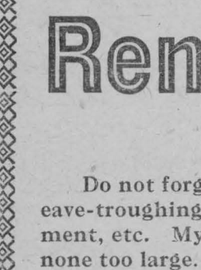
Compound Interest



Suppose a boy of 18 determines to save six dollars a week. At three per cent compound interest he will have on his twenty-fourth birthday $2,037 of which $165 will be interest.

The longer your savings account grows the larger it grows and the faster it grows. Is compound interest helping to make you independent?

934

Double your Savings It CAN be Done."

NOTES AND COMMENTS BY THE EDITOR

Get ready for the elections.

The best place to live is just inside your income.

Be sure and see that your name is on the voters list.

One way to get on your feet is to sell your automobile.

Second-hand cars are never as good as they are painted.

When the fly comes into the house it fogets to wipe its feet. Swat it.

It simply surprising how many places we want to go to while the car is in the repair shop.

We suppose the reason why a Scotchman lover the Sabbath day is because he can keep it.

One hardly gets rid of his winter cold than he has to begin doctoring for the hay fever season.

There are a lot of men in the field of politics who would be better engaged in ploughing the land.

A Winchester woman who is cleaning house says she wishes the hens would stop cackeling and lay carpets.

A road sign reads: "Drive slow; you might meet a fool." A better sign in some instances would be: "Drive slow; two fools might meet."

Babe Ruth is not going to be alone in making home runs this season. Several members of the Ontario Legislature will reach the home plate between now and the end of Jnne.

No, the people have not forgotten that "Last awful night" in the Legislative hall Toronto in 1922. Those who were mixed up with the "wine and women" spree ought to be left at home.

There are 20,000 commercial travellers in Ontario, and one of our merchants was heard to remark the other day that he believed that fully half of them had called on him during the past month.

The Conservative Convention will be held at Winchester Springs, on Monday, May 21st, the Liberal Convention at Chesterville on the 17th, and the U. F. O. Convention has not yet been announced so far as the Press can learn.

Rags make paper.
Paper makes money.
Money makes banks.
Banks make loans.
Loans make poverty, and
Poverty makes rags.

—Parrakeet.

If our young ladies and young men would work in the garden after four o'clock, as they do at baseball and tennis, the high cost of living would be reduced in many homes, the home surrounding made more beautiful, and the boy or girl physically benefitted just as much.

Hon. E. C. Drury, as premier of Ontario, draws a statutory salary of $9,000 a year. His deputy minister receives $4,600, while his secretary is paid $2,550. In addition to the $9.000 the premier's travelling expenses were $750, which is small on account of free railway transportation accorded M. P.'S.

A discussion has broken out afresh as to the reasons for the use of "u" in such words as honour. Sir John A. McDonald gave the best reason, when he had an order-in-council passed making it the rule for the Dominion civil service. He said that the use of the "u" was the British paractice,and Canada is a British country. Surely that is sufficient.—Orillia Packet.

In other words we are honor bound.

A well-known citizen remarked the other day: "Recently I spent a few days in another town, and during that time I never heard anyone say anything but something praiseworthy about the place in which he was living." That spirit of good will, optimism, is the biggest asset a town can possess. It is greater than natural advantages. It will overcome all obstacles, and the town having citizens of this character will stay on the map, and get bigger on the map all the time.

Mr. Casselman, according to some press reports, has been read out of the U.F.O., but most of those who talk this way fail to appreciate the fact that the Dundas member is answerable for his course, not to the Government, or to his fellow members, but to the United Farmers of Dundas who elected him, and who alone have a right to pass upon his record in the House, and upon his stout contention that, sitting though he does on the left of the Chamber, he is still a staunch United Farmer and a representative of agriculture. No outsider has any right to dictate to the U.F.O. in Dundas the attitude they should take toward their member, but it is worth remembering that one of the cardinal principles of the U.F.O. is independence, freedom from the binding fetters of party loyalty that forced men to answer the crack of the party whip no matter what their convictions might be. Loyalty is an essential, but it must be, above all things, loyalty to principles and to the member's constituents. It is the United Farmers of Dundas who will say whether Mr. Casselman has been true to those principles and to the interests of his constituents.—Farmers' Sun.

Elections June 25.

The provincial elections will be held on Monaay 25th, of June, and nominations on 14th, that just gives four weeks to select candidates and get into the fight. Elsewhere the Press gives the date as the 28th which is not correct.

SOCIAL AND PERSONAL JOTTINGS

Dr. and Mrs. Keyes of Ottawa visited here on Saturday.

Mrs. A. B. Hough, of Cornwall, is the guest of Mrs. R. L. Suffel.

Mr. Hubert S. Black of Ottawa, spent the week-end with his parents here.

Mrs. Ray Fraser of Moptreal, sister of Mrs. Weary, is a visitor at the Rectory.

Mr. Douglas Collins, of Governeur, N. Y., is the guest of Miss Tillie Coons.

Mr. H. McKercher of Toronto was a week-end guest at his parental home here.

Miss Stella Reed of Melvin spent the first of the week here with Miss Evelyn Merkley.

Mrs. Wilson, of Montreal, was the guest of Mrs. C. L. Casselman for a few days last week.

Miss Bessie Scott of Ottawa, spent the week-end here with her parents Mr. and Mrs. Wm. Scott.

Mrs. M. Beaton of Westmont, Montreal, spent the week-end with her sister Mrs. McConkey.

Mrs. R. L. Sniffel attended the district meeting of the Rebeccas held at Avonmore on Monday.

Miss Annie Sharpe returned to her school at Oxford after spending the week-end at her home here.

Miss Winonah Reveler returned home Saturday after spending the past month with her sisters in Toronto.

Mr. and Mrs. R. H. Hogoboam of Kemptville, were guests at the home of Mr. John Hogohoam on Sunday.

Mr. Walter Flora, who graduates this year, returned home from attending the Dental College, Toronto last week.

Mr. and Mrs. Sellow, and child, of London, England, arrived here on Friday last, and are with Mrs. Sellow's sister, Mrs. Peter Day.

Messes Mildred Davidson, Greta Earle and Helen Ellis of the Ottawa Normal School were week-end guests at their respective homes here.

Mr. and Mrs. Stanley McDonald and daughter, and Mr. Wm. McDonald, of Maxville, Ont were the guests on Sunday and Monday of Mr. and Mrs. Geo. T. Dixon.

Misses Annie and Emma Sharpe spent Saturday in Ottawa the guest of Mrs. Archer of Port Dalhousie, formerly of Ottawa. Mrs. Archer is visiting her many friends there.

The many friends of Mr. Orville Ault will be pleased to hear that he is slowly regaining his health and expects to be able to be moved this week from his boarding house at Hallville to his father's home at Brinston.

Mrs. Murrey L. Royar wife of Lieutenant Murrey L. Royar S. C. United States Navy, and daughter Mary Anne are visiting Mrs. Royar's parents Mr. and Mrs. James F. McVey.

Dr. McLaughlin went out to Dundela yesterday to attend the funeral of the late Samuel Smith who died suddenly a few days ago. The late Mr. Smith was a well known and highly respected citizen of Matilda, and in late years attended several meetings of the Dundas Experimental Farmers held at Winchester.

The Board of Governors of the Cornwall General Hospital invited Dr. D. O. Alguire and a few friends to the Board Room in the Nurses' Home on Tuesday evening of last week, when they presented the doctor with a handsome silver loving cup and an address of congratulation on his attaining the fiftieth anniversary of his graduation.

A very quiet wedding took place at the Methodist parsonage, Brinston, Wednesday eve., April 25th, when Miss Mae, eldest daughter of Mr. and Mrs. Wm. Moorehead, Dixon Corners and Mr. Harold M. Snider, of Detroit, Mich., formerly of Kingston, were united in marriage by the Rev. W. R. Johnston.

Mrs. R. A. Cheley and Mrs. F. T. Jenkins, of Colorado Springs, are visiting their brothers and sisters in this section. They are daughters of the late W. L. Scott and Mrs. Scott and Were born and spent their early life in this vicinity. Mr. T. A. Scott, Postmaster, is a brother. It is many years since they were in Winchester last, and they see many changes, and miss many faces that familiar to them fifteen and twenty years ago They will spend a number of weeks visiting with their relatives in this section.

Road Contracts Let.

Contracts have been let this weak for a considerable amount of work on the County roads. Contracts for work at Winchester, Inkerman and Toys Hill were awarded to F. M. Eagelson, of Winchester, in all, about 7 miles.

Fire Cracker Danger.

If there is not already a by-law prohibiting the putting off of fire crackers in Winchester, there should be. The town of Ailsa Craig lost several of its best business blocks through a fire started by boys with fire crackers. It is a dangerous practice, dangerous to the children and dangerous to property, and should not be allowed.

Carlyle-McVey

At three o'clock on Wednesday May 2nd, the marriage of Annie Caroline, youngest daughter of Mr. and Mrs. James F. McVey to Kenneth David E. Carlyle, youngest son of Mr. George M. Carlyle of Chesterville, took place quietly at the home of the bride's parents. The ceremony was performed by the Rev. John K. Curtis. The bride who was unattended was given away by her father. The immediate relatives of the bride and groom were present. The bride wore a smart attire of blue canton crepe with lace and corsage bouquet of Sweetheart Roses. The wedding supper was served later, after which Mr. and Mrs. Carlyle left for Toronto. The bride travelled in a Navy Blue Poiret Twill suit with hat to match. The grooms gift to the bride was a beautiful amethyst and pearl pendant. On their return Mr. and Mrs. Carlyle will reside in Dunbar.

LOCAL AND GENERAL NOTES

Have you had your first spring rhubarb pie?

See Cloverdale and Vernon notes on page seven.

The fishing in the Rideau is good if you have the bait.

The road between Winchester and Ottawa is in splendid shape. The roads wintered well.

Not a house, not even an apartment to rent in town. Winchester wants a few new residences.

The barefooted boy has not yet made his appearance, but the straw hat is already in evidence.

The Winchester Citizen's Band has been engaged to go to Iroquois on May 24th for the opening of the dance pavillion there.

J. W. McLeod, M. P. P. for Stormont, was last week unanimously selected as the candidate of the Liberal party in the approaching Provincial elections at the party convention held in Finch.

Read the verses on another page entitled "Silver Jack's Religion." It's something like the religion of some of the ministers and laymen who are writing to the press on the question of Church Union.

Next Sunday morning, Miss Jessie Maxwell, a former resident of Winchester will speak in the Methodist Church on Girls' Work. Miss Maxwell has charge of the C. G. I. T. work in the province of Alberta, and is now taking a month's holidays at the home of her cousins the Misses Bakers of Methodist Street.

The Women's Institute will hold their Annual Meeting on Tuesday, May 15th, in the town hall. We would like all the members to be present, just rest from your house cleaning for one afternoon, and assist in the election of officers and committees for the ensuing year, and enjoy a cup of tea prepared by Mrs. Karl Helmer and her committee. The Roll Call will be answered by the name of your birth month. Arrangements for the District Annual Meeting in June will be made

The Brockville Presbyterial of the Women's Missionary Society will hold their Annual Meeting in the Presbyterian Church Morrisburg, on May 31st and June 1st. First session in the morning. The ladies of Morrisburg extended a cordial invitation to all branches of the Society, and it is hoped that each Auxiliary, Y. W. Auxiliary and Mission Band will be represented. Each pastor is asked to announce the meeting and remember it in prayer at devine Service. Those who attend will have the privilege of hearing Rev. J. A. Mowatt of Honan, China, both on Thursday afternoon and evening.

Interment took place at Woodlands cemetery on Saturday May 5th, of the late Master Kenneth Gibson Stubb's whose death occurred at Winchester on Jany. 5th. Brief service was held at the grave by the Rev. Mr. Sinclair. The floral tributes included, Pillow (Our Kenneth) from Mother, Father and Doris, "Broken Circle" Mr. and Mrs. G. E. Fraser, "Anchor" Mrs. H. S. Gibson, John and Archie, "Spray" Mrs. Silas Cross. Friends from a distance were: Mrs. H. S. Gibson, John Gibson, Archie Gibson, Mr. and Mrs. G. E. Fraser and George Cross all of Winchester.

Trains Are Earlier.

Press readers will do well to bear in mind that the C. P. R. local going to Montreal in the morning, will after Sunday, leave ten minutes earlier, and the local going to Smith's Falls and Perth in the evening, leave an hour earlier.

Leg Broken

Clair Brown had his leg broken on Friday last in a very simple way, and as a result he will be laid up for several weeks. He was drawing earth from the tank holes being made, when he got into a friendly tussel with Geo. Marquette. Mr. Marquette is a very strong and a very heavy man, and in the tussel Mr. Brown went down, and in the falling his leg twisted under him, and the result was a very severe, break at the ankle. The injury was attended to by Dr. McKendry, and he found the bone badly fractured.

Case Dismissed

Ernest Jennack, who was tried before majistrate Cline at Winchester some weeks ago for having set fire to the barn and house belonging to Morris Arcand whose place is in the township of Mountain near the Prescott highway, was tried in the Judges Criminal Court, Cornwall on April 27th and the case was dismissed. None of the witnesses would swear positively that Jennack was the man seen driving a horse and rig in the vicinity of the Arcand home prior to the discovery of the fire, or that the horse he drove was the one he had borrowrd from a brother of the man whose house and barn were burned.

THE NEEDLECRAFT STORE.

The Needlecraft Store announces a demonstration of the Sealing Wax Art, on Saturday afternoon 2 to 5 o'clock. All the leading shades in sealing wax for beads, etc.

Any of the above mentioned embroidered by order. Corticelli Wools in leading shades for summer sweaters; Corticelli Knit-Kraft Sweater Books. Crochet Cottons, Tatting Thread, D.M.C. Embroidery Thread, Artsyl Rope, Embroidery Floss.

IDA F. GARDNER.

Mother and Her Baby Are Relieved of Eczema

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:

"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

DR. CHASE'S OINTMENT

60 Cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto

Cadets Inspection.

On Monday afternoon on the High School campus the Cadets of the Winchester High School were inspected by Capt. V. W. S. Heron, inspecting Captain of this military district in Eastern Ontario. There was a large number of citizens present, and under the direction of their instructor Mr. O. J. A. Henderson Capt. Brown and Lieuts. Dukelow and Steinburg, the cadets were put through their drill, and acquitted themselves in a most creditable manner. Under the tuteleage of Mr. Henderson the Cadets went through their physical exercises, and clearly demonstrated that they were apt and enthusiastic students. Capt Heron congratulated the Cadets and their officers on their splendid showing, and stated that ten of their number would be expected to take in the annual drill at Barrifield Camp this summer. Previons to the inspection at the school the Cadets marched in a body up to the end of St. Lawrence Street, and made a splendid appearance. The boys were then addressed by Dr. McKendry, Chairman of the School Board, J. A. Campbell, an ex-chairman of the board, Reeve Ault, Rev. Mr. Glassford and Mr. J. H. Ross, and were dispersed after three hearty cheers for Capt. Heron, Mr. Henderson and our King. There were a good many citizens present and all seemed delighted with the exercises.

FLOWERS' FOR MOTHER'S DAY.

Order them through Mr. Carl Rice. Phone 9, and you can have roses or Carnations of best quality and reasonable price. Orders taken for all kinds of house and garden plants and satisfaction guaranteed.

Liberal Convention

A Liberal Convention for the purpose of selecting a candidate for the County of Dundas in the coming Provincial Elections will be held in the Music Hall, Chesterville, on Thursday afternoon May 17th, at 1.30 o'clock. All Liberals, ladies and gentlemen, are cordially invited. It is expected that the leader of the Liberal party in the Legislature, Mr. Wellington Hay, will be present as well as other government speakers.

Elma, Ont.

For Sale

A good Milk Wagon. Apply to
52-2p James Algate, Cass Bridge.

Okanagan Co-operative Marketing

It is announced from the Okanagan Valley of British Columbia that a new co-operative marketing organization has been formed which has already signed up for a period of five years, eighty per cent. of the growers and tonnage in the Valley. The growers in the various districts have enthusiastically lent their support and endorsation to the scheme, and many fruit and vegetable growing localities have signed up one hundred per cent. The new organization has completely absorbed all the old co-operative selling societies and will function as the Valley's sole marketing agency for its products.

The innovation is of more than local interest. It may mean the development of the Valley along lines which will put it in a position its fruit-growing abilities justify and from which the problem of marketing has held it back. Those who best understand the situation in the Okanagan Valley and have sympathetically observed its troubles, anticipate considerable benefit accruing from the step, having long realized the necessity of drawing the smaller selling agencies together.

Benefit of New Organization.

The problem of the Okanagan Valley has long been largely a marketing one. The ability of the Valley to produce high grade fruit has been proven and recognized for years and has been attested at various exhibitions where the British Columbia product came into competition with the products of many other parts of the globe. Factors which enter into the situation, however, have developed peculiar difficulties in marketing with which other fruit-growing districts of Canada have not had to contend. Markets are at some distance away and subject to a competition from the south, whilst the business of selling has been complicated and disorganized by the number of agencies engaged in selling the Valley fruit and vegetable products.

The establishment of one large selling organization with the elimination of the many smaller ones gives the Valley a broad and clear survey of its markets as well as absolute control. It will permit the disposition of products as the market is ready to absorb them, obviating the possibility of too much going to any one market at one time. It will bring in its wake the many other benefits of unanimity of control.

Much is expected and anticipated from the new venture. It has long been recognized as a need to remedy a very aggravating situation. The scheme has been carefully planned and thought out and is based on the co-operative measures which have revolutionized marketing in California and proven so successful. The Okanagan apple has begun to make itself known on the overseas market and it is hoped that the new venture will further its popularity in many countries of the globe.

Electric Mummification.

The long-sought art of preserving the human form after death in nearly lifelike aspect, has apparently been achieved in a scientific method developed by an expert embalmer who, as a pioneer in this field, has devoted years of thought and patient investigation to the work. The method not only promises to afford a means of perpetuating the illustrious dead more successfully than the Egyptian mummies, but offers possibilities for the disposition of the dead in sanitary ways that introduce none of the objections of ordinary burial methods nor of cremation. As in many other modern inventions, electricity plays the leading part in the apparatus wherein the body is sterilized and dehydrated beyond the point where the organisms that cause decomposition can exist.

The apparatus, which has been assembled at small cost by the inventor himself, has the outward appearance of a sarcophagus and consists of a chamber which receives a rolling copper table upon which the body is placed. This table forms one terminal for the contact with the body and the other terminal consists of a number of contacts made on the upper surface of the body. When the circuit is closed an electric current passes through the body at many different points, setting up sterilizing action due to the heat produced by the resistance offered by the body, and an electrolytic action that reduces the moisture. It is possible that the sterilization is assisted by the breaking up of saline solutions into chlorine and caustic soda, both active sterilization agents. Electric-resistance units placed below the table in the chamber supply additional heat, and on exhaust fan changes the atmosphere in the chamber at regular intervals. The electric-control devices provide for regulation of the temperature and current by means of red signal lights and an alarm bell as well as recording instruments. The success of the method is attested by experiments performed upon dogs and cats, and by a test upon the body of a man who was the victim of a bullet.

Poplar is Best Target for Lightning Bolts.

A recently published work gives some interesting facts, obtained by careful observation and investigation, concerning the striking of trees by lightning. It appears that the poplar —known in Canada as the Lombardy poplar—is the tree most frequently struck, a fact probably due to its height and form, while the tree which suffers least from the electric fluid is the modest and gentle linden. After the poplar comes the oak, which is next preferred by lightning. Then comes the beech, the birch, the pine and the pitch-fir.

A German scientist had expressed his opinion that trees whose roots sink in a very compact soil are most exposed to lightning, and that owing to the conductibility of the soil the same is true of those the roots of which descend deep into the earth. Observations in several countries did not confirm the theory.

The Nests of Birds: One of Nature's Most Wonderful Secrets. . .

By ELSA G. ALLEN

WE wonder at birds for their migrations; we admire them for their beautiful plumage; we enjoy their strange, sweet music; but we love them for the nests which they build in our gardens; for the bird and its nest, and all the unfailing care which a bird lavishes upon its young, are one of the most appealing chapters in natural history. Whether it be the simplest nest upon the ground or the dainty lichen-covered cup of the huming-bird hidden in a tree, it brings a little thrill to the finder, for he has come upon one of nature's most wonderful secrets.

People have always been interested in birds' nests and have conjectured how birds have come by their varied art. Some have thought that they learned to build their nests by imitation, but the most careful studies of birds point to instinct as the only teacher—instinctly slowly developed and handed down to each species through the ages. Nest building has been a long and gradual growth, the reason for which may be seen in the fact that birds have developed from reptilian ancestors that left their eggs to be hatched by the heat of the sun and decaying vegetation.

Not the Part He Heard.

"I think her singing was very successful in part."

"Couldn't have been the part I heard."

The First Nests.

When birds developed beyond the cold-blooded reptilian stage into warm-blooded animals, they required a constant body temperature above that of their environment; it became necessary for them to keep their eggs, as well as their bodies, at an even temperature. This was best accomplished by the birds sitting upon the eggs, thus supplying them with the heat of their bodies. This gave rise to the need for nests to keep the eggs from rolling about, and to provide a comfortable place to sit during the long, tedious period of incubation.

Not all birds build nests, however. The brush turkeys of New Guinea still resemble their ancestors, the reptiles, in depositing their eggs in the warm sand, leaving them to be hatched by the heat of the sun. Their relatives, the mound birds of Australia, lay their eggs in great piles of earth, leaves and other vegetation which they scratch together, and leave the eggs with only the heat of this decaying mass to hatch them.

Varieties in Building.

Among our American birds there are none which practise this reptilian habit, but every other stage of nest evolution can be found. The whip-poorwill and chuck-will's-widow build no nests at all, but simply deposit their eggs on the ground in the woods. A shallow depression without any lining is the next stage of nest-building; this is represented by the nests of the killdee and other plovers. From this point on, nests become more and more elaborate according to the needs of the young and the intelligence of the builder.

In general, the elaborateness of nests increases with the helplessness of the young upon hatching. Birds which have precocial young, or young which are able to follow their parents as soon as hatched, build crude nests, while those which have altricial young, which are entirely dependent upon their parents for food and protection, build more elaborate nests.

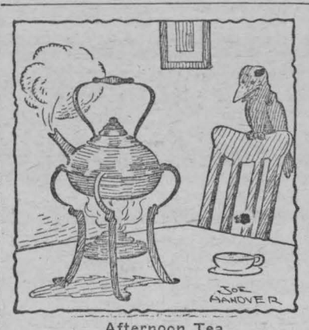
The ruffed grouse, whose chicks are active and alert as soon as they have dried, finds a shallow depression beneath a log or low bush; this she lines with leaves. It is quite suited to her needs, since the nest is not used after the young have hatched.

The Meadow-lark's Home.

The meadow-lark, whose young are hatched naked, blind and helpless, builds a close, warm nest of grasses in the field. She even roofs the nest over to complete its inconspicuousness. A later state in the evolution is represented by such nests as the veery's and the rail's which are built up from the ground.

Of the birds which have sought the bushes and trees for their nests, some build very crude structures showing that they have but recently leveloped a nest-building instinct; others build strong nests truly wonderful in warmth and compactness.

The mourning-dove, for example, makes only a simple platform of sticks slightly hollowed to keep the eggs from rolling out; likewise, the herons, whose nests are so flimsy that the eggs are visible from below. Although these nests are poor, their removal from the ground protects them from the cold, damp earth, from rain and from numerous terrestrial enemies.



Afternoon Tea.

Bird—"That fellow sings only in the afternoons, and not so well at that!"

In constrast to this poor architecture consider the nest of the yellow warbler. It is a cuplike structure woven of cotton, plant-down and horsehair—warm materials which protect the young from cold. Some birds go even a step farther in nest architecture, adding to their well-built homes what has been called "ornamentation."

Humming-birds and wood pewees fasten lichens to the outsides of their nests; wood-thrushes and vireos use bits of paper. This is probably a device to disguise them or to render them less conspicuous rather than to decorate them.

Latest Stage of Development.

The last stage in the development of bird homes is the hanging nest, like that of the Baltimore oriole, carefully woven of strings, horsehair and plant fibres, and concealed in the leafy tip of a branch. By moving away from the centre of the tree the oriole avoids many enemies which otherwise would beset it.

Besides the many kinds of nests on the ground or in bushes and trees, there are a number in holes either in banks or in trees. The kingfisher burrows about three feet into a sand-bank and there deposits its eggs without building a nest. Most of the owls nest in natural cavities, allowing the decayed wood at the bottom of the hole to keep the eggs in place. Woodpeckers drill their own holes; like owls they make no nests, letting the chips cut away by their chisel-like bills serve as nests.

Nests in Holes.

These birds which build no nests in their holes represent a low stage in nest evolution. There are some, however, like the bluebird, chickadee and nuthatch, which build well-formed nests in holes; these represent a much higher stage, since they have probably recently come to a hole-nesting habit after first developing a nest-building instinct.

Another great change has occurred in the cowbirds and the European cuckoo. They have entirely lost their nest-building instincts. These birds deposit their eggs to be hatched and the young to be cared for by the unfortunate foster-parents.

New Electric Conductor.

It is reported that a European inventor uses a column of water instead of an electric wire to transmit electric power. The current passes through the water with the same facility whether the water is in motion or stationary, and can be delivered at any desired frequency, or in more than one phase. Used for drilling granite in Cornwall, England, the special tools designed for the water wave impulses deliver 80 per cent of the generated power, whereas the compressed air tools deliver only 10 per cent.

World's Biggest Newspaper.

A French journal has broken the world's record for both price and size. For only 40 centimes one can buy a morning paper of 232 pages, all solid reading, without advertisements. It is the government's "L'Officiel."

Making it Easy to Understand.

Tough—"Do yer understand meh? Semi-American—"I understand not good English."

Tough—"Well, I ain't givin' yer no good English, am I?"

Flies live as long as five years.

Immigration in 1923

The total immigration to Canada during the month of January, 1923, was 2,602, as against 2,445 in January, 1922, a gain of 6 per cent. and a gain of 2 per cent. when compared with the previous month of December, 1922. The volume of wealth brought into the country by these immigrants was $385,992. After the depressing period of immigration experienced in 1922 even so small an increase is gratifying, and may be taken as presaging somewhat better things for Canadian immigration in 1923. This is more especially so since January's flow entered the country before the Immigration Act was modified, simplifying entry to some extent. For instance, there were 642 rejections of United States citizens at the International Boundary, two more than were admitted, and of these 187 were turned back because they came by indirect passage, and presumably would be permitted to enter now with the removal of this clause from the Act.

There is considerable evidence that this year Canada will see a substantial improvement in immigration, even though the tide to Dominion shores does not approach anything like the magnitude Canada was wont to see in the years before the war and not reach the proportions desired by those who see the remedy for most economic evils in the absorption of more people. The recent modification in the Immigration Act is only one of many evidences of an inclination to gradually broaden regulations and extend the facilities for the entrance of additional population.

It has long been puzzling to comprehend why Canada did not take steps to benefit by the scheme of Empire Settlement whereby the Imperial Government makes the sum of $15,000,000 per annum available for a period of five years and through which Australia has moved so many British settlers to its lands. According to announcement, preliminary action is to be taken to secure such benefits. An appropriation of $600,000 has been provided in the Federal Government estimates for "Advances of grants to immigrants under agreement to be made with the Imperial Government under the Empire Settlement Act." The Deputy Minister of Immigration and Colonization has left for England to take up this matter with the Overseas Settlement Committee, and it is confidently hoped that this is merely an initial step in a more elaborate scheme to take advantage of the benefits of the Imperial offer.

A further indication on the part of the Government to speed up immigration from desirable countries is given in the enlarged appropriations for advertising and lecture work in the United States and Great Britain. The present session of Parliament is considering an expenditure of $100,000 by the Western Canada Colonization Association for advertising purposes in these countries, the avowed object of the association being to settle Western lands. The Soldier Settlement Board at the present time is exhibiting activity in immigration and elaborating on the excellent work it has done for Canadian land settlement.

Certain provincial governments are aggressively going after immigration at the present time, Ontario being noteworthy in this regard. This province took the initiative in seizing upon the advantages of the Empire Settlement Act and in co-operation with the Imperial Government is bringing out parties of settlers from the British Isles, whilst it also has evolved a scheme for the emigration of numbers of 'teen age boys. The spring will also likely see the arrival in Canada of some four hundred young farmers from the Hebrides of Scotland under the auspices of the Ontario Government.

The offer of the Canadian Pacific Railway to assist Canadian farmers in securing farm help by taking advantage of the offers of various European governments who wish to aid the migration of their nationals is apparently appreciated by them. Judging by the number of applications which have resulted, Canada will in the spring and summer months receive a very healthy stream of immigration which will immediately be absorbed in exactly the manner the country most desires and where it will work to the greatest good—bringing those who want farm work to jobs that are waiting for them.

Indications are many that Canada will see a greater volume of selected peoples added to her population this year than last. Though it can hardly be expected that at a bound the magnitude of the pre-war flow can be attained, there is a tendency to increase the flow of immigration, and there is apparently no reason to conclude that the period of depression the country has experienced, or the policy of discouragement it was considered in certain directions advisable to pursue, has killed faith and hope in Canada.

French Cut Forests Ancestors Planted.

By a strange trick of fate the French are now cutting down a forest in the Rhineland which was planted more than a century ago by their ancestors. When during the revolution the Rhine provinces were occupied by French armies they cut down the timber in the privately owned forests of Hansruck, Eifel and Haardt which later became a part of the Reich's holdings.

The French on taking possession of the left bank of the Rhine found it necessary to replant these devastated areas and imported large quantities of Norwegian pines and similar trees from Savole and the Pyrenees. Before the world war the Germans considered cutting down these trees planted by the French, but the forestry experts advised waiting until 1920, when they would be fully matured. According to the best estimates this delay cost the German empire at least 500,000,000 francs.

Hold yourself responsible for a higher standard than is expected of you. Never excuse yourself. Never pity yourself. Be a hard master to yourself—and be lenient to others.

The AUTOMOBILE

MOTORS OFTEN "TINKERED" INTO AN EARLY GRAVE.

A new disease is developing along with the automobile industry. There is evidence to indicate that it has now reached the stage where a warning against its ravages is in order. This malady is known in technical circles as "Tinkeritis." The victim of this complaint is an owner who has a tinkering complex. Often it is overdeveloped and undereducated. In its extreme form it is disastrous to motoring efficiency.

Some men and practically all women who have purchased automobiles own them to use as a means of transportation. Their primary interest is to take the car out of the garage, have it convey them to some definite point, bring them back in due course of time and leave the vehicle in the garage from whence it came. When the machine fails to perform effectively it goes to the service station for what service may be needed. But when the car is out of sight and not needed the owners' minds are given over completely to other matters. These folks are free from the "tinkeritis" germ. Manufacturers of motors have gone to such lengths in perfecting them and making them almost fool-proof that this type of motorist doesn't get on so badly.

SOMETHING TO PLAY WITH.

Other men and practically no women when they buy automobiles undertake to secure not only a medium of locomotion but also a toy—something to play with. They think they can get two things for the price of one. Having a leaning toward mechanical ingenuity, which usually involves the incentive to tinker, they rightly conclude that there are more things about a car that can be tinkered with than any other known form of merchandise.

Perhaps they already have tinkered the phonograph until it murders the musical art of a Caruso. Perhaps they have tinkered the radio outfit so that it continually undertakes to reproduce two concerts at once. They see a much greater scope for their operation in an automobile—before it is completely put out of commission.

Such a person is entitled to his money's worth when he sets out to purchase a toy as well as a vehicle. I say he, because women, seldom being of a tinkering turn of mind, usually are free from all "tinkeritis" contamination. The man, however, wants in an auto not only something to pass away what might otherwise be many dull hours of monotony. Perhaps he seeks a means of recreation and a health-building exercise.

FUNDAMENTAL INFORMATION.

Salesmen for selling cars should look for symptoms of this disease and act accordingly. The buyer may become a liability to the industry's good will if not properly handled. But he should not be condemned absolutely. He needs a treatment which will direct his hobby into constructive channels.

This man has a talent that should find adequate expression. Just as the painter with his artistic genius finds happiness in making his brush and paints produce beauty, so the auto owner, with his natural bent toward things of a mechanical nature, finds joy in giving expression to his desire to tinker.

In order that he may do this without impairing the generally recognized purpose of a car all he needs is a little fundamental information. He should be advised in the first place that all adjustments on his car should be based on an intelligent understanding of basic principles which underlie them. He should be urged to study the machine first and tinker after.

One problem which automobile schools have to deal with continually is to be sure that the students learn enough so that they can tinker intelligently. Another problem includes pointing out carefully and emphatically that there are limits to an owner's capacity and facilities for doing repair work. There are certain things that he cannot do because the tools needed and usually the skill are to be found only in repair ships.

Pat's Solution.

Pat went to the druggist to get an empty bottle. Selecting one, he asked the price,

"Well," said the clerk, "if you want the empty bottle it will cost you five cents, but if you have something put into it, we won't charge anything for the bottle."

"Sure, that fair enough," observed Pat. "Put in a cork."

Different Names.

The star group Usa Major is known in this country as the Great Dipper, in England as the Plough and in Germany as the Wagon.

There are sixty different kinds of psychology and New Thought teaching, but all of them agree on one thing, and that is that right thinking brings right things to us and wrong thinking brings us evil things.

Interesting Items.

Ninety-one periodicals are published by the Salvation Army in forty-eight languages.

Be warned against nursing revengeful thoughts; they are apt to develop sharp stings.

According to figures just published, the output of beet sugar in Canada and the United States for the crop year 1922-23 is estimated at 745,000 tons as compared with 1,102,000 tons in the years 1921-22.

The man who cannot fill his heart with love for his fellow-mortals may fill his pay envelope or his bank account to overflowing, but he still remains a pitiable bankrupt, a lamentable failure.—B. C. Forbes.

In a recent address Sir Basil Thomson, former head of Scotland Yard, said the records show that one person in every 12,000 in the United States commits a murder while in England it is one in each 634,000.

The British Houses of Parliament cover an area of eight acres, and have a river frontage of 940 feet. They contain more than five hundred rooms, and about eighteen residences, the resident population being about two hundred.

Canadian Hydro Development in 1923

The Dominion of Canada, with a total of 18,255,000 horse power available under conditions of ordinary minimum flow and 32,076,000 horse power dependable for at least six months of the year, takes second place to the United States in her possession of available water powers. In the amount of power available per capita of population, the Dominion occupies the second place, following Norway, and fills the same relative position in respect to that country in per capita power development. Canada's water-power development is substantial and in the main adequate to the country's requirements, but by reason of the Dominion's vast available resources, amounts to only seven per cent. of such present recorded water-power resources.

In the past ten years the yearly increment of new power made available has averaged 180,000 horse power. In the year 1922 Canada developed three million horse power of electrical energy from its water powers, considerably over the decade average. This was divided as follows:—Ontario, 1,330,000 h.p.; Quebec, 1,100,000 h.p.; British Columbia, 310,000 h.p.; and the remainder among the other six provinces. It has been estimated by the Federal Water Powers Branch that at the end of the last year the horse-power development in Canada per thousand of population was 337, the total capital invested in development $620,658,731; and the estimated revenue from development $81,600,000.

Increasing Industrial Demands.

The exceptional amount of new power development in 1922 was made necessary by the great demand arising from industrial establishment, and for the same reason, the year 1923 is from all indications to be an outstanding year. The present year promises to make a record in the location of new foreign industries, and new electrical development must keep pace with industrial progress. Canada offers many inducements to manufacturers in other lands to locate within her confines, and one of the greatest is that of cheap and dependable power. Thus the city of Winnipeg has achieved the distinction of providing manufacturers with electrical power at a lower rate than any other city on the continent, and rates throughout Canada can generally be stated to compare very favorably with those of other countries. To maintain this prestige much development will be undertaken in 1923.

Among the larger hydro developments undertaken in the past year or previously, which will be continued in 1923, are the Queenston-Chippewa in Ontario and the Great Falls in Manitoba. The main work of the Queenston project, which is part of the Niagara development, which with its 600,000 horse-power capacity, will be the largest electrical plant in the world, was completed in 1922, but the facilities are to be continually extended to the utilization of the maximum power. The development progressing at Great Falls, on the Winnipeg River, is the largest hydro undertaking west of Niagara, with an ultimate capacity of 168,000 horse power and to cost ten and a half million dollars.

New Development.

A new corporation, financed by American capital, the St. Maurice Power Company Limited, is to develop the Gres Falls and Gabelle Rapids on the St. Maurice River, in Quebec Province, having obtained leasehold power rights to these. The total installed capacity of the development is placed at 120,000 horse power and the capitalization of the company is in the neighborhood of $10,000,000.

Another Quebec development will be undertaken on the Riviere des Prairies where 50,000 horse power of electrical energy is to be developed by the Back River Power Company, at a cost of from six to seven million dollars. The Provincial Government has recently granted a sixty-year lease on the river rights to the company. Through arrangements completed between the Quebec Government and the Quebec Development Company, Canadian and American capital will combine in the building of a great dam at Grand Discharge from Lake St. John, the headwaters of the Saguenay River. With an initial unit of 200,000 horse power it is expected the project will eventually be developed to produce 1,000,000 horse power. Further hydro development in Quebec Province will be accounted for by the Southern Canada Power Company, which is initiating another large power development on the St. Francis River, which will produce 30,000 horse power.

The Great Northern Power Company Ltd. has been organized in Ontario to furnish the gold mining industries of the northern part of the province with power and assist in the general development of the territory. The company has under way the initial unit of a plant on the Montreal River, and it is expected that this first power unit of 2,150 horse power will be ready for distribution early this year.

Further Probable Development.

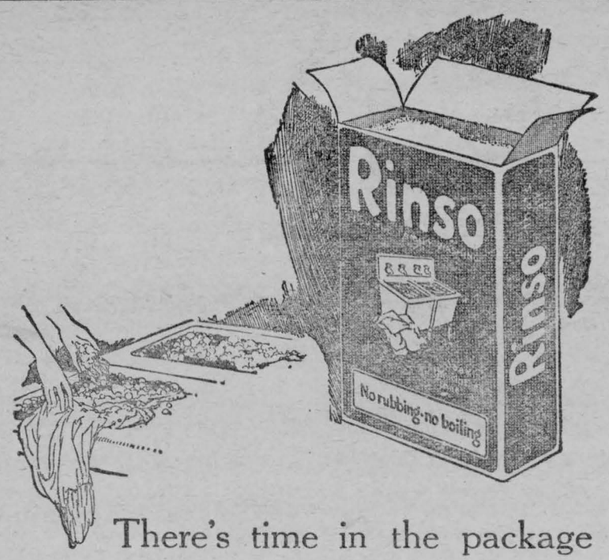
An important project which may materialize, is the development of Great Falls, the largest single water power in New Brunswick. It is estimated that with the minimum expenditure which could be made in harnessing the falls there would be available about 30,000 horse power. By adding storage facilities the power would be increased to 50,000 horse power, and by taking advantage of storage facilities at the headwaters of the St. John, the power output could be increased to 80,000 or 85,000 horse power. Preliminary investigations have been under way by the Provincial Government for some time and the year may see actual development started.

In 1922 large property holdings along the shores of the Gatineau River were acquired by the Hull Electric Company, which intends establishing a hydro-electric power plant this year with an ultimate capacity of 150,000 horse power, the cost of construction of which is estimated at $10,000,000. This is to be completed in two years. In the Province of Alberta there is a proposal by the Alberta Hydro-Electric Company to construct a plant at the Bow River, east of Calgary, to consist of four dams, the first of which will cost half a million dollars.

There are several new power developments projected in the province of British Columbia. Canadian Westinghouse is said to be planning the building of a great power plant at Seaton Lake, to sell power to a proposed pulp and paper plant, and to Seattle power consumers. Contracts have been signed for the installation of a 5,000 horse-power addition to the existing hydro-electric facilities at the Anyox smelter of the Granby Consolidated Mining, Smelting and Power Company, to cost in the neighborhood of $200,000.

While the developments here noted comprise only some of those of which notice was given prior to the conclusion of the past year, and there will doubtless be many more projects initiated in the course of the coming months, they are sufficient to indicate that the year 1923 will be an outstanding one in hydro-electric development. As new electric development means the exhaustion of available supply within sight, the new undertakings on such an extent are a fairly accurate gauge upon which to measure Canada's industrial progress. With such an expansion to electrical power being effected, an unprecedented development of the Dominion's industrial enterprises is confidently anticipated on all sides.

Perfectly well-meaning Old Lady: "Thank you so much for your song, my dear. It took me back to my childhood days on my father's farm. When I shut my eyes and listened to your singing I seemed to hear the dear old gate creaking in the wind."



There's time in the package

Time to do the many things ordinarily put off on wash-day. For Rinso does not keep you standing over the wash-tub, rubbing until your back aches and your hands are red and sore.

Rinso, an entirely different kind of soap, soaks clothes clean. Rubbing and boiling are unnecessary. The big soapy Rinso suds gently loosen the most ground-in dirt without weakening a single thread.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Correcting wrong impressions is one of the most important tasks confronting those who try to do educational work along health lines. Habits and ideas once acquired, however erroneous they may be, are hard to dislodge. The old saying "What's good enough for my forefathers is good enough for me" has upset many teachers. Every once in a while one meets prejudiced people—the type that know better than everybody else. No matter what the subject is—health or otherwise—they cannot be taught. Recently I met a man holding public office who held very skeptical views about the value of health education and the work of Health Departments in general. He did not know any details about the good work of the Health Department in his own city. He knew or pretended to know nothing about the disappearance of typhoid due to water filtration and chlorination, he knew nothing of milk inspection, he knew nothing of the work of the public health nurses in lowering the infant death rate and having physical defects corrected in children, he knew nothing of the Schick test or the value of anti-toxin in diphtheria, he knew nothing about the work carried on in combating venereal disease, nothing about industrial hygiene that is aiming to raise health standards in industry and lower the rate of sickness and accident in plants, factories, and workshops of every description.

None of these things he knew about or appreciated, and yet he was willing to throw cold water on all health efforts. There are many such men and women. They are stumbling blocks everywhere you go. They take up the wrong side of the argument without any reason except prejudice, and why this prejudice has been developed nobody seems to know.

Again, we see the type of individual who puts more confidence in a bottle of medicine than all the health talks or health articles that come his way. He doesn't want to know about the value of sleeping in well ventilated bedrooms. He doesn't want to know about the physical exercises and how they keep the body fit, nor does he care about the proper kinds of food to eat, or the value of a contented, happy outlook on life. What he does from day to day is to go along his own prejudiced paths, disregarding the inevitable consequences of his wrong methods of living, trusting to medicine to put him right when the impending crash comes. How many wrecks of humanity we see around us as a result of such practices. How many untimely deaths occur through neglect of the principles that tend to prolong life!

What is the moral of all this? What is the remedy? It seems to me that one important thing to do is to educate the young, to teach them the little simple facts of health, before they acquire wrong habits or impressions.

With The BOY SCOUTS

Norman J. Leach, Executive Secretary of the Ottawa Boy Scouts Association, sailed for England on April 20th, in order to spend two months studying the latest Boy Scout and Wolf Cub training methods at Gilwell Park, the Imperial Scout Officers' Training Centre. It is of interest to note that Gilwell Park is this year in charge of Mr. Rodney C. Wood, the Dominion Camp Chief of the Boy Scouts Association, he having been granted leave of absence by the Canadian General Council to fill, for a few months, the vacancy created by the absence of Camp Chief Capt. Francis Gidney in the United States.

London, Ont., now boasts fourteen splendid Boy Scout Troops and several newly formed Wolf Cub Packs. Between fifteen and twenty Scoutmasters and Cubmasters are taking part in a special Scout Leaders' Training Course being conducted under the auspices of the London Association. Scoutmaster George F. Metcalfe, of the 8th London Troop is in charge. Assistant Provincial Commissioner Irwin was a recent visitor at one of the classes, which are intensely practical and interesting.

Field Scout Secretary Earle H. Davison, of Provincial Headquarters staff, spent the week of April 16th in the Border Cities, visiting troops and meeting Scout leaders and local committeemen. He reports that excellent progress along all Scout lines has been made in Windsor and the neighboring cities and towns since his last visit in October.

The Canada Cycle and Motor Company, of Weston, Ont., has again announced its annual competition for Cyclist Scouts, but this year three prizes are being offered for competition in every troop participating instead of just one. The purpose of the competitions is to encourage general proficiency in all branches of Scouting, practical application in every day life of Boy Scout training and special proficiency in the subjects of the Cyclist Proficiency Badge tests. Every troop having three or more qualified cyclist Scouts is eligible to take advantage of the Cycle Company's prize offer. Scouts interested should ask their Scoutmasters for particulars.

After many long delays the announcement of the very early publication of The Boy Scout Handbook for Canada has been made and orders are now being accepted at Provincial Headquarters for copies of the book at 70 cents per copy, post free, delivery to be made as soon as the books come from the print shop. The new edition contains a great many revisions from the first edition published during the war and in every way has been brought right up to date.

Imperial Headquarters writes to say that they have a long list of names of English Scouts who want to correspond with Scouts in Canada. Scoutmasters having boys who will agree to exchange letters with Scouts overseas, either in Great Britain or in other parts of the Empire, are asked to send their names and addresses to Provincial Headquarters. This is a fine opportunity for Canadian Scouts to establish interesting friendships.

Well Qualified for Job.

He was an applicant for a position as a street car conductor.

"What are your qualifications for the place?" asked the superintendent."

"I used to work in a sardine packing establishment."

Human speech calls for the exercise of forty-four different muscles.

Minard's Liniment used by Physicians.

The Traveler's Slogan.

The seas beyond the Golden Gate
  Like liquid sapphire run
To coral islands set in foam
  And bright with sand and sun;
The cherry trees of old Japan
  Are whiter than the snow
On Fujiyama's sacred crest—
  Let's go.

The huddled roofs of Hongkong shine
  Like jade beneath the moon,
At Singapore the temple bells
  Boom out in solemn tune.
In all the Burmese women's ears
  Red chips of rubies glow,
Big game still roams in Africa—
  Let's go.

In Paris now the people sip
  Their coffee out of doors,
All night the click of dancing feet
  Is heard on polished floors,
The lilacs scent the misty air,
  Romance glides to and fro
Across the bridges of the Seine—
  Let's go.

In London streets the flower girls
  Display their fragrant wares,
The Thames is gay with punts and skiffs
  Propelled by loving pairs.
In dusky woods the nightingales
  Are fluting sweet and low,
And lanes are pink with hawthorn buds—
  Let's go.

White roads are winding east and west,
  The boundless billow calls
To Moorish palaces in Spain
  And Alpine waterfalls,
To sunrise on the Appian Way,
  The Tiber's turgid flow
And Venice with its long canals—
  Let's go.

The liner's waiting at the pier,
  The plane is ready, too,
And only needs a touch to soar
  To spaces wide and blue.
I hear the panting limited
  Its piercing whistle blow,
The travel itch is in my foot—
  Let's go.

—Minna Irving.

Sargossa Sea Secrets.

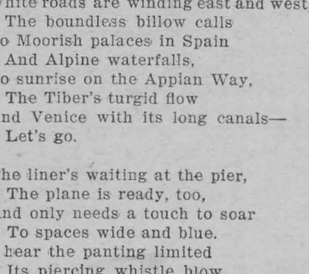
Most people know that the Sargasso Sea consists of an immense mass of seaweed somewhere in the Atlantic Ocean, but few know anything of its nature or why it is there.

Covering an area larger than that of Europe, to the north of the Leeward Islands and southwest of Bermuda, it has been massed together by winds and ocean currents converging to its present position in a great swirl from the Caribbean Sea and the Gulf of Mexico.

After its discovery by Columbus, it was for centuries an object of dread to seamen, whose imaginations called up terrifying tales of ships caught by the weed and held embedded while their crews died of starvation and their timbers rotted.

The fallacy of these stories was demonstrated by a Norwegian expedition of 1910, which found that the weed was not dense, but in scattered patches, incapable of seriously obstructing a vessel.

The Saragasso Sea is not the only one of its kind in existence. There is a similar area of considerable extent in the North Pacific Ocean, and a smaller one south of New Zealand.



Where Many Would Be.

Friend—"Good-bye, old man; but you haven't told me yet what you think of prohibition."

Tourist (boarding ship)—"Oh, about that I'm all at sea!"

The Population of Newfoundland.

The eighth decennial census of Newfoundland and Labrador, which has just been completed, gives the population as 262,979, which compares favorably with the census of 1911, when the total was 242,619, an increase of 20,360 or 8.39 per cent. Of this total, 259,358 represents the population of Newfoundland, and 3,621 Labrador, as against 238,670 and 3,949 respectively in 1911. A gradual increase in population since the official census of 1857 is shown by the report. In that year the population was only 124,288. In 1874 it had increased to 161,374; 1901, 220,984; and 1911, 242,619.

Newfoundland, for census purposes, is divided into eighteen districts, and all of these, with the exception of four, show increased population over the 1911 figures. The four districts to show decreases are Carbonear, Harbor Grace, Port de Grave and Harbor Maine. In the ten-year period ending 1921, the natural increase in population of the ancient colony was 31,347. In addition, immigration totalled 1,242. However, there was a loss of 12,229 due to emigration, leaving a net gain in population of 20,360.

Labrador's Population Declines.

Lack of development in Labrador has been the cause of a steady loss of population since 1884, when the total population was 4,211. Figures for each succeeding ten-year period show a slight decline, and the 1922 census returns record a falling off of 328 from the last report issued in 1911. There was no immigration to Labrador between 1911 and 1921, while there was a loss of 47 due to emigration. The natural increase in population shows a decline of 281, leaving a net loss to the territory of 328 persons.

An analysis of the report shows that while the figures regarding nationality have not yet been checked, there would appear to be 262,475 persons either born or naturalized British subjects in Labrador and Newfoundland, and only 504 persons of other nationalities.

IS THERE A BABY IN YOUR HOME?

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Moise Cadotte, Makamik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

So Sudden.

The ardent youth had taken the girl of his heart out to tea.

"I say, who is that young man who has just come in?" he asked his companion. "I see he nodded to you. Do you know him?"

"Yes," answered the maiden, "I know him well."

"Shall I ask him to join us?" said the young man, after a pause.

"Oh, dear," murmured the girl in confusion. "This is so sudden."

"Eh, what do you mean?" he asked in surprise.

"Why, Jack," she replied, "he's our minister."

He Was Doing His Best.

The newly engaged Scottish laborer was left to his breakfast and told to help himself to a cheese on the table. After a long time the farmer went impatiently to the kitchen in search of his new hand.

"Sandy," he exclaimed, "you take a long while to breakfast, don't you?"

"Aweel," replied Sandy, "a cheese o' this size is nae sae soon eaten as ye may think."

A golden eagle has been timed, and has been found to fly at the rate of more than a mile a minute.

Minard's Liniment for sale everywhere

TO AVOID PAINS OF RHEUMATISM

This Trouble is Located in the Blood, and Relief Comes Through Better Blood.

Rheumatism comes with thin, impure blood, and can only be driven out of the system by enriching and purifying the blood.

The chief symptom of rheumatism is pain. The most successful treatment is the one that quickly banishes this disagreeable symptom. Many rheumatic people suffer pains that could be avoided by building up the blood. The value of Dr. Williams' Pink Pills in rheumatic troubles is proven by the testimony of Mrs. A. Bryson, Arthur, Ont., who says:—"I was so used up with rheumatism in my shoulders and neck that I could not turn in bed without the help of my husband, and the pain at times was almost unbearable. I took doctors' medicine which did me little or no good. Then I began taking Dr. Williams' Pink Pills and have since been free from rheumatism. I can also recommend the pills to young mothers, as in my own case I found they are unexcelled. I may also add that I recommended Dr. Williams' Pink Pills to a neighbor who took fainting spells at the change of life, and who could not walk any distance. She took the pills for nearly three months and they made her a strong well woman."

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Build Memorial of Zeebrugge Raid.

The foundation-stone of what will be a noble memorial to the famous British raid staged at Zeebrugge, Belgium, in wartime, was laid recently by the Governor of West Flanders, in the presence of a distinguished Anglo-Belgian company, including Admiral Sir Roger Keyes, Lork Burnham, Lord Emmott, the British Ambassador, Sir George Grahame, and the Belgian Minister of Public Works.

The memorial, which will stand near the shore end of the mole, will take the form of a granite column 70 feet high, surmounted by a figure of St. George slaying the dragon. It will be visible far out at sea, and will be inscribed on the side facing the sea with the words: "Saint George for England," and also, "United for Justice." Likewise on the monument will appear the names of the British who fell in the action and also the names of the participating warships.

The Governor, when performing the ceremony, described the landing of the British in the face of the German fire as one of the most brilliant deeds in naval history. Other speeches delivered at the ceremony and preceding the banquet in Bruges Town Hall stressed the close Anglo-Belgian ties. Magnificent wreaths were subsequently deposited.

Higher Tax, Lower Revenue.

An interesting example of the way in which high taxes defeat their own purpose is quoted by the Financial Post. At $6 a thousand, cigarettes were heavily taxed, but Canadians smoked nearly 2,500,000,000 a year. The tax was increased last year to $7.50 a thousand and smokers turned to pipes and to rolling their own. Cigarette consumption dropped by about half a billion a year and the government suffered a net loss in revenue of about $2,000,000. The higher tax actually provided a lower revenue. Taxes that are too high will always defeat revenue purposes.

Whales suffer a great deal from rheumatism.

PAIN Minard's penetrates to the root of the trouble and gives quick relief. Splendid for sore muscles, sprains, bruises. A good thing—rub it in.

MINARD'S "KING OF PAIN" LINIMENT

EASY TRICKS

No. 25

Why?

13 YDS.	6 FT.	11	IN.
-11 "	6 "	13	"
1 YD	2 "	10	"
+10 YDS.	2 "	1	"
11 "	4 "	11	"
-	1 "	11	"
11 "	3 or "		
	12 YDS.		

The question "Why?" is for you to answer. After you learn how to do the trick, you may wish to know why it always "comes out right."

Write on a slip of paper "Twelve yards," fold it and hand it to a spectator to hold until the completion of the trick. Ask him to write on another piece of paper any distance he likes, expressing it in yards, feet and inches. The distance, however, must be greater than 12 yards. Ask him to reverse the numbers (as in the second line of the illustration) and subtract. Ask him to reverse the answer (as in the fourth line) and add. Next he is to subtract 1 foot, 11 inches from the sum. The result will be 12 yards. The trick ends when he looks at the slip of paper and discovers that you predicted the result of his calculations.

The answer will always be 12 yards if the spectator writes a distance in which the number of odd inches is less than the number of even yards. If the number of inches were greater it would be impossible to reverse and subtract.

(Clip this out and paste it, with others of the series, in a scrapbook.)

Night Camp.

A horse to ride and a dog to love,
  And a fire to warm me by,
End of the trail and high above
  The sweep of the starlit sky—
And where is there more for a man's desire
Than a horse and a dog and a pine-wood fire?

The horse will bear me far and swift,
  And the dog will guard my rest
When I lie me down on a dead leaf drift,
  Close to the brown earth's breast.
But ah! the ache of an old desire,
And the face that glows in the pine-wood fire.

—C. T. Divis.

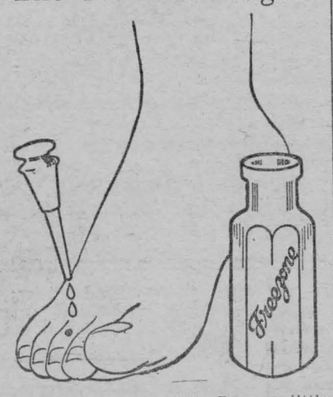
CORNS

Lift Off with Fingers



Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with finpers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

ISSUE No. 18—'23.

MRS. A. HARBACH GAINS 24 POUNDS

Declares Tanlac Restored Her Completely When Health Was Practically Destroyed.

"The Tanlac treatment restored my health and strength and increased my weight twenty-four pounds two years ago, and I am one of the happiest women in Canada, for I have been feeling fine ever since," declared Mrs. Alice Harbach, highly esteemed resident of 26 Dundas St. W., London, Ont.

"I was so nervous I trembled like one with the palsy and feared a complete breakdown. I couldn't relish my food, many days I didn't eat a thing, and lost weight until my clothes were way too large for me. I had piercing headaches, was so weak I would give out before the middle of the day, and at night just seemed to hear the clock strike every hour. I suffered more agony than tongue can tell.

"But Tanlac ended all my troubles, and if I had my say I would put a bottle in every home. It has won my everlasting gratitude, and I will always praise it."

Tanlac is for sale by all good druggists. Take no substitute. Over 37 million bottles sold.

The nightingale's song may be heard at a distance of a mile on a calm night.

KENDALL'S SPAVIN TREATMENT

EXCRUCIATING PAINS, CRAMPS

Entirely Remedied by Lydia E. Pinkham's Vegetable Compound

Eberts, Ont.—"I started with cramps and bearing-down pains at the age of eleven years, and I would get so nervous I could hardly stay in bed, and I had such pains that I would scream, and my mother would call the doctor to give me something to take. At eighteen I married, and I have four healthy children, but I still have pains in my right side. I am a farmer's wife with more work than I am able to do. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and I feel that it is helping me every day. My sister-in-law, who has been taking your medicine for some time and uses your Sanative Wash, told me about it and I recommend it now, as I have received great relief from it."—Mrs. NELSON YOTT, R. R. 1, Eberts, Ont.

Lydia E. Pinkham's Vegetable Compound is a medicine for ailments common to women. It has been used for such troubles for nearly fifty years, and thousands of women have found relief as did Mrs. Yott, by taking this splendid medicine.

If you are suffering from irregularity, painful times, nervousness, headache, backache or melancholia, you should at once begin to take Lydia E. Pinkham's Vegetable Compound. It is excellent to strengthen the system and help to perform its functions with ease and regularity. C

Choosing a Candidate.

During the next two weeks, throughout the province of Ontario, the people will be busy selecting Candidates to represent their views in the Ontario Legislature. During the past few years we have been hearing much about, "the rights and requirements" of the people, much of unrighteousness in our parliamentary halls, much of crookedness, much of grafting, much of extravagance and waste, much of incompetency, and much of self-seeking. It is an old and equally true maxim that it is much easier to criticise than to perform, much easier to tear down than to construct. Likewise, it is much easier to **talk about and preach about** the kind of men who should represent us in our Legislative halls than it is to place them there.

The political wire pullers are busy these days. The "party" men are loosing no time, and within a few weeks the candidates representing the several political parties will be selected and announced. **What manner of men will they be?** Will they really be representatives of the people, or simply representatives of a few political wire pullers who make it a point to select a "winner" irrespective of his moral or even his mental qualifications.

In the present Ontario Election Campaign, the chief issue with the politicians is "The ins and the outs." There will be much talk about extravagance, incompetency, corruption, etc., etc. The charges will come from all sides, and the arguments will be convincing from which ever party standpoint, you prefer.

In the opinion of the Winchester Press there is **only one issue** in the present elections worthy of real serious attention, and that is the attitude of our representative toward the **Ontario Temperance Act.** If the temperance people of the province are in earnest, and intend to hold on to what they have gained, they will see to it that every candidate in the race, be he Conservative, Liberal, U. F. O., or Labor will declare himself, pledge himself on this one question. It is a bigger, a more important question to the province and to the people than "party" and as there is a **large new vote** to be polled this election, it is up to the temperance organizations, the pulpits and the independent press to do all in their power to direct that vote in the right direction.

It is now,—before the Candidates are chosen—that the people should decide who their representatives will be in the next Legislature. There are many "self-announced" aspirants, but it is better that the position should seek the man and not man the position. Surely there are in the County of Dundas men of outstanding mental and moral calabre worthy to represent their party with credit to themselves and the cou'y, without picking up this or that fellow simply because he is a good mixer, or has a pull, or is even a good talker Two to one the same old system of choosing delegates and selecting candidates will prevail, and if the choice of the "party" is not all that you would like, you will swallow your dislike and fall in line with the party, and try to elect their choice. And when he is elected you will recommence to criticize, to protest and to grumble, and much good it will do you.

Warning and Example.

There appears to be a spirit of reckless indifference on the part of many with reference to behaviour in public places, in the matter of driving cars, using profane and indecent language on the streets, and in other ways. Young men, full of life and energy, are bound to give vent to their feelings in some way, and that is all right, but they should be taught, if they do not already know, that reckless and indecent behaviour will not be tolorated, and when warnings do not suffice then an example should be made of them. There are certain laws regulating the speed of cars and the side of the road they shall take, there are also laws regulating behaviour in public places Those laws and regulations are to protect the public, and to maintain order. The law is lenient in respect to many such regulations, and the people are "long-suffering." But there is a limit and the Press issues this friendly word of warning that some of our young men may have no excuse when they find that they have gone the limit, and that they will have to answer for their behaviour before a magistrate.

HON. E. C. DRURY

Who for the past four years has "Carried On" as Premier of the Province of Ontario and Leader of the U. F. O. party. He will appeal to the electors as leader of the U. F. O., and a supporter of their political platform. The date of the election is June 28.

Hon. W. E. Raney Resigns.

Hon. W. E. Raney, Attorney-General, in the Drury Government, has resigned, and does not intend to be a candidate in the coming elections. His resignation is for purely private and domestic reasons, but that fact will not be recognized by the strictly party newspaper, who will ascribe his reason to a weakening fear that the Drury Government will be defeated, and he wants to pull out before the fall. Those who have watched the career of Hon. Mr. Raney since he undertook the arduous work of Attorney-General will not credit such a statement, for no member of the Drury Government has shown greater fearless energy, and earnest endeavour in the performance of public duty than Hon. W. E. Raney. He has not been faultless, but he has been fearless, and in the enforcing of the Temperance Act he had not only been subjected to merciless criticism, but to persecution that would make an ordinary man cringe. Premier Drury is losing the strongest man in his Cabinet in the resignation of the Attorney-General. Mr. Raney was born near Aultville, Ont., 63 years ago, on the farm next to where Sir James Whitney was raised. Before taking up law he was engaged in school teaching and journalism.

Mother's Day.

"Mother's Day" is to be observed in all cities and towns on this Continent on Sunday, May 13 with special features forming an expression of of love and devotion to Mothers everywhere.

This special day of the year is comparatively a modern institution, but it was established as a result of a feeling that distant and wayfaring sons were not showing just the thoughtfulness toward their Mothers as they should. The idea sprang up to have one day of the 365 at least on which those far from home send a remembrance to Mother back on the farm, in the village, of in a far off section of the country. The suggestion quickly became popular, so that Mothers are now blessed with many prayers, thoughts, messages and gifts on the date selected in the spring season as her very own remembrance day.

In many churches of all denominations there will be special references to the duty and desirability of filial care toward the maternal parent. There will be special prayers in some churches, and "Mother" will be honored in various ways.

"Give a Thought to Mother" is the general theme of Mother's Day. It is a day when Mother and child of every age are closer in thought and happiness than usual One very substantial form of remembrance for the occasion is the sending of some special gift home to Mother. This gift can be something that will lighten her household labors, or it can be something beautiful, or some delight that carries with it the special meaning of Mother's Day. The general custom for the day is to send flowers in honor of Mother. A nice boquet of Mother's favourite flowers can be sent to her, whether she lives near or far, thanks to the splendid telegraphic arrangement which is now in use among fiorists everywhere.

But whether money is spent or not for the special observance of Mother's Day, the chief thing is to extend an expression of loyalty to one's Mother. There will be thousands of young fellows and young women who will sit down and write a nice long letter to the folks back home. Maybe that letter has been neglected for weeks—possibly for months. Won't Mother be happy when she finds that she is one of many Mothers who have been remembered on her special day?

The celebration of the second Sunday in May as "Mother's Day" originated through the efforts of Miss Anna Jarvis, of Philadelphia. Her mother died in 1905, and she resolved that she would each year observe the anniversary of her death. Then it occurred to her that others might feel the same if the suggestion was made, and she wrote to editors, clergymen and others prominent in all parts of the country, many of whom agreed to assist. The second Sunday in May was set for the obervance, and it was urged that on that day all persons should show their love and respect for their Mothers by some tribute.

IMPOSSIBLE TO GET RELIEF

Until She Started To Take "Fruit-a-tives"

The Medicine Made From Fruit

R.R. No. 1, Everett, Ont.

Why You Should Use An Electric Range.

GOOD HEALTH

Because it does not use up the oxygen and leave the air in you home full of foul odors and poisonous gases, the use of an electric range is conducive to the good health of the family.

CLEANLINESS

There is no smoke or soot from an electric range so that the outsides of your cooking utensils remain clean and bright. No dirty burners, oil cans or oily rags to handle. Seamless ovens easily cleaned. The oven, being practically heat tight, does not heat the kitchen. You may bake in a clean cool kitchen on a hot summer day.

SAFETY

Because there is nothing combustible about an electric range, there is no danger of explosions or fire. Each heating unit is protected by an individual fuse enclosed in a steel cabinet thus assuring electrical safety.

ECONOMY IN OPERATION

Modern electric ranges are equipped with different size cooking units so that a suitable size may be selected for the utensil being used. Each unit is also controlled by a three-heat switch which enables the operator to turn on high, low or medium heat as required. Strict attention to this feature by the frugal housewife will be reflected in the monthly bill for current.

LOW COST OF OPERATION

As the follow up rate has been reduced to 2 cents gross or 1.8 cents cash net. The cost of current is very reasonable and can compete favourably with that of other methods of cooking.

EFFECTS ON YOUR LOCAL SYSTEM

At present the Local Hydro System pays the Ontario Hydro Electric Power Commission for power on a monthly peak load basis. As this peak, owing to local conditions occurs at night during the lighting hours and a range load would occur chiefly during the daytime, the cost to the municipality would not be materially increased. The additional revenue derived from the sale of current for cooking would create a surplus which would eventually be returned to the consumer in lowered lighting rates.

Prices of ranges and estimates on the cost of installation will be cheerfully furnished.

T. O. VanBridger, Supt.

Winchester H-Electric System

A few days ago a young man driving a Ford coupe crashed into a cluster light standard at the corner of Perth and King streets, Brockville, and he was placed under arrest. Investigation revealed that in his car were "parked" three bottles of alcohol. In police court he pleaded guilty before Magistrate Page and was sentenced to seven days in the counties jail for driving a car while intoxicated. He was also fined $200 and costs for having liquor in an illegal place. To the police he gave his name as Hugh McKinnon and his place of residence Montreal. It is said that the real name of the man is Daniel Ross, and that he abode is a short distance from Cornwall.

Rev. A. E. Sanderson, pastor of the Methodist church, Merrickville, stated to-day that it was unlikely that he would be a candidate in Grenville county for election to the Legislature. He says he would be glad to run and would be confident of success if his only opponent were Hon. Howard Ferguson, but he finds that not only are the Conservatives to bring out Mr. Ferguson, but that the Liberals and U.F.O. each want a candidate of their own. Under the circumstances he feels that his chances of election would be small.

It is with narrow-souled people as with narrow-necked bottles; the less they have in them, the more noise they make in pouring it out.—Pope.

There are 3,867 cuss words in our language, all of which are inadquate when your new car "stalls" on the road, and you don't know what is the cause.

Planning a garden is described as an act of faith. When your next door neighbor keeps chickens, however, there is no faith about it—you know just what is going to happen early some morning.

Teacher.

W. C. T. U. Annual Meeting.

A fairly good attendance of members turned out on Wednesday afternoon of last week to elect the officers for the coming year. Mrs. Empey presided during the giving of reports and transaction of necessary business. In referring to the coming Provincial elections she recommended us to put principle before party, and to give this matter due consideration before the next meeting. The Hon. Pres. Mrs. Isaac Hughes took the chair for the election of officers by ballot for which the tellers were Mesdames Faith and Ritchie. The following are the officres:—

Hon. Pres.—Mrs. Isaac Hughes.
Pres.—Mrs. J. J. Empey.
1st. Vice. Pres.—Mrs. J. H. Faith.
2nd. " " —Mrs. Bolton.
3rd. " " —Mrs. Rennick.
Cor. Sec.—Mrs. Flora.
Rec. Sec.—Mrs. G. F. Armstrong.
Treas.—Mrs. M. Baily.
Evangelistic Supt.—Mrs. Suffel Johnston.
Press Supt.—Mrs. Ritchie.
Supt. Flowers, Fruit and Delicacies—Mesdames Reveler and Faith.
Supt. Traveller's Aid—Mrs. Boyes.
" Moral Education and Mother's Meeting—Mesdames A. W. Beach and G. E. Earle.
Supt. Medal Contests—Mesdames—J. H. Ross, Sweet and Ritchie.
Supt. Railway Employees—Mrs. A. Hart.
Supt. Citizenship—Miss Spense.
" Prison Reform—Mesdames Glassford and Empey.
Supt. Parlor Meetings—Mesdames T. O. Keyes, M. Fader, Leslie, McKeown, and White.
Supt. Soap Wrappers—Mrs. M. Fader.
" Little White Ribboners—Mrs. G. E. Copeland.
Supt. L. T. L.—Mesdames G. E. Earle and G. E. Copeland.
Auditors—Mesdames J. W. Ault and G. E. Earle.

Melvin News

Mr. and Mrs. John Black and Mr. and Mrs. Bert Black of Ottawa spent Sunday at the home of Mr. and Mrs. M. R. Black.

Mr. and Mrs. Charlie Flegg and children, spent Sunday with the latter's parents Mr. and Mrs. A. Baxter.

Miss Barr of Aultsville has returned home after spending the last two weeks with her sister Mrs. Geo. Smith.

Mr. and Mrs. Arthur Christie attended the funeral of their cousin Mrs. Herb Walter of South Mountain on Friday.

Mr. and Mrs. Roy Annable and children and Mr. and Mrs. W. R. Fraser, spent Sunday with Mr. and Mrs. Lei. Fetterly of Russell.

Mr. and Mrs. Geo. Smith and baby, Miss Barr and Mr. Emerson Stewart, spent Sunday with friends in Aultsville.

Mr. and Mrs. Eddie Earl and daughter Kathaline of Kemptville were guests of Mr. and Mrs. Humphrey Erratt on Sunday.

Mrs. Humphrey Erratt is spending a a few days with her daughter Mrs. Eddie Earl of Kemptville.

The Ration for Hogs

SCHUMACHER hogs go to market at six months of age weighing 200 pounds. Why?

Because Schumacher is a variety grain feed, composed of Corn, Barley, Wheat, Oats and Oil Meal, so balanced that it contains exactly the right properties for making bone, frame and muscular tissues. Schumacher helps sows to produce larger litters, too, and produces more milk for the young pigs.

Keep it in the pen in a dry form at all times (preferably in self-feeders)—and make your hog raising more profitable.

PLANT SHRUBS FOR THE BIRDS.

In setting out shrubs this spring keep the needs of the birds in mind.

It is a wise policy to provide them with early berries whose attractions keep them away from garden cherries and small fruits, for they prefer wild fruits.

The Dogwoods and the Honeysuckle family, including the Elders and the Viburnums, possess every characteristic to commend them to the landscape gardener and the fruit grower, and the cultivator of the "back yard." There are both herbs and shrubs and trees in the Dogwood family. All contribute their white blossoms to the glory of spring time, while their fruits come in assorted colors and range through bright scarlet, dark blue, light steel blue, bluish white and pure white. Cornus Alba (white fruited Dogwood) has blond-red stems and twigs throughout the winter, deepening in color towards spring. The great Canadian favorite, Redosier (cornus stolonifera) bears its fruit up to March.

The Elders are prime favorite with both bird and gardeners. The family is one of the choicest among native shrubs. It is deplorable that farmers destroy the elders, dogwoods, pasture roses, sumachs, etc., growing by fences and waysides. Canadian fence lines might be as beautiful as English hedgerows by the exercise of some forbearance in uprooting native shrubs in many instances. Redosier spreads by underground shoots and soon forms of itself a hedge which is a joy to the eye the year round. The American or Sweet Elder bears a pleasantly-flavored purple berry in June, July and August, while the red berried Elder is still earlier, and even more ornamental.

Another attractive member of the family is the Arrow-wood, or Maple leaved Viburnum, which carries its deep purple berries all winter and is an object of beauty into late autumn, its coloring, shading from dull red into creamy white.—Laura B. Durand.

DIET.

The individual himself is the only person who can have an exact knowledge of what foods agree with him and what others disagree. If he has not acquired this information by the time he reaches thirty years of age, he is either unintelligent or he has a stomach like an ostrich. In the latter case it matters not what he eats or when.

Every adult should learn, in the due course of living, the particular limitations and vagaries (kincks) of his own body in relation to food.

There are certain facts in regard to the specific action and uses of food, which the average person has no occasion to learn, but the knowledge of this is of service to medicine.

Growth determines the food needs in childhood. Food here must be selected with regard to their body building capacity.

Few children in this country need to suffer from any prolonged lack of the kind and variety of food needed to assist growth, preserve health, and furnish adequate heat and energy.

Early adult life makes drafts on vitality, energy, and heat-producing functions of the body and a diet capable of restoring the daily expenditures and maintaining such balance is required. This varies with body weight, climate, and body condition—whether lean or stout. The active adult has functions increased and eliminates wastes more easily than those engaged in occupations which impose a great deal of sitting. In feeding due allowance must be made for these conditions.

MEASLES.

Few individuals reach adult age without having had an attack of measles. It is generally considered a disease of childhood but adults also suffer from the malady. It is not so often contracted by adults because an attack in early life has made them measles-proof.

As most experienced mothers know, and as the inexperienced should learn, an attack of measles begins just like a common cold, with a cough, slight sore throat and running of the nose. It is only after three or four days of these symptoms that the rash comes out on the skin and the doctor is called to see the child.

The measles germ has never yet been seen but observation and experiments in monkeys teach that it is present in the discharges of the nose and throat of the patient and may be passed on in the tiny droplets sprayed out in coughing and sneezing. When such droplets, loaded as they must be with these germs, are breathed in and settle in the air passages of one who has never had measles, the germs quickly make themselves at home. They find their way into the blood, increase rapidly in numbers, and at the end of about ten days the sufferer begins to cough as if with a cold. In reality, it is the beginning of an attack of measles. The disease is passed along from one to others by the discharges of the mouth and nose.

The measles germ is present in the secretions of the throat and nose from the very start of what may be called the measles cold, which, as already mentioned, begins about three or four days before the measles rash begins to break out.

As we feel sure that the germ is passed along in the tiny droplets of liquid sprayed out in coughing and sneezing it would seem to be a simple matter to prevent the spread of the disease. In reality health officials are almost as helpless in preventing it as they are with the "flu" for the same reason that the damage is done before the true nature of the beginning "cold" is suspected. The best that can be done is to keep children with colds from mingling with others at home, in school or in public places.

Those actually sick should be kept away from other people until the rash has all gone. This is best done in a somewhat darkened comfortably warm room, the air of which should be kept moist and soothing to the air passages by means of pans of water or by wet sheets or blankets which may advantageously be hung across doorwoys.

MUSIC HELPS THE MIND.

Says a leading educationist concerning the value of music:

"I cannot think of an ideal home without music, for it would surely be very incomplete without it. To me, the beauty of music cannot be described in words. There seems to be no state of mind that one can be in in which music is not welcome. Even in the Bible we read that David played on the harp for Saul to quiet his troubled mind. We need music every day in our home more than in any other place for the good of our mind and body.

"The benefits of music are also reaching the hospitals, the homes of the sick, and busy people after a hard day's work find it refreshing to come home and hear its soothing strains.

"We also enjoy music in our homes of learning—the schools. The school orchestra and the songs we sing in assembly makes us feel more like starting out on the day's study in an excellent mood."

Splendor In Excess.

"The first carpet ever seen in a Nevada town," says an old-timer, "was in a parson's house. One day a little money came from the preacher's home folks back East. With it the parson bought the cotton; his wife spun it, had it woven and painted over in oil colors, with a gay border around the edge and groups of flowers in the centre.

"When the carpet was laid, the people were astounded at the magnificence of the preacher's parlor. One old chap, stopping at the door, was afraid to enter.

" 'Walk in,' said the parson.

" 'I can't,' said the old fellow, "without steppin' on it. Do yo' think,' he added, in wondering admiration, "ye kin have all that and heaven, too' "

"So the boss is going to star you in a vamp part next summer? I suppose you had to convince him you could act the part?"

"No. His wife convinced him."

Martha Jennie's N'Egg Did It

BY MINERVA L. GUTHAPPEL.

PART I.

"What's zat?" asked Martha Jennie Jones.

"A n'egg," said Jimmy Henning.

"What's n'egg?" persisted Martha, who was three.

"Sumthin' t'eat," answered Jimmy, whose seven years of life were filled with knowledge. The two sat upon the wooden doorstep of a house in a squalid court, in the slums of a big city.

Martha Jennie Jones' drunken father and sickly mother had died within twenty-four hours of each other, leaving Martha of the olive skin, snapping black eyes and tightly curled hair, to be raised by the neighbors or handed over to the charities.

Jimmy Henning's mother did laundry work. She had no one but Jimmy and often bewailed the fact that she not only had "no livin' husband" but also had no "gurls" to keep her company and that she was "that lonesome for a gurl as never was." So when Martha Jennie, all unconscious of the terrible happenings around her, had looked up into Mrs. Henning's broad Irish face, pleading "take Martha," Martha was taken into her motherly arms and proclaimed at once to be her "dopted daughter by all the law an' perlice," and thus it was arranged, since no one else in all the world wanted Martha Jennie Jones.

Martha Jennie soon proceeded to question her way into life and to-day's question related to a round white object held in Jimmy's grimy hand. It had come from a bag wherein reposed two similar objects. This was Jimmy's birthday and he had been allowed to choose an especial treat. He quickly chose a hard-boiled egg (Jimmy had luxurious tastes) and had been sent to purchase three for thirty-four cents, one for each of the family—an eleven and one-third cent treat apiece.

Now it happened that Martha Jennie's parents had never introduced her to an egg. Corn meal, fat bacon, bread and potatoes had comprised her menus thus far in life—at least when there was any menu. So, when Jimmy told her of her share in the day's treat, she took but little interest. Later, at the dinner table, her big black eyes watched the process of shelling the "n'eggs" into the cracked saucer that did duty as a plate. With the first mouthful her indifference vanished. "N'eggs *nice!*" she shouted, "want *more* n'egg!"

"Huh, sure you do!" said Jimmy, grinning. "Nothin' doin'. It's birthday to-day. That's why you get this one. Ma, kin we have eggs on Martha Jennie's birthday?"

" Don't know when it is, Jimmy. We'll have to give Martha Jennie a birthday, make her up one, I guess and then please God, if the money's there, we'll have eggs again. But it's dear food they be."

"Have my birthday now!" ordered Martha Jennie. " 'Nother n'egg!"

"No, no, dear. The eggs are all gone. Birthdays don't all come at once. Eat this piece of nice corn bread. Here's a little lassis for it. There, see! It's a feast—it is indeed—we're havin' to-day."

Shortly, another great day loomed upon Martha Jennie's horizon. Jimmy announced it: " 'Zeaster Sunday at Mission School. Teacher said bring all our little brothers and sisters. Ma, kin I take Martha Jennie?"

"I reckon, Jimmy. I've made her a dress out of the gingham apron the mission lady give me. There was plenty of the stuff so I put ruffles on it. It's pink and she'll look like a little lady, sure she will, and she'll be good like one, won't you, Martha Jennie? A little lady!"

"Don't know," calmly answered that small person. "Does 'Zeaster Sund'y hurt?"

"Hurt! Bless you, no, child. It'll be grand—no hurting at all, at all."

Martha Jennie pondered, then asked, " 'Zeaster Sund'y good to eat, like n'egg?"

"Why, my stars, hear the child! It's Sunday and it's Easter and the great Son of God came out of the grave that day and—and—they sing and—but there, ye shall see for yourself all of the flowers. We'll all go to the Mission School and it'll be fine."

Easter Sunday dawned, warm and cloudless. Bright and early Jimmy and Martha Jennie were aroused, scrubbed and curled.

" 'Zeaster Sunday," shouted Jimmy.

"Don't like it. Hurts!"

"Hurts—bash!" shouted Jimmy, and Martha Jennie's little feet were soon half walking, half dragging between Jimmy and his mother, her much ruffled pink gingham flying in the wind, her black curls bobbing and dancing on her head.

They arrived at the mission and found a place at the front. When the service was over, the children were each given one dyed egg and one chocolate egg. Martha Jennie's dyed egg was a brilliant blue and Jimmy's a gorgeous red. The happiness in Martha Jennie's eyes was good to see.

"Kin yer eat 'em?" she asked the world at large.

"Yes, indeed. Do you like eggs?" answered a smiling teacher. "If you will come every Sunday, you shall have a ticket to go to the country for two weeks this summer and so shall Jimmy. There on the farm, you'll see lots and lots of eggs and eat one—maybe two—every day. Will you come?"

Martha Jennie nodded. She would promise anything for a n'egg.

Months passed. Martha Jennie went to Sunday School on Sundays. Hot Sundays and cold Sundays, clear and rainy Sundays, any and every kind of Sunday found her willing, nay even eag[illegible] to be bathed, curled and hurried to the Mission School by the energetic Jimmy, who, having last year tasted the joys of a two-weeks' stay in the country, yearned to make such delight again his own.

Only once in the months following " 'Zeaster Sunday" did Martha Jennie meet up with n'eggs. That was the day Mrs. O'Reilly and Mrs. Schmidt, neighbors, got into an argument. The argument waxed warm and Mrs. Schmidt, whose husband was a baker's assistant, let fly a whole dozen eggs, "borrowed" from the long suffering employer. One of the eggs found a resting place on the small form of Martha Jennie who, standing open-mouthed between the combatants, failed to move when the battle began.

Shrieking, she ran to the motherly arms of Mrs. Henning and amidst her sobs poured forth disgust at the condition of her pretty gingham.

"What hit me?" she wailed.

"Sure, it was an egg."

"A n'egg?" gasped Martha Jennie. How could that be? It wasn't blue, like the 'Zeaster one nor good to eat, like the birthday one, nor choclat, like the black one. "What kind of n'egg wuz it?"

"It wuz a bad egg," said the wise Jimmy. "They be many kinds o' n'eggs."

"Bad," mused Martha Jennie and discussed the whole subject with Jimmy, as he magnanimously piloted her to the corner grocery and showed her a crate of eggs, each one lying in its own wee cubicle.

"Z'at where n'eggs live?" asked Martha Jennie.

"Sure," said Jimmy. And so the days went by.

August at last. Fifty children, all ages, sizes and conditions of raiment, lined up at the Union Station. Excited, awed, frightened, yet happy, the scrambling, chattering youngsters entered the special car reserved for them. When the farming community was reached, they were dropped off at the stations by two, three or in small bunches. Near the end of the line the train stopped at Lake View station and here our little folks were deposited. Jimmy, Martha Jennie, Alice Gordon, Mathilda Grey, six and nine years respectively, and Georgie Piersall, eight, whose right foot would not grow and whose crutch made the stillness of Lake View resound with its thump, thump, while its delighted owner shrieked, "There she is! Same old station! Here's the farm wagon. Why, if there ain't the same old cow!" Georgie had spent two weeks the previous year at Si Thomas' farm, to which the five children were consigned. So he knew all there was to be known about the country.

But my story concerns itself principally with eggs as they related themselves to the small girl already well introduced.

Martha Jennie could not be convinced that the chickens from which she regularly ran in fright, "laid" the eggs she saw in the nests and ate with such gusto at breakfast each morning. Jimmy and the others told her all about the great mystery but when Martha Jennie had been escorted to the barn to have the fact proven, lo, the farmer's wife was just putting a whole dozen of eggs into a nest out of a box, a "settin," she called it, and Martha Jennie again declared to the much-tried Jimmy her unerring conviction that eggs grew in boxes. They did in the corner grocery, they did in the Mission Sunday School on 'Zeaster Sunday, they did her: so n'eggs grew in boxes and that was all there was to it. The rest was a fairy story!

The days went by and all the children grew rosy and were blissfully happy. The last week had been particularly wonderful, for the evening train that stopped at Lake View deposited upon the platform the comfortable person of Mrs. Henning, who came in place of a sick Mission worker to look after the children. She surprised Farmer Thomas' family at supper and hugged each one in turn, for her heart was big enough to take in the whole brood.

The morning after she arrived, Martha Jennie hovered by her side until they were seated at the table and grace was said, and then burst out with, "Mother! There 'tis!"

'What, my little lamb? what is?"

"N'eggs! Lots of 'em. T'ain't no birthday. S'every day n'eggs."

"Why bless the child, how she do love eggs! It's eggs, my dearie, not 'n'eggs.' It's a fine lot of hens you must be having, ma'am, to lay you so many! Oh, thank you, ma'am, two be plenty for me. An' don't be given the child so many! She'll be wantin' them at home and hens don't lay 'em *there*!"

"Hens don't *lay* 'em!" said Martha Jennie, in scornful wisdom.

"Sure they do, darlin'. Haven't you seen the nests yet? And the biddies and all?"

Martha Jennie volunteered no explanation and the subject was dropped. Mrs. Henning's attention was called to Jimmy. "There, there, Jimmy, you've et enough. Two eggs, pie, milk, sauce and all the rest—you'll be busting yourself. Not another bite. Come Martha Jennie, and show mother the hens that don't lay eggs before I help the kind lady with the dishes. It's a wonder the hunger of yez all left even the dishes!"

(To be continued.)

Mixing Up the Baby.

The inventor of a new feeding-bottle for infants sent out the following among his directions to mothers:

"When the baby is done drinking it must be unscrewed and laid in a cool place under the hydrant. If the baby does not thrive on fresh milk, it should be boiled."

The Oldest Bread.

An Assyrian loaf more than 2,400 years old has been discovered by a French explorer. It is supposed to have been baked in 560 B.C., and was in excellent condition when found. The loaf is bun shaped and was wrapped in a cloth in a tightly sealed sarcophagus.

Reassuring.

Anxious Old Lady (on steamer)—"I say, my good man, is this boat going up or down?"

Surly Deckhand—"Well, she's a leaky old tub, ma'am, so I shouldn't wonder if she was going down. Then, again, her b'ilers ain't none too good, so she might go up."

Britain's Expenditure.

During the year ending March 31, 1921, Britain spent £26,000,000 on National Insurance, £76,000,000 on Education, and £31,000,000 on Poor Relief. Thirty years ago Education and Poor Relief cost together about £18,000,000.

He who can take advice is sometimes greater than he who can give it.

In the Highlands.

In the highlands, in the country places
Where the old plain men have rosy faces,
And the young fair maidens quiet eyes,
Where essential silence chills and blesses,
And for ever in the hill recesses
Her more lovely music
Broods and dies—

O to mount again where erst I haunted,
Where the old red hills are bird-enchanted,
And the low green meadows
Bright with sward;
And when even dies, the million-tinted
And the night has come, and planets glinted,
Lo, the valley hollow
Lamp-bestarr'd.

O to dream, O to awake and wander
There, and with delight to take and render,
Through the trance of silence,
Quiet breath!
Lo, for there among the flowers and grasses,
Only the mightier movement sounds and passes;
Only the winds and rivers,
Life and death.

—Robert Louis Stevenson.

A Royal Recognition.

His Royal Highness the Prince of Wales has graciously added his contribution to the progress of forestry in Great Britain and the Empire generally, in his aceptance of the office of President of the Empire Forestry Association. He presided on March 1st at the annual meeting of the Association, which was held at the Guildhall, London, England. In moving the adoption of the annual report of the Council of the Association, he said in part:

"I have had, the last three years, unrivalled opportunities of realizing the vast timber resources of our Empire and of actually visiting lumber mills in Canada and Australia. Without a cheap supply of timber, any progressive community must face disaster, having regard to the many needs we have for timber in everyday life, for which a regular and cheap supply is essential. This, however, can be secured only by close attention to forestry in all its aspects.

"If we are to accept the evidence of those who have made a study of the rate of consumption of timber, the world within the next twenty years will be faced with a timber shortage, if not an actual famine. No time must be lost in making provision for future supplies, steps must be taken to replant the vast forest areas devastated during the war, estimated in Great Britain alone at one million acres, of which probably not five per cent. have been replanted.

"The need for systematic forestry must be more fully realized and the doctrine of self-regeneration of forests no longer relied on as the sole means of propagation."

Up But Not Ready.

Companion—"Get up, Clara, get up at once. A man has broken into the house!"

Miss Passay—"I'm up, my dear, I'm up! But what have you done with the rouge box, I'd like to know?"

Floating Lands for Home Sites in Holland.

Of all the countries of Europe, Holland affords, perhaps, the best example of how the topography of a country affects the habits of its people, and influences their lives. A considerable portion of the Low Country lies below the level of the sea, and it was to resist its cruel invasions that the gigantic levees, or dikes, were built. Nevertheless, some of the flooded regions, periodically inundated by the sea, have been water-logged for centuries, and one of these is the province of Overyssel. Perhaps its quaintest spot is the floating village of Giethoorn. Taking advantage of the condition of the soil, these hardy Duhchmen have learned how to cut away sections of turf, and then float them to the spot where they are wanted. Considerable skill, of course, is necessary to escape a ducking, because the footing is uncertain and slippery, and the marshland deceptive and treacherous. Poles, about 12 feet in length, are employed to shove off the floating home sites, which are cut away beyond the village limits and then guided to town. Some 8 or 10 men follow this work exclusively, and, naturally, are very adept in the handling of their poles and the "islands" in their charge. Giethoorn has been built up in this manner.

Canadian Trade With Italy

Following the recent trade treaty concluded between France and Canada and as another phase of the preferential trade program arranged for in Europe by Canadian ministers, the terms of a similar favored nation treaty between the Dominion and Italy are announced. Though the clauses are brief they are extremely full and comprehensive, and apparently all that either country could desire to foster a mutual expansion of trade. Canada's export trade with Italy has undergone a surprising expansion, especially since the outbreak of the war, and the treaty is calculated to further stimulate this traffic, and at the same time, through facilitating the entry of Italian goods to Canada, augment the volume of the Dominion's imports from that country. The effects of the new treaty are generally summed up in the concluding clause, which states that in all matters governing the import, export and transit of merchandise Italy grants to Canada and Canada grants to Italy the treatment of the most favored nation. Articles, the produce or manufacture of Canada, imported into Italy and similar Italian commodities imported into Canada, shall not be subjected to higher or other duties than those paid on the same commodities from other countries, and similarly no prohibition or restriction shall be mutually imposed which is not equally extended to other countries. Articles from either country passing in transit through the country of the other shall be reciprocally free from all transit duties whether they pass through direct or are unloaded.

In the last fiscal year Canada's total trade with Italy amounted in value to $16,723,188, of which exports amounted to $15,335,818 and imports to only $1,387,370. Almost the entire volume of exports was attributable to vegetable products, consisting mainly of grain and flour, which had a value of $14,543,767, whilst the other two important items were animal products, which totalled $671,314, and non-metalliferous minerals totalling $103,625. Curiously Canada's greatest item of import was in vegetable products, amounting to $747,480, followed by fibre sand textiles to the value of $322,086 and non-metalliferous minerals worth $117,904.

A survey of Canadian-Italian trade in the last fifteen years or so discloses the fact that whilst Canada's import trade has remained more or less at a standstill there has been a surprising increase in the volume of the Dominion's export trade. In the year 1910 the total volume of Canadian-Italian trade was $1,774,751 in value, of which Canadian imports accounted for $945,243 and exports $829,508, giving Italy a small favorable trade balance. By 1915 imports from Italy had increased to $1,507,548 and exports to $1,840,910. By the year 1920 imports had declined to $999,040 and exports increased to the surprising total of $16,959,557. While in 1921 there was only a relatively small increase in the value of imports, export value had increased by more than three times and amounted to $57,758,343.

Goats in Alberta.

Goat statistics are not to be found in the livestock figures of the Dominion of Canada as the raising of these animals in Canada has never reached a status warranting its inclusion. The only province where goat raising has become thoroughly established and where it has arrived at undoubted success is British Columbia. Here there are approximately 5,000 of these animals, which have increased to these proportions from an original herd of 200 head imported from the United States in 1917, whilst a goat breeders' association in the province formed in the same year with a membership of 176, now has more than 400 adherents.

With its favorable conditions in many sections there seems no good reason why the Prairie Provinces should not have a flourishing goat industry, especially since this pursuit has proved so profitable in the province across the mountains. Alberta has at length its pioneer in W. A. Schroeder, who came from Switzerland and settled near McLeod, and has since been engaged in proving the feasibility of the goat-breeding industry in Southern Alberta and the profit to be found therein, which he would seem to have done conclusively.

He has one hundred goats, and with this substantial herd is following along the same principles of domestic dairying that have for generations been so successful in Switzerland. He is making fifty pounds of butter and cheese every week, which he sends to the McLeod and Calgary markets, where it sells on even terms with the ordinary dairy brands. An advantage in this industry lies in the claim that one gallon of goat's milk will make as much cheese as two gallons of cow's milk, and each animal averages a quart at a milking.

Goats are easily raised n Alberta, according to Mr. Schroeder, who first experimented with sheep, especially on hilly or broken land such as is found in certain sections of the province. They are economical to keep because they feed largely on brush and weeds, the snow offering no deterrent to rustling, whilst they seldom fall victims to coyotes. The meat of the goat comes under the class of wild game, and from ten to twelve pounds of tallow are produced from each carcass. The pelts when well tanned are waterproof and have a good commercial value.

Mr. Schroeder's experiments have been watched with a good deal of interest throughout Alberta and his present herd is in rather general demand for foundation stock for other herds. Some have gone as far north as the Peace River country, where a miniature goat-dairying industry is in process of being established. Now that it has secured its tart and certain proven advantages have been proven for it, there is every possibility of the goat-raising industry becoming established on the prairies of Western Canada.

Novel Boat.

A novel boat is both propelled and steered by jets of water ejected from a motor-driven pump in any direction desired by the navigator of the craft.

HOW CANADA ADVERTISES

Part of the staff of expert photographers, employed by the Canadian Government Motion Picture Bureau at Ottawa, to photograph all phases of Canadian industrial and agricultural life and development. The Laboratories at Ottawa are the finest in the Dominion. The pictures, especially a series of "Seeing Canada," are shown in all the countries of the world, thus advertising Canada's exportable products and promoting international trade.

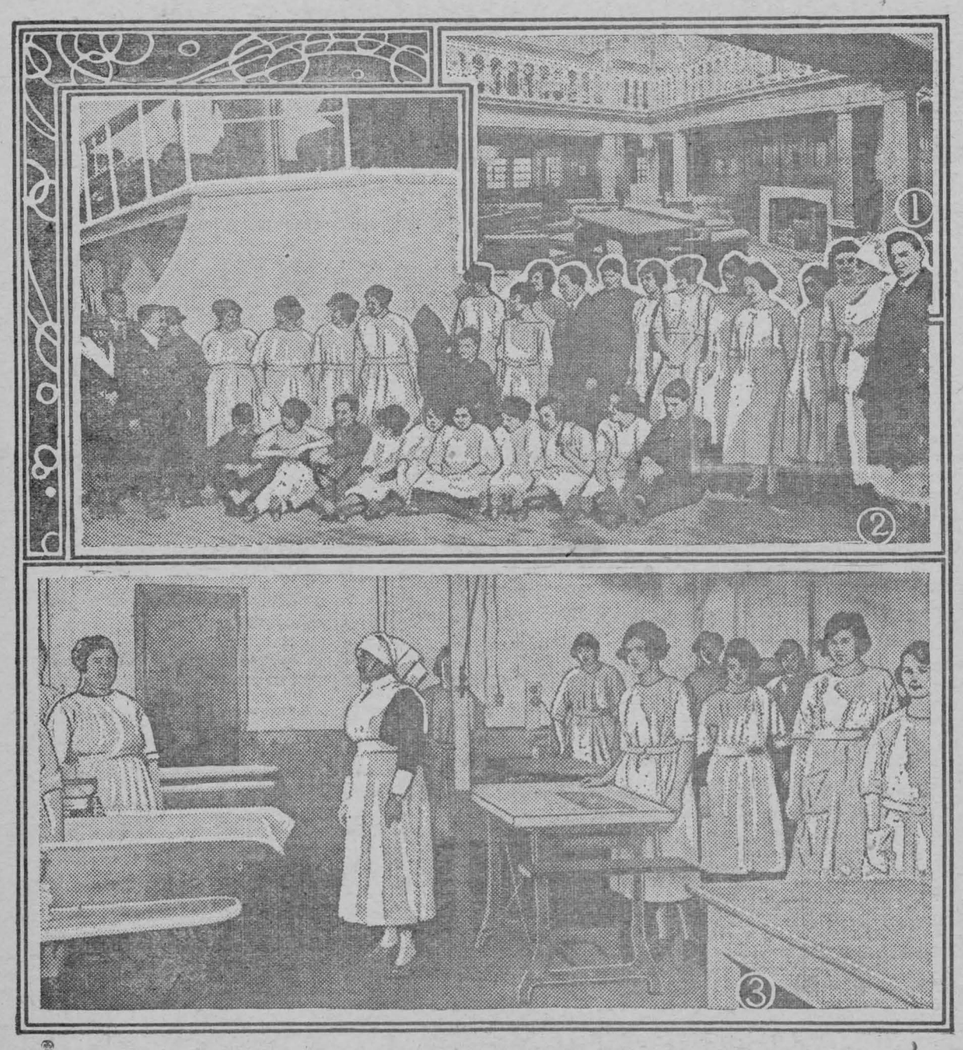
AN ELECTRIC LAUNDRY ABOARD SHIP



(1) A first-class smoking room on the "Empress of France."—(2) A group of the laundry staff of the same liner.—(3) Corner of the finishing department.

IT has been said that the modern ocean liner is a floating hotel, and this is probably the best description that can be given. A modern hotel is a city in itself, and a modern ocean liner of the type of the Canadian Pacific "Empresses" is certainly no less. When a couple of thousand or so of passengers are cut off from land to spend a week or more on the ocean, they must have every convenience and comfort that land can provide. The ship must be self sustaining in every particular. In this respect Canadian Pacific ships are as complete as modern invention can make them, and whether their trips extend for one week, or six weeks as does the cruise of the Mediterranean which the "Empress of France" made this winter, or even for three months as in the case of the cruise around the world to be made by the "Empress of Australia" this year, nothing is lacking to ensure the complete happiness of all on board.

As an instance of the way in which modern liners are equipped, the newly installed laundry of the "Empress of France" is well worth comment. It cost $25,000 and its complete plant and large staff of workers make it probably the finest of its kind afloat. In addition to the large amount of work undertaken for passengers at shore prices, it deals with 100,000 pieces of ship's linen per week. This new department is under the management of G. Dawe, junior, who controls its staff of six men and thirty women. Three washing machines form part of the equipment, and one of these, the largest ever fitted to a liner, is capable of dealing with 3,000 pieces of linen at a time, each piece being subjected to the entire washing process without removal. There is also a huge ironing machine which will iron and dry sheets at the rate of 400 per hour after they have been passed through a power wringer. This machine is operated by a team of nine girls. The higher class of laundry work is done by skilled ironers with press machines and electric irons, while shirts and collars, etc., are starched and finished by machines specially fitted for the purpose. All the machinery is electrically driven, and there are elaborate electrical controls for starting, stopping and regulating the machines. In the case of the washing machines, electric motors are fitted to the top of them, controlled by an electric timing device which regulates the revolving and reversing of the inside cylinders.

The oil-burning "Empress of France" has a length of 571 feet, beam 72 feet, depth 42 feet, and gross tonnage of 18,481. The speed which made her such an asset to the navy during the war is still maintained, and Captain John Gillies, her commander, is the hero of many an exciting race to port. Once aboard the "Empress" one has nothing to do but enjoy life while awaiting the end of the journey which usually arrives all too soon. She is a beautifully appointed ship with seven first class public rooms, including a lounge, smoking room, card room, and library. Provision is made in the second-class quarters for three public rooms, and spacious deck space affords all passengers more than sufficient room for open air games and exercise. Her steerage accommodation is in many ways about equal to the cabin accommodation of Atlantic liners of a few years ago, and her first and second-class provides every comfort that has been devised.

Cloverdale

A number of the young people from here took in a dance at Inkerman last Friday night.

Our factory re-opened last Monday with Mr. Geo. Riddell as cheese-maker. Mr. Riddell has moved his family back to the factory.

Mr. John Baker is at present on the sick list.

Miss Hughson teacher, and the children of the school, spent Friday afternoon in the woods it being arbor day.

Mr. and Mrs. Eli Lamoureaux and Miss Ethel and Mr. Eddie Dignard motored to Apple Hill last Tuesday to attend a wedding there.

Messers Emery and Ernest Durant escaped serious injury last week when their car was overturned in some way while meeting the motor bus. However they escaped with a bad scare and a broken car.

Farmers are very busy on the land, now some seeding has to be done.

Miss Ethel Lamoureaux is spending a few days at her uncle's Mr. A. St. Pierre.

Mr. and Mrs. Geo. Beatty and family spent Sunday at the latter's parents Mr. and Mrs. S. Dillabough.

While Master Docksteader and Miss Eva were out driving Monday evening, their poney took fright and ran away throwing them both out on the hard road. Fortunately they escaped uninjured.

Vernon

There was a good attendance at the concert given by the Community Singing Class last Friday night, and the school children did justice to the training they received from Mr. Reoch. The Program was as follows:—Opening Chorus—O' Canada, by the school. Reuben and Rachael by Misses Edith Dagg and Hazel Dalgleish and Arthur Anderson and Archie Campbell. Solo—Long, Long Ago—by Helen Dalgleish. Chorus—Tenting To-night—by School. Piano Duet—Misses Anna Crerar and Ethel Ferguson. Chorus by little folks, Little Drops of Water. Duett by Dorris Dempsey and Allison Kennedy, You Can't Play in Our Yard. Piano Solo Miss Katie Briggs. Chorus, My Bonnie lies over the Ocean. Duet—Juanita—by Miss Lois Campbell and Mr. Reoch. Solo Darling Nellie Grey—Alison Kennedy. Chorus by boys—Tramp, Tramp, Tramp. Quartette—Stars of the Summer Night—by Miss E. J. Campbell, Mrs. L. Allen, Mr. S. Sedgwick and Mr. J. Reoch. Solo Aloha Oo—by Mr. Sedgwick. Chorus by school—Polly Wolly Doodle. Good night ladies. After a short address by the chairman, Rev. H. A. Reid, a letter of appreciation was read by Miss Margaret Campbell and Master Wilfred Folkard presented Mr. Reoch with an envelope containing a sum a money from the class. Mr. Recch replied in a fitting manner and all joined Rev. L. S. Hughson in singing "For He's a Jolly Good Fellow," and closed with the Nationed Anthem.

The Horticultural Society have a membership of 87 and hope to reach the 100 mark before the Fall order for bulbs is sent in.

There was a large gathering at the barn raising bee at Mr. A. J. Kennedys last Friday afternoon and everything proceeded in fine order.

Miss Grace Campbell, of Ottawa visited at her home here last Sunday.

Miss Feek and Miss M. Howell spent Sunday, the guests of the Misses York, Spring Hill.

Special services will be conducted in the Presbyterian church, beginning next Sunday, May 13 until 31st. Rev. D. T. McIntosh will be the preacher and Mr. W. W. Weaver, the soloist.

Starting a Nursery.

At the farm of the Kemptville Agricultural School men are engaged in planting 13,000 trees, including pine, Scotch and jack pine, walnut, butternut and soft maple. This work is being done in co-operation with the forestry branch and is on land that is not even fit for pasture. There also are being planted 300,000 pine seedlings, which will be ready for distribution next year among the farmers of Eastern Ontario. As there is considerable land that is unfit for farming, an effort is to be made to encourage reforestration.

SILVER JACK'S RELIGION

I was on the drive in 'sixty workin' under Silver Jack—
Which the same is now in Jackson & aint soon expected back;
There was a chap among us, by the name of Robert Waite,
Who was kinder slick & tonguey—I guess he were a graduate.

Bob could gab on any subject, from the Bible down to Hoyle;
And his words flowed out so easy, just as smooth & slick as oil.
He was what they called a "skeptic," & he loved to sit & weave
Highfalutin' words together, sayin' what he didn't believe.

One day, as we was waitin' for a flood to clear the ground,
We all sat smokin' niggerhead, & hearin' Bob expound:—
Hell, he said, was a humbug, & he proved as clear as day
That the Bible was a fable;—we allowed it looked that way.

As fer miracles and sich like, 'twas more than he cound stan';
And for Him they call "The Saviour," he was just a common man.
"You're a liar," shouted someone, "& you've got to take that back."
Then ev'rybody started—'twas the voice of Silver Jack!

Jack clicked his fists together & he shucked his coat and cried,
"'Twas by that thar religion my Mother lived & died:
"And though I haven't always used the Lord exactly right
"When I hear a chump abuse Him, he must eat his words or fight."

Now Bob he war'nt no coward, & he answered bold & free,
"Stack your duds & cut your cappers for you'll find no flies on me."
And they fit for forty minutes, & the boys would hoot and cheer,
When Jack choked up a tooth or two, & Bob he lost an ear.

At last Jack got Bob under, & he slugged him onst or twiced,
Then Bob at last admitted the Divinity of Christ.
Still Jack kept reasonin' with him, till the cuss began to yell,
And allowed he'd been mistaken in his views concernin' Hell.

Thus that controversy ended, & they riz up from the ground,
And someone found a bottle & kindly passed it 'round.
And we drank to "Jack's Religion," in a quiet sort of way:—

Friends Tell Friends

ZUTOO

Stops Headache

Five years ago ZUTOO was practically unknown in Canada.

To-day, thousands and thousands of men and women depend on these little harmless tablets for quick relief from Headaches.

Their fame has gone from friend to friend—from town to town—from coast to coast.

Wherever there are headaches, there should be ZUTOO Tablets—they relieve in 20 minutes. 25c a box—at all dealers or by mail postpaid, B. N. Robinson & Co. Regd., Coaticook, Que.

Public Health

Citizens are requested to comply with the Public Health Act.

Notice is hereby given that all residents of Winchester are required forthwith to clean their cellars, drains, yards, pig styes water closets, outbuildings, and other premises, and remove therefrom all dirt, manure, and other substance which may endanger the public health and to have the same completed by the eighteenth day of May next, on which day the Sanitary Inspecter will commence a general inspection and further take notiee that the section of the Public Health Act prohibiting the keeping of hogs between the 15th of May and the 15th of November, except in pens at least 70 feet from any dwelling house, and 50 feet from any street or lane, with floors kept clear from all standing water and regularly cleansed, will be strictly enforced.

All citizens are earnestly requested to keep their premises constantly clear and thoroughly disinfected.

DR. P. McLAUGHLIN,
Medical Health Officer.

Very Honest.

Mark Twain was called upon to speak at a club dinner and took for his theme, "Honesty." He said when he was a boy at home he one day saw a cart full of melons. He was a boy—and he was tempted; besides he liked melons.

"I sneaked up to that cart," said Mark, "and I stole a melon. I went into an alley to devour it. But—I had no sooner set my teeth into it than I paused; a strange feeling over me. I came to a quick resolution. Firmly, I walked up to that cart, placed the stolen melon where I got it from, and took a ripe one."

THE GARDENER

So lovingly he holds within
His hand the tiny seeds and sees
A vision of bright fairy things,
That soon will flutter in the sun,
Like butterflies on flaming wings.

So lovingly he lays them down
In beds made soft and warm to sleep,
And carefully above their heads,
For fear a bitter wind and storm,
A magic carpet he spreads.

So lovingly he waits until
Awakened by a thousand sounds,
With tender outstretched arms they rise,
And struggle to their feet, to find
An eager welcome in his eyes.

So lovingly he watches then
With quick response they do his will.
And in his garden, kneeling there,
With busy hands, care slips away,
And peace comes like an answered prayer.

Lillian Howard Cort.

Slight Misunderstanding

The paper published at Yale University tells this yarn:—Mrs. Edwin was showing Selma, the new Swedish maid "the ropes." "This," she said, "is my son's room. He is in Yale."

"Yale?"—Selma's face lit up with sympathetic understanding. "My brudder bane there, too."

"Is that so? What year?" asked Mrs. Edwin somewhat surprised.

"Ach, he bane got no year; the judge yust say, 'You, Axel, sixty days in yail.'"

Winchester Springs

Mr. and Mrs. W. Kain and little son, spent Sunday at the home of Mr. and Mrs. I. Pitts of Brinston.

The W. M. S. of the Presbyterian Church held their monthly meeting at the home of Mrs. C. McIntosh Thursday last.

With a large attendance of relatives and friends who held him in high esteem during his 23 years residence at Billing's Bridge the funeral of the late John J. Lough, took place from the residence of his son R. R. Lough, to Ormond, Ont., on Wednesday May the 2nd, at 10 o'clock a. m. The funeral service's were conducted on Tuesday night at eight o'clock, by the Rev. Dr. MacLean of Fourth Ave. Baptist Church, Ottawa. Those left to mourn his loss are his four sons, Charles of Syracuse, New York, Robert of Billing's Bridge and Stanley and John of of Ottawa and his two sisters, Miss M. Lough, and Mrs. Rollins and one brother Alex. of Kenmore, Ont. A large attendance of relatives and friends from Ormond and Kenmore were at the cemetery when corteage arrived and the service there was conducted by the Rev. Mr. Robertson of Ormond, assisted by the Rev. Mr. Reid of Vernon. The floral offerings were received from including a wreath from the family. The L. O. B. A. 222, Billing's Bridge, No. 3. Fire Station, The Canadian General Electric, The One Hundred Club of Ottawa, The Jones Bros. of Billing's Bridge and sprays from the Ladies Mission Circle Fourth Baptist Church and Mr. and Mrs. D. Campbell, of Billing's Bridge.

Confirmation Service at St. Mathias

On Sunday May 6th the Lord Bishop of Ottawa, Dr. Roper, administered the Holy Rite of Confimation to eighteen candidates during the communion service at St. Mathias. Mr. Logan Lee was admitted to the Brotherhood of Lay Readers and presented with a license enabling him to hold service for any of the clergy of the diocese. In the afternoon a visit was made to St. John's, Crysler, and in the evening to Holy Trinity, Chesterville. At the three Churches large congregations witnessed the solemn ceremony, and the addresses given by the Bishop were very practical and helpful, and will not soon be forgotten by those who were present.

Departmental Examinations.

The time table for the annual departmental examinations has been issued. The entrance examination begins on Wednesday, June 27, the lower school examination on Tuesday, June 12, the upper school on Thursday, June 14, and the middle school on Monday, June 18. One of the examinations that faced pupils of High Schools formerly has been abolished, according to instructions issued by the Department of Education. Lower school standing for entrance to the Normal Schools will be granted pupils of High Schools or Continuation Schools who have passed comprehensive tests conducted by the teachers of the different subjects.

The seven Sunday Schools that are in operation on the Winchester circuit were represented by their officers and teachers being in attendance in groups at the evening service in the Methodist Church last Sunday. These schools are, Cass Bridge, Summers', Maple Ridge, Harmony, Melvin's (Union) Walker's (Union) and the Winchester Methodist. A report of the day's attendance and collection was given from each school which showed that faithful work is being done. Rev. J. K. Curtis preached an intersting and appropriate sermon, the keynote of which was the influence of the home training on the youth of our land. He said we should organize to spend at least fifteen minutes a day on the study of God's Word with our children in the home. He spoke of how the forces of evil are organized to do their work, and of the boast now made by the Moderation League of Ontario that their agents are going to win out in the coming Provincial election, and if so conditions here will be similar to those in Quebec now. He said he knew what he was talking about having received inside information while in Toronto recently. He made a strong plea to Sunday School workers that they train up the youth in strong temperance principles. He encouraged the workers to keep on in their noble work, of self-sacrificing service. The Male Choir led in a song service for twenty minutes at the opening, and Mr. Harry McKercher added much inspiration of the service by his contributions of two well-rendered solos. Mr. McKercher is always heard with pleasure in his home town.

Rev. Archibald Henderson, who died recently at Cobden, had been a minister of the Presbyterian church since 1874 and on coming to Canada in 1876 was inducted into the charge of Prescott. From 1878 to 1887 he was stationed at Mountain and Heckston. Burial was made at South Gower.

Word has been received from G. W. Hill, R. C. A., the Sculptor of the Soldiers' Monument, for Morrisburg that the bronze, which has been cast in Belgium, is now on its way across and will arrive here shortly. Plans are being matured to have the unveiling during an Old Home Week the first of August.

Notice of Sittings of Revising Officer.

TAKE NOTICE that sittings of the Revising Officers, for the purpose of hearing complaints, or appeals, with regard to the Voters' Lists to be used at the election of a member of the Assembly pending for the Electoral District of the County of Dundas, will be held at the following times and places, by the Revising Officers named, the name of the Clerk to the Revising Officer, his address, and the last day for filing appeals being also set out:

Name of Municipality	Place of Hearing	Time of Hearing	J. G. Harkness Revising Officer,	Clerk to Revising Officer	Address of Clerk	Last day for filing appeals
Township of Mountain	Oddfellow's Hall, Mountain Stn.	May 31 10.30 a.m.-4 p.m.		W. R. Keyes	Inkerman	May 28
Village of Winchester	Town Hall, Winchester	May 31, 7-10 p.m.		J. C. Empey	Winchester	May 28
Township of Winchester	Town Hall, Chesterville	June 1, 10 a.m.-3 p.m.		Geo Elliott	Chesterville	May 29
Village of Chesterville	Town Hall, Chesterville	June 1, 3-5 p.m.		Geo. Elliott	Chesterville	May 29

The Revising Officer will, in every case, sit until all appeals are disposed of.

AND FURTHER TAKE NOTICE THAT any voter who desires to complain that his name, or the name of any person entitled to be entered on the said list, has been omitted from the same, or that the name of any persons who are not entitled to be voters have been entered thereon, may, on, or before the dates set out above, respectively, apply, complain, or appeal to have his name, or the name of any other person entered on, or removed from the list.

AND FURTHER TAKE NOTICE that such appeals must be by notice in writing, in the prescribed form, and shall not include complaints, or appeals, as to names entered, or sought to be entered on the list for more than one polling sub-division. They must be signed by the complainant, in duplicate, and given to the Clerk of the Revising Officer, or left for the Clerk at his address stated above.

DATED this Ninth day of May, A. D., 1923

E. J. REYNOLDS,
Chairman for the Election Board of the United
