"The Store of Miracle Values."
Telephone 14, - Winchester.

Dear Mr. Reader

Your automobile was built to give you service, and no doubt has, but a piece of machinery needs adjustment and lubrication periodically. In a spare moment run down the following list of minor troubles and check opposite each to indicate whether or not you are satisfied with the performance of your car.

	O. K.	POOR
1—Low Gasoline Mileage		
2—Engine Lazy on Pick-Up & Hills		
3—Generator charging rate too High or too Low		
4—Brakes Imperfect		
5—Steering Imperfect		
6—Engine Misses at High or Low Speeds		
7—Engine Overheats		
8—Loss of Power		

It is our sincere hope that your driving be most pleasant and free from trouble and the above list shows a series of repairs at special prices. Have necessary adjustments or lubrications performed NOW AT ROCK BOTTOM PRICES.

Melvin's Garage,
ALBERT JOHNSTON, Service Manager.
Phone 113 - - Winchester

Our Column

Horse races still have their attraction.

Civic holiday was generally observed in Winchester.

For an endurance record it is impossible to beat a golden wedding.

A good place to stop and think things over is at a railway crossing.

The weather god was very kind on Monday in giving so fine a holiday.

We still maintain that gasoline and whiskey are a poor mixture in an automobile.

Married men never realize the worth of a good woman until they try to put the baby to sleep.

By a report of the Provincial Government there are over 600,000 motor vehicles in Ontario owned by the people of the Province, and ten years ago there were less than 150,000. If the number of cars owned by tourists is added to this, it would appear that at times there must be close to a million vehicles on the highway These figures only go to show there should be even more care and courtesy shown by drivers.

The Canadian people will readily acquit Mr. Mackenzie King of any direct knowledge that the Beauharnois Corporation was contributing to the expenses of his trip to Bermuda, though they may think him indiscreet in allowing his hotel bills to be paid. What they will not so easily excuse is the sort of men he chooses for his political friends and for members of the Senate. The Conservatives claim that their skirts are clear, and that it is the Liberals who are involved in the present scandal. Well then, the Conservatives are in power. Here is their chance to clear up the situation, once for all. If they have nothing to conceal, they have everything to gain by carrying the investigation through to the end.—Orillia Packet.

LOCAL AND GENERAL

Service will be held in St. Matthias' Church on Sunday evening at 7.30 o'clock

Rev. W. J. Robertson of Osnabrnck, will preach at Ormond on Sunday, Aug. 9th, at 11 a. m. and 7 30 p. m. A cordial invitation is extended to all to attend these service.

Traffic Officer J. Montgomery was instantly killed when struck by a car in the city of Ottawa on Friday last. He was on his motorcycle at the time, and the accident was caused by a congestion of cars at an intersection. Deceased was the son of Mr and Mrs. J. Montgomery of Spencerville and was in his 24th year. He leaves to mourn his loss his parents, his widow and an infant son who lives at Carleton Place.

Mr. J. L. Dixon, Funeral Director, is spending the week in Toronto, where he is attending the 48th Annual Meeting of the Ontario Funeral Service Association, of which he is a member. The Convention sessions are aimed to keep the funeral director in touch with the most recent scientific developments in his profession and to aid him in greater service to the community.

Charles L. Acres, Vernon, Ont., recently sold six head of purebred Holstein cows and heifers to Ray E. Henry, Lisbon, N. Y., who also purchased two from the Estate of Edwin Baker, Winchester, five from Clifford A. Wylie, Mountain Station, two from Burnett Derby, Mountain, one from Geo. W. Acres, Vernon, one from Wm. H Acres, Vernon, and two from Stanley J. Campbell, Vernon.

There start d from Brantford, Ont. on Saturday last, one of the most novel parades in motordom's history, when a fl-et of trucks of all types and descriptions for every conceivable commercial purpose, paraded through the city, and early Sunday afternoon left for Galt on the first lap of a 3000 mile pageant tour through the principal cities and towns of Ontario and Quebec. Designated the "Chevrolet Commercial Caravan," the parade consisted of 25 trucks, including an ambulance and fire apparatus and units of various designs for many uses. Many General Motors officials were present to give the caravan a send-off.

LOCAL AND GENERAL

Splendid afternoon for the races and splendid races.

The new Provincial Secretary, Mr. Geo H. Challies, M. L. A. for Dundas, was a visitor to Winchester on Monday, and received congratulations from his many friends here.

Rev. R. J. Wilson, who was in charge of the services at Finch on Sunday, July 26th, spent a day calling on friends in town. He was accompanied by Mrs. Wilson, his daughter, Louis and Miss Lee of Lavant.

The Law Office of W. J. Cass will be closed for two weeks beginning with August 10th, 1931. Mr. and Mrs. Cass and family and Miss Mable have taken Capt. Davis' cottage on the Rideau Lakes for this period.

On account of work on primary lines in the village, the electric power will be off tomorrow (Friday) afternoon from about 1.30 to 5 o'clock.

A miscellaneous shower was given in honour of Miss Laura Melvin at the home of Miss Robertson, Goodwin Mansion, Toronto, on Wednesday, July 29th, by the girls on the office staff of A. D. Garree and Co., Ltd., Toronto. The evening was spent in Bridge and a dainty lunch served at midnight. Miss Melvin was the recipient of many beautiful gifts and hearty congratulations from all present.

Misses Grace Greer and Margaret Ritchie have returned from a nine days' motor trip to the Maritime provinces. Going down they followed the St. John's River, beautiful scenery and winding hilly roads, to Halifax, returning by Bay of Chaleure and Matopedia Valley. They found crops in general a week or ten days behind ours although they picked blueberries and wild strawberries in the fields at the same time. They registered 2200 miles on the trip.

MILLINERY

A small assortment of hats to clear at $1.00, for one week only. Misses Irving & Quart.

Damage By Storm

The severe storm that passed over the eastern section of this county and through Stormont, on Wednesday of last week did a very considerable amount of damage at Embrum, a house and barn of A. R. Patenaud, were burned, loss over $7,000. At Monkland and Finch many trees were destroyed and telephone poles broken down At Berwick much standing crop is reported broken down. At Newington a barn belonging to James Haron was burned. Near the St. Lawrence some barns were burned and considerable damage done to standing crops.

Car Crashes Into Pole

On Saturday night last, while returning from Iroquois to Morrisburg, a Buick Coupe, driven by Jack McPherson, of Montreal, crashed into a hydro pole at the west end of Morrisburg Village and came to a sudden stop in the ditch. Other occupants of the car were Miss Helena Meikle, of Morrisburg, Miss Doris Sharpe of Montreal, and Mr. Stuart Meikle, of Morrisburg. Both Miss Sharpe and Miss Meikle were injured, while the men escaped with a severe shaking up. The car was owned by the Meikles and was badly damaged. The pole, which was struck, was broken off at the bottom and also about three feet from the top. A car conveying Don. Johnston's Orchestra from Iroquois, was the first on the scene after the mishap and rendered first aid.

Winchester Race Meet Well Attended

The program of horse races and ball games held at the exhibition grounds on Monday afternoon of this week was a huge success in every way. The weather was ideal and a great many took advantage of the Civic Holiday to attend the races. The baseball game between Winchester and Chesterville was a treat to the large crowd of spectators who had gathered to see two old rivals battle for supremacy. The game was closely contested with the visitors edging the local team out by a score of 13 12.

The Soft Ball Tournament was played as scheduled. In the first game, Vancamp and Winchester Springs furnished plenty of excitement with Vancamp winning by a score of 20 to 15. In the second tussle, Mountain sent the team from Winchester down to defeat by a wide margin. The score was 24 to 12. In the finals, Vancamp and Mountain played a real close game which kept the crowd cheering from start to finish. The score was 5-4 for Vancamp. Each player on the winning team received a neck-tie as an individual prize.

The horse races, which were the best ever witnessed on the Winchester track, had plenty of entries. There were 22 horses entered in the three races, which resulted as follows:

First Race, 2.25 Class, Purse $150., nine entries: 1st—Waddington Boy, owned by Mr. Murphy of Waddington; 2nd—Vera Marks, owned by Mr. Cecille of Pembroke; 3rd—Florence McGregor owned by Mr. H. Ross, Ottawa, and 4th—Nora Halo, owned by Mr. Strutt of Shawville.

Second Race, 2.18 Class, Purse $150, eight entries: 1st—Guy Chenault, owned by Mr. F. Dowser, Metcalfe; 2nd—Rex Onward, owned by Mr. Villeneuve, Hull; 3rd—Edna McKinney, owned by Mr. Shaver, Avonmore; and 4th—Al. Seymour, owned by Mr. Hunter, Smith Falls.

Third Race, Free-For-All, Purse $150., five entries: 1st—Lucelle H., owned by Mr. Connor, Wales; 2nd—Della Wilks, owned by Mr. Hunter, Smiths Falls; 3rd—Jesse Dillon, owned by Mr. F. Dowser, Metcalfe; and 4th—Joe Patchen, owned by Mr. Taylor, Ottawa.

The race officials were: Starter—Mr. J. H. Hoffman, Judge—Mr. F. Grimes, Timers—Messrs. J. Peacock and G. A. Carriere, all of Ottawa.

The evening performance in Lannin's Hall was supplied by the Galvin Players, of Ottawa, and was well attended. The program consisted of Vaudeville acts and was greatly enjoyed by all present.

On the whole, the day's sport was greatly enjoyed by the large crowd present and the Winchester Driving Club Committee are to be congratulated on the splendid way in which they managed the affair.

SOCIAL AND PERSONAL

Mr. and Mrs. Henry Stata spent Saturday in Montreal.

Miss Helen Smith motored to Toronto on Monday for a couple of weeks.

Miss Muriel Davidson, of Kemptville, spent the week-end with her friend, Miss Norma Robinson.

Dr. J. Gordon Glascott, of Toronto, was a week-end guest at the home of Mr. and Mrs. B. F. Smith.

Miss Minnie Fisher, of Toronto, spent the past two weeks visiting friends in Iroquois and Winchester.

Miss Helen Justus and brother, Mac, motored to Delta on Tuesday to visit their aunt, Mrs. M. Frye.

Miss Evah McQuaig has returned after spending a few days at the Pelican, the guest of Miss Agnes Parker.

Master Gordon and Dalton Loughridge of Morewood are guests this week of their cousin, Master Stanley Summers.

Mr. and Mrs. J. M. Jackson and family of Kemptville spent Sunday with her parents, Mr. and Mrs. Wm. Dickson.

Mr. and Mrs. A. A. Casselman attend the funeral of the latter's sister, Mrs. W. E. Strader, at Matilda on Tuesday.

Mr. Fred Smith and Mr. Billy Smith, of Toronto, spent the week-end with their parents, Mr. and Mrs. B. F. Smith.

Rev. J. A. and Mrs. Waddell are attending lectures at MacDonald College and enjoying an outing at that beautiful spot.

Mrs. J. E. Hutt spent the week end in town with Mrs. Slater and left on Monday to spend a month along the St. Lawrence.

Mr. and Mrs. Henry Stata and Mr. Rouben Pruner and Miss Laura Pruner of Melvin Settlement spent Sunday in Prescott.

Mr. Will C. Cochrane of Morrisburg, has been appointed to the position of Customs Excise Examiner in the port of Morrisburg.

Mr and Mrs. Wm. R. Justus arrived home on Sunday by motor, having enjoyed a wedding trip to New York and Coney Island.

Mrs. L. Wilson who has been spending the past few weeks in town, left last week to visit friends in Lavent, before returning to Hamilton.

Mr. Geo. Johnston and Miss Bradley, who has been spending their holidays at the home of the former's parents, left on Sunday for Toronto.

Mrs. Effie R. Fisher, with her sons, Willie and John, and daughter, Margaret of Toronto, made short calls on friends here, over the week-end.

Mr. and Mrs. Geo. M. Smith and family of Watertown, N. Y., have returned after spending a few days with her parents, Mr. and Mrs. Wm. Dickson.

Mr. and Mrs. John Smith, of Morrisburg, wish to announce the engagement of their youngest son, Frederick, to Stella Mae, only daughter of Mrs. Mary Becker, of Montreal.

Mr. Wm. Johnston left on Sunday to attend the funeral of his sister, Mrs. Wm. Kirk, who died at her home, Terra Cotta, on August 1st. The remains are to be brought to Oshawa for burial.

Rev. Thos. and Mrs. Meredith, of Lacolle, Que., passed through Winchester on Monday en route to Aylmer, Que. where they have taken a cottage for a few weeks. Their son, the Dr., will spend the week-ends with them.

Miss L. M. Ker, B. Sc., M. A., of Laureate Hall, 435 West 119th Street, New York City, has left to spend the month of August at Elgin House, Lake Joseph, Muskoka, after spending July with friends in Montreal and Winchester.

Mr. and Mrs. Albert Johnston, Velma and Melvin, Mr. George Johnston, Miss Bradley, of Toronto, and Mr. and Mrs. W. Johnston, motored to Christie's Lake last week to spend a day with Mr. and Mrs. Earl Johnston, at their cottage.

Mr and Mrs. James S. Casselman, of Toye's Hill, wish to announce the engagement of their eldest daughter, Gladys Mae, to Lawrence Gilbert, only son of Mr. and Mrs. Frederick Brook, of Sunnyside, Toronto. Marriage to take place quietly during August.

Mr. and Mrs. Jos. R. Canham, Newington, Ont, announce the engagement of their daughter, Leda Mabel, to William M. Campbell, son of David Campbell and the late Mrs. Campbell, of Avonmore Ont. The marriage will take place the middle of August.

Justus–Maloney

At St. Alban's Church, Ottawa by the Rev. Canon Whaley, on Saturday, July 18th, 1931, at 1 p. m., Clara Mae, youngest daughter of Mr. and Mrs. J. S. Maloney, of Carleton Place, to William Robert, son of Mr. and Mrs. R. W. Justus, Winchester.

Banquet to Geo. Challies

On Friday, August 14th, the Citizens of Morrisburg and Vicinity will tender a banquet to Hon. Geo. H. Challies. The banquet, which will be of a non-political nature, will be held at 6 30 p. m. in the Music Hall, and tickets, which are limited to approximately two hundred, may be secured from any of the following committee: John F. Casselman, John Dain, Arthur Flynn, Dr. Geo. Gorrell, John H. Meikle, Aaron Sweet and F. H. Broder. Price of tickets 75 cents. Space will be reserved in the gallery for the ladies.

Not An Idle Boast

The Arnprior Chronicle questions the correctness of the statement in the Winchester Press, that a certain farmer in this section had a ten acre field of corn that averaged nine feet in height. Let us hasten to assure our friend of the Chronicle that it is not an uncommon thing to see fields of corn in Dundas eight nine and ten feet in height, and stalks have at times been brought to the Press Office measuring over 12ft. Of course we admit that Dundas is classed as being one of the most productive and best dairying Counties in Ontario, and it would do any one good to take a drive over our fine County roads and see the wonderful fields of grain, corn, alfalfa and hay. Much has already been harvested, but the fields of corn "Averaging nine feet in height" may yet be seen.

GIRL WANTED

For light housework. To sleep out. Apply to Hy. Bessin.

HON. GEORGE H. CHALLIES

Member for Dundas in the Ontario Legislature, who was last Friday, sworn in as Provincial Secretary in the Henry Government.

Trouble At Morrisburg

The village of Morrisburg last week was for several days and nights without its usual supply of electric fluid, and it proved a great inconvenience. Some of the machinery, both in the upper and lower power houses gave out, and it was a case of one source of power holding out while the other was repaired. The village own their own power, and now find that it will be necessary to expend a considerable sum to put their power house in proper order.

The New Highway

That piece of the new highway, No. 31, between Harmony Church and Vernon is now open for travel, and this shortens the detour from Winchester by over one half. The detour is now to Ormond Corners and thence west to Harmony Church where you strike the new highway. A run over that piece of cement road will convince anyone that Harvey & Son, the Contractors, know how to build a road. It is as free from bumps and as smooth as a billiard table, and the curves are of sufficient grade that one has not to slacken speed to take them with safety. It is expected that the road will be completed to the road leading west from Winchester by the end of next week, when the work of constructing the road through the village will begin. Plans are being made to make detours and delays as easy as possible.

Miscellaneous Shower

On Monday evening last a large number of friends gathered at the home of Mr. and Mrs. W. A. Servage, Caleb Street, and tendered a miscellaneous shower to their daughter, Miss Carrie Servage, who is shortly to become the bride of Mr. Arnold Duncan, son of Mr. and Mrs. A. H. Duncan. The event had as its hostesses, Mrs. L. A. Ellis and the Misses Olive Gibb and Laura Dukelow. A well-worded address was read to the bride-elect by Miss Dukelow, after which a wagon, trimmed in pink and white scheme, was drawn in by little Joyce Crawford. The presentation, which included many beautiful gifts, was made by Miss Gibb. Although taken completely by surprise, Miss Servage, in a most charming manner, thanked her many friends for the kindness they had shown her. Candy was served and before leaving, those present registered their names in a beautiful brides book.

Late Mrs. William Gardner

"I cannot say, I will not say
That she is dead—She's just away.
With a cheery smile, and a welcome hand,
She has wandered into an unknown land.

J. Witcomb Riley.

The funeral service of the late Mrs. William Gardner was held in the home on Friday afternoon last, her pastor, Rev. Mr. Turner, conducting the service. He spoke in eulogistic terms of the noble character and useful life of the departed, and brought words of comfort, consolation and hope to the sorrowing relatives and friends who had gathered to take their last departing look on the face of one who through her life had been so thoughtful, so kind and so considerate in all her ways. The pall bearers were Dr. McLaughlin, Dr. Bean. Messrs. A. Sweet, R. Elliott, H. L. Lee and Wm. Dixon. Interment took place in the family plot at Maple Ridge Cemetery. The floral tributes, many and very beautiful, were sent by the following:—

Pillows—The Family; Mr. and Mrs. Herbert Gardner and family, Brockville; Mr. and Mrs. Donald Roughton, Kingston; Dr. and Mrs. J. R. Emery, White Plains, and Bill Agnew; Mr. and Mrs. Robert Alexander and family, Brighton; Mr. and Mrs. Duncan Gow and family, Ottawa; Mr. and Mrs. H. L. Lee and family; Mr. James G. Greg, Montreal.

Baskets—Mr. and Mrs. Fred D. Palmer and family, Ottawa; Dr. Peter and Dr. Robert McLaughlin; Mrs. Lowery. Great Falls, Montana, and Miss Laflamme; Mr. and Mrs. R. M. Elliott and Miss Ella Parker.

Sprays—The Ladies' Aid of St. Paul's Presbyterian Church; Miss Ida Knowland; Mr. and Mrs. W. J. Leonard, Brockville; Mr and Mrs. H. E. Empey; Mr. and Mrs G. E. Payne; Dr. J. Bean; The Elora Family; Mr. and Mrs. B. F Smith and Miss Helen Smith; Mr. and Mrs. Harry Despard, Syracuse; Mr. and Mrs. David Weir; Mr. and Mrs. Chester Robinson; Mr. and Mrs. Davie Melvin; The Winchester Press Staff; Frances Utman.

Cut Flowers—Mr. and Mrs. A. Sweet, Mr. and Mrs. R. Crowder, Mr and Mrs. Richard Justus and family, Mrs Hazel Hutt and Dixon, Miss Mabel Suffel, Lloyd and Ruth Dixon, Mr. and Mrs. Walter Barkley, Mrs. R. D. Preston, Miss Mary Empey, Frances Lee.

Wreath—W. M. S. of St. Paul's Presbyterian Church.

Real Estate, Hardware, and Plumbing Business For Sale

Offers in writing will be received by the undersigned until twelve o'clock, noon, of Saturday, August 8, 1931, for the real estate and stock-in trade and shop equipment and tools of George F. Armstrong, late of the Village of Winchester in the County of Dundas, Merchant and Tinsmith, Deceased. The property, situate in the Village of Winchester, Ontario, is about thirty miles south of Ottawa on the King's Highway No. 31, and the business has been without competition in a fine agricultural centre for some years. Offers may be made for the several parcels or as a purchaser may desire.

The following parcels are for sale:—

1. Village lot No. 90, North of Main Street upon which is erected a 9 room frame residence and a small barn, henhouse and garage.

2. Part of Village lot No. 50, North of Main Street upon which is erected a brick business block with two stores downstairs, and two 5-room apartments upstairs, one store is under lease to a clothing merchant and the other store was occupied by deceased; one apartment upstairs is under temporary lease, the other apartment is vacant. Building very centrally located and a very desirable business block.

3. Stock-in-trade of deceased, including stoves, washing machines, pumps, cans, pails, pipes, etc., and plumber's tools and equipment, including Chevrolet truck, etc.

Properties may be examined between the hours of 9 a. m. and 6 p. m., week days. Apply to

Harvesting In West Early This Year

Winnipeg. — Wheat cutting commenced in the St. Adolphe district of Manitoba on July 25th, the earliest, it is believed, such operations have occurred in Manitoba.

One farmer, resident in Manitoba, for 36 years, declared it was "the earliest date for wheat cutting in my experience." St. Adolphe is two miles south of Winnipeg.

Will

Ignatius Loyola was a great leader and master of men. One of his rules was: "What you want to be you can be. Will it then, and will it with all your might." Modern psychology tells us the same thing. Character is a matter of right will. Holiness is a will set toward God and His righteousness.

Wisdom of the Foolish

The foolish think that they can escape punishment; but every wrong-doing carries its own punishment. Punishment is not always something that happens to us, but rather something that happens in us. The greatest of all punishments is the loss of our humanity. What is more terrible than to lose the open countenance—to be forced to wear the fox's eye and the wolf's mouth?—Markham.

To make ICED TEA - Brew tea as usual - strain off leaves - allow to cool - add lemon and sugar to taste - pour into glasses half full of crushed ice

By MARIE ANN BEST

Christianity says — Be Christ-like, give thyself.

Atheism and Light

From time immemorial electricity has been with us, around us, in the air we breathe. Yet we groped along in the darkness for aeons of centuries knowing practically nothing of it. There came a time when prophets foretold its coming but few believed the prophecy until, believing it or not, when the time came that the thin edge of the wedge was applied by the slow process of scientific research, darkness suddenly opened up into a flood of light and power hitherto undreamed of. The great power was here which could destroy as ruthlessly as it could belch out light and energy. Yet all at once it was harnessed in so safely by skilled human hands that we use it now without fear, taking it as a matter of course, even though most of us know little more about it than to turn on the switch.

But we must have some appliance installed in our homes if we wish to use it and benefit by it, and we must touch the button to secure the power in order to connect up and benefit by it.

If this is true, and we know it is, is it not comforting that we have been told by the noblest man who ever lived, whose integrity was unimpeachable, whose truth and magnetic spirituality placed him first among the greatest of all men, that there is a power, a God power which is likewise everywhere. This power is supreme and above all other powers, bringing order out of chaos wherever it touches.

This greatest man of all men told us it was necessary for the Father to send His Son, to come to this world in order to teach us how to build up this spiritual machinery for ourselves which will give us the eternal life of light.

At the time Jesus lived on earth history shows us that virtues were a mockery. Conditions were terrible, in fact we have no idea of the wickedness and consequent sufferings endured by those early people. This was when Christ came to apply the thin edge of wedge. So great was the need of Him that they killed His physical body in their ignorance of right thinking. He found it necessary to die in order to show them the importance of each individual actually living the principles of love, truth, kindness and all virtues even unto death, the development of which brings us into everlasting life where moth nor rust does not corrupt.

He has said we should pray. We do not understand why, but in some manner prayer does make the circuit complete and for those who touch the spiritual switch by following what he taught a beacon is set out which helps us along wonderously through the trials and sufferings on this murky road of life.

He has shown us that we are going through the process of being born again; we have come up through the infinite ages; passed through darkness, ignorance, violence and materialization and can now see the glimmerings of a great light ahead.

How then can there be annihilation? If there has been a past how can it be possible not to have a future? All the past was future at one time, was it not? We have come this far not knowing what we are or how we move, or have our being. The world becomes more illuminated physically by electricity and immeasurably more important, it becomes spiritually illuminated by good living when everyone will do as they would be done by.

Oftentimes we think our own sufferings and difficulties, though hard to bear can be tolerated, but looking at others for worse off we are often puzzled when something seemingly terrible happens. "Well now, that person is good, and yet see how he suffers," and then we are apt to allow the small seeds of doubt to grow, forgetting God's words: "Thy dross to consume and thy God to refine." It is God's way of making us fit to be born again.

After all what is one little life when gazing into the depths of eternity? Earthquakes, famine, sorrow, death are as nothing if they bring us into the eternity of Divine Love.

Chicks and Other Little Friends
No. 31

Last week I told you about Fluffy being so cross at Rover because he came into the same room where Mamma Lady and Billy had brought her little kitties. She was so cross she scratched him, then jumped on his back and scratched some more so he didn't know what ever could be the matter, for you know he came in the room all right, but he didn't have a chance to even see the kitties, so he hadn't the slightest idea what all the fuss was about.

After he got chased out like that he wouldn't come in for a long time. It was a little while before Mamma Lady noticed Rover didn't come in the house. It was really Billy who noticed it first. He said, "Say, Mamma, do you know Rover won't come in the house? I wonder why?"

Then Mamma Lady remembered and said, "I believe he thinks it isn't very safe for him in here. I never thought of that. We'll have to coax him in."

So Billy ran out and called him and when he got near the door he was going to disappear again but Billy caught him by the collar and hugged him and said, "Oh, come on in Rover, nothing will hurt you."

You see, Rover wasn't a coward if he knew what was the matter, but he didn't know why Fluffy jumped on him like that, so he thought he would just stay away.

Well, just as he was trying to get away Mamma Lady came out and was extra nice to him. Come in, Rover, Fluffy won't hurt you, now come on, it's all right, come on in," and she opened the door so he could see it really was all right.

Rover looked at her and took a little step, then stopped, then another, and she kept saying "Come on in. It's all right." Then he looked warily around and took another few steps. "She won't hurt you, Rover."

But Rover didn't know whether to believe it or not. All at once he was going to back out pretty quick, for there was Fluffy sitting on the cushion on her chair. But would you believe it, she just looked good naturedly at him as though she had never done anything to him at all.

Wasn't that funny? You know I believe there are a lot of people like that. They get so very cross about something then forget all about it, and they want us to forget all about their crossness too, which isn't so easy to do sometimes, is it? But I guess it's just their way, so it really is best to forget.

You see Fluffy forgot all about it because her kitties were away off in a dark closet now and she liked Rover again, so that when he saw her she was a nice kitty again, and wasn't Rover a good dog, for he was soon good friends with her, although often he looked at her queerly, as much as to say, "Why did you scratch me?" Perhaps he'll know when he sees the kitties when they are bigger.

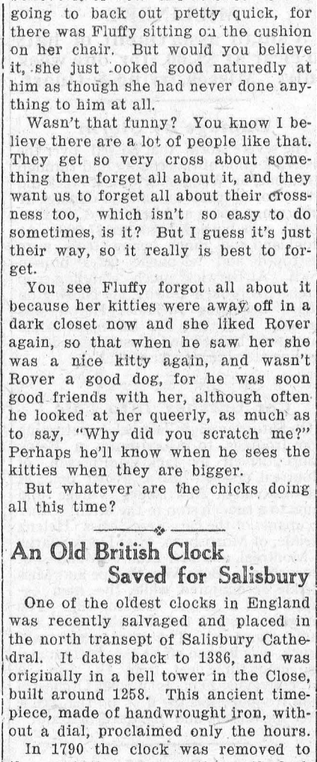
But whatever are the chicks doing all this time?

An Old British Clock Saved for Salisbury

One of the oldest clocks in England was recently salvaged and placed in the north transept of Salisbury Cathedral. It dates back to 1386, and was originally in a bell tower in the Close, built around 1258. This ancient timepiece, made of handwrought iron, without a dial, proclaimed only the hours.

In 1790 the clock was removed to the central tower of the cathedral, where it lay hidden, neglected and forgotten, its days of usefulness apparently at an end. In 1884 a new clock took its place. The recent discovery of the old clock and its reconstruction, however, has given it a proud place once more.

New Chapeau



New gesture in millinery that made its first appearance at the French races. Shallow crown with a mushroom brim set at a most tantalizing angle.

The cruelest lies are often told in silence.—R. L. Stevenson.

Popular songs are often so popular that they become unpopular.

Carbon Monoxide Takes Heavy Toll of Bird Life

Washington.—A never-ending gas attack from the exhausts of automobiles is taking heavy toll among English sparrows and pigeons, says Austin H. Clark, biologist of the United States National Museum.

These two birds, which formerly were common in the cities of Eastern United States, have been disappearing rapidly.

They feed largely on street refuse, which brings them into contact with carbon monoxide gas from motor exhausts. It is a heavy gas that tends to cling to the ground when there is no wind.

It takes very little carbon monoxide to kill a bird or weaken it so it is easily caught by cats, hawks or other enemies, Clark explains.

This is because birds live "at high speed." Their bodies transform oxygen into heat much more rapidly than human bodies.

They must have plenty of oxygen at all times. Anything such as gas that tends to block the oxygen supply from their lungs has a bad effect almost at once.

English sparrows were imported from Europe before the days of modern sprays and insecticides, to eat the canker worms that were infesting the American elm trees.

They accomplished their purpose but aroused complaints among bird lovers because they drove away other birds from birdhouses and feeding places.

Good Nerves Result Of the Good Life

Would you live happily and usefully?

Then cultivate a healthy, normal nervous system. Do not spoil a good one if you have it naturally; endeavor to soothe and make normal a poor one, if that is your misfortune.

In an article published in Medical Insurance (Reno, Nev.), Dr. D. L. Kerlin, of Shreveport, Louisiana, explains how one with healthy nerves may ruin them, and how sick nerves may be toned up and made to function.

Writes Dr. Kerlin:

"I am not sure that those with good nervous systems fully realize this fact.

"The lack of understanding of the milder mental and nervous conditions resulting from sick nervous systems has been passed down from generation to generation, and even at this enlightened age the general ignorance concerning the prevention and tratment of such conditions is astonishing.

"Most all of this ignorance can not be placed at the door of the laity, for the medical profession as a whole has been rather backward in diagnosing these conditions and supplying the proper treatment.

"Often people who are badly in need of treatment for some mental or nervous condition are deprived of this help through the lack of understanding of their relatives. Then, too, very often an individual suffering from some neurotic condition, fearing that his condition may be much worse than it actually is, fails to go to a physician for help.

"Another attitude taken by many neurotic people is that nervousness is a weakness of character, and they suffer in silence. This attitude often leads to serious mental and nervous conditions, for the factors which originally produced the nervousness often have gained a sure foothold, whereas, if counteracted early, little damage would have been done."

The functional unit of the nervous system, Dr. Kerlin reminds us, is the neurone, or nerve cell, millions of which are supported in a network of tissue, that can become sick just as the lung tissue, the liver tissue, or any other tissue of the body when there is sufficient cause. He goes on:

"One may inherit weakened nervous tissue through the effects of alcohol, syphilis, tuberculosis, consanguinity, infections, toxins, and psychic trauma upon the nerve cells of immediate ancestors. In the same way these conditions can damage one's nervous tissue during life, and various forms of nervous and mental disturbance are the result.

"There is always a cause for nervousness, whether it be the conditions enumerated above, gradually damaging the nerve cells, or harmful environmental factors producing markedly exaggerated emotions: fear, anger, pain, jealousy, sorrow, resentment, and emotion of a sexual nature which in turn brings about damage to the nervous tisue. This damage, no doubt, is due to insufficient nourishment of the nerve cells as a result of the effect of the emotions upon the sympathetic nervous system and the resulting effect upon the secretions.

"There is a physical basis for all nervousness, and that basis consists of minute changes in the structure of the nerve cells. The extent of the physical change is in direct proportion to the severity of the cause, whether it be emotional or otherwise.

"Often patients come into my hands with nervous systems physiologically exhausted. The reserve energy of the nerve cells has long been used up. The more their reserve is exhausted, the more nervous and restless they become, and exaggerated mental and physical activity is the result. This condition in turn brings about a more profound state of exhaustion."

A weakened nervous system, through any of these causes, makes it difficult, Dr. Kerlin tells us, to adjust oneself to a complex environment. A large part of the misery and unhappiness in many individuals' lives is due to the constant fight to make life's adjustments with poor nervous systems. Most cases of suicide, if not all of them, are simply failures of adjustment. The doctor proceeds:

"Unless the physician is continually on the lookout, neurotic disturbances are often not diagnosed as such, for they may simulate organic disease of any organ of the body.

The Urge

A winding road led up a hill to-day,
And wild plum thicket edged the stony way;
A slow train crawled around a river-bend,
The wind sped past me—to the world's end.
And in my heart I know that there are seas
Rough-plowed by giant freighters. All of these
Have made me restless, and are reasons why
I let life's puny discord pass me by.
—Billy B. Cooper, in The Montreal Star.

G. B. S. and Others

How George Bernard Shaw led the police into a dancing contest in a London square is related by Lincoln Springfield in his book. "Some Piquant People." It seems that Shaw after seeing a ballet one night, could not resist trying to go round the square just once after the manner of the dancer.

"It proved frightfully difficult," says Mr. Springfield. "After his fourteenth fall he was picked up by a policeman, who, keeping fast hold of his man, asked: 'What are you doing? I bin watching you for the last five minutes.'

* * * *

"Shaw explained eloquently and enthusiastically. The policeman hesitated and then said: 'Would you mind holding my helmet while I have a try? It don't look so hard. The next moment his nose was grazing the macadam.

"So they hung up their coats and went at it again, until an inspector arrived and asked the policeman if that was his idea of fixed point duty. 'I allow it ain't fixed point,' said the policeman, emboldened by his new accomplishment, 'but I'l' lay half-a-sovereign you can't do it.'

* * * *

"The Inspector could not resist the temptation to try (Shaw was whirling around before his eyes in the most fascinating manner), and he made rapid progress. They were subsequently joined by an early postman and a milkman, who unfortunately broke his leg and had to be carried to the hospital by the other three—according to Shaw."

* * * *

Few people are aware of the distinction between the Archbishop of Canterbury as "Primate of all England," and the Archbishop of York as "Primate of England," and fewer still are aware of the occasion for it, observes Mrs. M. V. Hughes (in "London At Home.") In 1176 there was a big quarrel between the two Archbishops as to which should be chief. At the Synod, sat "as in his proper place, Richard of Canterburie, when in springs Roger of York, and finding Canterburie so fairly seated, sits him down in Canterburie's lap. Canterburie's servants plucked him thence and buffeted him to some purpose."

This unseemly quarrel ended in Canterbury receiving the title of "Primate of all England," while poor York had to be content with being "Primate of England."

* * * *

The name "Cabinet" given to the committee responsible for the government of the country, comes from the days of Charles II., when a few of his leading ministers used to meet in his own private room, or cabinet, says Mrs. Hughes.

Edison Forced To Cease Active Work

West Orange, N.J.—Thomas A. Edison, inventor, has been forced to cease active work at the age of 84

Overwork during experiments in producing rubber from the golden rod plant, on which the aged inventor worked steadily all winter at Fort Myers, Fla., have made it necessary for Edison to take a vacation from the laboratory, according to his brother-in-law, John V. Miller—a vacation that may presage retirement.

Revenge is Sweet

They were discussing the food for the day after breakfast.

"I'm going to make a nice cake for tea," said Mrs. Nuwed.

The young husband raised his eyebrows in surprise.

"H'm," he murmur "I was thinking of bringing a friend home to tea."

"That'll be lovely, dear!" she cried. "We'll have a little tea-party."

"All right," he decided in the end, "I'll bring him along. He served me a mean trick once."

Out For the Count

Little Johnny returned home with a black eye and a cut lip.

"Johnny," exclaimed his mother, "you're a naughty boy. You've been fighting again."

"Yes, mum," he returned dismally. "I couldn't help it."

"But didn't I tell you to count a hundred first?" she said.

"I know, mum," said Johnny. "I had started to count—but the other boy's mother only told him to count fifty."

Too Much Weight

They were talking earnestly in the club room.

"Jove," said Higgs, "it was a weight off my mind when my wife told me he could cook."

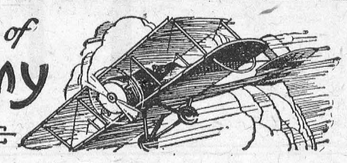
"That's a change these days," said his friend. "And I suppose she really can cook?"

Higgs grimaced.

"No; the weight is on my stomach now," he replied.

Colors and perfumes are part of a new specialized treatment for certain forms of mental trouble.

The Adventures of Captain Jimmy and his Dog Scottie



What came before: After many adventures flying over China, Captain Jimmy agrees to fly General Lu to Japan. Running out of gasoline, he is forced to land on a lonely island.

There we were on that lonely little island; General Lu, the Chinese War Lord; Ching, his faithful servant, Fu the interpreter, Scottie and myself.

Rank and fortune suddenly counted for nothing. We were four hungry men—and a dog. Even General Lu's huge fortune, which we had stored away in our plane would not buy us a square meal.

The sea stretched away on every side like a flat mirror. The island went back four or five miles and ended. Above, the sky rose in a huge empty dome.

"Look here General," I said, "you and I are going rabbit hunting."

After that we tramped and hunted for hours, but never found a rabbit. In fact, we never even saw a mouse or a squirrel. The island rose to a peak near the spot where we had landed. The remainder was covered with stunted brush, often burned brown from the sun's heat. The rocks were blazing hot.

More serious than the lack of game, was the absence of water. Hour after hour, we searched for fresh water, but not a drop could we find. As we walked home over a flat sandy place, General Lu suddenly gripped my arm.

In the sand was a long, streaky, track, as if you had drawn a stick along. At first I could make nothing of it, then it suddenly occured to me that the mark was made by the tail of some animal, while the sand was wet during the rain of the night before. A lizard, or a turtle might have made it, but because the track appeared so far inland, it seemed probable that the creature was heading for some known water hole.

The track faded out after a few hundred yards, but soon another appeared. This in turn faded out.

We continued to follow in the direction the last track had pointed. Some large sand dunes rose in front of us. Climbing to the top of these, a very small, green valley appeared below.

Hurrying down, we found a deep rocky dell, from which came the distinct tinkle of water. Out from between two rocks poured a clear, cold spring!

General Lu drank so much, I really feared he would drown. Then we filled our water can and walked back to the plane, where Chung and the interpreter anxiously waited for us.

Meanwhile Scottie had gone on up the beach, and was busily digging the sand, and half growling to himself. The sand flew in all directions. Then he came racing back to me. Sure enough, he had found a nest of eggs buried in the sand. His rough methods had ruined some of them, but there were almost a dozen left.

I put the good ones in my helmet and back to the boys I went. The Chinese seemed delighted, and sat about baking them by the fire. Well, perhaps I am not a very good judge, but to me those eggs surely seemed terrible.

The interpreter looked at me questioningly. "No likee eggs?"

Then he pointed meaningly to the sea. "Flish, he go mightee flinee—easy catchee, hu?"

(To be continued.)

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

The youthful animation of hem makes this dusty-pink washable crepe silk frock especially attractive. It is equally suited for sports or spectator sports.

The cape sleeves of the yoked bodice of plain crepe in blending shade are outstandingly chic in their unique pointed treatment.

A narrow belt of self-fabric is adjustable and is smart worn at the higher or the natural waistline.

Style No. 2846 comes in sizes 14, 16, 18 and 20 years. In the 16-year size 3 yards of 39-inch material with ⅝ yard of 32-inch contrasting is sufficient.

It's very snappy in navy blue silk crepe with white crepe contrast.

Other very charming ideas for its development are pastel handkechief linen, printed dimity, men's cotton or silk shirting, shantung, printed chiffon voile with dark background, eyelet batiste, eyelet linen and pastel flat washable crepe silk.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Prayer

He who prays as he ought will endeavor to live as he prays.—Owen.

To a Returned Traveler

(From The Spectator)

Wise with your wanderings, you thought to find
Us somehow altered, too; but in amaze
Found us contented with the very ways,
The thoughts, the projects that you left behind.
And in our littleness we were so blind.
Unshaken by the splendor of your days
We talked of them as of a finished phase,
And then forgot, nor knew we were unkind.

Then, in the grip of swift reaction held,
You kept yourself apart; we thought you strange,
Unconscious of the worlds dividing us.
We did not guess how fiercely you rebelled
To think that you must take in poor exchange
Our hobby horses for your Pegasus
—Diana Carroll.

Maternal Instinct

It is a mistake to suppose that the maternal instinct is universal on the one hand, or that it is developed only by personal experience on the other. Even women who are mothers may be found wholly destitute of it, with not a ray of natural feeling for their offspring; and some who are neither wives or mothers in fact are all the latter in feeling. These are the women who are the chosen friends of both sexes and all ages. To them flock all who have troubles, sure of a patient hearing and that sweet sympathy which of itself heals the wounds laid bare to its touch.

"Yes, I fitted up my flat at a ridiculously low price. In fact, it cost me but a song."

"How's that?"

"Well, you see, I started up a solo on the back fence at 2 a.m. and the donations I received in the shape of furniture, etc., just filled the bill."

SCIATICA?

Here is a never-failing form of relief from sciatic pain:

BAYER

Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They *do* relieve; they *don't* do any harm. Just make sure it is genuine.

MIN'S MYSTERY MAN

"You get out!" said Mark, but the man from hospital meant to stay.

By A. G. Greenwood

The busy secretary of St. Michael's Hospital looked up impatiently as Punch Cornish was ushered in.

"Just off," said Punch, six-foot, broad of shoulder, lean of hip, brown-haired, brown-eyed. "I wanted to thank you for all you've done for me during the last six weeks."

"That's all right," said the weary secretary, longing to get back to the appeal for funds that he was drafting, for thanks don't pay bills for coals and light, and so on.

"Like you to accept this," added Punch, laid an envelope on the table, said "Good-bye!" and hurried off. When the secretary found time to open the letter, he pulled out a cheque for $250, and was a very surprised and pleased man.

By that time Punch had sauntered along a dozen Shoreditch streets, rejoicing at being out and about in the sun again. At eleven o'clock he found himself in Chipman Street, and confronting a life-size portrait of himself in a photographer's window.

"Any photo enlarged and framed as per sample, $2.50, and cheap at the price," he read.

There was no mistaking his features. He remembered the original photograph being taken in Liverpool, three, four, perhaps five years ago. Queer, a print of it getting to London, and being enlarged and exhibited in a Shoreditch street, for till six weeks ago Punch had never set foot in London, and all those six weeks he had lain in St. Michael's.

Across the corner of the photograph was scrawled: "Ever Min's loving Bill."

Bill wasn't his "tally." He had been christened Edward Cornish, and Punch was only a nickname. Nor could he remember a Min. Girls hadn't been in his line. Certainly the signature wasn't his handwriting, and just as certainly he had never so signed a photograph in all his life.

An inquiry might clear the matter up, thought Punch, and stepped into the shop. A slim young woman was writing up a day-book at a desk. She glanced up with a mechanical smile of welcome which froze. Her eyes grew round. She leapt up.

"Bill!" she exclaimed, and ran to him. "At last! Min said it was a speaking likeness. I'd have known you anywhere. Min's out at work. She's in the factory again; but she'll be back at dinner-time. Oh, why didn't you write? Why didn't——"

"Just a mo!" broke in Punch. "You haven't got things quite right, young lady. I'm not Bill anybody. My name is Cornish. I stepped in to ask how you came to be——"

"Oh, Bill!" she exclaimed reproachfully. "You can trust me, you know. Don't you know—can't you guess who I am? I'm Sally, Min's sister. She's spoken of me, I know. Poor—poor Min! She's been utterly miserable—despairing. Sometimes I've been afraid she'd do something desperate—really, I have! Mark never lets her alone. Pestering her to marry him, day in, day out. Trying to persuade her you were dead."

"I'm no more dead than I'm Bill anybody," said Punch.

"You're denying you married Min?"

"I am," said Punch. "Not only that, I never even heard of her!"

"Oh, Bill!" was her breathless reproach.

"Don't call me Bill!" said he.

"Isn't that your photograph?"

"Yes; but it's not my handwriting."

"Min's Mystery Man," she said, then asked sharply: "Where d'you come from?"

"Devonport, Southampton, Portsmouth, Brighton," he said. "Anywhere, you might say."

"It was at Devenport she met you," persisted Sally. "She met you at Freeman's Fun Fair."

"What?" asked Punch, the picture of dismay.

"You two got married at Devonport," went on Sally. "You left her there. You'd promised to follow her back to London. You promised to write. She's never had a line or a message since. It's nearly broken her heart."

"Come off it!" said Punch. "Look here, I've never clapped eyes on your sister. That's flat. I was at Devonport, and I've been with Freeman years. It was at Devonport I got hurt. Ragging we were, one morning. Fell off a trapeze. Trapeses aren't in my line o' business. They thought I'd mend, and carried me along with 'em. I didn't mend. Soon as we reached London they shoved me into St. Michael's Hospital, near here."

"Well, now listen to me!" the girl interrupted. "Father ran this shop till he died. It paid then. Mother wasn't clever, though. It's gone downhill down and down. Then Mark came—Mark Upton. He's pulled it round. Mother—she's bedridden now—owes him money. She's fond of him. And he wants Min. He never lets her alone. He threatens to leave, put the brokers in, ruin everything."

"If I was Bill I'd know how to deal with the fellow," said Punch. "But—"

"Listen!" Sally broke in. "It's Min. She's back early. Oh, I do hope it's not the sack! They're discharging hands wholesale. Min—Min!"

She ran to a side door and flung it open. From the dark passage beyond came a tall, slim girl i na black-and-white frock, he fair, sleek hair worn tight to her head, her face very pale, her eyes very big and blue.

"Min, it's Bill!" cried Sally.

Punch saw her start, and her hands come fluttering up in the gloom, glimmering like the wings of a gull at night.

"Bill!" she ejaculated, then stepped in, stared, and cried. "He says he's Bill? He's not Bill! He——"

"I've been trying to persuade your sister about that," broke in Punch, in huge relief. "I just stepped into the shop because——"

He broke off at the sound of a quavering cry.

"Mother," said Sally. "I'll see what she wants."

Punch had explained to Min, and was asking about the photograph in the window when Sally reappeared.

"It's Mark,' 'she said. "He told mother this morning that it's all got to end. You're to decide, Min. If you say yes, all's well. If not, the shutters go up to-night, and stay up! Have you and Bill decided what line you're going to take? You can't throw dust in my eyes, you know. I'd know Bill anywhere. He——"

"He's not Bill," said Min. "He's very like—wonderfully like—but he's not Bill."

"Yet he comes from Freeman's Fun Fair, and was at Devonport," said Sally. "And that's undoubtedly his photograph in the window. He said so himself."

"A mistake," said Min. "It isn't. I asked Mark not to enlarge it. I begged him not to put it in the window. I'm very sorry if you're annoyed about it, Mr. Cornish."

"And that's all the explanation I'm to get?" he demanded.

"It's all there is, I'm afraid," said she. "Good-morning!"

Punch glanced, shrugged his wide shoulders, and made for the door. He had sauntered a few steps down the road, when the patter of feet behind him made him glance round. It was Sally.

"You're going? You're going to leave her to Mark? You don't care any longer? I didn't know men could be such brutes. Isn't it anything to you? Min's crying her heart out! Won't you come back and own up, and play the man?"

Punch, staring at her, angry and helpless, had not noticed the approach of three men—two small ratlike fellows, and a lumbering, red-faced giant with fists like legs of lamb.

"So he's turned up, Sally, has he?" sang out the giant. "Thought p'r'aps that photo would fetch him along one day. P'r'aps Mr. William Whoever-you-are, you'll explain what's been keeping you."

"I'll explain anything," said Punch; "but I doubt if you'd understand, from the looks of you."

"Mark, he——"

"You shut up, Sally!" said the fellow ferociously. "You keep your mouth shut, or I'll shut it for you. Now, then, cocky, it's your last chance. Vamoose, an' keep out of my way and Min's, and I'll let you off. See?"

"Look here, I'm not Bill!" said Punch. 'But if you want a row with him, and I'll do in his place—well, get on with it! I saw a photograph of myself in the shop window——"

The sound of light, swift footsteps made all four men turn. It was Min, flushed with running.

"He's not Bill!" she exclaimed. "Mark, it's all a mistake. He's—he's no more Bill than——"

"It's his photograph in the window—he's just said so," declared Mark. "I see you little game. Any lie will do to save 'is skin. Well, you're just in time to see the little affair, you are. You'll be welcome to what I leave of him, my girl."

Min came swiftly between them, fists clenched, arms rigid.

"You shan't touch him!" she cried. "He's not Bill, I tell you! I picked that photograph up outside the boxing booth at Freeman's Fun Fair when I was in Devonport, staying with auntie. I didn't know who it was; I didn't care. I only thought, suddenly, that if I was married to a man like him I wouldn't go about in terror of you, Mark Upton."

"What's this?" breathed Mark.

"It was all a lie. You said it was a lie when I refused to show you my marriage-lines. You were right. You called him my mystery man. You were right there, too. It's all been a lie—all through. There is no Bill—no other man at all."

"So that's been your little game, 'as it?" said Mark, and out shot his great hands, and his fingers ringed her wrists.

Then his eyes, inflamed and glinting, met Punch's.

"You get uot o' this,' he said, "an'

"You get out o' this," he said, "an'

"Let her go!" said Punch.

Mark turned and stared at him.

"Miss Min," said Punch, "may I—butt in? May I try to help?"

"No, no; you couldn't. Nobody could. Just go!"

"Not me!" said Punch. "Did you hear me, Bully? Let her go. Smart's the word, you scum!"

Mark released her wrists.

Punch sauntered forward.

"Now, listen to me," he began. I've had six weeks in hospital. I'm a bit tottery——"

"Too late!" broke in Mark. "You should have thought of that before. You'll be a bit more tottery afore I've done with you.

"So," said Punch, as though he had not been interrupted, "I'm afraid I can't permit the fight to be a long one. I shall have to hit you hard early on."

Punch smiled. That smile seemed to infuriate Mark. He lunged fiercely with his right, Punch side-stepped, drove a vicious left to the pit of Mark's stomach, and skipped back on his toes, smiling.

"That's why I'm called Punch," he observed urbanely. "You're about the umpteenth who's got in its way. I'm Punch Cornish, of Freeman's Fun Fair, now in Glasgow. I own the boxing-booth. It's pretty well known. Maybe you've heard of me."

Mark's eyelids flickered. Suddenly his rage gave way to a cold fear. He swayed, clasping his stomach.

"I'm waiting," said smiling Punch.

Mark retreated a step, then collapsed on the paving, breathing heavily.

"Miss Min," said Punch, sauntering to her and offering her his arm,

Together they passed along the sunlit street.

Min held her head high, and his was bent. They were looking at each other in wonder. It was a slum, but they didn't see it like that. They walked on, drawing the swift little breaths that lovers take on the way to Eden.—"Answers."

Thoughts at Dawn

I often walked when the quiet night
Begins to lift her mantle for her flight,
Withdrawing silently as mother mild
Doth slip in silence from her sleeping child.
Whose need of her is over, now that rest
Has smoothed the fretful lines of brow impressed.
The day not yet appears in her bright dress
To bless the earth with her renewed caress.
But faintly in the sky a growing arc
Lifts in sweet promise to erase the dark.
So do my hope and faith with brightening glow
Uplift within me, and a peace bestow,
Erasing doubt; and then in thankful praise
A prayer for understanding heart I raise.

—Caroline B. Rudd, in the Detroit News.

Diamonds and Stamps Used By Australian Travellers

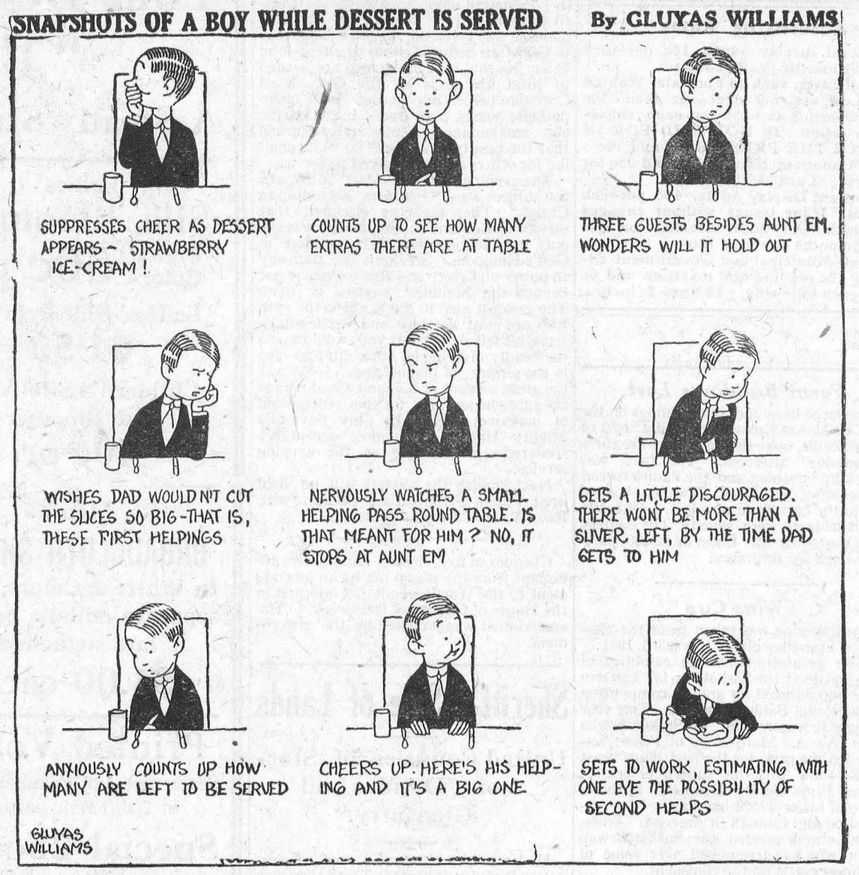
Syney.—Rare postage stamps and diamonds are being use by some Australian travelers to overcome the difficulties of their country's depreciated currency. To send £500 to London costs about £150, but to send £500 worth of rare postage stamps or diamonds costs nothing. Many tourists therefore leave for abroad with stamps and diamonds in their luggage instead of Australian letters of credit in their pockets.

Canada Leads

Ottawa Journal (Ind. Cons.)' There are Canadians with an inferiority complex who seem to think that we can do nothing as great or as mighty as our enterprising cousins to the south. The truth is that in the field of engineering this country's achievements rank not merely with those of the Republic, but are equal to the best that has been done by any country on earth.

SNAPSHOTS OF A BOY WHILE DESSERT IS SERVED

By GLUYAS WILLIAMS



Valley of Decision

Only in humble places are the great
Decisions made, clean moulded out of stuff
Finer than thin-spun dreams, and firm enough
To hold a costly peace inviolate.

Corn in the valley silks beneath the moon,
Bursting with slow rain filtered from a height.
Grass in low places stretches to the light
Against the folly of a copper noon.

One lovely figure at the point of vision,
Drawing a scarlet cloak to hold the heat
From his own leaping pulses' isolate beat,—
"Multitudes in the valley of decision."

There is white blossoming and golden fruit,
Tang of the sky, and sweetness at the root.
—Lena Hall, in "Late Adventure."

He Got the Job

The senior partner had dismissed his office-boy for untidiness and general slackness, and was interviewing in turn a waiting line of some twenty applicants.

Presently a smart looking youth was ushered in.

"Well, my boy," said the senior partner, "I am looking for someone who is smart and tidy. He must look round the office and note down little things that have to be done. The office must look clean and tidy. I'm fed up with boys that never see anything that requires doing, and I'm determined to have an office boy with some idea of keeping things as they should be kept. You understand me, of course?"

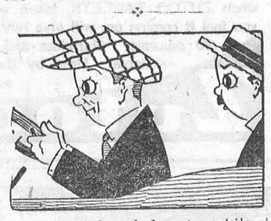
The boy nodded briskly.

"Yes, sir, certainly," he said. "Shall I begin by putting your tie straight?"

Violets

(From the Observation)

He was ragged—as tramps are,
Perhaps he was hungry
As he knelt in the cinders of the bank;
Then, as the great train slackened speed,
I saw a flash of purple in his hand,
And in the gaunt, unshaven face—upturned,
I saw and knew;
A tramp may also love the spring—
And feel himself a gentleman
Picking flowers in his garden—
A little patch of violets by the track.
—Caroline Lawrence Dier, in "Out of the West."



"This confounded automobile is always breaking down."

"Oh, you'll get over it."

"I'm not thinking about that. Getting under it is what bothers me."

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

Enhance our charm by wearing flattering jacket costumes.

It is a season of jackets!

The one sketched is in the green and white printed sportsweight linen in combination with plain green handkerchief linen.

The skirt shows slenderizing line in pointed hip yoke treatment. The jacket is in popular hip length.

Style No. 3436 comes in sizes 14, 16, 18 years, 36, 38 and 40 inches bust. The 16-year size requires 4 yards of 39-inch figured material with 1⅞ yards of 39-inch plain material.

It is stunning with the dress made of chiffon print in hyacinth blue coloring with the jacket of flat silk crepe in matching shade.

Yellow and white sportsweight linen with plain yellow sheer linen for simulated tuck-inn bodice is very chic.

Dusty pink flat silk crepe, white shantung and cotton or silk striped shirting are swagger.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

No Politics in Germ-World All Parties Heartily Co-operate

Canada Should Treat Germ-Enemies of Peace-Time As She Treated Human Enemies in War, Says Health-Writer—180,000 Always Sick

By John Burke Ingram

Disease germs have no political views. A typhoid microbe would bite a nice juicy Liberal just as quickly, but no quicker than he would gnaw a succulent Conservative. And when a flock of diphtheria germs swarm over a youngster's throat, they have a grim singleness of purpose. They don't hold debates and appeal to Mr. Speaker. They just feed and breed.

Now, in a ghastly way there's something admirable about that unanimity. It's kind of too bad that humans can't be equally unanimous about attacking germs, as the latter are about taking a whack at humans.

Let's consider that invading army of diphtheria germs for a minute. They kill about 1200 Canadians every year, out of a total of 12,500 cases. Now suppose that that germ army was a human army. Suppose that that havoc was wrought by invading battalions of Asiatic or European soldiers. What would Canada do?

Can't you imagine it? Remember 1914's mobilization! In a week, Canadian troops would probably have kicked the blighters into the sea. Invading Canada isn't a healthy pastime—for human enemies.

But it's a cinch for germs!

54,000 Canadian men are sick all the time!

Two per cent. of our total population—to wit 180,000 persons—are always on the sick list. Sickness and premature death—not all of it germ-caused perhaps, but half of it preventable, costs the country $1,311,000,000 annually.

So you see, Canada is at war. But most Canadians don't realize it, because the enemy is invisible.

So very many deaths that we mourn but take as Acts of God are unnecessary. Doctors know this. Most educated people know that thousands of Canadians, every year, die years ahead of their time of diseases which could be prevented.

Isn't it stupid? It's the public's own fault. All those Canadians killed or merely made sick by diphtheria, sicken or die unnecessarily. Diphtheria can be prevented, by a safe 90% sure, toxoid preparation. Typhoid fever that kills 1,111 Canadians annually, scarcely bothered Canadian soldiers during the Great War because they were inoculated against it, as everyone should be who is in danger of coming into contact with it. In modern cities this innoculation is unnecessary because modern cities pasteurize their milk and chlorinate their water and inspect their food supplies, and by doing all these things have cut their typhoid rate far below that of rural areas.

The tuberculosis death rate has been cut in half in the last 25 years, proof positive that it can be cut in half again with the next 25, by the exercise of intelligence. It still takes about 7,764 every year. Heart disease, maternal mortality, cancer, all can be reduced. Yet we let these things kill people who could be saved from them.

These are some of the things we need: recognition of the principle of Dominion leadership in health conservation so that the Federal health department may carry on and extend its present excellent work unhampered; Dominion-wide organization of county health units, fulltime medical departments of health to serve rural areas, as many such units are now serving with excellent results; public education to urge individuals to have themselves examined once a year by their family physicians with the idea of detecting deviations from normal health conditions, before these become serious. And last but not least, a national determination to take the offensive against disease germs, and to attack these, the worst of man's enemies, with something of the unanimity and singleness of purpose that they display in their unremitting war against us.

To a Locomotive in Winter

Thee for my recitative,
Thee in the driving storm even as now, the snow, the winter—day declining,
Thee in thy panopl, thy measur'd dual throbbing and thy beat convulsive,
Thy black cylindric body, golden brass and silvery steel,
Thy ponderous side-bars, parallel and connecting rods, gyrating, shuttling at thy sides,
Thy metrical, now swelling pant and roar, now tapering in the distance,
Thy great protruding head-light fix'd in front,
Thy long, pale, floating vapor-pennants tinged with delicate purple,
The dense and murky clouds out-belching from thy smoke-stack,
Thy knitted frame, thy springs and valves, the tremulous twinkle of thy wheels,
Thy train of cars behind, obedient, merrily following,
Through gale or calm, now swift, now slack, yet steadily careering;
Type of the modern—emblem of motion and power — pulse of the continent,
For once come serve the Muse and merge in verse, even as here I see thee,
With storm and buffeting gusts of wind and falling snow,
By day thy warning ringing bell to sound its notes,
By night thy silent signal lamps to swing.

Fierce-throated beauty!
Roll through my chant with all thy lawless music, thy swinging lamps at night,
Thy madly-whistled laughter, echoing, rumbling like an earth quake, rousing all,
Law of thyself complete, thine own track firmly holding
(No sweetness debonair of tearful harp or glib piano thine),
Thy thrills of shrieks by rock and hills return'd
Launch'd o'er the prairies wide, across the lakes,
To the free skies unpent and glad and strong.

—Walt Whitman, in "Leaves of Grass,"

Teaching

All our lives through we must learn by teaching; we must gain stores by distributing what we have.—F. D. Maurice.

Hamilton (Ont.) Spectator: "Fingerprinting is being urged in Toronto schools for the identification of lost children. It should be a simple procedure, with the ink already on the youngsters' fingers.

Goddesses of the Dead Guard Egyptian Tombs

How great a place religion has occupied in the life of the race through the ages is shown in the cast of the burial treasures found in the tomb of Tutankhamen in the Valley of the Kings, Egypt.

Among the new Tutankhamen exhibits at the Cairo Museum is the beautiful alabaster Canopic chest. It stands about 3 feet high, decorated with bas-reliefs of Tutankhamen and incised in black with passages from the book of the dead. Under the lid are four compartments each of which held a miniature gold anthropoid coffin delicately inlaid with lapis lazuli. These contained the King's viscera wrapped in linen, and as a religious rite a liquid was poured over the four miniature coffins. This resembles a kind of pitch, and has become so solid in the course of centuries that it has not yet been possible to extricate three of the gold coffins. These are firmly fixed in their compartments, while the fourth has for some years been on view in the jewel room.

In the next case there is another new exhibit, the wooden shrine which was placed over the alabaster Canopic chest. It was found in the small room lying eastwards of the sepulchral chamber, and Mr. Carter has given a description of the discovery: "The central portion of it consisted of a large shrine-shaped chest, completely overlaid with gold and surmounted by a cornice of sacred cobras. Surrounding this, freestanding, were statues of the four tutelary goddesses of the dead—gracious figures with outstretched protective arms, so natural and lifelike in their pose, so pitiful and compassionate the expression upon their faces, that one felt it almost sacrilege to look at them."

Fear

Fear and lack of faith go hand in hand. The one is born of the other. Tell me how much one is given to fear, and I will tell you how much he lacks in faith.

Fear is a most expensive guest to entertain, the same as worry is: so expensive are they that no one can afford to entertain them. We invite wha we fear, the same as, by a different attitude of mind, we invite and attract the influences and conditions we desire. The mind dominated by fear opens the door for entrance of the very things for the actualization of the very conditions it fears.

Fear is, so to speak, the direct opposite of faith, and faith is perhaps the strongest and most effective mental-spiritual force that we can possess or grow.—Ralph Waldo Trine.

MUTT AND JEFF—Mutt Could Make a Quaker Enter West Point.

Legal, Municipal and Government advertising 12c per line first insertion and 6c line for each following. 12 lines to inch.

THURSDAY, AUGUST 6th, 1931

HON. GEORGE H. CHALLIES

It is not often in the history of Canadian political life that advancement comes as quickly to a young public man as it has to the present member for Dundas County in the person of Hon. George H. Challies, of Morrisburg, who, on Friday afternoon last, was sworn in as Provincial Secretary in the Ontario Government. The honor and distinction has not come undeserved, and it is a credit to the discernment and canny insight into human nature that induced Premier Henry to make the selection he did. To the people of Dundas County, the intelligence came somewhat as a surprise, but a very pleasing one, and Mr. Challies is congratulated on all sides, and by men of all political persuasion on his preferment.

To the citizens of Winchester the honor of the appointment is particularly pleasing because Mr. Challies is a Winchester boy. Born here in the year 1884, Mr. Challies spent his boyhood days here, attended our school, played ball, lacrosse and hockey with the boys of Winchester. A son of Mr. and Mrs. James G. Challies, and a grandson of the late Wm. Bow, who was not only one of the pioneers of this place but one of the most influencial and enterprising citizens, the present Provincial Secretary got off with a good start. After passing through the schools here, Mr. Challies attended Woodstock College and Ontario School of Pharmacy, receiving the degree of Bachelor of Pharmacy from the University of Toronto. In 1914 Mr. Challies was married to Miss Jean S. Gibson, daughter of M. C. Gibson, of Morrisburg.

During a successful business career he became President of the Dominion Toilet Brush Company, which has engaged much of his attention. He has also served as President of the Colonial Coach Lines, Limited, and as President of the Kingston City Coach Lines, Limited. In public life Mr. Challies served on the Municipal Council Board of Morrisburg, first as Councillor, then as Reeve. In 1929 he was chosen the Conservative standard bearer in the Provincial elections, and, with three candidates in the field, was elected with a substantial majority.

Since becoming a member for Dundas, Mr. Challies has devoted all his attention to his native county and its interests. No request for his attention was ignored, and he has made many warm friends because of his unassuming but kindly and disinterested attention to the people of this County without regard to their political leanings.

As a member of the executive of the Ontario Municipal Electric Association and the Eastern Ontario Power Union, Mr. Challies has maintained a close and active interest in the power problem of Eastern Ontario. It was to the advantage of Mr. Challies that, during the term of office as Councillor and afterward as Reeve of Morrisburg, the municipality operated its own hydro-electric plant, and he acquired much practical knowledge from his association with the operation of this puplic utility service. His other public and fraternal interests have included the presidency of the Canadian Club at Morrisburg, which he was instrumental in organizing, as well as office in Masonry and life membership in the Scottish Rite.

That the interests of Dundas will continue to receive the best attention of its provincial member, there is not the slightest doubt. According to the present law Mr. Challies will have to seek re-election in Dundas as a Minister of the Government, and the election day has been set for Sept. 9th. It is not at all likely that Mr. Challies will meet with any opposftion.

As stated, it is not often that a young man in public life is advanced as rapidly as Mr. Challles, and that he will merit the confidence that has been placed in him we have not the slightest doubt. All we can add is that he is following in the footsteps, and representing the same riding, of one of the finest public men and best Premier Ontario ever produced, and if he will take for his motto those memorial words engraved not only on the monument over the grave of the late Sir James Whitney, but also engraved on the minds of his friends:

"Honest enough to be bold,
Bold enough to be honest."

he will in all probability in time reach the same eminence in the confidence and esteem of the people of the province of Ontario that came to the late Sir James Whitney.

Mr. Challies' parents are both living, their home, until a few years ago, being Winchester, but now Morrisburg. He has one older brother, John Challies, of Montreal.

NOT TOO FAST, NOT TOO SLOW

Arguments are being waged, in some of the leading papers, against the recent practise of fining motorists who appear to be deliberately holding up traffic through slow driving. While there is no doubt that speed in excess is not to be encouraged, the slow driver is also indulging in a practise which must be discouraged. A more exasperating thing is hard to find than to be caught on a busy highway behind a motorist, who is merely putting in time by "poking" along at 10 to 15 miles an hour. Often drivers caught in such a manner are business men, to whom extra time means profit. The "slow poke" is just selfish enough that he does not concern himself with the inconvenience he may be causing some medical doctor, who is on an errand of mercy, or other men behind him, who are not desirous of "puttering" along. The courts are perfectly correct in spurring such drivers into a little more thoughtfulness for the "man behind."

HOW MANY WOULD?

We wonder how many newspaper publishers, who are at present so vehemently denouncing those implicated in the somewhat shady transactions in connection with the Beauharnois Canal development scheme, would refuse to publish a full-page advertisement offered them by either the Beauharnois Company or a political party at double rate (preferred position of course) and ask no questions. Here is food for thought, fellow publishers.

Did we hear it said that it was time to reform the Senate. Hon. MacKenzie King, when Premier, appointed Wilfrid Laurier McDougal to the Canadian Senate. When Wilfrid Laurier McDougal accompanied Premier King to Bermuda (for their health) Senator McDougall took particular care to see that all of the hotel expenses of Premier King were paid. What touching friendship.

Hon. David Lloyd George has undergone a surgical operation in an English hospital. Rt. Hon. Lloyd George has been the subject of much dissecting in his political career, and his enemies have never failed to cut deep and without consideration. But the plucky Welshman has survived and always been able to come back with telling force. He has millions of admirers who wish him speedy recovery from this necessary surgical operation.

Considerable ridicule has been levelled at Premier Bennett because he has changed his mind several times with reference to the tariff. So far each change of mind has resulted because of an almost united protest from the people. In listening to the voice of the people, even against his own judgment, Premier Bennett is not showing a vascaliting or weak spirit, but a desire to serve the people as a whole to their advantage. His latest change of allowing bank cheques of $5.00 and under to pass without a stamp is a very sensible one.

Farm Buildings Lost

The large barn and outbuildings on the farm of Alonzo Cross, three miles east of Merrickville, were destroyed by fire early Wednesday afternoon. The barn was struck by lightning and the flames spread to the other buildings. Twenty tons of hay in the barn were also lost. All cattle and machinery were saved The damage is estimated by Mr. Cross as $2,000, partly covered by insurance.

Wins Cup

The following was taken from the Saskatoon Star-Phoenix of July 23rd, 1931:

"The greatest honor an exhibitor of dairy cattle at the Saskatoon fair can win is the cup donated for annual competition by the Royal Bank of Canada. This year this signal honor came to Saskatchewan when A A. Marquette, of Pense, was awarded the prize for the best dairy beast in the show with his superb Guernsey, "Pense Pride Golden Coronet," a three-year-old heifer which has rarely been excelled on any tanbark in America. Tremendous cheers greeted the Saskatchewan victor, who had triumphed over some of the finest cattle on the continent."

Mr. A. A. Marquette is a son of Mr. Hugh Marquette and the late Mrs. Marquette, of Mountain Station, and is well known in this surrounding district.

A Word To Merchants

Merchants everywhere are finding these times that to keep their sales up is a problem that challenges their best energy and resourcefulness. And yet it is possible for keen merchandisers to appeal for business on too narrow a basis. For instance a merchant may be chasing the elusive dollars so hard that he neglects to take an interest in municipal affairs. He may be so preoccupied with his selfish interests that he fails to lend a hand in worthy community enterprises. He may be so wrapped up in the selling of goods as to overlook the fact that the town as well as his store should be made attractive to the people of the surrounding district. He may not realize that unless the shoppers of the nearby country find the town interesting and attractive and unless they take a friendly interest in its welfare they are not going to be drawn particularly to that town. And if they don't come to town the merchant's chances of selling his goods are nil. The live merchant will show more interest in his customer than merely getting his money.—St. Mary's Journal Argus.

Not Much To Complain Of

We, in Ontario, are facing hard times. Farm products are down to the lowest notch they have reached in a generation. The farmer has no money.

And, because the farmer has no money, business is bad and collections are next to impossible. Many business men in the towns are facing a crisis they have never had to face before. Many have already gone to the wall. Many more will be forced to the same destination.

Yes, times are hard. But we, in Ontario, do not realize that there are many people, even in this Canada of ours who are worse off than we are—infinitely worse.

This week we were shown a private letter from a writer living in one of the Western Provinces. This writer said that in their district there had been plenty of wind and mud storms but no rain.

There were no crops, no flowers, no gardens, no vegetables. Everything was burned brown, like the brown autumn, and no matter what changes the weather made, there could be no growth this year.

They were allowed one pail of water every three days from the only well in the village, for drinking and household purposes. At night that well was locked up, for fear some one would steal the water, and it stayed locked until the next day, when a strict watch would again be kept over it.

Those are facts. Read them over again and the next time you feel like crying hard times, perhaps you will remember them and hesitate before you speak.

The West is a big place, and, of course, that is only one section in one Province, but it is a large section and there are others, both in that province and the other provinces of the West just like it.

What a different picture Ontario presents Ontario this year is like the promised land, overflowing with milk and honey. Crops, both in bulk and quality, have rarely given such promises of fruits, flowers, vegetables in profusion. More than man or beast can eat.

In spite of the cry of hard times we really haven't much to complain of—Exchange.

Union Services

After a few weeks rest, Rev. W. D. Turner, resumed work again last Sunday by conducting union services in the United Church. In the morning an inspiring message was given on "Christs Challenge to Christian heroism" from the text John 11:7. He said that brave men are needed to meet the needs of the day. Ideal Christian heroes are needed with sympathetic hearts, pure lives, brave spirits, and magnaminous souls. He showed that the beauty of any life is in its shining for others as Christ lived to serve.

The evening text was Matt. 20:25, and the subject was, 'Greatness according to Christ." The preacher declared that service to God and to humanity was the only qualification for high position in God's Kingdom. Service is the pathway to power and glory and this service is not beyond the humblest woman or man. The greatest man in the world is the man who can most worthily and successfully serve his fellowman. If you would know the beauty of living let your life go out in the service of humanizing. Jesus was the great servant of humanity and made the supreme sacrifice for the redemption of mankind. "Held by my Saviour's Mighty Hand," was most acceptably rendered as a quartette at the evening service.

Next Sunday the services will be held in St. Paul's Presbyterian Church with Rev. W. D. Turner as preacher.

Cheques of five dollars and under are exempt from the stamp tax by an amendment to the War Revenue Act adopted in the House of Commons last week. The amendment was proposed by the government.

Sheriff's Sale of Lands

United Counties of Stormont, Dundas and Glengarry.

Under and by virtue of a writ of execution issued out of the Tenth Division Court of the United Counties of Stormont Dundas, and Glengarry, to me directed and delivered against the goods and chattels and lands and covenants of Agnes Henderson in a certain action in which William C. Clark is plaintiff and the said Agnes Henderson is defendant, I have seized and taken in execution and will offer for sale by public auction at my office, in the County Buildings, Cornwall, on Monday, the 17th day of August, A. D. 1931, at the hour of two o'clock in the afternoon, all the estate, right, title and interest and equity of redemption of the said defendant, Agnes Henderson, in, to and out of all and singular those certain parcels or tracts of land and premises situate lying and being in the Township of Winchester, in the County of Dundas and being composed of;

FIRST;—The west half of the south half of lot number Five.

SECOND:—The east half of the east half of the south half of said lot number Five, both in the Second Concession of the said Township of Winchester.

JAMES F. AULT,
Sheriff of the United Counties of Stormont, Dundas and Glengarry

Sheriff's Office, Cornwall, May 14th, 1931

HENRY'S SHORTHAND SCHOOL, OTTAWA.

No school in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa Schools to come to it.

Therefore, it is not surprising thet business men, in advertising for stenographers should specially say, "Graduates of Henry's School preferred."

For particulars about our course, write
D. E. HENRY, Director
62 Bank Street.

WANTED!

25 Cars of Good Clean No. 1 Barley, weighing 48 lbs. to the bus. Forward your samples to this Egg Grading Station or Phone 150.

DURANT DEALER

Winchester - - Ontario

We are pleased that as a result of the publicity given to Lone Scouting through these columns many new members have joined the movement during the past few weeks. This week applications for membership have been received from Cobden, Hydro, Burkes Falls and Harriston, and at Durham there is every prospect of a full Patrol being formed.

A recent check up of the records of the Ontario Lone Scout Department showed that since its inception two years ago about 460 boys have been admitted to membership in the movement. Of course quite a few of these have been since transferred to regular troops which have been formed as a result of Lone Scout activity.

The Lonies at Fenelon Falls under Senior Patrol Leader Doug. Warren have had a very busy time just recently. On July 4th they had the pleasure of again meeting their friends of the 51st Toronto Troop, who camped near the town. The Lonies helped the Toronto Scouts to make camp, and entered ito their activities with zest.

Later the Lone Scouts were invited to visit the camp of the 90th Toronto Troop at Sandy Point, on Sturgeon Lake. They hiked over to the camp on July 8th, and to their surprise met an old friend who turned out to be none other than "Cookie" ("Colonel" Walton), who was so popular at the Lone Scout Camp at Ebor Park last summer. The Lonies stayed over night with the 90th, and entered into their programme enthusiastically, having a great time at the evening council fire.

We like to see this fraternization between the Lonies and their city brothers, and we are pleased to state that quite a few members of the Lone Scouts have gone to camp this year with regular troops, at the latter's invitation.

The Fenelon Falls Lone Scouts also report a rather unique "Good Turn" which might be copied by other Lonies who live along the lake shore. They recently assisted the local town authorities to clean up the beach, which we think was exceedingly good work, as we have seen quite a few beaches recently that could very well benefit by a similar "Good Turn."

Lone Scout visitors to Provincial Headquarters in Toronto recently have included Bill Gilbert, of Essex, and Jack Bassett, of Listowel, and Harold Nickle of Harriston was in Toronto a short time ago, but he did not pay us a visit. Lonies who come to Toronto for any reason are always welcome visitors to Scout Headquarters, so we hope you won't forget to pay us a call.

This week's Summer Time Proficiency Badge is the Angler's Badge. The requirements are as follows:

1. By the usual angling methods catch and name seven different species of fish. At least one specimen must be taken by fly-casting or trolling and one by bait-casting. In single handed fly-casting the rod must not exceed seven ounces in weight; in double handed fly-casting the rod may be one ounce weight for each foot in length; in bait fishing the rod must not exceed ten feet in length nor twelve ounces in weight.

2. Show proficiency in accurate single-handed casting with the fly for distances of 20, 40 and 50 feet, or in bait casting for distance of 40, 60 and 70 feet.

3. Make three artificial flies (either after three standard patterns or in imitation of different natural flies). Make a neat single gut leader at least four feet long, or a twisted or braided leader at least three feet long. Splice the broken joint of a rod neatly.

4. Give the open season for the game fishes in his vicinity, and explain how and why they are protected by the law.

Applications for membership in the Lone Scouts will be received from boys between the ages of 12 and 18 inclusive, who cannot become members of a regular Troop, for reason of locality or other handicap. Applications should be sent to the Lone Scout Department, The Boys Scouts Association, 330 Bay Street, Toronto, 2.—"Lone E."

Birds Necessary To Human Welfare

JULIAN S. HUXLEY
Eminent English biologist and writer.

To watch birds is delightful enough in itself; but most people like a background against which they can set their observations.

These feathered creatures, what are they in the economy of Nature? What is their history? How do they compare with other kinds of living things? There are no other animals built in at all the same way as birds. How did they come to evolve into their present condition?

The first thing that evolutionary study teaches us is that birds were not always so different from other creatures as they are today. The few fossil birds known from the upper Cretaceous age, 70 or 80 million years back, all had teeth, like any lizard. When we reach the Jurassic period, near twice as long ago, the only two specimens of birds so far found were so unlike any ordinary bird in their construction that, if it were not for the lucky accident of their having been embedded in such fine mud that the imprint of their feathers is still preserved to us, we should have been in doubt as to whether they were birds at all. They might have been agile reptiles, for they were toothed, had long jointed tail bones, and big claws on their fore limbs.

Birds, in fact, are an offshoot from one kind of very active reptile, probably related to some of the smaller dinosaurs. They became birds through the evolution of feathers out of scales, which first, by acting as a heat-retaining blanket, allowed their temperature to be kept at a high level, and, secondly, made flight possible.

There have been three other groups of animals to achieve true flight: one, the flying insects, arose from a wholly different stock; two, from the same back-boned stock to which the birds belong—the flying mammals or bats, and the flying reptiles or pterodactyls, the latter all long extinct.

The great advantage which the birds had over their vertebrate competitors in the art of flying was that they, possessing feathers, could make a wing of these; while the skinny flight-membranes of bats and pterodactyls had to be stretched taut and so demanded attachment to hind as well as fore limbs. Bats cannot run or hop, nor could pterodactyls; their legs are subordinated to their wings. But birds kept their legs clear of this entanglement, as the ancestors of man kept their fore limbs clear by running; and so birds were free both of the air and of the earth, having one pair of limbs for each element

Insects are the equals of birds in this respect; but they are inferior in another. They can never grow big. It would take too long to go into the reason why, but the fact remains; an insect as big as a swan or even as a thrush is, luckily for us, unthinkable. Small size is in itself a disadvantage; it brings the further disadvantage in its train that it prevents an animal from having a constant temperature higher than its surroundings, for its bulk is so small in proportion to its surface that the heat generated by the chemical combustion in its muscles all leaks away in no time.

So insects are not only small, but the whole tempo of their lives goes up and down with the temperature of the outer world. They cannot achieve the constancy of living possible to a bird or mammal, and are at a great disadvantage in winter, being put out of action more or less completely by the cold.

However, though birds can grow big in comparison with insects, they are limited in size in comparison with other vertebrates. This comes from the fact of flight; the laws of aerodynamics make it very inconvenient for a flying bird to weigh over 50 pounds, and quite impossible for it to weigh as much as a horse or even a leopard. It is only birds which have given up flying, like the ostrich or cassowary, which have even begun to grow big according to mammalian standards. The stock size for birds, in fact, is from something under an ounce to about 10 or 15 pounds.

Birds and mammals developed from two quite distinct reptilian stocks. Birds have kept reptilian-looking scales on their feet, and have stuck to the reptile's method of reproduction by large-yoked eggs. In some ways, however, the bird branch has evolved beyond their rivals, the mammals, and in these respects must be regarded as at the very tiptop of the tree of life. Birds have the highest temperature, and therefore the greatest speed of vital chemistry, of any creatures. The have the greatest activity, the greatest emotional variety; they show the highest extremes of beauty in color and pattern, they have the most striking and highly developed courtship of any group of animals, and their songs are by far the most beautiful and elaborate music that the world knew before the coming of man. The are the most mobile of creatures, and so are at a great advantage over every other kind of animal in high altitudes; for they can breed there and take advartage of the riches of the Arctic lands and still more of the Arctic seas during the summer, and then migrate to temperate climates.

What part do birds play in the elaborate system of exchanges which constitutes the balance of Nature? The great majority of them are eaters of other animals. For this they have stuck to the ancestral predilections of vertebrates, which were all in origin flesh eaters.

The birds as a whole stuck to a meat diet; but their average size determined the average size of their prey. The great majority of them are so moderate in bulk that they can only eat small creatures, though they will include worms and snails and spiders, will for the most part be insects. Some of the larger birds eat creatures up to the scale of frogs and mice, or are carrion feeders, or prey on smaller birds or on fish. But if we could take statistics on the food of all birds, we should find that insects headed the list.

Now insects are in the great majority vegetable feeders. So that in regard to what we may call biological trade—the complicated circulation of matter through lifeless forms in earth, water, and air, through green plants, animal bodies, and microscopic scavengers like moulds and bacteria, and back into lifeless forms again—the net effect of birds is to be a check upon insects in their consumption of green plants and their products. In this way they are allies of man.

So birds have a place in civilization. While we are mechanizing life, we should see that a place is kept for them, for our delectation and that of our posterity.

Gain Recorded in Population

The population of Stockholm has increased so much that the city now has more than 500,000 inhabitants. The census of the various districts was finished in March and shows that the total population at the beginning of 1931 was 502,203 persons.

Latest in Gas Masks

Three charming young ladies are exhibiting the latest types of gas masks at the Society of Chemical Industries exhibition held in Westminster, England. The exhibition displayed many of the latest marvels of science.

New Letters Patent For Governor-General

Ottawa.—New letters patent constituting the office of Governor-General of Canada have been issued by King George V., together with new instructions for the guidance of the conduct of the Governor-General. The last time letters patent were issued was in 1905 by King Edward VII. In general the recent documents bring the office of the Governor-General into accord with the recommendations of the Imperial Conference of 1926, which were adopted by the Parliaments of the Empire at various dates since that year.

Specifically, they remove from the Government of the United Kingdom the last vestiges of control exercised by that Government over the appointment of a Governor-General to Canada, making it a direct and personal one by His Majesty, acting on the advice of H.M. Government in Canada. Formerly in defining the powers and authority of the Governor-General, the letters patent directed His Excellency to carry out such instructions "as may from time to time be given him under our sign manual and signet, or by order-in-Privy Council, or by us through one of our principal secretaries of state." In the new issue, the last two references are eliminated.

The same deletion occurs in the document containing the King's instructions.

An archaism is removed from these instructions having reference to the grant of pardons, etc., by the Governor-General. Previously His Excellency had the authority to prescribe banishment for political offenders. That obsolete form of punishment is done away with by merely deleting the sentence which conveyed that power.

Saskatchewan-Britain Cattle Trade Growing

Regina.—Saskatchewan is shipping 150 head of cattle per week to Great Britain as a result of contracts entered into by the British Co-Operative Wholesale Society.

During the visit of officials of this society to Regina during the spring it was suggested approximately 100 head be shipped weekly. Officials of the Government and the Saskatchewan Live Stock Pool did not feel that the province was in a position to handle this order, and suggested starting with a small shipment and increasing it as the pool became supplied.

As a result it was learn from unofficial sources shipments had grown to 150 head per week under the contract.

Former Cannibals Demand Classics

London.—Civilization and education have wrought such a change in the head-hunting and one-time cannibal tribes of New Guinea that an urgent request came from that country for Bunyan's "Pilgrim's Progress" in the Tubetube language. This is one of the tongues of a Papuan tribe, and is the 123rd language into which the Religious Tract Society has translated the famous classic.

This edition has eight colored illustrations, and some thousands of volumes have already been dispatched. On arrival they are made up into suitable-sized packages to go up country on the heads of the native bearers.

Grasshoppers Still Invade Nebraska

Country Left Barren in Wake of Hordes Despite Desperate Offensive

Buffalo, Neb.—Wooden fence posts, wagon tongues, even clothing hung out to dry, were quickly devoured by the gray-yellow horde. Anything containing vegetable fibre attracts the hungry grasshoppers.

Although farmers said several millions of the grasshoppers had been killed, additional swarms are expected when eggs now resting the ground have incubated. Fires in which bodies of the slain insects were being burned dotted the plains tonight. Introduction of poison as a weapon resulted in the death of thousands of the insects.

At some points the bodies of the grasshoppers were piled high on the rails, impeding trains. At others they made the ground slippery beneath the tires of automobiles.

Some of the farmers, their crops destroyed, raised money by packing the dead grasshoppers in preservatives and selling them to fishermen for bait at 20 cents a pound.

The insect invasion has devastated gardens, crops and fruit trees, and behind their advance stretches a sere swath. Damage already is in the millions of dollars.

Entymologists said the grasshoppers soon would sprout wings and increase the area of their damage. Unless checked soon, they will be in control of the entire tier of Northern Nebraska counties.

Fields, green today, may be splotched tomorrow with barren stretches. Another day, and the fertile Platte Valley may be barren.

City and town dwellers also are witnessing the march of the grasshoppers. Gardens and trees are left leafless. Hungry grasshoppers swarm solidly on the houses, gather in clusters and fall to the ground from trees and telephone poles.

Burning of the insects was decided upon when farmers feared their cattle would die after eating the bodies of grasshoppers which had been killed by poison.

Births, Deaths, Marriages

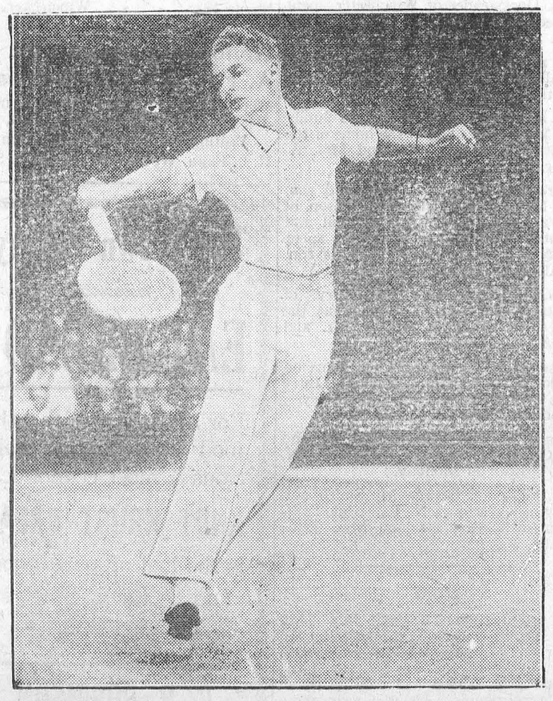
According to a bulletin issued by the Dominion Bureau of Statistics, births registered in June in 52 cities of Canada numbered 7,457, deaths 3,369 and marriages 3,706, as compared with 7,258 births, 3,644 deaths and 4,300 marriages registered in June last year, giving an increase of 2½ per cent. in births, and decreases of 7½ per cent. and 14 per cent. in deaths and marriages respectively.

For the six months January-June births showed a decrease of 2 per cent., deaths an increase of 3½ per cent. and marriages a decrease of 10½ per cent. from the corresponding six months of 1930.

Many Instruments Tested

During the year 1930 the Physical Testing Laboratory of the Topographical Survey, Dept. of the Interior, subjected to test for the Dept. of National Revenue nearly four hundred hydrometers. These instruments are used by the latter department for the purpose of determining the gravities of spirits, oils, and other liquids in connection with the collection of customs and excise duties.

British Star



"Bunny" Austin, England's ranking Davis Cup tennis player, returns a fast one during a set which he won from Sydney Wood of New York.

So They Say:

"When you make art democratic, you deify mediocrity and the indifferent."—Geraldine Farrar.

"I am perfectly certain that there are more and better things to do than any one is doing now."—Henry Ford.

"Some of the most successful men I've known gave money hardly a second thought."—Charles M. Schwab.

Economic boundaries are no longer identical with political boundaries anywhere in the world."—Nicholas Murray Butler.

"In twenty-five years there won't be a respectable opponent of birth control."—Will Durant.

"I am certain that Americans are beginning to realize that material possessions are not essential to a happy and blessed life."—Albert Einstein.

"As a gardener, Nature has two sides, a good and a bad. She plants and she also prunes."—Sir Arthur Keith.

"The prevailing pessimism is a good sign because the crowd always lags behind the event."—Sir Harry Brittain.

"The sophisticated reader does not like being led by the nose any more than the sophisticated writer likes leading him."—John Galsworthy.

"Physical discomforts in prisons are being removed, but spiritual, mental, emotional discomforts remain." —Lewis E. Lawes.

"We are now asking the landowner to render unto Caesar the things that are Caesar's."—Philip Snowden.

"The dream is in large part of warning of something to come."—Dr. Carl Jung.

"After all, it is not entirely certain that every question admits of a reasonable answer."—Albert Einstein.

"Joy is a fruit that Americans eat green."—Amando Zegri.

"Young people ought to be paid to go to school."—Henry Ford.

"Poverty is opulence where there is happy marriage."—Rupert Hughes.

"It is very difficult to make women believe anything that is so."—Thomas A. Edison.

"There is nothing that so kills the ambition of a man as criticism from his superiors."—Charles M. Schwab.

"A creative dressmaker, to be successful, must understand the psychology of women better than a surgeon understands their anatomy." — Paul Poiret.

One Smoked

The two tourists had spent six hours climbing the great volcano. At last, weary of limb, the reached the top and approached as near as they dared to the crater. It was smoking ominously.

One of them sat down to admire the view, but the other turned his back on it.

"Look here," he said suddenly, "let's go down and get back to the hotel. I can't stand watching that thing any longer."

"What!" ejaculated his friend. "We've climbed right up here, and as soon as we reach our objective you want to go back again." He paused and looked anxiously at his friend. "It isn't that you're afraid, is it?" he added.

"No," came from the other tourist. "It's only that I can't endure watching that crater smoke after I've found that I've left my tobacco at the hotel."

Presents for Bridesmaids

Choker necklace of carved white beads and amber flowers with bracelet to match.

* * * *

Choker of semi-precious stones in crystal and coral make a pretty combination.

* * * *

Necklace of tiny pink coral elephants strung on to a fine gold chain.

* * * *

A pair of shoe buckles in marcasite or paste.

* * * *

Vanity case of shagreen, hand-painted ivory or enamel.

* * * *

Evening bags of petit point with enameled or jewelled clasps.

Promises Leprosy Eradication

Rio de Janiero.—Eradication of leprosy in Brazil within thirty years is promised by Dr. Belisario Penna, head of the health department, in a recent report. Dr. Penna said that if immediate steps are taken to combat leprosy through detention of those affected, their isolation and subjection to a special treatment, the present virulent diseases would not only be definitely checked, but virtually wiped out within three decades. There are more than 50,000 cases of leprosy in Brazil now, Dr. Penna reported.

Real Success

When is a man a success?

When he refuses to slander even his enemies.

When he does not expect to get good pay for poor service.

When he does not wait until tomorrow to do the things that should be done today.

When he is loyal to his employer and not false to the ones with whom he works.

When he intelligently co-operates with the other members of the organization.

When he is studying and preparing himself for a higher position with better pay.—The Silent Partner.

Anything to Oblige

The bill collector called for money that was due to his firm.

"I'm sorry," said Mr. Dedbeet, "but I cannot pay you. Call again to-morrow."

The collector thrust out his jaw aggressively.

"That's what you said yesterday!" he snapped.

Dedbeet shrugged his shoulders.

"All right, make it the day after to-morrow," he said.

Seven Women Fliers to Compete In British Air Classic

London. — Forty-two competitors, including seven women, are ready to start in the 1,000 mile race for the King's cup, British air race classic. The field includes the first Canadian in the event, John C. Webster, of Montreal, flying a Canadian machine.

A daughter's challenge to her father is one of the features of the race. Capt The Hon. Frederick G. Guest and his daughter, Miss Diana Guest will fly moth planes, leaving together 28 minutes and nine seconds after the first starters.

No one would be surprised if the trophy remained in feminine hands for another year. Miss Winnifred Brown, who last year was the first woman to capture the trophy, is heavily handicapped, however, leaving an hour, 17 minutes and five second after the first machines.

Lady Bailey, famous for her long distance flights, is most heavily handicapped of the women entrants, being scheduled to start an hour, 52 minutes and 27 seconds after the first machines which take off from Heston airdrome at 6 a.m. Miss F. J. Crossley, daughter of a motor car manufacturer, in a plane piloted by flying officer H. S. Deach, a member of the Royal Air Force speed flight, takes off with the first group.

The scratch competitor is Flight-Lieut. C. B. Winchott, whose plane is capable of a speed of 150 miles an hour. He starts two hours, 33 minutes and 13 seconds behind the first planes.

Water Replaces Steam in New British Engine

Tradition of 300 Years Upset by Invention Using Liquid Working Substance

London.—A new kind of engine that uses liquid water instead of steam, discards boilers and condensers, develops more power in less space than ordinary steam and gas engines, with freedom from explosion hazards and heat wastes, will shortly be offered for experimental commercial use here.

It is the invention of J. F. J. Malone, engineer, of Newcastle-on-Tyne, who has experimented with the novel water engine for several years. The details of its operation have just been revealed.

Since steam and other engines have been worked always by the expansion of gases of one kind or another for some 300 years, this new kind of prime mover that is operated by expansion of liquid instead of expansion of gases has created much interest in engineering circles.

Water Stays Liquid

Both the new water engine and conventional steam engines use water, but in the case of the steam engine the water must be changed to steam before any work can be done. In the Malone engine the water stays liquid even under pressures of tons per square inch created within the engine.

Rapid heating and cooling of the liquid water are necessary in order that the water engine will operate. This was accomplished by Mr. Malone through the development of a novel form of heat transfer within one of the cylinders of the water engine.

Other advantages claimed for the engine are:

Only a small amount of water is needed and this reduces the size of the engine and allows it to be used where water is scarce.

It runs and changes speed more noiselessly than conventional engines.

It loses less heat than other engines and its outside shell is cool to the touch.

Its mechanism is simpler and the working parts need be opened for inspection only once in four years.

There is no incessant boiler cleaning, no water gauges, no risk of shortness or foulness of water.

The control system is simpler than in the steam engine.

It has no exhaust, as the water is used over and over.

All bearings within the engine are cold and lubricated by the water itself.

New Cards Invented To Aid Bridge Players

Zurich.—A new kind of playing cards, according to The N.Y. Times, will soon be adopted by bridge players all over Europe and America, according to Dr. Paul Herrmann of Zurich, an authority on the game.

The cards, made in Austria, lessen the chances of a revoke at contract bridge, a game rapidly becoming more complicated. Hearts are red, diamonds pink, spades black and clubs dark green; the cards themselves are longer and narrower than those at present used and are made to fit the present-day duplicate contract boards.

Dr. Herrmann thinks that bidding by players themselves, in duplicate contract, will rapidly be superseded by the employment of an announcer, thus eliminating all likelihood of information being wrongly transmitted by inflexion of the voice when calling.

Efforts are being made to adopt a more uniform system, both in the forms in which contract bridge is now played and in the methods of scoring, in order that international competitions may be arranged between leading bridge clubs.

High Heels Replace Lancashire Clogs

London.—Lancashire lasses have taken so largely to high-heeled shoes and silk stockings that a moving picture company which has been visiting that famous British county to make films of mill workers, has had to send to the south of England for a supply of stout wooden-soled clogs for camera models to appear in.

The clog is the traditional footwear of the Lancashire industrial workers, but even the much-talked-of trade depression has not brought them back to popularity. Depression or no depression the mill lasses of Lancashire wear high heels and silk.

Russia's Population Gains 35 Per Cent.

Moscow.—The census of urban population taken this year shows that Moscow has increased 35.5 per cent. since 1926, reaching a total of 2,745,000.

The population of Sverdlovsk, for instance, has grown since 1926 from 134,000 to 234,000, or 79 per cent. The population of Ivanovo - Voznesensk reached 162,300 against 108,700, an increase of 49 per cent.

Scientist Explains New Discovery

New Germ Isolation Process May Aid in Devising Cures

Chicago.—A mild-mannered little man, described for fellow scientists here recently his disease germ discovery, expected to have as far-reaching effect on the treatment of human ills as the processes evolved by the famous Louis Pasteur.

The man is Dr. Arnold I. Kendall, professor of bacteriology at the Northwestern University Medical School for the last 20 odd years. His discovery consists of a process of making visible under the microscope bacteria so tiny that research workers heretofore have been unable to identify it.

"The discovery is as startling the the scientific world as the discoveries of Pasteur," said Dean Irving Cutter, of the Medical School.

"Dr. Kendall's accomplishment means that we now stand on the threshold of a great discovery," added Dr. Edward C. Rosenow, eminent bacteriologist.

Dr. Kendall has developed what he calls the "K Medium," a soupy solution in which the invisible bacteria now may be isolated. His experiments are not over despite his years of research, he said, and practical use of his discovery is yet to come. He now is hard at work on a paper describing his "K Medium" in detail, so that it may be manufactured in laboratories other than his own.

A small intestine of a rabbit, dog, swine or man, chemically treated, is the essential ingredient of the solution, he said. He asserted that his experiments in Chicago hospitals ver a period of years indicated that it could and would isolate the bacteria of a majority of the malignant diseases.

Isolation of the infinitesimal germs means that such diseases as sleeping sickness, paralysis, influenza, cancer and rheumatism may be traced to their primary causes and that physicians hereafter may be able to devise specific cures for them.

Vote or Be Arrested Aim of Bill in France

Paris.—A law compelling all French citizens to vote, under penalty of fines, has been proposed by a group of conservative members of Parliament.

Voting, they declare in the bill they have laid before the Chamber of Deputies, is a duty and not a mere privilege.

The Chamber of Deputies and the departmental and communal elective bodies are, they maintain, composed too largely of the representatives of minorities because the other fellows shirked their duty at the polls.

In France, as in most countries, the well-to-do citizens are inclined to forego their right to vote. It is with the purpose of getting out this portion of the vote that the backers of the bill, led by Louis Marin, have moved for the reform.

Argentine Grain Output Grows

Buenos Aires. — Argentine wheat, corn, linseed and oats shipments this year show a considerable increase, private statistics of cereal exports reveal. A total of 1,928,752 tons of wheat was shipped from January 1 to May 22, as compared with 1,291,104 tons for the corresponding period a year ago; 2,480,795 tons of corn, against 1,2265,482 tons; 951,045 tons of linseed, against 683,378 tons, and 301,963 tons of oats against 162,457 tons a year ago.

70-Year-Old Man Enters University

Toronto.—A freshman has been admitted to Queen's University, Kingston, for the summer classes, who is 70 years old, is an ex-mayor and also an ex-member of the Canadian Parliament. Mr. I. E. Pedlow of Renfrew, Ont., is Canada's oldest "freshman."

Mr. Pedlow's college days will be followed with great interest, for he has carved out an honorable and useful career for himself, and is now taking his studies, which usually come first, last.

"Reckless Walking"

A charge of "reckless walking" was recently brought in a Paris court, for the first time, it was said, in French legal history. Damages of $2,000 were demanded by the plaintiff, a woman worker in a dressmaking establishment, who was hurrying across the Rue de Rivoli when she collided with the defendant, a banker. The plaintiff maintained that her wrist was sprained when she was thrown down by the collision.

The Modern Wolf

Have you heard of the unemployed man who put a sign on his gate reading: "Agents, solicitors, etc., etc., Keep Out. Beware of the Wolf on the Porch!"

"Digestible as milk itself"

Give your children all they want of this healthful cheese food. Velveeta contains all the elements of rich whole milk. Old and young can eat it freely.

KRAFT Velveeta

Made in Canada

"Speaking generally, one may say that politically America is always on the move."—William Allen White.

"There are no such things as 'natural rights'; there are only adjustments of conflicting claims."—Aldous Huxley.

"The reality of experience is far more eloquent than all the theories and philosophies on all the tongues and on all the book-shelves."—Benito Mussolini.

"We of the present age know very little—almost nothing." — Sir James Jeans.

Canada Rates High In Chinese Industry

Winnipeg. — Canadian exports to China can be doubled and trebled in the next ten years, if the Canadian business men are willing to investigate the unlimited opportunities that exist, said Lieut.-Col. L. M. Cosgrave, Canadian trade commissioner to China, who is touring Canada.

Canadians stand higher in the estimation of the Chinese than any other people in the world, Colonel Cosgrave said. The Dominion has had very favorable dealings with the Chinese nation. It remains only for the industrial leaders of this country to acquaint themselves with the methods of approach made necessary by the Chinese nature, in order to capitalize their present opportunities.

No matter how well you treat the world, you will never get out of it alive.

Owl Laffs

On the eve of their execution, an Irishman, a Scotchman and a Jew were asked if they would like any special delicacy.

The Irishman voted for Irish stew, the Scotchman for a bottle of Scotch whiskey, and the Jew fancied strawberries and cream.

Warden (protesting)—"But, strawberries are not in season."

The Jew—"That's all right, I can wait."

Sing a song, sing a song,
Ring the glad bells all along;
Smile at him who frowns at you,
He will smile and then they're two.

Laugh a bit, laugh a bit,
Folks will soon be catching it,
Can't resist a happy face;
World will be a merry place.

Laugh a Bit and Sing a Song,
Where they are there's nothing wrong;
Joy will dance the whole world thru
But it must begin with you.

First Tramp—"After I had given her back her lost purse, she put her hand in her pocket and said: 'Take this for a hot drink'."

Second Tramp—"What did she give you?"

First Tramp—"A lump of sugar."

Call the Police!

The wealth of the average American has been set at $2,977. My gosh, somebody been short-changed!—and how!

Lampson—"Have you ever been at a telephone in a storm?"

Harrell—"Oh, yes! My wife occasionally calls me up."

Kayo — "They gave Six Second Smith a present of a bathrobe before the fight last night."

Okay—"Yeah. And he got a beautiful pair of socks later on, too."

Clothes make the man in some environments, but an air mail stamp doesn't keep a circular out of the waste basket.

Mrs. Blabber—"You're looking very happy this morning. Have you had good news?"

Mrs. Gabber—"Just wonderful. My husband has just had a nervous breakdown and we're going south.

Mr. Warburg, a noted banker, says business revival needs the help of psychologists and not economists. Perhaps a few buyologists would help.

Joe—"Hullo! Bought a saxophone?"

Moe—"No; I borrowed it from the man next door."

Joe—"But yo ucan't play it."

Moe—"Neither can he while I've got it."

Mother (to little daughter returning from Sunday school)—"Well, what was your lesson about this morning?"

Little Daughter—"A man named Solomon."

Mother—"And what did you learn about Solomon?"

Little Daughter—"The teacher said he had 300 wives and 700 cucumber vines."

Harry—"A burglar broke itno my house last night."

Ralph—"Did he get anything?"

Harry—"Rather! You see, my wife thought it was me."

A guest hurried up to the hotel clerk's counter. He had just ten minutes to pay his bill, reach the station, and board his train.

The Guest—"Hang it. I've forgotten something. Here, boy, run up to my room—No. 427—and see if I left my pyjamas and shaving outfit. Hurry. I've only got five minutes now. Show some speed."

The boy hurried. In four minutes he returned, empty handed, and out of breath.

The Bellhop—"Yes, sir, you left them."

The girls are not going to worry about the washout of the cotton crop so long as the silk worms keep busy. If some men would spend as much time doing things as they do in telling about the things they have done, a lot more would be accomplished. Few things are as painful as telling a funny story to a person who has no sense of humor. An egotist is a person who thinks he is as clever as you think you are. It may be all right for people to love their enemies, but it has been our observation that mighty few of 'em do it.

"Palmy Days" Ford Monkeys

A special "palm house," kept at a tropical heat, has been provided at the London Zoo for the more delicate varieties of monkey and for wading birds from the tropics.

Cheap notoriety is usually an expensive luxury.

British Population Numbers 44,790,485

Increase Lowest Since 1801, but Density is Second in Europe to Belgium

Although the main statistical points in an analysis of Great Britain's population at 44,790,485, according to the censes just completed, an interpretative analysis has been made by S. P. Vivian, the Registrar General, serving to modify the discouraging features—the lowest increase since 1801 and the declining birth-rate.

He declares that the total is the largest ever recorded in the country, and adds that its density of 685 to the square mile, with the exception of that of Belgium, is the highest of any country in Europe.

Other points in his analysis are:

"The numerical increase is less than that of any decennium since 1861 (when the population was but half of its present dimensions) with the sole exception of the war decade, 1911-1921, while the percentage increase, with the same exception, is only half or less than half of any previously recorded. But for the exceptional loss of men during the war the present decennial rate of increase would have been the lowest recorded in respect of England and Wales since census taking was introduced in 1801.

"The full significance of the fall (in births 16.3 per cent.) will be but dimly appreciated for many years to come; any temporary satisfaction felt in a reduction of the number of unproductive mouths to be filled during the present period of economic stress must sooner or later be qualified by a realization of the profounder secular issues involved. The births of to-day govern the population of the future, and, just as the nation which faced the upheaval of 1914 to 1918 was the product of the birth rates prevailing toward the close of last century, we are now observing the conditions which will shape the generations charged with the national density in the latter part of the present century.

"The deaths registered in the intercensal period were more than half a million fewer than those of either of the two preceding decennia. This numerical reduction of more than 10 per cent., which, if allowance be made for the increasing age and numbers of the population exposed to risk, represents a reduction in true mortality of more like 20 per cent. compared with the decennium 1911-2- (exclusive of deaths on active service) or 30 per cent. compared with the last pre-war decennium 1901-11, affords nothing but satisfaction, indicating, as it does, a definite advance in the general vitality of the nation as a whole."

Motor Tips

Top cleaners that work well on the fabric of some cars may not be correct for others.

The weight of the car is materially reduced if the jack is set as near the end of the axle as possible.

Because high-compression engines are harder to cool, the radiator should be drained and flushed at least once a month.

Undue strain on the steering gear is prevented if the car is kept slightly in motion when turning the front wheels.

Failure to keep the car within the white line on the roadway not only is an infraction of the law, but it is a menace to traffic.

The spare tire should not be left on the back of the car too long. It is better to put it to work before the rubber deteriorates.

Stop the car immediately if a bee or a wasp flies inside. Driving the car and disposing of the insect cannot be done without a sting or an acident.

Drive slow when forced through a partly flooded section of the road. This not only gives better traction, but prevents splashing water on the ignition equipment, as would be the case if driving faster.

Which Was the Worst?

He hobbled into his neighbor's garden and displayed a tear in his trousers.

"I say, Smith," he commented angrily, "didn't you say your dog's bark was worse than his bite?"

"Yes," replied Smith.

"Then," said the other, "for goodness' sake don't let him bark. He's just bitten me."

Goodby!

Capt. Lawson Smith, expert English sea diver, kisses his baby daughter good-by just before descending at Clacton-on-Sea.

Hospital Night

The ward is never dark; here patient skies
Lend not their night to sweep
Smoother than feathers over shuttered eyes
In silver fronds of sleep.

There is no silence in these corridors,
No ageless quiet like rain
Descends in ice-clear beauty here, and pours
Through the unshuttered brain.

But these are shells, the bodies that rest here,
Still lips that shape no cry,
Pierced flesh, and wounded feet that cannot stir,
Torn hands that useless lie:

For like a flock of birds their thoughts have flown
Beyond the world; and free,
Travel the silent dark roads unknown,
Embrace eternity.
—John Barton, in The Spectator.

The New Education

Bertrand Russell in the New Statesman and Nation (London): (In their school in Sussex Bertrand Russell and his wife aim to bring up their pupils with a real knowledge of the world, instead of in ignorance of it). In ordinary education the child is brought up to believe, or at least to pretend to believe, that his parents and teachers are impeccable, that his country is always right, that statesmen of his own country and political party are invariably high-minded, that the wicked are easily discerned and invariably defeated in the end, and that only persons of rare depravity such as one is very unlikely to meet would be guilty of any sexual irregularity. Captains of industry, proprietors of great newspapers, admirals, generals, Privy Councillors, and such, are represented as invariably guided by the loftiest public spirit. When the young man goes out into the world and begins to see through all these amiable falsehoods, he almost inevitably becomes a cynic. Cynicism is the price we pay for a fantastic ethic. Children brought up with a sense of reality will not have to suffer this shock.

Canada Reserves Section British Industries Fair

Ottawa.—It was announced recently by the Department of Trade and Commerce that reservation of a Canadian section at the Birmingham section of the British Industries Fair next year has been made by the Canadian Exhibition Commission. The same space as was held this year has been secured and is located in the heart of the show. Considerable attention has been attracted in past years to the Canadian Government exhibit which is the only one of its kind from the overseas Dominions and Colonies.

London Opinion: It is said that the common fly is capable of traveling 95 miles in a single day. The trouble is, it won't.

Looks Easy

Horsemanship of rare ability was demonstrated recently by members of 5th Inniskilling Dragoons during a rehearsal for Aldershot command horse show at Aldershot, England. These daring equestrians show you how easy it is.

Great Lakes Region Has Wide Appeal

Many and Varied Tourist Attractions in Area Bordering on Great Inland Waterway

The Great Lakes region of Canada embodies a truly wide range of scenic and recreational attractions and through its accessibility is one of the most favored tourist districts of the Dominion. By motor, steamship, and rail this enchanting area may be reached from any of the Canadian provinces and from the United States. Fishing, hunting in season, canoeing, and bathing, as well as such organized sports as golf, and tennis, may be enjoyed under the most ideal conditions.

A central highway route traverses the whole of the southern section, affording a splendid motor drive from Montreal, Quebec, to Windsor, Ontario, a distance of nearly 600 miles of smooth travel. This route parallels the St. Lawrence and the shore line of Lake Ontario, and offers splendid views of the river, the Thousand Islands playgrounds, lake vistas, and pleasing rural scenes, interspersed with alert communities.

Side trips can be made from Kingston through the Rideau lakes and from Port Hope to the Kawartha Lakes district, two spots rich in canoe routes and places to hunt and fish. North from Toronto, Muskoka and Lake of Bays are districts of particular charm. There, nature has designed an out-of-doors particularly qualified to meet all the requirements of a summer vavation. West from Toronto to Windsor the trail leads through areas of intense agricultural and floral development, the early history of which is pleasantly associated with colonization days. East from Hamilton is the Niagara peninsula with its four major claims to distinction—the high development of fruit culture; the twin cataracts of the Niagara River; the Queenston - Chippewa power development; and the Welland canal. The shore lines of lakes Erie and Huron have many bathing beaches and snug summer colonies which find much favor in the eyes of tourists.

The central portion of the Great Lakes district is traversed by both rail and motor highway. Ottawa, the Dominion capital and site of the Parliament Buildings, is the gateway to the Rideau lakes, the fish and game regions of the Gatineau, and the Laurentian hills, a vast playground of river and lake, rolling hills, and green forest. Westward from Ottawa the railway runs through and the motor route passes close by Algonquin Park, an extensive provincial reserve rich in fish and wild life, and threaded by innumerable canoe routes. Farther west lies Mattawa, the starting point of many expeditions into the big game country beyond. North Bay is the meeting point of three roads with outstanding attraction. To the south is the beautiful lake district leading to Georgian Bay and its island paradise; to the north the softwood forests and gold-bearing rocks beckon to the adventurous; while westward the trail passes through the famous copper and nickel belt and skirts the southern boundary of a district noted for its variety and quality of fish and big game.

Six Million Diamond Exhibit Shown at Paris Gallery

Paris.—A $6,000,000 diamond exhibit has been dazzling the eyes of Parisians in the Rue de Choiseul at the Galerie Mauboussin. In addition to hundreds of stones made up into necklaces, rings and various sorts of decorations, the exposition included diamonds in the rough and in various stages of cutting for the market.

The most gorgeous piece in the collection was a necklace valued at $80,000. The stones were cut so that they threw off prismatic hues instead of the cold, fiery light of regulation cut diamonds. Also, instead of being pierced like ordinary beads, a process which would partially destroy their brilliancy they were attached with tiny hooks which gripped into equally minute slots in each diamond and held the necklace together.

Another distinguishing mark of the models displayed was the stringing together of thirty perfectly graduated canary diamonds by an East Indian method, that of making platinum joints.

The Simple Things of Earth Are Loveliest

The simple things of earth are loveliest:
A fire on the hearth, the lamplight's glow;
The hour when the heart finds peace and rest,
A mother's lullaby crooned soft and low;

The wayside blossom, tiny woodland stream
That sings a happy, lifting roundelay;
Soft, billowy clouds that drift as in a dream,
The hush of dawn, the sun's last flaming ray;

The friendly trees that give of fruit and shade,
The tendrils of the grape-like clinging hands;
O there are scenes more gorgeously arrayed,
But these the heart has known and understands.

Mankind has reached the pinnacle of power,
Has conquered land and sky and ocean's crest,
And yet, when comes the heart's deep, prayerful hour,
He knows the simple things are loveliest.
—Margaret E. Bruner, in Ave Maria.

Patience and Humour Exemplified in Spain

There is a delightful old Spanish proverb which it is wise to learn before visiting the country: "Have patience, and the mulberry-leaf will become satin."

A tiny story illustrates this admirably. Going to one of the frontier stations for a friend's arrival we saw the notice chalked up that the train was two hours late. After inspecting the church and wandering round the village in an icy wind for the prescribed two hours we returned to the station to find no sign of any train. The station-master, who regarded us with a pitying look, was approached. "Was the train then more than two hours late?" "Mesdames, the train is seven hours late," he replied.

"But why do you put up the notice that it is two hours late?"

"Ah, that, mesdames—that is to give a little hope!"

If you have the gift of leisure and of humor, Spain unfolds itself to you as a country of great charm and character, but there must be no question of rushing through it.

If you have patience your mulberry-leaf will indeed become satin; you will realize the graciousness and dignity of the Spanish character and will taste the full flavor of those delightful qualities. Indeed, in a few weeks you will come to agree with the Spaniard himself that rush and hurry are undignified and, in Spain at least, will effectively prevent your seeing either country or people as they really are.
—From "Spanish Sunshine," by Eleanor Elsner.

Character or Color

Natal Advertiser: Lord Willingdon has said that it is character not color that makes a man. This is the one fact which counts. If you take your stand on color, then all those qualities which are or may be common to men of diverse races—heroism, virtue, benevolence, sacrifice, self-sacrifice—become little better than words that mean nothing to those who use them. The vice of the white becomes a greater thing than the virtue of the brown; and the valour of sacrifice of the yellow becomes a baser thing than the self-sufficiency of the European. But supposing that we forget about the color of a man's skin, and we think only of the virtues of character that are revealed by those who come under scrutiny. Are we going to say that the sun which burns a man black also makes his soul black, and the cold which leaves him a pale skin makes his soul white? We all know that, in the last resort, the worth of a man is determined by the worth of his soul.

Magnet Takes Metal From Eye

A giant electro-magnet to remove metallic particles from the eye, has been donated to the St. Mary's Hospital in St. Louis. This magnet, the only instrument of its kind in the world, is available to any physician who may need it for the use of patients.

Special Plant Attention Advised For Dry Weather

In hot, dry weather, such as comes in midsummer, plants must receive some special attention if they are to thrive. They must be watered and have available a sufficient supply of plant food if they are to escape injury and remain in a vigorous condition.

In watering the lawn and garden, one should not follow the usual practice of sprinkling it lightly every day. This is a harmful method. It tends to cause shallow rooting of the plants, which makes them susceptible to injury during the extreme hot weather. It is always best to soak the soil thoroughly a couple of times a week, and if enough water is applied so that the soil is wet to a depth of several inches the plants will thrive during the hot summer weather.

In working in the garden, cultivating and hoeing at this time is beneficial, because it aids in maintaining the moisture content of the soil. The gardener should be careful not to work the soil more than an inch in depth, as the tender feeding roots of many of the plants are located near the surface.

In hoeing, the evergreen trees should not be neglected, but the soil beneath the broad-leaved ever-green shrubs should not be disturbed.

"The course of science is smoother than that of true love."—Sir James Jeans.

Nurses Wanted

The Toronto Hospital for Incurables, in affiliation with Fordham Hospital, New York Cit offers a Three Years' Course of Training to Young Women, having the required education and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and travelling expenses to and from New York. For further particulars write or apply to the Superintendent.

FLIES are sure to get in

even with the house screened. Hang up Aeroxon—the fly catcher with the push pin and longer and wider ribbon. Aeroxon is irresistible to flies because the glue is fragrant and sweet and will not dry—good for 3 weeks' service.

At drug, grocery & hardware stores.

Took it Before Childbirth

"I felt much stronger"

"I FIRST took Lydia E. Pinkham's Vegetable Compound before childbirth because I was so weak.

"After taking it, I felt much stronger. I could sleep better and I could do my work.

"I have taken the Vegetable Compound for eleven years off and on whenever I need a builder and I recommend it." Mrs. Emily Schindel, Renown, Saskatchewan.

This is only one of thousands of letters praising this simple, home remedy and recommending it to women who need a strengthener.

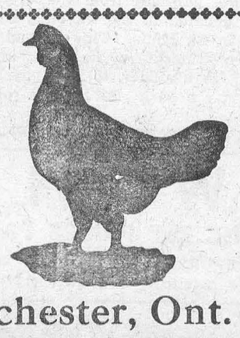
With this end in view, let us supply you with LAKKO and MONARCH Baby Chick Starters.

We also have plenty of Feeding Rolled Oats and Pinhead Oat Meal.



H. McMaster, Winchester, Ont.

No Retrenchments In Preparations For Ottawa Exhibition.

When some people were talking hard times, the director of the Central Canada Exhibition Association refused to make retrenchments or depart from the high standard of excellence which has made the Ottawa exhibition the best one week exhibition on the continent. In fact, they started out to make this year's attractions better than ever, and no expense was spared with this object in view.

For Cavallo and his band, the directors are paying more than for any previous band engaged for the exhibition. This organization is one of the foremost with a record of successive triumphs, and is composed of 58 artists. Two programs will be given each day from the concert bandstand, no extra charge being made for this stellar attraction.

To Edgar I. Schooley, producer of revues, the directors also said they wanted something even better than last year, and were prepared to pay the price. The result will be seen in the Sensations of 1931, the big spectacular music, dance and comedy presentation with a special cast of Broadway artists, mostly girls, elaborately costumed and with the most lavish stage setting ever arranged for an outdoor exhibition attraction.

There will be many new features when the exhibit on opens on August 24, and the six days and six nights will be replete with entertainment. Two buffalo, with their calf, will be seen in a special enclosure. These are loaned by the Dominion government for educational purposes. It will not be a midway show, but will be free to the public, as also will be the live fish, game birds and wild animals shown by the Ontario government; the gold and tropical fish display by Anson Pratt, the Dominion government Experimental Farm display and other attractions.

Each day there will be baloon ascensions and parachute drops by Major J. T. Smith, assisted by Miss Anna Lawless. Double and triple drops with acrobatics going up and coming down will give plenty of thrills. In addition, there will be airplane demonstrations.

A new midway, the finest program of vaudeville ever assembled for the grandstand, horse races, dog show, automobile show, child welfare demonstrations, pure food show, displays by merchants and manufacturers, livestock poultry and pets horticulture and agriculture, handicrafts and arts, hobby show, baby show, home cooking and domestic science, horse show, and scores of other features will appeal to exhibition visitors.

This year there is an exceptionally large demand for the coupon tickets. The regular admission to the grounds is 35 cents, but by buying strip tickets in advance, five admissions are obtained for one dollar, a direct saving of 75 cents. These coupons are transferable and may be used for admission to the grandstand any afternoon or to the dog show. They are on sale at branches of the Bank of Nova Scotia in the Ottawa Valley, or may be obtained by mail from the exhibition office. H. H. McElroy, secretary-treasurer, will be pleased to give all information as to entries, progams, etc.

HAS IT HAPPENED TO YOU ? by P.C.I

In our child-hood most of us learn to greatly dislike the words "don't do that", but of course when we grow up we learn that most "don'ts" have a lot of reason behind them.

However, some of us never do learn

For example, there's the man, who habitually exceeds the speed limit. I followed one of these chaps for about 8 miles yesterday on the Lake Shore Road. He didn't hit less than fifty anytime. Luckily traffic was light. He was indignant when I waved him to stop.

"Sure, I know I was driving fast." he said, "but the road was clear and I'm in a hurry."

I had to explain to him that no man can drive a car at excessive speed and get away with it—always.

You see, in the city a driver runs at a much slower speed and his mind and motions are keyed to that speed. In an emergency he knows what to do, and does it instinctively.

Occasionally on the highwdys he "steps on it" and at the first emergency he's in trouble almost before he knows it.

No two ways about it. I know. I've seen it happen often enough. The fast driver always gets his.....eventually, sometimes even through so simple a thing as a blowout.

Be slow down, before you get yours, brother.

Well, I'll be seeing you.

Winchester Township Council

Regular meeting of Winchester Township Council was held in the Town Hall-Winchester, Monday, Aug. 3rd, 1931. The members were all present. The minutes of last regular and special meetings were adopted as read and signed by the reeve.

The roads, bridges and sidewalks in the Township were again re-insured with the Globe Indemnity Co., for another year.

The Clerk was authorized to notify the contractor to begin work on the Johnston Ouderkirk Drain and have same completed on or before the 6th day of October, 1931.

By-Law No. 542, a by-law for the repair and improvement of the South Morewood Drain, and for borrowing on the Credit of the Corporation of the Township of Winchester the sum of $3771.90 for completing same, was read a third time and finally passed, signed and sealed

The Treasurer was authorized to pay the crossing allowances on the Lough Drain. The following accounts were passed and paid:

Cutting Weeds, Township roads, $188.; cutting brush, Township roads, $70 50; culverts repairs, $13.49; Printing by-laws, $57.50. Faulkner & Carruthers, crushed stone, No. 7, $1220 40; Wire Fencing, $19 65; Treasurer Tp. of Osgoode re Lough Drain, $341.00; Judge Costello, Court of Revision, $12 00; Stanley Cougler, Barclay Creek, $10.00; Dr. McLaughlin, Indigents, $30.00; G. A. Merkley, Ball Drain, $111.00; Sidewalks, Morewood, $88.85; Total $2162 39.

The Court of Revision on assessments in Kittle Creek and Parker Drain will be held at Winchester on Friday, August 21, 1931, at 10.00 a. m. Council adjourned to meet at Chesterville on Monday, Sept. 7th, at 10.30 a. m.

Messrs. Harold Baker and Wm. Rae accompanied Mr. A. Johnston home to Madrid, N. Y., and spent the day.

Mr. and Mrs Garnet McLean and Mrs. Jarvis of Chesterville were calling in the Valley.

Mrs. Wm. Worwood of Quebec City is visiting at the home of Mrs. Agnes Munro.

Miss A. Bogart and Mr. and Mrs. J. A. Bogart visited Mr and Mrs Geo. C. Merkley.

Mr. and Mrs. Harold Baker and Miss Jean visited the former's mother at Morrisburg.

Clerk's Notice of First Posting of Voters' List

Voters' Lists, 1931, Municipality of the Village of Winchester, County of Dundas.

Notice is hereby given that I have complied with Section 7 of the Voters' Lists Act, and that I have posted up at my office at Winchester, on the 4th day of August, 1931, the list of all persons entitled to vote in the said municipality at municipal elections, and that such list remains there for inspection. And I hereby call upon all voters to take immediate proceedings to have any errors or omissions corrected according to law, the last day for appeal being the 30th dav of August, 1931.

Dated at Winchester, this 4th day of August, 1931.

J. C. EMPEY,
Village Clerk.

Destroy The Weeds!

The Ontario Weed Control Act States

CLAUSE 3—Every occupant of land, or if the land is unoccupied, the owner, shall destroy all weeds designated noxious by the regulations as often in every year as is sufficient to prevent the ripening of their seeds.

CLAUSE 6—In the absence of any owner or occupier or upon refusal after notice to comply with the requirements of the Weed Control Act, the Inspector may cause weeds coming under this Act to be cut down and destroyed and may charge the cost of such work against the property to be collected in the same manner as taxes.

NOXIOUS WEEDS

Bladder Campion, Wild Oats, Docks, Stinkwood, Ox-eye Daisy, Canada Thistle, Ragweed, common; Tumbling Mustard, Sow Thistles, Blue Weed, Hawkweeds, Wild Carrot, White Cockle, Chicory, Ribgrass, Burdocks, Wild Lettuces.

Weeds that have been cut must be dried out and burned. It is contrary to the law to deposit them on any road-way or in any ditch. Weeds are a Public Menace. Weed Control is a Public Problem. We must Co-operate. DESTROY THE WEEDS ON YOUR PROPERTY.

H. H. EMPEY, Weed Inspector,
for Winchester Township.

The death occurred at an Ottawa hospital of David Brown, former grocer of the Capital. Mr. Brown was born in Spencerville 75 years ago, and after going to Ottawa established three grocery stores After the death of his wife eight years ago he retired from business owing to ill health. The chief mourners are two sons, Leonard, of Jackson, Mich., and C. H. Brown, of Ottawa; one brother, Lawrence L. Brown, of Mountain, Ont., and two grandsons. The funeral was held in Ottawa and interment was made in Maple Ridge cemetery, Winchester.

Rev. J. Dugald MacKenzie, minister for the past five and a half years of Fairmount-Taylor Presbyterian Church, Montreal, will deliver his last sermon from that pulpit on Sunday. His transfer to St. Andrew's Church, Avonmore, was allowed at a meeting of the Montreal Presbytery held earlier in the week. Many members of his congregation attended the session in order to pay a fitting tribute to their departing minister. Rev. MacKenzie was for some years minister of Knox Presbyterian Church, Morrisburg.

R. H. Timmins Wins Watch

For three months a Leadership Drive was conducted by the W. T. Rawleigh Co., of which the final results have just been announced, showing that Mr. R. H. Timmins, of Toronto, son of Mrs. Rachel Timmins, of Winchester, has won the Leadership of the whole Rawleigh organization in America. Besides winning this distinction he received an award of a valuable Howard watch. This speaks well for Mr. Timmins' ability as a salesman as well as for the quality of the products he sells.

Notice of Sittings of Revising Officers.

TAKE NOTICE, that Sittings of the Revising Officers for the purpose of hearing Complaints or Appeals with regard to the Voters' Lists to be used at the Election to the Legislative Assembly, to be held on the Ninth day of September for the ELECTORAL DISTRICT OF THE COUNTY OF DUNDAS, will be held at the following times and places, by the Revising Officers named, the name of the Clerk to the Revising Officer, his address, and the last day for filing Appeals being also set out:

Name of Municipality	Place of Hearing,	Time of Hearing,	Revising Officer	Clerk to Revising Officer	Address of Clerk	Last Day For Filing Appeals
Village of Iroquois	Town Hall Iroquois	August 21 2.00 p. m.	J. G. Harkness	Ewart A. McInnis	Iroquois	August 18
Township of Matilda	Barkley's Hall Dixon's Corners	August 21 10.30 a. m.	J. G. Harkness	Ancil Locke	Iroquois R R	August 18
Township of Mountain	I. O. O. F. Hall Mountain Station	August 22 10.30 a. m.	F. T. Costello	Edward Bush	Hallville	August 19
Village of Winchester	Town Hall Winchester	August 22 2.30 p. m.	F. T. Costello	J. C. Empey	Winchester	August 19
Village of Chesterville	Town Hall Chesterville	August 21 10.30 a. m.	F. T. Costello	Geo. Elliott	Chesterville	August 18
Township of Winchester	Pres'n Hall Morewood	August 21 1.30 p m.	F. T. Costello	Jacob Stein	Morewood	August 18
Village of Morrisburg	Town Hall Morrisburg	August 24 2.00 p. m.	F. T. Costello	F. R. Chalmers	Morrisburg	August 19
Tp. of Williamsburg	Froat's Hall Williamsburg	August 24 10.30 a. m.	F. T. Costello	M. S. Beckstead	Williamsburg	August 19

The Revising Officer will, in every case, sit until all Appeals are disposed of.

AND FURTHER TAKE NOTICE, that any voter who desires to complain that his name, or the name of any person entitled to be entered on the said List, has been omitted from the same, or that the names of any person or persons, who are not entitled to be voters have been entered thereon, may, on or before the dates set out above, respectively apply, complain or appeal to have his name, or the name of any person entered on or removed from the List.

AND FURTHER TAKE NOTICE, that such appeals must be by notice in writing, in the prescribed form, and shall not include complaints or appeals as to names entered, or sought to be entered, on the List for more than one Polling Sub-Division. They must be signed by the complainant, in duplicate, and given to the Clerk of the Revising Officer, or left for the Clerk at his address stated above.

AND FURTHER TAKE NOTICE, that the Voters' List to be used will be Parts 1 and 3 of the Lists printed for 1931, except that where Part 1 of said List has been revised by the County Judge, said part as so revised will be used. If list for 1931 is not printed revised list for 1930 will be used. All persons are required to examine the said Voters' Lists to ascertain that their names are correctly entered therein.

DATED this 4th day of August, A. D., 1931.

F. T. COSTELLO, Chairman of the Election Board
for the United Counties of Stormont, Dundas and Glengarry.
