Our Column

Gossip is a mean jade and gets a lot of us into trouble.

The Caw! Caw! of the Crow is now a familiar sound.

Bootlegging seems to exist even under Government Control.

Some people think twice before they speak; more speak twice before they think.

When you hear a story about someone, take time to wonder whether or not it is just gossip.

A sure sign of spring is when you see the man of the house beating the carpet in the back yard.

What a glorious spring day Monday was. One should almost feel the budding of everything that buds at springtime.

Weather conditions have made a decided and quick change in hockey and curling events. The next thing will be baseball and bowling.

We noticed that one of the first of the large trucks to pass through here from Ottawa this week was a "booze" truck, and well laden too.

Matrimony is like a game of cards. A woman has a heart, a man takes it with his diamond, and after that her "hand" is his unless she draws a club

Can you think of anything that gives you as much value for one and a half dollars as a year's subscription to the Winchester Press. Less than 3 cents a week, delivered.

During the past year Ontario spent nearly $155 000 per day, including Sunday, for intoxicating liquors. What a lot of clothing and provisions that money would buy for those who really need it.

A laugh will make you happy,
A laugh will make you gay;
A laugh will bring the sunshine
And drive the blues away.
Our souls will swell with rapture,
Our hearts will beat more strong,
For if we keep on laughing,
It cheers our friends along.

Ladies' Aid Group No. 1 will have a sale of Home Made Candy and Baking at the Needlecraft Store on Saturday March 1st, at 3 p. m.

Looks Like Election

It looks as though a Dominion Election would be held before next Christmas. Premier King intimated in the Commons that there was such a possibility. There are other evidences of preparedness, and political forces are being organized.

The First Robin

Mrs. Frank Hogaboam reported to the Press on Tuesday morning that she had seen a robin on Monday afternoon, Feb. 24th. So far as we know this is the first one to be seen in this district this year. Seldomh as the robin visited these parts so early in the season Possibly it made a mistake or else spring is just around the corner.

Just A Difference

The spring like weather of last week made possible the cleaning away from sidewalks the ice and snow accumulated during the winter, and as result there were many busy shovels, axes and other like implements on Monday. Many of the walks were made bare, and the improved condition was more noticable where there happensd to be short spaces left and where the necessary enterprise to clean away the ice was evident.

Took A Tumble

The Press Editor took a tumble on Tuesday morning. Fortunately no bones were broken, and more fortunate still there were few spectators. The walks had been cleared, but were wet, and the night frost made a coating of ice. He met another citizen coming down a side street and greeted him with "Nice Spring morning" when, without the slightest warning, his feet shot out and he went down ker-plunk on the hard walk. Like the Irishman he didn't mind the fall, but the sudden stop is what jarred most. Outside a few bruises no harm was done the editor and the sidewalk suffered no damage. The citizen very slyly remarked, "I hope, Mr. Editor, you haven't taken anything stronger than coffee this morning."

LOCAL AND GENERAL

Rev. H. B. Campbell of Arvida, Que, has received an unanimous call to the United Church of Hallville and Reid's Mills.

Owing to the fumigating of the Public School on Monday and many of the grown children made good use of their time in cleaning the snow and ice from the walks.

Mrs. Wesley Rice received the sad news of the death of her sister-in-law Mrs. H. I. Kittle, of North Syracuse, N. Y., who died Feb. 14th, at the home of her daughter, Mrs. M. Ross.

When we read of the floods, loss of life by drowning, and property destroyed by water and ice, in Westean Ontario, one begins to realize that there are times when Winchester is not a very bad place to live in after all.

There passed peacefully away at her late home at Elma, Ont., on Feb. 11th, Almira Nudell, beloved wife of Myron J. Weegar. The late Mrs. Weegar was born in 1857 at Nudell Bush. In the year 1897 she was married, and went to live at Elma, where she had always resided as a loving friend and neighbor to all she met.

The Presbyterian group of ladies, south of Winchester Station, entertained Winchester and Winchester Springs and Cass Bridge young people at the home of Mr. and Mrs. James R. Johnston at Cass Bridge. A pleasant evening was spent. Rev. Mr. Turner acted as chairman. A good program was furnished as follows:
Community singing. Mrs. J. Steward a Scotch recitation. Winchester Springs Orchestra. Solo, Mrs. Wm. Harper "My Mothers' Eyes." Community Singing Chairman's Speech Mrs. Rowat Kennedy a Reading. Orchestra. Miss Inez Kirkwood, Reading. Speeches, Mr. I P. McIntosh Howard Nesbitt and Mr. Wm. Dickson
Lunch was then served by ladies. This brought a very enjoyable evening to a close and all returned to their homes.

Curlers Bonspeil

If weather conditions continue favourable, a Curlers bonspeil is expected to be put on here on Monday next. Outside rinks are being communicated with. Valuable prizes will be offered.

Ernest Haley Wanted

Constable Helmer received a letter inquiring as to the whereabouts of one Ernest Haley, son of John Haley and Bridget Rourke, whose family originally came from Sussex, New Brunswick. He is said to be about forty five, and as he is heir to a sum of money, his solicitor is anxious to hear from him. If any reader knows anything about him they will do well to communicate with Constable Helmer, Wincheste.r

Vernon Women's Institute

The February meeting of the Vernon Women's Institute was held in the Orange Hall Friday evening.
The meeting opened with the singing of the Ode. The president, Mrs. Eddie Cowan, was in the chair.
There was a reading contest by the pupils from the six sections represented in the Institute The judges were: Mrs. Geo. Morris, Miss Mary Durant, and Miss Margaret McLean, and the prizes were awarded as follows: First, Allan Hawkshaw; second, Irene Acres; third, Jackie Newport; fourth and fifth, Jean MacDonald and Andy Anderson.

Four Months Hard Labor

The price paid for defying law is always high, but the unfortunate part is that the innocent as well as guilty often have to pay the price of one individual's wrong doing. Stewart DeClare, a young farmer with a wife and six children, has long been suspected of illegally dealing in liquor. But the law caught him at last and now he is in the County jail. The charge of handling liquor illegally was laid by Provincial Constable Jakeman. The evidence in the case was secured by our local Constable, Helmer. DeClare pleaded guilty and was sentenced to four months at hard labor in the County Jail.

Di Salvio—Reid

The marriage of Miss Stella E. Reid of Rochester, N. Y., formerly of Winchester, to Bernard Di Salvio, of Rochester, N. Y., took place on Saturday, Feb. 15th, at the home of the Rev. A. F. Duttweiler, pastor of the First Evangelical Church. The bride was attended by Miss Edna Kemnitz. John Di Salvio, brother of the groom, acted as best man. The bride wore blue crepe with hat and shoes to match and carried roses and Easter lilies. The bridesmaid also wore blue crepe and carried roses and sweet peas. After a brief trip to Canada, including Toronto, Mr. and Mrs. Di Salvio will live at 127 Delamaine Dr., Rochester, N. Y.

Car In Ditch

A big Paige Roadster driven by a young man from Toronto, went into the ditch at Jones' Hill about a mile west of Winchester on Sunday night last, and it took some time to get it out again. The young man had driven from Toronto on Sunday, and had to come to Morrisburg to get to Ottawa, as the Prescott Highway is at present closed. He missed the turn just west of the town, and at Jones' Hill went into the ditch. He sought the assistance of those living near-by, but horses were unable to pull the car back to the road. A phone message was then sent to Hart Melvin, and Hart never refuses help when he can give it, and with his able assistant, Ab. Johnston, and their wrecking truck, together with some headwork, the car was brought back to the road, but not without the assistance of many willing workers who had gathered to render what aid they could. As this all occurred at night and as the ditch was full of water and the snow very wet, there were a good many wet feet and soiled clothes when the work was completed. The young driver was wet to his knees, and went into a neighboring house to dry off before continuing his way to Ottawa. He was very grateful to those who assisted him, and his gratitude was not a mere "I thank you" kind either.

LOCAL AND GENERAL

A large oil truck went into the ditch about two miles north of Winchester on Tuesday night.

The new United Church at Spencerville was opened on Sunday last and there were large congregations at both services.

Boils, Pimples or Skin Eruptions quickly disappear if you take Gallagher's Blood Purifier, sold by B. F. Smith, Winchester.

The flood of the Nation at Cass Bridge, has not been serious so far this season, but there is yet plenty of time for it to mis-behave.

Rev Mr. Davies and Mrs. Davies went to Ottawa to-day to bring home their little daughter Betty, who has been in the hospital there for several weeks.

There will be a celebration of Holy Communion next Sunday in St. Matthias' Church at 10 30 a. m. Service will be held on Ash Wednesday at 7.30 p. m.

The annual social evening of the Women's Institute will be held in the Town Hall to-morrow night, and a very pleasant time has been planned for those who will attend.

The many friends of Mrs. Martha Reid will be sorry to know that she has been seriously ill during the past week at the home of Mr. R. Rennick. She has not fully recovered yet.

There passed peacefully away, after a few hours' illness, Miss Keziah Cickey, at her home west of Williamsburg village on Saturday morning, February 15th, 1930, in the 86th year of her age.

There are still a few cases of Scarlet Fever in town, bnt none of a serious nature, and the matter is being kept well in hand by our doctors. In neighbouring towns and villages a number of cases are reported, and in fact the epidemic seems to be all over the Province.

The men of Inkerman United Church will hold a "Batchelors Supper," on Tuesday evening, March 11th. Supper will be served at 6 30 p. m. followed by an address from Rev. T. W. Jones of Montreal. Everybody welcome.

While cleaning some chains on Friday at the Maple Leaf Condensery, where he is employed, Mr. Henry Clarmount had the misfortune of having his hand and arm very badly burned, when some gasoline which he was using exploded. It is understood that one of the men lighting his pipe near-by, carelessly threw the match near the can of gasoline, which exploded and caught fire to Mr. Clarmount's clothing. Mr. Clarmount was taken to his home and Dr. Casselman called to dress his wounds. He is getting along nicely, although the burns on his arm and hand are very painful.

Snow Plow Clears Way

The big Government snow plow, used we believe on highway between Ottawa and Prescott, came out from Ottawa on Thursday last and went through to Morrisburg on Friday. It is a powerful bit of machinery, and can tackel with comparative ease most of the snow drifts. It made a fairly clean road way through the drifts between the County boundry and Winchester Springs, and cars and trucks are now able to travel north and south. But the road is sloppy in many places, and a man has to be a good driver and should be a careful driver to use them. The big plow returned to Ottawa on Saturday.

Celebrate 90th Birthday

Mr. Joseph Boyd, St. Lawrence Street, who with Mrs. Boyd, came to Winchester about a year ago to reside with their son, Mr. W. J. L. Boyd, celebrated his 90th birthday on Wednesday evening, when a few relatives and friends gathered to offer congratulations and best wishes. Those present were his brother, John and Mrs. Boyd of Merrickville, his nephew, Fred, and Mrs. Boyd of Merrickville; Mr. and Mrs. Wilson of Osgoode, Mr. and Mrs. Ed Shaver and Rev. and Mrs. Waddell of Winchester. Mr. Boyd received, besides a congratulatory letter from the Official Board of the United Church, other messages of good will. Mr. Boyd was born at Merrickville and continued to live there with his wife and family until he moved to Winchester a year ago. He enjoys good health and Mrs. Boyd, who is 76 years of age is active and well and enjoying the best of health.

Tea and Money Shower

A delightful and successful Tea and Money Shower was held at the home of Miss Mary Empey, Centre St, under the auspices of the Women's Missionary Society of St. Paul's Presbyterian Church. The hostess was assisted in receiving by Mrs. Wm. Johnston, President of the Society, and Mrs. W. D. Turner.
The spacious rooms were bright with mixed cut flowers, hyacinths, tulips and daffodils, while the tea table was very attractive with silver basket of spring flowers and dainty yellow candles. Tea was poured by Mesdames C. Robinson, G. Wilson, R. Empey, B. McCourtie, Emmerson and A. Summers.
Arrangements for the tea were convered by Mrs. M. Moffatt, assisted by Mesdames L. Kinkaid, R. Kennedy, A. Smith, G. Angus, E. Munroe, B. Smith and H. Hay. The guests were ushered to the tea room by Mrs. Boyes and Miss Margaret Holmes. Money donations were received by Mrs. A. Edgerton and Miss Grace Irving.
During the afternoon and evening delightful instrumental solos were rendered by Miss Helen Smith, A. T. C. M. A vocal solo by Mrs. G. Payne was very sweetly rendered and added much to the occasion.

SOCIAL AND PERSONAL

Dr. Sherwood spent Sunday with his parents at Smiths Falls.

Mr. James Barkley of Ottawa, spent Wednesday with his parents here.

Mr. and Mrs. T. J. Wylie are spending this week-end in Ottawa visiting friends.

Miss Elinor Durant of Ottawa, spent the last of the week at her parental home here.

Mr. W. Lozott of Cornwall, spent the week-end with Mr. and Mrs. Roy Annable.

Mrs. Roy Annable spent Wednesday with her aunt, Mrs. Freen Hummell of Chesterville.

Mrs. Harold Patterson of Merrickville, is spending this week with Mrs. Annie Hughes, who is ill.

Mrs. Ella Fetterly of Russell, returned home after spending the past month with her daughter, Mrs. Roy Annable.

Mrs. J. Dixon and Mrs. J. H. Faith attended the funeral of the late A. B. Hough at Avonmore on Friday last.

Mr. N. W. Beach is in Toronto this week attending the Convention of the Temperance workers for the Province.

Mrs. Catherine Johnston, of Cardinal, spent the week-end the guest of her grand-daughter, Mrs. W. F. Workman.

Mrs. Geo. Barkley left on Mondy for Norwood, Ont., to spend a few weeks with her daughter, Mrs. Harry Clements.

Mr. L. W. Mullov of Iroquois, Miss Pear Mulloy and Mr. Will Dickson of Waddington, visited their sister, Mrs. Reid on Sunday.

Reeve Nesbitt, and Mr. Robt. McVey, Township Road Supt. are in Toronto this week attending the Good Road Convention, as delegates from the Townships.

Mrs. George Parish and daughters, Margaret and June, of Rosedale, spent the week-end with the former's parents, Mr. and Mrs. H. S. Carkner, Maple Ridge.

SPRING MILLINERY OPENING

The Ladies are invited to come and see hats of genuine distinction Friday and Saturday, March 7th & 8th.

Misses Irving and Quart.

Mrs. William Hamilton Dies Suddenly

The community surrounding Chesterville was greatly shocked on Wednesday morning when it became known that Mrs. William Hamilton, who had resided about a mile north of Chesterville, had passed away after a few days illness of pneumonia, in her 75th year. Mrs. Hamilton had lived the greater part of her life in the township of Winchester, and has a large circle of friends. She was highly esteemed in her community, and was an ideal wife and mother. Besides her husband, she is survived by two daughters, Mrs. Geo. Smith of Maple Ridge and Mrs. Melvin Marcellus of Morewood; also two sons, Thomas of Maple Ridge and Willie at home. Several from Winchester expect to attend the funeral service which will be held in the United Church, Chesterville, to-morrow afternoon at 2 o'clock.

Late Merrick Durant

On Friday, Feb. 21st, there passed away at the home of his daughter at Ottawa, a former well known and much respected resident of Winchester, in the person of Mr. Merrick Durant, who was in his 87th year. For many years Mr. Durant was an active business man in Winchester and took a great interest in all our municipal affairs, having served faithfully on the Municipal Council and School Board for many years. About eight years ago he moved to Ottawa but was a frequent visitor to Winchester, his last visit here being last fall. He was then just recovering from an illness, but was active and met many of his old friends. He was well known throughout this district and once resided in Williamsburg.
In religion he wes a member of the Methodist Church and for many years served on its official board. He was married on January 15 1867 to Carolina Shirley, who predeceased him eight years ago.
A funeral service was conducted at Burney and Son's Undertaking Parlors, Ottawa, by Rev. Dr. J. W. Woodside, of Chalmer church. The cortege proceeded to Beechwood cemetery. Included in the numerous floral offerings received by the bereaved family was a tribute from Henderson Lodge A. F. and A. M., of Winchester. The chief mourners were: two sons, M. A. Durant, Smith Falls; G. B. Durant, Ottawa; four daughters, Mrs. G. M. Stallmayor, Poughkeepsle, N. Y.; Mrs. J. E. Cook, Calgary, Alta.; Mr. Wesley Fulton, Chesterville; and Miss Agnes L. Durant of Ottawa.
In the spring the remains will be interred in the family plot at Maple Ridge.

Births

At Winchester, on Monday, Feb. 24th, 1930, to Mr. and Mrs. Harold Levere, a daughter, Audrey Hazel.

At Norwood, Ont., on Sunday, Feb. 23, 1930, to Mr and Mrs. Harry Clements (formerly of Inkerman) a son.

CARD OF THANKS

I wish to express my sincere thanks and appreciation to all those who were so kind during the illness of my wife, also to the Ladie's Aid of the Presbyterian Church and Holly Rebecca Lodge for the beautiful flowers sent to the hospital.
Geo. E. Cobourn.

In Memoriam

Mary Christie Ker entered Eternal rest January 25th, 1928, and her beloved husband, James Grahame Ker, on March 20th, 1906.

A HYMN OF COMFORT

"It singeth low in every heart,
We hear it,—each and all,
A song of those who answer not,
However we may call:
They throng the silence of the breast,
We see them as of yore,
The kind, the brave, the true, the sweet,
Who walk with us no more.

It is hard to take the burden up,
Since they have laid it down,
They brightened all the joys of life,
They softened every frown:
It is so good to think of them,
When we are troubled sore;
Thanks be to God that such have lived
Though they are here no more.

More homelike seems the vast unknown
Since they have entered there;
To follow them were not so hard,
Wherever they may fare:
They can not be where God is not,
On any sea or shore;
Whate'er betides, thy love abides
Our God, forevermore."

Inserted by their daughter,
Leona M. Ker B. Sc. M. A.

TRUE GREATNESS

Where good thoughts germinate there is the growth of true greatness and goodness.

Farm Notes

Cheese Production Decreased Last Year

Cheese made in this country has shown steady improvement year by year since 1893, when grading began. Seven years ago only 78% of the cheese made was good enough to go into the first grade. Of the 1929 yield over 93% was of the first class These figures were brought out by Mr. Joseph Burgess, Chief of the Division of Dairy Produce in the Department of Agriculture at Ottawa, before the Eastern Ontario Dairymen's Association.

The season was marked particularly in Ontario and Quebec with a decreased production owing to the low yield of milk due to poor pasture and shortage of water consequent upon continued dry weather. The cheese graded for the year 1928 showed a decrease of 293,000 boxes or about 18%. Most of this decrease occurred after the beginning of August and increased month by month. In the province of Ontario, where there are 730 factories in operation, the first grade amounted to 95.5% of the whole, which was intensely gratifying. Referring to this situation Mr. Burgess maintained that the co-operation of the producers with the makers was an important factor in this happy result. Mr. Burgess stressed the importance of well built curing rooms. He referred to the excellence of the curing room at the Cloverdale factory in Prince Edward County, which has the largest output of any factory in the province east of Toronto. The construction of this curing room, Mr. Burgess stated, seems to be the best that could be secured and cost something over $2000. The saving from the controlled temperature in this room is estimated to have been fully $1000 as a result of the saving in shrinkage and the better quality of the cheese turned out. Mr. Burgess strongly recommends cheese factory owners to see to it that they have the proper curing rooms.

Hatching Dates on Egg Production

The dates on which chicks are hatched are believed to have some influence on their production of eggs as hens the following autumn. A project to study this question was undertaken at the Summerland, B.C., Experimental Station of the Department of Agriculture. It was found that the eggs from each bird of the March hatch returned approximately thirty cents more than each bird of the April hatch, and fifty-two cents more than each bird hatched at the end of April. Late hatched birds, however, have been shown to have an advantage the second season although not enough to make up for the loss the first year. According to the Superintendent of the Station when once the birds settle down to work they gained a little each month on the early hatched birds with one or two exceptions.—Issued by the Director of Publicity, Dom. Department of Agriculture, Ottawa, Ont.

Cleaning Up Canadian Herds

Tremendous strides have been made in Canada towards the eradication of tuberculosis in cattle. Fifteen years ago the Department of Agriculture at Ottawa began the testing of cattle as the beginning of a policy which has so developed as to have removed thousands of diseased animals from the farms throughout the country.

A booklet recently issued by the Department of Agriculture at Ottawa, bearing the title "Bovine Tuberculosis," describes the main plans that are pursued by the Health of Animals Branch.

By the Accredited Herd plan, when a herd has passed two annual or three semi-annual tests without a reactor, the herd is designated a Tuberculosis Free Accredited Herd. This plan is confined to herds that are wholly or in part purebred animals.

In defining the Restricted Area Plan the leaflet states that when two-thirds of the cattle owners of a definite area have signed a petition for the establishment of a restricted area, and the petition has reached the Minister of Agriculture at Ottawa, through the Minister of Agriculture of the provinces interested, testing and cleaning up is undertaken.

Under the various policies administered by the Department for tuberculosis eradication one milion four hundred and sixty-nine thousand, seven hundred and sixty-nine cattle had been tuberculin tested up to the eighth of October last.—Issued by the Director of Publicity, Dom. Department of Agriculture, Ottawa, Ont.

HENRY'S SHORTHAND SCHOOL
Ottawa, Ontario
No school in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa Schools to come to it.
Therefore, it is not surprising that business men, in advertising for stenographers should specially say, "Graduates of Henry's School preferred."
For particulars about our course, write
D. E. HENRY, Director.

Buying Ties

Before entering the shop decide on the color of the tie wanted, otherwise the assortment displayed is apt to be confusing.

If a narrow knitted tie is favored, it should be closely woven and the silk soft. Then it will not readily crease and will prove hard-wearing.

In an open-end tie, good quality silk is soft and supple, will give to the touch and has a subdued sheen. A poor quality silk is often shiny, stiff and crackly and is liable to split.

The bias tie is made in every conceivable variety of silks and designs. If the large end sets flat, this denotes expert cut and good make, while the contrary is shown by slight wrinkles.

The pattern on a tie is an important matter to the average man. A wise choice is a small, neat, and well-blended design on a dark background. If there is any doubt, a dark tie is always a safe choice.

The majority of men prefer quiet colors. The only exception is the Regimental or Club tie, which should invariably be purchased from well-established shops to ensure the correct blend of colors.

"Here's a story which says the heroine thanked him with a look."

"I s'pose her gown was so tight that she couldn't trust herself to speak, eh?"

Dashing Sports Woolen Dress

All Smart Folks Are Wearing Beneath Their Fur Wraps for Street

By ANNETTE

It's unquestionably chic in horizontal weave in yellow-beige and brown coloring.

It's a one-piece straightline type that is severely simple yet so utterly smart, lengthened with a flounce in double box-plait effect, that curves downward toward the back from high point at centre-front.

A brown suede belt holds in fulness at normal waistline.

The notched rever collar and deep turn-back flaring cuffs are of plain yellow-beige woolen with machine stitching in two rows of brown around outer edges, which gives a nice tailored finish.

Brown bone buttons down centre-front carry out vertical line and give length to figure.

Style No. 193 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. In the medium size, it requires 3½ yards of 39-inch material with ¾ yard of 35-inch contrasting.

Flat silk crepe is well liked for sports and is attractive in dahlia-purple shade.

Wool jersey in hunter's green, midnight blue wool crepe, plum shade in self-checked covert cloth and gypsy red canton crepe smart.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

England's Green and Pleasant Land

Horace A. Vachell in the London Morning Post (Cons.): Nearly everybody familiar with the England of five-and-twenty years ago deplores the changes that are taking place even in our more remote rural districts. Very few applaud the almost forgotten speech of a democratic statesman, still living, in which he predicted (and hoped) that our lovely countryside would be "embellished" (his word) by milions of small villas. It is increasingly difficult to find what is called "unspoiled England." Even the famous beauty spots are menaced. Historic houses are being pulled down or turned into public institutions.

No More Rust

New Uses are Being Found for Stainless Steel Every Day

When the British Industries Fair opens at Olympia a good many visitors will be as much interested in the new Empire Hall as in the exhibits. This great building, which nearly doubles the accommodation of the old Olympia, is, indeed, one of the best advertisements that British industry could have.

At the end of March last year a number of houses with gardens were still standing on the site, and some of them were still occupied. The building of the new hall started on April 1st, building and excavation going forward at the same time. All records in construction have been broken, and two of the floors—there are to be four in all—will be used for the fair.

It has been a case of real hustle. The average rate of steel construction work in London is 100 tons a week; in the case of the Empire Hall the rate has been 100 tons a day, and the whole of the steelwork has been erected in seven months.

Towed Round the World

This remarkable feat affords another proof of the way in which the use of steel is revolutionizing building methods. But we are really only at the beginning of the new Age of Steel.

One of the things that will be noticed at the Empire Hall is the fact that polished stainless steel is used for all the interior fittings, including the turnstiles, and for the lettering, "Empire Hall," above the entrance. This stainless steel is of special interest, for the new varieties of stainless steel now being produced are capable of a thousand different uses.

It wouldn't be any exaggeration to say that stainless steel can now be turned out which is as different from the old kind used in ordinary stainless cutlery as cheese is from chalk. You can now get steel that is proof against all corrosion in a way never previously known.

A good example of the qualities of the new stainless steel is afforded by the Strand front of the Savoy Hotel. True, the London atmosphere can produce the appearance of rust even on this sort of steel. But it is appearance only—the reality of rust has been banished. For it has been proved that such strains are merely on the surface. They are due to the sulphur in the air, and regular washing with soap and water is all that is needed to preserve the original high polish.

Withstanding the corroding effects of the London atmosphere would seem a supreme test for any building material, but the new stainless steel has been subjected to other tests as well. A specimen of it has been towed round the world in the wake of a liner—a fairly thoroughgoing test.

In industry, stainless steel is proving its worth, and more and more use of it is being made for domestic purposes. One of the latest ideas in this line is the use of stainless steel plates for the side of gas stoves. It is expected that it will prove more satisfactory for this purpose than enamel.

For Whales and Cathedrals

But the uses of stainless steel are innumerable. It has recently been employed for strengthening the dome of St. Paul's Cathedral. Chemical works are now substituting it for porcelain in making the containers for certain acids, with a consequent big saving in maintenance costs. It has proved its worth as the material for the white traffic marks let into our roadways at certain points in order to guide vehicles and diminish the risk of accidents.

Even the biologists are using it. The movements of whales in the world's seas are now being studied, the method adopted to keep track of them being the shooting of metal disks into their hide. These disks are made of stainless steel. All this is of particular interest to Canadians because nickel from Sudbury is necessary for the good action of stainless steel.

How to Reduce

To get rid of fat, adopt a proper diet, prescribed by a competent physician, and under his supervision.

This is the simple method announced by the National Better Business Bureau, after consultation with a number of obesity specialists. Below are the answers to the Bureau's questions, substantially as quoted from The Long Island Medical Journal in Medical Insurance (Reno, Nev.) We read:

"Treatment for obesity can not be scientifically and safely prescried without a personal examination of the patient by a competent physician. It is essential that the cause of the excess deposit of fat be determined in order that suitable treatment may be prescribed.

"There are two distinct groups of overweight persons:

"First, there are those who eat more food than they need, and who are not sufficiently active to use up this surplus fat through exercise. This group constitutes the greater number of overweight persons. The safe and sane method of control under such conditions consists of diet and exercise.

"The second group is composed of those suffering from glandular obesity. Each case requires individual study and intelligent diagnosis and treatment. Reducing remedies may be administered by physicians, but only after careful diagnosi. and under personal observation and supervision."

It is true, we are assured, that persons who are definitely over-eating could with a reasonable degree of safety reduce their own diet without supervision:

"However, it is desirable for any reduction in diet to be made rationally in order to insure proper balance. A dietitian can advise a diet that will be low in fat-making material, or a dietitian can arrange a combination of foods which will be nutritious and not have tendencies toward the deposit of excess fat, but only a competent physician can determine what is technically wrong with the human anatomy as regards this disturbed functionig ad depositig of excess fat or its safe reduction.

"Obesity can be neither safely nor scientifically treated except under the supervision of a person with an intimate knowledge of the human body and its processes—that is, a physician. Under any reducing regime, secondary disease conditions may arise, which, if unrecognized, may lead to permanent disability, or even death."

Periodical examinations by a physician are recommended, because it is desirable that the patient's condition be carefully watched:

"Some treatments for obesity carry with them a definite risk to the heart and kidneys, and these organs need careful watching. We are advised that numbers of obese persons have diabetes often unsuspected by them.

"It is also possible for the beginning of tuberculosis of the lungs to exist in a fat person, and to be aggravated by reducing treatment. The ... must provide certain essentials during the period of reduc... the medical examiner must know ... ther the health is endangered by lack of these and general undernutrition.

Improper Housing As Bad as Disease

Children, Like Plants, Dependent Upon Surroundings

(This is he sixteenth of a series of Health Articles prepared by the Canadian Social Hygiene Council).

Let us consider to-day those people who have not such comfortable homes as the average reader of this paper. The man who works in the mines, and then goes home to a little hovel to sleep; the man who works with his hands in the city, and then returns to a tentment house that really isn't a home at all, but merely a roof over his head—that is the type of worker that we have to bear in mind when we take up the housing problem.

It has been definitely proven after long and concentrated study that defective housing is an essential factor in interfering with the proper growth of children, and in the general health of any country.

We can take care of our food supply, and conquer germs, and do everything else necessary to conserve health and prolong life, but we can count some of our time wasted unless we give a great deal of attention to what is not only one of the most important, but one of the hardest problems to handle—housing.

Overcrowding, lack of cleanliness, and improper ventilation are the three big enemies of poor housing. Rickets among children is the most prevalent disease in the slums of all large cities. Sunlight is the almost certain prevention and cure of this disease. Defective housing is equally certain one of the predisposing causes.

It probably does not occur to most people that the kind of house one lives in has much to do with the kind of teeth in one's head. Yet doctors have discovered that invariably when they take several hundred children, who lived under better class conditions and compare them with several hundred children living under slum conditions, the teeth of the badly housed children are much inferior to the others.

In order to show how seriously defective housing arrests the development of what otherwise might be a normal and healthy child, let us trace the developments of a rickety child, always bearing in mind that in the great majority of cases this very prevalent disease is directly attributable to the housing conditions of the victim.

Up to the time when a child is two years of age, the mental condition of the rickety child is painfully subdued. As a rule it is constantly exhausting its energies trying to get enough air into its lungs to live. Its activities are sometimes confined entirely to changes in the nervous system, over which it has no control, such as convulsions. Walking is delayed, speech is slow in coming, and when it does come, sometimes halted and marked by stammering. Mental development is slow.

When a rickety child reaches the school age, it shows backwardness which sometimes lasts for quite a few years. It lacks the power of concentration. In extreme cases the child, finding himself below normal, is apt to become moody, bad-tempered and troublesome.

A peculiarity of the rachitic condition is that the backward child of about seven years of age is apt to take a spurt in its mental activities and seem to be brighter and more able to grasp the teachings it receives in school.

This fact puzzled the authorities for some time, particularly when they were being constantly told by mothers that their children who had been delicate the first five years of their lives suddenly took a turn for the better. Finally the doctors reasoned it out, and they came back to the same problem of housing again.

These children had been kept indoors, largely because their mothers were working women. The long winter months had taken their toll helped by the badly ventilated, crowded homes. When the children were allowed to escape from their captivity and sent to school, the change came. The sunlight and fresh air that came into their lives with their new freedom had done the work. The rickety children were getting better, although they seldom reach the standard of children who escaped th disease.

In Australia, where there are great open spaces, the disease of rickets has been found very infrequently. South Africa has had the same experience. Now, as Australia and South Africa become more thickly populated, and the cities more crowded, the disease of rickets is beginning to show its head.

Rickets, however, is not confined entirely to the poorest sections. It is found in wealthy homes too, but when it is, the cause generally lies in the fact that the parents have denied their children the proper amount of sunshine and fresh air. In other words, they have coddled them inside the house. Rickets is the inevitable result, whether the food is good or bad.

With poor housing, rickets, anaemia, defective teeth, are companions. Tuberculosis is also closely associated with the problem. One city investigated the causation of tuberculosis and found that over six times as many cases emerge from homes of one room as in homes of four rooms or over.

An idea of the magnitude of the housing problem thta faces us can be found in the statement that about seven million people can be found in the United Kingdom alone who live in houses of three rooms or less.

Our aim as Canadians who are proud of our country and its people should be to endeavor to help and improve conditions for those people who have to live in houses that are detrimental to health. It is a question of broad legislation and requires a great deal of study before it can be handled, but everybody should lend a hand.

Movie Recipes

Pauline Frederick, the Warner Bros. screen star, should write a book on the art of being a perfect hostess. Players working in a picture with the star are often invited to enjoy the hospitality of the Frederick home when the day's work is finished. One of the most delightful phases of her charm as a hostess is her ability to concoct an appetizing repast on short notice. Informal breakfast and late supper parties are favored by her and cooking is her hobby.

Here are a few of her favorite recipes:

Date and Nut Muffins

One cup hot water, one cup sugar, one teaspoon butter, one teaspoon soda, one egg, one cup chopped dates, one cup chopped walnuts, two teaspoons baking powder, one and one-half cup flour.

First add the soda to the hot water and cool. Cream slightly the sugar and butter and add the egg. Beat the three ingreients with an egg beater. Add the dates and nuts and mix well. Add the water and soda and the flour, after sifting the flour with the shaking powder.

Half fill the muffin tins and bake in a moderate oven fifteen to twenty minutes. When cool ice with Brown Butter Frosting.

Brown Butter Frosting

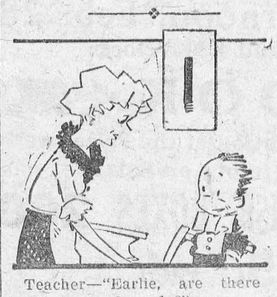
Two tablespoons melted butter, one tablespoon of cream or top milk, a few drops of vanilla and enough confectioneer's sugar to make the icing of the right consistency to spread.

Currant Sauce

To be served with baked ham. Melt two and one-half tablespoons of butter and brown in it two tablespoons of flour. Add one cup of brown stock. If you haven't this, dissolve some bouillion cubes. Also add one-third cup of curant jelly. Cook until thickened. A tablespoon of sherry flavoring adds to this sauce.

Macaroni Salad

Boil macaroni in the regular way and when cooked run under cold water. Cut macaroni into fine pieces (for this reason, do not cook too much). Chop one onion and a generous amount of celery. Mix macaroni, onion and celery together and season well. Put on crisp lettuce leaves and sprinkle with grated eggs and paprika.



Teacher—"Earlie, are there any feathered quadrupeds?"
Earlie—"Yes, ma'am."
Teacher—"Name one."
Earlie—"A feather bed."

CHINESE PROVERBS

Italian bachelors are protesting against regulations imposed on them by Mussolini. But to the married man a Mussolini more or less makes little difference.

ADAMSON'S ADVENTURES—By O. Jacobsson

"This Year, Next Year—"

"What is My Chance in the Marriage Market?" Every Girl Asks Herself this Question in Her Secret Heart. And Here are Some Official Figures that Will Help Her to Answer it.

Nowadays those mysterious people, the statisticians, are able to tell us with deadly precision many things formerly left to guesswork.

For example: At what age has a girl the best chance of finding a life-mate? From what age does her chance become more remote? When may she resign herself to lifelong celibacy?

By carefully compiling figures the experts can give fairly precise answers to these and other very important questions.

Statistics prove conclusively that the age when a girl has the best chance of marriage is twenty-five.

The odds that a girl of twenty will live and marry within the next five years are exactly even.

The odds that a girl of twenty will survive ten years and marry are two-thirds in her favor. But later on the chances are less.

You can put the matter in this way. The chances of the twenty-year-old girl marrying are two in three. For girls of twenty-five the odds are one in two; and of those of thirty the odds are three to one against.

Points We Must Consider

These are the figures to-day. Fifty years ago they would have been regarded as fantastic. During that period two factors have come prominently into play, bringing about far-reaching changes.

First, economic pressure, or the greater difficulty experienced by men in establishing themselves in early life, has resulted in a general postponement of marriage to a later period.

The second factor is the greater all-round chance of attaining a decent life-span. The battle for life has become more acute, but disease has been thrust back; the death-rate declines as the marriage age increases.

There is also a third factor making for later marriages; the independence of the wage-earning girl. She often earns as much as, sometimes she earns more than the man she wishes to marry and who wishes to marry her.

"Why marry Jack," she asks, "when I am earning a better salary than he is?"

This very common attitude is quite understandable. But independent girls who really wish to marry one day would do well to remember the cold figures of the statisticians. After twenty-five their chances are steadily declining.

A peculiar fact has been revealed by the probers into the secrets of marriage chancces. It is that while a girl's best chances of finding a partner decline after she is twenty-five, the reverse is true of men. The man of thirty has a greater chance to survive and marry than the man of twenty-five.

In the great majority of cases men choose brides younger than themselves. An old adage arrives at the ideal respective ages of husband and wife as follows. Halve the man's age, add seven years, and you have the ideal age for his wife.

Thus a man of twenty-five would marry a girl just under twenty; a man of thirty would mate with a girl of twenty-two; forty with twenty-seven.

This Victorian standard, however, would scarcely be accepted by most people nowadays.

Having arrived at the ages when the chances of marriage are at their best, let us turn to the subject of happy marriage.

There are no exact statistics available as to the relation between happy marriage and marriage age. But there is abundant evidencce of what factors militate against happy marriage and lead to disaster.

In the divorce court the woman with two or more children figures less frequently than the woman with none, while the woman with a large family by modern standards—that is, four or more children—navigates the waters of matrimony with more skill than her less prolific sisters.

It is very seldom indeed that a woman with six or more children appears in the divorce court, either as petitioner or respondent.

The conclusion to be drawn from these facts is the obvious one; childless marriage has less chance of success than one where children are in the nursery.

Women Who Wait

The tendency to-day is for a girl to demand a higher standard of living than did her Victorian grandmother. She prefers to wait three or more years rather than start marriage on a slender income. In short, she agrees with the cynic: "When poverty comes in at the door love flies out of the window."

But this adage does not stand the test of experience. The proportion of poor or not-very-well-off couples who come to grief is smaller than that among those who enjoy good incomes. These facts suggest that worldly success and married happiness are not in any way related. It is when idlenes, selfishness and discontent come in at the door that love flies out of the window.

What are your marriage chances? They are largely what you make them. The best come with youth and depart with yooth.

Filling the Gaps

Scholars Who Have a Little Knowledge and a Lot of Imagination

At a recent examination children were set to fill in the gaps left in very well-known quotations and common sayings. The results were in some cases almost startling. Here are a few examples:

"You cannot make a — out of a sow's ear." Answer: "Rasher."

"Caesar's wife is above—" Answer: "Forty."

"There's many a slip 'twixt the cup and—" Answer. "The third round."

"Do unto others as—" Answer: "They do to you."

"What there's a will there's—" Answer: "A row."

"Take everything with a grain of —" Answer. "Sense,"

"Sweet are the uses of—" Answer: "Sugar."

"Uneasy lies the head that wears —" Answer: "Curling pins."

"Music hath charms to soothe—" Answer: "Babies."

"A bird in the hand is worth two —" Answer: "And sixpence."

"Men must work and women—" Answer: "Go to the pictures."

Those Lazy Lollards!

History seems to be the happy hunting-ground of the schoolboy howler. Here is a new light on an event of the past:

"Magna Charta was good and kind and everybody liked her. She was strong."

Another child, asked to describe some of the hardships of the Crusaders, said that many of them died of salvation. Another young genius tells us that "In 1620 the Pilgrims crossed the ocean, and this is known as the Pilgrim's Progress."

On similarly original lines are the following historical judgments: The three estates of the realm are Buckingham Palace, Windsor, and Balmoral. Julius Caesar was renowned for his strength; he threw a bridge across the Rhine. Martin Luther did not die a natural death; he was excommunicated by a bull. Lollards were lazy people who aways wanted to rest up against something. Wat Tyler led the pheasants' revolt; he was himself a pheasant. The cause of the Peasants' Revolt was that a shilling poultice should be put on everybody over sixteen. Queen Elizabeth's face was thin and pale, but she was a stout Protestant. John Bright is famous for an incurable disease.

Revising the Bible

Geography probably comes next to history as a prolific parent of howlers. Here are a few new views of the world in general from the small boy's point of view.

In India a man out of a cask can't marry a woman out of another cask. he Sublime Port is a good wine. Latitude tells you how hot you are, and longitude tells you how cold you are. Stirling is noted for its fine silver. Glaciers spread a murrain over the land. Isosceles triangles are used on charts to join up places with the same weather. From Australia we get wine made from a bird called emu.

Biblical knowledge is sometimes a bit mixed, and, though revised, it is by no means authorized. One youngster, in his religious knowledge paper, wrote. "Bathsheba was the woman who tied David up with her girdle." Another said: "The words 'Would God I had died for Thee' were uttered by David after he had murdered Uriah and married his widow." A similar youthful theologian observed: "Abner killed himself by falling on his own spear while being chased by Dorcas." Another ventured: "Publius was the son of the man who was cured of Proxy by Paul—a very terrible disease." And lastly: "The Pharisees are peope who like to show their goodness by praying in synonyms."

The bigger the bank roll, the tighter the rubber band.

Tells of Lindy's Air Circus Days

Details of Famous Flier's Career Revealed by Pal

Only three years before Colonel Lindbergh accomplished his epochal trans-Atlantic fight, the world's premier aviator made a precarious living, in a financial as well as a physical sense, by "barnstorming" and putting on one-plane air-circuses in the small towns of the Middle West and Southwest.

Intimate memories of those carefree and romantic days, both thrilling and humorous, are told by Randy Euslow, now also a famous pilot, who was "Slim's" closest pal and business partner during that period, in the October issue of Popular Science Monthly.

"From Iowa we barnstormed down into Missouri and then over into Illinois," he writes, "spending most of a year (1924) at it. Slim was the cleanest fellow I ever knew. He didn't drink or smoke or swear. He had more nerve in the air and could do more with an old crate than any flier I've seen. The greatest exhibition of nerve in the air I can recall was the time Slim came closest to being killed.

"He was testing a new ship for Ben Bell in St. Louis. I stood in front of one of the hangars watching him. At 3,000 feet he tried to put the 'plane into a right spin so the torque, or twisting force, of the motor would help him get it out. He tried three times, but couldn't get it to spin So he put it in a left spin, and down it came For a thousand feet, with the wires screaming so they could be heard a mile away, he struggled to bring the ship out of that spin. Then he crawled out on the fuselage back of his seat, hanging on like a leech, ready to jump with his parachute But he didn't jump. He pulled himself back into the cockpit again and came down 1,700 feet more, trying to save the ship. He was only 300 feet above the ground when he jumped, but he wasn't hurt a bit.

"Lindebergh and I always flew into a town with one of us walking on the wing to attract attention. Then we would throw out a couple of hundred handbills, printed on yellow paper. We had worked out the wording together. It read: 'Come out and get acquainted. This ship is made of wood and wired together. The wings are not covered with tin. It don't back up.'

"Then we would land in a cow pasture, or baseball park, and invite passengers to go up at five dollars a ride. If nobody went up, we would fly away. Later, we would come back. When the people saw they couldn't keep us unless somebody went up, they got air-minded and climbed into the cockpit.

"We did everything that would bring in dimes. Sometimes we would race automobiles at country fairs. We got $75 for each race. Above those little half-mile dirt-tracks we would have to bank the 'plane almost straight up and down and buzz around like a fly in a bottle. As I remember it, we always won. But we used to throttle down the motor until the last lap to give the spectators a run for their money. On that last lap, we would show the boys what the old ship could do.

"Once we flew into a town with Slim on the wing. When we landed, an old lady came up and asked: 'Which one ow you young men was that out on the fender?'

"At night we would stake the ship down, or tie its tail to a stump and leave it backed into the wind like a Missouri mule. One time, when we left it tied down like that in a field in Illinois, a tornado came through the country and headed right that way. But just before the twister reached the spot it, gave a jump and came down several miles beyond. The ship wasn't even scratched."

Interval

The dead keep silence. All their stir
Than strings unjarred is quieter;
Not mute but still, as tone to tone
For rhythm's enchantment yields its own.

Music an outward form hath found
In sweet relationships of sound,
But music's self, the soul unseen,
Dwells in the intervals between.

—Dorothy Rowe in The Observer.

A GREAT TRIER

In his last letter to his friend Mr. Rowett, the late Sir Ernest Shackleton wrote these words:

"Never for me the lowered flag,
Never for me the lost endeavor."

It proves that the explorer was a great trier. He never gave up the hope of conquering the eternal ice; he never gave in. His life is an example to us all, showing that by dogged determination much can be accomplished.

A Country Without Books

Kemal Pasha's introduction of the European alphabet into Turkey seems to have brought about a veritable revolution.

Kemal has not merely replaced one series of letters by another. The Turkish language itself has been affected, and will be affected even more in the course of time. Moreover, Kemal has, for the present at least, suppressed all books. The Turkish nation is without a literature. Writes "E.," a contributor to Reclam's Universum (Leipzig):

"This is the unavoidable result of suppressing all books printed with Arabic letters. It is true that the purchase and sale of these books have not been legally prohibited, but henceforth booksellers will not dare to ask for them, and the public takes care not to demand them.

"In Constantinople alone about two million books will have to be destroyed. Booksellers and publishers have already claimed damages from the government. It is no longer permissible to print books with Arabic letters.

Still, there is on the book market at present just one specimen that has been printed in the new Latin alphabet. It is a volume of prose poems written by a member of Parliament, and is called 'Damla Damla' (Drop by Drop). This is the only book that for the present may be awarded as a prize to brilliant pupils in educational institutions.

"The Government Printing Office has its hands full with the preparation of schoolbooks. It has already published some very attractive primers in the new type, and some children's books with verses, interpreting popular pictures in color. There is a heavy demand for these books—the joint work of the Director of the Editorial Bureau at Angora and a Turkish lady.

"The European alphabet has already exercised a strong influence upon the language, which is taking on a much simpler form. Its new garb makes many old idioms and expressions unsuitable. All Arabic and Persian elements are constantly eliminated.

"Experts have been sent to the provinces to select words and expressions from the national language and to incorporate them into the modern classic language. The Language Committee which directs this research work is to be organizezd as a sort of Turkish Academy. It will compile and control the dictionary. Besides other duties the Committee will also have to supervise works of literature so that they may be adapted in style and expression to the new tendency of the Turkish language.

"Authors who have been familiar only with the old way of writing are practising and studying diligently, so that they may resume their work as soon as possible in the spirit of the new alphabet.

"It is not only the fashion to know how to write the Latin alphabet but it has also become a cult.

"Of course, this Europeanization meets with some resistance, but the Ghazi has absolute confidence in himself and, while he takes the old veils and garments from Turkey, he gives it new aims and new ideals."

Lassoed Mad Bull Sandgate Beach

Thrilling Five Hour Chase Ends in Execution on Sands

A mad bull, on a recent evening, escaped at Sandgate and was at large for five hours before it was lassoed after an exciting chase, and killed.

After breaking a rope in a slaughter house, the bull ran into the Hythe Canal, into the gardens of the Kent County Constabulary, and along the main road into Sandgate.

Pedestrians fled at its approach.

Between Battery Point and the coast guard station the animal narrowly escaped being run down by motor cars. A young cyclist who was in its path saved himself only by leaping from his machine as the bull charged head down.

KNOCKED OVER WOMAN

Leaving the cyclist the bull ran the pavement and knocked over a woman, who was wheeling a pram. Neither the woman nor the child, however, was hurt.

By this time several hundred people had taken up the chase in the dark, and at Sandgate coastguard station, where the bull sprang on to the beach, a slaughter man named Marshall tried to rope the animal.

But the infuriated bull turned and charged. Marshall fell, and the animal's horns caught him in the back. Another man went to his aid, but the bull again attacked Marshall as he lay on the stones.

Marshall saved himself by rolling over, and the bull's horns became buried in the beach, while Marshall scrambled up and was hauled to safety on the sea-wall.

BEACH "STEEPLECHASE"

Then, bellowing as it went, the bull dashed along the beach, jumping over groynes until after a half-mile rush it was stopped by a groyne too high to jump and by a 20-feet wall on the inland side.

When a rope was thrown over the bull's horns the animal charged at the sea-wall and broke the rope. But the bull was lassoed first by a constable and then by people on the sea-wall and slaughtered where captured.

The tendency of the childless rich to adopt orphans is due to their desire to give themselves heirs.

Rocket planes which can go 5,000 miles an hour are talked about; we are making up a list of friends whom we should like to see travel that way. —Cincinnati Times-Star.

A home is a little-used building that usually stands on the same lot with the garage.—Florida Times-Union.

Recalling Old Days

Miss E. Harrison in another interesting contribution to the Women's Institute at Chesterville, tells of some of the experiences of the grandmothers and grandfathers of some of the present generation.

"Land was very cheap in the early days. It is said that George Hummel sold four hundred acres for four dollars cash, and a Mr. Merkley sold six hundred acres for twenty dollars, store pay, which he carried home tied up in a handerchief.

You have often read of farms being sold for a gallon of whiskey or rum. Some of the early settlers here paid a very low price for their farms, while others were squatters and paid nothing for them.

There were two places that the settlers did their marketing—Morrisburg and Ottawa. If they went to the latter, they had to travel most of the night to be on the market early. If anyone here was building a good house, they took loads of produce in, their neighbors helping them, and bringing out of material. The McElroy, Samuel Smith, John Smith, Pitcher, John Houlehan and Foster houses were all built this way. How different now, when a truck load is brought out in an hour or so.

Most people went to Morrisburg, as the distance was only half and that was quite long enough for the roads they had to travel. In fall and spring there was deep mud and in winter snow drifts, the snow being higher than the fences. There were no wire fences, all rails, lots of zigzag, which caused drifting. Fences were thrown down and people drove through the fields to avoid the drifts and pitchholes. Women often went out on the top of a load of grain, and many did not get a warm dinner, which cost only twenty-five cents, but ate a cold lunch under the hotel sheds, in order to save for their children.

Morrisburg was a lively place at that time. Main street, from the Gravel road, would be full of sleighs and wagons down past the market. People generally did some trading when they sold their produce, but the rest they did at home. There were no departmental stores then, which was a blessing to small places. We read a lot about buying in our country, which we should practice, but our slogan should be, "Buy in our own town." Roosevelt said (and all admit he was a smart man) "Put people in the way of making a living, help them to help themselves." When we buy at home, are we not doing so? The more bought, the more clerks are making a living here, instead of having to cross the border. Who keeps up our schools? Not Eaton, Simpsons or A. J. Friemans, but the taxpayers. Who, also keeps up the churches, and who do they ask for a subscription of any kind? The people in business are always asked and expected to give, and is it not one way of following the Golden Rule, to help others? Let the people in business take a leaf from this also and buy more at home.

Almost the first thing a merchant there asked a customer to buy was a large chest of tea, always green, at about twenty-five cents a pound; a large box of raisins, currants in bulk; sugar in ten-pound lots, as they had not begun to do it up in hundred-weight bags; shoes for the whole family and winter clothing. The customers did not use pencil and paper to figure up their purchases, but used their heads. Mrs. Ward Smith could make up a hundred dollar trade without a mistake, and others did the same.

There were no fur coats for either women or men. The men had only cloth overcoats and mufflers, while the women always wore a shawl outside their wraps, also a cloud (a long wool scarf.) If they got cold on the way, there were several stopping places where they could get warm. Between here and Morrisburg were taverns at Dunbar, where S-S-Sam Empey once kept; Boucks Hill; Williamsburg, called Bell's Corners; Swaynes; and the Red Tavern on the Gravel Road. There were also two toll gates on Lower Road, coming out at Nash's Lower Road, which came at Nash's Creek, was used by many. Whiskey was only five cents a glass in those days. Along the front are many large houses still standing, that were used in the old coaching days.

Sometimes the men thought they got better flour at other mills than here, and took their grists quite a long distance to Russell, then called Duncanville, or Loucks's a little east of it. Mrs. Wm. Bailey's grandfather, Mr. Loucks, worked in that mill, and walked from his home above the Hess cheese factory in Williamsburg on Monday mornings, and on Saturday night brought home on his back flour to do the next week. Adam Harper and others walked from here to the Hanson Settlement on Monday morning and carried home their week's supply. It would be flour, meat and butter, and perhaps a little money to buy tea and tobacco.

Mr. Harper sometimes made tar to help out the living. Roland Kerr, who lived next door, remembers the process. Their house was of logs, right in front of where W. B. Lawsons's house stands, quite close to the street. There was no sidewalk, quite a deep ditch. He would fill a cooler, packing it in closely with fat pine roots, then cover with a piece of tin and put it along the side of the ditch, tipping it so the juice would run off in a kettle and covering with wood, which he set fire to. It came out tar, which sold for one dollar per gallon.

Wages were very low; a man would work for fifty or seventy-five cents a day, and worked from sunrise to sunset, and often until after dark. A girl in the early days would get two dollars a month, and some years later, four dollars, and work all day long. When the other work was done, if she could spin, they often got a chance at that. There were women who were professionals at it, and went from house to house spinning. They were able to do a good many skeins a day. It was nice to watch a good spinner pull out the rolls and make it into yarn."

Horse Drowned

A valuable horse owned by Mr. W. Ouderkirk, Nation Valley, was drowned on Sunday last. Mr. Ouderkirk, wife and child were driving along the road near Moody's Bridge, and when crossing culvert bridge the horse became frightened at something and jumped off the side into the ditch, head first, and before it could be rescued was drowned. Mrs. Ouderkirk was somewhat bruised and shaken up, but Mr. Ouderkirk and child escaped uninjured.

Hon. Mackenzie King, Prime Minister of Canada, who intimated in House of Commons that an early Dominion Election was a possibility

Hydro to Farmers

To stimulate the use of hydro in rural Ontario, Hon. J. R. Cooke, ministerial representative on the Hydro-Electric Commission yesterday in the Legislature introduced a bill to set aside $2,000,000 out of consolidated revenue to be expended by the Commission as loans to farmers. The fund would be operated on the lines of the rural credits scheme.

The bill provides that the Hydro Commission could draw on the fund for rural installation. A farmer, desirous of obtaining hydro would apply to the Commission for the necessary funds. Under the bill, the person applying must swear that he is the owner of the property. If there is a mortgage or other encumbrance on the property, the application to the Commission will not be dealt with for two weeks after the owner of the mortgage has been notified. Power is given the Government to prescribe the terms and conditions upon which the advance may be made.

No advance will exceed $1,000 and will be repayable in 20 years. Where default in repayment is made, the Government would be given the power to notify the clerk of the municipality in which the property is located. The amount due would be inserted in the tax collector's list and collected as ordinary municipal tax. A chattel mortgage, lien note or other registered instrument, shall have priority over the Government's lien.

Saw Bears in Woods

Mrs. Amelia J. Brown, who for the past 12 years has made her home with her youngest daughter, Mrs. Jed Tuttle, River road east, Iroquois, and who will celebrate her 97th birthday. March 1st, is a wonderfully well-preserved old lady.

Born in Augusta township and marrying Samuel Brown, when a comparatively young woman, they had a family of five boys and four girls, five of whom are living. She boasts of having 31 grandchildren and 22 great-grandchildren.

When asked what she considered her greatest adventure in life her answer was: "I don't quite know what it was, unless it was my marriage, and my husband and I never had our 'first quarrel.' My husband died after we had had 12 years of happiness together.

"A quarter of a mile from my father's home was a woods, and going to school one morning, when I was very small, a walk of two miles and a half at North Augusta, we saw tracks of a bear across the road. This sent the chills running up and down my back. The wolves were plentiful and when I made free enough to call to them, they gave an answering call,' she told us.

Mrs. Brown and a brother, Benson S. Wickware, of Morrisburg, who celebrated his 90th birthday in January last, are the only surviving members of a family of nine.

Above is a picture of Mr. Justice Taft, Head of the Supreme Court of the U. S. A., who is very ill and gradually losing ground, according to late news from his physician.

The Scrap Book

CASABIANCA

By Felicia Dorothea Hemans

The boy stood on the burning deck
Whence all but him had fled;
The flame that lit the battle's wreck
Shone round him o'er the dead.

Yet beautiful and bright he stood,
As born to rule the storm;
A creature of heroic blood,
A proud, though childlike form.

The flames rolled on; he would not go
Without his father's word;
That father, faint in death below,
His voice no longer heard.

He called aloud, "Say, father, say
If yet my task be done!"
He knew not that the chieftain lay
Unconscious of his son.

"Speak, father!" once again he cried,
"If I may yet be gone!"
And but the booming shots replied
And fast the flames rolled on.

Upon his brow he felt their breath,
And in his waving hair,
And looked from the lone post of death
In still, yet brave, despair.

And shouted but once more aloud,
"My father! Must I stay?"
While o'er him, fast, through sail and shroud,
The wreathing fires made way.

They wrapped the ship in splendor wild,
They caught the flag on high,
And streamed above the gallant child
Like banners in the sky.

There came a burst of thunder sound.
The boy—oh, where was he?
Ask of the winds, that far around
With fragments strewed the sea—

With mast and helm and pennon fair
That well had borne their part—
But the noblest thing that perished there
Was that young, faithful heart.

McIntosh—Davidson

A quiet wedding took place at the home of Mr. A. J. McIntosh, Dundela, on Wednesday, Feb. 19th, when his only daughter, Muriel A. McIntosh, was united in marriage to Mr. Joseph L. Davidson, of Winchester Springs. The ceremony was performed by Rev. J. C. Eastcott, B. A., of Dundela United Church. The happy couple left by train for Toronto, Niagara Falls and other western points, and on their return will reside at Winchester Springs.

Myself

I have to live with myself and so
I want to be fit for myself to know.
I want to be able as days go by
Always to look myself in the eye.
I don't want to stand, with the setting sun,
And hate myself for the things I've done.
I want to go out with my head erect,
I want to deserve all men's respect;
But here in the struggle for fame and pelf,
I want to be able to like myself,
I don't want to look at myself and know
That I'm bluster and bluff and empty show.
I can never hide myself from me,
I see what others may never see;
I know what others may never know;
I can never fool myself, and so,
Whatever happens I want to be
Self-respecting and conscience free.

GUNMAN'S BLUFF

By Edgar Wallace

COPYRIGHT BY EDGAR WALLACE

Fifth Installment

SYNOPSIS

Margaret Leferre marries Luke Maddison, wealthy banker, after he has transferred to her every dollar he has in the world. After the ceremony he asks her for some money with which to pay an obligation. She refuses, declaring that he shall never have a cent of his money back. She discloses to him the fact that her brother, Rex, who was found shot, had left a note saying that Maddison had ruined him, and Margaret had married Luke for revenge. She does not know that Rex had forged Maddison's name to a large check. Maddison leaves her and wanders about London, trying to understand what happened, when he meets Lewing, an underworld character who has previously brought him a message from Gunner Haynes, a famous American crook.

The two are attacked by Joe Connors' gang, who think Luke is a detective whom Lewing has put on their trail. Lewing is killed and Maddison seriously wounded. He recovers consciousness two weeks later and finds he is known in the hospital only as "Smith." He decides to retain that name. A messenger from Connors calls at the hospital, gives him $25 and the address of a Mrs. Fraser, explaining that there is a room there for him and that the gang wants to make amends for its mistake in attacking him. Luke goes to the Ginnett street address and finds a good room ready for him.

Meantime Margaret has had a telegram from Paris signed "Luke" saying he has found consolation elsewhere and will let her have a divorce. She doubts that it is genuine. Danton Morell, a friend of her brother Rex, calls on her to try to get some money. She horrifies him by telling him that she has given all the money which Luke gave her back to his trustee, who is making her an allowance to live on. She is convinced that Luke has gone to his favorite resort in Spain and intends to join him there. Morell realizes that Margaret is in love with her husband and that his own schemes are likely to fall through.

While they are talking Gunner Haynes is announced. Morell begs her not to see him, and when she insists, Morell hides in another room. Haynes admits that he is a jewel thief and that he is just out of prison, but Luke Maddison had once tried to do him a favor and he wants to return it if possible. He asks if Danton Morell is a friend of hers, and why her husband left her.

NOW GO ON WITH THE STORY.

"I should be a little worse than impertinent. And yet, Mrs. Maddison, I have a very deep interest in your husband's affairs. I have many bad qualities, but disloyalty is not one of them. Your husband went out of his way to warn me, at a moment when he knew the police were coming to arrest me. If ever there was a white and wholesome man, that man is Luke Maddison. I ought not to have asked you the question and I could not very well expect a satisfactory answer. The only thing I am anxious to know is this: have you any idea where your husband is?"

"Do you wish to find him?" she challenged.

He shook his head.

"No, but I'd like to know exactly where he is. I have a very special reason for asking this. Is he in London?"

She shook her head.

"He's in Spain at the moment, but I'm afraid I cannot give you the address."

"Mr. Morell—is he in Spain? Pardon me, Mrs. Maddison, but if I have a reason for asking you the one question, I have a doubly important reason for asking the other. Morell is the kind of man that no decent woman should know—"

She walked to the table and pressed the little onyx bell push. This time he smiled.

"That means you're going to turn me out, and I don't blame you. I'm afraid I've blundered this interview, which I intended should be very discreet and diplomatic. I particularly wished to know where Mr. Maddison was—"

"I have told you," she said, as the maid appeared in the doorway.

"As far as Danty Morell is concerned—" he began.

Her hand pointed to the door.

"I am not prepared to discuss my friends—even with the criminal acquaintances of my husband," she said, and she heard him chuckling as he went down the stairs as though at a very good joke.

* * *

Margaret walked slowly along the asphalt path. As she did so she saw a car coming slowly along the tan on the other side of the road. It was an electric brougham containing two people: a beautiful-looking girl, fashionably dressed; by her side, his face half hidden under a broad-brimmed Stetson hat, a bearded man of striking appearance. Ahead of her was walking a stout-looking man, and by his side a rather pretty girl. As she overtook them she heard the stout man say:

"Take a look at that swell woman! That's Jean Gurlay—the biggest crook in London, my dear."

Those ahead of her she recognized as the Sparrow and his companion, and, not wishing to be seen by them, sat down on a garden seat, her eyes following curiously the electric brougham. She saw the machine turn at the Marble Arch and come slowly along by the side of the curb, and she watched with a detached interest the beautiful girl and the bearded man, whose head was turned toward his companion. As they passed she heard the man say:

"This is all very mysterious. What does it mean?"

In an instant she was on her feet, pale and shaking; she had recognized the voice of the bearded man. It was her husband.

* * *

In the interest of his new, strange life, Luke found it fairly easy to forget. The spirit of adventure was on him. Margaret belonged to a dim, almost unbelievable, past. She was of the substance of dreams.

He went gaily to a rendezvous with a fair-haired girl on the following afternoon, and was delighted to find how springy was his step. He had hardly taken his place in front of the Guards Memorial when he saw an electric brougham approach and, catching the girl's signal, stepped to the side of the road as the car stopped.

"Take a look at that swell woman! That's Jean Gurlay—the biggest crook in London, my dear."

She was in excellent spirits.

"It's a great idea to let yourself be seen in a certain kind of car," she said. "You don't know what I mean? I'll bet you don't!"

They crossed into Hyde Park, made a slow progress near the edge of the sidewalk, and he found himself enjoying the novel experience. She was very pretty, though older than he had thought.

"Do you see that fat man over there? That's the Sparrow. You want to keep away from him."

He started at the name.

"You mean Bird?" he stammered, and looked guiltily in the direction she indicated.

He saw Mr. Bird. He was walking with a very pretty girl, but the woman who was at that moment seating herself on one of the park benches he did not recognize.

As the brougham turned and came back on the other side of the road, she said suddenly:

"There will be a car waiting near the Cavalry Barracks. I hope you can drive?"

"Another car?" he asked in astonishment.

She nodded.

"I want to try you out."

He laughed.

"All this is very mysterious," he said.

The car was waiting for them, a closed light car of English make. There was nobody in attendance, but without hesitation she stopped the brougham and gave the driver instructions.

"Here it is," she said. "Get in."

Luke sank into the driver's seat and put his foot on the self-starter, and she came in after him, slamming the little door behind her.

"Grafton Street," she said, in a businesslike tone. "Pull up opposite the Rean Club."

He thought she was testing his driving ability, for he had to pass through three traffic blocks before he brought the machine to a standstill at a place she indicated.

"Now you understand," she said, dropping her voice and speaking rapidly, "I'm going in to see my husband."

She looked him straight in the eyes.

"If he makes a fuss I shall expect you to help me. If he doesn't make a fuss, we'll drive quietly away down Albemarle Street, make for Vauxhall Bridge and Tooting Common."

"Your husband?" he stammered.

She gave him one quick look of suspicion.

"That is what you tell the flattie if there is any fuss."

What a flattie was she did not explain, and was gone before he could ask her. He kept the engine running according to her instructions. She was gone some twenty minutes. Presently, looking out, he saw her turn the corner from Bond Street and walk with apparent unconcern toward him. As she stepped into the car, a man in his shirt-sleeves darted around the corner, flew at her, and gripped her by the arm. She tried to wrench herself free, and before Luke realized what he was doing he had struck her assailant and sent him tumbling to the pavement.

"Drive!" she snapped, and mechanically Luke Maddison sent the machine leaping forward.

They crossed Oxford Street, down St. James's Street, through the park, and were over Vauxhall Bridge before he partly realized what had happened.

"Why did that fellow grab you?" he asked.

"My husband—I had a row with him," she said calmly. And then: "I knew Connor was wrong," she said, and whistled. "If I hadn't had my wits about me and started that husband story, I'd have been half-way to Holloway!"

He saw her look at every policeman they passed, out of the corner of her eye, and his heart was beating faster as they came to the edge of Tooting Common, and at her command he stopped the car.

"We'll get out here," she said. "You can go back by bus, I'll take a taxi. If Connor comes to-night, tell him I've got the stuff."

She turned to go, but he caught her by the arm.

"What stuff?" he asked sternly.

And then he saw the flat case she carried under her leather coat.

"My God!" gasped Luke Maddison. "You stole that!"

There was amusement in her fine eyes as she nodded.

"Of course I did, you poor simp!"

A taxicab was passing and she hailed it. Slowly his grip on her arm relaxed. He watched the taxi recede like a man in a dream, too stunned even to think. He could never remember that journey back to Lambeth. He had crossed Westminster Bridge when he saw a newsboy with a placard: "Daring West End Robbery."

He stood dead still, gazing open-mouthed at the contents bill, and then he felt in his pocket and dropped a penny from his trembling hand into the newsboy's palm.

He dared not look inside the newspaper until he was in a quiet street. Then he read:

DARING WEST END ROBBERY

Bearded Man and Pretty Girl Rob Taffanny's of £20,000 Diamond Necklace

A daring robbery was committed this afternoon at Messrs. Taffanny's jewel shop in Bond Street. At about 3:50 a well-dressed woman walked into the shop and asked to be shown some plain gold rings. Whilst the assistant's back was turned, she must have broken a glass case with a rubber-headed hammer. When he came back, he found not only the woman but a valuable diamond necklace had disappeared. He flew out into the street and overtook the woman as she was entering a motor car. He was immediately struck down by her companion, who is described as a man of great height, with a fair, well-trimmed beard, dressed in a gray tweed suit . . .

"That's me!" groaned Luke Maddison, and almost swooned.

* * *

For a quarter of an hour he sat and watched his tea growing cold, his mind vacillating between horror and amusement. He, Luke Maddison, was a thief, a gangster, an active member of an organization which had robbed Taffanny's! He knew Taffanny's rather well; he had bought Margaret's engagement ring over the very glass counter that had been smashed. He was helpless—the idea of going to the police and betraying his associates never occurred to him. There was only one thing to be done and that was to steal away at the first opportunity. He had written for his check book to be sent to Ronda, and it was a simple matter to reach Spain. Was it, though?

With a gasp he realized that he had no passport! And without a passport it was impossible to reach Spain, of all countries, where every man and woman who passed across the frontier were closely scrutinized. If he had not dismissed his servant it would be easy to creep back to his flat one night, pack a bag, and fade away into a Continental limbo. But probably his solicitor had the key of the flat. A new hope awakened. Hulbert had an apartment in St. James's Street. He was a bachelor and accessible.

TIRED OF WINTER
Longing for Spring!

Come, pay a visit and see our new Spring Goods—there's much that's lovely to choose from.

Dimities of Fine Quality

Small dainty designs on white grounds, smart for Women's and Children's Dresses, all fast colors and the price is low at 30c per yard.

Better Prints

Full yard wide, fast colors, in a wonderful assortment of new designs. Price 40c per yard.

32 inch Prints

White grounds with good bright colorings in medium and small designs. Fast colors, per yard 25c

Ginghams

Another shipment received today, in small, medium and broken checks. Regular 18c but we have put them in with the 15c line.

Don't Miss This Bargain.

Just Doing Things Well!

When it comes right down to the facts of the case, service is merely the art of doing the things that you set out to do and doing them well. That is what we endeavour to do in providing the public of Winchester with good things to eat. Our stock is carefully chosen and well assorted. We make it a point of having the best of everything that the market provides. We provide a staff of competent clerks, unequalled telephone service and prompt delivery.

Our High-Class Teas are Fit for Any Table
Note the List

Champion Orange Pekoe Tea is in a class by itself. We will compare or test it with any line selling for 10c more. Let us send you a lb. with your next order—the price is 70c, if it don't please you we will cheerfully refund your money.

Japan Green Tea—We haven't changed this line for 25 years. It can't be beat. 70c lb. That's a strong statement to make but you can easily prove it by trying it.

Ask to see our new Electric Coffee Grinder work next time you are in.

Candies—Young and Old Will Enjoy

There are Caramels, Taffies, Hard Centres, Cream Centres, Burnt Almond and Fancy Candies for the youngsters, also a select variety of Chocolates which the grown-ups will appreciate, because of the wholesomness and tastiness of Neilson's Chocolates. You'll never make a mistake if you buy Neilson's. Order a lb. assorted, with your next grocery order. Price 50c

Look Over This List of Groceries

Kemptville Creamery Butter 42c lb.	Peach Jam, 3 lb. glass 44c
Potatoes $2.25 per 90 lb. bag	Honey in 1 lb. sections 20c

JESUS TEACHING ABOUT HIMSELF

Matthew 11:2-6; 25-30

Rev. Samuel D. Price, D.D.

Telling the truth can make a lot of trouble, though one does not regret that he was absolutely honest in standing steadfast for the right. John the Baptist was bold in denouncing sin wherever he found it, regardless of the social standing of the sinner. When Herod Antipas became involved with the wife of his brother Philip, John denounced the perfidy and said, "Thou shalt not have her." Though John had plenty of time to reverse his opinion, while a prisoner of Herod in the castle Nacherus, no waiver was uttered. Herodias was after the man that presumed to speak against her actions and called for John's head on a platter when her daughter Salome out-danced the professionals at the party.

Most refer to the discouragements of John during this period in the prison. Confine anyone and mental distress will follow. John looked for a fiery Messiah and Jesus was a gentle man who gave himself to unobtrusive teaching. To settle the matter the Baptizer sent a number of his loyal disciples to this Man in the midst of His ministry in Galilee and asked if He really was the One John thought He was when he said a year and more before, "Behold, the Lamb of God that taketh away the sin of the world."

As the inquirers drew near Jesus was in the midst of His healing and teaching. The Oriental would be apt to observe a while rather than abruptly ask his question. The formal reply that Jesus gave was to go back to John and tell him all that they had seen and heard. The message about the Kingdom continued to be the same and every type of miracle was wrought. These marvels were as credentials to authenticate the teachings. The climax of the reply was "and the poor have good tidings preached unto them." That was a day when the poor might fail in getting even the crumbs from the table of the rich man. The Nazarene was the Man for all and He could satisfy their every need. The reply must have been satisfying to the prisoner, else Jesus would not have answered him that way.

It is likely that Jesus evaluated John to His disciples even as He did to the multitudes after their departure. Read verses 7-19. Though John is placed so high because of his relationship as the Forerunner of Jesus, each one of us has a greater position because of our more extended knowledge of our Saviour.

Following the uplift of prayer, (Verse 25) Jesus made declaration of the oneness between Himself and the Father. There was no difference in power. Between both there was the most perfect understanding, for Jesus was so often misunderstood as John had been. Jesus knew the human heart perfectly, with all its needs, problems and sorrows. He understood that they had "labor and are heavy laden." Without any qualification he said to ALL, "Come unto me—and I will give you rest." All who have accepted the invitation have experienced "And ye shall find rest unto your souls.

Such blessed promises are naturally related to conditions. To receive we are first to be yoke-fellows with Jesus and learn of Him, Who is meek and lowly in heart. Under those conditions the "yoke" is a means to service rather than a burden.

Great Northern May Extend to Devil's Lake

Will Give Outlet to Hudson Bay; Trawler Bought to Locate Fish Resources

The Great Northern Railroad is considering an extension of its line from Devil's Lake, N.D., to Brandon, Man., which will bring the railroad to Hudson Bay, according to a statement recently made by J. W. Breakey in the Manitoba Legislature. Mr. Breakey is the head of the Liberal party in the Manitoba House.

It is known that the Great Northern has been closely watching developments in western Canada for some time, as there is considerable likelihood of mid-Western freight shipments moving through to Hudson Bay. The extent to which American grain shipments might find a profitable exit through Fort Churchill has already received much study from the railroad interests concerned. As final conditioning will be made on the Hudson Bay Railroad this spring, it is expected that regular service wil be available to the port by August.

In view of this, four elevators with a capacity of 2,000,000 bushels each are being planned for Churchill harbor. Work on the first of these will commence early in the spring. At the same time the dredging of the harbor will be resumed. The dock already built there has an approach of twenty-five feet of water. It is intended that this shall be deepened to thirty-five feet. Work on extending the docks will also be pushed. It is expected that approximately 3,000,000 yards of gravel will be required for the filling-in operation in the water-front area. Big gravel deposits in the neighborhood, however, will facilitate this work.

The Sturgis cut-off will be in operation this summer, bringing the network of railways in the central region of Saskatchewan into more direct contact with the Hudson Bay Railway. This will greatly facilitate grain shipments from this territory.

Although the Hudson Bay Railroad is already being used for large shipments of fish from the inland lakes, some explorative work is going on to ascertain what the bay itself may be expected to supply in the way of fish. According to H. S. Johnson, Western manager of Booth Fisheries, the company will put a trawler in the bay this year. It is believed that a number of independent fishery companies will also be in the field during the year. One trawler, however, Mr. Johnson has declared, will be of no commercial use except to determin something of the fish resources of the bay.

If Hudson Bay is the lucrative fishing area that it is expected to be the movement of fish will be a considerable item in the freight haul of the railroad. An excellent market awaits the catch in the cities of the mid-Western states.

Fakir-Gambler at Fairs Denounced

More Attractions of Educational Value Are Urged

Toronto.—More attractions of an educational value should be used in county fairs and exhibitions instead of the customary sideshows and horse races, some 250 farmers attending the annual convention of the Ontario Association of Fairs and Exhibitions were told.

Sports, community organizations, championship contests for farm boys and girls and free admission of school children were among suggestions offered by W. L. Graham, Britannia Bay, to replace the sideshows and midways at provincial fairs.

J. L. Wilson, Toronto, secretary, said the "hard-earned money of farm boys and girls should be protected against the fakir and the gambler, who are allowed the use of the fair grounds by defiance of the law."

"It is said without these wheels of fortune, dice games, pools and so-called amusemerts a fair cannot be financed," said Mr. Wilson. "If that is so, then it is better if the Fair went out of business or else have the Legislature wipe out the law."

Duncan Marshall, former Minister of Agriculture for Alberta, said a well-known oil company is prepared to spend $50,000 toward an educational campaign to aid Ontario farmers in the eradication of weeds, a problem which he termed "one of the greatest now confronting Canadian Agriculture."

"You must follow modern scientific rules or you are not going to getanywhere," he continued. Urging farmers to keep livestock on their farms, Mr. Marshall said "in the next few years Ontario will have the best high class market for livestock in Canada."

Chinese Naval Officers Will Study in Britain

Shanghai—Twenty Chinese naval officers and cadets have gone to England to study British methods of running a navy.

They are making the trip at the invitation of the British government and will remain in England about two years.

The officers in the party expect to enter Greenwich Naval Academy and take the same course in tactics as British students. The cadets, however, must first pass some time on various naval vessels to learn the rudiments of British navy practice. Later they will also take the Greenwich course.

The price of silver has fallen to the lowest point in history. This would be a good time to have your clouds relined. The New Yorker.

Forty volumes of missing laws have been found in Siam. It seems that the Orient has more than its share of national disasters.—Florence (Ala.) Herald.

Canada's Radio May Be Operated By Government

Steps to be Taken Soon to Introduce Legislation for Regulating Broadcasting

Toronto. — Concrete steps toward inaugurating a government - owned radio monopoly in Canada are expected to be taken in the near futrue with the introduction in the Canadian Parliament of legislation for the purpose of regulating broadcasting in the Dominion.

Introduction of the legislation results from a lengthy investigation of broadcasting by a royal commission, which came to the conclusion that operation of broadcasting stations by private interests, as followed in the United States, has not been successful in Canada, where both population distribution and economic conditions are different. There are a considerable number of stations in the Dominion, but the reports indicated that they cannot support themselves by advertising programs, as in the United States, in the majority of instances, and fear was expressed that the heavy expense incident to the operation of the stations would eventually result in the closing down of many of them, leaving the Canadian audience with little radio entertainment other than that received from the United States.

The commission recommended that broadcasting be placed on a basis of public service, that a provincial director should be appointed for each province, to have full control of programs broadcast in his teritory, and that he be aided by a provincial advisory council on radio and broadcasting.

Establishment of a chain of seven high-powered stations running across Canada was recommended for initial service, to be the nucleus of the more ambitious system eventually to be created. These stations would have a power of as high as 50,000 watts with supplementary stations of lower power erected in areas not effectively covered by the main stations. Existing stations would be used until the proposed chain and auxiliary stations were built.

The cost of the chain and its auxiliaries was estimated at $3,250,000, and the operating expense was placed at $2,500,000 a year. Existing broadcasting stations, all of which would be put out of operation or converted into auxiliary stations under the plan, would be taken over by the government and their owners compensated. The costs of establishing and maintaining the government service would be covered by license fees, rental of stations for indirect advertising and a subsidy from the government.

It is proposed to increase license fees for receiving sets from $1 to $3 a year, which would provide an estimated revenue of $900,000.

"Mounties" Train for London Show

Regina, Sask.—While bitterly cold winter weather grips the Prairies, 25 members of the "Royal Canadian Mounted Police,' are training in Regina for the International Horse Show which will be held in London next summer.

This will be the first time in two decades that the "Mounted Police" have taken part in any such overseas function.

Major Dann, Vancouver, is in charge of the detachment.

Youthful members of the force, between 23 and 26 years of age, have been chosen for general smartness and riding ability. All are expert riders. They are now in the course of long weeks of training in Regina. Sometimes the weather sinks 30 degrees or more below zero. At any time they ride in the teeth of bitterly gales. Their horses, save four, were bred in the East, and are all young, being from five to six years old. The training, at present, confined to daily morning drives on long reins, followed later by driving under riders, will gradually become more intensive and varied so that when the detachment makes its appearance at the show from June 18 to 28, inclusive, it will present a program of horsemanship, including Roman riding, musical rides, vaulting and drills. It will be the first time since 1911, that Royal Canadian Mounted Police have taken part in an overseas function.

On that last occasion more than 80 riders were a part of the ceremonies attendant upon the coronation of King George V., and Major Dann was ridingmaster in charge of their training.

American Uneasiness

Ottawa.—The uneasiness which has arisen in American business circles following the Empire Free Trade campaign is indicated by the fact that business men are flooding Canada with questionnaires on the subject. Following are typical examples.

What attitude do Canadian manufacturers' jobbers take in regard to such a movement?

What is the attitude of Canadians generally towards British-made goods? Other things being equal would they prefer to buy British goods rather than American gods?

Why have not more British goods been sold in Canada up to the present time?

How much weight does the sentimental factor carry?

Apart from speed of delivery and the existing influence of advertising what factors favor United States merchandise?

What specific constructive criticisms can you make of existing British methods of trying to get business in Canada?

The problem of British v. American goods on the Canadian market is in fact being investigated from every possible angle.

You may depend upon it that he is a good man whose intimate friends are all good, and whose enemies are characters decidedly bad.—Lavater.

Rum-Runner is Eluding Police

Believed Silver Plane Carries Liquor from Winnipeg to North Dakota

Winnipeg. — Reports have reached here from Pembina, North Dakota, that another aerial rum-runner has engaged in the traffic in liquor between Manitoba and the United States.

The silver plane which was reported to have made use of Winnipeg flying fields in October last has, reports say, been seen again, but this time it has not ventured to the city.

The Pembina story is to the effect that the plane landed there on Tuesday about three miles outside the town. It came from Canada. Before town officials could get to it the machine took to the air and flew southerly.

At the same time an automobile was seen to leave the planes side and continue on the road in the direction of St. Paul. Examination of the field where the plane landed showed that boxes about the size of whiskey cases had rested on the snow probably while being transferred from the plane in which, officers are inclined to think, liquor was brought from Canada, to the automobile, which, if their theory is correct took the cargo further toward its destination.

Enquiries made in Winnipeg as to whether the plane had been seen here brought no information of value. No person could be found who saw. From the Manitoba Liquor Commission it was learned that no large purchases of liquor were made on that day, but there were many transactions, all to permit-holders, where single cases were involved.

Most of the purchases have been checked and still have their liquor so it is doubtful if the plane's liquor cargo, if that was its nature, was secured here.

Ancient Trowel Found in London

Used by Roman Workman Nearly 1,900 Years Ago

London—The great City of Londinium, which the Romans built so strongly beside the Thames nearly nineteen hundred years ago, has gone, leaving scarcely a vestige of itself behind.

The mighty wall, three miles long and eight feet thick, with which they surrounded it has faded away; so that it seemed very strange one day last week to pick up one of the very trowels used by the Roman builders.

It is of good thick iron. The neck curves back somewhat over the blade, and rusted on to it is the ferrule which prevented the handle from splitting when the three-inch-long tang was driven into it.

Altogether it is remarkably like the tool used for the same purpose to-day. The triangular blade is rather broader in proportion to its length. That is all the difference.

Yet there can be no doubt that it is of Roman date. 'Workmen, making an excavation on Fish Street-hill, near London Bridge, had dug through a layer of soil containing innumerable fragments of Roman pottery of the second century A.D., and below this they came upon the footings of a Roman wall—just an ordinary house wall about two feet thick. And among the rubble beside it they found this bricklayer's trowel.

Along with it were more pieces of the Romans' favorite bright red crockery, but of rather an earlier date than that which was in the layer above. For some of the scraps had the names of their makers stamped upon them, and they were those of potters who are known to have been selling their wares in the period A.D. 0 to A.D. 100.

Canadian Engineer Backs Waterway

Montreal.—Geo. C. McDonald, in his retiring address as president of the Montreal Board of Trade, declared that his view was that the St. Lawrence Deep Waterways scheme should be proceeded with as soon as economic conditions warranted, and that the whole cost of the project should not be saddled on power developments, but should be shared by navigation interests or whatever interests would be benefitted.

"It hardly seems reasonable to suppose," said Mr. McDonald, "that after developing our waterway system from the time canoes were portaged over the rapids to the present 14-foot channel, we are going to stand still at this stage of history and say that we shall not dig any deeper.

"Our problem," said Mr. McDonald, "is to find out, if we can, who is going to benefit, and let them pay. If it is the European buyer, the traffic should be made to pay, that is by tolls on shipping, as in case of the Panama Canal. If it is the citizens of the United States and Canada, it will be necessary to put it on a business basis, estimate the respective proportions, and pay accordingly."

Further in his remarks, Mr. McDonald said: "My conclusion is that the power should bear only its own burden of cost and that any further navigation development determined upon should be pa'' for by whichever of two ways might be found more suitable:

"1. By the traffic as is done in the Panama Canal, or—

"2. By the taxpayers generally of the United States and Canada in the proportions in which it is expected that the two countries would respectively benefit.'

There seems to be so much difference of opinion about the Nobel Peace Prize this year that it may not be awarded at all. Why not let the two leading candidates fight for it?—New York Evening Post.

All Hail the New Senator!

CANADA'S WOMANHOOD HONORED

The photograph here shows Mrs. Norman F. Wilson of Ottawa, whose appointment to a seat in the Canadian Senate has just been announced by Premier Mackenzie King. Mrs. Wilson, who is the mother of eight children, is not only the first woman to be appointed to the Canadian Senate, but she is the first woman to enter the Upper House on the North American continent and the British Empire. —Photograph by John Powis, Ottawa.

Canada to Expend $329,000,000 On Power

The quickening of production in practically all lines of industry is considered by economists to be largely due to an increased supply of power and a widening of its uses. Special significance therefore attaches to the fact that with undertakings brought into operation last year and with those which are either under active construction or are being studied for early development, a steadily increasing flow of low-cost hydro-electric power is assured for Canadian industrial enterprises for some years.

The total capacity of new water-power installations brought into operation during 1929 amounts to 378,400 horsepower, bringing the total installation for Canada to 5,727,600 horsepower. There are several important undertakings under construction which will add more than 1,600,000 horsepower to this total during the next three years.

The total amount of capital involved in the development, transmission and distribution of the new power developed in 1929 amounted to more than $75,000,000 while not less than $320,000,000 will be required to complete the undertakings planned for the next three years.

During 1929 Quebec took the lead in works completed and the same is true of the works at present under construction, but important programs are also under way in practically all the other provinces. In Ontario theh Hydro-electric Power Commission completed a 2200 horsepower development on the South Muskoka River; one of 1800 horsepower on the South River, and one of 5000 horsepower on the English River. Work was also advanced on the 54,000 horsepower development on the Niagara River, and on the 54,000 horsepower development on the Nipigon River; on the installation of a tenth unit of 58,000 horsepower in the Queenston station on the Niagara River, and on the duplication of the 220-000-volt transmission line bringing Gatineau River power to Toronto. The commission also took horsepower nder contract from various companies.

In Northern Ontario the International Nickel Company of Canada completed its 28,200 horsepower development on the Spanish River and the Algoma Power Company brought into operation a new plant on the Michipicoten River with an initial installation of 11,000 horsepower.

King Amanullah's Return Predicted

Deposed Ruler's Reform Work Still Seen in Afghanistan

New York.—The prediction that the western reforms that cost King Amanullah his crown would return to Afghanistan to stay, was made by Sirdar Muhammad Yunus Khan, recently resigned Charge d'Affaires of the Afghan legation in London.

Moreover, he said in an interview with the Associated Press, "I feel sure that 100 years hence a monument will be erected at Kabul, the capital, to King Amanullah to commemorate his patriotism and great reforms, for which my countrymen were, perhaps, at the time of their introduction, not quite prepared.

"But King Amanullah's great work in Afghanistan can still be seen there, and no Government in Afghanistan can afford to ignore altogether some of those reforms."

He blamed the "priestly classes," who, he said, were "extremely ignorant" of their own religion, for the failure of Amanullah's work.

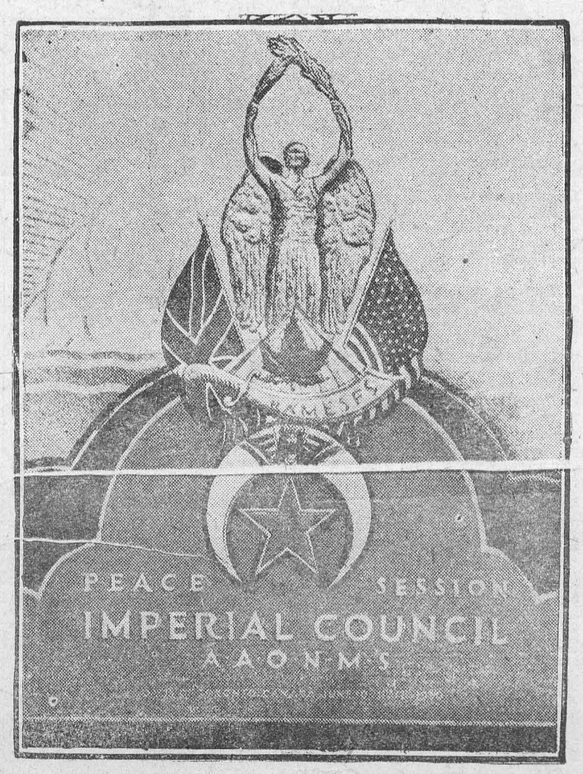
"My dear, I want to speak to you seriously."

"I probably deserve it, papa. I know I have been neglecting the children lately."

"It isn't that, but aren't you neglecting your game of bridge?"

Statesmen in London ought to be cautious, no doubt, but the discouragement of some suggests they are determined to burn their bridges in front of them.

Toronto to be Host to Huge Convention



PROGRAM COVER READY FOR JUNE MEETING

Clemenceau's Book Dramatic, Violent

Late "Tiger of France" Attacks Foch, Pershing, Poincare and Lloyd George; Germs of New War Developing

Paris.—The first information obtained here on the contents of the late Georges Clemenceau's book, "The Grandeur and Disillusionment of a Victory," which will be published shortly by the "Tiger's" family.

In this work, which was written during the last summer of his life, the former Premier relates in detail the entry of American troops into the World War, the last episodes of the struggle, the signing of the Armistice and the negotiations for the Versailles treaty.

The book is said to be dramatic and violent. With the ferocity which was habitual with him, the "Tiger of France" attacks Marshal Foch, General Pershing, Rene Viviani, Raymond Poincare and David Lloyd George, and gives vivid and sometimes ironical portraits of President Wilson, Balfour, Colonel House, Baron Sonnino and Ignace Paderewski.

In Chapter IV., which is considered the best of the whole volume, he tells of the critical situation of the Allied armies at the moment when the American troops began to arrive in France. Clemenceau implored Gen. Pershing to send his troops to the front as soon as possible to fill up the gaps in the French and British armies left by the last German attacks. But Pershing, who considered that the American soldiers were not yet ready to go into battle, asked the French Premier to give him time to train and organize them. The slow arrival at the front of the American troops, says Clemenceau, cost many French lives, and the Allies were near losing the war in the Amiens-Ypres sector.

Bad Strategist

The "Tiger" declares in his book that the late Marshal Foch was a bad strategist, although he concedes that the eventual victory was in a large part due to Foch's energy He recalls that only his personal intervention saved "the poor marshal" from losing his command.

President Wilson is called by Clemenceau, in the eleventh chapter of the book, a visionary whose high idealism clashed with European realisms and was reduced to nothing by the American statesman's lack of political experience

Clemenceau reveals that during the last months of the war and during the Armistic period he was in constant disagreement with Poincare, then President of France, whom he accuses of having ruined the victory. He portrays Lloyd George with much humor and declares that after the Armistice the Welsh Prime Minister became France's enemy.

The last chapters of "Grandeur and Disillusionment' 'are tinged with bitterness. Clemenceau admits at the end that he was deceived in his hopes that an era of peace would be the result of the World War. He dies, he says, with the fear that "to the accompaniment of the Geneva guitar" the germs of new violence and new war are being developed in the world.

Canadians Need Applied Research

Dr. L. V. Redman Forecasts Men Living in Comfort at North Pole

St. Catharines, Ont.—"Men will be able to live in perfect comfort and health anywhere in Canada up to the North Pole if research work now under way is successful, and there is every reason to believe it will be," Dr. L. V. Redman, a graduate of Toronto University, and now director of research for the Bakelite industries of America, told an audience in St. Catharines recently. He stressed the fact that what Canada needed most was applied research.

"Canada needs fresh fruits toward the end of the winter and in the early spring. Recent discoveries in the freezing of fish can be applied to fruit and the fruit will be delivered here and can be kept from one to six months with the same freshness that it had when it was originally picked," Mr. Hedman said.

"Canada has problems in agriculture. There is no reason to think that we cannot produce plants hardy enough to produce as much up at the 75th parallel as is now grown at the 40th."

The Old Man—"So you're the prodigal son and are going home, eh?" I suppose your father will kill the fatted calf."

The Young Man—"I hope not—for I think I've been the calf."

Elks Damaging B.C.. Orchards

Penticton, B.C. — British Columbia fruit farmers are complaining regarding damage being done to young fruit trees by about 90 elks.

Twenty-five of these animals were released at Adra five years ago and their numbers have increased to 90. They have divided into herds, one of 60, and the other 30 animals.

Game wardens have recommended thta the elks be corralled and shipped to some point away from the orchard district.

Feudal Times Recalled by Scottish Claim

Baroness Herries of Terregles Exacts Tribute from "Feuars"

Edinburgh. — An echo of feudal times, when a vassal if he did not go to war for his superiors had to send a substitute or pay a sum of money, comes from Dumfriesshire, where the Duchess of Norfolk is exercising her right as Baroness Herries of Terregles to exact the tribute from the "feuars' of her patrimonial lands.

Feu in Scotland is the common mode of land tenure, and in feu-holding proper the tenant, in addition to a substantial annual payment of money in return for the enjoyment of the land, is also obliged to pay "casualties' or additional payment to the superior of the land held in feu contingent on the happening of certain events.

Under the Feudal Casualties (Scotland) Act, 1914, all such casualties that had not been redeemed or commuted by January 1, 1930, were to be extinguished and discharged, and it is this Act under which the duchess is taking action.

The amount of money at stake is said to amount to £20,000, ond the demands vary from £20 to £150.

It was stated at a meeting of the property owners concerned that considerable uncertainty existed as to the liability of some owners to pay, owing to the age or want of title deeds. These owners decided to become passive resisters.

M.P.'s Intention

Where the title is established and liability admitted it was agreed to present a memorial to the duchess pointing out the depression of the times and the hardship the payment of the sums demanded would mean to many.

Major Dudgeon, M.P. for Galloway, has declared his intention of bringing the cases to the notice of the Solicitor-General and the Lord Advocate for their opinions.

The last time "casualties" were demanded in Dumfries was in 1884.

The Duchess of Norfolk, who is 53, is the mother of the present duke, who is Hereditary Earl Marshal of England and premier duke and earl. He came of age last year. His father died in 1917.

Plant Diseases Costly in Canada

Dominion Botanist States Wheat Rust Alone Costs $25,000,000

Canada's annual loss through plant diseases is more than three times the value of the Dominion's mineral output and more than four times the value of the output of fisheries. H, T. Gussow, Dominion botanist, stated in a lecture under the auspices of the McGill chapter of the Sigma XI Society in the Biological Building, on "Warfare with Plant Disease in Canada."

Wheat rust alone caused a loss of some $25,000,000 yearly, the greatest amount being in 1916, when an estimated loss of $200,000,000 was borne by western wheat growers, Mr. Gussow said in dealing with the economic importance of plant disease.

It was found that the spores which infect the wheat travel by air, germ particles being collected by an airplane at a height of 8,000 feet. The great movement of the spores is northwards from nited States, where wheat maturing earlier gives rise to a great number of black rust spores, which move north to attack Canadian cereals.

It was impossible to erect a barrier against these, so that efforts have been turned to the production of rust-resisting varieties of wheat, of which some four have been discovered, though yielding a lesser quantity of cereal. Mr. Gussow was optimistic concerning this avenue of plant research.

Aliens Dominating Alberta Oil Field

British Public Urged by Geologist to Support Development

London—In a paper read at the Institution of Petroleum Technologists, E. A. Cunningham Craig, an English geologist well-known in Western Canada, scored the apathy of British capitalists in allowing an important oilfield to pass under control of aiens. Mr. Craig sounded an alarm in the following words:

"It would be difficult now for a British company to acquire any large interest in the most promising Alberta oil areas without paying high prices. What is required now is the formation of a few large and well-organized companies, managed in Canada by men with local knowledge and supported financially from Britain. It is not in the best interests of the British Commonwealth tha tthe control of these new oilfields should fall into alien hands.

"That danger is fully realized by Canadians. There is a greater work to be done and it is little less than disgraceful that the Mother Country is taking so little part in this important development."

Votes for Quebec Women

Chatham News: We predict that the women of Quebec will eventually get the vote if they stick to the fight long enough. There seems to be disposition on the part of legislators to give the women anything they ask for, including the right to sit in the Senate. Premier Taschereau seems to be an outstanding exception to the rule, but even he may in the end find that it is impossible to hold out all alone.

13th Edition

NEW
and ENLARGED EDITION
BROCK'S BOOK on BIRDS

Send for Your Copy Today

This wonderful book on birds is a new and revised edition replete with 342 pages of valuable information on the care and feeding of cage birds; including 80 pages of practical advice on the treatment of bird diseases.

Will the South Pole Supply Our Heat?

"Highly carbonaceous material"—in other words, coal, of sorts—has been found on Mount Nansen in the Antarctic, by Dr. Lawrence Gould, geologist, of the Byrd expedition.

His report, as given in part over the radio by Admiral Byrd, is thus quoted in the New York Times:

"I have been able to make many glaciological studies, and my geological studies will demonstrate that the great mountain ranges which take their rise far away on the western side of Ross Sea are continued as major features of landscape in fairly unbroken fashion, certainly as far as 140th meridian.

"Capping Mount Nansen I did find sandstone with layer of highly carbonaceous material. Had to climb up 6,000 feet in part over steep, badly crevassed glacier in order to reach these cap rocks.

"No symphonies I have ever heard, no work of art before which I have stood in awe, ever gave me quite the thrill that I had when I reached out, after this strenuous climb, and picked up rock to find it sandstone. Here was what I had come all the way to the Antarctic to find."

Commenting on this report, and on its significance, Prof. Griffith Taylor, of the University of Chicago, who was Senior Geologist of the British Antarctic Expedition of 1910-13, makes the following statement to The Times:

"In 1909 Shackleton brought back the account of seven thin seams of coal which Wild and he had seen at the head of the Boardmore Glacier.

"Sir Edgeworth David, who accompanied Shackleton, is of the opinion that one of the world's largest coalfields may lie under the thousands of feet of the ice on the Ice Plateau.

"It is, of course, impossible to estimate the area of this hypothetical coal-field.

"David thinks this coal-field may cover 100,000 square miles, but all must agree that it is very inaccessible while the coal so far discovered is of poor quality. However, nothing can detract from the interest in these discoveries of coal near the icy poles.

"It is to be hoped that Dr. Gould can find fossils in his interesting carbonaceous material"

ASK YOUR BARBER

NO MORE STOMACH TROUBLE

"No more stomach trouble. Can eat anything," writes Mrs. E. White. Thousands say indigestion, heartburn, gas vanish like magic with "Fruit-a-tives". Constipation, sick headaches end overnight. Nerves, heart quiet, sound sleep at once. Rheumatism flies away. Complexion clears quick. Get "Fruit-a-tives" from druggist today.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

Extraterritoriality in China

Singapore Free Press: Logically if the Chinese claim an abolition of the extrality they must be prepared practically, and not simply in theory, to allow aliens that freedom throughout the whole of the country which is assured to Chinese citizens who go to other countries. At present foreigners are only allowed in certain places in the country and practically on sufferance, that is to say they are not, under the old regulations, allowed the customary freedom of foreigners in any part of the country. China, if she claims to sweep away all specialized privileges, must logically be prepared to ensure all generalized privileges, and, at present at any rate, it is quite impossible for any such assurance to be given.

BURDEN OF SHIRKING

Only those really know the ease of living who never try to dodge the hard things in life. For the easiest time to do a hard thing is when it first makes its appearance. If we would double its difficulty, we need only postpone it once; if we would make it four times as hard, a second postponement will insure this. And if we would have the drag and the nightmare of shirked duty alawys with us, so that life itself becomes a chronic burden, we must simply make our postponement of our hardest duties permasent. Tribulation lies ahead for anyone who will grapple his hard tasks promptly. Joy and strength and the exhilaration of ever-increasing power are assured to one who seeks the ease of instant duty-doing. We are hardest on ourselves when we try to save ourselves from hardship.

A vamp used to have a wicked glint in her eye—now she has it in her hair.'

Check Falling Hair with Minard's.

A professor says the respect children used to have for their parents fifty years ago is not in evidence to-day. Maybe it's because the old folks are so wild.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to [illegible] all the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Canada's Newest Seaport

Ottawa.—When Churchill, on Hudson Bay, Canada's newest seaport, is opened sometime in the summer of this year, it will be the scene of an interesting social experiment. The land within the limits of the townsite will not be sold but will be leased by the Manitoba Government, under whose administration the townsite comes.

Since Churchill was chosen in 1917 as the seaboard terminal of the Hudson Bay Railway it has been a great camp, with hundreds of workers engaged in harbor and railway construction in the summer and a small staff in charge of the plant in winter. But, as the chief depot of the new transatlantic route by way of Hudson Bay, it is expected to be at once a centre of important interests, such as transportation, mining, grain handling and fishery. The harbor improvements that have been planned cannot be finished earlier than 1932, and the presence of the army of workmen engaged in this development will give the new town a favorable start. Rail conection is now completed over the whole stretch of 511 miles from The Pas to Churchill. Regular trains run over a part of the line, but winter connection is not maintained at present to the Bay. The entire line will, it is expected, be in regular operation in the spring of 1931.

Though the future of Churchill is regarded very favorably by many, the inflation which has attended such sentiment in the case of other prospective railway centres has been wholly prevented by the refusal of the Manitoba Government so far to give rights in lands of the townsite. The provincial government of Manitoba, availing itself of facilities afforded by Dominion authority, has prepared plans for the development of several towns of the north, including Churchill. It is expected that Churchill will be open to newcomers early next summer. The effects of planning and of the new system of landholding will then be seen.

The Hudson Bay Railway has been built by the Canadian Government and will be operated by the Canadian National Railways.

DO NOT LET YOUR BABY SUFFER

Baby's Own Tablets Are Just the Help He Needs.

At the cost of a few cents every mother can add to her own happiness and to her children's safety, for, while the cost of Baby's Own Tablets is small the value of these Tablets to every home where there are little ones is exceedingly great.

What mother does not suffer when her little ones are suffering—when they are undergoing the tortures of the teething period; the agonies of constipation and indigestion, or the miseries brought on by colds or simple fevers? What mother can sleep when her child does not sleep? She can banish these troubles, however, and in banishing them she is making a happy household, for the happy child makes everyone else happy.

To banish childhood suffering Baby's Own Tablets should always be kept in the home. They are recognized the world over as an absolutely safe and efficient remedy for little ones. They are a mild but thorough laxative and through their action on the stomach and bowels never fail to banish any of the minor ills of little ones. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Empire and the Privy Council

Bombay Times of India: We in India are not concerned with the political aspect of the question raised by Mr. Blythe's speech in the Dail Eireann with regard to the right of appeal to the Privy Council. How far it is covered by the Anglo-Irish Treaty or by the deliberations and decisions of the Imperial Conference must be left to the parties concerned to say. But in its general aspect the question is of great interest and importance to every part of the Empire. . . . In a place like India, where age-long prejudices and the conflict of communal and religious sentiment are not without their influence upon the courts of law, the existence of a tribunal of ultimate appeal, far removed from local influences, and the authority and impartiality of whose judges have never been questioned, is not a matter of small consequence. . . . It would be long before a tribunal of equal status and authority with the Privy Council could be established in any part of the Empire. At least, so far as India with its peculiar difficulties, is concerned, the question of abolishing the right of appeal to the Privy Council should be carefully and dispassionately considered, and no attempt made to sweep away that right in a tide of unreasoning nationalism and local patriotism so common in these days.

Eletricity in Ireland

Dublin Weekly Irish Times: The Shannon scheme is a national undertaking. Its mere existence is a tribute to the progressive spirit of the Free State Government, and it may be argued that, even if the scheme should be a partial loss, the money has been well spent. In the first place, after years of destruction and wreckage, something really impressive has been built in Ireland. The works on the Shannon probably are the finest of their kind in the world, and their progress during the last few years has been a valuable education to the people. In the next place, electricity has been introduced into many places in the Saorstat which previously had not progressed beyond the stage of the oil lamp and the turf fire. The moral value of the change is incalculable.

Minard's—The Great White Liniment

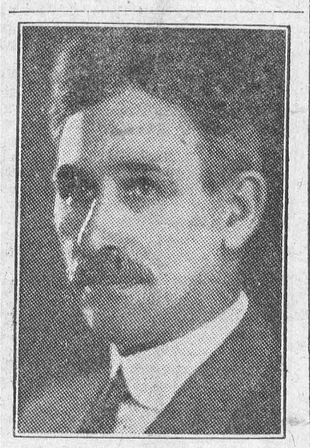
Government Annuities Grow In Popularity

Tremendous Increase of Purchasers Noted in Recent Years

The old gospel of "Sufficient unto the day is the evil thereof" is being greatly modified by Canadians, according to recent advices. People throughout the Dominion are taking an intensified interest in companies and institutions that aid them to sucure financial protection for their old age.

This awakening of interest has been particularly noticeable in the purchase of Government Annuities during the past few years. In 1908 this system was inaugurated by the Dominion Government to encourage thrift among the people and to enable them to provide for their declining years. In return for small regular payments each purchaser at the age of 65 become entitled to an income for life.

Since assuming office the Honorable Peter Heenan has taken a particularly keen and whole hearted interest in



Hon. Peter Heenan

this branch of his department work with the result that there has been a tremendous increase of purchasers. During his administration additional offices were opened and more representatives installed throughout the country. The radio was pressed into service. More extensive advertising was launched through newspapers and other periodicals. Postmasters in rural centres were urged to co-operate in the scheme and point out its advantages to the people in their communities. The result of all this publicity established new high records in the annual number of purchasers. In fact the number of applicants and the amount of purchase money received during the past three years has almost equaled that received during the preceding eighteen years. The number of contracts made from 1908 to the present day is nearly 12,000 while the total amount of annuities purchased has reached the sum of twenty-four milion dollars.

The Annuities System is designed to benefit the people. All administration costs are borne by the Government and no charge is made against the annuity purchaser. Operating without profit, the Government is enabled to allow extremely low rates and guarantee full benefit for the money paid in.

Luxury Vegetables

Glasgow Herald (Cons.): The retail cost of the 250,000 tons of luxury early potatoes which invaded our markets last year would run to the huge sum of £12,000,000, whereas the same quantity of home-crop potatoes (which were available at the time) could have been bought on a retail basis of 9d per stone at £1,500,000. It is easy to calculate what that means. Our consumers were ready to sacrifice £10,500,000 needlessly on imported potatoes in order to satisfy what has been called the depraved appetite for moist early produce. All of that huge sum, of course, did not go abroad. Of the £12,000,000 spent on these imported earlies only £3,000,000 actually left the country. But a more prudent use of this spending power would have saved our farmers from much of their present trouble, and would also have helped to fertilize other branches of our consuming markets.

The Dole

London Daily Herald (Lib.): By some miraculous lapse of memory large numbers of people appear to have entirely forgotten that the workers do pay a very large sum of money every year as their contribution towards the National Unemployment Insurance Fund. In the same way the employers and the State pay their shares duly allotted to them by Act of Parliament. Moreover, these contributions are compulsory. A workman in employment could not escape if he would. Yet there are some people who are always blackguarding him if he accepts a payment out of this Insurance Fund to which he has compulsorily subscribed. It is just as if a man who had subscribed to a compulsory superannuation fund was condemned as a slacker when he took his retiring pension.

COMFORT

There is a comfort in the strength of love;
'Twill make a thing endurable, which else
Would overset the brain or break the heart. —Wentworth.

"After Baby, Was Weak, Skinny. Gained 22 Lbs."

Ironized Yeast did it, says Mrs. Benoit. Thousands say 5 to 15 lbs. gained in 3 weeks. Nervousness, constipation vanish overnight. Skin clears like magic. Get Ironized Yeast tablets from druggist today.

ISSUE No. 7—'30

WHY SHOULD HE *suffer from rheumatism like this?*

IF he would accept the advice of thousands of men and women, he would find relief by taking Dr. Williams' Pink Pills. Rheumatism is not a surface ailment that can be banished by rubbing with liniments or oils. Watery, poison-laden blood must be built up and purified before there can be any progress toward permanent recovery.

Time and again, sufferers have proved the value of Dr. Williams' Pink Pills in the treatment of rheumatism. "For some years," writes Thomas Martin, of Novar, Ontario, "I was so badly troubled with rheumatism I could hardly walk and suffered great pain. I had medical treatment but did not get much relief. After taking Dr. Williams' Pink Pills for some time the trouble disappeared and has not since shown the least sign of returning."

Start today to relieve your rheumatism. Buy a box of Dr. Williams' Pink Pills at your nearest druggist's or, postpaid, by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ontario. $.13

Dr. Williams' PINK PILLS

"A HOUSEHOLD NAME IN 54 COUNTRIES"

THE PASSSING OF THE PIONEER

Down the last of the trails they are bearing,
In a solemn and glorious line,
Through the valley of death they are faring,
With a soul unafraid and divine—
The old pioneer fathers are passing,
And this think ye shall take for a sign.

For with every white head that is sinking,
For with every aged heart that is dead,
Ye are losing gold threads in the linking
Of traditional days that are spread,
The dumb epic eternally sped—
With the gift of their stern retribution
Which now carpets the path that ye tread.

There is never a zephyr soft-sighing,
Where the primaeval forest once lay,
Theer is never a patriarch dying,
But a story is passing away—
And a glory is passing away—
Of the humble who founded a nation
In the travail and stress of the day.
—Cameron Kester.

SUCCESS

To know how to bide one's time is the secret of success. To be impatient for results means failure to get any results which are worth while, for all good things grow slowly. Merely to wait like Mr. Micawber for "something to turn up" is to accomplish nothing; but to sow seeds, and then more seeds, and occupy ourselves with something else while waiting for the harvest, will bring the success for which we wish.

Minard's is Best for Grippe.

A mother named her little daughter Marigold because she hoped she would.

The East in Her Garden

The East is full of secrets—no one understands their value better than the Oriental; and because she is full of secrets she is full of entrancing surprises. Many fine things there are upon the surface: brilliance of color, splendor of light, solemn loneliness, clamorous activity; . . . the essential charm is of more subtle quality. As it listeth, it comes and goes; it flashes upon you through the open doorway of some blank, windowless house you pass in the street. . . . . Then the East sweeps aside her curtains, flashes a facet of her jewels into your dazzling eyes, and disappears again with a mocking little laugh at your bewilderment . . . She will not stay—she prefers the unexpected; she will keep her secrets and her tantalizing charm with them, and when you think you have caught at last some of her illusive grace, she will send you back to shrouded figures and blank house-fronts.

You must be content to wait, and perhaps some day, when you find her walking in her gardens in the cool of the evening, she will take a whim to stop and speak to you and you will go away fascinated by her courteous words and her exquisite hospitality.

For it is in her gardens that she is most herself—they share her charm, they are as unexpected as she. Conceive on every side such a landscape . . . a grey and featurless plain, over which the dust-clouds rise and fall, build themselves into mighty columns, and sink back again among the stones at the bidding of the hot and fitful winds; prickly, low-growing plans for all vegetation, leafless, with a foliage of thorns; white patches of salt, on which the sunlight glitters; a fringe of barren mountains on the horizon . . Yet in this desolation lurks the mocking beauty of the East. A little water and the desert breaks into flowers, bowers of cool shade spring up in the midst of dust and glare, radiant stretches of soft color gleam in that grey expanse. Your heart leaps as you pass through the gateway in the mud wall; so sharp is the contrast, that you may stand with one foot in an arid wilderness and the other in a shadowy, flowery paradise. Under the broad thick leaves of the planetrees tiny streams murmur, fountains splash with a sweet fresh sound, white rose bushes drop their fragrant petals into tanks, lying deep and still like patches of concentrated shadow. The indescribable charm of a Persian garden is keenly present to the Persians themselves—the "strip of herbage strewn, which just divides the desert from the sown," an endlessly beautiful parable. Their poets sing the praise of gardens in exquisite verses, and call their books by their names.—From "Persian Pictures," by Gertrude Bell.

POVERTY

Poverty overtakes him who says "Tis too cold, 'tis too hot, 'tis too late," and neglects his daily work; but he who, performing his manly duties recks not a straw for heat or cold, his happiness not decay.

A medical expert now comes forward with the statement that setting-up exercises are not beneficial and may even be harmful, a discovery we made these many years ago by standing too near a radiator while doing them.

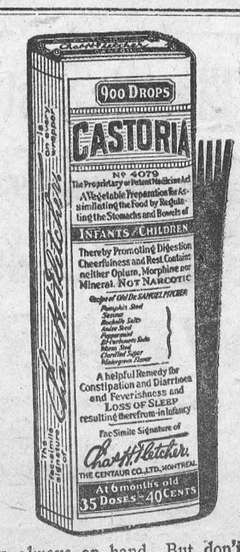
Winter Sickness

Keep Minard's handy. It has proven invaluable for many cold weather ailments.

MINARD'S "KING OF PAIN" LINIMENT

for SORE THROAT
BUCKLEY'S MIXTURE
Acts like a flash
A SINGLE SIP PROVES IT

When BABIES are upset



Baby ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you meet this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless but effective remedy for children; nothing that acts quite the same, or has quite the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria; the genuine bears Chas. H. Fletcher's signature on the wrapper.

A Different Woman

"I have great pleasure in informing you that Kruschen Salts have worked wonders for me. I have been a great sufferer of liver and kidney trouble, and after trying one bottle I am a different woman. I had to give up my work, but thanks to Kruschen Salts I am back at work again, and I give my son a little every morning, and I don't hear of the little complaints now which a child generally gets. He is happier and brighter. I have enclosed a snap-shot of son and self. I am 43 years, boy 6 years. I shall always highly recommend Kruschen, and I would not be without them myself in a hurry." —(Mrs.) M. P.
Original letter on file for inspection.

Kruschen Salts is obtainable at drug and department stores in Canada at 75c. a bottle. A bottle contains enough to last for 4 or 5 months—good health for half-a-cent a day.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c. package.
This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorised to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1750). Importers: McGillivray Bros. Ltd., Toronto.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did." —Mrs. Milton McMullen, Vanessa, Ontario.

Every Bell Telephone is a Long Distance Station

Quicker Service— and cheaper *than ever before*

Long distance telephone service is constantly improving. Seventy per cent of long distance connections are now completed while the calling party holds the line.

In 1927 it took an average of 5.8 minutes to complete connection. In 1929 the average was 3.5 minutes per call and many calls, of course, are put through on the instant.

And with this greater speed there have been two reductions in long distance rates within the last year. Every Bell telephone is a long distance station today, making speech possible across the province or the world — more quickly — and at lower rates — than ever before.

Bring the boy along and have him measured for a Tip Top Suit or Overcoat. All one price $24.

A. E. GOODFELLOW, Winchester, Ont.

SPORT NEWS

In the first game of the Ottawa City Finals, Montie's defeated Shamrocks, 3-2. The series is the best two out of three, therefore anything can happen before the winners are declared.

During the past week hockey activities have been at a standstill in the Town League owing to the mild weather. All play-off games had to be postponed, but colder weather is looked for and these games will be played at a later date. The first game of the Semi-Finals between the Thistles and Royals will be played tomorrow night and the second game on Monday night. The winners of this series will play the Speedboys on Wednesday and Friday of next week.

Chesterville Juniors defeated Cornwall Juniors 1-0 at Chesterville on Monday night, winning the rounds 3 goals to 2. They will now meet Perth who were successful in illiminating Almonte Juniors. The first game was played at Perth last night when Chesterville lost out 4-1. The second game takes place in Chesterville on Friday night, but it is hardly possible that Chesterville can overcome the lead taken by Perth last night.

Brockville eliminated Almonte in the O. H. A. Play-downs 2-1. On Monday night they played the Montcalms of the Ottawa Intermediate League and defeated them 1-0. Last night the return game was played at the Auditorium, Ottawa, resulting in a 2-1 score for Brockville, who take the round 3 goals to 1. Brockville will now meet Cornwall the first game to be played on Friday night.

Winchester Springs

Miss Lola Hummel who spent the past week with friends at Chesterville, returned home on Sunday, accompanied by Mr. Clifford Young and Mr. Ed. Hummell.

Mr. and Mrs. A. J. Casselman and baby Melba, returned home on Monday after spending sometime with Mr. and Mrs. Madric Launderville and other friends in Ottawa.

Mrs. A. E. Holmes and daughter, Lou., spent a few days with the former's mother at Russell.

Mr. and Mrs Aden Casselman and son spent one day recently with Mr. and Mrs. H. Whitteker.

Mr. and Mrs. H. Patterson entertained a large number to a house party on Friday evening.

Mr. and Mrs. W. McIntosh spent Friday with Mr. and Mrs. A. Johnston of Toye's Hill.

Mr. and Mrs. A. J. Casselman and baby spent Wednesday with Mrs. A. Coleman, of Toye's Hill.

Messrs. Byron and Vincent Steele and sister, Lyndia, were entertained to a tea on Wednesday evening at the home of Mr. and Mrs. Orren Casselman.

Mr. and Mrs. Frank Nesbitt and baby spent Sunday with Mr. and Mrs. Ross Morrow.

Over 70 friends and neighbors gathered at the home of Mr. and Mrs. Grant Johnston on Monday evening to bid them farewell before leaving for their new home at Massena, N. Y. The evening was spent in music, games and dancing. Mr. and Mrs. Johnston were called to the centre of the room by Mr. Heber McIntosh. A short address was read by Mrs. Earl Munroe while Mr. McIntosh presented them with a purse of money. Mr. Johnston, on behalf of his wife and family, thanked the people for their kindness and gave all a pressing invitation to come and visit them in their new home. All joined hands and sang 'For they are jolly good fellows" Lunch was then served by the ladies.

Harness Repairs

I wish to announce that I am still continuing my father's Harness Repair Business at the old stand at Vancamp. All kinds of harness repaired at reasonable rates.

A Boys' Service

Despite the inclemency of the weather and the prevailing epidemic there was a fair congregation at the service in the United Church on Sunday morning. In his talk to the children the pastor, Rev. J. A. Waddell, told of Benjamin Gregory, a native of Burn, Yorkshire, England, who is now over 84 years of age, and who has walked over 25,000 miles to Church in the past 64 years. As his home is two miles away his walk to morning and evening service is eight miles.

For over half a century his attendance was unbroken. Mr. Waddell paid a deserved tribute to a member of the congregation, Mrs. Rachel Timmins, whose regularity of attendance at Church is known to all despite the fact that in a few weeks she will have reached her 94th birthday.

The message to the adults was based on Acts 10-38 "Jesus of Nazareth who went about doing good." His subject was "Casual Contact." He said some of the most valuable opportunities we have of helping folk come by way of casual contacts. He pointed out how the lives of Zacheus the publican, the Woman of Samaria and others were led out into a new world of thought and feeling and actiou through "casual contact" with the Great Teacher. Jesus, he said, was always at his best and pointed out that our gravest danger was in easy satisfactions and low expectations. When we fail to be less than our best we fail to awaken the best in others.

In closing he asked what has been the result of our "casual contacts" this past week? What influence have we brought to bear upon the stranger within our gates, the man from another land,—What impressions of Christ has he gained from his contact with us? How about the man on the street, our neighbor, those with whom we have business transactions, or perhaps someone with whom we have had some difference of opinion? Have they discovered anything of that Christlikeness of Spirit that should characterize his followers? Let us remember, he added, that these "casual contacts" are leaving their impress either for good or ill upon others.

The evening service was one of enthusiasm and uplift It was conducted entirely by members of the Tuxis and Trail Ranger groups and was part of the program of "Boy's Work" as outlined by the Ontario Boys Work Board. Harold Beach the local member of the Boys' Parliament presided. Gordon Lannin, mentor of the Trail Ranger group led in prayer. Fifteen boys, who had been well-trained by Miss Helen Smith, gave two appropriate and soulful musical numbers, Lester Bell and Angus Adams taking the solo parts in a very pleasing manner In a forceful and challenging address "Mac" Singleton presented the work of the C. S. E. T. program for boys indicating that the whole objective of this program was that boys might be trained to render more efficient service in the home, the Church, the community and the world.

He defined the word "Tuxie" pointing out the program was "Christ Centred" with you and I on either side training for service. Referring to his text which was found in John 15:11 & 12 he said "Christs whole life was one of definite service. His parables, his miracles, his contacts with others all reveal this purpose, and that should be the note of our Christianity. We should not have a self-centred religion but a Christ-centred one. The positive rather than the negative note should ring out. We are indebted to others he remarked and the testing is seen in our attitude to the smaller things of life. Let us render our service not in terms of obligation, but in terms of unselfish consecrated service. In closing "Mac" made a definite appeal for a high standard of leadership and called on all present to be true to the high ideals of life. To catch the Christ ideal, follow His lead and develope life in the fourfold way.

During the morning service the choir sang most effectively the anthem "Sing and Rejoice" At the close of the sermon Mrs Durant, Mrs. Steele and Messrs E. Shaver and H. Annable sang very sweetly that old favorite hymn "Let the lower lights be burning" adding very greatly to the effectiveness of the morning message

During the service feeling reference was made by the pastor to the passing away, through the week, of two former members of the congregation, Mr. Merrick Durant and Mr. A. B. Hough.

The Way of Life
By BRUCE BARTON

I Reassure a Mother

A MOTHER writes me about her son's reading. Among other things, she says:

"In spite of all I can do or say, he insists on reading stories. How can I correct this habit?"

Frankly, madam, I do not know.

It is about as easy to cure a boy of eating as it is to destroy his love for good stories.

Centuries before there was any writing, story-tellers drifted about from village to village, gathering the people together and telling them stories.

The love of fiction is as old as that—older than recorded history, older even than civilization. It can not be rooted out: its roots run back too far.

And why should you want to root it out?

The greatest Teacher that ever lived spent half His time telling stories to His disciples. "Without a parable (a story) He taught them nothing." These stories have transformed humanity.

One great story written in our own country, "Uncle Tom's Cabin," so stirred men's hearts that they said, "Slavery must go."

Good stories will not hurt your boy: they may, if he is the right kind of boy, inspire him to real achievement.

And they will do something else for him, equally important. They will develop his imagination.

We have too little regard for the high value of the imagination, we Americans. We are too matter-of-fact. We forget that all great inventions, all great discoveries, all great achievements in science or business, came to pass because some man first had imagination enough to conceive them.

Many men have been hit on the head by a falling apple. Newton, when the apple hit him, had imagination enough to formulate the law of gravitation.

Many men have been burned by their wives' tea-kettles. Watt had imagination enough to conceive the steam-engine.

Look through the pages of history, and you will discover that the leaders of men have been those who could dream great dreams and carry them out—the men of powerful, intelligent imagination.

Because this is true, the editor of a magazine that prints stories has a responsibility that he must take seriously if he is any sort of man at all. He is intrusted with the duty of stimulating the imagination of thousands of children of mothers like you.

He may, if he choose, publish stories whose appeal is to the baser side of the imagination—and even achieve a certain sort of circulation increase for his magazine by so doing. Or he may regard every mother among his readers as if she were his own mother, and every mother's son as a younger brother.

You need not concern yourself because your boy likes stories. But are the stories he reads the right kind of stories—do they appeal to his imagination on its best and highest side?

That is the important question for you
