For repairing Stove Lining, Broken Fire Brick, Furnaces. Put up in handy cans of different sizes, or supplied in bulk, if required, at 10 cents a pound.

Asbestos Sheets

Asbestos Paper and Powder for Stove and Furnace work. Can be had in any quantity.

R. H. BRADFIELD & CO.

The Hardware Store

[illegible]SBURG Phone 10 ONTARIO.

MR. L. SOUTHWORTH

The death of Mr. Leavitt Southworth, who passed away at his home Wednesday October 4th, removes from our midst a prominent and highly esteemed citizen. For two years, Mr. Southworth had been in failing health, and for more than a year had been confined to his room.

Born on Dec. 20th, 1857, son of Stephen Jackson Southworth and Diana Stoddard, who resided in Bastard County, Ontario, Mr. Southworth, in his childhood, went to reside, with his parents, in Kitley, near Athens, and in these places he attended public and high school. In 1873 he moved to Brockville, and accepted a position as reporter, with the Brockville Recorder and Times. He was united in marriage to Miss May Kaufman, of Brockville, in 1884. In 1889 he moved to Charleston Lake, where he became proprietor of the summer hotel. He later was engaged in similar business in Newboro and Barnhart's Island. In 1912 he became a citizen of Morrisburg, and the popular proprietor of the St. Lawrence Hall, which business he carried on successfully until 1924, when he retired from active business, and took up residence on Riverside Drive.

He is survived by his wife and two brothers, Dr. Simeon Southworth, Bolinas, Calif., and Dr. Stoddard Southworth, Tonapah, Nevada; also two nephews, who reside in Toronto.

The funeral service was conducted by Rev. S.B. Holmes, at his late home, today (Friday), after which the remains were conveyed to Brockville for interment in Oakland cemetery.

MR. FRANK McLEAN

We regret to record the death of Mr. Frank E. McLean, at his home in West Seneca, New York, due to a motor accident on July 27th. He suffered a very bad concussion of the brain, which brought about his death on August 29th.

Mr. McLean was born near Morrisburg, Ontario, 62 years ago, and spent his early boyhood days there. He was well known in his own district and Buffalo, and was a life member of the F.O. Eagles Aerie, No. 146; Passyunk Tribe, F.O. Redmen; also Pilgrim Circle P.H.C.

The funeral took place at his home in Orchard Park Road on Friday, September 1st, the service being conducted by the Rev. Chas. A. Williams. The casket was borne by eight of his old friends and fellow railroadmen. Burial was made in the new Masonic cemetery (Acacia Park).

The many floral tributes were beautiful evidence of the esteem in which deceased was held by those who knew him.

Mr. McLean is survived by his wife, Sophia; one son, Frank; one daughter, Grace (Mrs. Clarence Horne); also four granddaughters, June, Doris, Carol and Muriel Horne. He was the brother of Mrs. Theresa MacMillan of Morrisburg, Mrs. Lucy Dickey of Dunbar, Christopher and Thomas McLean of Chesterville, and Donald McLean of Webster, South Dakota.

M.C.I. SPORTS DAY

Following are the results of the sports events, M.C.I. Sports Day, Friday September 29th.

Starter—Mr. Graham Cassselman.

Judges—Rev. Mr. Holmes, Rev. Mr. Mehlenbacher, Mr. G.A. Foulds, Mr. Ian Brodie.

Winner of Inter-form Shield—Second Form, 120 points. Runner-up, Third Form, 56 points.

Individual Boys Champions—

Ages over 17, Senior—Harry Smith, 27 points. Ages 15 and 16—Junior—Ross McIntyre, 17 points. Under 15, Juvenile—Lyle Strader, 23 points.

Senior Boys

High Jump—H. Smith, A. Rohrig.

Broad Jump—H. Lane, A. Rohrig, C. Hart.

100 Yds.—H. Smith, A. Rohrig, O. Pigeon.

440 Yds.—H. Smith, O. Pigeon.

120 Yds., Hurdles—H. Smith.

Junior Boys

High Jump—H. Timmins, R. McIntosh, R. McIntyre.

Broad Jump—R. McIntyre, L. Schell, L. Laurin.

100 Yds.—R. McIntyre, L. Laurin, J. Stitt.

440 Yds.—R. McIntyre, R. Hummell, J. Stitt.

80 Yds., Hurdles—J. Stitt, R. Hummell, L. Laurin.

Juvenile Boys

High Jump—L. Strader, R. Smith C. Tuttle.

Broad Jump—L. Strader, J. McDonald, C. Tuttle.

100 Yds.—L. Strader, C. Tuttle, J. McDonald.

880 Yds.—L. Strader, C. Ault, R. Smith.

60 Yds., Hurdles—C. Tuttle, J. McIntyre, J. McDonald.

220 Yds.—C. Tuttle, L. Strader, J. McDonald.

Open Events

880 Yds.—G. Salmon, G. Tindal.

1 Mile—G. Salmon, O. Pigeon, R. Holmes.

Shot Put—W. MacMillan, J. Robinson, R. McIntosh.

Inter-Form Relay—1st, Third Form; 2nd, Fifth Form; 3rd, Commercial. Winning Team—L. Laurin, G. Salmon, H. Lane, F. Ault.

LIBERALISM VS. C. C. F.

The "Edmonton Bulletin," Wednesday Sept. 20th, has the following main heading across its front page: "VanAllen Dubs C.C.F. Chocolate Coated Reds' ", and a picture of Mr. George H. VanAllen, K.C., son of Mr. and Mrs. W.A. VanAllen, Riverside. Mr. VanAllen's address to the Young Liberal Club of Edmonton, is reported in the "Bulletin," as follows:

The fundamental difference between the Co-operative Commonwealth Federation Socialists whom he dubbed "chocolate coated Communists" and the Liberal party is that the former call for a revolution, while the latter insist on reform, declared George H. VanAllen, K.C., in addressing a meeting of the Edmonton Young Liberal Club at its club rooms in the basement of the McLeod building on Tuesday evening.

Expanding on his theme, "Liberalism vs. C.C.F.," Mr. VanAllen said that both parties did stand together in some respects. "Both recognize the failings of the present system, notwithstanding all its achievements. Both stand for an extension of the principle of public ownership coupled with the abolition of exploitation and monopoly. Both stand for progressive thought and action.

Copied from Liberals.

"Excepting only the proposal of a new social order, all of the C.C.F. platform has been taken from that of the Liberal party."

Mr. VanAllen next quoted Rt. Hon. W.L. Mackenzie King, Dominion Liberal leader, in an extract from his speech during the degate on the Woodsworth C.C.F. resolution in parliament. On the occasion, the Dominion leader had said in part, "I come next to the control of credit. Liberalism believes that credit is a public matter, not of interest to bankers only, but of the direct concern to the average citizen. It stands for the immediate establishment of a properly constituted national central bank, to perform the functions of re-discount and the control of currency issue, considered in terms of public need. A central bank is necessary to determine the supply of currency in relation to the domestic, social and industrial requirements of the Canadian people, and also to deal with the problem of international commerce and exchange."

Continuing, Mr. VanAllen emphasized the fact that a national central bank to control the credit resources of Canada was first proposed by the Liberal party, not the C.C.F. "Thus," he said, "it appears that as to the initial and fundamental step in the matter of national planning, the C.C.F. is in accord with Liberalism."

Always Practices.

As to planning of national business, this is and has been always practiced by modern governments. "To state the contrary is to confess ignorance of the science and duties of governments," he said.

"During the war, the economy of the country was planned on a huge scale by the Dominion government. To a degree, both provincial and Dominion governments plan the production, distribution and exchange of goods today. By legislation of various kinds affectini business dealings, governments are going further in that direction each year, by a tendency to direct, regulate and control business affairs. We see signs of it everywhere. Did not the Canadian government plan the great inland waterways system of the country and the two great transcontinental railways? But both the C.N.R. and C.P.R. were built by the combined effort of government credit and private capital. The presence of private investments in these projects saved the Canadian taxpayer hundreds of millions of dollars. Then, who planned our great marketing system? Did not the government do the pioneering that induced private capital to come in and finish the great work which gives to our country the most efficient grain handling system of the world?

"Who planned the harbors and canals of Canada? These are only a few examples. The vast proportion of the time of government today is taken up with economic planning, as distinguished from the task of government itself."

Deplored Exploitation.

The Liberal party, he said, recognized that further progress should be made. It deplored any improvident exploitation of the natural resources and especially the sale of securities in grossly overcapitalized enterprises.

The platform of the Liberal party in Alberta provides that the provincial Liberal party favours Dominion legislation for the supervision of the issuance of securities to the public by corporation organized under Dominion charters."

On the question of socialization of banking, currency, credit and related matters, Mr. VanAllen said: "Mr. Woodsworth doubts the feasibility of the government taking over or nationalizing the banks, but he does insist upon a central bank. The new C.C.F. platform now demands that the chartered banks, as well, be socialized.

"The Liberal party first suggested a national central bank, but is against taking over all the banks now in business, believing that control will solve the prob'em, just as control has solved the railway rates question. Moreover, is it not be[illegible] to leave undisturbed the pri-

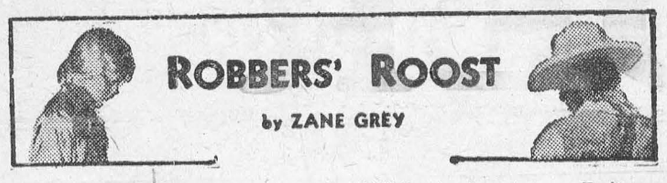
ARTHUR FLYNN Morrisburg, Ont.



SYNOPSIS.

Jim Wall joins Hank Hays' gang of cattle rustlers on the Star Ranch, in Utah, owned by Bernie Herrick, an Englishman, who has two gangs of rustlers in his employ—one led by Hank Hays and the other one by Heeseman. Matters are complicated when Helen Herrick, the owner's sister, comes to the ranch. Jim falls in love with her. Hays' desperadoes steal Herrick's cattle and sell them. Hays orders them to go to a canyon, where he will meet them. When he arrives he is accompanied by Helen, whom he has made captive. Heeseman's riders give chase and the desperadoes prepare to fight. Hank Hays, crawling to an advantageous position, kills Heeseman. The besiegers withdraw. Hays returns to the cavern, and Jim denounces him. Hank draws his revolver and Jim kills him.

CHAPTER XXVI.

"Helen—it's all—over," Jim called, hoarsely.

She appeared in the opening. "Gone?" she whispered.

"Yes, gone—and dead."

"I—saw—you....is he—dead?"

"You bet your life," burst out Jim, his breast oppressed.

"Oh, help me out!"

He ran to assist her. She came sliding out, to fall on her knees, clasping Jim with fierce arms. Her head fell against him.

"Get up," he ordered, sharply, trying to lift her. But she was more than a dead weight.

"God bless you! Oh, God bless you!" she cried. The voice was husky, strange, yet carried the richness and contralto melody that had been one of Helen's charms.

"Don't say that!" he exclaimed, aghast.

"Jim, you've saved me," she whispered. Jim's hands plucked at her arms, caught them.

She loosened her hold and raised her head to look up at him. He only saw her eyes, tearless, strained in overwhelming gratitude.

"No—not yet!" he blurted out. "We must hurry out of this."

She arose, still clinging to him. "Forgive me. I am selfish. We can talk some other time. I should have realized you would want to leave here at once. Tell me what to do. I will obey."

Jim stepped back and shook himself.

"You kept me from thinking," he began, ponderingly. "Yes, we must leave here....Put on your riding clothes. Pack this dress you have on—and all you have. Take your time. We're safe for the present. And don't look out. I've got to bury Hays and the men."

"My spirit wouldn't faint at that," she replied. "I saw you kill the wretch—and I could help you bury him."

"I won't need you," replied Jim, constrainedly, and wheeled away. Madly he rushed to and fro, while he searched the dead robbers, to fling their money and valuables in a pile. Then he dragged them to the brink of the wash and toppled them over.

Action had begun to steady Jim, if not compose him. He shoved all the money into his saddlebag. Next he packed every one of his shells. He might be attacked again in that hiding place. Then he selected supplies for two pack and filled them, not forgetting a few utensils.

His next move was to strap blankets and saddles on the two gentlest horses. Those he led back to the cave, where he packed them. After that he had only to saddle Bay and the gray horse Helen had ridden there.

Suddenly he thought of Smoky. If he had been alone, or with another man, even a helpless one, he would have taken time to find that strange and faithful robber and have given him a decent burial. But he would not leave the girl.

While he stood there, trying to think what else to do, he remembered a sack of grain that Hays had packed from Star Ranch. He found it half full and tied it on the lighter pack.

He hurried back to the girl, calling: "Are you ready?"

"I've been waiting," she said, and came swiftly out. The rider's costume brought out the rounded grace of her form. She had braided her hair. The sombrero he remembered shaded her face.

"Where are your veil and long coat?" asked Jim, seeing her as on that unforgettable day.

"He burned them," she answered in a stifled voice.

"Get into this." And he held his slicker for her. It enveloped her, dragged on the ground.

"We're in for storm. Rainy season due. You must keep dry."

Turning to the gray horse, she mounted.

"Ride close beside me where there's room. Just ahead where there's not," he directed her.

Jim tied the halters of the two pack animals to their packs, and started them off. Then he vaulted upon Bay—the first time for many weeks. The horse pranced, but steadied down under an iron hand and heel.

Helen looked back as one fascinated, but Jim bent stern gaze ahead.

"I would destroy this canyon if that were in my power. Come," he said.

They rode up out of the oval, driving the pack horses ahead. The rain was now falling heavily. On the gravel ridge to the west Jim saw a dead man lying prone.

Soon they entered the wide, shallow wash, in the sand of which Jim espied footprints filling with water. They rode out of the tail of the storm and into a widening of the wash, where it reached proportions of a small valley. Scrub cedar and brush and cactus began to show, and patches of sunflowers on low, sandy knolls. They passed the cove where the riders' horses had been left. Broad and deep was the trail to the south.

"Are you all right?" Jim queried.

"Oh, I did not know I could feel rapture again. Yes, I am."

"You're dizzy just the same. You sway in the saddle. Ride closer to me, while you can....Give me your hand. Don't talk. But look—look! You might see what I do not see."

They rode at length to a canyon head, down which the hoof tracks turned.

"We came this way by night, but I remember," she said. "Do you dare to follow them?"

"We must not."

"But that is the way to Star Ranch!"

"Yes, on the trail of desperate men, and across that Dirty Devil River. These summer rains. It will be in flood. I would not be able to get you through."

"You know best. But just to be free....to see my brother, Bernie! It is unbelievable."

Jim Wall looked across the brakes. Presently he said, "I will try to find a way out of this hole. The country is strange. I'll be lost soon. But somewhere up out of here—we'll find a lovely canyon where there is grass and water. I must not run into cattlemen; robbers are not my only enemies. I don't want to be hanged for—for saving you."

'Hanged! Oh, you frighten me!"

"I didn't want to tell you. It is no sure thing that I can safely elude the rest of Heeseman's outfit, if I try to get out through the brakes. It'd be far safer to hide you a while—south of here, out of the way of riders."

"Take me where you think best," she said tremulously.

"When you get out, you must go home to England."

"I have no home in England. Bernie is my only kin, except very distant relatives who hate the name of Herrick."

"Then go to a country as different from this naked, stony wilderness as day from night. Where it snows in winter, and in spring there are flowers, birds, apple blossoms...."

"No, I shall not leave," she replied positively.

A flash of joy leaped up in Jim at her words, but he had no answer for her. He led on, away from that broad, fresh trail, into an unknown region. And it seemed that this point of severance had an inscrutable parallel in the tumult within his heart.

The sun set in an overshadowed sky and storm threatened all around the horizon. Far north the thunder rolled, and to the south maint mutterings arose. Jim could not hold a straight course. He wandered where the lay of the land permitted. Rising white and red ground, with the mounds of rock falling, and green swales between, appeared endless and forlorn. He began to look for a place to camp.

At last, as twilight darkened the distant washes and appeared creeping up out of them, Jim came to another little valley where scant grass grew and dead cedars stood up, spectral ghosts of drought, and on the west side a low caverned ridge offered shelter He led her over to this and, dismounting, said they would camp there. Her reply was a stifled gasp, and essaying to get out of her saddle, she fell into hi sarms.

To Jim Wall it seemed a miracle that he did not snatch Helen to his breast. Like a wind-driven prairie fire his blood raced. He set her upright on the ground.

"Can you stand?" he inquired.

She essayed to, and, letting go of him, plainly betrayed her spent condition. Jim helped her into the shallow hollow under the rock.

In the quarter-hour before dusk he had unpacked, hobbled and fed the horses, built a fire and put water on to boil.

He carried his bed under the shelf and unrolled it, changed and doubled the blankets and folded the tarpaulin so that it could be pulled up in case rain beat in.

The fire sent a ruddy light into the cavern, and all at once Jim discovered that the girl was watching him.

(To be continued.)

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted.

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J. F. T., Montreal.

Longer And Narrower Skirts For Winter

Skirts will be longer this winter, and there will be a return even to hobble frocks for evening wear.

That is the edict of the fashion dictators now in Paris for their winter campaign.

The lacquered lady is dead. Colors have forsaken their metallic air. Flower shades of hyacinth, jonquil, and prune will be the vogue.

Evening parties will reveal a strange mixture of Edwardian off-the-shoulder gowns and modern young women with sweaters of crinkly silk which look as though they were knitted in wool.

Afternoon frocks of sporting cut will jostle with sober high-necked gowns like our mothers used to wear.

The dignity of long flowing skirts is offset by the impudence of the winter hats. They nearly all run to an impish peak at the top, and are worn tilted sideways with a gay little air.

Here are the highlights of the new modes:

Sweaters with polo collars to wear over backless evening gowns.

Sleeveless fur coats.

Velvet blouses with tweed suits.

Blouses made of wash leather.

Ultra-modern artificial silk and elastic wool.

Evening jackets in brocade with collars a foot high.

But once again the dictators seem to have catered for the sylph-like figure. They hold out little hope for the plump woman this winter.

The slimmers will love the new modes. There will be moans among the plump.

Indian Summer

These are the days when birds come back,
A very few, a bird or two,
To take a backward look.

These are the days when skies put on
The old, old sophistries of June,—
A blue and gold mistake.

Oh, fraud that cannot cheat the bee,
Almost thy plausiblity
Induces my belief.

Till ranks of seeds their witness bear,
And softly through the altered air
Hurries a timid leaf!

—Emily Dickinson. Poems. (Boston: Little Brown).

Open-Air Baths Cause English Wool Boom

London.—The social habits of young England are being changed by the swimming pools that are springing up alongside roadhouses in all parts of the country. So many bathing suits were sold last year that a boom resulted in the wool trade, and since then the number of open-air baths has been doubled at least.

The more pretentious of these establishments offer dancing as well as swimming to customers, and it is now the growing custom to round off a day walking, motoring, or games-playing with a plunge in the moonlight.

Times Change

A hundred long, long years ago a wilderness was here,
And man put powder in his gun and went to hunt the deer.
But times have changed a lot since then—we've found a different plan:
The dear puts powder on her face, and goes to hunt the man.

—Kitchener Record.

Britain Makes Gains

Great Britain has been cutting down unemployment at a slower rate than our own, but impressively enough if we consider the slower general tempo of British life. Toward the end of last month there were 448,000 fewer unemployed than a year ago. It would be a decline of about 15 per cent, as against a probable 25 per cent. recovery for us since last march. At the present moment the rate of unemployment in both countries must be very nearly the same, about 20 per cent. Oddly at first sight, British figures for reduced unemployment do not coincide with the figures for increased employment. As compared with a year ago, Great Britain now has 448,000 fewer idle, but she has 648,000 more people at work. The difference would be accounted for by young people now working who had never done so before to the extent of 200,000.—New York Times.

Canadian Girl Is Smarter Than Parisian

French Workers Save For Dowries but Our Cinderellas Hope to Marry Millionaires

Paris may be the fashion centre of the world, writes a Canadian woman living in the French capital, but Paris working girls can take lessons in chic from any Canadian shop girl.

Watch the six o'clock crowd pour out of the employees' entrance of Paris department stores, offices, factories and business houses. Here is no snappy crowd such as pushes gaily out of similar buildiings in Canada. Drab little figures, these, whether skinny or buxom, dressed predominatingly in sleazy black clothes, cotton stockings, nondescript hats, with worn purses and mended gloves.

Canadian working girls may buy their clothes at sales or make them themselves. They may shop weeks at noontime for the right accessories.

But they have an underlying sense of style, a trim look of chic, a real "class" that is utterly missing here. So is the colorfulness of their printed costumes, the dash of their gleaming white accessories (that must be washed every night), the glint of their silk stockings.

Saving for the Dowry.

This difference in appearance of working girls in Paris and Canada illustrates one of the most fundamental differences in the two countries. In Canada, the working girl puts her wages on her back, hoping to catch a millionaire and so climb out of the working class. Even if she helps support her family, she will deny herself lunches for a week to buy a new hat and sit up nights making a dress to go with it. For a smart looking Canadian Cinderella, in spite of the depression, still has a chance to marry above her station. In France, class distinctions are absolutely rigid. Paris working girls know they will marry some one in their own working class. Also they know that a little "dot" (dowry) will help them make a more advantageous marriage. So they save religiously!

French working girls cannot understand the Canadian working girl's restlessness. That a Canadian stenographer or clerk could save her money for a couple of years to take a trip and spend it all is utterly beyond their comprehension. So, too, is the fact that the Canadian girl gave up her job to take the trip! Once they have a job they hold onto it like grim death.

The Paris working girl's petty economies are just as much beyond the Canadian girl's ken. Many live in Paris suburbs with their families. These go to work a whole half hour early, just to save 50 centimes (three cents) on their round-trip subway ticket. They either bring their lunch or go clear home for it, rarely spending money for food at noontime. They make their underwear from pink or white muslin, never dream of silk. They turn their old dresses and coats inside out, sponge and clean them and make them up again. They do their own laundry, usually with an old-fashioned flatiron. In fact, they practice now the economies that we knew 30 years ago, before our standard of living soared.

Mannequins Highest Paid.

Mannequins are the top-notch of Paris working girls. They have a chance to strike the fancy of some rich man, when they model all the gorgeous clothes in high class houses. Moreover, they get as high as $180 a month, while girls in department stores get from $35 to $60. Models, after a few years, often become saleswomen in couturier establishments. These get less pay, from $80 to $100, but they get a bigger commission on everything they sell (calling "La Guelte") than they did when modeling, though mannequins get a small commission on every gown they model that is sold.

Both mannequins and the saleswomen at Patou's, Chanel's and the other places where Barbara Hutton (now Princess Mdivani) bought her clothes, are the envy of all Paris now. Some of them got such big commissions (she bought 50 costumes at Patou's alone, none under $100) that they can rest easy for a while.

Recreation is a simpler thing with French working girls than with Canadians. The boy friend usually comes to supper at the girl's home or goes to a concert, picnic or to a cafe with the family. Once in a long time the couple will take in a movie, and it will be a real treat that they look forward to. Or, perhaps once a season, they will go to "Robinson's," the working class paradise, on the edge of Paris, where there are dance floors, movies, platforms in the trees where you climb up to eat, and cafes on every side where you sit and sup one liqueur for hours. Once married, young folks prefer simple, inexpensive pleasure to spending their money.

Favoring Married Women.

Department stores encourage married women working. Fond of children as the French are, some of the stores make special provision for married women who have babies. The Galleries Lafayette has a charming nursery, where 65 bouncing babies under one year are cared for during the day while their mammas work, with time off to come in and feed them. Moreover, their mammas get three months off before their birth, with pay, and three months after birth, also with pay. And while their babies are of nursing age, they can come (and bring their babies) a half hour later mornings and leave a half hour early evenings. Many other stores and factories are starting cafeterias where food is sold at cost.

Practicality is behind most of the social service work done. And practicality is really the warp and woof of the French working girl's life. They love to see the fine ladies dressed up in gorgeous clothes. But they never dream, as our girls do, of being dressed up that way themselves some day. Perhaps that is why they are such a busy, satisfied lot. They know the life they have always lived. So they settle down, very young, to make the best of it they can.

Young Princess Compliments Sir James Barrie

A charming story illustrating the care with which the young children of the Duke and Duchess of York are being brought up, was told recently by Sir J. M. Barrie, writes the Toronto Mail and Empire. He was warmly welcomed in his native town of Kirriemuir, when he performed the opening ceremony of a bazaar in the town hall in aid of the funds of the town band. Thousands of people watched his arrival, and inside the hall, which is just across the road from the little house where he was born, there was not a vacant seat. Among those present was Mr. Peter Davies, the original of Peter Pan.

Sir James said that after all Provost Peacock, the chairman, had said about him, instead of going on being modest, he was going to give it up at once. Instead, he would tell them of a little compliment paid to him about a week ago by a person whom he would describe as the most delicious lady in the land on the occasion of her third birthday not far from there.

"She was sitting gazing with entranced delight at one of her birthday presents. It was a little toy table with two pointed flower pots on it, each about the size of a thimble, I said to her, 'Is that really yours?' and she said at once, 'It is yours and mine.'

"I cannot pretend," said Sir James, "that I am able to have such a pretty thought as that, but I think in the circumstances I may be allowed to borrow the Princess Margaret's phrase and say, 'Oh Kirriemuir, if there is grace in me that is worthy of sharing, it is all yours and mine.'"

The Wide Awake Wholesale House

The following was taken from a circular sent to retail merchants by a large wholesale house: "The value of your local newspaper cannot be overestimated. It's worth all the support and co-operation you can give. For the newspaper is a mirror reflecting the life of the community in which you and your store have an important part. Your advertisement is the reflection of your store. If it is not there the mirror is dark where your store should be. You are there but you cannot be seen. Your store is open for business as usual, but "Out of sight; out of mind!" To keep in step with the progress of your community; to get your share of business you must advertise regularly. Take your newspaper publisher into your confidence; he can give you invaluable assistance. Establish an advertising budget. Plan a regular schedule for your advertisements. It's a policy that is followed by the most successful stores; it's an idea that will be profitable to you.

Wild Dogs in U.S.

Towson, Md.—A pack of wild dogs, which attacked two outomobiles on highways near here, are being hunted by Baltimore County police.

The dogs have been troubling residents of the section and attacking persons for several months but this was the first time they have been known to jump at moving vehicles.

Reporting the incident to local police, William T. Ballard, Ruxton, Md., driver of one of the cars, asked permission to carry a pistol in his car.

OLD AGE

"When old age comes, what then? The preparation for it is a pure life, and faithfulness to duty now. First of all, try to make the best of it; not the best of what is bad at the best, but of what is, if I will but understand it, the best of my whole life, because it is the last"

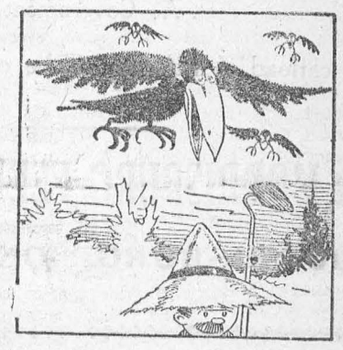
Mining Industry Is Now Second

Ousts Forestry — Agriculture Still Firmly Entrenched In First Place

The mining industry is now the second largest primary producer in Canada, superseding forestry, which has held this place for many years The premier position of agriculture is still firmly entrenched, says the monthly bulletin of the Canadian Bank of Commerce, despite the disastrous decline in prices and the low average grain crops of recent years. It was apparent as early as 1929 that the position so long held by forestry was in jeopardy, owing to the outstanding record of the mining industry, not only in comparison with other Canadian industries, but also with world mining, of which it has become an important unit.

During the ensuing years the forestry industry fell back rapidly under the impact of business recession, but the mining industry showed extraordinary resistance and eventually succeeded to its present position.

As illustrating the progressive importance of mining among the three primary industries, in 1920 the percentage of total primary production was as follows: Agriculture, 66.7; forestry, 17.9; mining, 9.4. In 1925, the figures had changed to: Agriculture, 67; forestry, 15.2; mining, 11; and in 1932, the percentages were: Agriculture, 47.7, forestry, 17.8; mining, 20.2



The farmers plant the corn—
Unless my guess is wrong,
Said Mr. Crow,
To feed us birds—
And help the caws along.

What A Pal

Two men were out hunting when suddenly the game warden appeared and demanded to see their licenses One immediately took to his heels and the officer rushed off in pursuit. For ten minutes the two dashed over the fields, and finally the officer caught the fleeing huntsman.

"Now, then," exclaimed the officer, almost out of breath, "I'll have to arrest you."

"What for?" demanded the hunter.

"For hunting without a license."

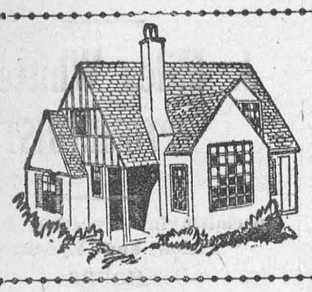
Very deliberately, the hunter fished the necessary document out of his pocket and presented it to the game warden.

"Why in blazes did you run away when you had a license?" asked the astonished officer.

"Well, you see," was the calm reply, "the other fellow didn't have any."—Sante Fe Magazine.

"It is not during prosperity that we reflect and progress, but rather during slack times when we must put our principles and our methods to the test of adversity."—Andre Siegfried.

"The principles of insurance can be made to meet the basic problems of unemployment and old-age insurance."—Franklin D. Roosevelt.



Woman's World

By MAIR M. MORGAN

Pungent Pickles

Many cuts of meat and plain, everyday vegetables that make wholesome meals need just a touch of a pungent, spicy relish to add zest to the menu.

Very often a well chosen pickle may be served with meat or fish in place of a specially prepared sauce. A baked fish that might otherwise demand a particular accompaniment to add the flavor that it lacks, gains piquancy from pickles that are ready to serve without extra effort.

So since the pickling season is with us again, we are giving you the recipes below in the hope that some of them will be just the kind of relish you want to add spice and pep to your meals, particularly during the long winter to come.

Oil Pickles

Fifty cucumbers three to four inches in length, 1 quart small white onions, ½ cup white mustard seed, 1/3 cup celery seed, 1 cup olive oil, 4 tablespoons sugar, 1 teaspoon white pepper, 1 quart vinegar, horse radish root.

Wash and wipe cucumbers. Peel onions. Put into a large crock and cover with a strong brine, using 1½ cups salt. Let stand over night. In the morning, drain and slice both cucumbers and onions. Mix mustard seed, celery seed, sugar and pepper with vinegar and stir until sugar is dissolved. Gradually beat in oil. Pack sliced cucumbers and onions in a large crock or sterilized jars and cover top with horse radish root cut in slices. Pour over the vinegar and oil mixture to cover. Seal jars or cover crock with a weighted plate, and keep in a dark, cool place.

Dresden Relish

Twelve sweet red peppers, 6 sweet green peppers, 6 medium sized onions, 2 tablespoons salt, 1½ cups light brown sugar, 2 teaspoons white mustard seed, 1 tablespoon celery seed, 3 cups vinegar.

Remove seeds from peppers, peel onions and put all through food chopper. Put into colander and pour several quarts of boiling water through mixture. Drain well and put into preserving kettle with vinegar, sugar, salt and spices. Bring to boiling point and cook slowly from 1 to 2 hours, until thick. Seal in sterilized jars. Store in a dark, cool place.

Beet and Horseradish Relish

Four cups chopped cooked beets, 4 cups shredded cabbage, ½ cup grated horseradish, 1 cup sugar, 2 teaspoons salt, ¼ teaspoon pepper, 2 cups vinegar.

The beets are cooked until tender, dipped in cold water to slip skins and measured after chopping. Combine all ingredients, using enough vinegar to cover mixture. Bring to the boiling point and cook five minutes. Seal at once, boiling hot, in sterilized jars.

Chili Sauce

12 medium-sized ripe tomatoes, 1 pepper and one onion, finely chopped, 2 cups vinegar, 3 tablespoons sugar, 1 tablespoon salt, 2 teaspoons each of ground clove, cinnamon, allspice and grated nutmeg.

Peel and slice tomatoes. Put in a preserving kettle with remaining ingredients. Heat gradually to boiling point and cook slowly two and one-half hours.

Ripe Tomato Pickle

3 pints tomatoes, peeled and chopped, 1 cup chopped celery, 4 tablespoons each chopped red pepper and chopped onion, 4 tablespoons salt, 6 tablespoons sugar, 6 tablespoons mustard seed, ½ teaspoon each of clove and cinnamon, 1 teaspoon grated nutmeg, 2 cups vinegar.

Mix ingredients in order given. Put in stone jar and cover. This uncooked mixture must stand a week before using, but may be kept a year.

Ripe Cucumber Pickle

Cut cucumbers in halves lengthwise. Cover with alum water, allowng two teaspoons powdered alum to each quart of water. Heat gradually to boiling point, then let stand over slow heat for two hours. Remove from alum water and chill in ice water. Make a syrup by boiling two pounds sugar, 1 pint vinegar and 2 tablespoons each of whole cloves and stick cinnamon (spices tied in a piece of musln) for five minutes. Add cucumbers and cook ten minutes. Remove cucumbers to a stone jar and pour over the syrup. Scald syrup three successive mornings and return to cucumbers.

Chopped Pickles

4 quarts chopped green tomatoes, ¾ cup salt, 2 teaspoons pepper, 3 teaspaans each mustard, cinnamon, allspice and cloves, ½ cup white mustard seed, 4 green peppers. sliced, 2 chopped onions, 2 quarts vinegar.

Add salt to tomatoes, cover, let stand 24 hours and drain. Add spices to vinegar, and heat to boiling-point and cook 15 minutes after boiling point is reached. Store in jars and keep in a cool place.

Spanish Pickles

1 peck green tomatoes, thinly sliced, 4 sliced onions, 1 cup salt, ½ oz. each cloves, allspice berries and peppercorns, ½ cup brown mustard seed, 1 lb. brown sugar, 4 green peppers finely chopped, cider vinegar.

Sprinkle alternate layers of tomatoes and onions with salt and let drain and put in a preserving kettle, adding remaining ingredients, using enough vinegar to cover all. Heat gradually to boiling point and boil one-half hour.

Chow-Chow

Two quarts small green tomatoes, 12 small cucumbers, 3 red peppers, 1 cauliflower, 2 bunches celery, 1 pint small onions, 2 qts. string beans, ¼ lb. mustard seed, 2 oz. tumeric, ½ oz. each of allspice, pepper and clove, salt, 1 gallon vinegar.

Prepare vegetables and cut in small pieces, cover with salt and let stand 24 hours; drain. Heat vinegar and spices to boiling point, add vegetables and cook until soft.

Lazy Daisy Pickles

One gallon vinegar, 1 cup salt, 1 cup sugar, 12 small hot red peppers, 1 cup custard seed, 2 gallons cucumbers 1½ to 2 inches long.

Wash cucumbers carefully and pack them in clean glass jars. Mix salt, sugar, mustard and peppers with the vinegar, fill jars to overflowing with it. Cover tightly, store in cool, dry place and pickles will be ready to eat in two weeks.

Pickled Onions

Peel small white onions, cover with brine, allowing one and one-half cups salt to two quarts boiling water and let stand two days. Drain and cover with more brine; let stand 2 days and drain again. Make more brine and heat to boiling point; put in onions and boil three minutes. Put in jars interspersing with bits of mace, white peppercorns, cloves, bits of bay leaf and slices of red pepper. Fill jars to overflow with vinegar scalded with sugar, allowing one cup sugar to one gallon vinegar. Cork while hot.

Green Tomato Chutney

Half peck green tomatoes, 1 lb. onions, ¼ peck ripe tomatoes, cut in pieces, ½ dozen sweet red peppers, chopped, 1¾ lbs. sugar, 2 tablespoons ground cinnamon, 1 tablespoon red pepper, 2 tablespoons cloves, ground, 1 tablespoon allspice, ground.

Slice tomatoes and onions, place in colander, sprinkle each layer with salt and let drain overnight. In the morning add remaining ingredients, cover with vinegar and cook until soft. Seal in covered jars. More or less sugar may be used as desired, also onions.

Ideas About Pressing

To bring up the corded effect on pique dresses, press them on the wrong side

Linen, because it requires a glossy finish, should be pressed on the right side.

Both real and artificial silks show iron-marks very easily and should be ironed on the wrong side.

The visit to the ironing board will be simplified if you bear in mind that artificial silk should be ironed with a cool iron and should be plactically dry before pressing; silks should be damped slightly more and the iron should be a little hotter; cottons should be damped fairly well and linens should be quite damp, while a very hot iron should be used for each.

Starched goods should be thoroughly damp and pressed quickly with a very hot iron.

Sunday School Lesson

Lesson III.—October 15.—PAUL IN ANTIOCH.—Acts 11: 19-30; 12:25. Golden Text—For I am not ashamed of the gospel: for it is the power of God unto salvation to every one that believeth; to the Jew first, and also to the Greek. —Rom. 1. 16.

TIME—Claudius becomes Emperor. January 24, A.D. 41. Church at Antioch founded, A.D. 38-41. Barnabas goes to Antioch, A.D. 42. Saul goes to Antioch, A.D. 43. Aid sent to Jerusalem by Saul and Barnabas, A.D. 44 or 45. Return of Saul and Barnabas, with Mark, to Antioch, A.D. 45 or 46.

PLACE—Antioch. Jerusalem.

GENTILES IN THE CHURCH, Acts 11: 19-21.

"They therefore that were scattered abroad upon the tribulation that arose about Stephen.' The martyrdom of Stephen was only the beginning of an increased persecution of the Christians. Led by raging Saul, the Sanhedrin and its myrmidons increased their bitter attacks on the disciples of Jesus, determined to root out the religion whose purity and power threatened their own evil gains and baleful ascendancy. "Travelled as far as Phœnicia." An ancient country along the seacoast north of Palestine. "And Cyprus." The large island in the northeastern portion of the Mediterranean. "And Antioch." The capital of Syria. "Speaking the word to none save only to Jews."

"But there were some of them." They were Jews who had lived abroad, among the Gentiles, and so were less bound by Jewish prejudices, and more eager to share their Christian blessings with men of other races. "Men of Cyprus and Cyrene." Barnabas was a man of Cyprus. "Who, when they were come to Antioch, spake unto the Greeks also." The noble Greek language was spoken all over Syria and throughout western Asia, but where "Greeks" are spoken of as opposed to "Jews," the general term "Gentiles" is meant.

"And the hand of the Lord was with them." A common expression to describe the controlling power of Christ and God. "And a great number that believed turned unto the Lord." These Greeks turned to the Lord in believing, carrying out their belief in obedience to the commands of Christ.

A GLORIOUS PARTNERSHIP, Acts 11: 22-26.

"And the report concerning them came to the ears of the church which was in Jerusalem." Travellers brought the news of the extension of Christianity to Gentiles. "And they sent forth Barnabas as far as Antioch." No more suitable delegate could have been found, for Barnabas was a native of Cyprus, brought up amid Gentile surroundings similar to those of Antioch.

"Who, when he was come, and had seen the grace of God, was glad." He rejoiced that the grace of God had been poured out upon Gentile converts as well as Jewish. "And he exhorted them all that with purpose of heart they would cleave unto the Lord." Barnabas knew that the Christians in the heathen city of Antioch were surrounded with many temptations.

"For he was a good man." a plain term, but crowded with honorable meaning. "And full of the Holy Spirit and of faith." So Stephen is described (Acts 6:5). "And much people was added unto the Lord." That, in the case of Barnabas, as in the case of Peter at Pentecost, was because of the convicting and convincing might of the Holy Spirit. Barnabas seems to have been older than Saul, and the vigor of that ardent soul was just what he needed to carry on work in so great a city as Antioch.

"And it came to pass, that even for a whole year they were gathered together with the church, and taught much people." Every Christian will seek out a partner in his Christian work, perhaps many partners. "And that the disciples were called Christians first in Antioch." The origin of this strangely compounded name—a Greek root "Christ," with a Hebrew meaning, "the Anointed," and a Latin termination, ian—is a matter of wide dispute.

THE HELPFUL HAND, Acts 11: 27-30; 12: 25.

"Now in these days there came down prophets from Jerusalem unto Antioch." Prophets were a class of religious teachers often mentioned in the New Testament.

'And there stood up one of them named Agabus." We shall meet him again on Paul's last journey to Jerusalem where the apostle encountered him at Caesarea. "And signified by the Spirit that there should be a great famine over all the world." That is, affecting all the world, not that the crops should fail simultaneously in all lands. "Which came to pass in the days of Claudius." There were terrible famines, as history relates, in many places during the reign of Claudius, and Josephus tells is that the famine was very severe in Judaea.

"And the disciples, every man according to his ability." Paul anticipated the wise modern motto, "To each man according to his need, from each man according to his ability." That was the good old principle of the tithe, and no better principle of giving has ever been discovered, provided it is not carried out in a Pharisaic spirit. "Determined to send relief unto the brethren that dwelt in Judaea." The organization of the Christian church began with this giving of aid to the poor, the appointment of the first deacons.

"Which also they did, sending it to the elders." The officers of the Jerusalem church, would be responsible for its wise distribution. "By the hand of Barnabas and Saul." They did not send subordinate workers, but dignified the errand an honored the recipients of their bounty by sending it by their pastors.

"And Barnabas and Saul returned from Jerusalem when they had fulfilled their ministration, taking with them John whose surname was Mark." This John Mark is the Christian who, probably under the supervision of Peter, wrote the second Gospel. He was the son of Mary, the cousin of Barnabas. He became the assistant of Barnabas and Paul on their first missionary journey.

"No Better Fishing Country Than Canada"

There is no better fishing country than Canada, believes Mrs. J. D. Abbott, well-known English sportswoman who has fished and hunted in many countries. She sailed from Quebec for her home in London with four fine specimens of her first fishing trips to this country.

They were all squared-tailed speckled trout, the largest specimen weighing eight pounds one ounce, and were mounted in special cases which Mrs. Abbott had set up in her stateroom on the liner. "They were caught in the Nipigon district," she said. Next year she hopes to come back and do some more fishing in Canada.

COMMENTS AROUND THE DIAL EVENTS

Tom Mix in New Series—Durante Noses Into Radio—New Names For Canadian Programs

Hero of New Series

Tom Mix's colorful career before the motion picture camera and as a cow-puncher, soldier and a U.S. Marshal in real is being dramatized before the microphone.

How Mix, whose motion picture roles and activities in real life have been equally thrilling, was shot by bandits while enforcing the law on the Western plains, wounded by the enemy in three wars, and starred with his famous horse, Tony, before the camera, will form the basis of the broadcasts, each of which will tell a complete story.

Mix's own adventurous career, fully as animated as any of his screen roles, began when he helped to round up snipers as a scout in the Spanish-American War. He fought in China during the Boxer uprising and was badly injured. Later he was with the British Army in South Africa during the Boer War.

Mix's first idea to enter the moving picture business came to him after winning the title of Champion Steer Thrower of the World at a Seattle round-up. In Hollywood he became one of the screen's greatest stars, and today is known to motion picture-goers in every nation in the world. Mix came to the microphone for his new series September 25.

* * * * * * *

Durante Noses Way Into Radio

Jimmie "Schnozzle" Durante of the "New York Durantes" slid across the studio floor and bobbed up under the mike, nose and all, to make his first sponsored radio appearance. Jimmie is doing the fill-in until Cantor returns from Hollywood.

The spotlight first fell on Durante when he trod the boards of burlesque theatres as an up-and-coming young comedian. From burlesque he went into vaudeville, and it was there that he became famous throughout the country.

From vaudeville he went to New York night-clubs where he became the favorite of the stay-up-late customers. Later Jimmie took his schnozzle and his capacity for insane comedy to Hollywood. Upon his return to New York he was cast for a leading role in "Strike Me Pink". Now that production has closed after a successful run.

Promises New Names For Radio

New ideas are always interesting, and one, is the disclosure that Forbes Randolph, who has been operating the "Theatre of the Air" in Toronto will re-open with a new policy.

Radio is playing no small part in the endeavour, since it is intended to give to radio listeners the finest in entertainment. The theatre will open around the end of the month, and from then on stars of both the air and vaudeville will be heard frequently broadcasting from the stage.

Canadians have been clamoring for a chance to air their talent, and now, they are to be given the opportunity. The feature, is the fact that all the artists are to be Canadian and Forbes, himself belonging to the Maple Leaf is going to develop talent which he says "Will be as good as any of the American artists, which up to now, have monopolized the ears of radio fans across the Dominion." That's a big statement to make, but Mr. Randolph has been associated with the New York show business for twenty years and he knows how names are built.

* * * * * * *

Post Scripts

The "Sisters of the Skillet" walked New York streets for months trying to pick up a sponsor for their act. They finally clicked, and now they are featured as the Texaco Reporters.

Al and Bob Harvey are back in Toronto after their tour of the British Isles. Successful . . . . ? Yes. They were headlined in some of the largest theatres on the other side.

Phil Harris, NBC's crooning bass and bandman, knocked about the country for five years with orchestras before he sang his first song.

Lum and Abner heard over the NBC, predict good times are here again for the farmer. Times are coming back so that he can sell off unproductive fields to city men for golf courses.

Paul Whiteman had to reduce his weight from 303 pounds to 150 before his wife, Margaret Livingston would step to the altar with him.

Salvation of Canada Seen in Gold Mines

Montreal.—Canada's gold mines may be her economic salvation, said Professor T. E. Gregory of London University, who arrived here on his way home. Professor Gregory is a world famed economist who has been attending economic and politcal conferences in Canada for the past month.

If the value of the dollar was cut to 50 cents by inflation, gold would almost certainly reach $42 an ounce as compared with $32, the present price, said Professor Gregory. It was not for Canada, however, to attempt radical experiments in the realm of economics. Canada's population was too small, compared to the size of the country, and conditions did not warrant radical attempts to rectify economic ills, he said. Professor Gregory believed this country should wait for economic solutions by the United Kingdom and the United States and then take advantage of her excellent position in the world economic scheme.

Vision at Birth

The normal infant is born with the faculty of distinguishing light from darkness and, possibly, with the sense of color.

But it is not born with stereoscopic vision, reports Wilbur B. Rayton, scientific bureau head of the Bausch & Lomb Optical Company.

MUTT AND JEFF— By BUD FISHER

Some Birds Are Jealous—Even Feathered Ones

News and Information For The Busy Farmer.

Canada has about 350 million acres of land suitable for farming purposes and of this total 163 millions are in occupied farms, of which nearly 86 million acres are improved land.

Certain suggestions for cures for hens eating their eggs have been made such as putting dummy eggs on which the hen damages its beak, or putting in the nest an egg filled with some substance such as quinine or mustard. The only sure cure, however, is to hand over the bird to the cook.

The seed of carrots, due to the fact that the individual seed-clusters do not ripen at the same time, cannot be harvested in the same manner as mangels and swedes. The individual seed-clusters must be picked by hand when they become brown, and several pickings are necessary to harvest the crop in best condition.

Dipping Sheep

Ticks and other external parasites of sheep are serious enought at any time, and cause more direct loss than is generally supposed, but during the period when the sheep are in winter quarters it is even more important to rid them of all sources of irritation. It is especially desirable that the flock be clean before and during lambing, otherwise the infestation is sure to be passed along to the lambs which will thus receive a very serious set-back at the most important period of their lives.

Ridging in the Fall

One of the best methods of killing weeds is to ridge the land in the fall. There are men who claim that there is no benefit in the way of killing rootstocks of sow thistle and couch grass remaining in the soil after summer cultivation. Others regard ridging as supplementary to early after-harvesting cultivation in the eradication of weeds. At the Kemptville Agricultural School in Ontario ridging is considered an important tillage practice, all land ploughed early and subsequently top worked being drilled up in early fall. Another advantage of ridging is that it aids in getting on the land a few days earlier in the spring, which is a decided gain on low or heavy land. Some clays tend to run together if left in a highly cultivated state all winter, but ridging up corrects this.

Killing The Flies

Most efforts to keep clear of stable flies have been restricted to spraying the flies on the cows. The suggestion is now made that the flies be fought in the stable as well. The idea is to spray the flies with a killing spray while they are settled in the walls and ceiling. If this spraying is done in the early morning, it will be more effective as the flies are then sluggish in their movements. Late afternoon is also a good time. Close the stable and spray with a fine mist that fills the air. One part of formalin in 19 parts of milk or sweetened water makes a good and cheap spray. The same mixture may be left around in plates for the flies to drink. Keeping all manure cleared away from the stable and yards will remove breeding places for the flies and reduce the nuisance. Where it is not convenient to move the manure to the fields it should be kept in a screened shed.

1932 Farm Figures

Depressed economic conditions have not affected the continuity of agricultural production in Ontario, according to figures just issued by the Department. The acreage planted to the principal crops amounted to 9,225,700 acres in 1932, as compared with 9,176,062 the previous year. Beans, potatoes and flax experienced the largest percentage decline in acreage, while barley, alfalfa, buckwheat and corn showed the greatest increases. The average yield per acre was very satisfactory, but gross value of agricultural production showed a decrease of $45,677,000 from the preceding year, the figure for 1932 being $226,445,000.

A crop of 45,759,800 lbs. of tobacco was grown in Ontario in 1932, marking a new high record of production. The outstanding feature of this industry is the increasing predominance of the bright flue-cured type which has increased in production from 8,726,000 lbs. in 1928 to 27,615,000 lbs. in 1932.

An increase in the number of horses and cattle on farms in Ontario and a reduction in the number of sheep, swine and poultry occurred between June 1st, 1931 and June 1st, 1932. The total value of all livestock and of each species fell during the year and was due chiefly to a further drop in values per head. The total value of all livestock amounted to $144,580,000 on June 1st, 1932, compared with $171,732,000 on June 1st, 1931, which represents a reduction of 16 per cent.

On Thinning Mangels

Experiments carried out over a period of eight years by the Dominion Experimental Farm, Ottawa, show that the largest crop of mangels is secured when they are thinned to a distance of 9 inches apart. The report also observes that the system of blocking plants into smaller bunches results in the production of many small roots, which are difficult to harvest.

Weekly Crop Report

In spite of low live stock prices, inquiries for sires of high quality and breeding females, particularly ewe lambs, has been greater than usual, according to a report from Dufferin County. Recent showery weather has greatly improved the condition of the land for fall wheat germination. Apple picking is in full swing in all the orchard districts and a fine crop of clean healthy fruit is being harvested. Pastures have held up fairly well in Eastern Ontario, and live stock should go into stables in good condition. From Leeds County comes the report that more clover and alfalfa are being left for seed than usual, the second cut alfalfa having an excellent seed set.

Hulless Oats

As a cheap source of high quality feed of particular value for poultry and young stock, and one which can be used at once without processing, except perhaps grinding, hulless oats has no equal, writes A. Gordon Skinner, Agricultural Representative in Haldimand County. The yields as recorded are most encouraging, and compare so favorably with the ordinary hulled varieties as to put the hulless variety in the lead when considering actual pounds of digestible nutrients produced, and after all that is the point in which we should be most interested. A 20 bushel crop of hulless oats reighing 50 pounds per measured bushel is equal to a yield of forty-two bushels when figured on the basis of 30 per cent. hull.

Hulless oats are very susceptible to smut, and unless measures are taken to prevent this disease, the loss will be heavy. Treatment is very simple, however, and can be readily made by any farmer with equipment which he may already have. Copper carbonate dust is used and according to instructions issued by the Deparmtent of Botany, O.A.C should be applied at the rate of about two ounces per bushel of seed. A hand operated cement mixer is an ideal piece of equipment for this operation, and is in common use in Haldimand. The Formalin treatment cannot be applied to hulless oats as it will destroy germination. Copper carbonate dust, on the other hand, is safe to use, and seed can be treated any time when it is convenient and stored without injury. Treated seed, however, cannot be used for feeding or milling purposes.

HANESVILLE

Mr. Johnson Fader spent Sunday with his cousin, Mr. Ambrose Gilmour.

Mrs. Donald Ullman and children of Kingston, are spending a few days with her parents, Mr. and Mrs. J. Murdock.

Mr. Archibald Irvine has returned to Guelph, to finish his studies.

Mr. and Mrs. Roy Robson sundayed with Mr. and Mrs. Geo. Kennedy.

Miss Zelma Gilmour spent Sunday with the Misses Edna and Nelda Fader.

Mr. Edge Collison is busily engaged in Morrisburg as carpenter.

Mrs. Arnold Fader spent Tuesday with Mrs. Floyd Shaver.

Mrs. Jas. Murdock and Mrs. W. W. Reynolds attended the funeral of Mr. Clark Hyndman on Monday, at Mountain.

Mrs. Ralph Hanes spent Tuesday with Mrs. Esrom Hanes.

Mrs. Fred Johnson and Freda spent one day last week with her mother, Mrs. Edson Johnson.

The Excelsior S.S. Class met at the home of Mrs. J.I. Murdock on Friday evening, to arrange their monthly class meetings for the winter. Will all members try and be present the last Tuesday in each month, for the study of some particular book in charge of Rev. Mr. Wilson. The first meeting will be held at the home of Mrs. Harvey Johnson.

WINCHESTER SPRINGS

A party was given Mr. and Mrs. Lloyd Casselman at the home of Mr. Mason Casselman Friday evening, before they left for their new home in Richville, N.Y. A large number of friends and neighbours met, and the evening was spen tin euchre and dancing. Mr. and Mrs. Casselman were called to the centre of the room, and presented with a purse of money. They replied in a few well-chosen words, after which the ladies served a dainty lunch.

Mr. and Mrs. A. Casselman and children called at the home of Mr. and Mrs. L. Carkner Sunday evening

Miss H. Robinson of Chesterville spent Sunday evening with Mr. and Mrs. T. Cunningham.

Mr. Arnold Casselman spent a few days with his aunt, Mrs. Landreville, in Ottawa.

Miss Olive Casselman of Chesterville took tea Sunday evening with her aunt, Mrs. R. Ball.

Mr. and Mrs. D. Hanson and children and Mrs. Dow Hanson of Waddington, spent Sunday with Mr. and Mrs. A. Bailey.

Miss G. Casselman spent Sunday with her aunt, Mrs. R. Casselman.

Mr. and Mrs. B. Libberty and daughter, Mrs. Ellen Libberty and Mr. B. Patterson, all of Ottawa, called Saturday at the home of Mr. and Mrs. G. Merkley.

Miss W. Ball, after spending some time with relatives in Canton, N.Y. returned to her home Thursday. She was accompanied by her aunt, Mrs. Wm. Connor.

Mr. and Mrs. Cyril Duff of Detroit spent a couple of days with their sister, Mrs. F. Bolton.

Mr. and Mrs. H. Patterson visited the latter's father at Avonore on Sunday.

The W.M.S. of the United Church held their meeting Tuesday afternoon at the home of Mrs. Aden Casselman. The attendance was rather small. The president had a splendid programe. The next meeting is to be held at the home of Mrs. A. Bailey.

Mrs. L. Bell of Winchester is visiting her uncle, Mr. A.E. and Mrs. Holmes.

Mrs. Orren Casselman took dinner with Mrs. D. Gallinger at Toyes Hill, recently.

METHODS OF SPREADING TUBERCULOSIS

(a) The Human Agent—The germs causing tuberculosis are found in the sputum of persons who have the disease. Whenever a person suffering from tuberculosis of the lungs coughs, minute droplets of secretion and phlegm are expelled into the air, and may be breathed into the bodies of those nearby or deposited on articles of food and clothing. The careless sufferer who expectorates on sidewalks and elsewhere provides another means of transmitting the disease. The sputum containing the germs becomes dried and mixed with dust, and the germs are inhaled or taken into the body with food, or on contaminated articles and fingers placed in the mouth.

(b) The Cow—Milk from tuberculosis cattle contains the germ of tuberculosis, and that is why raw milk (and cheese and butter made from raw milk or cream) is unsafe.

Resistance.

The tissues of the body have certain defensive properties. A body in good physical condition and in good hygienic environment has a much better chance of overcoming and rendering harmless tuberculosis germs taken into it than one who is weakened by other diseases, faulty habits of living, lack of cleanliness, overwork or worry.

Symptoms and Signs.

The symptoms and signs of tuberculosis are the result of poisons produced by the action of the germs gaining entrance to the blood stream and by the destruction of affected tissues.

Undue fatigue and lack of energy are probably the first symptoms noted by the diseased person. Cough expectoration of phlegm, loss of weight and appetite, sweating at night—are warning signs. Pleurisy with the formation of fluid on the lung or blood in the phlegm should always be considered as due to tuberculosis until proven otherwise.

SECOND AVENUE

Hurry! Hurry! Threshing grain is the order of the day in our hamlet.

Mr. and Mrs Arthur Henry spent Tuesday with their daughter, Mrs. Geo. O'Shaughnessy, Hoasic.

Mr. and Mrs. Fred McIntosh spent a couple of days last week in Syracuse, N.Y.

Mr. and Mrs. John Berton spent Thursday with Mr. and Mrs. Clark Garlough, Riverside.

We are all glad to see Mrs. Melvin McIntosh able to be about again

Mr. and Mrs. W. Baker, accompanied by Mr. H.P. Phillips, spent Friday afternoon in Aultsville.

Mr. Percy Prunner has retuned home from Kingston Hospital, where he underwent a serious operation.

Mr. Charlie Hart and daughter Beatrice called in Aultsville one day last week.

Mr. and Mrs. Earl Droppo spent a couple of days with friends in Quebec.

A number from here attended Avonmore fair on Wednesday.

Mr. Edward Hanna of Finch spent Tuesday with his daughter, Mrs. Earl Droppo.

Mr. and Mrs. Wm. Casselman spent Sunday at A.J. Henry's.

Mr. Coby of Morrisburg passed through here one day last week.

Mr. Sidney Prunner of Massena, N.Y., spent a couple of days last week with his brother, Mr. Percy Prunner.

Miss Laura Baker spent Saturday with Mrs. Melvin McIntosh.

AULTSVILLE PUBLIC SCHOOL

Pass for September, 240.

Sr. 1V—Irvin Beckstead 308H, Andeen Beckstead, 308H, Willetta Coughlin 285, Garnet Rombough 223, Clifford Hollister 207, Rex Robertson 239, Clark Burton 179, Isabel Morrison A.

Jr. 1V—Muriel Winters 254, Jean Rombough 190, Anita Germain 147, Mercedes Froats 132, Vaugh Beckstead 94.

Sr. 111—Grace Edwards 323H, Agnes Price 251, George Hickey 245, Robert, Hollister 189, Bruno Bisson A, Elie Bisson A, Lucien Bisson A.

Jr. 111—Harry Canough 283, Isabel Evans 242, Gordon Jarvis 166, Nora Carey 140.

S. S. 13, WILLIAMSBURG

September report. Names in order of merit.

Sr. 1V—Donald Dillabough, Pearl Robinson, Leda Burton, Gerald Merkley, Gladys McIntosh, Carl Hess.

Jr. 1V—Marion Herriman, Gerald Herriman, Elva MacKenzie, Cara Deeks, Rae Merkley, Greta Burton, Lila Merkley.

Sr. 111—Rae Weegar, Roy Lewis, Ella Deeks.

Jr. 111—Joye Dillabough, Lois Robinson, Emerson Barkley, Gerald McMillan, Grace Dillabough, Helen Lewis, Madeline Casselman.

11—Arthur Thom, Miriam Wallace, Barton Deeks, Lee Merkley, Lee Hess, Garnet Harper.

1—Garnet Stata, Helen Barkley Lyle Hess.

Sr. Pr.—Margaret Wallace.

Jr. Pr.—Edward Herriman, Melba Carruthers, Douglas Deeks, Florence Bouck, Joyce MacKenzie.

OLIVE T. McINTOSH, Teacher.

LIBERALISM VS. C. C. F.

(Continued from Page 1)

vate funds invested in the banks and be made available for the public benefit, rather than to buy out the banks with money that the people cannot afford to raise in taxes?"

Dominion and Provincial.

Contending that the Liberal party was responsible for nearly all the social and humanitarian legislation, he said the party stood for its retention and extension. He stressed the number of statutes of a social and humanitarian nature placed on the books by the Liberal party in Alberta prior to 1921 and at Ottawa over a period of years.

Favored Reciprocity.

The Liberals, he said, always had favored reciprocity with the United States, and now it stood pledged to a nation-wide scheme of unemployment insurance.

Among the social legislation points the Liberal party stood for were:

To increase the efficiency of primary education and to adequately maintain secondary education; proper maintenance and improvement of all the public health services of the province; unemployment relief should be afforded those entitled to it but it is a Dominion responsibility and the province and municipalities should be relieved of all liability in connection therewith. to enact legislation and take such other steps as will immediately give a fair measure of relief to the people of Alberta from the burden of both public and private debts and interest charges; to support the system of contributory unemployment insurance.

Dealing with these and other points, Mr. VanAllen said that "looking back over the C.C.F. platform, aside from its proposal to socialize all industry and abolish working for profit, it is self-evident that the C.C.F. has proposed nothing that the Liberal party has not been steadily putting into practice for years past."

But, he said, there came a point at which the Liberal and C.C.F programs parted company.

Turns Sharply Away.

"After following the Liberal trail for much of the way, the time comes when the C.C.F. policy turns sharply away from the course of normal progress, and selects a path heretofore pursued only by the Russian socialists," he said. "That course is the road to the socialistic state. Socialism in that sense is not the way of Liberalism. We as Liberals, believe that true liberty and happiness are best achieved by progressive reforms taken step by step as distinguished from revolution. The Liberal party opposes a socialistic revolution in Canada on various grounds."

Mr. VanAllen then analysed the various planks in the C.C.F. platform, scoring the tendency toward too much control of surpluses, confiscation and the threat of force.

"Thus," he said, "socialism becomes an autocratic rather than a democratic institution. This may be illustrated by reference to Russia in the present day, to France in the 19th century, to Rome and to every other state that has ever attempted socialism."

Radical Reforms.

Difficulties confronting the Dominion, he claimed, could be eliminated without loss of the freedom, enterprise and incentive which have made Canada what it is. The Liberal party proposed to meet the situation by a series of radical reforms of the existing system.

First, the party would remove trade barriers. "If returned to office, the party will remove these trade restrictions by abolishing the Bennett tariff increases and trade barriers of all kinds, negotiate trade agreements with other countries, and special reciprocity with the U.S., continue the British preference, put an end to artifical price control and break combines."

Secondly, Liberalism proposed a national central bank to control currency.

Thirdly, the party proposed as a permanent measure to cure unemployment, a national system of unemployment insurance.

Fourthly, a refunding of the public debt so as to provide for a general reduction in taxation.

At the conclusion of the address, a vote of thanks was proposed to Mr. VanAllen, which was concurred in by the meeting, which crowded the hall to the limit.

Mr. VanAllen addressed the club on Sept. 25th, on "Liberalism vs. the U.F.A."

S. S. 14, WILLIAMSBURG

September report. * denotes perfect attendance.

Sr. 1V—Betty McIntosh*, Hazel Barkley*, Edna Algire*, Clair Algire*, Lera Hummel, Harry Garlough.

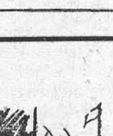
EUCHRE

The third of a series of Euchres will be held on Wednesday October 11th, in St. Mary's parish hall. Lady's and Gent's prizes and door prize. Sandwiches, cake and coffee will be served. Admission, 25c.

WOOD'S PHOSPHODINE.



The Great English Preparation. Tones and invigorates the whole nervous system, makes new Blood in old Veins. Used for *Nervous Debility, Mental and Brain Worry, Despondency, Loss of Energy, Palpitation of the Heart, Failing Memory.* Price $1 per box, six for $5. Sold by all druggists, or mailed in plain pkg. on receipt of price. *New pamphlet mailed free.* THE WOOD MEDICINE CO., TORONTO, ONT.

"Will we take $250 for the red bull?"

Young Tom Wilson had a string of cattle at the fair. A buyer took a fancy to the red bull, but Tom was afraid to take the responsibility.

"Why not telephone your father?" the buyer suggested, and in a few moments Tom was speaking with his father at the farm.

"Will we take $250? You bet!" the old man decided, and thanked his stars again for the convenience and value of the Long Distance telephone.

For 30 cents you can telephone about **100 miles** by making an "any-one" call (station-to-station) after 8.30 p.m. See list of rates in front of directory.

THE BELL TELEPHONE COMPANY OF CANADA — LOCAL LONG DISTANCE TELEPHONE

Long Distance **is surprisingly inexpensive**

SUBSCRIPTION RATES

$1.50 per year, strictly in advance, to any address in Canada; when not paid within three months, $2.00 per yer to any address in Canada. Foreign subscriptions, $2.00 in advance. All subscriptions date from the first day of the month.

ADVERTISING RATES

Display or open advertisements, one insertion, 50c per inch; second and following insertions, 35c per inch; 200 inches and over, by contract, not over one year, 20c per inch. All Legal, Government and Municipal display advertisements will be charged at 50c per inch, regardless of number of inches or number of insertions.

200 inches or more must be reserved at time of making contract in order to earn the 20c per inch rate, and no rebate will be allowed the advertiser, should more than 200 inches be taken out within one year, without having been reserved by contract.

Should the advertiser fail to take out the number of inches contracted for, the amount of space used will be charged at the regular card rate in force at the time of making contract.

Lost, Found, To Let, Wanted, Articles for Sale, etc., 5 lines and less first insertion 50c; each subsequent insertion 35c.

NOTE—All small advertisements received by mail must be paid in advance.

Government, Legal and Municipal Notices, By-laws, Election Readers, etc.: 15c per line for the first insertion; 10c per line for each subsequent insertion; 12 lines to the inch.

Advertisements ordered for insertion without instructions will be published until instructions are received to discontinue same.

Notwithstanding anything to the contrary that may appear in the contract, cuts left in our possession more than 30 days after date of insertion will be destroyed.

PROFITS IN NATURAL GAS

Huge dividends are being distributed to shareholders of companies operating in the prolific Natural Gas Fields of South Western Ontario.
A great public utility, serving over half a million Canadians, offers you a greater avenue of monetary reward in a shorter time than almost any other medium of investment.
Drop us a line and we will be pleased to mail you our descriptive folder containing interesting information and facts.

EMPIRE NATURAL GAS LIMITED

18 TORONTO STREET, TORONTO

The Dominion Coast To Coast

Halifax, Nova Scotia.—An increase of over 8,000,000 pounds in the landings of fish in the Maritime Provinces in June, compared with landing during the same month last year, is reported by the Eastern Division of the Department of Fisheries. Catches totalled 56,310,300 pounds valued at $1,093,264, while in June last year 47,836,100 pounds were landed with a value of $1,086,454. The principal varieties were lobsters, salmon, cod, mackerel, halibut and haddock.

Fredericton, N.B.—According to Mr. Allan King, Manager of the Minto Coal Company, Minto, N.B., the coal mining industry of the province is busier than it has been for fifteen years, and is now working at 100 per cent. capacity.

Montreal, Quebec.—The recent rapid increase in the demand for electric washing machines in place of the hand-worked variety is shown in the latest report on the industry from Ottawa. From 1927 to 1932 inclusive electric machines were turned out in Canada at the rate of three to one of the other kind, the number of electrically driven machines made during the period being 345,051 compared with 105,289 hand and 13,905 other power machines. There are seventeen factories in Canada engaged in the industry, the value of their output in 1932 being $3,241,323.

Toronto, Ont.—Cattle receipts for the first seven months of 1933 at the Union Stock Yards, Toronto, were about the same as those for the same period last year, comparisons being as follows:

	1933	1932
Cattle	400,422	359,655
Calves	174,747	181,347
Hogs	1,168,642	1,230,627
Sheep	273,527	238,953
Horses	22,732	27,894

Brandon, Man.—The Manitoba Provincial Exhibition in 1934 will be held in Brandon from July 2 to 6, according to a definite agreement entered into on dates by members of the Western Canada Class A Circuit. This city will, as usual, start the circuit, and only one change was made in the dates. Due to the World's Grain Exhibition and Conference, Saskatoon followed Regina in 1933, but next year the old order will be resumed with Calgary, Edmonton, Saskatoon and Regina holding their shows after Brandon.

Moose Jaw, Saskatchewan.—An illustrated booklet dealing with the city of Moose Jaw, compiled by the Board of Trade, shows that this important wheat and cattle-raising centre is progressing and consolidating in a number of directions—industrially, commercially and socially. With a population of 21,300 in the city itself, there are 12,000 farmers within a radius of fifty miles. As a manufacturing centre Moose Jaw stands in first place in the Province of Saskatchewan, with a production of $535 per capita.

Lethbridge, Alberta.—Tests made of the Roney-Nordon Twin River oil well south of Lethbridge are reported to show that the well is good for fifty barrels of clean oil a day, with a gas flow of around 5,000,000 cubic feet. The oil was turned into tankage and flowed at the rate mentioned, and in the hope of increasing production it has been decided to shoot the well to crack up the porous lime to enable the oil to flow more freely. The well is free from water.

Calgary, Alberta.—According to Mr. L. R. Hess, general manager, the Calgary plant of the Canada Malting Company has been running twenty-four hours a day to supply malt to United States breweries since beer was legalized in that country. Extra labor has been engaged, and between 75,000 and 90,000 bushels of barley will be required each month for the malt supply, a boon to Alberta barley growers.

Victoria, B.C. — A Dominion Geographical Survey Report announces that vanadium of appreciable value has been identified in a primary copper ore body on Quadra Island, near Victoria, in the form of a finely banded, silicious, carbonaceous material, one to four inches thick and carrying some thin, greenish copper stains. On analysis one sample yielded 3 per cent. vanadium and another 2.16 per cent., or 50 pounds and 43 pounds to the ton respectively. At present prices this works out at $180 and $125 to the ton. Vanadium is a pale grey metal with a silver lustre, and, like chromium, is valuable for mixing with iron to make a high grade steel.

SHE LOST WEIGHT EACH WEEK

The Ideal Way to Reduce

A woman writes to tell how she is reducing excess fat—and her way seeme to be the ideal way.

"I am 59 years old, 5 ft. 5½ in. in height, and was 190 lbs. when I started taking a level teaspoonful of Kruschen Salts every morning. I went slowly down in weight—some weeks 2 lbs., others just 1 lb., until I got down to 154 lbs. I have never felt better in my life than I do now, and I feel so much lighter and feel years younger." —(Mrs.) W. I.

The action of Kruschen Salts, taken regularly every morning, is to effect a natural clearance of undigested food substances and watery waste matter. It is that waste matter which is stored up in the form of ugly fat, if it is not regularly expelled.

A FRIEND

Commend me to the friend that comes
  When I am sad and lone,
And makes the anguish of my heart
  The suffering of his own;
Who calmly shunsthe glittering throng
  At pleasure's gay levee,
And comes to gild a sombre hour
  And gives his heart to me.

Commend me to that generous heart
  Which, like the pine on high,
Uplifts the same unvarying brow
  To every change of sky;
Whose friendship does not fade away
  When wintry tempests blow,
But like the winter's icy crown,
  Looks greener through the snow.

He flits not with the flitting stork
  That seeks a southern sky,
But lingers where the wounded bird
  Hath laid him down to die.
Oh, such a friend he is in truth,
  Whate'er his lot may be,
A rainbow on the storm of life,
  An anchor on its sea.

The Racket of Rubber Bees

Although honey stealing by bees is likely to be most troublesome in late summer, the beekeeper has to keep in mind that robber bees may start their racket at any time. In warm weather when there is little or no honey to be got from the flowers, the bees will easily yield to any temptation to obtain it anyhow. After more or less fighting they will overpower any very weak colonies, and carry the honey to their own hives. Old robber bees have a shiny appearance, the hair having become worn off with entering so many different hives. No colony should be allowed to grow weak, says the Dominion Apiarist, and no honey or syrup should be exposed in the apiary.

New German Program Encourag s Motorists

Germany's Chancellor Hitler has positive ideas about the transportation industry, and to show where he stands in the matter, has removed the once heavy tax on new automobiles. Also being convinced that master highways were much needed, he has started work on these modern arteries of travel. Hitler's highways are minus curves wherever possible, and, to handle traffic in two directions, on paved surfaces each 27 feet wide, separated by a strip 15 feet in width.

Survey of Scottish Coast is Planned by Lindberghs

Stockholm, Sweden. — Colonel and Mrs. Charles A. Lindbergh plan to fly to Scotland shortly, via Amsterdam, Holland, for a survey of the Scottish coast, it was understood last week. They recently completed an aerial survey of a possible air route over the North Atlantic.

Lindbergh said it was unlikely they would fly the Atlantic again this season. They probably will dismantle their plane and return to the United States on a liner.

Faith

Faith has been customarily portrayed as one of the gentle graces; as a lovely feminine figure with gentle face, slender, graceful physique, clad in easy flowing robes. Such a portrayal is not altogether appropriate. Faith ought to be represented as a masculine figure; strong, athletic, daring, with eyes of fire, with muscles of steel, with will of iron, with every facult in full control; not quiescent but in intense actiony. Faith is trust, but it is more. It is action on the basis of what is believed. It is daring; it is courageous; it is full of initiative. To conceive of faith as a passive attitude of mind, is to mistake its real nature. Where there is real faith the whole man proceeds to act. Art, in picturing faith as feminine, has not been profoundly true to the New Testament. Faith has more masculine than feminine qualities.

Common Days

God keep us through the common days,
  The level stretches, white with dust,
When thought is tired ,and hands upraise
  Their burdens feebly, since they must.
In days of slowly fretting care,
Then most we need the strength of prayer.

—Margaret E. Sangster.

In order to see into mankind, into life, and still more into ourselves, suffering is requisite.—Richter.

Have faith in yourself whether others believe in you or not.

Novel Treatment Curbs Insanity

Experiments With Endocrine Gland Hormones in Illinois Give Highly Beneficial Results

Chicago.—Science's newest weapon against disease, the hormones of the endocrine glands, are helpng to win its fight to reduce incurable insanity, it is indicated in a report n the Illinois Medical Journal by Dr. James H. Hutton, of Chicago.

Nearly 27 per cent. of 172 insane patients who received glandular treatment in addition to psychiatric routine were sent home, Dr. Hutton reported, while discharges from state hospitals as a whole ran only 17 per cent.

The patients were given the novel treatment in a two-year study of the relation of endocrine disorder to insanity conducted at the State Hospital for the Insane at Elgin, Ill.

The beneficial results of the extra treatment were such that it has been made a regular part of the treatment, the report adds, and a similar policy is urged for all state hospitals.

The endocrine glands include such structures as the pituitary as the base of the brain, the thyroid, gonads, parathyroids and adrenals, controlling most of the vital processes.

The study of their relation to insanity was prompted by the rapid increase in insanity in Illinois evidenced by a rise from 57 for each 100,000 of population in 1880 to 309 in 1931. In the last ten years the population of the state has risen 18 per cent. and its insane 33 per cent.

Ardent Champion Of Saskatchewan

Prince Albert, Sask.—Why move farmers from southern prairie drought areas to Northwestern Ontario, when Northern Saskatchewan offers plague-free settlement areas as good as any in the Dominion? This question was asked by Mayor H. M. Sibbald, of this city, when informed of the resolution passed at the Northwestern Ontario Chambers of Commerce convention in Fort Frances urging the study of the possibility of moving dry-area farmers from Saskatchewan and Manitoba to Northwestern Ontario.

"Without Government intervention," Mayor Sibbald remarked, "thousands of farmers have come into this city's trade territory from drought-stricken areas. There is room for thousands more where droughts, plagues and crop failures are equally as unknown as in Northwestern Ontario."

State Protects Males From Wiles of Women

Regina.—Let the modern woman beware how she uses her makeup. There is at least one law on the statute books to protect males in this country from the wiles of women who use artificial aids to enhance their charms.

Scanning an ancient volume Dr. J. F. Honsberger, Saskatchewan lawyer, came across an act passed by the British Parliament in 1670 and never repealed which prohibits women from adding to nature's gift on pain of being burned as witches.

Here is the law: "All women of whatever age, rank, profession or degree, whether virgins, maids or widows, that shall from the passing of this act impose upon and betray into matrimony any of His Maesty's male subjects by scents. paints, cosmetics, high-heeled shoes or bolstered hips, shall incur the penalty of the laws now in force against witchcraft."

Toronto Justly Earns "Convention City" Title

Toronto.—Known as a convention city from one end of the continent to the other, Toronto is to have more than 150 conventions next year. Bookings have also been made for 1935. Negotiations are under way to bring conventions seven or eight years distant to this city.

One important factor in bringing so many conventions hre next year is the fact that the city's centennial celebration is to take place then. Just as the Century of Progress exposition drew many conventions to Chicago, the coming centennial has proven a drawing card for Toronto.

You will never have what you like until you learn to like what you have.

BEFORE BABY COMES

A mother is a mother before her child is born. SCOTT'S EMULSION furnishes an abundance of the necessary Vitamins A and D for health and strength of mother and child.

SCOTT'S EMULSION
RICH IN VITAMINS
12-33

Autumn Briefs

London has more than half its total population under thirty years of age.

The older a codfish is the richer is the cod-liver oil it yields in vitamin A.

A room full of typists at work is equivalent in noise to a motor-horn heard twenty feet away.

Among the outlying police stations in country districts in England, some 200 are still unprovided with a telephone.

After lying buried under peat for a thousand years, a keg of butter dug up in the Isle of Skye was still fresh.

It would require a fleet of 125,000 aeroplanes, each carrying one ton of bombs, to destroy the whole of London in one operation.

London's new Passenger Transport Board controls 6,000 omnibuses, 2,600 tramcars, 2,239 electric railway coaches, and 226 railway stations.

Cycling has become a craze in the Chinese city of Canton, where British machines are the most popular because they are cheap, light, and strong.

The United Kingdom's eating less meat. In London alone 4,264 fewer tons of meat were consumed during the first half of this year, as compared with the same period in 1932.

There are fourteen private residences, including the house of the Speaker, in the Palace of Westminster, as the Houses of Parliament are called officially.

Employment is provided for 44,750 in the 646 new factories established in Great Britain last year. Of these factories, 251 are situated in the London area.

Drought and grasshoppers have combined to affect Canada's wheat harvest prospects very adversely, although earlier in the season a bumper crop was expected.

Only one woman is practising as a plastic surgeon in the West End of London. She comes of a medical family, and during the War assisted at plastic operations on soldiers.

A single map showing all the travelling facilities in London, including railways, trams, buses, and coaches, is not feasible, as it would require an area as big as that covered by Westminster Abbey.

Building societies are spreading over the Continent. In Germany between 1924 and 1931 they acquired 400,000 members. Austria has twenty-nine societies, Switzerland five, and Hungary three.

After London, Manchester had the most motoring offences last year, with 14,513 cases. At the other end of the scale came Tunbridge Wells, with forty-nine, Dover with forty, and West Hartlepool with only twenty-eight.

Of the fatal road accidents which occurred in Gt. Britain, the greater proportion happen in built-up areas, and only twent-five per cent. in open country. Comparatively few occur in really dense traffic, even in the London area.

Measuring six feet in width and twenty feet in length, London's smallest house is situated in Hyde Park Place. It has a hall and one room on the ground floor, and two more upstairs reached by a narrow iron ladder.

"My father is a wash-out," was the reply of a school child in Ladysmith in answer to a question. It proved that the parent was employed in washing out boilers at the engine sheds, "washout" being his official designation.

Thirty-two vessels of the German Fleet, which was scuttled in Scapa Flow, have been salvaged after nine years' work. The remainder will be left where they sank, as they are not worth raising owing to the drop in value of scrap metal.

Visitor to Pitcarn Writes Impressions

A visitor to Pitcairn, a British island in the Pacific, gives her impressions of place and people. "The islanders are good-looking, tall, straight and lean with skins varying from pale olive to dark brown; and eyes and hair mostly black, though here and there I saw a head of brown and clear blue eyes, which told of European origin.

"They spoke good English with soft, well-modulated voices, and their smiling good humor and charming manners won all our hearts.

"The men were dressed in cotton singlets or shirts and dungaree trousers; the women in cotton frocks of pinafore style; one, evidently the 'Belle of Pitcairn,' in a bright pink silk sleeveless confection, with shoulder cape. I saw no stockings and very few shoes. All wore native-made raffia hats, except one or two who said proudly that their hats had come from Panama—the Paris of Pitcairn — but nearly 4,000 miles away.

"I asked a nice-looking woman with a rather sad face if she would not like to go away from the island. 'Yes, lady,' she said 'but how can I? I have no money'."

'Tis Better Than None

Chicago. — A shy, effeminate youth with a lisp in his speech held up Peter Damiani, 17, and Myrtle Wilkenson, 23, as they sat in an automobile in front of Damiani's home. He looked at the change Damiani handed him, quietly remarked that "thirty thenths ithent tho much but ith thomething," and slipped away.

"The history of all education seems to be a continual cycle of knowledge getting overlaid more and more by mere opinions."—Lord Eustace Percy.

Claims Short Waves Cure Many Ills

German Doctor-Scientist Tells of Experiments With Wireless

London, Eng.—Cures for various ailments by the use of short wireless waves are claimed by Dr. Erwin Schliephake, a German physician and scientist.

Writing in the British Medical Journal, he describes how after long study and experimentation he has succeeded in treating deep-seated abscesses in the human body by passing ultra-short wireless waves through the patient, who was not in immediate contact with any instrument.

He found, he said, that various tissues exhibit entirely different degrees of conductivity in the presence of these waves, which act in characteristic ways according to the wave lengths. Many of the effects were said to be quite selective.

Dr. Schlephake declares he has used waves to treat pulmonary abscesses after pneumonia, in pleural empyema, pneumonic tuberculosis, in certain forms of peritonitu, in migraine (where waves of 15 metres were reported most satisfactory) and acute tonsilitis.

The Record "Mammonth Cheese"

One of the exhibits at the New York State Fair at Syracuse is to be a "mammoth cheese" weighing 12,000 pounds, that is expected to open the eyes of the natives, writes The Brockville Recorder.

But, as a correspondent of the Montreal Gazette points out, this cheese, large though it is, will be a mere pygmy in comparison with one that Canada sent to the World's Fair in Chicago 40 years ago and that cheese, it is worth remarking, was a product of the eastern part of Ontario, still famous for its dairy production.

"This reminds me," writes G. A. Marson, of Montreal, to the Gazette, "of the mammoth cheese from Canada which formed part of the Canadian exhibit and which I saw at the World's Columbian Exhibition at Chicago in 1893. This enormous mass of cheese was manufactured at the Dominion Experimental Dairy Station, at Perth, Ont., under the supervision of Prof. James W. Robertson, who was then acting as Dominion Dairy Commissioner. As much as 207,200 pounds of milk were used in making it, that quantity being equal to the milk of 10,000 cows for one day in September. The cheese weighed 22,000 pounds net. It was encased in the mould or hoop of steel in which it was pressed and a pressure of more than two hundred tons was applied to make it perfectly solid. It measured 28 feet in circumference by six feet in height. A special truck was made for transporting it through Great Britain after it left Chicago. It was later sold to Mr. T. J. Lipton, of London, England, who exhibited it as a feature of his business in every large city of Great Britan and Ireland."

Syracuse Fair may have its 12,000-lbs. cheese, but Canada made and displayed one of 22,000 lbs. 40 years ago. And that record does not seem to have been exceeded since that time.

Religion

Religion is a necessary, if indispensable element in any great human character; it is the tie that connects man with his Creator, and holds him to His throne.—Daniel Webster.

If for some of us action cannot mean doing, then remember bearing, too, is action, often its hardest part.—W. C. Gannett.

Pains After Eating? Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes belching, heart burn, bloating, sour stomach and indigestion. Bisurated Magnesia taken after meals will give such quick and pleasing relief you will be surprised. Any druggist will tell you ordinary Bisurated Magnesia is fine for sour acid stomach conditions. It should be in every home. It works.

Man's Lot

Each man's life
The outcome of his former living is;
The by-gone wrongs bring forth sorrows and woes.
The by-gone right breeds bliss.

—Edwin Arnold.

Nothing is of greater value than a single day.—Goethe.

SIMPLY WORN OUT?

Take Lydia E. Pinkham's Vegetable Compound

Can anything be more wearing for women than the ceaseless round of household duties? You have no time to be sick . . . you are tired . . . ailing . . . yet cannot stop. There comes a time when something snaps and you find yourself simply worn out.

Lydia E. Pinkham's Vegetable Compound will help you. Its tonic action will give you renewed strength, and will make your daily tasks seem easier to you.

98 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

MINARD'S "KING OF PAIN" LINIMENT

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile —No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c. at all druggists. 54

Cuticura Ointment
To soothe and heal burns, cuts, rashes and all skin irritations of childhood.
Price 25c. and 50c.

LOCAL AND GENERAL

Mr. Sylvio Mantha, of Montreal, was a guest at the home of Mr. and Mrs. Albert Bourette on Tuesday. He was accompanied to Morrisburg by his mother, Mrs. Mantha, of Montreal, and Mrs. Laura Gagnon of River Beaudette, who are receiving treatment at the Locke clinic.

To the citizens of Morrisburg who have been patiently awaiting a new source of current that will standardize the almost intolerably poor lights which we have at present, it will be good news to know that within a week or so, our light and power troubles will be a thing of the past. The new Diesel Electric Plant, being installed under the supervision of Engineer Geo. N. Longmuir, is of sufficient capacity to take care of this town's wants for many years to come. The fact that this new plant has an automatic governor will eliminate all fluctuation in your lights, so noticeable at present, said Mr. Longmuir, and the new plant should take care of double Morrisburg's present demand. We understand that Mr. Longmuir, whose family has joined him, may become a permanent resident of Morrisburg.

* * *

For the purpose of raising money for their winter's work, the Women's Institute will hold a Euchre in the Town Hall, on Tuesday evening, October 17. Ninety per cent. of the funds of the Institute is spent for local relief, and other town purposes, and it is hoped that the general public wil show their appreciation by attending this euchre. Please remember the date, Tuesday Oct. 17, and come. Tickets 25c. bc

* * *

A box of beautiful, ripe, raspberries in the month of July might not have the same appreciative value as one in October, and for this reason, we believe that Mrs. Meredith Garlough's kindness in presenting "The Leader" with these berries at this time of the year, is worthy of special mention. A few raspberries ripening in October is not a rare thing—they are to be found, perhaps, every year, but never in such quantities as Mrs. Garlough states she has picked them, from bushes in her own garden, during the last two weeks. "The Leader" expresses its appreciation of this very rare gift at this time of year.

* * *

A very unusual result followed the blowing out of a tire on a truck Tuesday at the noon hour, when a piece of rubber about three and a half inches in circumference and a half-inch thick, landed through the glass of a rear window in Mr. Sim Bogart's residence on King street, Chesterville, and went through the blind and curtain. Chester Timmins of Winchester was at the wheel of the Chevrolet truck proceeding north on Main street, Chesterville, and when opposite the open space between the Masonic Hall and Mr. W.B. Lawson's residence, the tire on the right rear wheel blew out with a resounding report, projecting the piece of rubber considerably more than a hundred yards, and through the window, at an elevation of about eight feet from the ground. The truck did not leave the roadway, and no one was injured.

LOSES HAND AND FOREARM WHEN CAUGHT IN BLOWER

Serious injury and the loss of the left forearm was suffeed by Harold Loughridge, 19-year-old son of Mr. and Mrs. Bradford Loughridge, of Morewood, late Saturday afternoon.

The young man was feeding an ensilage blower on the farm of Edward Cox, southwest of Morewood, when the accident occurred. In some way his hand got caught in the jaws of the machine, and before it could be stopped the hand and about four inches of the forearm were chopped off. Drs. D.S. McDougall of Russell and J.C. Gormley of Crysler, who attended, decided to remove the youth to an Ottawa hospital. He was taken to Ottawa by Rev. J.H. Smith, where the forearm was amputated about two inches below the elbow.

Loughridge had not been feeding the cutter during the day, and took another's place to feed the last load to complete the filling of the silo.

CHURCH OF ENGLAND

MINUTES OF COUNCIL

Regular meeting of Council for October held in the Town Hall on Monday the 2nd, at 8.30 p.m.

Members all present.

Moved by Mr. Brodie, seconded by Mr. Roach, that minutes of previous meetings as read be adopted.

Moved by Mr. Roach, seconded by Mr. Becksted, that the County Treasurer be instructed to delete from his record of unpaid taxes municipality of Morrisburg, $18.95, blk. 34, lot f, Augusta Street, owner Alvin VanAllen.

Moved by Mr. Roach, seconded by Mr. Beckstead, that the Reeve and Clerk be instructed to obtain, if possible, an agreement with the Ontario relief officer for the building of sewers on Gravel Road, First Street to the property of E.C. Merkley, on Main Street, and the improving of ditches.

Moved by Mr. Brodie, seconded by Mr. Roach, that no relief will be granted to any person who has not been a continuous resident of the municipality for at least a month prior to date of making application

Moved by Mr. Brodie, seconded by Mr. Roach, that John Thompson be engaged to collect back taxes for 1933, and also light and water rates, to be paid 10 p.c. on all collections on light and water accounts. We reserve the right to pay lump sum for taxes collected, depending upon the amount turned in.

Moved by Mr. Brodie, seconded by Mr. Roach, that this Council desires to put on record the fact that, having obtained consent from the Department of Railways and Canals to erect a building and install a Diesel engine on part of the land covered by lease No. 13815, on the understanding that in case of the power development on the St. Lawrence river, the village of Morrisburg would not ask for any compensation for the removal of said building or engine, and that a copy of this resolution be sent the Department.

Special meeting of Council held in the Clerk's office on Wednesday, Oct. 4th, at 7.30 p.m.

Present—Messrs Brodie, Roach, Jarvis, Beckstead.

Moved by Mr. Beckstead, seconded by Mr. Jarvis, that Mr. Brodie act as chairman.

Moved by Mr. Jarvis, seconded by Mr. Beckstead, that the Treasurer be authorized to pay the Board of Education $300.00 on account requisition.

Moved by Mr. Jarvis, seconded by Mr. Becksted, that the Reeve be instructed to make a claim against the Royal Phoenix and North British and Mercantile Insurance companies for the amount shown in a copy of claim as filed with the Clerk.
