# The Leader

XXIII, No. 34 MORRISBURG, ONT. FRIDAY, OCT. 16 1925

## Flour and Feed

A good supply is always on hand. We still have old wheat Flour—"The Maple Leaf Brand."

## CORN

The Argentine Corn is superior to last year's, and the price is 50c lower. It is an excellent Poultry Feed.

## POTATOES

Eastern Potatoes—selling at the right price. The New Brunswick crop is 30 per cent. below average, and the States is bidding high for them.

## Eggs and Poultry

We handle both Poultry and Eggs, and are always paying the highest market price.

**The MORRISBURG FEED & PRODUCE Co.**

MORRISBURG, ONT.

## A GRAND COLD BLAST LANTERN

The latest and best. Simple and easy device for raising the globe. Guaranteed not to blow out in the wind. Large Burner—A GREAT LIGHT. Equipped with Flint Glass "Never Break" Globe.—SPLENDID VALUE.

## Perfection Oil Heater

The new model has improvements making it the BEST HEATER ever made.

Patent Locking Flame Spreader insures Clear, Odorless Heat all the time.

Wick and Carrier all in one. Makes rewicking easy and clean.

## ZEBRA STOVE POLISH

Gives an instant polish of great brilliancy. Large size tins at a very low price.

STOVE PIPES, ELBOWS, DAMPERS, STOVE BOARDS, COAL HODS, AT PRICES TO INTEREST YOU

CALL AND SEE FOR YOURSELF

**R. H. BRADFIELD & CO.**

THE HARDWARE STORE—OPPOSITE ST. LAWRENCE HALL

MORRISBURG — ONTARIO

## ASHTON PROPERTY TOTALLY DESTROYED BY FIRE

The Village of Morrisburg suffered another severe loss by fire of unknown origin early Thursday morning, when the property of Mr. R. H. Ashton, situate on the North side of the C. N. R. tracks was totally destroyed. The loss which amounts to approximately $75,000 is only partly covered by insurance.

The fire was first noticed about 12 p.m., by Mr. Martin, night operator at the C. N. R. station. He telephoned Mr. Ashton, who had retired for the night, and told him that his cold storage was on fire. The flames had by this time gained considerable headway at the front of the building. Mr. Ashton called to his family, giving the alarm, after which he put in a call to the local firemen and the fire alarm was sounded. By this time the flames had spread all through the building and the reflection could be seen for miles around. A large number of willing workers were soon on the scene, and succeeded in saving the contents of the dwelling house. The "International Limited" due to arrive at Morrisburg about that time prevented the firemen from laying the hose across the track, with the result that the fire had gained almost uncontrolable headway before the water was turned on. Within about three hours, all the buildings on the south side of the road, were a mass of ruins. The loss includes: Cold Storage building, and plant, installed about ten years ago at a cost of $25,000; about 40 cans of cream and other stored goods; a frame building south of the cold storage; the dwelling house; barns some farm machinery; about 1000 bushels of oats and about 100 tons of hay. To Master Ralph Ashton, who is only 12 years of age, much credit is due for saving all the live stock, with the exception of one calf, one day old.

Owing to the total loss of his farm crop, Mr. Ashton will be forced to sell all his farm stock, and what his future plans will be, he could not say as yet, when interviewed after the fire.

## MR. J. F. CROBAR KILLED AT RAILWAY CROSSING

Mr. James Crobar, aged 54 years, was fataly injured when struck by a freight train at the "Flag" crossing, on Thursday at 6.30 a.m.

Mr. Crobar left his home in Matilda, shortly after six o'clock, and was driving to his work, on the roads at the Head of the Canal. When he reached Flags Crossing, he noticed a freight train approaching, and just ahead of him was a herd of cows, through which he was unable to make his way before the train reached the crossing. The buggy in which he was riding was destroyed, and Mr. Crobar received internal injuries and a broken leg. The horse, having reached just over the rails, was not injured. The train came to a stop, and a member of the crew took charge of the injured man, awaiting the arrival of the local express, which was flagged, and Mr. Crobar was removed to the Cornwall General Hospital. He died half an hour after entering the hospital, but was conscious until death.

The remains were conveyed to his home in Matilda. The funeral will take place Saturday, leaving the house at 1.30 p.m., to Morrisburg United Church. Interment will take place in Fairview Cemetery

He leaves to mourn his loss, his wife, one daughter, Mrs. Evelyn Declare, Rosetown, Sask.; his father, Mr. Harvey Crobar, Cornwall, and one sister, Mrs. Maud Prosser, of Cardinal.

## FERRYMAN DROWNED AT AULTSVILLE

Mr. John Brownell, engaged on the Aultsville Ferry lost his life by drowning in the St. Lawrence on Tuesday. The truck of the Griffith Dairy Co., of Massena, which goes to Berwick daily for cream, was being run on to the scow to be ferried across the river and Mr. Brownell went on ahead of it. It is not known whether he went too close to the edge to avoid being struck and fell in or whether the truck pushed him in, but he went into the river and never came up again, the current being very swift at this point. The driver lost control of the truck owing to the fact that the brakes did not work, and he also went into the river with the truck. The driver came to the surface, however, and managed to get back to the scow. The body of Mr. Brownell was recovered about two hours after the accident.

Mr. Brownell was about 63 years of age. His home is in Louisville Landing. The funeral was held on Thursday at 10.30 a.m. from his late home to St. Matthews Cemetery, Woodlands.

## NOTICE

A grand Liberal Rally will be held in the Liberal Rooms, in the Bradfield Block, on Wednesday, October 21st. Mr. Garnet Anderson, Liberal Candidate for Grenville and Dundas, and Mr. Sam Martin, organizer, will be present for the purpose of organization.

Ladies are cordially invited.

The Committee Rooms will be open to the public, commencing Monday, October 19th.

Chas. W. Marsh, Pres.
Ray Colligan, Sec.

## MORRISBURG CANADIAN CLUB

In the last issue of The Leader, a movement for the formation of a local branch of the Canadian Club was mentioned. Since then it is learned that nearly one hundred citizens have signified their intention of joining the organization, and it is expected that many more will become members when the matter is put before them. It is therefore in a fair way to being launched.

The headquarters of the Club are in Ottawa, with branches throughout Canada from coast to coast. The movement had its incepton several years ago; it is oon-political and non-sectarian, and is designed to bring together periodically the men of each community who are members, who will be afforded an opportunity of hearing prominent speakers on questions of national importance. The meetings are informal, and will be held as is customary at the luncheon or tea hour, when refreshments will be served.

It is essentially a patriotic organization, and has done much to unite the people and foster good citizenship wherever it has been tried.

Mr. George H. Challies is Secretary, and Mr. A. E. Springstead, Treasurer, from whom membership tickets may be obtained. The annual fee is $3 which also covers the cost of the luncheon, of which there will be five.

W. S. CONNOLLY,
ac President.

## GEORGE WELLS KILLED PINNED UNDER TRACTOR

While engaged plowing with a tractor, on a farm near Aultsville, on Tuesday, Mr. George Wells was killed, shortly before five o'clock in the afternoon.

Wells was going through a difficult furrow, when the machine became stalled, and an an attempt to release the tractor, he turned on more gas, with the result that the tractor tipped over, pinning him to the ground. Mr. Robert Styles, who was helping Mr. Wells, sought assistance, but upon returning to the scene of the accident, found that Mr. Wells was dead. Coroner Dr. Locke of Williamsburg was summoned and upon viewing the body, declared an inquest unnecessary.

The funeral was held on Thursday from his late home to Trinity United Church and Cemetery, Aultsville.

## MORRISBURG PUBLIC SCHOOL

No. enrolled 189. Average attendance 175.09. Per cent. attendance 90.26. No. days school was open 21.

# HARVESTING AND STORING POTATOES

## Care in Harvesting and Storing Means Better Returns for This Year's Crop.

BY H. C. MOORE.

The more general adoption by the growers of good cultural practices, such as early planting, closer spacing, use of certified seed, etc., should result in better matured, brighter potatoes of excellent market quality. The advantages, however, of favorable weather and careful growing will be lost if the potatoes are carelessly handled when harvested and stored. The market wants bright, sound, well-graded potatoes. Poorly graded stock showing fork punctures, bruises and other blemishes resulting from careless harvesting and poor storing, causes Ontario growers enormous losses every year. The following suggestions should aid growers in handling the 1925 potato crop so it will market to the best advantage.

HARVESTING.

Delay digging operations until the vines are matured or until they are killed by frost. The tubers separate more easily from dead vines and are less apt to be injured than when the crop is harvested while the vines are still green. Digging operations should be started in sufficient time, however, so that the entire crop can be harvested and stored before freezing weather sets in. Usually the ideal harvesting season is only of a few days duration. This necessitates having sufficient equipment and labor available to shorten the work as much as possible. Every precaution should be taken to avoid field frosted potatoes. No other factor causes more worry and loss to growers, warehouse men and dealers than chilled or frosted potatoes.

As far as possible do the digging on cool clear days when the soil is comparatively dry. Wet soil sticks to the potatoes and often causes them to rot in storage.

Use care in handling the fork and digging machine to prevent injuring the potatoes. It is not uncommon to see many lots of potatoes showing fifty per cent. or more injury resulting from fork pricks, digger cuts and bruises. Such stock keeps poorly in storage, becomes dark colored and is not wanted on any market.

The details of harvesting should be closely supervised. A careless man with a fork can cause the grower a big loss in a short while. Keep the plow of the digging machine deep enough to avoid cutting the potatoes and to carry some soil over the conveyor rack. If the potatoes are bounced along on the bare conveyor chains, they will be bruised. Slow, steady driving of the digger is important in preventing serious bruising of the tubers.

The dug potatoes should be left exposed to the sun and air for a few hours until they are dry and their skins toughen. They should never be left exposed, however, to chilling temperatures. When picking up the potatoes, very effective grading can be done if the badly bruised, ill-shaped and cull stock is left on the ground to be picked up later. Where weather conditions and time permits mechanical sorters can be used in the field to good advantage. Special efforts should be made to eliminate as much as possible of the unmarketable potatoes from the stock that is carried to the storage cellar. This will make for a better looking lot of potatoes when it is later graded to comply with the standard grades.

Pickers should be cautioned against throwing the potatoes into the crates. Serious bruising results from this practice. If the potatoes are hauled to the storehouse in crates or bags instead of in bulk they will be less bruised. In many cases the hardest drubbing that the potato gets in the harvesting-storing operation is over the mechanical grader. The injury done them at this time can be materially lessened if the grader is of the continuous belt type instead of the shaker screen type. Padding the grader hopper with burlap and running the grader moderately slow will help save the skins and will make for brighter colored potatoes.

STORING.

Nothing but sound, dry potatoes relatively free from dirt should be placed in storage. Potatoes that are wet and dirty are likely to heat and rot. Growers and warehouse men should take pains to keep all lots of potatoes that are chilled or frosted out of the warehouse. Such stocks should be kept on the farm.

During the first few weeks of storage potatoes go through a sweating process. Much head and moisture is given off at this time. Windows and doors should be left open nights during mild weather so that the warm moist air can escape. The temperature of the storage cellar should be reduced to forty degrees 4. as quickly as possible.

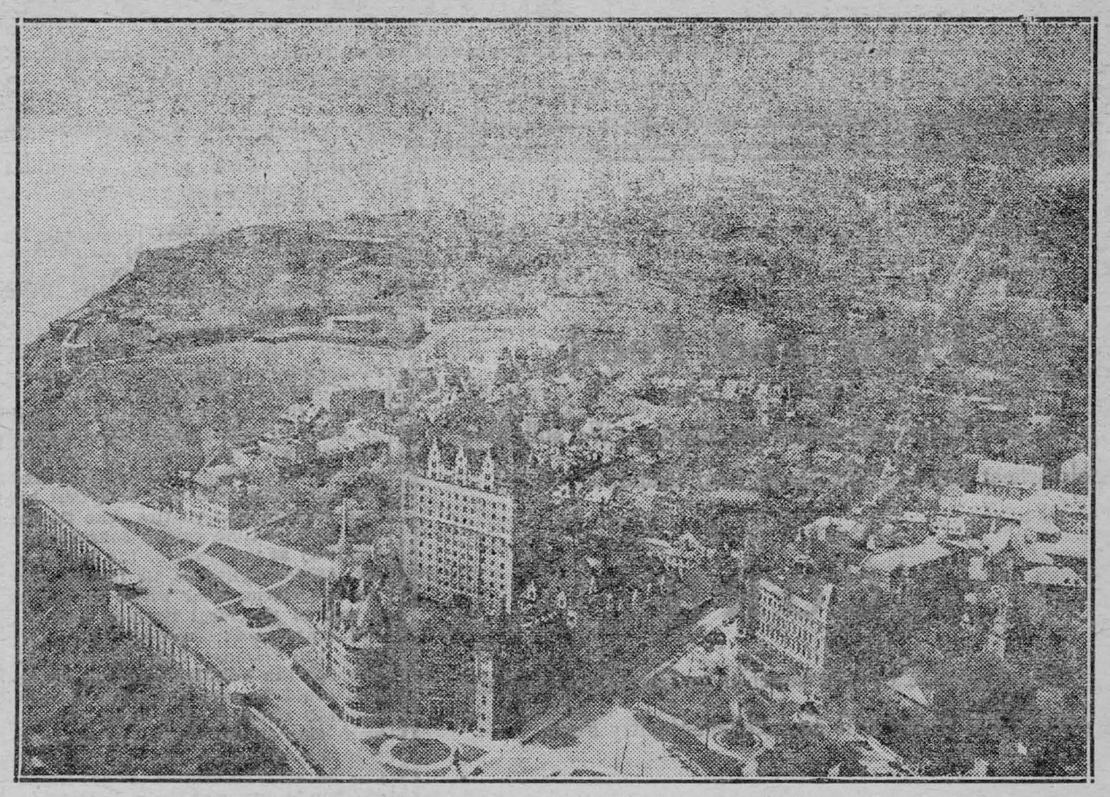

To keep the potatoes in a dormant condition and to prevent wilting and the development of molds and rots a uniform temperature of thirty-five to forty degrees F. should be maintained throughout the winter and spring. High storage temperatures cause a heavy shrinkage in the potatoes. If the temperature is much above forty degrees F. the tubers wilt and sprout during the late winter and spring months. High temperatures also favor the spread of molds and fungous diseases which make the skins of the tubers dark and in some cases causes rotting of the flesh. Temperature much below thirty-five degrees may cause the potatoes to have a sweet taste and darkened flesh. Chilling of the potatoes is apt to take place at temperatures of thirty-two degrees and lower. Store houses should be equipped with reliable thermometers. Many of them now in use in potato cellars are not accurate.

Potatoes in storage require fresh air to keep them in good condition. Lack of fresh air may cause blackening of the flesh (black heart) and surface breakdown (button rot). These conditions were quite common last winter and spring in poorly ventilated cellars and in large bins of potatoes that were not properly aerated.

Some of the better types of storage cellars receive their supply of fresh air through one or two twelve to twenty-four-inch concrete flues at the floor line. The intakes of the flues are generally placed from 50 to 100 feet from the cellar. The flues are placed below the frost line so that the temperature of the air is moderated by the time it reaches the cellar. The fresh air is carried the length of the cellar through ten eighteen-inch channels placed under the bins. The channels are covered with wooden slats spaced so that the air can rise through the bins. Ventilators are placed in the roof which allow the heated moist air to escape. All air flues and ventilators are provided with dampers and the entire ventilation system is under the control of the operator.

Large piles or bins of potatoes should be provided with ventilated division walls spaced at intervals of six or eight feet throughout the piles. These walls can be made of two by six-inch uprights with one by four-inch strips nailed on the edge. A one-inch space should be left between each strip. The ventilator wall should reach from the floor to well above the top of the pile. There should be sufficient air flues and ventilation walls throughout the pile so that no potatoes are farther than four feet from a supply of fresh air. This precaution will help eliminate blackheart, button rot and other forms of breakdown and will make for better quality seed and table stock.

The storage cellar should be kept as dark as possible so the quality of the potatoes will not be impaired. Light causes the potatoes to green and develop a bitter taste.

THE CITY OF QUEBEC AS SEEN FROM THE AIR

The above photo, taken by Fairchild Aerial Surveys Co., of Grand' Mere, Que., gives a splendid birdseye view of the Old City showing the Chateau Frontenac in the foreground, and Dufferin Terrace, the Citadel and the St. Lawrence River winding its way up to Montreal.

### How to Open a Hive.

We never open a hive from the front. The natural home of bees is in a cave or hollow tree, and the idea of an intrusion from the rear seems to take them quite by surprise.

As soon as the cover is gently lifted up, a puff of smoke is blown into the hive, and the bees become completely demoralized and act as they do in any emergency—fill themselves with honey—so as to be ready if it comes to abandoning their home, to take enough with them to make a start in housekeeping elsewhere.

Now, when filled with honey a bee rarely stings, and this, combined with the panic, so breaks up the organized "spirit of the hive" that manipulations are performed with ease and comfort. —H. W. Sanders.

# SIX MINUTES FOR BEAUTY'S SAKE

BY ROCHELL ROGERS.

The country woman who has not a great deal of time to give to the beautifying rites of cold cream and cosmetic aids but who, nevertheless, values a good complexion, will be glad to know of a six-minute beauty treatment many of her city sisters are successfully using at home.

Disfiguring blemishes, coarsened, rough or prematurely wrinkled skin—unless caused by depleted health—will yield to this daily care.

Besides the necessary six minutes, each night and morning, the requisites for this treatment are few—a cleansing cream, a tissue builder, an astringent lotion and a supply of very soft-textured cloths.

Those who know the how and why of complexion care warn against bathing the face with soap and water because of its tendency to roughen and irritate the skin. Instead, cleanse it with a solvent cream that will penetrate the pores and remove the dead oil and other clogging matter.

With the cleansing cream is used a tissue builder, rich in nourishing oils, and also an astringent lotion which, when used in conjunction with the two creams, will discourage wrinkles, shrink the pores, tighten the skin of a double chin and firm the muscles of the face and neck. An astringent that does not have a powder sediment is best, as it may be applied before powdering.

BEGINNING THE TREATMENT.

The beauty of any skin depends upon thorough cleansing before retiring. Powder and rouge, dust and grime, if left on, invite disfigurements and wrinkles.

Begin by pinning a protective towel over the hair. Open the mouth wide. Draw the lips over the teeth, and pull them as far over the edge as they will go. This position holds the skin and muscles firm and taut, and when the pressing motion this treatment calls for is used to apply the cream there is no possibility of breaking down the tissues or making lines in the face. So hold this position throughout the treatment.

Then dip the first two fingers of each hand into cleansing cream. It is not necessary to use a great deal of cream. Very little will do. Hold the fingers stiff, and with a firm, hard pressure—the firmer and harder the better—literally press the cream into the skin, always holding the face as directed.

Press—press! All over the neck and face, except over the eyelids where a very gentle patting is best. Press until the arms ache! The harder the pressure the more cream is absorbed—the greater the stimulation. It is active circulation that causes the pores to throw off the clogging matter dissolved by the cream.

Next, remove the cream, remembering—while holding the mouth open and lips drawn over the teeth—that removing is as important a process as applying the cream. Tissues must not be damaged. Lines must not be rubbed in.

NEVER USE HARSH TOWELS.

With the soft cloth provided for this purpose gently wipe over the eyes and around the nostrils. Lightly wipe the neck, chin, cheeks and forehead, always with an upward and outward stroke. Never dry the face with a harsh towel or bath towel.

Now, the cleansing cream removed, press the tissue builder into the face, which should be tingling by this time. Work this cream well into the skin and let the surplus remain on face and neck overnight. Unless wrinkles are well defined the astringent may be omitted at night.

In the morning—holding the face as directed—press in a very little of the tissue builder and apply the astringent over this. Wipe both off and tamp in a pure face powder. Don't rub; tamp or pat in with a large, clean soft puff. If rouge is needed put it on in a V shape. Begin at the temples and stroke toward the nose, then outward toward the jaw. Blend the edges deftly with the powder puff.

This completes the facial toilet and also protects the skin against the harmful effects of sun, wind and dust.

### Butter and Cheese Output.

The manufacture of creamery butter in Canada in 1924 showed an increase over 1923 in every province excepting Prince Edward Island and New Brunswick, in Nova Scotia by 588,863 lbs., in Quebec by 6,381,860 lbs., in Ontario by 5,181,401 lbs., in Manitoba by 1,902,814 lbs., in Saskatchewan by 2,626,663 lbs., in Alberta by 4,420,035 lbs., and in British Columbia by 710,206 lbs. 1924 was a record year in Canada for the manufacture of dairy butter, being 184,290,908 lbs., over 21,000,000 lbs. in excess of the turnout in 1923. In the produce of factory cheese there was an increase in 1924 compared with 1923 of 234,000 lbs. in Prince Edward Island, of 116,911 lbs. in New Bunswick, of 4,662,823 lbs. in Ontario, of 364,257 lbs. in Manitoba, in Saskatchewan of 20,711 and in British Columbia of 27,453 lbs. Nova Scotia was practically stationary, but there was a decrease in Quebec and Alberta, both of which showed a good increase over the output in 1922.

The true purpose of education is to cherish and unfold the seed of immortality already sown within us; to develop, to their fullest extent, the capacities of every kind with which the God who made us has endowed us. —Mrs. Jameson.

Through a process developed by the department of agriculture, it is now a commercial possibility to keep sweet cider the year round. The process consists essentially of freezing the fresh apple juice, grinding this frozen material, and then, by means of a centrifugal process, separating the essential solids from the frozen water. Five gallons of cider are reduced by this process to one gallon of concentrate.

### The Advantages of Co-Operative Marketing.

Convinced that co-operative marketing based on really sound principles is the best method of marketing poultry and poultry products, the Federal and Provincial Governments of Canada are giving encouragement to this feature of the poultry industry. In a bulletin on the co-operative marketing of poultry products, issued by the Dominion Live Stock Branch, the author enumerates the advantages of the co-operative method. Co-operative poultry and egg marketing associations have already achieved success in the different provinces. They have developed old markets and are finding new ones. They increase the income of the producers by cutting down expenses and obtaining higher prices for standard products. By securing capable and expert management, including a knowledge of the condition and needs of markets far and near, volume can be controlled, making it possible to cater to the exact requirements of different markets and to dispose of marketable goods to the very best advantage. These co-operative marketing organizations are also of great assistance in furthering the efforts of the authorities to standardize products and improve grading and packing methods. The bulletin, which may be obtained free from the Publications Branch, Dept. of Agriculture, Ottawa, tells in detail how to organize, finance and conduct these associations, and gives a great deal of general information on the marketing of poultry and eggs.

The ewe lambs should be supplied with a bone and muscle-making food. It is not advisable to make them fat.

# SIX PERSONS KILLED AT CROSSING NEAR TORONTO WHEN FLYER HITS AUTO

Toronto, Oct. 12.—A 4-year-old baby alone escaped alive when a closed car carrying seven persons was struck by the International Limited at a level crossing just west of Scarboro Junction at 5.15 o'clock last night. Four adults and two children were instantly killed when the car was smashed to fragments, remains of the victims and splinters from the auto being hurled for 150 yards along the track from the crossing. The sole living survivor of the accident, Baby Hilda Mould, is in the Hospital for Sick Children, suffering from concussion of the brain.

Those killed are:

Arthur Nichols, 162 Meagher Ave.

Mrs. Arthur Nichols, 162 Meagher Ave.

Baby Shirley Nichols, 162 Meagher Ave.

Alfred Mould, 1170 Queen St. East.

Mrs. Ethel Mould 1170 Queen St. E.

Ruth Mould, 12, 1170 Queen St. E.

There were no eye-witnesses of the tragedy. The automobile was owned by Nichols and was being driven toward the city. According to residents of the neighborhood the driver must have had a full view of the crossing, while track employees of the Canadian National Railways pointed out that the train, unless the circumstances were most unusual, could be seen 200 yards up the road from the crossing. The manner of the tragedy which almost wiped out two families connected by marriage, must remain unexplained.

Late in the afternoon Nichols telephoned Mould, inviting him and his family to his home for dinner and suggesting an automobile ride. The Mould family accepted. The party went down the Kingston road and crossed over the countryside toward Danforth Ave., when they were struck by the crack train of the C. N. R. The engine was in charge of Thomas Gorman, veteran engineer.

Gorman's fireman observed the automobile as the engine reached the crossing. He shouted to Gorman, who jammed on the brakes. The train was brought to a standstill within its length. Two rear coaches had not passed the crossing when Gorman and members of the crew, along with passengers, rushed to the assistance of the victims. Hon. W. F. Nickle and Dr. Dennis Jordan, Danforth Ave., who were returning from the U. of T.-Queen's football game, were among the passengers.

The automobile, shattered beyond recognition, was lying fifty yards from the crossing. The remains of the victims were scattered along the tracks for 150 yards. Baby Shirley Nichols was lying in its mother's arms. It was badly injured. A short distance off was Hilda Mould. They were treated by Dr. Jordan, Mr. Nickle assisting him. Baby Nichols was handed over to a railway surgeon, but died while on the way to the Hospital for Sick Children. Hilda Mould was brought to the city on the train.

## HEADLIGHTS BLINDED YOUNG DRIVER OF CAR

### Girl Meets Instant Death When Automobile Overturned in Ditch.

Woodstock, Ont., Oct. 11.—Ruby L. Flood, sixteen-year-old daughter of Mr. and Mrs. Harry Flood, Delatre street, is dead and Kent Stevens, son of Dr. J. M. Stevens, this city, is suffering from shock as the result of an automobile fatality which occurred on the Norwich road four miles south of Woodstock last night when the car in which they were riding overturned into the ditch, pinning Stevens, who was driving, underneath, and crushing the life from Miss Flood, whose death is believed to have been instantaneous.

According to Stevens, who is believed to be suffering from internal injuries, two cars were coming north while he was driving south and, at the sharp turn in the road where the accident occurred, he was blinded by the headlights of the first of the approaching cars. Under the impression that the car was about to crash into him head-on, Stevens turned the car sharply to the left, with the result that it overturned in the ditch. An inquest will be held on Tuesday, it was stated by Coroner Dr. MacKay this afternoon.

## AUTOS IN HEAD-ON SMASH AT BRANTFORD

### Two Detroit Men in Hospital as Result With Their Car Held in Charge.

A despatch from Brantford, Ont., says:—Two cars, one small, driven by John Ludlow, rural mail carrier on the Hamilton Road and the other a larger one, driven by Roy Benwell of Detroit, meeting head on, sent two men to the hospital Thursday afternoon. The two are Roy Benwell, Detroit, and Albert Boisseau, also of Detroit, both of whom were in the big car.

The larger car was proceeding east and turned out to pass a load of hay. The other car, driven by the mail carrier was coming west, and they met head on with a crash that threw Ludlow through the windshield onto the road. That he escaped serious injury is considered a miracle. Benwell was held in his car by the steering wheel and was severely injured in the abdomen. Mrs. C. Martin, in Ludlow's car, escaped injury. The Detroit men were held by the police and their car is in charge.

## NUTTING EXPEDITION LOST IN FROZEN NORTH

### Canadian Police on S.S. Arctic Report Fruitless Search in Baffin Land.

A despatch from Montreal says:—"No trace has been found in either Baffin Land or Greenland of the Nutting expedition." This is the message that came over the air from Inspector Wilcox of the Royal Canadian Mounted Police, on board the C.G.S. Arctic, which passed Father Point Thursday morning, returning from its voyage to the Arctic Circle to relieve police posts in that part of the Dominion.

Messages sent out from the broadcasting stations KDKA and WBZ started last Christmas Eve, and the appeal was broadcast every other day for a couple of weeks, giving a description of the Nutting ship, its course, and the places where it was last seen, in the hope that some trace might be found of the ship and its crew. The Nutting expedition sailed on the American yacht Lief Ericson, and was under the command of William Nutting, the other members of the crew being Arthur Hildesbrand, John Todahl and Mr. Fliescher, the latter a Norwegian.

The boat sailed from Norway, and was last heard of on Sept. 8, 1924, when it left Julianhaab, on the southern shore of Greenland, and headed west.

### Watford Pioneer Dies at Age of One Hundred

A despatch from Watford says:—Watford's centenarian, Mary Jane Land, widow of the late John Stapleford and mother of ex-Reeve Sanford Stapleford, died at the residence of her son on Ontario Street at the age of 100 years, 1 month and 20 days. Mrs. Stapleford was born in the Township of Saltfleet, near Hamilton, on Aug. 18, 1825, and was a great-niece of Robert Land, the pioneer founder of the City of Hamilton.

### Picture Canada's Industries for Use in British Press

A despatch from London says:—Arrangements have been made with the Canadian Government Motion Picture Bureau for the supply of photograph prints illustrating the industries—fruit-growing, fishing, manufacturing, mining, etc.—of the Dominion. These prints are now being prepared, and will be available in about six weeks. They will be distributed to the press of Great Britain.

## LONG SEARCH ENDS IN MURDERER'S ARREST

### Officer of R.C.M.P. Captures Pashton in North Country After 18-Month Hunt.

A despatch from Cobalt says:—Nick Pashton, sought by the police for 18 months in connection with a fatal shooting at Island Falls, 43 miles north of Cochrane, has been captured in the country between the end of the Timiskaming & Northern Ontario steel and James Bay, according to a report reaching here from the far North. An officer of the R.C.M.P. is said to have made the arrest.

Pashton was named by a Coroner's jury as the slayer of Joseph Lasalle, about 1.30 p.m., Monday, April 21, 1924. The shooting followed a quarrel the previous day, in which both men and Bert Racicot took part. After the alleged murder Pashton disappeared, and he has not been seen by the police since. He is an expert trapper and well acquainted with the district beyond Island Falls.

### Largest Turbines in World to be Installed in Quebec

Quebec, Oct. 11.—Ten of the largest turbines in the world, with a capacity of 80,000 horsepower each, are to be installed at Chipsaw, Que., near Chute a Caron, where the new Aluminum Corporation of America plants will be ocmpleted by the end of 1926, according to an official statement made at Chute a Caron by E. S. Fiske, Vice-President of the corporation. Some 8,000 men will be employed when the new plants are in operation.

### Original Copy of "Maria Chapdelaine" Destroyed

A despatch from Paris says:—The original copy of Maria Chapdelaine, Louis Hemon's masterpiece, has been destroyed by a mistake, according to a rumor in circulation here. The priceless manuscript had been laid away in the archives of a local library. Some time ago renovation of the building was started and the book was thrown into the furnace by mistake.

### Neck Broken When His Car Plunged Down Bank

A despatch from Orangeville, Ont., says:—While returning from Creemore Tuesday evening, Nelson Lawrence, a well-known cattle buyer of Honeywood, met death when the car he was driving left the road and catapulted down a steep twenty-foot embankment on the River Road near Creemore. His body was found Wednesday morning, his neck was broken. He is survived by his wife and one daughter.

## ELECTRIC FLAMES OUT FROM VICTIM'S FEET

### Wallaceburg Man May Recover From Burns Caused by Contact With Live Wire.

A despatch from Wallaceburg, Ont., says:—John T. Rankin, a local carpenter, had a miraculous escape from death Thursday afternoon while working on the demolition of the old town hall, upon which site will be erected the new Hydro building. He was in the act of throwing over a steel cable to attach it to a chimney, when the cable became entangled in a high voltage Hydro cable, the severe shock knocking Rankin to the ground and rendering him unconscious.

The accident was witnessed by a little girl, who called for assistance, and Provincial Officer W. C. Oliver, who lives close by, was early on the scene and rendered first aid to the victim, from whose feet he found electric flames shooting out.

Several of the injured man's toes, one arm and both hands were very badly burned, and although his condition is serious, it is believed that he will recover. It was some time after the accident that he recovered consciousness.

### Regina's First White Settler Dies of Sleeping Sickness

Regina, Oct. 11.—Succumbing to sleeping sickness at the age of 63, Regina's first white settler, F. M. Crapper, died at the Regina General Hospital this morning, following an illness of one week.

Mr. Crapper arrived in Regina forty-three years ago with the first party of settlers, and camped in a tent on the site of the present city. There were only four in the party. They left Brandon early in the spring of 1882, before the snow had gone, and trekked to the West with ox teams.

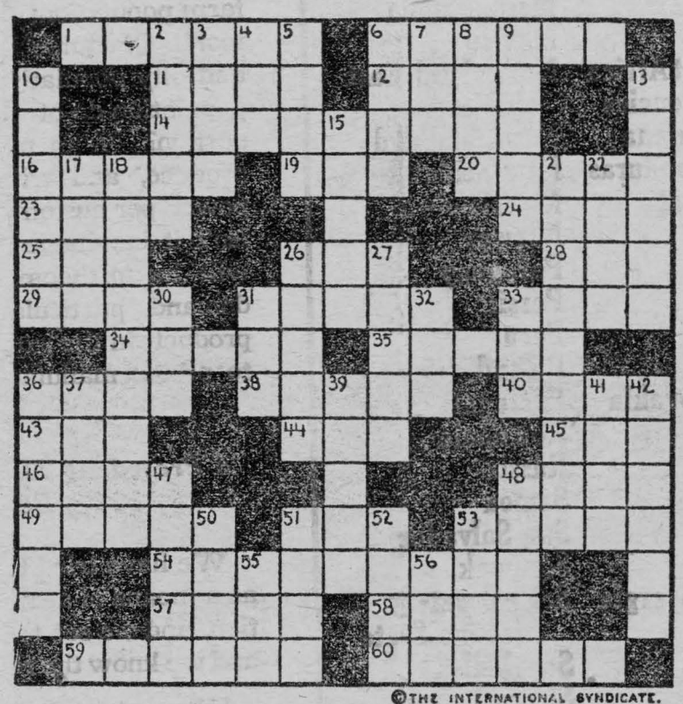

### B.C. Sea Serpents Are Gigantic Eels, Say Indians

Victoria, Oct. 11.—Indians of the Queen Chalotte Islands, off the coast of Northern British Columbia, where "sea serpents" have been reported seen several times this year, have classified the monsters as gigantic eels, according to a report received here by John P. Babcock, Deputy Commissioner of Fisheries.

The eels, according to the Indians, inhabit a slimy, submarine cave at a point on one of the most northerly of the group of islands.

The aborigines say that several years ago they killed one of the fish, which was more than 40 feet long.

## CROSS-WORD PUZZLE

©THE INTERNATIONAL SYNDICATE.

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES

Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

HORIZONTAL

1—One who commands
6—Begin discussion about
11—Cattle
12—Destroy
14—Not to be effaced
16—Small portion of food
19—Portion of tree trunk
20—Upstarts
23—Pointers
24—Jogging pace
25—Poem
26—Gratuity
28—A fish
29—Part of body
31—Lever for foot pressure
33—Cautious
34—Wild beast
35—Ruler of Hades
36—Program
38—Looked attentively
40—Dress trimming
43—Headgear
44—Guided
45—Observe
46—Tumult
48—Actor of eminence
49—Primitive missile
51—Away from
53—Clenched hands
54—Those who vote twice
57—Place in difficulty
58—Notion
59—Sacred to a Roman Goddess
60—Expands

VERTICAL

2—Brief satires
3—Prong
4—Limit
5—Stagger
6—Two-masted vessel
7—Polish
8—Lubricants
9—Concerning
10—A vegetable fibre
13—Piecrust
15—Cared for
17—Military assistant
18—Onlooker
21—Musicians
22—Wild animal
26—Undomesticated

38—Concise sententious expression
37—Hiding place
39—Wild equine animal
41—Flesh
42—Human being
47—Legal name for wronge
48—Fibre for cordage
50—Part of verb "to be"
51—Perceive through touch
52—Masculine name
53—Unrestrained
55—Vegetable
56—Man's name (abbr.)

## CHICAGO STEAL SHOWN IN LOWERING LEVELS

### Figures of Lake Depths Officially Recorded Demonstrate the Danger.

A despatch from Ottawa says:—How serious is the effect of the illegal diversion of Great Lakes water by the Chicago Drainage Canal is shown in the computations by hourly readings from the automatic gauge records of the Canadian Hydrographic Office of the Dept. of Marine and Fisheries for the month of September this year.

For Lake Ontario the readings show the water levels to have been .33 foot lower than in August, 1.07 feet lower than September last year, and 1.44 feet lower than the average stage of September for the last ten years. For Lake Erie the level was 16 foot lower than in August, 1.12 feet lower than September last year, and 1.54 feet lower than the average of September for the last ten years.

The level of Lake Huron was most seriously affected, the September level being .21 foot lower than in August, 1.42 feet lower than in September last year, and 2.39 feet lower than the average of September for the last ten years.

## EXPLORATION SHIP ARRIVES AT QUEBEC

### Captain Bernier Reports the Most Adventurous Trip the "Arctic" Has Experienced.

Quebec, Que., Oct. 11.—The Canadian Government exploration ship Arctic, commanded by Captain J. E. Bernier, arrived here Saturday after one of the most adventurous trips the vessel has ever experienced.

Delayed on her departure from the ancient capital for several days through an accident to the ship's machinery, and then having her radio outfit go back on her when she was under way to the Arctic after she had completed the early stages of her voyage, and had relieved Royal Canadian Mounted Police officers at various stations, was caught in the main pack of the Baffin Bay ice and held there for 14 days, during which she tried desperately to nose her way through the packed floes.

One of the incidents of the outward trip was an accident to Captain Bernier, who was knocked down by a swinging boom during a storm off Greenland, but fortunately he did not suffer any ill-elects, although he is still suffering from bruised ribs. He will, however, go under the X-ray for examination. Latitude 78.46 north was the furthest point reached by the expedition.

### British Hope Prince Will be Pied Piper of Trade

A despatch from London says:—Big business in Great Britain is hoping that the Prince of Wales will prove to be a sort of Pied Piper, with commercial orders instead of children following in his homeward wake across the ocean.

Even before he went to South America there were criticisms in the House of Commons about his being used as a glorified commercial drummer, as well as an ambassador of the empire, and now that he is homeward bound there is a great deal being written and said about the prospects of British trade in Argentina being given a fillip by his visit.

The correspondents who accompanied him there kept their eyes open for trade news and sent home reports as to how and where and why the Germans, Americans, Italians and others were getting more and more export business from South American customers than they might if the British houses tried a little harder to please potential buyers.

### United States Tourists Bring Canada Increased Revenue

A despatch from Ottawa says:—Tourists from the United States brought $150,000,000 in revenue to Canada in 1925, according to estimates of government officials. This sum is equal to a quarter of the value of the Dominion's wheat crop and approximates the values of the annual mining output of Ontario, Quebec and British Columbia combined.

More than 2,000,000 American automobiles, it is estimated, have crossed into Canada already this year. They carried approximately 9,000,000 tourists, or one tourist for every man, woman and child in the Dominion. Every province shared in the tourist business. Ontario received the larger traffic. Last year 1,376,988 cars from the United States entered Ontario, 163,878 of which stayed from two to thirty days, 1,645 from one to six months, and the remainder shorter periods.

Answer to last week's puzzle.

### 60,000 Pilgrims to Lourdes Shrine in Single Day

A despatch from Paris says:—Twenty-seven special trains were required recently to carry the pilgrims of one day to Lourdes, the "miracle town" of France, where the Virgin Mary is said to have appeared to a child in 1858, and where a magnificent church now stands on the supposed site of that apparition. Pilgrims flock thither, hoping for miraculous cures through the intercession of the Virgin.

The day was that of the Nativity of the Virgin, and the number of visitors was estimated at 60,000. The largest group was one of 6,000 from Cambrai, and others were: 3,500 from Rouen; 2,500 from Coutances, which has a population of only 7,000, and 1,100 from Grenoble.

From abroad came 120 pilgrims from England, including fifteen cripples, several of these being Protestants; 1,200 pilgrims from Italy, including 400 sick, and 600 from Portugal, thirty of whom were seeking cures. Each of the French parties brought groups of lame and sick, varying from four hundred to forty.

### Serious Floods Feared in Quebec from Heavy Rainfall

A despatch from Quebec says:—The heavy rain that has been general throughout the Province of Quebec in the past month has given rise to fears of floods in the northern sections. Hunters in the Laurentian Mountains report that the water in lakes and rivers is very high.

## GERMANY DROPS DEMAND FOR PRIVILEGES AS MEMBER OF LEAGUE

A despatch from Locarno says:—Important progress toward the completion of the Rhineland compact was made on Thursday when, as a result of private conversations, the German delegation agreed to proceed to negotiate on a basis of dropping the Reich's demand for special conditions for Germany's entry into the League of Nations, while the League members represented here agreed to support favorably certain proposals which Germany might make as a League member.

This means that Germany has at last seen the impossibility of getting any prior special dispensation for entering the League, and Thursday's development marks the elimination from the Locarno negotiations of an issue which threatened many complications.

What now remains to be done is to work out a program of the proposals which Germany, as a League member, would make. This problem presents difficulties for Dr. Luther and Dr. Stresemann because of the opinions of the Nationalists in Germany.

As Dr. Luther put it this morning to one of the other delegates: "What is necessary now is to find a formula which will be acceptable to the German people."

It is, of course, impossible to say now what will be the League projects which the Germans will ask the Allies to support as League members. One knows what prior conditions the Germans wish—exemption from the duty of giving military aid to the League, and a special regime concerning the right of forces of the League members to cross her territory to protect a member in danger.

Certainly Germany will not get full satisfaction. But since her strongest argument is that a disarmed nation surrounded by armed nations is in a special situation, it may be guessed that disarmament will be linked up with the effort to satisfy the Germans.

## GLEN BECKER

Ploughing is the order of the day.

Mrs. Frank Merkley is visiting her daughter in Brockville this week.

Mr. George W. Reddick of Spencerville was calling on his old neighbors this week.

Mr. Kenneth Froats and Mr. Kenneth Barkley motored to Cornwall on Sunday to see the former's sister who is progressing nicely.

Mr. and Mrs. Dalton Saddlemire and daughters Ruth and Edna were visiting at Mr. Frank Merkley's, Williamsburg, on Sunday.

Mr. and Mrs. Lorne Casselman were visitors at the home of Mr. Merton Saddlemire's on Sunday last

Mrs. Bell Deeks was visiting her neice in Waddington on Sunday.

Mr. and Mrs. Fred Duval of Morrisburg spent Sunday afternoon at the home of Mr. Walter Merkley's

Mr. and Mrs. Walter Saddlemire and baby Jean and Mr. and Mrs. Walter Baker of East Williamsburg, motored to Ottawa and spent the week end with friends there.

Mr. Charles Watson spent Sunday afternoon with Mr. and Mrs. Willis Mattice.

Mr. and Mrs. Gordon Render of Iroquois spent Thursday evening at the latter's parental home here.

Mrs. Willis Mattice is on the sick list. We hope for a speedy recovery.

Mr. and Mrs. Elery Casselman of Dundela were calling at Mr. Stanley Saddlemire's on Sunday.

Mr. and Mrs. George Eligh and daughters Ruby and May, and Mr. Walter Watson of Colquhoun were callers at Mr. Dalton Saddlemire's on Thursday of last week.

THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor)

**"Start a great big immigration movement into Canada, of people not only willing to work but for whom profitable work can be found, and all the pressing problems that now beset our country will be well on the way to solution."**

*—What Everybody Says.*

Fine—let us do so! But to be sure we're on the straight and sure road to our goal, let us begin by doing some clear thinking—some hard thinking—on these two important questions:

**1. What class of immigrants do we want? 2. How are we going to attract them?**

### *Valuable Lessons to be Learned from Past Failures.*

Heretofore we have always taken it for granted—without much careful thought, perhaps—that it was farmer immigrants we most wanted,—people who would settle on our vacant land in the West, and produce more from the soil.

And complaints being loud and numerous that farming in Canada was not as profitable as it should be, we have tried to convert an unattractive situation into an attractive one by lowering the tariff on manufactured goods, in the hope of thereby lowering farm production costs, and so increasing the farmer's net.

Has that plan gotten us anywhere?

In 1924, despite tariff reductions made ostensibly to benefit agriculture, there were actually fewer farm immigrants than in 1923! And when, against the total immigration for 1923 and 1924, we offset the total emigration from our towns and cities, we find that the country has suffered a net loss!

So, obviously there is something wrong—somewhere—in the plan we have been following,—either in the assumption that it is farmers we most want, or in our method of attracting them. Perhaps it's a combination of the two.

### *Population Increases Should be Properly Balanced.*

In shaping our policy as above, we have certainly overlooked one very important point. Farmers as a rule don't sell to farmers, but to town and city folk. So when we try to increase farm population by methods that operate to decrease town and city population, we are actually making things worse for the very people we are trying to benefit. We are curtailing a domestic market that our farmers can control, and we are increasing their dependence upon an export market over which they have no control!

### *An Alternative Plan that Promises Better Success.*

Let us now go back to the beginning again, and start from the alternative assumption that it's primarily town and city population we want to attract.

### *Are 63 Countries Wrong and Only Canada Right?*

**While Canada has been lowering her tariff, these 63 countries have been raising theirs:—**

Algeria
Argentina
Australia
Austria
Belgium
Bolivia
Brazil
British East Africa Dependencies
British Guiana
British Honduras
British West Indies
Bulgaria
Chile
China
Colombia
Czecho-Slovakia
Ecuador
Egypt
Esthonia
Finland
France
Repub. of Georgia
Germany
Gold Coast Colony
Greece
Guatemala
Holland
Honduras
India
Irish Free State
Italy
Japan
Latvia
Luxembourg
Madagascar
Malta
Mesopotamia
Mexico
Netherland East Indies
Newfoundland
New Zealand
Nigeria
Norway
Paraguay
Persia
Peru
Poland
Portugal
Roumania
Russia
Samoa
San Salvador
Sarawak
Serb-Croat-Slovene State
Seychelles
Sierra Leone
South Africa
Spain
Sweden
Switzerland
Tunis
United States
Uruguay

**And now even the United Kingdom has begun to protect her home markets.**

**63 Countries have been making it more difficult for Canada to sell in their markets, while Canada has been making it easier for the whole world to sell in hers!**

**Have they all blundered? Has Canada alone shown wisdom?**

Obviously the way to attract that class is by switching from a policy of lower duties to one of higher duties. The one thing above all others that the immigrant wants is the assurance of a steady job at good wages. Give him that, and he will come in his thousands,—yes, in his tens of thousands! And in a policy of higher tariffs he will have his guarantee that steady work at good wages will be awaiting him.

"Yes," you say, "but what about our farm population? We want it to increase too!" Of course we do! But with town and city population increasing, can farm population do other than increase in proportion? With more customers for farm produce, and with a higher purchasing power per customer due to higher wages, isn't it inevitable that a domestic supply will be forthcoming to meet a domestic demand, particularly if we protect farm products in the same way that we propose to protect manufactured products?

### *A Precedent That Shows What Can Be Done!*

We have tried the plan of lower tariffs, as a means of attracting farmer immigration, and we see that it has signally failed, and we know the reasons why it has failed.

Why not now try the alternative plan of higher tariffs, as a means of attracting urban immigration, when it seems perfectly clear that it must bring farmer immigration in its train?

Even if the latter were mere theory, that would be no valid reason for rejecting it in favor of a policy we have tried, and found to be barren of results.

But we know that it is far beyond the theory stage. The United States offers a practical demonstration of its success! By the plan of higher tariffs, to benefit all classes of population, the United States has managed to attract the biggest and longest sustained immigration movement the world has ever known!

What better example does Canada want?

## WILLIAMSBURG

Mr. Archie Shenmette left last week for Kingston where he will resume his medical course at Queens University.

Mr. Frank Strader spent last Friday with his aunt, Mrs. J. D. Beckstead in honor of her birthday.

Mr. and Mrs. Isaac J. McIntosh and family were guests of Mr. and Mrs. Ora McIntosh one evening last week

Mr. and Mrs. M. O. Trickey spent last week end with the former's brother in Watertown, N.Y.

John E. McIntosh spent last week end in Newington with Sutherland Dickey.

Mrs. Mary Casselman of Sacramento, Cal., arrived last week to spend some time with her mother, Mrs Almeda Casselman who, we regret to learn, is on the sick list.

Miss Muriel Smith spent last week end with the Misses Violet and Elvira Trickey.

Mrs. Brown of Uncle Sams Domain is visiting her mother, Mrs. Jeremiah Lane.

Plowing is the order of the day.

Mr. and Mrs. Ernie Trickey and children were guests at the home of Mr. Isaac J. McIntosh last Sunday.

Guests at the home of Mr. Reuben C. Casselman: Mrs Allen Markell, Mr. and Mrs. Garnet Casselman, Ottawa, Mr. and Mrs. Grant Casselman, Cabruck Centre, Mr. and Mrs. Wesley Fetterly, Farrans Point, Mr. and Mrs. Charlie Rombough and daughter, Helen of Aultsville.

Mrs. Ed. Cameron of Boucks Hill, Mrs. Sophia Starbird, Mr. and Mrs. J. C. Fetterly of Ottawa and Wilbur Garlough were recent guests at Sunny Brook

Mrs. Claude Casselman spent Friday last at the home of Dr. Rose, Avonmore.

Miss Edith Webb and Mr. Joe Webb spent last Thursday afternoon with Mrs. Fay Merkley.

A reception was tendered Mr. and Mrs. Alfred Casselman in Froats Hall last Friday evening by the young people of our village. Numerous were the gifts presented to the newly wedded couple and numerous were the best wishes extended to them. After refreshments were served the evening was spent in games and dancing..

Rev. and Mrs. Dewar spent Monday at the home of Mr M. O. Trickey.

Miss Bessie Rennick of Winchester spent a few days last week with Violet Trickey

Mr. and Mrs. M. O. Trickey spent the week end with friends in Evans Mills and Watertown, N.Y.

Rev C. G. Burgess was a caller in Williamsburg one day last week.

The Rev. Mrs. Smith, Violet and Elena Trickey attended the W.M.S. convention at Inkerman on Thursday, October 15th.

A Hallow'een Social will be held in the basement of the Lutheran Church on Friday evening, October 23rd, at 8 o'clock. Sandwiches, Pie, arts and Coffee will be served and a good program rendered. Admission cents. Everybody welcome. ac

Visitors at the Lutheran Parsonage over the week end were: Mr. and Mrs. Wm. Paesler and Miss Emma Paesler of Ottawa.

Visitors at the home of Mr. and Mrs. Norman Barkley on Wednesday of this week were: Rev. Theo. A. Iseler and family.

## AULTSVILLE

Mrs. W. F. Beach of Newark, N. J. arrived here on Tuesday for her annual visit with friends. At present she is the guest of Mr. and Mrs. G. W. Markell at the old home.

Mr. and Mrs. James VanAllen, West Front, and Mr. and Mrs. S. E. Hanes, town, motored to Lachine, Que., on Friday and spent the week-end with Mr. and Mrs. Jas. Clark.

Rev G. W. and Mrs. Dustan and daughter, Marion, Mrs Dustan and Mrs. Sheets of Gananoque, who are guests at the Trinity United Church Parsonage, motored to Cornwall on Monday.

Mr. and Mrs. George Markell who spent the past three weeks with friends in Belleville and Toronto, arrived home last Tuesday. While in Toronto they were the guests of Mrs. Margaret C. Walker on Shaw St.

Mrs. M. Beckstead is spending some weeks with friends at Grantley

Mrs. Austin Beckstead and son Herbert of Point St. Chas. and Mrs. Wm Weegar of Barrie were guests of Mr. and Mrs. Wm. Baker a couple of days last week.

Mr. and Mrs. S T. Loucks left last Wednesday for their home in Montreal.

Miss Edna Hanes left Sunday p.m. to resume her studies in J. H. S. after spending the week end here at her parental home.

Miss Reta Loucks left on Thursday for Toronto to visit Mr and Mrs. J. McDonald and family and other friends.

Mr. and Mrs. C. S. Ault were in Montreal the first of the week attending the meeting of the Non-Concurring Presbyterian Church.

The Guild of St. Paul's Anglican Church will hold a social evening at the home of Mr. and Mrs. A. McMillan, Station, on Friday evening, Oct. 16th. Everybody welcome. These social evenings, which have been held at the homes of the members every two weeks for the past year are growing in interest and popularity.

The congregation of St. Pauls Church held their annual Thanksgiving Supper in the basement of the Church last Friday evening. There was a large attendance in spite of the inclemency of the weather, almost $100 being the receipts from the supper. The Thanksgiving services were held last Sunday morning in the auditorium of the Church. The Rector, Rev. C. Bender officiated

Rev. G. W. Dustan will preach next Sunday morning October 18 at 11 a.m., to the members of the Womans Missionary Society. All members and friends are invited to be present.

Two fatal accidents occurred here on Tuesday of this week, when Mr. John Brownell of Louisville Landing, one of the ferrymen, was drowned at the wharf, and Mr. George Wells was killed just west of the village, by a tractor which he was operating. Both funerals are being held today, Thursday, Mr. Brownells at 10.30, from his late home, Louisville Landing to St. Matthew's Cemetery, Woodlands, and Mr. Wells at 2.30 p.m. from his late home, Aultsville, to Trinity United Church and cemetery. The sympathy of the community is extended to the bereaved relatives who have been so suddenly bereft.

Mrs. Linden Whittaker of Raymondville, N.Y. spent a couple of days here this week, leaving for home Wednesday p.m. She was accompanied by her father, Mr. Chas. Bush, who will spend the Winter with her.

Mr. and Mrs. Chas. Bowman are moving into A. N. Dafoe's house on Main street.

Mr. and Mrs. J. Joubert of Montreal spent the week end with Misses M. A. Elliott here.

Those attending the S. S. Conference at Iroquois on Wednesday were: Rev. and Mrs. Bender, Mrs. W. Robertson, Mrs. Carl Markell and Miss Annie Elliott.

Miss Dillabough of Chesterville spent a couple of days here with friends this week.

Mr. Wm. Plantz and son William Jr. spent Sunday here with Mrs. Jane Lount.

## GRANTLEY

The people were quite surprised to have a snow storm as early as this.

Mr. and Mrs. Don. Carr and son Claude, Mr. and Mrs. Elburn Carr and daughter Jean spent Sunday with Mr. and Mrs. John Bogart at Chesterville.

Mrs. John Bogart returned to her home at Berwick after spending a few days at her brothers, Milton Carr's where she was confined to her room owing to a severe fall.

Rev. Mr. McClerman, of the Bible Society, took the service here on Sunday, assisted by Rev. Stewart.

Mrs. Ed. Perrault is able to be around again after her recent sickness.

Mr. and Mrs. Alf. Wells and Miss Hazel Wells of Aultsville, Mr. and Mrs. Stanley Wells of Hoasic spent Monday at Milton Carr's also at Temieux, Ont., where Miss Hazel Wells remained to take up her duties.

Visitors at Milton Carr's on Friday: Mr. John Bogart and children of Berwick, Mr. and Mrs. Wm. Servage, Mr. Wm. McPherson, Berwick, Mrs. Peter Droppo and daughter, Cassie and Teresa of Finch.

Mr. and Mrs. Wm. McIntyre of Finch spent Sunday at Mr. Arthur Beckstead's.

Mr. and Mrs. Henry Hanson of Brinston spent Tuesday with the latter's son, Milton Carr.

## WINCHESTER SPRINGS

Mrs. Grant McIntosh of Williamsburg spent a few days at her home here.

The sympathy of this community is extended to Mr. Thomas Nesbitt in the death of his brother, the late Colin Nesbitt of Cornwall on Wednesday.

On Thursday night the barns of Mr. George Kirkwood were totally destroyed by fire.

Quite a number from here attended the anniversary supper and concert in the United Church, Winchester, on Monday night.

The sympathy of this community is extended to Mr. and Mrs. George Kirkwood and family in their recent sad bereavement.

Visitors at the home of Mr. Orren Casselman's on Monday were Mr. and Mrs. Landreville and Mr. Coatie of Ottawa, Mrs. Frank Cross and Mr. T. Durant of Winchester.

Mr. and Mrs. Jack Woods and baby from Washington D.C. and Mrs. Minerva Woods of Wales, Ont. were guests of Mr. and Mrs. Heber McIntosh on Monday evening.

Mr. George R. McIntosh of Williamsburg visited his son Mr. Walter McIntosh on Sunday.

Miss Agnes Whittaker returned to her home at Williamsburg after spending some time as clerk in R. A. Ball's store.

The funeral of the late Mrs. R. Kirkwood was held in the Non-Concurring Presbyterian Church Friday afternoon.

Mr. and Mrs. George Barkley and family of Williamsburg spent Sunday at the latter's home here.

Mr. and Mrs. Wm. Connor of Canton, N.Y., spent a few days visiting friends here.

Miss Euedine Henderson of Oxford Mills is engaged as clerk in R. A. Ball's store

Rev. Mahlon I. Robinson from Iroquois spent Friday at the home of Mr. and Mrs. C. J. Robinson.

Mr. and Mrs. Arnold Casselman spent Friday evening at Toy's Hill.

Visitors at the home of Mr. Orren Casselman on Sunday were:

Mr. and Mrs. A. Lawrence of Spencerville, Mr. and Mrs. Everett Strader of Brinston.

## CEDAR GROVE

Mr. and Mrs. Wm. Myers and Messrs. Harry and Harold Buchanan spent Sunday with their sister Miss Sadie Buchanan at Lisbon, N.Y.

Mr. Robert Dafoe visited Mr. and Mrs. Wm. Wiggins at Madrid on Sunday.

Miss Mabel Wells attended the Teachers' Convention at Cornwall on Thursday and Friday of last week.

Mrs. F. McConnell and Miss Muriel visited Mr. and Mrs. Cecil McConnell at Massena a few days last week.

Mr. James O'Shaughnessy, Aultsville spent Sunday with Mr. and Mrs. Ross Dafoe.

Mr. Murray Myers of the M. C. I. and Miss Nora Myers of the Finch School spent the week end at their parental home here.

Miss Mabel Buchanan spent a couple of days the first of the week with her sister Miss Sadie Buchanan

Mrs. Wm. Dafoe attended the Ladies Aid at Mrs. O. Gallinger's on Wednesday of last week.

Mr. and Mrs. W. A. Wereley attended the funeral of Mr. Wereley's uncle, Mr. Runions at North Field last week.

Mr. and Mrs. Arnold Crites of the 3rd Avenue visited Mr. and Mrs. George Williams on Sunday.

Mr. A. C. Fetterly of Cornwall called on Mr. Frank Dafoe on Friday.

Mr. Jas. Styles of Froatburn and his daughter Mrs. Casselman of Louisville visited Mr. and Mrs. Mason Beckstead on Friday.

Rev. A. W. Stewart of Finch was a caller in the Grove on Monday.

## PAYNE VALLEY

Mrs. Ernest Rombough of Newington spent Thursday with Mrs. Will Meldrum.

Mr. Rob Matheson of Ottawa spent the week end with Mr. and Mrs. J. McIntyre.

A few from here attended the sports at Avonmore on Friday.

Mr. and Mrs. Walter Watson and family of Colquhoun and Mrs. Meredith Garlough, Williamsburg, spent Sunday with Mr. and Mrs. George Eligh.

Mr. and Mrs. Campbell of Avonmore were visiting their son, Mr. Dan Campbell on Sunday.

Miss Ruby Watson, Newington, spent the week end at her home here.

Mr. and Mrs. Samuel Wells and daughters, the Misses Edna and Hilda and Miss Gladys Wells were at Mr. George Eligh's on Friday and attended the High School sports at Avonmore.

Mr. and Mrs. Abe Eligh returned from British Columbia on Monday after spending a couple of months with friends there and in Saskatchewan.

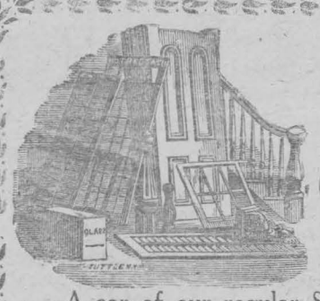

Our teacher Miss Winnie Mulherran spent Thursday and Friday at Cornwall attending the teachers' convention.

Some of our young men have arrived from the west, having gone on the Harvesters' Excursion.

The CANADA ACCIDENT & FIRE ASSURANCE COMPANY has been established nearly forty years and is the oldest Canadian Company transacting all lines of Fire and Casualty Insurance. # Kit Kennedy

BY S. R. CROCKETT.

CHAPTER XLIV.—(Cont'd.)

"I did not expect to find any one except your father," said the schoolmaster, "but I thought I might have the benefit of some conversation with him."

To this Mr. Bisset did not answer. There was the sound of another voice at the door, one anxious and a little querulous. The Lecturer was listening with straying attention, and did not hear Mr. Cathcart's last words.

Presently his wife came to the door of the little parlor.

"Daniel, you are wanted," she said.

The Infidel Lecturer went out and almost immediately returned.

"Mother," he said, quietly, "do not wait up for me. I am needed over in the Grassmarket. I may not be home all night."

"Very well, Daniel," said his wife, evidently accustomed to such an event.

"Will you walk a little way with me, Mr. Kennedy?" said Mr. Bisset, going to the corner to take a great oaken staff in his hand; "we will talk as we go. I am sorry to bid you good-night so soon, Mr. Cathcart, but a sick man wishes to see me. Such things happen even to a pastor without a church, an apostle without a creed!"

He smiled slightly and held out his hand. The schoolmaster took it with an alacrity which was not lost upon Kit. He on his part could do nothing but prepare to obey. He shook hands with Mary, without looking at her, and though there was a slight smile upon her lips, her eyes followed him sympathetically down the stairs. When Kit thought she had gone in he stole one swift glance back, and lo! there she was still, her arms on the rail, looking down on him. Her face lit up quickly as if she were saying, "Tell him!" She waved her hand gracefully and kindly towards him, and somehow Kit went out into the whirling snowstorm strangely comforted. Though he had left the schoolmaster in the little lamp-lit parlor alone with his sweetheart, Kit somehow felt that he had taken the soul of Mary Bisset out with him into the storm.

The Infidel (as Mrs. Christieson most unjustly called him) was wrapped in a huge Inverness cloak of grey frieze, with a collar which stood up about his ears. Kit, who had never possessed a great coat in his life, simply buttoned his stout tweed jacket up to the neck and strode on beside his friend.

It was a strangely altered world into which these two emerged, the first snowstorm of the year, and already it had wrapped all the city in a white clinging mystery. The wind from the north still kept the pavements fairly clean, but a thin and steady drift blew low along them which banked itself deeply at every turning. And there were growing wreaths piling themselves in swirls at the angles of the narrow alleys through which they made their way steadily towards the Grassmarket.

"Now tell me about your father," said Mr. Bisset, kindly.

And Kit told all he knew. He spoke of his grandfather, the ruling Elder in the Kirk-on-the-Hill. He told of his mother's marriage, and of all the unhappiness which came after, of the loss of the Dornal, and the stone-breaking by the roadside. Then, softening the details as much as possible, he told of his first sight of the "Orra Man," of their compact, and how it was carried out. He related the story of the long nights of three winters in the Black Sheds, of the early summer mornings that broke ere they had finished their work, and of all the growing knowledge which had ended in the winning of the First Galloway Bursary.

And as he talked the hand of the Infidel Lecturer fell upon his shoulder and remained there. Daniel Bisset heard Kit to the end and then he spoke.

"We'll make a man of you yet," he said; "but first we must make a man of your father!"

They were crossing the wide space at the higher corner of Candlemaker Row, now tortured and tumultuous with whirling snow. Greyfriars' Bobbie, coated white as he must often have been during his lonely vigils on his master's grave, looked down upon them as they turned down into the dark trench of houses.

"I will think over this and find your father," said Mr. Bisset; "no one can long be hid in this little city, though there are some queer places in it, too. But I can go where the police dare not It is my one privilege. Now, do you turn back!"

"Let me come all the way with you," said Kit, impulsively.

The Lecturer seemed to hesitate a moment.

"Well," he said, "you may see some strange things and observe what you call religion from a new angle. Still, if you wish it you may come. Walk straight after me, and keep your eyes only on that which immediately concerns us."

The two men crossed the white-sheeted causeway of the Grassmarket, and at the further side dived into a dense rabbit warren of houses. But Mr. Bisset did not hesitate a moment. As they went down the steps a policeman turned his lantern into their faces inquiringly.

"Beg pardon, Mr. Bisset," said the man, "I thought it was a pair o' my 'lambs.' It's no a time to be out on pleasure. And them that's in the Grassmarket this nicht has a reason!"

"All right, Fergus," said the Lecturer, "I have a reason!"

"I'll wager that!" answered Constable Fergus, and shut off the light of his lantern with a snap.

"Now take my hand," said Kit's guide; "it is scarce canny walking here."

He went down many steps, and then with equal confidence went up. He passed dark doors and wound round spiral staircases, through whose iron-barred windows the wind whistled and the sparse snow drifted. Halfway up a man opened a door and held a candle into their faces, going in again with a muttered curse of disappointment, and leaving the darkness more complete than ever.

At last Mr. Bisset stopped. He paused a moment as if to listen. But it was as silent within as it was dark without.

A smell of chloride of lime oozed from under the door. Mr. Bisset rapped. A faint light stirred inside, filtering round the ill-fitting frame, and shooting illuminated arrows from latch and keyhole.

A woman stood within barring entrance, a tall gaunt woman with a wisp of grey hair across her brow.

Sullenly and silently she drew back at sight of Mr. Bisset, who passed austerely in as if unconscious of her obvious ill-will. He strode straight along a narrow passage, his great shoulders brushing either wall equally, and Kit followed at his heel.

Both worlds were growing bigger before the First Bursar of the United Galloway Societies.

His guide entered a small kitchen room, clean and carefully tidied up. The tiles of the fireplace had been recently whitened, and the ribs of the grate were blacked and polished. A kettle sang thinly on the hob. There were two closed and curtained beds along one wall, and upon them small heaped mounds told of the sleep of childhood. As Kit stooped one of the heaps moved a little, and he caught the glint of a black eye and a tossed elf lock that fell over a thin inquiring face.

On the other side was a larger bed, also let into the wall and curtained with faded chintz. The latter had been so often washed that the color and pattern were almost indistinguishable. Nevertheless everything was clean as country linen.

A man, small-featured, haggard, hollow of eye and cheek, lay sunkenly on the bed. His thin hand drooped over the coverlet. He had a brush of stubbly grey hair like a dragoon's helmet on top of his head. A shoemaker's bench and stool in a corner betrayed his occupation. His face wore a querulous, almost acrid expression in moments of pain, but at other times a certain unwilling nobility crept into it. There was at least no doubt that things?"

his eyes lit up when they fell upon his visitor.

The cobbler held out his hand, lifting it from the patchwork as if it had been a dead weight.

"Ye hae come!" he said.

"You are very ill, Bartholomew!" said Mr. Bisset, touching the man's wrist lightly, and as it seemed mechanically, in search for his pulse.

"I am going, sir—going to find out!" He smiled as he said it.

"Ah, Bartholomew, I envy you tonight if that be so," said the Lecturer, sadly; "that is the best after all. They have called us Agnostics so long—Know Nothings. You have your chance now to prove them wrong."

"I would not be sorry, sir," said the cobbler, "but for these."

And a slight movement of his hand included his wife and the sleeping children. Kit caught again the restless black eye out of the heaped coverlets in the other bed.

"Don't go hard because o' me, Bartholomew," said the woman, coming to the bedside. "I have kept the poor children from starvation before and I can look after them again, praise God. It will be better telling you now to think of your immortal soul."

She cast a savage glance at the Lecturer, which, however, seemed to be absorbed by the mild persistence of his blance.

"To be faithful, honest, diligent, owing no man anything—these are no bad recommendations to any true God," said Mr. Bisset, gently, "and Bartholomew need not fear to meet such an One on his journeyings."

"Be soft with her, sir," murmured Bartholomew the cobbler, "ours is the sterner, the more barren creed. It is not fit for her; she is a woman."

"It is best so," said Mr. Bisset. "I would not have it otherwise. Let every man be fully persuaded, did not the Tarsan say?"

"Who is this young man?" said the cobbler, looking across at Kit with a strange look. It was as if death were in speech with life, one world hailing another.

"He is a young student who lives beside me; I brought him to talk to on the way. It is a very stormy night."

The dying man smiled.

"Aye," he said; "I wonder if in half an hour I shall be looking down on the house-tops? It is a rough night to be going so far."

As he grew feebler he motioned the Lecturer nearer to his lips. And Kit, seeing that they wished to speak privately together, moved over to a scrubbed white-wood chair by the side of the bed where he had twice seen the black beady eyes and the tangled elf locks.

Kit had a penny in his pocket. He took it out and stealthily held it on the edge of the mattress. There were two black eyes watching him now. The tall woman moved gauntly and mechanically athwart the fireplace, and rubbed a brass knob here and a piece of iron there. Kit held the penny a little higher. A hand almost like the beak of a bird shot out from under the torn blankets and pecked it away.

"Yes, Bartholomew," Kit could hear the voice of the Lecturer, "she shall be cared for. We of the Many Minds are poor, and it would not be well for her to be among us, at any rate. But I know a man———"

"What, not a minister?" cried the voice of the cobbler. "No minister would trouble himself with the widow of a dead unbeliever."

"You are no unbeliever, Bartholomew. Only fools are unbelievers. And, at any rate, Alexander Strong would not care what you were. I promise you your wife and bairns shall not want."

Mr. Bisset rose.

"You are right," said the cobbler, his eye painfully bright. "Let there be no farewells on the platform when the train goes out into the night. It is better so. Good-bye, sir. Wife, see that the children are covered. It is a bitter blast outside. And I want you to lie down. You must be tired. I am going to turn my face to the wall. I must try to sleep."

And as Kit followed Mr. Bisset out he looked back. The cobbler had already turned his frail body away from them. The gaunt and silent wife was arranging his pillow gently, and from the bed on the other side Kit caught sight of the dark head of a girl of eight. The penny was fitted into one of her eye sockets, and she was regarding him with a haughty and even indignant stare.

(To be continued.)

# "No – I've not boiled any garments since"

"A friend suggested that I stop boiling the clothes I washed and try Rinso, which I did, with such delightful results that I have not boiled any garments since then.

"I found that Rinso is excellent for removing finger prints from white paint and for washing all woodwork.

"It has cut my house cleaning troubles in half and consequently I felt that it was only your due to know that Rinso has a much bigger work to do in our house than just to clean the dirt from our laundry."

The makers of Rinso receive many such letters as this. For Rinso not only does the family wash merely by soaking—it is also excellent for many household duties, such as cleaning woodwork, scrubbing floors, etc. Order Rinso today.

## CLIPSE FASHIONS

Exclusive Patterns by H. Cecil Baynes

SIMPLICITY WITH DEMURE NOTE.

A demure note marks the simplicity of design in the newer frocks for the juniors, although a sophisticated tendency appears in the application of patch pockets and button trimming. Both long and short sleeves are sponsored and high necks with round collars are universal. Perhaps the most interesting feature of the frock in View A, lies in the inverted plait at the centre back contributing to the desire for more fulness. View B shows this plait at the back omitted, as well as the trimming at the front and the patch pockets. The diagram shows the simple design of pattern No. 1189, which is in sizes 4, 6, 8, 10 and 12 years. Size 8 years requires 2⅜ yards of 32-inch, or 2⅛ yards of 36-inch material. Price 20 cents.

The garments illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Keep Minard's Liniment in the house.

### Sentence Sermons.

Sooner or later—The doctor will be paid for keeping us well, not getting us well.

—Cities will begin building manhood first and factories next.

—We will discover how mean a sin race prejudice is.

—Every employer will discover that cheap help is always expensive help.

—The wise man discovers the uselessness of pretense.

—The braggart gets his due reward.

—Every man has to pay the high cost of low living.

### Meals for Sponges.

One of the hardest things to believe is that the sponge you use daily was once an animal, and not a vegetable growth of the ocean. Sponges live their lives, and eat food as other animals do.

The separate existence of a sponge begins with the breaking away from the parent of a tiny particle. The latter, after being whirled about for a time by tides and currents, eventually attaches itself to a piece of rock, and from that home it seeks its own livelihood.

The food of infant sponges consists of yelk cells, which contain a form of nourishment. Later, as the sponge grows, it requires something more solid, and this is brought by the currents, which sweep into a bag—half-mouth, half-stomach—minute particles of the new food.

### Magic.

Yesterday—a row of solemn trees,
Proud and green and high;
To-day—a row of golden spires
Against the evening sky.

Yesterday—six poplars slim,
Standing straight and true;
To-day—six wondrous torches
Blaze into the blue.

—G. M. L.

### Curse of Scotland.

Amongst old whist players the nine of diamonds is often spoken of as the "curse of Scotland." It is probably a corruption of the phrase "Cross of Scotland." The nine "pips" on the card were formerly printed in the shape of a St. Andrew's Cross.

More than one-half of the gold marketed every year is produced within the bounds of the British Empire.

### Germs Against Germs.

Malaria germs are bad, but paralysis germs are worse, and the two kinds hate each other. As between two evils, the lesser is preferable, so Professor Wagner-Jauregg, of Berlin, has found he can save patients from progressive brain paralysis by dosing them with malaria. After the malaria germs have killed all the paralysis germs the professor drugs the victors. The medical profession is, indeed, becoming more and more a matter of bacteriology.

Minard's Liniment used by Physicians.

For leaving a newspaper lying on the grass in a London park a man was prosecuted by the L.C.C. and fined five shillings.

What does Upper Cylinder Lubrication Mean to the Motorist?

It means elimination of carbon, friction and knocking, mileage increased 15 to 25%, longer life to engine, more efficiency and repairs reduced 50%. This Lubrication can only be obtained by using Miracle Oil. Miracle Oil Sales, 64 Richmond St. E., Toronto 2.

The Right Way to Boil Potatoes

Put the potatoes in an SMP Enameled Potato Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off *all* the boiling water through the strainer spout. No danger of steam scalding the hands because the handle securely locks the cover on. If your family uses potatoes, you require one of these.

## Sherlock and "Sir Sherlock."

It is almost certain that no character in fiction created by a living author has become so internationally familiar as Sherlock Holmes, the great detective. Sir Arthur Conan Doyle, in his recent very interesting book of reminiscences, Memories and Adventures, relates how, shortly after he had been knighted,—on account of quite another literary work,—he received a bill from a tradesman that was correct and businesslike in every detail save that it was made out to "Sir Sherlock Holmes."

"I hope I can stand a joke as well as my neighbors," records Sir Arthur, "but this particular piece of humor seemed rather misapplied, and I wrote sharply upon the subject. In response to my letter there arrived at my hotel a very repentant clerk, who expressed his sorrow at the incident, but kept on repeating the phrase, 'I assure you, sir, that it was bona fide!'

"'What do you mean by bona fide?' I asked.

"'Well, sir,' he replied, 'my mates in the shop told me that you had been knighted, and that when a man was knighted he changed his name, a that you had taken that one.'

"I need not say that my annoyan vanished, and that I laughed as hea ily as his pals were probably doi round the corner."

A party of French schoolboys vis ing London asked as the first of t sights that they wished to be sho the Baker Street lodgings of the grea Sherlock Holmes; but they could n be gratified, since Conan Doyle h always discreetly declined to identi the building. In South America She lock is so well known that a conve ient new word, based upon his nam has been added to the language clever bits of offhand deduction a now tersely defined there as "sherlock holmitos."

Letters in praise of Sherloc Holmes or propounding problems fo Sherlock Holmes's creator to solv reached him from the four corners o the world, including the Samoan Is lands. Robert Louis Stevenson wrot to him from Vailima.

"He had been retailing some of my Sherlock Holmes yarns to his native servants,—I should not have thought that he needed to draw upon anyone else,—and he complained to me in a comical letter of the difficulty of telling a story when you had to halt every moment to explain what a railway was, what an engineer was, and so forth. He got the story across in spite of all difficulties, and, said he, 'If you could have seen the bright, feverish eyes of Simite, you would have tasted glory!'"

Simite and his comrades accepted all the tales as literally true; they could not be convinced that any story was merely a feat of fancy. But to many more sophisticated admirers the superdetective is little less real—and certainly if he is not true he ought to be!

## Secrets of the Snows.

This summer has witnessed one of the greatest exploits of mountaineering ever recorded—the conquest of Mount Logan, the highest peak in Canada, which rises to a height of ever 19,000 feet.

The Canadian Alpine Club expedition, which triumphed over all obstacles and reached the summit of Mount Logan, originally consisted of eight members, but two of them had to abandon the attempt because of frost-bite and general exhaustion before attaining their goal.

Almost incredible hardships were suffered by the conquerors of Mount Logan, who spent forty-four days entirely on ice in getting to the summit and back again. Each man of the party had to pack about seventy pounds over two hundred miles of ridge and glacier. Dangerous storms were encountered, especially on the return journey, and only the most heroic efforts averted loss of life.

On the last lap of the ascent, when the party reached what they believed to be the highest point of the mountain, they found yet another peak towering above them. To attain this they had to descend a thousand feet into a valley between the two peaks before again beginning to climb.

This final peak was heart-breaking work, as the party had to make progress up a steep snow and ice slope, terminating in a knife area that led to the summit. The temperature when they gained the top was four degrees below zero.

"Leaves" of gold and nickel have now been made by a German scientist, so thin that it would require 2,500,000 of them to measure an inch in thickness.

Increase Poultry Profits by Marketing *Co-operatively*

THE Western Wheat Producers, the Ontario honey men and others, have made co-operative selling a marked success. They have stabilized prices and increased their profits by standardized grading and shipping methods; and applying efficient salesmanship and real merchandising to the disposal of their crops. By these methods the poultry producers, too, can secure these benefits.

The outstanding proof of this is Prince Edward Island, where, for the last thirteen years, expert and efficient salesmanship applied to co-operative marketing, has saved thousands of dollars annually for the poultry farmers and permanently stabilized their markets.

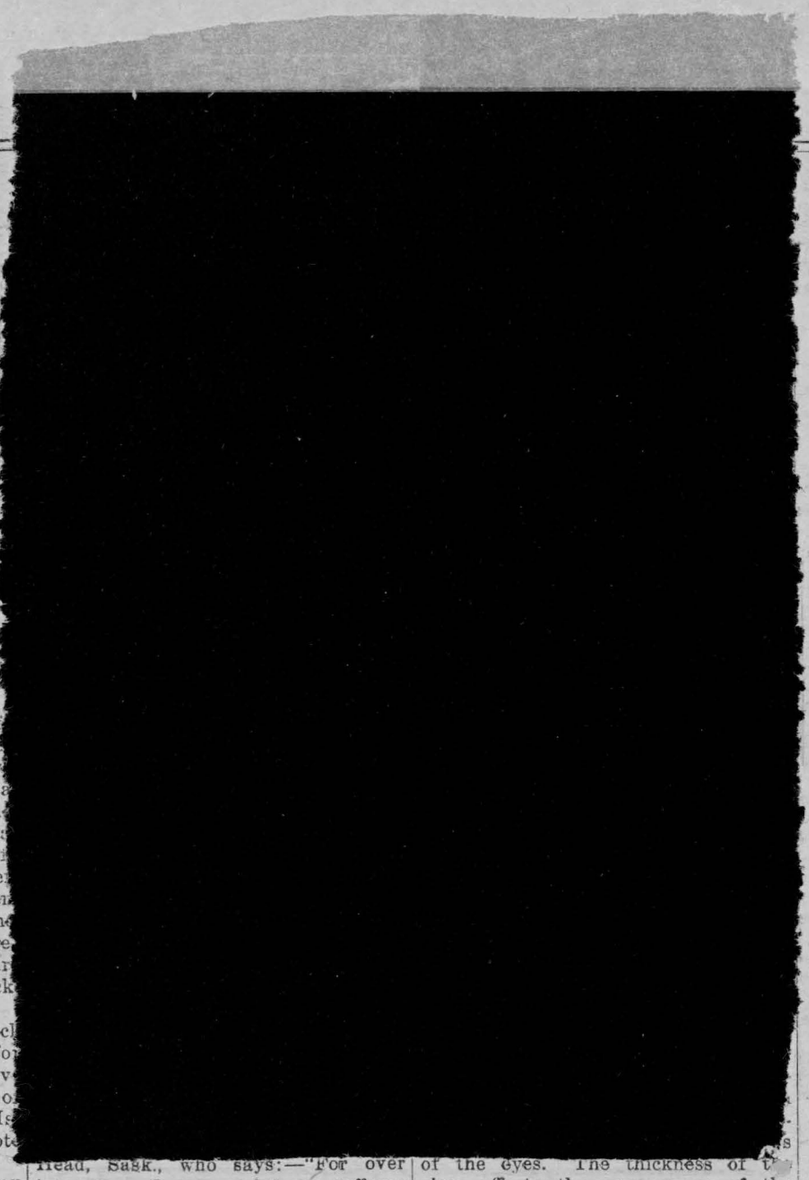

Naturally, to be successful, co-operative marketing must be handled efficiently. How to form and operate successfully a local organization is detailed in the FREE booklet, "Co-operation in Marketing Poultry Products", issued by the Department of Agriculture at Ottawa. This is one of over five hundred helpful pamphlets on farm subjects. To obtain it, together with complete list of FREE pamphlets, fill in this slip, and return it *post free* to

MAKE CARE OF BABIES EASIER

Baby's Own Tablets Are a Great Help to Mothers of Young Children.

Stomach disturbances and constipation are responsible for much of the peevishness of babies. The modern mother does not resort to so-called soothing mixtures but corrects the trouble by sweetening the little stomach and giving a gentle laxative that acts without griping. Such a remedy is found in Baby's Own Tablets, easy to take and guaranteed to be free from opiates or narcotics.

Every mother who tries Baby's Own Tablets becomes enthusiastic about them. Mrs. Oscar Auger, Holyoke, Mass., says:—"I have used Baby's Own Tablets and think them a splendid medicine for constipation and other ailments which affect little ones. I have no hesitation in recommending them to other mothers." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

## Cupid and a Camera.

Dr. C. W. Sanborn, of San Francisco, is not likely to speak well of the camera now that photography has given him the surprise of his life.

According to law reports the doctor had a breach of promise suit for $100,000 brought against him by Miss Beatrice Lichtendorf, a Chicago typist. The doctor had fallen in love with Miss Lichtendorf, but he was a cautious wooer, and to each of the letters he wrote her he appended a postscript requesting her to return the missive after she had read it. This she did.

But she also pursued businesslike methods, and when the doctor declared that he had never proposed marriage to her she produced photographic copies of love letters in some of which he spoke of marriage!

Minard's Liniment for Distemper.

### After Dark.

"William the Conqueror," read the small boy from his history book, "landed in England A.D. 1066."

"What does A.D. stand for?" inquired the teacher.

"Why, 'after dark,' of course," was the reply.

If a boy's hair were left uncut it would never grow as long as the average girl's, as women have a stronger growth of hair than men.

SICKNESS HEALED BY SPIRITUAL MEANS

Christian Science Lecturer Claims No Incurable Disease.

The Christian Science lecture radiocast from Massey Hall, Toronto, gave many an opportunity to hear for the first time something authentic about the subject.

After half a century of growth the claims of Christian Science that spiritual hea'ing is to-day practical is being recognized by material systems of healing and by the older churches. The lecturer, Robert Stanley Ross, of New York, spoke in part as follows:

Christian Science is demonstrating that it is the Christianity of Jesus made practicable to-day. Now, as of old, it is showing mankind how to escape from all evil. No matter how long one has been ill, no matter how deeply one may be involved in sin, no matter how heavy one's burden of sorrow, poverty, or care, Christian Science joyfully points the way out,—not through death and the so-called hereafter, but here and now. The Bible tells us that the kingdom of God, the kingdom of heaven, is at hand, here, now; and that now is the day of salvation; that now are we the sons of God.

All of us know that an ugly disposition (which is a mental state) will manifest itself in harsh, unlovely features (supposedly a physical state); whereas a gentle disposition (which is a mental state) will manifest itself in a smiling and serene countenance. Some one has well said that if fear, irritability, and hate will distort the features, they will distort likewise the heart, stomach, and liver. Why not? Jesus recognized clearly that it is not mere food which disarranges the human system, but fear, sensuality, hate, and other poisonous, destructive beliefs.

Writing on page 248 of Science and Health, Mrs. Eddy says: "Let unselfishness, goodness, mercy, justice, health, holiness, love—the kingdom of heaven—reign within us, and sin, disease, and death will diminish until they finally disappear." All of which indicates that mortals are healthy or unhealthy, happy or unhappy, strong or weak, alive or dead, in the proportion that their thinking is good or bad, spiritual or material. Centuries ago the wise man said: "As he (a man) thinketh in his heart, so he is."

In the sight of infinite Love there are no incurable diseases; there never have been any, there never will be any. The Psalmist knew this when he sang: "Bless the Lord, O my soul, and forget not all his benefits: who forgiveth all thine iniquities; who healeth all thy diseases." Note well that it reads all thine iniquities and all thy diseases, not some of them.

MRS. B. H. HART SICK FOR YEARS

Wants Women to Know How She Was Made Well by Lydia E. Pinkham's Vegetable Compound

Cornwall, Ontario.—"I am now giving your medicine a fair trial and it surely is doing me good and I am going to keep on taking it. I used to feel so tired in the morning that I didn't want to get up, but that feeling is leaving me now. I also sleep better and feel more like working. For seven or eight years I have had headaches, tired feelings, pains in my back and across my body. I read letters in the newspapers saying what good Lydia E. Pinkham's Vegetable Compound had done others. My husband says I quit too soon, but I am not going to stop taking the Vegetable Compound and Lydia E. Pinkham's Blood Medicine until I am better and haven't an ache or a pain. Isn't that the right way? I have great faith in your medicines They must be good when those who take them speak so highly of them. I am recommending them to my friends and I will gladly answer letters from women asking about them."—Mrs. BURT H. HART, Box 1081, Cornwall, Ontario.

Mrs. Hart wants to help other women and is willing to answer letters from sick women asking about the Vegetable Compound. C

All subscription accounts to "The Leader" were sent out about a month ago, to local subscribers. The result has been satisfactory, but there are a number of accounts which remain unsettled. We are therefore compelled to make the announcement that on Monday, November 2nd, all outstanding accounts will be handed in for collection. We trust that our subscribers who are in arrears will realize that any further delay will mean an extra expense to them and a loss to us.

* * *

A circular has been issued from the Post Office Department to the effect that, subject to the approval of the patrons of the rural mail routes, the Postmaster-General will grant to rural mail delivery contractors the following holidays: New Years Day; Good Friday, Victoria Day, Dominion Day, Labor Day, Thanksgiving Day. From time to time requests have been made to grant the contractors in question all statutary holidays; but, owing to the uncertainty that existed as to the views of the patrons of the routes in question, whose number now exceeds 200,000, it was deemed advisable to limit the holidays to those above mentioned. The new regulation goes into effect at once.

## DR. W. A. MUNRO

(Cornwall Standard)

The community was sadly shocked on Monday morning last when it became known that Dr. William Albert Munro, one of the best known and most highly respected physicians of the town, had passed away the previous evening, after a short illness. Dr. Munro was born in Chesterville, seventy-seven years ago, a son of the late William Munro. After completing his education in his home school he entered Toronto University and graduated in 1877 with the degree of M.D., C.M. For a short time he practised his profession at Avonmore and then opened an office in the village of Newington where he continued to practice with marked success for a period of almost 24 years. He came to Cornwall 23 years ago and has since made his home here, having a large and lucrative practice. Dr. Munro was deeply interested in municipal matters and was Reeve of Osnabruck Township for a number of years and as such was a member of the Counties Council. In Cornwall he also showed his interest in the welfare of the town of his adoption and served the ratepayers in various capacities at the Council Board, being honored with the highest position in the gift of the people—the Mayor's chair. As Reeve and Deputy Reeve of Cornwall, he also sat at the Counties Council

The funeral took place on Wednesday afternoon from his late residence corner of Bedford and Second streets to Woodland cemetery and was very largely attended, showing the high esteem in which he was held in the community.

**YOUR CHILD**

Might be the brightest in the class if he were not handicapped by defective vision.

The first duty of every parent is to determine a child's physical assets.

Eyes properly equipped to see will reduce the handicap of defective eyesight, and tends to increase the child's **health and learning** capacity.

An accurate eye examination at frequent intervals is an assurance of keen, comfortable vision.

Be sure your child's eyes are right before starting him to school again, by having them examined.

Make the appointment to-day.
