## *HAPPY CANADA DAY!!*

*from* **FETTERLY'S**

**SERVICE ADVICE**

*Proper maintenance at the proper intervals is absolutely essential to protecting your car or truck. In spite of the extended service intervals that auto makers have been specifying in recent years, there's plenty of good reasons to change your oil and filter every 5000 km along with the following checks:*

- Battery fluid level and cleanliness of terminals
- Windshield washer fluid - ADD "BUG OFF" in Summer
- Coolant levels
- Belts and hoses
- Tire pressure
- All lights
- Power steering fluid level
- Lubricate all chassis grease points
- Lubricate all door hinges and locking mechanisms
- Transmission fluid level
- Differential fluid level
- Windshield wipers

*When your vehicle is up on a hoist it is very easy to check the condition of the tires, exhaust system, shock absorbers and to note any fluid leaks - brake or fuel lines.*

Established 1924
