Our Column

The older people think this a real old-fashioned winter.

Nowadays it's a wise father who knows as much as his own son.

Business doesn't come back. You have to go after it. Advertise.

What is it that everyone is doing at the same time? Growing older.

Don't forget to send a Valentine tomorrow, and send one that will give joy, not sorrow.

"It's not the big things you do that count in the eyes of God. It's the small things you do in a big way."

The Government snow plow is certainly doing good work in keeping the Morrisburg-Ottawa highway open this winter.

The Cornwall Public School Board has gone on record as not in sympathy with a movement to have the summer holidays of Ontario schools extended to Sept. 15th

An Irish motor truck driver was charged with reckless driving in having stopped his truck so suddenly that a car behind smashed into him.

The judge asked him why he had not held out his hand. Pat indignantly answered; "If the poor fool couldn't see me truck, how in hiven's name could he see me hand?"

The Winchester Press extends congradulations and best wishes to our good townsman and fellow citizen, Mr A. Sweet, who first saw the light of day just seventy-seven years ago this the 12th day of February. For a man of his years, Mr. Sweet is some boy. Long may he continue to enjoy good health and prosperity.

We generally take the advise of experts, but merchants are sometimes slow in this respect. Men who have studied the situation from every side, and who have made it their business to find out, say that newspaper advertising is not only the most effective, but that no man in business can afford to ignore newspaper advertising.

A modest Scotchman, in speaking of his family, said: "The Douglas family is a verra verra aul Scotch family. The line rins awo' back into antiquity. We dinna ken hoo far back it rins, but it's lang, lang way back and the history of the Douglas family is recorded in five volumes. In aboot the middle of the third volume, in a marginal note, 'Aboot this time the warld was created'."

St. Valentine's day comes on Saturday. Do you remember when you used to love to send, and dread to receive those Comic Valentines. This year the Valentines are particularly attractive, many even prettier than the usual Christmas Cards, If you want to send a Valentine to make someone real happy, send one to your own wife, as you used to send to your sweetheart before she became your wife. Try it and see what a change it will make in her countenance.

In the eleven years since the war United States investments in Canada have increased by $1,669,000,000; British investments have increased only $22,000,000; and other foreign investments have declined $23,000,000. In the past five years alone United States investments have shown a net increase of more than $1 000 000,000. Manifestly this country is an attractive field for the investments of outside capitalists. Evidently our friends across the borderknow a good thing when they see it, and know where the safe investments are.

About Dogs

It might be a good thing for dog owners to remember the Clause in the Municipal Act of the Province that says, "Any person may kill any dog which, in a township or village is found between sunset and sunrise straying from the premises where the dog is habitually kept, or is found straying at any time and not under proper control, upon premises where sheep are habitually kept."

Which is Right?

The dispute between the groundhog and the wild goose is apparently beyond the ordinary person to settle or solve, and all we can do is to await results and then determine which is right. The groundhog says six more weeks of hard winter, and crawls back into his hole. The wild goose says an early and warm spring, and starts on a flight to northern lakes. So there you are. Is it the ground hog or the goose.

Is It Right

The Press is not inclined to criticise overmuch, but we question the wisdom or the necessity of the women of Ontario raising and expending over $5000 for a pair of Emerald ear-drops to present as a parting gift to a lady who, with undoubted charming manners, and holding a high position, comes to our Dominion a comparative stranger, and goes away after a few years known to a comparative few. Our governments are voting large sums of money to relieve the poor and unemployed. There are thousands of people in our cities hungry and poorly clad. Five thousand dollars would go a long way to relieve this suffering. It doesn't seem right or fair.

Easter Sunday Comes Early in 1931 Calendar

Easter Sunday this year comes 15 days earlier than it did in 1930, while the 24th of May will tall on Sunday, so that the holiday will be celebrated on the 25th. Thanksgiving Day being observed on the Monday nearest Armistice Day, will be celebrated on November 9th. The holiday dates for year are:

Good Friday—April 3
Easter Sunday—April 5.
Easter Monday—April 6.
Victoria Day—(Monday), May 25.
King's Birthday—(Wednesday), June 1.
Civic Holiday—(Monday), August 3.
Labor Day—(Monday), Sept. 7.
Thanksgiving Day—(Monday), Nov. 9.
Christmas—(Friday), Dec. 25

LOCAL AND GENERAL

St. Jean Baptise Church, one of the sights of Ottawa, was totally destroyed by fire on Sunday morning last. The loss is said to be about $400,000.

Hon. T. A. Low, Renfrew, who held portfolio in the King Government, and a prominent public man died suddenly at his home on Sunday last in his 60th year.

The regular meeting of the Women's Guild of St. Matthias' Church will be held at the home of Mrs. T. O. VanBridger on Thursday Feb. 19th, at 2.30 p. m

Fire completelv destroyed the general store and farm machinery agency of Mr. Frank Crowder at Ventnor at 3.30 a. m. last Friday. In addition to having his stock of general merchandise destroyed by the conflagration, Mr. Crowder lost two new wagons, one cream separator and two new plows.

The Choir of St. Paul's Presbyterian Church, Winchester, will hold a Seven-Table Supper in the S. S. Rooms, on Friday, February 20th, from 5.30 to 8 p. m. Come and enjoy this unique way of partaking a full course supper, all for 35c. Everybody welcome.

Women's Institute

Next Tuesday the 17th, the February meeting will be held in the Town Hall at 3 p. m. Members will answer roll call by naming things that our grandmothers missed. There will be an interesting program and arrangements will be made for the Annual "At Home." Everybody is welcome.

705 Census Clerks

The Civil Service Commission has announced examinations to fill 705 male and female clerks' positions at Ottawa. Salaries range from $75.00 to $110.00 per month

Home Meetings

The W. M. S. of the Williamsburg United Church have been holding their monthly meetings in the homes of members, and the scheme has proved a very enjoyable as well as helpful one. The last meeting was held at the home of Mrs. M. O. Trickey. A poem by Edgar Guest was read by Mrs. M. Beckstead, and Mrs. Roy E. McIntosh read a very interesting and instructive paper on "History of the Early Japanese Church." At the close dainty refreshments were served.

Sheep Destroyed By Dogs

On Saturday morning last two dogs entered the premises of Mr. Ernest Christie west Main St., and so worried his flock of sheep that two ewes had to be killed and five others were very badly hurt. The damages amounted in all to $58, which the municipality has to pay. The dogs were traced to their owner's home, and as it was daylight, both Mr. and Mrs Christie are positive as to the dogs. It is the first case of its kind in this municipality in many years. The law requires that the dogs must be destroyed.

Annual Meeting of the Band

The annual business meeting of the Winchester Citizens' Band was held on Tuesday night last with a good attendance of members. Several items of business were discussed and the Treasurer's report received. There is an enrolment of 18 members at present and a very successful year was recorded. It was decided to publish a letter of appreciation in the Press to those who had given donations and other financial assistance during the year. When all accounts are paid there will be no balance in the treasury, but this is better than going behind. The following officers were elected:

President—F. Hogaboam.
Vice President—S. Anderson.
Treasurer—A. F. Utman.
Secretary—S. Dukelow.
Business Manager—W. F. Workman.

Mizpah Mission Circle

A program of exceptional interest was presented at the regular meeting of the Mizpah Mission Circle on Wednesday afternoon by the February group with Miss Mabel Suffell in charge. The devotional service on "Prayer" conducted by the President, Mrs. B. L. Carr, created a worshipful atmosphere which proved most uplifting. Miss Annie Walker introduced the 2nd chapter of the study book by taking all present on an aeroplane trip through the Japan of today, visiting the important cities, pointing out out the places of interest in each and especially calling attention to the work of the United Church Missions. This was followed by a brief summary of the work of missionaries of the past and present. Plans were completed for the Valentine Tea and Money Shower to be held at the home of Mrs. Adams on Saturday from 3 to 6. A social half hour was much enjoyed at the close of the meeting.

He Is The 79th Warden

Dr. J. H. Munro, reeve of Maxville, is the 79th Warden of the United Counties of Stormont, Dundas and Glengarry. A few years ago, or we might put it some twenty-five years ago, there was a strong movement for separation of the Counties, and Stormont and Dundas each wanted their own county seat, with county buildings, gaols, courthouses and all the rest.

In fact so strong was the agitation that it was almost on the verge of success when it was all upset by a circular issued and broadcasted throughout the Counties by a gentleman in Cornwall who was either Warden or a representative in the Legislature at the time. It showed the absurdness of the movement, the added expense to the counties, and the advantages of a strong union of the counties. Since then harmony has prevailed and although the Reeve of Cornwall and sometimes the Reeve of Lancaster gives the "solid front from Dundas" some hard knocks, it is done in a friendly way, and no hard feelings remain. We are not certain, but we believe it to be a fact that not a single member of the Counties' Council of 67 years ago is alive to-day.

LOCAL AND GENERAL

Next Wednesday being Ash Wednesday there will be a Celebration of Holy Communion in St. Matthias' Church at 7.30 a. m. and Evensong and Commination Service at 8 p. m.

Three men were killed at a level crossing at the west end of Ottawa, early Sunday morning, and two others badly injured. The car in which they were driving was hit by the C. P. R. Winnipeg train.

The Mizpah Mission Circle will hold a Valentine Tea and Money Shower at the home of Mrs. A. H. Adams on Saturday February 14th, from 3 to 6 o'clock. A cordial welcome is extended to all.

Driving a horse and sleigh on Highway No. 31, north of Winchester, Mr. Dillabough lost control of the animal, which ran into the path of an oncoming car, driven by Mr McIntosh of Williamsburg. The horse was ihjured, but not seriously, and the matter was satisfactorily settled between the parties concerned at the scene of the scene of the accident.

Three very creditable records have just been completed by Holstein cows and heifers owned by W. a. Fawcett, Winchester, their production averaging 13.064 lbs, milk containing 556 lbs. butter. One member of the trio, the four year old Lulu Keyes Sylvia, bred by Nicholas Ralph, Brockville, gave in her lactation period of 365 days, 14,908 lbs. milk containing 630 lbs. butter. Mr. Fawcett is highly regarded as one of the outstanding breeders of Holstein cattle in Dundas County.

A meeting of the Trail Ranger Group met at the home of Gordon Lannin's on Tuesday evening. A good program was given by the members, one boy giving a paper on "Overcoming Handicaps," and another giving two original poems. There was some discussion re a bond selling campaign. The social half hour took the form of a birthday surprise party for their pastor, Rev Mr. Waddell. Gordon Lannin, on behalf of group, presented Mr. Waddell with a book, "The Course of Life," by M. MacKimion, as a birthday gift and expressing to him the good wishes of the boys for many happy returns of the day. Mr. Waddell expressed his sincere appreciation of the gift and of the kind wishes of the Group, and the love which Mr. Waddell has for the boys is similar to that felt by the boys for their pastor.

Dainty refreshments were served by Mrs. Lannin.

The Old, Old Story

An advertiser in the Winchester Press writes us as follows, "Please discontinue my advt. in your paper for a while, until I can get caught up with the orders. Results have been very satisfactory." Another evidence of not only the effectiveness of newspaper publicity, but of the satisfactory results that follow if that publicity is through the column of the Winchester Press.

Our New Governor

It has been announced by Premier Bennett that the Earl of Bessborough is to be Canada's next Governor General. He is 50 years of age. He holds the title that goes back to the beginning of the seventeenth century. He is also Viscount Duncannon and Baron Bessborough, of Ireland, and Baron Ponsonby, of Sysonby. Right Hon. the Earl of Bessborough has had wide experience in Parliament, in war service and in financial affairs.

$10 Fine or 30 Days

Ten dollars fine or 30 days in counties' jail was the sentence handed out when Daniel Billings and Roy Dillabough were convicted of stealing a sheep from Henry Bellinger of Inkerman. Constable Frank Rose arrested the men on January 24th, and following a long investigation, the men were brought before Magistrate McCormick and were given the choice of choice of thirty days in jail or $10 and the costs of the case and sheep.

Was Well Known Here

Dr. Robert E. Webster, of "The Point," Maitland, for many years one of the best known surgeons in Eastern Ontario and equally well known as a breeder of horses and dogs, passed away suddenly on Monday morning near San Diego, Cal., whithea, in company with Mrs. Webster, he proceeded last month with the idea of spending the remainder of the winter. Dr. Webster had been a sufferer from heart trouble for some years and withdrew from active practice in Ottawa on that account. He was in his 62nd year.

Some Farmers Lose Their Whole Herd

The T. B. testers of cattle sent out by government authority have been going through the township of Mountain during the past two weeks, and as a result some farmers who two weeks ago were proud of their herd of fine cattle, are to-day practically without a single cow. In some cases the whole herd has been condemned, and in others only a few head have stood the test. As a result there has been an unusual shipment of cattle to Montreal, and during the past week over 600 head have been shipped from the stations of Mountain, Inkerman and Winchester, and during the next week it is expected as many more will be shipped. Many farmers are largely depending on their milk supply to tide them over the winter months, and this sudden stripping them of their cattle has left many of them in a somewhat embarassing position, to say nothing of the heavy financial loss in the compelled parting of their cattle at a very low figure, compared with what it will cost them to restock with T. B. tested cattle.

H. S. HOCKEY TO-NIGHT

Kemptville High School Girls' and Boys' Teams will play a double header with the local H. S. Teams at the Arena to-night. Both contests promises to be packed full of thrills so don't miss them. These games are the E. O. S. S. A. Playdowns. To-night at 7.30 sharp. Admission 25c and 15c.

SOCIAL AND PERSONAL

Mrs S. H. Merkley is visiting friends in Toronto this week.

Mr. Hugh Knowland of Prescott is spending the week-end at his home here.

Nurse Mary Deeks has returned to Winchester after nursing Mrs. Albert Hill at Vernon.

Mr. and Mrs. George Parish had dinner with Mr. and Mrs. Arnold Docksteader on Tuesday of last week.

Miss Muriel and Norma Robinson spent the week end with friends in Kemptville and Spencerville.

The many friends of Mrs. Charles Annable who has been seriously ill, will be pleased to learn she is now out of danger.

Mr. and Mrs. McNairn of Grantley were week end visitors with the latter's parents, Mr. and Mrs. Edwin Beach of Piety Hill.

The Misses Pauline and Edith Docksteader, of Ottawa, spent the week-end with their parents, Mr. and Mrs. Arnold Docksteader.

Miss Geraldine Summers has returned home after spending the past month visiting her sister, Mrs. F. A. Johnstone at Sundridge, Ont.

Mrs. Angus McLaughlin has received word on Wednesday that her husband is critically ill, and she left the same evening for Brockville.

Master Robert Preston, son of Mr. and and Mrs. G D. Preston, of Toronto, is spending a few days with his grandparents Mr. and Mrs. Robt. Rennick.

Mrs. G. Armstrong left the first of the week to attend a Convention of the Horticultural Society in Toronto, being a delegate from the local Society.

Mr. and Mrs. P. A. McGregor and little daughter Anna Lee attended the funeral of Mrs. McGregor's uncle, Mr. Graham near Mountain Station, on Monday.

Mrs. R. Bessin of Ottawa left to spend two weeks at the Hotel New Yorker in Atlantic City. On her return she will visit relatives in Hartford, New Haven and New York.

Mr. and Mrs. George Parish and daughter returned to their home at Smiths Falls on Tuesday, after visiting the former's parents at Huvelton, N. Y. and the latter's parents at Maple Ridge.

Miss Myrtle Grant of Cardinal who passed the Civil Service Examinations at the Brockville Business College in October was notified last Friday of her appointment to a position of typist in the offices of the Department of Pensions at Ottawa.

Visitors for Tea on Sunday evening at the home of Mr. Robert Carkner, Vernon were: Mr. Harold Sheldrick, Mr. and Mrs. Henry Stoodely, Mr. and Mrs. Ronald Carkner and daughters Hilda and Lorna of Vernon, Mr. and Mrs. Mac Carkner of Harmony, Mr. and Mrs. Pete Cumming and Christena of Russell.

Boys' And Girls' Workers Meet

A representative gathering of all denominations was present at the County Boys' Work Board meeting which convened in the United Church at Winchester Springs on Tuesday afternoon. After the devotional exercises and minutes of the last meeting had been read, the election of officers followed resulting in the re-election of Rev. J. A. Waddell, Winchester, as chairman, and Mr. John H. Meikle, Morrisburg, as sec'y-treasurer.

The report of Boys' Camp at Broder Island last July showed that while not so strong numerically as other years, yet from the standpoint of moral uplift, recreational enjoyment and definite work accomplished, this camp was the best yet held.

Those present were keenly interested in the work and the matter of promotion was thoroughly discussed. The following were chosen as publicity agents for their respective districts: Williamsburg Township—Brock Harper, Mountain Township—Stanley Coleman, Matilda township—Ray D. Gilder, Winchester Township—Harold Beach and Foster Fulton. It was decided to secure the services of Rev. D. T. I. Forsyth of Montreal, who has been the popular swimming instructor at Camp during the past two yearr, as Camp Director this coming season.

The matter of Father and Son services was considered as well as the matter of a Boys' Conference to be held in the early spring. The following Bible Study leaders were appointed for the Camp next July: Rev. H. O. Lloyd, Ormond, Convenor; Rev. A. M. Russell, Williamsburg; Rev. Archdeacon Carson, Morrisburg; and Mr. Roy D. Gilder, of Iroquois. Arrangements were also made to secure the services of Mrs Conley, who has been the efficient cook since the beginning of Broder Island Camp. Mr. George Challies, M. P. P., and Mr. J. H. Meikle, of Morrisburg, were authorized to secure if possible a portable building to be used for camp purposes. It was decided to hold a meeting early in May to complete all Camp arrangements.

Owing to the absence through illness of Mrs. McLean Morrisburg, Chairman of the Dundas County Girls' Work Board, it was decided to adjourn and meet at the call of the chairman at a later date and arrange leaders, committees and work for the Girls' Camp which follows directly after the Boys' Camp.

Appreciation

Winchester. Feb, 11th,

To the Editor:

Dear Sir:—Through the columns of the Press we, the members of the Citizens' Band Committee, desire to express our appreciation and gratitude toward all those who have helped the band financially during the past year. We are deeply indebted to Messrs. Hart Melvin and Hy. Bessin for a donation of $10.00 each, also to the members of the Women's Institute for the splendid assistance they rendered the Band by taking up collections during the summer months, and also to those who contributed via the Women's Institute towards the Band Fund. These extra donations have enabled the executive to close the year with practically a clean sheet. Thanking you, we remain

F. Hogaboam, President.
S. Anderson, Vice President.
A. F. Utman, Treasurer.
S. Dukelow, Secretary.
W. F. Workman, B. Manager.

Quaint Seventeenth Century "Traders' Tokens" Attract Collectors

London.—Humble "traders' tokens" of the seventeenth, eighteenth, and early nineteenth centuries continue to attract. A recent London sale of a large and famous collection occupied three days and realized no less than $12,000. One of the highest prices was $250, paid by a woman collector for a silver 5s piece, issued by the Bank of Guernsey, in the Channel Islands, in 1809. A very rare gold token for £2, issued in Reading, Berkshire, in 1812, bearing a bust of King Alfred, brought $100. It was for long believed to be the only gold token of its kind ever struck. A Birmingham workhouse silver half-crown realized $37.50.

Tokens have played a more important part in the everyday history of Stuart and Georgian England than the coins of kings and governments. It has been pointed out that the English coin from the Norman conquest right up to the present day does not record a single event or exhibit one national trait.

Traders' tokens, on the other hand, mostly issued on account of the shortage of the official currency, indicate the occupations of the common people, their skill, customs and modes of life, their guilds, habits, sentiments, costumes, their towns, families and homes.

The want of half-pennies and farthings, the equivalents of cents and half-cents, in Elizabethan times was so seriously felt by the entire population, that innkeepers, grocers, dry-goods merchants and other traders resorted to the issue of private tokens of lead, pewter, brass, tin, and even leather. Only commodities could be had from their issuers in exchange. Thus were traders' tokens launched. They were often issued for public convenience by local town or city officials.

Many thousands of varieties are known to have been in circulation and the collector of to-day has a wide choice, the current prices ranging from the equivalent of a few cents upward. They are mostly of copper and brass and in shape are round, square, that they bear dates, names, the tool octagonal or heart shaped. The fact and even the images of their issuers, and other emblems of trade guilds, to say nothing of quaint wordings and misspellings, adds considerable to their interest.

All English counties are represented. The trade-guilds issuing them include such ancient callings as armourers, barber-surgeons, horners, braziers, cordwainers or shoemakers, fletchres, girdlers, loriners (saddlers), merchant adventurers, scriveners, watermen, and woodmongers, with their appropriate emblems.

A small library of books has been written on the subject.

Does Man Really Tame Jungle Cats?

Trainer Challenges Death When Tigers and Lions, Sworn Enemies, Are in Same Act

The trainer had turned his back on thirty-two assorted lions and tigers to receive his ovation from the public with the gallant comportment proper to a cat man.

For this was the grand finale, the triumphal climax of his act. Armed only with a whip, a light chair, and a pistol loaded with blanks, and armored less than a half-back or a baseball catcher, he had put his writhing, spitting, and snarling monsters through their paces—with many a by-play of hot rebellion—until now they had been driven into their tawny pyramid of flaming resentment.

For the man behind the bars it was the most critical moment of the whole performance. Facing the applauding audience with chivalric gestures, he could no longer see the big cats. But the "terrible, strained expression of horror on the face of a youngster, about ten years old, in the first row of reserved seats" served as a warning that something was wrong behind him.

The story is told in Field and Stream, by Paul Brown, under the title, "Working the Jungle Cats." Mr. Brown quotes the cat man, Clyde Beatty, as relating that the boy's expression inspired him to drop in his tracks and pull his revolver, and he added:

One of the tigresses had leaped for me, and shot past as I dropped.

I held the rest of the cats and drove her back. The crowd thought it was a splendid way to close the act—but of them all, only that boy perceived the danger sufficiently to transmit it to me by his features.

All my helpers outside the arena told me afterward that they had shouted to me when they saw the tigress crouching for her leap, but I failed to hear them.

Beatty, an American stripling not long out of college, is described as "a most personable young fellow," and Mr. Brown adds:

He works more lions and tigers than any other animal trainer in America at the present time—for the entertainment of the patrons of the Hagenbeck-Wallace circus—and is an excellent example of the type of man in his hazardous profession.

Twice a day he enters the great steel arena in the circus tent with eight lions, six lionesses, nine tigers, and nine tigresses, all but a few of which had been captured when full grown and are really tamed wild beasts—"tamed" being a relative term, of course.

It is not generally known that lions and tigers entertain a perpetual and undying hatred for each other, which is far more intense than the animosity which exists between cats and dogs, but this is so.

To fill an arena with a mixture of them is probably the most dangerous element of the act.

With both sexes represented, the danger is greatly aggravated, yet this is rarely realized by the spectators.

Of the third weapon in the cat man's armament, we are told:

The chair, carried in his left hand, is intended to fend off a charging cat. If hard pressed by the feline fury, Beatty releases the chair; and as it is such a hollow, futile sort of thing, the animal generally loses its interest in it and does what it was expected to do at first—largely because it has done that thing so many times before. The whip carried in his right hand with the revolver, is a very real whip, a typical Australian bull-whip—but utterly useless as a defensive weapon.

The cat man confessed to his interrogator that "most of the cats come into the arena pretty lively," explaining further that "they are usually angry and resentful, for the handling they get when they are driven from their own cages (which place they have come to realize as a safe haven) is not always gentle. However:

Please understand me; neither is it brutal, but a reluctant cat must be made to obey and behave.

The act can not wait because Fatima gets sullen or because Rajah stops to snarl defiance at a rival.

Prodded every inch of the way, they move through the chute, sometimes struggling furiously to combat their fancied and elusive enemies behind them.

Fatima is nearly always difficult to handle. Twice she sulked briefly in the end of the chute, and finally made a terrific leap into the arena at me, crashing into the bars at the rear. The first time I didn't expect it, and escaped only because she hit a high hurdle at the very top of her flight. The second time I was ready.

Are the big cats trained to appear ferocious for the sake of the thrill? Beatty answered that question by telling a story:

One of the features of my act which always receives a tremendous burst of applause from the crowd is the apparent cowing of a big Nubian lion, after it has cornered and disarmed me, by the last resort of staring it into submission.

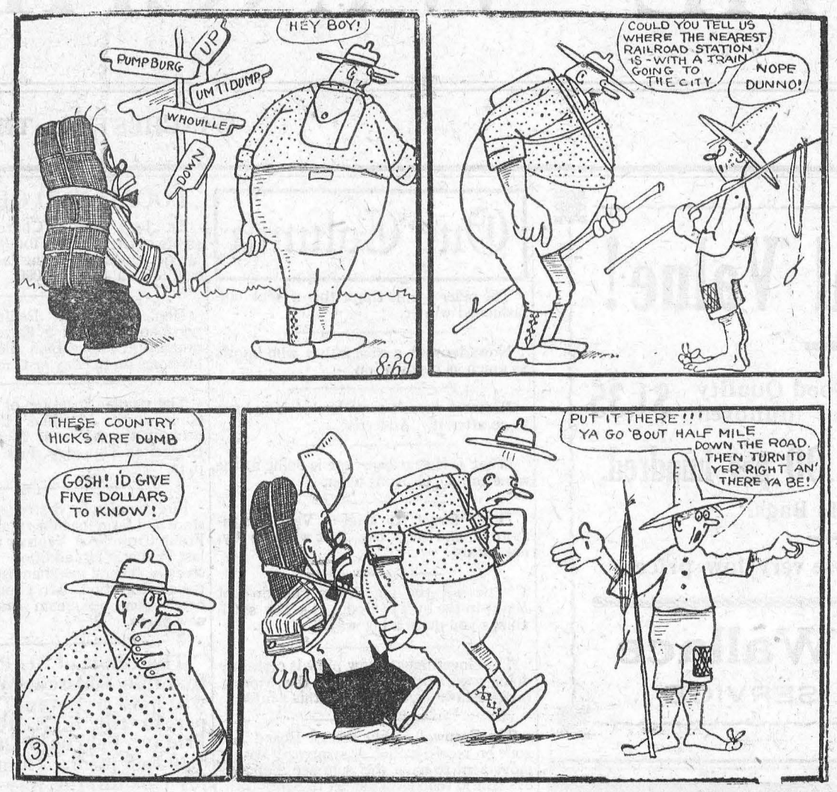
The lion suddenly charges, striking viciously. To be perfectly frank, I assist in the disarming process by deliberately releasing the chair when it is struck. The whip and pistol are sent flying from my grasp by another lunge.

I have backed against the bars—can retreat from the roaring fury no farther. Then I stop the lion's charge by suddenly taking a step toward him, leaning forward until my face is within a foot of his own, and staring him into submission.

I have yet to see the time when his eyes have not been baleful, but Nero stops; his roars drop to snarls, and finally cease entirely. He shakes his head in apparent baffled rage and discomfiture, slowly backs afay, and slinks to his pedestal.

While I am doing that there are from six to fifteen other cats prowling around the arena at perfect liberty to do as they please. I wouldn't dare take my attention from Nero, no matter what happened.

"ADAMSON'S ADVENTURES"



Every Man Has His Price.

A Cat Pays Its Debt

By Adrian Anderson in "Our Dumb Animals".

The family of Luke H. Denton, of Birmingham, Ala., will have occasion to be eternally glad that they have long and consistently followed the practice of being kind to animals.

Three months ago a tiny kitten, thin and bedraggled, made its appearance at the Denton home and won its way into the hearts of the entire household. It was fed and tenderly cared for and given the name of "Fluff."

One night recently, Denton was awakened shortly after midnight by a thumping against the door that led to the kitchen, followed by cries of a creature in peril and fear. Groping his way through the darkness, he opened the kitchen door and was greeted with a blast of smoke and heat. The kitchen and breakfast room were ablaze.

Denton rushed his wife and two children out of doors and telephoned the fire department. Then he sought Fluff.

Just inside the flaming kitchen, he found the tiny pet, but, alas, it was dead. Suffocation had taken its toll.

To Make Survey

Toronto.—A new survey of venereal diseases, similar to that conducted several months ago, and which showed Toronto to be among the freest of all cities from these diseases, is to be undertaken here during the month of February or March, it is announced.

Virtue, though in rage, will keep me warm.—Dryden.

Wireless programmes can now be enjoyed by the passengers on one express train between London and Leeds on payment of one shilling for the use of headphones.

Fashion Gleanings

As a trimming or accessory for pastel and white costumes, brown is most important. Brown fur trims the short sleeve in many of the suits and ensembles for dressy afternoon and spectatular sports. Evening gowns with removable jackets have also adopted the fur idea.

Crepe-shangtung — a soft pure-dye silk with a dull finish—is styled in sports and spectator sports frocks. Its popularity is assured on account of its tubbing qualities.

Pajamas are considered a definite part of the wardrobe, not only for sleeping, lounging and beach wear, but for dinner and evening as well. The latter models follow the lines in vogue for dresses for like occasions, showing the same draped necklines, bolero jackets, jeweled belts, and elaborate sleeve treatments, as outstanding features.

Angora, in the daintiest of shades, has edged its way into wraps for formal evening wear. They are usually hip-length, with flowing sleeves and scarf. They are wonderfully light in weight, still giving the needed warmth and the silklike appearance of the brush gives a misty air to its wearer.

One's hat, gown and shoes should be of matching tone, the color contrast being augmented by scarf, belt or tie. The bag also should carry the combination color.

Don't Be Late!

You may be late at chapel or at church;
You may be late at business or at play;
But don't be late when someone calls to you
To help a crippled brother on his way.
It doesn't matter if you're late to bed,
Or if you're late in rising in the morn;
But don't, for goodness sake, be late, my friend,
When someone's feeling lonesome and forlorn.

In business you may not be very prompt;
You may miss trains and buses every day;
Procrastination may be your worst fault,
And you may miss the time for making hay;
But if a fellow-creature's in distress,
If someone sorely needs a helping hand,
Then don't be late in going to their aid,
For that's a lateness Love can't understand.

—A.B.C. in "Answers."

Glories of Babylon

The New Outlook (Toronto) — In spite of all the time and energy expended to-day upon perplexing national and world problems, in the midst of the building of palaces and towers, and in the throes of the making of twentieth century history, scholars and scientists of two great nations are finding time to dig among the ruins of buried cities that date back nigh three thousand years. Mr. C. Leonard Wooley, director of a joint expedition of the British Museum and the University of Pennsylvania, reports some remarkable discoveries from Mesopotamia, where his party is excavating the ancient glories of "Ur of the Chaldees." According to Sir Charles Marston, archaeologist, "Mr. Wooley has discovered the palace of Princess Bel Shafti Nanna, believed to have been the sister of King Belshazzar of Babylon, whose great feast was so dramatically interrupted by the handwriting on the wall." Cuneiform writings of the sixth century B.C., inscribed on clay tablets nearly 2,500 years ago, have already been deciphered, giving clear-cut evidence of the reality of Belshazzar, and remarkable confirmation of the subject matter of the fifth chapter of the Book of Daniel. Hope is entertained that future discoveries may shed some fresh light on Daniel's life in Babylon in the years following Belshazzar's dramatic death. All history is really a collection of bits of evidence reaching down through time and making continuous the connection of the past with the present. The scholars are digging continually over yonder in Bible lands and those who love the Old Book are constantly receiving fresh proofs of its credibility.

Jamboree in the Jam

Two little boys were talking. One said to the other: "Aren't ants funny little things? They work and work, and never play."

"Oh, I don't know about that," replied the other. "Every time I go on a picnic they are there."

"Girls are now taking an interest in agriculture," we read. Especially husbandry.

French Fruit Trees Are in Wide Demand

Nurseries Also Meet Call for Great Numbers of Saplings to Be Used in Reforesting

French horticultural and arboricultural specimens are imported by customers throughout the world. The nursery gardens in which trees and shrubs are raised for orchards, forests and gardens are situated usually in the environs of the larger French towns. Fruit trees intended for grafting and young forest trees for replanting are reared by the thousands at Versailles and Ussy in Calvados. These go to many places in Europe, the United States, Canada and Australia.

The nursery gardens in the neighborhood of Paris, at Bourg-la-Reine, Vitry, Chatenay, Bougival, Versailles and the neighborhood are noted for their production of fruit trees, as well as ornamental trees and shrubs, which are grown there in large quantities. At Orleans and Angers are raised the younger and cheaper fruit trees, which are ultimately planted in the orchards of Brie, Normandy, the centre and the east of France.

The rearing of young apple trees is carried on at Doue-la-Fontaine and Angers, as well as in the orchards scattered throughout Normandy and Picardy. These apples are of both table and cider varieties. The nursery gardens of Lille and Moncheaux supply fruit and ornamental trees to the northern departments of France.

Rose trees flourish particularly in the neighborhood of Lyons, Orleans, Angers and Brie-Comte-Robert, and are grown in large numbers for sale both in France and abroad. In the region around Nantes are reared evergreen shrubs such as magnolias, camelias, holly, rhododendrons, hardy azaleas and other plants of more delicate nature.

Tours and Versailles have many hot houses for Indian azaleas, rhododendrons and hortensias. Near Versailles are also reared the palm trees and floral plants used in decorating apartments and gardens.

Vitry-sur-Seine has monopolized the production of lilac trees and supplies the Parisian flower market. Young trees are also forwarded to the large cities of France, Italy, England and the United States. Poplars, valuable trees in well-watered regions, are largely cultivated in the departments of Seine-et-Marne, the Aisne, the Aube and the Yonne.

Oranges, mandarins and lemon trees are cultivated especially in Algiers and in the departments situated along the Mediterranean coast. Extensive establishments are also to be found throughout France at Nancy, Troyes, Poitiers, Moulins, Limoges, Amiens, Dijon and Montpellier.

For many years Dr. Marchal, a scientist known throughout the world for his work on insect life, has directed a "Phyto-pathological inspection service" with a staff whose task is to supervise enterprises which export agricultural products of a vegetable nature. Thus every precaution is taken to ensure that the products of French nursery gardens contain no insects or fungi injurious to plans. Such supervision provides a guarantee of supreme importance to counties importing French plants.

Milady's Coiffure Ruled "Individual"

Detroit.—The curls and twists which adorn milady's brow this year will reflect, in varying and surprising form, her individuality.

That is the word sent out by 4000 beauty experts, now holding forth here in the annual American Beauty Trade Exposition.

"The era of sameness in hair dressing is gone," Edwin Strauss, the beauty profession's president, declares. "One's hair must reflect individuality. Never before has the coiffure played such an important part in woman's life as today."

"Well, old man, what are you doing these days?" "I'm selling furniture." "Are you selling much?" "Only my own, so far."

"Clothes give a man a lot of confidence." "I should think they do. I go to heaps of places with them that I wouldn't dream of going to without."

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

A most attractive model for youth and the youthful type of woman.

The jumper effect of the bodice gives it a jaunty air.

Carried out in dark brown wool crepe with cuffs, vestee and collar of turquoise-blue, the tie brown with blue dots, is delightfully gay and smart.

A similar scheme in dark green wool jersey with lighter green is snappy. The belt may be of self-fabric or of leather.

Style No. 2921 may be had in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Other interesting suitable fabrics are flat crepe silk, canton crepe and tweed mixtures.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

"Talking of starting with nothing and making a fortune," said the talkative passenger, "see that old chap reading a paper? Well, he came to this town thirty years ago with 25 cents in his pocket; he bought a tin of blacking and a wooden box and started as a boot-black after getting a set of brushes on tick. What do you think he's worth to-day?" "Oh, about $50,000," a listener suggested. "Well, you're wrong; he's not worth a bean, and he still owes for the brushes."

Carbon Monoxide Is Deadly Menace

Under the heading "Don't Flirt With Death," a bulletin issued by the road department of the Province of Quebec points out how quickly and easily death may come from carbon monoxide: "The average automobile while 'warming up' discharges from its exhaust about one cubic foot of deadly carbon monoxide per minute. In an average sized garage of 10'-20' it requires less than two minutes to produce sufficient carbon monoxide to reach a concentration injurious to health. In five minutes the atmosphere will contain sufficient to produce asphyxia, and in a very few minutes more the concentration will reach a fatal amount."

The Quebec bulletin having given ordinary method of treatment by removal to fresh air goes on to mention how carbon monoxide poisoning may be avoided:

1.—Have carburetors adjusted for most complete combustion rather than for pick up and power.

2.—Do not race motors when cars are standing still.

3.—Shut off the motor for stops.

4.—Never run a motor indoors without leading the exhaust through a pipe to the outdoors.

5.—Never get under a car with the motor running.

6.—Keep radiator fan type heaters closed when travelling slowly and closely behind other cars.

7.—Beware of a feeling of tiredness, headache, nausea, palpitation of the heart, and mental dullness. These symptoms may be due to chronic carbon monoxide poisoning, resulting from long exposure to low concentrations of the poison.

As the bulletin warns motorists, carbon monoxide is all the greater danger in that it may extend to a car in motion.

Hard Sense

She kept a little moon
Yellow as butter;
Hoarded a little tune
Too sad to utter;

Cherished a windy sky
Secret and holy;
Treasured the way birds fly,
Solemnly, slowly.

Parson at last is glad,
Old wives are grinning;
Wed to her neighbor's lad,
Set her to spinning . . .

Flax on the busy loom,
Children to cherish,
So in one narrow room
Folly will perish.

Here is a silver spoon,
Here a copper kettle,
For her who thought the moon
Made the dearer metal.

—Elspeth, in The Forum.

Keeping It Going

"I want to see the boss."

"What do you want to see him about?"

"About a job."

"I'm sorry, but you can't see him; he's in an unemployment conference."

Doctor Says Movies Do Not Injure Eyes

New York.—It is not the fault of the stars or of the projection machines if motion pictures hurt the patrons' eyes. The blame falls squarely on the eyes of the patrons in the opinion of Dr. William M. Richards, of the Better Vision Institute, who in his recent address before the National Board of Review Pictures here asserted that an insidious rumor that the films were bad for the eyes was keeping thousands daily from the motion picture box office.

"If motion pictures hurt your eyes don't blame the picture but blame your eyes and have them examined," he declared. "For if your eyes are normal, either with or without glasses, you can look at films without any discomfort whatever. It is a common complaint among persons generally to say that their eyes have been ruined by motion pictures. Normal eyes never give symptoms when looking at the pictures and are never in any way harmed by them."

Mr. Richards suggested that patrons should equip themselves with a special type of eyeglass in their pilgrimages to the theatre.

There are many things that can be done to bring this important subject to the attention of motion picture audiences," he pointed out. "I suggest that there be incorporated, for the time, at least, in all picture releases the suggestion that if the films inconvenience the eyes one must not blame them, but rather the eyes."

The Call of the Bush

Day is smiling approval at earth's new spring apparel. It is good to be out of doors, free and away. Already in the moonlight dawn the warbling magpies had heralded such an awakening, and the call of the bush is loud and insistent. So off to the hills for young hearts eager to revel in nature's glory.

Up hill and down dale, through wooded vales blue-vaulted by the floor of heaven; by the crystal lake shaded on every side by thickets green; to the distant purple hills where grows the bracken fern or hoots the owl; where music in the waterfall makes harmony with singing birds; where cries the curlew plaintively; or where the kookaburra lifts his laughter on the air; such places lend themselves where thought may dwell in simplest luxury.

Leschanaultia, blue, yellow, white and red, splashes the landscape like a painter's palette. Buttercups fringe the roadside's edge. Sarsaparilla hangs her purple tresses from tree to tree. The tall gums stand majestic; low blackboy clumps send up new, soft, green spears.

At last a wattle grove is reached. The silence in the woods is very sound, the sound that breathes in stillness thanks to God for such a paradise. In the trees' cool shade luncheon is spread. Rest, talk and day-dreams while away the afternoon's sunshine. Homeward toward the city, as the golden sunset says, Amen!

"I believe girls, even more than boys, need college education."—Mrs. Thomas A. Edison.

Mutt Wins a Hollow Victory.

Bothwell Romance Again in Spotlight

Smashing of Earl's Burial Casket on the Island of Zeeland Recalls His Adventure with Mary Stuart

The pillaging of a forgotten village church on the remote little island of Zeeland, reported in Copenhagen dispatches last week, recalls one of the most brutal episodes in all British history. Here since his death, in exile, in 1578, has lain the body of one of the husbands of Mary Queen of Scots, the Earl of Bothwell. In searching for treasures, or accidentally, thieves smashed the glassed-in coffin which for more than three and a half centuries has held the remains of the man about whom historians agree that "no good word can be said."

James Hepburn, high-born and adventurous, inheriting the title and castles of the Earl of Bothwell, has been said to have contributed more than any other person to sending Mary to the gallows. Although a Protestant, Hepburn became one of the most violent anti-English leaders in the bitter religious wars between Scotland and England.

After exile in France and imprisonment by Queen Elizabeth in the Tower, Bothwell returned to Scotland in 1565 at the summons of Mary—his daring and strategy made possible his escape despite pursuit by ships Elizabeth sent in search of him.

His complete ascendency over Mary appears to have dater definitely from the murder of the Queen's secretary, Rizzio, in March, 1566. From then on he was her chief adviser, attending with her the Craigmiller conference at which both signed the "bonds" which were to result in the murder of the Queen's husband, Darnley.

To Mary, Bothwell was a "glorious, rash and hazardous young man." He was masterful and daring and possessed of a certain courage that even his bitterest enemies were forced to recognize.

The intention of Queen Mary to make the Earl of Bothwell her husband was, for a time, kept secret. She sought refuge with him at Dunbar Castle. He met her riding outside of Edinburgh and, leading a force of 800 spearsmen, escorted her—forcibly or otherwise—to Dunbar. Less than a month later Mary made Bothwell Duke of Orkney and Shetland.

Within a month after their marriage, Mary Queen of Scots and Bothwell were again seeking refuge, to be separated from then on. Bothwell's flight to Denmark was the last of his adventurous life. He was no longer in position to aid his Queen, and her downfall left him the prisoner of King Frederick II of Denmark, from whom, during Mary's reign, he had obtained safety by promising to restore to Denmark the Orkneys and Shetland. Eleven years after his marriage with Mary the Earl of Bothwell died at Zeeland.

Year's End

Down Time's windswept hillside
I saw the Old Year creep,
Past low, drifted hollows
Where spent leaves sleep.

Winds were in the brown fields
But lately ripe with corn,
And ghasts of autumn asters
Stood ragged and forlorn.

I pitied him in passing,
So shabby and so old,
Young dreams all forgotten,
And proud heart cold.

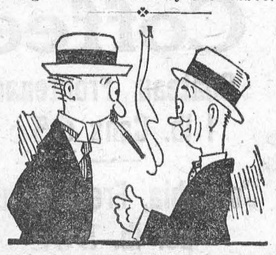
But when the New Year met him,
Climbing, climbing still,
I saw them pause in passing,
Halfway on the hill;

Midnight bells were sounding,
High stars pricked through.
"Hail, brother!" cried the Old Year.
"God bless you!" said the New.

—Frances Crosby Hamlet.

Clubs Can Hire Planes

Airplanes will be leased to British light airplane clubs, according to the Department of Commerce. The planes at the disposal of the clubs will be Gipsy I Moths with wooden fuselages, and equipped with telephones, automatic slots and a compass. The planes will be fully insured by the De Havilland Company, the builders, against all ground and air risks, including third party risks. They may be hired for any period up to six months at $291 a month and for a period beyond six months at $243. All rentals are payable in advance. Planes must be maintained at the expense of the lessee in a correct airworthy condition, and must be operated in accordance with the provisions of the air navigation acts. In the event of accidents causing damage to the aircraft, the first $77.20 of damage must be met by the lessee.



"Mr. Fiancee's father seems to think she is marrying a fool. But he's wrong."

"Why? Are you going to break the engagement?"

The longest air route at present with a regular service of planes is from New York to Buenos Ayres, a distance of 5,880 miles.

Imperial Airways, England's national company, has flown more than 6,000,000 miles during the past six years, with only four serious accidents.

Owl Laffs

If the boss' desk is clean it indicates that an assistant is doing the work. Often the boss takes the "in" out of indispensable when an employee begins to feel that way. How can there ever be true happiness in this world when all silver linings have a lot of little clouds about them? Eat slowly, friend. Haste makes waist.

Sounds Tiptop

(Advertisement in St. Louis, Mo., Post-Dispatch). Partner Wanted—Lady wants partner in bath house; good proposition.

The little girl who ordered a baby brother complicated the affair by specifying that he must arrive three years old.

Aspiration

Let me to-day do something that shall take
A little sadness from the world's vast store,
And may I be so favored as to make
Of joy's too scanty sum a little more.

Let me not hurt by any selfish deed,
Or thoughtless word, the heart of foe or friend;
Nor would I pass, unseeing, worthy need,
Or sin by silence where I should defend.

However meagre be my worldly wealth,
Let me give something that shall aid my kind.
A word of courage, or a thought of health,
Dropped as I pass for troubled hearts to find.

Let me to-night look back across the span
'Twixt dawn and dark, and to my conscience say:
"Because of some good act to beast or man
The world is better that I lived to-day."

Judge—"You're charged with throwing your mother-in-law out of the window."

Accused—"I did it without thinking, your honor."

Judge—"I realize that, my dear man, but don't you see how dangerous it was for anyone passing at the time?"

Whether administrations are responsible or not, they get blamed for bad times—and never fail to take credit for good ones.

Archibald—"Do you and your wife ever think the same, John?"

John—"When I stay late at the club we do. She keeps thinking what she'll say when I get home, and so do I."

Flapper's Vocabulary — To understand a modern young woman's vocabulary it is necessary to know that "cute" may describe a sports roadster, a bridge prize, a dance step, a baby, a dog or Rudy Vallee.

Wait for something to turn up and it will, but it will be your toes.

Tommy — "Pa, why was Adam created first?"

Father—"To give him a chance to say something."

Many of us find it harder to shirk than to work.

The banker's little word "yes" has power to break the bank and his little word "no" has power to break everybody else.

We can't say much for these dresses that look like they had been caught in a door and portions torn off as the lady left home.

Love is the only commodity needed to insure a happy marriage between meals. Beauty that used to be skin deep is now skin and knee deep. Dreams that come true would anyway. We know a man who fell out of a twentieth storey window without hurting himself. There was a balcony outside. The ability most in demand is reliability.

Caller (at telephone)—"Give me Main 2633. Hello; this the wife-"

Called—"Yes."

Caller—"Listen, dear. Will it be all right if I bring a couple of fellows home to dinner to-night?"

Called—"Why certainly."

Caller—"What?"

Called—"Certainly it will. I'll be very glad to have them."

Caller — "Oh, pardon me, lady. Wrong number."

Constipated Children

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the new-born babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

"What's the idea of the Greens having French lessons?" 'They have adopted a French baby and want to understand what it says when it begins to talk."

Teacher—"Define a nation?" Pupil—"A nation is a body of people entirely surrounded by politicians."

Mrs. Montmorency—"I thought you loved your pet dog so much?" Mrs. Poulton—"So I do, dear; but my husband is doing so well in business now that we can afford one with a better pedigree!"

Crew of shipwrecked schooner "John W. Miller" which left St. Johns, N.F., with a load of cod for Brazil. She was abandoned after being wrecked by a storm in mid-ocean and the crew was picked up by a German steamer and landed at Colon whence the "Carinthia" brought them back to entrain for Canada. They are: (sitting) Wm. Kennedy, 1st Mate, of St. Johns; Capt. Cyril Horwood, St. Johns; Boatswain John Clark of Carbonear, N.F.; (back row) F. Rogers, St. Johns; Wm. Laing, Carbonear; Theo. Pike, Harbor Grace; John Green, cook, Carbonear.

Simplicity Marks The New Fashions

Revival of Boyish Suits With Fitted Backs is Featured At Paris Openings

Paris.—The first Paris openings indicate a swing in the fashion pendulum back toward tailored simplicity. O'Rossen revives Garconne suits tempered by fitted backs featuring the swan-curved figure. Two jackets and two blouses for one skirt are a novelty.

Two-buttoned, single-breasted jackets and conventional tuxedos with false wrap-around skirts having a low stitched pleat on the left instead of closing also are shown. There are many nearly long and three-quarter coats. Men's twill suitings are used. There are also fine, smooth, small-weave tweeds for sportwear.

Figured silks and suits and blouses are displayed. Lace-trimmed georgette blouses are used with classic suits. Suede-finished twill is one of the interesting textures.

Lyolene's is jammed with buyers, despite the hard times. It shows fantasy suits, uniting three-color fabrics and patterns, with very short-fitted jackets, short loose tunic blouses and low-flared skirts. Short-sleeved, fitted cutaway vests in pique or checked flannels are characteristic. Many are hand-embroidered with scalloped edges. Coral buttons and trimmings are notable.

There are divided skirts for all times of the day. Transparent wool evening dresses, with sleeveless, metal lace jackets also are drawing interest. Flower-printed and embroidered organdie evening gowns with Peter Pan collars over deep black decollete are shown. The pindotted cotton twill suits shed the skirts, revealing rompers.

Philippe et Gaston show mannish suits and top coats. There are dis played tight chemise frocks belted at the normal waist. Gray flannel tailored suits with elbow-sleeved and double-breasted jackets are a novelty. There are also detachable tunics to transform afternoon dresses into street costumes. Dotted swiss georgette is the exclusive afternoon fabric. There also are shown draped evening gowns in a new Rodier chiffon jersey with flecked surface.

Paris,—Trousers, long and short, formal and informal, indicating that the modern miss will combine 1931 freedom with 1870 femininity, are one of the most important features of showings of Spring styles just begun.

Although only small couturiers have exhibited so far, collections indicate that pajamas launched as a fad are now a definite part of the mode both for playtime and evening wear.

There are wide variations of cut and variety of material from red Canton flannel to glittering sequins. Summer girls may lounge on beaches in red flannel made in overall design with braces crossing over the shoulders and buttoned to a belt. The overalls go with red and green gingham long-sleeved shirts. A bandana of the same gingham may be knotted around the head, worn under a broad-brimmed crownless hat of red flannel.

Tennis costumes feature white pique shorts with sleeveless blouses of the same material accompanied by long full pajamas to wear when the game is finished. Yachting pajamas are one of the newest items of trouser display. They are made of white with light blue shirt and dark blue jacket.

Stylists predict great success for dinner pajamas of definite sophistication. One such model has gray sequin trousers worn with a tight bodice, which has a strap decollette. Another is pale pink silk crepe with a high-necked bodice made of the open silk mesh, which is new and much used for Spring.

All pajamas feature wide semi-flaring lines tight hips and bodices, which are generally attached to the trousers. Pajama costumes have loose, hip-length coats.

Long Wait

The office-boy took off his cap, presented the bill, and stood at ease.

"My boss says I'm not to go back until you give me the money you owe him," he said.

"Oh?" was the reply of the debtor. "I wonder if he'll recognize you with a beard?"

The most usual age for marriage in Great Britain is 24 for men and 23 for women.

MIDDLE AGE

A Critical Time for All Women.

"I am beginning to feel my age" is the confession many a woman has to make when she reaches the critical time of middle life. There is no need, however, to think you are too old to be well and happy.

Perhaps you have lost your grip on things; perhaps the old vigor and energy is lacking; you get tired easily, and your limbs ache terribly. Often your back seems ready to break and the pain is unbearable.

Your blood is at fault — it has become thin and impure and does not give the health-giving nourishment to the body. What you need is a treatment of Dr. Williams' Pink Pills. They will set you right. They actually make rich, red, health-giving blood and this good blood will drive out all your aches and pains.

Dr. Williams' Pink Pills will banish headaches, backaches, nervousness and lack of appetite, and in their place will come new energy and happiness. You can get these Pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Autos as Earthquake Refuges

Automobiles are cited as "admirable earthquake-proof buildings" by Dr. T. A. Jaggar, American volcano expert, as a result of personal experiences during the earthquake of September 25, 1921, in Hawaii.

In a recent announcement from the Hawaiian Volcano Research Association, Dr. Jaggar describes how he happened that day to be driving in his automobile to visit a friend. Then, says Dr. E. E. Free's Week's Science (New York):

"On arriving at the friend's house, Dr. Jaggar was astonished to find the inhabitants in great excitement, and the house partly ruined.

"A violent earthquake had happened while Dr. Jaggar was in his moving automobile.

"In spite of long experience as an earthquake observer, he had felt nothing. During the shocks which followed, Dr. Jaggar reports, many people left their houses and slept in their automobiles.

"Even when not in motion, Dr. Jaggar reports, 'a sedan on springs and rubber tires produced almost no sensation to the occupants, while adjacent homes were rattling and rocking with the aftershocks.'

"Houses usually act, he finds, as magnifiers of earth movements, so that what seems to be a violent earthquake to a person indoors may seem to a person on the ground in the open to be a single not very strong thud under his feet, or may pass altogether unnoticed.

"This may explain why it is that primitive men have few myths of earthquakes, but many of floods and fires. Having no houses to magnify them, primitive men probably felt only the very greatest earthquakes, but anybody is impressed by a forest fire or a flood."

Tests Show Lack of Vitamin Cause of Grey Hair

Premature gray hair may be due to lack of some vitamin-like material in the food, just as lack of one of the vitamins causes the disease called rickets. This is suggested by researches reported to the Academy of Sciences in Paris by Prof. Gabriel Bertrand. Says Dr. E. E. Free in his Week's Science (New York):

"In experiments planned for a different purpose, ordinary black and dark gray rats were fed on diets containing all vitamins known to be necessary, but made of purified or synthetic foods instead of natural materials like vegetables and grain.

"To the investigators' surprise, the black coats of the animals began to turn silver gray.

"This may happen, the experimenters knew, because of bad health, but the rats in this instance were perfectly healthy, as was confirmed by blood tests.

Love

When the mists of the early morning
Disappear on the rays of the sun
The soul can climb to heights sublime
In communion with Jesus the Son.

Though the darkness of night surround you
And your soul is deep in despair
His love and strength can lift you
If you believe that He is there.

—I. M. STEEPER, (London, Ont.)

Noiseless Factory To Help Workers

Also to be Built Without Windows—Machines to be Painted Orange

A factory without windows, and having other features of an unusual, if not revolutionary, character, is to be constructed at Fitchburg, Mass. Conditions under which the employes work will be so controlled that they will be uniform, night and day, and everything possible will be done to make work easy. It is expected that efficiency will be increased by about 30 per cent, and the experiment is being watched by industry.

Noise-eliminating devices will make the factory quiet. The walls will be built to absorb sound, and machines will be mounted on cork. Noises from the manufacturing processes will be made to counteract each other.

The intensity of daylight changes constantly, thus putting a strain on eye muscles and bringing on fatigue. In this windowless factory, electric lamps, with special diffusing shades, will furnish illumination. A certain amount of ultra-violet light will be introduced.

The temperature in the factory will be kept constant, the air being washed on entering the building, heated in cold weather and cooled by a spray in warm weather. Drafts are to be eliminated.

As colors, according to psychology, either depress or raise the spirits of humans, they are the basis for the decorative scheme. The walls and ceiling will be white, blue and green. Machines will be painted a bright orange, to make them easily visible and thus to reduce the chance of accidents.

Liberia Accepts Leagues' Reforms

Geneva—The Council set to work in a small committee to examine Liberian affairs and provide for administrative and financial reforms which will help expiate the horrors of slavery revealed in the recent investigation.

Under the presidency of Arthur Henderson, British Foreign Secretary, the committee met to examine means of sending European or American administrators to Liberia to alter the internal government. It is also expected that the League will arrange a loan for Liberia which will enable necessary reforms, but the Council insists that execution of the reforms must not be subordinated to granting financial assistance.

The United States Government is to be invited to participate in all of the committee's investigations into Liberian affairs. Antoine Sottile, Liberian government representative, read a telegram from his Government accepting the Council's recommendations.

The Tin-Whistle Player

'Tis long since, long since, since I heard
A tin-whistle played,
And heard the tunes, the ha'penny tunes

The tunes that were before Cendfind
And Cid went Ireland's rounds—
That were before the surety
That strings have given sounds! breath,
And now is standing in the mist,
And jigging backward there,
Shrilling with fingers and with
A tin-whistle player!

He has hare's eyes, a long face rimmed
Around with badger-gray;
Aimless like cries of mountain birds,
The tunes he has to play—

The tunes that are for stretches bare,
And men whose lives are lone.
—Padraic Colum, in "Old Pastures."

Useless

"Weel, Angus, I hear ye've got married."

"Aye, Donald."

"An' what kind o' a body is yer wife? Can she sew?"

"No."

"Mak' parritch?"

"No."

"What! No' mak' parritch? What can she do?"

"Well, Donald, she's a grand singer."

"Och, mon, but ye're daft. Wouldna a canary hae been cheaper?"

Caller (inquiring for son of the house)—"Whaur's young Angus, Mr. McFee?" Mr. McFee—"He's doon in the shed sharpening the gramophone needles. We're giving a wee party the nicht."

The Letter

By John Hall Wheelock

The night is measureless, no voice, no cry
Pierces the dark in which the planet swings—
It is the shadow of her bulk that flings
So deep a gloom on the enormous sky;
This timorous dust, this phantom that is I
Cowers in shelter, while the evening brings
A sense of mystery and how all things
Waver like water and are gliding by.

Now, while the stars in heaven like blowing sand
Drift to their darkness, while oblivion
Hushes the fire of some fading sun,
I turn the page again—and there they stand,
Traced by love's fleeting but victorious hand,
The words: "My darling, by beloved one."

Winds of the Sea

Winds are advertisements to all they touch, however much or little we may be able to read them; telling their wanderings even by their scents alone. Mariners detect the flowery perfume of land-winds far at sea, and sea-winds carry the fragrance of dulse and angle far inland, where it is quickly recognized, though mingled with the scents of a thousand land-flowers. As an illustration of this, I may tell here that I breathed sea-air on the Firth of Forth, in Scotland, while a boy; then was taken to Wisconsin, where I remained nineteen years; then, without in all this time having breathed one breath of the sea, I walked quietly, alone, from the middle of the Mississippi Valley to the Gulf of Mexico, on a botanical excursion, and while in Florida, far from the coast, my attention wholly bent on the splendid tropical vegetation about me, I suddenly recognized a sea-breeze, as it came sifting through the palmettos and blooming vine-tangles, which at once awakened and set free a thousand dormant associations, and made me a boy in Scotland, as if all the intervening years had been annihilated.—John Muir, in "The Mountains of California."

The new vicar was calling upon one of his parishioners. "I hear," he said, "that you have a son in the film business at Hollywood." "That I have," replied the woman, proudly. "How long has he been in America, Mrs. Smith?" "Five years, sir." "Indeed. And does he ever come back to Erland?" "Every summer regularly." "And brings his wife with him, I expect." "That is so, sir. And they've been five smart girls, too."

Results Commendable. Genuine Gratitude.

Miss Miller, of Croydon, writes:—"In gratitude, I feel I must write and tell you what wonderful benefit I have derived from taking a bottle of your Carter's Little Liver Pills. Having been troubled with indigestion and sick headache for several months, a friend recommended me to try your famous pills, with the results that after the first dose I was made aware of their very real tonic value, and felt I had at last discovered a remedy which performed what it claimed to do." Take Carter's Little Liver Pills for the complexion and constipation. All druggists 25¢ and 75¢ red pkgs.

Does your face burn and itch after shaving?
Try Cuticura Shaving Stick
It soothes and heals and is wonderfully efficient

for COUGHS
Take half a teaspoonful of Minard's in molasses. Heat Minard's, inhale it. Also rub it well into your chest.
32 You'll get relief!
MINARD'S "KING OF PAIN" LINIMENT

ACID causes Headaches

WHEN there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet your way out of the trouble!

Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments.

Take a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. Whenever you are taking cold or feel sluggish, weak, constipated, Phillips' Milk of Magnesia has a gentle, laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips for your protection.

How To Lose Fat and Get That Youthful Feeling

Over in Great Britain when a man is feeling "as fit as a fiddle" and looking the "picture of health" they say:

"HE'S GOT THAT KRUSCHEN FEELING."

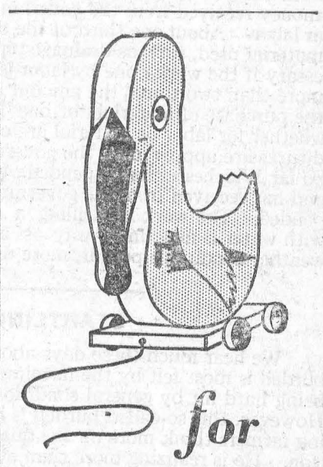
That means he takes his little dose of Kruschen Salts every morning.

It's the same in the U.S.A.—in Germany—in Holland—in Australia—in South Africa, for Kruschen Salts are now sold the world over.

Kruschen Salts is not one salt only—it is the combination of six salts necessary to healthy life.

Take half a teaspoon in a glass of hot water before breakfast every morning, modify your diet and exercise regularly.

But don't miss a morning, for Kruschen not only puts and keeps the stomach, liver, kidneys and bowels in a splendid healthy condition, but purifies your blood-stream, and sends new life and activity to every part of your body.



WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea — a condition that should always be checked without delay. Just keep Castoria handy and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Fletcher's CASTORIA

"I have to work in the store and do my own housework, too, and I got nervous and run-down and was in bed nearly all summer. The least noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I am looking after my store and housework and my four children and I am getting along nicely now." —*Mrs. J. Malin, R. R. No. 5, Barton St. East, Hamilton, Ontario, Canada.*

CUT OUT PROMOTION EXAMS.

At the last session of the Counties' Council the promotion exams. that have been held in rural schools for many years past were discontinued, so far as the United Counties are concerned. Hereafter the burden of exams. and of promotion will remain with the teacher. When, a year ago, the Provincial Department of Education took away from the Counties the appointing and control of Public School Inspectors it practically cut out the responsibilities of the Counties' Council with reference to rural schools. At the recent session of the Counties' Council the Inspectors reported that the Dept, of Education at Toronto had no objection to the carrying on of the promotion exams as heretofore providing the Council would pay the cost of preparing papers and holding such exams. This the Counties' Council refused to do, contending that as the government had taken over all control of the Inspectors, it could also take over the control of the exams. The question as to the wisdom of this course is debatable. If the old system was a good one, one that was better for the children and better for the teachers, it should be continued. However as the matter now stands, the promotion of children from one form to another will be the result of their standing for the term and at the discretion of the teacher and Inspectors.

ABOUT THOSE BRIDGES

In the course of time, and perhaps in the not very distant future, a bridge, an international bridge, will be built across the St. Lawrence, between Kingston and Cornwall. At present several sites have been recommended by a commission of engineers appointed by the State of New York, and it was stated a few days ago that the site between Ogdensburg and Prescott had been approved. Since then the idea of an international bridge being built jointly by the State of New York and Canada, or even the Province of Ontario, would mean a lot of red tape negotiating and arranging, and create complications that almost puts the idea of an international State owned bridge out of thought. As the Brockville Recorder-Times points out, the only practical way is to build a bridge by private capital, and under the direction of a joint-stock Co,, as a business as well as an international enterprise. That is what it will probably end up in. First of all, however, a charter has to be secured and a site approved by both the United States and Canada. Great enterprises like the deepening of the St. Lawrence waterway, the development of the St. Lawrence power and International bridges move slowly, and many now alert to the questions will be long underground before any of the above mentioned enterprises have been completed.

THE RELIEF FUND

There are many who are content to trust the judgment and good sense of those in authority to handle and expend what is known as the "Relief Fund." Unfortunately, however, there are too many with suspicious minds, and they cannot see how a relief fund can be used except in the employment of labor direct. It might be well to point out that, except in digging, no labor can be employed without the use of some kind of materials. Those materials have to be purchased from those who manufacture. Those who manufacture employ labor. The 50 per cent of the amount expended in all relief work is made up by the Municipality. The other 50 per cent comes from the Federal and Provincial governments. In Winchester the money received from the government has, so far, all been expended in labor. About one third of the total expended has been spent for material used, such as drainage pipes, etc., which is absolutely necessary if the work done by labor is to be of any use. In some places more than two thirds the amount alloted for relief work is used in the purchase of materials of one kind and another. All accounts whether for labor or material are open for inspection, and all expenditures are approved by the government before the money is paid. So far Winchester has expended over $2000 of its allowance of $5000, and has received from the government the 50 per cent of amount expended. The work of drilling a well to supply this municipality with water is now under way as a relief measure, and as soon as weather conditions permit, more drainage will be undertaken.

STARTLING FIGURES

We hear much these days about "the burden of taxation." This burden is most felt by the farming community because the farmer is being hard hit by general conditions that seem to effect him most. However, this so-called burden is having one good effect; it is making farmers think more on the question of government and legislation. He is realizing more than ever that the man he votes for to go to Ottawa, to Toronto, has much to do with what effects his financial condition. When he realizes that in six years the debt of Ontario has increased from $332,391,000 to approximately $476,000,000, and that the people of Ontario are to-day paying to the provincial government nearly $20,000,000 more in taxes than they were six years ago, he will realize just why this "burden of taxation" and who is responsible. Here are some startling figures that should furnish food for thought, and help all to realize why.

Ontario's Drink Bill for 1939-30 was approximately	$55,000,000
There was spent on:—	
Public Education	11,774,000
Children's Aid and Protection	288,000
Old Age Pensions	6,572,000
Mothers' Allowance	2,369,000
Prevention of Disease and Public Health	880,000
Public Institutions, Hospitals and Charities	8,025,000
Highways	17,900,000

Just think of it, more spent for liquor than for Education, children's protection, highways, and the several other items above quoted. They are startling figures that ought to make any citizen stop and do some serious thinking.

FROM OUR DISTRICT CORRESPONDENTS

Metcalfe

Mrs. A. Waddell who has been living with her daughter, Mrs.G. Reaney here, is seriously ill now, suffering from a stroke of paralysis.

Mrs. McImis was confined to her bed last week through illness.

Mr. Russell Blair is laid up with an attack of pneumonia. At time of writing his condition is somewhat improved.

The funeral of the late Mrs. Charles Carson, a resident of Metcalfe for a great number of years but who since their home was broken up and sold last fall has been living with her niece, Mrs Carson of Carsonby, was held Friday afternoon to Springhill Cemetery. She leaves an aged husband and two sisters to mourn her demese. Mrs. Carson was in her seventy-first year and had been in feeble health for the past three years.

The Curling Club from Metcalfe was represented in Ottawa at the Central Canada Bonspeil by a rink skipped by Rev. Father Harris. They won two out of three games.

The Metcalfe Agricultural Society are sending Miss Ida McLaurin and Miss Jessie Cameron as delegates to the convention in Toronto.

Mr. Jack Rowan of the Civil Service, Ottawa, is holidaying with his parents here.

Mrs. Jobb and Mrs. Byers are delegates to the United Church W. M. S., Presbyterial in Ottawa, this week.

Mr. Rodger Brisbois has been seriously ill for some time and is condition remains unchanged.

Miss Lula Ralph spent last week with relatives in Ottawa.

Mountain

Mr. and Mrs. S. W. VanAllen spent last week with Mr. and Mrs. Joe McCordick at North Gower.

Mrs J. H. Irvine and daughter spent ehetweek-end in Ormond.

The W. M. S. met at the home of Mrs. R. D. Cheney on Tuesday afternoon.

We are pleased to report Mr. E. Scott out again after his recent illness.

The Womens Association of St. Andrews United Church held a Social evening at the home of Mr. and Mrs. R. L. Kerr on Monday night.

Dr. Younghusband of Toronto, who has been a guest at the Foster House, had the misfortune of dislocating his shoulder on Saturday while testing cattle. Upon the arrival of Dr. McKendry of Winchester, it was found necessary for the Dr. to return to his home in Toronto. He was accompanied by Carson Kerr.

Rev. J. W. Clarke of Montreal spent Monday with Mr. and Mrs. R. L. Kerr.

LATE MRS. BELLA VANALLEN

Death again visited our midst in a Brockville Hospital, and took away one of our respected citizens in the person of Mrs. Bella VanAllen, beloved wife of the late George VanAllen, who predeceased her two years ago, in her 66th year. She was a daughter of the late Mr. and Mrs. Reddick of Morrisburg.

The last seven weeks the deceased has suffered considerable, when death came as a happy release to a pain-racked frame and the spirit departed to it's last long home on Thursday morning, Jan 28.

Deceased was well and favourably known and leaves to mourn her loss: two sons and one daughter, Mrs. Sam Finley of Mountain, Earl of Williamsburg, and Garnet of Kemptville, also two sisters, Mrs. Melvin Casselman of Morrisburg, and Mrs. Ellen Tuttle of Rockland, Cal.

The funeral was held on Sunday in the United Church, at 1.30 p m., being conducted by the Rev. A. O. Lloyd, preaching a very impressive sermon from John 14:2, "In my father's House are many mansions." Mrs. Duncan Cameron sang a solo, "Heaven is my home" The floral tributes were both plentiful and beautiful. The pall bearers were: Messrs. G. Walter, E. Loftus, F. R. Barrigar, A. Froom, A. Levere, F. Beckstead. The remains were laid to rest in the vault at South Gower Cemetery to await interment. The sympathy of the community is extended to the bereaved.

North Mountain News

Mr. William Tinkess of Ottawa was a guest of his mother on Sunday.

Mr. and Mrs. Arthur Allen are visiting at the home of Mr. Wm. Balkwill at present.

Miss Golda Cumming spent the week-end at the home of her parents.

Miss Hazel Tinkiss of Iroquois spent Sunday with her mother in Hallville.

Miss Gladys Logan spent Thursday and Friday with her friend, Miss Thelma Weaver.

The Y. P .S. of St.Andrew's United Chnrch spent Friday night in Winchester, the guests of the Y. P. S. there and had a very enjoyable time.

Mr. Broder Scarlett retnrned from Ottawa, where he spent a few days visiting his parents and attending the Dog Derby.

Mr. Arthur Allen spent Friday in Prescott.

Morewood

Mrs. Benson Hutchinson spent a couple of days last week with her brother, Mahlon Swerdfeger of the ninth.

We are sorry to report that Mr. Albert Steinberg is on the sick list

Mr. Harold Allison of Ottawa spent the week end with his parents, Mr. and Mrs A B. Allison.

Mrs. Fred Reveller and daughter of Ottawa spent the week-end with friends in North Winchester.

Mr. Robert Evans of Ottawa spent a few days recently with his sister, Mrs, James Andrew.

Mr. and Mrs. Vernon Fetterly and Mrs Abner Dillabough visited on Thursday with Mr. and Mrs. Ray Dillabough of Russell.

Mr. and Mrs. Harry Empey visited on Sunday at the home of her father, Robt. Stein.

An enjoyable evening was spent at the home of Mrs. B. Hutchinson on the occasion of her grand-daughter's 6th birthday. The tea table was adorned with a birthday cake with six lighted candles. Mr. and Mrs. McLaren and daughters and Mr. M. Swerdfeger and daughter were present.

South Mountain

Messrs. R. J. Sherman, Dr. C. Stirtan and Ernest Boyd attended the hockey match at Spencerville Monday night.

Mrs. Brunston of Russell attended the funeral of her brother, Mr, James Graham, on Monday.

Mr. Gordon and Miss Winnifred Boyd and Miss Erma Barton visited Mr. and Mrs. Frank Latourell of Pelton's Corners on Sunday last.

Mr. W. W. Bellinger and Miss Etta, and Miss Sylvia Canning were down to Winchester Saturday.

Dr, G. C. Ferrier visited his mother at Kingston, over the week-end. Mrs. Ferrier is seriously ill.

Mr. John Cameron is spending a few days at Toronto this week

The many friends of Mrs. Annie Ennis are sorry to learn of her being ill.

Mr. Lorne Armstrong was out to Iroquois Sunday.

Born to Mr. and Mrs. Leroy Berry on Sunday, Feb. 1, 1931, a daughter.

The sympathy of the vicinity is extended to the family of the late James Graham, who passed away in the early hours of Saturday, Feb. 7th, at his home at Vancamp.

Barn and Stock Destroyed At Pleasant Valley

The people of this place were surprised to learn on Monday morning last that Mr. Joseph Lennox, of Pleasant Valley, lost all his barns and outbuildings and 12 head of cattle by fire. Mr. Lennox went up to put down some hay and his lantern exploded.

The United Church

(Contributed)

An uplifting message was given on Sunday morning by Rev. J. A. Waddell on the friendship of Aquila and Priscilla with Paul, from Rom 16:3. He said their lives were the richer because of this intercourse. They had a common soil. We too may have our roots in the same soil, and render service that will win God's approval We may be helpers together by prayer, of which the pastor spoke on its wonderful power and results, emphasizing its importance. They were one in common service. Great things were accomplished in God's name They rendered their own possible service. We can do great things for Christ if we recognize the call and the honor to be fellow-workers with Him. We must have a spirit of love and sympathy. God must enter into our lives fully and completely.

From the 23rd verse of the same chapter of Romans, the pastor chose his evening text. These three men were noted for their activity, although they are among the lesser known men of the Bible. "In this practical day," said the pastor, "a man's worth is determined by the service he readers humanity." Gaius was known for his hospitality, and Eractus for his high ideals in civic life. He put his Christianity into civic affairs, just as men should to-day. Quartus was renowned as a brother. Every one of these men found their inspiration in the fellow-ship of Jesus Christ. When we have served to the best of our ability our lives will not have been lived in vain. God is calling us to such service.

The choir rendered special music at both services; particnlar mention might be made of the pleasing duet part in the evening anthem. taken by Mrs. J. Bruce and Miss A. Walker.

Former School Teacher Laid To Rest

The funeral of Ray Daniel Levere, well known in this section, who taught school in Inkerman a few years ago and who died at the home of his parents, Mr. and Mrs. Levi E. Levere, of Shanly, after having been confined to his bed for only two weeks, was held from his late residence to the United Church on Saturday, January 31, at 1 00 p. m. The deceased was born at Mountain, Ontario, on Sept. 10, 1904, one of a family of eight, the children of Levi Levere and of his wife, Ada Ethel Leizert. Of this number, three brothers. Fred, of Renfrew, and Basil and Dwight both of Shanly and two sisters, Mrs. Kirk of Fort William, and Miss Janet, at home. survive, as do both parents. Rev. John L. Hodgson, of the United Church, of Shanly had charge of the service, while Rev. Wm Hamilton, of Ottawa, preached the sermon by special request. The choir of the Pittston United Church sang the anthem, "The River of Life," and the Shanly mixed quartette sang by special request, "The Eastern Gate." The accompanists were Mesdames Braynard E. Holmes, and Harry Grant.

The deceased had been engaged in school teaching since 1923, and was teaching at Newboro, when taken ill and forced to return home.

Aged Farmer Found Dead Near Williamsburg

James Gow, 60-year old farmer living just outside of Williamsburg, was found hanging to the rafters of his barn early Tuesday morning. He left the farmhouse to go to the barn about 6.30 a. m. and when he did not return for breakfast, a search was conducted. Mr. Gow is survived by his widow and 11 children, Burial will be at Williamsburg cemetery on Thursday.

A Valentine Party

A very enjoyable time was spent on Friday last when the Young People of the Winchester United Church were at home to the Young People of Hallville United.

In behalf of the local Society, Mr. LeRoy Boyd extended a hearty welcome to the visitors A helpful devotional service was then conducted by the Young People of Hallville, led by their president, Mr. Rae Allen, who was ably assisted by Miss Gladys Logan, Miss Hazel Cummings and Mr. Edward Kennedy, their subject being, "Prayer." This was followed by an inspirational address by Rev. H. B. Campbell on three words, "Must'nt, Must and May.

A committee under the leadership of Miss Annie Walker arranged a programme of songs, games, contests, in harmony with St. Valentine's Day. This included vocal solos by Miss Alice Rice, Miss Helen Smith, A. T. C. M... also a piano solo by Miss Alice Singleton.

Dainty refreshments were served by Mrs. Rice and the members of her committee.

A hearty vote of thanke by the visitors brought a very happy evening to a close.

IN OUR FEBRUARY SALE

We are featuring in our February Sale this 3 piece Bed Special. The Bed is a Simmons Steel Walnut. The Mattress is a "Peerless" guaranteed 100% layer white felt with a strong fancy covering, double stitched rolled edge. The Springs, a sagless cable, will last a life time. A wonderful combination at a low price, and our new terms,

$6.00 down and $2.65 monthly for 10 months.

ISSUE No. 6—'31

Arctic Life Less Strenuous To-day Claims Adventurer

Montreal.—An explorer to the South Pole who becomes stranded on the icy wastes will find, if he happens upon a place known as Little America, a snow house with sufficient food supplies to last for several years, three air planes, two of which are in good running order, and a large roast in the oven of the stove. Such was the stock left by George W. Tennant, who acted as chief steward and cook of Byrd's expedition to the Arctic in 1926 and the Antarctic in 1928. He is a native of Leamington, Ont.

An expedition to the poles to-day does not entail all the sufferings and hardships which faced Amunsden and Scott when they raced to the Arctic in 1911. Those who composed the Byrd party ate three times a day and consumed coffee whenever they desired, stated Mr. Tennant in a recent interview here.

"On holidays we had turkey, and on Sundays we ate chicken," said the adventurer, who was responsible for the menu that was used to feed the 42 members of the party.

"We had with us," he continued, "a large quantity of eggs which froze so hard that we couldn't dent them with an axe. Everything freezes down there, even to the anti-freeze which we used to thaw out by placing it on the stove."

Whales are plentiful in the Antarctic, and the seals are so tame they wait until a hunter lands upon them. They make good food, and the oil is used as heating fuel, he declared.

Mr. Tennant has girdled the globe several times. He has lived in every country and under every clime, but since his return from the Antarctic has become special representative of a chain-store concern.

Denmark's Winter Trees

Borne onthe arms of a strong northwest wind, the snow has come to Denmark! Drifts of fleecy, spotless down have piled themselves against the fences, and even in the forest have spread a white carpet over the fallen leaves.

After a noisy day of wind in the upper branches of the tall trees, there is a stillness and hush over all, as the snowflakes continue their dance. Suddenly there is a creak and a crack, which echoes through the aisles as if it were a large, empty room! The high beech trees have an edge of white down on their shadowy, purple trunks; the bole of the fir, in its copper-red dress, forms a contrast to the white around it, and the overhanging snow-capped branches spread out to protect, while each dark green bunch of needles wears, as it were, a mitten of white. The oak, which has imported itself into Denmark, and was formerly one of the principal trees of the country—before the beeches gained the upper hand—stands majestically alone in the more open parts of the forest. It has even more character in its winter than in its summer dress, its bare, gray twisted branches, making trellised windows against the pale gray sky. What energy it connotes. Living in a wind-swept country, it has been obliged to take strong hold of the earth and to spread its roots wide and deep as the strong wind tossed and bent it in the days of its youth.

The forest trees in winter are as much an inspiration as in summer. A shadow and a shelter to the undergrowth beneath their branches, each tree has its work to do. The multitude of buds on the trees' branches seem always to reach upward; up a little higher each year, ever turning toward the light, directing the thought of the onlooker to the fulfillment of the promise of the ages ,that "seed time and harvest, cold and heat, summer and winter, and day and night shall not cease."

Consulting the Oracle

Gentleman (at the police station)—"Could I see the man who was arrested for robbing our house last night?"

Desk Sergeant—"This is very irregular. Why do you want to see him?"

Gentleman—"I don't mind telling you. I only want to ask him how he got in the house without awakening my wife."

Betty—"Black hens are more clever than white ones, aren't they, mummie?" Mother—"What makes you think that, dear?" Betty—"Well, the black ones can lay white eggs, but the white ones can't lay black eggs."

How to Open Things

Information on this valuable subject is given by Dr. Albert Neuburger, of Berlin, in Everyday Mechanics (Chicago).

We constantly come across things, he says, that are difficult to open. There are, for instance, bottles with glass stoppers polished to fit tightly, as used for perfumes, condiments, etc. He goes on:

"To open these, it is only necessary to warm the neck of the bottle.

"This can be done by slowly warming it over a gas or alcohol flame, with constant turning. But there is the risk of having the heating take place too suddenly, and a valuable crystal bottle may be cracked.

"Therefore, the following process is better. Loop around the neck a thick string or a thin hemp cord. Then two persons grasp the bottle with their left hands, and hold it firmly. With their right hands they grasp the ends of the string, and draw it quickly back and forth.

"Thereby the neck of the bottle is warmed, and it expands; the stopper can be removed easily by turning it.

"Metal caps of tubes, in which we get toothpaste, cold cream, vaseline, various medicinal preparations, as well as water-color and oil paints, very often can not be unscrewed.

"Take a match, light it, and hold it under the cap of the tube, at the same time constantly rotating the tube. Of course, one can also use a gas or alcohol flame, but in almost all cases a match is sufficient. Dipping in hot water will also loosen the cap.

"Then there are metal cans of all kinds, such as those containing shoe polish, paste, candy, etc., which do not open. Many a finger-nail is broken in attempts to open them.

"Take a small, narrow knife and try at some point to insert it between the cover and the lower part of the can. Bend it out a little, and then gradually go around the whole can, always continuing to bend out. It is not necesary to have the knife reach all the way to the top of the lid.

"If the can does not open, gradually press upwards, still bending out, in individual circles, until it is finally bent out enough for the cover to be removed easily.

"Metal covers, such as those of fruit-jars, are easily removed by inverting the jar and holding the cover under hot water for a few seconds.

"This will expand the cover and loosen it. But if held under hot water too long, the glass also will expand."

The Dogs of Great Britain

The Minister of Agriculture has issued an order, operative as from July 1, 1930, which is of great importance to dog owners.

It requires that every dog, while on a highway or in a place of public resort, shall wear a collar with the name and address of the owner inscribed on the collar or on a plate or badge attached thereto.

It seems probable that the order, which applies throughout Great Britain, will be more strictly enforced than the local regulations have been, and it behooves every dog-owner to comply with its provisions.—The Animals' Friend.

Forenoon, and—what
The empty song repeats itself no more?
Yea, that is Life: make the forenoon sublime,
This afternoon a psalm, this night a prayer,
And time is conquered, and thy crown is won. —Edward Sill.

Happiness

Can happines be bought? To the cold and hungry it seems there is no question about it. Of course it can. Yes, and also to the everyday ordinary individual it seems happiness is always waiting just around the corner if we only had this or that. And yet if we look closely at those who have material things, pressed down and running over, we find their faces certainly do not mirror happiness any oftener than it is mirrored in the face of the man or woman who is without worldly goods. Granted then that happiness does not come from owning things, how is one to go about it to obtain this elusive but very desirable characteristic.

Since happiness cannot be bought is it possible for it to be taught? Maybe not, as one would teach the three r's, but isn't there an opportunity of teaching happiness if the child, right from the cradle, is first taught to control himself. It is readily seen that the child who has learned to get up and laugh when he bumps his nose and not to cry for things is receiving better training than the child who is allowed to be peevish and fretful and who takes real pleasure in pitying himself for every little scratch which comes his way. The little plastic mind is forming the foundation for being miserable instead of happy.

Sickness, disappointment, work and worry come to us all as we grow older and happiness comes to only those who have learned to pick themselves up after each misfortune, continue on and begin over with a determined cheerfulness instead of being crushed by it. There is nothing can make people happy who have grown up along with self pity.

So it seems very important to teach children to cultivate a cheeful outlook on life. You can either teach your child how to find real joy in doing things successfully even if it is accompanied by repeated failures, or you can teach him to envy those better off than himself so that all he can do is to brood dismally about how badly he is treated.

Then the world is so full of the simple, everyday things that are always with us. Real happiness comes to those who can see the beauty in the sunset, who feel the quiet of the woods, who know animals, who read wisely, who worship trustingly.

So we can be happy or miserable just as we choose and the world goes on just the same. It is for us to learn to be humble and thankful and to enjoy what blessings we have. Why borrow trouble or be afraid of the future or worry over the endless little things that go wrong continually. The way to forget them is to keep busy, so busy that your mind must concentrate on your work to the exclusion of every other thought.

Then, finally, the only way one can be truly happy is to make other people happy. You cannot be selfish or self centred or mean and be sincerely happy. These things do harmonize with happiness. "So give the world the best you have and the best will come back to you."

It's a Poor Joke

"When everyone can't join you in the laughter."

"When a little child is brought to tears."

"When something sacred is made to appear com on."

"When some woman blushes with embarrassment."

"When some heart carries away a sting."

Twilight Hour Story

Chapter 10

What They Did With the Big Box

You will remember Mama Lady sent Billy down cellar to get the big box for the chicks and when he found it he hurried upstairs with it. It got a little dusty down there so it was made all clean, inside and out. Billy was having lots of fun for he wondered what his mother was going to do next to make the little chicks comfortable. After it was all clean she told him to go out to the barn and get a whole lot of real fine straw and chaff that sifted down through the big pile of straw in the mow. When she had put a thick layer of it in the bottom it was as soft as soft could be. Then Mama Lady remembered she had an old warm black shawl up in the attic, so Billy brought it down, wondering what she wanted it for. But she just laughed when he asked her and said, "Wait, son, and you'll see very soon." And this is what she did:

She put the little chicks in the box which had the fine straw in the bottom and you would have laughed if you had seen them playing with the straw and scratching it up with their little feet. Then in one corner she put the old black shawl so that it made a tiny room in behind there just big enough for four little chicks. This was their small bedroom. It did seem as though that would be warm enough for them, but Mama Lady knew it wasn't snug enough when they were sleeping. So she thought a long time about what to do and was a little afraid she couldn't keep them warm enough. Suddenly she remembered she had used the last of the coffee that very morning out of its tin can and that tin can was the very thing she wanted. She filled it with a lot of nice, warm water, then put the lid on tight and set it behind in their little bedroom. It was just like a cosy stove, wasn't it? Now everything was ready, so she picked each little chick up, held it against her cheek a minute and against Billy's cheek too, and then set Jimmie and the others behind the shawl, close beside the little hot water furnace. The black shawl was closed down closer around them and this time I do believe they did think it was their Mama Hen, for they were so very warm and comfortable. And do you know they went sound asleep right away. Mama Lady covered them in with more covers so they wouldn't get cold before the long night was over. Then she and Billy said "Good night little chicks, till morning." Next it was Billy's turn for bed and it didn't take him long to get there, he was so sleepy, and he too went off into slumberland right away.

Opportunity

They do me wrong who say I come no more
When once I knock and fail to find you in;
For every day I stand outside your door
And bid you wake and rise to fight and win.

Wail not for precious chances passed away,
Weep not for golden ages on the wane;
Each night I burn the records of the day,
At sunrise every soul is born again.

Laugh like a boy at splendors that have sped,
To vanished joys be blind and deaf and dumb;
My judgments seal the dead past with its dead,
But never bind a moment yet to come.

Though deep in misery, wring not your hands and weep,
I lend my arm to all who say "I can";
No shame-faced outcast ever sank so deep
But he might rise and be again a man.

Age Fifteen Shows Girls To Be at Greatest Value

Taking into account the average wage earning capacity of women, the value of their work in the home, the value at the birth of children, what it costs to feed and clothe them and all other economic factors that could be collected, a group of German statisticians estimate that the girls of that country are worth more at the age of fifteen years than at any time before or after that age. They place her worth to the state at fifteen years as approximately $10,000.

When she has reached the age of thirty, the report states, her value decreases to $9,200. At fifty the value is set at $7,000 and at sixty it is calculated as only $5,000. After seventy years of age the economic value sinks to almost nothing.

German males at thirty are estimated to be worth $11,000, as compared to the $10,000 for the average woman. It is equally interesting and important that the estimated economic values for women have risen much higher for women during the last twenty years. The reason for this is ascribed to the increasing application of women to industrial work, so that they can be directly credited with production and earnings as well as for their worth as home builders and family makers.

At a matinee a little man called at the theatre, bought two tickets, and proceeded to enter, followed by his wife and eleven children. "Here!" shouted the doorkeeper, "where's the other tickets?" 'Whit ither tickets?" asked the man. "Why—for this crowd." The man with the family answered angrily, "Did ye no' advertise children under twelve wi' parents admitted free?" "We did," retorted the doorkeeper, "but these are not under twelve." "Count them, then, an' ye'll be findin' there's just eleven o' them—we left the ither at hame."

Danger! Plane Crossing!

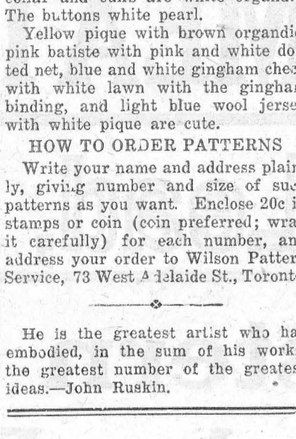
First "aeroplane crossing" sign ... ning to motorists and pedestrians has been erected by Curtiss-Wright officials at Grand Central Air Terminal, Glendale, Calif., at spot on road where incoming planes fly low for landing.

102 million more cups of Salada tea were consumed in 1930 than in 1929 by the people of Canada.

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern



It's very, very French—and so entirely practical.

Don't you love it?

It's as simple as can be.

The one-piece dress has inverted plaits below the buttoned applied tabs. They provide all the necessary fulness small folk need to romp about.

The knee band bloomers are smart, showing beneath the hem of the dress.

This becoming bloomer frock Style No. 2773 comes in sizes 2, 4 and 6 years.

The 4-year-size requires 2½ yards of 39-inch material with ⅜ yard of 35-inch contrasting.

It is nile green linen. The frilled collar and cuffs are white organdie. The buttons white pearl.

Yellow pique with brown organdie, pink batiste with pink and white dotted net, blue and white gingham check with white lawn with the gingham binding, and light blue wool jersey with white pique are cute.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

He is the greatest artist who has embodied, in the sum of his works, the greatest number of the greatest ideas.—John Ruskin.

Zoologist Names World Wonders

Four things in the universe that really are wonderful even to a modern scientific man, replacing such purely man-made "wonders of the world" as the pyramids of Egypt or the hanging gardens of Babylon, were listed by the distinguished British zoologist, Sir J. Arthur Thomson, before a recent meeting of the School Nature Study Union, in London. One of the four, Sir Arthur said, is the enormous amount of power in the universe; power that keeps the gigantic earth spinning on its axis or power that keeps the sun and other stars continually pouring out heat and light for billions of years. The second real wonder is the immensity of space, so that light rays which travel a little more than 186,000 miles each second require more than a hundred million years to reach us from the most distant stars and nebulas which astronomers have measured, with still greater unmeasured depths beyond. Third of the list is the intricacy and manifoldness of things, something especially to be appreciated by the biologist who studies the thousands of tiny, intricate yet beautifully fitted and adjusted mechanisms needed for the life of even the simplest living creature like an insect or a grass blade. Finally, as the fourth of his list Sir Arthur mentioned the orderliness of Nature, so that man observes not a chaos of unintelligible actions going on haphazard like men running aimlessly in a riot, but a rational, ordered cosmos in which natural law seems to be everywhere and always the same. But perhaps a still greater wonder than these four, Sir Arthur concluded, is the wonder of science itself; of the growing ability of the human mind to understand these other wonders.

Private Police

It has recently been revealed that one street in Chicago, where a number of wealthy people live, has its own private police force, for which the residents pay.

This is designed as a precaution against "gangsters," and so strict is the watch for "undesirables" that the to the officers on duty before they are house-owners have to give a password allowed to enter their homes.

A private police force must come rather expensive. But one rich American, who was robbed by burglars, maintained his own detectives until the criminals had been brought to book.

Sometimes the American will act as his own "policeman." There is a chemist near Los Angeles who was "held up" five times last year. But he keeps a revolver behind the counter and has already captured four crooks and shot two.—"Answers."

"Faithfulness to vows is the backbone of society."—Gilbert K. Chesterton.

Varied Heat of Sun's Poles Einstein's Latest Theory

Mount Wilson Observatory, Calif.—An interesting theory was presented to astronomers by Dr. Albert Einstein on Jan. 30th after he had looked through the instruments of the world's greatest solar observatory here.

The north and south poles of the sun have a different temperature from that of the equator, or at least a difference in temperature exists between the sun's poles and equator, the world-famous physicist suggested.

This theory may explain some of the mysteries of the gigantic cyclones, the sun spots, observed in the sun's atmosphere.

Dr. Einstein suggested that were the sun's poles either hotter or cooler than its equator the similarity between the sun's cyclones and the storms on the earth might be explained.

Dr. Einstein's visit to the observatory was perhaps the most momentous event in his sojourn in southern California. It was a small group that gathered at the observatory.

There were Dr. Walter S. Adams, director, and Dr. Edwin P. Hubble, two of the world's foremost astronomers; Dr. William Wallace Campbell and Dr. Charles E. St. John, astronomers of Lick Observatory; Arthur S. King, astrophysicist; Alfred H. Joy, observer, and Ferdinand Ellerman, photographer of the observatory staff. Accompanying Dr. Einstein was his collaborator and companion, Dr. Walter Mayer of Berlin.

These latest observations were at the 65-foot solar tower in which Dr. Einstein was enabled to seek the effect of the magnetic fields of sun spots. These spots are known to be cyclones in the solar atmosphere.

Dr. Einstein studied the observatory methods of plumbing the depths of the sun's atmosphere and measuring conditions at different depths. The observations that the sun spot cyclones were like earthly cyclones, because their apparent origin at the poles and direction of their travel was similar to earthly storms, aroused the curiosity of the German natural scientist.

Based on this, he suggested cooler polar temperatures might exist on the sun and offer the solution to the movements of these cyclones.—The Christian Science Monitor.

Modernism in Art Abandoned in Paris

One of Largest Stores Throws Out Objects and Hangings When Demand Ceases Furniture Also Changes

Paris.—The public, which is the final judge, has effectively revolted against the more extravagant manifestations of modernism in art which have been current for the past ten years. Out of that extravaganec of design and color much that was good seems likely to remain. But for the moment there has been a complete reaction against what only a very few years ago was regarded as the last word in modern decorative art.

About a month ago, one of the largest department stores in Paris, a store employing some 10,000 people, held a directors' meeting to decide what to do about the ultra-modern art handled in their art department. For months not a single ultra-modern canvas had been sold and their customers passed by the modern wall hangings and other decorative pieces as though they were not there. It was not due to the financial depression, because classic art and classic decorations sold well.

The result of this directors' meeting was that every piece of so-called modern art was retired from the art gallery, the store taking its loss stoically, and every piece of fabric that bore a modern art design was sent to the dye factory where it was converted into plain, solid-colored cloth and sold at bargain prices.

Sees Lack of Sincerity

"The so-called modern art was never sincere," one of the directors said. "It was the result of a lack of willingness to study. The persons who turned out such things as animals with legs that looked about eighteen feet long and heads about the size of lemons most certainly had never learned the rudiments of their metier, much less their art. They were seeking an easy way to make a living.

"These animals today are gone, disappeared in the dyepot, just as the so-called modern art is gone; disappeared under the flood of adverse public opinion. As far as we are concerned, modern art has ceased to be. In the place of yesterday's atrocities, lacking proportion, perpective and finesse, we have today paintings and designs showing the harmony that results from an intelligent and painstaking application of the principles of art.

"There have been many changes in public opinion in my time, but rarely, if ever, have I seen a more complete change than that so clearly expressed at present by the general sentiment against modernism in art. Modern art simply doesn't exist in our store. It is dead and buried."

A firm in Paris which has made a specialty of ultra-modern furniture and decorations, selling queer-shaped furniture and odd hangings, today is showing furniture that is solid, quiet and dignified. Asked where were the eccentric and amusing things one always associated with that house, the manager explained, with a shrug of the shoulders:

"All that exaggerated modernism is quite out of fashion. It is really bad taste (mauvais gout) to have anything ultra in one's home. We depend for the attractiveness of our furniture on simple lines and beautiful woods. No more unnecessary curves and angles, just good lines and precious woods, exquisitely worked, furniture that will be a pleasure to live with through the years.

Now Building for Comfort

"We are building for comfort, solidity and comfort. Look at these armchairs. They are perfectly plain, upholstered in the best quality plain-colored materials. They are built to be restful and useful with deep seats, backs at just the right angle, and wide arms. Notice the beautiful lines, the perfect proportions.

"As for wall coverings, we are using a great deal of velours and velvets, but always in plain, neutral colors, no designs to spoil the harmony of a room."

Camille Mauclair, a Paris journalist, lifted up his voice some time ago against the so-called modern art that has been produced in Paris, largely by foreigners. His first book, "The Joke of the Living Art," was received by much sympathetic understanding. His second book, which has just made its appearance, is entitled: "Undesirable Foreigners Against French Art."

Fresh Air and Heat

Before starting a coal fire for baking, open the oven doors wide to allow the old, stale air to escape. Then start the fire briskly, close the oven, and in just a few minutes it will be hot, whereas it might otherwise have taken some time. The reason is that fresh air heats more quickly than does stale air.

A similar procedure should be followed in the heating of a room. In whatever way a house is heated fresh air must be admitted freely at intervals, particularly before starting the heat in the morning or again toward night. If the air is made perfectly fresh, it will warm quickly.

Hoop-Skirts and "Baby Cars"

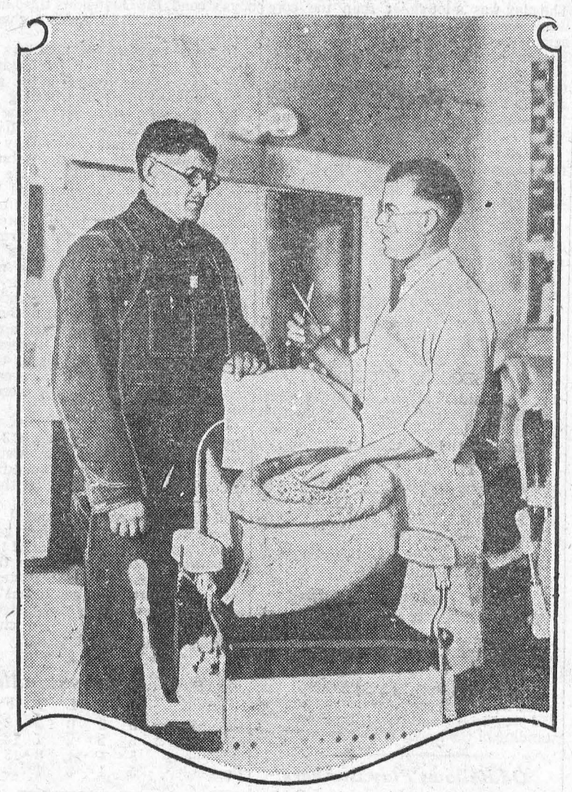
A fashion expert says that hoop skirts are coming back. And just as the popularity of the miniature car, apartment and various forms of sport has reached its zenith Can you picture the promised situation? —The Christian Science Monitor.

Canadian Petroleum

The chief petroleum producing areas in Canada are the Turner Valley field in Alberta, and the Petrolea and Enniskillen, the Oil Springs, and the Bothwell fields in Southern Ontario.

It is perfectly all right for a woman to want to hold on to her youth, but she should not do it while he is driving.

Bushel of Oats Pays Barber



"I see by the papers," says Orrin Gould, farmer of Fairmont, Minn., to Albert Westergaard, barber, "that a bushel of oats is good for a haircut." "O.K.," replied the scissors expert.

Planets Mars and Venus Possess Form of Life, Scientist Thinks

Cambridge, Mass.—At least two planets besides the Earth, Mars and Venus, may have life in some form, in the opinion of Leon Campbell of the Harvard Observatory staff.

It was absurd, he said in an recent interview to suppose that the earth was "the only peopled planet."

"Atmospheres as determined on Mars are found to be livable," he said. "The temperature in the middle of the day is 60 degrees above zero Fahrenheit. It ranges downward 100 degrees. The same range exists on our planet, but the temperature does not drop 100 degrees in a single day here as it may on Mars."

Campbell emphasized that while it was quite possible that there was some form of animal life on Mars, it was uncertain if that planet was suitable for the development of "intelligent" life.

It was equally probable, he thought that there was life on Venus. Though the telescope, he explained, he had seen both these planets markings, formerly believed to be canals, but now regarded as natural waterways lined with foliage.

Live Normally And Avoid Colds

Medical Association Gives Nine Rules to Escape a Cold

Nine rules for avoiding colds have been published by the American Medical Association, as compiled by James J. King. Colds in America probably cause, Mr. King asserts, a loss of more than a billion dollars a year; something which would arouse instant alarm if it happened in the stock market but which the country allows to go on year after year virtually unchecked. The first rule for avoiding this enormous loss, Mr. King states, is to "keep all the organs working normally," and it is to help do this that his other eight rules are devised. "Get plenty of sunshine and fresh air," is the second rule. The third is to "eat sufficient and proper food." The fourth is to dress properly but not in clothes that are too thick or heavy. The fifth is to keep the body clean, especially the hands, as this tends to avoid infection by germs. The sixth rule is to "eliminate the body poisons through bowels, kidneys and lungs." The seventh, probably least known of all to the average layman, is to get rid of any chronic germ infections of mouth, teeth, gums or throat. These frequently result, Mr. King states, in starting new colds. The eighth principle is that the special vaccines recently developed for preventing colds may be useful for people who are especially susceptible. The ninth rule is to consult a physician promptly and frequently in the early stages of a cold so that the infection may be kept as mild as possible.

"The Gorgeous East"

Truth Magazine (London): Speaking in the House of Lords on the evacuation of Kandahar, just a month before his death, Lord Beaconsfield said: "My Lords, the key of India is London. The majesty and sovereignty, the spirit and vigor of your Parliament, the inexhaustible resources, the ingenuity and determination of your people—these are the keys of India." They were the last public words of a statesman who was conscious that England was the trustee of an inheritance bequeathed to her by Clive and Warren Hastings, by Wellesley, by Dalhousie, by Canning, by Lawrence, by Havelock, by Metcalfe. Having poured into India for over two centuries the wealth of London to float the loans and build the railways; having sent out to the Peninsula our greatest soldiers and most sagacious statesmen, England is now told to stand aside, and leave questions of vital importance to the safety and prosperity of the whole Empire to be settled by a handful of Indian delegates, whose authority to speak for the Indian masses has not even been examined.

British Films

H. S. Oakley in the Fortnightly Review (London): For the first twenty years of its brief life, this industry has been controlled from the United States. . . . Today all this is in process of change. The Legislature took the first step when it passed the Films Act (1927). Science completed the process when it invented the "talkie". The British audience stood the American picture, much as it laughed at times over the grotesque mistakes that were made, but it cannot stand the American voice. It wants English as it is spoken in England, and slowly but surely it is getting it. A great industry is in process of being born. British-made films are already finding their way into every corner of the English spoken world, and they are being welcomed.

Women pause to reflect—when they see a mirror.

Long Trousers Will Usurp Plus-Fours

Caps Making New Bid For Popularity — Panamas Still Rank First in Hats

New York—Knickers, according to the Fifth Avenue stylists, are slipping out of the golfer's wardrobe.

Long trousers are due to come back to the links. That is to say, for those who like to be different. The whole idea (the stylists' idea) is that the mashie wielders don't really need knickers now.

The rough, for which they were designed, on most courses, no longer is so rough that trouser legs are likely to emerge with shin guards of thistle burrs and dry twigs.

Already plus-fours are not as baggy as they used to be.

Caps are increasing in popularity, especially in white or natural linen. White flannel trousers are by long odds the current Florida resort fashion. Here again there is a neat distinction. Most white flannel pants wearers probably will appear in the striped variety—the hotel trade, as one Fifth Avenue clothier called it. The really well-dressed man (meaning, presumably, the chap who has a villa), will wear them pristine plain.

Panama hats are first in popularity, chiefly in the optimo shape, with plain black bands. White felts are limited but smart. Sennits will remain in the perennial standard among straw hats.

Men's spring suits, says Amos Parrish, fashion counselor, will rank thus:

Coats—Two button, plain full back, from 29 to 30 inches long, with notch lapels; the same in three button style, worn by many with only the middle button at the waist buttoned; six-buttoned double-breasted, with peak lapels, worn by many with only two buttons buttoned, the middle outside and the invisible inside dress button.

Colors—Light and medium grays outstanding, tans and chocolate browns next, and, of course, blue. Light blues, greens and pastel browns and tans are a limited fashion.

Unknown Elements Traced By X-Ray

Washington. — Confirmatory evidence of the existence and identity of "rhenium," one of the missing elements, has been discovered and checked at the Bureau of Standards.

Dr. W. F. Meggers, a government specialist in optical work, has brought out proof of the presence of the substance by application of the X-ray and the analysis of the spectral light it reflects.

The substance, provisionally set down as "rhenium 75" on the list of 90 or more basic elements making up the physical universe, is one of those whose existence has been hitherto predicted rather than discovered by natural science.

At present, rhenium is rarer than radium in the earth's stock of commodities, and is too young to have any known usefulness. However, like many another of the elements purposefully sought since the structural plan was laid down indicating their existence, rhenium may attain value and be put into service after natural science has more fully established its character.

Children Rush to School In Czechoslovakia

Prague.—School children hurry on their way to school in the villages and hamlets of Czechoslovakia, eager anticipation written on their faces. Why? They are to hear the most interesting lessons to-day by the greatest teachers of the nation, right from Prague.

Getting noted teachers has long been a problem in rural schools. Radio now brings their voices to every part of this country. Loudspeakers have been installed in even the smallest village schools and thus the children look forward to their lessons.

England's results with radio in the schools inspired this step in Czechoslovakia. At present only one hour a week will be devoted to this type of education, covering history, geography nature study and music. A central board working with the broadcasting stations of Prague, Brno, Bratislava and Kosice will control the work and prepare special monthly bulletins for the teachers outlining preparatory work for the programs. Every state school will be equipped with sets and loudspeakers.

Not only will children benefit from these installations but adults also as the school buildings are used for extension work. Incidentally this plan is expected to stimulate a great deal of interest in radio generally. Czechoslovakia has only 288,000 listeners-in out of a population of 13,000,000, compared with 455,000 in Austria with a population of but 6,000,000.

The history teacher noticed that young Smith was back in class after a long absence through illness. "I'm glad to se you here again," he said. "You'll have a lot to make up. How long have you been away?" "Since William the Conqueror landed, sir," replied Smith.

World to Pay 3 Billions For Roads in Year

Programs Will Be Extended to Uttermost by Many Nations to Aid the Jobless

A writer in the N.Y. Herald Tribune makes the assertion that 1931 will be the greatest year on record for road building. He further declares that "not only will the United States extend the highway construction program to the uttermost, but other nations throughout the world are planning to make vast extensions to roads. It is estimated by the United States Department of Commerce that more than $3,000,000 will be expended.

Among the nations that will take part in the construction works are Argentina, Canada, Japan, Mexico, Jugoslavia, Algeria, Greece, Hungary, Bulgaria, Italy, Belgium, the United Kingdom, Porto Rico and Austria.

According to the official report, Argentina will pay out $200,000,000, Canada and Japan a least $10,000,000 each, while Jugoslavia is prepared to expend $13,000,000. To relieve unemployment in the Philippines there is $6,000,000 ready for road work.

"One hundred and ten nations and political subdivisions of the world will spend at least $2,000,000,000 on roads and road construction during 1931, according to an estimate made by automotive division of the Bureau of Foreign and Domestic Commerce," says the statement by the Department of Commerce bulletin. "World-wide investigations disclose the fact that in the majority of countries of the world road building has been stimulated as a measure of unemployment relief, and as a consequence world highway budgets were larger in 1930 than in 1929, and are expected in 1931 to be larger than ever before.

"That history repeats itself in this respect at least is attested to by recent findings in India, Asia and other places where ancient roads have come to light built many years ago.'

Chinese Children Grade 95 Per Cent.

Toronto. — Five members of a Chinese family, children of the Rev. T. K. Mah, a minister of the Church of All Nations, here, newcomers to Canada, learned the English language, and then headed their respective classes at public school. Joseph, the eldest, not only headed his class but was the only pupil out of 200 who wrote departmental entrance examinations to get 100 marks in every subject. The four other members of the family secured 95 per cent. each in their examinations.

In the presence of 400 parents of the pupils, Joseph was presented with a gold medal signaling his attainment at the examinations. "They studied intensely," said Principal Little. "They did not go out as much as the average Canadian boys and girls. In short, they put every bit of energy into their school work."

It was only two years ago that the family came from China to Toronto. The rapidity with which they learned the English language is still a matter of gossip in the Humber Bay district of Toronto.

Sun Pays Surprise Visit To Northern Regions

Seattle, Wash.—The natives and white people of Point Barrow on the extreme northern coast of Alaska were in a high state of excitment on January 21st, when a fiery, red ball poised hesitantly on the horizon for 10 minutes and then disappeared.

Most of the town's population crowded to the house tops or to the summit of the nearest snow drift to catch the first sight of the sun they had had in about two months. A blizzard of several days' duration stopped at the approach of the sun and there was an immediate moderation of temperature.

British To Patrol Transjordan Border

Jerusalem.—A step toward bringing to an end intertribal raids along the frontiers of Transjordan and the Nejd is seen in the formation of a special desert police force under the direction of Captain Glubb, who had successfully maintained order in the large desert areas of Irak.

The scheme involves the construction of three new frontier police posts which will be garrisoned by the desert police and serve as the bases for the mobile force.

Dr. Robb Advocates Tomato Juice Diet

Contains Vitamin C, Which Protects Scurvy, Minister of Health Points Out

Ontario's Minister of Health, Hon. Dr. John Robb, is a firm believer in the healthfulness of tomatoes—particularly in the efficacy of the juice of canned tomatoes in the Winter season when the average diet is deficient in Vitamin C as a protection against scurvy and kindred conditions.

"The tomato," pointed out Dr. Robb, "is composed of an outer covering called the skin. It contains pulp, seeds and a large quantity of juice. The valuable properties of the tomato from a dietary and medicinal point of view, are contained in the juice, and the most important element in these dietary properties is a large proportion of the vitamin which protects against scurvy as Vitamin C.

"During the Winter months Vitamin C in the ordinary human diet, especially that part represented by milk, is considerably reduced, and therefore it is particularly essential that our dietary deficiency be taken care of by supplementing our regular diet with some food or food accessory rich in Vitamin C. Nothing in this connection is superior to tomato juice," declared the minister of health. "A fortunate fact in this connection is that vitamin C in tomato juice is adequately protected by the presence of fruit acids, so that the heat required in the process of canning is not sufficient to materially reduce the vitamin C content of the juice.

"Orange juice has long been recognized as an excellent protective against scurvy, and its use during the Winter months for infants artificially fed, has become common. We know now that tomato juice is equally as good as orange juice for this purpose and it has the advantage that the required amount of juice may be taken for the infant and the balance of the can, when we serve canned tomatoes, may be used as an excellent food for the family.

"The important point to be noted is that our regular diet requires a supplement to provide in the Winter for the deficiency in vitamin C. Tomato juice adequately supplies this deficiency."

Eating of Starchy Foods on the Wane

Urbanna, Ill.—Prof. P. D. Converse of the University of Illinois finds that from 1899 to 1927 the per capita consumption of wheat and rye flour, corn meal, and rice declined from 334.2 to 209.3 pounds. The consumption of meats is up from 156 to 159.2 pounds.

A great increase has been noticed in the use of canned goods, that of fruits from 2.3 pounds in 1899 to 9.9 in 1927, and canned vegetables from 10.3 to 28.1. Fresh fruits are now used in greater quantities, due mostly to the better methods of refrigeration which are now available.

A decline in the amount of butter used is more than made up by the increase in the consumption of oleomargarine.

A Rack for Covers

It is very annoying to have to waste time hunting for the cover you want for a saucepan, but many housewives have just this trouble. There is nothing to hang covers by. Sometimes they are arranged against the wall on the back of a shelf, but a large assortment of covers will take up considerable space and this is not always available.

There are cover racks to be had which can be hung on the closet door or on the side wall of the closet and these will hold all the covers, making it possible to get the cover you desire without the loss of a minute.

One woman never used the rack in the range oven intended to be placed under the roasting pan, so she put this in one corner of the shelf and she finds it is a space and time saver as a cover rack.

Prince to Visit Santiago

Santiago, Chile.—The Prince of Wales will spend two days in Santiago and two days in Vina del Mar during his South American tour, it was announced recently. President Carlos Ibanez will welcome the Prince of Wales and Prince George at Los Cerrillos Airdrome when the two arrive here by airplane from Antofagasta on February 23.

Talkies Give British Films New Incentive

Arthur E. Lee Claims Britain Is Hollywood's Most Serious Competitor

Toronto.—Increased consumption of British films throughout the British Empire would, almost immediately, place British and Hollywood producers on an absolutely equal footing, from the financial and every other viewpoint, said Arthur Lee, American representative of two of the largest British studios, Gaumont-British and Gainsborough, in an interview here.

Introduction of sound to pictures, said Mr. Lee, had greatly restricted Hollywood's export markets in non-English speaking sections of the globe. This gave British studios, forging ahead in recent months till they are to-day the American's most serious competitor, the best chance they have ever had to break the Hollywood hold on film entertainment in British countries.

As far as Canada is concerned, there have never before been as many good pictures available as there are at the present time. Their quality is demonstrated by the fact that a dozen British films have already been booked in New York and more are to follow. Some of these have not yet been shown generally in Canada.

Mr. Lee is a former Canadian who has for years been engaged in the development of British film distribution.

Swamp Water Is Changed To Guard Birds' Health

Salt Lake City, Utah.—Changing the water occasionall, to keep the occupants healthy is as essential in a bird refuge as in a gold-fish bowl, it has been discovered.

Soon it will be possible to "change the water" at will over 30,000 acres of marsh land in the Bear River migratory bird refuge. An elaborate system of dikes and spillways costing $350,000 is being built to enable game wardens to release stagnant water and fill marshes with fresh water from the Bear River.

Thousands of birds died in the refuge previously from disease that developed because the swamps were not drained.

C.P.R. Net Earnings Exceed Last Year's

Montreal.—An increase of $1,008,251 in the net profits of the Canadian Pacific Railway for the month of December, 1930, as compared with the corresponding month of 1929, is shown in the earning report issued recently. The gain in profits was made up partly by an increase in gross earnings and partly by a cut in working expenses.

Banker Claims Dominion Will Recover First

A. W. Austin Says Depression Has Affected Canada Least of All

Toronto—"Notwithstanding all adverse happenings, Canada has suffered less during the past 18 months than almost any other country and will recover more quickly," said A. W. Austin, president of the Dominion Bank of Canada, in the course of his address at the sixtieth annual meeting of the shareholders of the bank recently held here.

Mr. Austin referred to the soundness of the Canadian banking system and the adaptability of branch bank service to the Dominion's limited and scattered population. The president dealt exhaustively with agricultural conditions, especially in the prairie provinces, and urged the extension of mixed farming operations.

C. A. Bogert, vice-president and general manager, in his address dealt with the cause of shrinking grain prices and referred to the return of Russia as an exporter. The speaker pointed out that the shrinking of grain prices was largely due to the policy of European countries, formerly importers, in increasing their own output and placing prohibitive tariffs on foreign wheat.

Dealing with the question whether gold shortage is the root cause of the world's difficulties as many authorities assert, Mr. Bogert said: "Undoubtedly a shortage exists and the accumulation of over 50 per cent. of the insufficient total stock in the hands of two countries works to the detriment of others."

Late Trains Clocked For Paris Commuters

Paris.—When Paris commuters tell the boss their train was late they have to produce documentary evidence in support.

Every time a train from the suburbs is delayed, officials give out slips on which are shown the time and place of departure and the exact time of arrival at the terminus.

Birds Roost on Housetops, Dogs Yawn at Rabbits

Tanana, Alaska.—This is the winter of much game. Ptarmigan are so plentiful that the birds fly into town and are found roosting on housetops in early morning. Snowshoe rabbits romp in the streets too common for the sledge dogs to bother to chase. Pot pies and roast game are regular entrees here.

Ill fortune is often an incentive to genius.—Ovid.

Kaye Don To Attempt Speed Record

Miss England II in which Sir Henry Segrave met death and which has been reconditioned and repaired at Derby, England. Craft is ready for Kaye Don to make speed attempt on Lough Neagh.

Junior Hockey

On Friday night last the local Junior Hockey team played their final game with the Chesterville Sextette at the arena here and were defeated by 6 goals to 2. The play was a lot closer than the score would indicate, but the breaks were against the home team. For Chesterville, Helmer, McAvoy and Lapierre were best, Helmer being the most spectacular of them all. On the local line-up, Bailey and Crowder stood out with the rest of the team doing their best. The line-ups were:

Chesterville—goal, def., Helmer; and Lapierre; centre, Lynch; wings, McAvoy and Olsen; subs., Tate, Clarmour and Fyke.

Winchester—goal, R. Barkley; def, A. Barkley and Crowder; centre, Summers; wings, Wylie and Slater; subs, Kinkaid, Gemeroy and Helmer.

The Summary:

FIRST PERIOD

1—Chesterville, Helmer..... 8.00
2—Chesterville, Helmer, (Taite)..... 6.00
Penalties,—Fyke.

SECOND PERIOD

3—Chesterville, Lapierre, (McAvoy 3.00
4—Chesterville, Helmer,..... 6.00
5—Chesterville, Helmer..... 5.00
Penalties—Helmer, Clarmour.

THIRD PERIOD

6—Winchester, Slater..... 4.00
7—Winchester, Gemeroy..... 10.00
8—Chesterville, Olson..... 3.00
Penalties,—Lapierre.

Referee, L. J. McCormick.

Junior League Standing

Team	P	W	L	T	F	A	Pt
Chesterville	7	7	0	0	22	7	14
Morewood	7	4	3	0	10	7	8
Winchester	7	0	7	0	6	24	0

The Berwick team having dropped out of the league, all games played with them nad to be thrown out, therefore the standing of the league is as shown above.

Oddfellows Play Bankers

After the Junior Game last Friday night, the Bankers' team of Chesterville played a return game with the Oddfellows here. The game was closely contested and ended a draw 2-2. Shots on the nets were equally divided, 18 stops credited to each goalie. For a large part of the game the Oddfellows were most aggressive, but missed some pretty chances on seueral occasions to get goals, hard luck being responsible. Winchester opened the scoring in the ffrst period when Scott gave Summers a pass in front of the visitors' net and the latter scored. Seven minutes later Flynn put the visitors on even terms, and just before the period ended Chesterville went into the lead when Casselman dented the twine. About midway through the second stanza Hec. McLean gave Scott a qass and he evened the score for the locals. No further scoring was done. Flynn, Lynch and Casselman bore the brunt of the battle for the visitors, while Scott, McLean and Fader were best for the locals. The line-ups were:

Chesterville—goal, Campdros; defence, Brown and Flynn; centre, Casselman; wings, Lynch and Osler; subs., MdLeod and Marcellus.

Oddfellows—goal, Aul;a defence, Kellogg and Flor ; centre, McLean; wings, Scott and Summers; subs, Fader, Helmer, and Cross. Referee, L. J. McCormick.

The Buzzers Lose 4-1

On Thursday night last, Hy. Bessin and his Buzzers played a game of hockey at South Mountain with a team from that village. The Buzzers were without the services of one of their best players, Frank Bailey, and greatly hampered by an open rink and a drizzling snow storm, lost the grme, 4-1. South Mountain did their scoring in the first two periods. Hy. Bessin refereed the first two periods of the game and in the final session he put on his skates and played with his team at centre. The Buzzers goal was scored when Hy. took the puck from behind his own net and stick-handled his way through the entire South Mountain team, passing over to Collison in front of the Mountain goal, and Collison poked it in.

Two minutes later the same play was repeated, but Kirkwood who took Hy's pass missed an open net. On the whole the team put up a fine showing. The cold trip to Sonth Mountain and the falling snow during the game, along with shortage of subs., were responsible for the contest not being a lot closer. Those who played for tne Buzzers were—Barclay, Johnston Jacobs, Lashway, Collison, Kirkwood, Hitsman, Kirkwood and Bessin After the game the boys were treated to a full course dinner, which they greatly enjoyed.

South Mountain—goal, G. Boyd; def., H. Murdock and T. Shaver; center, E Boyd; wings, E. Francis and H. Boyd; subs, H. Laushway, D. Boyd.

Chevs. Are Defeated

Hart Melvin's Chevs, were handed their first defeat of the season when they took on the Morrisburg Maroons, of the St. Lawrence Hockey League, at Morrisburg last Thursday night. The score was 3-0. While the Chevs. failed to get a goal they put up a hard battle and would have scored on several occasions had the Maroon goalie not been in such rare form. However on the night's play Morrisburg had an edge on the local team and deserved the victory. For the victors Miller, Cameron and O'Malley were the best, while on the automobile team every man worked hard with McLean, Render, Stuart, Barkley, Thompson and Williams being particularly aggressive. The first two Maroon goals were netted by Miller and were real gems, while Ault got credit for the third counter which was scored from a scramble in front of the Chevs. net.

The local band accompanied the team and their music was a treat to all present. A good aggregation of hockey fans also attended the game. After the contest the hockey players and members of the Band were treated to a dainty lunch at Cassel's restaurant, and on the whole a very enjoyable time was spent. The line-nps:

Morrisburg—Goal, Wagoner; defence, Chatelaine and Duval; centre, Miller; Wings, Boucher and Cameron; subs., O'Malley, Payer, Smith and Ault.

Winchester—Goal, Williams; defence, Brown and Stuart; centre, Thompson; wings, McDonald and Render; subs., Elliott, McLean, Barkley and Summers.

The game was handled in a flawless manner by L. J. McCormick as referee, and F. Broder as judge of play.

Among the Curlers

The Club Pins have again changed hands and Mr. Johnston had to hand them over to Mr. Graham after a hard fought game. Metcalfe has a game arranged with Morrisburg for the Christie Cups and Winchester comes next to play the holders. This afternoon two rinks come out from the Glebe rink at Ottawa for a couple of friendly games. The weather has been ideal for curling and there has been plenty of noise and fun at the rink this winter.

DR. A. L. CREWSON

122 Sydney Street, Cornwall, will be in Morrisburg at the home of Miss Della J. Snyder, first house south of the War Memorial Monument, Tuesday and Friday mornings. Please make appointment with Cornwall Office. Tel. 1245. 46c

Town League Games

The Town League games played at the local arena last night has changed the standing of the teams considerably. The Chevs. are now in the lead, the Speedboys second, the Oddfellows third and the Buzzers in the cellar without a chance of making a play-off birth.

In the first contest the Speedbys chalked up a 4-2 victory over the Oddfellows in one of the fastest games of the season. The Speedboys opened the scoring in the first period with two goals off the sticks of Rennick and Art Summers in five and eight minutes respectively. They added another goal in the second session when Art Summers scored one minute before the gong sounded. In the final period, Scott scored for the Oddfellows after four minutes play and two minutes later Kinkaid took a neat pass from Armstrong and counted for the Speedboys' fourth goal. The Oddfellows put four men on the offensive and obtained their second goal via McLean. The game ended 4-2, The Oddfellows had the best of the shooting and met with considerable hard luck, having missed the net on several occasions when they were right through. There was little to choose between either team and the game was a lot closer than the score would indicate.

In the second game the Chevs. became league leaders when they took a 3-2 decision from the Buzzers. The first period went scoreless while each counted once in the second, Crowder scoring for the Chevs and Kirkwood for the Buzzers. In the final stanza, Thompson counted for the Chevs. second goal and they got their third from a scramble in front of the nets Laushway scored the second for the Buzzers. This was also closely contested for the greater part of the game, but on the whole the Chevs. had a slight edge. This leaves the Buzzers without a chance of making the play-off this year.

Town League Standing

Team	P	W	L	T	F	A	Pts
Chevrolets	5	2	0	3	8	6	7
Speedboys	5	2	2	1	13	13	6
Oddfellows	5	1	1	3	13	14	5
Buzzers	5	1	3	1	10	11	2

Hockey Notes

The final game of the Junior schedule was played at Morewood last night. The game went into overtime and Chesterville won the contest 2 to 1

The Speedboys will journey to Finch to morrow night and play an exhibition game with one of the town-league teams of that village. Here's hoping they meet with better success than Hy. Bessin's Buzzers did at South Mountain last week.

The first game of the Central Ottawa Valley Junior Play-offs will be played at the Winchester Arena on Friday night of this week, when Morewood and Chesterville will be the contestants. Everybody is invited to come out and watch these teams battle for the league title. Game starts at 8.15 p. m. Admission 25c.

The Winchester Juniors were left flat at the bottom of the league this year, but under the circumstances made a pretty fair showing even though they didn't have a winning streak Another year will make a big difference in the Junior ranks, and should Winchester be in the league, they will no doubt, make a far better showing than they did this year,

The final series of Town League games will be played on Monday night, then come the play-offs. There being a charge for the play-off series, it is hoped that the multitude of people who have witnessed the regular schedule games all season, free, will not hesitate to buy tickets for the play-off. The league treasury is low at present and the executive need all the financial assistance they can get to meet their obligations.

Cups go to Morrisburg

One of the hardest contested and closest matched games of Curling was played on the rink here on Saturday night last when a team from Morrisburg won by a lucky last shot, a game that had from the start really belonged to Winchester. The teams were well matched, Winchester had a slight advantage. At the 16th end, and before the last end was played, Winchester was two up. But that last stone of the last end changed what would have resulted in a tie to one in favor of Morrisburg. The victors were heartily cheered, and the custody of the beautiful cups was placed in their hands until some teams come along and wins them away. The teams were as followe:

Morrisburg—N. Tyndal, Dr. Galvin, C. Broder, Dr. Davies, skip, 11.

Winchester—D. H. Weir, H, L. Lee, L. Kinkaid, B. Carr, Skip, 10.

Cornwall Man Disappears

It is now thought that Percy R. Fawthrop, manager of the Fawthrop Brothers' store at Cornwall, who left his home Monday morning at 8 o'clock and has not been seen since, fell into the St. Lawrence river from the center span of the N, Y. C. railway bridge. Footprints leading to the bridge were investigated.

Our New North

The Missionary Committe presented a most stimulating programme to the Young People's Society of the United Church at their regular meeting on Monday night. Mrs. W. A. Sherwood, vice-president of the Society occupied the chair, in the absence of the president, who was ill.

After the devotional exercises, which were conducted by Mrs. James Crawford, a pleasing duet was rendered by Miss Annie Walker and Mrs. John Bruce.

An illuminating paper on. "Our New North," was given by Mrs. Russell Crowder which was followed by a most interesting reading by Miss Walker, entitled, "A Living Sacrifice,"

A committee was appointed to arrange for the play, "The Red Box," which will be presented by the Young Peoples' Society of South Mountain on Monday, Feb. 23.

Hallville Womens' Association

The Womens' Association of Hallville United Church gathered at the home of Mrs. Lyman R. Kerr on Monday evening Feb. 9th, to spend a social evening. A special invitation was extended to any who wished to avail themselves of the opportunity of spending a profitable and pleasant evening. The result was that the commodious home of our noted hostess was filled to capacity. Rev. H. B. Campbell acted as Chairman and master of Ceremonies in a most proficient and happy mood. A programme was rendered which was par excellence. The Rev James W. Clarke, who needs no introduction to this community, and now pastor of Westmount Park-Melville Church, Montreal, found it convenient to be with us for this occassion, greatly to the joy of all. Mr. Clarke conducted Anniversary services in Bell St., United Church, Ottawa, Sunday, remaining over for their Banquet and Tea Meeting to be held on Tuesday evening. On the Monday intervening he found time to come out and spend an old fashioned evening amongst his many admirers and well wishers from old Hallville United Church. Naturaly the evening would not be complete without a few words from Mr. Clarke. During Mr. Clarke's stay in this locality it was well understood that if Mr. Clarke could be availed upon to take part, the entertainment was provided for the evening, as he himself travels abroad, his reputation is not diminishing. His remarks from the first had the same old flash of humor which immediately captivates his audience and elevates them from the sor did humdrum of life to the joy of living This was followed by a reference to his pastorrte in Old Hallville Church. His first charge, and he told us he would never forget it or it's warm hearted people as it helped to round out his life to meet his future pursuits. This was a most wonderful tribute coming from the lips of Mr. Clarke to the congregation of Hallville United Church. Mr. Clarke's subject for his lecture in Ottawa on Tuesbay evening is, "A Scot looks at the Scotch." Well when the Scot came to Mountain, evening he found lots of the Scotch waiting to welcome him, with true hospitality and a warmth of heart born of a true reverence and pride which will follow him in his various undertakings wherever he may be. While the Community was well represented among the out of town guests were Mrs M. B. Ford of Chesterville who came up specially for the occasion, and W. S. Kerr of Montreal.

The Ladies long noted for their talent in the refreshment line served a luncheon equal to the occassion. Before this very enjoyable evening was brought to a close a very hearty vote of thanks was tendered to Mr. and Mrs. Kerr which was responded to in a very fitting manner by the Host and Hostess.

Note—While the Buzzers won their first game with the Speedboys, the points were divided between both teams to settle a protest.

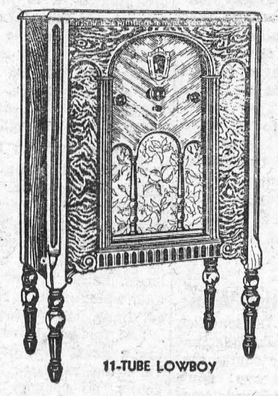
I. SMITH, Chesterville.



11-TUBE LOWBOY

An exquisite open-faced cabinet of American black walnut, figured butt walnut, and Oriental wood. American Gobelin tapestry over speaker. Inside is the wonderful new 11-tube Philco Superheterodyne-Plus receiver with Tone Control, Automatic Volume Control which HOLDS programs against fading, Station Recording Dial for easy tuning, and built-in Electro-Dynamic Speaker less tubes $180.25

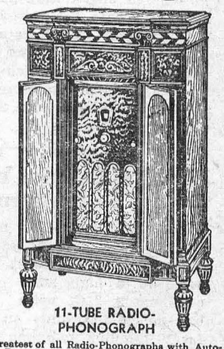
Never before such a Radio as this—

eleven-tube

Superheterodyne-Plus

All your pre-conceived ideas of what constitutes radio reception are due for a drastic revision when you hear this amazing new eleven tube Philco . . . this masterpiece of master minds. In it, Philco engineers have combined three of radio's greatest principles—*Screen Grid* for power—*Superheterodyne* for selectivity—*Balanced Units* for absolute fidelity of Tone. Result . . . a radio set that so far exceeds your expectations as to take your breath away.

The enormous power of this 11-tube receiver will bring you stations that here-to-fore have only been so many letters of the alphabet. Its Automatic Volume Control will hold them at constant level without fading. Its superheterodyne selectivity picks out like a magnet the one big program you want from all the traffic jams of the air. Even more fascinating to your ear will be the TONE; the wonderful realism of any and all programs you bring in. You have never heard a radio like this. We honestly believe it will not be surpassed—unless by another PHILCO—for years to come. See your nearest Philco dealer today. He will gladly demonstrate one of these revolutionary new radios, and arrange easy payments when you buy.



11-TUBE RADIO-PHONOGRAPH

The greatest of all Radio-Phonographs with Automatic Record Changer which plays ten records, making a full 45-minute program of music. Its Elizabethian design is worked in pencil-striped and figured butt walnut. Beautiful carvings and Thuya Burl veneers enhance the front panels. A wide band of genuine Marquetry of holly and ebony, encircles the top. Price less tubes $380.25

The PLUS in Philco's New Superheterodyne-Plus

11-TUBE POWER—More than the average owner needs, but wonderful to reach out and bring in the programs YOU want.

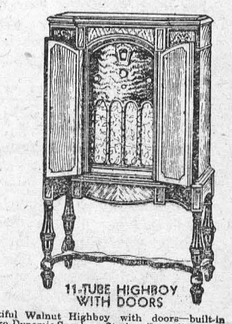
AUTOMATIC VOLUME CONTROL—Making this great power USEFUL by holding the reception at constant level without FADING.

TONE CONTROL—4 qualities of tone, "Brilliant," "Bright," "Mellow," "Deep"—whichever YOU like, at a touch of the finger.

SUPERHETERODYNE SELECTIVITY—Combined with the sensitivity of screen grid tubes, recognized as the most perfect circuit known.

STATION RECORDING DIAL—On which you can permanently log your favorite station.

BALANCED UNITS—Which produce the true, clear, UNdistorted Philco Tone.



11-TUBE HIGHBOY WITH DOORS

Beautiful Walnut Highboy with doors—built-in Electro-Dynamic Speaker, Station Recording Dial, Tone Control, Automatic Volume Control, and all features. Price less tubes $216.75
