WARBLE FLY CONTROL

The losses created by the Warble Fly in Canada, as elsewhere in the world, are enormous. The Dominion Department of Agriculture estimates the losses attributable to Warble Flies throughout the Dominion from $7,000,000 to $14,000,000 and in some seasons may exceed the latter figures. Warble Flies can be and have been controlled, by a dressing of Hyprd Warble Fly Powder. First dressing should be applied now, and succeeded by three other dressings at intervals of 28 days. Treatment is easily applied at a small cost. A trial will convince you of its efficiency, and will save you money. Call and get descriptive circular and full information—it costs you nothing.

EASTER THANKOFFERING MEETING

The Easter Thank-offering meeting of the Women's Missionary Society of the United Church of Morrisburg, was held in the lecture room on Friday evening, March 22nd, with the president, Miss J. Smith, presiding. The meeting opened with hymn 288, and Rev. Dr. MacRae offered prayer. A very beautiful solo, "The Stranger of Galilee," was rendered very effectively by Mr Trevor Allison, and was much appreciated by all. The Mission Band quartette sang "Up from the Grave He Arose," very sweetly. The Scripture lesson from LXXII Psalm was read by the president. After another hymn, the guest speaker, Mrs. Longley, who was a missionary in West China, was introduced by Miss J. Smith. Mrs. Longley, with her charming personality, expressed her appreciation of the opportunity of addressing a W.M.S. meeting, and felt it a real honour to address an Easter thank-offering service. She spoke of the difficulty of some missionaries, after acquiring the Chinese language and speaking it for a number of years, to speak English when they returned. But the missionaries were loyal, faithful and efficient workers on the field. She spoke of dark Africa, with their non-christian women, living in small round huts, with no windows, no chimney, no hygenic sanitation or anything to preserve health. It has been said that in passing by you can discern a christian home by windows and chimney, etc. She spoke of the beauty of West China, and some of the work done; of Chinese girls going to the University of Chentu, and these girls, after graduating, going out as missionaries and teachers among their own people, and that no one can determine the extent of their labours. Mrs. Longley captivated her audience as she cited glimpses of Africa, Corea and China. Everyone present felt the effect of a gifted speaker presenting in such a pleasing and inspiring manner, the work which is so dear to her heart. Mrs. Reddick expressed the thanks of the Society. Offering, which was very gratifying, was received by Mrs. Mullen and Mrs. Merrill.

Meeting closed with hymn 28 and W.M.S. benediction in unison, after which a social hour was enjoyed.

RENEW DRIVE FOR WATERWAY TREATY

Washington, March 25—Proponents of the public power development of the St. Lawrence river are counting on the United States government to use the weight of its navigational claim to half of the international stream to acquire from private interests control of the power area.

The New York State Power Authority, created as the result of a ten year fight by both President Roosevelt as governor of New York, and former Governor Alfred E. Smith, is understood to have taken this viewpoint after a check of the situation arising, out of recent Senate defeat of the seaway treaty.

The strategy is predicated on Senate ratification of the international development treaty with Canada, for both a waterway and a power project. Proponents have quietly instituted a campaign to recruit, with public power development as a chief point, strength sufficient to down the treaty opposition at the next session.

LEGISLATURE ENDS

The pre-election session of the Ontario Legislature closed yesterday afternoon with a minimum of enthusiasm. Final and formal prorogation ceremonies will be held Tuesday afternoon, but all business was cleared from the order paper when the House rose at 6 p.m. yesterday. Order papers were thrown from the gallery as the Speaker announced rising of the House until next week, but the general feeling was one of relief rather than celebration.

MR. WILLIAM SWEENEY

The funeral of William Sweeney, aged resident of Matilda township, was held on Tuesday from his late residence, Irena, to St. Anne's church at Dixons Corners, where the funeral mass was celebrated by Rev. Fr. O'Donnell.

Acting as pall bearers were Messrs R. McCaslin, C. Bouck, D. McGinn, R. Connor, M. Wallace and J. Gibbons.

Deceased, who was in his 77th year, had spent all his life at Irena where he successfully engaged in farming. He is survived by one son, Francis J., formerly of the teaching staff of St. Patrick's Separate School at Ottawa, and three grandchildren. His wife predeceased him several years ago.

TRUCK IGNORES C.N.R. GATES OCCUPANTS NARROWLY ESCAPE DEATH

A truck bearing a Quebec license, the occupants of which could give no satisfactory reason why they were travelling in this district, crashed through the C.N.R. gates, which had been lowered owing to the approach of a westbound express, on Wednesday night, and narrowly escaped fatal results. Both the gates were ruined, and considerable damage was done to the truck. The occupants were unhurt.

The driver of the truck and three other passengers were on their return from Hull, Que., where, it is alleged, they had purchased several bottles of liquor.

Provincial police were at once notified, and the truck was located before the men had reached Cornwall. They were charged with failing to return to the scene of an accident, and when arraigned before Magistrate McCormick on Thursday, were fined $25. and costs.

COURT TO DETERMINE RIGHTS OF SEPARATE SCHOOL

Rights of Separate School Boards to a greater share in school taxes will be decided by the highest courts since "the Government have had difficulty in finding a basis on which a larger share of school taxes may be paid which would not take into account the question of legal rights.' Just before the Legislature session closed yesterday, Premier Henry made the important announcement that a series of questions on the subject would be submitted for judicial ruling.

Premier Henry's statement follows:

"I wish to announce to the House the decision of the Government respecting the taxation of companies in support of Roman Catholic separate schools. This question is not new, and has been under discussion during many years, but more recently the Government has had the advantage of considering forml statements of claims, and counter-claims, put forward respectively by the supporters of separate schools and the friends of public schools. There has also been wide discussion of the subject on the public platform and in the press. From this evidence one fact stands out quite clearly namely, a definite divergence of view upon what are the legal rights of separate and public schools under the present division of school taxation. The Government has given careful consideration to the argument of separate school supporters that, apart from the legal aspect, they are entitled to a larger share than falls to them under existing laws. But the Government has had difficulty in finding a basis on which a larger share of school taxes may be paid which would not take into account the question of legal rights. It is desirable that an authoritative declaration of the legal rights of the parties should be secured as soon as possible. With this object, the Government has decided to submit to the highest courts, in accordance with the law governing such procedure, a series of questions to determine finally the ground on which a settlement could be based. This mode avoids any lengthy litigation, and the questions which are now being drawn up will be made public at an early date."

GARLOUGH—ROBINSON

The United Church Manse at Williamsburg, was the scene of a very quiet and interesting wedding on Wednesday afternoon last, when Madeline Byo, daughter of Mr. Marvin Robinson, was married to Arnold Arthur, son of Mr. and Mrs. Henry Garlough, all of Williamsburg. Rev. C.A. Adey officiated.

The bride and groom were attended by Mr. Beryl Robinson, brother of the bride, and Miss Mary Garlough, niece of the groom. She wore a charming costume of blue georgette, her hat being a small turban of woven straw with coat gloves and purse to match.

Following the ceremony, an informal reception for the immediate relatives was held at the home of the bride's sister, Mrs. S. Phifer.

Mr. and Mrs. Garlough will reside at Elma.

MR. JOHN W. BURLEIGH

There passed away at the family residence, Point Iroquois, on Saturday March 24th, a much respected resident, in the person of John Wesley Burleigh, after an illness of six weeks.

Deceased, a son of the late Mr. and Mrs. Gordon Burleigh, was born at Iroquois, where he spent his entire life. He was in his 70th year. For many years he was a valued employee of the C.N.R., being superannuated about five years ago. Since then he had followed gardening and other general labor. He was a man of very quiet nature, and greatly loved home life.

His wife, formerly Amelia Anderson, predeceased him over two years ago. Surviving are one son, Ernest of Brockville; two daughters, Mrs Rene Dupuis of Arnprior and Miss Ethel, at home; one adopted daughter, Mrs. Orville Timleck, who resided with him. He is also survived by twelve grandchildren; two brothers Charles of Matilda, and William, of the United States; and one sister.

The funeral was held at the residence on Monday afternoon, service being conducted by Rev. Thos Knowles. The remains were placed in the vault at Point Iroquois, to await burial in the Spring.

STRANGE ABSENCE by ALLYN SLOAN

SYNOPSIS.

Jean Graham and her brother, Euan, stay on the Riviera with Geoffrey Winton and his wife Doreen, who leads Euan on to gamble at the Casino. Jean coaxes him to go to Paris. On the road to Paris Jean finds a string of pearls in Euan's pocket. He snatches the case from her and the car crashes. This accident is discovered by Jerry Grant who takes her back to his hostess, Helen Gorst. Euan is missing. M. Rivaux investigates and he confronts Helen with the fact that Mrs. Winton's pearls are missing. Jean visits Euan's friend, de Laurier, and learns that Euan is in debt to him. Jerry Grant meets M. Perichon, famous detective, who assists them. Jerry Grant proposes to Jean, but she asks him to wait. She accompanies the Baron to a theatre under Perichon's instructions. The Baron demands that she invite him to the Van Dyke party. Grant is furious, then suddenly he gets the right perspective.

CHAPTER XX.—Continued

Before Revaux could get any further however the door opened and a head pushed itself in.

"C'est Perichon. You allow me, mon ami?" he asked.

Inside him, no doubt, Rivaux called upon the sacred name of a dog and upon all the powers of thunder, but swallowing them down as if they were bitter pills, he jerked: "Yes, yes, come in."

Washburn's hitherto serious face relaxed into a grin of relief as he pushed a chair towards the old detective.

"Mesdames et Messieurs," Rivaux began. "The pink diamond famous in all the world and belonging to Mme. Van Dyke was at eight o'clock last night in the safe in the wall of Madame's bedroom. This morning at eight it is gone! Now we ask ourselves who was in that room last night. At three o'clock Madame's maid was in the room. Who was in that room between nine and three?"

"Jean Graham!" Doreen's voice fell like drops of sold water into the silence.

"How do you know, Madame?" Rivaux swung around to face her.

"Mr. Washburn told us so last night."

Washburn nodded: "Miss Graham's nose was bleeding and I took her into my sister's room to lie down."

"At what time?"

"I think it was about twelve."

"How long was Mademoiselle there?"

The young man shook his head. You can search me. She said that if she did not feel better soon she would go home.

Rivaux's lips twisted cynically: "And you did not see her go?"

"Nope. But you needn't grin like that. She didn't want Mrs. Gorst to be fussed, so she said she'd just go down the sire way."

"Um." This all seemed to interest Rivaux exceedingly. "I suppose all the domestics have access to Madame's room?" he resumed.

"Yes. My haid whom I have had for ten years; besides, there is a cook, a housemaid and a butler."

"Yes. I have already questioned them."

As the enquiry progressed, M. Perichon sat listening, with his hands folded and his eyes half shut. Occasionally his head nodded at some question or remark of Rivaux's or else he shook it as if in disapproval. All at once Rivaux glanced at the clock and then at Helen Grost.

"But Mademoiselle takes a long time to dress," he grumbled.

Doreen snorted unpleasantly.

"She is being a long time," Helen allowed. "Still, she was in bed. Perhaps Mr. Grant is waiting for her to have some breakfast."

"Breakfast? But we wait—we are losing time!" ejaculated the police officer irritably.

Perichon stood up and advanced into the middle of the room.

"You permit me to put a question or two, mon ami?" he asked, smiling mildly at Rivaux.

There was nothing for it. With as good a grace as possible he gave permission: "Very well. Of course. Ask, ask."

The older man bowed to him, then turned to Washburn: "Monsieur, is it not true that this house is let for the summer?"

"Yes, from May till September."

"And has anyone been to see the villa?"

The young man thought a moment, then said: "Why yes. A rame came to look over the place about a week before Sis—er—Mrs. Van Dyke came out."

"I was not told this," Rivaux interposed sharply.

"You did not ask, and I never thought of it.'

Perichon smiled at the other apologetically; then went on: "Describe her, please."

"Well—" Washburn paused. "She had dark red hair, big dark eyes and she was rather large—"

Helen glanced anxiously at the clock, and wondered what was delaying Jean. She ought certainly to have arrived, unlss anything was wrong. Just then, quite accidentally, she caught sight of de Laurier's face, and its expression held her attention. It struck her that he was listening to M. Perichon's conversation with more than ordinary interest, yet the impression passed almost instantly, and his face assumed its usual air of assurance. What would he say to a reconciliation and perhaps an engagement between Jean and Jerry Grant? But Perichon was saying:

"Voila l'auto. Mademoiselle comes at last."

Almost as he spoke the door was wrenched open and Jerry Grant strode in. At the sight of his face Helen stood up.

"Well, where is Mademoiselle?" snapped Rivaux.

"Miss Graham is missing," jerked the young man breathlessly, looking from Perichon to Helen.

Missing?" gasped Helen. "What do you mean?"

"She's never been home. Her bed hasn't been slept in."

Everyone was silent, struck dumb by the amazing news.

Chapter XXI

PERICHON'S TELEGRAM

Jerry Grant explained to the amazed company that the housemaid on going into Jean's room had found the bed just as she had left it the night before. There was no indication that the girl had returned at all.

"But it's impossible," suddenly ejacutated de Laurier.

Grant ignored him, turning frantically to Perichon.

"Look here, we must do something at once." But they were arrested by a somewhat hysterical laugh from Doreen Winton as she got up, crushed out her cigarette and turned to Rivaux.

"Find Jean Grabam and you'll find the diamond and my pearls. I always told you that she knew more than—"

She broke off for the fury of Grant's face as he stood before her was terrifying.

"Stop!" he ordered in a shaking voice. "You say one more word and I'll have you up for slander!"

She merely smiled and flung carelessly: "Try!" With which she called to Rivaux: "May I go now?"

"For now, yes. I shall want you all again later. But for now I am finished. But I want you, Madame—" he pointed at Helen.

With deep concern written all over his face, de Laurier went over to Rivaux: "But this is terrible, Monsieur. If there is anything I can do—anything, you understand?"

"Thank you, yes, I will remember. Now go and do not talk. Hold your tongues."

To Helen de Laurier bowed: "Madame, I am so distressed. If you have news you will let me know."

In a moment the company had dispersed, all but the occupants of the Villas Marguerite and St. Juan. Elisa Van Dyke, who until then had watched the proceedings in silence, went over to Helen now and offered her sympathy.

"My dear, this is a horrible affair. I'm so sorry."

"I simply cannot understand it," muttered Helen in a bewildered fashion.

The next few moments were occupied in telling Rivaux every detail of Jean's astivities of the previous night as far as they were known, whilst Grant, Washburn and Perichon listened.

"And you did not see that Mademoiselle's room was empty?" asked the police officer.

"No. The room was dark."

"But you say that the window was open."

"Of course. We all sleep with our windows open."

The Frenchman shrugged. Such ridiculous habits. Shortly, M. Rivaux left to set the activities of the law at work to trace the missing girl, whilst Helen, Grant and Washburn, escorted by M. Perichon, returned to the Villa Marguerite.

To Helen the whole thing was a nightmare and entirely incomprehensible. The worst of it was that Rivaux quite evidently suspected Jean not only of stealing the diamond but also Doreen Winton's pearls. This latest occurance it seemed only confirmed his previous suspicions. And certainly it all looked very black for the girl. shrugged her shoulders, she turned to Perichon, saying hopelessly:

"I cannot understand it."

The Frechman gave her a long, penetrating look. "Madame, in your mind you do not suspect Mademoiselle? In your heart, no—but in your mind?"

For ont instant Helen hesitated, then declared firmly: "No, I am sure Jean is innocent."

It flushes off stains without harming enamel or plumbing . . .

HOW to get rid of those ugly toilet-bowl stains! It's easy—with Gillett's Pure Flake Lye. Once a week pour this powerful cleanser and disinfectant—full strength—down toilet bowls and drains. It *flushes* off stains without scrubbing. Cannot harm enamel or plumbing. Kills germs and destroys all odors as it cleans!

There's no need to slave over unpleasant cleaning jobs. Let Gillett's Lye work for you—it's quick, thorough and absolutely dependable. Ask your grocer for a tin—today.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for new revised edition of the Gillett's Lye Booklet. Gives full directions for cleansing sink drains and toilet bowls, tells how to shorten dozens of other cleaning tasks. Also contains full directions for soap making, thorough cleansing, and other uses on the farm. Write to Standard Brands Limited, Fraser Avenue and Liberty Street. Toronto. Ontario.

GILLETT'S LYE EATS DIRT

Pushkin Manuscript Bought by Russians

Belgrade, Yugoslavia — A manuscript of the Russian poet, A. S. Pushkin, has been bought for $2500 by the Soviet Government from its Yugoslav owner, Mr. Miodrag Obradovitch.

It was written a century ago and the famous poet is said to have given it to one of his creditors against a debt. All trace of it was lost after 1850.

About this time Mr. Obradovitch's grandfather, who was a hardware merchant, made frequent business trips to Russia and in some way came into possession of the manuscript.

It was kept in the family library in Belgrade for many years until its owner wrote to the Soviet Ministry of Public Instruction, offering to sell it.

After much waiting, the merchant's grandson received a letter informing him that the Soviet Government would be glad to buy the document. It is understood that the manuscript will be kept in one of the State museums.

Crime in Holland has decreased in the last thirty years by 60 per cent, the convict population being 58,000 in 1904, compared with 23,000 to-day fifteen prisons have shut down.

Flame Darts

London, Ont. Co-eds were complaining recently that undergraduates have been shooting darts at them from blow-guns, apparently having found a scientific application for the famous weapon of the African pygmies. The darts, they explained, are not poisonous, but they are explosive.

A short section of glass tubing from the laboratories serves as the blow-gun, and a common match constitutes the dart. The trick is to shoot it at a stone wall beside the unsuspecting co-ed. The dart lands with a neat explosion and bursts into flame.

Old Churches Are Tottering

Cathedrals Lack Money For Restoration, English Assembly Told

LONDON, Eng. — Seven historic English cathedrals are on the verge of bankruptcy. This disturbing statement was made by the Bishop of Derby before the Church Assembly, the cathedrals being those of Carlisle, Chichester, Lichfield, Peterborough, Ripon, Salisbury and Wells.

Naturally the upkeep of the fabric alone of such enormous buildings demands constant expenditure; it is questionable if any of these great houses of the faith is ever completely free from scaffolding. According to the Bishop of Derby the smallest amount on which a dean and chapter can effectively maintain a cathedral is about $45,000 a year.

Dogs and Child on Leads

LONDON (C.P.)—Seen in Richmond Park leading her grandchild and three dogs, each — including the child — with its own collar and chain, a woman told an inspector she saw no cruelty in the practice, but promised to discontinue it.

His Death Came Way He Wanted It

Denver, Colo.—Roman Engle, 64, a barber, was shaving Max Mannison. They were discussing illness.

"When I die," said Engle, "I want to go just like that." He snapped his fingers.

He barely had uttered the words when he collapsed beside the barber chair. He died in a hospital a few minutes later.

The coroner said it was a heart attack.

In a Museum

The grace of a Tanagra figurine;
A golden goblet bearing still the print
Of that perfection which has ever been
Dreamed of by those who labored without stint —
Such treasures are not set apart to be
Hoarded by sage historians who sift
Only the dustheaps of Antiquity,
Losing a far more cherishable gift!

I need not ask that Rome be built anew,
Or search the archives of an age gone by,
To read what still is beautiful and true,
Known to another sense, a keener eye
That sees beyond the symbol and the name
Something as changeless and as pure as flame!

—Leslie Nelson Jennings.

It's Sure Sign Spring at Hand

Fort Erie, Ont.—With a nonchalant gesture, last week, A. L. Springland threw his line into a hole in the ice of Lake Erie and hauled out a lake trout weighing a little more than 25 pounds, the first caught at this point in a decade. To prove he was not fooling, Springland caught 30 more smaller fish

A judge has ruled that a slap on the back is erely a "hail-fellow-well met" actoin. Detectives, of course,, have different ideas about this.

A study of "earthquake weather" has been made for the 107 days when earthquakes were felt in the Los Angeles area from 1877 to 1932, and it appears that in the great majority of cases there were no abnormal weather conditions.

Two sets of twins in 11 months is the remarkable record of Mrs. Brown wife of an agricultural labourer of Terrington, St. Clements, Norfolk.

Bull Falls into Silo, Fights Off Rescuers

M'Kean, Pa.—Whether every man's house is his castle or not, Wesley Weaver, a farmer living at McKean, can certify that every bull's silo is his fortress.

A Holstein bull owned by Mr. Weaver got loose in the barn and fell from the barn floor into the silo through the opening used to get the silage out. Although the fall was some fifteen feet, the silage at the bottom broke the animal's fall and the bull was none the worse for his experience save that his temper was aroused. All attempts to get the animal out of the silo pit failed, the bull charging furiously at every one who attempted to enter the silo to fasten a sling around his body so he could be hoisted back to the barn floor again.

It looked as if the bull had a permanent home which he was willing to defend against all comers. Not wishing to tear down the silo walls in order to extricate the animal, straw was thrown into the silo and gradually the silo was filled until the straw was level with the opening into the barn. After which the bull was driven back to his box stall and peace reigned in the barn.

Duchess d'Arcos Is Dead in Rome

Wealthy Widow of Duke Brunetti D'Arcos Leaves Lengthy Will

Rome.—The millionaire Duchess Virginia D'Aarcos, the former Virginia Whitebury Lowery, of Washington, D.C., died of pneumonia at the age of 80 in her magnificent Roman residence, the Brandaccio Palace. She was the widow of Duke Brunetti D'Arcos, who once was the Spanish Ambassador to Washington and Rome.

The Duchess left a will 16 pages long in which she gav $1,000,00 to United States institutions, including hospitals and libraries.

King's Pardon For Wrong Man

Fine is Returned—His Majesty Signs Free Pardon — Unusual Case

London.—John Salisbury Davies is a farmer of Bryneglwys, Denbigshire.

Last July he fell foul of the law. He was fined by the Llangollen magistrates.

John Salisbury Davies, who had pleaded guilty, paid.

Then the law began to scratch its head. Something wrong about the case.

Investigation.

Discovery . . . the prosecution was due to a misapprehension.

Sequel yesterday . . .

British Justice

John Salisbury Davies appeared before the same Bench of magistrates. Alderman Dodd, the chairman, explained the mistake, and proudly presented John Salisbury Davies with a free pardon, signed by the King and the Home Secretary.

The fine was returned.

No Cattle Involved

Kansas City, Mo.—"Jersey vs. Holstein" was not a bull-fight, but the title of a lawsuit filed here after Everett Holstein's truck struck Robert Jersey. The defendant is a dairy man.

THE CANADA STARCH CO. LIMITED. MONTREAL

Now! Ease Sore Throat Instantly!

1 Crush and dissolve 3 Aspirin Tablets in half a glass of water.

2 GARGLE thoroughly — throw your head way back, allowing a little to trickle down your throat.

3 Repeat gargle and do not rinse mouth, allow gargle to remain on membranes of the throat for prolonged effect.

Remember: Only Medicine Helps Sore Throat

Modern medical science now throws an entirely new light on sore throat. A way that eases the pain, rawness and irritation in as little as *two or three minutes!*

It requires medicine—like ASPIRIN—to do these things! That is why throat specialists throughout the world are prescribing this ASPIRIN gargle in place of old-time ways.

Be careful, however, that you get Aspirin Tablets for this purpose.

Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve completely enough to gargle without leaving irritating particles.

ASPIRIN TABLETS ARE MADE IN CANADA

Woman's World

By Mair M. Morgan

The following recipes for frostings are well worth being added to your scrap book for future reference.

Frostings

Frostings belong to two main groups — those which are cooked and those which are not cooked.

1. Cooked Frostings — (a) The so-called Boiled Frosting — a sugar and water syrup poured and beaten into stiffly beaten egg whites; the White Mountain Frosting (the same but with a large proportion of egg white) and the Seven Minute Frosting, for which all ingredients are put together in the double boiler and cooked under constant beating.

(b) The creamy, fudge-like mixtures — any of the candy recipes like maple cream, fudge, divinity fudge, kept a little softer so that they will spread.

2. Uncooked Frostings

Note: Always roll lumps out of icing sugar and sift it.

(a) Plain Confectioners' Icing — liquid, icing sugar and flavoring.

(b) Butter Icing — well creamed ter, liquid, icing sugar, and flavor-

(c) Ornamental Frosting — unbeaten egg white, icing sugar, lemon juice, beaten together until stiff.

(d) Egg Yolk Base — with icing sugar and fruit juices, pulp, chocolate, etc., added.

(e) Almond Icing — prepared almond icing can be bought in tins and if necessary softened with a little egg white or yolk. Real almond paste can be mixed with equal amounts of icing sugar (put through food chopper together) and blended with well-beaten egg yolks for a yellow icing, or with stiffly-beaten whites for a white icing, to give required consistency. (Ornamental Frosting is used over the almond paste.)

BOILED FROSTING

One cup granulated sugar, ⅛ teaspoon salt, 2 teaspoons light corn syrup, 1 or 2 egg whites, 1-3 cup boiling water, ½ teaspoon vanilla (or other flavoring).

Two egg whites make a fluffier icing. Put the sugar, salt, boiling water and syrup over low heat in a saucepan and stir until sugar is dissolved; bring slowly to boiling point and cook without stirring until your thermometer registers exactly 240 degrees F.; if you have no thermometer, test by dipping a fork into the syrup and lifting it into the air; when right, it will leave a long wavy hair-like thread as it drips from the tip of the fork; also, a little syrup dropped into cold water will form a soft ball. Remove from fire; beat the egg white until stiff. Pour the syrup very, very slowly over the egg white, beating constantly. If you want a firm, crisp frosting, begin to pour the syrup over the egg as soon as it stops bubbling; if you want a soft frosting, allow the syrup to cool considerably before pouring it over the beaten egg. Do not scrape the last syrup from the pan. Beat until the icing is of a consistency to spread. A wire beater and flat plate or platter are easiest to use for the egg whites, and to beat in the syrup.

Note—⅛ teaspoon cream of tartar, sprinkled into the syrup when boiling down, may be used instead of the corn syrup to keep icing soft and fluffy.

A good frosting to keep on hand; put in covered jar in refrigerator.

Seven-Minute Frosting Variations

1½ cups white sugar.
2 unbeaten egg whites.
5 tablespoons cold water.
1 tablespoon light corn syrup.

FLAVORING.

Put all but the flavoring into upper pan of double boiler and beat to blend well.

Place over lower pan containing rapidly boiling water and heat steadily steadily with a Dover beater until icing will stand up in peaks when the Dover beater is lifted out — (usually 7 minutes).

Remove upper pan from heat, add flavoring and heat until right for spreading. When cool, pile roughly on top and sides of cake — use as filling, too, if desired.

This frosting should be allowed several hours to set.

VARIATIONS

Either the boiled frosting or the seven-minute frosting may be finished in many different ways.

Colored Frosting — Blend a little pure coloring paste or liquid into a small part of the icing, then mix gradually into the main part; this way, you can be sure to keep it pale enough to be tempting. The egg-white may be colored for the boiled icing.

Banana Icing — Spread sliced bananas thickly over soft frosting, just before cake is to be served.

Chocolate Icing — Add one ounce or square of melted chocolate immediately after adding syrup (in boiled frosting). Grate chocolate over 7-minute icing, and beat in lightly when cooked.

Coffee Icing — Use coffee infusion instead of water as the liquid.

Caramel Icing — Use Brown sugar instead of white.

Maple Icing — Use ½ pound grated maple sugar to replace the sugar. Or flavor the cooked icing with maple flavoring.

Marshmallow — Add 8 marshmallows, cut in pieces, to syrup, just before beating it into egg whites, for boiled frosting. For 7-minute frosting, fold in, when frosting is cooked.

Orange Icing — Add grated yellow rind of one orange just after the syrup has been added to the egg, in a boiled icing — at end, in 7-minute frosting.

Chocolate Glaze — Put 2 squares chocolate over hot water and heat slowly till melted.

Cool a little, keeping free from draughts, then streak over a thick layer and spread with a knife. Allow to cool slowly in moderately warm room, so chocolate won't turn grey.

Gelatine Icing — Soak 1 teaspoon gelatine in 2 teaspoons cold water 5 minutes and dissolve in hot boiled frosting. (This makes it certain that the icing will stand up.)

If Frosting Threatens Failure

If you have a saucepan thermometer to put in your saucepan, you can always make a boiled icing just right, but sometimes it is difficult to cook the sugar to exactly the right degree without a thermometer.

If boiled icing or 7-minute icing seems in danger of failure, you may rescue it:

(a) If to thin, stir in icing sugar to bring frosting to right consistency

(b) If too hard, add a little hot water or soften it with a very little lemon juice, which will turn some of the sugar to glucose, with softening effect.

Plants in the Home

Our homes, according to the Horticultural Division, Dominion Department of Agriculture, are much too warm and dry for most plants, especially during the winter months. High temperatures combined with too little sunshine produce weak, spindly growth, and under such conditions flowering plants often drop their buds. As the home can be modified only to a very slight extent, plants must be chosen that can adjust themselves to such environment. Many failures to grow plants successfully are due to faulty drainage, careless watering, and insect injury. After potting, the plant should receive a liberal watering, and then no water given until needed. Blooming plants require more water than the slowed growing ones such as palms. With a little experience one can tell when plants really need watering. The appearance of the plant, of course, is a good indication of its requirements. A method commonly followed is to tap the pot with the knuckles. If it has plenty of water, the sound is dull; if it dry the pot will ring. Occasional syringing is beneficial, especially for ferns and other foliage plants.

Soften Brown Sugar

If brown sugar lumps, soften it by placing in a shallow pan in a warm oven for a few minutes. Then put it away in a cool place, covered with a damp cloth, to keep it soft and moist until ready to use.

To Separate Glasses

When two glass dishes have stuck together through being packed one inside the other, pour cold water into the top one, and stand the bottom one in hot water, and in a few minutes they will come apart.

Beautify the Home

Following the impetus given by the various horticultural societies throughout Canada in the beautification of Canadian homes, the many resplendent varieties of bulbs and other lovely spring flowers are becoming increasingly popular in the Dominion. After a long monotonous winter they appeal to man's primitive love of rich colours in a degree seldom equalled by the floral glory of later seasons. Every spring one of the most gorgeous displays of colour that it is possible to create is to be seen at the Dominion Central Experimental Farm, Ottawa, where frequent inquiries as to the culture of these flowers are received and willingly answered, together with other valuable information on the floral beautification of the home. From the "More Beautiful Canada" committee of the Canadian Horticultural societies, and from all the Dominion and Provincial experimental farms and stations, anyone desirous of beautifying the home may obtain useful and practical information.

In Memory

$1,100,000 Towers Is Dedicated to Parents of Lord Vestey

Liverpool, Eng.—In memory of their parents Lord Vestey and his brother Sir Edmund, probably the biggest figures in the world's chilled meat trade, are donating $1,100,000 for construction of the 327-foot central tower of the great New Liverpool Anglican Cathedral.

The tower forms the crowning feature of the magnificent design of Sir Giles Scott distinguished architect of the cathedral, and the gift will hasten completion of the entire structure by many years.

Now controller of the Great Union Cold Storage Company and head of a steamship line Lord Vestey, with his brother once ran through the streets of Liverpool as messenger-boys at $1.50 a week. The new tower will overshadow a school where the brothers were educated. They were the sons of Samuel Vestey of Liverpool.

Frozen Hard

Unlikely Lake Shpping Will Open Before May 1 This Year

Sault Ste. Marie, Ont.—The second summary of ice conditions on the Great Lakes, issued here recently, gives little indication that conditions have improved sufficiently for navigation to open before the first of May at the earliest.

The ice in St. Mary's river is 23 inches thick and solid, 30 to 36 inches thick in the lower end of Whitefish Bay and 10 to 24 inches thick near the end of the point. There are still 44 inches of ice in Georgian Bay, which is completely frozen over, and 20 to 30 inches of ice at Parry Sound harbor.

In Lake Huron the ice extends beyond vision along the east shore, in Saginaw Bay and in the region about Alpena, with depths ranging from 13 to 24 inches. At Oscoda there is no ice in the river, and only a few distant "icebergs" are sighted.

Two U.S. Railroads Loaned $2,366,531

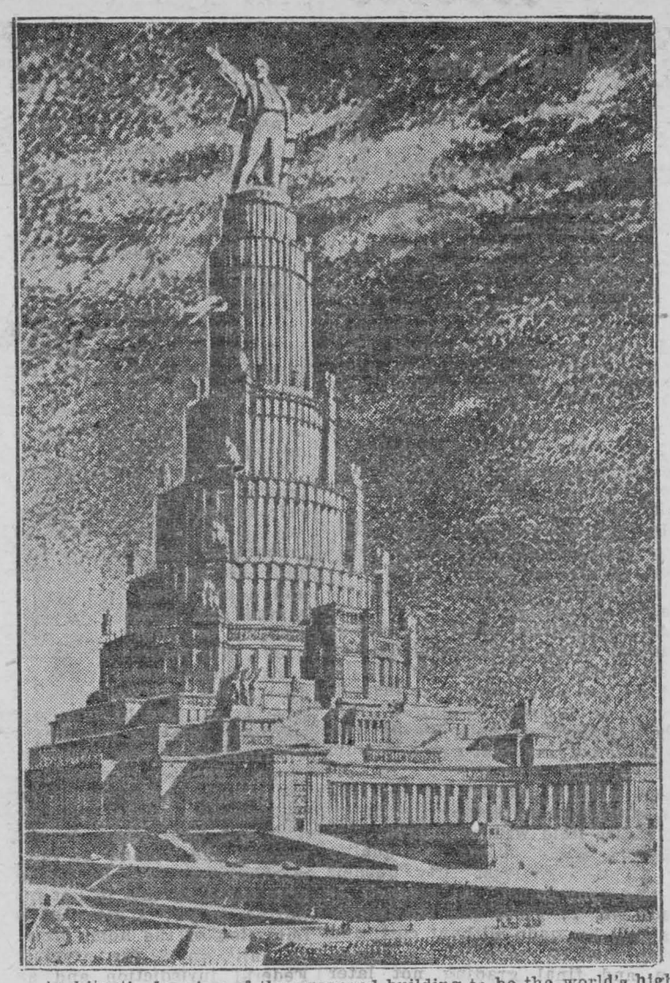
Washington.—Two additional loans to railroads totalling $2,366,531 for new equipment and maintenance were announced recently by Harold Ickes, United States Public Works Administrator.

The Chicago, Milwaukee, St. Paul and Pacific was loaned $1,966,531 for building 75 new passenger cars, air conditioning of 22 diners and lounge cars and installation of 300 loading devices on automobile cars. The New York Central was loaned $400,000 to pay track men in laying 37,000 tons of rails and fastenings.

Air-Conditioning Increases

Chicago—Air-conditioning is increasing rapidly in Chicago, according to an annual report of the Commonwealth Edison Company. In 1933, the report says, 130 permanent air-conditioning installations were added to the company's electric power system.

U.S.S.R's. Bid For Highest Building



Architect's drawing of the proposed building to be the world's highest, recently accepted by the central executive committee of the U.S.S.R.

Are You Guilty Of These Crimes?

All About a Thoughtless Visitor Who Hindered Rather Than Helped Her Hostess

The telegram announcing her arrival brought a puzzled frown to the brow of the busy housekeeper. For a moment the name of the sender meant nothing to her. Then she recalled the one-time school-mate, a somewhat selfish and inquisitive girl for whom she had felt no great affinity, in their casual contacts, and little real regret at parting. Now she experienced a slight feeling of anger at this uninvited guest, who was doubtless making a convenience of her; but this soon passed, as more hospitable feelings gained control.

The train upon which the guest was expected to arrive pulled into and out of the station, but the guest was not there. The weary woman who had waited for her turned homewards, striving to make up for lost time by simplifying her plans for the evening meal. Just as the family had reached the dessert stage, the missing traveller was announced by the honking of an auto horn.

"I got off the train at the other station," she offered gaily. "I saw a friend on the platorm, and as I wanted to speak to her, I thought I might as well get off there and taxi over."

She offered no apology for her thoughtless change of plans. Her utter disregard of every one's convenience but her own on this occasion was symbolic of her attitude all through her lengthy visit.

The meals became a burden to the hostess, because "I cannot eat this," or "I must not eat that," became a familiar cry three times a day, and yet another burden was laid on weary shoulders: "What can I cook, or afford, that she will like?"

And after each meal, when the busy housekepeer attacked the great piles of dishes—for she did her own work — the guest was there, in the middle of things hindering where she was under the impression she was helping, misplacing articles, to the despair of the hostess when the time came to prepare the next meal, and continually talking about herself and her affairs, or about people whom her long-suffering hostess, approaching every moment a little nearer to distraction, never saw and had no desire to see. ....

It was the pride of this hostess to have all her rooms in order early in the day, and no matter at what hour she chanced to pass her guest room door, disorder prevailed. She averted her eyes that she might not see the littered wearing apparel of all kinds, on tables, chairs and floor, while the lop-sided bed suggested nightmares.

"I just won't make her bed," she said to herself, with the daring which even the trodden worm displays. What was the use of trying to keep anything tidy in a room which always looked as though a cyclone had struck it?

"If she would keep all her belongings in her room, I could stand it!" the hostess sighed to sympathetic ears. "But she drops something every time she moves, and scatters things over every room in the house!" And sighed wearily as, in order to preserve some semblance of tidiness, she gathered up a collection of books, papers, fancy work and knitting and carried them upstairs to their owner.

But it was in the bathroom that the guest "got in" her most remarkable moves! She was quite without the discrimination which teaches what is meant for family, and what for personal use in a bathroom. Bath salts, wash cloths—she made use of everything.

Her favorite time for a long-drawn-out btah was just in the middle of the carefully prepared morning schedule whereby each member of the family was governed, and which gave all the benefit of a regular bath. If she was aware that a son or a daughter had nearly exploded with impatience, and was finally obliged to go off bathless to work or pleasure, she made no sign. She simply could not learn to take her bath when the bathroom was not in demand.

And she was the personification of curiosity about matters which did not concern her in the least. She noticed and commented on the slight dust in the corner, the finger prints on the bannister, the sullen fire, the children's noise. In fact, nothing, large or small, escaped that eagle eye.

And just where a guest might make herself most appreciated, she failed miserably. She made no attempt to enter into the moods of her hostess and family, to be silent when they were thoughtful, ready to converse when they showed themselves so inclined. She could not merge herself into the household atmosphere, be content to read or occupy herself with her own thoughts or her own work. An unceasing stream of meaningless talk made concentration impossible.

No member of that long-suffering household felt or even pretended to feel regret when at length she announced her departure. Too sincere to offer objections, even at the risk of seeming inhospitable, the hostess gently but firmly paved the way, and finally bade her a kindly farewell.

Not so easily, however, was this family to get rid of the obnoxious visitor. Seated at the first meal they had really enjoyed for many days, they were transfixed with amazement when a too familiar voice called out gaily through the open door:

"Missed my train, Good People!"

Swift's at Edmonton Raise Wages 10 p.c.

Edmonton, March 18. — Some 325 hourly-paid employes of the Edmonton plant of the Swift Canadian Company, Ltd., have received a wage increase of 10 per cent., effective at once, G. T. Robertson, manager, announces. The increase will add about $25,000 annually to the company's payroll.

Population Growth Low in U. S.

New York—Gain in the population of the United States last year is estimated at 797,000 in a report of the Scripps Foundation for Research in population problems.

The population on Jan. 1, 1934 totaled 126,144,000, the report estimated, with the .6 per cent. gain lower than any year except two since 1870.

If population growth continues to become smaller as rapidly as during the last decade the Foundation said, it will cease entirely about 1940, when the country will have less than 130,000,000 inhabitants.

Seattle—A lot of mothers in this city and all over the United States will have a holiday Tuesday.

Their daughters are to do all the housework. It's one of the ways some 2,500 girls are celebrating the 22nd birthday anniversary of the Camp Fire Girls.

Seven Women Finish Prospector's Course

Honor Graduate of Toron to University Actually Out in Mining Field

There is one woman prospecto in Manitoba, who is actually out i the field. This is Miss Kathleen Rice an honor graduate from Toronto Uni versity, who is located at Herb Lake She has a team of huskies, wear hob nailed boots and a real pro spector's outfit, and is equipped t look after herself in the wilderness.

But there are seven other women who have completed a prospector's course in the geology department, a the University of Manitoba, with 15 men. One of these, Mrs. G. M. Brownell, said she took the shor course because she was interested i geology and wanted to make herse better acquainted with her husband' specialty. When Dr. Brownell men tions at dinner, on future occasions that so-and-so has staked a claim, o that operations are to begin on new mine, his wife will be able t say something besides a mere, "Oh," and then ask if his coffee is all right

One of the teachers graduating taught near Gypsumville, where sh satisfied her curiosity about fossil and rock formations, and added a lo of mining terminology to her vo bulary. Other teachers said that th prospectors' course attracted them because their students were alway bringing in rock and stones for identi fication.

None of the women have any in tentions at present of going off an roughing it as a prospector. There is some talk, however, of an expedi tion in the spring, for a little prac tical field work.

Asked if it was a women's course i any way, some of the members of th class replied that a woman's power of observation and discriminatio undoubtedly aided her in the identi fication of minerals. The examination consisted in part of the naming of 6 minerals, a knowledge of which i necessary before anyone calling her self a prospector could attempt to dis cover a field where gold or othe minerals might be found. As one o them put it, "a woman is ued to look ing into things."

Everyone who lives in Winnipeg said others, should know Tyndal stone when they see it, with so many banks and office buildings made o this Manitoba mining product. "When I go by the auditorium or the Parliament buildings now," commented one girl, "I always scan the wall for fossils. The buildings mean something to me now, since I took the prospector's course."

MUTT AND JEFF— By Bu

Mutt Is No Piker When On "Location"

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Dehorning Cattle

Experience has proved the great advantage from every standpoint of dehorning commercial cattle, and a great benefit would accrue to the live stock industry if all commercial cattle were dehorned. Every effort should therefore be made to attain this object, and it more than merits the active support and co-operation of the press, and all institutions and organizations interested in the live stock industry to encourage the practice of dehorning all horned commercial cattle between March 15and April 15 or during the month of October.

Champion Egg Eaters

Although compared with some other countries, the per capita consumption of poultry in Canada is relatively low, Canada retains the egg-eating championship, with 28.36 dozen eggs consumed per head of population in 1932. While the average consumption of poultry by each inhabitant of the United States in that year was about 18 pounds, of which 7.E pounds were hens and chickens. Altogether, 112,241,206 pounds of poultry and eggs has been relatively well maintained. In June last year; according to the bulletin, "The Agricultural Situation," issued by the Dominion Department of Agriculture, the number of hens and chickens on farms in Canada was 54,943,000.

Soft Bacon

The further expansion of our bacon trade with reat Britain depends to a large extent upon quality improvement. Recent advices from the British market criticize our supplies on the score of underfinish in a large percentage of bacon sides, as indicated by softness and flabbiness. This soft, flabby bacon is most likely the product of underfinished hogs, of which there are considerable numbers being marketed at yards and plants in Canada at the present time. The remedy lies with the producer in holding back unfinished hogs. In most cases, another week or so on feed would put on the finish so necessary for the making of firm bacon. All hogs of bacon and select weights should be properly finished at their weights. Underfinish is as detrimental as overfinish, and in this case is a very serious obstacle to efforts being made to popularize Canadian bacon with the British consumer. Every hog raiser is asked to co-operate to the best of his ability.

Raspberry Plantations

Where manure is not applied to raspberry plantations until the spring, a cover crop is also advisable to prevent too late growth of cane. As the advent of mosaic disease is making it advisable to renew plantations more frequently, the grower who is unable to get large quantities of manure will find that shorter rotation lends itself more to the cover crop and mulch system, for each new plantation may be preceded for a season by a crop of clover or alsike which when turned over, will leave the soil in excellent condition for the new plantation. This method of renewal, say every six years, with proper green manuring, cover crop or mulch, and adequate quantities of commercial fertilzers, wil rendeir it possible for raspberry growing to take its place beside orcharding, in being more or less independent of the failing and increasingly expensve supply of manure.

New Egg Grades

The revsed Dominion egg grading regulations recently passed at Ottawa are now in force in Ontario for all shipments. The former grade names of fresh specials, fresh extras firsts, seconds, pullet extras, etc. etc., have been changed to A-1, A, B, and C, with different weight classifications within each grade.

The chief purpose of the revision is to enable the farmer to be paid on a suality basis, as well as make it possible for the consumer to tell what he or she is buying. Producers are allowed eight eggs per halfcase under grade on examination and suitable penalties are made for any infringement.

Hog Outlook Favourable

While it is likely there will be some temporary price declines during the present year, the trend of hog prices appears upward. Market supply prospects are for a moderate volume during the first half of the year, followed by a fairly substantial increase. Prospects for export appear to be satisfactory, and the restrictions existing on exports from foreign countries selling to the British market are working suite favourably toward stabilization of prices. Despite the present favourable export otulook, improvement in breeding, feeding, selection and processing so as to secure a large percentage top grades of bacon is much more desirable than a marked increase in general production.

More Than $2,000 in Prizes Offered For Malting Barley

This Province is ideally suited to the growing of first-class malting barley and, with the purpose of encouraging the efforts of Ontario farmers in producing this crop, the Ontario and Quebec Brewing Industry has offered prizes amounting to well over two thousand dollars. This was the recent announcement of Hon. Thomas L. Kennedy, Minister of Agriculture for Ontario.

All Ontario farmers will be eligible for competition, and the media used for exhbiiting will include the Winter Seed Fairs, Combined Field Crop Competitions, and the Fall Fairs, sixty of whicihi hiaveiiii;1? Fairs, sixty of which have already been selected.

Prizes at the Winter and See Fairs will total some two hundred and fifty dollars. Combined Field Crop competitions have been allot ted over one thousand dollars; and Fall Fairs a similar amount. Such prizes and details of competition will be under the administration of the Superintendent o Agricultura Societies, J.A. Carroll, Parliament Buildings, Toronto.

In connection with the Field Crop Competitions, societies have been chosen in areas particularly well suited to producing the desir d quality of barley.

All competitors must be paid-up members of an Agricultural Society. There must be at least ten entries and not less than eight crops inspected. It is further required that only Registered O.A.C. No. 21 Barley be sown, and that the minimum acreage be five acres. In case where a field entered for competition comprises more than five acres, the entire field will be judged.

Before a competitor can qualify for a prize, at least fifty bushels of the crop must be cleaned to Grade No. 1. Field and bin inspection will be made without cost, and barley must be ready for bin inspection and final grading not later than December 1. Prizes in each competition will be awarded as follows: First, $30; second, $25.; third, $20.; fourth, $15.; fifth, $10.; sixth, $5.00.

Winter and Seed Fairs will include Guelph Winter Fair, Ottawa Winter Fair, South-Western Ontario Corn and Seed Exhibition at Chatham, Quinte District Seed Fair, and the Ottawa Valley Seed Fair. At each of these exhibitions, fifty dollars will be distributed in prizes. Eighteen dollars in prize money has been alloted to each of the Fall Fairs, or a total of ten hundred and eighty dollars.

No exhibitor may win a prize at more than one Fall Fair. This, however, will not debar the exhibitor from competing at one of the large seed shows or winter fairs. Barley will be judged on its suitability for malting, not for seed. The points desired in barley for malting, in order of relative importance, are soundness, size and uniformity of kernel; freedom from other grains and freedom from weed seeds and inert matter.

Concluding his remarks on this subject, Col. Kennedy said: "While I heartily endorse any movement designed to encourage Otnario farmers, the action of the Ontario and Quebec Brewing Industry should have an even more important result than only raising the standard for malting barley. I look for a definite improvement in all Ontario barley; wether grown for malting feeding, or any other purpose."

THE ONTARIO LEGISLATURE

The Henry overnment scored their third overwhelming vote of the session when the House divided on carrying the budget by 79-19 this week.

In concluding the debate for the overnment, Premier George S. Henry delivered a smashing defence upon opposition criticism on several issues, particularly in connection with the recent $40,000,000 loan flotation. Again the Premier drew comparison with the loans floated by the Drury administration, under which the Premier charged their friends had benefited, while under this loan the Government had obtained the lowest rate of any loan floated in over twenty years.

With the same vigorous argument, the Premier challenged both Progressive Leader Nixon and Dr. L.J. Simpson, Liberal, Centre Simcoe, Liberal financial critic, to say whether they approve of the policy of Liberal Leader Hepburn to dismiss civil servants in wholesae numbers should they be returned to power. Dr. Simpson held that political members of the Hydro Commission should be dismissed, for being allied with the Conservative party. To this Premier Henry defended the Government's policy in having retired one former commissioner who had failed to agree with the policies laid down by the late Sir Adam Beck.

Upon the division being registered, the House went into committee of supply to consider the estimates totalling $37,167,519, which are a slight advance over last year. The Premier drew long applause when he announced there would be no supplementary estimates, which is the first time in 21 years this has been accomplished.

On a similar division, the Government was also sustained on the issue of use of dogs in hunting deer, the division being requested by D.J. Taylor, Progressive, North Grey, thus maintaining the present law prohibiting the dogs.

Attorney-General W.H. Price introduced the Government wider sale of beer and wine policy in amendments to the Liquor Control Act. The measure provides for sale of beer and wine with meals in dining rooms in standard hotels, and at the option of the Liquor Control Board may include restaurants and clubs. It also provides for sale of beer by the glass in refreshment rooms in standard hotels, and in veterans' and labour union clubs.

Supplementary legislation likely to be introduced will empower the Liquor Control Board, it it deems it advisable, to make it unnecessary to have a permit to purchase beer and wine or either of them as is carried out under the present ,iquor law.

The act will not be brought into force until proclamation, which is interpreted to mean not until after the provincial election.

With a view to establishing control on the measure, the amendments lay down several drastic stipulations. Only British subjects may secure licenses, or as the act terms the privilege "authorities". No authority is issued to any one interested in breweries or wineries, neither will sale be permitted to any one on premises who are minors or intoxicated persons. No bars are to be erected. No packages of beer may be removed from authorized sale premises, and no slot machines are to be operated therein. "Notoriously bad characters" are not permitted on premises.

The Board is given power to designate the premises to be used as refreshment rooms; where rooms are to be located; what and how much beer and wine are to be sold, and the periods of the year, days and hours when they may be sold served and consumed. Holders of permits or authorities must keep books, file returns to the Board.

Attorney-General Price, in introducing the bill, said that the measure is an aide to temperance and sobriety, pointing out that the free distribution of beer and wine would mean a further decrease in the consumption of spirituous liquors and an increase in the consumption of beer and light wine. It would also remove the feeling of the average working man that he has been discriminated against in not being permitted to buy a glass of beer; elimination of the home-brew menace as built up in the province under Federal jurisdiction and authority.

The bill, Col. Price pointed out, also maintains the Local Option clause as included in the present act, but they will be extended so that Local Option districts may vote on whether they want beer and wine in dining rooms or beer in refreshment rooms. Authority for permitting liquor advertising in newspapers and by radio and to grant permits for consumption for beer and wine at banquets is now vested in the Board.

"Liquor consumption in the province has dropped from the peak year of 1929 from $55,000,000 to $30,-000,000—in 1933," said Col. Price. "The greatest reduction has occurred in spirituous liquors, a much smaller reduction in the consumption of beer, while the consumption of wine has decreased very little. Itis anticipated that with a freer distribution of beer and wine there will be a further decrease in the consumption of spirituous liquors and an increase in the consumption of beer and of light wine."

"Nearly 175,000 home brew permits granted by the federal authorities have presented a menace which had to be met," said Col. Price. "This act puts the control of the consumption of beer back in the hands of the board and should be an aid to temperance and sobriety."

Premier Henry agreed with the resolution tabled by A. Russell Nesbitt, Cons., Bracondale, that some action should be taken into the charge that practically racketeering exists in the sub-letting of contracts by contractors to the detriment of those employed. The Premier agreed that the Labour committee should be called to deal with the matter.

PAYNE VALLEY

Mr. and Mrs. Kennie Cameron called at Mr. and Mrs. Harris Rupert's recently.

Mr. and Mrs. Dan Campbell, Mr. and Mrs. George Eligh and Master Boyd Stephenson spent Thursday evening for tea with Mr. and Mrs. Jas. Benning and family.

Miss Helen Richards of Avonmore spent Tuesday evening with Miss Mabel Campbell.

Mr.and Mrs. Len Thompson and daughter spent one evening recently with Mr. and Mrs. Jas. Benning and family.

Mr. Josh. Rupert of Newington called at Mr. Harris Rupert's on Wednesday.

Mr. and Mrs. Leonard Cameron and family of Dixon spent Tuesday with the former's sister, Mrs. Harris Rupert and Mr. Rupert.

Mr. and Mrs. George Eligh and Master Boyd Stephenson called on Mr. and Mrs. Guy Empey and Mr and Mrs. Jim Eligh, Finch; also Mr. and Mrs. Abe Eligh and family at Newington.

Miss Jean Rupert, Newington, spent a few days recently with her brother, Mr. Harris Rupert, and Mrs. Rupert.

Mr. and Mrs. Harris Rupert were in Avonmore on Wednesday, and spent the evening for tea with Mr. and Mrs. George Eligh.

Mr. Clifford Schwerdfeger, Northfield, called in our Valley on Tuesday.

Mr. Cora Eligh is busy hauling hay from his uncle George's to North Valley.

Mr. and Mrs. J.D. Shaver and family were recent visitors of Mr. and Mrs. Willard, Finch.

Mrs. Dan Campbell called on Mrs. Alex McMillan recently.

Mr. and Mrs. Clifford Eligh spent Sunday with Mr. and Mrs. George Eligh.

Mr. Percy Rutley, Newington, was calling in our Valley on Wednesday.

Mr. and Mrs. Cora Bush and grandchild, of Dixon, spent Monday with Mr. and Mrs. Kennie Cameron.

Mr. and Mrs. Albert Bush spent Sunday with their son John, and Mrs. Bush, Finch.

SECOND AVENUE

Mrs. Arthur Henry has returned home, after spending the past week with her daughter, Mrs. Geo. O'-Shaughnessy, Hoasic.

Mr. Dan Durant called at Mr Harold Dillabough's on Friday.

Mr. Neil Epaugh spent the week-end with friends at Cornwall.

Mr. Ferguson Froats is spending a few days at the home of Mr. Charlie Hart.

Mr. and Mrs. Wm. Baker were in Aultsville one day last week.

Misses Lola Henry and Ada Dillabough and Mr. Ernest McIntosh spent Friday evening with Mr. and Mrs. Charlie Hart and family.

Mr. Neil Epaugh spent a short time with Mr. Melvin McIntosh on Friday evening.

Mr. Earl Droppo and daughter Reta spent a few days last week with friends at Finch.

Mr. John Berton spent Thursday at Riverside.

Mr. Clifford Hart of the M.C.I. spent the week-end at his home.

Mr. and Mrs. Wm. Casselman spent the week-end at the home of Mr. A.J. Henry.

Mr. Geo. Gow spent Sunday at Mr. Josh. Fetterly's, Grantley.

Mr. and Mrs. Percy Prunner spent Sunday at Riverside.

CEDAR GROVE

Mr. and Mrs. Jack McConnell and Miss Marion, of Gallingertown, were guests of Mr. and Mrs. Frank McConnell Friday.

Mr. Earl Hollister, 2nd Con., was a caller at the home of Milton Crites on Friday.

Mr. and Mrs. Frank Donnelly of Louisville Landing, were recent guests of Mr. and Mrs. Mason Beckstead.

We are sorry to report Miss Della Wells on the sick list.

Mr. Harry Martin, of Nyack, N.Y., was the guest of Mr. and Mrs. W.A. Wereley for a few days last week.

Mr. and Mrs. Harold Anderson Second Concession; Mr. and Mrs Ernest Stiles and Miss Elva visited Mr. and Mrs. Fred Dafoe Wednesday evening.

Miss Gertrude Watson of Lunenburg, who spent last week with Mr. and Mrs. Fred Dafoe, returned to her home Friday.

The assessor, Mr. Geo. Brownell of North Valley, paid his annual visit to this vicinity Friday.

Mr. Garnet Gallinger, Miss Fern Gallinger and Mr. Charlie McConnell of Aultsville, visited Miss Muriel McConnell on Saturday evening.

Mr. and Mrs. Mason Beckstead spent Thursday with Mr. and Mrs. Ross Schwerdfeger, Froatburn.

PLEASANT VALLEY

Miss Viola Somerville returned home, after spending the past few weeks at Ottawa.

Mr. Garnet Fader and sister Lula visited Mr. and Mrs. H. Wallace on Tuesday.

Mrs. Violet Kearns spent an afternoon recently with Mr. and Mrs. Frank Davidson.

Mrs. Geo. Hess spent an afternoon recently with Mrs. Alex Francis.

Mr. and Mrs. H. Wallace and son visited Mr. and Mrs. Orville Selleck, Groveton, on Friday.

Messrs Delbert Murdock and Jas. Cowan called on the latter's sister, Mrs. J. Payne, Groveton, recently.

Mr. Wm. Farrel sundayed at Melvin Collison's.

Miss Zelma Gilmer, and Miss Nelda Fader of Iroquois, spent Sunday with the former's parents and the latter's grandparents, Mr. and Mrs J.A. Gilmer.

Mr. and Mrs. John Briggs of Hanesville were Sunday guests of Mr. and Mrs. H. Gilmer.

On Sunday morning, Mr. George Hess received work that his younger brother, Mr. Jas. Hess of Heckston, was seriously ill. We hope Mr. Hess will soon be better again.

Mr. and Mrs. Thos. Gilmer spent Saturday with their daughter, Mrs. Johnson Cleland and Mr. Cleland of South Mountain.

Mr. and Mrs. H. Wallace and baby visited the latter's parents, Mr. and Mrs. Wm. Fader and family, of Hanesville.

CHEVROLET STANDARD SIX FOR 1934

The Chevrolet Standard Six for 1934, lowest priced of all Canadian cars, yet very similar to the famous Master Six, is announced by General Motors Products of Canada Limited.

The new Standard Six has a wheel base of 107 inches, longer and wider Fisher bodies, and a greatly improved 60-horsepower motor. The resemblance to the Master Six is easy to follow in the slanting radiator, the smart horizontal hood louvres, the deep-skirted fenders extending well over the tires, and covering chassis construction. The new Fisher bodies have the exclusive Fisher No-Draft ventilating system and many comfort and luxury features.

An ideal car for the fleet user and commercial traveller, the new Standard Six is not only economical from the standpoint of first cost, but also in respect to maintenance and operation. As a companion car to the Master Six, it is sure to have a wide appeal among buyers who want a well-built and economical car in the lowest-priced bracket. Models available are the five-passenger regular coach, four-passenger roadster with rumble seat, five-passenger special coach, and the two-passenger coupe.

The Standard Chevrolet is being built with the highest possible Canadian content. All cars bearing the Chevrolet name are built of the same materials with the same precision and fine craftsmanship and on the same manufacturing and assembly lines of General Motors of Canada, Limited, as a Master series.

The engineering resources of Chevrolet have been directed from year to year toward the perfecting of the valve-in-head engine, with the result that the 1934 Chevrolet valve-in-head power plant is the most efficient and economical engine ever produced by Chevrolet placing it in a position of mechanical excellence far above that of any engine in the low-priced field.

Some of the features which contribute toward this improvement are the new intake manifold and carburetor, new thermostatic heat conrol and new four-point cushion-balanced engine mountings. Sixty h p is developed at 3,000 R.P.M. and a feature of the performance is the smooth acceleration at all speeds.

The Octane Selector is a featur of Standard Chevrolet equipment. This device permits the use of all types of gasoline with the greatest efficiency from the gasoline selected without engine knock.

Improved Huck-type brakes are used and the braking area has been increased. Front and rear treads are now each 56 inches. Another chassis improvement is noted in the stabilized front end construction.

There have been several major changes in the 1934 Fisher bodies on the Chevrolet Standard Six, all of them adding material strength. As a protection from rain or snow when the no-draft ventilators are open, a trough has been placed at the top of each front door immediately above the ventilator, so that it may be opened two or three inches without admitting moisture when the car is in motion. The screened cowl ventilator now opens toward the windshield, assuring improved ventilation through the cowl.

There are many luxury items in this low-priced car; the sun visor is adjustable to the front or the side, and models have rear vision mirror, windshield wiper, dome light, and pocket. Closed models are wired for radio.

LOW COST OF HYDRO SERVICE

In 1932, the last year for which comparative figures are available, all the domestic consumers served by Hydro municipalities used an aggregate of 740,000,000 kilowatt-hours, for which they paid the aggregate sum o f$11,676,000, or an average cost, inclusive of all charges, of only 1.57 cents per kilowatt-hour. According to United States census figures for 1932, the domestic consumers served by privately-owned utilities in that country paid an average of 5.60 cents per kilowatt-hour.

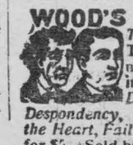
It is a simple matter to compute that, if Ontario Hydro domestic consumers had had to pay, for the 740,000,000 kilowatt-hours they used in 1932, as much per kilowatt-hour as United States consumers paid, their bills would have aggregated the vast sum of $41,490,000, or nearly $30,000,000 more than the amount their electricity actually cost them under Hydro service.

A similar computation for the years 1914 to 1932, inclusive, based on actual Hydro records, as contrasted with costs per kilowatt-hour in the United States as set forth in the Congressional Record and in the American Year Book, indicates a difference between the result of applying United States per kilowatt-hour to quantities of electrical energy used by Ontario Hydro, domestic consumers, and the actual Hydro charges paid by the Hydro consumers of more than $250,000,000.

Such figures serve to emphasize the real achievement that the Hydro undertaking has accomplished in reducing costs per kilowatt-hour to the consumer as compared to costs paid elsewhere, and show that very large sums of money result from applying the difference in costs per kilowatt-hour to the tremendous quantities of electrical energy used by Ontario's Hydro domestic consumers.

Even if it be recognized that the probable effect of attemping to charge in Ontario at the rates prevalent elsewhere would have been to prevent Ontario consumers from using as much electricity as they actually did under the low Hydro rates in force, the fact nevertheless remains that Hydro has probably saved **in actual cash** to Ontario consumers many tens of millions of dollars, and it has, in addition, made possible the enjoyment of comfort-giving and labour-saving appliances on a scale that but for low Hydro rates would have been beyond the reach of a large proportion of Ontario consumers.

WOOD'S PHOSPHODINE.



The Great English Preparation Tones and invigorates the whole nervous system, makes new Blood in old Veins. Used for *Nervous Debility, Mental and Brain Worry, Despondency, Loss of Energy, Palpitation of the Heart, Failing Memory* Price $2 per box, 3 for $5. Coleman Mantles ARE BUILT TO LAST LONGER

The amount of light you get from your gasoline lamp or lantern depends largely upon the kind of mantles you use. To be sure of longer service, better light and more light, always use genuine Coleman Mantles on Coleman Lamps and Lanterns.

Coleman Mantles are scientifically made. They are correct in size, design and texture. No side seams to split. Reinforced across bottom. Saturated with highest grade light-giving chemicals. They are made stronger to last longer.

Look for the name "Colem[illegible] stamped on each mantle. Alw[illegible] ask for the genuine. (MX15)

Our Correspondents

WILLIAMSBURG

Mrs. R.C. Casselman was a guest of Mrs. Geo. Wingard on Sunday.

Miss Alice Eastwood returned home last week, after having spent some time visiting friends at Syracuse, N.Y.

Mr. and Mrs. Hubert Trickey were guests on Sunday at the home of Mr. and Mrs. Alfred Shaver at Rowena.

Messrs C.W. Norval and Wilbert J. Johnston spent a few days last week in Montreal. Mr. Johnston returned home with a new Chevrolet automobile.

Mrs. Wesley Reddick and Mrs. F. Starbird of Morrisburg were recent guests of their cousin, Mrs. Jas. D. Becksted at the Dominion Hotel.

Mr. Sam Telford of Morrisburg was a guest on Sunday at the home of Mr. and Mrs. Isaac J. McIntosh.

Miss Nettie Thom, R.N., of Elma, is nurse in charge at the home of Mr. and Mrs. P.E. Beckstead. We regret to report that Mr. Beckstead is seriously ill.

Miss Marion Adey was a recent guest of Miss Phyllis Graybiel.

Little Donald McIntosh, son of Mr. and Mrs. Strader McIntosh, had the misfortune last week to fall while playing on the ice. The result was a dislocated collar bone. At time of writing he is gaining nicely.

Miss Vena Whitteker was a week-end guest of Mr. and Mrs. Augustus Whitteker.

Mrs. Merton Saddlemire entertained a number of ladies at her home last Thursday afternoon and evening. The occasion was the quilting of a quilt in aid of the W.M.S. of the United Church. The guests were: Mrs. Mary Shannette, Mrs. Wilbert Shannette, Mrs. A. Webb, Mrs. Howard Saddlemire, Mrs. Allen Becksted Mrs. Earl VanAllen, Mrs. Kennett Becksted, Mrs. Stanley Saddlemire, Mrs. Grant Cougler and Mrs. Jacob Garlough. A six o'clock dinner was served, after which games and music were enjoyed for a couple of hours.

Mr. and Mrs. Byrtle Hess and Miss Francis Cooper took advantage of the excursion fares to Montreal, and spent the week-end with Mr. and Mrs. Douglas Locke.

Miss Mabel Merkley was a visitor of friends in town last Tuesday.

Mrs. Peter D. Schell of Froatburn was a recent visitor at the home of her daughter, Mrs. Stanley Forward.

Mr. and Mrs. Augustus Whitteker were recent guests of Mr. and Mrs. Harvey McIntosh at Dundela. We regret to learn that Mr. McIntosh has been confined to his home through illness, all winter.

Mr. and Mrs. Jacob Garlough entertained the following guests at their home recently: Mr. and Mrs. Frank Merkley and family, Mr. and Mrs. Mahlon Merkley, Mrs. Ellen Merkley and Miss G. Mae Merkley. The occasion was in honour of Mrs. Garlough's birthday. A sumptuous turkey dinner was served, after which an enojyable evening was spent in games and music. On departing for their respective homes the guests wished Mrs. Garlough many happy returns of her natal day.

Mrs. R.C. Casselman and Mrs. Agnes Merkley visited Miss Emma Casselman last week.

Mr. Roy E. McIntosh spent Wednesday at the home of his brother Mr. Bernice McIntosh, Elma.

Mr. John E. McIntosh of Queen's University, Kingston, is expected to spend the week-end with his brother Mr. Strader McIntosh.

Mr. Phil Strader, a student of O.A.C., at Guelph, is spending the Easter holidays at the home of his father, Mr. R. Bruce Strader.

On Friday night, April 6th, in the schoolroom of the United Church Williamsburg, a play entitled "Here Comes Charlie" will be presented by the Young People's League.

The announcement was made this week of the purchase by Gandy and Dumser of Cornwall, of Ryder's restaurant in Williamsburg. This latest acquisition will be conducted in connection with the firm's other businesses, Locketon Lodge Dining Room and the Cornwall Coffee Shoppe at Cornwall.

BRINSTON

Died—At Irena, on Saturday Mar. 24th, William John Sweeney, in his 78th year. The funeral was held on Tuesday March 27th, at 9.30 a.m from the residence of his son, Frank Sweeney, to St. Anne's R.C. Church at Dixons Corners, after which the remains were placed in Dixons Corners vault, awaiting burial in the spring in the R.C. cemetery.

Rev. and Mrs. Tuttle of Heckston spent Monday at the parsonage here.

Miss Stella Ennis of Johnstown spent the week-end at her home here.

Special Easter service will be held in the United Church here at 7.30 p.m. Easter Sunday.

Mr. Forrest G. Wallace, who has been spending some weeks in Ottawa is at present at his home here, and intends helping his father for some time.

Mr. Oscar Barkley and Miss Audrey, Boucks Hill, were guests at Mr. Roy Styles' one day last week.

Mr. and Mrs. W. Murray Styles and children spent Sunday evening at R.J. Schwerdfeger's.

Messrs R.J. Schwerdfeger and Albert Bowman were callers in Williamsburg on Monday.

Born—To Mr. and Mrs. Pat. Chassoni, on Wednesday March 14, a son.

Mr. Wm. Dafoe was in Winchester on Monday.

Mr.and Mrs. Wm. Barkley, Boucks Hill, were recent guests at Mr. Roy Styles'.

Mr. and Mrs. Roy Styles spent Monday evening at Mr Stanley Saddlemire's, Glen Becker.

Mrs. W. Murray Styles spent a couple of days this week with friends at Iroquois.

Mr. and Mrs. Ernest Schwerdfeger spent Friday with friends at East Williamsburg.

Born—On Tuesday March 27th, to Mr. and Mrs. Ernest Schwerdfeger a son.

Miss Nellie Barkley, Glen Becker spent a few days the past week with Mr. and Mrs. W.M. Styles.

Mrs. Roy Styles entertained a number of ladies to an old-fashioned quilting bee on Thursday.

Mr. and Mrs. M. Hyslop and little daughter, Iroquois, were Sunday guests at Mr. Simon Schwerdfeger's.

Mrs. Henry Schwerdfeger spent Saturday with Morrisburg friends.

Mr. and Mrs. Simon Schwerdfeger visited Mr. and Mrs. Hyslop at Iroquois last week.

WINCHESTER SPRINGS

Mrs. O. Casselman returned to her home after nursing Mrs. Byran Dawson at Cass Bridge.

Mr. and Mrs. Arnold Casselman and family took tea Thursday with Mr. and Mrs. C.J. Strader at Winchester.

Mrs. R.A. Ball is in Kingston hospital taking treatments.

Mrs. Orren Casselman spent one day recently at the home of Mr. and Mrs. Ross Durant.

Mr. and Mrs. C. Robinson spent Wednesday at the home of Mr. and Mrs. R. Dillabough, Chesterville.

Master Allen Davidson spent a few days with his grandparents at Dundela.

Mrs. Marguerite Nesbitt spent a couple of weeks in Ottawa with Mr. and Mrs. W.W. Stinson.

Mrs. Orren Casselman spent some time with Mr. Frank Cross and family.

Mr. and Mrs. Kenneth Nesbitt and family have left our midst, and will reside in Brockville.

Mr. and Mrs. Arnold Casselman and family took dinner with Mr. and Mrs. G. McIntosh and family Sunday.

Mrs. Leslie Holmes and family Mrs. Alva Holmes and family were guests of Mr. and Mrs. A.E. Holmes recently.

We are pleased to learn that Mrs. R.A. Ball, who is taking treatments at Kingston Hospital, is improving

ROWENA

James Hanson and son Aden, of Strader's Hill, were Sunday guests of Mr. and Mrs. J.C. Becksted.

Mrs. Chas. Coons and son Gordon and Mrs. Jos. Coons, of Brinston, spent Sunday with Mrs. Wm. Seeley.

Arnold Shaver, of the staff of the Bank of Montreal, Westport, has returned home, to spend Easter with his parents, Mr. and Mrs. Alfred Shaver.

We are sorry to report that Master Clifford Seeley had the misfortune to have his leg broken while skating on Saturday. We hope for a speedy recovery.

Mr. and Mrs. Hubert Trickey, of Williamsburg, were Sunday guests of Mr. and Mrs. Alfred Shaver.

Miss Audrey Marcellus spent Sunday afternoon with Mr. and Mrs. Ernest Marcellus.

Mr. and Mrs. Willis Barkley and family of Dixons Corners, are spending a few days with Mr. and Mrs. Morgan Seeley.

AULTSVILLE

Mrs. Percy Prunner and Mrs. Thomas, of Archer, spent a day recently with Mr. and Mrs. Robert Donnelly.

Mrs. Alice Duffin spent a couple of days with Mr. and Mrs. Preston Rombough.

Mr. and Mrs. P. Germaine and Miss Ryal spent a few days recently in Toronto.

Mr. Max Edwards returned home on Saturday, after attending Dairy School, Kingston.

Mr. Wm. Edwards and Mr. George Beckstead were in Cornwall on Friday.

Mr. and Mrs. S. Price and son, of Dunbar, spent a couple of days with Mr. and Mrs. Chas. Price.

Dr. and Mrs. Gross, Winchester, spent Sunday with Mr. and Mrs Chas. Hanes. Miss Hanes accompanied them home.

Mrs. Clifford Grove spent a few days in Morrisburg last week.

Mrs. Kathleen Harris held an informal pupils' musicale on Saturday March 17. The program consisted of piano and vocal numbers by Misses Helen Hanes, Minnie Dafoe Keitha Lane, Muriel Winters, Freda Strange, Mary Dafoe, Mrs. D. Jarvo, Doreen Jarvis, Junior Hegerman, Mrs. Stanley Dafoe and Mrs. Harris. Those present included Rev. and Mrs. Strange, Mrs. Chas. Rombough, Mrs. C.S. Ault, Mrs. E. Rombough and Mrs. Allen Ferguson of Cornwall; Mrs. Arthur Snyder. Senior girl pupils assisted in serving tea.

A very pleasant evening was spent at the home of Mr. and Mrs. Sanford Wells on Wednesday last. Progressive euchre was played at five tables. The first prize was won by Mrs. Herbert Sarginson and the man's prize by Ross Hess. Consolation prizes were won by Miss Colquhoun and Mr. E. VanAllen.

Mr. and Mrs. O. Lane and Miss Audrey Lane, Mrs. Wesley Bedingfield, Bobbie and Shirley spent a few hours in Cornwall on Wednesday. They visited Mr. Bedingfield, who is a patient in the Cornwall General Hospital, and found him resting comfortably. We hope Mr. Bedingfield will improve rapidly.

Mr. and Mrs. John Hunter spent Wednesday in Montreal.

Services at United Church next Sunday:—Gallingertown, 11 a.m.; Osnabruck Centre, 2.30 p.m.; and Aultsville at 7.30 p.m. Note change in hour of service. Special Easter service and singing. Everybody welcome.

GLEN STEWART

Mr. and Mrs. Charles Jordan spent Friday at Mr. and Mrs. D Blair's.

Mr. and Mrs. Chester Warren called on Mr. and Mrs. Norman Baker Friday evening.

Mrs. Jas. McDermott and Lillian and Doris, were guests of the former's mother, Mrs. Christie Johnston, on Sunday.

Miss Stella Johnston spent Saturday in Iroquois.

Mrs. Lillian Taylor spent Friday with Mrs. Chas. Anderson.

Mr. and Mrs. John Rylance spent Sunday with Mr. and Mrs. David Blair.

Mr. and Mrs. Samuel R. Hamilton spent Sunday with Mr. and Mrs. Chas. Jordan.

Mr. and Mrs. Ross Anderson and Miss Hannah Blair called on Mr. and Mrs. Dawson Levere on Monday evening.

Mr. and Mrs. Harvey Johnston of Hainsville called on Mr. and Mrs. Thos. Johnston on Sunday.

Miss Hannah Blair spent Friday with her aunt, Mrs. E.J. Hamilton.

Mrs. Stewart Christie and Donald spent Wednesday with Mr. and Mrs. Wm. T. Beggs.

Mr. and Mrs. Holmes of Inkerman spent last week-end with their daughter, Mrs. Dawson Levere.

Mr. and Mrs. Charles Thorpe and family and Andrew Warren called on Mr. and Mrs. Chester McDermott on Sunday.

Mrs. Robt. Sharra visited Mrs. W.G.A. Wilson on Wednesday.

MORTGAGE SALE

UNDER AND BY VIRTUE of the Powers of Sale contained in a certain Mortgage, which will be produced at the time of sale, there will be offered for sale by ROSS MORROW, Auctioneer, at Public Auction on Friday, the 6th day of April, 1934, at the hour of two o'clock in the afternoon at the farm of the late Robert Shaw, Aultsville, Ontario, the following property, namely,

All and Singular those certain parcels or tracts of land and premises, situate, lying and being in the Township of Williamsburg, in the County of Dundas, in the Province of Ontario, being composed of FIRST: The North half of the West half of Lot Six in the Third Concession and the East half of the West half of the South half of said Lot Six, containing Seventy-five acres, more or less, and SECONDLY: All that part of the West quarter of Lot number Six in the Third Concession, lying south of the Highway crossing the said Lot, in the said Township of Williamsburg, containing Twenty-five acres more or less.

On the said farm there is said to be erected a dwelling house with suitable farm buildings.

The lands will be sold subject to a reserve bid.

FACTS ABOUT HYDRO — *No. 2 of a series of official announcements by the Ontario Municipal Electric Association, representing the Municipalities who own the Hydro-Electric System of Ontario.*

ONTARIO MUNICIPAL ELECTRIC ASSOCIATION

What Hydro Has Saved Domestic Consumers

In 1932, the last year for which comparative figures are available, all the domestic consumers served by Hydro municipalities used an aggregate of 740,000,000 kilowatt-hours, for which they paid the aggregate sum of $11,676,000, or an average cost, inclusive of all charges, of only 1.57 cents per kilowatt-hour. According to United States census figures for 1932, the domestic consumers served by privately-owned utilities in that country paid an average of 5.60 cents per kilowatt-hour.

It is a simple matter to compute that, if Ontario Hydro domestic consumers had had to pay, for the 740,000,000 kilowatt-hours they used in 1932, as much per kilowatt-hour as United States consumers paid, their bills would have aggregated the vast sum of $41,490,000, or nearly $30,000,000 more than the amount their electricity actually cost them under Hydro service.

Comparative Cost of Domestic Lighting Service in Typical Canadian and United States Cities

Monthly Net Bill for the Same Quantity of Electricity			
Under Hydro System		Under Private Ownership	
Toronto	$1.44	Montreal	$3.15
London	1.74	Detroit	4.35
Hamilton	1.74	Buffalo	4.14
Brantford	1.74	New York	6.60
Ottawa	1.74	Boston	5.30

NOTE—*Hydro serves 56,000 rural consumers at an average cost, inclusive of all charges, of 4.37 cents per kilowatt-hour.*

Hydro has saved the citizens of the associated Hydro municipalities tens of millions of dollars for electric service. And in addition, it has made possible the enjoyment of comfort-giving and labor-saving appliances on a scale that, but for low Hydro rates, would have been beyond the means of the average citizen. The facts about Hydro speak for themselves.

ONTARIO MUNICIPAL ELECTRIC ASSOCIATION

Voice of the Press

Canada, The Empire and The World at Large

Canada

A General Idea

—His Honor Judge McLean of Picton, likes a good joke. He tells the one on the foreigner who recently came before him for his naturalization papers. When asked who was the Premier of Canada, the man answered that it was Bennett. To the question who was Premier of Ontario, the man said Henry. But when asked who was the King of Great Britain, the surprising reply was Ferguson.—Trenton Courier-Advocate.

Essential to Prosperity

—Commodity prices are going up and you don't hear even a whimper from the consumer. They all realize that if the country is to be prosperous the greatest producer of all — the farmer — must get a fair price for his produce.—Chatham News.

Nickel and War

—If Canada shut off nickel from all the world, every nation would be on the same footing and the danger of war not lessened, for if history is to be believed, men fought when armed only with the bow and arrow. Much could be said for preserving our nickel resources for Empire use, but this would require joint Empire action.—Moncton Transcript.

Won't be Seen

—Out in Provo, Utah, Mary Mirth Dahlquist has never missed being at Sunday school for eleven years. Now if she had killed her husband and been acquitted, she would have been offered a fat vaudeville contract, but it will be waste of time to watch the electric lights to see the name of Mary from Utah.—Niagara Falls Review.

Paper Money

—The Chinese are given credit for inventing many things centuries before they were discovered in the Occidental world, such, for eample, as chinaware, gunpoyder and printing. But very few people know that the Chinese were the first to use paper money. Authorities on Chinese history believe that paper money was current in China at the beginning of the ninth century A.D.—London Free Press.

Worth While

—In regard to mothers' allowance, the general verdict in Ontario will be that they have been well worth while, that they have resulted in lesser demands upon public institutions, and that they make it possible for widows to take care of their children in their own homes, a most decided advantage from more than one point of view. — Peterborough Examiner.

Time and Money

—Man arranged the clock to suit himself. Perhaps some day he will see the same can be done with currency which, in itself, is neither half so complicated nor nearly so serviceable as the time-piece was. It has been done with time; let us hope for the day when it is done with money. —Ottawa Citizen.

Canada Will Come Through

—Canada and the Province of Ontario have their problems, plenty of them, but our general position is strong and when contrasts are made with many countries that might be named, our country stads out as a rock of towering strength. Never fear, Canada will come through with colours flying.—Windsor Border Cities Star.

Making More Jobs

When circumstances eliminate a blacksmith shop it is replaced by a garage or a service-station employing more men; the tradition of the crossroads carriage shop i continued in the automobile factory, and so on down the roll of industry. Among them the engineer, the inventor, the scientist, it appears abundantly proved, have made far more jobs than they have destroyed, and in addition they have added enormously to the comforts and luxuries available to the masses of the people.—Ottawa Journal.

Not in the Curriculum

—In many quarters there will be agreement with Prof. Stephen Leacock's statement before the McGill Society of Toronto to the effffect that if a University cannot get along these days without a famous football team it ought to get out of the educational field.—Toronto Globe.

Speed in Russia

—Soviet freight trains, it is contended, do not travel at a faster rate of speed than two or three miles an hour due to obsolete rolling-stock and faulty management. At that rate, the justly-celebrated mixed train from Brockville to Westport is a positive flyer.—Brockville Recorder.

One Drink too Many

—A Montreal judge has ruled that a man can take three or four drinks and still remain in complete possession of his faculties at the wheel of an automobile. Such a rule might apply in one instance and be invalid in others. The safest rule for all automobilists whilst driving is that one drink would be one too many.—Montreal Gazette.

License Cancellation

Scottish courts seem to depend to quite an extent on the cancellation of the license to drive, and the knowledge that an accident or a charge in court is liable to result in the car being made useless for a term of years undoubtedly has an effect in producing caution in drivers.—Stratford Beacon-Herald.

Liberty

—"There are two kinds of liberty —the liberty of anarchy, which is death, and true liberty, which alone is worth a wise man's caring for, the liberty which is made possible by obedience to national authority." The quotation is from Froude's "Short Studies." Liberty should not be confused with license.

The Empire

VOICE OF THE PRESS—CONT

A Scathing Letter

—A letter written by James Watt, inventor of the steam engine, to his father-in-law, in the course of which a scathing reference is made to Richard Arkwright, the famous textile machine inventor, has been gifted to Glasgow University. The letter is believed not to have been previously published.

In his reference to Arkwright, Watt states:

"As to Mr. Arkwright, he is, to say no worse, one of the most self-sufficient ignorant men I have ever met with. Yet by all I can learn he is certainly a man of merit in his way, and one to whom Britain is much indebted and whom she should honor and reward, for, whoever invented the spinning, Arkwright certainly had the merit of performing the most difficult part, which was the making it useful.

"Some years ago he applied to us at two different times for our advice, which we took the trouble to give him in one or more long letters, which he never had the manners to answer, but followed his own whims till he threw away several thousand pounds and exposed his ignorance to all the world, and then in disgust gave up the scheme. I have heard nothing of him since he returned from Scotland, and shall rest satisfied though I never do." —Edinburgh Scotsman.

Books by the Yard

—Artificial books for decoration are now sold made t order with any kind of paper "binding" required to match a room, the hangings or carpets. The books are joined to a strip of cardboard with real titles and authors' names on the backs, just for swank.—London Sunday Express.

Aims for India

—A speech delivered by Lord Willingdon in Calcutta put the three necessary aims of the government in their right perspective. The task of the administration, said the viceroy, was to insist on law and order, to push on with the constitutional reforms, and to develop the economic future of India.—London Spectator.

Everywhere

—As jay-walking is one of the gravest faults of the pedestrians in Hong Kong, we are given to understand that the police will be striving towards its cessation. Chinese are not the only offenders in this respect, as anyone can see for himself — or herself — for the trouble of five minutes observation at the intersection of Ice House street and Des Voeux road, or at Pedder street, where Big Ben used to be.—Hong Kong Press.

"The Empire's Jugular Vein.

—The Suez Canal is of vital concern to India. Of late the strategical importance of the Canal to India, Australia and New Zealand and the Far East has indeed, in contrast with the apathy of seventy or eighty years ago, been fully realized by Imperial strategists and statesmen. Its defence has figured in all the British discussions with Egypt since the War, and is now, whatever may be the political status of Egypt in the future, regarded as a major British interest. During the Great War Germany described it as the "jugular vein" of the British Empire.—Calcutta Statesman.

Drifting to the Cities

—There has been a persistent drift of people from the country to the city, especially since the War. T. Waites, the N.S.W. statistician, has remarked on it from time to time in his "Year Book", and it is reflected in the distribution of seats in the House of Representatives. At every rearrangement of electrical boundaries since the Commonwealth was established, the cities have gained seats at the expense of the interior, and the size of country electorates has swelled to such an extent that many outback people never see their member from one year's end to another. Kalgoorlie, for example, spreads over more than 900,000 square miles. Maranoa is three times the area of Victoria. Maranoa is to be enlarged again, and South Australia is about to lose a country member. It is all an effect of deliberate centralization, which has taken many forms.—The Bulletin, Sydney, N.S.W.

The United States

Depression's Hardships

The demand for Reno divorces is diminishing. In their present financial condition, many gentlemen have been forced to keep the old models for another year or two.—New York Herald-Tribune.

Fair Warning.

—In one of the dime stores last week a "spieler" wa selling American diamonds. He ended his appeal to the prospective buyers with the sentence, "You'll have to hurry to get yours. I'm selling them to-day only. To-night I'm leaving town."—Topeka, Kas., Capital.

Clean Hotels For Tourists

Canada Week by Week.

In its latest issue of "The Tourist Bulletin," issued by the Provincial Government Department of Roads, emphasis is again placed upon the need of a high standard of cleanliness in hotels within the province. Although a high standard has already been attained, it is obvious that pressure will be continued to raise it even higher.

The Bulletin says in part: "A great display of luxury is not suitable in a small hotel, but cleanliness should be found in large and small hotels, being at the base of the good reputation of all establishments, receiving giving shelter and food to travellers. We believe that excessive cleanliness would advantageously take the place of luxury, even in large hotels called 'palaces' in Europe."

It is added that all hotels and inns in the province should have an appearance of tdiness that will be "in keeping with the beautiful and good roads, so as to give to the Province of Quebec a reputation of neatness in accordance with the numerous attractions it offers to tourists and travellers."

Duke of Gloucester Hurt in Steeplechase

Chippinghurst, England.—The Duke of Gloucester, third son of King George, had a nasty spill in the nomination race for the Oxfordshire point-to-point steeplechase, but was not badly injured, although painfully bruised and shaken up.

He rose unaided after his mount fell at a fence and after resting a few moments supervised arrangements for removal of the horse, which was badly hurt. Spills are not new to the Duke, who is considered a splendid horseman.

H. C. Rickaby Given Geologist's Post

Will Succeed Dr. Burrows in Mines Department Office, Member of Staff

Toronto, March 19.—Announcement was made over the week-end by Hon. Charles McCrea, Minister of Mines, that the post of Provincial Geologist,, made vacant by the death of the late Dr. A. G. Burrows, has been filled by the appointment from the Geological staff of Harold Colman Rickaby, senior pre-Cambrian geologist with the Mines Department.

The appointment was ratified by order-in-Council of the Henry Cabinet, on Saturday.

Mr. Rickaby is an honor graduate in Chemistry and Mineralogy of the University of Toronto in 1922, and also a Master of Arts graduate in 1923. He was Research Assistant in the Department of Mineralogy from 1924 to 1926, inclusive, and joined the Provincial Mines Department in 1927. While he has been associated with the department in geological studies since 1920 his work since becoming a permanent member of the staff has been principally in Banuockburn, Sudbury and Swayze areas.

Mr. Rickaby was overseas from 1915 to 1919, in active service with the Princess Patricia's Canadian Light Infantry.

"Student Prince" Author Is Dead

Berlin, March 18—Wilhelm Meyer-Foerster, author of the world's greatest stage hit, "Alt Heidelberg," known to Canada as "The Student Prince," died to-day after a long illness. He was 72.

"Alt Heidelberg" claimed the biggest stage success of all time. It was a dramatized version of a short story Meyer-Foerster wrote in 1899, called "Karl Heinrich." This attained a sale of 30,000 copies within two years.

Its success induced the author to rewrite it as a play. The play has been translated into every modern language, and at present is being produced in Tokio in Japanese and in Johannesburg, Union of South Africa, in English.

First Photograph

The first photograph together of their majesties King Leopold III and Queen Astrid of the Belgians, since their accession to the throne last month.

What Does Your Handwriting Show

By GEOFFREY ST. CLAIR

(Grapho-Analyst.)

All rights reserved.

(Editor's Note:—Leters are coming in in batches, in response to the author's invitation to readers to analyze their writing. Some delay is unavoidable, as each letter requires careful scrutiny, but replies are being mailed as quickly as possible. If you want your handwriting analyzed, see the announcement at the end of this article).

A young lady from a small Ontario town sends me a letter, and encloses a specimen of the writing of her sweetheart. Part of her letter follows: 'In sending you my own handwriting, and also that of my sweetheart, I would like you to advise me. I am very worried and unhappy. I love my sweetheart very dearly, and I have always thought he reciprocated my affection. But I am beginning to wonder if he really does, and whether he is the right type of man for me. I love him very much, but would far rather finish things with him now than to have a lot more trouble and unhappiness later on. We are engaged to be married, but he keeps putting off making a date for the wedding. And I have been told that he goes out with other girls. He admits this, but begs me to forgive him, and assures me that when we are married, he will have nothing more to do with other girls. At the same time, he puts me off by telling me that his business is much too insecure for us to contemplate marriage now. Please advise me."

I am sorry for my correspondent, but am inclined to believe that she is sensible enough to realize, as she says in her letter, that it is better to effect a cure now, rather than make a great deal more trouble and unhappiness for herself later on.

Her own handwriting shows a warm, ardent nature that simply must have the affection of others. She is honest and trustworthy, and has a good deal of natural pride. Her writing shows that she would like to own a home of her own, and that family life would be her metier.

On the other hand, the writing of her friend is not so good. It shows unreliability and a predilection for deceit. He is of a cooler type than my correspondent, not naturally affectionate in the kindly sense. He is of a rather "physical" type.

My advice to the young lady is that the young man is not the one best suited for her. If she marries him, he will deceive her just as he is deceiving her now, because it is his nature to do so.

And there is a streak of dishonesty in him. This, coupled with the very definite indications of deceit, tells me that she will only be unhappy if she continues to go with him.

And, speaking of the practical, she is not getting any younger. She is losing her opportunities of making the acquaintance of a man who may become fond of her, and make her a good husband.

Do you want your handwriting analyzed? Do you wish to know the character that is shown in it? Send a letter in your own handwriting, with 10c coin and a stamped (3c) addressed envelope to: Geoffrey St. Clair, Room 421, 73 Adelaide St. West, Toronto, Ont. Leters are confidential.

Restocking Methods Proving Successful

Distribution of Trout Fingerlings Throughout Ontario 1,500,000 Annually

We in Southern Ontario, are very apt to overlook the re-stocking requirements of northern districts, where there are innumerable, accessible and heavily fished waters, so much so that additional protection by closure has been necessary. Does the reader recall that Thunder Bay contains certain trout waters of outstanding importance on the continent, and as a matter of fact, in the world?

The large distributions of trout in Algoma and Thunder Bay are the result of the establishment of a large trout-rearing station in each district, each capable of distributing annually 1,500,000 fingerlings. From the economic and biological standpoints, the Department has been more than justified in these committments.

At least 80 per cent. of the brook trout eggs distributed later as fry, fingerlings, yearlings, etc., in the waters of Southern Ontario originate from breeders at the Northern Ontario trout-rearing stations and the field station on Lake Nipigon. If it were not for these sources of supply, re-stocking in Southern Ontario would be greatly curtailed.

Certain streams and lakes in Ontario have been stocked with brown trout on an experimental basis, and as a result of additions to the Kenora hatchery experimentation with the culture of the species in that district, with restricted distribution of advanced fry has followed. It is only during the past two or three years that the Department has planted brown trout fingerlings to any extent, and although the results of the plantings may be known, it is not in the best interests of conversation to publish the details until the fish become properly established.

All scientific men are not anglers in any sense of the word, and they often resort, "under permit," to speedier methods of capturing fish. The investigator, if questioned, would probably admit that in his attempt to obtain specimens of brown trout from Big Clear Lake, he did not try the finer methods of angling usually employed by the followers of Isaac Walton.

Practically one hundred per cent. of the maskinonge distributed from hatcheries on this continent are fry. Experimental work on the culture of maskinonge fingerlings has been undertaken, but the results accomplished to date are insignificant; in fact, practically nothing is definitely known of the actual requirements to rear this species successfully. It is well known that it is better to plant fingerlings and larger fish, and comparing the pond space devoted to bass culture in Ontario with that elsewhere, it will be found that the quantity of bass fingerlings distributed by the Department in recent years is creditable Pond culture is only one phase of the subject; sane creel limits, suitable closed seasons, and bass sanctuaries are to be considered also.

The planting of rainbow trout in the French River seems a step in the right direction. Rainbows or steel-heads run into a number of streams tributary to the Georgian Bay and Lake Huron as a result of former plants in the St. Mary's River and in streams adjacent to the Great Lakes.

Dies as He Hears He's Father of Son

Wheeling, W. Va.—Physicians told John F. Ward, 32, a barber, that he was the father of a son.

Overcome, he collapsed and died in the corridor of the hospital. Doctors are withholding the news from Mrs. Ward.

Soviet Lipstick Expert Won't Use It Herself

Moscow. — Pauline Czemshuzlina wife of M. Molotov, Director of the Soviet Cosmetics Trust, makes very good lipstick and soap.

So good, indeed that the TZIK (Central Executive Committee of the Soviet Union) has awarded her the Order of Lenin for "carrying out the production plan and improving the quality."

But she does not use cosmetics herself.

Two U.S. Railroads Loaned $2,366,531

Washington.—Two additional loans to railroads totalling $2,366,531 for new equipment and maintenance were announced recently by Harold Ickes, United States Public Works Administrator.

The Chicago, Milwaukee, St. Paul and Pacific was loaned $1,966,531 for building 75 new passenger cars, air conditioning of 22 diners and lounge cars and installation of 300 loading devices on automobile cars. The New York Central was loaned $400,000 to pay track men in laying 37,000 tons of rails and fastenings.

Manitoba To Observe Boxing Day Holiday

Winnipeg, March 18.—Boxing Day, Dec. 26, the day after Christmas, will become a statutory public holiday in Manitoba in future if the legislature approves a bill to be introduced next Wednesday by Col. Ral[illegible] H. Webb, Conservative member for Assiniboia.

The beach of Del Monte, California, is a popular photographic background generally used by young ladies attired in brief bathing suits, basking in the sun. This particular photograph was taken at sunset and all conspires to blend into a beautiful study.

Butter Here Like Coal in Newcastle

Muncie, Ind.—Perry Township, Indiana, has 120 pounds of butter for one man on its relief list, and that one man doesn't want any butter.

In the distribution of surplus farm products 120 one-pound prints were apportioned to Perry Township. Mr. Raymond N. Carmichael, township trustee, looked at the 120 prints, then at his relief list, and then scratched his head thoughtfully. He finally decided to store the butter in a packing house in a near-by city until he should have opportunity to confer with relief agencies of the city regarding disposal of his surplus. The total relief bill for Perry Township during the month of January was $6.75 which was paid for one ton of coal.

Hon. Charles McCrea Lauded By Leaders of Mining Industry

Toronto.—A remarkable tribute was recently paid to the Hon. Charles McCrea at the King Edward Hotel by the leaders of Ontario's mining industry. No man has contributed more to the opening up and upbuilding of the north country than the Minister of Mines, who hails from the Sudbury nickel belt, and who for ten years has been the alert and forceful backer of the mineral industry, an inspiration to engineers and prospectors engaged in the development of the north, and thus a benefactor of the whole province and of the entire Dominion. But for the sympathetic leadership given by Mr. McCrea, the Ontario gold mining industry could scarcely have reached its present proportions. Nor could the base metal industry have grown as it has.

But for this country's greatly expanded gold production the Canadian Treasury might not have been able to maintain the national credit or to meet its obligations abroad during the depression. Nor should it be forgotten that those engaged in the mining industry are by no means the only section of the community to benefit from this industry. The mines of New Ontario utilize a tremendous amount of food, clothing, boots and shoes and other products of Ontario factories. The mines thus give employment, directly and indirectly, to large numbers of our people. As the protector of the mining industry, Mr. McCrea has proved an invaluable friend not only to Canadian mining men, but to the country as a whole.

"The California Boiler Maker"

"Among the thousands who use Omega Oil as a daily rub down, no one thinks more of it than I do. It is a liniment of amazing strengthening and soothing power."

James J. Jeffries, for long the Champion heavy-weight of the world, found that Omega Oil went deeper, and limbered up those great muscles quicker. Omega Oil should be in every household for strains, sprains, stiffness, and sore aching muscles. Rubbing doesn't blister the skin. At all druggists 35 and 60 cts. Sole Agent: John A. Huston Company, Limited, Toronto.

We easily forget those faults that are nown only to ourselves.—La Rochefoucauld.

Too Much "Party" Last Night

Too Much Food,
Late Hours,
Smoky Atmosphere

YET—*This Morning No "Acid Headache"—No Upset Stomach*

Scientists say this is the QUICKEST, SUREST and EASIEST way to combat FEELING THE EFFECTS of over-indulgence—the most powerful acid neutralizer known to science. *Just do this:*

TAKE—2 tablespoonfuls of Phillips' Milk of Magnesia in a glass of water BEFORE bed. In the morning take 2 more tablespoonfuls with the juice of a WHOLE ORANGE. That's all! Tomorrow you'll feel great!

Or take the equivalent amount of Phillips' Milk of Magnesia tablets. Each tablet is equal to a teaspoonful of the liquid.

Get genuine Phillips' Milk of Magnesia in the familiar liquid form, or the new, marvelously convenient tablets. Be sure it's PHILLIPS'... the kind doctors endorse.

NOW IN TABLET OR LIQUID FORM

MADE IN CANADA

1,000 Widows Wed

LONDON.—Because a thousand war widows married again last year Neville Chamberlain, Chancellor of the Exchequer, will save more than $250,000 in his coming budget.

The widows had the option of choosing between their pensions of $5 a week and would-be-husbands. One thousand chose husbands.

This fact is revealed in the annual report of the Minister of Pensions. It shows that twenty years after the outbreak of the war there are still 1,107,000 persons in receipt of war pensions or allowances.

Another reduction has resulted from the fact that 46,500 "war babies" reached the age of sixteen during the year. Their allowances automatically ceased.

Since establishment of the Ministry of Pensions the total expenditure has been $5,235,000,000.

Too Much

Media, Pa.—Mrs. James J. Nelson, Jr., wife of a Philadelphia dentist, testified in divorce court that she could take almost anything. It was bad when her husband threw lighted cigarettes in her face and took other women home from parties, she said. It was worse when he went upstairs and fired a revolver through the floor in the general direction of the bridge table. But, she added, it was too much when he put a pistol at her back and made her "walk the plank" on a tiny pier at Beach Haven, N.J.

King Will Open Huge New Tunnel

London.—The new £8,000,000 Mersey Tunnel, the largest underwater tunnel in the world, is to be opened by the King in July.

The Liverpool City Council is forming a special committee to plan festivities for the occasion. The streets of the city will be decorated with flowers, flags and bunting and illuminated at night with thousands of colored fairy lamps

50 Years' Work For 1,200 Men

Gloucester, Eng.—There is joy on the eastern side of the Forest of Dean.

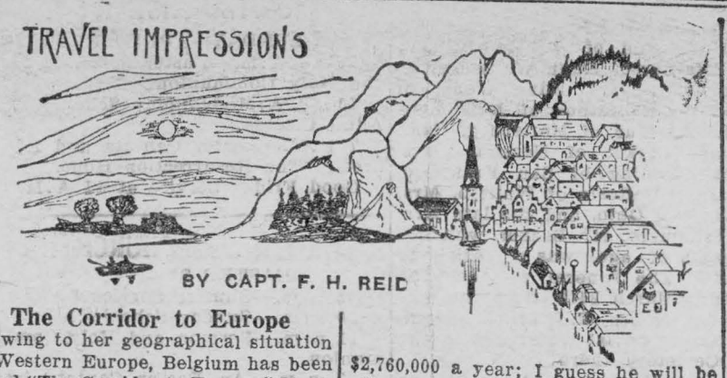
A virgin seam of coal has been cut by the Crawshay Colliery Company.

When properly developed it will give 50 years of permanent work to at least 1,200 men. The local unemployment problem is solved.

When the sinkers cut the coal at a depth of 225 yards, cheering miners flung their caps in the air, and the Union Jack was hoisted over the mine as a symbol of victory.

ISSUE No. 12—'34

TRAVEL IMPRESSIONS



BY CAPT. F. H. REID

The Corridor to Europe

Owing to her geographical situation in Western Europe, Belgium has been called "The Corridor to Europe." Much of the traffic, going to the central portion of the Continent, enters through this little country. Its greatest length is 165 miles and its greatest breadth 120 miles and the total area only 11,755 square miles—so the importance of a country does not depend upon its size altogether. The Belgian population is the densest of any European state—688 per square mile—and is composed of two distinct races: the Flemish, who are of French extraction and who speak a corruption of French, intermixed with words and phrases from Spanish and other languages. French is the official and literary language, although road signs and general information is printed in both tongues. Almost the entire population is Roman Catholic and there are over 2,400 convents, with nearly 37,000 inmates. Protestantism is tolerated and even salaried by the State, but cannot count more than 30,000 adherents.

A Little History

The territory, now known as Belgium, originally formed only a section of that known to Caesar as the territory of the Belgae, extending from the right bank of the Seine to the left bank of the Rhine and to the ocean. This district continued under Roman sway until the fall of the Empire. Subsequently the country has had a checkered history, being contended for by Germany, France, Spain Austria and Holland. What a heritage for the young king, who, owing to the tragic death of his father—the late beloved King Albert—has assumed the leadership of two races, who do not love each other any too well. The present dynasty dates from 1831, when Leopold, Duke of Sax-Cobourg, accepted the crown under the title of Leopold I.—this was after Holland and Belgium separated, after a short but stormy union of only 15 years. One compensation for this responsibility may be the 33 1-3 per cent. increase in salary, just granted to King Leopold III.—henceforth he will get 12 million francs or, in our money, $2,760,000 a year; I guess he will be able to manage along on that.

About Milk and Other Things

Dogs are utilized for other purposes besides household pets in Belgium. Large and smaller animals are attached to carts which haul commodities of various kinds along the cobbled streets of this busy country. Milk-carts are often in the form of barrels, laid horizontally on the wheel carriage and the milk is drawn out by a faucet at the end. Another method of delivering milk is by large pails, suspended from a yoke slung over the shoulders of a woman, girl or boy. In the early morning one can see many of these primitive milk deliveries—it is rarely one will see a man on such a job.

Another interesting sight is the slow-moving barge being propelled along one of the many canals. Sometimes this is pulled by a horse on the towing-path, sometimes a man is the "beast of burden." The family lives, moves and has its being on this clumsy looking carrier and young children are tied by a rope to prevent them from straying over the side.

A Peculiar Form of Art

One of the sights of Brussels is the little Manikin Fountain, placed on a corner in a central section of the city. When the ladies see this, they are almost stunned with amazement; perhaps some one laughs and then the humor of the situation appeals to the assembled company. The fountain is that of a little boy, dressed in nature's garb, who, according to the story, was lost and found—hence the fountain as a mark of gratitude. This little fellow has been standing on this corner for more years than I would care to remember. He has been decorated by the French, has a whole wardrobe of uniforms which are placed on him at special occasions. This fountain is an interesting sidelight on the Latin character. Postal cards, brass miniatures, etc are sold freely all over the city—even this forms a source of revenue for the thrifty Belgians.

Switzerland will be the location for our story next week.

A gift—its kind, its value and appearance; the silence or the pomp that attends it the style in which it reaches you — may decide the dignity or vulgarity of the giver.—Lavater.

A 266 lbs. MAN LOSES FAT

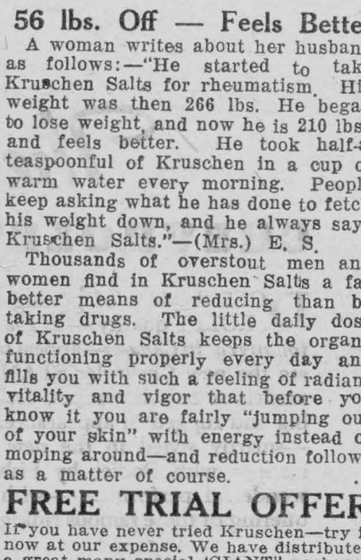
56 lbs. Off — Feels Better

A woman writes about her husband as follows:—"He started to take Kruschen Salts for rheumatism. His weight was then 266 lbs. He began to lose weight, and now he is 210 lbs., and feels better. He took half-a-teaspoonful of Kruschen in a cup of warm water every morning. People keep asking what he has done to fetch his weight down, and he always says Kruschen Salts."—(Mrs.) E. S.

Thousands of overstout men and women find in Kruschen Salts a far better means of reducing than by taking drugs. The little daily dose of Kruschen Salts keeps the organs functioning properly every day and fills you with such a feeling of radiant vitality and vigor that before you know it you are fairly "jumping out of your skin" with energy instead of moping around—and reduction follows as a matter of course.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special 'GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c package. This consists of our regular 75c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.



Famous Star In Brief Visit To London

Norma Talmadge Speaks Her Mind in Love, Money and Hitler

LONDON — For the past seven days one of the greatest film stars the world has ever known has been in London, staying at a big hotel, going to first nights and films. Nobody noticed her — Miss Norma Talmadge.

Officially she was due to arrive in this country some time next week. Actually she came last Saturday. And left again for New York yesterday afternoon in the liner Paris.

Negotiations for her to play lead in a talkie remake of the famous old British silent film, "Somehow Good," fell through. She did not like the part suggested another, and decided to go home to Palm Beach while it is being prepared.

Thomas Meighan, who was to have been her leading man, goes too.

Norma Talmadge is something of a philosopher. She has decided views on Love, Money and Hitler.

I talked to her for an hour and came away with these comments.

It is high time we put love in its proper place. It isn't all that important. Nowadays we are beginning to treat the thing sanely.

A girl is no longer ruined for life because she has an unfortunate love affair, or because her marriage doesn't work out right.

She has other things to think about. I haven't any patience with the fools who keep on getting married and divorced, and married again.

These film stars who lose all their money in the market and then go around whiting about it make me tired.

If you've got the brains and the ability to make money you should be able to keep it.

I think movie actresses who make fortunes (and they earn them) should be compelled by law to put them into trust funds, and stop making public nuisances of themselves.

I don't like that man. It's not right to teach young people to be vengeful, intolerant, and militarist. The young should be taught to be tolerant — to understand the point of view of others.

Norma Talmadge is thirty-seven. She looks twenty-seven.

She is tanned brown by the sun, and the spirit of an unconquerable optimism sparkles in her black eyes.

She started her film career at Brooklyn before they'd ever thought of Hollywood.

"I've seen the great stars come and I've seen them go," she says.

"The only difference is that they arrive quicker — and they go quicker — nowadays.

"They make their stars overnight, and forget about them overnight. They haven't even time to find out whether the public like them or not . . . It's hard on a young girl. . . ."

More Tobacco for Your Money *and* POKER HANDS *too*— *with* TURRET FINE CUT

When you "roll your own" with Turret Fine Cut you pay less per cigarette because you get more tobacco for your money—and more enjoyment, too, in these milder, cooler, more fragrant smokes. "MECCA" OINTMENT

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile
—No Calomel needed

When you feel blue, depressed, sour on the world, that's your liver which isn't pouring its daily two pounds of liquid bile into your bowels.

Digestion and elimination are being slowed up, food is accumulating and decaying inside you and making you feel wretched.

Mere bowel-movers like salts, oil, mineral water, laxative candy or chewing gum, or roughage, don't go far enough.

You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe. Purely vegetable. Sure. Ask for them by name. Refuse substitutes. 25c, at all druggists. 52

for STIFFNESS

Plenty of Minard's well rubbed in soon sets you right. Bathe the sore part with warm water before you start.

34 You'll soon limber up!

MINARD'S "KING OF PAIN" LINIMENT

* * *

In ill-health for the past year, Frederick W. Snelgrove, chief chemist of Courtaulds (Canada) Limited, died at his residence in Cornwall on Sunday night.

* * *

A card from Mrs. J.H. Meikle addressed to Mrs. Leo Laurin, and written from Demascus, Palestine states that Mr. and Mrs. Meikle are visiting historical places in Palestine, and both enjoying good health.

* * *

Died—At her home in Los Angeles Cal., on Tuesday March 27th, 1934, Mrs. Harvey E. Casselman. Death was due to a stroke suffered four months ago. Funeral arrangements have not yet been ascertained.

* * *

Word has been received of the death in Honolulu of a former well known resident of Winchester in the person of Mrs. Nellie M. Rowat. She was formerly Nell Alexander, and had spent her girlhood days in Winchester. She was in her 73rd year.

* * *

Mr. Napoleon Guay, father of Mr. Julius Guay, barber, was on Sunday last removed to St. Vincent de Paul Hospital, Brockville, where he will receive treatment. His daughter, Mrs. Caufield, of Ogdensburg N.Y., accompanied him to the hospital.

* * *

Seizure of 40 gallons of United States alcohol being smuggled across the ice of the St. Lawrence River, near Cornwall, was reported at Brockville by Constable Greenwood, of the Royal Canadian Mounted Police. The alcohol was in a number of cans.

* * *

An Eastern Ontario fish and game association, representative of the different fish and game clubs from Kingston to the Quebec border and northerly to Ottawa, will be formed, in the near future. A meeting will be held at Prescott, under the auspices of the recently organized Prescott Protective Fish and Game Club. It is expected that Hon. George H. Challies, Ontario minister of game and fisheries, will be among the speakers at the gathering.

Although several farmers in the district have tapped a large number of their maple trees, the weather has not been warm enough yet to extract much sap. Early last week, during the mild weather, the trees were tapped, but the cold snap put all thought of syrup-making from the minds of everyone.

* * *

Miss Ann Louden delightfully entertained fourteen of her young friends at a birthday party on Thursday. Games were played from 4 till 5, after which the guests were inbited to the dining room, where delicious refreshments were served. Ann was the recipient of many birthday gifts.

* * *

Mr. R.G. Hodge, formerly superintendent of the St. Lawrence Canals has left for England, where he has accepted a position. He was accompanied by his son, Billy, and will be joined in the near future by Mrs. Hodge. Mr.and Mrs. Hodge and Billy have many friends in Morrisburg who wish them success.

* * *

The explosion of a lantern in the stable on the farm of T.J. Mundle, two miles east of Kemptville, resulted in all the barns and outbuildings being wiped out by fire early Tuesday evening. Farm machinery, feed, harness and other equipment, as well as four sheep, were included in the loss.

* * *

Suffering a heart attack shortly after boarding a street car at Cornwall Thursday, Roland Richard Marchant, a resident of Notre Dame de Grace, Montreal, died almost immediately.

* * *

Fire of unknown origin destroyed the Moulinette Motor Sales garage at Moulinette, early Wednesday morning. In addition to the large frame building, which was burned to the ground, the entire contents of the garage were lost, including three automobiles. It is expected that the loss will be about $3,000.

* * *

80,000 cigarettes were stolen from a railway car at Cornwall Sunday morning, while a merchandise train was standing in the yards. Quick action on the part of the C.N.R. police, aided by provincial officers brought about the recovery of the loot, which had been hidden behind a bush at the side of the right-of-way. The thieves escaped.

* * *

Mr. H.B. Fetterly, formerly inspector of public schools for Dundas, now the superintendent of the Ontario Institute for the Deaf at Belleville, was elected grand master of the Grand Orange Lodge of Ontario East for the ensuing year at the closing session of the Grand Lodge, held at Pembroke, which completed its business last Friday.

* * *

In honour of Miss Dorothy Strader whose marriage will take place shortly, the Misses Laura Richardson and Ella MacIntyre, of Ottawa, entertained recently at a delightfully arranged bridge party and a shower of silver flatware. The bride-elect was the recipient of numerous pieces of silver. Bridge play was enjoyed, and later supper was served, the table being attractively adorned with lighted pink candles in silver holders, and pink flowers.

* * *

Two Smiths Falls men will perhaps pay for their meals when they get them from now on, instead of doing so by delayed action through the Magistrate. Two men entered an eating house at Iroquois last Wednesday, and leaving by the back door, forgot to pay for their meals. The proprietor telephoned to Constable McLeod, and then followed in his car, catching up with the miscreants when the Constable was talking to them. They had denied having a meal in Iroquois, but when the proprietor appeared, they owned up. In police court on Thursday before Magistrate C.A. Adams, they paid over the sum of $32.75.

Died—Entered into rest in Sacramento, Calif., Orrin S. Becker, beloved husband of Hattie Becker; loving father of Hugh W. Becker of Sacramento, Mrs. Edna Weber of Sacramento; brother of Mrs. Wesley J. Larmour of Morisburg, Can., William Becker of Nevada, Mrs Agnes Downing of San Francisco Mrs. John DeRosia of Wallejo, Mrs. F. Seigel of Ohio, and the late Mrs. Wm. Summers. Mr. Becker, who was 56 years of age, was a native of Canada. The funeral was held on Saturday March 24th, from the parlours of James R. Garlick, Sacramento, and burial was made in the City Cemetery there.

* * *

Misses Mildred Casselman and Eva Casselman, Messrs Davidson and C. McKiddie, all of Ottawa, attended the 35th wedding anniversary of Mr. and Mrs. Alfred Casselman, at their home in Williamsburg, recently. Mr. and Mrs. Casselman were pleasantly surprised when they were presented with a beautiful bouquet of cut flowers and a handsome three-light electric table lamp by their children, who are the Misses Mildred Casselman, R.N., and Miss Eva Casselman of Ottawa, Mr. Robt. Smith of Newington and Mr. Aden Casselman of Berwick.

* * *

Hon. G. Howard Ferguson, Canadian High Commissioner in London who is still feeling slight after-effects of his recent illness, hopes shortly to visit France and Flanders. It is his intention, as soon as milder weather sets in, to take over his car and, in company with Mrs. Ferguson, revisit the Canadian cemeteries and war graves, and inpsect the Canadian National War Memorial on Vimy Ridge. This is a trip he has long promised himself, but official duties and other impediments have hitherto stood in the way.

* * *

The Morrisburg Branch of the Canadian Legion, British Empire Service League, will commemorate the Battle of Vimy Ridge at a banquet to be held in the Music Hall, Morrisburg, on April 9th. While in past years, owing to the limited room, only gentlemen were permitted to attend this annual banquet, this year provisions have been made so that the ladies will be permitted to participate. The speaker will be Capt. John C. Manson, of Montreal. Mr. Manson was Captain of Canadian Engineers in command of the Canadian Wireless Section from its formtion in France until after the battle of Vimy Ridge, when he was loaned to the Admiralty to conduct an experiment on the location of submarines. A short programme of music has been arranged. Tickets for the banquet are on sale at Mr. Jas. Reddick's grocery, Main St., and Mr. A.G. Taylor's shoe shop, Main Street.

ONTARIO'S PRISON POPULATION DOWN

Some attempts were made to create trouble in provincial prison institutions following the Kingston uprising in 1932, stated C.F. Neelands, deputy provincial secretary, in his annual report tabled in the Ontario legislature by Hon. G.H. Challies, provincial secretary.

"When criticism of the penitentiaries was rife, we naturally, in our institutions, felt its backwash," Mr. Neelands said.

"Newspapers are freely admitted to our institutions, and so our prisoners avidly read all that was written," the report declared. "There are always some prisoners who are ready to agitate and take advantage of any situation to cause the officers trouble."

Prison population decreased, Mr. Neelands pointed out, there having been 14,538 persons sentenced during the last fiscal year, compared with 15,803 in 1932. Material reduction in the expenditure was made. During the past two years, the gross expenditure was reduced $408,574, while revenue declined $220,180, the latter largely due to lessened buying power of other departments.
