club. It is equal to the high standard set by the players of this vicinity and will be ready for presentation in a few weeks.

CLOUD OF CHLORINE AS PLUG BLOWS OUT OF TANK

Overcoming more than twenty-five employees and killing a horse directly in its path, a greenish-yellow cloud of chlorine gas hovered over the Canada Starch Company's plant at Cardinal for several hours Saturday after a safety plug blew out of a one-ton tank of chlorine.

Floating along on a mild wind, hugging the ground and creeping into several buildings in the plant, the gas was finally carried out over the St. Lawrence River. Reports from six miles up the river indicated it was still visible there, but casualties were confined to the starch plant itself.

Four doctors, called from Cardinal and Iroquois, attended the stricken employees. Several remained unconscious for as long as three hours but the majority were sufficiently recovered to go home soon after being overcome. Some of those affected have developed bronchitis, and pneumonia will have to be guarded against, doctors said.

The chlorine was contained in one of fifteen tanks in a yard of the plant. It had not been touched since delivery there, and plant officials could not explain the accident. Four men working beside the tank received the full force of the gas as the safety valve blew, but as it had not yet mixedsufficiently with oxygen they were not affected.

Employees in all the buildings were warned and rushed from their benches and machines to a safe point to the windward of the gas cloud. Many were overcome before they could escape, and had to be assisted from the danger zone. Seized with violent coughing fits, some of the victims staggered outside the plant fence and collapsed in a field. Others dropped in the buildings, but were quickly taken out by gas-masked rescuers and revived.

Witnesses believed only the direction of the wind, which took the gas cloud over the river and away from the town, saved residents of Cardinal from being overcome. Using a fire hose, employees of the plant battled the cloud while it was still within range, and the water had some effect in dissolving the dangerous fumes. The ton of chlorine, however, was still formidable as it was wafted over the water, and the residents of the town watched with relief as the danger rolled away.

MRS. A. E. FETTERLY

The community of Aultsville was shocked on Sunday morning, March 27th, to learn of the sudden death of Mrs. A.E. Fetterly. The deceased lady, whose maiden name was Miss Annie Margaret Bryan, was born at Lunenburg, 77 years ago. She was a daughter of the late Mr. and Mrs. Edward Bryan. On November 26, 1901, she was married to Mr. A.E. Fetterly, Aultsville, who predeceased her two years ago.

Surviving are five brothers: Frank and Sidney Bryan, Aultsville; Herman Bryan, Syracuse, N.Y.; Michael Bryan, Galesburg, Ill. and Allen Bryan, Saskatchewan.

The funeral service took place on Tuesday, from her late residence to Trinity United Church, Aultsville, and thence to the vault at Woodlands. Rev. H.E. Warren officiated.

WOMAN ENDS LIFE WITH PISTOL SHOT

Ill for ten years with nervous disorders, Mrs. Arthur Metevier, 53 years old, was found shot through the heart in her home, Cornwall, on Sunday. Police said she committed suicide. According to her husband, who recently was transferred to Cornwall from Beloeil, Que., as C.N.R. station agent, Mrs. Metevier came downstairs with a revolver in her hand. He and a maid servant ran from the house, and heard a shot as they left. This, it was later learned, lodged in the floor. While they ran for help, the police were informed, Mrs. Metevier went to her room, and shot herself through the heart.

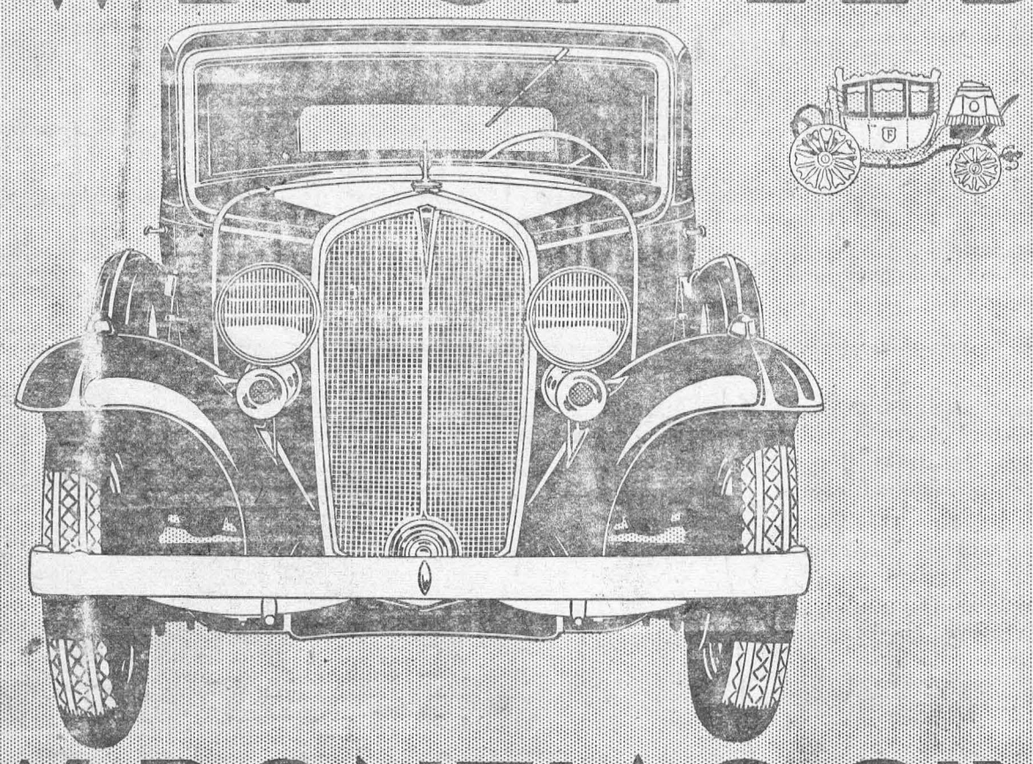
NEWLY STYLED


NEW PONTIAC SIX
produced in Canada
Fetterlys' Limited, Morrisburg

OF course, most people buy motor cars for the convenience they give. But most of us also demand two other qualities—smartness and economy. The new Pontiac was built specifically to meet these important requirements.
It is truly smart—with chromed V-radiator; low, flowing lines; sloping windshield, and graceful, rounded corners. This new styling is right in the forefront of motor car fashions; in fact Pontiac's Fisher Bodies have much to do with *setting the style.*
Pontiac also lives up to its good looks; performance and reliability match its fine appearance. Why shouldn't it? Basically it's the same sturdy car that has an enviable record for economy and durability—a fact conceded by motorists everywhere. And you'll find that Pontiac has all the year's important improvements, at no extra cost. Ride control, free wheeling, syncro-mesh transmission, silent second, high compression motor, enclosed springs, rubber cushioning at 47 chassis points—Pontiac brings them all to the low-priced field.
Come around and see this fine big car. There are seven models from which to choose. P11-36

Free Trees For the Asking!

The Lone Scouts of Ontario have recently co-operated with the Ontario Forestry Branch of the Provincial Government in posting signs in prominent places throughout the province announcing to farmers and other interested person how they may secure a large number of trees free of charge, for reforestation work, from the Forestry Branch.

The boys arranged hikes, armed with the cards, a hammer and tacks, and posted these announcements in prominent places.

Every year, around May 24th, some 200 Boy Scouts attend a special Forestry Camp at Angus, Ontario, where they are taught the rudiments of Forestry by Government Officials, and where they help to lay out plantations which will be the foundation of a large Boy Scout Forest Already some of the trees, planted several years ago, are growing into large proportions. This camp is very popular, and only costs the boy his transportation to Angus and it may be that some Lonies would like to attend this year. If so, let Headquarters know as soon as possible, so that arrangements can be made to include you.

English Scouts May Visit Canada

A project is afoot among Birmingham Scouts and Rovers to organize a special troop and visit Canada this summer. If the plan materializes the troop will leave Liverpool in July and spend some fifteen days in Canada.

Lone Scout Summer Camp

There has been quite a lot of interest shown in the proposed Lone Scout Camp, and this opportunity for Lonies to get together and work and play under the supervision of experienced Scout leaders should not be missed. Similar camps were organized very successfully in 1929 and 1930, and if there is sufficient encouragement to carry the matter through, the camp will probably be held at Ebor Park, near Brantford, Ont., during the first two weeks of July. The cost for the two weeks will probably be ten dollars, and the Scout will have to provide his own transportation to and from the camp.

Any Lone Scout interested should communicate at once with Headquarters, and start saving his nickels now!

Boys Aid Firemen in Dominion Contest

Hamilton, Ont., Scouts are credited by Fire Chief James with helping his department win the 1930-31 Dominion Fire Prevention contest, Class 1, and the Canadian Chamber of Commerce Shield. The Scouts systematically inspected alleys and back streets and reported fire hazards.

World Courts and Boy Scouts

That Scouting offered a great lesson in neighborliness, and that he would rather fasten his hopes for world peace on the Scout Movement than on world courts, was the declaration of the Hon. W. G. Martin, Provincial Minister of Public Welfare, at the annual meeting of the Boy Scouts Association of Ontario.

This Week's Scout Law—No. 2

A Scout is loyal to the King, his country, his officers, his parents, his employers and to those under him.

Loyalty is one of the foundations of good citizenship. No organization of any sort, from a Government downwards, can be successfully operated unless it's members are loyal. To be loyal means to adopt certain principles and to stick to them when you know they are right. Loyalty is a bulwark thrown up against Life's temptations.

Therefore a Scout is Loyal to his country, that he may help to make it a better place to live in; to the Scout Organization that he may get the best out of it; to his Parents, who have worked and sacrificed for him, thus obeying the 5th commandment, which says "Honor Thy Father and Mother"; to his employer, that he may obtain the best results from his labor; and to those over whom he has control, that they in turn may honor and be loyal to him.

Lone Scout Dog Show

In a recent issue of "On Lone Scout Trails" particulars were given of a Lone Scout Dog Show." This, in fact, is theoretical, as the boys cannot bring their dogs to any central spot for judging, but they are required to write an essay and send pictures of their dogs, from which the judging was done. The winning essays will be published in this column at a later date.

Membership in the Lone Scouts is open to boys from 12 to 18 years of Age, inclusive, who are not able to join a Regular Boy Scout Troop. It is particularly designed to give boys who live on Rural Routes, or in small villages, an opportunity to take advantage of the Scout Programme.

For full particulars, write to The Lone Scout Department, Boy Scouts Association, 330 Bay Street, Toronto 2. —Lone E.

Prince George Attends Hunter Show

Prince George recently attended the hunter show at London and presented the King's cup for thoroughbred stallions. Joseph Staiens is shown receiving the award for his horse, Ballynahinch.

Forecasts End Of Niagara Falls

McGill Scientist Believes Land Tilting May Turn Great Lakes Flow Back Toward Mississippi

Montreal.—The eventual disappearance of Niagara Falls was predicted by Professor T. H. Clark, professor of paleontology at McGill University, in a recent address here.

Professor Clarke's discussion of the Niagara River came in the course of a general survey of the history of the Great Lakes, whose discovery he termed one of the most absorbing subjects to the student of North American history" A few of the geologic keys to the secret of time were displayed for the benefit of his audience.

Changeless as the Great Lakes seem, when looked at through the eyes of the layman, they all show constant change to him, for his theories are framed in an unlimited time, and with the yardstick of thousands of years the lecturer measured off the line of the rivers and lakes of eastern Canada.

The ancestry of the present St. Lawrence was traced to a main stream which started in the present bed of Lake Michigan, moving thence via Georgian Bay to Lake Simcoe and Lake Ontario, whence it followed much the same course as it does today. The river was, however, much longer then, for soundings show the presence of a submerged channel cutting through the banks and falling off into deep water south of Newfoundland, said the lecturer. Near its mouth it received a tributary from the north, whose only modern evidence is the Strait of Belle Isle.

There was no Niagara Falls then, but at the extreme end of Lake Ontario, through a gap in the Niagara escarpment a tributary stream draining the present region of Lake Erie flowed into the Laurentian River. The types of animals which we know to-day in a wild state probably saw this work of nature, but it was prior to any human life on this continent, the lecturer asserted. Then came the Glacial age, when this country resembled modern Greenland, which is still in the throes of an ice period.

Accompanying the closing stages of ice occupancy of the lake region, Professor Clark said, there came a strange occurrence—the invasion of the St. Lawrence lowlands, the Ottawa Valley, Lake Champlain and Lake Ontario by the sea, due to the depression of the crust of the earth. At Montreal the sea was 625 feet above its present level. Retilting of this crust brought a draining off, leaving, however, abundant trace of the presence of the sea there. At that time, he said, the lakes asumed their present form and position.

The possibility of a reverse tilting being now in progress was suggested. This would tend to spill the waters of the lakes once more into the Mississippi, where they once found an outlet.

American Air Lines Carry 457,753 Fares

New York.—American air transport lines experienced the busiest year in their history during 1931, with marked gains in passenger, mail and express traffic, according to a report made public recently by the Aeronautical Chamber of Commerce of America.

"With 720 airplanes in service, the major American lines reporting to the Aeronautical Chamber of Commerce carrier 457,753 passengers, 9,351,195 pounds of mail, and 885,164 pounds of express in 1931," the report said. "This volume of traffic can be compared with 385,910 passengers, 3,513,75 pounds of mail and 286,798 pounds of express in 1930, the previous peak year."

Stream Flow in the Maritime Provinces

The Dominion Water Power and Hydrometric Bureau of the Department of the Interior reports that the month of January was unusually mild in the Maritime Provinces and that, as most of the precipitation occurred in the form of rain, the run-off was above the long term average. In Nova Scotia the run-off was about 30 per cent. above the January mean and was heaviest following rains and thaws during the middle of the month. In New Brunswick the run-off was about 15 per cent. above the January mean with low flow during the first four or five days of the month followed by high flows as the weather turned mild and rainy. The Lepreau river in southern New Brunswick was swept clear of ice on January 7 and remained free for ten days—an unusual circumstance at this season.

Athletes Keep Trim For the Olympics

Busy Season Assures Entrants Will Be In Good Form

The sports world is in the throes of a busy season this year.

The winter Olympics are over.

The indoor track season has been illumined by the brilliant performances of Venzke, Spitz, Lermond, Sexton, McCluskey, and their fleet, agile comrades.

But more is to come. Outdoor track meets in plenty will thrill the fans; and ahead, as a climax, is the prospect of the Olympic games in Los Angeles in August.

But before this, the world's big sports show, there are the numerous tryouts.

These, in general, will follow the college track season and will be so distributed over the country as to give almost all sections a chance to witness Olympic competition.

Perhaps the dates of some of these events will be of interest. So here are some of them, as listed by Lawrence Perry in a Consolidated Press dispatch:

On June 24-29 the track and field athletes of the East will hold a tryout in Harvard Stadium at Cambridge.

Rowing tests for all but eight-oared crews will be held on the Schuylkill River at Philadelphia, July 1-4.

Chicago will be the scene of the semi-final Eastern track and field trials on July 8-9. On the same dates the Western semi-final tryouts will be held at Long Beach, California.

Cincinnati will see the final swimming test for men on July 14-17.

Gymnasts who are to represent the United States at Los Angeles will be selected in a final meet in New York City on July 15.

On July 15 the final track and field tryouts will be staged at Palo Alto.

July 15-16 will see the holding of the final boxing trials at Chicago.

Pacific Coast yachts will sail trial races at Los Angeles July 16-20. And there, also, on July 23 the finals in tumbling, rope-climbing, and Indian clubs will be held.

Diving finals and final events in water-polo go to Pasadena, July 18-23.

Final yachting tryout will be held on the Los Angeles course July 23-27, and at this time the final road-cycling tests will be held on the Olympic course.

"People don't exist for government. The government exists for the benefit of the people."—Alfalfa Bill" Murray.

"Has George ever hinted marriage to you?"

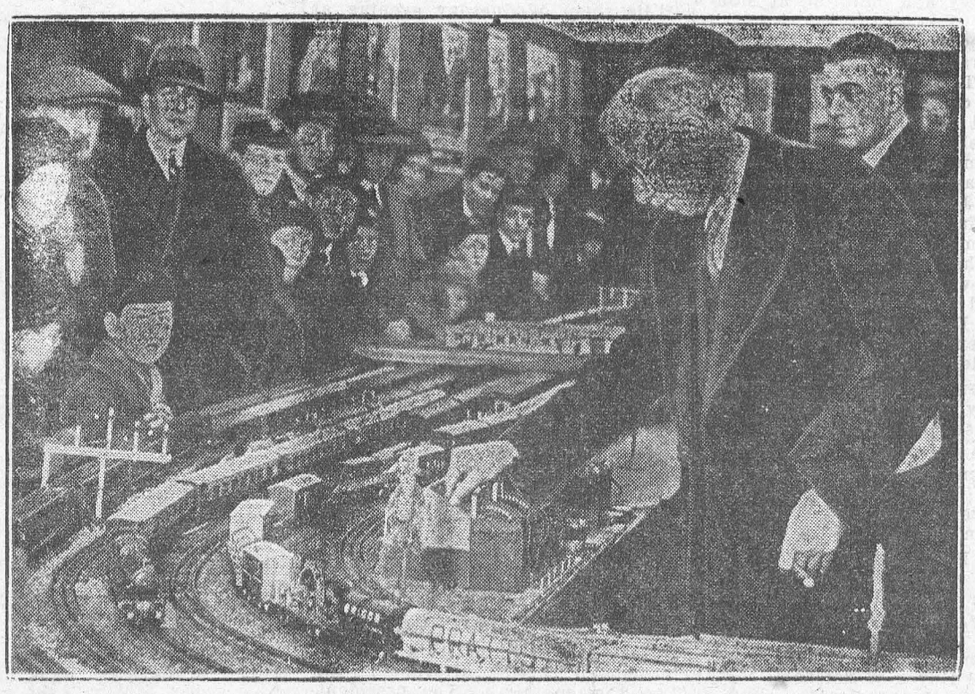
"Only once, coming home from the theatre the other night, he laughed and said that anyway two could ride in a taxi as cheap as one."

Might Hear Some Soup

In a fashionable restaurant, a new multi-millionaire with no knowledge of French and no desire to expose his ignorance, pointed to a line on the menu and said to the waiter: "I'll have some of that."

"I'm sorry, sir," replied the waiter, "but the band is playing that now."

Dominions Secretary Enjoys Motor Show



Ex-locomotive engineer, J. H. Thomas, now Dominions Secretary in the National government, for a moment forgot his duties and amused himself with the miniature models at Crystal Palace in London, recently.

Current Events

As Viewed By The Press

CANADA

Toronto's Bond Triumph

Canada, as well as Toronto, has reason for congratulation over the absorption of the city's new $15,299,000 loan in less than two hours. The success of the flotation indicates a healthy state of Toronto finance, and it also suggests a degree of returning confidence which should be beneficial to the business community.

Since it became impracticable last autumn to enter the New York market for money, Canada has witnessed the disposal of several important bond issues at home, and, while it has been feared the saturation point might soon be reached, there seems no danger on that score as yet.—The Globe (Toronto).

Forest Preservation

Having returned from a three months' tour of the chief European countries Mr. Frank J. D. Barnjum is more than ever convinced of the serious world shortage of wood. He thinks that the British Empire, notwithstanding its immense natural resources of other kinds, is weak in this respect, and he makes the following suggestion:

"Our governments could not make a wiser or more necessary move than to purchase and conserve as a reserve, every acre of forest within the Empire than can be obtained at a reasonable figure. The present time is the best and last opportunity that will occur to purchase forest lands at a moderate price. Owing to the depression, land containing mature timber can be purchased in Canada today for a trifling advance over the cost of planting young seedlings. Control of a majority of the remaining available wooded areas, with the enormously advancing values which are bound very shortly to occur, would give the Empire greater prestige than control of the gold supply, for no amount of gold can replace forests within the lifetime of two generations, nor the few thousands of acres of our remaining big trees in 15 generations."—The Mail & Empire (Toronto).

The Industrialization of Canada

Le Devoir, Montreal (Ind.): Recent official statistics show that the industrialization of our provinces is continuing. Throughout the country more than 53 per cent. of our population lives in the towns. In Ontario 61 per cent. of the population lives in the urban centres. In our province the proportion is 63 per cent., as against 56 per cent. in 1921. This means that practically two-thirds of our people live in towns like Montreal—where more than a third of the population of the province resides—Quebec, Verdun, Three Rivers, Hull, Saint Hyacine, etc. Practically a third of the population remains on the land. Such a state of affairs from all points of view is unsatisfactory; the movement toward the towns, if it has declined since the beginning of the economic crisis, is still far from being stopped. Undoubtedly with modern methods of agricultural production and with the evolution of crops, there is not the same need for laborers on the land as there used to be, but there is still a complete world to develop and populate, that of the new territories and colonization regions.

Back to the Land

Le Droit, Ottawa (Ind.): If the back to the land movement has been many times proposed as a remedy for unemployment, it goes without saying that the opening of new lands and the clearing of them, with the establishment of farmers or the sons of farmers in new countries, would be no less efficacious. This is the work that follows on colonization.

Joint Effort

Windsor Border Cities Star (Ind.): Mr. Charles Forester, division superintendent of the Canadian National Railays, addressing a meeting of the Ontario Onion Growers' Co-Operative Society at Leamington, says that the outstanding success which has attended the sale of the Western Ontario onion crop through co-operative effort should induce growers to apply the same method to the disposal of corn, tomatoes, fruits, vegetables and other products of the farm. Mr. Forester is right, of course. The agricultural industry is never coming into its own, it will never extract the full and legitimate benefit of its labor and investment, until such time as the men on the land learn the lesson that there is much more to farming than the actual growing of the goods. One may produce the best potatoes or tobacco in the world, but if he lacks adequate marketing facilities he can never hope to make any money.

The Imperial Conference

Toronto Star (Ind. Lib.): It is to be hoped that some workable plan of closer trade co-operation between Canada and Great Britain may emerge from the conference at Ottawa during the coming summer, but no matter what the conference may decide upon one may feel assured Canada will continue to exercise control of her own fiscal policy and will continue to advance as she can as an industrial nation—utilizing her own raw materials as much as possible.

The Western Viewpoint

Saskatoon Star-Phoenix (Lib.): The prairie provinces have a vital interest in the Empire Economic Conference this year at Ottawa. The bulk of Canadian exports to Britain have always been from the west: wheat, livestock and farm products. It is on the shipments abroad of these commodities that Canada's prosperity largely rests and the prosperity of Western Canada depends on them almost exclusively.

THE EMPIRE

True Nobility

Recently a Salvation Army band played beneath the windows of Buckingham Palace, and subsequent incidents revealed the kindly and intensely human character of the Royal family. The Queen sent out a request that the musicians play her favorite hymn, "Jesus, Lover of My Soul," while his Majesty requested "King of Kings" and "Silver Threads Among the Gold." Then the leader of the band was invited into the palace and introduced to members of the family circle.

Nothing wonderful about this, may be the comment of the supercilious critic of all such human incidents. But there is. Here are the hereditary rulers of a vast Empire, asking, not for the latest in popular music, but for the old hymns and a song that has been familiar for more than a generation.—The Globe (Toronto).

Ireland and the Empire

London Morning Post (Cons.): If the Irish are to be driven out of their Imperial heritage by their countrymen in Southern Ireland it will be their great loss and misfortune. They cannot well have it both ways. If they are citizens of a Republic, they cannot at the same time be British subjects. Their loss, we fear, in these hard times will be looked upon as gain by many of our native British now out of employment. It is altogether a very complicated and regrettable position. If the severance comes, both countries will suffer heavily thereby: but it seems to us that the Irish will suffer much more heavily on balance even than the British, since they will thenceforth be aliens in a country and Empire which they have long regarded as their home from home.

The "Defence" of Paris

Manchester Guardian (Lib.): The authorities of Paris are preparing elaborate plans for the defence of the city against aerial bombardment. The French public is never left for long without some reminder of the "imminent" danger of attack from Russia, or Italy, or Germany. The real danger, unless provoked by France herself, must, in the present state of the world, be extremely slight. It may perhaps still be the duty of the War Department, or the new Ministry for National Defence, to envisage it and to guard against it. But this constant harping in public on the likelihood of France's being attacked is not calculated to increase that feeling of security which the French Government professes so earnestly to desire.

OTHER OPINIONS

The Prince's Popularity

Brooklyn Eagle: But what the Prince of Wales calls his "debt" to the press is due to the press of the whole world. Does his horse throw him, as any man's horse might? Sympathy is stilled by newspaper stories from Melbourne to Paris. Does he plan to teach his nephews the manly art of self-defence? South Africa and Canada and the United States get all the details. Does he issue a fervent appeal to British patriotism? The appeal, textually printed, reaches all readers of the English language. Commonly he shows rare common sense in what he says and what he does. Publicity never hurts him.

The Silver Lining

Boston Christian Science Monitor: The ten-year deflation of agriculture has resulted in losses running into the billions. Some estimates run as high as $40,000,000,000. On the face of it, one would assume that recovery must be painfully slow. That does not necessarily follow. A great industrial concern which had its capital depleted to that extent would have to face the task of replacing a large part of that depleted capital out of future earnings. Agriculture, although a great industry, is an industry of small owners, and to a considerable extent of changing owners. The greater part of the billions lost in the agricultural deflation has been charged off. It is the loss of the savings of the older generation and of holders of farm mortgages. Those losses will not have to be recouped before agriculture can recover. Most of them are gone and never will be replaced. Agriculture is more completely liquidated than any other industry, and, with the coming of better times, its recovery will be correspondingly rapid.

"It is as easy for the mind to think in stars as in cobblestones."—Helen Keller.

"The basis of our European-American civilization is critically shaken."—Albert Einstein.

Big Demand For Teachers In Germany

Unique Method of Repairing Roads Employed by Small Towns

According to an article contributed to the Berlner Tageblatt by a distinguished official in the Thuringian ministry, there is still one profession for women that is by no means crowded. The position open is that of kindergarten teacher in the country. It is contended that while the large cities and even small townships have their kindergartens in plenty many district on the country side are destitute of this instruction and occupation for the tiny tots. A Froebel house has been opened in Schweina, in Thuringia, which receives girls and trains them for the profession of kindergarten teacher at a nominal charge. When the course is finished there is every chance of the young teachers finding employment in various places in the country. At the present time, when so many women teachers have lost their positions in the large towns, this comes as good news to those seeking a livelihood.

Citizens Repair Roads.

The coffers of Hochemmingen and Fischbach, two small places near Villingen on the Rhine, being but sparsely furnished, the district authorities have revived an ancient method for keeping the roads in repair, following thereby an ancient method of wealthier Switzerland. A communal decree was issued this winter, in unanimity with the statutes of the Reich's Constitution, to the effect that it is the citizen's duty to render personal service to the state and community. In Fischbach the male inhabitants over sixteen years of age were called upon to mend the district field roads. One mark a day was paid for hand labor, while horse-and-cart owners' work was remunerated by three marks daily. Each person is notified a fortnight beforehand and is permitted to find a substitute at his own expense. Any one refusing to comply with this new regulation is liable to a fine up to fifty marks, but the local authorities know their people and feel assured of compliance.

Penalty For Pedestrian.

Two important sentences have been pronounced by German courts recently for violation of traffic rules. In one case, a pedestrian was sentenced to imprisonment because he had disregarded the stop-light of a traffic signal, which neglect led to a serious consequence. In another instance the driver of a car was punished because he had not looked into the little mirror fixed to his windshield and thus failed to see a car coming up from behind.

The Berlin post owns 1,000 mail-delivery cars. They are painted canary yellow and are driven by electric motors. A new giant garage, said to be the largest of its kind on this side of the Atlantic, is now approaching completion where the dry batteries of these cars can be repaired.

At a meeting of an urban district council the chairman announced that the clerk wanted a supply of ribbons for the typewriter. Immediately a member protested against such extravagance. "She may be a nice girl," he said, "but I don't see why she should be provided with finery at the expense of the rates."

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

— With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

Chas. H. Fletcher.

Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved by Dr. Williams' Pink Pills.

Working Every Day Now.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Albert Berger, Wingle, Ont. "It got so bad I had to stop working and stay in the house. I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I gave the Pills a fair trial, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lame Back, Sciatica."

Rheumatism and kindred ailments thin the blood very rapidly. Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combatting such ailments. Equally good for all rundown or nervously exhausted people. Try them. At your druggist's. 50c. 273

Lunch Counter an Innovation On Crack French Boat Trains

Paris.—Express trains equipped with bars and quick-lunch stands are the latest innovation of the French State railways on the Cherbourg-Paris line. If the experiment proves popular with the traveling public, it will be extended to other lines.

This buffet-bar is for the convenience of all passengers, no matter in what class they are travelling. It resembles an ordinary buffet, and two employees of the Compagnie des Wagons-Lits are in charge. The menu includes sandwiches of all kinds, salads, fruits, cakes; also tea, coffee, wine and beer. Ham and eggs and frankfurters and sauerkraut seem to be the most popular dishes on the bill of fare.

Gar Wood Building A New Speedboat

New York — Gar Wood, Detroit speedboat king, announced recently that he is constructing a new craft, Miss America X, to defend the Harmsworthy trophy in the international classic on the Detroit River this summer. He predicted the new boat would be capable of 120 miles an hour, "maybe more."

This announcement was in answer to the news that Lord Wakefield, British sportsman, has decided to build a new Miss England III, to challenge for the trophy. Miss England II, piloted by Kaye Don, cracked up in the Detroit River in the last races. Don again will drive Lord Wakefield's boat.

Wood's new boat will use the same twin engines that were in the Miss America IX when Wood recently attacked the world water record on Indian Creek in Florida. The craft, itself, will be several feet longer but of the same design as the other Miss Americas.

Berlin Post-Office Offers Language Service

Berlin—It is not generally known that at one of the largest post offices in the city of Berlin there is an information bureau where clerks may be consulted upon business matters in almost any known language. Information can be obtained in twenty-two languages. Every post-office clerk in this department has been thoroughly grounded in the language assigned to him. Those speaking Japanese and Chinese have studied at the Berlin Oriental Seminary. The solitary exception appears to be Yiddish, but when information in that tongue is required a rabbi of the near-by synagogue is consulted. Even the foreign consulates frequently come with requests to this bureau. Business men from other countries, spending a short time in Berlin, find it of inestimable advantage.

Piccadilly Circus To Be Floodlighted

London—Piccadilly Circus, termed "the hub of the universe" by Londoners, is to blaze with new lights. And Eros, the center of the hub, is to have his own system of flood lighting.

The lighting is described as more powerful than the lights of the Potsdammer Platz in Berlin. There will be 40 lamps with a total consumption of 60,000 wats In case of failure of the main supply, a separate battery system, which will be kept perpetually charged from another circuit, has been installed.

German Veterans Form Association

Buffalo, N.Y.—Veterans who served during the World War with the German and Austrian armies have completed here an organization which they hope may in time become national in scope. It is called "Deutschstammige Veteranen in Amerika, Gruppe Buffalo."

"We want to show the American people that although we took part in the World War as enemy combatants, we can become good citizens of the United States today," said Mr. Lother Mannheimer, organizer of the group and its temporary president, "There is hardly one of us who has not already applied for citizenship papers."

London Atmosphere

The pageantry of old London town is well exemplified in this photograph. A sentry at St. James' Palace salutes Dr. Winnington Ingram, bishop of London, on his departure from the King's second levee, held there recently.

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

A great many Spring dresses combine woolen and rough pebbly finished silk crepe—and how smart they are!

Here's a lovely example so youthful and versatile. The skirt, crushed belt and sleeve trim are sapphire blue woolen.

The silk crepe bodice is pale pink shade, an altogether flattering combination.

Black canton-faille crepe topped by a white crepe bodice is conservatively smart and dignified.

A bit more daring for spectator sports is brown diagonal woolen with plain vivid yellow woolen in a knit mesh weave.

Style No. 2655 may be had in sizes 14, 16, 18, 20 years, 36 and 38 inches bust.

Size 16 requires 2 yards of 39-inch material for blouse with 2 yards of 39-inch material for skirt.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

"I met Fred in the city today. Poor fellow; he's feeling terribly down in the mouth. Said he was perfectly willing to die." "Oh, dear! Why didn't you ask him to dinner?"

Women Plan Bank In Czechoslovakia

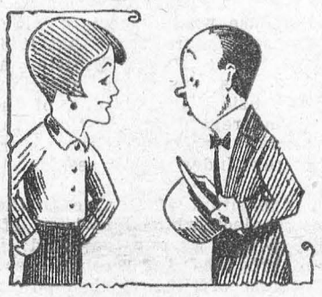
Prague. — Establishment of a savings bank entirely under the management of women has been decided upon by the Czechoslovak Women's Council, it is reported.

Women only will be depositors and credits will be issued for women only. The plan aims at giving cheap credits to business and working women and granting to women an opportunity to become heads of a banking institution. The net profits of the new bank are to be devoted to the women's movement in Czechoslovakia

Russia to Place Ban On Alien Job Hunters

Moscow.—Job hunters from other countries who come to Russia on ordinary tourist visas are going to be disappointed this summer if they expect to find work and stay here.

The Government appears to be tightening its policy of discouraging unemployed persons from entering the country unless they have jobs specifically contracted for in advance. The new restrictions are expected to apply even to skilled labor.



Hubby—"My dear, I can give you a satisfactory answer of my delay in getting home this evening."

Wifey—"You may have an explanation, Henry, but I can tell you in advance that it won't be satisfactory."

It's also true of the bonds of matrimony that they aren't worth much unless the interest is kept up.—Publishers Syndicate.

A barber is not a pugilist, although he does give a customer an uppercut.

Will You Pay 3c To Be Rid of Your Indigestion?

Here is a positive guarantee no sufferer from indigestion, sour, acid stomach can afford to ignore. Within two minutes by the watch, at a cost of not more than 3c you may be rid of acid stomach, indigestion, bloating, gas, belching and stomach pain.

Do you doubt it? Then go to your nearest drug store and get a package of Bisurated Magnesia and use as directed. If after the first dose you do not feel it is worth its weight in gold, if the belching, gas and pain are not relieved completely, you may have your money back.

Bisurated Magnesia is sold on this positive guarantee because we know of its value in stomach distress. It is used by thousands of stomach sufferers the world over. The cost is about 3c per dose. You just simply can't afford to suffer longer with stomach distress, acid stomach and indigestion when real relief is so inexpensive.

Try it just once after a heavy meal and see for yourself how magically it works. Twenty-five regular doses in every package.

ISSUE No. 14—'32

Trees of Americas Found Related

Geologists Trace Kinship to Trees of 60,000,000 Years Ago

Princeton, N.J.—A definite relationship between the present forests of Central and South America and those which flourished in western North America some 60,000,000 years ago has been established as the result of a two-months research expedition through tropical jungles, according to a recent announcement by Dr. Erling Dorf of the Princeton department of geology.

On this research trip which was conducted under the auspices of the Carnegie Institution of Washington Dr. Dorf was accompanied by Dr. Ralph W. Chaney, of the University of California. The party advanced into the densest jungles by foot, boat, airplane and mule pack trains.

Working on the theory that the climate gradually cooled and dried in the tertiary history of this country, the investigators assumed that this climatic change drove southward those forests which once grew upon western lands, or else exterminated only the northern parts of these ancient woodlands By traveling southward several thousand miles, the members of the expedition discovered forests which grew in Eocene times in western North America and which since have been driven further and further south by the general cooling of the climate which culminated in the glacial epoch of the Northern Hemisphere.

The expedition also discovered that not only were the forests of the regions visited composed of primitive types of trees, but animals, too, were primitive types in comparison to those now found in North America. In detail the living forest bearing the closest resemblance to the Eocene forests of western America was found to be the temperate rain forest of the Venezuelan Andes, southeast of Lake Maracaibo. A close resemblance was also noted between the ancient forests of California and the living lowland forests of the Pacific slopes of Panama.

Tar Sand Deposits Found in Alberta

Ottawa—Mr. A. U. G. Bury, of Edmonton, told a committee of the House of Commons there were deposits of tar sands along the Athabasca River, north of Edmonton, containing "sufficient gasoline to supply the needs of the whole world for hundreds of years." He suggested the committee investigate.

Mr. Bury said Dr. S. C. Ells, of the Department of Mines, had told him he believed "it would be possible to process the deposits so as to produce gaoline at a commercial rate."

So Soon

A cloud seemed to overcast the bride's fatures, and with an anxious note in his voice the groom asked what was wrong.

"Oh-h-h!" Sobs began to shake her frame.

"What is it?" he asked. "Why are you crying?"

"B-b-because you are growing cold towards me. You don't love me any more!"

"Oh, my dear," he complained, "how could you say that?"

The girl glanced up to him.

"Well," she said, "you've looked out of the carriage window twice."

The occupant of a flat in London was troubled by the noise created by an actor who lived above. This fellow would come home after midnight and make his presence distinctly audible. So the man who lived below him called one day with an article he had cut from a newspaper. The article dealt with noisy neighbors and was handed to the actor without comment. The actor read it carefully, and suddenly beamed. "I say, old boy," he pegged, "can I have the loan of this for just five minutes while I show it to that clumsy devil upstairs?"

Uncle John was explaining to his little nieces the mysteries of bird migration. He described how the swallows and martins come from far-off lands in early summer, and return to the warmer climates when autumn comes along. Little Phyllis was very interested. "Do all the birds go away?" she asked. "No, dear," replied uncle. "Only a few of them." "Do the robins go?" "No, dear," answered uncle. "The robin just gets himself a new red waistcoat and stays." "There was a long pause, and then Phyllis said, thoughtfully: "I don't think that's right, Uncle John. I've seen heaps of robins wearing red waistcoats, but never one with stays!"

"H'm! I don't like the look of your wife, Mr. Blunt," said the doctor, after he had examined the patient.

"Neither do I," answered Blunt, "but she's a good wife, and looks after the children and the house well—so I can't grumble, I suppose."

The telephone operator answered an agitated summons from a call-box. "Oh, miss," came a tearful plea, "can I have my twopence back? Albert wouldn't speak to me!"

When a woman is lost in admiration she may be found in front of a mirror.

"PAINS ALL OVER ME"

Rheumatism Again!

And once again it was the "little daily dose" of Kruschen that conquered it. In fact, it made this sufferer "feel ever so well."

"I have been taking Kruschen Salts because of having pains in the back, head and joints; pains all over me. I felt tired going to bed, tired getting up. I was in a very bad way. I was laid up for over a month, and the doctor who attended me said I was suffering from acute rheumatism, and advised me to take Kruschen Salts. In less than 3 months I felt ever so well. I can't thank you enough for Kruschen Salts."—G. O.

The principle is this: Kruschen Salts drive from your body the uric acid crystals which cause your pain. Your pains ease; knotted joints become loose. Afterwards the "little daily dose" of Kruschen so stimulates the liver and kidneys that your inside is kept clean. Mischievous uric acid does not get the chance to accumulate.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c. package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorised to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

"Is it true that Margaret has a secret sorrow?" "Yes; hasn't she told you about it?"

CARTER'S LITTLE LIVER PILLS

Too Much ACID

MANY people, two hours after eating, suffer indigestion—as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia tooth-paste.

Before buying your new Electric Refrigerator, see or ask about the new Norge Electric Refrigerator, Canada's greatest refrigerator value. Made by Canadians in Canada, at Canadian prices to suit Canadians. Prices range from $195.00 upwards. Nearly every home or apartment in the city of Toronto is equipped with the new Norge Electric Refrigerator. "Ask the woman who owns one." Norge is complete with every modern feature and costs less to run than any other make.—ARNOLD M. JARVIS, Dealer. ap

Lindley Cook, of Iroquois, appears in the list of names as winner of a Parchment Certificate granted by the investigators of the Royal Canadian Humane Association in session at Hamilton for bravery shown recently.

Marking his appreciation of a pleasant association as Coach of the Morrisburg Hockey Team, Mr. Geo. D. Howith this week gave outward expression of his fine spirit and good sportsmanship, when he presented each member of the team with a silver "loving cup," bearing each player's monogram. Mr. Howith coached the boys in the early part of the season, during which time he achieved considerable success.

The members of the Matilda Women's Institute will entertain their husbands and gentlemen friends on Thursday evening, April 14th, at 8 o'clock in C I. Gilson's Hall, Brirnston. The roll call will be responded to by a "Health Habit." An address on health will be given by Dr. Hamilton. Each member is kindly requested to bring the following: A partner, two plates, 2 cups and 2 spoons. Please attend and enjoy the social evening.

* * *

There was no scarcity of bread in Prescott this week, when 200 loaves of underweight bread, seized by Officer J.W. Mills, from a baker named Davidson, of Brockville, were distributed to the poor of Prescott. Davidson appeared before Magistrate P.K. Halpin, Prescott, and was fined $10. and costs. Despite the seizure on Tuesday, it is alleged that he arrived in Prescott with another load of bread on Wednesday morning, which was also found to be underweight, but was allegedly allowed to return to Brockville.

* * *

A quiet but pretty wedding took place in Oxford Mills, at the home of Mr. and Mrs. Antonio Sisty, on Saturday evening, March 12th, when Forrest R. Wilson, son of Mr. and Mrs. Jas. Wilson, Iroquois, and Hilda Gertrude McMillan, only daughter of Mr. and Mrs. Edward McMillan, of Dixon Corners, were united in the bonds of holy matrimony by Rev. H.M. Beach. They were attended by Mr. and Mrs. Antonio Sisty.

Announcement has been made of the dates of departmental examinations for this year. Middle school examinations are the first to open, starting on June 20 and continuing until July 6th. Upper school examinations also begin on June 20 and finish on July 6, while lower school examinations begin on June 23 and finish on June 29. Entrance examinations will be held from June 22 to 24. For the first time, middle school students this year may be promoted on the year's standing, if attaining at least 66 per cent. Those who fail to make standing during the year can try the final examinations by paying the regulation fees.

IN MEMORIAM

In loving memory of my dear sister, Olive C. Steen, who passed peacefully away one year ago.
Sadly missed but not forgotten by Sister and Friends.

A 45-page booklet, at present on the press, when published should find its way into every home in Canada and the United States. The author, a patient of Dr. Locke, who was treated in the leading hospitals of the United States, without success, before coming to Williamsburg, passes on to his fellowmen his personal experience of the miraculous cure and benefit to humanity, at the hands of the man who has been properly termed the "Miracle Man." On the cover of the booklet, which is copyrighted, are several humorous sketches, while the contents come under the following headings: "Arches"; "Dr. Locke"; "History of Williamsburg"; "Miscellaneous Quotations" and "Happiness". The booklet will be completed in about three weeks, and contains no advertisements, the author depending entirely on the sales to defray the cost of printing and other expenses.

Announcement of a reduction in the price of tea of 10 cents a pound was made last night by two of the largest tea companies in Canada. The reduction has been contemplated for some time, officials said, but was postponed until announcement of the Dominion budget. A tax on tea was expected by tea merchants but the downward price revision followed as soon as it was learned there was no impost on the commodity.

The Toronto Mail and Empire, in a despatch from Ottawa, referring to a "vague possibility" that a St. Lawrence waterways treaty with the United States might be brought before the House of Commons this session for ratification, today quoted Prime Minister R.B. Bennett as saying "depending on the progress of events, there may be another measure for submission to the House with respect to which I cannot say more than that it is possible." The Prime Minister at the time was answering questions by Mackenzie King, leader of the opposition, regarding questions the House might expect to discuss during the remainder of the session.

* * *

The opposition of Quebec to the seaway project which has been effective to date is now revealed in all its arrogance and selfishness. The interest of the Quebec power trust are to be held as supreme and unchallengeable. If Mr. Bennett undertakes, in his well-known vigorous style, to put Mr. Taschereau and his power friends in their place he will find the people of Canada very solidly behind him. Nothing quite so impudent as Mr. Taschereau's attitude has been hitherto known in the relations between the provinces and the Dominion. —Winnipeg Free Press.

BROUSE—DEEKS

At the United Church Parsonage, Morrisburg, Tuesday April 5th, at half past seven in the evening, the marriage took place of Miss Eleanor F. Deeks, daughter of Deputy Reeve Alfred S. Deeks and Mrs. Deeks of River Road, Matilda Township, and Mr. Jacob C. Brouse, of Iroquois.

The bride, looking very pretty, was gowned in black chiffon velvet ermine trimmed, with hat to match. She was attended by Mrs. M.H. Tousaw of Iroquois, and Mr. M.H. Tousaw attended the groom. The Rev. Dr. Donald N. MacRae officiated.

After the bridal ceremony Mr. and Mrs. Brouse left on a trip to Toronto, and on their return will reside in Iroquois.

FEDERAL ELECTION WITHIN ONE YEAR?

Quebec, April 5—Federal general elections within a year is the "mot d'ordre" given to Liberal headquarters here, and preparations already are starting for a big fight. Generally it is thought that the St. Lawrence waterways, as well as the general situation throughout the country, will bring a call to the people by the Federal Premier. An attempt to return a solid bloc from the old Province is afoot, following the recent Provincial and Municipal successes.

PRESENTATION

A very happy event took place at the home of Mrs. Blanche Hanson on Friday evening, when about 90 guests, residents of Strader Hill and community, tendered a delightful reception to Mr. and Mrs. Cecil Hanson, and to make a presentation to the newly wed couple. They were presented with many beautiful gifts, including an occasional chair from Dr. P.A. McIntosh and Mrs. McIntosh, of Spencerville, and several cheques. During the evening, Mr. Clinton Stewart read the following address:

Dear Ada and Cecil:

It is with pleasure we are gathered here tonight to welcome you to Strader Hill as partners in life's voyage. We extend to you both our heartiest congratulations and best wishes for many years of happy wedded life. You, Ada, we welcome most warmly to our midst and would have you become one of us in work and play. We know that you will prove as helpful and loyal a companion as Cecil has always been. We trust you will accept these small gifts in the same spirit in which they are given, and will live many years among us to enjoy them.

Signed on behalf of Strader Hill and Community,
Mr. and Mrs. Bernice Strader,
Mr. and Mrs. Guy Strader.

Mr. Hanson replied on behalf of Mrs. Hanson in a few well-chosen words, thanking the guests for their kind remembrance. This part of the evening's programme was followed by refreshments, and the rest of the evening was spent in cards and community singing, which were enjoyed by all until past midnight, when the guests dispersed to their homes after singing "For They are Joly Good Fellows," and "Auld Lang Syne".

DR. ALEXANDER DEWAR

The death occurred in London, Eng., on March 19th, 1932, of Alexander Dewar, M.D., the result of an accident which took place last September when he was struck by a motorcycle. Dr. Dewar was born at Ormond, Ont., 71 years ago, the son of Peter Dewar and Isabelle McGregor. He received his high school education at Morrisburg, and taught school several years. Later he attended McGill University, where he graduated in Medicine. He practised in Coakshire, Que., a short time, then went to England in 1900 for a post-graduate course. While there he married Mrs. Emily Evelyn Eccles, remaining in Wales as Superintendent of the Hamadryad Seaman's Hospital in Cardiff until 1910, when he came to Canada with his family and practised medicine in Calgary, Alta., for five years. He returned again to England and practised in London until his death.

He leaves to mourn, his widow; three daughters, Mrs. (Dr.) Maxwell, Hilda and Iris; one son, Howard, all in England; three sisters, Miss Grace Dewar, Kenmore, Ont.; Mrs. D. Martin, Minneapolis, Minn. and Mrs. Thos. Beveridge, Calgary, Alta.; one brother, Peter M., also of Calgary.

The funeral was held in London, on March 22nd. Numerous floral tributes were received from doctors, patients and friends.

S. SALMON,

NAVIGABLE WATERS PROTECTION ACT

R.S.C. 1927, SEC. 140.

SUN OIL COMPANY LIMITED, hereby gives notice that it has, under Section 7 of the said Act, deposited with the Minister of Public Works at Ottawa, and in the office of the Registrar of the Registry Division of the County of Dundas, a description of the site and the plans of a wharf proposed to be constructed in the St. Lawrence River at or near the Village of Morrisburg, in front of lot No. 28 in the first concession of the Township of Williamsburg, in the said County of Dundas.

AND TAKE NOTICE that after the expiration of one month from the date of the first publication of this notice, SUN OIL COMPANY LIMITED will, under Section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa, for approval of the said site and plans and for leave to construct the said wharf.

DATED AT OTTAWA, this 16th day of March, A.D., 1932.

SUN OIL COMPANY LIMITED.
