If You Don't Like Our Policy KEEP AWAY

XXV, No. 17 MORRISBURG, ONT. FRIDAY, APR. 30 1926

## EGGS

If Montreal has lost your case or paid you for "seconds" or "cracks", when it should have been "extras", don't be discouraged as there is a market much closer to home, where the eggs are candled and the highest market price paid. You can get your money when you bring in your eggs, and always be assured of your own case back and fair treatment.

## Reliable SEED

For a sure crop with quick and early results, see that you get our HIGH GRADE selected Government Standard Seeds.

MEDIUM RED CLOVER—Northern grown, selected from Clean Farms and recleaned. Red Tag and Government Certificate number on each bag.

ALSIKE—Northern Grown, Specially selected Seed, Red Tag and Government certificate number.

ALFALFA—Ontario Variegated, Peel County grown, Government inspected. Red Tag Certificate number on each bag.

Owing to the splendid strain of this Ontario Variegated Alfalfa Seed we expect to have a very heavy demand for this excellent SEED.

TIMOTHY—Our stock has been carefully selected and is very fine, pure and clean. Each bag bears the Government Red or Blue Tag with certificate number. Our prices for these high graded seeds you will find on comparison are right.

Beginning Monday May 3rd, we will give with each Cash Purchase, a 3 per cent discount coupon. This applies to all Cash Purchases for Hardware, Gasoline, Oil, Seed or anything you buy from us and pay Cash for.

### MISS AGNES M. C. SNYDER

There passed peacefully away on Wednesday, April 28th, at her late residence, Morrisburg, after a short illness, Agnes Mary Caroline Snyder, daughter of the late David Snyder and Caroline Baker.

### MR. GILBERT W. ANDERSON

Mr. Gilbert W. Anderson, who was born at Cardinal 78 years ago, son of the late Peter Anderson, died suddenly at his home in Morrisburg, on Thursday April 15th after an illness of about fifteen months, having been confined to his room since February last. Mr. Anderson had lived in Morrisburg for more than 45 years, and his death removes from our midst, one of our oldest and best citizens. Unassuming, but nevertheless, he was deeply interested in everything that pertained to the welfare of our community. As a kind father, he discharged his duties with marked devotion to his family, which won for him the high esteem of his fellow citizens His many warm friends watched with keen interest, developments during his illness, and learned of his death with much regret.

In 1876 he was united in marriage to Miss Mary Montgomery, who survives, with three daughters and three sons: Clarence of Portland Me.; Arnold, Montreal; Albert, Toronto; Mrs. Frank Coons, at home; Mrs. Roy Geach, and Mrs. D. K. Strathearn, Toronto; also two brothers and three sisters: Mr. Tom Anderson of Montreal; Mr. Beldon Anderson of Prescott; Miss Anderson, Montreal; Mrs. Cole, Lowell, Ont.; Mrs. Hawkens, Ottawa.

The funeral service was held at his late home on Sunday afternoon at 2.30 o'clock, Rev. E. Lawson officiating. The remains were placed in the vault.

Relatives from out of town in attendance at the funeral were: Mr. Tom Anderson, Mr. Beldon Anderson, Mr. and Mrs. Clarence Anderson, Mr. and Mrs. Arnold Anderson and family, Mrs. D. K. Strathearn and Mrs. Roy Geach.

### MR. JOHN H. LOUCKS

Mr. John Henry Loucks, aged 66 years died at the home of his son, Canton, N.Y., on Thursday, April 15th., where he had resided during the last eighteen months. The remains were conveyed to the home of his daughter, Mrs. Chas. Casselman, Morrisburg, and the funeral service was conducted in St. Paul's Lutheran Church on Monday, April 19th, at 2 p.m., Rev. Jacobi officiating. The remains were interred in St. Johns cemetery, Riverside.

Deceased was born in Williamsburg Township, where he had lived almost all his life. Forty-five years ago, he was married to Miss Fedora Phifer, who survives, with one son and two daughters, Mrs. Jas. Weagant, Sacramento, Cal.; Mrs. Charles H. Casselman, Morrisburg, and Ora Loucks of Canton, Ohio; and one sister, Mrs. Amanda Loucks of Morrisburg.

Among the relatives from out of town attending the funeral were Mrs Calvin Loucks, Ottawa and Mrs. Asa Stillson, Prescott.

### NEW DUNDAS PRESBYTERIAL

The public Inaugural Service of the Union of the Women's Missionary Societies of the former Congregational, Presbyterian and Methodist Churches was held on Wednesday April 14th, in the United Church, Winchester The attendance was large and representative delegates were present from all parts of Grenville and Dundas

At the opening of the Inaugural Service, the three groups of representatives of the Uniting Societies entered the church doors singing "The Church's One Foundation." After a very impressive service Communion was administered by Rev. J. A. Waddell, pastor of the church assisted by Revs. Clark, Johnston, Maxwell and Matheson.

Greetings from Dundas Presbytery were extended by Rev. A. B. Johnston, Spencerville, Moderator. During this part of the session the Interim Committee of thirteen members, occupied the platform, presided over by Mrs. Merrill, Morrisburg. Mrs. Earle, President of Winchester Society, extended a hearty welcome to the visiting delegates, to which Miss Connell of Spencerville responded.

The first part of the afternoon session was presided over by Mrs. Clarke Hyndman, Hallville, who conducted the opening devotional exercises. In the survey of the new Presbyterial, Brockville District contributes 7 Auxiliaries, 1 circle, 1 band; Brockville Presbyterial contributes 14 Auxiliaries, 3 Y. W. A. 4 bands; Perth District contributes 8 auxiliaries, 1 band; Matilda District contributes 23 auxiliaries, 11 circles, 19 bands.

Mrs. W. H. Henderson of Ottawa presided at the election of the officers as follows:

President—Mrs. W. S. L. Merrill, Morrisburg.

1st Vice-Pres.—Mrs. Clarke Hyndman, Hallville.

2nd Vice-Pres.—Mrs. I. Hilliard Morrisburg.

3rd Vice-Pres —Mrs. John Anderson, Heckston.

4th Vice-Pres.—Mrs. Murray, Maynard.

Recording Secretary —Mrs. Snider, Kemptville.

Corresponding Secretary — Miss Connell, Spencerville.

Treasurer—Mrs. F. W. Elliott, Prescott.

Young Peoples Work—Miss J. Smith, Heckston.

Children's Work—Mrs. J. Mur-

(Continued on page 4)

### FORMALLY INDUCTED AT KNOX CHURCH

A large congregation gathered in Knox Church on Friday afternoon, April 23rd, for the induction of Rev. Jenkins Burkholder into this pastoral charge. The devotional exercises were conducted by the Rev. Mr. Barker of Cardinal, who preached a very fine and inspiring sermon. The Choir rendered an appropriate anthem.

The Rev. D. MacOdrum, B A., of Brockville, presided and after Rev. Wm. Merrilees of Iroquois had related the steps leading up to the call, the usual questions were asked and duly answered. The new Pastor was then solemnly inducted, and by prayer committed to his new duties, and given the right hand of fellowship by his brethren. Mr. Burkholder having signed the Presbytery Roll signifying adherence to the standards of the Presbyterian Church, words of wisdom and counsel were addressed to the minister and congregation respectively by Rev. George McGregor, B.D., of Prescott and Mr. J. B. Gass of Iroquois.

At the close of the service Mr. and Mrs. Burkholder were escorted to the door of the church by Dr. W. F. Meikle and Mr. F. - R Chalmers and introduced to the people.

Refreshments were them served in the basement, and several happy speeches delivered by the members of Brockville Presbytery present.

Mr. Burkholder comes from Kirkfield and Bolsoner, in the Presbytery of Lindsay, where he has enjoyed a profitable ministry of nearly four years.

The comparatively early settlement of Knox Church is largely due to the Interim Moderator, the Rev. Wm. Merrilees, who has been unwearied in his efforts for the welfare of the congregation.

### PRESENTATION AND ADDRESS

Under the auspices of the Williamsburg Womens Institute a publis presentation of a Life Saving Certificate from the Royal Canadian Humane Association was made to Garnet A. Casselman for saving Roy Casselman from drowning. Mr. Sweet, M.L.A., of Winchester, Rev. Newman of Dundela, and Rev. Iseler were present and made short addresses. Songs by Helen Becker and Evaline and Vivien Barclay and recitations by Ella B. Whitteker and Jack Hollingsworth, and community singing, helped to make the evening enjoyable The District President, Mrs. M. Casselman of Morewood, who was instrumental in getting the certificate, read the presentation address as follows:

"The Royal Canadian Humane Association have acknowledged the application for our award certification to Garnet A. Casselman for heroic action. We all know that Garnet had no thought of personal honor or glory when he did the deed for which he is receiving this certificate. He would say he just did his duty; just did what anyone else would have done under the circumstances. His services at that time were rendered without any thought of self. Therefore he might feel inclined to refuse praise. But let him remember and call to mind the words of the Supreme Man about deeds done in unselfishness, that "Greater love hath no man than this, that a man lay down his life for his friends." That is supreme unselfishness consists in not holding even life itself dear if by giving one's life another may be saved.

He whom we meet to honor had the spirit of supreme service without being called on actually to make the supreme sacrifice and it is his spirit we delight to honor. What a less desirable world this would be to live in if good deeds went unnoticed by any, if fine deeds done in a fine spirit went unappreciated. The human race needs this inspiration and the incentive to good that comes from the public heralding of deeds so outstanding as this of our friend. The human heart needs examples of "great love" for the benefit of our general human conduct. Therefore we ask our honored friend to accept this certificate as the tribute of the public to him personally and we ask him to bear with any embarrasement he feels while fine deeds of great love are held up to human view for inspiration and guidance. So long as our land contains men and women of your spirit, then Canada shall continue to be called "a land with a great future."

After the presentation Roy Casselman spoke a few words of appreciation to Womens Institute for honoring Garnet and tried to express his gratitude for the great service done him. The meeting closed by singing the National Anthem.

## More Power

LESS GASOLINE

*with the Famous* Valve-in-Head Motor *of the Better* McLAUGHLIN-BUICK

FOR over seventeen years the McLaughlin-Buick Valve-in-Head motor has proved its worth to owners. A positive proof that the Valve-in-Head principle is correct.

The net result of the Valve-in-Head construction is more perfect combustion than any other type of motor—less loss of heat resulting in greater power with less gasoline consumption.

Improved carburetion and manifolding has contributed to the increase in power in the Master Six, which is 75 h.p.; and Special Six, 60 h.p.

Only when you have driven the Better McLaughlin-Buick will you realize fully the power—speed—and inexpensive performance—one of the many reasons for the popularity of McLaughlin-Buick.

*The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.*

# SAFETY FIRST ON THE FARM

## Preventive Measures That Save Much on the Overhead.

BY HENRY R. ZELLEY.

The Tommies didn't wear tin derbies and gas masks to try and scare Heinie. No, they wore these encumbrances for the same reason that a farmer wears a large straw hat when working out in the fields during the heat of summer. And the reason was self-protection, or safety first. Sherman gave a first-class definition of war, but the leaders in the last titanic struggle took every possible precaution to protect their men, for these precautions meant higher efficiency in the business of fighting.

And to-day industry recognizes that Safety First means more efficient production. About the first thing you see on entering any large plant is a large safety bulletin board. Just as Safety First is of vital importance in industry, so it is on the farm.

The hazard we find most on the farm comes under what is classed as poor housekeeping in industrial plants. Old boards and scraps of lumber containing nails are frequently left lying around, and usually the nails are turned up. Now, a rusty nail puncture very often means blood poisoning, so piling up this old lumber not only makes the farm look better, but it is a big factor in preventing accidents to men and stock. If rushed with work so that you haven't time to pile up the boards, you can at least turn down the nails.

The next hazard to consider is ladders. Too often ladders are left where last used, exposed to the elements, until needed elsewhere. Now, a ladder may look perfectly sound, and yet the rounds may be decayed where they pass through the sides. The surest protection against this is to keep the ladders well painted and to hang them up, either in the barn or under a shed when not in use.

Another hazardous practice is nailing strips across the ladder to replace broken rounds. There are attachments on the market which permit the safe repair of ladders, and by using these, broken rounds can easily and safely be replaced.

Are your ladders fitted with non-skid shoes or spikes? If not, then you are certainly tempting fate. All ladders for outdoor use, or for work in the barns, should have spike feet. These spike feet can easily be made by any blacksmith, or even by the farmer himself. They are made from three-eighths by two-inch flat iron, bent to go on both sides of the foot of the ladder, and a spike point welded on the end. For use indoors, or on roofs, there is a cork ladder foot which is first-class and insures safety.

A good pair of goggles should be on every farm, and worn while grinding scythes, sickles, mowing machine knives, and the plow disks. Goggles will prevent any chips of steel which might be thrown off, from entering your eyes, and thereby causing severe pain, or even blindness.

Any engines, belts, circular saws, and other machinery on the farm should be guarded, and gears or drive chains on mowing, reaping or planting machines should be protected by a guard. Now, these guards do not have to be elaborate, and can be built by any farmer. The real purpose of guarding machinery isn't to make it fool-proof, but to prevent the worker being hurt, should he slip, or for a few seconds forget to watch out.

There are a few general principles worth noting: Loose boards should be nailed down, broken floors repaired, broken window panes reglazed, and doors with broken or loose hinges put into first-class working order. Traps leading into the hay mow, etc., should have a railing around them. If you don't want to burn your barn down, make it a rule that only electric torches or lanterns can be taken into the barn. And be sure that inflammable material, such as gasoline and oils, are kept in a building some distance from the other out-buildings.

Safety First on the farm isn't foolishness, but is downright good common sense, for it means not only freedom from many accidents, but also more efficiency on the farm. Because you have never had an accident from any of the causes listed here, does not mean that you never will. Don't be a Mr. Chance Taker, but be a Safety First farmer.

## My Raspberry Methods.

Proper pruning greatly improves, I find, the size and quality of black raspberries. The methods are so simple and easy that everyone may practice them. Suppose we start the work in winter with a patch already established.

First, cut away all dead stems close to the ground. Second, cut out the puny young canes, also at the ground. Third, continue to cut out superfluous canes until only the three or four sturdiest are left. Fourth, cut off all puny branches from these canes, leaving only three to five or six of the strongest on each to bear fruit. Fifth cut off all branches lower than a foot from the ground unless one or two are exceptionally strong and there are no strong ones higher up on the same canes. Sixth, cut off the ends of the branches, leaving only a foot of each. This covers all the winter pruning.

Summer pruning will also help make sturdier plants and finer fruit the following year. It consists of two simple operations. The first is to pinch or snap off the growing tip of each new stem when it reaches a height of two to two and a half feet. This is done as each individual shoot reaches the height desired, at intervals between late May and mid-July. The proper time to do this is while the growing tips of the shoots are so soft that the finger and thumb will snap them with a clean break. If knife or shears are needed the result will never be so good.

The objects of this pinching are to make the stems stouter and have branches develop lower down than on unpruned canes. Also, this plan obviates staking or trellising or tying. Stems pinched back in this way develop like little trees, holding up great loads of fruit without supports.

The second operation in summer pruning is to remove the old canes as soon as the fruit has been gathered. Having fruited, these canes have no further use; it is their nature to die at the close of the season. After having fruited they are worse than useless because they not only waste plant food which could better be used by the young canes, but they also harbor diseases and insects and prevent the free access of air and sunlight, both of which are necessary to growth and to the prevention of disease. The sooner they are removed from fruiting the better.—M. G. K.

## I Tell the Price.

I shall give some experience gleaned from several years of advertising. It may point the way to those who are puzzling over the problem of wording their classified advertisements.

There are two kinds of classified ads. One kind is to make direct sales; the other is for getting names of prospective customers.

The first quotes prices of the article advertised and urges the reader to include the money with the first letter so that the order may be clinched. The second usually omits the price but invites the readar to write for price lists, catalogues and further information.

If the advertiser has a big scope of business and a wide range of prices, then it may be well to invite the prospective customer to write for price lists and information. I have found that when I employ this indirect method I must be in a position to follow up my first reply and make it easy for the prospective buyer to make the purchase. I must have good and attractive stationery. I must be able to write a good letter. If my first letter brings no response I will need to follow up with a second letter and possibly a third or fourth. I have found that I failed to make sales because I at first was unsystematic in my methods and follow-up.

I carried ads in two of the best poultry journals in the country several years ago. Here is what they were like:

"S.C. Leghorns. Eggs. Catalogue. Write for prices. Edgewood Farm."

"S.C. Legghorns. Eggs, $3 and $5 per 15. Catalogue. Edgewood Farm."

The first brought inquiries and a few orders after considerable delay.

The last ad brought home the bacon. Orders rolled in without the usual parleying concerning prices and details.

Let me add a bit of personal experience. While at a farm meeting not long ago a farmer friend inquired concerning some Rhode Island Red pullets we then had for sale. We described them but did not price them since we had no intention then of selling any of them. Some days later we changed our mind and accordingly wrote to him but stated no price, thinking it best to let him see the birds since he lived only a few miles distant. For two months I did not see him. Neither did he come to see the pullets.

Again I met him at a farm meeting. I inquired why he had not come to see our Red pullets. Imagine my surprise when I heard him give me this eye-opener.

"The next time you wish to sell me anything state your price when you write. From your letter I could not tell whether your price was what I could afford to pay." —W. E. F.

## Matrimony Vine Killed the Sheep.

A short time after a certain farmer let a flock of sheep graze in an old-fashioned garden surrounding a recently abandoned house on his farm, eight of the animals died. One sheep was posted by a veterinarian and the digestive tract was found to be highly inflamed, as though affected by acute poisoning.

The vegetation upon which the animals had foraged was examined and suspicion pointed toward a bush that seemed to have been most heavily grazed upon. It turned out to be matrimony vine, a rather common garden plant that belongs to the dangerous nightshade family and that has long been under suspicion as a poisonous species.

The purpose of garden plants is to ornament and not to supply forage. Loss of stock due to grazing on yew, privet hedge, castor-bean plants and other ornamentals is by no means rare.

## My Woods Garden Pays.

I guess I am the only gardener in my section of the country who grows a large variety of herbs and flowers from plants and seed gathered in the woods. I have at least thirty different varieties.

I got my start almost entirely from the plants and seed I brought from a nearby forest. I am still adding to my collection, as every year on my trips to the woods I discover new varieties of flowers and herbs.

I made this garden just to gratify my curiosity and to have something to do. But I very soon learned that I could sell ginseng, yellow root and snakeroot for medical purposes.

Among the wild herbs for which I have a ready sale the ginseng and yellow root bring by far the best price. But it takes each of these herbs quite a while to mature. It requires eighteen months for the ginseng seed even to sprout.

I find that it is a better plan to start with the young plants. The ginseng will mature in about six or seven years after the plants have been set out. I sold quite a quantity of ginseng last year. I replaced the plants I removed with others from the woods. I set out young plants every year, so I have ginseng coming on all the time. As I have followed this custom now for several years I have a certain amount of salable ginseng every year. I get from $6 to $15 a pound.

Yellow root does not bring as good a price as ginseng, but it has a very ready sale. I use the same methods in growing the yellow root as I do the ginseng. It requires about three or four years for this herb to mature. In addition to wild snakeroot, for which I have some sale, I also sell quite a lot of sage, dill and horseradish. My wild garden is not only profitable but it is also beautiful. The trillium, Indian turnip, sweet-william, snakeroot and many others bloom beautifully. I also have many wild ferns.—O. H.

## Egg Eating on the Increase.

Old residents of Canada can remember when it was safe to figure on one or more eggs in every dozen purchased being of bad or doubtful quality, that is particularly in cities and towns. There is no such cause for apprehension now, thanks to the system of grading that has been in force since July, 1923, when regulations were introduced requiring that eggs sold to the domestic trade should be subject to the system that had previously been adopted for export eggs. A housewife to-day knows exactly what she is buying and as a result, says Pamphlet No. 59 of the Dominion Dept. of Agriculture, on the value of eggs as a diet and their place in the Canadian diet, the consumption of eggs has greatly increased and three-quarters of an egg per capita is being eaten every day. The pamphlet referred to, which can be had free by applying to the Publications Branch, Ottawa, besides dealing with the place eggs occupy in the food of the nation, also contains various useful recipes.

## We Veal Our Calves.

We are in the butter business. Here is our answer to the question of how a fresh cow can bring us the most, by making veal or butter.

A fresh cow will furnish us about a pound of butter a day. In five weeks, not counting the first week, when the milk can't be used, she would produce, at 50 cents a pound, about $14 worth of butter.

If we put two calves on her we have at the end of five weeks 320 pounds of veal, which at eight cents a pound totals $25.60.

That's what we do as far as possible. If two cows don't happen to freshen at once we usually can buy an extra calf from some neighbor for about $2. A big-boned male calf is ready to veal in five weeks. It takes six or seven weeks for a heifer or lighter stock. We get an average of about eight cents on our local market. —H. S. P.

## Rear Step for Wagon.

Ever notice how many times a man will climb up into his cart when loading it with bags or boxes? Why not make the work easier by fitting a strap-iron step upder the rear sill, so he can step up into the cart without straining every muscle in his arms and chest? Simple little helps like this make a man's work more efficient and at the same time easier. Don't try to do everything by brute strength, but make your head help lighten the work of your hands and your feet.

A farmer must use his hands and feet, but his brain ought to be thinking up schemes all the time to make their work easier, and therefore more efficient. You can make one of these iron steps in the farm shop, out of a piece of old wagon tire or strap iron, bent into shape.

If fudge hardens before it can be poured from the pan, it may be treated like fondant and made into chocolate creams. To do this knead small amounts of the hardened mixture with buttered fingers until it is the consistency of fondant, and mold into balls.

The next step in the poultry business will likely be a "chickery." Such a plant would operate in conjunction with a hatchery, and would provide pullets for sale. Since it is the pullet, and not the day-old chick that the farmer wants, this development will undoubtedly meet his full approval.

# PRUNING YOUR GARDEN SHRUBS

By Henry J. Moore.

In this article it is proposed to give a few simple instructions as to the way in which the owners of a home may properly prune the shrubs he has used to beautify the surroundings. To indicate the importance of proper measures of pruning, it should be said that the successful flowering of the shrubs wherever cultivated depends upon it. Unless shrubs are pruned, many of them will grow so high as to become unsightly. They will crowd your small lawn areas and the stems will become so matted as to preclude the production of flowers in profusion.

### Things to Learn.

There are certain things of importance about which we must learn before we can intelligently prune our shrubs. The chief of these is that there are shrubs of varied characteristics. We should know the nature of the shrubs before we may successfully carry out the work. We may for our purpose divide the shrubs into four classes. Even although we may grow only a few we may have a representative of each in the classes.

Class A.—In this class we will place the shrubs which flower upon the current year's growth, that is shrubs which flower upon the growths made in the same year as the flowers are produced. Hybrid perpetual and Hybrid tea Roses and Hydrangeas belong to this class. It is the practice to prune these shrubs as soon as danger from heavy frost is past. As usually the lower buds on the growths will produce strong flower-bearing growth, it is well to prune severely unless for some reason large bushes are desired. The way to obtain large blooms of Hydrangea paniculata is to remove the very weak growths and restrict the shrub to four or five strong ones, then to cut these back just above buds, three or four inches above the wood of the previous year. Hybrid Perpetual Roses are pruned in much the same way except that the growths are shortened a little further above the wood of the previous year, say eight or ten inches. Hybrid Teas are pruned a little more severely about four inches above the previous year's wood.

Class B.—In this class the shrubs which flower upon growths produced the previous year, as Spirea Van Houttei, The Bridal Wreath; Weigelia, Lilac, Lonicera Tartarica, Tartarian Honeysuckle, and Lonicera Morrowi Honeysuckle, and all shrubby Honeysuckles, also Deutzia, the Snow Flower, the Forsythia, the Golden Bell and others too numerous to mention in this short article.

The shrubs in this class are dependent upon the formation of new growth for the following season's flowers and should as a rule be pruned as soon as the flowers fade. The pruning should consist in the removal of old flowering growths to favor the development of the new and the subsequent ripening of the flowering buds before winter. The pruning of these shrubs should more properly be termed "thinning." If the shrubs have grown somewhat tall they should be reduced in size by thinning out the oldest and the longest of the growths and not by drastically shearing or cutting back the growths to a given height. Shrubs should not be allowed to become overgrown on the average city lot; if so their beauty will be sacrificed. In the case of the Lilacs the growths which have flowered should be removed before seed formation takes place, their growths being cut back to the next joint.

Sub-class C. — This class, which might properly be termed a sub-class of Class B, will comprise the shrubs which are valued for their ornamental berries (fruits), or for their colored stems and twigs during winter. It should not be necessary to say that if after flowering these shrubs are heavily pruned there will be few berries or colored stems left to cheer the eye during winter. In this class we have shrubby Honeysuckles, the same as in Class B, and where we desire to preserve fruiting growths we simply do not thin out the growths which have flowered, very drastically. The Symphoricarpos two kinds, the Snow Berry and Indian Berry, Barberry and Euonymus, also belong to the class. The pruning of these should be left until they have served their ornamental purpose during late winter.

Class D. — The evergreen shrubs should reasonably be placed in a class by themselves. It is true that very little pruning is ever necessary. Whether they are used as specimens in the lawn or massed in the border, it is folly to interfere very much with them. As they usually are of very slow growth the only pruning necessary will be to remove a wayward growth occasionally. Any pruning if necessary should take the form of a thinning.

The writer knows that during past years evergreen trees and shrubs have been shorn to grotesque shapes. In all cases, however, this has been done at the expense of the natural beauty and gracefulness of the subject. The beauty of your evergreen shrubs, no matter where planted, except in hedges, lies in their naturalness. Do not despoil this. In this class we have the Japanese Yew, Thuya (arbor vitae) Dwarf Spruce, Dwarf Mountain Pine, Junipers (although not so good for the atmosphere of a city) and similar low growing forms.

### Hedges for Flowers and Ornamental Fruits.

Briefly the pruning of hedges such as of shrubs which flower upon the previous year's growths, such as the Bridal Wreath, should take the form of a thinning (never a clipping or shearing) just after the shrubs have flowered. Even the Caragana, Siberian Pea, should receive this treatment much as to the contrary we often see it clipped. If you desire to defeat the purpose for which these hedges were largely planted—the production of lovely flowers, clip or shear them.

Hedges of the Japanese Barberry valued for the red stems and berries, should never be clipped but be thinned out lightly every year, so many growths being left as to leave no suspicion in the mind of drastic pruning.

### Foliage and Evergreen Hedges.

When pruning hedges such as the English Privet, Amur River Privet, or the California Privet (the last mentioned not hardy in cold winter localities), also evergreens such as Arbor Vitae, or as it is sometimes called, "White Cedar," White Spruce or Norway Spruce, the practice is to clip these to cause the branches to thicken out. Such hedges are usually planted to serve a purpose where utility is the chief consideration. The evergreens are usually pruned during July and the Privets in spring and midsummer if necessary. For the ordinary deciduous hedge one pruning a year will however suffice.

### Pruning Shrubs An Art.

To properly prune shrubs is an art which however, when studied is easy of accomplishment. To be able to diagnose the case is of prime importance, for the pruning of any shrub is really an operation. Be certain first to which class the shrub belongs and then prune. The objects of pruning may be summarized as follows:—To encourage the development of vigorous flower bearing growth. To eliminate superfluous and worthless growth or branches, and those which are dead, defective, or which have performed their function. To promote by pruning the production of young growths to replace the old and worthless and cause a general rejuvenation of the shrub.

When effecting this annual pruning of your shrubs, don't leave any stubs. Remove the branches at their junction with others. If necessary, as it sometimes is, to shorten long ones, cut these just above smaller branches or buds with a slanting upward cut. A great reason for encouraging young growth is that the strongest stems grow quickly to the light. The lateral ones are thus badly shaded. This may result in their partial or full defoliation and sometimes death. It simply being a case of survival of the fittest. Unless we carefully prune our shrubs unsightly leafless stems will appear near the ground and dilapidation will quickly ensue. When the practice of proper annual pruning pertains, renovation will constantly take place, much to the enhanced appearance of our plantations. Copyright 1926, MacLean Building Reports, Ltd.

# MY PET CLEANING STUNTS

BY NELL B. NICHOLS.

I have a great admiration for the ability of soap and water in cleansing woodwork and furniture. When properly used they accomplish wonders in removing coal dust, finger prints and other soil that accumulates on wood surfaces.

If my furniture or woodwork is soiled badly I moisten a soft cloth in a basin containing a rich suds made from a mild soap or soap flakes and tepid water. This cloth is wrung very dry and then I rub it on the soiled surface with the grain of the wood, cleaning a small area at a time. With a dry piece of lintless cloth I wipe the clean surface.

After the cleaning is completed, polishing is in order. This gives the wood a bright appearance and restores the oil which is lost as the wood is dried by heat and is washed. I sprinkle my dust cloth, which is an old piece of velveteen salvaged from an ancient hat, with the liquid and roll the material tightly. As this stands the polish is distributed evenly through it. I take especial pains to avoid the application of too much polish, for a surplus serves as a collector for dust and soil.

### BRUSHES ARE AIDS.

Most women have a favorite furniture polish which they use. Frequently I use paste wax. I like this on painted surfaces, for it gives a dull, rich finish.

In cleansing waxed surfaces I frequently employ gasoline instead of soap and water. This method is safe only when there is no fire in the room.

I find that much bric-a-brac, such as vases, candlesticks and picture frames, may be cleaned in soap and water. Then there are excellent polishes for cleaning the metal fixtures in the bathroom, keeping them shining in appearance.

Brushes are aids in my home in cleaning the crevices in cut-glass vases, silver and other ornaments. In every home there are windows and mirrors and glass doors to be cleaned. I have two ways of doing this work: the wet and the dry methods. I strive always to take long, overlapping strokes in cleaning and drying glass, for they are easier than short, jerky ones.

For washing glass I prefer to use clean warm water and a chamois skin. I wet the chamois in the water, wring it out quite dry and then rub the surface with it. I rinse the chamois in a second basin containing clean hot water, and go over the glass again. It is almost dry when the chamois has been used a second time. A chamois lasts a long time if you are careful to rinse it in clean warm water and dry it by spreading on a table away from high heat.

### DRY CLEANING.

On cold days I like to clean glass by rubbing it with denatured alcohol. I would be tempted to use this method all the time, especially on windows, if the alcohol were not so expensive.

My dry methods utilize any one of many excellent commercial preparations now available. I moisten the powdered preparation either with alcohol, ammonia or water, forming a thin paste. Then with a moistened cloth I apply a thin film of paste to the glass. After this has dried I rub it off with a dry cloth.

I clean silver by the electrolic way. It is a quick and easy method, and a safe one. Here are the steps I follow: Heat the water to the boiling point in an aluminum kettle and to every quart add one teaspoonful of salt and an equal amount of washing or baking soda. Stir until these have dissolved. Then place the silver in the kettle. Every piece should be covered with water. Boil until the discoloration is removed. Empty the water out of the kettle, rinse the silver in hot water and then dry it. When I rub it vigorously I find that the polish is satisfactory.

The important precaution to heed in cleansing mirrors is not to use enough water, when the wet method is employed, to permit any of it to get behind the glass. When this occurs a cloudy mirror is the result.

In protection of our supply of milk, the whole proceeding must naturally start at the farm. Unless clean milk is produced, it is impossible to deliver a product that thoroughly satisfies the people who consume it.

It's a good plan to get the machinery repaired before the field work is on.

# SUMMARY OF THE FEDERAL BUDGET

Income tax reductions "all along the line." Exemptions are increased from $2,000 to $3,000 for married persons and from $1,000 to $1,500 single persons. This will mean a lower rate on smaller incomes. Upon the amount of the income in excess of the statutory exemptions, the rate on the first two thousand or any portion thereof will be two per cent.; on the amount in excess of two thousand, but not in excess of three thousand, three per cent.; in excess of three thousand but not in excess of four thousand, four per cent. Other changes are made in higher incomes.

Receipt tax—Wiped out.

Penny postage on letters for delivery in Canada and the United States is restored as from Dominion Day next. There will be no change, however, in the present rates on postcards and drop letters.

The tax on playing cards, formerly 8 and 15 cents, according to value of the cards, becomes 10 cents a package.

The following articles exempted from sales tax: Pot barley, pearl barley, split peas, oil shales, articles for exhibitions, menageries, carriages for travellers, travellers' baggage, heirlooms.

Automobiles—Duty on autos at retail value of not more than $1,200, and on motor trucks and motorcycles, reduced from 35 to 20 per cent. general tariff; 17½ per cent. intermediate; 12½ per cent. British preference. On autos valued at more than $1,200, general tariff reduced from 35 to 27½ per cent.; intermediate to 25 per cent.; British preference to 15 per cent. To encourage Canadian auto industry, drawback of 25 per cent. will be paid on materials used in manufacture of above-mentioned motor vehicles, provided that at least fifty per cent. of the cost of the finished articles is produced in Canada.

TARIFF CHANGES.

Cocoa beans—Increased in general tariff from $1.50 to $2.00 per hundred pounds. Corresponding increase made in certain cocoa products.

Coffee, green, free under British preference.

Ginger, spices, nutmegs, mace and arrowroot—rates reduced in compliance with West Indies agreement.

Pineapples—Free under all tariffs, but Governor-in-Council given power to impose duty of fifty cents a bunch under general and intermediate tariffs, leaving them free under British preference when shipped direct.

Pineapples—When in air-tight tins, rate reduced from 1¾c a pound to ½c under British preference.

Fresh meats—General tariff in... ½c per pound.

Seeds—Tree seeds for re-afforestation on free list.

Sugar—For refining, testing 96 degrees of polarization, reduced under the British preference 16.288 cents per 100 lbs., that is from 45 cents to 28.712 cents. Proportionate reductions made in the duty on sugar of other degrees of polarization.

Angostura bitters, imported by ship direct—British preference to be $5 per gallon as compared with present duty of $10.

Sponges—These now pay 12½ per cent. British preference and 8¾ per cent. under British West Indies agreement of 1920. They are to be free under the British preference.

Tin plate—Of class or kind not made in Canada. Free under British preference. Dutiable at five per cent. under the intermediate and general tariffs. Changes made, announced Mr. Robb, for the benefit of the canning industry.

Pasteurizers and equipment for generating electrical power for farm purposes—Duty reduced under British preference to five per cent., under intermediate and general tariffs to 10 per cent. Proportionate reductions made on the raw material.

Steel castings, in rough for manufacture of shotguns—Duty reduced under general tariff to 10 per cent. On gun-stocks duty reduced under general tariff to 15 per cent.

Miners' safety lamps—The duty removed on belt and cap lamp for miners and parts.

Machinery for use only in producing unrefined oil or fertilizers from shale—Put on free list and exempt from sales tax.

Aircraft engines and complete parts—Free under British preference, dutiable at 7½ per cent. under the intermediate, and 10 per cent. under the general until July 1, 1928.

Ethylene glycol, used in the manufacture of explosives, to be free.

DRAWBACKS.

Ninety-nine per cent. on sugar used in manufacture of loganberry wine.

Eighty per cent. on artificial silks, tops and waste until January 1, 1928.

Eighty per cent. on artificial silk yarns enumerated tariff item 583A when imported prior to January 1, 1926, and manufactured before January 1, 1927.

Ninety-nine per cent. on cellulose acetate in powder form when imported after April 30, 1927, and before November 1, 1927, and manufactured before December 1, 1927.

Eighty per cent. on yarns produced from cellulose acetate, dry spun, when imported after October 31, 1926, and prior to August 1, 1927, and manufactured before September 1, 1927.

DIRECT SHIPMENT.

Proposed that after January 1, 1927, benefits of the British preferential tariff shall apply only to goods conveyed direct to a sea or river port of Canada.

Tax on carbonic acid gas as specified in schedule two of the special War Revenue Act repealed.

Next Governor-General?

The Duke of York, second son of the king, likely to be Canada's next governor-general according to a prediction from Ottawa. His Royal Highness is Duke of York, Earl of Inverness and Baron Killarney, a commander in the royal navy and a group captain of the Royal Air Force. He is colonel of the 11th Hussars, the present governor-general being also a cavalry officer, and colonel of third Hussars. He is 31 years old and was married April 26, 1923, to Lady Elizabeth Bowes-Lyon.

## AVIATOR DEPARTS ON ARCTIC EXPEDITION

### Capt. Wilkins Leaves Fairbanks With Cargo of Gasoline.

A despatch from Fairbanks, Alaska, says:—Speeding up preparations for his coming aerial expedition over the Arctic Ocean in search of land, Capt. George Hubert Wilkins took off here on Thursday in the airplane Alaskan on the third flight to Point Barrow with supplies.

Lieut. Carrol B. Eielson, aviator of the expedition, piloted the plane. The 550-mile trip to the supply base at Point Barrow, the starting point of the proposed Arctic flight, was expected to require about five hours.

The plane carried 4,330 pounds of gasoline to swell the store already left at Barrow on the previous flights. The take-off was made after two runs the length of the aviation field of the Fairbanks Airplane Corporation. The ground was soft.

Wilkins undertook the trip despite an injured hand and arm, which he sustained Saturday, while guiding the Alaskan as the plane landed on the ice at the edge of the Arctic Ocean at Barrow, northern tip of Alaska.

## LAKE CARRIERS PROTEST WATER STEAL

### Chicago's Action Strenuously Opposed by Lake Carriers' Association.

A despatch from Cleveland, Ohio, says:—Telegrams protesting against further water withdrawals at Chicago, "under pretext of improving navigation in the Illinois River" were sent by members of the Lake Carriers' Association to Speaker Longworth of the House. The association closed its annual meeting Thursday night.

The association also adopted a memorandum asking Congress to construct dams to raise lake levels.

Newton D. Baker, attorney for the association, declared a last-ditch fight by the association would be necessary against "powerful and widespread interests" to preserve lake levels and prevent increase in shipping rates.

The association asked active support of every industry and shipping industry at Great Lake ports in its battle to have Congress eliminate the Illinois River project from the Rivers and Harbors Bill.

### King and Queen to Hold Courts on May 13 and 14

A despatch from London says:—It is officially announced that the King and Queen will hold courts at Buckingham Palace on May 13 and 14.

## FAMILY OF SIX SWEPT TO DEATH IN ICE JAM

### Athabasca River Floods Are Menace to Residents of Flats Along Shore.

A despatch from Edmonton says:—An entire family of six members, father, mother, and four children, were swept to their deaths by the raging flood of the Athabasca River on Friday afternoon, according to word received by Inspector Piper of the Alberta Provincial Police.

The victims of the flood are Fred Brestlin, with his wife and four little ones, the oldest of whom was 9 years of age. The father was a farmer in the Whitecourt district, where he had been living for some years.

Brestlin and his family were driving along the road on their own land about a quarter of a mile from the river, which was pent up by the ice jam. Suddenly the ice jam, which held back the water in the river, loosened at one side, and the torrent of ice and water came roaring over the low land directly on top of the party. To make their escape was impossible, and almost in a moment the wagon was carried away in a flood with the six persons clinging on in the hope of saving their lives. The horses managed to break clear of the wagon, and they were rescued a short time later.

White Court, Alta., April 18.—With the breaking of the huge ice dam and the rapid lowering of Athabasca River flood waters here on Saturday, Alberta Provincial police and other searchers came upon the bodies of Chris Prestlin, his wife and four children. The bodies were found about 500 yards from the Prestlin home and within a few yards of the spot where they were last seen alive when their wagon capsized in the raging Athabasca River flood torrents about seven miles east of here.

The bodies were but a short distance apart. The parents evidently made a desperate effort to hold the family together in the last struggle when the wagon box floated off the running gears, and upset on a wire fence. The oldest child was but nine years old.

## HOSTS OF MURDERERS AT LARGE IN STATES

### Condition of Lawlessness Unequalled in the History of Civilization.

A despatch from New York says:—There are at large in the United States thousands of men and women murderers who never have been brought to justice, declared Marcus Kavanagh, Judge of the Superior Court of Chicago, in an address at the annual dinner of the National Metal Trades Association. There were in the United States last year, he said, more than 10,000 criminal homicides, as compared with 100 in England.

Judge Kavanagh declared that the condition of lawlessness in the United States to-day was unparalleled in the history of civilization.

"There is no mystery as to why we have so much crime in this country," he said. "Evil-minded men in the United States have no respect for the law, because their experience has been that they need have little fear of its penalties. A man knows that the chances are three to one that he never will be arrested if he kills, twelve to one he never will be convicted, and more than one hundred to one he will not die for his crime.

### Customs Investigation Costs $10,918 to March 27

A despatch from Ottawa says:—Auditors' fees and expenses for special work in connection with the customs probe amounted to $10,918 for the period Feb. 19 to March 27, this year. This was stated in the House of Commons in answer to a question. The auditors will continue their services, with a much smaller staff, until the committee has finished its work.

Another question elicited the fact that R. L. Calder, K.C., special counsel for the committee, is being paid $200 per diem and $15 per diem expenses, "when so engaged elsewhere than in Montreal."

## HAWAIIAN VILLAGE ENGULFED BY LAVA

### Volcano Sends Tide of Molten Rock Into Sea—No Casualties Reported.

Kona, Territory of Hawaii, April 18.—The Village of Hoopuloa, on the south-west shore of the Island of Hawaii, was completely wiped out this morning by an avalanche of lava that burst forth from the volcano Mauna Loa. Ten to fifteen homes were engulfed, but there is no report as to what became of the inhabitants.

A flood of molten rock pouring from the crater struck the sea at 6.21 o'clock in the morning, starting the ocean boiling several hundred feet out at sea.

Plunging into the water just south of Hoopuloa, the lava turned in the direction of Kona, filling the bay and completely burying the landing and ten to fifteen homes located in the vicinity. All houses and the wharf at Hoopuloa were engulfed under fifty feet of lava, the post office being the last building to go. It burst into flames at 8.30 o'clock in the evening.

Army airplanes arrived a few hours after the village was wiped out, but were unable to locate the flow definitely because of the dense steam and smoke. The aviators reported the heat was intense at an elevation of 3,900 feet. Huge clouds of steam hung over the ocean, rising to a height of several hundred feet. As the lava struck the water tremendous rockets of steam shot into the air showering the entire region about the bay.

So far as can be learned there were no casualties.

## REFUND OVERPAYMENT OF 1925 INCOME TAX

### Budget Proposals Not Effective Until Royal Assent is Given.

A despatch from Ottawa says:—In reply to inquiries as to the effect of the income tax proposals, Hon. J. A. Robb, Minister of Finance, has issued the following statement:

"The changes in the Income Tax Act announced in the Budget will apply to income of 1925 and thereafter, but cannot be acted upon until after an act has been passed by both Houses of Parliament and Royal assent has been given.

"Taxpayers may, however, on their own responsibility, estimate their own tax liability under the existing law, or the Budget proposals of April 15, 1926, and pay accordingly on or before the 30 of this month, but no assessments will be levied until after the bill becomes law. When approved, refunds will be granted in cases where overpayments have been made."

### 6000 New Settlers Leaving British Isles for Canada

London, April 18.—Six thousand emigrants are leaving the British Isles for Canada, and there will be a race across the Atlantic between several lines to be the first to open the St. Lawrence season.

The "Aurania" of the Cunard Line from Liverpool, the "Ausonia" and the "Montrose" from Southampton, the White Star Line "Doric" from Liverpool, and the Canadian Pacific liner "Montnairn" from Glasgow have sailed, and the White Star liner "Araby" leaves Southampton to-morrow.

Most of the Emigrants are travelling under the £3 scheme, and include many hundreds of families.

### Two Manitoba Companies to Build Lines to Gold Fields

A despatch from Winnipeg says:—Subject to the provision that construction work commence within one year and be completed within three years from the date of approval, two bills giving charter rights for the construction of railway lines into the Central Manitoba mining district were reported by the Private Bills Committee. One of the charters was granted to the Winnipeg River Railway Co., and the other to local interests headed by J. D. McArthur, railway contractor.

## THE MARKETS

TORONTO.

Man. wheat—No. 1 North., $1.68; No. 2 North., $1.61; No. 3 North., not quoted.

Man. oats—No. 2 CW, nominal; No. 3, not quoted; No. 1 feed, 51½c; No. 2 feed, 49½c; western grain quotations on c.i.f. bay ports.

Am. corn—No. 2 yellow, track, Toronto, 86½c; No. 3 yellow, 85½c.

Millfeed—Del. Montreal freights, bags included: Bran, per ton, $30.25 to $31.25; shorts, per ton, $32.25 to $33.25; middlings, $39.25 to $40.25; good feed flour, per bag, $2.30.

Ont. oats—40 to 42c, f.o.b. shipping points.

Ont. good milling wheat—$1.33 to $1.35, f.o.b. shipping points, according to freights.

Barley, malting—62 to 64c.

Buckwheat—No. 2, 72c.

Rye—No. 2, 85c.

Am. corn, track, Toronto—No. 2 yellow, 84½c; No. 3 yellow, 82½c.

Man. flour—First pat., $8.85, Toronto; do, second pat., $8.15.

Ont. flour—Toronto, 90 per cent. pat., per barrel, in carlots, Toronto, $5.95; seaboard, in bulk, $5.95.

Straw—Carlots, per ton, $9 to $9.50.

Screenings—Standard, recleaned, f.o.b. bay ports, per ton, $22.50.

Cheese—New, large, 20c; twins, 21c; triplets, 22c; Stiltons, 23c. Old, large, 25c; twins, 26c; triplets, 27c.

Butter—Finest creamery prints, 43c; No. 1 creamery, 42c; No. 2, 41c. Dairy prints, 35 to 37c.

Eggs—Fresh extras, in cartons, 35 to 36c; fresh extras, loose, 33c; fresh firsts, 31c; fresh seconds, 28c.

Dressed poultry—Chickens, spring, lb., 70 to 80c; chickens, lb., 35 to 37c; hens, over 4 to 5 lbs., 30c; do, 3 to 4 lbs., 27c; roosters, 25c; ducklings, 5 lbs. and up, 30 to 31c; turkeys, 40c.

Beans—Can. hand-picked, $2.60 per bushel; primes, $2.40 per bushel.

Maple produce—Syrup, per imp. gal., $2.40; per 5-gal., $2.30 per gal.; maple sugar, lb., 25 to 26c; maple syrup, new, per gal., $2.50.

Honey—50-lb. tins, 11½ to 12c per lb.; 10-lb. tins, 11½ to 12c; 5-lb. tins, 11 to 12½c; 2½-lb. tins, 14 to 14½c.

Smoked meats—Hams, med., 29 to 31c; cooked hams, 46 to 48c; smoked rolls, 22c; cottage, 25 to 27c; breakfast bacon, 32 to 36c; special brand breakfast bacon, 33 to 39c; backs, boneless, 35 to 43c.

Cured meats—Long clear bacon, 50 to 70 lbs., $24.25; 70 to 90 lbs., $23.75; 20 lbs. and up, $22.34; lightweight rolls in barrels, $42.50; heavyweight rolls, $39.50 per bbl. Lard—Pure tierces, 18 to 18½c; tubs, 18½ to 19c; pails, 19½ to 20c; prints, 20½ to 21c; shortening, tierces, 15 to 15½c; tubs, 15½ to 16c; pails, 16 to 16½c; blocks, 17½ to 18c.

Heavy steers, choice, $7.50 to $8.25; do, good, $7 to $7.25; butcher steers, choice, $7 to $7.50; do, good, $6.25 to $6.75; do, com. to med., $5 to $6; butcher heifers, choice, $6.50 to $7.25; do, good, $6 to $6.50; do, com., $5 to $5.50; butcher cows, choice, $5.25 to $6; do, fair to good, $4 to $5; butcher bulls, good, $5 to $5.75; bolognas, $3.50 to $4; canners and cutters, $2.50 to $3.50; springers, choice, $80 to $90; good milch cows, $70 to $80; medium cows, $45 to $60; feeders, good, $6.25 to $6.75; do, fair, $5 to $6; stockers, good, 5 to $5.50; do, fair, $4.50 to $5; calves, choice, $12 to $12.50; do, good, $10 to $11; do, lights, $5 to $9.50; good lambs, $14 to $15; do, med., $12.50 to $13; do, culls, $10 to $11.50; good light sheep, $7 to $9; heavy sheep and bucks, $5.50 to $6.50; hogs, thick smooths, fed and watered, $13.10; do, f.o.b., $12.50; do, country points, $12.25; do, off cars, $13.50; do, thick fats, f.o.b., $12; select premium, $2.55.

MONTREAL.

Oats, Can. west., No. 2, 69c; do, No. 3, 64c; extra No. 1 feed, 61c. Flour, Man. spring wheat pats., firsts, $8.80; seconds, $8.30; strong bakers', $8.10; winter pats, choice, $6.20 to $6.30. Rolled oats, bag 90 lbs., $3.30 to $3.40. Bran, $31.25. Shorts, $33.25. Middlings, $40.25. Hay, No. 2, per ton, car lots, $13.50.

Butter, No. 1 pasteurized, 36¼c. Eggs, fresh extras, 37c; fresh firsts, 34c. Potatoes, Quebec, per bag, car lots, $4.25 to $4.50.

### Total Wheat in Canada 161,376,000 Bushels

A despatch from Ottawa says:—The total quantity of wheat in Canada on March 31, 1926, was 161,376,000 bushels, as compared with 121,084,000 bushels on March 31, 1925. These figures are given in a crop report issued by the Dominion Bureau of Statistics, based on returns from elevators, flour mills, railway companies and crop correspondents.

### Train Whistle Saves People From Fire Which Razes Home

A despatch from Port Arthur says:—The engineer of a Canadian Pacific freight train passing Hurkett on a recent morning noticed a house on fire. He blew his whistle shrilly, being unable to stop his train as he had to meet the passenger train a few miles west. He succeeded in waking the owner of the house. Mrs. Thirsbe, who with her child and aged mother, made their escape from the burning building. The husband was at the time in Port Arthur. It was entirely due to the vigilance of the Canadian Pacific engineer that no lives were lost in the fire, which destroyed the house.

### Native of Canada Dies at 110 Years of Age

A despatch from New York says:—Self-supporting until a few weeks ago, Mrs. Susanna Divo, said to be a native of Canada and 110 years old, died of bronchial pneumonia at Bellevue Hospital.

According to her landlady, who disputed the assertions of hospital authorities that Mrs. Divo was only 99 years old, she had supported herself by making Indian moccasins and doing beaded work until she contracted the disease.

## BANK MANAGER TAKES HIS LIFE IN BUILDING

### No Reason Given for Tragedy in Oshawa as Books Are in Good Shape.

A despatch from Oshawa says:—J. C. Anderson, 61 years of age, manager of the branch of the Bank of Montreal at the corner of Bond and Simcoe streets, this city, was found shot through the head Thursday afternoon in the basement of the bank with the discharged revolver lying by his side.

Mr. Anderson left his office about 2.30 and about 3.30 when the bank messenger was making his rounds, he found the body in the paper vault in the basement. No report of the firing of the revolver was heard by the staff of the bank or by the inspector who was paying a visit from the head office and who was at work on the floor above. This is accounted for by the heavy cement work in the walls and partitions of the basement.

Mr. Anderson came to Oshawa from Ottawa about three and a half years ago and had been in the employ of the bank for thirty-five years and for the past two years had been treasurer of the Oshawa General Hospital Board of Directors.

Coroner Dr. J. F. Randell, after making an investigation found an inquest not necessary. No reason can be given for the tragedy as the books are reported in good shape

MUTT AND JEFF—By Bud Fisher.

Mutt Believes in Doing Everything in the Quickest Way Possible

## NEW DUNDAS PRESBYTERIAL

(Continued from page 1)

dock, Shanley.

Associate Helpers—Mrs. McCarley, Shanley.

Supply Secretary—Miss Farlinger, Morrisburg.

Missionary Monthly—Mrs Coleman, Hallville.

Christian Stewardship—Mrs. Earl Winchester.

Strangers' Secretary—Mrs. Jas. Nash, Iroquois.

Delegates appointed to Branch meeting—Miss Pearson, Mrs. R. J. Douglass, Merrickville; Mrs. Murray, Maynard; Miss Fairbairn, Spencerville; Mrs. W. H. Casselman, Chesterville; Mrs. A. B. Allison, Morewood; Mrs. (Rev.) Wright, Cardinal; Mrs (Rev.) Miller, Kemptville.

A Round Table Conference was conducted by Mrs. Henderson, who solved many difficulties which presented themselves.

An inspirational consecrational service was in charge of Mrs. Hilliard who made an appeal to the women to give them time, talent and service unreservedly to the work of the Master.

At the noon and tea hour most delicious and dainty meals were served by the ladies of Winchester W.M.S. Miss Phillips and Miss Edna Shaver presided at the organ during the sessions and Miss Phillips sang a solo most acceptable. The choir rendered a beautiful anthem in which Mrs. Hutt and Miss Walker took solo parts.

Preceeding the evening session, greetings were presented by the W. M.S. of St. Pauls Church, the ladies of Baptist Church, the W. C T. U. and the Womens Institute.

After the devotional exercises at the evening session, the Rev. J. W. Clark introduced the officers of the new Executive and in a masterly and eloquent address charged them with the responsibilities of their offices. He set before them, their duty of enthusing all the women of Presbyterial with Missionary Zeal, and made them feel the seriousness and worth-whileness of their task, concluding with an earnest prayer for God's blessing to rest upon each member

Mrs. Merrill, in a few pleasing words introduced the speaker of the evening. Mrs. Henderson whose Mission address was on "What is My Share of the Lifting Up on the Christ."—It is the glorious privilege of man to pass on the gospel story and when we have received power, then are we able to go on and tell the story. She said we do not know the meaning of the word sacrifice today in comparision with those pioneer women who have gone before. On the Mission fields of the United Church of Canada the sun never sets. Every man, woman and child is needed in this great work. "Canada for Christ", should be our slogan. In the Home Mission field there is a great untouched area to whom the W M.S. can minister. She spoke of the need of Missionary Workers in India, China, Japan and other foreign fields. How are we going to meet this need? We must go quickly and tell. We must convince ourselves of the present need. She spoke of the indifference at the home base, The Love, Sympathy and gifts of every woman is needed. Divine power is through human Leadership. The Master is giving to each of us a harp, and asking us to put in the strings—optimism, hope, patience, love and hard work. Do not put in any undue criticism or selfish desires. The Master will sweep His fingers over these strings and this strain shall swell, "Our Jesus has done all things well."

The report of the Courtesy Committee was brought in by Mrs. McDougall of Jasper, and a hearty vote of thanks was tendered to all who in any way contributed to making this gathering a success.

The closing hymn "Breathe on Me Breath of God" and prayer by Rev. J. W. Clarke closed a very helpful and successful Missionary Convention.

## Cream Wanted

We have installed a creamery in connection with our Montreal store and are in the market to buy cream for butter-making. We pay expenses from your nearest express shipping station, and pay you promptly for each individual shipment.

## FIRE THREATENS OUR NATIONAL HERITAGE

### Carelessness Destroys 3,000,000 acres annually of Canadian Forest

Loss of standing timber by fire continues to be appalling. On the average, over 3,500 million board feet are destroyed annually. The forests of Canada are being depleted at a rate they cannot possibly withstand; more than half of this depletion is due to fire, insects and decay. The future of the forest industry is just as dependent on the seedling trees and young growth as the pulp and paper and lumber mills, and industry generally, are dependent on mature timber—both must be saved from the ravages of fire.

In addition to the shelter afforded by the forest to the farmer and his stock, settlers in forested regions are vitally dependent on the woods for winter employment. Care with fire in land-clearing operations is all-essential—**burned timber pays no wages.**

Canada has the finest inland fishing in the world, but these splendid food and game fish require clean, cold water in the streams to ensure prolific reproduction. Forest fires are inimical to fish life.

Game animals attract foreign tourists and induce Canadians to seek pleasure, health and adventure in the great outdoors. These animals are distinctly a forest resource—utterly dependent on it for protection and food. Forest fires are most destructive of such wild life.

Ninety per cent of the forest fires are caused by carelessness. Are you doing your part to prevent this wanton waste and destruction?

For Half a Century the Standard, Successful Treatment
Dr CHASE'S OINTMENT

Here are the facts

When 3 telephone orders can be taken in the time required for one order over the counter — as has been proven — and the amount of a telephone sale averages almost a third more, as it does, can there be any doubt in your mind that the merchant who uses the telephone consistently will win out over the rival who does not?

Can you afford to overlook the rapidly increasing importance of the telephone in your business for increasing sales and reducing the cost of selling?

Be open-minded. Try it — not spasmodically, but consistently, and judge for yourself.

THE BELL TELEPHONE COMPANY OF CANADA — LOCAL LONG DISTANCE TELEPHONE

## AUCTION SALE

The undersigned will offer for sale by public auction, without reserve, on lots 2 and 3, Second Concession Township of Williamsburg, three miles north-west Aultsville, on Wednesday, May 5th, commencing at one o'clock sharp, the following Live Stock and Chattels:

24 Holstein Cattle consisting of 10 High-Grade Milch Cows, which have all freshened this spring; 10 High-grade Holstein Heifers rising one year old, from pure bred registered bull, "Echo Segis Wayne"; 4 pure-bred Registered Bull Calves; one Brood Sow, due to farrow about May 8th; one stack, consisting of about 12 tons clover and timothy hay, mixed; 1000 feet of Basswood and Spruce Lumber; 50 cords of Beech and Maple stove wood.

The reason I am disposing of the above listed cattle is that I have given up the 100 acre farm of W. Doyle, which I have had rented, and am unable to carry the present stock I have on hand on my farm. I wish to impress upon the minds of the public that these are not a culled bunch from my herd. These cows are all of my matured grade, with teats and udder O.K., and they range in age from 6 to 9 years. Parties looking for high-grade and high-producing milch cows would do well to attend this sale.

TERMS—$10.00 and under cash; over that amount 12 months credit given to parties furnishing approved joint notes, or 3 per cent. off for cash.

Ross Beckstead, Auctioneer.
Chas. A. HART, Proprietor.

Neptunite Varnishes

Lowe Brothers Neptunite Varnishes are ideal for either exterior or interior use.

They have the distinction of being the only varnishes that have successfully withstood the heat from a Hot Iron on their surface. They will not turn white, crack under the hammer test or show heel marks. Ice and snow or rain have no effect on them.

They produce a remarkably beautiful finish; they wear longer and cost less than most good varnish.

Neptunite Varnish-Stain

Is a high grade varnish stain. It varnishes and stains in one easy operation. The stain colors are non-fading. Neptunite Varnish Stain has splendid wearing qualities and gives a fine mirror-like gloss. Easy to use. Dries quick—has a surface like glass that is free from stickiness and dusts off easily.

Mellotone Flat Wall Paint

For interior decoration; it is a liquid paint, ready for use. Mellotone combines the delicacy of a water paint with all the durable elements of a lead and oil paint.

It is very economical and easy to apply. It can be washed with soap and water; is color fast and covers 900 square feet to the gallon.

House Paint

Lowe Brothers "High Standard" Liquid Paint covers fully half as much more than a so-called cheap paint. More than this, "High Standard" is so easy to apply and lasts so long that it is conceded by hundreds of users to be the most economical paint per square foot sold.

It comes in a splendid range of beautiful colors and produces a high gloss finish that wears off evenly, leaving the surface in splendid condition for repainting. Try it when next you paint.

Auto-Gloss

There is no need to drive a shabby car when any amateur can refinish his car in a few hours with Lowe Brothers Auto-Gloss.

Auto-Gloss produces a finish of remarkable beauty and depth. It flows out evenly and leaves no brush marks or overlappings. It is permanent and impervious to the weather.

We will be very glad to supply you with literature telling you how to restore the finish to your car. You will be surprised to learn how easy it is.

LEADING CHARACTERS IN THE STORY.

Richard Viner, a young man of leisure living with his aunt in London, one night while taking a walk, comes upon the dead body of

Joseph Ashton, an apparently wealthy resident of the neighborhood.

Dr. Cortelyon, whose residence is nearby, says Ashton had been stabbed through the heart.

Miss Wickham, Ashton's ward, knows nothing about Ashton save that he had been a great friend of her father's before the latter's death.

Mrs. Killenhall is Miss Wickham's chaperon-companion.

Langton Hyde, an old schoolmate of Viner's seen running from the scene of the crime, is arrested while trying to pawn Ashton's ring. He explains that hunger drove him to snatch it up from where it lay beside the body of Ashton, whom he took to be intoxicated. He tells of meeting a man swathed to the ears in a white muffler, coming from the place where the body lay. Viner, convinced of Hyde's innocence, engaged the services of his own solicitor, Felpham, to represent Hyde.

Mr. Pawle, Ashton's solicitor, is also convinced of Hyde's innocence.

Inspector Drillford is inclined to ridicule Viner's faith in Hyde.

Miss Penkridge, Viner's sharp-witted aunt, has many valuable suggestions

Mr. Stephens and

Mr. Fosdick, two Australian friends of Ashton's, testify that Ashton had confessed himself to be in possession of a secret which would startle English society when revealed.

### CHAPTER VIII.

NEWS FROM ARCADIA.

When Viner walked into the waiting room at Crawle, Pawle and Rattenbury's, he was aware of a modestly attired young woman who sat shyly turning over the pages of an illustrated paper. And as soon as he got into Pawle's private room, the old solicitor jerked his thumb at the door by which Viner had entered, and smiled significantly.

"See that girl outside?" he asked. "She turned up here about an hour ago, and said that her grandmother, Mrs. Hannah Summers, who keeps an inn at Marketstoke, in Buckinghamshire, had seen the paragraph in the papers this morning, asking for information about Mr. John Ashton's movements, and had immediately sent her off to me with the message that a gentleman of that name stayed at their house for a few days some weeks since, and that if I would send somebody over there, she, the grandmother could give some particulars about him."

"Do you think this is the same Ashton?" asked Viner.

"We'll soon decide that," answered Mr. Pawle as he touched the bell on his desk.

"Now, my dear," he continued as a clerk brought the girl into the room, "take a chair and tell me what your message is, more particularly. Your grandmother keeps an inn called Ellingham Arms?"

"Yes, sir," replied the girl.

"Now, I suppose you were at the Ellingham Arms when this Mr. Ashton came there?"

"Oh, yes, sir; I live there!"

"To be sure! Now, what sort of man was he—in appearance?"

"A tall, big gentleman, sir, with a beard, going a little grey."

Mr. Pawle nodded at Viner.

"Seems like our man," he remarked. "Now," he went on, turning again to Lucy Summers, "what did he do with himself while he was there?"

"He spent a good deal of time about the church, sir," answered the girl, "and he was at Ellingham Park a good deal. At night he talked a great deal with my grandmother. I think that's what she wants to tell about."

"Very well," said Mr. Pawle. "Now, then, you run away home to Marketstoke, my dear, and tell your grandmother that I'm very much obliged to her, and that I am coming down this evening, with this gentleman, Mr. Viner."

"Viner," Pawle continued when he had taken the girl into the outer office, "we can easily run down to Marketstoke in under two hours. I'll call for you at your house at half-past five. And then—we'll hear what this old lady has to tell."

Viner nodded, went out, into the afternoon calm of Bedford Row.

He jumped into a cab and hastened back to Markendale Square to pack a bag and prepare for his journey.

Miss Penkridge called to him from the drawing-room as he was running upstairs; he turned into the room to find her in company with two ladies—dismal, pathetic figures both in tears and evident distress, who, as Viner walked in, rose from their chairs and gazed at him sadly and wistfully.

### CHAPTER IX.

LOOKING BACKWARD.

Before either he or Miss Penkridge could speak, the elder of the two broke into an eager exclamation.

"Oh, Mr. Viner, we are Langton's sisters. We learned this dreadful news last night in the evening paper and we have been to Mr. Felpham's office this afternoon. He told us how kind you had been in engaging his service for our unfortunate brother. But now that we have found Langton, we must stand by him. We must find some quiet lodging, and settle down to help. We cannot let all the burden fall on you, Mr. Viner."

Viner glanced at Miss Penkridge. They were quick to understand each other, these two, and he knew at once that his aunt saw what was in his mind.

"Listen!" said Viner. "I have to go away to-night on a matter closely connected with this affair. Let me leave you in my aunt's charge. You'll be much more comfortable here than in any lodgings or hotel and—and I should like to do something for Hyde; we're old schoolfellows, you know."

Then he escaped from the room and made ready for his journey; and at half-past five came Mr. Pawle in his private car and carried him off into the dark.

An hour and a half later, they drew up at the Ellingham Arms, where an excellent dinner awaited them.

Dinner over they sat before the fire awaiting the appearance of Mrs. Summers.

Finally a light tap at the door heralded her approach.

"Come in, ma'am," Mr. Pawle cried, throwing open the door. "We are very eager, indeed, to hear what you can tell us."

"Well, sir," the landlady answered, "I have a good deal to tell. Mr. Ashton came here one Monday afternoon and he stayed here until Thursday. And he hadn't been in the house an hour, gentlemen, before I wondered if he hadn't been here before.

"After he'd seen his room upstairs, he went out to the front door, and I overheard him talking to himself as he looked about.

"'Aye!' he was saying, as he looked this way and that, 'there's the old church, and the old moot-hall, they haven't changed a bit, I reckon, in all these years!'

"'You've known Marketstoke before,' I said to myself.

"During the time he was here, he went about in it in a fashion that convinced me that my ideas were right. He was in and around the church a great deal and he visited Ellingham Park twice, and was shown over the house. And before he'd been here two days I came to a certain conclusion about him."

"Yes!" exclaimed Mr. Pawle. "And that, ma'am, was—"

"That he was somebody who disappeared from Marketstoke thirty-five years ago," answered the landlady, "disappeared completely, and has never been heard of from that day to this!"

"And that somebody?" Mr. Pawle asked in hushed accents. "Who was he?"

"It's a long story, sir," the landlady answered. "You're aware, of course, that just outside the town here is Ellingham Park, the seat of the Earl of Ellingham. Thirty-five years ago the head of the family was the seventh Earl, who was then getting on in life. He was a very overbearing harsh old gentleman, not at all liked, and he had trouble at home with his elder son,—he only had two sons and no daughter,—and about the time I'm talking of it came to a head. When Lord Marketstoke—that was the elder son's name—was about twenty-five or twenty-six there was a great quarrel between them. That night, gentlemen, Lord Marketstoke left the house and set off to London, and from that day to this he has never been heard of or seen again—hereabouts, at any rate. It was known that he had money of his own, that had come to him from his mother, who had died years before he went. He couldn't have disappeared more completely if they'd laid him in the family vault in Marketstoke church.

"About fifteen years after Lord Marketstoke had gone away, the old Earl died. And then there was no end of trouble and bother. The Earl had left no will; at any rate, no will could be found, and no lawyer could be heard of whom had ever made one. And of course, nobody knew where the new Earl was, nor even if he was alive or dead. There were advertisements sent out all over the world—asking for news of him and stating that his father was dead.

"All the efforts and advertisements were no good whatever, and after some time—some considerable time—the younger brother, the Honourable Charles Cave-Gray—that's the family name—came to the conclusion that Lord Marketstoke was dead, and so—I don't understand the legal niceties, gentlemen, but they went to the courts to get something done which presumed his death and let Mr. Charles come into the title and estates. And in the end that had been done, and Mr. Charles became the eighth Earl of Ellingham. And of him we see very little; he scarcely ever stayed at Ellingham Park, except for a bit of shooting, since he came to the title. Now," she concluded, with a shrewd glance at the old lawyer, "I wonder if you see, sir, what it was that came into my mind when this Mr. John Ashton came here a few weeks ago, especially after I heard him say what he did, and after I saw how he was spending his time here?"

"I've no inkling, ma'am; I've no inkling!" said Mr. Pawle. "You wondered—"

"I wondered," murmured Mrs. Summers, bending closer to her listeners, "if the man who called himself John Ashton wasn't in reality the long-lost Lord Marketstoke."

(To be continued.)

ISSUE No. 16—'26.

## Insects' Sense of Smell.

Many insects have a keen sense of smell. A piece of decaying meat so covered that it can not be seen will, on a warm day, attract numerous flies, some of which apparently scent it at a distance where no odor is discernible to man.

Many of the social insects recognize the members of their household by smell, and the male of some species seeks his mate by the olfactory sense.

Among insects the organs of smell are located in the antenna or palps. Male bumblebees with the antenna removed can not find their mates. Some crustaceans seem to possess organs of smell on the antennules.

## Work if You Would Rise.

Soon after the great Edmund Burke had been making one of his powerful speeches, in Parliament, his brother Richard was found sitting silent in reverie, and when asked by a friend what he was thinking about, he replied:

"I have been wondering how Ned has contrived to monopolize all the talents of our family. But then I remember that when we were doing nothing or at play, he was always at work."

And the force of the anecdote is increased by the fact that Richard Burke was always considered by those who knew him best to be superior in natural talent to his brother; yet the one rose to greatness, while the other lived and died in comparative obscurity.

### Acclimated Chinese.

The Chinese are said to stand change of climate better than any other race.

Minard's Liniment for colds.

# ECLIPSE FASHIONS

Exclusive Patterns

THE FLARE JUMPER FROCK.

Contrast is the smartest note in the new two-piece sports costume, and we present this model as unerringly smart for morning or afternoon wear. Dainty flesh color crepe makes the long simple overblouse, which uses printed silk in two shades of rose like the full skirt, to fashion the collar, cuffs, inset pockets and front plait. The flaring skirt, No. 1298, is cut in two pieces and joined to a fitted body lining, and comes in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 bust requires 2¼ yards 36-inch figured material, with ⅞ yard lining for bodice top. The blouse, No. 1044, is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 bust requires 2¼ yards 36-inch plain material as illustrated. Price 20 cents, each pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Minard's Liniment used by physicians.

## A Fantasy.

When out of Heaven Prometheus brought
The fire to Earth, he dropped a spark;
And where it tumbled, Nature wrought
A fire-filled crocus for a mark.

—Norman Gale.

"DIAMOND DYE" ANY GARMENT, DRAPERY

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

## What's in a Name?

Do names matter? According to the adherents of numerology, to-day's very latest craze, they do. These ingenious people have discovered that the relation of certain numbers to the letters of your name may vibrate you to success or failure.

Students of human nature have always realized that names count, and have acted on their belief. The Shakespearian critic and biographer of King Edward, Sir Sidney Lee, who died recently, was undoubtedly wise in changing his name from Lazarus to Lee, which he did, on Dr. Jowett's advice, when at Oxford.

A publisher once sat in his office to interview the writer of a manuscript, which his reader had described as "a novel of rare passion and power, probably the work of a woman of mature experience." When a girl of seventeen was ushered in, the publisher declined to discuss the book with her—he wanted to see the author.

"I am the author," the astonishing young person replied; and the publisher then set to work to invent a pen-name for her which would take the public fancy. The lady is now known all over the world as "Victoria Cross."

Then take the case of fascinating Claire Windsor, of film fame.

Miss Windsor thought that name would sound better in the ears of film enthusiasts than her rightful one, which is Olga Cronk.

Gussie Apfel felt likewise when she emerged sereenwards as Lila Lee, whilst recently the Fox Film Corporation announced that "Miss Beatrice Burnham, after giving the matter much consideration, has changed her name to Inez Rene, to match her Latin personality."

A little cold tea mixed with warm water and applied with a soft woollen cloth will make stained woodwork look bright and fresh.

Of the 667 professions listed in the United States, women are engaged in 632.

# ALWAYS TIRED OUT

### People Who Feel Like This Need the Help of a Tonic.

The dictionary defines a tonic as a medicine that increases the strength and gives vigor to the system. That tells why Dr. Williams' Pink Pills are a real tonic. Thousands of men and women are ailing to-day, not sick in bed, but without ambition to do a full day's work, though they are forced to keep on. They are always tired or nervous, do not sleep well, and awake in the morning unrefreshed. Many have headaches, backaches and stomach trouble. Such people need the tonic help of Dr. Williams' Pink Pills. The beneficial effects of this medicine reaches the whole system. Dr. Williams' Pink Pills do more than relieve the symptoms—they remove the cause. Mrs. E. Virginia Gray, Tofield, Alta., has proven the value of this medicine and says:—"I can sincerely recommend Dr. Williams' Pink Pills for a tired and run-down condition of the system. I have followed the nursing profession for a number of years and after a few weeks of hard or trying cases I take two or three boxes of Dr. Williams' Pink Pills, and always with the very best results. The pills also proved a great boon to my daughter at a trying age, and I have seen splendid results follow their use in other cases."

Dr. Williams' Pink Pills are sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

#### A Wonderful Invention.

Cassidy—"I see that they've invented a new whistle."

Casey—"Phwat kind of a whistle?"

Cassidy—"One that sounds just as loud in the morning as it does at quittin' time."

#### Imperfectly Coached.

Magician (to youngster he has called up on the stage)—"Now, my boy, you have never seen me before, have you?"

Boy—"No, daddy."

It costs four or five dollars to prepare for a picnic, and a good heavy rain is frequently worth it.

Eaten too much?

Take a spoonful of Sal Lithofos in a glass of water daily before breakfast and rid yourself of that disagreeable feeling of dullness. An efficient saline laxatve that gently purges the system of clogging poisons and makes a new being of you.

Sal. Lithofos

# Surnames and Their Origin

### MOWBRAY

**Racial Origin—Anglo-Norman.**
**Source—A locality.**

Here is one of those English family names which are derived from the names of places in France, though from its modern spelling you would not be likely to suspect it. England and America, however, are full of such names, coming originally from French sources, but scarcely recognizable as such for two reasons: first, because modern French is a very different thing from medieval French, and second, because under English influences the names have developed spellings different from their original ones and different from modern French.

Mowbray is a spelling which represents, under the influence of the English tongue, the "Mont Bral" or "Mont Brave" of the Normans.

If you bear this family name it is a fair inference that the medieval ancestor who gave it to you was one of the Normans who came over to England with William the Conqueror, and also that he probably did not bear that name prior to that time.

Such names as these developed from the fact that the forces of the Conqueror, gathered from many parts of northern France, contained many men of the same given names, so, it was the easiest method of differentiating them to refer to the place from which they had come, as this not only identified the individual, but identified the military unit with which he was connected.

### McCANN.

**Variations—McGann, MacCann.**
**Racial Origin—Irish.**
**Source—A given name.**

This family name is an Anglicized form of the designation of a very old Irish clan, which in its turn rose to the dignity of a clan as a branch or sept of a still more ancient clan, that of the MacMahons of Ulster.

The Irish spelling of this family or clan name is exceptional in that it is virtually identical with the Anglicized form, this being one case where the Irish and English spellings are so simple that no confusion has resulted in the transition of the name from one tongue to another.

The Gaelic of the name is "MacCana," when used in the plural sense. As applied to one person it is "MacCann." This "Cana" was a son of a chieftain of the MacMahons, named "Maithgamhuin," and as nearly as can be ascertained, the period of the formation of the Clan MacCann was about the year 900 A.D.

Thus the family name is from two to five centuries older than the majority of English names, and antedates the bulk of the German family names by a still greater period, though it is not older than a great many of the Scottish clan names.

#### Diagnosed.

"Pretty slow train, conductor. What's the matter?"

"Locomotive ataxia, I guess."

An acid stomach caused by indigestion often creates rheumatic symptoms. Set your stomach right with Seigel's Syrup. Any drug store.

### Alchemy.

Sometimes my day so sordid seems,
So blank and colorless, devoid of dreams;
That like the grains of sand in oyster shells,
It seems it, too, must irk the place wherein it dwells.

Then through the hours, monotonous and gray,
There come adventures, quickening and gay;
The proven love of friends, the gain of right,
The surging forth of all the heart's pure might,
And, as the oyster to a pearl has turned the sand,
The alchemy of Truth shows treasure close at hand.

—Mary Chase Witherbee.

#### What Is It?

"Whalebone," began the teacher, "isn't a bone at all."

"Well," broke in the bold, bad boy, "it isn't a whale, either, so what is it?"

The one secret of life and development is not to desire and plan, but to fall in with the forces at work, to do every moment's duty aright.—George MacDonald.

Time and trade wait for no man.—The Prince of Wales.

### The Safe Side.

With certain individuals the first question asked, when it is a matter of taking sides, is whether the indicated attitude is safe. They desire to have the honor and the fortune that await the brave, but the last thing they want is to incur the risk. You will not find them promptly volunteering at the outset for an enterprise of hazard. They will wait and see what the outcome is likely to be ere they enroll as partisans in any conflict.

It is an understandable desire on the part of a man to want to be on the side that wins. The easier thing is always to cast in one's lot with the puissant majority, not to give all one has and is to a cause that looks forlorn from the inception and seems to have but a rank outsider's chance of victory. Yet, happily, there are those of the heroic mettle and the different mold who are attracted by the knowledge that success is not a predetermined certainty and that conquest or failure depends largely on their own performance.

Some intrepid spirits have thrown themselves away on futile quests and vain objectives; they may have been so restless that they could not bide at home and must be "gentleman adventurers" in foreign legions, perhaps taking part in Central American revolutions, or it may be chartering ships and with kindred spirits engaged in a search for buried treasure of pirates in fronded isles of the West Indies.

But is there not adventure enough to be had in the championship of hopes, the furtherance of causes here at home that have nothing to do with the profession of the man-at-arms or the seaman? There is necessary warfare in the name and under the flag of social, legal and medical reforms which call for courage as well as the battlefield, and whose pioneers must often incur loneliness and odium while the popular acclaim goes to charlatans and demagogues "'Tis man's perdition to be safe when for the truth he ought to die." Those who have decided that a certain course is right cannot be satisfied with another way, though their own path is difficult to tread. They are not asking to be spared the hard things; they give welcome to the experiences that test their fibre and develop fortitude and train them to face serenely what the days may bring.

### Living Green.

I never knew how much green grass
Could mean until I had it not;
Until I went to live where I
Could see no tree or garden-plot.

The joy of living green I loved,
It was a part of daily being,
As easily as much of life
As thinking, moving, feeling, seeing.

But hedged about with stone below
And sky above, what it could be—
I came to know, to realize—
To miss the sight of shrub and tree.

And when spring came my poor starved soul
Cried out aloud; I could not stay—
I have come back to where I see
Green hills and growing green each day.

—George Elliston.

#### Family's Age Totals 465.

Under the same roof in the village of Billingsborough, England, are five women, all related, whose combined ages total 465, an average of ninety-three. They are all active. Two of them earn a living by knitting and dressmaking, while the other three do housework. The patriarch of the household is ninety-seven, but still gets out to do the shopping, while the flapper of eighty-seven spends most of her time doing the kitchen work and chores. The others are aged eighty-eight, ninety-one and ninety-two.

Minard's Liniment for sore throat.

### The Poetry of Familiar Things.

All poetry, it is to be remembered, is not the poetry of romance, of strangeness, of wonder, of things thrilled with the unknown. There is the poetry of familiar things, . . . true nevertheless in their littleness or greatness. This is the kind of poetry in which that century so dear to Thackeray, the eighteenth of happy memory, so decorously delighted. One almost hesitates to speak of "decorous delight" in this day which is so prone to hold all that is decorous to be near to the stilted or artificial. The decorous is not necessarily so any more than the abandoned is necessarily artistic or sincere.—Cornelius Weygandt in "A Century of the English Novel."

## SIXTEEN YEARS USE OF BABY'S OWN TABLETS

### Has Shown One Mother There is Nothing to Equal Them.

A constant use of Baby's Own Tablets for their children has proven to thousands of mothers that they are without an equal for babyhood and childhood ailments. One mother, Mrs. C. W. Jackson, R.R. 1, Gilford, Ont., writes:—"We have used Baby's Own Tablets ever since our first baby was born sixteen years ago. We have seven fine healthy children and the Tablets is the only medicine they received in their early years. Our baby is one and a half years old, is walking and talking and weighs 25 pounds. Baby's Own Tablets is the only medicine he has ever had."

Baby's Own Tablets are guaranteed to be absolutely safe for even the newborn babe. They are free from opiates and narcotics; act as a gentle laxative on the stomach and bowels and thus relieve constipation and indigestion; break up colds and simple fevers and make baby healthy and strong.

You can get Baby's Own Tablets from your druggist or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Prettiest of Gardens.

No known nation has even equalled the Spanish Arabs in the beauty and costliness of their pleasure gardens. The flower-perfumed air was driven or drawn through metal pipes into the living rooms, while sprinkling fountains were everywhere, some of them even containing perfumed water. To these gardens where experimental gardening was always in order, the world of to-day is indebted for the peach as well as many other very valuable cultivated fruits.

Minard's Liniment for dandruff.

#### Fair Enough.

Guest—"Do you play anything people request?"

Orchestra Leader—"Certainly."

Guest—"Fine, I wish you'd take your men out and play a game of pool while I finish eating."

#### New Money for Erin.

New coinage in silver, nickel, and bronze is suggested for the Irish Free State. The proposed money will bear Irish designs instead of the King's head.

MacLean Building Reports, Ltd., 344 Adelaide St. West, Toronto.

### When the Dead Were Judged.

In ancient times the dead were taken before a judge and jury and given a trial just as though they were alive.

In Egypt, the body was taken soon after death to an embalmer and kept by him for forty days. It was then returned to its old home where the mourners wept over it for thirty-two days and nights, after which it was carted to the nearest sacred lake where witnesses were heard.

In the case of a good man the body was allowed to be taken across the lake in a boat and buried on the other side.

If the evidence showed that the dead was not a good man the mourners had to take the body back home and keep it until such time as they could, by good works, gifts to the priests, incense and such things bury it properly in later years.

### All Tired Out—Feel Miserable, Generally?

If you feel out of sorts, your kidneys and liver are not acting naturally. Don't delay but go to your druggist and get a bottle of Warner's Safe Kidney and Liver Remedy and take according to directions. In a short time you should notice the benefit from this remedy made from herbs and other beneficial ingredients. Used for over 50 years by millions in all parts of the world. For your health's sake take care of your kidneys and liver.

Sold by all druggists. Price $1.25 per bottle. Warner's Safe Remedies Co., Toronto, Ontario.

### Hemorrhoids

That Shockingly Painful Affliction

There are few of us who have not suffered from this trouble, but little do we realize that in most cases it is due to our own neglect.

Medical authorities agree that Hemorrhoids (piles) could be largely avoided were one to assist nature by observing nature's laws.

Hemorrhoids are most frequently brought about as a result of constipation. Therefore, assist nature by assuring an easy passage of the waste matter, and this can best be done by the use of *Nujol*.

*Nujol* simply softens the waste matter, and thus permits regular, easy elimination, without any overtaxing of the intestinal muscles.

*Nujol*, the scientific internal lubricant, replaces the lack of nature's lubricant, and obviates the possibility of constipation.

Ask your druggist for *Nujol* today and remember—look for the name "*Nujol*" in red on both bottle, label and package.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

# RASH COVERED FACE AND NECK

### Caused a Lot of Pain, Itched Badly, Healed by Cuticura.

"My trouble began with a rash of pimples that covered my face and neck. The pimples grew larger and started to fester, causing a lot of pain. They itched badly and I was very restless at night. The trouble lasted four months.

"A friend advised me to try Cuticura Soap and Ointment so I purchased some, and after using three cakes of Cuticura Soap and one box of Cuticura Ointment I was completely healed." (Signed) Miss Martha Martene, R. R. 2, Crediton, Ont., Nov. 3, 1925.

Daily use of Cuticura Soap, with touches of Cuticura Ointment now and then, keeps the skin fresh, smooth and clear. Cuticura Talcum also is ideal for the skin.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

WHITE Zinc-O-Lith PURE WHITE

*It harmonizes with all seasons*

In sunny spring and summer, in fall and snowy winter, a white house has a beauty all its own. For a white house we recommend Zinc-O-Lith—the new kind of paint that *is* white and *stays* white. It covers better, lasts longer, costs less.

N. McGILLIS
