The Leader

XXXII No. 19 MORRISBURG, ONT. FRIDAY MAY 1932

Feeds

The Market is getting weaker and we quote lower prices on Bran, Shorts and Middlings.

Grass and Clover Seed

Afalfa is getting very scarce and is on the advance, while the rest of the seed is holding steady. As a special for this week, we are offering: Alsike and Timothy, mixed, 10½ cents per lb.

Recleaned Seed

Barley, Oats and Wheat, guaranteed free from weeds. Suitable for seed purposes.

SEED CORN

All Dents, per bus. $1.25
All Flints, per bus. 1.50

Special Corn

Rennie's XXX, per bus. $1.60
Tremendous ears and good stock. Give it a try.

Chick Feed & Mash

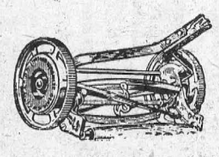
Monarch Chick Starter $2.75
Growing Mash 2.35
Monarch Chick Scratch 2.25
Lakko Chick Starter 2.65

We handle Lumber, Roofing, King Bug Killer, Fertilizer and Salt.

The MORRISBURG FEED & PRODUCE Co
MORRISBURG, ONT. Phone 88.

Garden Time

HOW ARE YOU FIXED FOR
Hoe, Rake, Spade, Garden Fork, Hand Cultivator, Lawn Mower or anything that makes a garden or lawn and keeps them in trim?



Lawn Mowers

A fine selection of easy running machines. Keep your lawn well mowed, it adds so much to the appearance and value of your property.

Monarch Fertilizer

A superior and highly concentrated fertilizer for Gardens, Flowers, Vegetables, etc. Bone Meal, Nitrate of Soda, Pulverized Sheep Manure, &c. Priced in small quantities 4 to 5 cents lb.

This is a Favorable Time For Sowing the Root Crop

Mangels, Sugar Beets, Field Carrots, Orange and White Turnips, Purple Top Rutabagas. Very low prices on Seeds this season.

R. H. BRADFIELD & CO.

LINDBERGH BABY FOUND DEAD

New York, May 12—The baby son of Colonel Charles A. Lindbergh was found dead at 3.15 o'clock this afternoon. The child had been murdered.

The body, lying face down in a depression, and partly covered with dead leaves and wind-blown debris, was discovered by a Negro truck driver in a patch of woods in the Sourland Mountain, 45 feet off the heavily travelled Princeton Highway and less than 5 miles from Lindbergh home near Hopewell, N.J.

The child evidently had been killed soon after he was stolen from his crib in the nursery on the night of March 1. Whether he had been slain with calculating purpose by criminals who found it advantageous to them to get rid of the child, or whether he had been thrown from a fast-moving automobile by kidnappers fleeing in a panic, was not determined tonight.

The body showed the marks of a compound fracture of the skull, however, and there was a hole the size of a quarter over the child's right ear. It could not be definitely established whether this was a bullet hole or the result of a blow with a blunt instrument. The condition of the body indicated that the child had been dead at least two months. The kidnapping occurred 73 days ago.

Mrs. Lindbergh and her mother, Mrs. Dwight W. Morrow, were at home when the body was found, but were in complete seclusion. Colonel Lindbergh was reported to be away pressing the search for his son, and efforts were being made by the family and the police to find him, according to a close friend of the family. It was believed that he had not heard of the discovery of the body.

The family was spared the necessity of viewing the body, for the identification was considered conclusive by Colonel H. Norman Schwarzkopf, Commanding the New Jersey Police.

Despite the shock of the discovery Mrs. Lindbergh was bearing up courageously tonight, as she has from the beginning.

It was as if some adult person had held the baby tightly in his arms and deliberately hammered the head, with the purpose of causing instant death.

The diagnosis was:

"The cause of death is a fractured skull, due to external violence."

Dr. Mitchell's report confirmed the statement that decomposition of the body had progressed to the point where it could be surmised that the child had been killed almost immediately after the kidnapping, depending on climatic and other conditions that might have produced such results.

The autopsy also indicated that the body had not been disturbed, probably since it had been buried, although this point was not covered definitely.

Teeth, cranial and other bone formations were given to confirm the identification of the child, although the autopsy was purely technical and itself did not try to establish identity.

Dr. Mitchell said there was evidence of a hemorrhage on the inner surface of the left side of the skull, at the point of fracture. This would indicate that the blow on the left side of the head might have been the one that actually caused death.

The scalp was so badly decomposed that it was impossible to find any contusions or hemorrhagic conditions external to the skull. Thus it was impossible, from a diagnostic point of view, to aid the police in the hunt for the actual instrument of death.

The autopsy reports did not speculate, but left the diagnosis at "external violence."

Physicians usually pronounce such fractures, however, due to blows delivered on the head rather than accidental fractures.

The finding of the remains brought the search, which had covered much of the world, into a new phase. The indignation and sorrow which the kidnapping caused were intensified when the fate of the child was finally learned. Colonel Schwarzkopf and other officials who have been in charge of the long hunt declared their determination to press the hunt for the kidnappers with renewed vigor, freed now of the necessitty of proceeding cautiously for fear of causing harm to the child, since the worst fears are now found to have been fulfilled.

Colonel Schwarzkopf indicated tonight that the police had under surveillance now a group suspected of being the kidnappers. Early arrests in the case were predicted.

Rural neighbours of the Lindbergh family had complained, almost from the beginning, that the police had made no thorough search in the vicinity of the estate itself, and many discredited tales purporting to place the scene of the child's imprisonment near the estate were broached early in the hunt.

The place where the body was found is the downward slope of a hill, directly across the valley from the Lindbergh home. Before Colonel Lindbergh's new home was built, he and Mrs. Lindbergh lived for a time within a mile of the place where their child was to meet his death.

The body lay in a scrubby, second growth maple and locust trees, thickly grown with underbrush, back from the turnpike 45 feet—the main travelled road—which runs from Hopewell to Princeton over the crest of Mount Rose.

Within 45 feet of the body were emergency telephone lines laid down by police to facilitate the search. The property is believed to be owned by St. Michael's Roman Catholic Orphanage. Mount Rose itself is a cluster of half a dozen modest houses in the heart of the farming country. It is five miles from the Lindbergh house by road, and four miles as the crow flies.

The finding of the body was a sheer accident. William Allen, a negro chauffeur, was driving along the turnpike toward Hopewell in a truck owned by William Titus of Glenmore, N.J. The truck was loaded with timber, and riding with Allen were Orville Wilson, Livingston Titus, 26-year-old son of the owner, and Orville Kraft, 32. Allen lives in Trenton, with his wife and four children.

It was by chance that they stopped at that particular spot in the road, and that Allen stumbled upon the body. Allen and his companions all remained at the Lindbergh home last night for further questioning at the request of the police.

The formal announcement of the finding of the body was made at 6.45 o'clock this evening in the garage of the Lindbergh home, where all reporters in Trenton and Hopewell had been assembled.

"MIKE O'MALLEY STARS IN GOAL"

In glaring head lines, the Ottawa Citizen, Thursday, featured Mike O'Malley, a Morrisburg boy, as the outstanding player on the Ottawa "Laurier" lacrosse team. The Citizen says:

"Lauriers scored their second consecutive victory in the Senior City Box Lacrosse League race last night at the Auditorium, but it took an exceptionally brilliant display of goal-tending by Mike O'Malley to keep the Le Regiment de Hull squad from winning their first start of the season. The former resident of Morrisburg rose to sensational heights, as he held the Transpontine representatives to two goals, and it was chiefly his outstanding work that allowed the Lower Town Frenchmen to rack up a 3-2 triumph."

CLEAN UP DAY?

A large number of citizens are inquiring about the annual clean-up day. So far no date has been set by the local council, notwithstanding that this is a matter of general concern to the citizens of this municipality. Throughout Ontario, municipalities are reporting the success of their public clean-up day, while Morrisburg slumbers at the switch. In fact, in many places with smaller population than this village, garbage is collected twice a week, and in every case it has been found that the service well warrants the small expenditure. Let us have at least one clean-up day a year.

MR. JOHN N. HUMMELL

A native of Morrisburg and a highly respected young man, in the person of Mr. John N. Hummell, son of Mr. and Mrs. Fred Hummell, passed to his eternal reward on Tuesday morning, following an illness of about two weeks. Deceased was 19 years of age. He received his education at the Public School and Collegiate Institute, and had always resided with his parents in Morrisburg.

He is survived by his parents, one brother, Andrew, and one sister, Phyllis.

The funeral, which was held on Thursday morning to St. Mary's Church, was largely atended. The service was conducted by Rev. Fr. R.J. Coyle, after which interment took place in St. Mary's cemetery.

HAVE NOT SIGNED ANY SEA-WAY PACT

While negotations between Canada and the United States on the St Lawrence deep waterways proposal are very well advancced, reports that the two countries have signed a treaty for carrying out the project were officially denied last night.

Work on the drafting of a treaty is understood to have been under way for several weeks following marked progress in treaty negotiations since November last. This situation still leads to the general feeling that an announcement will be made in the very near future, although there are one or two details pending.

Ratification of a treaty on the project would hardly be asked for in Parliament this session. For some time, the impression has been and still exists that the customary approval would not be requested until the United States had given its ratification.

WALDORF—MARKELL

A quiet but pretty wedding took place in St. David's Church, Wales, on Monday morning last, when Miss Nora Evelyn Markell, daughter of Mr. and Mrs. Cory E. Markell, Wales, and Mr. Kenneth John Waldorf, of the staff of the Chesterville branch of the Bank of Montreal, and son of Mr. and Mrs. John H. Waldorf of Dickinson's Landing, were united in the holy bonds of matrimony by Rev. A.T. Carson. The bride looked charming in a dress of blue crepe with hat and accessories to match. The young couple were unattended. The witnesses were Miss Helen L. Waldorf, sister of the groom, and Dr. C.T. McGahey of Iroquois.

Mr. and Mrs. Waldorf left by motor for Montreal and other eastern points.

The bride and groom were the recipients of numerous gifts, as well as cheques for substantial amounts, showing the popularity of the young couple.

New Service Station and Garage

Our Remodelled Premises formerly used for Car Display will be occupied as a Service Station and Garage on or about May 9th.

A one stop complete service for Car Owners where you can get anything for, or anything done, to your Automobile.

Your Patronage is respectfully solicited.

ARTHUR FLYNN Morrisburg, Ont.

The Green Murder Case

BY S. S. VAN DINE.

SYNOPSIS.

Philo Vance, wealthy young bachelor and friend of District Attorney, John F. X. Markham, becomes interested in the Greene murder case. Julia Greene is killed and her younger sister, Ada, is wounded. Old Tobias Greene's widow, together with the five children, Julia, Chester, Sibella, Rex and Ada, an adopted daughter, all live in the old Greene Mansion. The burglar theory is repudiated. Mrs. Greene is questioned and Vance finds that Chester Greene possesses an old .32-calibre revolver.

CHAPTER V.—(Cont'd.)

"Did you take a good look for it today, like you said?" asked Heath.

"Certainly, I looked for it," Chester replied, haughtily indignant. "I went through every room and closet and drawer in the house. But it's completely disappeared — Probably got thrown out by mistake in one of the anual house-cleanings."

"That's possible," agreed Vance. "What sort of a revolver was it?"

"An old Smith & Wesson .32." Chester appeared to be trying to refresh his memory. "Mother-of-pearl handle; some scroll-engraving on the barrel—I don't recall exactly, I bought it fifteen years ago—maybe longer—when I went camping one summer in the Adirondacks. Used it for target practice. Then I got tired of it, and stuck it away in a drawer behind a lot of old cancelled checks."

"Was it in good working order then?"

"As far as I know. Fact is, it worked stiff when I got it, and I had the sear filed down, so it was practically a hair-trigger affair. The slightest touch sent it off. Better for shooting targets that way."

"And now, seeing that Doctor Von Blon is still with his patient, I wonder if we could see Miss Sibella for a moment."

Chester got up, obviously relieved.

"I'll fetch her myself, he said, and hurried from the room.

Markham turned to Vance with a smile.

"Your prophecy about the nonreappearance of the gun has, I note, been temporarily verified."

"And I'm afraid that fancy weapon with the hair-trigger never will appear—at least, not until this miserable business is cleaned up."

"It's quite possible the revolver disappeared in the way Greene said it did," Markham submitted. "In any event, I think you unduly emphasized the matter."

"Sure he did, Mr. Markham," growled Heath. "And, what's more, I can't see that all this repartee with the family is getting us anywheres. I had 'em all on the carpet last night when the shooting was hot; and I'm telling you they don't know nothing about it. This Ada Greene is the only person round here I want to talk to. There's a chance she can give us a tip. If her lights were on when the burglar got in her room, she maybe got a good look at at him."

"Sergeant," said Vance, shaking his head sadly, "you're getting positively morbid on the subject of that mythical burglar."

Markham inspected the end of his cigar thoughtfully.

"No, Vance. I'm inclined to agree with the sergeant. It appears to me that you're the one with the morbid imagination. I let you inveigle me into this inquiry too easily. That's why I've kept in the background and left the floor to you. Ada Greene's our only hope of help here."

At that moment there came a sound of footsteps on the marble stairs, and a few seconds later Sibella Greene, accompanied by Chester, appeared in the archway.

CHAPTER VI.

Sibella entered with a firm swinging gain, her head held high, her eyes sweeping the assemblage with bold interrogation. She was tall and of slender, athletic build, and though she was not pretty, there was a cold, chiseled attractiveness in her lineaments that held one's attention. Her dark, crisp hair was bobbed but not waved, and the severity of its lines accentuated the over-decisive cast of her features. Her hazel eyes were widespaced beneath heavy, almost horizontal eyebrows; her nose was straight and slightly prominent, and her mouth was large ard firm, with a suggestion of cruelty in its thin lips.

She was dressed simply, in a dark sport suit cut extremely short, silk-wool stockings of a heather mixture, and low-heeled mannish Oxfords.

Chester presented the District Attorny to her as an old acquaintance, and permitted Markham to make the other introductions.

"I suppose you know, Mr. Markham, why Chet likes you," she said, in a peculiarly plangent voice. "You're one of the few persons at the Marylebone Club that he can beat at golf."

She seated herself before the centre table, and crossed her knees comfortably.

"I wish you'd get me a cigarette, Chet." Her tone made the request an imperative.

Vance rose at once and held out his case.

"Do try one of these Regies, Miss Greene," he urged in his best drawing room manner. "If you say you don't like them, I shall immediately change my brand."

"Rash man!" Sibella took a cigarette and permitted Vance to light it for her. Then she settled back in her chair and gave Markham a quizzical look. "Quite a wild party we pulled here last night, wasn't it? We've never had so much commotion in the old mansion. And it was just my luck to sleep soundly through it all." She made an aggrieved moue. "Chet didn't call me till it was all over. Just like him—he has a nasty disposition."

Somehow her flippancy did not shock me as it might have done in a different type of person. But Sibella struck me as a girl who, though she might feel things keenly, would not permit any misfortune to get the better of her; and I put her apparent callousness down to a dogged, if perverted, courageousness.

Markham, however, resented her attitude.

"One cannot blame Mr. Greene for not taking the matter lightly," he reproved her. "The brutal murder of a defenceless woman and the attempted murder of a young girl hardly come under the head of diversion."

Sibella became suddenly grave. "Why draw a long face over something that's happened and can't be helped? Anyway, Julia never sought to brighten her little corner. She was always crabbed and fault-finding, and her good deeds wouldn't fill a book. It may be unsisterly to say it, but she's not going to be missed so dreadfully. Chet and I are certainly not going to pine away."

"Oh, cut it, Sib," objected Chester irritably. "You yourself had a spasm this morning when I told you the police were hot-footing it after a burglar."

Sibella made no answer. With a slight toss of the head she leaned over and threw her cigarette into the grate.

"By the by, Miss Greene"—Vance spoke casually—"there has been considerable mystery about the disappearance of your brother's revolver. It has completely vanished from his desk drawer. I wonder if you have seen it about the house anywhere."

At his mention of the gun Sibella stiffened slightly. Her eyes took on an expression of intentness, and the corners of her mouth lifted into a faintly ironical smile.

"Chet's revolver has gone, has it?" She put the question colorlessly, as if her thoughts were elsewhere. "No—I haven't seen it." Then, after a momentary pause: "But it was in Chet's desk last week."

Chester heaved himself forward angrily.

"What were you doing in my desk last week?" he demanded.

"Don't wax apoplectic," the girl said carelessly. "I wasn't looking for love missives, I simply couldn't imagine you in love, Chet—" The idea semed to amuse her. "I was only looking for that old emerald stick-pin you borrowed and never returned."

"It's at the club," he explained sulkily.

"Is it, really? Well, I didn't find it anyway; but I did see the revolver—Are you quite sure it's gone?"

"Don't be absurd," the man growled. "I've searched everywhere for it— Including your room," he added vengefully.

"Oh, you would But why did you admit having it in the first place?" Her tone was scornful. "Why involve yourself unnecessarily?"

Chester shifted uneasily.

"This gentleman"—he again pointed impersonally to Heath—"asked me if I owned a revolver, and I told him 'yes.' If I hadn't, some of the servants of my loving family would have told him. And I thought the truth was best."

Sibella smiled satirically.

"My older brother, you observe, is a model of all the old-fashioned virtues," she remarked to Vance. But she was obviously distrait. The revolver episode had somewhat shaken her self-assurance.

"You sap, Miss Green, that the burglar idea does not appeal to you." Vance was smoking languidly with half-closed eyes. "Can you think of any other explanation for the tragedy?"

The girl raised her head and regarded him calculatingly.

"Because I don't happen to believe in burglars that shoot women and sneak away without taking anything, it doesn't mean that I can suggest alternatives. I'm not a police-woman—though I've often thought it would be jolly good sport—and I had a vague idea it was the business of the police to run down criminals. You don't believe in the burglar either, Mr. Vance, or you wouldn't have followed up Chet's hunch. Who do you think ran amuck here last night?"

"My dear girl!" Vance raised a protesting hand. "If I had the foggiest idea I wouldn't be annoyng you with impertinent questions. I'm plodding with leaden feet in a veritable bog of ignorance."

He spoke negligently, but Sibella's eyes were clouded with suspicion. Presently, however, she laughed gayly and held out her hand for another cigarette.

What the automobile has taught women about household lubrication

Experience with motor cars has taught women that moving parts must be protected against wear by a film of oil. Many of them haven't learned, however, that moving parts of sewing machines, vacuum cleaners, lawn mowers, washers, and other mechanical devices must also be protected against dirt and rust.

3-in-One Oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high grade oils — animal, mineral and vegetable. 3-in-One is the oil you should use on mechanical equipment if you want best results.

Don't risk your expensive household devices using oil that does only half the job. Insist on the old reliable 3-in-One. It costs little more to buy and much less to use. At good stores everywhere. For your protection, look for the trade mark "3-in-One" printed in Red on every package.

Latest Offerings Of Science

Earth's Primitive Forces Still At Work—Diamonds Evolved From Carbon

Earthquakes and volcanic eruptions are evidences that the forces which began shaping the earth 3,000,000,000 years ago are still at work. For all the rigidity of what we call terra firma, mountains are still heaving, continents are still tiiting, bedrock is still trembling, while beneath all the primal magma is still welling.

In the volcanic activity that recently terrified the inhabitants along 400 miles of the Andes we see these processes at work. The view that an active volcano is a purely local prenomenon is certainly wrong. On the borders and in the middle of the Pacific Ocean are long chains of volcanoes—the Fujiyama, Hawaiian, Aleutian and Andes chains. Usually a single volcano is active, while its immediate neighbors are dormant. But the Andes eruptions prove that subterranean forces are at work which affect whole regions, so that the theory of isolated activity is actually misleading.

In the Andes chain three volcanoes were especially active. Their history is obscure. Of the three, Tinguiririca has a definite past record, although not very clearly traced. It seems to belong to the variety that emits steam, gases and some ash. Explosively violent volcanoes from which lava exudes are rare. Some who have flown over the Andes recently report outpourings of lava.

Beneath the Andes volcanoes magmas is now moving and magma is the sea of molten matter on which solid land floats as if it were an iceberg on the ocean. Magma is just as active under New York City as it is under the Andes. If it happened to manifest its existence along the western coast of South America recently it was because the volcanoes there lie over especially thin portions of the earth's crust.

Lava is simply magma that has been forced out of a volcano by pressure from below, but magma physically and chemically changed. No one has ever seen magma in its original state. As it wells up and the overlying pressure is relieved gases bubble up. These react with one another and with air to produce combustion of hydrogen, carbon monoxide and sulphur vapors. The melt itself changes into lava, a glassy foam.

SYNTHETIC DIAMONDS.

Like L. H. Barnett, who recently received the endorsement of Dr. Ralph McKee, Professor of Chemistry in Columbia University, half a dozen experimenters within the last generation believed that they had produced minute but genuine diamonds in the laboratory. Professor Henri Moissan started them off.

On the assumption that carbon can be made to crystallize under high pressure and thus produce a diamond. Moissan melted pure iron with sugar charcoal in an arc furnace and dropped the crucible containing the molten mass into cold water. He obtained microscopic crystals which resisted the action of powerful acids. "Diamonds," he concluded—diamonds produced by the pressure that resulted from the rapid chilling of the crucible. Barnett's process is much like Moissan's.

Among others who thought they had made diamonds was Sir William Crookes, who exploded cordite in closed steel cylinders and, at a pressure about 8,000 times that of the atmosphere and a temperature of about 7,000 degrees Fahrenheit, obtained what he thought were diamonds. Sir Charles Parsons, inventor of the steam turbine, went still further, with pressures of 15,000 atmospheres, but decided that diamonds could not be produced in the manner that Moissan and Crookes supposed.

Two German chemists, Drs. von Hasslinger and Wolf, announced that they had obtained diamonds by the crystallization of magnesium silicate. A French engineer, Guyot de Boismenu, claimed that he had made diamonds one-eighth of an inch in diameter by electrically decomposing fused calcium carbide.

After Sir Charles Parsons died the distinguished British chemist, Professor Henry E. Armstrong, reviewed the claims of all the diamond makers from Moissan down, and handed down this devastating opinion: "The whole of the literature relating to the production of the diamond, I venture to say, might now be safely burnt. ... Moissan's interpretation of his results is not now accepted by his French colleagues. The von Hasslinger and Wolf work is genuine enough, but there is no proof in it that diamond was obtained or that their method was a likely one. . . . You can trust a chemist no more than any one else further than you can see him. Only when he produces the goods in ways in which you can repeat may you accept him."

ALUMINUM UTENSILS SAFE

Four research workers of the Mellon Institute, George D. Beal, Richard B. Unangst, Helen B. Wigman and Gerald G. Cox, have measured the amount of aluminum picked up by foods cooked in aluminum utensils. They have found that only barely detectable amounts of aluminum are in the tissues after food containing large amounts of aluminum has been eaten. Thirty-three different kinds of food were cooked in both glass and aluminum utensils according to standard recipes. The largest amount of aluminum was taken up by apple butter—112 parts per 1,000,000. This was found to be less than one-tenth the amount necessary to produce symptoms of phosphorus starvation on a low phosphorus diet. Creamed chicken became impregnated with 1 1-3 parts per 1,000,000, lemon pie filling with 2 parts per 1,000,000, and sauerkraut with 12½ per 1,000,000. The Mellon Institute researchers calculated the amount of aluminum that would be consumed by a person on a balanced diet, if all the foods were cooked in aluminum, and determined that the aluminum content of the original foodstuffs is greater by 40 per cent. than the amount that would be added by cooking in aluminum utensils.

THIS YOUNG UNIVERSE.

According to recent estimates by a committee of the National Research Council, the probable length of geologic time is about 1,600,000,000 years. Dr. Ernst J. Opik of Tartu University Observatory, Estonia, now lecturing in astrophysics at Harvard, concludes that the universe is not much more than 3,000,000,000 years old. If any reliance is to be placed upon these two estimates, it follows that the universe of stars and nebulae cannot have evolved as slowly as we have been taught by cosmologists.

Dr. Opik bases his conclusions on analyses of the helium and radium content of meteorites made by Professor Fritz Paneth of the University of Konigsberg. Values ranging from 100,000,000 to 900,000,000 years resulted.

Opik finds supporting evidence of Paneth's conclusions in the double stars. A study of the distances and magnitude of these convinces Opik that double stars have not shrunk much in the lapse of time, again proving that the universe is young, relatively speaking. W. K.

Something Cool

I like the sound of something cool,
Of ice and sparkling snow,
Or pools that lie in shadows deep,
And beds where pansies grow.

The ocean on a summer's day,
The dunes across the bar,
The silver moon when riding high
With one small lonely star.

I like the sound of something cool,
Of rivers broad and deep,
And night that leads each restless day
To quiet aisles of sleep.

"If the people of one nation go on a speculative spree, the world wakes up with a headache."—Ogden L. Mills.

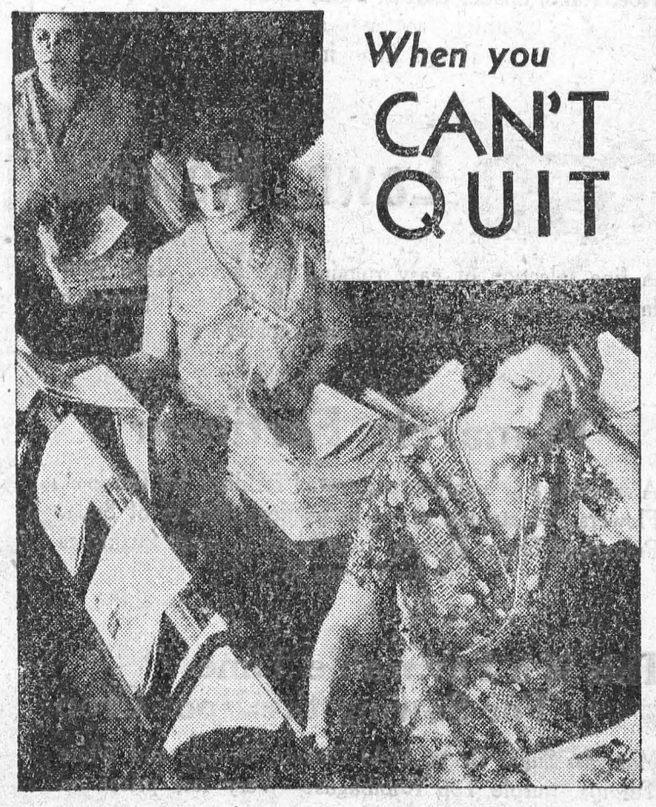
Agents Wanted

Experience unnecessary, to sell direct-to-consumer a guaranteed line of workmen's clothing. Can easily make $10.00 to $15.00 a day. Write for complete outfit to TUFF-WEAR CLOTHES, General Post Office, Box 413, Toronto.

SAFE Sterilized TISSUE

"AN EDDY PRODUCT"

Two popular brands for household use. "Dreadnought" rolls contain seven ounces sterilized, creped tissue. "Navy" rolls have 700 sheets soft, sanitary paper. All made with water sterilized in Eddy's $400,000 Filtration Plant. Ask for them by name, and be safe.



When you
CAN'T QUIT

A HEADACHE is often the sign of fatigue. When temples throb it's time to rest. If you can't stop work, you *can* stop the pain. Aspirin will do it, every time. Take two or three tablets, a swallow of water, and carry-on—in perfect comfort.

Don't work with nerves on edge or try all day to forget some nagging pain that Aspirin will end in a jiffy! Aspirin can do you no harm; just be sure that it is Aspirin with Bayer on each tablet.

In every package you'll find proven directions for headaches, colds and sore throat; neuralgia, neuritis, etc. Carry these tablets with you, and be prepared. To block a sudden cold on the street-car; quiet a grumbling tooth at the office; relieve a headache in the theatre; spare you a sleepless night when nerves are "jumping."

And no modern girl needs "time out" for the time of month! Your little box of Aspirin tablets is sure relief for all such pain.

Take Aspirin for *any* ache or pain, and take enough to *end* it. It can't harm you. At drug stores everywhere. Made in Canada.

King's Scout

Most Lone Scouts look forward to the day when they will be entitled to wear the coveted King's Scout Badge on his arm, and it is indeed an achievement for which any Lonie may well deserve hearty congratulation, as it is no easy task for a boy to work steadily over a long period of time for the most part alone, and reach this high rank in Scouting.

It is therefore with great pleasure that we record the fact that two brothers, Lone Scouts Robert and Albert Passmore, of Hensall, have successfully passed the requirements for the King's Scout Badge, and we know that all the Lone Scouts of Ontario will heartily congratulate them.

The Dog Show

We are glad to be able to report that this "show" was most successful and a full list of the prize winners is published in the April number of "On Lone Scout Trails,' which has been mailed to all Lonies.

The prize winner in the 1st Class was Bruce Isaac of Lucan, Ont., for the best essay describing his dog.

In Class Two the winner of the first prize was Ronald Sage, of Ingersoll, for the best written and composed essay.

We publish herewith the winning essays and offer our congratulations to all the prizewinners:

Bruce Isaacs

I have decided to enter my dog in your dog show because I think he is the most wonderful dog in the world and I wouldn't trade him for all the pedigreed dogs in the world.

The breed of my little dog is a fox-terrier and he is about one foot six inches in height.

He is all white from tail to head and he is three years old. He is a good worker and can pull me around in the sleigh and he can also hunt cattle and he is not a bad watch-dog for a little pup. My little dog cannot perform any tricks, but I love him just the same. I like my dog because he and I are the very best of pals and he will do anything for me.

My dog is the father of six lovely pups. My brother, who is twenty-three, has one of his little daughters.

Ronald Sage's Essay
"Skippy"

Skippy is a collie. Although he lays no claim to being a thoroughbred, it is easily seen that he is a very fine specimen of his race.

To say the least, Skippy is handsome. He has a very fine coat of long silky hair and this on his tail is like a waving plume. In color he is a beautiful brown with a large white patch on his chest. He is magnificently built, having a long, intelligent looking nose, thick, sturdy legs; a very aristocratic tail and a deep, finely curved chest. Skippy is not very big, being just about a year old, but he gives promise of being a wonderful dog, doing credit to his clan, the Collie.

Last fall we sold our cattle, but before that Skippy showed that he had the makings of a fine cattle dog and he was only a pup then. He is a born "heeler," which means that he goes after the cows' heels, that is the sign of a good cattle dog. He loves to hunt rats and mice. Our granary and barn are full of these pests and Skippy is always ready for a hunt and has caught rats seven or eight inches in length.

Skippy has been hardly old enough to be taught tricks, but he will "speak" for his dinner, fetch a stick, climb into a chair and sit up and so on. He also loves the water and in summer he has a great time in the creek.

Why do I love him? Why does any boy love his dog? Because he is a friend, a faithful companion who loves and will follow anywhere, who asks nothing but your love. Such is Skippy.

This Week's Scout Law—No. 7—"A Scout obeys orders of his parents, patrol leader, or Scoutmaster, without question.

This is a very important law, as without its aid it would be impossble for the Boy Scouts Association to carry on efficiently. Whatever the organization, whether it be a business, club, church, army, or anything else where a number of people congregate, if law and order is to be maintained, someone must be the leader and undertake the responsibility, and unless the others are prepared to accept his instructions the organization proved unsuccessful.

The very foundation of our home life is the fact that children "honor their father and mother," and if they were allowed to do as they please from the day of their birth, our nation would soon sink into oblivion.

Further, it is a well known and universally recognized fact that no person can successfully act as a leader and give orders unless they themselves have first learned to obey. How else can they understand the position of those under them?

Therefore to be a successful Scout it is necessary to learn obedience, so that as time passes and the opportunities arise, you can become a successful leader of your fellow Scouts, and take your place in later life as a leader amongst your fellow men.

There is room in the ranks of the Lone Scouts of Ontario for many more boys of Scout age. If you are unable to join an ordinary Scout Troop, and are between the ages of 12-18 inclusive, why not be a Lone Scout?

Write for particulars, which willl be gladly sent to you, to The Boy Scouts Association, Lone Scout Department, 330 Bay Street, Toronto 2.—"Lone E."

London Zoo Trying Incubator on Penguin Eggs

London.—Penguin's eggs, laid in the Guano Islands, are being incubated at the London Zoo, 8,000 miles from the mother bird. They were rushed from Cape Town by air, in the hope that they would arrive in a fertile condition, thus solving the problem of bringing penguins safely to London, one of the zoo's biggest difficulties. So far there have been no little strangers in the penguin house.

Canada Built 12,600 Dwellings During 1931

Detailed reports from more than fifty Canadian cities show that 10,750 permits for dwellings (including houses and apartments and, in many cases, repairs and alterations), estimated to cost $47,000,000, were issued in 1931; this compares with 12,600 residential permits in 1930 whose total value was $53,000,000. The average estimated cost of a dwelling in 1931 was $4,334, as compared with $4,200 in 1930. The increase in value can probably be attributed to a larger proportion of apartment houses in the total for residential building.

Infirmities

They that are strong ought to bear the infirmities of those that art weak, and not to please themselves. There's a text wants no candle to show't; it shines by its own light. It's plain enough you get into the wrong road in this life if you run after this and that only for the sake o' making things easy and pleasant to yourself. A pig may poke his nose into the trough, and think o' nothing outside it; but, if you've got a man's heart and soul in you, you can't be easy a-making your own bed and leaving the rest to lie on the stones. Nay, nay, I'll never slip my neck out o' the yoke, and leave the load to be drawn by the weak uns. — George Eliot.

Spain's "Best Seller" Is Free

Madrid. — Spain's Constitution would be a "best seller" if it were not going to be given away free. One hundred thousand copies have been printed in French and will be distributed in all parts of the world as an advertising feat to call to attention what is regarded here as a leading contribution to modern political thought.

Latest Portrait of the King

King George has approved this latest portrait of himself, just completed by Frederick William Elwell, associate of the Royal Academy. It will hang in Holyrood castle, Edinburgh.

Sunday School Lesson

May 15. Lesson VII—Jacob at Bethel—Genesis 28: 10-7. Golden Text—I am with thee, and will keep thee in all places whither thou goest.—Genesis 28: 15.

I. THE REVEALING DREAM, vs. 10-12.
II. DIVINE ENCOURAGEMENT, vs. 13-15.
III. JACOB'S REVERENCE, vs. 16, 17.

INTRODUCTION—Jacob had committed two major offences against his brother, Esau. For a mere trifle he had secured his birthright (Exodus 25: 27-34); and he had stolen from Isaac the blessing that properly belonged to Esau, 27: 1-40. By taking these mean and crafty advantages of his brother, he had aroused Esau's hatred, 27: 41. Esau vowed that revenge would be him upon Isaac's death. Thus Jacob's position was seriously jeopardized in the home. Once again, as in all the stories of the patriarchs, strife was avoided by isolation and separation. Jacob must leave home. There was a further reason for his leaving home, in that the time had now come for him to marry, and his mother was anxious for him to take a wife from among her own relatives in Haran, who were Arameans living in Mesopotamia, 27: 43-46. Up to now his record had been bad. He had proved himself selfish, crafty and devoid of fraternal sympathy. God, however, has his own way of dealing with a wrong-doer, and of fashioning him for future service and greatness.

I. THE REVEALING DREAM, vs. 10-12.

Alone and on foot Jacob set out on his journey, a fugitive from his brother's hatred and revenge. The journey from his home in Beersheba to Bethel must have occupied at least two or three days. Arriving at Bethel at sundown, when all good Hebrews retired, he decided to halt for the night, and sought out a great boulder for his head-piece. Nightfall, solitude, and a troubled conscience,—what a setting for the dream that followed! Here Dr. Lynn Harold Hough offers a valuable suggestion. He points out that Freud, the psychoanalyst, claims that dreams are the occasions upon which our suppressed desires leap up from the subconscious mind and play the part denied them in real life. Freud thinks, however, that it is invariably our evil desires that emerge in dreams. Dr. Hough suggests that it may very possibly be that our good desires also come to the surface in our dreams. It is interesting to interpret Jacob's dream in this way. Bad though he was, pet there was a core of goodness in him to which God could appeal. For God cannot grant a revelation of himself unless there is a soul capable of appreciating it. The medium of revelation here was a dream. The men of Israel thought that very frequently God used dreams to communicate his secrets. Jacob's was one of the most beautiful and majestic dreams ever conceived. It was all the more impressive in that it unfolded at first in complete silence. With its foot resting on the earth, a ladder—suggested, it may be, by the rocky ledges of the Bethel mountain-side, or bythe rainbow—stretched up to heaven. Heaven, therefore, could not be very far away. The ladder was astir with a great traffic. Up and down it moved the angels of God, for they were not as yet thought of as having wings. Heaven, according to Hebrew thought, is not an empty and depopulated place, but filled with living and ministering spirits. The Hebrew mind projected personality out into the unseen world. The angels were regarded simply as agents of God, who received and fulfilled important commissions from him.

II. DIVINE ENCOURAGEMENT, vs. 13-15.

In the incident of the birthright, Jacob had shown a keen eye for the future, but with all the weight of his sinful past, could he hope for a bright future? This aptitude in Jacob for taking account of the future, God now quickened and turned to his own great purposes. There are two phases to God's promise of the future. The one has to do with Jacob's personal fortunes. Lonely sinner though he was, yet he was assured that God's watchful care would be over him in all his wanderings, and that he would be brought back in safety to his own land. The other feature of the promise has to do with Jacob's offspring. It is to be very numerous, and is compared with the dust, which was a current proverb for great numbers. An old Rabbinic commentary on Genesis quaintly suggests that the reason for this recurring promise of a numerous progeny is that each Israelite bears ideally the image of God.

III. JACOB'S REVERENCE, vs. 16, 17.

A feeling of profound reverence swept over Jacob on awakening. This fear of the Lord is not only the beginning of wisdom, but it is the root of all genuine religion. It rises up naturally in men when they are confronted with God in all his majestic holiness—all that separates him from this creaturely world. In Jacob's day, however, it was thought that God's holiness was communicated to the place where he appeared. A peculiar sanctity attaches to a place where men have encountered God. So Jacob said, "How dreadful is this place!" Bethel he recognized as a God-haunted place, a veritable house of God as its name suggests. Here a door opens into heaven, which is not far away. It is little wonder that later Bethel developed into a famous sanctuary.

SELF-RELIANCE.

To repose calmly on the thought which is deepest in our bosoms, and be unmoved if the world will not accept it.—F. W. Robertson.

American Traffic System Fails to Please Paris

Paris—First experiments conducted in Paris with New York's system of synchronized traffic regulation resulted in a complete traffic jam in exactly twenty minutes. But Prefect of Police Jean Chiappe, who superintended the test is not convinced that the system is impractical. He thinks that it will work better when the public has been accustomed to it.

The experiment was tried in the most congested district of Paris, between the Portes Saint Martin and Saint Denis, and where the Boulevard Sebastopol crosses the Grands Boulevards. Electric signals mere installed so that when traffic was stopped on the Grands Boulevards, that from the Porte Saint Denis and Porte Saint Martin entered simultaneously. A few seconds later the cross traffic from the Boulevard Sebastopol was also admitted automatically. Then automatically all transverse streets were closed by the signals and traffic over four blocks on the Grands Boulevards was kept moving for three minutes.

For a short time it seemed as though the system was working properly without the interference of the traffic police, but soon confusion developed and in twenty minutes circulation was completely stopped, with cars unable to move in any direction. It took the police half an hour to restore order under the old billy club system of direction.

Other experiments will be tried and if they attain the results Mr. Chiappe desires, the entire Grand Boulevard system from the Church of the Madeleine to the Place de la Bastille will be placed under synchronized traffic regulation.

Twentieth Century Inventions Drawing Empire Together

London—Radio broadcasting, aviation and movies, are being utilized to weld the British empire more closely together, economically, politically and sentimentally.

The last imperial conference decided that steps should be taken to encourage British empire broadcasts. As a result the British Broadcasting Corporation is building a special short wave station at Daventry which will be in operation by 1933.

Meanwhile experimental programs and broadcast from the Chelmsford short wave station, the most important features of which are British news bulletins.

Programs from Daventry will be practically continuous thoughout 24 hours.

Steady progress is being made in empire air routes. A weekly mail and passenger air service has been in operation between Britain and India for four years. An 11-day mail air service between Croydon and Capetown was inaugurated recently.

While broadcasting and aviation are doing their bit, British film producers are experiencing difficulties in capturing even a small share of the empire market.

Wear on Steering Spindle

The car owner with enough interest to keep the front wheel bearings tightened should remember that weakness in the steering spindles often is confused with bearing looseness. After the wheel has been jacked up and before shaking it from side to side it is a good idea to stick a screwdriver in the top of the spindle bushing to compensate for possible play at that point.

New Mosque for London

London—A new mosque is to be built in the northwest district of London. The architect is Sir Brumwell Thomas, well known as the designer of the Dunkirk War Memorial, Belfast City Hall, and other public works. One of the richest Indian princes has already subscribed £60,000 toward the cost.

WISDOM AND VIRTUE.

To sit still and contemplate—to remember the faces of women without desire to be pleased by the deeds of great men without envy, to be everything and everywhere in sympathy, and yet content to remain where and what you are, is not this to know both wisdom and virtue, and to dwell with happiness.

Protect the Colts

Colts Become Worm Infected at Pasture

Many young colts do not do well, if they are worm infested. And they are sure to be infested if they run with other infested horses. Most of the horses that we see killed for fox meat are worm infested to some degree. The colt being particularly susceptible to worm infestation, during the first few months of its life, should be given some protection against these pests, which may become serious enough to cause death of the colt. The start should be made with the brood mare and the other horses; treat these or have them treated with a suitable worm expeller. This done the source of infection will be cut off and the pastures will be relatively safe for the colts when they arrive. Infection takes place through wormy horses scattering the worm eggs over the pasture field in the faeces, so if the mare is free of worms the owner will have little to worry about, and the colt will grow well and be free from attacks of verminous colic. Verminous colic is serious and may cause the death of the colt. Better prevent worm infestation, so that the colts will not experience this trouble. The colt that is free of worms and bot grubs is more likely to thrive and grow well than the neglected colt that depends on no management at all. Change the pasture ground frequently during the summer, keep them away from wormy horses, and have them treated with a carbon disulphide capsule when they come into winter quarters.

Trade and the Empire

.. By Stanley Baldwin

One of the interesting results already of our departure from the free trade policy has been a certain influx of foreign manufacturing business. That tendency has been rather exaggerated in the press, but it is a real movement, and I would remind you that we in England have owed a good deal in the past to some of those importantions of new manufactures.

We brought weaving, a typically British industry today, from the Fleminfis. It was the French Huguenots who taught us how to make silk; and so it is today that we find the toymaker from Nuremberg, the clockmakers from the Black Country; the perfumery and toilet accessories made in Paris are coming over to be made in this country, and also the finest kinds of ladies' stockings from Saxony.

Those are industries that will be valuable to us because they will not only provide work to meet the demands of our own customers at home but they will broaden our equipment for competitive orders coming from abroad, and increasing. I hope, our exports and trade.

Perhaps the most important thing is this, that at last there are no more arguments about whether a tariff is a good thing or a bad. We are at last going to put these economic theories to the test of experience, and we shall know, instead of arguing about, the results by the time four years hence or more this government renders up its mandate to the people.

A Happy Man

To awaken each morning with a smile brightening my face; to greet the day with reverence for the opportunities it contains; to approach my work with a clean mind to hold ever before me, even in the doing of little things ,the Ultimate Purpose toward which I am working; to meet men and women with laughter on my lips and love in my heart; to be gentle, kind, and courteous through all the hours; to approach the night with weariness that ever woos sleep and the joy that comes from work well done—this is how I desire to waste wisely my days.—From Fiery Grains.

Humility

Humility becomes all, it is Christ like, for none were ever so humble as He. It gains the respect of all. It will never let us down. It will help us to overcome the difficulties of life, and we cannot fall, for God is on our side.—Martin.

MUTT AND JEFF— By BUD FISHER

In Case of a Tie—He is Also Asleep.

SENSATIONAL SAVING IN GOVERNMENT COST EXPECTED BY TORIES

While there are no definite signs at present o an early Provincial election, many prominent Tory campfollowers feel that things are now moving in that direction, and that any appeal which the Henry Government may make to the people—in 1933 or as late as 1934—will be one for Ontario-wide economies, with Queen's Park pledged to set the pace therein.

In any such economy platform, the following planks may be laid down:

1. Reduction of the present Legislature membership of 112 to 82, so as to tally with hte Ontario House of Commons membership, and make possible the adoption of (or as nearly as possible) Dominion electoral riding boundaries.

2. An eight-man Ontario Cabinet.

3. Abolition of all County Councils.

4. Discontinuance of the Grand Jury system.

Absolutely no confirmation of these suggested proposals is to be had at Queen's Park, but Governments are not in the habit of "tipping their signals" in advance, and unofficial rumor is that various members of the present Administration are at least discussing such matters nowadays among themselves if not actually bringin them before Cabinet as a whole.

It is a pretty well accepted belief, furthermore, that a Redistribution Bill will be brought down to the Legislature at the 1933 session, and this, undoubtedly, would serve as the first step toward making the House smaller, and a less costly proposition than it is at the present time.

A smaller Cabinet, with amalgamation of various departments and elimination of others to effect that goal, has been rumored for some time.

Doing away with County Councils has been advocated from public platforms during the past year by various Ministers of the Government and abolition of Grand Juries has a forceful sponsor in the person of Attorney-General W.H. Price, whose intimation along this line at the last session of hte House was generally taken to indicate that the Government was about ready to move in that connection.

Abolition of County Councils, with the subsequent adoption of the Township Council basis of rural municipal government, would, it is understood, necessitate considerable changes in Provincial grants—notably in highways construction contributions—but on the other hand, it is said, would effect a material financial saving all around—Toronto Globe.

STRADER'S HILL

Mrs. Guy Strader was the guest of her aunt, Mrs. Nell Cook, Tuesday.

Miss Dora Hanson visited friends at Morrisburg a couple of days recently.

Quite a few from here attended the dance held at Williamsburg on Friday night.

Messrs Ralph Turner and Acil Cook motored to Ottawa Saturday and spent the day.

Mrs. G. Cunningham visited her daughter, Mrs. E. Pitt, recently. Her many friends are glad to see her out again after her illness.

Visitors for the week at Mr. and Mrs. Ross Hanson's were: Mr. and Mrs A. Casselman, Winchester; Mr. and Mrs. W. Casselman, Mr. and Mrs. R. Merkley, Winchester; Mr. and Mrs. C. Pitt, Mr. and Mrs. G. Ellis, Dixon.

We are glad to see Mahlon Strader out again after an attack of appendicitis.

Visitors and callers at Mr. Henry Hanson's for the week were Mr. and Mrs. J. Bogart, Elma; Mr. and Mrs. D. Strader, Dundela; Mr. and Mrs. Nathaniel Merkley, Mr. and Mrs. Will Carr and Dwain of Boucks Hill; Mr. S. Coons, Mr. E. Johnston, Toys Hill; and Misses Dora Hanson and Olive Strader.,

Mrs. Blanche Hanson and Miss Ethel Beryl motored to Cornwall on Friday and spent the day with friends.

Mr. Stanley Pitt of Niagara spent Saturday with his grandfather, Mr. Ross Hanson and Mrs. Hanson.

GALLINGERTOWN

Miss Luella Strader spent the week-end in Williamsburg.

Miss Lois Weagant spent Friday with her aunt, Mrs. Fred C. Gallinger.

Mr. Frank Jarvis spent Thursday night at L. Ravary's.

Sawing wood is the order of the day.

Mr. John Wagner has been busy for a couple of days grading the roads in this vicinity.

MARIATOWN

Mr. and Mrs. L. Bateman and daughter Dorothy spent Monday evening with Mr. and Mrs. S. Canning.

Mrs. L.E. Casselman spent Tuesday afternoon at Elma, guest of Mrs. Ira Weegar.

Mr. and Mrs. S. Canning called at the home of Mr. F.J. Beckstead on Sunday.

Mrs. T. Kerr and daughter Claudine spent one day in Ottawa last week.

Mrs. E. Selleck spent Tuesday with Mrs. Geo. Heagle.

Mr. and Mrs. A. McConnell spent last Sunday in Cornwall, guests of the latter's sister. Miss Pearl Feeley accompanied them home, after spending a week in Cornwall.

Mr. and Mrs. S. Rombough attended the funeral of Mrs. C. Markell at Aultsville on Tuesday.

Mr. and Mrs. S. Canning and family spent last Sunday at Spencerville, guests of Mr. and Mrs. W. Cummings.

WINCHESTER SPRINGS

Born—To Mr. and Mrs. Ross Morrow, April, 29th, a son. (Robert Ross).

Mrs. Orren Casselman spent a few days with Mrs. Ross Morrow.

Miss Sybil Morrow spent Friday last with her grandparents, Mr. and Mrs. Robert Morrow.

Mr. and Mrs. Elburn McIntosh and children spent Thursday last with Mr. and Mrs. Merton Casselman, at Dundela.

Mrs. O. Casselman spent Thursday in Ottawa.

Mrs. Bertha Casselman spent a few days with friends in Ottawa last week.

Mrs. Abe Bailey is spending some time with Mrs. Ross Morrow.

The W.M.S. of the United Church held the May meeting in the church hall Tuesday afternoon, with a good attendance.

The Presbyterian W.M.S. entertained the United Church W.M.S. Wednesday afternoon. The meeting was very helpful and inspiring. An address was given by Mrs. Preston McIntosh, which was enjoyed by all. At the close of the meeting, lunch was served by the ladies to the visiting society.

Mr. H. Barkley and Mr. H. Whittaker called at Mr. Aden Casselman's Sunday.

Mr. and Mrs. Arthur Harper of Cardinal visited at the home of Mr. and Mrs. C. Thompson Sunday.

Mr. and Mrs. Geo. McLean of Manotick were guests of Mr. and Mrs. Ralph Allison Sunday.

Mr. and Mrs. Alva Steel and family were guests recently at the home of Mr. and Mrs. Wm. Steel.

Mr. Briggs McIntosh spent Thursday in Ottawa.

Mr. and Mrs. Geo. Myers and daughter Grace spent Sunday with Mr. and Mrs. A. Runions at Aultsville.

Mr. and Mrs. F.R. Pratt of Brockville spent a few days with Mr. Jos. Webb and sister Edith.

Miss Dora Holmes and Mr. Victor McIntosh from Ottawa Normal School spent the week-end with their parents here.

Miss Alice Barkley spent Sunday with her parents, Mr. and Mrs. Wm. Barkley at Inkerman.

The play, "Beads on a String," was put on by the young people of the United Church last Thursday evening in the Orange Hall. There was a good attendance and everyone spoke appreciatively of the entertainment. Rev. Morrison of Elma acted as chairman. Singing the National Anthem brought the meeting to a close.

A number from here attended the funeral of the late George Marcellus held at his home near Williamsburg.

Mr. and Mrs. Cecil McIntosh and daughter Orian spent Thursday with Mr. and Mrs. Reveler at Winchester.

SECOND AVENUE

Mr. Cora Hollister called at Mr. Earl Droppo's Monday.

Mr. and Mrs. Geo. Casselman, accompanied by Mr. and Mrs. Roy Cunningham, motored to Cornwall on Monday.

Mr. Lloyd Henry and Miss Hazel Willett spent Sunday evening in Morrisburg.

Mr. and Mrs. Harold McIntosh were in Morrisburg Sunday evening.

Mr. and Mrs. A. Henry made a business trip to Williamsburg on Monday.

Mr. Geo. Henophy of Autsville spent Monday afternoon at Mr. Melvin McIntosh's.

Mr. Roy Murdock and Mr. Lloyd VanAllen called at Mr. Earl Droppo's on Monday.

Mr. and Mrs. Harvey Phillips spent Tuesday afternoon in Morrisburg.

Messrs Wm. and Geo. Becker called at Mr. Neil Epaugh's Tuesday.

Mr. and Mrs. Chas. Watson of Village View passed through our hamlet on Wednesday.

Mr. Bert Cunningham passed through our street enroute to Morrisburg.

Mr. A. Crites called at Mr. M. McIntosh's on Wednesday.

Mrs. John Berton spent Tuesday with her brother, Mr. C. Garlough, Riverside.

Mr. Harry McIntosh of Massena is spending a few days at his home here.

Guests at Mr. Melvin McIntosh's Tuesday evening were Mr. Lloyd Henry, Miss Hazel Willett, Miss Lola Henry and Mrs. A. Henry.

Mr. and Mrs. Wm. Becker spent Thursday in Aultsville.

Mrs. Arthur Henry and Miss Hazel Willett spent Thursday afternoon with Mr. and Mrs. Geo. O'haughnessy, Hoasic.

Mr. E. Sheets of Aultsville called in our hamlet on Friday.

Mr. and Mrs. Harvey Phillips and son Lloyd spent Friday afternoon in Morrisburg.

Mrs. Geo. Casselman and Mrs. Earl Droppo spent Friday afternoon in Morrisburg.

Mr. Harold Dillabough called at his mother's, Mrs. Geo. Dillabough, Riverside, on Friday.

Mrs. Alvin Henophy and Mrs. H. Phillips were in Morrisburg Saturday evening.

Mr. E. Dennison passed through here enroute to Morrisburg.

Mr. and Mrs. A. Henry, Mr. Lloyd Henry and Miss Hazel Willett motored to the Capital on Sunday. Miss Willett remained, after spending two weeks with Mr. and Mrs. Henry.

NOTICE TO CREDITORS

AND OTHERS

IN THE MATTER OF THE ESTATE OF MARIE SERVISS, LATE OF THE VILLAGE OF MORRISBURG, IN THE COUNTY OF DUNDAS, WIDOW, DECEASED.

All persons having claims of any kind against the Estate of the said Marie Serviss, deceased, who died on or about the 17th day of December, A.D. 1931, are hereby required to fyle their claims on or before the 31st day of May, 1932, with Douglas M. MacInnes or Lulu A. MacInnes, 97 Bethune St., Brockville, Ont., the Executors of the said deceased, after which date the said Executors will proceed to distribute the said Estate, having regard only to such claims as shall have then been received by them.

DATED at Brockville, this Twenty-second day of April, A.D. 1932.

STEWART & STEWART,
Brockville, Ont.,
Solicitors for Executors.

ONTARIO SEED CORN

Kent County high quality, hand-selected, No. 1 Government grade, Early White Cap and Golden Glow at $1.25 and Longfellow at $1.50 per bushel; sacks free and freight paid on three bushels or more. Government germination of 97 p.c. to 100 p.c. Shipment made only to stations with a freight agent. Send One Dollar with order, balance C.O.D.

J.G. GLEESON,
dp Fletcher, Ont.

NOTICE TO CREDITORS

Notice is hereby given that creditors or any other persons having claims against the estate of Mrs. Andrew Redmond, widow, deceased, who died at Morrisburg, on or about the thirteenth day of April, 1932, are required to forward their claims, duly verified, to the undersigned, on or before the twenty-fifth day of May, 1932, after which date the administratrix will proceed to distribute the assets of said deceased among the parties entitled thereto, having regard only for the claims of which she shall then have had notice.

Dated at Morrisburg, this third day of May, A.D. 1932.

MYRTLE L. GAMBLE,
Administratrix.

TO IMPROVE CEMETERY

Plans for the improvement and beautification of Dundela cemetery were recently completed by the Trustees and work is now in progress. The plan is to level the entire surface of the cemetery, remove all unnecessary obstructions, and seed the ground so that it will present a clean, tidy and well kept appearance from front to back. A new fence is being purchased for hte south and East sides.

Already the old fence has been removed and the work of levelling has begun. Many who have watched the work in progress are enthusiastic over the possibilities of this place. Before taking steps, the trustees visited a number of well kept cemeteries and held conference with trustees in several places where similar plans have been successfully carried out.

The plot-holders of the cemetery as well as the community at large will welcome the efforts of the trustees in their determined effort to add beauty and dignity to the resting place of our beloved dead.

WILLIAMSBURG COUNCIL

The 'Counci' met at Williamsburg on May 7th, 1932. Members all present. Minutes of previous meeting read and adopted. The Counties' Treasurer was authorized to delete from his books the amount of taxes returned against part west Commons Con. 2. The following accounts were passed:

Arthur Reddick, winter work	$ 1 20
E.R. Marcellus, winter work	2.00
G.A. Casselman, work, road	17.15
G.W. Colquhoun, work road	2.40
Alfred McMahon, work road	9.45
Clifford Casselman, work on road	2.00
Geo Hess, work on road	15.15
C.S. Beckstead, work road	1.60
Aden Casselman, hauling cedar and for plank	19.30
Jas. Cook, work on NTL	2.00
C.T. Brown, cartage	4.00
Hugh McHaffie, work roads	5.65
Henry Hall, work on bridge	5.25
Clarence Casselman, work on bridge	2.00
N. Tupper, winter work	2.40
Sawyer Massey Co., repairs for crushing plant	232.14
C.N.R., crossing gates	31.24
Fred Myers, freight	8.58
Chas Brown, for cedar	96.75
G.F. Barkley, work on roads	11.25
G.L. Barkley, spikes and iron	17.37
Ward Whitteker, work on roads and tractor	31.48
R.F. Norval, gas and work	33.90
John Bowman, dragging roads	4.50
Ezra McMillan, pay on salary Road Supt.	62.50
Bismark Barkley, grading	4.90
Geo. Merkley, grading	2.50
Lorne Hepburn, work road	2.25
Sam Kyle, work on road	6.00
Fred McMillan, dragging	6.60
Bernice Gallinger, grading	15.40
J.J McMillan, grading and repair grader	5.00
Frank Whitteker, salary assessor and postage	82.00
Stanley Forward, services as School Attendance officer	2.00
Marcella Casselman, relief of herself and family	10.00
C.S. Colquhoun, house rent, Marcella Casselman	8.00

The Council adjourned to meet again at Williamsburg on May 4th, 1932, at one o'clock p.m. as a Court of Revision on assessment roll and other business.

M.S. BECKSTEAD, Clerk.

TOYES HILL

Miss Lulu Hunter of Williamsburg spent Sunday at her home here.

Stanley Waddell took tea with Mr. and Mrs. Arnold Peterson on Tuesday evening.

Little Kenneth Wylie spent Sunday with his grandfather, Joseph Hunter.

Miss Ruth E. Harper and lady friend of Hulbert, spent Sunday with the former's parents, Mr. and Mrs. I. N. Harper.

The Misses Charlotte Casselman and Mildred Wylie took tea Saturday evening with the former's mother, Mrs. Margaret Casselman, of Hulbert.

The young people will hold their monthly meeting at the home of Mrs R. S. Peterson on Friday evening, May 13.

HAINSVILLE

Mr. and Mrs. Alfred Briggs and family and Mrs. Ella Briggs spent Sunday afternoon with Mr. and Mrs John Hempinstall of Pleasant Valley

Miss Muriel Kirker spent Monday with Miss Ivah Briggs.

Mrs. Esrom Hanes and son, William spent Monday with Mr. and Mrs. Ralph Hanes.

Make Your Own Repairs with The NEW IVORY GYPROC Fireproof Wallboard

ANY man who can drive a nail can put up fire-safe ceilings and partitions of Gyproc.

Measure the area to be covered, then order as many sheets of Gyproc as you need. It cuts to size like lumber and you nail it to the studs, joists or over old plaster.

Paper it, panel it, or finish it with Gyptex or Alabastine and you have an inexpensive wall of professional appearance.

Gyproc may be easily identified by the name on the board and the Green stripe along the edge.

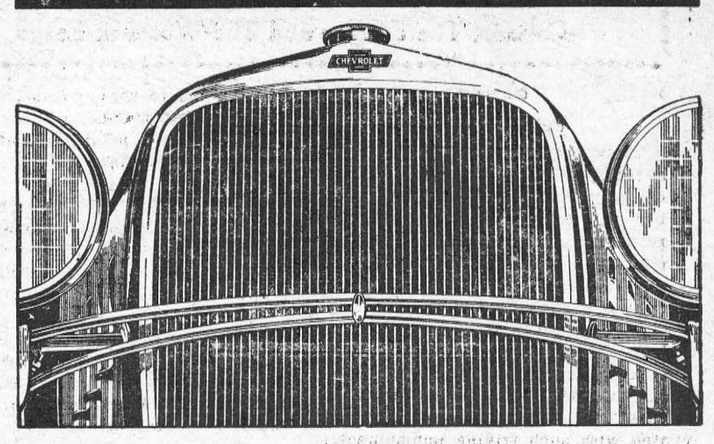
THE GREAT CANADIAN VALUE



THESE REASONS
make it wiser than ever
TO CHOOSE THIS SIX *TODAY!*

1 Chevrolet pioneered the six-cylinder engine in the low priced field because this is the one type of power plant that strikes a *perfect balance of smooth performance and maximum economy.* It is necessary to have six cylinders to get multi-cylinder smoothness.

2 Drivers of sixes never want less; and anything more than six cylinders means a sacrifice of economy! The Chevrolet Six costs less to operate than *any* other full-size car. Naturally, more than six cylinders would mean greater expense for gasoline, oil and upkeep.

3 The 1932 Chevrolet Six is a proved car. It represents the fullest development of the basic multi-cylinder principle which has resulted in highest satisfaction to more than 2,000,000 Chevrolet Six owners.

4 The Chevrolet Six is the lowest priced car combining Silent Syncro-Mesh shift and Free Wheeling.

5 Bodies by Fisher are exclusive on Chevrolet in the lowest price field. Fisher hardwood-and-steel construction is the safest and most durable.

6 New, reduced prices and easy terms over a period of months. Immediate delivery of any model.

7 The Chevrolet motor is mounted on thick rubber blocks, utilizing the most modern and efficient method of preventing vibration.

8 109-inch wheelbase. Strong frame. Four long springs, with four Lovejoy shock absorbers.

9 Stabilized front fender design. Insulated driver's compartment. Fisher non-glare VV windshield, easily adjustable with one hand for ventilation.

10 Down Draft Carburetion with heat control. Harmonically balanced, counterweighted crankshaft.

11 Powerful, enclosed four-wheel brakes. Separate emergency brake system.

12 Built in Canada, of Canadian materials by Canadian workers.

Reckless Driving

Twenty-nine people were killed in automobile accidents on the highways of the province in March. The number will probably be larger for the month of April. As traffic increases during the summer the fatalities will also increase, judged from the experience of past years.

Most of these fatal accidents have been and will be due to reckless and careless driving. In no sphere of human activity is recklessness and carelessness so lightly condoned or visited with such trifling punishment, despite the great danger to human life that is involved.

Severe penalties and severe punishment are the only means of protection for the public against those who refuse to obey the laws and drive with caution and consideration. If every careless driver responsible for an accident were made to suffer exemplary punishment in keeping with the serious consequences of his offence there would be a rapid and substantial decline in the number of highway accidents and fatalities.

Suspension of driving licenses for longer periods than are now imposed in the case of recklessness and drunkenness at the wheel of a car would go a long way toward effective prevention. Permanent cancellation would, in fact, not be too drastic or more than the public interest requires in some cases.—Toronto Star.

Prescribing For Listeners

The amusing feature, however, is the attempt of witnesses at Ottawa to tell the committee the kind of programs the radio listener wants to hear. Does the radio listener really know himself? Isn't it a fact that he is all over the dial in the course of an evening, and that one evening his taste differs from another evening? The fan who wants Amos 'n' Andy may also be an appreciative listener of the grand opera programs from New York. He may take on a medley of old-time jigs and a lecture on the gold standard in the same evening and enjoy them both. In the middle of it all he may wish to learn the result of a hockey match at Winnipeg or Regina. We would like to see the Solomon who is able to say with certainty what a radio program should be made up of to please everybody. He would be such a wise bird that he should be put to work on the unemployment problem.—Regina Leader Post.

Back to the Land

Where an unemployed man is anxious to get busy on the land, he should be encouraged in all possible ways. Given access to suitable land, a willing man, with some initial help, might easily be placed in a position where he could lift himself by his own productive exertion out of the mire of unemployment. Not to give such a man his chance at a time like this is little short of a crime, and it is in this light that the question should now be looked at by the City Council and the other responsible official bodies. Unemployment is striking into a new phase in Winnipeg, and the most strenuous and ntelligent measures will have to be adopted to cope with it, and there should be no delay in getting such measures started. — Winnipeg Free Press.

Fortunes in the Making

We have a communication from a well-known New York financial man, who recalls that the world outlook has been much blacker at certain crises in the past than it is to-day.

Dealing specially with conditions on this continent, our correspondent says everyone's income has suffered in the past two years, but in nine cases out of ten it has not suffered enough to interfere with food or comfort. Instead of crying about paper losses and making things worse by continually talking about them, people should be thankful to be alive and well. Untold numbers are out of work, are suffering and desperate, but compared with many parts of the world Canada knows nothing of poverty. "If your business is good, say so. If not, say nothing. The overworked word, psychology, plays a large part to-day in the public attitude. People are waiting now for someone else to make times better, instead of working hard and making them better themselves. They compare commodity and stock prices today with those at the 1929 peak. They refuse to take advantage of the wonderful opportunities afforded by the break in prices. They say they are waiting for business to be good before buying anything, or doing anything constructive themselves. They hesitate to buy securities at a fraction of 1929 prices, but with equally good future prospects."

We certainly do not think of fostering any fresh speculative campaign, but on the other hand the present is the time for courage instead of fear; for work instead of for whining; for sane saving, sane spending and sane investing. New fortunes are in the making. A few wise ones know it and are taking advantage of the situation. —Toronto Mail and Empire.

Farmers in the Chatham area are being urged to grow soy beans. But the trouble with Canada to-day is that there are too many soys and not enough laughs.—Toronto Star.

A safe has been invented which it is claimed to be impossible to open. It evidently embodies the chief features of a taxicab window and a sardine tin. —Ottawa Journal.

Just as the 1932 wheat crop peeps through the Alberta soil France discovers the need of more Canadian wheat. Which is an excellent form of balance.—Toronto Globe.

THE EMPIRE

Britain and Europe

We in this country are part of Europe. We may regret that we are part of Europe. We may wish that the Atlantic was narrower and the Straits of Dover wider. But sentiment cannot alter geography. Not all that can be said or done at Ottawa will add one foot to the Straits of Dover.—Manchester Guardian.

Nationalism and the World

The world collectively condemns tariffs; the nations individually insist on keeping them. The world collectively says that reparations and international debts are ruinous; the nations individually protest that they cannot abandon their claims. The world collectively says that it is being ruined by armaments; the nations individually fight stubbornly to maintain their own armaments. All these things are linked together in the great world controversy. We are getting to the point when this quarrel must be composed or the system we call "capitalism" will break down. And yet by a queer paradox it is in most countries the capitalists, or at least the rich and well-to-do, who are most ardent in the defence of nationalist economies and national armaments. If between them they kill the capitalist system, it will be they themselves who will have done it.—J. A. Spender in the London News-Chronicle (Lib.)

Education in England

English education is very much alive. There are still dull patches in it, of course, but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community. Three times before in history English education has flushed with renewed energy: first under Alfred, next at the time of the Reformation, and last in the early years of Queen Victoria. But never till now has it been free from the cramping influences of poverty. To-day it is well furnished and free in its choice of methods of work. Thes teachers are at liberty to try new ways of teaching; to get into the open air; to use other tools than the pen. A school needs space, zest and freedom if it is rightly to train those who a few years hence will make or mar the tone and temper of town and village, of factory, shop and farm. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.—The Master of University College, Oxford, in the Spectator (London).

World Prices

While prices of world commodities have been tumbling for the last two years, the British trade unions have nailed their wages and hours to the wall, and refused to lower them an inch. This is called maintaining the standard of living. Other countries fail to recognize the right of the British artisan to a higher standard of living than themselves; they lengthen their hours and lower their wages to suit the changed conditions of the world markets, which, consequently, they snatch from under our noses.—A Truthful Tory in Truth (London).

OTHER OPINIONS

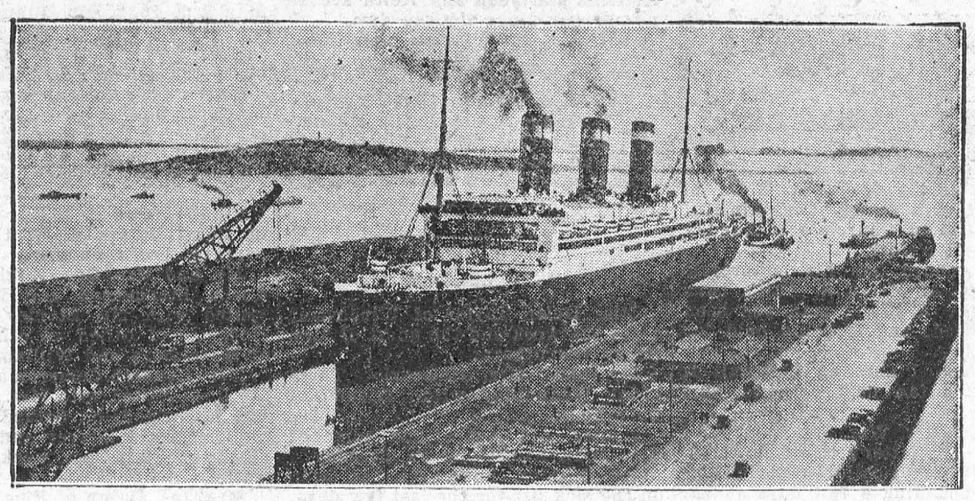
More British Protection

While neither the United States nor any other nation that trades heavily with the United Kingdom can do other than regret that the British are making the entry of foreign products into their country increasingly difficult, the fact stands out that they have definite purposes to achieve. Furthermore, they believe that the attainment of those objectives warrants the means to accomplish them. However unfortunate it may be for the rest of the world, one can hardly disregard the fact that the British are only emulating the example given them by the suffering nations. — Providence Journal.

Crisis Still to Come

If there is no actual starvation anywhere — even Chicago reports that "food is adequate and no one is suffering from cold"—there is everywhere misery and want. More and more workers have exhausted their savings; available relief funds are running low. Spring and Summer may bring seasonal improvement in industrial conditions in some localties, as in Detroit, but no one expects it to solve the problem of relief. From the viewpoint of the welfare workers the real crisis is still to come.—New York Times.

"Leviathan" Starts New Season



After a long winter nap, the Leviathan has had a spring rub-down and is ready for service again. We see her leaving the Boston drydock, bound for Europe once more.

McGill University to Honor Painter and Scientist

Montreal.—McGill University will honor a Canadian painter, a Canadian scientist, and two prominent citizens of the United States at the annual Spring convocation to be held this year on May 26, it was announced at the university. The honor list of those who will receive degree of Doctor of Laws now includes Horatio Walker, Isle of Orleans, Quebec, recognized as the dean of Canadian painters; Dr. John S. Plaskett, director of the Dominion Astrophysical Observatory at Victoria, B.C.; Dr. John H. Finley, associate editor of the New York Times, and Major-General Robert Y. Patterson, a former Canadian and a graduate of McGill University who is now Surgeon-General in the United States army.

The convocation address will be given by Dr. Finley who represented United States at the unveiling of the goodwill monument on McGill campus last Spring. In addition to the honorary awards, the degree of Doctor of Science will be conferred on Dr. I. M. Rabinowitch, director of the Department of Metabolism and physician in charge of the diabetic clinic at the Montreal General Hospital.

Stainless Steel Secret To Be Opened in 1960

Sheffield, England.—The story of the discovery of stainless steel, a secret for several years, is not to be told for another three decades.

Harry Brearley, discovered of the process, has given the "cutlers' company" of Sheffield a sealed envelope, admonishing the society not to open it until the cutlers' feast of 1960. The envelope contains his story of the discovery.

Irak Government Banishes Chairs For Visitors

Bagdad, Irak.—The Minister of Finance has issued instructions to all departments under his control, that in the future there must be only one chair in the rooms of heads of departments. All other chairs are to be taken away.

It is understood that this order was framed to prevent the waste of officials' time by visitors whose visits to Government offices are apt to be prolonged far beyond the time necessary for the transaction of their business.

5,000 Paris Flats Empty

Paris.—Official housing records indicate that empty apartment space is now available for 5,000 families. The apartments range from two to five principal rooms, with central heating and elevators, and at an annual rental of from $186 to $217.

Earl of Willingdon Escorted By Agridi Tribesmen

In a special despatch from India to the New York Times we read that our former Governor-General, the Earl of Willingdon, recently paid an official visit to the Khyber Pass, on the north-western Indian frontier. Four hundred Afridi tribal elders were there to meet His Excellency and to assure him of a general tribal loyalty to the Rajah and the British Crown. Such unpleasantnesses as have occurred on the frontier in the last two years have been the work of five per cent. of the younger tribesmen, led astray by Russian emissaries. The tribal leaders pdayed the Government "to pity the poor people and show its pleasure" by restoring to them the right to join the army and the police force. As the Viceroy drove through the Khyber Pass the way was guarded throughout, not by British troops, but by local levies drown from the tribes as a mark of confidence—a mark of confidence immensely appreciated by the tribal elders and the Afridis in general. The military roads in this district were originally built for defence purposes, but they now fulfill a most useful function as roads of peace, which make possible the freest intercourse between the tribesmen and the bazaars of Peshawar. Thousands of Canadians will be interested in this bit of news from a remote point on the Empire's far-flung frontiers.

Coal Gas As Motor Fuel Proves Success in Test

Santiago, Chile.—Experiments were conducted recently in utilizing coal gas with a special carburetor as fuel for automotive vehicles as increased prices for imported gasoline appeared inevitable, despite lengthy conferences between government officials and the two oil companies operating in Chile.

An experimental automobile was run satisfactorily for five kilometers (about three miles) on one cubic meter of gas in one trial.

Debts of Edgar Wallage Greatly Exceed Assets

London.—According to the Daily Mail an affidavit of Edgar Wallace's estate, presented for probate showed debts of about £81,000 (currently $340,200) and assets of £18,000 (currently $75,600) while the personal estate of the late author, who died in California on Feb. 10, was nil.

The affidavit, however was subject to correction, the newspaper said, as it was incomplete regarding his earnings in Hollywood. The Mail quoted his widow as having said the debt were due to heavy racing losses, extravagances and excessive generosity.

A native Indian couple, Mr. and Mrs. Himansui Rai, married in India, have given notice in London, England, of their intention to go through a second ceremony, as they are travelling and an English certificate would help them in applying for passports.

Hygiene Council Urges Continuance of Health Units

Toronto — Making an urgent plea that, under present conditions, every effort should be put forward to maintain at full strength and efficiency the health departments and community agencies concerned with health of safeguards, the boards of the Canadian Social Hygiene Council passed unanimously a resolution to that effect and decided to bring the general question to the attention of governments, other national organizations and the public generally.

Reports from many sections of the Dominion, the resolution states, indicated apprehension lest the necessary efforts towards reduction in governmental costs might lead to material curtailments in health services. That health is the first wealth of the people is stressed in the Council's statement which notes that, despite unfavorable economic conditions, the national health has been maintained at a high level. Up to the present time, this level has been raised year after year. It is further pointed out that expenditures for the protection and promotion of public health have been very small compared with outlays for other public services of intrinsic merit and that they do not, for this reason, lend themselves to deflation.

That maintenance of the public health, in the face of disturbed economic conditions, becomes even more vital than in normal times and that any relaxing of vigilance such as reduced health services would cause, would be fraught with danger, are given as reasons which prompted the Council's action. At the session over which Hon. Mr. Justice Riddell presided, with J. P. Bickell, chairman of the finance committee, business and financial leaders as well as public health officials, were present and expressed themselves as strongly in support of the sentiments expressed.

Soviet Industries Plan Order for German Iron

Berlin. — Recent reports from Essen said Soviet industries had placed new orders for 300,000 tons of iron bars and sheets and that possibly 200,000 additional tons would be ordered later.

Russian orders in the Ruhr industries so far this year were estimated at between 300,000,000 and 400,000,000 reichsmarks. Terms of financing are still being considered.

Platinum Deposit Found 20 Miles From Pembroke

Pembroke.—Finding of a platinum deposit in the Township of Fraser, 20 miles from here, was reported in Pembroke recently. More than 40 claims are reported to have been staked, and prospectors from Northern Ontario are reported preparing to flock into the district. It is understood the discovery was made some time ago by John Roberts, mining engineer, for a Beachburg syndicate, which is preparing to develop a rich feldspar deposit.

8,000 Canadians Addicts To Drugs, Report Shows

Ottawa.—Every effort had been made in Canada to restrict drug traffic, yet it was estimated there were 8,000 drug addicts in this country, Rt. Hon. Arthur Meighen told the Senate recently. The international convention for limiting the manufacture and distribution of narcotic drugs at Geneva was approved.

Senator Meighen explained the purposes of the convention.

Japan Issues a Warning "Hands Off Manchuria"

Tokio.—A warning to the League of Nations and to Soviet Russia to keep "hands off Manchuria" was issued by General Sadao Araki, Japanese War Minister, in a speech to the Kokuhonsha, a patriotic society at Osaka.

The society is the nucleus of the present country-wide nationalist movement in Japan.

"Wool Week" Palnned

Perth, W. Aust. — The Pastoralists' Association with other local institutions, has set apart the week May 20 to 27 as "Wool Week," to advertise the high quality fleeces grown in this country. Prizes are offered by the association for woolen goods of various kinds.

News Oddities

Partners Solve Problem After Ten Lawyers Fail

Detroit.—Ten lawyers litigated for 13 weeks to effect a dissolution of the partnership of Mr. Jacob Shevitz and his uncle, Mr. Isaac August, principally because the partners hadn't kept books for 10 years.

Then the partners settled it all to their own satisfaction in less than 30 minutes. They wrote on 98 slips of paper the descriptions of the 98 properties they jointly owned, shuffled the deck and started dealing on a "one for you, one for me" basis.

Devotion to Canaries Cause of Divorce

St. Louis, Mo.—Mrs. Leona Sternfels sought a divorce from her physician husband and, although her suit did not specifically so state, 150 canary birds could have been named as co-respondents in the case.

Her petition stated that Dr. Arthur F. Sternfels passes most of his leisure hours with his canaries, that he frequently spent as much as $75 on a single bird and had invested at least $5,000 in his hobby.

Dr. Sternfels denied such excessive expenditures and insisted that every professional man is entitled to a diverting hobby.

Non-Poisonous Reptiles Swallows Deadly Loser

Boston.—The milk snake may be a non-poisonous, comparatively harmless member of the snake family, but when he is aroused it would seem that he is sure death to the venomous copperhead, according to a description of a thrilling battle between a copperhead and a milk snake as related in the Boston Society of Natural History bulletin.

Lewis H. Babbitt came upon the snakes in Simsbury, Conn. He describes the battle thus:

"For 15 minutes I watched this fight in the mountain side. The snakes were twisted into an apparently inextricable knot, with the milk snake squeezing the copperhead harder and harder, maintaining all the while a secure grip with its jaws clamped near the copperhead's tail while the latter sank its fangs into the neck of its antagonist. The contestants were balanced on a small stone but in their struggles fell off, and rolled some two feet down the slope, bringing up against a boulder."

Punctuality of Employe Saves Himself and Wife

St. Catharines.—The fact that he was a faithful and always punctual employe saved the life of Harry Lowe and his wife when they were overcome by gas at their home. Lowe was noted for his promptness in arriving at work, and when he failed to appear his employer despatched a messenger to ascertain the reason. The messenger failed to receive any answer to his knocks at the Lowe home, and he became alarmed. The police were summoned, but before they arrived the constant knocking had aroused Mrs. Lowe from a stupor and she stumbled to the door. Her husband was found in another room completely overcome by fumes escaping from a gas heater. Both responded to medical attention.

Spread of Automats Cuts Waiters' Tips

Brussels.—Twelve months ago there were practicallp no automatic buffets or quick-lunch bars in Belgium. Today there is one at almost every street corner, and they are having a quite unexpected effect. In the automat people serve themselves and pay no tips. The smaller cafe, feeling the effect of the competition, is putting out bills, "No tipping allowed here."

Waiters, with newly acquired dignity, after the war, proclaimed that they want no more tips, but expected 10 per cent. of the bill for service. This they got, but insolence took the place of the former obsequiousness, and none of the small services usually rendered for the tip were given unless more largesse was forthcoming.

This, combined with the blue laws, has been ruining the licensed victualers' trade. Now that tipping in the smaller place at any rate, is to be abolished, better times may be coming.

Medicinal Plants

Brussels.—The Minister of Agriculture has decided to promote the cultivation of aromatic and medicinal plants in this country. Land has been selected for the experiments, and lectures with slides will be given at Lessines and other centres. Herbs are largely used in Belgian medicine, and serious complaints are treated with such simple remedies as cherry stalks or blackberry leaves, which curiously enough are quite successful.

More Americans Visit Manitoba

Manitoba had more American visitors in 1931 than in 1930, according to the president of the Winnipeg and Manitoba Tourist and Convention Bureau. Automobiles entering Manitoba Province from the United States in 1931 totaled 47,745—4,500 more than in 1930.—U. S. Commerce Reports.

Tires Match Color of Cars

Tires to match color combinations of motor cars are the latest innovation in the tire industry.—Popular Mechanics Magazine.

Australia reports an orchid forty-five feet high. They come rather high in other places, too.

COMFORT

for COLICKY BABIES

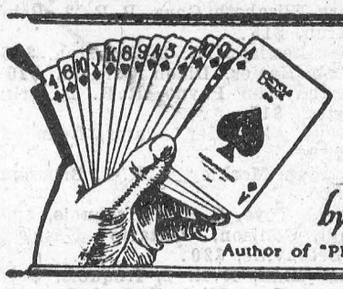
. . . THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made specially for babies and children. It is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs, no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

Chas. H. Fletcher.

CASTORIA

CHILDREN CRY FOR IT



How to play Bridge AUCTION and CONTRACT

by Wynne Ferguson

Author of "PRACTICAL AUCTION BRIDGE"

ARTICLE No. 21

The following hands have been misplayed in some way and have been sent in for criticism:

Hand No. 1

Y
A B
Z

Hearts—6
Clubs—K, Q, 9, 8
Diamonds—7
Spades—A, Q, J, 9, 7, 6, 2

No score, rubber game. The hand is equally applicable either to Auction or to Contract.

Z dealt and bid four spades (a fine pre-emptive bid by the way), A doubled, Y passed and B bid five hearts. Z and now passed and Y doubled. When all passed what should Z have opened? This hand offers an excellent example of the proper opening lead after a double. If a player doubles after his partner has made a bid, he expects his partner to lead the suit he has bid. If a player has made a bid of his own and later doubles, he expects his partner to lead that suit.

In this example hand, Z has bid four spades and his partner, Y, has doubled five hearts. Under these conditions, Z should have opened his ace of spades. This opening would have set the contract one trick. Y had a singleton spade and doubled with the expectation of a spade opening. Z, however, thought of none of these very good reasons for a spade opening. He opened the king of clubs and A B just made their bid and thus scored game and rubber. This hand is a fine example, so study it over carefully.

The following is another fine example:

Hand No. 2

Hearts—5
Clubs—9, 8, 6, 3
Diamonds—7, 6, 2
Spades—A, K, 8, 7, 6

Y
A B
Z

Hearts—K, 6, 2
Clubs—K, Q, J, 4
Diamonds—K, 8
Spades—Q, 10, 4, 2

No score, rubber game, and the hand is applicable to either Auction or Contract.

Z dealt and bid four hearts, A bid five diamonds and all passed. Y opened the king of spades and B's hand, the dummy's in this instance, was placed on the table. Z played the three of spades and A the five. Y should have reasoned somewhat as follows: "What sort of hand did Z have to justify a four-heart bid? If he had wanted a heart lead, he probably would have doubled. His four-heart bid probably consists of at least eight hearts with four honors and very little side strength. He also probably has a singleton spade and bid four hearts in the hope of shutting out a spade bid. Therefore, my best play is to lead the ace of spades and hope that Z can trump the third round of spades.

If Y had followed this line of reasoning, he would have set the contract one trick. He failed to do so, however, and led a heart at trick two, which A trumped. A then led trumps and scored game and rubber, losing only two spade tricks. This is another hand that should be carefully noted.

The play in the following hand should be easy but sometimes the easy ones are the ones that go wrong:

Hand No. 3

Y
A B
Z

Hearts—K, Q, 10, 8, 4
Clubs—A, 4
Diamonds—J, 7, 6, 2
Spades—9, 5

No score, first game. The point of the hand is applicable to either Auction or Contract.

Z dealt and bid one heart, A and Y passed and B bid one spade. Z and A passed and Y bid two hearts. The final bid was four spades due to the fact that Y raised the heart bid twice more. He also doubled four spades. What should Z open?

This hand is similar to the first one in that Z has bid a suit and his partner, Y, has doubled. Under the rule set down in the analysis of that hand, Y certainly expected a heart lead by Z. Irrespective of that fact, however, Z should have led a heart in the endeavor to set up a trick in that suit before he lost his re-entry in clubs.

Instead of doing so, however, Z opened the ace of clubs and then led the four, hoping, as he said, for a ruff. This lead gave A B a game that they couldn't have scored if Z had opened the king of hearts.

Shakespeare's Choice of Words

We have a great living instance among writers, that the quality of a man's productions is not to be estimated in the inverse ratio of their quantity. I mean in the Author of Waverley, the fundity of whose pen is no less admirable than its felicity. Shakespeare is another instance of the same prodigality of genius; his materials being endlessly poured forth with no niggard or fastidious hand, and the mastery of the execution being (in many respects at least) equal to the boldness of the design.

As one example among others that I might site of the attention which he gave to his subject, it is sufficient to observe that there is scarcely a word in any of his more striking passages that can be altered for the better. If any person, for instance, is trying to recollect a favourite line, and cannot hit upon some particular expression, it is in vain to think of substituting any other so good. That in the original text is not merely the best, but it seems the only right one. I will stop to illustrate this point a little. I was at a lass the other day for the line in Henry V.,

"Nice customs curtsy to great kings."

I could not recollect the word nice; I tried a number of others, such as old, grove, etc.—they would none of them do, but seemed all heavy, lumbering, or from the purpose; the word nice, on the contrary, appeared to drop into its place, and be ready to assist in paying the reverence due. Again,

"A Jest's prerogative lies in the ear
Of him that hears it."

I thought, in quoting from memory, of "A jest's success," "A jest's renown," etc. I then turned to the volume, and there found the very word that of all others expressed the idea. Had Shakespeare searched through the four quarters of the globe, he could not have lighted on another to convey so exactly what he meant—a casual, hollow, sounding success!

I could multiply such examples, but that I am sure the reader will easily supply them himself; and they show sufficiently that Shakespeare was not (as he is often represented) a loose or clumsy writer. The bold, happy texture of his style, in which every word is prominent and yet cannot be torn form its place without violence, is (one should think) the result either of vigilant pains-taking, or of unerring, intuitive perception, and not the mark of crude conceptions, or "the random, blindfold blows of ignorance."—From "Table Talk," by William Hazlitt.

The Shellfish Industry

Among Canada's growing resources are the shellfish industries, which together add several millions of dollars yearly to the Dominion's income. The most widely known, perhaps, is the lobster fishery in Atlantic waters. Scallops, also, on the East Coast provide a very considerable revenue.

In the Dominion's Pacific waters shrimps are taken in amounts of considerable value, as well as abalone. Clams, cockles, crabs, oysters and oysters and winkles are obtained from both coasts, in amounts of varying value.

New impetus has been given to the fishing industries of Canada in recent years because of emphasis on the iodine content of shellfish and the consequent virtue of the shellfish as preventives of goiter, anemia and other ills.

"Her father said she was playing too much bridge and threw her cards into the fire."

"What did she do?"

"What could she do, the girl stood by the burning deck."

GOOD ACTIONS.

The greatest pleasure I know is to do a good action by stealth, and to have it found out by accident. —Lam.

Underweight?

"My baby was so thin his hands were like bird claws. But he thrived wonderfully after I started giving Baby's Own Tablets," writes Mrs. L. Kennedy, Portland, Ontario. Baby's Own Tablets help to regulate stomach and bowels; and the thin child gains weight. Absolutely safe. 25c package. 233

Dr. Williams'

BABY'S OWN TABLETS

Down in Weight and Very Pale

Mrs. Beare Thankful for Way in Which Dr. Williams' Pink Pills Helped Her Back to Health

Gained Weight and Color

"I can truly recommend Dr. Williams' Pink Pills, for they did wonders for me," writes Mrs. Mabel R. Beare, New Westminster, B.C. "After a long and very trying illness, I was down to 90 lbs. in weight. I could not eat a hearty meal. In fact, I have had to go away from the table hungry, from a dinner I dared not touch. I was also very pale. I had often read about Dr. Williams' Pink Pills, so thought I would give them a trial. I soon found I was able to eat with any one, and life began to look brighter. My weight came up to 118 lbs. and my lips and cheeks had lots of color. I am more than thankful I ever took Dr. Williams' Pink Pills, and I only hope others will try them."

Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason they have given new vitality and strength to thousands of such nervously exhausted women. Equally helpful for growing girls. Try them. At your druggists in the new glass container. 50c

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

2789

Here's a charming daytime dress of printed crepe silk. A plain crepe vest with self-button trim provides interesting contrast.

It's a bit feminine with its ruffle trimmed neck and sleeves.

The skirt is decidedly distinctive with its deep scalloped hip treatment.

In the miniature view, it shows the attractively shaped long sleeves that pattern includes.

For more formal year, you could make it of one of the new looking sheers in polka-dotted chiffon.

Plain flat and crinkle crepe silk are irresistibly lovely in this model.

Style No. 2789 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Size 36 requires 3⅝ yards 39-inch with 1 yard 35-inch contrasting.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

OLD BOOKS.

In literature I am fond of confining myself to the best company, which consists chiefly of my old acquaintance, with whom I am desirous of becoming more intimate; and I suspect that nine times out of ten it is more profitable, if not more agreeable, to read an old book over again than to read a new one for the first time.—T. Dudley.

POVERTY.

Poverty, if it is sweet and not bitter, is in my view a condition far more blessed of God than wealth, bringing human hearts closer together in mutual dependence and brotherhood.

It is possible that a man can be so changed by love that one could not recognize him to be the same person. —Terence.

"Access to raw material is the occasion for international conflict and disagreement."—Newton D. Baker.

Owl Laffs

Knowledge Is Power

Tommy was fond of squeezing tooth paste out of his shiny new tube. His mother, finding it necessary to limit the amount to the purpose in view, warned him one morning not to take too much.

Tommy—"How much may I take?"

Mother—"Oh, a little bit, about the size of a bean."

Tommy gave the tube a tremendous pinch and out shot a long ribbon of paste.

Mother—"Tommy! Do you wish to be punished? Is that the size of a bean?"

Tommy—"Sure, Mom. This is a string bean."

Henry—"How sweet of you to back that horse because it had the same name as mine!"

Jane—"It had the same habits, too. It got there half an hour late!"

Wise—"When was tennis first mentioned in the Bible?"

Otherwise—"I'll ask you."

Wise—"When Joseph first served in Pharoah's Court."

The Six Ages of Women

Five, Fifteen, Twenty-five, Thirty-five, Thirty-five, Thirty-five.

A woman's favorite sport is shopping for things she knows she can't afford—a man's is doing things he suspects he ought not to do. Maybe some of the flappers kiss so much now, before they're married, because they see how few mother gets. If wives and stenographers would only co-operate, no man would have a chance to get far from the dotted line between his desk and his door mat. A musician is defined as one who can hear new music and recognize the old scores it was stolen from. And even some of us who do not claim to be musicians can do that.

Wife (on their return from the party)—"Do you realize what you did?"

Husband—"No; but I'll admit it was wrong. What was it?"

Agnes—"Isn't it remarkable how Alice keeps her age?"

Clara—"Yes, she hasn't changed it for ten years."

Nervous Suitor—"I've come to see your sister."

Little Brother—"She's been expecting you."

Nervous Suitor (beaming)—"Ah! that's good. Here's a quarter for you. How do you know she's been expecting me?"

Little Brother—"She's gone out."

When a gold digger starts chasing after a Scotchman, she gets a good run for her money. When the meek inherit the earth, their hardest problem will be trying to collect rent from the unmeek. Every now and then we come across a house-to-house salesman who is so rude we dont know whether to slam the door in his face, or to slam his face with the door. Leap year doesn't signify that girls should jump at conclusions. Flattering a man is like after dinner speaking. The whole thing depends on knowing when to stop.

124-Yr.-Old British Firm Makes Record Motors

London.—The makers of the engines which hold the world's land and air speed records started business 124 years ago as producers of printing machinery. Now known as the builders of Britain's Schneider Trophy, automobile and speed boat record breaking motors, the firm of D. Napier & Son was established in 1808. Within a few years its newspaper printing machinery was being extensively used in London and Ireland. A special machine for printing Bibles in rare Oriental languages, invented by D. Napier before 1830, is still in use today.

All kinds of machinery and instruments have been invented and manufactured by the company.

Automation coin weighing and sorting apparatus was perfected in 1851. Other manufactures included astronomical telescopes, guns, rolling mills, bulets, numbering machines, embossing and perforating gear for postage stamps, steam engines, tide guages, ships' compasses and centrifugal sugar machines.

The automobile enterprise was not launched until 1898, and it was a small step from the automobile motor to the airplane engine. The firm is now specializing in the production of high-speed aero engines.

Lose Fat

—and Feel Better for it!

How would you like to lose 15 pounds of fat in a month and at the same time increase your energy and improve your health?

Get on the scales to-day and see how much you weigh—then get a bottle of Kruschen Salts (lasts 4 weeks). Take one half teaspoonful every morning in a glass of hot water—reduce the food supply—increase daily activities and when you have finished the first bottle weigh yourself again.

Now you can laugh at the people who spend money galore to lose a few pounds of fat—now you will know the pleasant way to lose unsightly fat, and you'll also know that the 6 vitalizing salts of Kruschen (salts that your blood, nerves and glands must have to function properly)—have presented you with glorious health.

After that you'll want to walk around and say to your friends—"One 75c. bottle of Kruschen Salts is worth ten dollars of any fat person's money."

HELP! KIDNEYS!

If your kidneys become useless no doctor can save you. Get your kidneys strong, healthy. For over 50 years kidney sufferers have put their trust in Warner's Safe Kidney and Liver Remedy. Purely vegetable. Pleasant tasting. Stimulates kidneys and liver gently but surely. Get a bottle today from any druggist. Warner's Safe Remedies Co., Toronto, Ontario.

WARNER'S SAFE KIDNEY AND LIVER REMEDY

for SPRAINS

Rub Minard's in gently. It penetrates sore ligaments, allays inflammation, soothes, heals.

Puts you on your feet!

MINARD'S "KING OF PAIN" LINIMENT

When PAIN Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many times that much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go, get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. 50c a bottle—any drug store. (Made in Canada.)

• • •

On Monday afternoon, 25,000 salmon trout fry from the government hatcheries at Glenora, near Picton, were deposited in the waters of Devil Lake. The fry were secured through the efforts of members of the Wright camp and were shipped by truck in charge of a government attendant. He was met at Newboro by R.L. Wright and G.B. Wilkinson, who superintended the placing of the fry at the most advantageous points in the lake.

• • •

At a meeting of the Boys' Work Board for Grenville-Dundas, held last week at Brinston, arrangements were made to hold a boys' camp on Broder Island, near Morrisburg, on July 4 to 11, and to follow this with a girls' camp from July 11 to 18. These camps have become very popular and much good has been accomplished for those who attend them.

• • •

Surviving her father by less than three months, Miss Gertrude Gibbens, daughter of William Gibbens, late editor and publisher of The Cornwall Standard, died suddenly at Hotel Dieu Hospital, Cornwall, early Tuesday. Miss Gibbens was apparently in her usual health when she returned to Cornwall Saturday having spent a few weeks in Newburgh, N.Y., and New York City. She became ill Sunday morning. Her condition became worse and she was taken to the hospital early Monday evening, where she passed away a few hours later.

• • •

According to reports reaching this office, the flower-thief is again active in Morrisburg. The village has been free from this class of petty stealing for years, at least so far as our knowledge is concerned, and it is just possible that if the offender was fully conscious of his meanness apart from being liable to punishment by law, he would feel that he is not amply rewarded for the disturbance he causes to his fellow citizens. The offender should take into consideration that the flowers were placed in the garden with a view to beautifying the premises; that the destruction caused by a thief stepping into a flower bed and destroying that which represents much of the owner's time and energy is the cause of more worry than is the loss of the actual value of the flower, which is the offender's reward. Local authorities are asked to cooperate with the citizens in stamping out this class of offender.

MORRISBURG PUBLIC SCHOOL

Report for April. No. enrolled 220; average daily attendance 209; percentage attendance 96.

Room A, Sr. 1V Class—Irene Warring, Stuart Martin, George Williams, Margaret Mellan, Mildred Wereley, Lois Helmer, Aldema Phillips, Marguerite Clark, Marjorie Warring, Greta Casselman, Leo Gauthier, Vaudrey Mattice, Dorothy Barkley, Phyllis Deeks, Charles Tuttle, Winnie Duvall, Edith Taylor, Aplin Street, Morris Gauthier, Edith VanAl'en, Jennie Casselman, Minnie Cole, Lillias Stevenson, Brenda Finnie, Paul Laurin, Vernie Duvall, Mary VanAllen, Annie O'Malley, James McIntyre, John Stitt, Donald Beckstead, Eileen Lynch, Cecil Cole, Dannie Locke.

Class D—Evelyn Crober, Neale Dalton, Betty Tuttle, Willie Casselman, Tommy Tindal, Claudine Kerr, Patricia MacIntosh, Lawrence Weagant, Billy Tuttle, Earle Smith.

G.C. CAMPBELL, Teacher.

EDDY LAMOUREUX FATALLY INJURED SATURDAY NIGHT

(Winchester Press)

This community was thrown into a state of intense excitement on Saturday night last about 8 o'clock, when the news was spread that one of the popular young men of Cloverdale district, whose home is about three miles from Winchester, had been killed, and his younger brother so badly injured that he was not expected to survive, in a motor accident.

Edward Lamoureux, aged 20 years and his brother, Felix, aged 15 years sons of Mrs. Eli Lamoureux, of Cloverdale, were driving to town in their buggy. It was about 8 o'clock. They had reached the top of the elevation opposite the home of Mr. Wesley Durant, and had stopped to have a chat with him. They had only proceeded a short distance when a Pontiac Sedan, driven by Mr. Clifford Dann, travelling agent for the Metallic Roofing Co. of Toronto, crashed into them, literally battering the rig into kindling wood. Edward Lamoureux was thrown to the highway and his brother Felix to the side. Strange to say, the driver of the car, and his companion, a Miss Morgan, of Ottawa, escaped unhurt, although the car was badly damaged and the front windshield shattered, much of the glass being found in the rear end of the car. Mr. Dann at once endeavored to render all possible assistance and he was joined by others who came along. Edward was so badly hurt that he could not be moved, but Felix was placed in the Sedan and brought to Winchester to the residence of Dr. McLaughlin, where he was taken in. Telephone messages were sent for assistance, and Dr. Malloch, on his arrival at the scene, had Edward picked up and taken to his home. An examination showed that his body had been terribly broken and bruised, and there was no hope of him surviving, although he was perfectly conscious all the while. Father Robairre, the parish priest at Marionville, was sent for and arrived before the young man passed away, which was within half an hour of his being taken to his home. Felix, who was at Dr. McLaughlin's office, was more fortunate, as he suffered no fractures, although terribly bruised, and it was learned that he was injured internally. Nurse Allan was procured, and his injuries carefully attended to by Dr. McLaughlin, so that he was able to return to his home on Sunday evening, and is now on fair way to recovery.

The recounting of the details of an accident does not in any way tell all that it means to a community.

11.40 A.M.—Sunday School and Adult Classes.
7 P.M.—Sermon, "The Secret of The Strong".

When the news spread that the young man, Lamoureux, had passed away, it was as though a terrible calamity had happened, and though unknown to many, it was felt by all that the loss was a personal one. Everyone was interested and concerned, and to the bereaved mother, grandmother, sisters and brothers is extended the deepest sympathy of the whole community. Reference to the tragedy was made in the local pulpits on Sunday, and the prayers of all were asked on behalf of the afflicted. The young man whose career was so suddenly cut short was, since the death of his father, Eli Lamoureux, some months ago, the main support of his mother and sisters, and on his shoulders fell the burden and responsibility of the farm. He was of exemplary habits and a hard worker, careful in his attention to business, and in every respect an outstanding young man of the community. Hiss loss will be greatly felt, not only in the home, but in the district in which he lived.

Mr. Dann, the driver of the car, did all in his power to render what assistance he could. He came out from Ottawa on a business trip, accompanied by a lady friend. Their intention was to have their supper at Winchester and then, after attending to business, to return to Ottawa. He says that he does not think he was travelling at a greater speed than 35 miles an hour. He did not see the rig until it was too late to avoid striking it, and he did not see the rear lamp. On his arrival at Winchester, he inquired for the police officer, and told his story to Constable Helmer. Provincial Highway Officer Rose of Morrisburg was sent for, and after learning the particulars, he allowed Mr. Dann to return to Ottawa. His investigaton showed that the Lamoureux rig carried a lamp, and the lamp was practically uninjured. The buggy was broken into small parts. The horse, by some miraculous chance, escaped death, although it was cut on the side. It was freed of the buggy and went galloping up the road, but was afterwards caught and cared for.

The funeral of Edward was held Tuesday morning to the Marionville Roman Catholic Church, where Rev. Father Robairre sang the Requiem Mass. Surviving are his mother, four sisters and five brothers.

The Inquest

An inquest into the death of Edward Lamoureux was held in the Town Hall here on Wednesday afternoon by Crown Attorney Harkness of Cornwall, and Dr. McLaughlin, Coroner. Having heard the evidence, the jury rendered the following verdict:

"From the evidence given, Edward Lamoureux met his death by being struck by a car driven by Mr. Dann, while on Highway No. 31, north of Winchester, and the jury wishes to go on record as not being satisfied with the evidence given by Mr. Dann that he did not see the buggy until a few feet from it."

OLD AGE PENSIONS

Following is a list of persons in the Township of Matilda receiving old age pensions:

Andrew W. Sypes, R.R. 1, Iroquois, $20.00.
Margaret Ellen Sypes, R.R. 1, Iroquois, $20.00.

"I'll see if Ella can come"

The very day visitors were coming, Bob Emery's wife caught a bad chill. She tried to keep going, but it was obvious that she would have to go to bed.

"Now don't worry," Bob said, "Ella's only 30 miles away. I'll just get her on the telephone and see if she can't come and help us out."

A few minutes later they had Ella's cheery promise. Once more, in an emergency, Long Distance had proved quick, dependable — and surprisingly inexpensive.
