## WHAT IS DYNAMITE?

### Some Farmers Have a Wrong Idea About Dynamite

They know its a powerlful explosive and believe it is dangerous to handle.

Dynamite is very powerful, much more so than gunpowder, but is actually safer to handle.

Many farmers all over the Country begin to understand the value of "Stumping" Dynamite -- Clearing land of stumps, Trees and Boulders, breaking up Hard Pan, Shale or Clay. Sub-soils, Plowing, Draining Swamps, Planting and Cultivating Orchards, Digging Ditches, Post Holes and Wells Road Making and Grading, Excavating for Foundations and Cellars, Digging Trenches, Regenerating Old Worn-out Farms

If you are interested and want to know more about the uses of "Stumping Dynamite" - how to handle, cost, etc., call and see us, or write and we will be pleased to give you full information involving no cost to you what ever.

Now is the time to clear the land of boulders by the use of "Stumping Dynamite" while stone for the road is needed and the price is high for delivery during the dull winter months.

Agent for Canadian Explosive Co.

## ..BOARD OF EDUCATION ...

A special meeting of the Board of Educaton was held in the Secretary's office on Saturday, October 22nd at 2 p.m to meet Mr. H. Loucks of Morewood, re matter of M.C.I. principal. Present D. C. Bush, J. L. Casselman, Rev. C. O. Carson, Mrs. Ashton, Mrs. Hilliard, Dr. McLaughlin, W. G. Beckstead, A. H. Hunter, J. H. Meikle.

Secretary received letter from the Department of Education stating that J. W. Strader was not qualified.

D. C. Bush, J. L. Casselman That we offer Mr.. Loucks $2500 as prinpal for M.C.I. to come as early as possible.—Carried.

D. C. Bush, A. H. Hunter, That the meeting adjourn to Monday next at 7.30 p.m. to confer with M.C.I. lady teachers on matters concerning M.C.I. That Secretary notify the members to that effect.—Carried

Special meeting, October 24th.

Present D. C. Bush, J. H. Meikle, T. Coligan, W. G. Beckstead, Rev. C. O. Carson, Mrs. Hilliard, Mrs. Ashton.

Moved by W. G. Beckstead, T. Coligan, That we engage Mr. J. S. Jamieson to act as temporary principal till end of this term at rate of $2600 per annum, and the Secretary to notify Mr. Jamieson immediately .—Carried.

## FETTERLY—BAKER

(Ottawa Evening Journal)

The home of Mr. and Mrs. Archie Beaton, 15 Pansey Avenue, was the scene of a very pretty wedding on Thursday evening when Miss Lula Georgina Baker, third daughter of Mr. John B. Baker of Morrisburg, was united in marriage to Mr. Wm. L. Fetterly, only son of Mr. and Mrs. Herman Fetterly of Russell. The ceremony was performed by Rev. G. A. McIntosh in the presence of immediate friends of the contracting parties. The bride, who was given in marriage by her father, entered the drawing room to the strains of wedding march. She looked charming in a gown of white meteor crepe with coronet veil held by a wreath of Orange blossoms and carried a shower bouquet of Ophelia roses and white heather. The bridesmaid Miss Eva Sully was dressed in grey crepe de chene trimmed with old rose and wore a corsage bouquet of sweetheart roses. Mr. Arthur Hollister was best man. During the signing of the register Miss Rose Parsons, of London, England, accompanied by Mr. James Wilson, sang "All Joy be Thine." Following the ceremony a wedding supper was served by Misses Ida and Effie Beaton. The groom's gift to the bride was a sunburst of pearls, to the bridesmaid, a gold bar pin set with amethyst and pearls, to the groomsman, a pearl ie pin, to the soloist, a gold piece, and to little Miss Mabel Beaton, who played the wedding march,, an onyx and pearl ring. The bride's gift to the groom was a leather club bag. Among the many presents was a substantial cheque from Miss Baker's former employer, Mr. Fleetwood Wilson.

Mr. and Mrs. Fetterly left for Niagara Hamilton and other western points. The bride travelled in a suit of Harding blue broadcloth, opening over grey georgette blouse and wore a mole skin fur with a smart hat of grey Paynne velvet with touches of silver and blue.

On their return Mr. and Mrs. Fetterly will reside in Russell, Ont.

## JAMES S. BAKER

On Tuesday, October 18th, 1921, a very highly esteemed citizen in the person of James S. Baker of Elma, passed very suddenly away. The deceased had not been in the best of health for the past few years and therefore had retired from active farming. A man of sterling character and always ready to help those in need. He will be greatly missed from the community in which he lived, as was exemplified by the large assembly of neighbors and other sorrowing friends who came to pay their last tribute at the funeral which was held at his residence on Thursday, October 20th. The service was conducted by Rev. Mr. Howe.

Deceased, who was a son of the late John Baker, was born March 4th, 1851 at Nudell Bush and leaves to mourn his loss a wife whose maiden name was Sarah Beckstead, one brother, Melvin C. Baker Nudell Bush.

The pall-bearers were, Oscar Beckstead, William Southworth and James Barkley (three nephews) and Chas. S. Baker, Walton Baker, and Clarence Baker, (three cousins) Interment was made at Trinity Church, Riverside, conducted by Arch-deacon Carson of Morrisburg.

## LANTERN EXPLODES

George Butchard a farmer of Eastnor Townships, 20 miles north of Wiarton, had his house, two barns and implement shed and other buildings destroyed by fire Friday evening. The entire season's crop, one horse, and six head of cattle were also lost. A lantern explosion was the cause of the fire. The buildings on a farm near Tilsonburg, were also destroyed recently from the same cause.

## MR. CRERAR'S CAN'T

When Mr. T. A. Crerar tells the people of Canada through a manifesto that 'the supreme issue before them is "whether our Government is to be free or fettered," he descends to demagogy and cant. Such talk one expects to hear in the mouths of soap-box orators, or from the youthful parlor Bolshevists of the half-baked Socialist press, it is not what the country has a right to expect from the serious leader of a party.

Mr. Crerar was for two years or more a member of the Government. Was it controlled by Big Business? Was it free or fettered? He knows perfectly well that it was free, that it was controlled by nobody and by no influence other than parliament that instead of Big Business controlling it it taxed and controlled and governed any other class in the State.

What, then, does Mr. Crerar mean? Does he mean that just as soon as the Government lost his power and personality Big Business got control of the Government? Was he the one just man in Gomorrah?

The public is becoming weary of such cant. It is becoming weary of Agrarian leaders trying to build moral crusades upon a foundation of hypocrisy and falsehood. If Mr. Crerar knows of cases where the present Government was controlled or fettered or improperly influenced by Big Business, let him come out man fashion and tell when, where and how the improper influence was exercised. If he knows of secret campaign funds, let him take action against the contributors and the beneficiaries, as he has a right to do by the law. In plain, blunt language of the street, let him "put up or shut up."

Mr. Crerar instead of shouting about campaign funds, and fettered Parliaments, should answer a few questions on his part.. He should tell the public:

1—Where does the money come from that finances the Grain Growers Guide and the enormous propaganda that s carried on by the Canadian Council of Agriculture?

2—Who put up the money to pay for the thirty two lawyers who fought to prevent an inquiry into the "farming of the farmers" and why?

## JAPAN TAKES WORLD'S RECORD

The dairy world marveled when Segis Pietertije Prospect broke the World's Record for milk production by yielding 37,381.4 pounds of milk in 365 days.

Such tremendous production means that the cow performing the miracle must be possessed of tremendous constitution, capacity, temperament ability and blood circulation. These, however, even associated with intensive dairy breeding and conformation, are but the basis of phenomenal production.. A man must recognize the presence of these qualities and then by hard persistent work and liberal, judicious feeding aid the cow, giving her every possible comfort and opportunity to do her very best every hour for 365 days subsequent to a preparatory period of from three to six months. The Japanese as a race are known to be more intensive in any work they attempt than any other race of people. As evidence of this, and as evidnce of the fact that the breeding and characteristics of the man in charge of a cow are as great actprs as the feeding and characteristics of the cow herself, the report now comes from Japan that a Dutch cow named Princess Anna Roland has broken all World's records for milk production by yielding 39,928 pounds of milk in 365 days. Japan is an infant in dairying, but if this record is indication, and we believe it is, other countries will need to look well to their laurels when Japan approaches maturity in dairying and breeding dairy cattle.

## AUCTION SALE

The undersigned will sell by public auction on his premises, Lot 6, Con. 2, Williamsburg, on Tuesday, November 8th, commencing at one o'clock.

# AUTO BANDITS ESCAPE WITH $14,000 FROM BANK OF TORONTO, WYOMING

### Police Think Robbers Are Same Band That Entered Bank of Hamilton in Toronto and Stole a New McLaughlin Car in Thorndale the Same Night.

A despatch from London, Ont., says:—Walking into the Bank of Toronto at Wyoming, a village 45 miles west of London, on the G. T. R., on Thursday afternoon, four auto bandits held up Manager H. E. Lambert and his staff and made their escape with $14,000 in cash in a high-powered car, the motor of which a fifth thug had kept running while the robbery was taking place. The hold-up occurred at 2.50.

Ronald Brown, one of the clerks, slipped out the back door and gave the alarm, firing five shots at the robbers as they jumped into their car and drove away. The bandits, who were all armed, fired at everybody they saw, compelling many people who sought to give chase to seek cover behind telephone poles or in doorways.

W. Garlick, a traveller for the Ingersoll Packing Company, was passing the bank at the time, and two of the staff, E. S. Taylor, teller, and Thos. Scharf, hastily procuring revolvers from a hardware store, jumped into the traveller's car and started in pursuit. The bandits, however, had a new McLaughlin, and, though hampered by greasy roads, managed to distance their pursuers, until finally, at Pernhill, north of Parkhill, Taylor and Scharf were compelled to give up the chase.

It is thought that the robbers were the same men who robbed the Bank of Hamilton in Toronto on Tuesday last, and also that they are the thieves who stole a new McLaughlin car from Wright's garage in Thorndale, 10 miles from London, on the same night.

When the London police received word of the hold-up Chief Birrell at once despatched a powerful car loaded with detectives and police to join in the hunt for the criminals. As the bandits had headed toward London when they left Wyoming, the local officers went out the Sarnia gravel road in the hope of meeting them. They say that at one time they must have been within a couple of miles of their quarry, but the latter were on a road paralleling the Sarnia gravel road and easily avoided their pursuers.

St. Mary's, Stratford and Guelph police were at once warned to be on the lookout for the gunmen, as it was thought they were heading back toward Toronto.

---

Recent bank hold-ups in Ontario were:

Bank of Hamilton branch at Locke and Herkimer streets, Hamilton, in June; robber got $4 500.

Bank of Hamilton branch at Sanford avenue and King streets, Hamilton, Oct. 13; robber got nothing.

Union Bank of Canada, Locke and Main streets, Hamilton, Oct. 14; robber got $2,000.

Bank of Hamilton branch at College street and Ossington avenue, Toronto, Tuesday, Oct. 18; robbers got $2,990.

Bank of Toronto branch at Wyoming, Ont., Oct. 20; robbers got $14,000.

WHO WON THE WAR?

The man who thinks he did. The man who guesses he did. The man who knows he did.

## CAPTAIN OF GERMAN RAIDER IN MOVIES

### To Play Role of Pirate in a Hamburg Film.

A despatch from Berlin says:—Captain Count Felix von Luckner, who commanded the German sea raider, the Seeadler, is about to appear in the movies. He will play the role of a pirate in a film called "Mabel and Suitor," produced by the Vera Film Company of Hamburg.

Certainly, Count von Luckner is well fitted to the role. For seven months the Seeadler roamed the Atlantic and Pacific oceans and sank no less than 25 Entente vessels, according to Von Luckner's claim. Finally, the Seeadler was wrecked in the South Pacific. Von Luckner was captured, interned in New Zealand, escaped, was recaptured and at last exchanged.

### University Class for Industrial Workers.

Last week the Workers' Educational Association of Toronto commenced its classes for the season in one of the buildings of the University of Toronto. The subjects to be taught are economics, international finance, trade union law, political philosophy, British history, English literature and composition, psychology and logic, public speaking. The Workers' Educational Association of Hamilton has three vigorous classes in economics, psychology and logic, and English literature and composition. In Ottawa the W.E.A. has also three classes, one each in economics, history, English literature and composition.

In all three cities this instruction is provided for working men and women by the provincial university—another instance of the widespread activity of the University of Toronto in giving education to all people in the province who wish to take advantage of it. A prominent publicist said the other day, "The University of Toronto is leading the way in linking higher education to the world of affairs."

### Method Discovered to Isolate Pox Germs

A despatch from Santiago, Chili, says:—Dr. Arturo Atria, chief bacteriologist of the Chilian Institute of Hygiene, announces that he has succeeded in discovering a method of isolating the bacteria of smallpox.

Dr. Atria claims his discovery will permit the combating of smallpox by direct injection instead of through preventive vaccination.

Walter S. Allward

### 1921 Apple Crop.

British Columbia—Total crop 100 per cent. in excess of last year, or approximately 1,009,000 barrels (3,027,000 boxes).

Ontario—Total crop 60 per cent. of last year, or approximately 960,000 barrels. Eastern Ontario, 45 per cent. of last year's crop. Spys heavy. Western Ontario, 45 per cent. of last year's crop. Practically all sold. Considerable scab and high percentage lower grades.

Quebec—Total crop is from 35 to 40 per cent. of last year, or approximately 35,200 barrels. Color and size fair. Demand and prices good.

New Brunswick—Total estimate about 110 per cent. of last year, or 33,000 barrels.

Nova Scotia—Total crop will be 110 to 115 per cent. of last year, or 1,300,000 barrels.

### Cambridge Refuses Membership to Women

A despatch from London says:—Cambridge University has again voted against granting women membership in the University by a majority of 214. On December 8th last the University refused women membership by a vote of 908 to 1,712.

It was voted, however, to give women titular degrees by diplomas. This recommendation was adopted by a majority of 642.

## FAIL TO AVERT U.S RAILWAY STRIKE

### Brotherhood Leaders Claim Nothing Accomplished by Conference.

A despatch from Chicago says:—Efforts by the Railroad Labor Board to avert the threatened railroad strike through conference with heads of the five unions which have ordered a walk-out, effective October 30, failed when the meeting adjourned on Thursday night with the announcement, by the board, that "while the discussions were beneficial, no definite results were obtained."

"There has been a full and frank discussion of the situation," said a statement given out by Ben W. Hooper, Vice-Chairman of the board. "The Labor Board and the Brotherhood chiefs exchanged views in a perfectly pleasant way. The interview was beneficial, but we cannot say that any definite results were obtained."

"The adjournment is final," Chairman R. M. Barton of the Labor Board announced. "We do not plan any further conferences with the Labor leaders, nor do we plan, at present, to call in the railroad Presidents. I cannot say what our next step might be."

Union leaders said the board had not presented anything which they looked on as in any way a tangible proposition.

"It's somebody's next move," said the head of one of the larger of the five organizations. "Whether it is ours, the board's or the roads', I do not know. I only know that the board brought us here and talked four hours without presenting anything which we could even consider as a compromise. The meeting was absolutely without results.

"We are going back to our headquarters. There is nothing scheduled immediately except to go right ahead with the plans for a strike."

## MAY DEFER TARIFF REVISION IN U.S.

### Leaders in Harding Government Strive to Postpone Action Till Nov., 1922.

A despatch from Washington says:—Some of the strongest leaders of the Harding administration are working quietly but persistently and effectively, it is stated, to prevent revision of the tariff for another fifteen months. It is their plan to throw tariff revision over until the congressional elections of November, 1922, have been decided.

The impression is steadily growing in Washington that the prospects for passing a tariff bill this winter are becoming remote. The resolution to extend the emergency rates on agricultural products will pass.

---

Ludwig III., former King of Bavaria, dies in Hungarian exile.

Some 8,000 spectators watched the international plowing match at Woodstock, Ont.

### Upper Silesia Boundary Line Fixed

A despatch from Paris says:—The Silesian boundary, as decided by the Council of the League of Nations, follows the River Oder from Oderburg as far as Nibotschau, then runs north-easterly in an irregular line as far as Hohenlinde; thence running between Rossburg and Birkenheim, it turns north-westward as far as Lissau. Northwest of the latter place it follows the old frontier of the German Empire to a point where the latter reaches the frontier already established between Germany and Poland under Article 87 of the Treaty of Versailles.

### The Rich Northwest.

The reported discovery of an extensive deposit of iron of high quality on the shores of Lake Athabasca, in the sub-Arctic region of our great Canadian Northwest, follows rather closely upon the account of the oil strike near Fort Norman, on the Lower Mackenzie, west of Great Bear Lake.

The first lure that attracted pioneers to the region was the beaver. The prosperity of the Hudson Bay Company was founded on fur trade with the Indians. The Eskimo had a little copper at the mouth of the Coppermine River, and the Indians took it from them in occasional raids. But the mineral and metal resources of Canada outside of the valley of the Upper Yukon in the neighborhood of Dawson until lately have been comparatively neglected. The great work of the Canadian Ministry of Mines and the reports of the Geological Survey of Canada of an exemplary thoroughness, are publishing to the world the assurance of large returns for sound investment and strenuous toil in a land that Nature never meant for the dilettante, which the homebiding and comfort-loving portion of mankind regards indeed as the abomination of desolation.

### Napanee Visited by Bear and Two Cubs

A despatch from Napanee, Ont., says:—Napanee residents were startled and the female portion of the population badly frightened on Friday by the invasion of an old she bear and two cubs. The self-invited visitors made, however, no hostile demonstration, but wandered about the residential district, sitting on verandahs, which were promptly vacated in their favor, and comporting themselves after the manner of interested tourists. Finally one of the cubs wandered away from its mother and was captured, the other two disappearing.

---

In Holland a municipal gas plant is extracting illuminating gas from a peat and coal mixture.

## NUMEROUS STRIKE-BREAKERS OFFER HELP

### United States Citizens Apply for Positions in Event of Strike.

A despatch from New York says:—Employment departments of Eastern railroads are so flooded with applicants for jobs as strike-breakers that little difficulty in manning and running trains is expected by railroad heads in this district if the threatened strike materializes, it was announced to-day.

"More than one-third of the number of men needed to keep our trains running applied for jobs here on Tuesday alone," said William G. Besler, President of the Jersey Central.

The same conditions obtain on railroads in New York State, according to officials of these roads.

The student body of Dartmouth College, through the official undergraduate paper, The Dartmouth, this morning offered its services to the railroads of the country in event of the threatened strike becoming a reality.

## LINKS IN CHAIN OF EMPIRE'S CABLES

### Canada, Africa, India and Australia Joined by Wireless.

A despatch from London says:—F. J. Brown, Chairman of the Postoffice, Telephone and Telegraph Society of London, speaking before that body, discussed Great Britain's increased communications with the Dominions.

He said that the Imperial cable was a romance of the war. He said that, despite the submarine perils, the former German cable from Emden to New York, via the Azores, was diverted to Penzance and thence to Halifax, and that it is now working from London to Halifax, carrying an average weekly load of 230,000 words.

Mr. Brown said the Postoffice wireless station at Leafield, near Oxford, had just been completed, and a corresponding station near Cairo would be finished at the end of the year, thus forming a link in the chain to East and South Africa. Two more stations are to be erected in England and Egypt, forming the first link in a chain to India, Singapore, Hong Kong and Australia.

## TWO MINUTES' SILENCE ON ARMISTICE DAY

### Beginning at 11 a.m. on Friday, November 11.

A despatch from Ottawa says:—His Excellency the Governor-General has received a despatch from the Secretary of State for the Colonies proposing that on Friday, Nov. 11, the anniversary of the signing of the Armistice, there should be a complete suspension of business, so far as possible, beginning at 11 a.m., and continuing for two minutes.

The Canadian Government has adopted this suggestion, and, accordingly, the Secretary of State for External Affairs has issued a request that the rite be observed throughout the Dominion.

## EXPLAINS ABNORMAL HEAT AND DROUGHT

### French Astronomer Says the Earth is Tending Toward Perpetual Summer.

A despatch from Paris says:—The earth is rushing toward a period of perpetual Summer, according to a French astronomer, who offers this explanation of the present abnormal warm and dry weather. Oscillation of the inclination of the earths axis is the cause of the upheaval of the seasons, he says, and this oscillation is between a 35-degree maximum and a 9-degree minimum every 31,756 years.

The last maximum was reached during the ice age, he contends, and the next minimum will come in the year 2296. Therefore, according to this astronomer, the earth's temperate zones will henceforth become progressively more tropical in the matter of climate.

---

Armistice Day is to be celebrated on Monday, Nov. 7, as a day of general thanksgiving for the bountiful harvest and other blessings with which Canada has been favored this year.

## The Leading Markets.

**Toronto.**

Manitoba wheat— No. 1 Northern, $1.16½, nominal; No. 2 Northern, $1.14, nominal; No. 3, $1.10, nominal.

### King George Cuts Down Living Expenses

A despatch from London says:—Joining the world-wide movement for the reduction of the cost of living, King George has named a committee to investigate household expenses in the Royal Palace. Wages and other items in the maintenance of the palace will be included in the investigation.

The King also announced that he cannot afford to fit out the Royal yacht Britannia for the yacht races next year. "This is a great disappointment," His Majesty says, "as there is no sport the King enjoys more."

It's a Great Life if You Don't Weaken — By Jack Rabbit

# With The BOY SCOUTS

**Windsor Loses President.**

The Boy Scouts of the Border Cities are in mourning as the result of the death of their president, Mr. W. F. H. Hackney, of Windsor. Mr. Hackney has taken a keen interest in Scouting in Windsor and the surrounding district for many years, and within two or three days of his death was working hard in connection with a special piece of work which one of the local Association committees had on hand. His sudden death came as a complete shock to all his associates, and left a vacancy in local Scouting which will not be an easy one to fill. Two hundred and seventy-five Scouts of the Windsor, Walkerville, Sandwich and Ford troops attended the funeral, forming special guards of honor at the deceased president's home and at the cemetery. A "minute of silence," ordered immediately after the burial service had been read, was one of the most impressive features of the ceremony.

**Good Scouting Prospects in Cornwall**

Quite recently nearly one hundred and fifty boys of the town of Cornwall assembled at the local High School in response to an invitation to attend a meeting for the purpose of considering the advisibility of organizing an association of Boy Scouts in Cornwall. Several prominent gentlemen of the town were also present. The chairman, after delivering a short address of welcome to the boys, called upon Mr. H. Lister, of Ottawa, Field Secretary, who, in a clear and forceful manner, explained the aims and objects of the Boy Scout Movement. Mr. Lister's address was listened to with deep interest and at its conclusion a hearty vote of thanks was tendered the speaker. The majority of the boys present registered their names with the local gentlemen who have interested themselves in the movement and the prospects for a Cornwall Association of Boy Scouts are very bright.

**"The Best All-Round Scout."**

At a recent meeting of the Brockville troop voting took place for the purpose of deciding the winner of the Rev. Mr. Whalley's cup, presented for the best all-round Scout in the troop. The meeting unanimously decided that Patrol Leader Stanley Milson was their model of efficiency and he was accordingly presented with the cup. The Brockville enthusiasts are also anxiously waiting the formation of a new patrol owing to the fact that quite recently a large number of recruits have been incorporated into the Brotherhood.

**Scouting Grows.**

During the past few weeks the Ontario Boy Scout Headquarters, Bloor and Sherbourne Streets, Toronto, has issued charters for new troops in the following centres: Rodney, Foleyet, Plattsville, Galt, Stevensville, Pakenham, Kemptville, Westmount, Lucknow, Port Arthur, Renfrew, Thamesville, Galetta, Vars, Beachburg, North Gower, Navan, Ridgetown, Lucan and Burlington. Twenty more centres have decided to try the worth of Scouting. This speaks well for the recent progress of Scouting in Ontario. Scouting grows in proportion to the impressions of worth and efficiency it creates in a community. Let your winter's work be governed by this inexorable law. The patrons of Scouting and even those who are not directly interested in boy welfare are watching you. Show them why and how.

The Mohammedans hold their Sabbath on Friday.

# WHAT TO DO FOR STOMACH TROUBLE

## Good Advice From One Who Had Suffered Much.

Nine tenths of all forms of indigestion or so-called stomach trouble are not due to the condition of the stomach at all, but are caused by other influences. The great contributing cause of indigestion is thin blood. Good blood and plenty of it is required by the stomach to take care of the food. If the blood is thin the stomach functions sluggish, food lies undigested, gas forms and causes pains in various parts of the body. Instead of getting nourishment from the blood the system gets poison.

Relief from this condition can be obtained by the tonic treatment which Mr. D. Shaw, Mt. Stewart, P.E.I., tried and now warmly recommends to others. Mr. Shaw says: "I suffered from indigestion for over four years, and have tried many of the well-known remedies for such troubles, but never obtained more than temporary relief. The trouble was aggravated by constipation setting in owing to the stomach failing to do its work, and laxatives only gave relief to the bowels and left the stomach in worse condition. The result was my blood was growing more and more anaemic, I did not sleep well at night and was growing despondent. I was in this wretched condition when a friend advised me to try Dr. Williams' Pink Pills. I got three boxes and by the time they were finished there was some change for the better. This greatly encouraged me and I continued taking the pills for some three months, by which time my stomach was all right again, my blood good, nerves strong and life was again worth living. My advice to all who suffer from stomach trouble is to give Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills can be obtained through any medicine dealer, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## Origin of Fruits.

The strawberry comes from a cross between the native strawberry of Virginia and that of Chile. The raspberry is native in temperate Europe and Asia. The apricot originated in China. The peach was originally a Chinese fruit. The cherry originated around the Caspian Sea. The plum comes from the Caucasus and Turkey. The pear is native in temperate Europe and Western Asia. The quince comes from South-eastern Europe, the Caucasus and the Caspian region. The apple, one of the oldest fruits, oringinated in Persia, it is generally believed. The almond comes from Persia. The fig originated in Syria. The grape is native in southern Europe.

**Silence Pays.**

Silence is the most satisfactory substitute for wisdom.

Have you ever stopped to think how this country would fare if there were no forests—no wood to supply the thousand and one necessities of domestic life?

The longest journey taken by any known creature is the annual migration of the golden plover. The plovers nest along the Arctic coast of North America. They fly to the Labrador coast as soon as their young can care for themselves, and then start on their extraordinary flight to the shores of South America. From there they fly to their winter home in Argentina. They stay there six months and then return to Northern Canada, having made their annual round trip of more than 22,000 miles.

## Cheating Hungry Lions.

At lonely spots on the Madras Railway, in India, may be seen small stone-built huts with iron gates. They are referred to by railwaymen as "tiger boxes."

The object of these little cabins is to afford protection for pointsmen and other workers against the tigers that frequent the jungles in the vicinity.

These ferocious animals have in the past manifested a peculiar taste for railwaymen, and it was found necessary to place retreats at the more isolated parts of the track. In each hut is placed half a gallon of water and a rough bunk.

In East Africa railway workers use monkeys to warm them of the presence of lions and other wild beasts. The monkeys are placed in cages on high posts or other prominent positions. They scream when they scent the approach of lions.

On the Uganda line, a telegraph operator, on returning to his station, found the station-master and staff barricaded in a hut, while two big lions patrolled the platform! He wired the information down the line, and a locomotive carrying a crack shot was sent to drive the animals away.

## Do Automobiles Start Forest Fires?

Officers of the Massachusetts forest service declare that the number of fires in the forests in the state bears a direct relation to the number of automobile licenses issued. As the automobiles increase so do the forest fires. They claim that city people, touring through the woods by automobile, leave their noonday camp-fires burning and so start fires The statement is possibly justified, but analyzed it simply means, "more tourists, more fires." The remedy is not fewer automobiles but more widespread education as to the dangers of careless handling of fires in the forests. The more city people here are who go for their recreation to the forest, the better will the value of the forest be appreciated and the easier it will be to have conservation measures carried out. If the subject is approached in this way the automobile will become not a menace to the forest, but a great aid to forest conservation.

# THE FALL WEATHER HARD ON LITTLE ONES

Canadian fall weather is extremely hard on little ones. One day it is warm and bright and the next wet and old. These sudden changes bring on colds, cramps and colic, and unless baby's little stomach is kept right the result may be serious. There is nothing to equal Baby's Own Tablets in keeping the little ones well. They sweeten the stomach, regulate the bowels, break up colds and make baby thrive. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## The Voices.

I heard the voice of the city
Calling again and again,
And into her arms there hastened
Millions and millions of men.

And I heard the voice of old gardens,
Of quiet woodland ways;
But few there were who would heed them
In the rush of the busy days.

The cities grow old and vanish,
And their people faint and die;
But the gardens are green forever,
Forever blue is the sky.

## Selling War's Surplus.

War materials on hand at the time of the armistice have been an asset of Governments to be liquidated. This operation has now proceeded to a point where the results run into large figures.

To the end of June England had made sales of 88 per cent. of its war materials, realizing £582,000,000, at par of exchange, $2,670,000,000. The depression in the market for such materials as copper can be understood when it is noticed that England had stocks of non-ferrous metals which it sold for something like $200,000,000. Textiles, leather and equipment realized $150,000,000. Food supplies brought in only $35,000,000.

## A Little Wisdom.

The cost of civility is—nothing.

Creditors have better memories than debtors.

He who courts needless danger is more fool than hero.

It is a good habit now and again to examine your habits.

Better an ass that carries than a horse which throws.

If you give no occasion for suspicion no suspicion will arise.

The best advice is not the most pleasant but the most useful.

If you want good friends all the year round, get some good books.

He who makes it his law to do what he likes will not always like what he has done.

Tact is as much not saying the right thing at the wrong time as in saying the right thing at the right time.

A novel periscope enables an automobile driver from his seat to examine all the tires on a car.

A great many men reason in a circle; that's why there is no end to their arguments.

Minard's Liniment Lumberman's Friend

# HEALTH EDUCATION

## BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Diet is a matter of great importance at any time of life, but at weaning time it is especially so. When the baby is about twelve months old it begins to demand something more than a milk diet for its ordinary sustenance; it has passed from the infant stage and begins to train its stomach for the mixed diet of childhood. What to give the child at this crucial time of life is of very great concern. The best substitute for a whole diet of milk is cereal, such as oatmeal, cornmeal or cracked wheat, which should be well cooked and fed to the baby twice a day; for two or three months the cereals should be strained. In addition to the cereal he should have four cupfuls of milk daily, and a little fresh fruit juice.

When fifteen months old he may have at first a teaspoonful, later one tablespoonful of rare scraped beef, mutton or chicken; when eighteen months old, he may have one-half of a mealy, baked potato, daily.

During the second year, the child should have four meals a day, at 6 a.m., 10 a.m., 2 p.m., and 6 p.m. Nothing but water should be allowed between meals.

When two years old he may have most of the fresh green vegetables when they are thoroughly cooked and finely mashed.

Tea, coffee, cider, wine, beer, soda water and candy should NEVER be given a young child, nor should pies be given it. It would be a good plan indeed to tell the child when it grows older not to touch pies, as they are not good for little children. This can usually be done before the child acquires a taste for pies or pastry, and I remember a few months ago meeting a child of five who did not know the taste of pie and did not want to know, because the parents had taught her to avoid it.

Although the juice of fruits is the best, cooked fruits such as baked apple or apple sauce, are appetizing and helpful. They should be given once a day after a child is eighteen months old, but the fruit should first be strained. Stale raw fruits are dangerous, especially in the city in summertime.

For a child of from two to three years of age, a suitable diet is as follows:

Breakfast—7.30 a.m., the juice of one sweet orange, or the pulp of four or five stewed prunes, or apple sauce. Either a well-cooked cereal—cornmeal, oatmeal, cracked wheat, wheatena—all well salted and with not more than one-half teaspoonful of sugar and milk added; or, soft boiled or poached eggs with stale bread or crisp toast. Glass of warmed milk. 10.30 a.m. Glass of warmed milk.

Mid-day lunch—1.30 to 2 p.m. One-half cup of broth or soup, which may be chicken, beef or mutton, thickened with barley or rice. Chop, rare roast beef, rare steak, chicken or broiled fish, boiled or baked potato. Asparagus tips, carrots, string beans, peas, spinach. All vegetables should be very thoroughly cooked and mashed. The vegetables should be cooked quickly, and not allowed to stay long in the water and lose any vitamines they may contain.

Baked apple, plain bread or rice pudding, corn starch, custard, junket, or stewed prunes with skins removed.

Supper—5.30 p.m. Well-cooked cereal, bread and milk, bread and butter and cocoa, stewed fruit, apple sauce. Glass of warmed milk.

No food between meals. Water several times a day.

If the lady signing herself "A. T. Turriff" will kindly send her name and address to Dr. Middleton at Spadina House, Spadina Crescent, Toronto, he will answer her letter.

**Arabs Like Hyena Stew.**

Some Arabs are extremely fond of hyena stew, and this despite the fact that even a dog turns from hyena meat in disgust.

**MONEY ORDERS.**

Send a Dominion Express Money Order. They are payable everywhere.

Life is like the old farm—we turn one furrow at a time, and only the man who keeps plowing is ready for the sunset.

**Ask for Minard's and take no other.**

During the last forty years over eight thousand wrecks have occurred on the coasts of Great Britain.

The English language is now taught at London Universities exactly as it is spoken.

## Cascarets To-Night for Liver, Bowels, if Bilious, Headachy.

Get a 10-cent box now.

You're headachy! You have a bad taste in your mouth, your eyes burn, your skin is yellow, your lips parched. No wonder you feel mean. Your system is full of bile not properly passed off, and what you need is a cleaning up inside. Don't continue being a bilious nuisance to yourself and those who love you, and don't resort to harsh physics that irritate and injure. Remember that most disorders of the stomach, liver and bowels are gone by morning with gentle, thorough Cascarets—they work while you sleep. A 10-cent box will keep your liver and bowels clean; stomach sweet, and your head clear for months. Children love to take Cascarets too because they never gripe or sicken.

America's Pioneer Dog Remedies

## Mother! Move Child's Bowels With California Fig Syrup.

Hurry mother! Even a sick child loves the "fruity" taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful to-day may prevent a sick child to-morrow. If constipated, bilious, feverish, fretful, has cold, colic, or if stomach is sour, tongue coated, breath bad, remember a good cleansing of the little bowels is often all that is necessary.

Ask your druggist for genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

## A Health Saving REMINDER:

Don't wait until you get sick—USE

MINARD'S "KING OF PAIN" LINIMENT

## USE SLOAN'S TO EASE LAME BACKS

YOU can't do your best when your back and every muscle aches with fatigue.

Apply Sloan's Liniment freely, *without rubbing*, and enjoy a penetrative glow of warmth and comfort.

Good for rheumatism, neuralgia, sprains and strains, aches and pains, sciatica, sore muscles, stiff joints and the after effects of weather exposure.

For forty years pain's enemy. Ask your neighbor. *Keep Sloan's handy.*

At all druggists—35c, 70c, $1.40.

Made in Canada.

Sloan's Liniment (Pain's enemy)

Genuine Aspirin

BAYER

Nothing Else is Aspirin—say "Bayer"

Warning! Unless you see name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an unbroken "Bayer" package which contains directions worked out by physicians during 21 years and proved safe by millions for Colds, Headache, Earache, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago, and Pain. Made in Canada.

All druggists sell Bayer Tablets of Aspirin in handy tin boxes of 12 tablets, and in bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

# TORONTO WOMAN GAINS 35 POUNDS

## ONLY WEIGHED NINETY POUNDS, SHE SAYS.

## Now Feels Fine and Strong and Gratitude to Tanlac is Unbounded.

"Tanlac has built me up from a mere frame weighing only ninety pounds to a strong woman weighing one hundred and twenty-five pounds and my gratitude is unbounded," said Mrs. Lydia Pickup, 12 Ramsay Lane, Toronto, Ont.

"My stomach troubled me so much during the past three years that my life was a perfect burden. My appetite was gone entirely, gas would form and nearly set me wild with pain in the pit of my stomach. The gas nearly smothered me and my heart acted so queerly that it alarmed me. I could get scarcely any sleep and was tired and dull and all worn out. I often turned so dizzy I could hardly stand up, and at times my head hurt like it would burst open. I lost weight until my clothes were entirely too large and I was so weak I could hardly move.

"One day I saw a statement about Tanlac and I determined to try it. I have now taken ten bottles in all and my appetite has come back, I eat anything I want and as much as I want at every meal without pain or any uncomfortable feeling afterwards. I do not have headaches or dizzy spells any more, I sleep soundly every night and get up feeling fine and strong in the morning."

Tanlac is sold by leading druggists everywhere. Adv.

Energy will do anything that can be done in this world; no talents, no circumstances, no opportunities will make a two-legged animal a man without it.—Goethe.

## CUTICURA HEALS SKIN TROUBLE

In Pimples On Face. Itched So Had To Rub Them. Burned and Hurt.

"My face was a mass of pimples and I had an unusual amount on my forehead and chin. They were hard and red and later they came to white heads. They itched so I would rub them, and then they started to burn and hurt.

"I saw an advertisement for Cuticura Soap and Ointment and tried them and found they helped me. I purchased more and when I had used three cakes of Cuticura Soap and one and a half boxes of Cuticura Ointment I was completely healed." (Signed) Miss Anna Fyalka, Carrolls, Wash., Dec. 6, 1919.

Give Cuticura Soap, Ointment and Talcum the care of your skin.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, 344 St. Paul St., W., Montreal.

Cuticura Soap shaves without mug.

# TO WOMEN OF MIDDLE AGE

## This Woman's Letter Tells You How To Pass The Crisis Safely.

Lascelles, P.Q.—"During the Change of Life I felt so weak and run down I could hardly do my work. The perspiration would pour over my face so that I couldn't see what I was doing. We live on a farm, so there is lots to do, but many who felt as I did would have been in bed. I took Lydia E. Pinkham's Vegetable Compound and it did me a world of good. I tried other remedies but I put Vegetable Compound ahead of them all, and I tell every one I know how much good it has done me."—Mrs. DUNCAN BROWN, Lascelles, Prov. Quebec.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ear, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness should be heeded by middle-aged women, and let Lydia E. Pinkham's Vegetable Compound carry them safely through this crisis as it did Mrs. Brown.

**You are invited to write for free advice**

No other medicine has been so successful in relieving woman's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass.

*The foolish man who built his house on the sand—*

He gave an example in folly which anybody can understand.

It isn't so easy, however, to sense the mistake of trying to build the body on foods which lack essential nourishment.

Here, again, is a foundation of sand which gives 'way when the test comes.

Many a food that tastes good lacks honesty of nourishment to equal its taste. Thus it tempts the appetite into mistakes that often are costly.

Grape-Nuts is a food which helps build bodily endurance for life's stress and storm. The full nourishment of wheat and malted barley, together with the vital mineral salts so necessary to bone structure and red blood corpuscles, with phosphates for the brain, is retained in Grape-Nuts. The long baking process by which Grape-Nuts is made gives the food a natural sweetness and an unusual ease of digestibility and assimilation.

Served with cream or milk, Grape-Nuts is fully nourishing, and whether eaten as a cereal at breakfast or lunch, or made into a pudding for dinner. Grape-Nuts has a particular delight for the appetite. Sold by grocers.

Grape-Nuts—the Body Builder
"There's a Reason"

# Black as Dirt About the Eyes

**Liver Was All Upset and There Was Pain Under the Shoulder-blade — Two Interesting Letters.**

So many people suffer from derangements of the liver that we feel sure these two reports, just recently received, will prove interesting reading and valuable information to many readers of this paper.

Mrs. F. L. Harris, Keatley P.O., Sask., writes: "I was suffering from liver trouble—had a heavy pain under one shoulder blade all the time, and was nearly as black as dirt around the eyes, so I concluded to try some of Dr. Chase's Kidney-Liver Pills. I did so, and before I had taken one 25c box the pain had left me and I commenced to gain in flesh, and by the time I had taken two boxes I was completely cured and felt like a new person. My trouble was caused by heavy work out-of-doors, and, of course, heavy eating and constipation. I would advise anyone suffering from kidney or liver trouble to give Dr. Chase's Pills a trial."

Mrs. Charles Terry, Tweed, Ont., writes: "Before I was married I was troubled with enlargement of the liver. My liver became so enlarged that you could detect the swellings on either side, and it was only with difficulty that I could get my clothes on. A friend advised me to get Dr. Chase's Kidney-Liver Pills and take them. I commenced this treatment, and used nine boxes, which cured me at that time. Then, about two or three years afterward I was troubled again with the swelling, but only on my right side. I secured some more Kidney-Liver Pills, and took them, which finally cured me. I have not been troubled in this way since. I can cheerfully recommend Dr. Chase's Kidney-Liver Pills to anyone having kidney or liver trouble.

"We have also found Dr. Chase's Linseed and Turpentine excellent for coughs and colds. In fact, any of Dr. Chase's medicines which we have used have been good."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, 5 for $1.00, at all dealers, or Edmanson Bates & Co., Limited, Toronto.

**Cook's Cotton Root Compound.**

*A safe, reliable regulating medicine.* Sold in three degrees of strength.—No. 1, $1; No. 2, $3; No. 3, $5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor.)

**ECZEMA** You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage. 60c. a box; all dealers or Edmanson, Bates & Co., Limited Toronto.

**WOOD'S PHOSPHODINE.**

*The Great English Preparation.* Tones and invigorates the whole nervous system, makes new Blood in old veins. Sold by all druggists, or mailed in plain pkg. on receipt of price. *New pamphlet mailed free.* THE WOOD MEDICINE CO., TORONTO, ONT.

# The Vital Issue

*"What we have to decide is this—Are we going to continue the protective system of this country or are we not? That is the question and that is the whole question. And the great, big, necessary thing is that every voter in this country from the Yukon to Halifax knows that this is the question he or she is deciding when he or she votes in this great contest."*

—ARTHUR MEIGHEN

THE vital issue in the coming election—in fact, the only issue—is the Tariff, and to every clear thinking Canadian it should be readily apparent that a Protective Fiscal Policy is absolutely essential to stability, progress and development.

Every important country in the world upholds Protection as an essential economic principle. Even Great Britain—so long the stronghold of Free Trade—has now adopted laws that constitute Protection of the most effective kind. In fact, the present policy among most nations is towards raising their tariff walls, not lowering them. In the face of these facts it would be suicidal for Canada to do exactly the reverse and discard the fiscal system which has been responsible for its progress during the past forty-three years.

Free Trade would mean death to Canadian Industry. It would also result in the immediate closing down of Canadian plants of foreign firms, with consequent additional unemployment. There are to-day 650 American factories alone in Canada. Similar proposed ventures would be abandoned. New capital would refuse to come to a Country lacking adequate protection and present industrial enterprise would be promptly strangled by foreign competition.

The preservation of the home market by a Reasonable Protective Tariff is vital to both city dweller and agrarian alike—now as never before. More capital is urgently needed for the development of Canada's enormous resources, which will result in a lessening of unemployment and an increased population. More work and more workers will produce an enlarged home market for products of both city and farm, and the exodus of Canadian men and women—and the dollars they earn—will be precluded.

The United States has slammed her trade door in the face of Canadian farmers by adopting the Fordney Bill, and the farmer is consequently now even more dependent upon the home market than in the past.

Yet Crerar asks you to destroy that home market by voting for Free Trade.

King's policy—if he has one—will result in the destruction of the Tariff.

**Meighen stands four square for Reasonable Protection—Protection for all the people—and asks for an overwhelming mandate to give both industry and agriculture that assurance which will spell prosperity for all. Individual prosperity depends upon National prosperity. Your personal interests and Canada's very existence hang upon your vote.**

*Meighen will lead us through*

IT IS NOT THE THING YOU DO, BUT THE THING YOU LEAVE UNDONE THAT GIVES THE BIT OF HEARTACHE WHEN YOUR LIFE IS DONE

Some men say—I expect to make a fortune in the next five or ten years and I will leave my family rich. Poor man; What presumption. Of course he is young and strong, but how does he know he will live five or ten years—even one year. Life is uncertain and it is this uncertainty that makes Life Insurance such an imperative duty. Very few men die rich, so it follows the great majority die poor.

There is only one sure way of protecting your loved ones, when you are gone, and that is Insurance.

The Scripture says "He that provideth not for his own and especially those of his own household is worse than an infidel.

Then everyman should remember that for him the time will come when

The book is closed and the prayers are said,
And he is part of the countless dead:
Thrice happy, then, if his wife can say
I live because he has made my way.

Mr. and Mrs. Lagorah Millward and baby spent Wednesday last with Mr. and Mrs. Nelson Pruner.

Mr. and Mrs. Isaiah Fetterly of East Williamsburg spent Friday last with Mr. and Mrs. C. Baker and family.

## DELCO-LIGHT PULLEY PLANT

Following out the idea of "a size for every need" the Delco-Light Pulley Plant is a favorite where heavy duty power is desired direct from the engine. It operates separately as either gas engine or electric plant or both at the same time. This plant has the same destructive engineering as all other models of Delco-Light and is the most powerful of any Pulley plant on the market. This plant develops more than four H.P. under brake test but is conservatively rated under full continuous load at 2½ H.P. by the Delco Light company. These plants may be seen in actual operation at the farms of John McGinn, Dixons Corners, Farran Beckstead, Melvin Settlement and James Scott's, three miles west of Morrisburg.

FOR FLETCHER'S
CASTORIA

CASTORIA
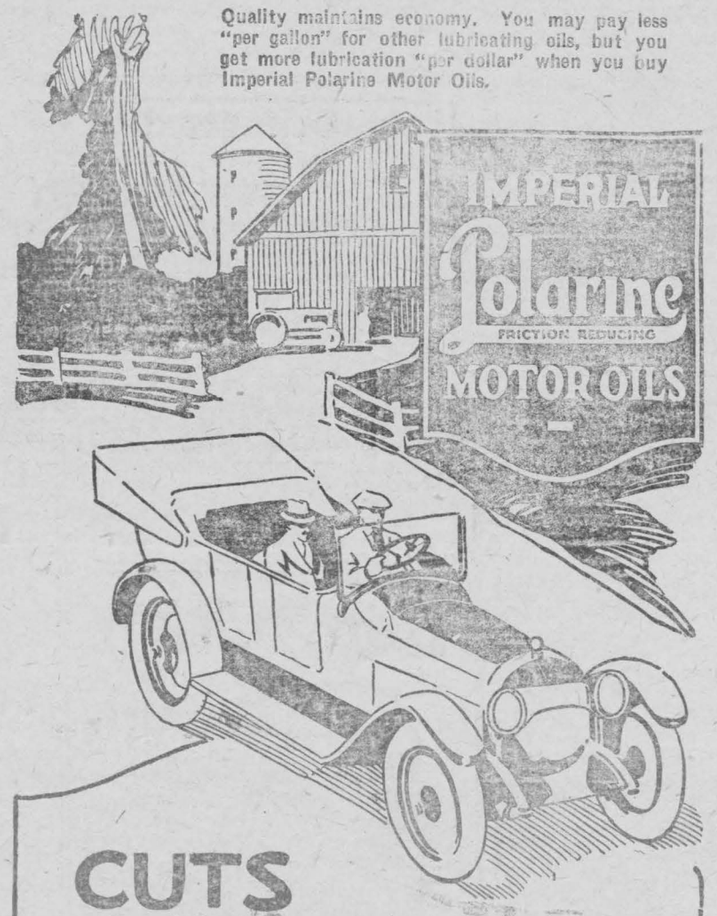
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher.

Quality maintains economy. You may pay less "per gallon" for other lubricating oils, but you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.



CUTS OPERATING COSTS -

THE economy of using Imperial Polarine Motor Oils extends over practically every item of motor operation.

The lubrication afforded at every friction point and the gas-tight piston-to-cylinder seal means a big saving in fuel bills and a noticeable increase of power.

Through perfect protection of all motor parts, undue repair bills are avoided and depreciation is greatly reduced. By using Imperial Polarine Motor Oils you can save dollars this year on maintenance alone. Besides, you realize more profit and greater usefulness from your car.

Always use the grade of Imperial Polarine recommended on our Charts for your type of motor. See Charts at your dealer's or write to 56 Church Street, Toronto, for a copy of our interesting booklet, "Automotive Lubrication," which contains the complete Chart of Recommendations.

IMPERIAL OIL LIMITED
BRANCHES IN ALL CITIES

WE GIVE IMPERIAL Polarine MAKES A GOOD CAR BETTER CRANK-CASE SERVICE

*For a Clean, Efficient Motor*

Dealers displaying this sign will thoroughly clean the old oil and the grit and the dirt out of your crank-case; will flush your motor crank-case with Imperial Flushing Oil and refill it with fresh lubricating oil. Your crank-case should be cleaned every 1,000 miles or less. It means more economy and more satisfaction to employ Imperial Polarine Crank-Case Cleaning Service.

HAY GIVES SERVICE ON THE MINUTE

We send Flowers by Express or by Parcel Post to all points in Eastern Ontario. They reach their destination in perfect condition and please our many customers. We deliver free all orders of Five Dollars and up in value; for Funeral Designs or Cut Flowers, CHARGES PAID TO YOUR EXPRESS STATION, OR YOUR POST OFFICE. This makes it a "fair deal" by putting our out of town customers on the same level as those who buy over the counter here in the city. Telephone us for quick and efficient service.

*"Say it with Flowers"*

**We Lead in Artistic Floral Emblems for funerals, Bouquets for Weddings, Presentation Boquets for all occasions, at the season,s lowest prices.**

Our floral pieces are models of neatness and good taste: we do not crowd the flowers, but let each blossom shew its natural beauty, just as if it had naturally sprung into place, while combinations of colors and shadings are carefully chosen to give the most pleasing results. Our work is done by very competent flower designers who have had a life-long training.

We respectfully solicit your orders for Flowers for any occasion

THE HAY FLORAL & SEED Company
FLORISTS
BROCKVILLE, -- ONT.

The Fire Ranger and His Job

DOTTED over 100,000,000 acres of forest, 1,000 men, organized in the employ of the Government of Ontario, are, this summer, passing back and forth over the canoe routes and along the railways, watching out for the tell-tale smoke which is the sign of fire. Regardless of hot weather, black flies, mosquitoes, discomfort, loneliness or monotony, the Fire Ranger makes his rounds, preventing, quenching or fighting fires in Ontario's forests, paying his own living and traveling expenses, and receiving $3.00 per day for his services.

All in all, the Ontario Fire Ranger is entitled to the help and co-operation of everyone. He deserves all the support the people of Ontario can give him. His work is of vital importance. Heed his warnings. Do what he asks.

Save Ontario's Forests
They're Yours

The Ontario Fire Ranger, during the danger period of the dry summer, is constantly on patrol to catch fires while they are small. He cannot prevent them starting, as a rule. He is at the mercy of all types of carelessness. Thanks to his vigilance, however, two-thirds of the forest fires in the last four years did not spread beyond five acres and of these, half did not exceed one-quarter acre.

Most of Ontario's Fire Rangers are northern woodsmen. Contrary to common belief, only five per cent. of them are students, and these are experienced Fire Rangers or returned soldiers.

Rangers travel chiefly by canoe and in pairs over a definite "beat", the length of which varies according to the degree of danger from fires.

Others travel up and down the forested railway sections on hand velocipedes, following trains to put out fires set by steam locomotives. In all, 2,100 miles of railroad are patrolled steadily all summer.

Two men devote their whole time to examining locomotives to see that screens and ashpans will not permit the escape of sparks and live coals. In the dry belt, a large force of Rangers supervise settlers' fires in land-clearing operations.

Don't blame the Fire Ranger if he asks you to be careful. Don't think he is too particular. He knows the risk. Ontario is poorer by untold millions of dollars through forest fires in the past. Help the Fire Ranger save the increasingly valuable forests that remain.

# The Kingdom of The Blind

By E. PHILLIPS OPPENHEIM.

(Copyrighted)

CHAPTER XXIX.—(Cont'd.)

She would have drawn him further down but he kept away.

"Listen," he said, "when I tell you that I am going to write to your father to-morrow, you know what that means. For the rest, I must think. Perhaps this is the only way out. Of course, I like you but the truth is best, isn't it? I hadn't any idea of this. As a matter of fact, I am rather in love with some one else."

She caught at her breath for a moment, half closed her eyes as though to shut out something disagreeable.

"I don't care," she muttered. "You see how low I have fallen—I'll bear even that. Come," she added, springing up, "my aunt goes to bed before eleven. You can drive me down there, if you like. Are you going to kiss me?"

He bent over her a little gravely and his lips touched her forehead. She caught his face suddenly between her hands and kissed him on the lips. Then she turned towards the door.

"Of course, I am horribly ashamed," she exclaimed, "but then—well, I'm myself. Come along, please."

He followed her down into the taxi and they drove off towards Kensington.

"How long have you known the other girl?" she asked abruptly.

"Very little longer than I have known you," he answered.

She took off her glove. He felt her hand steal into his.

"You'll try and like me a little, please?" she begged. "There hasn't been any one who cared for so many years—not all my life. When I came out—ever since I came out—I have behaved just like other properly, well-brought-up girls. I've just sat and waited. I've rather avoided men than otherwise. I've sat and waited. Girls haven't liked me much. They say I'm odd. I'm twenty-eight now, you know. I haven't enjoyed the last six years. Father's wrapped up in his work. He thinks he has done his duty if he sends me to London sometimes to stay with my aunt. She is very much like him, only she is wrapped up in missions instead of science. Neither of them seems to have time to be human."

"It must have been rotten for you," Granet said kindly.

Her hand clutched his, she came a little nearer.

"Year after year of it," she murmured. "If I had been good-looking, I should have run away and gone on the stage. If I had been clever, I should have left home and done something. But I am like millions of others—I am neither. I had to sit and wait. When I met you, I suddenly began to realize what it would be like to care for some one. I knew it wasn't any use. And then this miracle happened. I couldn't help it," she went on doggedly. "I never thought of it at first. It came to me like a great flash that the only way to save you—"

"To save me from what?" he asked.

"From being shot as a spy," she answered quickly. "There! I'm not a fool, you know. You may think I'm a fool about you but I am not about things in general. Good-bye! This is my aunt's. Don't come in. Ring me up to-morrow morning. I'll meet you anywhere. Good-bye, please. I want to run away."

He watched her go, a little dazed. A trim parlormaid came out and, after a few words of explanation, superintended the disposal of her luggage in the hall. Then the taxicab man returned.

"Back to Sackville Street," Granet muttered.

CHAPTER XXX.

Granet, on his return to Sackville Street, paid the taxicab driver, ascended the stairs and let himself into his rooms with very much the air of a man who has passed through a dream. A single glance around, however, brought him vivid realizations of his unwelcome visitor. The little plate of sandwiches, half finished, the partly emptied bottle of wine, were still there. One of her gloves lay in the corner of the easy-chair. He picked it up, drew it for a moment through his fingers, then crushed it into a ball and flung it into the fire. Jarvis, who had heard him enter, came from one of the back rooms.

"Clear these things away, Jarvis," his master ordered. "Leave the whiskey and soda and tobacco on the table. I may be late."

Jarvis silently obeyed. As soon as he was alone, Granet threw himself into the easy-chair. He was filled with a bitter sense of being entrapped. He had been a little rash at Market Burnham, perhaps, but if any other man except Thomson had been sent there, his explanations would have been accepted without a word, and all this miserable complication would have been avoided. He thought over Isabel's coming, all that she had said. She had left him no loophole. She had the air of a young woman who knew her own mind excellently well. A single word from her to Thomson and the whole superstructure of his ingeniously built-up life might tumble to pieces. He sat with folded arms in a grim attitude of unrest, thinking bitter thoughts. They rolled into his brain like black shadows. He had been honest in the first instance. With ancestors from both countries, he had deliberately chosen the country to which he felt the greatest attachment. He remembered his long travels in Germany, he remembered on his return his growing disapproval of English slackness, her physical and moral decadence. Her faults had inspired him not with the sorrow of one of her real sons, but with the contempt of one only half bound to her by natural ties. The ground had been laid ready for the poison. He had started honestly enough. His philosophy had satisfied himself. He had felt no moral degradation in wearing the uniform of one country for the benefit of another. All this self-disgust he dated from the coming of Geraldine Conyers. Now he was weary of it all, face to face, too, with a disagreeable and insistent problem.

He started suddenly in his chair. An interruption ordinary enough, but never without a certain startling effect, had broken in upon his thoughts. The telephone on his table was ringing insistently. He rose to his feet and glanced at the clock as he crossed the room. It was five minutes past twelve. As he took up the receiver a familiar voice greeted him.

"Is that Ronnie? Yes, this is Lady Anselman. Your uncle told me to ring you up to see if you were in. He wants you to come round."

"What, to-night?"

"Do come, Ronnie," his aunt continued. "I don't suppose it's anything important but your uncle seems to want it. No, I shan't see you. I'm just going to bed. I have been playing bridge. I'm sure the duchess cheats—I have never won at her house in my life. I'll tell your uncle you'll come, then, Ronnie. . . . Good night!"

Granet laid down the receiver. Somehow or other, the idea of action, even at that hour of the night, was a relief to him. He called to Jarvis and gave him a few orders. Afterwards he turned out and walked through the streets—curiously lit and busy, it seemed to him—to the corner of Park Lane, which had belonged to the Anselmans for two generations. There were few lights in the windows. He was admitted at once and passed on to his uncle's own servant.

"Sir Alfred is in the study, sir," the latter announced, "if you will kindly come this way."

Granet crossed the circular hall hung with wonderful tapestry, and passed through the sumptuously-furnished library into the smaller business man's study, in which Sir Alfred spent much of his time. There were telephones upon his desk, a tape machine, and a private instrument connected with the telegraph department. There was a desk for his secretary, now vacant, and beyond, in the shadows of the apartment, winged bookcases which held a collection of editions de luxe, first editions, and a great collection of German and Russian literature, admittedly unique. Sir Alfred was sitting at his desk, writing a letter. He greeted his nephew with his usual cheerful nod.

"Wait before you go, Harrison," he said to his valet. "Will you take anything, Ronald? There are cigars and cigarettes here but nothing to drink. Harrison, you can put the whiskey and soda on the side, anyhow, then you can wait for me in my room. I shall not require any other service to-night. Some one must stay to let Captain Granet out. You understand?"

"Perfectly, sir," the man replied.

"If you don't mind, Ronnie, I will finish this letter while he brings the whiskey and soda," Sir Alfred said.

Captain Granet strolled around the room. There was no sound for a moment but the scratching of Sir Alfred's quill pen across the paper. Presently Harrison returned with the whiskey and soda. Sir Alfred handed him a note.

"To be sent to-night, Harrison," he directed; "no answer."

The man withdrew, closing the door behind him. Sir Alfred listened to his footsteps across the hall. Then he rose from his place and turned on the whole of the illumination of the room. The shadows of the dark spaces were suddenly illuminated, every corner of the stately apartment was distinctly visible. Sir Alfred, with his hands in his pockets, walked slowly around. When he came back he turned out all the lights except the heavily shaded one over his desk, and motioned his nephew to draw his easy-chair up to the side.

"Well, Ronnie," he said, "I suppose you are wondering why I have sent for you at this hour of the night?"

"I am," Granet admitted frankly. "Is there any news?—anything behind the news, perhaps I should say?"

"What there is, is of no account," Sir Alfred replied. "We are going to talk pure human nature, you and I, for the next hour. The fate of empires is a matter for the historians. It is your fate and mine which just now counts for most."

"There is some trouble?" Granet asked quickly,—"some suspicion?"

"None whatever," Sir Alfred repeated firmly. "My position was never more secure than it is at this second. I am the trusted confidant of the Cabinet. I have done, not only apparently, but actually, very important work for them. Financially, too, my influence as well as my resources have been of vast assistance to this country."

Granet nodded and waited. He knew enough of his uncle to be aware that he would develop his statements in his own way.

"When all has gone well," Sir Alfred continued, "when all seems absolutely peaceful and safe, it is sometimes the time to pause and consider. We are at that spot at the present moment. You have been lucky, in your way, Ronnie. Three times, whilst fighting for England, you have managed to penetrate the German lines and receive from them communications of the greatest importance. Since your return home you have been of use in various ways. This last business in Norfolk will not be forgotten. Then take my case. What Germany knows of our financial position, our strength and our weakness, is due to me. That Germany is at the present time holding forty millions of money belonging to the city of London, is also owing to me. In a dozen other ways my influence has been felt. As I told you before, we have both, in our way, been successful, but we have reached the absolute limit of our effectiveness."

"What does that mean?" Granet asked.

"It means this," Sir Alfred explained. "When this war was started, I, with every fact and circumstance before me, with more information, perhaps, than any other man breathing, predicted peace within three months. I was wrong. Germany today is great and unconquered, but Germany has lost her opportunity. This may be a war of attrition, or even now the unexpected may come, but to all effects and purposes Germany is beaten."

"Do you mean this?" Granet exclaimed incredulously.

"Absolutely," his uncle assured him. "Remember that I know more than you do. There is a new and imminent danger facing the dual alliance. What it is you will learn soon enough. The war may drag on for many months but the chances of the great German triumph we have dreamed of, have passed. They know it as well as we do. I have seen the writing on the wall for months. To-day I have concluded all my arrangements. I have broken off all negotiations with Berlin. They recognize the authority and they absolve me. They know that it will be well to have a friend here when the time comes for drawing up the pact."

Granet gripped the sides of his chair with his hand. It seemed to him impossible that with these few commonplace words the fate of all Europe was being pronounced.

(To be continued.)

## Dyed Her Wrap Blue and a Skirt Brown

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

### World's Biggest Cave.

The largest cave in the world is in Edmondson County, Kentucky. It is known as the Mammoth Cave, and consists of a succession of irregular chambers, situated at different levels. Some of the chambers are very large, and the navigable branches of a subterranean river—the Echo River—run through them. The fish in these rivers are blind.

### Matter of Money.

Fred—"If I were to propose, what would be the outcome?"

Freda—"That would depend very much on the income."

### November Holiday Favorable.

Taking the world over, November is the favorite holiday month, twenty-six out of its thirty days being kept as official holidays by as many different countries.

# The Woman of To-Day

### Cleansers and Polishers.

It frequently happens that one has in the pantry or wood-shed the very ingredients that go to make up many expensive compounds for keeping the house bright and clean. It is especially desirable for the farm housewife to know the formulas for some good, home-made applications.

If your floors are dark in color, a good polish for them may be made of one-half gallon of boiled linseed-oil and one gill of soft tar. Do not apply it too liberally and be sure to rub it well, as an excess of oil only serves to collect dust. For the waxed floor, never use a linseed-oil preparation, as the oil cuts the wax. One sperm candle, melted and combined with one pint of kerosene may be used to brighten a waxed floor. Another excellent formula calls for one-half cake of melted paraffin to one cupful of turpentine, applied with a flannel cloth. The very finest preparation for waxing a floor, however, is made of one pound of melted beeswax to one pint of turpentine. Any wax preparation goes farther and is easier to apply if the container is set in a vessel of hot water while being used.

A floor wax that both cleans and polishes is composed of one part melted paraffin to two parts of kerosene. This is also an excellent compound for making a dustless duster. Wring squares of cheesecloth out of the mixture and let dry in the open air. Store these cloths in a metal or fire-proof container, or spontaneous combustion is likely to occur. Twine mops may be dipped in the same solution. To stain a cheap floor so that it resembles oak, paint with about ten cents' worth of permanganate of potash dissolved in one quart of boiling water. Let cool before using, then apply, and when the floor is dry, wax it.

Many expensive furniture polishes contain nothing more than equal parts of boiled linseed-oil and vinegar. Shake well before using. Two parts of crude linseed-oil and one of turpentine, with the addition of a tablespoonful of salt to the gallon, make another good polish. For waxed furniture, use one ounce of beeswax, half an ounce of Castile soap and one-half pint of turpentine. Put all ingredients into a quart bottle, let stand for twenty-four hours, shake well, then fill the bottle with water and it is ready for use.

A fairly good wall paper cleaner is composed of ordinary bread dough, quite stiff, into which a few drops of ammonia have been worked. If you have a large room to clean, it will be worth while to make the following preparation: To one heaping cupful of sifted flour, add one tablespoonful of salt, one tablespoonful of kerosene, two tablespoonfuls of vinegar, two tablespoonfuls of ammonia, and one-half cupful of warm water. Mix and boil until the flour is well scalded and the mixture is quite thick, stirring constantly. Take it from the kettle, cool, then knead with the hands. Pinch off pieces the size of one's fist, rub the soiled paper with short downward strokes, turning and kneading the dough between the strokes to keep the surface clean.

A carpet-cleaning paste consists of two cakes of white soap, shaved fine, one-fourth of a pound of borax, two tablespoonfuls of saltpetre, boiled in three gallons of water until everything has dissolved. Remove from the fire and stir in one-half pint of ammonia. This may be used hot, or cold when it will be in the form of a jelly. Take a little warm water in a pan, dip a scrubbing-brush in the water, then into the soap jelly, and scrub a small space at a time. Avoid the use of too much water. Take the edge of the brush or a small flat stick to scrape up the lather, then wipe the spot with a cloth wrung out of clean hot water.

Equal parts of naptha washing-powder and any good scouring-powder make an excellent polish for metals or glass. This is also good for painted woodwork that resists ordinary methods of cleaning. If used for the latter purpose, wring the cloth as dry as possible and dip into a little of the mixture, then apply with a firm, perpendicular, "wiping" stroke rather than a circular rubbing motion. Baking-soda, similarly used, is also effective on painted surfaces. Use no more water than is necessary in cleaning paint or enamel.

Keep Minard's Liniment in the house.

A nursing bottle has been patented that is made of a collapsible material which can be folded from the bottom.

**NEW LAMP BURNS 94% AIR**

**Beats Electric or Gas**

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal-oil).

The inventor, F. T. Johnson, 246 Craig St. W., Montreal, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him to-day for full particulars. Also ask him to explain how you can get the agency, and without experience or money, make $250 to $500 per month.

**Your Opportunity**

Large Canadian institution established 1887 with assets in excess of $35,000,000, which are rapidly increasing, desires a local representative in this district. Only men of character and ability, however, will be considered. If you feel you are competent to place our proposition before the best people in your community, we can offer you a contract which will be very remunerative. Previous selling experience desirable but not essential If you are the right kind, energetic, ambitious and progressive, we will develop you along proper lines of salesmanship. Apply in confidence, stating age, past experience and length of residence to

**Cutting Down Fuel Requirements.**

The recent reductions in the price of motor fuels are no excuse for carelessness in the utilization of such fuels. The desirability and necessity of maintaining good fuel economy is just as great as ever.

Among the important things affecting fuel economy may be mentioned proper adjustment of the carburetor. All the carbureting accessories such as air meters, fuel vaporizers, etc., should be in first class working order. The carburetor jets should be clean and all fuel passages must be clear and free of leaks. Leakage of air through faulty gaskets, badly fitted valves or other places, sometimes causes faults in operation which are improperly ascribed to the carburetor.

Using the choke excessively is also productive of much trouble in causing carbon deposits and in clogging mufflers. This results in a sluggish engine, reduction of power, and, consequently, more fuel. A vicious cycle is thus established.

Valves should be carefully fitted and properly timed. Factory timing is rarely incorrect and when any repairs are made, or any overhauling of the motor is done, care should be taken to check the time accurately. The cooling system has some effect on fuel consumption. Generally speaking, the hotter an engine runs the less fuel will be used, but this has some exceptions. Cool operation results in fuel condensation in the combustion chamber and consequently carbon formation.

Adequate lubrication is also essential. Bearings that are too tight absorb power and it takes fuel to produce power.

**Practical Paragraphs.**

**Relieving seized piston**—A seized piston is usually considered a pretty serious matter, but it is not necessarily so. It is sometimes possible to remedy this trouble if it is not the worst type of a case. Try this. Open the compression cocks or take out the spark plugs and pour in a liberal dose of kerosene. Let this stay in for fifteen minutes or so and give it a chance to soak in thoroughly. Try to turn over the engine. If the kerosene has not loosened things up so that you can turn it over put the car into low gear, with the clutch left in, and get as many people as possible to help push the car. Generally this will have the desired effect and the pistons will begin to move again.

**Cleaning sight feed glasses**—An excellent way of cleaning the glasses of sight feed lubricators without dismounting is to take a red hot poker and hold it near the glasses. This will melt the solidified oil on the glasses and permit the oil drip to be seen again. Another way is to have a piece of twisted wire connected on the end of the drip nozzle inside the glass of the lubricator. The oil runs slowly down the spiral path and is prevented from splashing over the glass and obscuring the view.

**Rapid fire grease gun**—Here is a method of putting lubricant into the rear axle in double quick time. Put a common funnel in the filler hole of the axle. Remove the cap and nozzle from the end of the grease gun, opening the whole front end of the gun. Put the end of the grease gun in the wide end of the funnel and hold it firmly while screwing up the handle in the ordinary way. The grease will shoot into the axle in jig time, and a rinsing with kerosene and wiping with a bit of waste will remove all traces of the operation from the funnel.

**Creeping rims**—When the shoulders on the wheel designed to hold the demountable rim become worn the rim and its tire will creep on the wheel. Naturally this makes the valve stem project at an acute angle and if continued long enough may cut it off. If the valve stem is held firmly by means of a cap the strain falls upon the lower portion of the stem and that part of the inner tube which surrounds it. In this connection it is well to call attention to the need for tightening the rim lugs by degrees. If they are fully tightened one after the other and all the way around the wheel there is apt to be too much space on one side of the wheel and too little on the other. The proper way is to tighten one lug and then the one nearly opposite it and so on.

## ——and the worst is yet to come

# THE CRUISE OF THE GALLANT "QUEST"

## SIR ERNEST SHACKLETON SOUTHBOUND.

### With a Crew of Heroes to Sweep Unknown Seas and Probe Hidden Secrets.

The other day a trim little steamship, half-schooner, half-yacht, with a white crow's nest above the foremast spars, sailed proudly down the Thames and out to sea.

She looked not much bigger than a tug-boat, but her bows were sheathed with steel, and her sides had a thick overcoating of the toughest timber. On the bridge, as she dropped down the river, stood Sir Ernest Shackleton, waving his farewells to ship and shore—for this was the Quest—outward bound on his fourth expedition to the Antarctic, and on a voyage that may prove one of the most thrilling and romantic in the long story of British exploration.

**A Man of Nerve.**

If all goes well, by the time the Quest drops anchor again in the Channel of Old England she will have circumnavigated the South Polar Continent, visited many of the "lost islands" that stud these turbulent seas, and mapped in some three thousand miles of all but unknown coastline in the Antarctic region.

It requires a man of Shackleton's nerve and daring to plan and lead so hazardous a venture. But all through his career, Sir Ernest has gone for the big thing.

He served his Antarctic apprenticeship twenty years ago with Captain Scott, and was with him and Dr. Wilson on the sledge journey of 1902, which paved the way to the conquest of the South Pole. That glittering prize all but fell to him seven years later, when he scaled the Beardmore Glacier to the lofty plateau that holds the Pole and was compelled by sheer exhaustion to retreat when only a hundred miles from success.

**The Mysterious South.**

More daring still was the plan of his third expedition, for, had he succeeded he would have marched across the southern continent from shore to shore, and settled once and for all many of the problems of the still mysterious South.

Ill-fortune dogged him again, but the splendid failure of the Endurance expedition is illumined by the unconquerable spirit he displayed in the drift down the ice-floes of Weddell Sea, and his heroic voyage of eight hundred miles in a small boat through the wildest seas in the world in search of relief for the party left behind on Elephant Island.

A man capable of deeds like these takes rank with the greatest of English sailors and pioneers. And with all that wealth of experience behind him, who will say that his latest and perhaps his last Antarctic venture—for he is approaching fifty—may not be crowned by a glorious triumph?

And what of the men who are with him? Of the ship's company of sailors and scientists five at least are men who know the Antarctic of old.

**A Sturdy Crew.**

There is the second-in-command, the bold Frank Wild, with his unequalled record in the Far South, who was with Captain Scott in the Discovery, with Shackleton, when he first failed to reach the Pole, with Mawson in the great Australian expedition, and again with Shackleton in the Endurance.

To know Frank Wild is to love him. Small but sturdy, he is a man of iron nerve and infinite resource, an endless stock of cheerfulness, indomitable, tireless, brave as a lion—the man to have beside one in a tight corner.

Frank is the life and soul of any company in which he finds himself. A robust vocalist, he can sing sea chanties by the yard, and spin yarns when everyone else has told his best and last.

Shackleton has with him others who have been his companions on earlier ventures. Commander Frank Worsley, D.S.O., the navigating officer of the Quest, served as captain of the Endurance, and came through all the trials and tribulations that beset the doomed ship before she foundered in the ice of Weddell Sea.

Major Macklin was surgeon and biologist in the Endurance, and Captain Hussey the meteorologist; and Green, the cook of the same expedition, is going out again to keep the mess table of the Quest abundantly supplied with seal-pie and limpet soup, should other dainties begin to run short.

To the two lucky Boy Scouts who were chosen as cabin-boys one may offer congratulations on the great chance that has come their way of seeing the distant isles of the Southern Seas and the wonderland of magnificent desolation.

The Quest has therefore a happy company as she rolls her way down south. Life on board will not be quite that of an ocean liner. The little ship—she is only 111 feet long and 23 feet beam—is so packed full of stores and equipment—an aeroplane that may do great things in fine weather, up-to-date apparatus for sounding the ocean depths to 30,000 feet, dredging appliances, scientific instruments, and so on—that personal comfort must be a secondary consideration.

**Every Man a Sportsman.**

But explorers do not expect staterooms and velvet cushions, and when the men of the Quest have settled down to their quarters they should have a much better time than many a good old salt in days of yore.

One feature of life on board the ship is worth noting. There will be no distinction of class or rank. Officers, scientists, seamen, and cabin-boys will take their meals together in the one mess-room, which is closely lined with sleeping quarters. It is a democratic arrangement unknown on the regular trader or in any navy; but on a vessel where good-fellowship and sportsmanship count for so much in the success that all are striving for, it means a very great deal that the whole party, from the leader downwards, should know each other and be on the best possible terms.

One can picture the scene in that little saloon, with its skylights and swinging lamp, when Shackleton presides at the Christmas dinner to all hands, while outside, in the perpetual daylight of the Polar summer, lie the glistening ice-fields and the massive tabular icebergs that make the wondrous scenery of the Far South.

**Into the Unknown.**

The Quest has a splendid mission. It is a mission that recalls the great voyages of the early pioneers, full of peril and uncertainty, but with that inexpressible magnetism that comes of the danger accompanying the penetration of the unknown. Who knows what stories of heroism she may bring back, what news of lands seen for the first time by the eyes of men, what tales of the misty, ice-clad islets of the Southern Seas, the only remaining relics of an earlier world?

Trade and commerce may gain little or nothing from the labors of Shackleton and his comrades, but we shall know a great deal more of the earth's history when the results of their work have been translated into terms of modern science.

# THE WORLD IN THE MELTING POT

## PROTECT MANKIND FROM HORRORS.

### Advice and Warning by Sir Leo Chiozza Money, Famous Expert on Economics.

Addressing the officers of the United States Army War College, President Harding said the hope of entirely abolishing wars was "perfectly futile." Armies and navies would probably always be necessary.

There had never been so much killing done in the world before as occurred between August, 1914, and November, 1918. Already we see references to the "next war," but it is difficult to believe that those who utter the words realize what a "next war" of the great nations would mean to the world.

**Deadly Weapons of War.**

If two things are realized as certainties of a "next war," it will never occur If they are not realized, the world may rush unthinkingly to its doom.

The first of these things is that the war of the future will be fought by the engineer and the chemist, armed with weapons beside which those we knew, even in 1918, are toys.

The second is that a "next war" will not be fought by combatant forces raised either voluntarily or by conscription. It will be a war to the death between peoples, in which old and young, men, women, and children, the strong and the weak, will be involved in a common holocaust.

As the late war progressed, it became increasingly horrible. Its early period knew nothing of flame projectors, or of poison gas; of tanks or of merciless attacks without warning upon seamen; of squadrons of aeroplanes bombing the sleeping inhabitants of a great city.

To read an account of the sufferings inflicted upon soldiers by poison gas as used in the closing stages of the war is to be nauseated. Never before in the world's history—not even in the annals of savagery—were more sickening tortures inflicted upon man by man.

To the mercilessness of ancient days was added the knowledge of the scientist. Where the barbarian slew his hundreds, the modern soldier, armed with the weapons of science, slew his tens of thousands, and where he did not slay he often ruined men for life. Europe is producing less per man than before the war for many reasons, but not the least of those reasons is that in every country there are men who will never again be able to do a decent day's work—whose bodies and minds will never recover from their terrible experiences.

The next war, if the folly of man allows it to happen, will be a struggle between hosts armed with such machines and explosives, and such death-dealing chemicals, as will destroy the hope of mankind for generations, if not for ever. We shall begin at the dreadful point at which the last war ended.

Poison gas and liquid fire will be developed into weapons capable of destroying ten or twenty times as many men as died on the battlefields of Europe between 1914 and 1918. And in all probability new and more deadly weapons will be forged.

**New Mystery Power.**

The world of science is on the verge of a great discovery—how to utilize the potent forces which are locked in the atoms of which matter is composed. The discovery of radium has revealed to us the possibility of the transmutation of the elements, and, in their transmutation, the setting free of such gigantic powers as have never before been wielded by man. If ever such forces become usable, they will be used in war, and in such a manner as to make it possible to destroy an army corps at a stroke.

Now let us come to the second point, which is that wars of the future will be fought by helpless non-combatants as well as by fighting forces.

Although the late war began only five years after the English Channel had been flown for the first time by an aeroplane, as many as 1,413 persons were killed and 3,407 people wounded in the United Kingdom by German airmen before the conflict ended. Most of these victims were non-combatants, many of them women and children. The next war in the air necessarily means war upon non-combatants.

As soon as war is declared swarms of aeroplanes will fly to the enemy's capital and other great centres of population They will have bombs at their disposal infinitely more effective than those used by the Germans upon London. The air bombs of 1918 were elementary essays in the foul art of murdering from the air.

**Shelters for Millions.**

It is idle to suppose that the "next war" will be a thing confined to specific armies, navies, and air fleets. It will have to be endured by all. The victims probably will be more largely non-combatants than combatants. Either that, or a nation must construct perfect underground shelters for the whole of its population, which is obviously impossible.

Those, therefore, who talk of a "next war" are talking of war upon civilization. The are persons either without imagination or without conscience. We must protect the world from the horrors which threaten it.

**Bill's Vocabulary.**

"Say, pa," Harry demanded, "what part of the body is the vocabulary?"

"Why, Harry?"

"Oh, teacher said Bill Smith had a large vocabulary for his age."

# It Is the Harvest Moon!

It is the Harvest Moon! On gilded vanes
And roofs of villages, on woodland crests
And their aerial neighborhoods of nests
Deserted, on the curtained window panes
Of rooms where children sleep, on country lanes
And harvest fields, its mystic splendor rests!
Gone are the birds that were our summer guests;
With the last sheaves return the laboring wains!
The songbirds leave us at the summer's close,
Only the empty nests are left behind,
And pipings of the quail among the sheaves.

—Longfellow.

# Mother is The Only One

After all is said and done,
Mother is the only one,—
The only one in all th' land
To give a chap a helpin' hand,
To cheer him in the daily work
That he's a-dyin' just t' shirk;
Who says, whenever things go wrong,
"Keep up, boy, 't will be done 'fore long."

Sometimes, when crops refuse to grow,
No matter how I hoe 'n hoe;
'N plow, 'n rake, 'n sow, 'n weed,
Jest so's th' stock ken hev some feed,
Well, pa comes roun' an' says, "Say, Si,
I reck' thet crop's 'bout t' die;"
An' brother Jim, who's citified,
Says, "Really, has the fodder died?"
An' Sue, who reads them romance things,
Says, "Back to earth what old earth brings."
And then she hol's her hands 'n looks
Jes like the gals in novel books.
But ma! Ah, mother comes along
Softly hummin' an ol' sweet song.
I drop th' hoe, I mop my brow,—
Ain't got no use for sunshine, now.—
An' life is filled with sudden bliss,
Fer ma has asked me for a kiss,—
An' after that,—well I jest swear
I wouldn't change with a millionaire!

Some time ago, when Higgins' gal
Was lookin' fer a lifetime pal,
An' when I went to church, why she
Wuz there, too, an' she winked at me.
An' at one meetin', by her side,
I says, "Liz, will yer be my bride?"
'Fore I had time to make a guess,
She squeezed my hand an' whispered, "Yes."

We talked 'bout flowers an' weddin' rings,
'N cottage love, 'n all them things,
'N how we'd live on honey drops
On a farm that didn't need no crops,—
But,—something 'neath my Sunday vest
Told me that I loved Mother best.

But mother's gettin' old and gray:
Some day she'll be laid away
Down in th' field by th' old mill stream,
Where the roses love to dream.
And when thet happens, like 'ez not,
The old farm'll jest 'bout go to pot.
We'd lose all hope, ef ma was gone,
Fer she most runs the farm alone.
Up with th' sparrers every morn,
Callin' the chickens to their corn;
She cooks a meal I wouldn't trade
Fer the finest farmhouse ever made;
She cleans th' house an' sets the hen,
An' shoos the pigs back to their pen;
She feeds the cow, an' then she goes
Inter th' house, an' sews, an' sews,
An' bakes a cake, an' runs th' churn,
An' gathers in th' wood t' burn;
An' ef you say, "Ma, rest a while!"
She'll answer, with her old sweet smile,
"Child, I ain't tired a bit. Are you?
We can't rest when there's work to do."
An', supper o'er, the chores all done,
She hears our lessons, one by one,
An' then she sees th' cat is fed,
An' puts the children all t' bed,
An' when th' family's tucked away,
Then she, alone, kneels down to pray.

After all is said and done,
Mother is the only one.

## Village That Floats.

In the interior of French Indo-China there is a village whose location is a source of worry to captains of passing steamers. They are never certain where they will find it.

Its name is Snok-Trou, and its location is somewhere on the Mekong River. The village consists of forty or fifty little huts built on rafts and lashed together with rattan ropes. Here dwell about two hundred people, whose chief occupation is fishing.

The rear of the village is lashed to half-submerged trees, but the whole town changes its position from time to time, according to the vagaries of the river or the whims of its inhabitants. Steamboats passing up the river will find it at one spot, and on the return journey discover that it has moved elsewhere.

## First Post.

Most people regard the post as a modern institution; yet this is not so, for regular postal services have existed for more than two thousand years.

One of the earliest systems for the delivery of letters was established by Persia more than five centuries before the Christian era.

In those days letters were not written on paper. They took the form of short sticks, on which a message was inscribed either by means of paints, or by burning it on with a kind of primitive poker-work outfit. These letters were delivered by regular relays of postmen over thousands of miles of country.

Even the telegraph was in use in a crude form. Messages could be sent in an hour or two over distances of hundreds of miles by means of a system of shouters, who passed them on from one to the other.

## Growing Fuel on the Prairies.

As a general rule the prairie settler requires first a shelter-belt or wind-break around his buildings. The establishment of a plantation to produce fuel and fencing material is either of secondary consideration or is not given a moment's thought, the popular idea being that is takes trees too long to grow, and that it is not much use doing work the benefits of which will be reaped by some one else. This, however, is a mistake, as has been clearly shown by actual plantations set out on the western experimental farms, on the Dominion Forestry Branch Nursery Station at Indian Head and by private individuals scattered throughout the West.

Order is a lovely nymph, the child of Beauty and Wisdom; her attendants are Comfort, Neatness, and Activity; her abode is the valley of happiness; she is always to be found when sought for, and never appears so lovely as when contrasted with her opponent, Disorder.—Johnson.

## The Diamonds in Your Ring.

There is a tremendous amount of detailed work in setting presious stones.

After an apprenticeship of six years a setter has still a long period of training to undergo before he can attain the experience of a first-class craftsman. Concentration and meticulous care are essential.

Very often impaired eyesight is the fate of the diamond-setter, unless he is careful to obtain a good light. This can be readily understood when we learn that a single ring contains sometimes as many as two hundred small stones, each hardly bigger than a pin's head.

Specially shaped holes have to be cut, and the adjustment of a stone in its setting is a fine art in itself. The hole is so cut that the stone is slipped in with a little pressure, and in such a way that it cannot possibly fall out.

In old-fashioned rings silver takes the place of the more modern platinum, which is used in the better grades of rings. Silver has the disadvantage of tarnishing and softness, and will not stand the necessary heat of soldering so well.

People are often confused about diamonds, rose diamonds, and brilliants. They are all three "diamonds," but a rose diamond has a flat bottom, with only the upper half cut and polished. A brilliant is a completely cut stone. Rose diamonds are not as valuable as brilliants.

A diamond-setter's workshop comes in for a good deal of spring-cleaning.

The floor is regularly swept, and the dust burnt in a special furnace. From the residue is recovered a valuable deposit of gold and platinum dust. This residue is called "lemel," and gives a handsome return when sold.

The setter must also wash his hands before leaving the workshop, for gold-dust has a trick of creeping into the pores of the skin and beneath the finger-nails.

The water is drained off into a tank fitted with an outlet tap halfway down the side. The lemel sinks to the bottom, and once a month is collected and melted down into a very substantial ingot.

## We're All Lopsided

There is scarcely a man or woman who has not one shoulder a little lower than the other The low shoulder is generally the right, for the droop is caused by using one hand and arm more than the other. Usually the muscles of the right side of the body are better developed than those of the left; but, curiously enough, the left foot is often larger than the right.

As a rule, the right eye is better than the left, whilst if we wish to catch an indistinct sound, it is always the right ear that we turn towards it.

This neglect of the left side has made it less robust than the right. Diseases which affect the ears, eyes, nose, or legs occur far more frequently on the weak left side than on the more developed right.

## Origin of Influenza.

The word "influence" appeared first in mediæval Latin under the form influentia. It was used to denote the manner in which stars and planets were supposed to exert a guiding direction over the affairs of men.

Little by little the original meaning of the word was lost in a more general application of the term, until it reached its final significance of any power exerted from the outside—a power ranging from "influence at court" to the "influence of liquor."

It is from the astronomical application, however, that we secure the word "influenza"—the Italian name for a malady caused either by malign planetary influence or atmospheric conditions which were none too well understood even by the men of medicine who gave the disease it title

Make your selection early while stock is complete. This offer is for cash only.

Armistice Day is to be celebrated on Monday, November 7, according to proclamation, as a day of general thanksgiving for the bountiful harvest and other blessings with which Canada has been favored this year.

Remember that liberality has never killed a town. Every public enterprise ought to receive substantial encouragement. Every dollar invested to improve the town is well invested. Don't be a croaker like the frog in the stagnant pool. In every community though, a few croakers are necessary to measure the rate of progress at which live men are advancing.

New Northway Coats at $22.50 to $38.50—D. C. Bush.

Morrisburg, Sept. 21 to Oct. 1.

Mr. and Mrs. Harry Clark, and two children, Kathleen and Marguerite, are visiting Mrs. Clark's parents in Hazelton P.

Mr. B. G. Gamble of Toronto was in own on Friday last.

Notwithstanding the rains of the early part of the week, road construction on our Main street has made satisfactory progress. The first portion of the road, designated by the Counties Council will be completed, wth the exception of the tar, this week. It s a credit to the town and the superintendent Mr. Harry Winstanley, to whom we think much credit is due for his untiring efforts to have this work completed this Fall and in a manner second to none in the county, Much credit is also due the Warden of the United Counties, Mr. Wesley Hamilton of Chesterville, and others who cooperated with Reeve Farlinger at the recent sitting of the Counties Council in having the by-law passed at this session authorizing Mr. Cameron, Road Superintendent, to take over the remainder of the Main street highway, extending to the Government Highway. This work will be completed as soon as weather conditions permit in the Spring. In the meantime business men and other citizens can show their appreciation and civic pride by keeping rubbish off the highway in front of their premises. The present appearance of the street is a marked contrast with that of last Fall, and only with the co-operation of the citizens will it be possible for the Road Superintendent to keep it so.

A popular concert will be held in St. James Hall Tuesday evening, November 8th. The program will be given by the best local and out of town talent. Mrs. J. Wesley Allison and Mrs. W. H. Workman have the entertainment in charge, which is a guarantee of its artistic and financial success. Some of those who will take part are Mrs. Warfield of Prescott, Mrs. W. H. Workman, Mr. George Perkins ,Mr. B. A. Herring, Mr. Cochrane and others. Music lovers of Morrisburg and vicinity are sure to be pleased. Tickets are only 25 cents

For the convenience of their friends, Mr. and Mrs. J. Frank Beckstead wish to announce that they have removed from their farm home which they have disposed of to Mr. M. J. Casselman, and have taken up residence at the Myren VanAllen home, Mariatown, which they have purchased.

The Willing Workers of St. Pauls Lutheran Church will hold a sale of fancy articles and food on Saturday, December 10th, 1921. ap

**THE J. C. ROCKWELL "SUNNY SOUTH COMPANY**

etoain hsrdluu cmfwy vbgkqj

The amusement loving public will be pleased to hear that J. C. Rockwell's "Sunny South" company, the show that leaves you laughing when they say "good night," will be the attraction at the Morrisburg Opera House, Tuesday evening, November 1st. This company has been seen here several times and on their former visits, it was generally conceded to be the best and most pleasing of the kind ever presented on the local stage. This season the performance, from curtain to curtain is absolutely new and right, up-to-the-minute in every respect; being entirely different from anything here-to-fore presented in this particular field of amusement. It is characteristic throughout, being a mixture of fun, melody and dancing, consisting of all the features peculiar to the Negro in Dixie Land, presented by Negros of the cultured and educated class, free from vulgarity,without any objectional features, at the same time sparkling with wit and good humor. Comedy is all that is aimed at and nothing else is reached bar some very clever singing dancing and clever vaudeville stunts; being the kind that are seldom seen outside the larger centres of population; which will make the most fastidious seeker after amusement sit up and take notice. There is snap and ginger from beginning to end; the music is all iew, bright and catchy and of that gingery sort that can be whistled after one hearing. A good sprinkling of new songs has been made throughout the performance and with the atmosphere being of the sort where the audience leave the theatre whistling the latest song hits, you can depend on being sent home feeling satisfied you have received full value for your money. Fro mfirst to last there is not an objectionable word spoken nor the slightest approach to vulgarity in action nor glance.

The "Koontown Parade" takes place at noon,, Main street only.

The prices of admission are 50. & 75 cents, plus war tax. Secure seats now and avoid standing. They are selling at Chalmers' Jewelry store.

**LETTER POSTAGE RATE**

**DON'T TRIFLE WITH YOUR EYES**

We are addressing you who are aware that your eyes need attention, but never come to that point where you are willing to let an Optometrist take charge of your case, and fit you with correcting lenses.

You are making a mistake that you may be bitterly sorry for, when at last you wake up to the fact that your eyesight has been permanently injured by your neglect.

Don't trfle with your eyes, they are your faithful servants only so long as you take care of them. And to persist in doing without glasses when you know you require them, is a degree of foolishness that there is no excuse for. Is not this true? Of course so come in——see us at once. We are here to serve you.

'Phone today for appointment.
