MORRISBURG — ONTARIO

DR. EDWARD McLAUGHLIN

A pall of mourning passed over the Village of Morrisburg, when it became known that one of our foremost citizens, and one of the best known medical practitioners in the county in the person of Dr. Edward McLaughlin had been called in death, at his late home, on Tuesday April 17th. For some time past the deceased had not enjoyed good health, but was able to look after his practice. About a week ago, however, he sustained injuries from a fall and his condition became most critical.

The late Dr. McLaughlin, who was in his 67th year, was a son of the late Michael and Lucy McLaughlin. He was born in Dundela, township of Matilda, where he received his early education. Later, he attended the Morrisburg High School, following which he taught school in his native village, Irena, for a perod of three years. He then began the study of medicine with Dr. John Harkness of Iroquois, and following his course at Queens University, Kingston, he was graduated in 1886. He then practiced at Harrow smith for a period of three years, and in 1890 established his practice in Morrisburg where he remained active until the time of his accident.

A gentleman's heart, a willing spirit, a helping hand and remarkable medical skill, won the enviable practice which he enjoyed, and many of his patients became warm friends, in whose hearts his memory will not pass away.

The late Dr. McLaughlin was medical officer for the Canadian National Railway with jurisdiction from Aultsville to Prescott, and local medical health officer. While a busy man in his profession he not merely displayed a deep interest in the welfare of our village in general, but willingly consented, by entering the Board of Education, to give his colleagues the benefit of his wide experience. He quickly rose to be chairman of the Board, and his opinion and advice were of incalculable value to the community. The present chairman, Mr. J. L. Casselman, as a mark of respect to his predecessor, caused the flags to be placed at half mast over the Collegiate Institute and Public School, until the remains had been conveyed to their last resting place.

The funeral service was held at his late residence on Thursday afternoon at 2 p.m., Rev. H. Cameron of Ottawa, officiating.

Two sisters and two brothers survive, namely: Mrs. F. R. Kearns, Vancouver; Mrs. Kendall, Brockville; Dr. P. McLaughlin, Winchester; Mr. Thos. McLaughlin, Matilda.

Relatives and friends from a distance present at the funeral were Dr. Alguire, Cornwall, Dr. Maloney, Ottawa, Drs. Brown, Chesterville, Dr. Johnston, Iroquois, Dr. Robert McLaughlin, Paris, Ont., Dr. P. McLaughlin, Winchester, Dr. Marsellis of Iroquois, Mr. and Mrs. G. W. Cook, Westmount, Mrs. Begbie, Brockville.

The following floral offerings were received: Board of Education, wreath; Corporation of Morrisburg, wreath; C.O.C.F., wreath; Public School staff, spray; A. G. F. Drew and family, spray; the Farlinger Family, spray; Mr. and Mrs. G. W. Cook, cross; the Misses Cook and Mr. Herbert Cook, wreath; Countess of Minto, spray; Miss Wingard, spray; Mrs. G. Farrell, spray; Mrs. Dr. Stevenson, spray; Miss G. Merkley, spray; Mrs. McLaughlin and family, pillow; Dr. McLaughlin, Winchester, wreath; Mrs. Kendall, Brockville, spray.

MR. THOMAS MIDDAGH

Mr. Thomas Middagh, aged 23, brother of two of our esteemed townsmen, Messrs. Harry & Edward Middagh, was instantly killed near Marysville Station, east of Belleville on Monday morning. He was employed as brakesman on the G.T.R., and it appears that a west-bound freight train had stopped at Marysville, and when it started young Middagh was on top of the box car the jolting throwing him down between the cars to the rails. He sustained several injuries which caused his death almost immediately. The body was later brought to Belleville, where an inquest was opened.

The victim of the unfortunate accident was unmarried and formerly lived at Winchester. He was a member of the A.F. & A.M. Society and also a member of East Toronto Lodge No. 108, Brotherhood of Railway Trainmen. Deceased was deservedly popular with his fellow employees who sincerely regret his untimely death. While a resident of Belleville he made many friends owing to his kindly and jovial disposition.

The body was conveyed to Morrisburg on Tuesday morning, accompanied by Messrs Harry and Edward Middagh, and the funeral, which was under the auspices of the Masonic Order, Henderson Lodge of Winchester, took place on Wednesday to the Methodist Church. The church service was conducted by Rev. Miller, after which a very impressive Masonic service was conducted in front of the church. A number of the brethern accompanied the remains to the cemetery at Maple Ridge.

CORRESPONDENCE

The following report was brought to this office by the chairman on Monday of this week, for publication:—

To the Reeve and Council of
the Village of Morrisburg.

The Committee appointed by your honourable body have held five meetings and considered the situation in respect to Electric Light, and the undersigned submit the following report:

We recommend the installation of meters to correct the shortage in voltage with which the town has suffered for the last few years.

We recommend a combined flat and meter rate of 80 cents domestic and $1.60 commercial per lamp and one cent per K.W. hr. The meter rate also to cover other appliances than lamps.

We are not making any recommendation as to those using electric motors which have separate connections to transformers.

We are convinced that if meters are installed there will be an excess of power at the small plant for present purposes, but if it were found in the future that there was a market for current over and above that which can be supplied by the small plant, we recommend that a qualified engineer be employed to examine and report on the large plant as to the best possible way of altering that plant so as to get a constant supply of current in this connection. We recommend any one of the following engineers.

Mr. J. H. Larmonth, Montreal; Mr. John MacRae, Ottawa; Messrs. Walter J. Francis & Co., Montreal.

Respectfully submitted,
J. H. MEIKLE,
Chairman.
I. HILLIARD, Secretary
A. F. MERKLEY.
B. B. TUCKER.

CORRESPONDENCE

To the Editor, "The Leader"

Dear Sir,—Again I crave space in your valuable paper for a few remarks on the Light and Power Situation which are called for by erroneous statements in a communication in your last issue over the signature of W. P. Biggs.

The opinion of Mr. Biggs on this question should carry considerable weight when he says that the mirority report was uncalled for and out of order and that the proper plan to follow is what was recommended by a majority of the committee although in his next paragraph he says he has never seen those recommendations, and does not know what they are. It is unfortunate that our village council had not been thus informed by Mr. Biggs before sending the writer of that minority report a kind letter of appreciation of the same. But doubtless by the time Mr. Biggs has lived in our midst a little longer we will have learned from him many things pertaining to parliamentary proceedure and management of municipal matters.

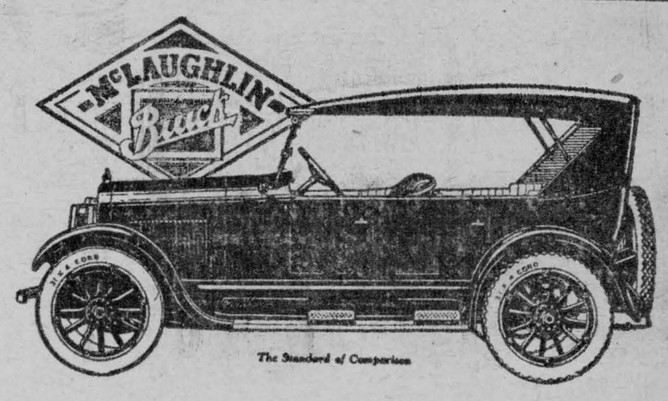
Mr. Biggs says he does not know that the Village of Morrisburg has ever offered free power to induce manufacturing industries to locate here and says he questions this statement. Of course Mr. Biggs' long sojourn in our midst (less than two years) well qualifies him to advise in these matters and to question statements of citizens who have resided here a lifetime and for many years, in the council and out of it, been in close touch with municipal matters, and no doubt his opinion will convince the Village Clerk and the Collector of Light rates that under the meter system they would have no more work to do than at present and should receive no more remuneration. No doubt too, the Town of Prescott and other municipalities under the meter system will be well pleased to learn that Mr. Biggs can let them on to a method whereby they can save money in this matter

Mr. Biggs says that as he understands it the service has been poor for a number of years and the relief has been a bone of contention among the councillors for many, many years.

I can tell Mr. Biggs that the bone of contention has not been poor service, but has been the question of making those pay who have had the service. I can tell him that one of the greatest offenders in this respect is and has been the manufacturing concern of which Mr. Biggs has the honor of managing. I can tell him that the citizens of the village have not forgotten the $1348.-89 for water, light and power owing to the village by this establishment under the old regime and before his time that the council was forced to remit because the company could not pay. And in this connection it would look as if history might repeat itself, for Mr. Biggs' Company at the present time owes the municipality more than $200 for water, light and power, notwithstanding the fact that they are being supplied with energy to the extent of 35 H.P., 64 lights, and all the water they can use all for the munificent sum of One dollar per day.

And yet Mr. Biggs is bold enough to point to the citizens who are using electrical energy for heating purposes, intimating that they are not paying for the same. These people can tell him that they are paying all they are asked to pay and hence owe the village nothing, which cannot be said of the company

(Continued on page 4.)



Canada's Standard Four

McLaughlin Buick "Master Four" Touring 23-35 Special

IN beauty of appearance, dependability and economy of operation, this "Master Four" Touring has established an entirely new standard for four-cylinder cars. Sturdy, dependable, always ready to go, it is perfectly suited to the needs of the average family.

The seats are deep and low, with plenty of leg-room in both compartments. The steering column is in exactly the right position for driving comfort and the gear shift lever is high enough to prevent bending and reaching. Some of the many unusual refinements on a car of this class are transmission lock, windshield adjustable from the inside, nickelled bumper, walnut dash, rear vision mirror, combination tail and stop light, drum type head and parking lamps, crown fenders and scuff plates.

Built in Canada by Canadians for service under Canadian highway and climatic conditions. No "Four" on the market is so well suited for rugged use at so low a cost, both initial and upkeep, as the McLaughlin-Buick Master Four edition of "Canada's Standard Car."

From a Bench in the Park

BY ANNIE HAMILTON DONNELL

PART II.

The clumsy bundle slid out of the girl-mother's arms and thudded to the path, not without a faint remonstrance from within. Horrified, Shirley sprang to gather it up.

"If you're going to sleep, you'd better tie your baby to you!" she scolded. "How do you know you haven't broken her?—There, there!" cradling the bundle in the way of all mothers.

"I'll keep her now. I won't let you fall, baby!" then in a flare of anger. "Why don't you speak? Don't you care you dropped—oh! Oh, my dear!"

The quiet figure at the other end of the bench had followed the baby's example and slipped in a limp heap to the pathway.

"My dear! What is it—oh, I know. You're frozen and starved. Are you dead? Right here in a—in a human land!"

Then Shirley's frightened eyes fell upon the trig little car with the man slumped down behind the wheel.

Shirley flew across the stretch of intervening parkland and deposited her clumsy bundle of baby upon the padded rear seat of that car. Then, a flushed and brusque young creature, she faced the startled man at the wheel and stated her case, not calmly but very clearly.

"There's a girl in a faint! Freezing. Or starving. Come quick. I can't bring her alone."

"Bring her?" The man stared with a kind of fascination at the lovely, flushed face.

"Yes, bring her! To the car—here. This is her baby! She's got to be saved. Isn't this a human world? Oh, isn't it human?"

"I'm coming!" answered the man and Shirley led the way. Not until the baby's mother had been deposited gently beside the bundle she had held till she could hold it no longer, was another word spoken.

"What next?" the man said then.

"Home. I'll have to go, too, to hold on to them both."

"Where is home?"

"Where is—don't you know where you live?" Shirley's voice threatened hysterics but she caught at it with both hands of her will; she made it steady down.

"We haven't either of us got homes," she tried to explain calmly. "Not a—a shingle. If you've got a car, there must be a garage. Cars have homes if babies haven't. Can't she and the baby go there and sleep? On—on the hay? The cushions, I mean! Or, if you've got a wife or a heart——!"

"All right, little Sister. I understand. It's been sudden." And then they were actually bowling along and the young mother's eyes were opening and the bundle was crooning as if it knew something better was coming to pass.

The car stopped at a house. The elderly person who came to the door was ample and kind-looking. The man spoke to her with a sort of friendly authority.

"I've brought you two ladies and a —a bundle, Mrs. Blaine. They need warming up I should say. You will know what they need—and plenty of it, please. Shall I carry the—bundle up to your room? If the bed in the east room is ready——"

"It's always ready, sir. Oh, you poor dear, you just lean onto me! There, now! They're terrible easy stairs to go up."

Shirley's heart opened wide doors to this new friend.

"I told you it was a human world!" she said softly to no one in particular, though the man with the bundle heard. He deposited his little load and went back downstairs. He was neither a young man nor an elderly one, neither handsome nor homely. Just a man. But the sort of man Shirley would have liked if she had found time to look at him. Indeed, she had liked the back of his head. She had had time for that, being a woman.

It was Mrs. Blaine who at length descended the stairs that were so easy to go up. She walked ponderously on tiptoe.

"Sh!" she warned, "Both of 'em's sound asleep. The baby is the cunningest! Not so terribly older than——"

The man nodded quickly. He was not quite ready for direct comparisons.

"Only it's a girl one up there," motioning behind and above her. "You should have seen the little thing drink warm milk and curl her toes up at the fire! The mother was about as hungry and cold, too—nice young woman. What do you think I found out? You can find out a terrible lot when you're undressing a baby!"

"What was it this time?"

The man made a pretense of leisurely indifference. It was only pretense. Mrs. Blaine faced him with sternness that was far from pretense.

"It was *your* factory! That's what I found out."

"My factory?"

"Yes, that turned him off—her husband. Tim's his name. He hasn't found a job since. They've been going down and down and to-night she and the baby struck bottom. Pretty hard, too. Turned out on the street. And it's cold. If I was sure you *had* to turn him off—oh, if I was a man with a factory!"

He touched her shoulder gently, affectionately.

"You'd make a fine one, Auntie Blaine," he said soberly. "Where's the other one—is she asleep, too?"

"What other one? Oh, you mean the young lady that came with 'em? She went long time ago."

"Went?" He was on his feet in consternation. He was remembering that she had said: "We haven't either of us got homes—not a shingle." "I didn't see her go."

"No, I guess likely she went the back way. She wanted I should tell her where the back way was. She said something about not trying to get you to put her up too. Said she only came to 'hold the others on the seat'—something like that. I didn't get what she meant, I was so busy. She laughed when she told me to kiss the back o' your head sometime. Guess she thought I was your mother."

"The back of my—what?"

"Head. For her, she said. To thank you. And I liked the soft little way she laughed. You would've, too. I told her about to-morrow. I kind of had to. She said oh, but she'd like to be here when I opened the front door! Said she'd like to see you bringing in that bundle!"

The car went back to the little park as fast as the man behind the wheel could drive there. He sprang out and searched the benches anxiously. He could hardly have explained why but he was sure that she would come straight back here. But if not——

"I've got to find her, that's all," he said. He wasn't going to be haunted the rest of his days with the thought of a girl with as big a heart as that, with a face like that, being without a shingle over her.

He searched the great park and at last found her, huddled for warmth at the foot of a stone statue.

"I came for you," he said, touching her arm gently. "Did you think I'd sit there at home while you froze here? In a 'perfectly human world'——"

"I wasn't asking help for myself. I am all right," she answered staunchly. "It will soon be to-morrow and I shall find my new job."

"I know," he nodded gravely. "But how do you think I'd feel to-morrow? Mrs. Blaine is waiting for you. The others are sound asleep."

Shirley was on her feet, her cheeks rosy with the delight of the beautiful human world. This would be something to tell the grandchildren! "Grannie, tell about the Nice Human Man," they would say.

"Mrs. Blaine told me about to-morrow. If I do—if I go back now—may I be there then? When it happens? That beautiful, darling thing——"

"When that beautiful, darling thing happens," he answered gravely and Shirley like the solemnness of his face. "You may. It is the most beautiful thing that could happen to a man."

For a whole year—a whole year is so long!—Shirley had not been as happy as this. Not since she had lost Martha Mary. She wished Martha Mary could know.

"I'll write and tell her," she thought. "And I think—I think I'll say, 'Want me to come and make you a little visit?' "

On the way back to Mrs. Blaine, the deep-bosomed, deep-hearted woman who was friend as well as housekeeper, neither the man behind the wheel nor the shivering girl beside him said much. But one thing the man threw out, as if from over-crowded thought rather than a desire to inform, sent delight in a warm stream through Shirley's tense body.

"I'll have to take Tim back, that's all—sure I'll have to."

"Tim? He's her 'man'? The baby's father?"

"Sure. He was turned off from my factory. Trust Auntie Blaine to root that out! We cut down our gang more than half. Had to. Tough. But what are men to do these days?"

"But you're going to stop cutting down Tim!" crowed Shirley joyously. "If I could tell her—and the baby—could I be the one to tell?"

"Sure thing!" He cleared his throat loudly as if some sudden lump in it disturbed him. Shirley glancing sidewise at his good, plain face read lovely things in it. Then she remembered the proprieties and that she did not even know the name of this man whose car and home and very self she had peremptorily commandeered. But she knew Mrs. Blaine and Mrs. Blaine stood for the proprieties, a chaperon of weight!

The chaperon was waiting.

"I've got your bed all nice an' warmed up, dearie. I knew you'd be back. You don't mind slipping in with her, do you? She hasn't stirred nor the baby hasn't stirred. Soon as you've drunk something nice an' hot you're not going to stir either!"

On the mysterious "to-morrow" the very house stirred and vibrated. What with the strangers within its kindly doors and the little stranger to come, it was over-running with life and subdued excitement.

"Any minute I'm liable to sing at the top of my voice!" said Shirley to Shirley's happy self. "Somebody ought to muffle me. When I think of last night and then look at to-day—and this darling house!"

Shirley loved the house.

She had borrowed an apron and a duster. A house couldn't shine too much for the beautiful thing that was going to happen to-day! She dusted everything three times. It was all you could do in so perfect a house.

And then it happened. Shirley heard the honk of the arriving car; it had a splendid, a triumphant sound. She peeped from the window and saw them get out, the slender woman and the man with the bundle that was his very own bundle!

"Somebody ought to m-muffle me!" sobbed Shirley, hiding back in a modest corner. "It's so lovely, I'm going to cry."

From the Maternity Hospital down in the heart of the city, where the tiny ones first see the light, they were bringing the baby to this house. He was making his triumphal entry. The mother, not in her first youth, but in the first soft radiance of motherhood, walked beside Father and bundle, with stately joy.

"There, dearie, let me get your veil off so's you can see how we've shined up for you!" Mrs. Blaine, fumbling happily, was a bit slow and while the little group stood for a moment, Shirley sprang out from her corner and a glad cry rang through the house.

"It's Martha Mary! *My* Martha Mary! It's me, dear! *Me!*"

"Shirley! Little Sister!"

"It's you now but if I shut my eyes and open 'em again it w-won't be!" the girl was sobbing out. "I never will shut 'em!"

"It will always be me—oh, sit her down somewhere in a chair! Auntie, Dick, somebody sit her down! I want to give her something——"

The woman who would always be Martha Mary was swiftly throwing off her own wraps and the many wrappings of the little bundle. The clear whiteness of her sweet face was turning a beauteous pink. She lifted out the tiny core of the bundle with an exquisite tenderness and laid it in Shirley's lap.

And Dick looked on and said, "Well, well!—Well, well!—Well, well!"

"Oh, Dick, say something else!—oh, no, it *is* well-well, well-well! That's the right thing to say!"

"I must have known she was our sister! Didn't I call her that when she ran out of the darkness and made me go back with her?"

"He did every beautiful thing there was to do," sang Shirley, "but I can't stop to remember. Oh, don't anybody disturb me ever again!" cradling the baby, devouring the soft pink wrinkledness and sweetness of him. It was a Shirley to stand and look at. They stood silently.

She broke the silence softly, looking up at them, star-eyed.

"I was jealous. Left out. I wanted to be in on things. I never thought I'd be like this. Who cares *now* for Kimmerses and cold benches. * * * Oh, Tim's baby! And her. Somebody fetch them; please! Let's *all* be glad."

(The End.)

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City, offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

Woman of To-Day

AN OLD-CLOTHES PARTY.

Why not a party in honor of the Rag Man? It's a good thing to have a last spree in your oldest clothes before bursting into new spring raiment. And at such a party neither ice cream on your blouse nor April showers on your bonnet need dampen your spirits.

The following verse might answer for the invitation:

Wear your oldest clothes
And your oldest hat,
And come to the place
Where our party's at!
Please look your worst
And feel your best
And fun and the rag man
Will do the rest.

To meet the Rag Man
(Time and Place.)

Write the verse evenly on ragged pieces of coarse paper, then baste each one on a bit of bright cloth, so that it looks like a patch.

An attic would be the most appropriate place for an old-clothes party, but a barn or a large room would do quite as well. The party had better be in the evening, because a rag man works all day, and it would never do to have an old-clothes party without the guest of honor. Someone in your family will no doubt be delighted to impersonate this charming old gentleman.

Tack old newspapers and pictures cut from cheap magazines on the walls. Candles stuck in bottles or tin cans would give a nice touch. Drape old pieces of carpets and quilts over the chairs and put up signs such as:

"This clock keeps rag time." (Tack over clock.)

"We will empty your cellar—of everything."

"We buy all old things except flivvers and toothbrushes."

If you like you might tell everyone beforehand to come looking as ridiculous as possible. When we humans are a bit disguised there is no constraint or stiffness, and any party will start off merrily. When all the guests have arrived, have the doorbell ring violently and the Rag Man himself come clumping in, shouting at the top of his voice.

If your guests haven't come disguised, the Rag Man can transform them all into peddlers with very little trouble. The articles required are easy to procure, since old clothing is the only disguise the peddling profession requires.

When each has been fitted out, make them all demonstrate their ability to fill their new professions. For instance, the scrubwoman must really scrub a bit of floor, the shoestring peddler really sell a pair of laces, the umbrella man give his call, and so on.

Before the party, hide about the room a collection of old bottles, old shoes, old magazines, bits of carpet, old hats, old coats, tin cans—anything old, in fact. Be sure that they are clean to handle. Give to each guest a bag made out of old sheeting or unbleached muslin, and at a given signal tell them to fill their bags as fast as they can. In five minutes the Rag Man will blow his whistle, and the person having the most treasures in his bag will be crowned King of Rubbish with a brimless hat. The one who has least might have all the collection of old stuff thrust upon him.

Next comes Poor Man's Pins. This game is played with empty bottles and a large soft rubber ball. Each person should have one turn, and if anyone breaks a battle he must immediately pay the Rag Man whatever he asks. The one who makes the best score should receive a bottle of ginger beer or liniment.

It would be great fun to serve the refreshments from pushcarts. Light wheelbarrows would do, or hastily constructed stands like street dealers use. You could have soft drinks, ice cream cones, peanuts, pop corn, hot coffee, and frankfurters, candy and fruits.

THE LEFT-HANDED CHILD.

"The child is left-handed because it is 'made that way.' Left-handedness, like right-handedness, has a definite anatomic basis. To handicap a child by training it to use a less efficient half of the brain, and thus to run also the attendant risk of developing serious speech defects, is surely not a wise educational procedure. Expert left-handedness is much less of a disadvantage, if any at all, than awkward and inefficient right-handedness and the commonly attendant imperfections of articulate speech."—Good Health.

THE SINGING KEYS.

Keys for clocks and keys for doors,
Keys for churches, houses, stores,
But the nicest ones are these—
Black and white piano keys.

Play one shining key alone,
Out there comes a lovely tone,
And it sings for you and me,
While we press the shining key.

One's like drummers when they play,
One is bugles—squares away;
One's the school bell when it rings,
One is Mother when she sings.

I stop records when they're through,
I may turn the handle, too,
But the nicest things are these—
Black and white piano keys.

Dominion News in Brief

Invermere, B.C.—Lionel Barrymore, and an all-star cast, under the personal supervision of E. H. Griffith, are at present in this district producing a new film based on Arthur Stringer's novel, "Snow Blind." The film is being made for Famous Players, and later will be released through some 7,000 theatres in Canada and the United States. It is of interest to note that during the past few years several large film producing companies have been using the magnificent scenery of the Canadian Rockies for exterior scenes, while the interior views are being taken in the East or California.

Calgary, Alta.—Considerable branch line construction will be made in Western Canada this year by the Canadian Pacific Railway, according to D. C. Coleman, Vice-President of Western Lines. Mr. Coleman states that it is proposed to complete the Hanigan northerly branch from the present terminal at Naicam to Melfort. Work will be undertaken on the Cutknife-Whiteford Lake line, which will be carried to the crossing of the Battle River this season. The first two sections of the Milden-Empress line, 59 miles in all; the first two sections of the Leader southerly line, 50 miles, and the first section of the Wymark-Archive line, 25 miles, will be completed. Mr. Coleman stated it was also intended to build from Drumheller south to the Bull Pound, a distance of thirty-nine miles. Work is now proceeding on the first two sections of the Consul-Assiniboia branch.

Regina, Sask.—Saskatchewan now stands first in the world in regard to the number of rural telephones per capita, with a telephone for every nine of the population. It is estimated that the Saskatchewan Government has $11,000,000 invested in urban telephones with 31,800 subscribers, while rural companies in the province have invested $15,000 with 58,000 subscribers.

Port Arthur, Ont.—Local marine men are looking forward to a busy season of navigation. There is considerable grain in store ready to move out and a large quantity of freight to come here from the East. The fleet on the Great Lakes will be augmented by 41 new vessels, the majority of which are now building for Canadian companies in Great Britain.

Quebec, Que.—It is reported that a gold rush is in full swing, which may bring about the development of more mining camps in the counties of Temiskaming and Abitibi, just east of the Ontario boundary. Gold was discovered in these two counties early in 1922, and a rush of prospectors began in March of that year. In October, 1922, 250 claims were staked, comprising about 50,000 acres of land, and this, with other claims staked earlier in the year, and since October last, would bring the total number of acres up to about 90,000.

Halifax, N.S.—Upwards of two hundred boys, most of them between the ages of twelve and fifteen, on their way to farms in the Canadian West, landed here recently. These boys were brought out under the auspices of various societies interested in child welfare work.

THE ROYAL FAMILY IN A VILLAGE SETTING

The Yorkshire village of Goldsborough was the scene of a royal family party when the King's grandson, Princess Mary's son, was christened in the village church. The tiny church held only the tenants and villagers, but thousands of visitors watched the party on its walk from Goldsborough Hall to the church. The picture shows Princess Mary and the King, followed by the nurse and baby, the Vicar of Goldsborough, and the Archbishop of York preceded by his Chaplain. Above Queen Mary, in a merry mood, who led the procession with her son-in-law, Viscount Lascelles.

DISSOLUTION OF ONTARIO PARLIAMENT WITH ELECTIONS LAST WEEK IN JUNE

A despatch from Toronto says:—The fifteenth Legislature of Ontario is to be dissolved on or about May 4, and the Provincial general election will follow in the last week of June.

This announcement was made by Premier Drury to the Legislature when the House met on Thursday afternoon. It followed a busy morning of conferences with the Ministers and a meeting of the Cabinet in Council. The sensational episodes of the overnight sitting had left the atmosphere at Queen's Park tense with expectancy, and many rumors of "developments" were afloat.

It was evident from the moment when Ministers and members started to arrive at the Buildings that all parties and groups took for granted the imminence of an appeal to the people. Pre-election preparations got under way openly. Group conferences took place at various party headquarters. A full attendance of members and crowded, curious galleries greeted Mr. Speaker when he took the chair at the formal opening of the House.

The Premier did not leave any doubt as to the procedure upon which the Government had determined. Immediately following his announcement of pending dissolution he introduced in blank three electoral bill—redistributional, proportional representation and the single transferable vote system in single-member ridings. Those bills are to be first dealt with by a committee consisting of 11 Government members, 5 Liberals, 5 Conservatives and 1 Independent, with the Speaker as Chairman.

Canada led the world in 1922 in the export of raw furs to the United States. The total fur catch for that year was over 4,000,000 pelts, valued at $16,000,000. While the general price of raw furs shows a downward trend, the total catch shows a remarkable increase.

Nearly four thousand persons designated as farmers, ranchers and fruit growers in Canada were registered as shareholders in Canadian chartered banks in 1922, according to a report tabled in the House of Commons. By provinces, these shareholders were distributed as follows: Alberta, 216; British Columbia, 93; Manitoba, 830; New Brunswick, 65; Nova Scotia, 245; Ontario, 1,188; Prince Edward Island, 38; Quebec, 465; and Saskatchewan, 747.

Guide Chief in Canada

Lady Olave Baden-Powell, wife of the founder of the Boy Scout and Girl Guide movements, who is in Canada with her husband, and is being greeted by the Guides in all parts of the country.

ALBERTA COAL OF SUPERIOR QUALITY

Anthracite Delivered in Ontario at About Seventeen Dollars Per Ton.

A despatch from Ottawa says:—"You would need several adding machines to estimate the amount of anthracite in the hard coal areas of Alberta," Joseph Errington, discoverer of the Alberta fields, told the Commons Committee on Canada's Fuel Supply Thursday afternoon. The Hoppe field, he estimated, extended about 35 miles north and south and 30 miles east and west. Replying to E. J. Garland (Bow River), he agreed that the coal might run 100,000,000 tons, but it would be foolish, in his opinion, to attempt to estimate the amount.

Coal in the Alberta hard coal area was equal to any mined anywhere in the world. There was also a great deal of coal which was suitable for coking. Transportation, however, was the great prblem.

He estimated that coal from the anthracite areas could be placed in Toronto at about $16 or $17 a ton. There would be additional charges for retailing. The coal was superior to Pennsylvania anthracite now being delivered to Canadian points.

Mining conditions in the Alberta field were superior to those in the Pennsylvania field, and the coal itself was clean and did not deteriorate. The public would not need further education in using Alberta coal. If the field was developed it would also provide a profitable tonnage for the Canadian National Railways.

King and Queen Speak to Children on Empire Day

A despatch from Ottawa says:—Their Majesties the King and Queen are to address messages to the children in the elementary schools of the Empire on May 24, and have arranged to have these recorded for gramaphone reproduction, so that the children may hear the messages in their Majesties' own voices.

Heads N.C.E.

Mr. Vincent Massey, of Toronto, who is keenly interested in many branches of educational work, has been elected president of the National Council of Education, at the convention in Toronto.

HIGH EXPLOSIVES WRECK RY. BRIDGE

Germans Counteracting Frenc Progress in Ruhr by Acts of Sabotage.

A despatch from Buer, Germany, says:—The ire of the Germans is counteracting French progress in seizing coke in the Ruhr, by destroying waterways and railways through which coke might be moved into France.

A charge of high explosive blew the steel rockers from under one end of a railway bridge here Wednesday morning and shattered the concrete supports sufficiently to let the bridge down about two feet. It was only because part of the charge failed to explode that the concrete supports were not further destroyed and the bridge completely unseated.

French engineers were able to jack it up into line with the rails within a day and to replace the shattered concrete with timber supports.

Although such acts of sabotage are officially disavowed on the German side, there is unofficial exultation when they are announced, and it is becoming more and more obvious that there is an official sabotage organization plentifully supplied with high explosives and directed by a staff of German engineers in selecting strategical points for destruction.

SCOURING MOUNTAINS IN SEARCH OF VALERA

Six Columns of Free State Troops Search Tipperary for Rebel Leader.

A despatch from Dublin says:—Six columns of Free State troops under General Prout are scouring the mountains in Tipperary for Eamonn de Valera, Dan Breen and other Republican adherents who escaped the National troops when Liam Lynch was fatally wounded and captured. This operation is the best organized effort yet made to capture de Valera.

The area in which the troops are operating is very mountainous, and little information regarding their movements is trickling through.

Thomas Keating, one of the Southern irregular leaders, died on Thursday from his wounds in the Dungarvan Hospital. Keating, with a party of irregulars, was surprised by troops operating at Coolnasmear, near Dungarvan, County Waterford. The irregulars refused to surrender and were fired upon, Keating receiving a mortal wound. He was one of the most active of the Southern irregulars.

Considerable discussion took place in Dail Eireann Thursday over the position of the Free State army, the contention having been raised in some quarters that the military branch is not sufficiently under civil control.

President Cosgrave arose and declared that General Mulcahy, Minister of Defence, had his entire confidence and that there was no intention of disturbing him in his direction of military affairs.

SCOTLAND YARD RAIDS IRISH HOMES

Active Propaganda Work in London Halted by Detectives.

A despatch from London says:—Another secret raid upon persons suspected of plotting in behalf of the Irish Republican cause was made in London Saturday morning, according to the Daily Express. The paper mentions Greenwich, Woolwich and Bermondsey as the districts where the police operated.

Scotland Yard detectives went in automobiles to the various districts and swooped suddenly on numerous houses. The occupants were taken completely by surprise; many of them were abed. Important documents referring to the activities of the workers for the Irish rebels are said to have been discovered in the search, which occupied some hours, but the Express does not state whether there were any arrests.

Since the round-up of March 10-11, the paper adds, it has become known that a considerable number of men, women and girls, belonging to the Irish revolutionary party, were continuing active propaganda work in London. This led to exhaustive inquiries and Saturday's raids.

CANADA PUTS STOP TO SILK SMUGGLING

Vigilant Officials Stamp Out Illicit Traffic Along the Niagara Frontier.

A despatch from Bridgeburg says:—Collector of Customs and Excise Frank T. Pattison believes that the backbone of the silk-smuggling industry has now been broken. With additional preventive measures that have been taken, it is his belief and the belief of other officials that silk smuggling has been practically stamped out along the Niagara border—a far different condition from that which existed two years, or even a year ago at this time.

Officers stationed at this frontier port have been active and on the job 24 hours a day for some weeks in efforts to secure the upper hand of the smuggling combine.

Cigarettes are about the only problem left with which border Customs officials have to cope. This later traffic is likewise being cut down to a minimum although it is difficult entirely to stamp it out.

The frontier port of Bridgeburg has come through, with honors, a difficult task in stopping the activities of the silk smugglers, and it is now predicted that the textile trade, struck several bad blows through successful coups by the rivermen who were handling the smuggling, will now revive considerably. It will be impossible totally to check silk smuggling, but at the same time it is believed it is now as closely confined as it is possible to keep it.

The Queen of Holland.

Queen Wilhelmina of Holland, who was crowned twenty-five years ago. She has been invited to visit New York next year to join in the celebration of the three hundredth anniversary of the founding of Dutch colonies in the New World.

Apples, pears, beans, poultry, oysters, frozen meat, bacon, flour, and bars for copper-making helped to make up the 10,000-ton miscellaneous cargo of an Atlantic liner which recently reached Liverpool from New York.

The number of forest rangers engaged in the work of forest control, with the object of preventing fires in the vicinity of the borders of Quebec and Ontario, will be tripled during the coming season, according to a statement made by the Provincial Minister of Lands and Forests. It is anticipated that a similar protection will be afforded the forests on the Quebec-Maine line.

The Week's Markets

TORONTO.

Manitoba wheat—No. 1 Northern, $1.30¼.
Manitoba oats—Nominal.
Manitoba barley—Nominal.
All the above track, Bay ports.

It takes at least six years to produce sufficient seeds of any new type of wheat to test it for milling purposes. If it fails then, the variety is discarded.

ISN'T IT EXASPERATING?

—Louisville Courier.

CORRESPONDENCE

(Continued from page 1.)

for which Mr. Biggs is acting as manager.

Mr. Biggs' contention that the adoption of the meter system would not increase the taxes if a service charge were made to cover the cost of installation is refreshing. Surely he knows that light rates are taxes and any money expended for improvement or changes is an additional expenditure that has to be met, and whether it is paid as a service charge to the consumer or directly by the consumer, it makes the taxes for light just that much greater and thus increases his total tax.

Mr. Biggs says, "certainly the value received from old wires hung from the power house to the old plate mill and which if pulled down would fetch scrap value, would not pay for wiring from the power house to the different buildings requiring the power."

I would like to ask Mr. Biggs if he has ever measured the length of wire from the power house to the plate mill. It may surprise him to learn that this despised line consists of 19,150 feet of 13 strand No. 9 copper wire, weighs 14362 pounds and at scrap value is worth $1436.-20. This sum will buy 63,831 feet of the necessary wire or enough to wire a distance of 21,277 feet, far more than sufficient to wire to all the buildings requiring power.

Mr. Biggs asks what would prevent the users of current for other purposes than light from switching on to the light current after the power current is shut off. This is the one and only point in Mr. Biggs' whole letter, but the answer is so simple that it would have occurred to Mr. Biggs as it would to any practical man.—Have the connection between the power current and all stationary electrical appliances of such a permanent nature as to prevent their removal to make place for a connection from the light current. This would still permit movable appliances, irons and toasters, to be connected to the light current but the amount of energy consumed by these appliances is so small that it is practically negligible

Mr. Biggs pretends to take my estimate of the cost of going into the meter system when he takes $6,200 as a basis of his calculations but my figure was $11,200. However for the purpose of examining his ability as a financier as exemplified by his figures we will assume the $6,200 instead of $11,200. The only way the payment of this $6,-200 could be spread over twenty years is by debenture. The total sum eventually paid if interest is computed at 6 per cent. would be $10312.80 or 540.64 each year. But this would not be paid equally by the 490 users (where does he get the 690?) but will be paid by all the ratepayers in proportion to their assessment and will increase the tax rate by almost a mill.

Your last week's correspondent But Mr. Biggs' argument means, if it means anything, that by a direct tax he would make the poor man, having a property worth say $400 with two lights in his house, pay exactly the same, towards the cost of going on the meter system, as the rich man owning a mansion in which he has 75 lights.

Your last week's correspondent attempts to show that by the plan I proposed, the rate for lights would increase, but his argument is not logical. Let us consider the whole cost of operating the Lighting plant both day and night as at present. I find from the financial statements of the last four years that the average total yearly cost of operation is $4227.50. If this plant should be run at night only this sum would be reduced to $2879.50. The total cost of operating the power plant on the bank day time only for one year would be $2923. The two together will therefore cost $5.802.50. The revenue from the Lighting Plant will be $4300 and the revenue from the Power Plant at even the low rate of $7.50 per H.P. for manufacturing purposes and $13.50 per H. P. for water heaters, cooking ranges, etc., would be $2837 or a total revenue from the two plants of $7137 as against an outlay of $5802.50. And yet your last week's correspondent says it will increase the light rate

In conclusion Mr. Editor, I beg to call the attention of your readers to the fact that in neither my former letter nor this one, have I criticized the other members of the citizens' committee or their actions but have simply tried to show why I could not agree with them. But sir, it is no surprise to me that Mr. Biggs should favor a majority report recommending that householders should be put upon meters in order to conserve current for Mr. Biggs' manufacturing concern which, according to the Committee's report, is exempt from the meter system.

CARD OF THANKS

Miss Violet Trickey wishes to thank her many friends and the W.M.S. for their kindness to her while in the hospital and since returning home.

BY-LAW NO. 444

A By-law for granting a bonus to The Morrisburg Lumber Mills by way of fixing the assessment of the property owned and used by the said The Morrisburg Lumber Mills for manufacturing purposes.

WHEREAS it is expedient in the interest of the municipality to grant the bonus hereinafter mentioned for the promotion of manufactures in the municipality.

BE IT THEREFORE ENACTED by the Municipal Council of the Corporation of the Village of Morrisburg as follows:

1. For the purpose mentioned in the preamble the property now owned by Frank Fentiman and William Dennis Killins carrying on business under the name and style of The Morrisburg Lumber Mills, being lots numbers twelve, thirteen and fourteen in block number thirty-nine in the said Village of Morrisburg according to the registered map of said village made by Walter Beatty, P.L.S., and any other property hereafter purchased and owned by the said The Morrisburg Lumber Mills during the period of years hereinafter limited shall be assessed at not more than the sum of One Thousand Seven Hundred Dollars during the period of ten years from the first day of January, A.D., 1923, provided the said The Morrisburg Lumber Mills use all of the said property for manufacturing purposes during the whole of the balance of said period of ten years as hereinafter mentioned; but this By-law shall not apply to or affect taxation for school purposes or local improvements.

2. The said The Morrisburg Lumber Mills shall enter into a contract with the said Corporation, at the time of the final passing of this By-law, covenanting to carry on for the balance of the said period of ten years upon the said property the manufacture of sash, window frames doors, blinds, mouldings, brackets, turnings, hardwood flooring, sheathing, V Joint, Rustic, Feather Edge, Silos and other manufactures of wood or other manufacturing industry; and also covenanting to employ from twelve to twenty workmen in the said manufacturing industry immediately after the expiration of one year from the final passing of this by-law and shall, where practicable, employ such workmen from residents of this municipality.

3. This By-law shall take effect on the day of the final passing thereof.

4. This By-law shall be finally considered by the Municipal Council of the said Corporation, and if the same shall be assented to by the electors, shall be then passed on Monday the 21st day of May, A.D., 1923, at the hour of eight o'clock in the afternoon.

By-law read a first time in open Council, this 18th day of April A.D., 1923.

F. R. CHALMERS,
Clerk.

By-law read a second time in open Council, this 18th day of April, A. D., 1923.

F. R. CHALMERS,
Clerk.

Take notice that the foregoing is a true copy of a proposed By-law of the Corporation of the Village of Morrisburg to be submitted to the votes of the electors on the 12th day of May, A.D., 1923, between the hours of nine o'clock in the fore noon and five o'clock in the afternoon at the following places:

Polling Sub-division No. 1—At the Town Hall.

Polling Sub-division No. 2—At the East Public School Building.

Polling Sub-division No. 3—At Mrs. Henderson's Coach House.

And that the 11th day of May, A. D. 1923, at ten o'clock in the forenoon, at the Clerk's office, in the said municipality, has been fixed for the appointment of persons to attend at the polling places, and at the final summing up of the votes by the Clerk.

And that if the assent of the electors is obtained to the said proposed By-law it will be taken into consideration by the Municipal Council of the said Corporation at a meeting thereof to be held after the expiration of one month from the date of the first publication of this notice, and that such first publication was made on the 20th day of April A.D., 1923.

F. R. CHALMERS,
Clerk.

CARD OF THANKS

The Middagh Bros. wish to extend their sincere thanks to all those who so kindly came to their relief in their recent bereavement.

HARRY & EDWARD MIDDAGH
Morrisburg.

"I Had Terrible Backache From Kidney Disease"

Mrs. M. A. McNeill, Canaan Sta., N.B., writes:

"I was troubled for years with terrible backache, resulting from kidney disease. At times in each month I remained in bed, the pain was more than I could stand, and to walk was almost impossible. I used about $50.00 worth of other medicines, but with little results. Now I am completely better, after using only five boxes of Dr. Chase's Kidney-Liver Pills.

Dr. Chase's Kidney-Liver Pills

One pill a dose, 25cts. a box. All dealers, or Edmanson, Bates & Co., Ltd., Toronto

AUCTION SALE

The undersigned will sell by public auction, on Tuesday, May 1st, on the premises, south of the residence of Mrs. Jarvis, West Main street, in Village of Morrisburg, commencing at 2 o'clock, the following.

OUR CORRESPONDENTS

WILLIAMSBURG

Early closing every Tuesday and Thursday at 6 p.m., beginning May 1st, until October 31st.

Mr. and Mrs. John Warring of Iroquois were calling on friends in this vicinity last week.

Miss Lyla Saddlemire was the guest of Mrs. Frank Powell last Sunday.

Mr. and Mrs. Perry Hess and Mrs. Minerva Hess were guests of Mr. and Mrs. Carl Fetterly last Sunday.

The old stork visited the home of Mr and Mrs. Bertram Whittaker last Sunday and made a gift of a daughter.

Miss Lucy Merkley spent last Sunday the guest of Mrs. Wilbert Winston.

Mr. Robert G. Merkley "the Rawleigh Man" was making calls in and around this vicinity last week.

Mr. Isaac L. McIntosh spent last week-end in Brockville renewing old acquaintances with Mr. James Dillabough of Sask., who is spending a couple of weeks with his mother, Mrs. Martha Dillabough.

Mr. M. O. Trickey is on the sick list. We hope to see him around soon.

Much sympathy is extended to Mr. and Mrs. George Durrant of Iroquois and to Mrs. Schlitzer of Cardinal in the death of their grand son and son Cecil Clifford, whose death occurred at the former's home this week after a lingering illness.

WILLIAMSBURG

(Too late for last week.)

Guests at Mr. R. C. Casselman's last Sunday: Mr. and Mrs. Clifford McIntosh and Mrs. Garnet Casselman and son Dwain of Ottawa.

Mr. and Mrs. Chas. E. Merkley spent a few days last week with friends in Toronto.

Mr. Frank Strader was the guest of Mr. and Mrs. Isaac J. McIntosh last Friday evening for tea.

Miss Lena Hollister spent last week with Mrs. Claude Casselman.

Mrs. Lee Tuttle and children of Dundela were guests of Mr. and Mrs. Geeorge Shannette last Thursday.

Miss Ida May Merkley spent last week end with Miss Kathleen McIntosh.

Mr. Alfred Casselman of Ottawa spent Easter holidays at his parental home.

Miss Emma McIntosh was the guest of her sister, Mrs. Thos. Eastwood, a few days last week.

Mrs. Amber Miller returned home last week after spending the past month with friends in Knowlton, Que.

Mr. and Mrs. Chas. E. Merkley, the Misses Dora and Lucy Merkley and Mr. Henry Merkley attended the banquet of the Rebekah Lodge held at Cornwall last Wednesday evening.

Mrs. Ross Hanson and Mrs. Isaac McIntosh visited their mother, Mrs. Susanna Merkley on Wednesday of his week.

Mrs. John Hanson spent a couple of days last week in Morrisburg with her mother, Mrs. E. P. Foster, who we are glad to learn is convalesing after her recent operation in the General Hospital, Montreal.

Mrs. Reuben Loucks and little daughter are spending this week at Mr. Conrad Whittaker's.

Messrs. Stanley Saddlemire, Ezra Casselman, Henry Merkley and Strader McIntosh motored to Brockville on Tuesday of this week.

Rev. A. Hall attended Presbytery meeting in Brockville on Tuesday of this week.

GLEN BECKER

A social evening and dance was held at Messrs. George and Isaac Hall's last Wednesday evening and all report a good time.

Mr. and Mrs. Stanley McIntosh of Williamsburg were calling at Merton Saddlemire's on the 17th.

Mr. and Mrs. Harry Myers and family of Morrisburg spent Sunday at Mr. Reuben Hunter's.

Mrs. Frank Powell and baby and Miss Lila Saddlemire visited friends at Froatburn one day last week.

Mr. and Mrs. Walt. Saddlemire were Sunday guests of Mr. and Mrs. Ralph Swerdfeger, Froatburn.

Mr. and Mrs. Percy Reddick and daughter, Laura, visited Mr. Henry Merkley's at Iroquois on Sunday.

Mr. Donald Beckstead is leaving for St. Catharine's this week where he has secured a position in one of the factories there.

Mr. and Mrs. Edwin Vincent and Mrs. Charles Watson were visiting at Dalton Saddlemire's on Monday of this week.

Mr. and Mrs. Stanley Saddlemire and Miss Lila were guests at the home of Mr. Peter McIntosh recently.

FROATBURN

The Assessor, Mr. Frank Whitteker of Dunbar, made his trip through Froatburn on Wednesday.

Mr. and Mrs. Luke Weagant of Riverside spent Sunday at Mr. Sterling Dillabough's.

The Misses Jeanette and Marion McHaffie and Grace Gallinger spent Saturday at Hugh McHaffie's.

The Messrs. Sam and Ross Swerdfeger made a business trip to Morrisburg on Friday.

Mr. Gillard was a recent caller at L. Millward's.

Mr. Mark Fetterly and daughter spent Sunday with friends in Froatburn.

Mr. and Mrs. Tommy Casselman spent Sunday evening at the latter's parental home.

Mr. and Mrs. Walter Saddlemire spent Sunday at Hugh McHaffie's.

Mr. and Mrs. Jacob Swerdfeger were visiting at the latter's parental home in Iroquois on Wednesday.

Mr. and Mrs. Harry Bowman spent one day recently at Jeff Swerdfeger's,

Mr. and Mrs. Jefferson Swerdfeger spent Friday at Neil Well's, Morrisburg.

Mr. and Mrs. J. Swerdfeger were calling at Jeff Swerdfeger's, Wednesday.

Mr. and Mrs. R. Swerdfeger spent one evening at John Casselman's, last week.

EAST WILLIAMSBURG

Mr. Wm. Barr, Aultsville, spent a couple of days last week at Mr. James VanAllen's.

Miss Olive Hess, Williamsburg, was visiting her grandparents, Mr. and Mrs. A. Hess, recently.

Mr. and Mrs. Ed. Hart of Cornwall spent Sunday with friends in our Burg.

Mr. William Loucks, 2nd Con., spent last week sawing wood in our Burg.

Mr. and Mrs. A. Hess spent Sunday at Mr. Walter Watson's.

Mr. Frank Jackson, Aultsville, spent a couple of days last week at Mr. Samuel Wells.

Mr. and Mrs. Wilfred Schwerdfeger, Froatburn, spent Sunday at the latter's parental home here.

Mr. Roy Dafoe of Brockville, spent the week end at Mr. Sidney Dafoe's.

Any one wanting to buy a couple of milch cows, call and see Walter Watson, Aultsville, R.R.

COLQUHOUN

Mr. W. H. Fetterley of Morrisburg was through here one day last week with his Delco-light.

Mr. G. W. Colquhoun spent Wednesday at Mr. McKenzie Thom's, Elma.

Mr. and Mrs. Edward Hanna, of Finch, spent Tuesday with their daughter, Mrs. Earl Droppo.

The regular meeting of the W.M.S. of Colquhoun was held in the church on April 11th, with a good attendance.

Rev. Mr. Barron of Finch, spent over Saturday with Mr. and Mrs. Earnest McMillan.

Mrs. Ernie Styles, Riverside, and Miss Verna Herriman spent Tuesday at Mr. Calvin Gallinger's.

Mr. Willie Black, Elma, spent Sunday at his home here.

Mr. and Mrs. Willie Barringer of Russell, spent Saturday and Sunday with the latter's sister, Mrs. Aden Durant.

Mr. and Mrs. Calvin Gallinger were in Aultsville on Wednesday.

CEDAR GROVE

Mr. Robert Dafoe is spending a few days this week with Mr. and Mrs. Roy Sweet and family of Bombay, N.Y.

Miss Aggie Empey is at present the guest of her brother, Mr. D. Empey and family, Third Ave.

Mr. Harold McIntosh of Nudell Bush visited his brother, Mr. Earl McIntosh, the 15th.

Mr. and Mrs. Fred Dafoe and Miss Greta spent Monday with Mr. and Mrs. Ed. Pier, Third Ave

Mr. and Mrs. C. Millan were guests of Mr. and Mrs. E. Dennison of Archer, Monday.

Mrs. F. McConnell and Miss Muriel visited Mrs. R. Gallinger and Miss Fern, at Gallingertown the 14th.

Mr. and Mrs. Milton Crites and son spent the 15th with Mrs. Crites' parents, Mr. and Mrs. J. Fetterly of Grantley.

Mr. and Mrs. Lloyd Brown and baby were visitors of Mr. and Mrs. Wm. Barr, Aultsville, Sunday.

Miss Leanie Dafoe, who spent the past three weeks with friends in Ottawa, returned home on Wednesday.

Mr. and Mrs. Fred McIntosh of Nudel Bush spent Monday with Mr. and Mrs. Milton Crites.

Miss Aileen Barr of Aultsville, spent a few days this week with her sister, Mrs. L. Brown.

Mr. Oscar Lane is busy building a new barn. Mr. George Beckstead of Aultsville is doing the framing.

MARIATOWN

Mrs. A. McHaffie of Morrisburg was a visitor at Mr. and Mrs. A. Sullivan, Thursday.

Mrs. William Fetterly of Russell is spending a few days with her father, Mr. John B. Baker.

Miss E. Whitteker of Williamsburg spent Friday afternoon with her sister, Mrs. H. G. Froats.

Mr. J. D. Deeks made a business trip to Ottawa Thursday.

Mrs. J. F. Beckstead is on the sick list this week.

We are sorry to report Mr. J. D. Dain is not improving very rapidly.

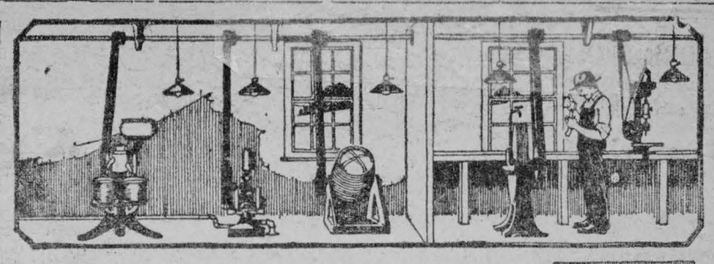
Mr. and Mrs. B. B. Tucker of Morrisburg spent Sunday with Mr. and Mrs. H. D. Swerdfeger.

Mr. Vincent Hutt was home for a few days and left on Wednesday for Massena and then he intends leaving there shortly for Rochester, N.Y.

Mrs. J. Price and sons Donald and Robert left on Wednesday for Sudbury after spending the winter months here.

Miss Della McLatchie and Mr. Eddie Mullin, Morrisburg, were guests of Mr. and Mrs. T. Cleland Sunday.

A few of our interested ones took in the pruning demonstration at Mr. W. Robertson's, Tuesday.



When you see the "F" Power and Light Plant

at work you will agree it is the handiest and most practical plant made.

It was designed first of all for producing electric light anywhere and everywhere—cheaply and well, and it does that job to perfection. It floods your home, shop, or other buildings with clean, brilliant light for a few cents a day, and still has power to spare.

When you examine it's sturdy construction, and mechanical simplicity, and note it's flexibility and ease of operation, you will wonder how it can be sold at the price.

We have no hesitation in telling you the demand for the "F" Plant all over the country is so great, that now is the time to install your plant if you want the advantages of Power and Light at low cost.

Come in any day and see the "F" Plant in operation, or send me a post card asking for a catalogue.

ANNOUNCEMENT

The Morrisburg Lumber Mills

Successors to

A. H. MERKLEY

BEG TO ANNOUNCE that they are open to meet the demands of the Public in Lumber and Factory Work. In a short time our stock will be complete and will be glad to quote on anything in our line. Our Mill and Factory have undergone a complete overhauling and placed in first class shape for high grade work. Our Mechanics are of the highest order, being experts in their line. and our Kilns will ensure satis factory product.

OUR SAW MILL will undergo a complete change this summer. For the convenience of our patrons, we will have new skidways set up and the entire mill set on concrete to insure the best possible sawing. The sawmill building will be built new and modern in every respect.

It is our aim to satisfy our customers in all their requirements and give courteous attention to any one who calls or writes for information.

We have in our office for your convenience designs of houses and farm buildings of every description and will furnish "free" full plans and specifications for any of these with order.

We are prepared to furnish entire buildings of any size, or anything such as Sash, Window Frames, Doors, Mouldings, Brackets, Blinds, Turnings, Hardwood Flooring, Sheathing, V Joint, Rustic, Feather Edge, Silos, in fact anything in wood.

We have also a good grist mill and will grind while you wait.

Mr. W. Killins, a man of many years' business experience, will have charge of the office and accounts, and will be found most courteous and glad at all time to get or give information or help to anyone who intends to build or who may need quotations on any of our lines. Call, write or phone at any time.

Mr. Fentiman will be in charge of the plant and yards and will personally supervise your orders at all times. He has been for the past fifteen years in charge of large business concerns in Ottawa and will bring up-to-date methods to bare on our products and orders will be turned out in first class shape in the shortest possible time.

You will find it to your interest to come and see us when in town. Come and see us, whither you buy or not. We will be glad to show you around.

Address communications to Agronomist, 73 Adelaide St. West, Toronto

SOME COMMON CHICK DISEASES—THEIR PREVENTION AND CONTROL.

Chick mortality is something which will always have to be contended with, and no matter what steps are taken there will still be a certain death rate, as in all other classes of animals. What this can be reduced to, cannot be predicted at the present time. It is safe to say, however, that should effective attention be given to some causes, which are easily remedied, there naturally will be a reduction in the number of deaths.

Normal chick mortality.—This varies greatly according to the conditions of flock management. Where the young are reared under comparatively normal conditions, where the flock is small, the range liberal though protected, the food and attention as well as the sanitary and hygienic conditions being all that can be desired, the loss usually is reduced to a minimum. On the other hand when part or all of these conditions are interfered with the death rate frequently increases to an alarming extent.

In many instances the chick's life has been settled before the egg leaves the oviduct; for example, the hatchability varies greatly between eggs handled and incubated in precisely the same manner. Chick diseases with their resulting mortality are due to predisposing and exciting causes.

Predispositions — Predisposition to disease is generally passed over far too lightly and it is regretted that such is the case. If one wishes to see just the part it plays take two hatches of chicks, the one where the percentage hatched has been low and with low vitality, while the other bunch is just the opposite—strong, sturdy and active. As a usual thing it is no matter of conjecture as to which will be the harder to raise, and which will be the more subject to disease.

We should differentiate between a prenatal predisposition, and a tendency to contract disease as a result of environment. It is commonly said that a sick hen will not lay. This is probably true, but a hen low in vitality will lay, and the chicks hatched from her eggs will inherit constitutional weakness. Consider such gross defects as watery whites and chalky shells which probably appear in varying degrees, frequently to pass undetected. Both of these substances must furnish nourishment to the developing embryo, and it cannot build up a normal body from materials which may be lacking in essential substances. Then again there are the unseen components of the egg, such as the newer known vitamines. If a hen has laid heavily for some time, the food supply being deficient in some of these essential substances, and her body supply has been called upon until no longer an available supply exists there, it will naturally follow that the egg must be lacking in these materials. If vitamines are essential to the health and development of a growing chick they must be considered during the twenty days which it spends in the shell. The presence or absence of vitamines in cows' milk has been found to be dependent upon the animals' food. A food supply, though otherwise abundant, but deficient or lacking in vitamines results in a milk product correspondingly deficient. Possibly the same can be said of the hen's egg, with regard to these elusive though essential substances.

Environmental Predisposition to Disease—The normal animal body under natural conditions is not a very suitable medium for the growth and development of pathogenic organisms. When this does take place the parasites are almost invariably assisted by other agents. If a "slums" condition is created there must follow a harvest of chick fatalities as a penalty, just as there is a high infant mortality under similar conditions.

It may not be apparent to many just what constitutes chick slums, nor how near they have permitted conditions to approach this undesirable state. As contributing factors we have crowding, fouled soil, contaminated utensils, bad ventilation, insanitary quarters, insufficient or variable heat supply and unsuitable food.

Of crowding little need be said as it must be apparent to all that the larger the number the greater becomes the hazard from disease. Close cohabitation favors the quick spread of infection and increased virulence of disease.

The soil can, and frequently does, become the source from which many chick epizootics have their serious beginning. Certain protozoa, capable of setting up disease in the alimentary tract, are able to live in the soil. When the soil becomes polluted with feces these lower forms of life become greatly increased in number. This favors a return of the parasites to the hosts' gut in large numbers, resulting in the loss of much life.

Utensils which are left with particles of food attached for anything like protracted periods are excellent places for the colonization of bacteria. While these in every instance may not be pathogenic organisms they frequently are capable of causing digestive disorders resulting in diarrhoea of a fatal nature.

Ventilation must be maintained without producing draughts. The quarters must not be so close, however, that on opening a chicken odor is noticeable, nor must there be sufficient opening to cause the temperature to fall during the colder hours of night. Chills have a most disastrous effect on young chick life. If the chicks appear listless when let out of doors in the morning but soon regain their normal activity when in the open, consider the ventilation inadequate. If this continues the chicks' health will soon suffer.

Chick dietetics has received considerable attention, and the brands of suitable feeds and methods of feeding are almost legion. When chick mortality increase a finger of doubt is almost invariably pointed at the food. When standard feeds are used, and methods followed which have stood the test of time, they should be questioned only after all other predisposing causes of disease have been placed beyond doubt.

The actual cause of chick disease whether it be protozoa or bacterial organisms is of far less concern than the conditions which permit the spread and multiplication of the parasites to the extent of causing disease.

Little hope of treating the subjects should be entertained, but rather every effort should be given to prevention. Time and money expended in sanitation and hygiene are good insurances that will pay well. With the foregoing attended to, unless the chicks are subnormal when hatched, the mortality should be maintained at a minimum.

HORSE

As the spring planting season is short, farm operations must be rushed. This entails long hours, and with modern machinery it also means heavy work for farm horses. Horses working in harrows, discs and manure spreaders are pulling heavy loads, and in many cases they are pulling them over broken ground. Because the work is hard and the hours are long the horses must be in good physical condition. This is only possible when horses are fitted for spring work.

If they have been fed a liberal grain allowance they will be fat and soft, and should get regular exercise to harden their muscles. If they have been carried through the winter mainly on roughage, with very little grain, they should be given regular exercise and the grain ration should be increased to one pound per hundred pounds of live weight. Violent changes in either the diet or the habits of horses are injurious, and for this reason the farmer should begin getting his horses in shape a month, or preferably six weeks before heavy spring work begins, gradually increasing the grain and work so that the horse will be in shape to perform a heavy day's work when the rush season begins. The grain ration should be increased to at least one and a quarter pounds per hundred pounds live weight when the heavy spring planting commences.

The hay fed before and during the busy season should be either high grade timothy or a mixture of bright, clean timothy and clover. The grain fed while the horse is being fitted may consist wholly of oats; or a mixture of three parts of oats to one part of bran may be fed. Bran is too laxative for horses at heavy work, and no more than one part of bran to five or six parts of oats should be fed during the busy season except on Saturday night when a bran mash is advisable.

Sometimes a horse does not seem to be digesting his food properly, in which case the teeth should be examined and any that are long and ragged floated smooth. Indeed it is a good practice to go over all the horse's teeth each spring before starting to prepare the animal for spring work.

By properly fitting his horses for spring work the farmer will avoid sore shoulders, his horses will finish the season in good condition and they will render much more efficient service than if they had begun the spring work without being properly fitted for it.

Corn as a Feeding Stuff.

Corn, says a Dominion Agricultural Bulletin on Commercial Feeding Stuffs, is probably the most palatable and highly relished of all the grains used in feeding live stock. While rich in starch and oil, it is lacking in protein and mineral matter, and is, therefore, more suitable for fattening stock than for cows producing milk or in calf or for young and growing stock. Indeed for all classes of live stock it must be supplemented with feeds rich in protein and ash constituents, if satisfactory results are to be obtained. It is particularly relished by poultry, but must be sparingly fed to layers or they will become nonproductive through over-fatness. In fattening poultry also its excessive use tends to the development of fat rather than the production of a properly fleshed fowl.

Opals are so soft when first taken from the ground that they may be pulled apart with the fingers.

A Canadian at Harvard.

Clarence M. Warner, formerly of Napanee, Ontario, is another Canadian who occupies an important post in the United States, as curator of the Canadian section of Harvard University library. Through his keen interest in Canadian history he has secured enormous and valuable collections of records relating to Canadian affairs.

The Food of Pigeons.

Practically all cereals constitute a good feed for domestic pigeons, says a bulletin on pigeons, just issued by the Poultry Division of the Dominion Experimental Farms. The best are peas, wheat, barley, and buckwheat, which should be fed mixed and whole, as they are more palatable to the pigeons. Care must be taken, in order to avoid bowel and digestive trouble, not to feed green or absolutely new and unseasoned grain. All grain should be fed in hoppers, so as to keep it clean and wholesome, and the hoppers should be so constructed that the birds may not be able to turn around on the open front.

As to the value of the various grains that may be fed, the bulletin says: Barley in limited quantities is a good summer feed; cracked corn is a good feed when used in limited quantities, but care should be taken, owing to its fattening propensity, not to use it too freely, especially with birds in confinement; wheat is one of the best grains, but the use of immature or new wheat should be avoided; pigeon breeders look on peas as essential and they generally form from 25 to 50 per cent. of the ration; clipped oats or, better still, grouts, are recommended during the laying season; rye is not a satisfactory feed; hemp is heating, but can be given occasionally in small quantities to add variety to the ration, and is looked on with favor for use during the mating season. A continual supply of pure drinking water should be kept before the birds and in the lofts of pigeons bred in captivity, hoppers containing rock salt, fine gravel, crushed oyster shells, charcoal, and pulverized mortar, in separate compartments, should be constantly replenished.

Must Go All the Way.

The Good Book tells us that, if we transgress the law in part, we are guilty of all. This advice can be carried over into the farming business to the advantage of the man who tills the land.

In growing crops there are limiting factors. Good seeds are necessary, but good seeds alone will not give a maximum crop. Plenty of available plant food is necessary, but an abundance of pre-digested plant food alone will not give a maximum crop. A fine, well-compacted seedbed is necessary, but such a seed-bed alone will not give a bumper crop. And so on with all the various factors required for the bringing to maturity of a crop that is worth while.

Now, the point is this: Unless we are willing and able to go the whole distance and provide all the factors required in the growing of a maximum crop, or in the developing and fitting of stock, then it is better that we go to work on the road, accept the managership of some bank, or run on the free-for-all ticket at the next election.

HOGS

One pretty good rule is that 100 pounds of skim-milk are worth one-half the price of a bushel of corn for feding hogs.

Another rule, a little more reliable, is this: When fed alone, the value of 100 pounds of skim-milk equals the market price of live hogs, in cents per pound, multiplied by five. If fed in combination with corn or barley, it is worth the price multiplied by six instead of by five.

The following example shows how the second rule works: If hogs are worth eight cents a pound, 100 pounds of skim-milk would be worth for feeding eight times five, or forty cents, if fed alone. If fed with corn or barley, as it usually is, it would be worth forty-eight cents. A limited amount of skim-milk for feeding small pigs or brood sows is worth much more to the hundred pounds. The larger the percentage that milk makes of the total feed, and the older the hogs, the less the milk is worth. The above rule is for pork production in general.

Planting of Fruits, Vegetables and Flowers

So much of the success in the growing of fruits, vegetables and flowers depends upon the quick establishment and early starting into growth of the plant that it is very important that promptness, when the right time comes, and care in planting should be impressed on everyone.

Fruit trees, fruit bushes, and strawberry plants all do best when planted as soon as the soil is dry enough to work in the spring. This means early spring before growth has begun. The later the planting is left the less the chances of success. Too much cannot be said about the importance of preventing the drying out of roots before planting. Sometimes plants arrive with the roots rather dry, and if there is delay in planting they may be very dry, if not actually dead, before the tree or plant is set out. In the case of the trees and bushes, they may leaf out after planting, but, the roots being dead, the leaves soon wither and the plant dies.

When received, trees, bushes, and strawberry plants should be opened up, and if the roots are at all dry they should be well soaked with water before heeling in until they can be planted. Strawberry plants are very subject to heating, and if left in the bundle for a few days the roots are likely to die from this cause. They should be taken out of the package and heeled in well, spreading out the plants and roots so that the moist soil can be brought in close contact with them. When trees, bushes or strawberry plants are taken to the field to plant the roots should be exposed to the sun as little as possible and should be planted as promptly as possible so as to prevent the roots from becoming dry. One of the most important items in planting is to make the soil firm about the roots as, if it is not made firm, moisture will not reach the roots promptly and continuously and, even though the plant may be in good condition when set out, it may die because the soil about the roots becomes too dry after planting. Proper depth of planting is important. Trees and bushes should be planted from two to three inches deeper than they were before. This provides for a slight heaving which may occur the first winter after planting. Strawberry plants, however, should be planted as near as possible at the depth they were before. If planted too deeply they do not do well, and if planted too shallow they are likely to die. By reducing the top of the trees and bushes from one-third to a half, by pruning immediately after planting, success will be much surer than if the whole top is left on as in the disturbance in transplanting many roots are destroyed, and the top must be reduced to offset this loss.

In the planting of vegetables the same care is necessary in preventing the roots from becoming dry and in firming the soil about the roots after planting, as is the case with fruit trees and bushes. The hardening off of plants in the cold frame is very important when one grows one's own plants. If plants have been grown in the house or in a hot-bed and are set out direct from there to the open field the foliage will be soft and very liable to be injured by sun and wind. The danger from light frosts will also be much greater than if the plants are hardened off by exposing them in a cold frame or other sheltered place and protecting from frost for a few days before planting out in the field, by which time the leaves will be much better able to withstand sun, wind and frost.

Some vegetables require much higher temperatures than others, and little is to be gained by sowing seed of certain kinds early or setting out plants. Seed is very liable to rot without germinating if the temperature of the soil is too low, and very little frost will kill some plants.

The following classification of varieties as to time of sowing will be found useful:

Seed to be sown early in spring—beets, carrots, lettuce, onions, parsnips, peas, radishes, kohl-rabi, garden cress, salsify, spinach, parsley, and leeks.

Seed sown in hot-beds but plants will stand some frost—cabbage, cauliflower, celery.

Seed to be sown after danger of frost is over unless protected—beans, corn, cucumbers, melons, and squash. Seed of late cabbage is not sown until May, but the plants will endure frost, and seed of Swede turnip should be sown late, though turnips will stand frost. Where early potatoes are desired, they may be planted even when there is danger of their being frozen after they are up as it has been found they will come on again even after being frozen, and in places where the season is short early planting ensures the largest crops.

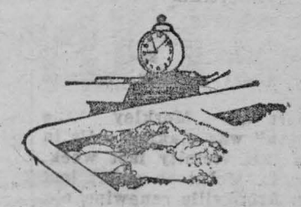
Seed sown in hot-beds, but plants will not stand frost—melons, egg plants, peppers.

Ornamental trees and shrubs require the same care in planting as fruit trees and fruit bushes, and should be set out early for best results. In growing annual flowers for setting out it is important to harden them off, as is the case with vegetables, if best results are to be obtained. There is a great advantage in time of blooming of using plants rather than seed of most annuals, but Sweet Alyssum, Eschscholtzia, Poppy, Annual Gypsophila, Portulaca, and others should be sown in the open. —W. T. Macoun, Dominion Horticulturist.

Dissolve in boiling water

Use enough to get a big lasting suds

Big lasting suds—one secret of Rinso's amazing power to dissolve dirt. If you don't get lasting suds, you have not used enough Rinso.



Soak an hour or more Overnight if you wish
(Colored clothes only half an hour)

After soaking, only the most soiled clothes need a light rubbing with dry Rinso.

Your clothes don't need boiling if you use Rinso. But if you like to boil your white cottons, use enough Rinso solution to get the suds you like.

Rinso is made by the largest soap makers in the world to do the family wash as easily and safely as LUX does fine things.

TORONTO R302

Putting Away Hams for the Summer.

I have had quite a number of years' experience in putting up hams for the summer. As I have never lost a ham or had one bothered by the insects, I gladly give to others the simple process I have used.

When the hams are removed from the salt they are smoked for several days. Then I carry them to the kitchen. I make a thick flour paste by dissolving the flour in cold water and pouring into the mixture boiling water until it has come to a starchy thickness. I stir cayenne pepper into this until it has a reddish cast. About two tablespoonfuls to a gallon of paste will be right.

I dip each joint of meat into boiling water for an instant to destroy any insect eggs that may have become attached to it. Then I rub paste over the ham until it is thoroughly covered, after which I wrap it in light brown wrapping paper, taking care to see that the paper adheres to and covers every part of the ham. Thus all flies are excluded from coming in contact with the meat.

As soon as the paper on the ham is thoroughly dried, I place each ham in a canvas sack, tie it tightly, and hang it in the smokehouse to remain until ready for use.—W. D. N.

To Control Striped Beetle.

Here is my recipe for taking care of the striped vine bug, the squash bug and the onion maggot. I save all fine ashes and soot from the stove and pipe during the winter, keeping them dry. Then I take a syrup pail, put a stout bail on same and punch about two holes in the centre of the bottom of the pail with a twenty-penny spike. I have used this dope for twenty-five years and never lost by it. I have raised onions on the same ground for four years, and the fourth crop was the best.—N. M. Crout.

Recipe for soap: Dissolve one can of lye in two and one-half pints of rainwater and let stand an hour or till blood-warm, then pour five and one-half pints melted lard into the lye and water, stirring all the time while pouring and till it looks smooth and well dissolved, then set away till entirely cold. Cover while cooling.

A good crack filler for floors can be made by mixing flour paste (flour boiled in water) with plaster of Paris.

In scalding hogs, do not have the water boiling when the hog is plunged in, but a few degrees below the boiling point. We add a bucket of cold water. If the water is too hot, the hair will set, making cleaning a difficult task. To a kettle containing fifty gallons of water, add a small shovelful of hardwood ashes. These are a great help in removing the hair and black scurf.

Brantford Concrete Mixer

Built for Years of Service

The "Brantford" Concrete Mixer for small jobs is built to stand up under hard usage. It cuts labor in half when building silos, foundations, barn floors, etc. Many farmers use it to mix feed or fertilizer. Made for hand or power. We also build larger size mixers for heavier work. Write for booklet.

A TREATISE on the Horse—FREE!

This book is one of the best ever written for the horseman and the farmer. In plain, everyday, understandable English it deals with every ailment that horseflesh is heir to, and tells how to treat them. It has chapters on shoes and shoeing, breeding and feeding. The book is worth many dollars to the handler of horses, but all you have to do is to ask your druggist for it. It is absolutely free. Here is one opinion:

SOUTH BRANCH, N.S., Jan. 19, 1922.
"Please send me by mail your GREAT book showing positions and actions of sick horses. Have been using your Kendall's Spavin Treatment for years and think it is a great treatment."
PERLY CORKUM.

If your druggist has not a copy of the book left write us direct:

Surnames and Their Origin

DEXTER.

Racial Origin—English.
Source—A locality.

Here is a family name which, from its ending, might appear to belong to that classification of surnames which have been derived from the names of occupations—names, for instance, such as Baxter, which originally was "Bakester" or "Baker."

As a matter of fact, however, it is a compound of a place name with the Norman-French prefix "de," meaning "of" or "from" and quite generally used in the early period of family name formation to indicate the locality from which the bearer of the name had come, or with which he was in some special way connected.

Earlier records of this name as "d'Exeter" and "d'Excester" show that in its original use it meant simply "of Exeter," the reference being to the ancient city of that name in Devonshire.

Exeter is located on a river known to the ancients as the Exe. The rest of the name comes from the Latin "castrum," meaning a camp, which the Anglo-Saxons called "caester," thus indicating "Execaester" as the more ancient name of the city.

KELSO.

Racial Origin—Scottish.
Source—A place name.

There is such a similarity between the family names of Kelso and Kelsey, the latter of which was explained in the preceding article, that one might be pardoned for jumping at the conclusion that they are really but variations of the same name. They are not, however.

Kelsey is a name of Cornish origin. Kelso is Scottish. And though both are derived from place names, these place names are alike neither in spelling nor meaning.

Kelsey, it was explained, came from the ancient place name of "Kelsyc." Kelso comes from the place name of "Calchow," which was a corruption of the more ancient form of "Chalkheugh."

Though Scottish, this name is Anglo-Saxon, being in Roxburghshire. Its meaning was "chalk-hill. Note how the North English speech maintained the initial "ch" as a "k," though the second "ch" became softened and finally changed into an "s."

Was Methuselah Really Old?

How old was Methuselah?

Nine hundred and sixty-nine years is the age with which we have always credited this patriarch. Now however, scientific research has reduced the figure to 78¾ years!

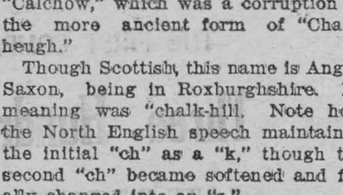
Experts point uot that there has always been a certain amount of doubt concerning the great age supposed to have been attained by patriarchs, and many theories have been evolved to reduce Biblical records of this kind to something near man's normal span.

It is supposed that in the earliest times the month, or period of a moon cycle, was called a year. So that Adam's 930 years of life, calculating a year at 29½ days, the length of a lunar month, works out at 75¼ years.

After the month-year there would appear to have come a five-month year, the limit of five being derived from the fingers of one hand, for primitive peoples used the fingers for purposes of calculation. On the five-month year basis, Abraham's 175 years shrink to 72, and Isaac's 180 to 74.

It is also pointed out that it is possible there intervened a six-month year, discovered by Jacob while watching Laban's flocks. Thus Jacob's 147 years work out at about 73.

The twelve-month year originated with the Egyptians, who saw that a complete period was made up of two "years," in one of which the days were longer than the nights, and in the other the nights were longer than the days.



Feared the Results.

Father—"That fellow you're going with is a bad egg."

Daughter—"I know it. I'd have dropped him long ago if it weren't for that."

Small Garden Implement Has Many Uses.

With its uses as spade, stirring fork, rake, and hoe, a new combination tool will prove a handy implement in the flower and kitchen garden. It is easily changed from one form to another by a locking plate.

Minard's Liniment used by Physicians.

The Work of Paul Peel.

A piece of sculpture by Paul Peel, the famous Canadian painter, whose picture, "After the Bath," has just been returned to Canada, purchased by Henry Pocok, of London, Ont., from the Hungarian government. The figure was presented years ago to the London library by Paul Peel's father.

NEW BLOOD NEEDED IN THE SPRINGTIME

Try Dr. Williams' Pink Pills as a Blood-Improving, Health-Restoring Tonic.

Every man, woman and child needs new, rich, red blood at this time of the year. That is a scientific fact. All doctors know it. The blood grows thin and poor in the winter; there is not enough of it and spring shows the effect. Take notice and see how many people are pale and sallow at this time of the year. They complain of being easily tired, their appetite is poor, and they are often depressed and low-spirited. That is mother nature urging them to improve their blood supply; but often their digestion is weakened so that they cannot turn food into blood without help. Here is where modern medical science comes to the rescue. Dr. Williams' Pink Pills have a direct action on the blood and enable you to get full use of the blood-making elements in your meals. You soon feel their effect—your appetite improves, your nerves are steadier, color returns to the cheeks and lips, you have more vim and energy and can work with less fatigue. The above statements are borne out by the experience of Mr. J. P. Greschuk, Janow, Man., who says:—"Very recently I found myself in a badly run down condition. My stomach was quite out of order; I could eat but little and what I did eat did not appear to nourish me. I did not seem to have enough blood; my hands and legs were blue, and I had no strength to work. I tried several medicines but did not get good results. Then one day reading our newspaper I read about Dr. Williams' Pink Pills and decided to try them. I used a half dozen boxes, and now I feel well and strong, have a good appetite, and can do my work with ease. Naturally I have great faith in this medicine as a blood-making tonic."

Whether you are seriously ill, or merely feel easily tired and out-of-sorts, you should try Dr. Williams' Pink Pills this spring. They are sold by medicine dealers everywhere, or will be sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

Getting Even.

The foreman was going from one man to another with a sheet of paper in his hand. When he came to Sandy McKie he said:

"Sandy, this is a subscription to get a wreath for Jim Lomond, who died last week. All your workmates have given a shilling each towards it."

"Och, mon," replied Sandy, "that'll make me and Jim square noo. He owed me a bob, onyway."

MONEY ORDERS.

Poor Fannie.

Fannie was eating an apple, when she suddenly cried out in pain.

"What is the matter, darling?" asked her mother.

"I stepped on my tongue with my teeth," said Fannie.

"She—"George, do you love me for myself alone?"

He—"Yes, dear, but there's no use offending yer ma and pa by letting 'em know it."

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little one she would use nothing else. The Tablets give such results that the mother has nothing but words of praise and thankfulness for them. Among the thousands of mothers throughout Canada who praise the Tablets is Mrs. David A. Anderson, New Glasgow, N.S., who writes:—"I have used Baby's Own Tablets for my children and from my experience I would not be without them. I would urge every other mother to keep a box of the Tablets in the house." The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and make teething easy. They are sold by medicine dealers, or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Preventing Disease.

The modern aim of medicine to prevent disease rather than wait for it to declare itself is encouraging. In former days people used to remark with some amusement that among other "queer" customs of the Chinese—queer because contrary to our ideas or practice—was that of paying the doctor only so long as you were well; but nowadays we are beginning to think that the custom is perhaps not so funny after all. We have always been fond of saying, "An ounce of prevention is worth a pound of cure," but, curiously enough, we applied the maxim to almost everything except health. Now, however, we are coming to see that it applies to bodily ills with special force.

The modern effort to prevent disease began with the doctors, who in spite of the good-natured, and the sometimes ill-natured, fun that is poked at them are true lovers of their kind. Since, with some few exceptions, we have not adopted the Chinese plan, the doctor earns his living solely by caring for the sick, and the fewer the sick the harder it is for him to earn his living. Nevertheless, he is working constantly to teach people how to keep well.

Societies have been formed for instructing the public how to avoid tuberculosis, cancer, heart disease and other great scourges of mankind. Moreover, associations of medical men have been established for considering the best means to promote public health and to prevent epidemics. But at bottom responsibility for health rests with the individual, who should form the habit of going to his physician for a clean bill of health, just as he goes to his dentist to ascertain the condition of his mouth.

The Lost Mother.

MRS. J. GILMORE DISCUSSES CASE

Despaired of Ever Getting Well, But Tanlac Entirely Ended Stomach Trouble, She Declares.

"I was just hopeless of being well again, when along came Tanlac, and to-day I enjoy the best of health. I will praise this medicine as long as I live." This grateful statement was made recently by Mrs. Janet Gilmore, 73 DeGrassi St., Toronto, Ont.

"For seventeen months I led a miserable existence with stomach trouble. My appetite left me and anyhow I was afraid to eat. Gas on my stomach pressed around my heart till I thought I would smother, and my nerves were so excited even the noise of the children playing nearly drove me frantic. I could get no restful sleep and it was next to impossible for me to do any housework.

"Then I started on Tanlac and the first bottle convinced me I had the right medicine. I now feel like a new person, without a single ailment. Tanlac has no equal."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

Newsprint From Grass.

John Johnston, formerly a well known Grand Trunk conductor, died recently at Fenner, Alberta, in his 70th year. He was born at Inkerman and had been in poor health for some years. For a period of more than 30 years he was in the service of the transportation department of the Grand Trunk and in 1911 moved to Alberta.

* * *

Owing to the lateness of the season, membership in the Horticultural Society will be extended to May 1st, 1923. All those who have not yet joined are urged to do so before this date as we cannot guarantee delivery of any goods thereafter for Spring planting. Memberships will, however, be received up to July 1st, the premiums going with the membership such as Tulips Hyacinths, Daffodils and other bulbs and paeonies being delivered in the Fall.

* * *

Mrs. Jane Reid, widow of John Reid and mother of Hon. Dr. John [illegible] Senator, Prescott, died on [illegible] at her home in Cardinal at the age of 88. The late Mrs. Reid was born in Prescott, the daughter of John Dowsley, of whose family she was the last surviving member. Her husband, John Reid, collector of canal tolls at Cardinal and also superintendent of the Canada Starch Company works there, died some years ago. There survive two sons and four daughters: Hon. J. D. Reid, Prescott; George Reid, Cardinal; Mrs. (Dr.) Gow, Calgary; Mrs. Charles Virtue, Montreal; Mrs. Jas. Meikle and Mrs. Edward Dodge of Cardinal.

A meeting to organize the local Base Ball Team, will be held in the Town Hall, Tuesday evening, April 24th, at 8 p.m.

Read the by-law in this week's issue of The Leader. It will enable you to cast your vote intelligently on May 12th. By voting for the bylaw you do not only encourage this industry, but you will encourage other industries to locate here. The Morrisburg Lumber Mills are not asking for any additional concession, that Mr. A. H. Merkley did not enjoy, but they are merely asking the citizens to register their votes as a guarantee that the present assessment of $1700 will remain in force for a term of years. It is a splendid opportunity for the citizens to make known abroad that they realize the advantages of having these industries, and that they are ready to extend due courtesy to concerns who have the courage to invest thousands of dollars in our midst without any financial assistance from the municipality. Such a concern cannot afford to lose the money they have invested, they must grow. Lend your support (not your money) by carrying the by-law "over the top" on May 12th.

The Presbytery of Brockville last week accepted the resignation of Rev. William Usher from the charge of Bishop's Mills and East Oxford to take an appointment under the Home Missions committee at Cushing, Que., and that of Rev. Arthur Hall from the charge of Williamsburg and Winchester Springs. The first resignation is effective after the last Sunday in April and the second after June 1st. Rev. A. S. Morrison, Spencerville, is interim moderator of the first charge and Rev. R. J. M. Glassford, Winchester, of the second.

MRS. JOHN B. BAKER

On Monday, April 16th, the Angel of death came and claimed a loving wife and mother, in the person of Mrs. John B. Baker of Mariatown.

Deceased was a great sufferer for over two years and bore her suffering with little complaint, and though a great sufferer, she was never so weary that she could not make it a pleasure for you to be at her bedside. Deceased had only been in our midst a few weeks, during which time she gained many warm firends.

The funeral was held in the Methodist church, Morrisburg, service being conducted by the Pastor, Rev. Miller, who took for his text, psalm 23, 4 verse. Miss Della McLatchie sang, "Does Jesus Care".

After the service, the remains were laid in the vault.

Much sympathy is extended to the bereaved husband.

Those from a distance who attended the funeral were: Mr. and Mrs. R. McCaslin, Mr. and Mrs. Wesley McCaslin, Iroquois, Mrs. Frank Hunter, Mr. S. Baker, Ford and Garfield Baker, Mr. and Mrs. F. Huggabone, Mr. Herbert Baker and son, Arthur, Mrs. James Johnson, Winchester.

EDWARDS—WILLIAMS

The marriage of Mary Alexandra, daughter of Mr. and Mrs. George Williams to Arnold Edward, son of Mr. and Mrs. Alyney Crites, took place at the home of the bride's parents, Fairview Farm, Aultsville, April 9th. Rev. A. S. Stewart officiated. The bride, who was given away by her father, wore a gown of white silk with panels of radium lace and rosebud trimming. Her veil was caught at the sides with lilies of the valley and held in place with a band of pearls. She carried roses and fern tied with pink tulles.

Miss Dorotha Copas, cousin of the bride, attended as bridesmaid, and wore a silk dress with pink crepe-de-chine trimming, with a pink band in her hair. The bride's brother, Mr. Jack Williams, acted as best man. Mrs. Stewart played the wedding march.

The young couple left Tuesday for Montreal and other points.

ANNOUNCEMENT

Having sold my business to the Morrisburg Lumber Mills, I am closing my books. Any accounts due me may be paid at my house, Main street west until June 15th.

It is with regret that I end my business relations of more than fifty years, but I am confidant that the community will be better served by the greatly increased facilities of the new firm.

bp A. H. MERKLEY.

AUCTION SALE

The undersigned will sell by public auction at her premises on St. Lawrence street, opposite Fair Grounds, on Saturday afternoon, April 28th, commencing at one o'clock, her household effects, consisting of 2 ranges, 1 coal heater, sewing machine, side board, kitcher cupboard, 5 piece parlor suite, book case, 3 bed-room suites, carpets, tables, chairs, dishes, cooking utensils, and many other articles.

Terms of sale cash.

R. Link Auctioneer. MRS. A. J. HARRISON Proprietress.

NOTICE OF DISSOLUTION OF PARTNERSHIP

Notice is hereby given that the partnership heretofore subsisting between James L. Casselman and John F. Casselman, as heretofore carried on as Boot and Shoe Merchants, in the Village of Morrisburg, Ontario, under the name and style of J. F. Casselman & Company, has this day been dissolved by mutual consent, the said John F. Casselman retiring from the said firm. The business will be conducted as formerly under the name of J. L. Casselman by the remaining partner, James L. Casselman, who will pay all liabilities of the said firm. All accounts due the said firm must be paid at once, otherwise they will be placed in Court for collection.

Dated at Morrisburg, this 16th day of April, 1923.

JAMES L. CASSELMAN.
JOHN F. CASSELMAN.

In reference to the above the undersigned begs to tender to the customers and friends of the firm, his sincere thanks for the patronage extended during so many years, and solicits a continuance of the patronage and good will so freely extended to the firm in the past.

JAMES L. CASSELMAN.
