# The Leader

XXXII No. 5 MORRISBURG, ONT. FRIDAY FEB. 12, 1932

## EGGS

The market has advanced 5c a dozen this last week are looking for a further advance. Market your eggs often to procure the highest grade.

## Poultry Feed

With the advance on eggs it will pay you well to feed good mash. We recommend and handle,

Monarch Laying Mash,
Lakko Laying Mash,
All Canada Mash.

They are all good Mashes. They contain all the ingredients for maximum egg production. Where milk is being used in the diet, reduce your mash with either Sampson or Shorts.

## Molasses

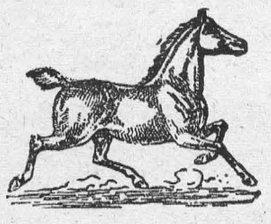
At a special price, a gallon .....20c

## LUMBER

We are carrying a fairly complete line of Spruce and Pine, quarter-round, window and door stop, etc., at reasonable prices. The lumber is all choice quality. Any orders will be given our careful attention.

**The MORRISBURG FEED & PRODUCE Co.**
MORRISBURG, ONT.

## Some Seasonable Lines You are Likely to Need



EPSON SALTS—For Horses, Cattle, Pigs, etc., lb. .....5c
Pure Ground Sulphur—For Horses, Cattle, Pigs ....5c
RAW LINSEED OIL—1½ pint bottles, each .....35c
RAW LINSEED OIL also in bulk, at low price per gallon. A special medicinal quality for Horses, Cattle and all live stock. A splendid healing laxative.
SABADILLA POWDER, in bulk, any quantity, lb. ..60c
Sabadilla Powder in combination with ground Sulphur makes an excellent and cheap cold weather destroyer of Lice of all kinds on Horses, Cattle, Pigs. etc.

**STEWART'S IMPROVED Horse and Cattle Clipping Machine**

**Complete, ready to use, $14.00**

CLIPPER PLATES, &c.—Bring us your old, dull Clipper Plates to sharpen, and we shall return them to you as good as new, and it will cost you only $1.00 pair.

**R. H. BRADFIELD & CO.**
THE HARDWARE STORE—Opposite St. Lawrence Hall,
Phone 10.
MORRISBURG—ONTARIO

## PREMIER REPLIES TO MR. KING ON WATERWAYS

"There are many other subjects dealt with in the Speech from the Throne to which reference has been made this afternoon, but I do not propose to prolong this debate for the purpose of covering them again. With respect to the St. Lawrence waterways, I have this to say, that I believe the proper course to pursue in the matter is by verbal negotiations and discussions. If a treaty is concluded, of course the very word treaty implies that the agreement is between sovereign nations, or the communities that speak as sovereign nations; then it is submitted for approval. If a treaty is to be the subject of discussion in Parliament before it is signed, obviously it is not a treaty. Everyone knows that in international dealings after a bargain is made each Government instructs its plenipotentiary to sign the instrument constituting the treaty, and the treaty is then submitted for the consideration of Parliament. But, at no time in the history of this country, or of Great Britain, has a document been submitted to Parliament and been called a treaty unless it was an executed instrument. If it is a bad instrument, then, of course, it will be rejected by Parliament. Was the halibut treaty signed or was it not? Was the treaty with respect to salmon signed or was it not? You cannot endeavour to escape responsibilities in that way, you cannot escape your constitutional obligations.

"I should just like to make this simple observation. We are not hurrying the St. Lawrence waterway treaty. All you have to do is look at the map and see your completed Welland Canal and your twenty-seven foot waterway to Albany, and then you know why the Canadian Government is concerned about the matter. When the appropriate time comes, I fancy Canadians will realize that the reason why this Government is now carrying on negotiations for the completion of that waterway is not that we desire to add more to the burdens we have, but that the development we have reached in connection with our own canal system and the canal system of our great neighbour to the south makes it essential that now and at no other time we should consider it. It is all so easy and simple to condemn governments because they take action. Did it ever occur to hon. members that there are occasions in the lives of nations as of individuals when decisions have to be made or the opportunity is gone forever? That is the situation here.

"At the appropriate time if a treaty is concluded, this House of course will have the fullest opportunity to discuss it and, if it so desires, to reject any treaty that may be made. Because it is not being made in any party sense. If it is made at all, it is a treaty made by a Canadian Government, on behalf of the Canadian people, and if the representatives of the Canadian people believe it to be a bad treaty, the Canadian people's representatives will do what one would expect them to do, namely, reject it."

### SENATOR BEAUBIEN SAYS:

"The St. Lawrence waterways question is one that interests vitally the whole Dominion, but, if I may say so, particularly the Province of Quebec and Montreal. It is a source of great anxiety, therefore to very many people, who have given it, and were able to give it, proper consideration. In a way the project is nothing less than a continuation of the policy which we followed without interruption in Canada since the inception of the foundation of Montreal. Both parties have from time to time improved our canals to keep pace with the improvement in shipping. At the time of the union, our canals were deepened to nine feet, which was then considered sufficient. They were subsequently carried to a further depth of 12 and 14 feet. There were no less than three canals built at Welland. The canals had to keep pace with the size of the ships, if they were not to become obsolete.

"So from that point of view the completion of the deep waterway at a depth of 27 feet from Lake Ontario to Montreal is nothing out of the way. However, there are other factors now in this great project which give us very serious concern. Particularly is there the time, as well as the method of carrying this project out. As to the time, most people will opine that the present period of depression is not auspicious for the inauguration of colossal expenditures. But against that consideration there are, no doubt, very weighty reasons. Fifty-seven million people in the rich and most productive portion of the United States are clamoring for an outlet to the sea. The pressure on the American Government by this very important portion of the electorate is very great, if not irresistable. If Canada refuses to make any agreement with the States with a view to completion of the waterways, to the depth of the Welland Canal, then it is possible, nay, it is probable, that the American Government will be forced to select another route to furnish an outlet to the millions of people in the Middle States. In that case they might choose—they probably will choose—the New York State Canal from Oswego to Albany. It must not be forgotten that the Hudson River has already been deepened to 27 feet right through to Albany. If such a determination should be resorted to by the American Government, where would Canada be with our canals and the

(Continued on Page 4,

## DUNDELA YOUTH MEETS TRAGIC DEATH

A sad tragedy occurred on the county highway, near Peter Harkness' farm, Matilda Township, on Sunday evening last, when Alfred Marcellus, son of Mr. and Mrs. Jas. Marcellus, of Dundela, met a tragic death. The young man, with a companion, Miss Luva Kennedy, of Hainsville, were proceeding to Iroquois with a horse and rig when their buggy was crashed into by a car owned and driven by Hugh Thompson, of Brinston, who was returning home from Iroquois. Marcellus was killed almost instantly, while Miss Kennedy suffered a broken shoulder. It is alleged that neither party had lights at the time of the accident.

Mr. Thompson, and his wife, who was with him, escaped injury, but Mrs. Thompson is at present suffering greatly from shock.

The funeral of the unfortunate young man, who was only 19 years of age, was held on Tuesday.

The accident was investigated by Provincial Officer Frank Rose, of Morrisburg, and an inquest will be held on Monday, at 1 p.m., at Brinston, by County Coroner Dr. C. A. Louden.

## REV. G.G. WRIGHT FAREWELLS

The Rev. G.G. Wright, formerly Rector of Wales and Moulinette, who was recently transferred from Carleton Place to Belleville, conducted his farewell services last Sunday. In reporting the services, the Carleton Place Herald says:

Last Sunday Rev. G.C. Wright, Rector of St. James Church, conducted his farewell services, prior to leaving for his new charge at Belleville. At the morning service he spoke to an overflowing congregation. In the evening the church was again filled to capacity.

A Litany prayer-book was presented to St. James Church as a Thankoffering by the rector and Confirmation classes of 1931. It contains the Litany, Prayers and Thanksgivings upon several occasions; with blank pages at the back with a written list of those confirmed by Bishop Roper of Ottawa, June 21st, 1931 and September 18th.

A farewell and goodfellowship meeting was held on Monday evening in the Parish Hall. There was a very large attendance. A program was presented, after which Rev. Mr. Wright was presented with a purse of gold, containing over one hundred dollars. Mrs. Wright was presented with a basket of flowers by Miss Anita Fraser. Mr. Wright acknowledged the expression of goodwill most feelingly, for himself and Mrs. Wright.

Mr. Wright and family left on Tuesday for Belleville, and bear with them the best wishes of hosts of friends for success and happiness in their new home.

## ECONOMY SESSION FACES MEMBERS OF ONTARIO HOUSE

Important legislation is forecast by the Ontario Government in the Speech from the Throne read at the opening of the Legislature Wednesday. Among other things, the Government proposes:

1—Provide a modified moratorium for mortgages.

2—Amend the Old Age Pensions Act.

3—Amalgamate the Ontario Railway and Municipal Board with the Board of Municipal Affairs.

4—Economize to the fullest possible extent.

The Speech outlined the activities of the Government departments during the past year, declared agricultural production was maintained at a high level though at a financial return much below normal, and expressed the belief that this year Ontario mines will register a much higher output of gold.

Almost 200 miles were added to the highway system and much employment afforded. Nearly $7,000,000 had been advanced to municipalities for road purposes, and this had helped materially to lighten the burden of taxation.

The modified moratorium would provide a one-year rest on principal payments under mortgages, in order to relieve both city and rural property holders of the danger of foreclosure through inability to pay the principal. Payment of interest will not be affected by the legislation.

The amendment to the Old Age Pensions Act would provide a new scheme for the payment of pensions. The Federal Government is to assume 75 per cent. of the cost, thus relieving municipalities and the province of a large proportion of existing pensions costs.

Previously, the Federal Government paid 50 p.c., the Provincial 30 p.c. and the municipality 20 p.c. of the cost. Under the new arrangement, while there is no official confirmation available at present, the Province's and municipalities' shares are expected to be 15 and 10 per cent. respectively.

Amalgamation of the Ontario Railway and Municipal Board, with the Board of Municipal Affairs, would empower the body to supervise the affairs of insolvent municipalities. The Government supervision would prevent excessive local improvements in municipalities which found it a real burden to take care of their percentage of the cost.

Just how drastic the economies suggested might be is problematical. Already Ontario civil servants have

## FOR RENT

Owing to a change which we are considering in our premises, we offer for rent, our store and warehouse, now occupied by us. Approximate size of store 21'x50'; warehouse 25'x35'. This is probably as fine business premises as there is in town, in the most central location. With all modern improvements, including plate glass front, hardwood floors, hot water heating, oil burner, wash room and toilet. In addition to this, if desirable, the fine appartment over this store may be included or rented separately.

FOR FURTHER PARTICULARS APPLY TO—

ARTHUR FLYNN Morrisburg, Ont.

# WITH THE LONE SCOUTS

It is very probable that there are a large number of boys who read this column week after week, and although they are not Scouts, they very much wish that they could be. I would like those boys to realize that the Lone Scouts have been organized especially for them, and all that they have to do is to spare a moment to write a note to Lone Scout Headquarters asking for full particulars, and then they, too, can share in all the fun that Lone Scouting brings to any boy.

It is not very difficult, is it? Why not write that now, at once? The address is given below.

### Lone Scouting Grows Apace

During this past week we have received applications for membership from over a dozen boys in various parts of Ontario. Five applications came from Colborne, four from Lucan and the others from Merrickville, Parry Sound and South River. We welcome all these recruits to our ranks, and we know that a good time is in store for them.

### News From Overseas—More Scouts Down Under

Sir Kelso King, Chairman of the New South Wales branch of the Boy Scouts Association, attributes a very substantial increase in the number of Australian Scouts during 1931 to the visit of Lord and Lady Baden-Powell.

### A Major First Aid Test

A motorcycle accident at a country crossroads in which two girls suffered broken legs brought an unidentified English Boy Scout a major test of his training. He acted immediately, and gave effective first aid with improvised splints and bandages.

### Famous Admiral in Boys' Work

Admiral of the Fleet, Sir Roger Keyes, famous for his services during the Great War, especially in connection with the operations against Zeebrugge, on St. George's Day, 1918, has become Assistant County Commissioner for Sea Scouts in Buckinghamshire.

### Scouting Influence

An interesting incident demonstrating the results of Scouting as a character building and citizenship training organization is revealed in a report to the National Office of the Boy Scouts of America from the Scout Executive in the Phillipine Islands, Mr. Ernest Voss. He stated as follows:

Yesterday, in Judge Vicker's court, here in Manilla, Attorney Charles McDonough, while questioning a diminutive brown-eyed boy, asked: "And why are you here as a voluntary witness in this criminal case?" The boy proudly drew himself erect. "Because, Sir," said he, "I am a Boy Scout and I promised on my honor to do my duty to God and my Country, and to be trustworthy."

### News From the Provinces

"Lone E" has received a letter from Mr. Robert F. Middlecoat of Hemmingford, Quebec, who was formerly a Troop Leader in a Troop in London, England. Mr. Middlecoat read about the Lone Scouts in a local newspaper and did not know that the Lonies were flourishing so wonderfully in this country, and we can assure him that Scouting is very much alive in Canada and especially in our Province.

Perhaps some Lone Scout would like to write to Mr. Middlecoat, who has some interesting experiences to tell, and who would probably be able to give some very useful hints from his Scouting experience.

### Lonies Please Note:

On February 22nd, Scouts all over the world will celebrate the 75th birthday of the Chief Scout of all the world, Lord Baden-Powell.

### A Thought For This Week

"The player who smiles most enjoys the game most."

### How to Become a Lone Scout

Drop a line to The Lone Scout Department Boy Scouts Association, 330 Bay Street, Toronto 2, and ask for particulars, which will be gladly sent. Lone Scouting is open to boys between 12 and 18 years of age who are not able to join a regularly organized Troop, and is especially meant for boys living on rural routes and small villages. Write to-day.—"Lone E."

## English Misses At Lake Placid

Two young ladies aged twelve and eleven respectively are shown in a smiling mood at Lake Placid. They are Megan Taylor and Cecilia Colliege, representing the pick of British skaters.

## Saved From the Sea

Are summer storms more dangerous than those of winter?

The contrary view is the general one, yet figures just published show that during the four summer months of last year English lifeboats rescued 107 persons, while the rescues during the first four months of the year were 104. This seems to suggest that, in 1931, at any rate, summer was as bad a time for sailors as winter.

In all, the lifeboatmen rescued 269 persons from shipwrecks last year. They also saved twenty-six boats from destruction or helped them to safety.

But rescue work was not carried out only at sea. A Whitby lifeboat was taken inland a few months ago to save flood victims.

The Royal National Lifeboat Institution now has a fleet of 184 lifeboats, of which 107 are motor lifeboats. Sixteen of the latter were added to the fleet last year—the largest number ever built in one year.

### TRUTH

If a crooked stick is before us we need not explain how crooked it is! Lay a straight one down by the side of it, and the work is well done. Preach the truth, and error will stand abashed in its presence.—Spurgeon.

"Glamour only makes husbands glummer. Be yourself, and as nice a one as possible."—Faith Baldwin.

For want of self-restraint many men are engaged all their lives in fighting wth difficulties of their own making, and rendering success impossible by their own cross-grained ungentleness; whilst others, it may be much less gifted, make their way and achieve success by simple patience, equanimity and self-control.—Samuel Smiles.

## Ground Glass Road Tested in Czechoslavakia

London.—Glass roads in Czechoslovakia and colored roads in Scotland are the latest experiments to be tried by European highway engineers. All sorts of surprising materials have been tested in Britain recently—cast iron, molten stone, rubber, cotton, and wood—in the hope of finding an ideal track for motorcars.

In the Czechoslovak experiment ground glass was mixed with cement and the resulting surface is said to have been found very durable and not susceptible to the heat of the sun.

## Stilton Cheese Once Quenby

London.—England's famous Stilton cheese did not originate in the town of that name, although it did become famous there. What is today known and acclaimed by gourmets as Stilton cheese was originally made at Quenby Hall by the Ashbys, who owned the place many years ago, and it was then known as Quenby cheese. An enterprising landlord of an inn at Stitlton bought up large quantities of the cheese and made it famous under its present name.

## Other Uses of Paper Pulp

The enormous use of paper for newsprint has overshadowed its many other vital uses, say the Canadian News Letter. Other uses include cement and flour bags, rug pads, curtains and blinds, serviettes, handkerchiefs, towels, doillies, cord, containers for food and drugs, packing cases, wallboard, cores, upholstery, drinking cups, plates, dishes and spoons. The paper milk bottle is meeting with favor in New York, although its use in Canada is at present negligible.

## Accomplished Women of the Eighties

"Is Miss Darcy much grown since the spring?" said Miss Bingley; "will she be as tall as I am?"

"I think she will. She is now about Miss Elizabeth Bennet's height, or rather taller.'

"How I long to see her again! I never met with anybody who delighted me so much! Such a countenance, such manners, and so extremely accomplished for her age. Her performance on the pianoforte is exquisite."

"It is amazing to me," said Bingley, "how young ladies can have patience to be so very accomplished as they all are."

"All young ladies accomplished? My dear Charles, what do you mean?"

"Yes, all of them, I think. They all paint tables, cover screens and net purses, I scarcely know any one who cannot do all this; and I am sure I never heard a young lady spoken of for the first time, without being informed that she was very accomplished."

"Your list of the common extent of accomplishment," said Darcy, "has too much truth. The word is applied to many a woman who deserves it no otherwise than by netting a purse or covering a screen; but I am very far from agreeing with you in your estimation of ladies in general. I cannot boast of knowing more than half a dozen, in the whole range of my acquaintance, that are really accomplished."

"Nor I, I am sure," said Miss Bingley.

"Then," observed Elizabeth, "you must comprehend a great deal in your idea of an accomplished woman."

"Yes, I do comprehend a great deal in it."

"Oh, certainly," cried his faithful assistant; "no one can be really esteemed accomplished who does not greatly surpass what is usually met with. A woman must have a thorough knowledge of music, singing, drawing, dancing, and the modern languages, to deserve the word; and besides all this, she must possess a certain something in her air and manner of walking, the tone of her voice, her address and expressions, or the word will be but half deserved."

"All this she must possess," added Darcy, "and to all she must yet add something more substantial in the improvement of her mind by extensive reading."

"I am no longer surprised at your knowing only six accomplished women I rather wonder now at your knowing any."

"Are you so severe upon your own sex as to doubt the possibility of all this?"

"I never saw such a woman. I never saw such capacity, and taste, and application, and elegance, as your describe, united."

Mrs. Hurst and Miss Bingley both cried out against the injustice of her implied doubt and were both protesting that they knew many women who answered this description, when Mr. Hurst called them to order, with bitter complaints of their inattention to what was going forward. As all conversation was thereby at an end, Elizabeth soon afterward left the room.—Jane Austen, in "Pride and Prejudice"

## Silver Lining

*BY HECK.*

Everybodys goal in life is "Happiness."

"Anybody is happy
"who is able to play the role
"which best satisfies him
"in his own eyes."
—Van Loon in The N. Y. Tribune.

* * * *

To "play the role," means W-O-R-K. Rich or poor, he must work by brain or brawn, or there is no satisfaction, no happiness.

* * * *

Work, then, symbolizes Happiness. It brings wages or profit, which in turn bring food, fuel, clothing, amusements.

* * * *

Some would have us believe that in most countries, work, wages or profit are very, very scarce—if so, happiness must be on the decrease.

* * * *

NEWS, the kind that informs us why, where, when work can be had, will help to keep mankind working and happy.

A broadcast, a print, a speech, a wire or wireless to the effect that there is a scarcity of any one thing or commodity, helps, because capitalists will hire workers, start machinery to fill the scarcity, supply the demand; wages will flow again, and happiness be restored. If word is passed around that there is an overabundance of a product, means are, or should be, at hand to remedy the condition. That is the purpose of this Silver Lining. Through the medium of news, good news will keep a proper, sane balance of supply and demand—informing those who want profit, work, service, where they can get it and find the Happiness they want.

* * * *

Even news of this kind helps the shut-in, the cripple, the old, whose active minds derive satisfaction in the knowledge that those who care for them are in a position to get work.

* * * *

Sault Ste. Marie.—Special materials, re-inforcing steel bars used in dam construction, new automobile bumper, have greatly increased the out put of Algoma Steel Corporation lately.

* * * *

Building—December of last year showed very substantial increase in authorized building in Ontario, Quebec, Manitoba, New Brunswick. Ontario's gain was $342,857.

* * * *

Banking—Premier R. B. Bennett last Wednesday stated that Canadian banking system had not suffered one single failure during the previous twelve months, while over two thousand had failed in the same time in the U.S.A.

* * * *

Trade — Parliamentary measures have resulted in shifting the balance of trade in Canada from an adverse balance of $73,000,000 to a favorable balance of $10,000,000 is another statement by Premier Bennett.

* * * *

Transportation—A couple of weeks ago this column stated that there was a rumor of amalgamation of air, rail, and truck transportation. Yesterday, January 20th, Sir Henry Thornton advocated such a measure.

* * * *

Orono, Ont.—Christmas presents to be distributed among the poor of this town had to be salted away for another year, as nobody could be found poor enough to enjoy them.

* * * *

Here is one you cannot dismiss with a yawn. More than half the population in Sault Ste. Marie have a savings account in the banks and post-office. This city subscribed $500,000 to the Government Loan three weeks ago.

* * * *

New York. — For two months depression will not be using rough tactics on the City of New York, because eight banks, on aJnuary 19th, loaned the City of New York $12,000,000 to tide them over a serious financial condition.

* * * *

Breweries—Canada Bud Breweries Ltd. show an increase of $405,000 for the year 1931 over 1930, bringing the colume to the $2,000,000 mark. One of their officers is reported as saying that the last they saw of the depression she was walking away with only one spat on.

* * * *

Mortgage Corporation—Let us give the spotlight to the Canada Permanent Mortgage Corporation, whose gross assets have grown nearly $4,000,000 during 1931. Profits were $913,928.

* * * *

Lake Shipping—National Association of Marine Engineers make a strong protest in the Federal House against the cutting down of crews and overloading ships in the Canadian lakes.

* * * *

Telephone—"American Telephone and Telegraphic Company, world's largest corporation, managed to earn its usual annual dividend in 1931." is a statement of the president, Walter H. Gifford.

* * * *

Power—Reconstructions said stop, look and listen to Power Installation, as it increased 8 per cent. during 1931.

* * * *

Gold—Ontario output has set a record in 1931. The total output for the Province is around $42,900,000 and peak was in December last.

* * * *

Radio Broadcasting—A. E. Leary, Assistant to the General Manager of broadcasting station CKCL, stated that their sales during the last two weeks were greatly on the increase. In fact, the sales for December were the highest in the history of the company, and already show a great increase over January of last year.

## Mount Vesuvius' Light Goes Out

Naples, Italy. — Mount Vesuivius, after centuries of quiescence, presented a new problem following fresh rumblings and explosions last week. The curious thing in connection with the event was the discovery that as soon as the explosions ceased, the crater, which always has been lit up at night by internal fires, was cold dark. Natural scientists have begun an investigation to determine why.

An observatory, a military police barracks, a convent, a railroad and a hotel on the volcano's side were shaken, but their quake-proof construction protected them, observers said. Attendants at the observatory after working through the night, learned little except that the epicenter of the quake was within, or under, the mountain and it apparently affected only a small area.

## Compulsory Voting Approved in Peru

Lima, Peru.—Compulsory voting for men between the ages of 21 and 60 was recently approved as part of the new Peruvian constitution in process of adoption by the constitutional congress.

The secret ballot also was approved. Voting will be optional for men over 60. Last week the congress rejected equal suffrage for women, but women over 25 years of age will be permitted to vote in municipal elections.

## Good Trade Balance Reported by Bulgaria

Sofia—Bulgaria has a very "favorable" trade balance. During November exports exceeded imports by more than 100 per cent. Merchandise worth 713,000,000 levs or about $5,000,000 was sent out of the country and products worth 351,000,000 levs were shipped into it.

The sums received from this excess ofexports over imports all go to pay Bulgaria's debts abroad. Rigid regulations make it impossible to export money for private transactions.

## Latvia and Estonia Lift Export Duty on Timber

Riga, Latvia—In order to assist the Latvian timber exporters, the Latvian Government has abolished the export duty on various kinds of goods, and especially on pulpwood. wood.

In Estonia various facilities have also been granted to the timber exporters.

## New Mineral Identified

Stanford University, Calif.—Prof. A. F. Rogers of the mineralogy department of Stanford University has identified a new mineral which he calls Sanbornite. He said it is a barium silicate never found before.

The new mineral was named after Mr. Frank Sanborn of the California Bureau of Mines. It is a lump of ore picked up in Mariposa County.

## 16-Year-Old Aviatrix

Joy sticks are nothing new to Mary Equi of Portland, Ore., who, after two years of instruction, becomes youngest aviatrix in the northwest at sixteen.

## 20 P.C. Added to Import Duty By Norwegian Government

Oslo, Norw.—An increase of 20 per cent. on import duties was recently approved by the Storting.

An important provision authorizes the Government to exempt goods regulated by treaties and goods not produced by Norway.

The estimated revenue from the new duties will amount to 9,000,000 crowns (about $1,680,000) the first half year. The reason for the additional duties is the deficit in the last half year's budget. A royal proclamation was published, bringing the new scale into effect immediately.

## French Pilot Tests Feasibility Of Air Line to Madagascar

Le Bourget, France.—Captain Ludovic Arrachart landed here recently after a trail-blazing flight to Madagascar and return with information which may presage regular mail and passenger service. The outward trip was accomplished in ten days, with stops along the dangerous Sahara route. The return trip took eight days.

Aviation authorities believe the projected line could be run without difficulty.

War is dying. It dies because it cannot pay its way. It dies because, through the spread of education and the demand of commerce, no part of the civilized world can be suffered to engage in a life-and-death struggle with any other part.—David Starr Jordan.

## Draws Metal from Eyes

This huge magnet is used for extracting tiny metal splinters from injured optics and is said to be the most powerful in the world. It has the pull of ten horses.

Grocers guarantee this tea.
Money back if you ask for it.

# RED ROSE TEA "is good tea"

CHOICE QUALITIES — Red Label & Orange Pekoe

## Owl Laffs

**Contagious—Like Measles**

Happiness is like measles; you cannot have it without giving it to someone else.

When Business Is Good
Advertise Some to Get More.
When Business Is Slow,
Advertise More to Get Some.

If you can smile before breakfast it is very likely that you can smile the rest of the day. Love at first sight has a great precedent: Adam's for Eve. Many a man has lost his fight by stopping to pat himself on the back. Any wife knows that the ideal husband is one who can pay her compliments and her bills. A lot of the talkies are dumb. As soon as a husband is broken of one bad habit he acquires another. With airplanes and radios riding the air all the time it is no wonder the air bucks up occasionally. Putting your purse under your pillow does not necessarily mean that you have enough to retire on. Before leaving your present position for a new one, be sure the new one has more advantages than a mere advance in salary. Here's something for the girls to consider: When airplanes become common and take the place of autos, there will be no opportunity to get out and walk back home. He who laughs last laughs best, but he soon gets a reputation for being mighty dumb.

Brown—"When you sleep, your forehead reminds me of a story."

Light Brown—"What Story, 'Sleeping Beauty'?"

Brown—"No. Sleepy Hollow."

Z———OUCH!

Sam held her hand and she held hiz'n,
And then they hugged and went to kiz'n.
They did not know her dad had riz'n,
Madder than hops and simply siz'n;
And really 'tiz'n right to liz'n,
But Sam got hiz'n and went out whiz'n.

**Trouble Averted In Either Case**

A man who gives in when he is wrong is wise.
A man who gives in when he is right is married.

Little George (after he had been introduced to the guests for dinner)—"Daddy, dear, may I have a dime, please?"

Daddy (with a smile)—"Surely, son. Here it is."

Little George (anxiously) — "This time you won't make me give it back after the visitors are gone, will you Daddy dear?"

Harry—"Is Gertrude homely?"

Charles—"Well, if her face is her fortune, her husband didn't marry her for money."

Timid Customer — "Do you keep fountain pens?"

Too Smart Saleslady—"No, but we sell 'em."

Timid Customer (walking out) — "Well, you will keep the one I was going to buy."

Explorer—"I have made a remarkable discovery. A tribe of human beings that possess no weapons of warfare."

Listener—"Is that so? Well, I didn't think there was any part of the world that uncivilized."

**NOTICE TO MOTORISTS**

**GLARING LIGHTS ENDED BY THE USE OF STOP-GLARE REFLECTORS**

These Reflectors can be attached to the light bulbs in the head lamps of your automobile.
They greatly increase your driving vision, lighting the roadway from fence to fence.
They are sold at a low price.
They are guaranteed for the life of your car.
This is not a painted light bulb.
Write us for full particulars and exclusive agency selling rights.

**CHILD need REGULATING?**

CASTORIA WILL DO IT!

When your child needs regulating, remember this: the organs of babies and children are delicate. Little bowels must be gently urged—never forced. That's why Castoria is used by so many doctors and mothers. It is specially made for children's ailments; contains no harsh, harmful drugs, no narcotics. You can safely give it to young infants for colic pains. Yet it is an equally effective regulator for older children. The next time your child has a little cold or fever, or a digestive upset, give him the help of Castoria, the children's own remedy. Genuine Castoria always has the name:

Chas. H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

## French Scene

It is the most delightful of French inns, in the quaintest of French settlements. As you rush by in one of the innumerable trains that pass it daily, you may catch glimpses of tall trees trailing their branches in the still stream—hardly a dozen yards wide—of flocks of white ducks paddling together, and of queer punts drawn up on th shelving shore or tied to soggy, patched-up landingstairs.

If the sun shines, you can see, now and then, between the trees, a figure kneeling at the water's edge, bending ovr a pile of clothes, washing—her head bound with a red handkerchief.

If you are quick, the miniature river will open just before you round the curve, disclosing in the distance groups of willows, and a rickety footbridge perched up on poles to keep it dry. All this you see in a flash.

But you must stop at the old-fashioned station, within ten minutes of the Harlem river, cross the road, skirt an old gardn bound with a fence and bursting with flowers, and so pass on through a bare field to the water's edge, before you catch sight of the cosy little houses lining the banks. . .

I have a love for the out-of-the-way places of the earth when they bristle all over with the quaint and the old and the odd, and are mouldy with the picturesque. But here is an in-the-way place, all sunshine and shimmer, with never a fringe of mould upon it, and yet you lose your heart at a glance. It is as charming in its boat life as an old Holland canal; it is as delightful in its shore life as the Seine; and it is as picturesque and entrancing in its sylvan beauty as the most exquisite of English streams.—From "A Day at Laguerre's and Other Days," by F. Hopkinson Smith.

Bess—"Jack Timid has asked me if he might call to-night. I think he wants to tell me that he loves me."

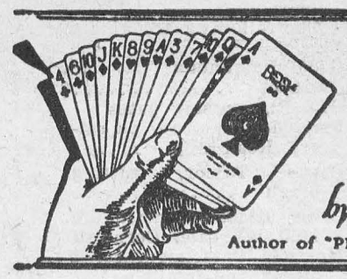
Tess—"Oh, that goes without saying."

Bess—"Yes, and I'm afraid he will, too."

### The Poet's Day

The poet's day is different from another,
Tho' he doth count each man his own heart's brother.
So crystal-clear the air that he looks through,
It gives each color an intenser hue;
Each bush doth burn, and every flower flame;
The stars are shining; silence breathes a name.
The world wherein he wanders, dreams and sings
Thrills with the beating of invisible wings;
And all day long he rears from hidden birds
The low, melodious pour of musicked words.

—Richard Watson Gilder, in "Complete Poems."



## How to play Bridge AUCTION and CONTRACT

by Wynne Ferguson

Author of "PRACTICAL AUCTION BRIDGE"

ARTICLE No. 8

A discussion of the following question of a correspondent should interest all Auction and Contract players:

"First hand has bid no trump, second has passed, third has over-called his partner with two hearts and fourth has bid two spades. Under what conditions should the original hand (a) bid two no trumps, (b) raise his partner to three hearts."

This particular question opens up a very wide field of discussion and one that can be handled only in a very general way. For the purpose of this discussion it will be assumed that neither side has a score. Also assume that the dealer has bid one no trump with each of the following hands:

A
Hearts—Q, 8
Clubs—A, 10, 4, 2
Diamonds—K, 10, 9, 8
Spades—K, J, 7

B
Hearts—Q, 10, 7, 2
Clubs—A, 10, 4, 2
Diamonds—K, Q. 9
Spades—10, 4

C
Hearts—7, 2
Clubs—A, 10, 4, 2
Diamonds—K, Q, 9, 8
Spades—Q, 7, 2

D
Hearts—7, 4
Clubs—A, K, Q, 7, 6, 2
Diamonds—K, 10, 7
Spades—K, 7

Then assume that his partner has bid two hearts and fourth hand has bid two spades. With Hand A, the dealer should bid no trump. He has a double stopper in the spade suit and only two hearts. For this reason the no trump bid offers the better chance for game. If his partner has a strong heart suit, it is up to him to bid three hearts. The bid of two no trump indicates a strong hand but no particular help for the heart bid. Always hesitate to help your partner's suit bid with only two trumps or less. The only exception to this is when you hold ace or king and one other.

In Hand B, the dealer should undoubtedly bid three hearts. He has no stopper in the spade suit and yet very strong help for his partner's heart bid. This hand is a fine example of the type of hand on which to assist partner's suit bid.

In Hand C, the dealer should pass. He has only one stopper in spades and less than normal help for his partner's heart suit. For that reason, he should neither bid two no trump nor three hearts. It is a fine example of a hand that is just under the requirements for a two no trump bid.

In Hand D, the dealer should bid two no trump. He has only one stopper in the spades but his set-up club suit makes the hand a good chance for game in no trump. The fact that it contains only two small hearts makes a three-heart bid inadvisable. It is a fine example of a hand that is just over the requirements for a two no trump bid.

It is manifestly impossible to include in this discussion all of the various types of hands that might come under the conditions specified in the question, but the foregoing examples are typical and will act as a guide in the great majority of instances. As a general rule, bid two no trump if you have a double stopper in the suit bid or three hearts if you have three or more hearts to an honor and a sound no trump.

### Last Instructions

When I am dead, and ashes in your hand,
In a mild Virginia meadow take your stand,
And pause a moment, thinking of the past,
Those rare road-walking days that couldn't last.

Think, "This was her body that swung along with me,
The same road the same violets, the very locust tree."
Think, "God she loved, and the witnesses of God
And in especial the Virginia sod.

Here we walked together, the wind whirled
As on the first bright morning of the world.
Hungry, tired, and tremblingly in love,
And something sang, I think a brown wood-dove."

These thoughts will pass like summer. Pause no more.
I shall be there as happy as before.
I shall be there to watch you turn aside,
Remembering. Then fling the ashes wide.

—Virginia Dare in The Montreal Star.

### The Interdependence of Nations

Detroit News: Every great modern industrial country is dependent on world economy. Even we in the United States are finding out that our wealth is not simply the country's resources, means of production and population, but is conditioned by the international exchange of goods, services and capital. National self-containment is a pure political phantasy, as our own rapidly dwindling foreign trade with its terrible concomitants of bankruptcy and unemployment so tragically attests.

"The list of American Presidents presents an almost unbroken array of British names."—Havelock Ellis.

**Bad Attacks of Flu**

**E. M. Ward Finds Wonderful Pick-Me-Up in Dr. Williams' Pink Pills.**

Brings Wonderful Vitality.

"I have had attacks of the 'flu' frequently since 1919, and sometimes very bad attacks, but always when on the road to recovery I take Dr. Williams' Pink Pills and I find them a wonderful pick-me-up."

So writes E. M. Ward, Saskatoon, Sask., who further states: "I would recommend Dr. Williams' Pink Pills to all sufferers from that rundown, listless feeling. I have taken the Pills on many occasions, and they seem to tone up my blood wonderfully. I have been anaemic for years, and find that, when I get rundown, after taking several boxes of Dr. Williams' Pink Pills the color comes back to my cheeks and I have wonderful vitality."

Dr. Williams' Pink Pills rebuild health by creating new blood and increasing the red blood cells which restore the wasted tissues and revitalize the exhausted system. They remove the cause of rundown or nervous conditions. Try them. At your druggist's. 50c a package. 271

## What New York Is Wearing

BY ANNEBELLE WORTHINGTON

*Illustrated Dressmaking Lesson Furnished with Every Pattern*

Here's a splendid slip that has quite a number of points to aid and enhance the matronly figure.

There is the bias cut of the upper edge, so comfortable and slimming to the neckline. The moulded bodice gives snugness to the waistline, cut bias at the front.

The wrap-over arrangement at the back makes it shadow proof.

Style No. 3480 will give you a marvelously slimming silhouette, that will give you a more youthful appearance.

You can make it in crepe de chine, crepe satin or flat crepe.

It is designed in sizes 16, 18 years, 36, 38, 40, 42, 44 and 46 inches bust.

It takes but 2¾ yards of 39-inch material for the medium size.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto

**Fugue in Seven Sharps**

Blinks—"I hear you and your neighbor are on the outs. What happened?"

Jinks—"Well, my kids are taking music lessons, and the other day he sent over an ax with a note saying, 'Try this on your piano'."

The Tobacco with a heart

## Hints to Motorists

Front wheels of all cars toe-in, or are gathered at the front, to compensate for the fact that the wheels taper from top to bottom.

MUCH POWER IN STOP LIGHT.

Stoplight bulbs are more powerful than many car-owners realize. They average around fifteen candlepower in brilliance. Unless the motorist is aware of this, he might, in just dropping around to pick up a bulb, get one of inadequate power. It takes quite a bit of brilliance in the signal to make certain the oncoming driver will catch the "stop."

AIDS TO VISIBILITY.

Two handy aids to visibility are: Keeping the windshield wiper blade back at the top of the arc, and wiping the dust from the glass before driving into the sun. Both are so easy that it is surprising more motorists do not see that they are done.

USE OF BRUSH HELPS.

A brush with bristles that are not overly stiff is really the ideal thing with which to clean the closed car top. It gets down into the material in a fashion that is impossible for a cloth or sponge. A little lukewarm water—and nothing else—is the thing to use on the brush.

CAUSES OF CARBURETOR POPPING

There are quite many causes of popping back into the carburetor, a condition that may cause the engine to catch fire, especially if the outside of it is dirty and covered with oil. The four most common ones are dirt in the carburetor, sticking intake valves, water in the gasoline, and an air leak at the intake manifold connections.

PUT WINDSHIELD DOWN.

Many a car owner is only partially locking his door these days by leaving the windshield open, making it a simple matter to reach through and unlatch a door from the inside.

### Astronomers Will View Sun's Eclipse

Toronto—The Royal Astronomical Society of Canada have formed a committee to organize an expedition to Northern Quebec to observe a total eclipse of the sun on August 31.

Professor H. R. Kingston, London, Ont., suggested the possibility of broadcasting the eclipse by television from an airplane. He said the path of totally would be 100 miles wide.

Imports of Canadian tobacco through the Port of London in 1930 amounted to 728,000 lbs. and in 1931 to 2,070,000 lbs., and is still on the increase.

**HER HUSBAND TEASED HER**

**But not for long!**

"I started taking Kruschen Salts for biliousness, and for the last two years I have been perfectly free from an attack. Now I continue to take them, as I find they keep me in perfect health. My husband used to joke about me taking Kruschen Salts; now he takes them himself, so do my children. My sincere thanks."
—Mrs. G. P.

When your gastric or *digestive* juices refuse to flow, your food, instead of becoming absorbed into your system, simply collects and ferments inside you, producing harmful acids and gases which give rise to biliousness, heartburn and flatulence.

Kruschen is a combination of six mineral salts, which goes right to the root of the trouble. It first stimulates the flow of gastric and other juices to aid digestion, and then ensures complete, regular and unfailing elimination of waste matter every day. And that means a blessed end to biliousness, and a renewed and whole-hearted enjoyment of your food without the slightest fear of having to pay the old painful penalty.

GENUINE PHILLIPS MILK OF MAGNESIA
For Troubles due to Acid
INDIGESTION
ACID STOMACH
HEARTBURN
HEADACHE
GASES-NAUSEA

**Reduce the Acid**

SICK stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated.

Too much acid makes the stomach and intestines sour. Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless dose neutralizes many times its volume in acid. For 50 years the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Get proof this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians in correcting excess acid.

## PREMIER REPLIES TO MR. KING ON WATERWAYS

(Continued from Page 1)

entire trade of the West diverted to Albany and New York?

"Furthermore, in the life of nations as in the life of man, there are opportune moments for action. It is possible that the present may be a very opportune time for Canada to negotiate with the United States and obtain better conditions. Be that as it may, should an agreement be made, the engineers advise us that the international portion of the waterways cannot be completed in any shorter period than ten years. On the other hand, the national portion of the project, that comprised within Canadian territory, can be performed in a much shorter time, at the outside, four or five years. It is therefore possible to conceive that the Americans having assumed to build the international section, might set to work now and Canada would have the advantage of waiting for several years until the return of better times before any of its expenditures on the national section would have to be made.

"But if the question of time is one of importance, the manner in which the project is to be carried out is of no less moment. Strange as it may seem, the national advisory committee, in their recommendation to the Government, have not hesitated in stating that if the United States assume the entire cost of developing the international section, both for canalization and waterpower purposes, then Canada, in respect of the carrying out of the works in the national section, could afford to wait until private interests in need of water power, in order to obtain the concession, should assume the full cost of canalization in this, the national section. This of course, would mean that the entire cost of the waterways in the national section would be borne by the water power development.

"It must not be forgotten, however, that the water power in the national section forms part of the natural resources of Quebec Province. These water powers, accordingly, would be forever loaded and handicapped with the cost of the waterways in the national section. This would mean that instead of water power capitalized at $97 per horse power in Quebec for the first million horse power envisaged by the engineers, you would have water power capitalized at the huge figure of 210. per horse power. This, of course, would be a crying injustice, and must not be. It is difficult to understand how men of the standing of those who form part of the national committee should have made such an evidently unjust suggestion to the Government.

"We are now faced with the neccessity of deciding on this project. It is to be hoped that when the Government contemplates the method in which this project is to be carried out, they will take proper care to see that the development, which is one belonging to the entire Dominion, should be borne and paid for by the whole Dominion.

## APPLICATION TO PARLIAMENT

**ONTARIO-QUEBEC CANAL AND POWER COMPANY**

Notice is hereby given that an application will be made to the Parliament of Canada, at its next session, for the passing of an Act to incorporate a company under the name of "Ontario-Quebec Canal and Power Company," with the right to build a canal or canals, to overcome the rapids of the St Lawrence River, from a point at or near Cardinal, in the County of Grenville, to a point at or near Cornwall, in the County of Stormont, all in the Province of Ontario, and also another canal or canals from a point at or near Hungry Bay, in the County of Beauharnois, to a point at or near Laprairie Basin, in the County of Laprairie, the latter canal or canals all in the Province of Quebec; with such powers as will enable it to create a deep waterway throughout the entire distance from the eastern end of the Welland Canal to the Harbour of Montreal, such waterway or ship channel to be of not less than thirty-five feet depth throughout; to construct, operate and maintain all such works and structures as may be necessary or incidental in connection with the said canals and ship channels; to construct a viaduct or vehicular traffic bridge over the River St. Lawrence from a point at or near Valleyfield, in the County of Beauharnois, Province of Quebec, to a point at or near Coteau Landing, in the County of Soulanges, Province of Quebec; to levy and collect toll for all traffic over the aforementioned bridge or viaduct; to regulate and maintain the waters of Lake St. Francis to the average spring level; with the right to have and do all such things as may be pertinent to such an undertaking or incidental to the production of electric, hydraulic, pneumatic or other power, and to the use, sale or lease of same; to acquire by purchase or expropriation any such property, works, canals, as may be necessary to its undertaking; to purchase and take over as a going concern the Great Lakes and Atlantic Canal and Power Company, Limited, a body politic and corporate, duly incorporated under "The Companies Act," R.S.C. 1906, Ch. 79; to divide the works of the company into different sections, for all purposes whatsoever, to finance same separately, to issue bonds on such separate sections, so that each distinct section may be covered by a separate Deed of Trust covering such section and its revenues specially and exclusively; and generally to have all powers necessary or incidental to an undertaking of this kind, such canals, works and undertakings being declared to be for the general advantage of Canada.

**Mother of Five Looks for Early Relea...**

When one is only 27 the strain of raising five children on limited financial resources is a burden which would tax any woman's strength and vitality. In the case of slender Mrs. N., none too strong from early years at factory work, the burden pressed her lower and lower to the point where tuberculosis gripped her in all its power.

Fortunately, however, she was sent to the Muskoka Hospital for Consumptives, where the experienced doctors and nurses took her in hand with kindly care. Since then, like a rain-freshened flower, Mrs. N. has responded to the carefully planned treatment and has made splendid progress towards recovery, and is eagerly looking forward to the time when she may return to her little ones.

There are many such cases, but without financial assistance the Muskoka Hospital cannot aid them. A gift from you will be gratefully received if sent to Mr. A. E. Ames, 223 College St., Toronto.

## WILLIAMSBURG

Born—To Mr. and Mrs. George Strader, Williamsburg, on Monday, Feb. 8th, 1932, a daughter.

Born—To Mr. and Mrs. William Lane, Boucks' Hill, on Sunday Feb. 7th, 1932, a son.

Miss Opal Hess, R.N., returned to Rochester, N.Y., last week, after spending the past month with her mother, Lyla Hess.

Mrs. Simon Whitteker of Finch visited relatives in Williamsburg recently.

Mrs. Roy Merkley of Smith Falls spent last week-end visiting her parents Mr. and Mrs. Elgar Casselman.

Mrs. Blanche Hanson, Miss Beryl and Cecil Hanson spent last Sunday at the home of Mr. and Mrs. Will Cook, Winchester.

Mr. and Mrs. Grant Casselman and children were guests of the latter's parents, Mr. and Mrs. Mac Doherty, on Sunday.

Mr. and Mrs. M.O. Trickey spent last Sunday in Massena, N.Y., with their daughter, Mrs. Lynden Barkley and Mr. Barkley.

Mr. and Mrs. Wilbert Strader were guests of Mr. and Mrs. Ivan Barkley of Dunbar last Friday.

Mr. Elgar Casselman was the guest of Mr. and Mrs. Ward Casselman last Sunday.

Rev. W.A. Morrison of Elma was a guest at the home of Mr. and Mrs. Willis Tupper on Tuesday evening of this week.

Misses Thelma and Hazel Barkley were guests of their little cousins, Betty and Diana McIntosh, last Saturday.

Many friends of Mr. C.W. Norval were sorry to learn of his illness, and hope he will soon be around again.

Miss Luella Strader of Gallingertown spent last week-end with her parents, Mr. and Mrs. Willis Strader.

A great many friends in this district attended the funeral services of the late Alfred Marcellus, only son of Mr. James Marcellus of Dundela, and the victim of a motor and buggy collision near Dixons on Sunday evening. The funeral was held from his late home to the United Church, Dundela, on Tuesday afternoon. A very heartfelt sympathy from a large circle of friends in this district is extended to the sorrowing parents and sister.

Mrs. Claude Casselman, accompanied by her brother-in-law from Winnipeg, who spent the week-end in Williamsburg, left on Monday for a three months' visit with her two sisters in Winnipeg.

## CHURCH ROAD

Mrs. [illegible]ce Tupper, Morrisburg, spent the week-end at Mr. Nathan Tupper's.

Mr. and Mrs. M.J. Beckstead, of Cedar Grove, spent Tuesday at J.J. Styles'.

Mr. and Mrs. Russell Link and little daughter were Sunday guests at Mr. E. Strader's, Iroquois.

Mrs. Sam Schwerdfeger and Mr. Earl Schwerdfeger spent Tuesday evening at Mr. Roy Styles'.

Mr. and Mrs. Jacob Schwerdfeger and sons Carl and Lyle, spent Saturday evening at R.J. Schwerdfeger's.

Mr. and Mrs. Allen Froats spent Sunday at Mr. Jas. Schwerdfeger's.

Mrs. W. Murray Styles and little daughter spent last Thursday with her mother, Mrs. H.H. Barkley.

Mrs. Ben Bowman has been ill with la grippe the past week. Hope for a speedy recovery.

Mr. and Mrs. R.J. Schwerdfeger and sons Roscoe and Ray, spent Sunday at Jas. J. Styles'.

Mr. Wm. Brouse of Ottawa was a recent caller in this vicinity.

Mr. J.A. Wells arrived here Tuesday morning, returning to Syracuse the same day, accompanied by Mrs. Wells, who had spent some time here.

Mr. Thos. Milward had the misfortune to have both hands injured with a circular saw on Tuesday.

Miss Mary Schwerdfeger and Geo. Styles of the M.C.I. spent the week-end at their homes.

Mrs. Bowman spent Wednesday with Mrs. Stanley Saddlemire at Glen Becker.

## AULTSVILLE

Mr and Mrs. Geo. Hagerman spent Thursday in Ottawa.

Mr. Merkley, of Iroquois, spent Sunday with Mr. and Mrs. W. Reddick.

Mrs. John Morgan spent Sunday with her mother, Mrs. Henderson, of Morrisburg.

Mrs. John Kettle, of Grantley, spent the past week with Mr. and Mrs. W. Reddick.

Mrs. Frank Jarvis has returned home from the Cornwll General Hospital, much improved in health.

The three local teachers, Miss Ault, Miss Baker and Miss Fowler, accompanied by Mrs. C.S. Ault, spent Thurs[illegible]y in Ottawa.

## BRINSTON

Miss Verda Brinston, R.N., of West Hudson Hospital, Newark, N. J., is spending a couple of weeks at her home.

The remains of the late Mr. Samuel LaPorte, of Inkerman, were placed in the vault here on Sunday, to await burial in the spring.

Mrs. J.C. Payne spent the week-end at the home of her son, W.D. Payne, of Kemptville.

A very large crowd attended the skating party on the community rink on Saturday night, under the auspices of the Hulbert Sunday School.

Mrs. John Johnston of Shanly is visiting friends and relatives over the week-end.

Last Saturday evening, while two of our obliging young gentlemen were escorting their ladies to their home, in the unusually high wind, one of them had the misfortune to have his hat carried away across the fields. Certainly he could not desert his lady, and was forced to let the hat go. Being Scotch, and "a hat in the hand being worth two in the shop," he arose at break of day next morning, lest he might awake his neighbors, and secured the elusive hat.

The regular monthly meeting of the Matilda Women's Institute will be held at the home of Mrs. James Boyd, Brinston, on Thursday Feb. 18th, at 7.30 p.m. Roll call—A Valentine Verse. Each member is requested to bring a needle and thimble.

## MARIATOWN

Miss Pearl Feeley entertained the members of the Mission Circle at her home on Tuesday evening, there being about thirty present. All enjoyed a pleasant evening.

Mr. and Mrs. E. Spencer and children of Iroquois and Mrs. M. Mason spent Sunday with Mr. and Mrs. Ed. Robinson.

Mr. and Mrs. John Hanes were guests at the home of Mrs. L.E. Casselman Sunday evening.

Mrs. E. Castleman spent Sunday afternoon at the home of Mrs. W. Robertson.

Mr. and Mrs. J.H. Hanes, Mrs. S.G. Casselman and Mrs. L.E. Casselman spent Sunday afternoon at the home of Mr. and Mrs. W.O. Sheets at Farrans Point.

Mrs. N. McGillis and Miss Kingston were callers at Mrs. Ed. Robinson's on Monday.

## STRADERS HILL

We are pleased to report Mrs. Bruce Strader home from the hospital much improved in health.

Mrs. Eslie Pitt is spending the week with her mother, who is seriously ill at time of writing.

Quite a crowd attended the dance held at Jim Hanson's Tuesday night.

Mrs. A. Riddel called on Mr. and Mrs. B. Strader Thursday.

Mr.and Mrs. H. Hanson visited Mr. and Mrs. E. Johnston Thursday, at Toyes' Hill.

Mr. and Mrs. F. Coons visited Mr. Jim Cook Sunday at Williamsburg.

Miss Nina Casselman was the guest of Mr. and Mrs. O. Cook Sunday.

Mrs. H. Cook called on Mrs. B. Strader Sunday afternoon.

Visitors of Mr. and Mrs. R. Hanson: Mr. and Mrs. B. Merkley, Williamsburg; Mr. and Mrs. F. Riddel, Shanly; Mr. A. Hanson, Prescott; Mr. R. Fetterly, Morrisburg.

Mr. and Mrs. E. Johnston made a business trip to Ottawa Saturday.

## WINCHESTER SPRINGS

Callers from Metcalfe at the home of Mr. and Mrs. Thos. Cunningham recently were: Mr. and Mrs. Wm. Armstrong, Mr. and Mrs. Henry Armstrong.

Miss Mary Bailey was a recent guest of Mrs. T. Cunningham.

We are sorry to learn Mr. James Barrigar is suffering a stroke.

Mrs John Patterson returned to the home of Mr. A. Bailey, after spending some time with friends at Inkerman.

Mr. Jay Bailey and sister Mary, and Mr. H. Patter, spent the week-end with Miss Dorothy Latimer, at Kemptville.

Misses Reveler and Gardner of Winchester spent some time with Mr. and Mrs. Cecil McIntosh.

Mr. and Mrs. Arnold J. Casselman and son and daughter spent Sunday with Mrs. George Armstrong, Winchester.

Mrs. Orren Casselman returned to her home Saturday, after nursing Mrs. Thos. Cunningham.

We are pleased to learn at time of writing that Mrs. Mason Casselman is improving nicely from her recent illness.

Miss M. McIntosh spent a couple of days with Miss H. Davidson.

Mr. and Mrs. Ralph Allison and family spent Sunday at Morewood.

Mr. and Mrs. Orren Casselman spent Monday with Mr. and Mrs. Calvin Strader.

Mr. and Mrs. Howard Nesbitt spent Sunday evening with Mr. and Mrs. Wallie Bolton.

Mr. and Mrs. Plin Irving and daughter Elaine, from Dunbar, spent Sunday with Mr. and Mrs. W. Bolton.

Miss Margaret Thorpe of Hulbert spent a few days with Mr. and Mrs. Wm. Barkley.

## CEDAR GROVE

Mr. and Mrs. Fred Dafoe and Miss Greta visited Mr. and Mrs. Calvin Gallinger, Gallingertown, Sunday.

Miss Wilda Durant is at present the guest of her sister, Mrs. Charlie Black.

Mr. and Mrs. Carmi Froats, Grace Iva and Clayton, of Gallingertown, spent Saturday evening with Mr. and Mrs. Frank McConnell.

Miss Lenie Dafoe left on Saturday to spend a few weeks with Mrs. Alice McDonald and Miss Dorothy of Moulinette.

Don't forget the Valentine Tea at the home of Mr. and Mrs. W.A. Wereley, Wed. Feb. 17th.

Mr. and Mrs. Ernest Marcellus and daughters Irene and Jean, of Iroquois, were Saturday visitors of Mr. and Mrs. Frank Dafoe.

Mr. and Mrs. Fred Dafoe and Miss Greta spent Thursday evening with Mr. and Mrs. Kenneth Gallinger at Gallingertown.

Miss Muriel McConnell is spending some time in Massena, the guest of Mr. and Mrs. Cecil McConnell.

Mr. and Mrs. Harvey Martin of New York spent a few hours Monday with the latter's parents, Mr. and Mrs. W.A. Wereley.

Mr. and Mrs. Frank McConnell and Miss Muriel spent Tuesday with Mr. Walter McConnell, 2nd Concession.

## ARCHER

Mr. and Mrs. Roy Cunningham visited Mr. and Mrs. John Warren one night last week.

Miss Hilda Gallinger spent the week-end at her home here.

Mr. and Mrs. H.A. Gallinger and son Graham visited at Mr. Isaiah Fetterly's on Friday.

Mrs. Bernice Gallinger and children Harold and Lyle visited her mother on Sunday.

Messrs Allen, Bernice, Graham Gallinger and Robert Storey spent Saturday in Cornwall.

## SEED DOWN

Something happened in 1931 to give us an extremely bountiful crop of legume seeds. Apparently the elements in league with old Mother Nature, anticipated low prices for the farmer, and in a vain attempt to give him a remunerative cash crop, so arranged things that almost every clover field in the Country produced its allotment of seed; seed that in most cases is of very high quality.

This bountiful supply of home-grown legume seed is a real blessing to all farmers, particularly to those not actually or regularly engaged in the production of small seeds.

The legume seed crop in Ontario this past year has been estimated at varying amounts. Even the most conservative estimates place the 1931 crop at figures that will insure ample high quality Alfalfa, Red Clover and Alsike of hardy strains to meet the requirements of every farmer in the Province of Ontario.

Due to the low cost of seed, farmers may seed down 10 to 20 acres more this year than they have been in the habit of doing, and at the same time their total cost of seed will be materially less than usual.

Some sections of Ontario are not yet growing Alfalfa to any great extent, and if the truth were known the cause may be due to disappointment caused by winter killing of imported seed. As a soil builder, pasture and hay crop producer, Alfafla stands supreme. As a green manure crop, Alfalfa opens up the soil and adds nitrates and other plant foods to a value worth much more than the price of the seed. As a hay crop Alfalfa outyields all others both in quality and quantity. It was the only crop to remain green for pasture during recent very dry years in Western Ontario. In these sections where Alfalfa has not yet secured a foothold, it should be sown in mixtures with other legumes.

The Timothy hay market is now almost a thing of the past, yet thousands of bushels of Timothy seed are sown every year, more than half of which must be imported. If the Timothy acreage could be largely supplemented by legume hay crops, we could avoid importing seed with the danger of having new weed seeds introduced. This would also help in further creating a favourable trade balance. At the same time we would be growing crops that yield on the average nearly a ton to the acre more than Timothy. Legume feed is of better quality for all farm animals, except horses on heavy work, and the legume crops have a much more beneficial effect and are easier on the land than Timothy. After all, can we afford to grow Timothy in such large quantities as we have done in the past?

All legumes are capable of transferring the nitrogen of the air to the soil and storing it there as nitrates. The nitrates in the plant food are the most expensive to supply. Where legumes are grown extensively, it is seldom necessary to add any nitrate fertilizer. This in itself is a very material saving in fertilizer costs.

**MARKET CONDITIONS**

Clover and grass seed markets have been very dull and seeds have been moving only in small quantities. Prices for small seeds have, however, strengthened slightly in the United States and Europe. Some Canadian Red Clover has already been exported to Great Britain, and taking into consideration the exchange, it may be possible in the near future to overcome the prohibitive tariff of 8c per pound and at least some of our surplus seeds of lower grades may be marketed in the United States.

In view of these indications and considering the present low prices, farmers might well be advised to procure seed supplies early.

Due to the fact that hundreds of farmers saved clover seed this year, who never did before, and in many cases no preparation was made to guard against weed seeds, there will no doubt be a lot of clover come on the market very low in grade, due to weed seed content. These lots should be thoroughly cleaned before being offered for sale. Purchasers in so far as it is possible should buy top grade seed.

Beware of ungraded seed. In the first place it is unlawful for anyon eto offer for sale ungraded and secondly, ungraded seed is of very doubtful quality and often is a source of severe weed contamination. Any farmer, by forwarding reprsentative samples to the Dominion Seed Branch at Toronto, or Ottawa, may have three samples graded free of charge.

One prominent farmer sums up the legume situation very aptly when he remarked, "As far as my own farm is concerned, I intend to seed down everything and slap it on thick."

**ALFALFA FOR THE ORCHARD**

Apple growers have found that in order to get sufficient color and maturity, it is necessary to keep the orchard in sod, breaking up only at intervals of 5 or [illegible] years.

Mr. W.B. Somerset, Chairman of the Ontario Marketing Board, and a practical grower in the Burlington district, states that Alfalfa is the best crop to use for this purpose.

Alfalfa being perennial in nature, remains in the ground year after year. Alfalfa roots penetrate into the soil much lower than apple tree roots, and therefore do not consume much of the moisture supply available to the tree. Furthermore, the roots open up the soil, make it more porous, thereby allowing the air to penetrate into the soil, which in turn stimulates bacterial action in the soil.

Alfalfa is a plant capable of taking nitrogen from the air and storing it in the roots as nitrates. All good orchardists apply nitrate fertilizer early in the Spring to promote early rapid growth and to stimulate blossoming. A cover crop of Alfalfa is an extremely cheap source of nitrate supply.

Alfalfa being the heaviest yielder of all legume and grass crops, may be cut twice each year. The cuttings which are allowed to remain under the trees make an excellent mulch which conserves moisture and keeps down weeds.

Fisher Bodies bring style and comfort to the New Chevrolet Six

Chevrolet owners are gratified, of course, at the admiration evinced by friend and stranger alike. But they are not surprised that the new Chevrolet is recognized as the most beautiful car in the low-priced field. For they know that Chevrolet possesses one fundamental of smartness accessible to no other car in this field—its style-setting Fisher Body.

The world's foremost designers—the same men who design the ultra-modish Cadillac—have used their artistry to set Chevrolet head and shoulders above anything in its price-class as far as style is concerned. Style, indeed, has been an important factor in Chevrolet's rise to its position as largest-selling of all cars.

Remember, only the Chevrolet Six offers you these exclusive Fisher Body advantages in the lowest-priced field. Come in and see it for yourself.

"It's Lucky you have a Telephone"

Jim Ross hadn't noticed the broken fence until his favorite roan mare got caught in the barbed wire and cut her leg.

It didn't seem a bad cut at first, but blood poisoning set in and Jim thought he was going to lose a valuable horse. A hurried telephone call brought the veterinary surgeon.

"I think we can save her, Jim," the veterinary said, "but another couple of hours might have been too late. *It's lucky you have a telephone.*"

THE BELL TELEPHONE CO. OF CANADA

# SON OF THE GODS

*BY REX BEACH*

SYNOPSIS

When Lee Ying, a prosperous Chinese merchant of San Francisco, announces that a son has arrived at his home, only Officer Dunne knows that the child is really a white foundling. Sam Lee attends Eastern College and finds a social barrier on account of his supposed Chinese blood. Several attempts are made to blackmail him and fail, but succeed in getting Sam expelled from college. He goes abroad and becomes assistant to Bathurst, an English playwright. He meets Alanna Wagner, California heiress. They fall in love but Alanna learns through Alice Hart, former Eastern student, that Sam is a Chinese, and publicly horsewhips him. Lee Ying dies before Sam arrives home. Embittered, he adopts the ways of the Orient.

CHAPTER XXVI.

Prior to his divorce Albert Wagner had enjoyed a certain amount of home life but thereafter he had experienced little, and of late none at all. As a result he was beginning to yearn for it. That California estate of his was expensive to maintain and he loved living there, but during the past year he had scarcely been permitted to see it, for Alanna had kept him on the go and she had been content to remain in one spot hardly long enough for him to receive his mail.

If ever there was a stormy petrel, a pigwidgeon blown on the wings of a tempest, it was she, and Wagner could not make out what had come over her. She made a thousand plans and changed them all. One day, for instance, she had refused to leave Paradis, the next day she had insisted upon leaving without a moment's delay: she had arranged to spend a season of gaiety in New York, only to change her mind and decide on California.

Alanna was never twice the same and yet she had the power to wrap him around her fingers. One moment she was loving and lovable, the next she was harsh and hateful. She was obedient and rebellious, humble and domineering by turns and always she was as restless as some Peri doing penance until it could be admitted into Paradise.

They were back in New York again, why nobody knew. The Wagner suite at the Ambassador was like a madhouse; maids and bell boys were on the run, some one of the several phones was constantly ringing with a clamor as irritating as a neuralgic pain. Lunches, teas, dinners, dances, theatres, all night parties, polo, races: her hours were too short to accommodate her overlapping engagements.

Wagner had set out to keep pace with her for once and she had been delighted to have him do so. She had swept him along for a while, then spurred him on when he faltered and finally rowelled him into a gallop until his breath failed and he dropped hopelessly behind.

It was not often that he saw his daughter long enough to engage her in conversation, for she was always late—permanently late, as Wagner put it—for something or other, and she was seldom alone. Some male orchid was usually adroop over her shoulder, or some shrilly-voiced neurasthenic of her own sex was shrieking at her to "make it snappy," "step on it," "give it the gun."

Occasionally there did come a chance for a word with Alanna, as, for instancefi one night when she returned home about twelve o'clock. For once she looked exhausted, and her father was encouraged to believe there must be a limit even to her endurance.

"Well, well, well!" he began cheerily. "You certainly look rotten. In your dragging feet and haggard face I see hopeful signs of a physical collapse. How much longer do you think you can keep this up."

"How much longer can I keep what up, jelly bean?"

"This—dementia."

"Bless you, I'm just getting up a comfortable glow. What about a kiss? Don't rise: I can make it."

"I wish you were an old lady. Aren't you ever going to settle down?"

"Horrors, no!"

"I wish one of these germs would marry you. I'd accept the worst one in the outfit."

"No danger. The more I consider matrimony, the better I like diphtheria. No, I shall never marry. I am content to remain at your side, a constant cheer and comfort."

Wagner leaped to his feet and strode about the room, followed by the almost derisive gaze of his daughter. Up to this point he had risen to her banter as best he could, but now a change came over him and when he spoke it was in an altered tone:

"I've an idea it's all due to that infernal Chinaman."

"Don't let's talk about him," said Alanna.

"Why not?" The father drew down his brows in a scowl; for a moment the two stared at each other.

There was a pause. Without rising, Alanna reached forth her hand, lifted the telephone and called a number.

"What are you doing? Who are you ringing at this time of night?"

"Sam Lee," said the girl.

Albert Wagner gasped, he moved as if to snatch the instrument but Alanna turned her shoulder, her eyes widened, an expression leaped into her face that warned him to keep his distance. Of a sudden she had grown as white as paper.

"You—know his number! You've called him before!"

She nodded. "I looked it up when we came from Europe, and I've repeated it to myself a hundred thousand times. I called him, but he had gone to China."

"What are you going to say to him?"

"I don't know. If you move or make a sound, I'll tell him to come and get me."

"Alanna! For the love of heaven—"

"Smother me with a pillow! Shake it out of me! I warned you not to threaten. . . . I—I want to hear his voice. I want to know he's there. I was half crazy when I came in and you. . . . Hello!"

Through the silence Wagner heard a faint, metallic answer.

"Is that you, Sam? This is Alanna. Oh, that explains it! But why sleep at this hour? Sam, you've been dissipating." The girl laughed hysterically, she was shaking, her face was strained, her eyes were wild. . . . "I don't know why, I'm sure. I never have a reason for doing things. Impulse probably. I want to see you. Yes, that's it, I want to see you. . . . But—there's something I must say. . . Father and I have been quarreling over you."

Wagner shuddered, he felt a moisture start out upon his body.

Alanna went on, utterly heedless of him now:

"Oh, not a serious quarrel. Just our usual bedtime battle. Nothing like a few fast rounds to make you sleep. . . . Please, Sam . . . Why? Because I ask it. Isn't that enough? . . . . We're at the Ambassador. Please! . . Any time tomorrow. Whenever you say. . . . Thanks, old dear. I'll expect you."

"Oh, my God!" the father exclaimed feebly.

That midnight message shook Sam, and he slept no more after its receipt. When morning came he experienced a peculiar indecision: he looked forward with dismay to seeing Alanna again and yet the thought of doing so set his pulses to racing madly, stopped his breath. Well, he wouldn't go . . . And yet she had begged him. She was capable of anger but not of deliberate malice; perhaps she really had something of importance to say. To change his mind now would be a confession of weakness. Torn by unruly desires, hot with resentment, cold with dread of the ordeal, he spent the morning in a restless pacing of his rooms.

When the hour he had set arrived he went swiftly, eagerly, as he had known he would go.

Sam had named a time when the hotel lounge was likely to be least crowded and at his request Alanna met him there. Had he been less agitated when she came down the change in her appearance would have shocked him, for she was thin and drawn, there were ghosts in her eyes.

It required courage on her part to meet him but, as usual, she came to him as straight as an arrow in its flight. She put an icy hand in his and she met his gaze bravely. He was unusually pale; through his pallor the old mark of her crop stood out like a scar and for a moment she could not see anything else.

It was the worst experience either of them had ever endured: when it was over they seated themselves and exchanged commonplaces.

Only for Sams inward struggle, his painful preoccupation with himself, he surely would have noticed the girl's wistful yearning, for her self-possession was like a mask of gauze. As time went on, however, she managed to assert better control over herself, and to take refuge behind an artificial flippancy.

"I assume you go out as much as ever?"

"Um-m, yes. Father says it's as much as ever that I come in. That's hardly just for I'm seldom late for breakfast. Why, Sam, I broke a solemn engagement to see you and do my penance— Oh, don't go! For the first time in a long while I'm in good company and it's helping me. Tell me something about yourself."

"I went to China with the remains of my father. It was a painful duty but I laid them to rest in the happiest spot in all that country."

"I gathered, somehow, that you intended staying there."

"So I had intended. But China wouldn't have me. Certain metals can't be made to fuse, you know, and it's the same with certain racial elements. It seems to make no difference whether they're inherited or acquired."

"I presume that's true, but I wouldn't think it applied to your case." Sam explained how it did apply, and the girl nodded her complete comprehension. "What a pity! How unreasonable it is—all this prejudice. And yet how real."

Alanna was staring fixedly at her companion; she roused herself and abruptly changed the subject. "Dad was in the room last night when I called you and it threw him into complete mental and digestive disorder. He's out yonder now, foaming like one of Wagner's Velvet Shaving Sticks. Funny, isn't it, how parents will clutch at the wheel and risk ditching the whole family? They're all back-seat drivers."

"I would be honored to have him join us."

(To be continued.)

## Sweden Becoming Famous For Her Beauties

Miss Vera Von Schmitterlow, the Swedish "banknote girl," is now appearing as a butterfly in the new German super-film "The Butterfly Ball." Her flaxen hair, turquoise eyes and clear skin are causing much comment.

# Quality has no substitute

**Tea** *"fresh from the gardens"*

## The Potato Harvest

A high bare field, brown from the plough, and borne
Aslant from sunset; amber wastes of sky
Washing the ridge; a clamour of crows that fly
In from the wide flats where the spent tides mourn
To yon their rocking roosts in pines wind-torn;
A line of gray snake-fence that zigzags by
A pond and cattle from the homestead night
The long deep summonings of the supper horn.

Black on the ridge, against that lonely flush,
A cart, and stoop-necked oxen; ranged beside
Some barrels; and the day-worn harvest folk,
Here emptying their baskets, jar the hush
With hollow thunders. Down the dusk hillside
Lumbers the wain; and day fades out like smoke.
—Charles G. D. Roberts. "Poems."

## First Traffic Laws Instituted by Romans

Even the ancient Romans had to worry about parking near "the big game," and about driving the wrong way on one-way streets, according to Benjamin G. Eynon, Pennsylvania motor Vehicle Commissioner.

He has discovered that the first traffic law on record, passed in 396 B.C., gave women unrestricted right to drive their chariots through the streets of Rome.

"Motor vehicle operators who complain of one-way street regulations would have found the same condition confronting them in the Rome of the period referred to," he said, "for Rome had the first one-way streets in traffic history." He surmised that narrowness of Roman streets made one-way traffic necessary.

"Conditions in the Circus Maximus and the market places were so congested that Julius Caesar issued an order to his traffic policemen that every person entering the market place for 10 hours after sunrise must enter on foot," he said.

## Sun and Snow

Sunlight is curious about snow.
It glares intently,—wants to know
How flakes are made, and why the crust
Of snow can powder into dust.

The sunlight cannot hold aloof
When snow is dazzling on a roof.
It wants to know what makes it gleam,
And why the eaves should run a stream.

Inquisitively, sunlight peers
At beauty melting into tears.
It stares surprised, and does not know
That its attentions melt the snow.
—Helen Maring.

Hubby—"A fool and his money are soon parted."

Wifey—Oh, John, how much are you going to gve me for my birthday?"

"The functions of government should be exercised to stimulate not 'big business' nor 'little business,' but all enterprise."—Franklin D. Roosevelt.

"The bright ones will get along without a college education. It is the slow ones who need colleges."—Ruth Nichols.

## Spanish Melody

One of the most delightful things in Spain is its strange Eastern music, and of all the music by far the most magical is the "Malaguena." This is a plaintive little song or chant which is hummed under the breath, started by one, taken up and varied a little by another, carried right down the street like a thread of melody, everyone singing a few bars. Sometimes it is the veriest whisper; sometimes it rises to a wailing chant. It is quite bewildering, for you cannot place it; it often seems to die away altogether and begin again as a sort of echo, but with different harmonies and intervals and always in a minor key. The narrow streets of Malaga are full of this strange ghostly music, and the women washing clothes in the riverbed all hum it, each one improvising as she goes on, but it always stops suddenly if it is noticed that any stranger is listening.—From "Spanish Sunshine," by Eleanor Elsner.

## A New Crime Museum

The famous Black Museum at Scotland Yard has now its counterpart in Rome, where a Museum of Crime has just been opened.

Some of the exhibits are very interesting. There is, for instance, a stiletto with the words "Corsican Vendetta" on the handle, and on the blade the grim legend: "May the wound made by me prove mortal."

Prisoners planning escape have been responsible for a special section. Among the exhibits here are nails, bolts, and even pen-nibs, which have been made into knives by the expenditure of infinite labour. More ingenious still is a dummy revolver, which one prisoner fashioned out of breadcrumbs and coloured black. It was so realistic that its maker was able to intimidate a warder with it and make his escape.

"If a man has no fear, he has no brains."—Barney Oldfield.

# "FATIGUE? I just postpone it!"

"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three o'clock, and certain days, of course, were worse than others.

"Then I learned to rely on Aspirin."

The sure cure for any headache is rest. But sometimes we must postpone it. That's when Aspirin saves the day. Two tablets, and the nagging pain is gone until you are home. And once you are comfortable the pain seldom returns!

Keep Aspirin handy. Don't put it away, or put off taking it. Fighting a headache to finish the day may be heroic, but it is also a little foolish. So is sacrificing a night's sleep because you've an annoying cold, or irritated throat, or grumbling tooth, neuralgia, neuritis. These tablets always relieve. They don't depress the heart, and may be taken freely. That is medical opinion. It is a fact established by the last twenty years of medical practise.

The only caution to be observed is when you are *buying* Aspirin. Don't take a substitute because it will not act the same. Aspirin is made in Canada.

BAYER

# Farm Problems

Conducted by Prof. Henry G. Bell, Dept. of Chemistry, Ontario Agricultural College, Guelph

1. What fertilizer would you suggest for mangels? How much per acre, and would the same fertilizer be used for sugar beets?

Answer.—In the demonstration tests conducted on a large number of farms throughout the province by the Department of Chemistry, O.A.C., best returns from fertilizers used with mangels have been obtained where 2-12-6 fertilizer was applied at the rate of 375 lbs. per acre. This gave an average yield on loam soils of 49 tons per acre against 36 tons where no fertilizer was used. On clay soils it gave a yield of 33 tons per acre against 27 tons where no fertilizer was used. 2-12-6 gave very good yields on sugar beets but was slightly surpassed by fertilizers a little higher in potash.

2. Will complete fertilizer build up the soil for future crops or are they only good for one crop?

Answer.—In experimental work and field demonstration tests considerable information is accumulating which points to a decided "after" effect from fertilizers. For instance, where fertilizer was applied to alfalfa in 1930 giving an increase of 9,200 lbs. (green weight) per acre, the same plot in 1931 without further fertilizer gave an increase of 2,240 lbs. (green weight) over land which had been unfertilized. In another instance where fertilizer had been applied to barley on clay soil in eastern Ontario in 1930, there was an increase of 13.6 bushels. On the same plot in 1931 without any further fertilizer there was an increase of 4,320 lbs. of clover hay (green weight) over unfertilized land. In a test conducted by the Department of Chemistry, O.A.C., where complete fertilizers were applied to mangels and no further fertilizer applied for two years, there was a gain of 4.1 tons of mangels the first year; 9.7 bushels barley the second year, and 600 lbs hay the third year. Necessarily, attention must be given to keeping up the organic matter of the soil by turning under green crops or adding all the strawy manure obtainable, if the soil is to be improved in its productive capacity.

3. Should a 4-8-10 fertilizer cause scab on potatoes, used at the rate of 500 lbs. per acre?

Answer.—We know of no reason why fertilizers of any kind should cause scab. Scab is a fungus disease which thrives in an alkaline soil. If potato seed is not treated and is planted in a scab-infected soil that is alkaline in reaction, there is every chance of a scabby crop being harvested. Many potato growers find that by turning under a second crop of clover in preparation of the potato seed bed, the desirable small degree of acidity in the soil which produces clean potato stock results from the decay of the organic matter.

4. How does 6% potash in the fertilizer, say 2-12-6, applied at the rate of 200 lbs. per acre, help the grain to pay extra cash in a spring crop, say oats?

Answer—With oats at the present low prices it is difficult to make a profit from the addition of fertilizers directly to this crop. From results obtained recently in our demonstration work, it would appear that oats can benefit most profitably from the residual effect of fertilizers applied to the crop preceding. If, however, oats are grown as a cash crop, 200 lbs. of fertilizer to the acre may be of advantage. Whether or not it will pay will depend upon the type of soil and state of soil fertility. If grain has been taken from the field frequently within the last few years without the return of much fertility, the available potash of the soil will undoubtedly be considerably lowered, in which case a fertilizer such as 2-12-6 will pay well.

5. In how many ways are plant food elements taken from the soil?

Answer.—Plant food elements are removed in crops which are harvested from the soil both in the straw stalk and in the fruit, grain or seed. They are also removed in the bodies of livestock pastured upon the soil, and nitrogen especially is washed out of the soil through drainage water. Small amounts of potash and phosphate in the order named are also removed by this means.

6. Does the gradual elimination of the bases in the soil occur constantly?

Answer.—Certain of the bases in the soil are removed by cropping and by drainage. For instance, lime is thus removed, and magnesium.

If so, does this action create an unbalanced soil condition in which the acid elements predominate?

Answer.—The natural reaction of the removal of lime and magnesium is to produce a condition where acid predominates.

Would a proper application, after liming, of a well balanced fertilizer increase production to an economical maximum?

Answer.—In the system of farming commonly pursued in Ontario, lime should be applied once in four or five years on the average, in soils that are naturally short of it. Crops are rotated so as to introduce a legume crop once in four or five years. The second growth of this crop is usually turned under as green manure. It also adds considerable nitrogen to the soil if legumes predominate in it. A fair amount of livestock is usually kept and manure is returned as generously as possible. In addition to these practices, suitably balanced fertilizers applied to money crops or to crops of relatively high value has been found to increase yields at considerable profit. Of course, the degree of profit will depend among other things upon the quantity of fertilizer employed. We mean that while three bags of fertilizers per acre may give a highly profitable return on wheat or corn or sugar beets, the addition of eight bags to the acre, which would entail a much greater cost, would in all probability consume the additional profit. The Ontario farmer has to determine this point for himself, in view of the type of his soil, the cropping system which he follows and the amount of fertility that he is able to return in barnyard manure and green manures.

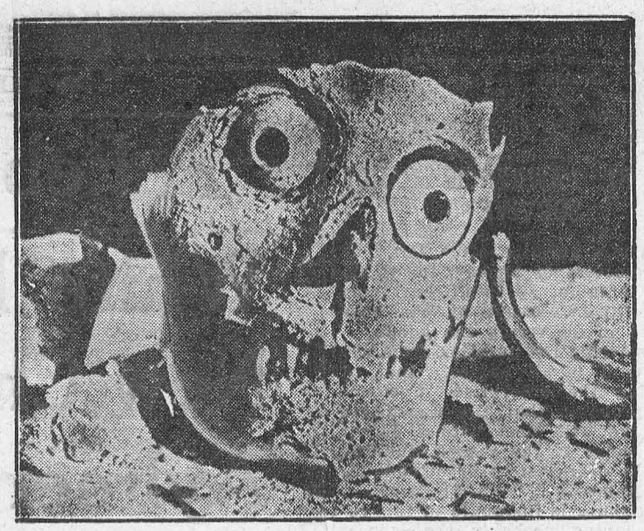
7. What is the maximum phosphoric acid that one can use in a potato fertilizer? For the last two years we have used 4-12-6 for early potatoes and 2-12-6 for late, and the results have been very good. We have a sandy loam soil and usually put on a light coat of manure.

Answer.—Results in our demonstration fertilizer tests throughout the past three years point distinctly to the value of 2-12-6 fertilizer on potatoes under general conditions. In our tests of 1931 where 2-12-6 and 4-8-10 fertilizers were compared, we found the latter gave a little higher yield on light soils and loamy soils, but the difference on loam soils hardly overcame the difference in cost of fertilizer. The reverse order was found to prevail on clay soils. From the rather extensive investigational potato work conducted by this station we are of the opinion that as least 12% phosphoric acid can be used with good results in fertilizers for early potatoes. It would appear that while your choice of fertilizers for the early potatoes, namely 4-12-6, is quite as we would recommend, yet the results of our tests indicate that you could get slightly larger yields by substituting 4-8-10 for the late potatoes on the light soil. This will depend, of course, upon how heavy a coat of manure you apply. In the tests conducted to which we have referred, no manure was applied. In the event that you have a fair coating of manure to apply, 2-12-6 will give you a better balance of plantfood with manure than 4-8-10.

## Mahogany Used as Fuel

In the interior of the Republic of Panama one often sees valuable mahogany being used as fuel in the carboneros, or charcoal burners, doing the cooking for the villagers and planters. Mahogany is cheap and makes the best charcoal, but the Canal Zone authorities are planning to introduce other fuel so as to save the valuable timber.

## Ancient Mexican Art



A decorated skull unearthed by Professor Alfonso Caso leader of expedition in Mexico. This unusual specimen is adorned with carved sea shells in the eye sockets, a piece of flint in the nose cavity and the whole finished off with turquois.

# What New York Is Wearing

BY ANNEBELLE WORTHINGTON

*Illustrated Dressmaking Lesson Furnished With Every Pattern*

For little daughter of school age, why not this darling coat-like dress?

You can carry it out so charmingly in sheer woolen, now so modish. For the darling pleated collar, you could use pique, linen or self-fabric in a contrasting color.

The original dress used brown wool crepe. The collar was almond green wool crepe. The wide brown belt was shiny patent leather.

Spanish tile wool jersey with brown linen collar and brown suede belt is cunning.

A dark green tweed-like woolen with vivid yellow pique collar is another scheme you'll like.

Style No. 3465 is designed in sizes 6, 8, 10 and 12 years.

Size 8 requires 1¾ yards 54-inch material and ⅜ yard 35-inch contrasting material.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto

### THE LOVE TREE

Love is like a tree—vegetating of itself, striking deep roots through all our being, and often continuing to grow greenly over a heart in ruins. And, inexplicable as it is, the blinder is this passion the more it is tenacious. It is never more firmly seated than when it is without a shadow of reason.—Victor Hugo.

# Sunday School Lesson

**February 14. Lesson BII—Jesus and the Man Born Blind—John 9. 1-11; 30-38. Golden Text—I am the light of the world: he that followeth me shall not walk in the darkness, but shall have the light of life.—John 8: 12.**

ANALYSIS.

I. THE BLIND MAN CURED, John 9: 1-7.

II. "I WON'T BELIEVE, John 9: 8-34.

III. WITH CHRIST, OR AGAINST HIM, John 9: 35-41.

INTRODUCTION—Chapters 7 and 8 show the gradual hardening of the Jewish hearts against Jesus. Many of his own disciples no longer walked with him. The shadow of the approaching crisis was already darkening his way. He knew that the end could not be far off. The "man born blind" is a type of the Jews who received Jesus. The Pharisees in the story represent the prejudiced stubbornness of those whose hearts were hardened by Jesus' life and teaching.

I. THE BLIND MAN CURED, John 9: 1-7.

It is probable that the blind man was at the entrance to the Temple. On the Sabbath, however, he would neither be begging nor receiving alms. The rapidity with which the news of his cure spread suggests some religious festival—perhaps the Feast of Dedication, 10: 22. The "disciples" (9:2) may have been the Judean group, and not the Galilean. Would fishermen be interested in the theological question?

The question which they are made to ask in the story indicates the two main views which the people of John's time in Ephesus held regarding trouble. The Jewish view—as old as Job's comforters—was that trouble is the punishment for the sin a man commits—or the sin which his parents commit.

The Greek view was that in some previous state of existence a man did something wrong for which he is made t pay in his next incarnation. "Who sinned, this man, or his parents, that he was born blind? v. 2. So strong were the old legalistic tendencies of the disciples, that the sight of suffering aroused, not the impulse to help, but the desire to discuss.

Jesus' answer (v. 3) did not mean that sin does not bring suffering—for it does. He did mean, however, to discourage the tendency—still among us—to think uncharitably of suffering as punishment. Let a non-churchgoer, say, be killed in a motor accident on a Sunday and some one will be sure to say, "God's judgment!" We are not in a position to say. Our duty in such a situation is made clear by Jesus' reply to his speculating disciples, v. 3. We are to ask, not—"Why do such things happen?" but "What can I do to help?" So will the works of God be made manifest.

The elaborate process of wetting the clay—sealing the man's eyes, sending him to the Pool of Siloam, is symbolism. The clay symbolizes the act of creation, Gen. 2: 7. The Christian, the man whose eyes Christ has opened, is a new creation. Sealing the eyes means that our spiritual blindness must be brought home to us. Siloam means "sent." John saw in the name a reference to Jesus Christ, "sent" by God. The command to "wash" is part of the sacramental tendency of this Gospel. Only after the rite of baptism does the believer enter fully into the new life.

II. "I WON'T BELIEVE, John 9: 8-34.

The story begins with the healing of physical blindness, but it soon shifts to the Jews who, in spite of the conclusive evidence, remain stubbornly unbelieving. They fastened upon the work involved in wetting the clay on the Sabbath, and made it the basis of the charge against Jesus, v. 16. "A good man would not break the Sabbath," said some. "A bad man could not work a miracle," retorted another. So the controversy went on.

Failing in their purpose, the Jews degenerated into abuse, v. 34. They hated Jesus. Therefore they would neither see nor admit any good in him. What about our attitude toward the deeds of people whom we dislike?

III. WITH CHRIST, OR AGAINST HIM, John 9: 35-41.

Resourceful and bold as this man proved to be, he could not but have felt keenly his excommunication. His hope of employment would now be gone. He would be shunned as the outcast he was. One could imagine him moodily wishing that he had been left as he was, where he could at least have had society provide him his living. But, meeting Jesus, who, hearing of his punishment was probably looking for him, he found a friendship which more than compensated for any loss which his loyalty may have caused him. To him as to many another, beset by life's misfortunes, Christ became "all and in all."

Jesus, summing up the meaning of the "sign," declares that his coming into the world is like a judgment. It brings out the characters of men, v. 39. No one ever comes in contact with him without being compelled to side with him or against him. The choice he makes determines his destiny.

"Where did you find your wonderful follow-up system? It would get money out of anybody."

"I simply compiled and adapted the letters my son sent me from college."

"No new age ever starts from scratch. Each era makes its particular contribution to the future."—Raymond B. Fosdick.

# Sounds of Night in the Jungle

It was early spring in the tropics. The final period of pipe and fiddle had not yet arrived, so that there was no hum from the underworld. The flow of sap and the spread of petals were no less silent than the myriad creatures which, I knew, slumbered or hunted on every side. It was as if I had slipped back one dimension in space and walked in a shadow world. But these shadows were not all colorless. Although the light was strained almost barren by the moon mountains, yet the glow from the distant lava and craters still kept something of color, and the green of the leaves, great and small, showed as a rich dark olive. The afternoon's rain had left each one filmed with clear water, and this struck back the light as polished silver. There was no tempered illumination. The trail ahead was either black or a solid sheet of light. Here and there in the jungle on each side, where a tree had fallen, or a flue of clear space led moonwards, the effect was of cold electric light seen through trees in city parks. When such a shaft struck down upon us it surpassed simile. I have seen old paintings in Belgian cathedrals of celestial light which now seem less imaginary.

At last the silence was broken, and like the first breath of the trade-wind which clouds the Mazaruni surface, the mirror of silence was never quite clean again — or so it seemed. My Northern mind, stored with sounds of memory, never instinctively accepted a new voice of the jungle for what it was. Each had to go through a reference clearing house of sorts. Any strange wail or scream striking suddenly upon my ear instantly crystallized some vision of the past—some circumstance or adventure fraught with similar sound. Then, appreciably as a second thought, came the keen concentration of every sense to identify this new sound, to hear it again, to fix it in mind with its character and meaning. Perhaps at some distant place and time, in utterly incongruous surroundings, it may in turn flash into consciousness — a memory-simile stimulated by some sound of the future.

I stood in a patch of moonlight listening to the baying of a hound, or so I thought; that musical ululation which links man's companion wolfwards. I turned to the Indian at my elbow, full of hopeful expectation. With his quiet smile he whispered, "Kunama," and I knew that I had a frog of size and voice well in keep-heard the giant tree frog of Guiana—ing with these mighty jungles. I could imagine the great goggle-eyed fellow sprawled high near the roof of the jungle, clutching the leaves with its vacuum-cupped toes. The moonlight would make him ghostly—a pastel frog; but in the day he flaunted splashes of azure and green on his scarlet body.

At a turn in the trail we squatted and waited for what the jungle might send of sight or sound. And in whispers Nupee told me of the big frog kunama and its ways. It never came to the ground, or even descended part way down the trees; and by some unknown method of distillation it made little pools of its own in deep hollows and there lived.—William Beebe, in "Jungle Peace."

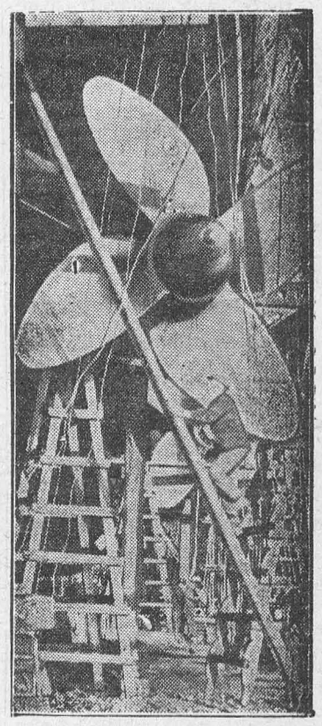
### ELOQUENCE OF WORDS

By words we have it in our power to make such combinations as we cannot possibly do otherwise; by this power of combing we are able, by the addition of well-chosen circumstances, to give a new life and force to the simple object; in painting we may represent any fine figure we please; but we can never give it those enlivening touches which it may receive from words. To represent an angel in a picture, you can only draw a beautiful young man winged; but what painting can furnish anything so grand as the addition of one word, "The angel of the Lord?"—Burke.

### GROWING IN DARKNESS

Kind hearts are gardens,
Kind thoughts are roots,
Kind words are blossoms,
Kind deeds are fruits;
Love is the sunshine
That warms into life,
For only in darkness
Grow hatred and strife.

## Getting Ready



Here is the Aquitania at the Southampton floating dock, undergoing a thorough grooming in preparation for her next busy season. The propellers each weigh 15 tons.

MUTT AND JEFF— By BUD FISHER

T'was a Dark and Stormy Night—!

# LOCAL AND GENERAL

Rev. Mr. Wright has many friends in Morrisburg, who join in wishing him success and happiness.

• • •

Mr. F.E. Lavis of Montreal spent the week-end with his mother, Mrs. M.E. Lavis.

• • •

Hon. George H. Challies, Provincial Secretary, spent the week-end with Mr. and Mrs. James G. Challies, in Morrisburg.

• • •

The Junior Members of the Catholic Women's League will hold an entertainment in St. Mary's Hall on Thursday March 17th.

• • •

Born—At Hepburn Hospital, Ogdenburg, N.Y., on Wednesday Feb. 3, 1932, to Mr. and Mrs. Alton L. Newvine (nee Alberta Reddick), a son—Alton Charles William.

• • •

The next hockey match to be played in Morrisburg will be on Friday evening next, Feb. 19th, when Cardinal and Maroons will battle in the local arena. Reserve your seats early.

• • •

On Friday evening, there passed away at the home of his son in Inkerman, Samuel LaPorte, aged 76 years. The funeral was held on Sunday afternoon.

• • •

The Women's Institute will hold a Valentine Tea and Food Sale in the Public Library on Saturday afternoon, Feb. 13th. bc

• • •

It is now reported that the Prince of Wales will again visit Canada during the coming summer, and may open the Imperial Economic Conference that assembles at Ottawa July 18th next.

• • •

Mountain Township Council passed a by-law Friday prohibiting the cutting of ice in that district either for domestic or commercial use, and no ice may be stored without a permit being secured from the township Board of Health.

• • •

For the seventh consecutive year, The Leader has been awarded the contract for printing the Counties' Council Minutes. This contract is awarded after submitting tenders to all the printers in the United Counties.

• • •

LOOK!! On Thursday Feb. 18th, at 8.15 p.m., the Ladies' Aid Society of the United Church, Morrisburg, will present the play, "Kitchen Sinkfunny Orchestra," under the direction of Mde. Kitchenette, "Piney Sutherland," of Winchester. Admission 35c. ac

• • •

Mr. G.B. Cousins, formerly of Pine Grove cheese factory, who recently moved to Mountain, Ont., to take charge of the Vancamp cheese factory there, was suddenly overcome with blindness, and is now a patient in the Civic Hospital, at Ottawa.

• • •

On Sunday last, at the home of her daughter, Mrs. Alfred McMahon, there passed away, Mrs. Eliza A. Russell, of the Colquhoun Settlement, at the age of 72 years. The funeral service was held at the Colquhoun United Church, on Tuesday, being conducted by Rev. Mr. Russell, of Williamsburg.

• • •

Mr. Robt. Earl, who for many years lived east of Morewood, and was well known in this vicinity, passed away recently at his late home in New Westminster, B.C., where he resided with his eldest daughter.

• • •

There passed away in Peterboro on Monday Feb. 1st, Mr. Wellington Shaver, only son of the late Mr. and Mrs. Alva J. Shaver, in his 73rd year. He was predeceased by his sister, the late Mrs. Chas. Gilson, of Brinston, two years ago.

• • •

When Edward Brown, said to belong to Syracuse, N.Y., appeared in Cornwall police court on a charge of illegal possession of liquor laid in connection with the seizure, near Iroquois, of the truck which he was driving, in which 1,000 bottles of Quebec beer were being carried, he was fined $200. and costs and the truck, with its contents, ordered confiscated.

• • •

James Kirkwood, captain of the Pyke Salvage Company's barge Geo. T Davie, in drydock at Cornwall, died in the Cornwall General Hospital Friday night. Captain Kirkwood was alone in his cabin aboard the barge Wednesday afternoon, when he suddenly became ill. He summoned aid by rapping upon the cabin window, and was rushed to the hospital. The remains were taken to Kingston on Saturday for interment.

• • •

Cattle breeders in this section of the province, from which a large number of cattle are exported annually to the state of New York, are interested in a proposed order by the Department of Agriculture and Markets of that state under which an embargo would be placed upon cattle which have not passed the test for Bang's disease or which do not come from herds certified as free of it. It is felt that enforcement of the proposed order, which is to be considered at Albany, Feb. 16, will affect cattle shipments from Eastern Ontario and force breeders to subject their herds to a test for Bang's disease if they wish to participate in the trade. The proposed order does not apply to cattle for immediate slaughter, steers and beef cattle, or to purebred cattle temporarily exported for exhibition purposes.

The hockey match between Spencerville and Morrisburg, scheduled to take place on Friday evening, Feb. 12th, in the local arena, has been postponed until Saturday, Feb. 13th, at 8.15 p.m.

• • •

After a successful six weeks' course in the Toronto Marine School, Mr. Tom Connor returned to town this week, with Master's and Coaching Mate's Certificates. These qualifications entitle Mr. Connor to assume marine duties as far as the West Indies. For the past three years, Mr. Connor has been engaged on the steamer "Soulte", plying between the Gulf of St. Lawrence and the head of the Great Lakes. Mr. Keith Cole, another Morrisburger, was also successful in his course in Toronto, returning recently with Mate's certificate.

• • •

The February meeting of the W.M.S. of the United Church, held in the ladies' class room on Feb. 12, was well attended, considering the inclement weather. After the reading of the minutes, Mrs. W. Merrill brought before the members a petition dealing with the Temperance Question, to be submitted to the government. All were in favor of having this document signed at an early date. The devotional leaflet, "Matthew, the Man of Busines," was given by Mrs. J. Challies in an interesting manner. Short items of interest were given by the heralds, Mrs. Timmins, representing India; Mrs. Ritchie, Trinidad, and Mrs. Marshall, China. The fifth chapter of the study book on Korea, "New Schools" was fully dealt with by Mrs. McLean. A musical selection by two members of the Mission Band, Misses Mattice and Duvall, accompanied by Mary Blancher, was enjoyed by all.

## JUNIOR HOCKEY

**MORRISBURG 2; CARDINAL 0**

Morrisburg Juniors working under Coach Merve Duval succeeded in defeating Cardinal Juniors in a St. Lawrence Junior League fixture, at Cardinal on Monday night, by a score of 2-0. The teams were very evenly matched, but owing to the good work of Jack Robertson and his "rabbit foot" in goal, were unable to score.

In the first period the play started off rather tame, but gradually warmed up as time went on, neither team being able to score, although the play was from end to end, and the goalies had several hard and close shots. The Juniors are showing the spirit which is bound to win, that of passing the puck, time after time the forwards of each team would go up abreast, passing from one to the other. Morrisburg followed the play into the enemy's territory more than at any other game they have played so far this year. Hermie Smith, who was off for a few games with an injured wrist, was back again on the line, his presence strengthening the team considerably. Frank Smith, sub forward, on a back-hand shot from right wing, put Morrisburg in the lead in the second period, which edge the boys were able to hold, the period ending 1-0 for Morrisburg. In the final period, Geo. Smith worked his way to the Cardinal end for a shot which put the locals 2 up. Cardinal now grew desperate to even up, or at least stave off a shutout, but failed to do so, when the final gong sounded the score stood 2-0 for Morrisburg.

The game was well handled by Gord. Smith of Morrisburg, and Cameron, of Cardinal.

The line-up:

Cardinal—Perry, goal; Leeder and Galbraith, defense; Lampson, Mathieu and Kavanaugh, forwards; subs, Browning, Sanders, Dungan and Marlott.

Morrisburg — Robertson, goal; Merkley and Clark, defense; George Smith, H. Smith and Weegar, forwards; subs, Hutt, Snyder, Gamble and F. Smith.

**CARDINAL 2; MORRISBURG 2**

The Morrisburg and Cardinal Juniors battled for 70 minutes to a draw game at the local Arena on Wednesday night, before a small crowd. The checking was close, but both teams missed many good chances to score by not playing their positions.

In the first period, the play was about equal, neither team being able to score. Shortly after the opening of the second period, Hermie Smith put the locals one to good, but before the period was up Cardinal secured a goal, making the score 1 all. Cardinal got another, which gave them the lead 2-1. In the final period, the score was evened up by Geo. Smith, which score neither team was able to break. Ten minutes overtime was played, which ended in the score remaining the same. Both teams worked hard to break the tie, but with not result.

Morrisburg Juniors go to Prescott Saturday night to play the Prescott Juniors. The winner of this game will practically decide who will go into the play-off with Iroquois, leaders of the St. Lawrence Junior League.

On Monday night at the local arena, Iroquois Juniors, leaders of the League, will play the last game of the schedule. The locals are very anxious to win this game, as it will help greatly to put them in second place, which entitles them to play off with the first place team.

Don't fail to attend the last Junior game of the schedule on Monday night, when the leaders of the League, who haven't been beaten this year, will meet the Locals. Game called at 8.15 p.m.

**STANDING OF THE TEAMS**

| | Points | To Play |
|---|---|---|
| Iroquois | 13 | 1 |
| Prescott Juniors | 6 | 2 |
| Morrisburg | 5 | 2 |
| Red Indians | 4 | 2 |
| Cardinal | 4 | 1 |

## WILL ST. LAWRENCE LEAGUE SURVIVE?

This is a question often asked by the promoters of hockey, to which, in our opinion, no intelligent reply can be given, except by the boys engaged in delivering the goods.

Considering the question from the most vital of all angles, that of financing the enterprise, it would seem probable that the Executives in charge will meet with a deficit at the close of the season, judging from the ever-decreasing attendance at the games.

Morrisburg is fortunate in this respect, having probably the largest following of any team in the league. However, comments from the leading supporters of the league indicate that a deficit, if it does come, will be due to the fact that the brand of hockey is not in keeping with the cost of producing it.

There was a time when a team attracting an attendance of 125 supporters to cheer the player who hoisted the puck from one end of the rink to the other, elicited the inspiring "tap on the shoulder". The same glory came to the open-field lacrosse player, who took an "over-head" throw to the opposite goal, or in the open field, while spectators, awaiting the return of the ball, filled their pipes and discussed the merits of the creditable play, or player. As everyone knows, this performance in the lacrosse field slowly, but surely, dug itself under, never to return, and today the game known as box lacrosse has developed into a much faster and more scientific game.

One of the leading league supporters, having made a survey of the possibilities of success in the St Lawrence Hockey League, states that the attendance will continue to dwindle so long as the present tactics of hoisting the puck from one end of the rink to the other is adhered to by the team having the leading score in the game. No sportsman, he says, can afford to conceal his skill, or kill time, when he is measuring up with an opponent, no matter how scientific or clever player he may be, and arouse any enthusiasm among his supporters. This is surely having its effect on the attendance.

Another outstanding draw-back is the fighting spirit of a number of the players, who, at the least provocation, drop their sticks and pile into their opponents with the fist: some of these boys have surely missed their calling, and boxing, as we all know, is a very unpopular sport in Morrisburg, judging from the very small attendance at a recently widely advertised boxing bout.

The future of Hockey is in the hands of the best sportsmen in each community, and its success depends largely on the loyalty and performance of the players.

## MR. G. D. HOWITH WITHDRAWS FROM MANAGEMENT OF MORRISBURG MAROONS

Owing to heavy pressure of business at his offices in Ottawa, and dock negotiations here, as well as other enterprises which now command all his time, Mr. George D. Howith has had to withdraw from the coaching and managing of the players representing Morrisburg in the St. Lawrence League.

The players did very well under his guidance, to place the club in third position of the League, with three-quarters of the season completed. It is gratifying that the team has managed to be the leading scorer in the league, by having thirty-three goals scored in favour, with only fourteen goals scored against it.

Although not associated with the club in the managerial capacity in the future, Mr. Howith can be called upon at any time for his valuable advice and assistance at all times, where his time will permit it."

## MR. GEO. E. McINTOSH

On Thursday afternoon, Feb. 11th, interment took place in Fairview Cemetery, Morrisburg, of the remains of hte late Mr. Geo. E. McIntosh, whose death occurred at the home of his daughter, Mrs. P.C. Snyder, at Howell, Michigan.

The late George E. McIntosh was born at Dundela, March 4th, 1847. He was a life-long Methodist, and in politics an ardent Liberal. Until 1915 he and his wife resided at Morrisburg, then moved to Hoquiam Wash., where four sons resided. Mrs. McIntosh passed away in 1927. Miss Gertie McIntosh, a former teacher at Vancamps, also predeceased her father, having passed away in 1895. Four brothers, Edwin, George W., H. Wilfrid and Kenneth, reside in Washington State. Two daughters, Mrs. P.C. Snyder, at Howell, Mich., and Mrs. W.J. Cass, of Winchester, and a son, Mr. H.W. McIntosh, principal of Ryerson School, Toronto, are the surviving children.

11.40—Sunday School and Adult Classes.

7 P.M.—Address, "John Wycliffe, The Bringer of the Bright Light of the Bible to Britain."

## PRESENTATION

A very pleasant event took place when a large number of friends gathered at the home of Mr. and Mrs. Alfred Shaver, Rowena, on Friday evening, Feb. 5tth, to bid farewell to Miss Marion Shaver, who is leaving for Toronto, where she has accepted a position as stenographer. Miss Olive Carter presented a beautiful ivory manicure roll, and the following address was read by Mr. Harold Miller:

Dear Marion:

It is with mingled feelings of pleasure and regret that we, your friends and neighbours, have assembled here tonight to spend one more social evening with you; to wish you "good luck" in your new adventure, and to record our feelings of loss at your leaving us. Marion, we rejoice with you in your good fortune in securing one of those coveted positions, and we feel you deserve the best. We shall miss you, your pleasing personality, your ever smiling face and your ready answer, "I'll try," when called upon to help us in any phase of our church work. We shall miss you, as one of the divinely group of young people of our community. Our best wishes follow you to the city, where you are to follow your chosen work. We wish you success in your undertakings and hope that nothing but good fortune will come your way.

We ask you to accept this gift, not for its intrinsic value, but as a slight token of love and remembrance of your friends in your old home town, Rowena.

Miss Shaver acknowledged in a very pleasing manner. "For She's A Jolly Good Lassie" resounded throughout the home. The evening was spent in games and singing.

A dainty lunch was served, after which the company dispersed, all wishing Miss Shaver "bon voyage" and success.
