NOTES AND COMMENTS BY THE EDITOR

Summer going.

Fall Fairs are nearly all over.

The fly pest doesn't seem so bad this fall.

Clean up the back yard before the snow comes.

There was a lot of gasoline consumed last Sunday.

The hens are cackling and eggs are going up in price.

Lloyd George will be in Toronto, October 9th and 10th.

Ottawa has returned to Standard time—and to its senses.

Renew your subscription before the two dollar rate comes in.

The best endurance test we know of is found in a dentist's chair.

How lovely the trees in their fall tints, and how beautifully the various colors harmonize.

The merchant who does not advertise may have bargains to offer, but no one knows of them.

Do you remember the time when shop pers were wont to ask "Haven't you something more expensive?"

Premier Ferguson is opposed to "Home work" for children. He prefers political pull to aid their promotion.

If business men could only collect their accounts like the government collects the business tax, there would be fewer worried business men.

The Prince of Wales will think it a somewhat cool reception when he discovered three inches of snow covering his ranch in Alberta last week.

"Ten persons killed and two more may die" is the record from Schnectady, N. Y. for last Sunday in automobile accidents. In Montreal, Que., the record was nearly as bad.

An exchange remarks that "There is nothing to prevent anyone with a little money from ascertaining how banks can lose money. All he has to do is to lend it and try to get it back."

They are now introducing patented "Spanking machines" into prisons to correct unruly prisoners. If there was more spanking in the homes there would be fewer prisoners to spank.

When Lloyd George comes to Canada next month he will receive a welcome that even the popular Prince of Wales would be proud to acknowledge. Canadians will travel many miles to see and hear the great English Statesman.

Fingers Cut.

Mr. Wm. Helmer, Maple Ridge, had a couple of fingers badly lacerated by his hand being caught in the engine driving the corn cutter. He was brought to Winchester by Mr. Carkner, and Dr. McLaughlin attended to the wounded hand. He will not lose any fingers.

Married

At Carp, Ont., on Wednesday, September 26th, 1923, Mr. Clifford Summers, son of Mr. and Mrs. Herman Summers, Cass Bridge, to Miss Rachael Johnston, daughter of Mr. and Mrs. Robt. Johnston, of Carp.

Expect a car of mixed soft wood to arrive about Oct. 1st. Am offering a special low price delivered from car. Leave your orders. Terms cash.

A. W. Beach.

The News We Want

An exchange gives some permanent hints as to news suitable for local newspapers, which we reproduce. The Press will always be pleased to receive accounts of the following:—1, Marriages, given as fully as possible; 2, Births; 3, Deaths, always give sketch of life; 4, Removals; 5. Loss by fire or otherwise; 6, Land transfers; 7, Robberies; 8, Unusual freaks or accidents; 9, New or important enterprises 10, Visitors to or from a distance: 11, All township news, and in fact all kinds of news that is of interest; 12, Progress of agricultural operations. Don't forget to sign your name, which is not for publication. What not to give:—Jibes, hints or insinuations which only a few can make sense of and which are unkind in their nature; the mere calling of one neighbor on another except for some public purpose Sunday visiting, and though "Every lassie has her laddie," she does not care to have the public know of every time he calls on her and the public does not care either.

A 50 per cent advance in prices will certainly follow the destruction of Japanese Silk Stocks.

Better buy Silks now—We have an excellent range at prices away below those going into effect.

D. C. Bush, Morrisburg.

Be sure and see "Slippy McGee" in the town hall, Winchester, on Friday and Saturday Nights. This is one of the greatest dramas ever put in motion pictures. The story of a crook who went straight by stealing the heart of the girl he loved. Come early and get a good seat. Admission 35c and 20c.

SOCIAL AND PERSONAL NOTES

Miss Gladys Conley spent the week-end at her home here.

Miss Addie Gardner is the guest of her sister, Mrs. G. C. Reveler.

Dr. W. S. Flora, of Ottawa, spent the week-end at his home here.

Mr. Harold Gillissie, of Perth, spent the week end at his home here.

Mr. John. E. Gillissie, of Kenmore, spent Wednesday with his brother here.

Miss Annie Sharpe, of Gravel Hill spent the week end at her home here.

Dr. Reddick of Ottawa. was calling on friends in Winchester on Wednesday.

Mr. Alex McLean of Almonte spent the week end with friends in Nation Valley.

Mr. Joseph Barrigar who is working in Iroquois spent the week-end here with his family.

Mr. Davis Elliott, of Prescott spent a few days the guest of Mr. and Mrs. Jacob Dixon.

Mr. and Mrs. H. W. Empey and Mr. and Mrs. G. E. Payne spent Sunday in Kingston.

Mr. and Mrs. J. F. King of Avonmore were week-end guests of the former's sister Mrs. L. Flora.

Mrs. W. J. Smith, Mr. Lloyde and Miss Mary Smith spent Sunday with friends at Avonmore.

Mr. and Mrs. E. Gilroy, of Smith's Falls were week-end guests of Mr. and Mrs. G. Gilroy.

Mr. D. Christie of Calgary has been visiting with relatives in this section for the past few days.

C. N. Stewart attended the funeral of his aunt, Mr. John Phillips at Peer Point Manor, N. Y., one day last week.

Miss Dean Darling left Wednesday night for Michigan where she is engaged as nurse in the Lady Fair Hospital.

Mr. A. S. Cochrane and daughter, of Madoc were callers on Saturday at the home of their cousin, Mrs. W. B. Campbell.

Mr. A. Cochrane, of Merrickville and Mr. Brownlee, of Kemptville were guests of the former's cousin, Mrs. Campbell, on Saturday.

The Misses Kathleen Anderson and Betty O'Reilly, and Mr. H. MacDougall, of Ottawa, spent Sunday at the former's home here.

Miss Ida Gardener, was the government judge of ladies fancy work at Almonte fair last week, and is judging at the Bancroft fair this week.

There was a splendid attendance at the Metcalfe Fair yesterday, and a first class show in every respect. A good many from here attended.

The Misses Kathleen Anderson and Peggy O'Rieley and Messrs McDougall and Rutley, of Ottawa spent part of the week-end at C. N. Stewart's.

Mrs. Albert P. Johnston will receive for the first time since her marriage on Wednesday, October 3rd, from 4 to 6 and after the 1st Monday of each month.

Mr and Mrs. Robert MacLachlan of Kenmore and son Dr. MacLachlan of Ottawa spent the week-end with Mr. and Mrs. Donald Darling of Nation Valley.

Mr. and Mrs. Benvenuto and little nephew, Teddy, who have been visiting the latter's parents, Mr. and Mrs. Robt. Robinson, have returned home to Toronto.

Mrs. T. Dunn of Ottawa, accompanied by Mrs. Fullerton and daughter of Toronto, called on a few Winchester friends on Wednesday when on their way to Morrisburg.

Mr. Geo. Robinson, who spent the week end with his parents returned home to Montreal, Mrs. Robinson and children remaining for two weeks, have also returned home.

Mr. Arlie McIntosh, who has been appointed Demonstrator in Accountancy, in the School of Commerce, McGill University, will leave for Montreal on Friday to resume studies.

Mr. and Mrs. Mac Campbell and little daughter, Isobell, of Dalkeith, accompanied by Mr. David Mooney and his sister, Miss Martha, of Vankleek Hill, spent Sunday at the home of Mrs. Tweed.

Mr. Albert Robinson, who was taken to Cornwall General Hospital, on Wednesday last, to undergo an operation for appendicitis, is reported in an improved condition and is expected home in a few days.

On Thursday, Sept. 20th, at the home of Mr. and Mrs, Silas Baker, a very pleasant evening was spent in honour of Mr. and Mrs. Ford Baker, when they had a number of relatives in for tea, afterwards presenting Mr. and Mrs. Ford Baker with a handsome clock. Mr. Baker made a reply in a few well-chosen words. Everybody had a very enjoyable time.

They are off to the schools of learning. During the past few days there has gone out from Winchester to McMaster University, Toronto, Miss Florence McLean, Miss Bessie Edwards and Mr. U. Lanoue. To Queen's University, Kingston, Miss Belle Elliott and Miss Helen Agnew, Mr. Howard Justice, G. Suffel, F. Higginson. To Ottawa Normal Miss Ella McDonald, Miss Jean Anderson, Mr. Malcolm Rae, Miss Helen Ault, Miss Jean Darling, Miss Laura Lanoue, Mr. Preston Timmins and Mr. Lester Brown, and to take a course in a business College, Toronto, Miss Hilda Sheldrick. Mr. W. Faith and J. Gemeroy are at McGill, Montreal.

Now for bigger Fall Business—we don't wait for it—we go after it. Specially reduced prices in new Northway Coats, Suits and Dresses.

D. C. Bush, Morrisburg.

Returned Missionary Speaks.

Rev. J. R. Earle M. A. of the West China Mission spoke to a large congregation in the Methodist Church Sunday night. He told of the longing that the Chinese have to worship something, hence the idol-worship. They are gradually being won over to worship the true God, and as Churches are established there with native preachers, teachers and workers, they become Missionary Churches and extend their work to some part where the gospel has not been preached. They are even entering Thibet, that land that has been so long closed to Mission work. Mr. Earle clearly showed that his heart is in his work there. He with his wife and family are residing in Toronto while home on furlough. A male quartette sang a very appropriate Missionary selection.

LOCAL AND GENERAL JOTTINGS

Sixty-three bushels of wheat to the acre has been harvested on the farm of J. M. Ballantyne, three miles north of Lacombe, Alberta.

After seven weeks in the Brockville General Hospital, where he underwent a serious operation, the Rev. J. W. Charlesworth, B. D., of Dundela, is home again.

Mr. H. Loughridge, of Morewood, father of Mrs. J. W. Summers, Winchester, died on Wednesday morning, after a lingering illness. The funeral takes place on Friday afternoon.

On Sunday, Sept. 30th, St. Matthias Church (Anglican) are holding their Harvest Home Services. The morning service will be at 10.30 a.m., and the evening service at 7.30 p.m. A welcome is extended to all.

Rev. Mr. Dumbrill, rector of Kemptville, was recently handed a cheque for $2000 by Joseph Cooper, of Iroquois, a former parishoner, to wipe off the debt on the Leslie Memorial Hall, erected by the Anglicans of Kemptville several years ago.

Mr. J. R. Weir, Ottawa, was in town this week representing the Chamberlain Rubber Tire Co'y who are now located in Brockville, having a fine manufacturing building along the river front. They expect to begin the maufacture of tires this fall.

A resolution asking that the Dairy Standards Act be amended to make the testing of milk optional with factories choosing to pay by test or by the pooling system was adopted by the Dairy Men's Board of Trade, at Brockville on Saturday last.

Rally Day will be observed next Sunday morning in the Methodist church by six of the Sunday Schools that are in operation on this circuit. Each Supt, will take some part in the service and the pastor will give an address. The Sunday School Orchestra will furnish special music. The parents are especially invited to attend.

At a pic-nic near Lindsay the other day Mr. J. J. Morrison made a very sensible statement when he urged farmers to organize for business rather than politics. He said, "Farmers should have as their objective a selling price for their produce, that would include costs, plus a fair profit. We drifted into politics when we should have remained out. We began to play politics against the experienced politicians; we lost." The secretary of the U. F. O. is beginning to realize where he made a great mistake.—Newmarket Era.

Daniel Cornell, 25 years a Cornwall resident, died Saturday at his home on Fourth Street, West. Mr. Cornell was born at Queensboro, Ont., on Aug. 14th, 1869. Since he came to Cornwall and until a year ago he was on the teaching staff of the public school, resigning on account of ill health. He was able to be about, however, until a short time ago, but passed away rather unexpectedly. For 19 years he had the preparation of entrance class at the puplic school, and during that time nearly 700 of his pupils passed into the high school.

A Fine Head.

Mr. A. W. Beach has placed on the wall of the office of Hotel Winchester, a splendid specimen of Buffalo Head, mounted with a pair of perfect horns. The head has been much admired.

Rally Day.

Next Sunday will be Rally Day in the Sunday Schools of the Dominion. The Presbyterian Sunday School will meet with the congregation at the morning service. There will be no S. S. session in the afternoon next Sunday.

School Fair

The Township of Winchester Rural School Fair was held at Maple Ridge on Tuesday. The attendance was not as large as in former years, but the display was fully equal to any before shown. The prize list will appear later.

Late Wm. F. Poole

Mr. William Franklin Poole, a respected resident of the Township of Mountain was called suddenly by death last Saturday, following an operation while in the General Hospital at Cornwall. Mr Poole was taken ill with an attack of inflamation of the bowels on Wednesday of last week, and was taken to the hospital at Cornwall on Friday and died on Saturday. The funeral service was held at the home of his son, Peter, Winchester on Monday last, interment being made at Maple Ridge Cemetery. He is survived by his wife, 3 sons, Peter at Winchester, W. J. at Harmony and Albert at Kars Ridge, and two daughters, Mrs. Wylie at Kars Ridge and Mrs. Jas. Robinson, Hallville, one son, Henry, was killed while serving in the war overseas The deceased was 67 years of age, and well known and highly respected in this section.

Enjoyed Their Visit.

The Alexandria News in speaking of the visit of their bowlers to Winchester says, "Last Friday a friendly bowling tournament took place in Winchester between teams representing Winchester Alexandria and Ottawa which proved most enjoyable to all concerned. The visitors were right royally entertained by the ladies of Winchester who served a most tasty supper after the semi-finals had been disposed of. The bowling green was in good condition and the reception of the visiting teams was so cordial that the tournament proved an unqualified success. The Winchester Club certainly upheld their reputation as ideal hosts, and all who participated in the tournament will look back with pleasure on their little excursion. It is expected early next season a return match will take place between the Winchester and Alexandria Clubs in Alexandria."

For Fall—Special prices in Carpet Squares—Tapestry, Brussels, and Axminster, Congoleum Squares, Linoleums and oil-cloths.

D. C. Bush, Morrisburg.

LOCAL AND GENERAL JOTTINGS

There was a good display and a good crowd at the Russell fair this year.

A get-together movement among the business men of Winchester would be a good move.

Messrs. P. A. McGregor and Orlin Coughler are busily engaged serectieg silos for the farmers.

How would it do for the lady bowlers to challenge the President for a final game, with ice-cream the stake.

The Dedication Services in connection with the new Wesleyan Methodist Church, Inkerman, are being held this week,

Anniversary Services will be held at the Baptist Church on Sunday October 7th special sermons be preached by Dr. A. A. Cameron of Ottawa.

The North Mountain Consolidated School with a staff of six teachers has an attendance of over 150, about one third of whom are taking high school work.

Herb Jackson's black mare won first money in the Farmers race at the Russell Fair last Friday, but Jake Ross says his horse can beat Herb's on the road or on the track.

Rideau Valley cheese factory, near Merrickville, was destroyed by fire Saturday, which originated from an explosion in the boiler room, The factory was owned by Miss Mina Everetts and W. J. Ragsdale, Smith's Falls.

Despite heavy expenditures, the town council of Cornwall has reduced its tax rate by three mills on the dollar. The rate adopted is 31 mills for general purposes, 12 mills for public school supporters and 16 mills for Separate school supporters.

Married—At the Lutheran Parsonage, Dunbar, on Wednesday, September 12th, 1923, by Rev. Meader, Miss Lera Whittaker, of Williamsburg, to Mr. Roy Steinburg of Dixons. The happy couple motored to Ottawa to spend their honeymoon. Their many friends extend best wishes.

A very pretty wedding was solemnized at St. Bartholemews Church, Ottawa, at high noon on Wednesday, August 22nd when Lola Blanche, only daughter of Mr. and Mrs. A. A. Strader, Brinston, was united in the Holy Bonds of matrimony, to Robert Allen Stanley of Detroit, Mich.

The steel tressles for the roof of Lannins garage and hall are being now placed. They were brought in from Ottawa on three wagons. The teams left Ottawa at six o'clock in the evening, and drove all night, taking a couple of hours rest on the way. They arrived about 9 o'clock in the morning and soon had the steel unloaded. The work of constructing the roof is with an Ottawa firm, and they are making good progress.

The following announcement was sent the Press from New York. Miss Edith May Small of 811 Lincoln pl. was married Wednesday afternoon to Kenneth D. Annable, son of Mr and Mrs. Herbert Annable of 69 E. 123d st Manhattan. The wedding took place at the home of the bride's aunt and uncle, Mr. and Mrs. W. Trevor, 307 West 86th st., Manhattan, at 4 o'clock, the Rev. Dr. Bently officiating. Miss Velma Annable was the bride's maid of honor and only attendant, Dwight Annable was the best man for the bridegroom.

The Congregations of Williamsburg, Winchester Springs and Colquhoun have extended a call to the Rev. E. Smith M.A F.R.A.S. of Oshawa, and promise a salary of $2000 per annum. The call will be considered at a special meeting of Presbytery to be held in Cardinal on Friday afternoon of this week.

Rev. John McCurtie, formerly of Finch and more recently of Edmonton, will be inducted into the pastoral charge of Cardinal on Friday evening.

Mr. Fred Flora, who wrote on Latin Authors in the Supplementary Exams, has received word that he was successful in making a pass. Fred will leave for Toronto on Monday, where he intends entering the Royal College for Dental Surgeons

Bootleggers Hard Luck.

A number of bootleggers were up for sentence before magistrate Cline, of Cornwall, at Cornwall last Friday. B. Steacy got 3 months and a fine of $500. P. Lalonde and A. Lalonde, F.Minor and J. Derosiers, each fined $100 and costs or 3 months in prison. H. Savard was finded $200. An elderly man named P. Curran was charged with selling liquor in the village of Chesterville on February 8th last, and a fine of $300 and costs was imposed, the magistrate suspending a bail term on condition that he does not appear on a similiar charge within two years, or, if he does, a double term of imprisonment will then be imposed regardless of his present plea of ill-health, on account of which no term was imposed in this case. The fines imposed by the magistrate at the sitting totalled $1,400, exclusive of costs.

Canadian Pacific Railway Alterations in Passenger Train Service will take effect on Sunday, Sept. 30th, 1923 For particulars apply to ticket agents.

MARKET DAY

The Annual Market Day of the Winchester P. S. will be held on Friday, Sept. 28th at 2.30 p.m. in the Public School Delicious Cakes, Pies & Home-Made Candy will be on sale, besides fruits and vegetables. Tea will be served. An added feature will be Sports on the School Grounds, in which all children will take part. The parents are especially invited to come and encourage these youthful Athletes.

S. Annable, Principal.

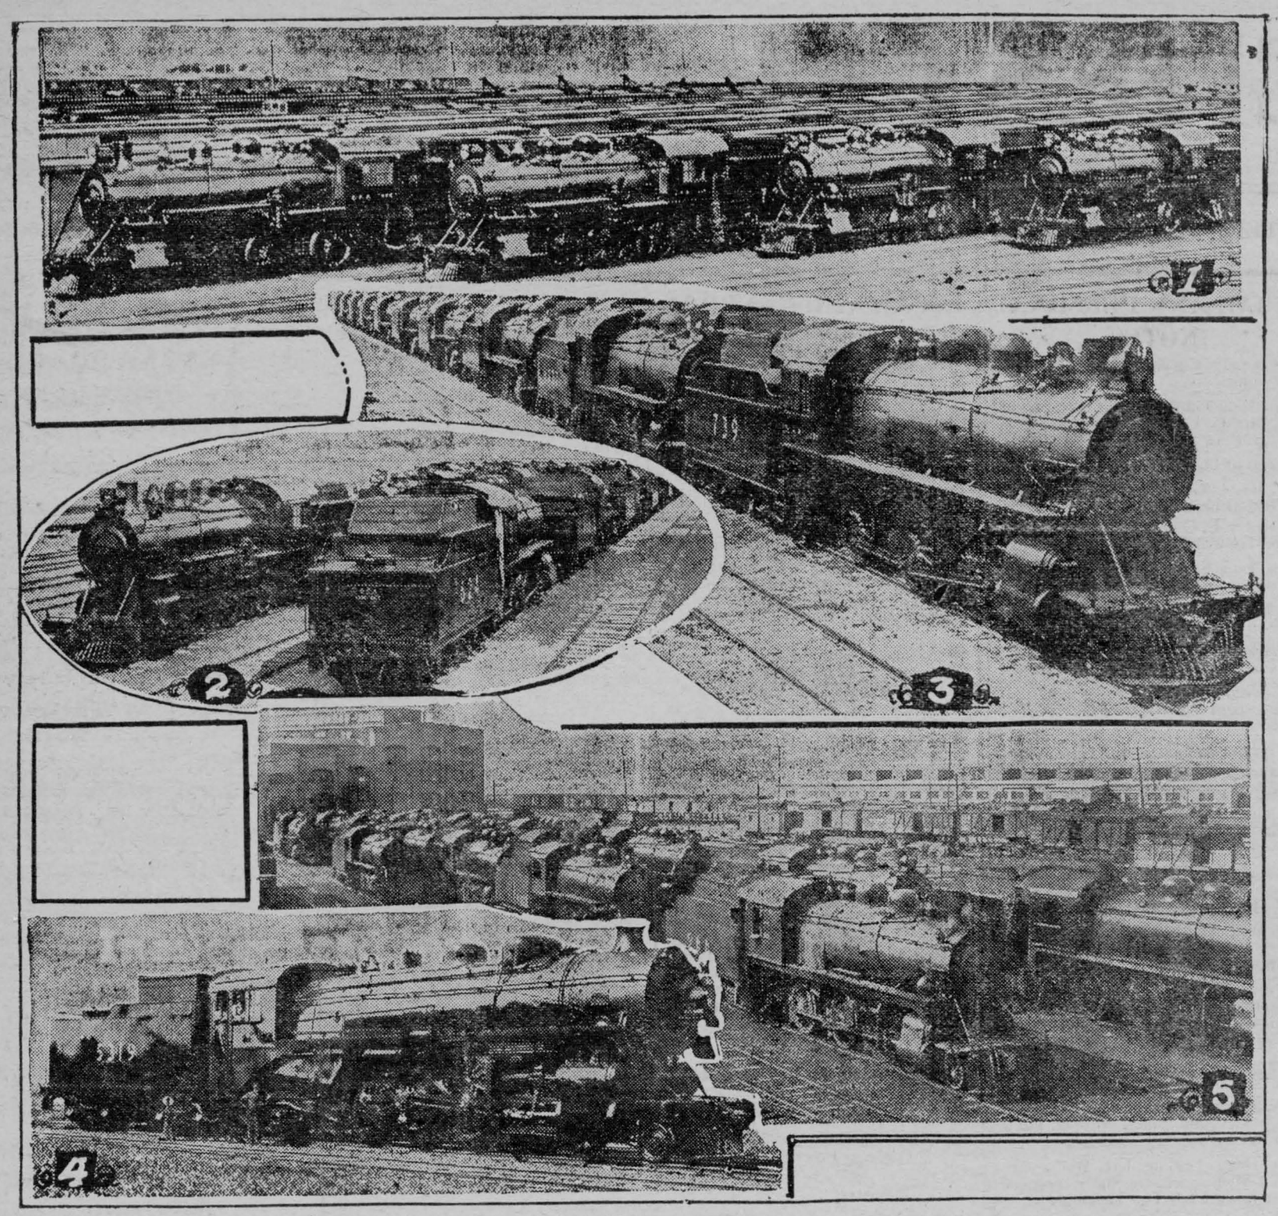
NOTICE

All persons having promised special donations to the Winchester Fair are asked to hand same in to the secretary, John McCormick, at once.



Iron Horses Ready For Grain Rush

HERE are some of the engines and box cars, Canadian made for Canadian traffic, which arrived in Winnipeg recently to augment the rolling stock of the Canadian Pacific railway. This equipment is now in readiness for the transporting of western Canada's crop, which bids fair to be one of the largest ever recorded. These additional engines and cars were constructed at the company's shops at Angus, near Montreal, and have been assembled at the Weston shops, Winnipeg, awaiting the call to the harvest fields of the west.

The upper picture shows four trains leaving Weston with a string of approximately 100 box cars per engine. Each car has a capacity of 60 tons. (2) and (3) some of the new freight engines which will be used to haul the grain throughout the three prairie provinces. (4) One of the 55 new P-2 class engines. These engines have a total weight of 252 tons, exerting a traction effort of 55,000 pounds. Their driving wheels are 5 feet 3 inches in diameter, cylinders 25½ in. diameter by 32 in. stroke; the total length being 81 feet, 4½ inches. The tender has a water capacity of 8,000 gallons and 14 tons of coal, which is equal to the average citizen's winter supply of fuel. These engines are known as the P-2 class, numbered in 5,300 series. They have vestibule cabs for the comfort of the engine crew and are electrically equipped throughout. The complete weight of one train hauled by one of these engines, including the engine, is 4,476 tons, of which 3,020 tons would be the carrying capacity for wheat, or 100,660 bushels in each train. The carrying capacity of the 45 engines of this standard is 4,529,700 bushels per trip. Each engine makes one trip a day. Picture No. 5 shows another group of the new Canadian Pacific locomotives. Their capacity and weight rank them among the biggest of their type in the world.

The First Locomotive in America and the Latest.

THIS picture might almost be entitled "Ancient and Modern." It shows the "Sampson," first locomotive in America which was first used ... lion mines in 1839, and one of the new Pacific ty... ...motives which have been placed in commission by the ...nadian Pacific Railway on all main lines, and which are ...fly responsible for this company's "on time" fe... ...of service. The Canadian Pacific Railway hav... definitely adopted this design for their heavy main service, as representing the most desirable and ... cient locomotive for economy and reliability of service, as this particular design reduces to a minimum, consistent with capacity, the number of moving parts which is essential for reliability of service under the most exacting and severe conditions.

The capacity and weight of these locomotives rank them among the biggest of their type in the world, and the largest of this design in operation in Canada. The haulage capacity of the 2300 series is 42,600 lbs., which is obtained with 200 pounds boiler pressure, cylinders 25 inches in diameter, 30 inch stroke and with driving wheels 75 inches in diameter. The weight on the three pairs of drivers of engine is 180,000 pounds and the total weight of the engine and tender in working condition is 495,000 pounds, the tender having a capacity of 8,000 gallons of water and 14 tons of coal.

The design of these locomotives was given very careful study, a trial order of engines constructed in 1919 having been made, with tests under all Canadian conditions, which fully justified all expectations for reliability and economy of operation. The boiler has been carefully proportioned and the inter-relation of grate area, fire box volume, heat absorption capacity of different lengths of tube and gas areas more carefully thought out than is usual in most designs, which, coupled together with an extremely accurate distribution of steam by an improved type of Walschaert valve gear, has given exceptional economy for a locomotive of this size.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Where and from whom are children to receive education on sex matters? The question is an important one, for investigation has proven that ninety per cent. of children receive this information at a tender age from thoroughly improper sources. The child should be repeatedly impressed with the fact that the source of information on such matters should be the father or mother, not friends or companions. Sound training in chivalry and idealism, a proper reverent attitude towards sex and the great purposes of nature, thorough training for marriage and its responsibilities—these constitute a foundation upon which parents can build the future happiness of their children. Yet in spite of this, it has been proved that the great majority of children obtain their education on sex matters from companions, not often of the right type. What does this state of affairs lead to? It leads to a biased and improper viewpoint of the whole question of sex. It blinds the high purposes of nature; it develops cynicism, carelessness and sometimes is the starting point for careers of ill health and crime.

Red cheeks, sturdy limbs, clear vision, happiness alike in work and play; long and useful lives; these should be the lot of your children.

But for many thousands, the picture is and will be, sadly different. Blindness, deafness, insanity, locomotor ataxia, heart disease—these are only a few of the serious results of the devastating plague of venereal diseases which overwhelm so many.

Surely the heritage of our children should be the right to be well-born—the right to a sound body and mind inherited from healthy parents who have married in full knowledge of the fact that they are free from all disease. And yet, eighty per cent. of blindness in the new-born is due to gonorrhoea; and syphilis is responsible for the birth of thousands of diseased children, four out of five of whom die in infancy.

Both of these diseases thrive on ignorance and cowardly silence. Ignorance can be dispelled if citizens and parents will only study the situation. Surely when they understand, parents and indeed all citizens, will do their part for the sake of the children of the land. No parent can sit back and say "This is none of my affair." Preventive social measures are important. Careful supervision of and attention to the needs of normal children will prevent much of the trouble. Normal recreation, good books and proper companions are all real preventive measures.

The cost of venereal diseases takes rank with the tremendous costs of war. Early death and widespread disability as a result, are matters of every day comment among those who have studied the question. The fact that we pay unnecessarily for hospitals, insane asylums, Homes for Incurables, jails, institutions for the blind and reformatories implies a wastage of public funds that should make every taxpayer think.

A Practical Demonstration.

Standing in a shop recently, one of the Inspectors of the Toronto Humane Society saw a beautiful insect with wide-spread green wings fly through the door and settle on the base-board. The proprietor of the shop, after exclaiming over the wonders of the small creature, produced a long, wicked-looking pin and advanced on the insect.

"Just what are you going to do with that pin?" inquired the Inspector.

"I'm going to get that thing. It's a beauty. Just stick it up somewhere."

"Alive?" asked the Inspector.

"Certainly!" said the 'collector,' poising the pin. As he jabbed at the victim, his hand came into unpleasant contact with another pin, in the hand of the Inspector. A yell, a jump, a line of warm exclamations.

"What do you mean?" in an angry tone.

"Well, that is what you were going to do to the insect, and it would have had no defence. It couldn't even indulge in the language you used."

The Inspector gently placed the green-winged thing on a paper, took it to the door, and tossed it in the air. It floated off, above the reach of pins.

Collectors of insects who impale the specimens on pine while alive, to die by slow torture, are in need of a few lessons such as these. Moths and butterflies should be killed by placing under a glass bowl with a bit of absorbent soaked in Chloroform, before impaling on pins. And the conclusion of the whole matter is, there is nothing like a practical demonstration.

Wet Weather.

It is the English in me that loves the
soft, wet weather—
The cloud upon the mountain, the
mist upon the sea,
The sea-gull flying low and near with
rain upon each feather,
The scent of deep, green woodlands
where the buds are breaking
free.

A world all hot with sunshine, with a
hot, white sky above it—
Oh then I feel an alien in a land I'd
call my own;
The rain is like a friend's caress, I
lean to it and love it,
'Tis like a finger on a nerve that
thrills for it alone!

It is the secret kinship which each
new life is given
To link it by an age-long chain to
those whose lives are through,
That wherescever he may go, by fate
or fancy driven,
The home-star rises in his heart to
keep the compass true!

—Isobel Ecclestone MacKay.

With The BOY SCOUTS

How Boy Scouts Help Their Towns and Cities.

Every Boy Scout is pledged to do at least one good turn each day, but in addition to these individual acts of kindness, whole troops and often all the troops in a whole community will unite to do something which required organized and concerted action.

Safety-first campaigns, swat-the-fly crusades and clean-up days have been conducted or assisted by Scouts in scores of places. Very often the courteous appeal of a Scout has proven more efficacious in securing permanent results than the peremptory order of a public official. There can be no question that the boy is working for the good of his community and that his suggestions are free from any connection with petty graft or politics.

Mrs. Housekeeper, swatting the advance guard of the summer's swarm of flies, cannot fail to be interested in the Scout who, half scared perhaps at his own temority, points out to her the fact that her own garbage can and dishwater drain are responsible for her unwelcome visitors.

If she has ordinary common sense—and what housekeeper has not—one microphotograph showing how the deadliest of germs are picked up by the housefly's feet and then depositd upon the bread and butter which her children eat, makes her a red-hot recruit for the militant forces of sanitation.

Woman's tongue has been the subject of many unkind remarks. Let us pause and reflect upon what it accomplishes when it is set a-wagging for a cause like this. It means less flies and more Scouts before the sun goes down.

"Safety First" is second nature with a Scout, for the prevention of accidents is one of his earliest subjects of instruction. Most accidents can be foreseen. Every Scout is taught to look for them and by removing the causes to prevent the consequences.

Many communities are indebted to the Scouts for the distribution of literature on fire-prevention and on other subjects of vital importance, for planting trees, protecting parks, painting the fire hydrants, establishing town clocks, testing street lights, helping in public playgrounds, cleaning sidewalks, assisting in campaigns for good roads, co-operating with the Humane Society, serving on relief committees, aiding the blind, providing seats for outdoor meetings, reporting unsanitary conditions, destroying tent caterpillars, maintaining scout wells, securing community Christmas trees, distributing Thanksgiving and Christmas baskets, taking flowers to hospitals, "adopting" friendless old people, gathering old clothes for the needy, searching for lost persons, acting as ushers at public gatherings, conducting first aid and information tents at fairs, fighting forest fires, removing furniture from burning houses, arranging for safe and sane holiday celebrations, decorating the graves of veterans, guiding convention delegates, removing unsightly signs from public highways.

The Scout's service has a double value—it helps the city and it educates the boy. The accomplishment of a piece of service for his town or city will do more to develop his civic and national pride, and prepare him to be an intelligent voter and officeholder than a year's study of civic government from books. A community that neglects to foster an organization which produces such results deserves whatever it may have of unjustly high taxes, lax law enforcement and juvenile delinquency.

BABY'S OWN TABLETS OF GREAT VALUE

Mrs. Hermadis Chagnon, Ste. Theodosie, Que., writes:—"Baby's Own Tablets have been of great value to me in keeping my little one well and I would not be without them." Thousands of other mothers say the same thing. They have learned by actual experience the value of the Tablets in regulating the bowels and stomach; banishing constipation and indigestion; breaking up colds and simple fevers; and keeping the baby free from the many simple ailments of childhood. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Woman to Hunt Insects on Pacific Expedition.

A woman scientist will accompany the expedition of the Research Association to the southern Pacific, scheduled to sail on the specially equipped St. George this year. She is Miss L. E. Cheeseman, who became the first woman curator of the London "zoo" in 1917, when she took up her appointment as curator of insects. She will hold the position of entomologist aboard the St. George during its trip of a year.

Her researches will be twofold. Among the coral and volcanic islands near South America, where species similar to those on the continent may be found, she will endeavor to ascertain how in the course of many generations they have adapted themselves to new conditions, while on the islands remote from the American mainland, such as Easter Island, the Australs, Cook Islands, etc., she is confident of discovering entirely new species.

Good Sign.

Those who notice the rapid growth of their finger nails should be happy, for it is considered to indicate good health.

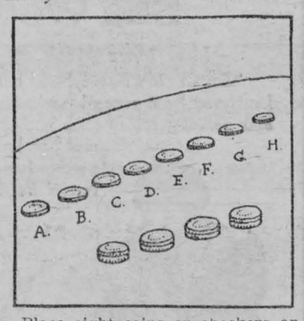
EASY TRICKS

No. 45

Easy When You Know How



Place eight coins or checkers on the table in a row as indicated in the drawing. Now lift one coin up, pass it over two coins and place it on another. If you do it correctly, you will have the coins in the position shown in the lower illustration in four moves.

To do it, pick up D, pass it over E and F and place it on G. Pick up F, pass it over C and E and place it on B. Pick up A, pass it over F and B and place it on C. The last move is to pick up H, pass it over D and G, which are together and place it on E.

Another way is to place E on B, C on G, H on F and D on A.

(Clip this out and paste it, with other of the series, in a scrapbook.)

SYMPTOMS OF DEBILITY

How to Tell Whether Your Blood Needs Revitalizing.

The symptoms of general debility vary according to the cause, but weakness is always present, a tendency to perspire and fatigue easily, ringing in the ears, sometimes black spots passing before the eyes, weak back, vertigo, wakefulness caused by inability to stop thinking and unrefreshing sleep. The cause of the trouble may be some drain on the system, or it may be mental or physical overwork, sometimes insufficient nutrition due to digestive disturbance.

If you have any or all of these symptoms try building up the blood with Dr. Williams' Pink Pills, and as the new blood courses through your veins there should be an increase in your appetite, a better digestion and soon a renewal of strength and vigor.

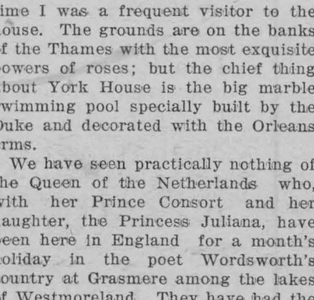
You can get these pills through any dealer in medicine or by mail, postpaid, at 50c a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Royalty in Hiding.

Louis Philippe, Duke of Orleans, one of the French Royalists who came back to London in very indifferent health as a result of his recent expedition to Africa, unlike his sister, Queen Amelia of Portugal, and his nephew, King Manuel, who are constantly to be seen around London, goes about very little. He is rather grieved at being exiled from France though in his young days, you remember, he more than once insisted on going there, claiming his right as a Frenchman to serve as a conscript in the Army. He used to live at York House, Twickenham—his sister Queen Amelia was born there—and at one time I was a frequent visitor to the house. The grounds are on the banks of the Thames with the most exquisite bowers of roses; but the chief thing about York House is the big marble swimming pool specially built by the Duke and decorated with the Orleans arms.

We have seen practically nothing of the Queen of the Netherlands who, with her Prince Consort and her daughter, the Princess Juliana, have been here in England for a month's holiday in the poet Wordsworth's country at Grasmere among the lakes of Westmoreland. They have had the quietest of times and their wish for unobtrusiveness has been compiled with. The Prince Consort took his daughter, Juliana, long climbs in the mountains while the Queen devoted a good deal of her time to water-color painting of the lake scenery. The Dutch royal family never came near London, really for fear they might get engulfed in the gaieties of the season.

The mother of the murdered Czar has been staying with her sister, Queen Alexandra, mother of the King. The two widowed queens are inseparable. More than once recently when I have sauntered into Hyde Park on a sunny afternoon to listen to the band of the Grenadier Guards I have seen their open automobile drawn up under the trees so they might enjoy the music. Of course, everybody knows who they are, but no one is so bad mannered as to go near and stare at them. Queen Alexandra, however, has always the brightest smile for anyone who salutes her as the car drives along, but the Dowager Empress of Russia always seems to be wrapped in sadness—as well she might be.—Sir John Foster Fraser.



Good at the Bank

"Every time that singer goes up the scale in her wonderful trills it means money to her."

"Yes, from dough to dough every note's good at the bank."

The lowest priced tea is not the cheapest. A pound of "SALADA" yields more cups to the pound, and so much more satisfaction than ordinary tea, that it is really the most economical to use.

"I jist likes to let her in at the door," said an Irish servant one day, of a woman I know, whose face was always cheery and bright; "the face of her does one good, shure!"

Ask for Minard's and take no other.

Relieved Rheumatism, Too, Says Contractor

Thousands of people everywhere have learned of Tanlac through the statements of others and have taken the treatment with such splendid results that they in turn deem it only fair to relate their experience for the benefit of suffering humanity. Such is the case with L. Desormeaux, well-known electrical contractor, living at 1066 Berri St., Montreal, who says:

"I couldn't do otherwise than publicly endorse Tanlac for I was lucky to find out about the medicine the same way myself. For nearly a year I suffered from indigestion, and also had rheumatism in my legs. About a month ago I was laid up in bed for two weeks with this rheumatism and a bad case of grippe. I lost about eight pounds and felt miserable.

"Three bottles of the Tanlac treatment, besides greatly improving my rheumatism, has made my eating and digestion better than they ever were. I have regained my lost weight, and am feeling extremely well. Tanlac is great."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

Prayer.

If God were subject to my whim,
Obedient to my breath,
I should not dare to pray to Him
For fear of life and death.

If I could bring some power to bear,
As old apostles say,
To move the mountains with a prayer
I should not dare to pray.

But since my Father-God is slow
To heed my childish cries,
And, father-like, will answer "No,"
When "Yes" would not be wise—

At every turning in my road,
In turn to Him in prayer
For strength to bear the traveller's
load
Or pins to hold my hair.

With "Yes" and "No," now kind, now
stern,
He shows me how to live,
And often makes me work to earn
What I would have Him give.

I thank Him for each hungry want
And each inspiring task,
But most because He does not grant
The foolish things I ask.

—Claribel Weeks Avery.

CAWS ENOUGH!

1000 Eggs in Every Hen

New System of Poultry Keeping—Get Dollar a Dozen Eggs—Famous Poultryman TELLS HOW

"The great trouble with the poultry business has always been that the laying life of a hen was too short," says Henry Trafford, International Poultry Expert and Breeder, for nearly eighteen years Editor of Poultry Success.

The average pullet lays 150 eggs. If kept the second year, she may lay 100 more. Then, she goes to market. Yet, it has been scientifically established that every pullet is born or hatched with over one thousand minute egg germs in her system—and will lay them on a highly profitable basis over a period of four to six years' time if given proper care.

How to work to get 1,000 eggs from every hen; how to get pullets laying early; how to make the old hens lay like pullets; how to keep up heavy egg production all through cold winter months when eggs are highest; triple egg production; make slacker hens hustle; $5.00 profit from every hen in six winter months. These and many other money making poultry secrets are contained in Mr. Trafford's "1,000 EGG HEN" system of poultry raising, one copy of which will be sent absolutely free to any reader of this paper who keeps six hens or more. Eggs should go to a dollar or more a dozen this winter. This means big profit to the poultry keeper who gets the eggs. Mr. Trafford tells how, if you keep chickens and want them to make money for you, cut out this ad and send it with your name and address to Henry Trafford, Suite 630B, Herald Bldg., Binghampton, N. Y., and a free copy of "THE 1,000 EGG HEN" will be sent by return mail.

CUTICURA HEALS LARGE PIMPLES

On Face, Itched and Burned. Caused Loss of Sleep.

"I was troubled awfully with pimples on my face. Little white spots formed at first which later broke out in large, red pimples that festered and scaled over. They itched and burned causing loss of sleep, and my face was disfigured.

"Other remedies were used without success. A friend recommended Cuticura Soap and Ointment so I purchased some, and after using them about a week I got relief. I continued using them and in a month was completely healed." (Signed) Miss Lilian Warner, Williamsburg, Ontario.

Daily use of Cuticura Soap, Ointment and Talcum helps to prevent skin troubles.

Sample Each Free by Mail. Address: "Lymans, Limited, 344 St. Paul St., W., Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

WOMAN SUFFERED FOR MONTHS

Weak and Nervous. Made Well by Lydia E. Pinkham's Vegetable Compound

Webbwood, Ont.—"I was in a very weak and run-down nervous condition, always tired from the time I got up until I went to bed. Sleep did not rest me at all. My sister recommended Lydia E. Pinkham's Vegetable Compound to me and others told me about it, but it was from my sister's advice that I took it. It did not take long until I felt stronger, headaches left me and my appetite came back to me. I am a farmer's wife and have many things to do outside the house, such as milking, looking after the poultry, and other chores. I heartily recommend the Vegetable Compound to all who have the same trouble I had, for it is a fine medicine for women."—Mrs. LOUIS F. ELSASSER, Hillcrest Farm, Webbwood, Ont.

Another Nervous Woman Finds Relief

Port Huron, Michigan.—"I suffered for two years with pains in my side, and if I worked very much I was nervous and just as tired in the morning as when I went to bed. I was sleepy all the day and didn't feel like doing anything, and was so nervous I would bite my finger nails. One of my friends told me about Lydia E. Pinkham's Vegetable Compound, and it helped me so much that I soon felt fine."—Mrs. CHARLES BEELER, 501-14th St., Port Huron, Mich.

Women who suffer from any feminine ailment should try Lydia E. Pinkham's Vegetable Compound. C

Thursday, Sept. 27, 1923

Trying to do business without advertising is like trying to run an automobile without oil. Both soon come to ruin.

Henry Ford may be sincere in his desire to abolish poverty in the world, but he keeps a lot of us hard-up in trying to keep the rattle out of his cars.

Ford says he won't run for President of the United States except under compulsion. He's thinking of the times he had when he first manufactured the Ford Car.

The Winchester Press goes into 1000 homes in this immediate section every week. If you want to talk to the people you are most interested in you will use the columns of the Press.

It is not lack of ideas, not lack of willingness to do that prevents the carrying out of some local public enterprises, but the lack of getting together and working together. What we want is a get-together movement.

Driving into the dazzling lights of an oncoming car is dangerous business—dangerous alike to the dazzler and the dazzled. And it is so unnecessary. To dim the lights of a car is so simple and easy a task, that it seems that the daager involved by not doing so would compel the motorist approaching another car at night to take this simple precaution against the possibility of accident to his own car as well as the cars of others. It should not take a law to bring about the dimming of headlights. Common decency demands that a motorist practice this simple rule of night driving etiquette, for it is etiquette, and good manners are just as essential on the road as anywhere else.

Do not keep the alabaster boxes of your love and tenderness sealed up until your friends are dead. Fill their lives with sweetness. Speak approving, cheering words while their ears can hear them, and while their hearts can be thrilled and made happier by them; the kind things you mean to say when they are gone, say before they go. The flowers you mean to send for their coffins, send to brighten and sweeten their homes before they leave. If my friends have alabaster boxes laid away, full of fragrant perfumes of sympathy and affection which they intend to break over my dead body, I would rather they would bring them out in my weary and troubled hours, and open them, that I may be cheered by them, while I need them. I would rather have a plain coffin without a flower, a funeral without an eulogy, than a life without the sweetness of love and sympathy. Let us learn to annoint our friends beforehand for their burial. Post-mortem kindness does not cheer the burdened spirit. Flowers on the coffin cast no fragrance backward over the weary way.—Author Unknown.

Honorable and Useful

"Your lives have always stood for that which was good and honorable, for the advancement of the community and for the betterment of mankind."

Above is a sentence in an address which was recently presented a very worthy couple who were, after many years of toil, moving from their farm home to the town. The tribute to the useful and honorable lives of that couple we have no doubt was sincerely meant and well deserved, and we believe no higher tribute can be paid to any man or woman. The couple referred to were no doubt unconscious of the silent influence their exemplary and unselfish lives was exerting in their community, but the influence was there nevetheless, radiating from their country home to warm and cheer and encourage others, and an example to not only their own, but other children in the community. To have travelled life's pathway, to have reached that turning point when the way is less tedious but nearing its end, and to feel that you have the respect and esteem of your neighbors, to know that your life has been a blessing to others, and that you have helped in directing others along the road that leads in the right direction, must be a source of comfort if not complete satisfaction. To have it said of you that "Your example has been a silent rebuke to the wrong doer, and an inspiration to all to attain to higher plains of life" is a tribute that no man can but be proud to hear, and the man who deserves it has not lived in vain.

The Right To Live Your Own Life.

Youth is the time of adventure. The world beckons alluringly, and many a path to fame and wealth and power opens up just ahead. It is natural that eager youth, breathing an atmosphere tingling with romance, feels aggrieved when it is required to lend a hand in the common tasks of the household, when it is kept in a state of humiliation by the inadequacy ot the domestic budget, when it has to defer in matters of opinion and the employment of its leisure to the judgement of those who, being much older, are in its opinion far behind the times.

The problem grows more difficult when youth feels within itself the glow of genius and dreams of a career in art or literature, music or the drama. Then duty appears as the dearest of moral obligations, for in your father's house, it is never spectacular, never glorious. You may do your best in the kitchen, yet your tasks there will always be barren in the sense of lovely and enduring accomplishmen. Sometimes youth revolts, declaring, "I have a right to live my own life," which is only a grandiloquent way of saying, "I mean to do what I please.

About this aspect of the principle of the self-determination of small peoples there is nothing new or strange. The young man of the parable who took his patrimony and journeyed into a far country may have dreamed of a career when he left his father. But, like many another, he made an unwise choice of companions to help him to success. He only exchanged for the tender family ties, habits and pursuits which proved far worse obstacles to worthy ambition than all the petty chores that made life in the old home so distasteful.

Even if you find your career and escape the pittfalls that surround it, can you be independent in it? To develop your gift must you not rely upon the patience and consideration and good will of those about you? At home the love and care that your parents and brothers and sisters lavished upon you were given with no thought of recompense. Can you expect as much from those among whom you are "living your own life"? Most of them will stick by you as long as they can make use of you. They too "have their own lives to live."

The test of any way of life is the measure of happiness that it brings in its train. By that test "living your own life" is not to be recommended. We usually find that those who try it are querulous and faultfinding. They keep no true friends for even the most unselfish of friends must have a little oil to feed the sacred flame. The happiest are they who have found that the true way to live your own life is to devote it to the service of others.—Selected.

Nerves So Bad That She Would Sit and Cry

Mrs. Mary Hocking, Madoc, Ont., writes:—

"Dr. Chase's Nerve Food has done me a wonderful lot of good. I suffered from general weakness and was so run down and my heart and nerves were in such bad shape that I would sit down and cry and not know what I was crying about. I also used to have weak spells. Thanks to Dr. Chase's Nerve Food, however, I am real well now. I shall always keep a box of the Nerve Food in the house, and recommend them to my friends; they are a wonderful medicine."

(Mr. J. W. Vince, Druggist, of Madoc, Ont., says: "I have sold Mrs. Hocking your Nerve Food, and the medicine has done her much good.")

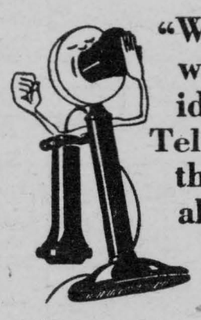
Postage Stamps Illegal For Cheques.

With the close of the present month postage stamps will not be legal for the war duty on cheques, receipts and bank drafts. Furthermore, it is announced by the Post Office Department, that the excise stamps for this purpose will not be sold at post offices. This, it is contended, would lead to confusion, as postal matter might be mailed with excise stamps instead of the correct postal stamps, The excise stamps are to be sold at banks, and such other places as may be designated by the Department of Customs and Excise." On money orders and postal notes the war tax will continue to be paid by affixing postage stamps.

Horse vs Automobile

In a contest between a horse and a motor car late last week at Niagara Falls, the horse came off best. Charles Cummings and George Stewart were motoring along Lundy's Lane when the horse, which had broken out of a field, was hit. The car stalled. The horse kicked the radiator to pieces, smashed the lamps, went to the side and kicked the mudguard into scrap iron, and then paid a visit to the back of the car and smashed the rear lights. The horse did not receive a scratch, but the occupants of the car were badly shaken up by their experience.



"Wonder what an idle Telephone thinks about?"

"I STAND here idle for hours at a time! Ho-hum! She forgets that she hires me to help her.

"She complains of never having time enough, yet I've watched her for over an hour trying to write one letter to Springville.

"For a few cents I'd put her in Springville, and for 5 minutes the music of her voice would make somebody happy.

"When she picks up a pen she gets so self-conscious that her letters—well, honest, they don't do her justice.

"No pen helps a woman to express her real self, at her best, as I do—no postage stamp travels so fast.

"I sometimes think her husband appreciates me more. Ho-hum!"

DEDICATION

—OF THE—

Wesleyan Methodist Church, INKERMAN

The New Wesleyan Methodist Church at Inkerman will be opened with a three days Convention,

September 28th, 29th and 30th

Three services will be held each day at 10.30 a.m. 2.30 and 7.30 p.m.

The preachers of the Canada Conference and others are expected to be present and expound the truth.

We have recieved word from the Revs. J. R. Pitt and J. A. Bain and both expect to be present.

The ministry of song will be conducted by Misses Edith and Lillian Stevensons, of Mooers, N. Y., and local talent. Don't fail to come and hear these distinguished and spirit-filled singers as they bring their messages of song under the direction of the Spirit.

Free entertainment to those coming from a distance. Those who anticipate coming will be met at the Inkerman Station, if timely notice is given to W. R. Rennick, Winchester, Ont.

Ministers and Christians of all denominations are most cordially invited and their co-operation desired in this campain for souls.

WHICH VEGETABLE IS BEST WITH THAT MEAT?

Certain combinations of meat and vegetables have always appealed to the taste, due to the blending of their flavor. Try some combinations from the list given below for dinner. Choose the meat, then a starchy vegetable and a green or succulent vegetable to make a well-rounded main course to the meal.

Roast beef with cauliflower, beets, cucumbers, spinach, carrots, parsnips, squash, celery, tomatoes, onions, beans, turnips or green corn.

Beef steak with peas, asparagus, cauliflower or mushrooms.

Beef pot roasts with onions, turnips, carrots, tomatoes or beets.

Corned beef with cabbage, spinach, beet greens, string beans, cauliflower, parsnips or cucumbers.

Veal roast with turnips, beets, peas, spinach, tomatoes, new onions, string beans or lima beans.

Veal chops or cutlets with celery, string beans, tomatoes or peppers.

Pork hocks with cabbage, sauerkraut, string beans or greens.

Pork roast with apples, spinach, tomatoes or sweet potatoes.

Pork chops with apples, sweet potatoes, tomatoes, corn or celery.

Salt pork with cabbage, corn, peas or beans.

Spareribs with rutabaga, turnips, beans or sauerkraut.

Baked ham with corn, cauliflower, spinach or squash.

Boiled ham with cabbage, spinach, celery, corn or beans.

Lamb roast with carrots, peas, mint, brussels sprouts or turnips.

Leg of lamb with peas, brussels sprouts, artichokes, corn or lima beans.

Lamb chops with peas, string beans, brussels sprouts or tomatoes.

Mutton with tomatoes, onions, string beans.

Heart, baked, with tomatoes, onions, beets, parsnips.

Liver with onions, spinach, tomatoes, corn, beets.

Sweetbreads with peas, tomatoes, mushrooms, string beans.

Tongue with string beans, carrots, spinach, tomatoes, cucumbers.

Tripe with onions, carrots, peppers, tomatoes.

Chicken, roasted, with onions, corn, squash, lima beans, peas, tomatoes.

Chicken, fried, with celery, sweet potatoes, squash, cucumbers.

Chicken, boiled, with peas, carrots, onions, celery, parsnips.

LET'S STAY YOUNG.

Old age is a matter of body cells. They are more important than the years of your birthday book. When they're rested and nourished you have bright eyes, sparkling hair, and a smooth skin, whether you are forty-eight or touching sixty. But if you neglect them, you can look droopy and draggled at twenty. This month I am going to tell you some simple ways to keep these cells as youthful as you want them.

Just because you're plump don't think you have an insurance policy against wrinkles. Unless the tissue cells of your face are stimulated they will sag and crease in little telltale lines, especially around the eyes and mouth. You're afraid the ordinary creams will make your face fatter. There are non-fattening ones, you know. They refine the skin, smooth away the wrinkles, and keep the complexion fresh and blooming without adding a fraction of an ounce.

And there's a soap that seems compounded just to youthify. It contains a larger percentage of oil than many creams. It is a real cold cream in soap form. While it nourishes and beautifies, it also cleanses, thus saving much of the work entailed by extra creaming. It is really worth a trial. And don't forget there's nothing so helpful to the aged skin as plain sweet milk applied liberally.

Strange, but true, your first wrinkle is often caused by an ill-fitting shoe. One that is too large is just as bad as one than pinches and binds. For a strained look comes to the eyes when the shoe slips to the heel, or the toes clutch at the sole to keep in place. It takes only a second or two to whisk a good antiseptic foot powder over sensitive feet in the morning, but it gives in return hours and hours of comfort through the rest of the day.

Young hair is well kept hair, where dandruff has no place. So if you find the gloss and prettiness have vanished try the latest—a herb tonic that may be used directly after the shampoo, or in place of it. Rub this on the scalp and through the hair, and watch the improvement in attractiveness.

And don't forget, there's magic—hair magic—in your own ten fingers. Apply them at night in a circular motion all over the scalp. Keep this up until you feel the aroused blood tingling through the veins. Then you may be sure that the little cells that furnish coloring to the hair won't want to die away into a discouraged grayness.

A PRETTY APRON.

4429. This model is both comfortable and attractive. The back fastens over the skirt portions of the front. Percale with bindings of linene would be a pleasing development. Chintz or cretonne with sateen or rick rack for a finish is also good.

The Pattern is cut in 4 Sizes: Small, Medium, Large, and Extra Large. A Medium size requires 2¾ yards of 36-inch material.

Pattern mailed to any address on receipt of 15c in silver or stamps, by the Wilson Publishing Co., 73 West Adelaide Street, Toronto. Allow two weeks for receipt of pattern.

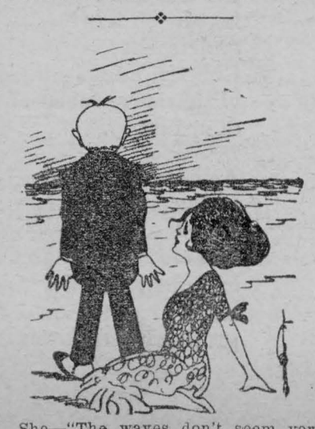
The Fish of Kings.

If the King chose to exercise his right to all sturgeon landed on the English coast, he would be obliged to start an isinglass factory to dispose of them. For many sturgeon are taken in the North Sea, and even on the west coast.

In 1910, just after the present King succeeded to the throne, a boat owned by Captain Smalley, trawling in Cardigan Bay, caught a fine sturgeon, which was offered to and accepted by his Majesty. Oddly enough, one was caught two days after King Edward's Coronation and sent to him, and another turned up just in time for Queen Victoria's wedding breakfast.

Sturgeon, like salmon, visit fresh water in order to spawn. They are found in almost every part of the Northern hemisphere, and are particularly common in some American rivers. They rarely visit British streams; but when they do they seem to have a preference for the Ouse, where they have run as far inland as St. Ives.

In the old days they were found fairly frequently in the Thames, and the Lord Mayor of London still has a prescriptive right to all sturgeon caught in the Thames above London Bridge.



She—"The waves don't seem very wild to-day."

He—"There are no wild women around to make 'em wild."

(Copyright, Thomas Allen.)

CHAPTER XI.—(Cont'd.)

The first witnesses developed the movements of Cunningham during the evening of the twenty-third. He had dined at the City Club, and had left there after dinner to go to his apartment. To a club member dining with him he had mentioned an appointment at his rooms with a lady.

A rustling wave of excitement swept the benches. Those who had come to sek sensations had found their first thrill. Kirby drew in his breath sharply. He leaned forward, not to miss a word.

"Did he mention the name of the lady, Mr. Blanton?" asked the coroner, washing the backs of his hands with the palms.

"No."

"Or his business with her?"

"No. But he seemed to be annoyed." Mr. Blanton also seemed to be annoyed. He had considered not mentioning this appointment, but his conscience would not let him hide it. None the less he resented the need of giving the public mores candal about a fellow club member who was dead. He added an explanation. "My feeling was that it was some business matter being forced on him. He had been at Colorado Springs during the day and probably had been unable to see the lady earlier."

"Did he say so?"

No-o, not exactly."

"What did he say to give you that impression?"

"I don't recall his words."

"Or the substance of them?"

"No. I had the impression, very strongly."

The coroner reproved him tartly. "Please confine your testimony to facts and not to impressions, Mr. Blanton. Do you know at what time Mr. Cunningham left the City Club?"

"At 8.45."

"Precisely?"

"Precisely."

"That will do."

Exit Mr. Blanton from the chair and from the room, very promptly and very eagerly.

He was followed by a teller at the Rocky Mountain National Bank. He testified to only two facts—that he knew Cunningham and that the promoter had drawn two thousand dollars in bills on the day of his death.

A tenant at the Paradox Apartments was next called to the stand. The assistant district attorney examined him. He brought out only one fact of importance—that he had seen Cunningham enter the building a few minutes before nine o'clock.

The medical witnesses were introduced next. The police surgeon had reached the apartment at 10.30. The deceased had come to his death, in his judgment, from the effect of a bullet out of a .38 calibre revolver fired into his brain. He had been struck a blow on the head by some heavy instrument, but this in itself would probably not have proved fatal.

"How long do you think he had been dead when you first saw him?"

"Less than an hour." Answering questions, the police surgeon gave the technical medical reasons upon which he based this opinion. He described the wound.

The coroner washed the backs of his hands with his palms. Observing reporters noticed that he did this whenever he intended taking the examination into his own hands.

"Did anything peculiar about the wound impress you?" he asked.

"Yes. The forehead of the deceased was powder-marked."

"Showing that the weapon had been fired close to him?"

"Yes."

"Anything else?"

"One thing. The bullet slanted into the head toward the right."

"Where was the chair in which the deceased was seated? I mean in what part of the room."

"Pushed close to the left-hand wall and parallel to it."

"Very close?"

"Touching it."

"Under the circumstances could the revolver have been fired so that the bullet could have taken the course it did if held in the right hand?"

"Hardly. Not unless it was held with extreme awkwardness."

"In your judgment, then, the revolver was fired by a left-handed person?"

"That is my opinion."

The coroner swelled like a turkey cock as he waved the attorney to take charge again.

Lane's heart drummed fast. He did not look across the room toward the girl in the blue tailored suit. But he saw her, just as clearly as though his eyes had been fastened on her. The detail that stood out in his imagination was the right arm set in splints and resting in a linen sling suspended from the neck.

Temporarily Rose McLean was left-handed.

"Was it possible that the deceased could have shot himself?"

"Do you mean, is it possible that somebody could have tied him to the chair after he was dead?"

"Yes."

The surgeon, taken by surprise, hesitated. "That's *possible*, certainly."

James Cunningham took the witness chair after the police officers who had arrived at the scene of the tragedy with the surgeon had finished their testimony. One point brought out by the officers was that in the search of the rooms the two thousand dollars was not found. The oil broker gave information as to his uncle's affairs.

"You knew your uncle well?" the lawyer asked presently.

"Intimately."

"And were on good terms with him?"

"The best."

"Had he ever suggested to you that he might commit suicide?"

"Never," answered the oil broker with emphasis. "He was the last man in the world one would have associated with such a thought."

"Did he own a revolver?"

"No, not to my knowledge. He had an automatic."

"What calibre was it?"

"I'm not quite sure—about a .38, I think.

"When did you see it last?"

"I don't recollect."

The prosecuting attorney glanced at his notes.

"You are his next of kin?"

"Hy brother and I are his nephews He had no nearer relatives."

"You are his only nephews—his only near relatives?"

Cunningham hesitated, for just the blinking of an eye. He did not want to bring Kirby into his testimony if he could help it. That might ultimately lead to his arrest.

"He had one other nephew."

"Living in Denver?"

"No."

"Where?" L L

"Somewhere in Wyoming, I think. We do not correspond."

"Do you know if he is there now?"

The witness dodged. "He lives there, I think."

"Do you happen to know where he is at the present moment?"

"Yes." The monosyllable fell reluctantly.

"Where?"

"In Denver."

"Not in this court-room?"

"Yes."

"What is the gentleman's name, Mr. Cunningham?"

"Kirby Lane."

"Will you point his out?"

James did so.

The lawyer faced the crowded benches. "I'll ask Mr. Lane to step forward and take a seat near the front. I may want to ask him a few questions later."

Kirby rose and came forward.

"To your knowledge, Mr. Cunningham, had your uncle any enemies?" asked the attorney, continuing his examination.

"He was a man of positive opinions. Necessarily there were people who did not like him."

"Active enemies?"

'In a business sense, yes."

"But not in a personal sense?"

"I do not know of any. He may have had them. In going through his desk at the office I found a letter. Here it is."

The fat little coroner bustled forward, took the letter, and read it. He handed it to one of the jury It was read and passed around. The letter was the one the promoter had received from the Dry Valley rancher threatening his life if he ever appeared again in that part of the country.

"I notice that the letter is postmarked Denver," Cunningham suggested. "Whoever mailed it must have been in the city at the time."

"That's very important," the prosecuting attorney said. "Have you communicated the information to the police?" L

"Yes."

"You do not know who wrote the letter?"

"I do not."

The coroner put the tips of his fingers and thumbs together and balanced on the balls of his feet. "Do you happen to know the name of the lady with whom your uncle had an appointment on the night of his death at his rooms?"

"No," answered the witness curtly.

"When was the last time you saw the deceased alive?"

"About three o'clock on the day before that of his death."

"Anything occur at that time throwing any light on what subsequently occurred?"

"Nothing whatever."

"Very good, Mr. Cunningham. You may be excused, if Mr. Johns is through with you, unless some member of the jury has a question he would like to ask."

One of the jury had. He was a dried-out wisp of a man wrinkled like a winter pippin. "Was your uncle engaged to be married at the time of his death?" he piped.

There was a mild sensation in the room. Curious eyes swept toward the graceful, slender form of a veiled woman sitting at the extreme left of the room.

Cunningham flushed. The question seemed to him a gratuitous probe into the private affairs of the family. "I do not care to discuss that," he answered quietly.

"The witness may refuse to answer questions if he wishes," the coroner ruled.

Jack Cunningham was called to the stand. James had made an excellent witness. He was quiet, dignified, and yet forceful. Jack, on the other hand, was nervous and irritable. The first new point he developed was that on his last visit to the rooms of his uncle he had seen him throw downstairs a fat man with whom he had been scuffling. Shown Hull, he identified him as the man.

(To be continued.)

No woman should have wrinkles or sagging skin before she is sixty.

Lifebuoy keeps the skin young.

The health odour vanishes quickly after use.

When the Needle Fails to Point True.

One night off the Irish coast during the war a steamer was torpedoed. The boats were provisioned and dropped over the side, and in the captain's boat was placed a small machine gun for protection. The boat carried also the ship's compass, and the captain instructed the other craft to follow him as he laid his course toward land.

But late in the morning the captain began to suspect that the needle was not pointing north. For a little while he was puzzled; then he understood. The machine gun was affecting the needle. Only when they had reluctantly dropped the weapon overboard—for there was no room for it in the other boats—did they find a course that brought them to land.

How often in life something that we insist on taking unto ourselves solely for protection influences the delicate needle of conscience so that it no longer points true! For example, there is money. Most of us in laying out the course of our life feel sure that we must include it, for money is such a comforting protection against so many woes and ailments. Yet how many times under its subtle appeal the needle of conscience swings away from the ideal of strict honesty or truthfulness or generosity to which God intended it to point.

And there is the desire for popularity; it is a natural desire, but it carries with it the temptation to sacrifice principle, to surrender a high conviction or a righteous ideal in order to get more of it. It is true that popular people have power of a certain kind, and on many occasions power is a great protection; but we must be sure not to pay too much for it. For the great end of life is not money or popularity or power; it is character. Whatever keeps us from attaining it had better be thrown overboard. Before the voyage is finished we shall thank God we have been wise enough to make the sacrifice.

Surveying and Mapping by Aerial Photography.

A further step in co-ordination of effort between the Air Board of Canada and the different Government departments in the development of flying for peace time uses has been the institution by the Topographical Surveys Branch, Department of the Interior, of a section devoted to aerial photography. The progress made in the development of practical methods of applying the information obtainable by aerial photography for mapping and surveys is full of promise, and with the formation of a section for its study and development, progress should be rapid.

In the past the work has been largely experimental and has lacked co-ordination. In the future, all requests for aerial photography will pass through the Topographical Surveys Branch, the officers of which will consider the technical aspects of the operation and advise how the requirements of each can best be met, whether by oblique or vertical pictures, the height at which the photographs should be taken, their direction and inclination, the character of the lens to be used, and other features. The photographic work and flying will, as heretofore, be carried out by the Air Force, but the results will all be made available to the Topographical Surveys Branch for study and development.

Paid For His Time.

Interfering Old Man—"My little boy, have you no better way to spend the evening than by standing in front of the gate idling away your time?"

Boy—"I ain't idling away my time. There's a fellow inside kissing my sister, who is paying me a quarter to watch for pa."

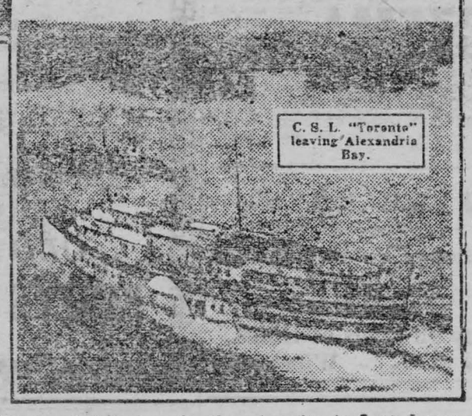
Wonders of the Thousand Islands



THERE are thousands of beauty spots along the mighty St. Lawrence river, stretching as it does for upwards of a thousand miles from Lake Ontario to the ocean, but perhaps the most ideal spot on the river is between Kingston and Brockville. It is world-wide known as the Lake of the Thousand Islands because of the myriads of magnificent islands that dot the river and add grandeur to this wondrous section of the St. Lawrence. It would be invidious to attempt at an extensive description because space will not permit, but Kingston was founded in the seventeenth century as a trading post under the name of Cataraqui and in 1673 Frontenac erected a fort under his name but the Iroquois Indians destroyed it and massacred the inhabitants twenty years later. Eventually Empire loyalists estab ished themselves here and called it Kingston. The Toronto-Montreal boats make a call at Kingston en route for Prescott. It was the naval base of the British fleet operating in Lake Ontario. After leaving Kingston no stretch of imagination can describe the wonderful kaleidoscopic view that meets the eye of the Manatoana, the garden of the great spirit, as the Indians describe this part of the St. Lawrence. Here tradition has it that the mighty Hiawatha met two dusky Onondagas and counselled the alliance of the Six Nations. Here it is that our American neighbors chose to erect their summer mansions, which are pointed out as famous places of interest. The Lost Channel is among these islands, where in 1758 the British, under Lord Amherst, on their way from Oswego to Montreal, entered it by mistake and were ambushed by the French and their Huron allies. However, they emerged victorious although a small boat with coxswain and crew never found its way out, hence its name.

The Thousand Islands are famous for history. Carleton Island was the rendezvous of Thayendanagea, the terrible Six Nations chief who fomented massacres, and during the revolutionary war it was a famous refuge for the Tories of New York, Pennsylvania and New Jersey. Another island, named "Devil's Oven," was the home of "Bill" Johnson, the pirate of the Thousand Islands. Another favorite is Lost Lover Island, where an Indian maid was drowned on a fruitless search for her lover.

Clayton, on our way down the river towards Prescott, where C.S.L. passengers for the metropolis and the lower St. Lawrence are transferred to the Rapids boat, is often called the Gateway of the Thousand Islands. It is a very popular resort, especially for Americans, and from here the journey across Alexandria Bay, numerous islands are passed with their magnificent homes. Hart Island stands out prominently, and future history will doubtless rehearse the story connected with the great mansion erected here by a wealthy American at a cost of over a million dollars and now showing signs of decay. According to the pathetic story, the huge house with its outstanding turrets, was built by a loving husband for his devoted wife, who, before its completion, died. He was so disappointed that he had neither the inclination to finish the work or live there, and it remains just as it was at the time of her death.

Mail the Coupon and Watch the Mail

It will bring you at once a copy of our booklet "Buying Bonds on the Partial Payment Plan." Therein you will find a sane, workable plan for budgeting your income and a simple method for the investment of a monthly surplus—no matter how large or small—in sound securities. A systematic programme of saving and investing a determined portion of your earnings is the foundation of an independent income. Our Partial Payment Plan will enable you to do this.

During the next few months you can become the owner of a safe $200, $500 or $1,000 bond. Just send us your name and address on the coupon below and full particulars will be mailed to you.

The AUTOMOBILE

NEW ERA IN MOTOR INDUSTRY.

A new era in the automobile industry is at hand, according to engineers and manufacturers who have been studying the 1924 offerings of the largest manufacturers. While these new models may appeal to the general public as simply excellent values for the money, to the initiated they mean far more.

It is being said here that manufacturers have at last come to the only sound method of building cars, that of making them fundamentally right at the start and acquiring production and price as a necessary but secondary consideration.

It is believed that the 1924 models show that factories have decided to build cars to last and for safety purposes and for price next.

Engineers say that while there are many changes in the next year's cars as far as the public is concerned there is not a new principle involved which was not known to the industry as far back as 1905. It is simply a case of being able to manufacture the devices incorporated in the models at a price which will appeal to the public.

In the case of the four-wheel brakes several American engineers were experimenting with them as far back as 1909, and actually had sets on test cars of that period. At a factory in Lansing a newspaper man the other day was shown a car eight years old, on which four-wheel brakes had been installed years ago.

The same situation exists in regard to carburetion. The engineers knew years ago that heat control, contained on many 1924 models, was an important factor, but the companies could not afford to place it on the cars, as it would increase the price and facilities for making the attachments had not reached a point where it could be done cheaply and quickly.

This also is said to apply to clutch developments and rear axle improvements, which have been made so that to-day one almost never considers these parts as possible of giving trouble.

The principle of the baloon tires was also known years ago, but engineers could not conceive how they could be made at a price where they would be salable.

All these points are being brought up by engineers to show that manufacturers are getting back to the fundamental principles of first making it right and then making it at a price by achieving quantity production and by the development of new machinery.

Another point brought out in the 1924 models is the increased power of nearly all models. Engineers say that the early cars of this century were high powered and wonderful results were obtained, then engine power dropped due to price considerations, but to-day high-powered motors are returning.

Novel Carburetor Invented by Swiss.

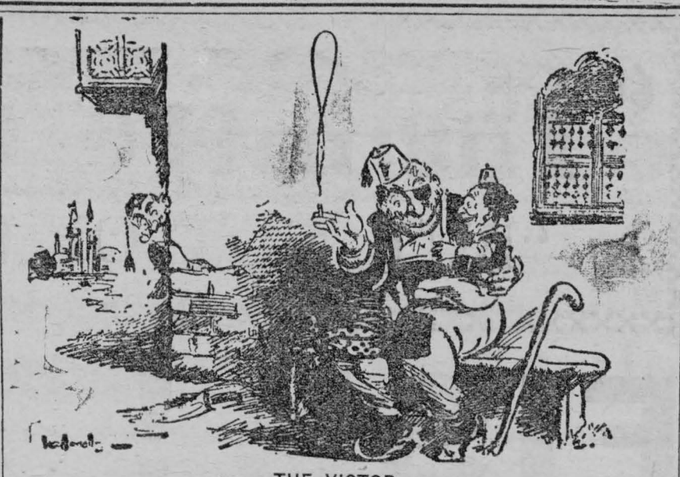
News has come to this country of the details of a carburetor invented by a Swiss and for which wonderful claims are made. Saving in gasoline up to 32 per cent. is one advantage, greater motor speed another, the absence of a float feed another; but the greatest is the easy use of benzine, gasoline, kerosene or alcohol without changing the carburetor at all.

The gasoline is vaporized by a small air fan with its axis on the jet and situated slightly beyond the nozzle. It is set in motion by the air current passing through the carburetor when the motor moves. Greater use of gasoline is claimed because of the better mixture of gas and agitated air. There is also an auxiliary jet which sprays water into the air-gas mixture once the motor gets hot. The combination of water and gas is said to induce almost perfect consumption of the gasoline, elimination of carbon in the cylinders and smoother running of the motor.

When fuels other than gasoline are used this auxiliary jet is connected with a small tank of gasoline or benzine and vitalizes the heavier substitute fuel, but for starting only. The advantage of the carburetor being without a float rests in the fact it may be mounted at any angle, and gives the added merit of eliminating clogging and consequent failure of fuel supply.

Biggest South of Equator.

Buenos Aires, the capital of Argentine, is the largest city lying south of the equator.



THE VICTOR

Little Turk—"What did you do in the Great War, daddy?"
Father—"I bluffed 'em, my boy; I bluffed 'em!"

—From The Cardiff Express.

My High Hill.

I came to my high hill in the cool of the evening
After my loneliness had all but torn my heart;
I came to my high hill and there were kind arms leaning
And the breath of tenderness and peace from earth apart.

Sorrow called insistently, pain waited near me,
But my hill put out a shield cool and unafraid;
So what was there in memory scarred with grief to sear me
When I found her benediction on me softly laid?

—E. Shaw Montgomery.

King George Gives Stranded Autoist a Lift.

"Jump in" is not an expression one expects to hear on a first meeting with the King, but those or similar words came into the conversation that a London doctor and his wife had with his majesty King George V. recently at Perth on the Braemar Road.

Dr. Young was motoring from Perth when his car collided with another near Reddock, about fourteen miles from Braemar. Soon after the collision another car came along, and the owner, seeing the travelers stranded, stopped his car and asked if he could be of any assistance.

On the doctor explaining that he was due at Braemar in a short time he was told to hop in and be driven to his hotel. It was not until the conclusion of the journey that he learned that he and his wife had been riding in the royal car and talking to King George.

The King was on his way to Balmoral, but by going first to Braemar his arrival at the castle was delayed half an hour, to the perturbation of court officials, who thought the royal car must have met with some accident.

Select Your Post Cards With Care.

Picture postcards are a great convenience to the hurried traveler who has, or who thinks he has, no time to write letters home. But accidents will happen. Sometimes, says a contributor to the Youths' Companion, the picture selected says something the sender did not intend.

Some time ago a lady who was traveling in Florida wrote on a card that she was about to mail to a friend in Chicago: "Wish you were here."

In due time came the answer: "Received your card, but what do you mean? You sent me a picture of a cemetery!"

A dear old grandmother who was traveling through northern Ohio chose a card on which was a colored picture of a handsome new building. She wrote: "Am detained here unexpectedly for a few days. Will explain later."

Great was the glee of children and grandchildren, for grandmother had sent them a picture of the new jail!

"The Ugliest Man in the World."

No, he wasn't handsome. In fact both at school and at college the Rev. "John George"—a name under which Mr. Arthur Porritt in his interesting reminiscences conceals the identity of an old friend—was told repeatedly that he was "no Adonis." There was no question about it, he was downright homely.

When "Mr. George" had been a year or two in the ministry he went to find an old theological college chum who had recently married and settled in a suburb of Liverpool. The friend had often talked to his young wife about the Rev. "John George" and had described him as "at once the dearest and the ugliest man in the world." The young wife opened the door, and the visitor asked for her husband.

"I'm sorry, Mr. George," replied the woman, "but my husband is down with influenza and must not see anyone. He will be sorry when he hears you have called and could not see him."

"Oh, I'm exceedingly sorry," said "Mr. George." Then with a start he added: "But, excuse me, Mrs. ——. can you tell me how you knew that I am Mr. George?"

But the young wife, her cheeks burning, fled.

Both Sexes.

A clergyman who advertised for an organist received this reply:

"Dear Sir,—I notice you have a vacancy for an organist and music teacher, either lady or gentleman. Having been both for several years I beg to apply for the position."

The Burned Tree.

Latest estimates increase the value of forest damage by fire in New Brunswick to not less than $5,000,000. The fires in the richest virgin forests of the province have continued to burn unabated.—News item.

I was a Canadian tree.
I stood here for a hundred years.
My roots are deep in the earth.
My branches waved high in the air.
I was good to look at;
A tall, strong tree.
Poets sang about my strength and beauty;
Birds sang on my waving branches;
Over me curved the blue sky;
Above me floated the white clouds.
The thunder crashed;
The storms of a century
Swept harmless past me,
Past me and my companions.
All around me they stood,
The beautiful trees of the forest.
We were the wealth of Canada;
We were industry;
We employed thousands of men;
We were work and profit
And wages,
And sustenance for homes;
We helped to hold Canada up;
The forest trees—
But the fire came.
And in an hour we were destroyed—
The growth of a hundred years—
Blackened stumps in a wilderness;
Wasted an dead and ruined;
Destroyed by fire in an hour;
By the annual Forest Fire
That is burning the vitals of Canada.

The New Baby.

She is so small, yet looks so wise
Out of her round, blue, serious eyes;

I wonder what she thinks about
And shall I ever find it out?

They tell me she can't really see,
But yet I know she looks at me.

They say she doesn't think nor know—
They can't make me believe it's so.

She knows me and she knows my voice
And I'm so glad she made her choice

And picked me rather than another
To be her proud and happy mother!

—Abigail Creeson.

Injurious to Linoleum.

About the most important thing in regard to the wear of linoleum is to prevent water from getting into the seams and under it. Always wipe dry and prevent this from happening.

The man who does not climb slips back.—Dr. Alexander Meiklejohn.

Exhibit of Federation of British Industries

Canada has, since the termination of the war, awaited with patience the adjustment of British economic conditions and the revival of its trade, and with the possibility, becoming increasingly evident, of the manufacturers of the British Isles to devote greater attention to markets abroad and the promotion of trade expansion, it is enormously gratifying to the Dominion to find herself one of the first and most engrossing objects of such regard. The latest and most definite proof of this great interest in Canada on the part of manufacturers of the British Isles is the fact that fifty-three exhibitors from the British Isles took space in the Canadian National Exhibition at Toronto in the special section arranged by the Federation of British Industries.

The Federation of British Industries was founded in 1916 by a small body of prominent manufacturers of the British Isles who realized the necessity for some organization to co-ordinate the interests of and represent all the industries of the United Kingdom. The original idea of its founders was to enable manufacturers to take immediate advantage of commercial opportunities overseas following upon the conclusion of the Great War.

The Federation has grown so rapidly that it has speedily become the largest and most powerful organization of manufacturers and producers in the world. Its membership includes all the important trade associations in the United Kingdom, over 170 in number, whilst altogether its total direct and indirect membership is more than 19,000 manufacturing establishments representing $25,000,000,000 in capital. In addition to its head office in London it maintains 16 district offices in the principal industrial cities of the United Kingdom, and has representatives or correspondents in 46 different countries of the world. The Federation through its widespread ramifications is in daily touch with commercial conditions in practically every important market of the globe.

The Voice of British Enterprise.

The Federation of British Industries is recognized by the Government and the public of Great Britain as the voice of British productive enterprise. The scope of its influence and endeavors has, since its foundation, rapidly widened until its activities are no longer confined purely to the interests of the British manufacturer, but are imperial in character. The Federation stands for the improvement of inter-imperial trade, and the confirmation of this is the exhibit which was organized for display at the Canadian National Exhibition. It was a relatively small exhibit, but it represents the development of much effort and the forerunner of what is hoped will be much bigger things in the years to come.

The Federation confesses to much patient work in rousing British manufacturers to the necessity of being adequately represented at the Canadian National Exhibition, which is the greatest annual fair in the world, with its attendance of nearly one million and a half people in its duration of two weeks. It suggests the conviction among many British manufacturers that Canada is the peculiar province of the American interests. The British manufacturer is himself to blame for the formation of such an opinion. Canada has exhibited in every possible manner her strong desire to promote greater trade with the Motherland and other Dominions of the Empire, and the latest proof of this was given in the extent of British preference in the recent budget.

It is with the greatest gratification she sees British manufacturers represented at the Canadian National Exhibition under the aegis of the Federation of British Industries which she hopes may be the commencement of a greater and more adequate annual representation.

Wanted—A Self-Starter.

Mr. Isaacson had just opened a clothing store.

Mr. Adams, an insurance agent, called upon Mr. Isaacson to see if he could write some business.

"You've just opened a nice new clothing store," Mr. Adams began, "and, of course, you'll want to take out some fire insurance."

"Oh, sure," Mr. Isaacson agreed. "write me $10,000."

"And then," Mr. Adams continued, "burglars do sometimes break into stores. I should think you'd feel safe with burglar insurance."

"Sure, sure," Isaacson beamed. "I'll take $3,000.'

"Fine," exclaimed Mr. Adams, "and, by the way, I've just taken on a new line which protects you against tornado."

"Tornado — tornado — murmured Mr. Isaacson. "Vell, how do you start a tornado?"

Cruelty is bad morals and bad manners.

It's an awful bore when a man will insist on talking of his ailments, when you want to talk of yours.

The Reason.

Little Willie came home from school looking very tearful.

"What's the matter," inquired his Uncle John.

"I've lost the quarter the teacher gave for the best boy in the class!" wailed Willie between his sobs.

"Well, never mind," said Uncle John. "Here's another quarter. But how did you manage to lose it?"

Willie—"Because I wasn't the best boy, uncle."

Each Got a Shot.

"Did that bootlegger fire on the dry agents?"

"Perhaps he did. I heard 'em say each of 'em got a shot from him."

Stories About Well-Known People

Ever Try Rider Haggard for Pneumonia Cure?

When Sir Rider Haggard was at a garden party at Buckingham Palace—according to Walter Tattle. the artist—he was approached by a titled pair who wished to express their gratitude to him for having been instrumental in saving the life of their son. The boy was suffering from pneumonia, which had reached the crisis, and it was vital that he be made to perspire. They tried many things to secure this end, but without success. The patient was very weak and listless. Nothing interested him until they tried reading to him from one of Sir Rider's books. At once his curiosity was aroused, and when a thrilling climax was reached, he broke into a profuse perspiration. From then his recovery was rapid.

Lady Astor on Herself.

"The historian may gather a fairly clear idea of 'Nancy Astor by Lady Astor' from the little volume of her speeches just published, under the title—My Two Countries.

"Here are a few of Nancy Astor's judgments on Lady Astor:

" 'I certainly have been given courage and strength. I won't say too much about wisdom.'

" 'It was my husband who started me off on this downward career—from home to the House.'

" 'I usually do speak from my heart. It has been a safer guide to me than my head.'

" 'I am striving to take into public life what any man gets from his mother, and most men get from their wives, if they choose wisely.'

" 'I don't pretend to be an educated woman, but I have a slight understanding of human nature and a positive nose for politics and politicians.' "

An Awkward Introduction.

When the clever Canadian humorist, Mr. Stephen Leacock, was lat in England he told me a good story against himself.

"I was being introduced to an audience before giving a lecture, and the chairman proceeded to remark, 'We used to send out to Canada various classes of people to help build up that country—laborers, scholars, professors, and even criminals. And now'—with a wave of his hand towards me—'they are coming back!' "

THE GOOD PROVIDER.

James Beeswax is a good provider, year after year he strives to please; he brings home kegs of wholesome cider, and cans of succotash and peas. His children wear the finest raiment of any offspring on the street, and James is always making payment for things to wear and things to eat. The town is full of women yearning for things they need and cannot buy, and they behold this James returning from market with a costly pie, and oftentimes their hearts are bitter, and in them thoughts discordant buzz; "Why can't all men," they sadly twitter, "behave as James H. Beeswax does? His wife must be a happy woman, she gets all things for which she sighs; that man of her's is more than human—he's old Kris Kringle in disguise." And Mrs. Beeswax, sitting lonely, is saying, "By the saints above, my James would be a peach if he'd only tell me often of his love. He brings me eggs and prunes and bacon, he brings me butter from the cow, but I am feeling all forsaken, for lack of kisses on the brow. He brings me home a sack of carrots, a dish of kraut, a bale of hay, and hats whereon the plumes of parrots and ostriches make vain display. But I am pining for the ardor that once he showed, and brought me bliss; I'd rather do without the larder, and have an old time lover's kiss."

British Columbia Re-Foresting the World

Man continually improves on nature. The seeds of forest trees are equipped with wings, with which they ride aloft on the breeze; but this takes them comparatively small distances. Man robs them of the wings Nature provides, puts the seeds in sacks, and sends them to the four corners of the earth. The place where this is being done on a large scale is in the seed extraction plant operated by the Dominion Forest Branch at New Westminster, B.C.

Like many another story, this one goes back to the war. In those days of storm and stress ocean tonnage that could ill be spared from the vital task of transporting men and munitions had to be diverted to the freighting of lumber. Out of that experience, in due course, was born a determination to embark on a big scheme of reforestation in Britain.

Going into the thing with characteristic thoroughness, the imperial forestry commission made tests of practically every species of timber in the world, and came to the conclusion that the Douglas fir and the Sitka spruce are the best of all for general purposes. It was determined to base the scheme on these two. Negotiations were then opened between the imperial and dominion governments, and an arrangement entered into under which the former undertook to bear the cost of seed collection, extraction and shipping.

The plant was built in 1921. It was located at New Westminster because that city is the centre for the Fraser valley, where the facilities for collecting fir cones are the greatest. The spruce cones, however, are collected in the Queen Charlotte Islands. This plant is the only one of its kind in Canada. There are a number of small plants in the United States, but no such wholesale busness is done anywhere else in the world.

Expansion of Industry.

Originally the intention was only to supply the British government with its requirements, but in the two years that have elapsed enquiries have come from many other countries, and the undertaking has grown into a regular export business, which shows signs of supplying the re-forestation needs of the whole globe.

Most of the cones are gathered by women and children. In addition to fir and spruce a relatively small quantity of hemlock seeds is handled. At present the operations are confined to these three species. Enquiries, however, have been received for cedar, and in time that species may be added.

The machinery involved in this industry is comparatively simple. A huge cylinder, twelve feet long and four feet in diameter, is the central unit. Flanges continually hurl the cones into this blast. As the cones dry and open the seeds sift through a fine mesh net, of which the walls of the cylinder are built, into a hopper. Thence they pass through the "winger," a machine specially devised for this plant that strips the wings off the seeds. They then go through an ordinary fanning mill, which removes the chaff, and the seeds are ready for sacking.

A sack of Douglas fir cones treated thus yields about a pound and a quarter of seeds. Sitka spruce cones yield more than two pounds to the sack. The yield from Western hemlock is about the same as from fir.

The industry is a seasonal one. From the time the plant started to operate at the beginning of October, 1921, it was run on a 24-hour shift till March 31, 1922. During that time it produced 4,500 pounds of fir seeds, from 3,646 sacks; 8,125 pounds of spruce seeds, form 3,237 sacks; and 440 pounds of hemlock seeds from 353 sacks.

Last year the plant did not operate, the season being an unusually poor one for cones. Indications of the present season so far are that the cone crop will be unusually good, and it is anticipated that the plant will operate on a larger scale than before.

Supplying World Needs.

In addition to the principal shipments of 4,000 pounds of fir, 3,000 pounds of spruce and 100 pounds of hemlock seeds to the British government, smaller quantities have been snt to many lands. Some have gone to Scotland and Ireland for the re-forestation of private estates, some to many of the United States, where they were bought by seedsmen and others; in Canada they have gone to Quebec and New Brunswick; the colony of Newfoundland has come to this source of supply. Shipments have been sent to the commonwealth of Australia and the state government of New South Wales, to New Zealand and to Tasmania. In South America they have penetrated Chile and Peru. A dozen countries of continental Europe have requisitioned, including France, Belgium, Germany, Russia, Denmark, Norway, Sweden and even far off Iceland.

And yet the industry is only in its infancy. It takes at least a hundred years to grow a Douglas fir into merchantable timber. No man now living will see the process of re-forestation now beginning come to fruition. But in imagination one may see the day when the temperate countries of the world will be clothed with the verdure that once was indigenous to the Pacific coast.—R. A. McLellan, in Toronto Star Weekly.

X-Ray or Radium to Cure Cancer

An X-Ray of high voltage as a substitute for the use of radium in the cure of cancer is being advocated by specialists in some of our most important centres.

Increase in this dread disease has been rapid and is viewed with deep concern both on this continent and abroad, as the cause of cancer is as yet undetermined. "One of the great mysteries," it is characterized by Dr. William J. Mayo, the distinguished American surgeon, who contends that no cure has been found.

Prominent physicians and electrical experts have concentrated long on this vital problem, and experiments are being carried on in many laboratories and hospitals in an effort to conquer the unknown. X-ray voltage has been increased to as high as 300,000 volts in treatment of malignant cancer, with what is said to be measurable success.

But in spite of the X-ray enthusiasts there are many who have not swerved from their belief in radium as the white hope of the afflicted. They say that the contention of X-ray fans that the cost of radium is prohibitive is without foundation.

Knowledge of Radium.

The conference of the American Congress on Internal Medicine held recently in Philadelphia helped considerably in giving radium its definite place in medicine. Much of the mystery surrounding its use and value was cleared away. In the beginning too much reliance was placed in its miraculous powers; conversely the pessimist has become less antagonistic. In itself radium has not proved to be a cure for cancer, but as an adjunct tosurgical treatment it still holds its place. The power of the gamma rays of radium to change the biologic structure of human cells has not been questioned, but rather the value of this change.

It is a very speedy substance and not at all miserly with its energy.

Not long hence it may be possible for almost any of us to walk into the corner drug store, ask casually for a few milligrams of radium, pay for it and depart.

In less than six months the price of radium has dropped more than half. It is now within the reach of nearly every practitioner of medicine, at a cost per milligram less than a month's rent.

Not a Scarce Substance.

The discovery lately of vast radium deposits in Madagascar and the Belgian Congo and the formation of a radium producing company in Colorado under international capitalization promise a steady drop in price until it will be possible for practically all industrial chemists to experiment for new applications.

For, contrary to our notion, radium is not scarce at all, but is everywhere about us.

Rushing through space with the speed of light, 186,600 miles per second, are particles so small that the most powerful microscope cannot detect them. They are about 1-1840 the mass of the smallest things imaginable. Yet to equal this apparently effortless and spontaneous act of nature man would be required to generate an eectric current of 2,000,000 volts; equivalent to a sixteen-foot spark in air. We call this particle the "hard beta ray" and its parent is radum C.

About twenty-five years ago M. and Mme. Curie first extracted radium bromide from pitchblende residues. Pitchblende contains nearly one-half of the known metals, which accounts for the amount of research engaged in before it became known that uranium was at the bottom of it all. There are many uranium-containing ores, but only two are of practical importance, uranite and carnotite.

After the radium has been obhained it begins to disintegrate or decay. By doing so it comes close to violating some of the laws of chemistry; but when, in addition to this, it has the effrontery to blossom out into an entirely different substance, it breaks all the commandments. Or it did until the principle of radioactivity became known.

Tremendous Energy.

The first thing radium does to show its contempt of law is to shoot out alpha rays. These are really particles of positively charged helium atoms. They start with a speed of 9,000 to 12,000 miles per second, but don't get very far. The greatest distance possible for them to cover under standard conditions of temperature and pressure is a fraction more than an inch. The thinest layer of metal or even a sheet of note paper is sufficient to stop thm. In addition radium emias a certain amount of energy of the heat-raising variety. It has been estimated that the alpha rays from one gram of radium emit 125 calories per hour!

This means that it could raise the temperature of 125 times its weight of water one degree centigrade within an hour.

One would imagine that all this stored up tremendous energy of radium would have some value as an internal remedy. Certain springs are reputed to have remarkable health-giving properties due to the presence of radium. But whatever definite biologic effects have been noted to follow therapeutic administration of radium emanations or radium salts were due to quantities several millions times greater than are found in any known natural springs.

Real Value of Radium.

So far the real value of radium lies in its power to change the biologic structure of body cells. It is especially valuable in the treatment of thirty or forty different kinds of cancer and various skin diseases.

The gamma ray is used mostly for this purpose. This ray travels with the speed of light. But it is not produced in the same manner as either the alpha or beta ray. It is really the result of lost energy.

When a high speed beta ray is escaping from a radium atom intense electronic vibrations are set up in the atom. These vibrations result in very high frequency, or short wave length, electro-magnetic waves. These are gamma rays. One might almost say it is similar to the discharge of a big gun. The recoil is lost energy or the by-product of the discharge.

To obtain one gram (about 1-28 of an ounce) of this mysterious element, radium, approximately 500 tons of chemicals and 1000 tons of coal are used. Then after a great deal of crushing of the ore and chemical treatment through complicated processes a little bit of white powder is obtained, so small a quantity in fact, that it could be lost in a thimble. If one had enough of these thimbles the world's war debt could be paid off for all time.

But the knowledge of radium is in its infancy; what it may accomplish in the future may prove as startling as its discovery.

I Only Wish I Could.

(Crawf. C. Slack.)

If I could only give away,
The little that I know,
To some enthusiastic youth
When I am called to go,
Have him start where I leave off,
And toil with conscious heart,
Perhaps the world might have sometime
One worthy of true art.

Oh, could I tell him what to do,
And give him words of cheer,
The words I've missed so on my way,
And often longed to hear.
I'd like to tell him what I've learned,
As I have blundered through,
That real art, yea the love of art,
Is in the hands of few.

Could I but tell him my mistakes,
Too oft the chances lost,
Of all my disappointments,
And the heartaches that they cost.
Could I warn that failure always lurks
To mar each worthy plan,
And arm him for to buffet this,
Perhaps he'd make a man.

I'd like to tell him of my dreams,
Of things I idolized,
And visions of by-gone years,
As yet unrealized·
Of work unfinished, I must leave,
Far from self-satisfied,
And my only consolation is
To know that I have tried.

Could I impress that Nature keeps
The only school of art,
The lessons taught by mortal minds,
Is just the minor part.
Degrees by such on one conferred,
Compared to truth is foil,
Success in every worth while art,
Is crowned by patient toil.

Nature's hand alone can prism
The sunset and the dawn,
She alone with brush and pallet,
Sets the diamonds on the lawn,
She can paint the maple crimson,
As the summer starts to die,
For she holds the Master's pallet,
With hues of every dye.

Poor and unpaid I'd bid him toil,
Undaunted through his years,
Facing the critics pointing flaws,
The failures, slurs and peers.
Then meet him in the great unknown,
There to greet me with a smile,
And say, "The legacy you left
Was surely worth the while."

Melvin News

Mr. and Mrs. Roy Annable and children had tea with Mr. and Mrs. W. R. Fraser on Sunday.

Master Dwain Shaver of the Nineth spent Sunday with his cousin Master Gordon Wilson.

The farmers are busy cutting corn and threshing,

Miss Muriel Robinson was the guest of Miss Annie Christie for the week end.

Mr. and Mrs. Sherman Christie and children spent Sunday at the home of Mr. and Mrs. Robt. McDonald of Ormond.

School opened on Monday with Miss Strader as teacher.

High School Field Day.

The High School enjoyed King's weather for their annual sports day this year, but the attendance, other than teachers and scholars was small. The sports were good and each event contested with vigor and enthusiasm. Following is the list of prize winners.

Boys Events.

Mile Race, Senior—1st Geo. Johnston, 2nd Rupert Helmer, 3rd Levius Shaver.

½ Mile, Junior—Stuart Corry, William Smith, Jack Boyes.

100 Yards, Senior—Rupert Helmer, L. Porteous, Geo. Johnston.

100 Yards, Junior—Melvin Scott, William Smith, Eldon Davidson.

Hop, Step & Jump, Senior—Leonard Porteous, Rupert Helmer, Geo. Johnston.

Hop, Step and Jump, Junior—Melvin Scott, Wm. Smith, Eldon Davidson.

High Jump, Senior—Geo. Johnston, R. Helmer, L. Porteous,

High Jump, Junior—Eldon Davidson, Melvin Scott, Ewart Carkner.

Hurdle Race Senior—Geo. Johnston, R. Helmer, L. Porteous.

Hurdle Race, Junior—Eldon Davidson, Jack Boyes, Stuart Corry.

440 Yards, Senior—Rupert Helmer, Geo. Johnston.

220 Yards, Junior—Melvin Scott, Harold Barclay, Eldon Davidson.

Running Broad Jump—L. Porteous, L. Shaver, Melvin Scott.

N. B. The Broad Jump is not one of the championship events.

Senior Champions — K. Helmer and Geo, Johnston, (equal) 22 points.

Junior Champion — Melvin Scott, 18

Girls Events

High Jump—Mabel Jackson, Ruth Claxton, Ada Summers

Hop, Step & Jump, Senior—Ruth Claxton, Evangeline Darling, Ada Summers.

Hop, Step & Jump, Junior—Ruth Claxton, Mildred Derby, Olive Johnston

50 Yards Dash, Senior—Audrey Anderson, Evangeline Darling, Mabel Jackson.

50 Yards Dash, Junior—Olive Johnston Nina Henderson, Bessie Coulthart,

Nail Driving Contest, Senior—Evangeline Darling, Ada Summers, Mildred Derby,

Nail Driving Contest, Junior — Rae Derby, Lera Summers, Nina Henderson.

Potato Race Senior—Evangeline Darling, Olive Johnston, Ruth Claxton

Potato Race, Junior—Isobel Gemeroy, Mildred Derby, Ruth Claxton.

Walking Race, Senior—Ada Summers, Mabel Jackson, Audrey Anderson

Walking Race, Junior—Mildred Derby, Ruth Claxton, Lera Summers.

Three Legged Race, Senior & Junior—Marjorie Wallace & Isobel Gemeroy, Lera Summers & Violet Steele, Olive Johnston and Audrey Anderson

Relay Race—Form II, Form III B, Form I

N. B. The Three Legged Race and the Relay Kace are not championship events.

Senior Champion, Evangeline Darling 16 points.

Junior Champion, Ruth Claxton 20 points.

Winner of the cup given for the Form having most points—Form III B.

Justice Orde is being asked at Osgood Hall to decide whether a will made out on one of the printed forms on display in every stationary store is spurious or not. The Judge after hearing arguments and reviewing evidence felt constrained to call attention to the danger of having the form of a will so easily available and observed that offering such forms for sale should be made a criminal offence.

Horrible Death of Little Child Who went through corn cutting machine.

James Lowe, aged one and one-half years, infant son of Charles Lowe, farmer, met a horrible death at Bearbrook, near Vars, on Saturday morning last, when he was instantly chopped to Ribbons in a corn-cutting machine on his father's farm in sight of his little sister, Dorothy, aged two and one-half years. The remains were buried at Vars cemetery Saturday afternoon.

The little fellow and his sister were playing in a wagon near the cutting machine. Several wagons of corn had been unloaded. About 8.30 a wagon was emptied, and left for the fields along with the farm hands. Jimmy and his sister walked over to the machine, which was unattended. Mr. William Lowe, an uncle, had gone to the engine to sharpen some knives and did not see the children around the machine. Suddenly, Jimmy ran up and climbed on the feed box. He was carried into the knives, which cut him to bits, and the blower fanned them into the silo, where an employe was startled when a foot dropped near him in the corn. The cutter made about 900 revolutions a minute.

Dorothy, who saw her brother meet such a tragic death, ran to the house crying, "My Jimmy gone up blower." Her uncle in the meantime had come back to the cutter to learn of the sad event. Her father and mother, who were in the house when Dorothy went to them, were overcome with grief.

Dr. J. F. Stoness, of Vars, was summoned, and also the coroner, Dr. Boyle, of Casselman, who decided that an inquest was not necessary.

The terrible accident deeply affected the whole neighborhood, and much sympathy is felt for the bereaved praents and little Dorothy, who survive.

Mr. Ed. Fitzsimmons was the victim of a most peculiar accident on Tuesday last, says the Russell Leader. While driving past the Kenmore High School, the boys were playing baseball, and a batted ball struck the wind shield of the car, breaking it into a thousand pieces. Strange to say the glass was driven right past his head without touching his face, but some of the larger pieces fell on his right leg, inflicting three nasty cuts and severing a couple of arteries. Seven stitches were required to close the wounds.

Jerusalem needs modern waterworks, and she has them, but by an interesting piece of enterprise. The reservoirs known as the Pools of Solomon, which were not Solomon's, but were made by Roman engineers, have been cleaned out and their leaks stopped. Now two of them are at work again. They hold 40,000,000 gallons. The pools are supplied from a spring in a cavern called Bir Darash. A large quantity of gravel and stones has been removed, and the aqueduct and tunnels between the spring and the pools repaired; and Jerusalem has its up-to-date water-works, a splendid tribute to the science of ancient Rome.

Teach Me Thy Way

Thy way, not mine, O Lord,
However dark it be!
Lead me by thine own hand,
Choose out the path for me;
Smooth let it be or rough,
It still will be the best,
Winding or straight, it leads
Right onward to thy rest.

I dare not choose my lot;
I would not if I might;
Choose thou for me, my God,
So shall I walk aright.
The kingdom that I seek
Is thine; so let the way
That leads to it be thine,
Else I must surely stray.

Take thou my cup and it
With joy or sorrow fill,
As best to thee may seem;
Choose thou my good and ill.
Not mine, not mine the choice
In things or great or small;
Be thou my guide, my strength,
My wisdom and my all.

People in middle life remember Pearline as a product almost as well known as Pears' soap. But few know why it is never heard of now, though it was then recognized as an article of real merit. The writer of a magazin article on the question of advertising, reveals the secret. After the death of its originator, the firm decided that Pearline was so well established that there was no need for further advertising. A few years later, a concern which, while it advertised, had been making a profit of over a million dollars a year, was sold out for $12,000.

The Kemptville Agricultural School Courses

In Agriculture & Household Science

Open Oct. 29th, 1923, Close April 6th, 1924

The instruction given is a combination of High School Work and practical training in Modern Agricultural Practice, specially designed to meet the needs of the young man and woman of the farm.

Anyone fifteen, 15, years of age with Public School training, and a desire for self-improvement, will be admitted.

Free Tuition. Board and Room in College Residence at Five Dollars, $5.00, per week.

The Course so arranged that the farm work is not greatly interferred with.

For detailed information write for Calender to;

W. J. BELL, B. S. A., Principal, Kemptville, Ont.

HON. JOHN S. MARTIN, Minister of Agriculture, Parliament Buildings, Toronto.

"The Store of Quality."

"BUT NOT OF HIGH PRICES."

FISH!

Have you tried our
Fancy Fresh Mackerel.

No need to worry about a quick lunch with a few tins of these fish in your cup-board, per tin 30c

Finest Small Fat Herrings in Tomato Sauce, per tin 25c

Fancy Boneless Kippered Herrings. per tin 25c

Smoked Brislings in Pure Olive Oil 25c

O. K. Pilchards in 1 lb. tins 18c.

SALMON

White 17c or 3 cans for 50c
Fancy Pink 25c — Medium Red 30c
Cohoe Red 40c — Sockeye 45c
Clover Leaf 50c

Other Canned Goods

Pickles, mixed, sour 40c & 50c per bottle
Chow Chow 45c — Chili Sauce 40c
Chipped Beef in Tumblers 45c
Salad Dressing, large bottles 70c
Mince Meat, large bottles 50c
Pumpkins, 2½ lb. tins 18c
Prunes in 2 lb. tins 45c
Spinach 2 lb. tins 30c
Tuna Fish 40c — Lobsters 40c
Cod Fish Flakes in 1 lb. tins, 25c
French Mustard in Tumblers 30c
Olive Butter in Tumblers 35c

Preserving Needs

Pickling Spices, Tumerick, Celery Seed,
Cury Powder, Whole Cloves, Whole Cinamon
Cashia Buds, Bright Jap Chillies
Red Peppers, Hot Green Peppers, Parawax
Rubber Rings, Pint Jems, Quart Jems
Mustard in tins, Mustard in Bulk
Whole Allspice.

Hardware

Stable Shovels, — Stable Brooms
Curry Combs. — Horse Brushes,
Dog Chains — Belt Laces
Whips, Hammers — Planes
Jack Knives from 25c to $1.00
Butcher Knives — Knives and Forks
Crocodile Wrenches — Pipe Wrenches
Screw-Drivers — Chisels
We handle the celebrated Barrett Roofing
O'cedar Mops — O'cedar Oil
Tar Felt — White Felt
Nails, Hinges — Track for Roller Doors
Stern ends for repairing shafts, axe handles, and crowbars.
Picks, — Wrecking Bars
We are always pleased to have you come in and look over our hardware stock.

SOAP SPECIALS

Palm Olive 3 cakes for 25c
Infants Delight 3 cakes for 25c
Castile Soap 7 cakes for 25c

SHOE Dept.

We have secured a supply of Heavy Work Shoes from the Best Maker in Ontario. Every pair is fully guaranteed by the maker as well as ourselves. When we say the Best, we mean the BEST, not something just as good.

Men's Tan Granite Blucher, whole quarter, army back strap, out-side counters, slip soles, plain toe. nailed and stitched at the low price of $4.75 per pair.

Men's Black Calf, tanned by the very best methods and meets the existing demands for a soft and mellow leather, combined with a tough fibre Urus calf is fitted with a pitch and is as near waterproof as it is possible to make leather, Blucher cut outside counters, nailed and stitched. Once a customer for this shoe always a customer, at the low price of $4.75

Hunting Boots

No part of the Sportsman's equipment is more important than his boots. 12 in. leg., Brown Storm Blucher, army back strap, toe cap, double-sole nailed and stitched.

Empress Shoes for Women, high-cut shoes, 7 in top. made from No. 1 Black Kid and built on a comfortable full fitting last, plain toe cap, rubber heels, cushion soles, per pair $7.50

Women's high-cut, 7 inch plain toe cap, light slip sole, New York Heel, circular vamps, $6.50 pr.

DRY GOODS

Underwear

We have a good full range and feel sure we have a weight and texture to suite you.

Men's Fine Wool Mercury Brand Shirts and Drawers, per garment $2.00

Special Value, Heavy Elastic Rib, all wool, shirts and drawers. It's a value that men will appreciate They are garments that fit sugly and comfortable, shirts are double breasted, priced per garment $1.50

Men's Fine Wool Murcury Brand Combinations per suit $4.00

Men's heavy all Wool Combinations, made in the well-known Scotch Knit, a close firm knit that fits snugly and assures splendid service. Extra value, per suit $3.00

Men's Wool Sweaters, fancy stripe' $4.75

Men's Sweater Coats, $4.00 and $5.50

Men's, Youth's and Boy's Fine Sweaters.

Cashmere Wool Sweaters $1.50, $2.75 and $3.50

Men's Heavy Wool Socks, 25c, 45c, 50c, 65c and 75c per pair.

See our line of Ladies' Hose, Silk and Wool in all the leading shades at $1.40 per pair.

Ladies Cashmere Hose, Brown and Black 65c, 85c and $1.00 per pair.
