Our Column

Owing to an unusual demand on our space this week we were forced to leave out several small advts., as well as some good news items.

"Eat less and chew more; ride less and walk more; wear less and bathe more; work less and play more; talk less and think more; go less and sleep more; waste less and give more; scold less and laught more; preach less and practice more, and you will be better fathers, husbands and business men," was the advice offered by Arthur Bagley at a luncheon in the Royal York Hotel, Toronto, last week

The annual meeting of the Bible Society will be held in the various churches Winchester, Sunday, Nov. 23rd. Rev. Mr. Miller a Missionary from Korea, will speak in the Presbyterian Church at 10.30 in the morning and in the United Church at 7.30 in the evening, also Rev. F. Crawford will address the Baptist congregation in the morning and the Wesleyan congregation in the evening. The collectors will do their work the following week.

Being Charitable

During the past few weeks many strangere have passed through here, and a good many of them of the "down and out" kind. They call at private homes asking for meals or assistance. Often the lady of the house is alone, and she is afraid to ask the stranger to come inside, and sometimes she is compelled to send him away empty handed. It would mean a hard heart that would turn a hungry man from the door without an offer of food. But one cannot blame a woman for not entertaining these strangers. The only thing to do is to tell them to hunt up the town constable who will attend to them. If they are really hungry they won't refuse to apply to the proper authority.

Halloween Fatality

The great danger of young men overstepping the mark, and making themselves liable to serious offenses on Hallowe'en nights, when their sense of fun is not tempered by good judgment is again illustrated in the case of a young man near Kingston, who is held on the charge of murder. During a raid on a neighbor, stones were thrown, and one thrown by Lorne Rogers, 21 years, hit a man on the head with a stone, and he died as the result. The young man is now up on a charge of murder. It is only a couple of years ago that a young man's life was sacrificed at Mountain Station because of a Halloween prank, and even here in Winchester serious offenses have been committed that had to be settled in court. Its all right to have fun, but don't become law breakers.

MILLINERY-- Just arrived some smart felts selling for $1.50 Misses Irving & Quart.

Golden Anniversary

Mr. and Mrs. Edward Scott of Mountain celebrated the golden anniversary of their wedding on Saturday, Nov. 8th, when friends and relatives gathered to offer congratulations. Among those present were: Mr. and Mrs. M. Tucker of Belleville; Mr. and Mrs. M. Thorpe of Brinstons; a daughter, Edith, and husband, S. R. Hyndman, of Ottawa; Mr. and Mrs Ernest Scott of Heckston; Mr. and Mrs. Byron Scott of Almonte. and Rev. A. O and Mrs Lloyd of South Mountain. Six grandchildren were there to greet Mr. and Mrs. Scott, as well as bridesmaid and groomsman of fifty years ago, Mr. and Mrs. M. Tucker, who themselves had been married 49 years. Many beautiful gifts were received by Mr. and Mrs. Scott and an address was presented by friends in the village of Mountain.

The concert announced for Friday Evening of this week in Knox Presbyterian Church, Winchester Springs, has been postponed, and will be held on Thursday Evening, Nov. 27 at 8 o'clock. Program furnished by Chesterville and Winchester Presbyterian Churches. Admission 35c and 25c

W. M. S.

Twenty-seven members and two visitors were present at the meeting of the Women's Missionary Society of the United Church held in the Sunday School Rooms on Thursday 13th instant

The President, Mrs. Keyes before reading the 33rd Psalm expressed her thanks to the Vice Presidents for carrying on during her absence.

The minutes of October meeting were read and reports of different secretaries received. Mrs. J. W. Ault and Mrs J. A. Mc Dongal were appointed a nominating committee to nominate officers for year 1931. Interesting Missionary items were given from Japan, Korea, India and All People's Mission, Windsor. Mrs. N. W Beach took charge of program. "We've a story to tell to the Nation" was sung and after a responsive reading Mrs. W. J. Cass gave a delightful vocal solo entitled "Thy brother calls to thee." The 2nd chapt of Study Book was ably dealt with by Mesdames Beach, Keyes, Shaver and Cass.

SHIP ANYWHERE—SAMPLE PACKAGE Four kinds leaf tobacco, 4 lbs. for $1.60; 10 lbs. for $2 50: 20 lbs. for $4.50; 40 lbs. for $8.40 Pure Quesnel $1 25 lb. or 3 lbs. for $3 00 Specify if mild or strong wanted. Address G. Dobois, 18 Henderson Ave, Ottawa.

Please Settle!

The Press has a hundred or more accounts running from 50c to $1.00 for advts. sent by mail or phoned in. Some are a year old, some older, some only a few months or weeks. It costs about 10c each time we send out an account. This 10c we add to the account after the first month. The advts. referred to are such as "For Sale, Card of Thanks, Lost, Found, etc." We ask that if you are concerned that you be kind enough to have this account settled as early as possible.

LOCAL AND GENERAL

One of the oldest and most highly respected citizens of Morrisburg passed away at his home on Tuesday, Nov. 11th, after a brief illness, in the person of Mr. Jas. J. Gillespie, aged 89 years.

Mr. Nelson Bowman, in his 71st year, died suddenly at his home in Morrisburg last Friday, Nov. 14th Deceased was born on January 28th, 1859, in the Township of Williamsburg, a son of the late Mr. and Mrs. Chas. Bowman. His entire life-time was spent in the Township of Williamsburg and the Village of Morrisburg, with the exception of three years spent in Chesterville.

To-Morrow—Nominations

The nomination of persons to fill the positions of Reeve Councillors and public school trustees will be held in the Town Hall to-morrow (Friday) night, between 7 and 8 o'clock. At present there does not seem to be much stir in municipal matters, but to morrow night may bring some surprises.

High School Commencement

In connection with the High School Commencement and exercises this year there will be an entertainment of much merit, and deserving the patronage of all our citizens. Besides the distribution of prizes and deplomas there will be many exercises of Gymnastic display, club-swinging etc and besides a most interest-play entitled "Spreading the News" by Lady Gregory. There will be instrumental and vocal selections and the evening promises to be one of the most entertaining ever put on by the H. S. Staff and Students. It being St Andrew's night there will be numbers in keeping with the night. Don't forget the date. Friday, Nov. 28th. in Lannins Hall, commencing at 8 o'clock. Tickets 35c and 25c.

Celebrates 90th Birthday

Such was the privilege yesterday of Mr Dawson Beattie at the home of his daughter, Mrs. Earle, who entertained in his honor at the dinner hour, the guests from out of town being Mr. and Mrs. A. B. McConnell of Morewood, and Mr. and Mrs. Geo. Beattie and daughter Ruth, of Cornwall. Many messages of congratulations were received from friends far and near.

Mrs. William Porteous

Margaret Campbell, wife of William Porteous of Kenmore, died at her home there Friday after an illness of about two months' duration. She was in her 71st year.

Mrs. Porteous was born at Kenmore, daughter of the late Mr. and Mrs. Robert Campbell, and had lived all her life in the Ottawa district. She was a member of the United Church and her passing will be mourned by many friends in the community. Surviving, besides her husband, are three sons, Robert Porteous, Toronto; James and Charles Porteous, Kenmore; two daughters, Mrs. Albert Mullin, Kenmore; and Miss Nettie Porteous at home; two brothers, Peter and Robert Campbell, Vernon, and one sister, Mrs W. Eastman of Vernon.

Late David Kinkaid

David Kinkaid, father of Mr. Lorne Kinkaid of Winchester, for many years a farmer in the Russell district, died last Thursday at the Ottawa Hospital after about two months' illness. Mr. Kinkaid was well known, both in his own home and in Ottawa. He was 73 years of age.

Born near Russell, Mr Kinkaid had a farm south of the village, which he operated until about 10 years ago. At that time he gave up active work and took up residence in Russell. He was a member of the United Church.

Surviving are his wife, formerly Martha Colborne; two sons, Lorne of Winchester, and Walter of Russell; two daughters, Mrs. H. C. Robinson of Winchester, and Mrs. Ray Dillabough of Russell and one sister, Mrs. Bowers, of Ottawa. The funeral was held Friday from his home at Russell to Russell United Church. Interment was made in North Russell cemetery.

Winchester Receives $5,000 of Unemployment Fund

Through the efforts of the Municipal Council, assisted by the member of the Ontario Legislature, Mr. Geo. Challies, Winchester has been granted aid to the extent of $5,000 to take care of the unemployment situation in this town during the coming winter. An effort was made to secure a sum sufficiently large to warrant the Council in starting on a system of water and sewerage, but so great and urgent are the demands on the government for assistance that only $5000 could be allotted to Winchester. To this the Corporation are bound to add another $5,000, making $10,000 in all that will be expended in public improvements in Winchester during the next six months. Just what work will be undertaken as a whole has not yet been determined, but there are several schemes, any of which will be of great value to Winchester. The Council will not definitely decide on any before next week, as they are awaiting certain developments.

"East Lynne"

Who has not read that charming story? Well, you will see it in real life, produced by the talented young people of Heckston in the Town Hall, on Tuesday night, Nov. 25th. No doubt the best amateur play ever given in Winchester. One that will give you pleasure from beginning to end. Read the Cast of Characters in this five-act Play, under direction of Mrs F. Singleton.

Sir Francis Levison, a gentlemanly villian—Mr. C. Singleton.

Archibald Carlyle, Leading man—Rev. H. Servage.

Lord Mount Severn, first old man—Mr. F. Singleton.

Justice Hare, second old man—Mr. T. Taylor.

Mr. Dill, second low comedy—Mr. C. Whaley.

Officer, Utility Man—Mr. F. Evans.

Little Willie, a small child's part—Master R. Taylor.

Lady Isabel, Madame Vine, dual Role, Leading Lady—Mrs. E. McKendry.

Barbara Hare, Juvenile Lady—Mrs. W. Bennett

Richard Hare, The Suspected Murderer—Mr. W. Bennett

Miss Carlyle, Eccentric Character Part—Mrs. J. Hyndman.

Joyce, Utility—Mrs. H. Servage.

Wilson, Utility—Miss A. Graham.

Admission only 35 cents, Children 25c. Play starts at 8 o'clock sharp.

SOCIAL AND PERSONAL

Mrs. Annie Hughes is visiting her sisters in Brockville this week.

Mr. and Mrs. T. D. Hamilton and Earl, spent Sunday with Mr. and Mrs. Arnold Docksteader.

Mrs. D. Campbell and daughter, of Finch, had been week-end guests of Mr. and Mrs. Wm. Dickson.

Mr. and Mrs. R. H. Timmins of Toronto, were guests of the former's mother, Mrs. Rachel Timmins on Sunday.

Mr. and Mrs. Harold Droppo of Bethune, spent Sunday here with the latter's parents, Mr. and Mrs. Earle.

Mrs. Hubert Merkley and moter, Mrs. Reveler, spent Monday of last week with their cousin, Mrs. Arnold Docksteader.

Mr. and Mrs. James Hughes and daughter, Lila, of Cloverdale, had tea with Mr. and Mrs. Arnold Docksteader on Friday.

Mrs. G. D. Preston and children, have returned to their home in Toronto, after spending three weeks with the former's parents here.

Mrs. Stata of Boston, and Miss Roberta Reveler spent Monday evening with Mr. and Mrs. Arnold Docksteader, leaving Tuesday morning for Roceester, N. Y.

Mr. and Mrs. Wm. N. Clark of Durham, left Monday for home having spent the summer in New Brunswick and with the latter's parents, Mr. and Mrs. J. W. Coons.

Messrs. Stewart Corry and William Lawmaster, of Watertown, N. Y., spent Sunday at the home of the latter's parents, Mr. and Mrs. John Corry of Inkerman.

Mr. and Mrs. Milburn Strader and daughter Ruth, and Mrs. W Strader of Williamsburg, Mr. and Mrs. Ross Hanson of Matilda, were the guests of Mr. and Mrs. A. A Casselman on Wednesday

Mrs. Malcolm Beaton, Westmount, Que., accompanied by her daughter, Mrs. Lewis V. Lingley, Saint John, New Brunswick have returned home after spending a few days the guest of Mrs. B. McConkey.

Mrs. Merkley and sister, Miss Roberta Reveler of Rochester, N. Y., who have been here for past few weeks lett for their home in Rochester, on Tuesday last. Mrs. Reveler will accompany her daughter to Rochester.

C. E. Sarney, until recently manager of the Kemptville Advance, a weekly news paper sold by Premier Ferguson, has purchased the Thamesville Herald, another weekly newspaper, of which he will be editor and proprietor.

Married on Saturday, Nov. 15, at Ottawa, by Rev. Cameron, Mildred Lorraine Meikle, R. N., daughter of Mr. Fred H. Meikle of Morrisburg. to Dr. Archibald Todd Shannette, son of Mrs. Mary Shannette, of Williamsburg.

Mr. and Mrs. G H. Summers have returned home from pleasant motor trip to Toronto, Parry Sound and Sundridge, having spent Thanksgiving holidays with their daughters. They were accompanied to Toronto with Mrs. Frank Hogoboam.

Mr. H. B. Fetterly, Supt. of the School for the Deaf at Belleville, Ont., and former Inspector of Public Schools for Dundas, was in Winchester on Sunday afternoon and Monday morning last, but did not see as many of his friends as would liked to have said Good-day to him. However those fleeling visits keep in touch the friendship that have been made and we trust Mr. Fetterly enjoys his visits to Winchester as much as Winchester enjoys seeing him again.

A very successful and well attended tae and money shower under the auspices of the Womens Guild of St. Matthias' Church (Anglican) was held at the home of Mrs. H. L. Lee, Cameron Ave., on Saturday, Nov. 15. from 4 to 6 p. m. A cheerful log fire burned in the fire place in the drawing-room which was decorated with shaded rose and bronze Mums. Mrs. T. O. VnnBridger, President of the Guild, assisted by Mrs. G. Oliver Davies wife of the Rector, and the hostess received the guests. Tea was served in the Dinning room which was softly illuminated with candle light. The tea table with its Irish lace cloth, was adorned with a silver vase of baby Mums in shades of rose and tall rose tapers in silver holders. The tea room was in charge of Mrs. D. H. Weir and presiding were Mrs. Oscar Pierce and Mrs. J. O Lewis, assisted by the Misses Vivian Lee and Jean Van Bridger. The door was opened by Miss Dorothy Weir, and the money donations were received by Mrs. Victor Desheneau and Mrs. Robt. Henderson. The Rector of the Parish, Mr. G. O. Davies, was present during the afternoon to greet the guests.

Mrs. Lee, the convener, and her committee, appreciate very much the generous response of their friends in Winchester who helped make the shower the splendid success that it was.

DEBATE "RADIO vs. MOVIES" Which gives the greater educational factor? Four first-class debators will help you decide this question at the United Church, Winchester Springs, on Friday evening, December 5th. Aiso a musical and literary program. Fuller announcement with debaters and judges next week.

Tyrrell—McGillis

Old St. Andrew's Church Toronto, beautiful with palms, ferns and Bronze Chyrsanthemums, was the scene of a wedding on Friday afternoon at 4.30 o'clock, November 7th, when Miss Queenie Marguerite McGillis, only daughter of Mrs. McGillis and the late John R. McGillis of Mountain, became the bride of Percival Newton Tyrrell of Toronto, son of Mr. and Mrs. E. N. Tyrrell. Miss McGillis was formerly Contralto Soloist of Old St Andrew's Church. The ceremony was conducted by Rev. J. R. P. Sclater. The wedding music from Beach was played by Richard Tattersall. During the signing of the register, Mrs. Hodgetts sang Gounod's "Ave Marie"

The bride who was given in marriage by her uncle W. W. Hay, looked lovely in a French Beige Chantilly lace gown with lace bolero and long circular skirt. She wore a large brown transparent velvet hat with touches of orange, brown kid slippers and amber beads. Her bouquet was Bronze Mums.

The bride was attended by her Matron of Honor, Mrs. Louis Nerlich. The best man was Gordon Tyrrell, brother of the groom, and the ushers were Guy Winter and J. Wesley Nelson.

Immediately after the ceremony the bride and groom left on a motor trip through New York State and the White Mountains. They will reside in Toronto.

LOCAL AND GENERAL

Married at Akron, Ohio, on November 13th, 1930, Mildred E. McFarlen, formerly of Ottawa, to Dr. T. D. Manson, of Columbus, Ohio

Patrick McKee, Inkerman, has a colt 6 mos. 16 days old that weighs 771 pounds which is probably the heaviest colt for its age in this County.

There will be a Celebration of Holy Communion at 8 a. m. next Sunday in St. Matthia's Church. Evensong at 7.30 p. m. Sunday School at 3 p. m.

On Monday, Nov. 17th, a very enjoyable evening was given by Mr. and Mrs. Frank Nesbitt in honor of their son, Thomrs Reginald's first birthday. Supper was served to fifteen guests.

Chicken Thieves

Chicken thieves have been busy in this district, and last Friday visited the farm of Alfred Casselman, Williamsburg, but were frightened away. Down near Cornwall many thefts of poultry are reported.

The Hunter Hero

Mr. B. L. Carr, who on his recent hunt as a member of the Morrisburg Club, which includes such well-known sportsmen as J. F. Gibson, C. Stubbs, George Bolton, Jas. Connell and A. M. Fader, was fortunate in shooting a big bull moose, became the hero of the hunting party and when on their return trip the big moose was on display with their six deer, the whole party became the centre of attraction and admiration, especially when they reached Buckingham, where they created somewhat of a sensation according to the Buckingham Post. The Post says:

"And Mr. Carr had to fight that battle over again for the benefit of every fresh comer. His good nature was unfailing. And again there is a reason: It isn't everyone, aye, not one in a thousand hunters, who has brought down the mighty monarch of the forest on the Lievre. And Mr. Carr carries his honors modestly. Of course, he didn't hear the running fire of comments on his prowress going on among the crowds of sightseers. "That's him, that big man over there, chewing the stub of a fat cigar.' 'I bet you he feels proud.' 'Wouldn't you like to be him?' 'Gosh!' It seems Mr, Carr was alone when he sighted the moose, and there was a cow along bigger than the moose. Mr. Carr's first shot took the moose between the horns and it didn't even phase the animal. Another shot hit the bull in the neck—a very vulnerable spot—with no other effect than to make the animal swing around and get behind the cow. Mr. Carr was in a fix, he couldn't kill the cow moose. He raised his cap and shouted to frighten the cow but the action and noise was wasted as neither beast moved. At last Mr. Carr got the chance he was anxiously waiting for and put six additional bullets into the bull which collapsed at last. Mr. Carr says he was an extraordinarily tough customer to bring down and the bull looks it. The Post thinks this is the banner year of the Morrisburg Club."

In Memoriam

In loving memory of Bessie Bluer Wright, who passed away on November 17th 1927,

There is a vacant chair in our home
And the voice we loved is still;
There is a vacant place in our hearts
That no one else can fill.

'Tis sweet to think we'll meet again
Where sorrow is no more,
And that the ones we parted with
Have just gone on before.

Sadly missed by Father, Mother and brother Gerald. 30p

In Memoriam

In loving memory of our dear father, Wm. Webb, who departed this life Nov. 22, 1927,

Even death has its wonderful mission
Though it robs us of those we love,
It draws us from our surroundings
To long for the meeting above.

Inserted by son George and family.

In Memoriam

In loving memory of our dear mother, Mrs. Thos. D. Nesbitt, who passed away November 23rd, 1927.

You left behind some aching hearts,
That loved you most sincere;
That never did or ever will
Forget "you mother dear."

Its not the tears at the moment shed
That tells how a heart is torn;
But the unseen tears of the afrer years
And the remembrances silently borne

Sadly missed by her Daughters

Startling Sensations Made At R-101 Investigation

Inspection Chief Says He Would Have Refused Airworthiness Certificate—Expert Says They Were Fouled, by Wires, Bolts and Nuts

London.—Inspection Chief F. McWade of the Cardington Airfield, testified recently before the court of inquiry into the R-101 disaster, that had he been asked he would not have given a certificate of airworthiness for its fatal flight to India.

This testimony and the introduction of two letters relating to holes in the bag of the big British dirigible which crashed in France, provided the greatest sensation yet brought out in the inquiry, which is attracting deep interest throughout Britain.

The letters were read by Sir John Simon, head of the court of inquiry. They were written by Col. Richmond, designer of the R-101, to McWade last Summer.

In each letter, Col. Richmond referred to holes in the dirigible's gas bag, which the designer insisted resulted in a "startling" loss of gas.

McWade said the gas bags were fouled by wires, nuts and bolts in thousands of places throughout the great ship. He testified this condition was "very serious and unsatisfactory," and declared had he been asked he would not have given a certificate that the R-101 was airworthy for a voyage to India.

McWade said he had recommended that the R-101 cease flying until the defects had been remedied.

The dirigible's crash in France on October 5 resulted in the death of Lord Thomson, Air Minister, and 47 other persons, including many of the best minds in aviation in the British Empire.

Junior World Mark Established By Boy In Parachute Jump

Charles Daly Jr. Drops 16,200 Feet and Drifts 15 Miles

Toronto—Charles Daly Jr., of Toronto, 18-year-old student of Humberside Collegiate, established a junior world's record for parachute jumping Monday afternoon, when he made a successful descent from an altitude of 16,200 feet from a Buhl plane piloted by Captain Earl Hand.

Amid the cheers of many hundreds of spectators at the Century Airport, he climbed into the machine at 3.3b p.m., and in a few minutes the machine disappeared from sight as it soared skyward. In vain did the watching and expectant throng look for his landing, although hundreds were still on the ground one and one-half hours later, when word came that the youth had landed safely in Scarboro' Township.

Turned Somersault

Speaking shortly after his descent, young Daly related that he had made a perfect landing, and was none the worse for his experience. "Something happened a few seconds after I had left the plane," he stated, "and as I pulled the cord, I seemed to turn a clean somersault." Just what took place he was at a loss to know, but he told of drifting eastward driven by a cold wind. He finally landed in a plowed field on the farm of Samuel Markham at Scarboro' Junction, some 15 miles from the airport.

There was no person there to greet him on his achievement, and young Daly, after loosening himself from the parachute attachments, strolled across a couple of fields to the homestead of J. C. Hunter, and related how he had come thereff

In his achievement Daly easily triumphed over a record of 13,000 feet which held only overnight, after wegner Lips had set it when he landed at Guelph on Sunday, after going up at Kitchener.

Daly, who made his first descent only last May, declared that he was now through with parachute-jumping. "My parents do not care for it," he stated, when asked for his reason. "If anyone cares to beat my record, they are welcome to do so." he added.

Canadian History Depicted In Royal Christmas Cards

A delicate compliment has been paid to Canada by the Prince of Wales in his choice of a Christmas greeting card, for it comprises a reproduction of the painting by Bernard Gribble of the full-rigged sailing ship of Henry Hudson, sailing the Atlantic in 1610, when he discovered what was afterwards called Hudson's Bay. Mounted on a dark blue card like embossed leather, the inside leaves carry a brief history of the foundation of the Hudson's Bay Company and the wish "Each chance and change that swift winged Time brings in Be for your greater good."

The King's Card, also a painting by Bernard Gribble, depicts "The Sailing of the Royal London from Deptford." Built by the Lord ayor, Alderman and Companies of the City of London in 1666 she was said by Pepys to be the "best ship in the world." The motto on the greeting page is "The Heavens give safety to your purposes." Her Built by the Lord Mayor, Aldermen and a garden scene, being a painting by Flora Pilkington entitled "The Fragrance of the Flowers," and in addition to an appropriate quotation by Alan Estmere it bears the motto "Fair days to you and may each glad tomorrow Bring Happiness to you." The coaching picture of the Duke and Duchess of York is entitled "The Good Old Days" and was painted by Gilbert Wright. It carries a quotation from Charles Dickens and the wish "A Merry Heart, a Merry Day, And many friends on Life's Highway." The card of Princess Mary is "A Garden of Sunshine," painted by Edith A. Andrews, and like all the others is typical of the magnificent art work.

Prince Receives Boyd and Connor

London — Capt. Errol Boyd and Lieut. Harry P. Connor, Canadian trans-Atlantic fliers, were received by the Prince of Wales at York House on Nov. 6th.

"The prince gave us a marvellous little time," Captain Boyd said. "We were with him talking probably for forty minutes. Mostly he discussed aviation. He seemed to know a great deal about flying. He mentioned the German DO-X and seemed very interested in the possibilities of future development along this line."

Northern Wild Flowers

Many varieties of wild flowers grow in great profusion throughout the treeless plains of Northern Canada.

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

A jaunty coat dress of dark green flecked tweed of lightweight texture that deserves a place of its own.

There isn't anything that quite compares with it for all-around daytime wear for Autumn.

It's just the thing for the football games, for the college miss for street and for travel.

The rever ending in a loose scarf at the opposite side is smart detail. The side-front buttoned skirt closing creates a slimming line. The low-placed plaited insets give a youthful swing to the hem.

Style No. 2779 is simplicity itself to make. It may be had in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Crepy woolens, canton crepe, flat crepe and velveteen are very smart for this model.

Size 16 requires 4⅞ yards 39-inch material.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Wales To Have New $4,250,000 Road

A new £850,000 ($4,250,000) road, which is being constructed between Penyclip and Penmaenbach, in Wales, will resemble, when finished, the famous Corniche on the French Riviera. The task before the engineers is the reconstructcion of a winding and dangerous road, and the work to be done includes blasting a 70-foot tunnel through solid rock and erecting a long, wide viaduct 40 feet below the present narrow winding way.

Owing to the magniture of the work the county council is to receive 85 per cent. of the total cost from the Road Fund.

It is interesting to note, following the recent articles in the Daily Mail (London), that this road is to have a tar macadam surface like that of the Scottish main roads, and it is expected that the consequent freedom from skidding will make it popular with motor tourists in North Wales.

Canal Record Is Lowered 3 Hours

St. Catharines — The package freighter Georgian, under the command of Captain D. Hudson, continued recently to make records on the Welland ship canal. The first steamer to pass through the new waterway when the northern division was unofficially opened for navigation at Port Weller, she was also the first boat to pass through the twin flight locks at Thorold, and now she has set a new record when she clipped four minutes from her own time, and negotiated the passage from Thorold to the end of the breakwater in Lake Ontario in three hours and six minutes.

Newly Crowned King of Abyssinia

View of Negus Ras Tafari, as he was crowned co-ruler of Abyssinia with Queen Menen in 1928, a scene which was repeated recently, on his coronation as sole Emperor of Ethopian Empire.

Astronomers to Watch Heavens To Determine Date of Meteor Showers

Washington.—Astronomers throughout the country, with the assistance of a large group of amateur observers, will soon be watching the night sky for shooting stars, hoping to learn whether we may expect a huge meteor shower in November, 1933 or 1934.

Such showers occurred in 1799, 1833 and 1866, when the sky was said to have been covered with shooting stars, or meteors, which looked like the innumerable ribs of a gigantic umbrella. Another was expected in 1899, but failed to materialize for reasons that had not been foreseen.

There may be, however, another brilliant display within the next few years. If so, the meteors should be more numerous than they have been for a long time. The nights of Nov. 14 and 15 are the dates for the display of meteors which astronomers and interested amateurs will count to determine the date of the shower of shooting stars.

Dependents of R-101 Dead Will Receive Compensation

London.—The British Government will pay compensation to the dependants of victims of the crash of the airship R-101 on Oct. 5, Frederick Montagu, Under-Secretary for Air, announced in the House of Commons recently.

The pensions will vary from $900 with a gratuity of $2,250, plus $120 annually on account of each child, to pensions of $5.50 weekly plus $1.25 weekly for each child. These apply to dependents of the airship's officers and men.

Civilian pensions will be paid varying from $500 to $1,500 with special children's allowance except for those already receiving pensions under the workmens compensation regulations. The latter awards where necessary will be made up by the Government to the scale paid civilians not so qualified.

The force pension is $900, while the civilian scale is about $285 annually.

Earthquake in Quebec Predicted in 50 Years

Montreal — Quebec province will probably be free of earthquakes for some 50 or 60 years at the end of which there is a possibility of another quake of less intensity than that of 1925, R. Meldrum Stewart, director of Dominion Observatory, said here at the recent annual meeting of the Royal Astronomical Society of Canada.

The director explained that statistics showed that Quebec had been the seat of an earthquake at somewhat regular intervals every 50 or 60 years since 1660. For this reason he thought structures and large works should be built to withstand moderate shocks. This could easily be done, he said, and would prevent future loss in property damage such as was occasioned in 1925.

DO-X Lands Safely On English Field

Great German Flying Boat Ends Second Hop of Ocean Flight

Calshot, Eng.—The DO-X set itself down here smoothly on Nov. 10th at the end of the second stretch of its transatlantic flight to New York. She carried 15 in her crew and 21 passengers.

The next hop will be Havre, whence the DO-X heads for Lisbon, then out across the ocean for the Azores and the United States.

Seaweed May Yield High-Grade Paper

One of the big problems of the day is to find new sources for the supply of paper. Most of it is made from wood, but we are using up the world's timber faster than nature can grow it for us.

From Russia comes news of a discovery which may revolutionize the paper-making industry. An engineer named Velijeff was struck some time ago with the idea that seaweed probably contained the essential substances for making paper. Now he has evolved a process which allows this to be done on a large scale at a remarkably low cost. A factory nearing completion in the neighborhood of great sea lakes in Sibera will, it is estimated, yield an annual seaweed crop of 100,000 tons.

By means of novel machinery, seaweed can be converted into paper in less than half an hour. Sixteen different kinds of paper, as well as cardboard and glue, have already been obtained from seaweed, and the chief waste product is a fireproof substance that can be manufactured into tiles.

156-Year-Old Turk Peers Into the Future

Zaro Agha, said to be 156 years old, learns from Princess Mahletka, New York city, Indian philosopher, what the future holds for him, while a group of girls from Roseland ballroom gather around to listen in.

Doctors Should Study People Who Have Not Become Sick

The next great advance in medical science, the distinguished British surgeon, Lord Moynihan, said recently, in an address at Guy's Hospital Medical School in London, should be the study of healthy individuals instead of sick ones; perhaps especially the study of individuals who are just about to get sick. When the average patient calls in a physician or goes to a hospital, Lord Moynihan said, the forces of Nature usually are fighting in the last ditch. The physician has only a forlorn hope to work on. What medical science now knows about fighting disease is comparable to what a military strategist would know of warfare if he were never sent for until the battle already was nearly lost; if he never commanded an army until it already was defeated and in full retreat. It ought to be possible, the British surgeon urged, to develop an entirely different type of medical science, dealing with normal people and with the fight against disease before the first engagement has gone in favor of the enemy instead of afterward. To create the detailed knowledge of normal and "near-normal" human beings necessary for such a science, Lord Monynihan advocated the establishment in medical colleges of professorships of normal human physiology, giving these professors and their assistants access not only to hospital sick paitents and to sick people generally but to groups of normal people in ordinary walks of life, and especially to people who feel themselves just beginning to fall sick.

170 Tons of Mail Carried This Year By Plane Services

Ottawa Report Shows 500 Machines and 717 Pilots in Canada

Ottawa.—For the three months ending Sept. 30, the aircraft engaged upon the twelve air mail services which now operate in Canada carried 119,301 pounds of mail, bringing the total from the beginning of the current year up to 379,424 pounds, or roughly 170 tons. One-half of the services operate out of Montreal. Two new services are projected, according to the quarterly report of the Civil Aviation Branch of the Department of National Defence. One will cover the route from Amos to Siscoe in Quebec, a distance of forty-two miles, and the second from Peace River to North Vermilion in the Northwest Territories. The latter calls for sixteen return trips during the winter, and will be continued for four years.

500 AIRCRAFT

The report shows that there are 500 aircraft flying in Canada, while the number of pilots is 717, of whom 403 are commercial pilots. The Dominion has seventy-two air harbors.

Detailing the flights of the various air-mail services, the report shows that the Toronto-Buffalo line flew 7,800 miles in the three months under review, and carried 14,004 pounds of mail. All scheduled trips were completed.

A total of 15,800 miles was flown on the Montreal-Albany service, whose operating efficiency was rated at 90 per cent. This firm operates the Montreal-Toronto, Detroit, the Montreal-Saint John-Moncton, the Montreal-Quebec and the Ottawa-Montreal-Rimouski services.

TOP MILEAGE.

Exceeding the formr companies in mileage, however, were the planes of the Western Canada Airways Ltd., of Winnipeg. These flew 413,043 miles, carrying 5,564 passengers, 316,898 pounds of baggage and express, and 76,572 pounds of mail. The percentage of regularity on schedule times was rated at 97.4.

The report says that intermediate aerodromes are being leased, fenced in and graded with runways between Moose Jaw and Saskatoon, Sask., and Lethbridge and Edmonton, Alta., a distance of approximately 500 miles. An airways beacon is being installed on one corner of each aerodrome, while five radio beacons are being installed at present at Forrest, Man.; Regina, Sask.; Maple Creek, Sask.; Lethbridge and Red Deer, Alta.

There are 21 light aeroplane clubs in the Dominion. For the nine months ending Sept. 30, members of these organizations had flown 11,567 hours. The membership totalled 2,887. Ontario has the largest number of flying clubs with nine. Other provinces are: Saskatchewan, three; Nova Scotia, Manitoba and Alberta, two each; Quebec, New Brunswick and British Columbia, one each.

Two Bernard Shaws Both Write Plays

G. B. S.'s Nephew and Namesake, a Doctor, Also Writes Plays.

London.—There is another Bernard Shaw writing plays in England and, strangely enough, he is a nephew of G. B. S. He is Dr. Bernard Shaw, assistant pathologist at a Newcastle infirmary, who has been writing some short plays for the students at Armstrong College which are said to have been regarded very highly by the Macdona Players. This company gives a season of the better known Shaw plays at the Court Theatre here recently.

Dr. Shaw was not christened after his uncle, for Bernard, he says, is a family name. Like a cousin of Mr. Shaw's, who lives in Chipstead, Surrey, he has not kept in touch with G. B. S., who seems to have little use for family relations.

In spite of his reputation as an amateur dramatist, Dr. Bernard Shaw is by no means an amateur pathologist and his talents in the theatre are not expected to lead him into serious competition with his uncle. Here is no case of a doctor's dilemma.

World's Air Junction Will Be Within Arctic Circle?

Philadelphia, Pa.—The Arctic Circle will be the future world junction for inter-continental air routes, Vilhjalmur Stefansson, explorer, declared recently in an address at the University of Pennsylvania Museum.

Stefansson defended the Arctic against "erroneous public ideas," asserting that Amundsen would not have been lost had he been nearer the North Pole. "He was too close to Europe," Stefansson said. The Gulf Stream was between him and Norway. Nearer the Pole he would have found safety."

Nations' Good-Will Stressed at Opening Of Border Tunnel

Services Mark Dedication of Windsor-Detroit Tunnel— — Many Attend Ceremony

Windsor.—Fitting ceremonies marked the dedication and formal opening of the Windsor-Detroit vehicular tunnel on November 1st.

Cheers, band music, bursting of bombs, clicking of camera and the flare of flashlights were the noise features of the two occasions which drew thousands of people from both sides of the line into a joint celebration of an international event of importance —the completion of a $25,000,000 project which is the first vehicular tunnel to connect two nations.

Spirit of Amity

Men prominent in public life in both Canada and the United States played an outstanding part in the program of addresses which featured the activities. The burden of the spoken words was emphasis of the spirit of amity which has existed for more than a century between the two countries, and stressing of the fact that this latest means of intercommunication will go far to strengthen the bonds which now bind the two nations, and to further emblazon before the world the great thought of peace and harmony among peoples.

Shortly before noon, when the program of addresses ended, President Herbert Hoover pressed a button in Washington which actuated the great gongs beside the speakers' platforms at both sides of the tunnel, marking the official opening of the great tube. This was the signal for prolonged cheering by the immense crowds, and aerial bombs crashed overhead and bands blared forth.

"The Fleetway"

The announcement was made that the name selected for the new tunnel is Detroit-Windsor Tunnel—the Fleetway. A competition for the choice of the name was conducted by a Detroit newspaper. John T. Wills, of Detroit, and Michael J. Walsh of Windsor, formerly of Hamilton, will each get $300. Willis suggested the first half of the name and Walsh the latter half. The judges felt that the combination was the best name proposed. Ten other suggested names were given honorable mention.

"Wise Old Owl" Is Myth of the Ancients

The owl figures intensively in the legends and folklore of nearly all peoples and it has been regarded as the symbol of wisdom since the down of history. There is an air of mystery about this bird. It's nocturnal habits, it's noiseless flight, it's mournful call and it's large stationary eyes have all contributed toward making it an object of superstition. Some of the ancients believed that if an owl appeared near a sick chamber it was an omen of death. Among the Greeks the owl became the symbol of meditation and counsel because it was one of the attributes of Athena, the deity who presided over the whole intellectual side of human life. It is probable that the owl represents the original form under which that goddess was first worshipped and that it became her favorite bird subsequently. Homer applied "Glaukopis," meaning keen-eyed, to Athena; this epithet may have originally signified "owl-faced." Although the owl may look wise to some people, as a matter of fact it is a rather stupid bird compared with many species.

The Possibilities of Tubes

While driving along M-65 recently I spied an abandoned inner tube by the side of the road. Right then and there I began to figure on the possibilities of such tubes.

One inner tube I gave a thorough washing. When dry I made a handbag from it by cutting two pieces eight inches by five inches. The bottom was cut into fringe, the sides pinked and laced up. To finish it up I worked a beaded design on the front.

Bands were cut from the tube, covered with ribbon, and the addition of organdy flowers made them into fancy garters—A Reader.

Canadian Office in Cairo

A new Canadian Government Trade Commissioner's office is to be opened at Cairo, Egypt. The territory for this new office, which will open some time in December, includes Egypt, the Sudan, Palestine, Cyprus, Syria, Irak and Persia. When the Canadian Trade Commissioner takes over at Cairo, Canada will have 34 trade commissioners in different parts of the world and a commercial agent at Sydney, Australia.

Talking Pictures Aid the Hospitals

Survey Reveals at Least Three Ways in Which Institutions May Be Helped

New York.—That the talking pictures will open three new avenues of progress for hospitals of today is the belief of both the makers and users of talking picture apparatus, says The Modern Hospital. These three avenues are: the entertainment of convalescent patients; the training of student nurses by the sight and sound method and the presentation of screen entertainment in connection with hospital fund-raising campaigns.

Excerpts from a recent survey of the hospital field are quoted here:

"Motion pictures have been used as aids to instructing nurses and attendants in hospital work for the past decade in various parts of the world. One hospital, the Serfimerlasarettet, in Stockholm, has used films for medical instruction for fifteen years. But with the advent of the talking picture the applications of the talking screen to medical and scientific advancement are increased a hundredfold. The hospital field has been awaiting the development of a portable motion picture sound projector, ready to plug into the electric light socket, and to be wheeled from room to room as required.

"Plans ranging from the talking motion picture as a teaching film to be used in conjunction with lecture courses delivered by hospital staffs in the instruction of student nurses, to 'animated textbooks' that would provide entirely new approaches to many medical problems are now under discussion by leading hospital authorities. The facility with which the talking film lends itself to medical instruction can best be appreciated when it is understood that fifty student nurses watching a surgeon can see little more than their eyes and the position of their chairs permit them to see. On the film, closeups can carry the spectator to the heart of the operation. The talking film gives the spectator a running lecture that outlines in detail the elements of the surgery.

"The applications of the talking film to the hospital are almost unlimited. Hospitals having a library of recorded surgery films will no longer have to rearrange their nurses' lecture schedules to fit the program of the operating room. Any type of surgical demonstration will be available at any time, accompanied by a complete lecture delivered by the surgeon who performed the operation. Nurses and student nurses can see the world's greatest surgeons at work, a privilege heretofore granted only to a select few. Attendants can learn the proper procedure of hospital routine through their favorite entertainment medium.

"In the entertainment of convalescent patients, the portable talking picture projector will likewise play an important part. Fifty or a hundred patients can be assembled in a convenient room and the portable apparatus wheeled in and plugged into the light socket to produce an afternoon of enjoyable sound-motion picture entertainment. Patients will forget they are in a hospital.

Early Americans Were Asiatics?

Noted Anthropologist Says Research in Alaska Indicates Migration to Continent

Philadelphia.—Dr. Ales Hrdlicka, widely known anthropologist, told the American Philosophical Society recently that five years of intensive research in Alaska had led scientists to believe that prehistoric man on this continent was of Asiatic stock.

Dr. Hrdlicka is curator of the Division of Physical Anthropology, National Museum, Smithsonian Institution, Washington.

"Since 1926," Dr. Hrdlicka said, "intensive anthropological and archaeological work has been carried on by the Smithsonian Institution in Alaska. The object of this work is to locate and save, so far as possible, the oldest remains of man that may be found, both skeletal and cultural; and at the same time a study is being carried on of the remaining full-bloods, both Eskimo and Indian.

"The chief aim of the present studies has been to discover, so far as possible, data of value relating to the old migrations from Asia to America. It is now definitely known that the American population was not indigenous and must have come, and that in fairly recent (post-glacial) times, from Northeheastern Asia, but material proofs of this were hard to secure.

"The work will take several more years to finish. Its extension to Asia is imperative."

Goiter Preventive Found In Kentucky Limestone

Lopuisville.—Limestone now promises to join the anti-goitre campaign.

This rock contains small quantities of iodine, the goitre remedy, says a report of the Kentucky Agricultural Experiment Station, and is useful in making fertilizers.

"When these fertilizers are used in growing important farm crops," says the report, "the iodine content of the latter is apparently enriched and foods better suited for nourishment of animals are thus produced."

Iris had been sitting with an absorbed look on her face, gazing at her father. "Why did you marry mother, dad?" she suddenly said. "Because I was a fool, I suppose," he replied. "Poor Mums," said Iris softly. "What do you mean, miss?" asked father sharply. "I mean that it was sad for mother to marry a fool, dad," explained Iris seriously.

How the Telephone Helped

"Great stuff!" exclaimed Jack Wright, former captain of the local football squad. "Next best thing to being with the boys is to hear from you regularly and to know how the team is shaping up." Jack's team mates thought a lot of their captain and when the doctor ordered him right at the very beginning of the season to go to the mountain sanitarium for a complete rest, they arranged amongst themselves to call him on the long distance telephone two or three times a week. The calls cost very little and as coach Hennessy said "those telephone talks not only cheered Jack but they kept the team members right on their toes for naturally, they didn't want to talk about anything but wins when they spoke to Jack!"

Right Ideas About "Growing Up"

By EDITH L. REID

"You forgot something," Mother called to Gerald as he left the dinner table to join his playmates in the yard.

With reluctant feet and half sulking, Gerald came back. "When I grow up I'll never fold my napkin," he said, cramming a rather rumpled piece of linen into the ring, and banging the door by way of emphasizing his resentment.

"When I grow up I won't wear rubbers ever," posed Betty Lou, when reminded of the wet sidewalks as she started to school.

"Teachers only have to ask questions—they don't have to learn any old multiplication tables," grumbled Joe, as he struggled over the "nines". "When I grow up, I won't have any books except about knights and airplanes."

These expressions of rebellion and dozens of others similar in tone are heard all too often by parents and teachers. Children complain about restrictions and what they regard as the freedom of adulthood.

Such a condition of mind is annoying to those who have the training of boys and girls. But the truth is that the child's attitude toward the future and its privileges is determined in early years by those in authority.

Unless the folding of the napkin at the table implies more than mere social conformity, it will very soon lack interest for the small boy. Let Mother introduce this habit as a test of advancement in ability to do things.

"I believe you are almost big enough to fold your napkin now without anyone to help you match the corners. Let's try it for two days and see just how well you can do." After the two days the time may be extended to a week, always with the challenge to his growing powers of responsibility. This manner of training removes he idea of a command. From a mere rule of etiquette folding a napkin might become to Gerald an opportunity to display development.

And as to the wearing of rubbers, Betty Lou's mother may almost entirely remove this worry by making this a milestone in her small daughter's judgment and self-reliance.

"I believe you are old enough to decide whether you need to wear rubbers, dear. If I am not mistaken you can see when it is cloudy and when the walks are damp just as well as I can. So I am going to give you this 'growing up' privilege this week. You may prove to me whether I am right."

When the week is ended, Mother may again say, "Well, you did pretty well, but just to show you are really ready for this responsibility all the time, we will try the plan one more week."

At this very point Betty Lou begins to sense that "growing up" is not throwing off rules, but learning to apply them through personal choice. By such a course the child loses the false notion that to grow up is to "do as I please". Growing up becomes a dignifying experience of every day.

When mothers hold out responsibility as a trophy to be won by diligence and acclaimed as an accomplishment, good habits and resourcefulness will result. Resentment will die unborn or become submerged in the zest of worthy performance.—Issued by the National Kindergarten Association, 8 West 40th Street, New York City. These articles are appearing weekly in our columns.

Be Yourself!

Know what you want and take it,
Don't dither all the day;
But if you cannot make it,
Then put the hope away.
Don't spend your time repining
For what you cannot gain,
Accept the silver lining
In every cloud of rain.
Know what you mean, and say it;
Don't use another's phrase.
In kindliness convey it,
Your censure or your praise.
Consider your opinion;
Don't take it ready made.
Your mind's your own dominion;
To think don't be afraid.
Know what's your job, and do it
With all your heart and power;
Don't merely shuffle through it
With one eye on the hour.
For every occupation
Is worth while doing well;
Theres' such a sure elation
In knowing you excel.
Be what you are sincerely,
Not apeing other men,
Pretending you are really
One of the upper ten.
No matter what your station,
'Tis character which tells;
'Tis not the shop location
But what it stocks that sells.

—A. M. F.

Light Upper

A black velour suit has the loveliest dress, made of a skirt of the velour with the front panel extending up almost to yoke line and buttoning onto a green off-white brocaded satin blouse.

Minard's Liniment refreshes the scalp.

Woman's Fortitude

Forces Herself to Smile Through Pain.

"I never seem to find time to rest," says many an overworked housewife. Under smiles and forced cheerfulness she conceals weariness and nervous depression; headaches and backaches. Often she is in real pain, but still refuses to give up. This very fortitude is apt to be her undoing. If she continues to neglect the signals of distress she will sooner or later suffer a serious breakdown.

A noted doctor has stated that nine-tenths of the ills of womanhood are due to poor blood. That anaemia is the cause of the low spirits, the poor appetite and palpitation that make life a burden for so many.

There is no need, however, for women to suffer in this way. All the miseries of anaemia can be banished by taking Dr. Williams' Pink Pills. These Pills create an abundance of new, rich, red blood and this new blood will bring strength and vitality to nervous, overtired women. The Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

How to Avoid Cold Feet

You can avoid cold feet this winter by lengthening your blankets and comforters so that they will tuck in securely, since so few really come long enough.

Take a strip of unbleached muslin 12 inches wide and as long as your blanket or comforter is made. Attach it securely across the bottom of your blanket or comforter, having first had the other three sides hemstitched in the color of your bedding or else blind stitched or done in colored feather stitching.

Rice Custard

One cup cooked rice (more if you like it), two eggs, slightly beaten; two good tablespoons sugar, pinch of salt, about a pint of milk, a little nutmeg. Combine all ingredients in a baking dish. Set dish in pan of hot water and bake in not too hot an oven until a silver knife will come out clean.

Tiny Tot Travels Alone

Three thousand miles by ocean steamship and a further 1400 miles over land—all the way from Edinburgh to Winnipeg, has no terrors for little Joyce Braidwood, aged 3½, who recently sailed unaccompanied by Canadian Pacific liner Duchess of Atholl, from Glasgow to Montreal. Canadian Pacific transportation services once more took care of her at the latter city and conveyed her to waiting friends at Winnipeg with whom she will live.

"Here is an invitation to my golden wedding." "Your golden wedding?" "I am marrying the only son of a millionaire,"

For Dry Skin—Minard's Liniment.

Man (just acquitted) to counsel—"Thanks very much! What should I have done without you?" Counsel—"Oh, about five years."

Growth of Canada In Manufactures

Raising of Crop in 1605 First Agricultural Process in Canada

Tokio, Japan—Canada's growth into a great manufacturing country was described by R. E. Thorne, Montreal, in a recent address here before a luncheon, given by prominent Japanese to the delegates of the trade mission of the Canadian Chambers of Commerce.

In 1870 the value of Canadian manufacturing was $221,000,000, Mr. Thorne said. In 1928, the latest year for which complete statistics are available, it was $3,770,000,000. The capital invested in more than 23,000 establishments was $4,780,00,000 and the number of employes 688,000.

Going back into the cradle of Canadian industry, Mr. Thorne said the first agricultural process to be carried on by Europeans in what is now the Dominion of Canada, was the raising of a crop of grain at Port Royal, Nova Scotia, in 1605.

The first manufacturing process was the grinding of grain in the Autumn of that year.

The present century had witnessed the chief forward movement in Canadian manufactures, the result of two great influences, first, the "boom" accompanying the opening up of the Canadian west, and, second, the Great War, which not only created enormous demands but left a permanent imprint upon the variety and efficiency of Canadian plants.

At present Canada ranked as the third largest producer of electrical energy in the world, Mr. Thorne said, following the United States and Germany. Investment in this industry in Canada now amounted to about one billion dollars.

Do Eagles Carry Off Young Babes?

Hardly a year passes that newspapers do not publish reports of a child being carried away by an eagle in Switzerland or some other part of the world. Most of these reports are, no doubt, made up out of whole cloth and may be dismissed as pure fiction. The U.S. Biological Survey states that it is unable to find a single authentic instance of this kind so far as North America is concerned. It is possible, however, that some of the larger eagles may, under unusual circumstances, seize and carry away small children. The golden eagle, it is estimated, can carry a weight of 12 or 15 pounds and it often preys upon lambs, fawns, and kids. Dr. W. Reid Blair says that the Harpy eagle of Central and South America "attacks and kills animals of more than three times its own size and weight. Turkeys fawns, foxes, sloths and monkeys alike fall victims to this powerful bird's claws." There is no reason for supposing that such an eagle, when hungry, would discriminate against an unprotected small child. The Kirghiz Tartars from time immemorial, have employed golden eagles to hunt antelopes, foxes, wolves and other game.

Guard the Children from Autumn Colds

The fall is the most severe season of the year for colds—one day is warm, the next cold and wet, and unless the mother is on her guard, the little ones are seized with colds that may hang on all winter. Boby's Own Tablets are mothers' best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose of the Tablets will prevent colds, or if it does come on suddenly their prompt use will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Oil Age Gives New Speed To World, Says Leacock

Montreal—The modern era is distinguished from all others by man's use of the products made from crude oil, and hence this is the "Oil Age," according to Stephen Leacock, lecturer and professor of political economy at McGill University here.

Petroleum was known for centuries, Mr. Leacock says, but the modern uses for it were not discovered until the nineteenth century. Modern scientists, while they agree with Mr. Leacock in recognizing the discovery of oil and its importance as a basic product, stress man's ingenuity in perfecting methods of scientific refining, and attach secondary significance to the quality of the crude as it comes from the ground.

With the appearance of oil, says Mr. Leacock, "all the world was speeded up. The globe seemed to shrink beneath our feet. Its vastness was all gone. From end to end it was searched and ransacked for oil. The white winged plane and the motor boat brought all civilization into one. The motor car unified the world and turned the jungle into highways."

Though crude oil has been known for centuries, it remained for modern man to learn how to make it into really useful products.

Chest Colds

Minard's Liniment is recommended in cases of bronchial irregularity. Rub it on the affected parts, and inhale it as necessity dictates.

MINARD'S "KING OF PAIN" LINIMENT

Owl Laffs

The Turkey

It saddens me to see the turkey
As, with mind upon his work, he
Views with undisguised dismay
The coming of Thanksgiving Day.

For him the pumpkin has no charm,
Cranberries cause him much alarm,
Chestnuts give him collywobbles,
Wring from him most plaintive gobbles.

His sojourn sad and grim,
No kindly Providence for him,
No hope is his save that his breast
May lie beneath an alien vest.

Beautiful Daughter—"Well, I proposed to Harold myself to-night."

Her Mother—"You must be mad!"

Beautiful Daughter—"You're darned right I am! He turned me down."

While we are on the subject, we might say one trouble with young people to-day is that they do too much petting, and another trouble with their parents is that they do not do enough.

Paul—"Give me a kiss or I'll sock you over the head and take one anyway."

Pauline—"I'll not give you a kiss—and don't dare hit me too hard!"

Aren't We All?

The scene was the smoking room on a popular train. The newcomer offered his package of cigarettes to the only occupant, but his offer was declined with:

Occupant—"No, thanks, just finished one. Or rather, six would be more like it, but I've got to do something to keep my mind off of business."

Newcomer—"Business not so good?"

Occupant—"Not so good? (grouchingly) It's terrible! Every merchant I've visited this week is complaining. Some of 'em spent an hour or more giving me the gruesome details, and now they've got me feeling the same way."

Newcomer—"I don't see how they can do it."

Occupant—"Do what?"

Newcomer—"Spend an hour talking about 'business conditions'."

Occupant—"No business coming in, I tell you—nothing else to do. You don't understand."

Newcomer—"I'm afraid I don't. I'm a local merchant, but I'm so busy taking care of my business I haven't had time to learn of this slump you speak of. Matter of fact, my business for the first nine months of this year exceeded that of last year."

Occupant—"Say, are you just handing me Pollyanna stuff to cheer me up, or is this on the level?"

Newcomer—"I don't see any reason why I would want to 'kid' you; I never saw you before, and it will probably be better for my morale if I never do again."

Occupant—"I'm sorry, stranger, I'm just down in the dumps, and I forgot myself. Here, have one of my cigarettes, and then tell me how you put it over."

Newcomer—"Put it over? I didn't know I was doing anything unusual, and so never stopped to analyze the reasons."

Occupant—"Well, now that you've heard my story, I wish you'd try."

(Deep silence for a minute or two).

Newcomer—"About two months ago, I wrote two contractors saying that I would like to built an addition to my home, giving me an extra bedroom and a sleeping porch with an enlarged kitchen and breakfast room on the first floor. One has made no reply, and the other waited three weeks, only to tell me that he was 'tied up' on a big contract. Two weeks ago I arranged to have my home re-decorated, beginning the following Monday. The decorator has not shown up yet. The man who cleans my basement every fall, tends my furnace, carries out the ashes, etc., has not put in an appearance this fall, despite my frequent calls and his equally frequent promises. I telephoned three times for a man to come and see a car that needed repairing and overhauling and putting in running condition. He never came."

Occupant—"But how has that helped your business?"

Newcomer—"It hasn't. Because of their utter lack of interest, I've cancelled all of these jobs and am now looking for men who are ready to do business. The point I'm trying to make is that business isn't good with some folks because they aren't good to their buiness."

Banish pain with Minard's Liniment.

This year's world output of gold is estimated at $404,000,000.

DON'T DO THIS — Deafness HEAD NOISES — RUB IN BACK OF EARS—INSERT IN NOSTRILS.... Leonard EAR OIL — $1.25 All Druggists. Descriptive folder on request — A. O. LEONARD, Inc. 70 Fifth Ave., New York City

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

ISSUE No. 46—'30

Who said "Blue Monday"?

WASHDAY—hardest in the week for many women. Especially if there are children.

But it needn't be "blue". When you begin to feel tired, make yourself a cup of tea. It will rest you!

RED ROSE TEA "is good tea" 116

TWO QUALITIES — RED LABEL & ORANGE PEKOE

Beebe Returns With New Fish Specimens

New York—Dr. William Beebe, director of tropical research for the New York Zoological Society, returned recently from his second consecutive year of studying fish in the ocean depths off Nonsuch Island, near Bermuda. He brought 94 cases containing about 150,000 specimens of fish and crustaceans, many of them new to science and some trawled at a depth of two miles. He intends to name and catalogue them during the winter in his studio here.

"I am proud to say that my work is of no practical value," he said, "although, of course, there is always the chance that something practical may be stumbled upon in the course of my research. There are, roughly, three fish-depth zones. First, the surface zone of only a few fathoms populated by blue and transparent fish, then the silver zone going down to 1,500 feet and then the red and black colors exist at a 'frigidaire' temperature."

When he has catalogued his specimens, he said, they will be taken to the Museum of Natural History.

Ancient Tree Bears Twelve-Inch Apples

From a tree twice as old as the Dominion of Canada, J. C. Freil of Niagara Township has picked apples of a deep purple color and of very good quality, known as "the Black Chief." The tree is over 120 years old, and was a veteran when Confederation was signed 63 years ago. The seed was brought to Canada from the Old Country by sailing vessel. Measured on an average, the fruit had a circumference of 12½ inches.

Use Minard's Liniment for Toothache.

"If a man wants to marry he should make a little money first," says a magistrate. Afterwards he'll have to make a little money last.

DEPRESSION

"I'm a different woman"

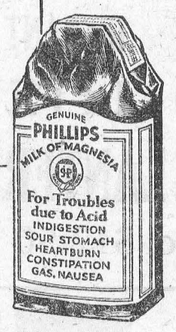
"Two years ago I began to get depressed, and everything was too much trouble for me. I was a misery to myself and everyone around me. I was advised to take Glauber Salts by my friends who said it was the same as Kruschen but it did me no good, so at last my husband got me a bottle of Kruschen and no one would realise the different woman I am. I have been taking Kruschen now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Kruschen as well and she has found its worth as she feels a different woman."

—(Mrs. G. A. K.)

The commonest cause of depression is *partial* constipation—an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation impossible. Therefore, if you keep to Kruschen you need never know the meaning of melancholy; never feel "nervy" or depressed.

TOO MUCH ACID may be causing those frequent headaches



WHEN there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet your way out of the trouble!

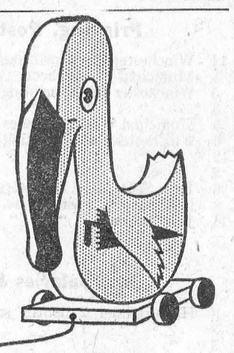
Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments.

Take a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. Whenever you are taking cold or feel sluggish, weak, constipated. Phillips' Milk of Magnesia has a gentle laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips' for your protection.

PHILLIPS' MILK OF MAGNESIA



for ANY CHILD

WE can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

Fletcher's CASTORIA

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better, thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—*Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.*

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., Lynn, Mass. U. S. A. and Toronto, Ontario, Canada

THE WINCHESTER PRESS

THURSDAY, NOVEMBER 20th, 1930.

Winchester Springs

Miss Carrie Stewart is in Ottawa, where she had an operation recently.

Dr. Noah Loucks and friend of Cleveland who have been visiting at the formers parents, returned home on Saturday

FINANCIAL STATEMENT OF THE VILLAGE OF WINCHESTER FOR THE YEAR 1930

The following Financial Statement of Receipts and Expenditures for the Corporation of the Village of Winchester is one that every ratepayer will be pleased to examine. The statement is prepared a month earlier than in former years so that it may be in the hands of the ratepayers before election day, Monday, Dec. 1st. The statement is complete as far as the knowlege of the Collector and Treasurer goes, and is accepted by the council as such. The somewhat large surplus is not desirable, but is much more satisfactory than a deficit. There is no reason why the rate for 1931 should not be reduced by at least two mills.

'Fresh from the gardens'

Amusing Anecdotes Of Famous People

A born raconteur was Pett Ridge, the "modern Dickens," who died the other day. One of his stories concerned a young couple with one child, who decided to move from a house to an apartment. The husband, as a labor-saving device, went off for golf while the moving was being done.

* * * *

At the first dinner given in the new apartment, he spoke fo the guests with complacency of the ease with which the transfer had been effected.

"No anxiety," he declared, "and absolutely no worry of any description. Isn't that true, my dear?"

"Quite true," she agreed. "No more than there was when our little Gladys arrived."

* * * *

Then there was the story of the man who returned home late after having done himself very well at the club. He walked round and round the one laurel bush in his front garden. Finally, much discouraged, he sat down and wept.

"Lost, lost," he cried, "in an inpenetrable forest."

* * * *

Another of Pett Ridge's stories was about a millionaire who died, and found himself, as he expected, in a handsomely appointed elevator. He waited for some time and then said to the attendant:

"What time is this concern supposed to go up?"

"It doesn't go up, sir," answered the man.

* * * *

A piquant story of the beautiful Duchess of Manchester (who became the Duchess of Devonshire) is told by E. F. ("Dodo") Benson, in his reminiscences "As We Were: A Victorian Peep-Show." The Duchess, a German by birth, used to delight in walking alone about the streets of London, something which was not done than. Naturally there would often be a man hopefully following this radiant and unaccompanied vision, and on one occasion the Duchess gave one of these "mashers" a salutary lesson to leave her alone.

* * * *

She had stopped to look in at the window of some smart bonnet-shop, and the hopeful follower asked her if she would not like to have one of those nice bonnets. She said she would like one very much, and they went in together and she chose one, for which the follower paid. So, of course, he had to carry it home for her, but she said he must not trouble himself to do that for they would send it to her, and she gave her name, the Duchess of Manchester, and her address.

"He would thus learn not to pester respectable young ladies who were taking the air. It would do him good," the Duchess would chuckle in telling the story to her friends.

* * * *

"We had the French Ambassador today at the White House," wrote Major Archie Butt, Military Aide to President Taft, to his sister. "I heard the President telling him of an incident which was told to him by Cecil Lyon. He could hardly tell it for laughing. He said that when Colonel Roosevelt was in Texas he was holding some big reception and, as was his wont, was shaking every man by the hand as if he were the only intimate friend in the country.

* * * *

"One old fellow came along and said:

"'Mr. President, I am so glad you are here. We are in terrible trouble. Our young son has been captured by the Mexicans and is kept in a vile prison incommunicado, and we fear is ill.'

"Colonel Roosevelt, who had not heard one word he had said, grasped him by the hand and said in his characteristic way:

"'Fine, fine, splendid!'"

* * * *

President Taft enjoyed an occasional game of poker. One night he was "sitting in" with a few friends, including Archie Butt who had just won a large pot, when the President drew down a small ante. One of the players asked him if that was his second pot. He began to laugh and said the question reminded him of an old farmer in Georgia who had been serving 'possum. When nearly all was gone he saw a lean red-headed boy at the other side of the table and asked in an angry gruff voice:

"Sam will you have some more 'possum?"

"Goodness," replied Sam, "I haven't had some yet."

* * * *

On one occasion at Buckingham Palace after luncheon, while King Edward was enjoying a cigar and talking to his friends, recalls Sir Lionel Cust (in "King Edward VII. and his Court"), the door opened and in ran two little boys, Prince David (now Prince of Wales) and Prince Bertie (now Duke of York), and came and stood on either side of the King. They looked rather shyly at the assembled company.

* * * *

At last the boys got fidgety and one of them said:

"Now then, Grandpa, you must not sit too long here, or else you'll keep Mr. Hansell waiting."

Mr. Hansell was their tutor.

The King was immensely amused at receiving this command (says Sir Lionel), which he very shortly after obeyed with due humility.

* * * *

At a children's tea-party given by King Edward and his Queen in the garden at Buckingham Palace, King Edward was attending to the little son of one of his intimate friends, and asked him what he would like. The child at once said:

"More jam, King."

Roofing C[illegible]l for Sealing Silos

Three years experiments by the Illinois College of Agriculture indicate that one of the best methods of sealing a silo is to tramp the top layers thoroughly, level it off well, then cover it with strips of a good quality of roll roofing, lapping the joints well, and then covering evenly with some heavy fine material, such as sawdust, dry earth, ground limetone, and so on, applied at the rate of about 15 pounds per square foot, care being taken that no holes are made in the roofing by stepping on it. Experimental silos sealed in this way showed no spoiled silage after standing three months, except next to the wall where air leaked in between wall and covering. This could be largely avoided by running the strips up on the wall and then putting an extra strip around the edges.

When the silo is opened, the weighting material can be placed in sacks and stored with the roll roofing on crosspieces under the silo roof ready for the next season. The experiments also showed that the roll roofing is the important thing, the weighting material being much less effective alone.

The Story of Heels

How is it that we have heels on our boots and shoes?

It is said that they had their origin in Persia, long long ago. Blocks of wood were fixed beneath the sandals in order to raise the feet above the burning sands of that country.

The blocks thus used by the Persian women were from eighteen inches to two feet in height (much higher than those of the men), and might therefore be described as stilts.

Many years later, a similar fashion prevailed in Venice, where it was encouraged by husbands with "gadabout" wives, who thought that such cumbrous, inconvenient 'foot-gear would keep the women in what the men considered their proper place—at home. The supports of these Venetian shoes were called "chapineys," and in order to gratify the vanity of the ladies, and also, perhaps, to "sugar the pill," they were highly ornamented. A woman's chapineys proclaimed her rank. The higher they were, the higher was her position. Thus the nobler the lady, the greater must have been her discomfort.

Cotton For Road-Making

Burnley, one of the big Lancashire cotton towns, has just launched an experiment which may result in the finding of new markets for cotton cloth.

The corporation is resurfacing part of its streets, and on certain lengths it is using Burnley-made cotton. It is believed that the cotton will help to make the surface waterproof, and that it will last longer.

Similar experiments have been made in America, where cotton has been used successfully in the construction of both concrete and asphalt roads.

If the use of cotton for road-making spreads, a great deal of cloth can be used in this way. Road engineers are always on the look-out for new materials, so there should be no difficulty there. Among their previous experiments may be mentioned the use of rubber, which may be encouraged now by the very low price to which the raw material has fallen recently.

Three Holstein cows, members of a herd owned by James A. Thomson of Moose Jaw, have just finished yearly records in the R. O. P. with a production averaging 13,657 pounds of milk containing 657.50 pounds of butter.

Cat Lovers Can Now Change Pets' Color

Moscow Scientists Report Remarkable Experiments on Siamese Felines

Washington.—The cat lover may now have his favorite striped or speckled in any pattern he may fancy, and this without any harm to the cat, merely by regulating the temperature at which the hair of the animal grows.

A report received here by the American Genetic Association from the laboratory of experimental biology at the Moscow Zoological park tells how Professors N. A. and V. N. Iljin changed the color and markings of a Siamese cat.

The Siamese cat is normally a very light cream color of fawn with face, ears, feet and tail in clearly defined dark brown, almost black. The pair studied were taken from their warm cushions in a German parlor to the very different climate of Moscow where they lived in a building the temperature of which never exceeded 66 dgrees fahrenheit and which sometimes was as low as 26 degrees. Within a few months the cats had changed to a dark chocolate color with the darkest area across the shoulders.

The experimenters then tried the plan of warming certain areas of the skin of the animal. They shaved off part of the darkest hairs on the shoulder and applied a cotton bandage. When the bandage was removed the bald spot was covered with colorless hair, making a marked light spot on the animal. The experiment was repeated for various parts of the body, always with the same result—where the skin was kept warm the hair was light.

The conclusions of the experimenters were that while hereditity does influence the color of animals, they can develop their natural color only under favorable external temperature, and by the internal factors of heat production and heat loss. Thus the body of the animal is normaly the lightest part, while the extremities, the paws and ears, are the most pigmented.

Black Diamonds

Brazil has long been noted for its nuts and has made the front page recently with its revolutions. But The Engineering and Mining Journal has the story of a different kind of Brazilian product, namely, black diamonds. Africa is by far the largest producer of white diamonds, but Brazil is thought to lead the world in gems of the black variety. Three varieties of diamonds are known: the crystalline gem stone, the bort, resembling the carbonado; and the true carbonado. Brazil possesses the only known commercial deposits of the carbonado, a so-called anthracite variety of diamond. The largest diamond ever found was a carbonado, discovered in Brazil in 1895, weighing 3,078 carats and worth more than $3000,000 at present rates. Until the invention of the diamond-drill, carbonados were of little value. Once thrown away as useless, later sold at twenty-five cents a carat, these huge, hard, rough, diamonds now bring a hundred and eighty-five dollars a carat in the market. Prospecting by the use of the diamond-drill is now approved engineering everywhere. The carbonado has the distinction of being the toughest substance on earth and, ground to powder, is used as polishing material in the cutting of white diamonds. Another good example of the folly of calling a thing rubbish and casting it to the void, simply because we have not discovered its use. The so-called rubbish-heaps of the world are all coming in turn to be worked over again with many startling results.—From "The New Outlook."

How Languages Grew

The earliest human inhabitants of the earth had no language such as we have to-day. They spoke to one another largely in signs and gestures, pointing at a man or an object for want of a name. Children do the same thing today when they want to call attention to something of which they do not know the name. Exclamations like "Oh! Ah! Eh!" have been used from the very earliest times to express such varied feelings as surprise, pain, sorrow, interest, disgust, and contempt. And these words, or "sound gestures," are the same in all modern languages.

Not only were actions imitated in dumb-show, but natural sounds were also imitated, and the sounds made were used in names. For example, "ka-ka" means crows in Sanskrit, and "pipit" means whistle in the Malay language. Words similar to these were probably the earliest words used.

The wonderfully complicated languages of the present day, that boys and girls find so difficult to learn, have all grown out of such small beginnings as these, just as a chicken comes out of an egg and an oak-tree from a tiny acorn.

Oyster-Bed Veterans

Have you ever encountered an oyster that measures over a foot across? If you do, you may be pretty sure that he is a centenarian.

Oysters can live to be a hundred—as Professor John Eyre, bacteriologist to the Worshipful Company of Fishmongers, revealed recently—and the specimens which do so "measure a foot or more across." But very few oysters get the chance of attaining this ripe old age—the species is too much in demand.

Whether centenarian oysters are as good to eat as their younger brethren is not known. Anyway, the size would make it difficult for any new oyster-eating records to be set up with 100-year-old specimens.

Mr. A. P. F. Chapman, the famous cricketer, once ate 210 oysters at a sitting. While the English team were in Australia they were presented with a huge sack of the shellfish, and challenged to eat the lot. Mr. Chapman, at any rate, did his bit!

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

A stunning dress you'll love to have in your Fall wardrobe, because of its smart wearability.

It is canton crepe in rich raisin shade.

The white crepe cowl neckline attracts particular interest caught wit' jeweled buckle in the raisin tone.

A circular godet provides interesting fulness to the skirt. The pointed outline at the upper edge lends slimness to the hipline.

The long bow trimmed sleeves have pointed uffs of self-fabric. If desired the cuffs may agree in color or fabric with material used for the cowl neckline.

Style No. 2718 may be had in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Flat crepe, velvet and crepy woolens appropriate.

Size 16 requires 4 yards 39-inch material with ⅜ yard 27-inch contrasting.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Perambulating [illegible]nks

Little Lottie, aged four, who was spending a week with her aunt in the country, had developed a great fondness for milk. One day, having drunk as much as her aunt thought good for her, she was informed that she could not have any more.

"Pshaw!" exclaimed the indignant little miss, "I don't see why you want to be so stingy with your old milk. There's two whole cowfuls out in the barn."—Brooklyn Eagle.

He Knows Better

"We have been married a year and never quarrel. If a difference of opinion arises and I am right, Felix always gives in immediately."

"And if he is right?"

"That never occurs."—Fliegende Blatter (Munich).

75 Poisonous Plants Growing in Canada

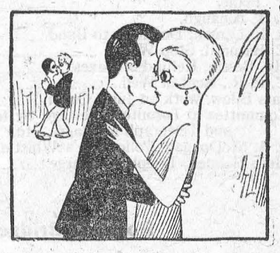
The subject of plants poisonous to man and animals is not generally known by the public and frequently one hears of a fatality due to this cause. It is somewhat surprising to learn that there are at least seventy-five plants growing in Canada which are more or less poisonous at certain seasons of the year.

In a book called "Poisonous Plants and Weed Seeds," written by Professors Thomson and Sifton, of Toronto University, these plants and their effects are described, the dangerous substances in the plants explained and the treatment given when known. For instance prussic acid is stated to be dangerous element responsible for Sorghum poisoning, Saponin is the toxic substance in purple cockle, phallin in the death cup.

In some parts of the country heavy losses have been sustained by stock owners, directly traceable to poisonous plant substances in pasture or fodder.

The book is a well-bound, well-printed, flat, little volume, containing forty illustrations, and would be of value as an addition to the nature study shelf. To the student of botany as well as to the practical farmer it presents much enlightening information.

It is published by the University of Toronto Press and priced at $2.50.



"I proposed to Miss Nomer and Miss Chance, whose good opinion I esteem, says I'm a fool."

"Well, propose to Miss Chance and she will think you have lucid moments."

House Plants

To clean the leaves of house plants, apply equal parts of milk and lukewarm water gently with a sponge about once a week.

Blood Tests Not Dependable Until Baby Three Weeks Old

Blood tests to determine the parentage of a baby may yield the desired information and help to solve mix-ups or disputes, as is reported to have happened recently in Chicago, but these tests must not be trusted for children two weeks old or less. During the first two or three weeks of life, Dr. Carl H. Smith, of Cornell University Medical College, states in a recent letter to the American Medical Association, the baby's blood is likely to be characterized chiefly by chemical blood factors obtained, before birth, from the blood of the mother. Only after at least two weeks of independent life does the baby produce enough of its own blood to sweep out these traces of mother's blood and to take on its own peculiar characters, which determine the blood group to which the child belongs and which may be useful in testing parentage. These blood tests depend, experts now know, not upon any single chemical constituent of the blood, but upon a complex of substances and reactions, many of which still are known only imperfectly. Most of these blood chemicals are dissolved in the "serum' or clear, yellowish liquid in which the red blood corpuscles float. When tests are made by mixing the serums of different blood types these chemicals sometimes react with each other and sometimes do not react, depending upon the blood type. In this way all mankind can be divided into four main blood groups and several sub-groups. These blood characters are inherited, which is what makes possible the blood tests of parentage; but this blood inheritance, like the inheritance of many other bodily characteristics, like features or stature, is not fully developed, Dr. Smith's researches indicate, until some time after birth.

Artists Commend Revival of Color In Women's Dress

But Declare That Women Must Study the Philosophy of Colors to Escape Glaring Effects

The painter's jargon is a closed book to the mere layman.

What does he mean by "warm" and "cold" colors?

Do we perspire or shiver in front of a canvas?

It is a question of psychology.

No; the layman sees the absolute color, red, blue, or yellow; and when he "knows what he likes," he is responding to a psychological impulse.

This philosophy of colors is far more important than we imagine. Most women understand it, or feel it instinctively, for it lies at the basis of taste in clothes.

Hermann Schletten gives us in the Berlin Illustrirte Zeitung, some subtle points on the esthetics of paint as well as of attire:

"An exhibition of modern paintings is usually cold, a gallery of old masters, warm. The new colors are somewhat fresh, sober; the old are toned down, harmonious. With age, the colors have darkened and yellowed. That is why so many people prefer the old paintings.

"Every color can be either warm or cold.

"There is a warm blue which goes over into red, and there is a cold blue which tends toward white. A yellow, when warm, becomes orange; when cold, it is citron-hued; a warm red carries a yellow tint, a cold red is mingled with light blue.

"If one wishes to see color, one must note these differences. A dress produces a mottled effect when the colors are neither warm nor cold."

To choose the right color is difficult, and only the elect know how to do it, this writer continues. A harmonious combination gives us a sense of well-being. The person who is harmonious in the color of his clothing appears to be fine and sympathetic. Note an example of the opposite:

"Once I was sitting in the Munich Hofgarten. It was Easter Sunday, and the fashionable world was showing off its new clothes. Two of my neighbors at the table were young girls. I heard one of them say: 'Look, there goes Annie. She has no taste. She is wearing three colors.' This remark pleased me, and I looked at the speaker and then at Annie, who really had no taste. She wore three pronounced colors, a warm deep red, a cold green, and an ice-cold violet. The number of colors was not the worst thing, but the ugly combination. Each color burst forth, as it were, and tried to dominate the others; while they defended themselves. A color war was the result.

"Animated by this experience, I began to examine the parade with an eye to the color combinations of the individuals, and as a result I arrived at the basic error of taste, the thoughtless mixture of warm and cold in color.

"My theory, which was formed then, gradually became a law of esthetics.

"A lady passed by whose colors actually screamed at one another in their ugliness, and yet her face bore a look of complete satisfaction with her own taste. Then others passed by with wonderful color symphonies in the folds of their gowns. They did not know why they were the chosen few who were silently beautiful, the beauty that is only felt. But I saw it: the repulsion was in warm and cold, the attraction in warm or cold."

The matter now becomes frightfully personal; the question inevitably is: "What should I wear? Which color is most becoming to me?"

"That depends on whether you have a warm or a cold face. Like to like. If you have a healthy glowing color, with deep blond hair, you are warm, and should wear warm colors. If your cheeks are a bit too red, cold colors would accentuate them, whereas warm colors would refine your complexion.

"Reddish, blond, golden hair, deep and brilliant, is beautifully complemented by a dark, emerald-green dress. If your face is pale, then you are cold, and should wear cold, faint colors, blue, and silvery tones. If you do so, you will no longer envy the rosy cheeks of your best friend.

"Very light blonds are also cold, and should wear light, delicate colors, pastel shades of blue, rose, and cold lavender. The whole appearance must be accentuated in light and dreamy tones. If you are pale, with full, red lips, and deep black hair with a bluish sheen, then you should wear dark, glowing colors, such as peacock blue, wine red, or deep orange.

"Really, ladies have no difficulties today with the beautiful colors now on the market. We painters had always regretted that our day no longer produced the lovely materials of past centuries. The colors of Titian have been forgotten.

"At present, we are going through a renaissance of color. And women have become more beautiful because of it. But they must learn to make the correct decisions.

"If a woman wishes to appear a bit outside of the color scheme, and if it suits her, she can add a bit of cold in a single piece of jewelry attached to some part of her costume, to the warm color she wears. Such an effect can even b produced by the stone in her ring. It can be very effective, but also daring.

"The same theory can be applied to men, and they often sin more grievously than the women in this respect. Even though their choice is limited, due to the fact that their suitings are more neutral in color, they must see to it that the color worn is suitable to their skin.

"The man's most dangerous spot is close to his face, his tie. It is here that he wishes to express himself, to relieve the monotony of his suit by a dash of color. The tie reveals the character of the wearer, be his nature gentle or brutal, refined or common. Many a tie has destined the fate of its owner."

Baldness and Brains

It has long been thought that a bald head was a sign of brain power, but this fallacy was exploded by Dr. D. J. H. Davies at a meeting of hairdressers held at Brighton (England) recently.

His view is borne out by quite a number of of our most prominent men, who have luxurious heads of hair. Mr. Lloyd George, Mr. Ramsay MacDonald, Mr. Maxton, and Mr. Arnold Bennett are cases in point.

In the course of his address Dr. Davies mentioned a number of other bald truths. For instance, it has been thought that the wearing of tight hats has had a lot to do with the baldness of the male sex, but, as he pointed out women never go entirely bald, yet they wear far tighter hats than men, and for longer periods.

Invisible Genes Govern Heredity, Says Scientist

Pasadena, Calif.—An elementary, sexless and little understood sort of reproduction is involved in the multiplication of genes, those invisible particles' which are the active constituent of chromosomes and which govern hereditary development.

Describing what is believed to take place, Dr. Calvin B. Bridges, of the California Institute of Technology, says:

"The synthesis of daughter genes utilizes materials abstracted from the surrounding fluids. It is self-governed, occurring at and only at the site of the original, or parental gene of each specific kind.

"This growth is controlled by the genes in the chromosomes, thereby producing fingers on the hand, golden hair and blue eyes, as well as every other character in its proper place.'

Great National Resources Assure Canadian Supremacy

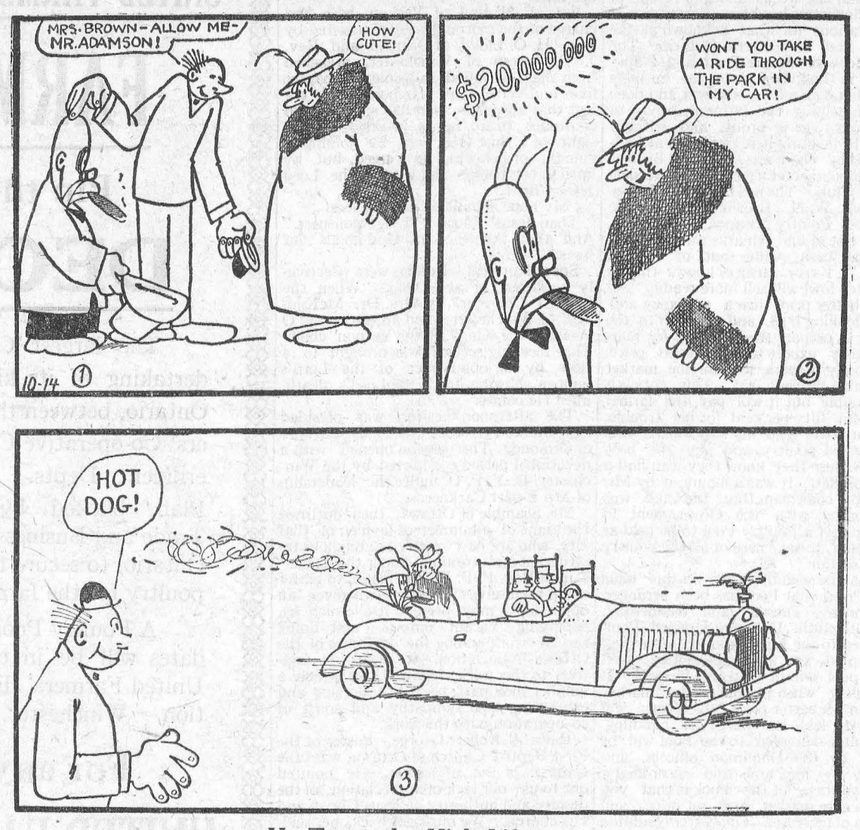
Forest areas, vast water-power developments and manufacturing plants in all areas of Eastern Canada the world's chief source of newsprint, pulp, and paper supply.

WESTERN YELLOW PINE

Canadian Western yellow pine from seed collected in British Columbia is largely helping to reforest New Zealand.

"Any one could tell by looking at you that your parents came from Ireland." "My parents did not come from Ireland," said Pat. "Come on, don't try to fool me; your face shows your parents came from Ireland." "They did not," said Pat. "They are in Ireland yet."—Vancouver Province.

"ADAMSON'S ADVENTURES"—



He Tastes the High Life.

The Supreme Sacrifice

O valiant Hearts, who to your glory came,
Through dust of conflict and through battle flame;
Tranquil you lie, your knightly virtue proved,
Your memory hallowed in the land you loved.
Proudly you gathered, rank on rank, to war,
As who had heard God's message from afar;
All you had hoped for, all you had, you gave
To save mankind—yourselves you scorned to save.

Splendid you passed, the great surrender made,
Into the light that nevermore shall fade;
Deep your contentment in that blest abode,
Who wait the last clear trumpet call of God.

Long years ago, when earth lay dark and still,
Rose a loud cry upon a lonely hill;
While, in the frailty of our human clay,
Christ, our Redeemer, passed the self-same way..

Still stands His Cross from that dread hour to this,
Like some bright star above the dark abyss;
Still, through the veil, the Victor's pitying eyes
Look down to bless our lesser Calvaries.

These were His servants in His steps they trod,
Following through death the martyred Son of God;
Victor he rose; victorious too shall rise
They who have drunk His cup of sacrifice.

O Risen Lord, O Shepherd of our Dead,
Whose cross has bought them and Whose staff has led
In glorious hope their proud and sorrowing land,
Commits her children to Thy gracious hand.

This hymn of remembrance was written by John Stanhope Arkwright a lawyer of London, a descendant of Richard Arkwright, the great inventor. Mr. Arkwright won the Newgate prize for English verse at Oxford, and sat in parliament for many years.

Hot Water From Exhaust

Many farmers who use a gas engine for operating a milking machine or for pumping water find it very convenient to utilize the engine exhaust for heating water for cleaning purposes. There are two or three commercial devices of this type on the market at reasonable prices which give satisfactory service. It is also not difficult to arrange home-made devices of this kind.

Honey Output

The honey crop this year in the Province of Saskatchewan is placed at 550,000 pounds, an increase of 150,000 pounds over the 1929 output.

Students Sleep on Vibrating Beds to Test Effect on Health

Hamilton, N.Y.—Nine Colgate University men are sleeping nightly on vibrating beds and discovering unexpected ways in which a machine age may cause headaches, circled eyes and unsociable dispositions.

These new "rumble" experiments combine noise and vibrations in a way to imitate some of the more acute sleeping obstacles of modern life. They are conducted in the psychological laboratory under direction of Dr. Donald A. Laird and with the assistance of Herman H. Willie and Clifford H. Shipley.

The vibration is announced as less than on a railroad train and about equal to that experienced in a high grade automobile. It is produced by hanging electric motors under the beds. Each motor is of one-sixth horse-power, attached to the top springs, but swinging along with accessory apparatus below the bed.

Choked Milk House Drains

If the milk house drain stops up due to the collection of casein, the best remedy is to use one of the sink solvents sold by the regular plumbers. These, if used according to directions, will dissolve any grease or animal matter which may have collected. If you are running your sewage into a septic tank a heavy dose of this alkali might kill off the bacteria for a time, but a small does probably would do no serious injury.

CALF IS BORN WITH 4 HEADS

Coquimbo, Chile—A cow on a farm near here has given birth to a calf with four heads. It is planned to place the monstrosity in a zoo.

COAT CUFFS

Oftentimes the only part of your coat lining that is worn is the cuff. You can match the lining with ribbon and add a new cuff very easily.

TO ALL LANDS

Canadian newsprint exports reach all quarters of the civilized world.

Sleeping compartments, fitted with proper bedsteads, running hot and cold water, steam radiators, folding trouser-hangers, and a temperature regulator, are now running on one night express between London and Aberdeen.

Tall Sunflowers Shield Tomatoes From Disease

Washington—Two methods of overcoming one of the plant diseases which cut down the supply of tomatoes, now recognized as a highly valuable part of a well rounded, health-producing diet, have been worked out in experiments recently concluded by scientists of the U.S. Department of Agriculture.

The disease, called tomato yellows, is spread by beet leaf-hoppers, and it was found that by shading the plants in the field not only the disease itself but the activities of the insects are reduced. Muslin tents, it was concluded, provide the most effective shade for the plants, but their expense makes them not generally applicable.

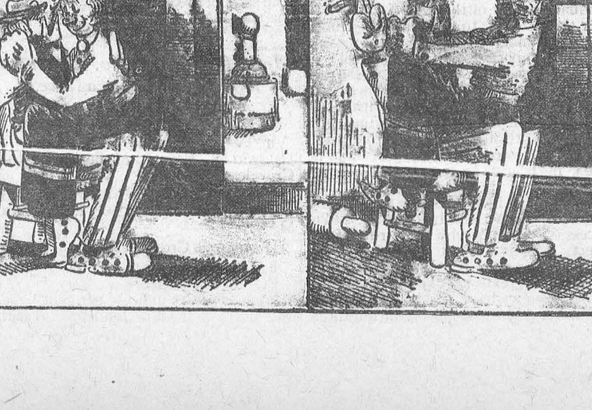
As a substitute for the tents sunflowers were planted between rows of tomatoes in experiments in California.

A visitor from the city one day asked a farmer which he did with such an enormous peach crop. The farmer replied:

"Well, we eat what we can, and what we can't we can."

"We do the same thing," replied the visitor. "We sell what we can sell, and what we can't sell we cancel."

King's Watch "Under the Hammer"



Watch, once property of King Charles I, sold by auction at Hurcombs, England, recently.

Electric Lights in Wintertime Trick Crows Into Flying North

Washington.—Can scientists cause birds to migrate northward instead of south when cold weather comes?

The question is asked in a report to the National Academy of Sciences by William Rowan, of the University of Alberta, and his answer is that certain crows were made to do just that thing.

Dr. Rowan and associates have discovered that neither a warmer climate nor food of the southlands is the trigger that sets birds to flying southward in the fall.

The thing that starts them is the shorter days—that is, less light.

He found that with diminishing light certain organs of reproduction become partly shriveled. Then the birds fly south.

When the days lengthen in spring time these organs grow again and the birds fly north.

Dr. Brown reversed the seasons on the crows by use of artificial light, giving them the increasing long days of spring as the winter cold came on. He released them and many—though not all—flew north.

The Current

If so my life must
Be like unto a river,
And flow within unyielding banks
Of customs Time has fused into conventions,
Grant, then, at least these waters may be clear,
And cool, and to the passers-by, refreshing;
Carrying in unclouded depths
No dregs of hatred, scorn—
No treacherous rocks
To rend the fragile shell of Friendship's bark;
Yet purposeful of current,
Not slow meandering, nor lazily content,
No stagnant bayous, winding channels
Leading blindly on and on;
Not yet rushing forward in a heedless torrent;
But of some constant service unto they who dwell
Upon the grassy slope and call me friend.

"Girls walk home from automobile rides still. If they talked it would be censored."

CANADA AND EMPIRE REFORESTATION

Canada is yearly playing a bigger part in Empire reforestation. Fifty-three per cent. of the tree seed exported has gone to Great Britain, forty per cent. to New Zealand, and the remainder to Australia, Ireland, and other parts of the Empire. During the past ten years the British Forestry Commission has planted 140,000 acres of softwoods, the greater part of the seed used coming from Canada.

CANADA AND INDIAN AFFAIRS

In Canada the first and most important idea underlying the administration of Indian Affairs is protection; that is, to protect a dependent race in its lands, moneys, and its contact with the community. The Magna Charta of the Canadian Indians is the Proclamation of 1763 which set forth that no Indian could be dispossessed of his lands without his consent and the consent of the Crown. The reason of Canada's success in the management of Indians is based on that broad principle.

PRECISE LEVELLING ON VANCOUVER ISLAND

While precise levelling has been carried on intermittently on the British Columbia mainland since 1914, no work of this nature was done on Vancouver island until last summer. A line was begun from Victoria and carried northerly over the Esquimalt and Nanaimo railway as far as Nanaimo. Within a short time the island will be well served with reliable sea level datum.

Unusual Dessert

For a dessert that is different, peal and slice some of the big Japanese persimmons and serve with thick cream and powdered sugar.

BORAX STARCH

If you add a pinch of borax to the water in which you rinse your linen or batiste collars and cuffs, they will have a pristine crispness when ironed.

Surgeons to Study Care of Costly Minor Wounds

Philadelphia.—Common wounds, so frequent they cause loss of time to millions of workers are to be an important consideration when the American College of Surgeons meets here shortly.

Like the "common cold," common injuries have been somewhat neglected by medical science, according to Dr. Franklin H. Martin, director-general of the college, and their care has not kept pace with other developments of surgery.

Statiscians of the college estimate the compensation cost of these wounds at $104,000,000 yearly.

Whites Hired to Carve Stone Totems in Alaska

Wrangel, Alaska—Indian totems for centuries were carved from cedar trees, but prosperity has led several tribes to employ white men with electric tools to cut such historical data in marble and granite.

By the use of the harder material and finer tools modern stoneworkers are able to write the tribal histories in one-tenth the space utilized by the old native carvers. These miniature marble totems are for use only in tribal burial place.

Big 'Un From Meaford

Brantford, — A 30-pound salmon trout, the largest brought into the city in recent years, was part of the catch of a party of Brantford fishermen who have returned from Meaford. The big fellow rose to Lou Alpaugh's spoon and, with the aid of the latter's companions, was landed after a struggle. The local salmon trout record previously was held by Miss Ruth LaRush, whose catch at Meaford last year weighed 22 pounds 6 ounces.

Limit of Division

"If I cut a beefsteak in two," asked the teacher, "then cut the halves in two, what do I get?"

"Quarters," returned the boy.

"Good. And then again?"

"Eighths."

"Correct. Again?"

"Sixteenths."

"Exactly, And what then?"

"Thirty-seconds."

"And once more?"

"Hamburger!" cried the boy impatiently.—Nor'West Farmer.

CANADA'S FIRST STEAMSHIP

The first steamship to be constructed in Canada, the 'Accommodation", was built in Montreal in 1809 by the Honourable John Molson. During the war of 1812-14 the ship rendered notable service on the St. Lawrence river between Montreal and Quebec. A tablet, erected by the National Parks of Canada Branch, Department of the Interior, is to be seen on the outer main wall of the Molson office in Notre Dame street east, Montreal, commemorating the historic event.

By means of an identification system evolved by a Los Angeles police official, it is said to be possible to state the make and size of a motor tyre, which wheel of a car it is on, and the approximate speed, load, and type of car, from the tyre prints on the road.

One windy afternoon an English landlord, while passing along the country lane, observed one of the cottagers eating his frugal meal by the roadside before his humble dwelling. "Why, Henry," he said, "why are you eating out here alone?" "Well, sir-er," the man stammered, "the er-chimbley it do smoke, sir." "That's too bad! Ill have it fixed for you. Let's have a look at it." Before the cottager could stay him the laird proceeded to enter the cottage. As soon as he had opened the door a broomstick fell upon his shoulders, and a woman's voice shrieked, "Back here again, are ye, ye ould villain! Clear out wiv ye, or I'll—" The intruder retired, and the cottager sat in the road shaking his head in sorrow and embarrassment. The other bent over him in kindly fashion and laid his hand on his arm. "Never mind, Henry," said he consolingly, "my chimney smokes sometimes, too."

A. E. GOODFELLOW, Winchester, Ont.

Important Meeting to Farmers

A meeting of far reaching importance to the farming community was held in the Town Hall last week, and as a result of which Winchester has been selected one of three stations for what is known as the Poultry Pool of Eastern Ontario. The other places chosen are Perth and Napanee, and in those two places the business men have taken a lively interest and done much in helping the farmers dispose of their poultry at a profit, and without risk. The meeting here was well attended, and the chair was occupied by Mr. Thos. Stobo, Secretary of the Cloverdale Farmers Club The meeting was addressed by Mr. W. N. Brown, Chief of the Dominion Poultry Branch at Ottawa, and the gist of his remarks was "getting the best cash value out of dressed poultry." Every farmers knows that a well fatted fowl will sell more readily and bring a better price thrn a scrawney and ill fed looking bird, and it is up to the farmers to prepare these poultry for market if they expect to get a good price. To properly prepare fowl for the market they must be crate fed. This entails a little trouble but it will pay the farmer more than fifty per cent for his trouble, as buyers will grab at well fatted and well dressed poultry, and pay the best p ice, because they know they can find a ready market. It was announced by Mr. Stobo, the chairman, that the Club was co operating with the Government in arranging for a Poultry Pool to be held at Winchester, to take care ot all the poultry ot tnis section

As may be seen by Advt. in this issue of the Press, that Pool has been arranged for Monday, Tuesday and Wednesday, Dec. 15th, 16th, 17th, and Dressed Poultry taken to the Egg grading Station will be accepted, and an advance price, fixed by the pool will be paid the farmers. If the poultry when placed on the market will b ing a better price, the farmer will receive it less the charge of handling All Poultry delivered to the Pool will be graded by the Dominion officers, and marked by him and sold accordingly. The advantage of the Pool is that you have a sure market at a set price, and chances of increase, The better condition your poultry the better price you get You get your money on delivery.

At the same meeting there was a discussion with reference to the T. B. test in Dundas County, a d the discussion was at times somewhat lively, but never beyond the control of the chair. A committee of three was appointed to interview the Federal member, and to report at a future meeting.

The Cloverdale Farmer's Club has certainly been of great assistance to this farming community in many ways and in this latest move in making Winchester a Poultry Pool it has accompliseed much.

The Late Mrs. C. R. Rose

With that same serenity of spirit that marked her whole life, Mrs. Charles R. Rose finished her work among us and passed peacefully to rest on the morning of Nov. 6th at her late residence on Clarence Street, Winchester, Ont.

The deceased, whose maiden name was Eliza Jane Keyes, was the only daughter of the late Mr. and Mrs Thos. Keyes of Matilda, and was the last of one of Dundas County's pioneer families.

She was born in Matilda township on the 19th April. 1847, where her early years were spent. Her parents, who came from Ireland, settled in that township on their arrival in Canada, and this home became in the passage of the years a centre of enriching influence, which touched the countryside. When twenty two years of age the subject of our sketch was married to Mr. Charles R. Rose, a prominent young farmer of Rose Haven in Mountain township. Here on the farm, now occupied by Mr. Wesley Rose, the young couple lived happily together, in one spirit, with one mind for the faith of the gospel in the training of their children and the establishment of a christian home.

On April 16th, 1886, death invaded the home and a loving husband and father was called away, leaving a young wife with seven small children, the eldest but fifteen, the youngest but one year and three months It was a deep sorrow and a great loss but with a real spirit of heroism, born of a great faith, this mother set herself to the great task of the maintenance of her home and the care of her fatherless children.

Hardship, sacrifice and loneliness characterized many of those days but these things simply challenged her faith, her courage and resourcefulness and amid it all her confidence in the Heavenly Father's goodness never wavered Until twenty years ago, Mrs, Rose continued to live at the old home at Rosehaven, moving to Winchester in the summer of 1910.

Of a quiet and reserved disposition with no desire for publicity, she lived her life but that life was a continual demonstration of the fact that the gentle and unobtrusive influences are really the most potent and abiding. During the twenty years spent in Winchester, she endeared herself to all by her life of devotion, self forgetfulness and her genuine christian consistency of character.

The funeral service was held in the United Church, Winchester, on Saturday, Nov. 8th, and was conducted by her pastor, Rev. J. A. Waddell, assisted by Rev W. D. Turner of St. Paul's Presbyterian Church, and Rev. John Ostrom of the Baptist Church, in the presence of a large number of neighbors and friends. The remains were laid to rest in the family plot at Vancamp Cemetery.

She leaves to mourn her loss three daughters and two sons: Mrs. J. L. Mill, Winchester, Mrs. L. E. Luther, Cardston, Alta.; Mrs. David Hamilton, Glen Stewart, Ont.; Thomas B. Rose, Cardston, Alta., and Dr. Bruce Rose, Professor at Queen's University, Kingston, Ont.

"To live in the hearts of those we love is not to die."

The floral tributes were as follows:

Gates Ajar—Family

Sprays—Mr. and Mrs Clair and Marie Mill, Mr. and Mrs. Wm. McIntyre, Kenneth and Margaret Rose and Mary Holmes, Kingston; Mr. and Mrs. C. Rose, Mrs. M. Rose, Edith, Neil and Andrew, Mr. and Mrs. T. Miller, Syracuse; W. M. S. Winchester; Dr. and Mrs. E. L. Bruce, Kingston; Mr. and Mrs. T. O. Keyes, Mr. and Mrs. J. W. Ault.

Cut Flowers—Mrs. Eliza Keves, Mrs. Lucy Summers.

The United Church

(Contributed)

The message of Rev. J. A. Waddell on Sunday morning was strongly evangelistic when he spoke from Matt. 4:19

Two thousand years ago this command was given by Jesus to these fishermen and ever since it has been incumbent upon all Christians It is the business of the individual member of the Church to go out after the lost and to seek diligently until they are found. Only as we are impressed with the importance of the task will we be able to measure up to what God requires. One of the first requisites is that we get into vital communion with God. In closing the pastor asked: "Have you ever felt the thrill that comes from leading men and women to Christ?" and he urged his hearers to pray and work to save others.

"Rewards of Fidelity" was the evening subject from the text Luke 19:17. Real success is determined by the verdic of the expert. Life is a great trust for which we must at sometime render an account. There is a great joy and satisfaction comes when we have done our best, and been faithful to the trust committed to us.

Baptist District Conference

The semi-annual meeting of tne Baptist Dirtrict Conference was held with the church at Kenmore, on Sunday, November 16th.

Rev. L. H. Vail, of Vernon, who had charge of the morning session, assisted by Rev. H. O. Llovd of Ormond, and Rev. J. E. Ostrom of Winchester, preached from the text found in Romans, chapter five and verse one. He pointed to the fact that although man had sinned, and continues to sin, he is justified in the sight of a just God, not by joining a church, or believing in a creed, but by faith in the Person and work of the Lord Jesus Christ.

"My hope is built on nothing less
Than Jesus' blood and righteousness."

And then the peace of God floods our lives.

Special musical selections were effectively rendered; a sacred solo, "When the Lillies I Consider" by Mrs. Dr. McKendry of Winchester; and an anthem "O Worship the King" by the Vernon choir. The morning service was brought to a close by the observance of the Lord's Supper, showing forth the Lord's death, until He comes.

The afternoon session was presided over by the President, Mr. A D. Carkner of Ormond. The session opened with a devotional period conducted by the Winchester, B. Y. P. U. under the leadership of Mr. Ewart Carkner.

Mr. Scamble of Ottawa, then outlined the plans of a number of laymen of that city, who are now receiving religious instruction and training under the leadership of Rev. P. P. W. Zinemann, to better equip themselves for service wherever an opportunity may present itself; such as, supplying vacant pulpits, and doing special work among the churches of the Ottawa Association. A discussion relative to this work followed, in which a number took part, heartily endorsing and expressing their sympathy and spirit of co-operation with the work.

Rev. A. Robert George, Pastor ot the First Baptist Church of Ottawa, was the speaker of the afternoon. He pointed out to us our lack of appreciation of the dignity and authority of Jesus Christ and His church. We must get back, he said, to a more consistent and sincere Christian life; and then we shall be able to bring men and women into the Kingdom of God and His church. He made us feel that the soul's relationship to Christ is the one regulating factor in adjusting our lives to the things of this world. Music was supplied by the Ormond Male Quintette.

In the evening the session was opened by a helpful song service, conducted by Rev. A. R. George. The Kenmore B. Y. P. U. under the leadership of Mr. Charles Hill took charge of the devotional exercises Special music was furnished by the Vernon Male Quartette.

Rev. A. R. George, speaker of the evening, preached from the text, Mark 14:18 "Lord, is it I?" that is "who will betray Thee?" The scene was very vividly reconstructed, and modern betrayals were illustrated, e. g. looking for the praise of men in the church work we do, and clinging to grief when we should be revealing the joy of the Lord, etc

This helpful and inspiring day of conference was brought to a close by two sacred duets, beautifully rendered by Rev. and Mrs. J. E. Ostrom.

W. C. T. Parlour Meeting

On Friday afternoon, Nov. 14th, in the S. S. rooms of St Paul's Church, the annual parlour meeting of the local W. C. T. U. was held with the Pres., Mrs. K. Helmer in the chair. Most impressive devotional exercises were conducted by Mrs. J. I. Johnston, who read portions of Nehemiah and Esther, showing that God brought these two persons forward just at critical times in Jewish history to lead His people aright. So to-day, throught the prayers and faithfuness of His people, some one will be raised up to be the leader in the over throw of the present day evils. Mrs. (Rev.) W. D. Summers and Rev. John Ostrom led in prayer.

Good interesting reports of the Provincial Convention held recently in Belleville were brought by Mesdames Duncan, Helmer and Beach. Reference was made to the outstanding andresses of Dr. Irwin who said: "The temperance warfare promises to be a long struggle, but slow gains may prove permanent," and of Dr. Ernest Cherrington of Washington, who said "The first major step in the eradication of any evil to deprive that evil of the sanction of the law and the protection of the Govt."

A pleasing instrumental duet was given by Misses Ada Summers and Winonah Reveler.

The piano solo of Miss Helen Timmins was well-rendered.

The contributions of solos, and duet by Rev. John and Mrs. Ostrom, were very choice, and added to the impressiveness of the meeting. Mrs. (Dr.) McKendry accompanied them.

The patriotic selection 'Canadian Born' was well given by Angus Adams.

Rev. G. O. Davies gave a few good thoughts on Temperance and expressed his enjoyment of the program after which he closed with the benediction.

Dainry refreshments were served and a social hour spent.

Don't fail to see Rod LaRocque in "Captain Swagger" at Lannin's Theatre on Saturday night. A Movie Drama of exceptional merit.

Women's Institute

At the monthly meeting held on Tuesday the helpful ideas given for Mondays and Saturdays were practical and interesting. After the reading of the minutes the Sec'y reported that a balance of $44.40 in the Bank after paying all bills except a small one A communication was read about sending relief to those in need in Northern Ontario. The feeling of the Institute was that the money might be needed for local charity.

It was decided to give Mr. Quart $5 for his services in getting the hall ready and having it ready for Institute meetings.

Mrs. Wm. Lannin, having attended the recent convention in Ottawa, gave a few echoes from it, which were of interest to all. She heard splendid address on the Home and on Reading of Books. Mrs. Laura Rose Stevens spoke on Institute Work in Europe, where she had travelled, and from her speech, Mrs. Lannin gave many good ideas.

Mrs. Earle conducted a questionnaire on organization and work of the Institutes. Our Institute at present has 51 members. The singing of God Save the King closed the meeting.

UNITED FARMERS' CO-OPERATIVE COMPANY OF ONTARIO

FARMERS ATTENTION!

Pin the following dates to your hat

DEC. 15 - 16 - 17

The largest Co-operative undertaking of its kind, in Eastern Ontario, between the United Farmers' Co-operative Co. and the Government Depts. A Co-operative Plan, backed by the Boards of Trade and Business Men of Eastern Ontario, to secure the last dollar in poultry for the farmers.

A Poultry Pool for the above dates will be in operation at the United Farmers' Egg-Grading Station, Winchester. An advance payment will be made at the time poultry is received, with final payment after poultry is sold. The only charges that will be deducted will be the actual handling, selling, and packing charges. The poultry will be graded by a Dominion Government grader and placed according to government standards.

Mr. Farmer, it will pay you well to properly finish your birds for the market.

For any other information Phone 150

UNITED FARMERS EGG-GRADING STATION

Winchester, Ontario.

St. Lawrence League Players Barred

In the press account of the annual meeting of the Ottawa and District Amateur Hockey Association, the following paragraph is of particular interest to this section as it effects the league comprising teams from Prescott, Cardinal, Spencerville and Morrisburg—

"One of the most important resolutions adopted at the meeting was the banning of all players who participate in the St Lawrence League. Complaint was received from one of the groups that players were migrating to the league, and was the unanimous opinion of the meeting that steps would be taken to protect the interests of affilliated groups. Notices are being sent to all clubs advising them to draw to the attention of the players that anyone participating in this league will be debarred from playing in the Ottawa and District Amateur Hockey Association and reported to the Amateur Athletic Union of Canada.

Melvin News
