MR. T. P. McQUAIG

Mr. Thomas P. McQuaig, born in the Township of Matilda 65 years ago, died at his home in Morrisburg Sunday night, April 20th where he has resided during the last two years. Deceased had been in failing health for about two years, and was confined to his room during the last few weeks.

He is survived by his widow, three daughters, Mrs. Edwin L. Deeks, Williamsburg, Lois and Gladys at home, and Hubert of Los Angeles Cal.; also three brothers, John of Winchester, William, Lisbon, North Dakota; and James, Schaller, Iowa; and two sisters, Mrs. Bissell of Lisbon, N.D. and Mrs. Bush, Massena N.Y.

The funeral was held from the family residence on Lock street on Tuesday afternoon at 1 o'clock, Rev. E. Lawson officiating, assisted by Rev. Howe of Elma.

The remains were conveyed to Maple Ridge cemetery for interment.

MISS MARY V. LOUCKS

On Thursday morning, April 17th, 1924 there passed away at her home near Williamsburg, Miss Mary V. Loucks, daughter of Mrs. Alta and the late Guy A. Loucks, at the age of 47 years and 3 months. Deceased had been ailing for the last few years but was able to attend to the house hold duties until Tuesday when she was taken seriously ill with acute Brights Disease and passed away on Thursday.

She leaves to mourn, her mother, one sister, Christie of Rochester, N. Y., and five brothers Reuben R., Guy E. and Isaiah all of Williamsburg, Horatio, B.A., of Ottawa, and Willis of Toronto.

Deceased was of a kind and gentle disposition and was held in high esteem by a large circle of friends.

The funeral service was conducted at her late residence on Saturday p.m., by her pastor, Rev. T. Iseler. Interment was made in Williamsburg cemetery.

MR. THOS. FROATS

The citizens of Wales were shocked on Saturday morning, April 12th to learn that Mr Thomas Froats, a highly respected citizen of that village, had passed away. He had been in his usual health and had been at his work the previous day in Mr. L. G. Wert's grist mill, where he had been employed during the last twelve years serving his employer and the public in a very satisfactory manner. Mr. Froats was a man of mnny sterling qualities and will be greatly missed by his numerous friends. His death was caused by cerebral hemorrhage.

The funeral was held on Monday at 1.30 p.m. at St. David's Church and cemetery and was attended by a very large number of friends and business associates. The services were conducted by the Rector, Rev. G. G. Wright who preached a very appropriate sermon, taking for his text "Be ye faithful unto death, and I will give you a crown of life.

Mr. Froats leaves a widow and one son Cecil, who is now living at Louisvill,e N.Y.; also two sisters, Mrs. Archie Warren of Morrisburg and Mrs. Sylvester Dillabough of Aultsville, and three brothers, Mr. Alex. Froats and Mr. William Froats of Dickinsons Landing. Mr. John Froats of Wales. There were a large number of friends from a distance at the funeral.

30th ANNIVERSARY OF ST. JAMES CHURCH

The 30th anniversary of the opening and consecration of St. James Church will be celebrated on Sunday, April 27th at the 11 a.m. and 7 p.m. services. The Rev. Canon Anderson, L.Th., of Ottawa, to whose executive ability and energy the people of Morrisburg are endebted for this splendid edifice, will preach at both of the services.

Everybody welcome.

THE STORY OF DUNDAS

A Toronto Publisher has purchased the remaining 75 copies of the Story of Dundas. These are the only copies remaining of the entire issue. These copies are being retailed by the publisher at six dollars per copy. By special arrangement at time of sale, I have reserved the right to secure, while they last, copies for any of my Dundas friends at five dollars per copy. If you have been contemplating a copy for yourself or a friend this is your final opportunity. Copies will be mailed direct to you upon receipt of order.

MILES—CASTLEMAN

An unusually attractive house wedding ceremony was that which took place at 7 p.m. on Easter Monday, at the home of the bride's parents Farrans Point, when Miss Olive Lillian Castleman, eldest daughter of Mr. and Mrs. John M. Castleman, was married to Mr. Harold Reginald Miles of Montreal, son of Mrs. Miles and the late George Miles of Toronto.

Rev. A. W. Stewart of Aultsville Methodist Church, officiated, the wedding march being played by Mrs. A. W. Stewart, A.D.C.M. The rooms in the residence were effectively adorned with hydrangea and other potted plants, before which the bridal party stood. The bride who was given away by her father, wore a handsome gown of mauve embroidered chinchilla, and carried a shower bouquet of pink roses, sweet peas and maiden hair fern.

At the conclusion of the ceremony the rite of baptism was administered to Mary Maxine, the small sister of the bride, who was dressed in pale blue crepe-de-chine.

After congratulations had been tendered, the guests, numbering about twenty-five, repaired to the dining room where a very dainty luncheon was served, the colour scheme being carried out in mauve and white.

The presents were numerous and costly and included cheques to the bride and groom from the firms in Montreal with which they were connected.

The groom's gift to the bride was a neckpiece of cocoa fox, and to the organist, an amethyst bar pin.

The happy couple motored to Aultsville and took the 10 o'clock train for Toronto where a reception will be tendered them at the home of the groom's mother.

The bride travelled in a navy suit with beaded overblouse and smart hat to match, and wore the groom's gift. Mr. and Mrs. Miles will take up residence in Montreal.

EARLY CLOSING

Most of the local merchants will begin early closing, Monday April 28th, three nights a week, Monday, Wednesday and Friday, at 6 p.m.

TO SIMPLIFY SYSTEM IN SCHOOLS

General revision of the Ontario public school curriculum was announced this week by Hon. G. H. Ferguson,, Premier of Ontario, who, in his first address to the Ontario Educational Association as Minister of Education stated that a greatly modified course of study would become operative with the beginning of the next school year.

Addressing a general session of the O. E. A. Convention, in Convocation Hall, the Premier declared that the time had come when he intended to make good a long-standing threat "to get even with homework."

To carry out his purpose, he proposes two fundamental changes in the public school curriculum now in use:

1. A readjustment which will make the course of study more flexible and allow individual communities to fashion their courses to meet their peculiar needs.

2. The relieving of overcrowding in the existing curriculum by the elimination from the compulsory class of "a lot of subjects which, I think, are not essential."

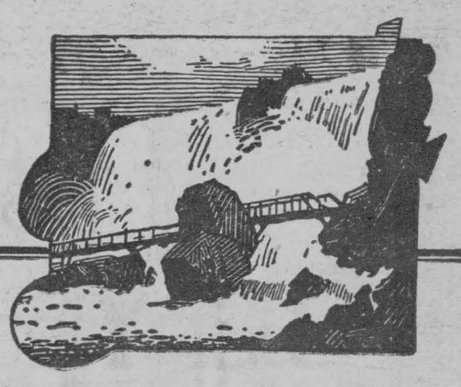

The Premier expressed the hope that the suggested changes would remove a disability under which, he believed, the rural schools of the Province were laboring. Under the curriculum now in use and because of the fact that teachers in ungraded rural schools were required to teach the many subjects, the country child was getting not a training, but a smattering of knowledge."

In order to reach that flexibility which was one of the objects of the revision, he proposed that there be established a minimum requirement of work "in courses of a practical type." Parallel to this would be a series of supplementary courses, any one of which could be brought into operation in individual or groups of schools, provided the responsible authorities believed that the course or courses selected were adapted to the needs of their particular community.

Mr. Ferguson did not give any details of the proposed changes, but he indicated their direction by criticizing the teaching of complicated arithmetic in junior grades, "complex parsing and analysis that's a nightmare to the child," separate text-books for reading and literature the separate teaching of spelling and composition, and the separate teaching of hygiene and physical culture.

In concluding, the Premier intimated that he looked upon the revision as something of an experiment, and suggested that it was a step toward a more democratic control of the public school. He asked the educationists to whom he spoke to try out the new system for a year, and then give him the benefit of their advice on the matter.

One other subject, that of the teaching of first-year university work in high schools, was referred to by the Premier who suggested this innovation as being advisable on the ground of lower costs and greater convenience to senior students throughout the Province.

SUGGESTIONS FOR THIS YEAR'S SPRAYING.

1. Do not spray at all unless you are going to try to do it well. It will not pay.

2. You cannot make a success of apple growing without good spraying.

3. You canont spray well without a good outfit which will give you plenty of pressure. So overhaul the old spray machine at once, or if it is not satisfactory, buy a new one with plenty of power.

4. Get a spray calendar from your agricultural representative, or from Mr. P. W. Hodgetts, Director Fruit Branch, Toronto, or Prof. L. Caesar, O.A.C., Guelph. Tack it up in the spray shed where it will always be available.

5. Use only the spray materials recommended in the spray calendars.

6. Do not spray when it happens to be convenient but spray at the times the spray calendar says. The time of spraying is of vast importance and the times given in the spray calendar are based on years of study.

7. Omit none of the first three regular sprays, some years the first is the most important, some the second and some the third. Each spray helps to make the next more effective and each must be given to insure clean fruit.

8. McIntosh and Snow trees should always receive a fourth application. Read what the spray calendar recommends under "Extra sprays and remarks" and be guided by it.

9. You will not control San Jose scale on large trees, twenty-five years old or more, unless you first prune them heavily and scrape the loose bark off with a hoe. Then see that every particle of the bark is wet with the liquid; a mere mist or a light spray will not kill the insect. Use lime sulphur 1 to 7 of water, preferably just as the buds are bursting.

10. For scab and codling moth cover both sides of every fruit and also cover every leaf. Scab attacks the leaves too and is often washed from them to the fruit. It will require from 7 to 13 gallons for each tree twenty-five years old or upwards, not just 2 or 3 gallons.

11. Be sure the spray reaches right through the trees. To insure this go in, if necessary, underneath the tree and spray the part beyond the trunk first, then step back to the outside and spray the remaining part. Do this from both sides. Remember that it is the centre or shaded part of the tree where scab naturally is worst and poor sprayers nearly always miss this side though they often cover the sunny or outer side all right.

12. A tower, even with a spray gun, is a great help. Often it will suffice to stand on the tank. A railing or support on it removes the danger of falling.

13. Do not use large openings in the discs of either nozzles or spray guns unless you have 225 pounds pressure or more. They are wasteful, make it difficult to maintain high pressure, and give too coarse a spray.

14. In many cases better work will be done with a rod and three-angle disc nozzles than with a gun. In any case use some system in spraying so that you will make sure everything is being covered in a methodical way.

15. Have a handy place to fill the tank. Ten minutes should be long enough for any tank.

16. Do not stop spraying because rain threatens. Go right on until the rain has well begun. It is rain and moisture which cause scab outbreaks.

17. Do not stick to an eight or ten hour day when spraying, but make every effort to get it done as soon as possible without sacrificing thoroughness. If the second spray is not finished before the blossoms open, omit the poison and go on until it is finished.

18. Wash out the tank and pump clean water through the machine and nozzles at the close of each day.

19. Remember spraying gives healthy foliage and is a great factor in producing annual crops as well as giving clean fruit. Even trees that are not bearing should be sprayed to keep them healthy.

20. Get a new spray calendar each year.

21. When in difficulty consult your agricultural representative or write to Prof. L. Caesar, O.A.C., Guelph, or W. A. Ross, Vineland.

UNTHRIFTY HORSES.

Horses are frequently seen that give little response to liberal feeding and care, continuing unthrifty due to the presence of intestinal parasites, a point often overlooked in the care of animals.

Variable appetite, unthrifty and poor condition, indigestion with periodic attacks of colic, are the common indications of the presence of cestodes, or tape worms. Two species of tape worm infest the intestines of the horse; one, the *Tenia Plicata*, ranges from six inches to thirty inches in length; the other, *Tenia Perfoliata*, is from one to two inches long. Both have comparatively large, four-sided heads in which are fashioned four round cup-shaped suckers. Their bodies consist of a number of overlapping segments. The tape worm segment, or joint, is a complete reproductive organization. When ripe, detached and expelled with the contents of the bowels it can be described as a small rectangular body containing eggs. After breaking away the eggs may be drifted or carried from place to place by various agents. Many perish, but a few are able to continue the species by being taken up in food or water by other animals, in the intestines of which they go through their life cycle and provide for the carrying on of the next generation.

Preventive measures consist in providing clean fodder and water; the avoidance of low, damp pasture land and ponds contaminated by the droppings of horses. If tape worm is suspected and no qualified veterinary is available to administer treatment, the following dosage can be given: creolin, one-half ounce; oil of turpentine, one and a half ounces; and raw linseed oil, one pint; to be given at one dose as a drench, on an empty stomach. The treatment may be repeated at intervals of several days, if necessary. Clean fodder and clean drinking water are highly important in keeping live stock healthy and free from intestinal parasites. Drinking from filthy, shallow pools or ponds in which hogs wallow and cattle and horses wade is responsible for considerable trouble, and this trouble does not usually show up until late winter or early spring. A cement water trough, well supplied with clean, cold water, is the best insurance against tape worm in horses. —L. Stevenson.

Plantin' Time.

Some folkses put their trust in signs,
When plantin' spuds, cucumber vines,
An' other kinds o' garden truck;
They'll tell you that the moon ain't right,
An' you must wait till dark or light,
Which ever 'tis, if you'd have luck.

An' one will say, "The moon is dry,
The way she's hangin' in the sky,
An' crops are apt to burn," they'll fret;
But someone else, as like as not,
Will say, "The seeds are goin' to rot,"
An' tell you that same moon is wet.

But I don't mind their talk at all,
For when I hear the robins call,
An' geese a-honkin' in the sky,
When every breeze smells fresh an' sweet,
An' ground breaks mellow under feet,
I reckon plantin' time is nigh.

—Myrtle Blassing.

Information for Farmers

The following bulletins and many others, of which these are examples, are available to farmers, and will be sent free on request by the Dominion Department of Agriculture. The information they contain is both useful and practical, and may point the way to greater profits from farming operations.

Have a May-Pole Dance at Your Spring Social.

The May-pole dance given by children is always attractive. The dance should be given out-of-doors or on the floor of a large hall, as space is required. The pole should be from twelve to fifteen feet in height, with streamers of colored muslin attached near the top. An equal number of boys and girls might take part. Eight of each, perhaps. Each child takes hold of the end of a streamer and, when the music starts, the girls dance around a circle in one direction, the boys in another, passing each other in a way which weaves the streamers around the pole. Continue until the circle grows too small for further dancing. When the music starts again the dancers go in the opposite direction until the weaving is undone. There are beautiful musical numbers which you might have also. If you have no musicians upon whom you can depend, use a talking machine. The following records will be found suitable: "Oh, That We Two Were Maying," "Mendelssohn's Spring Song," Rubenstein's "Melody in F," "Lass of Richmond Hill," and "Morning," by Grieg.

Prune the Berry Bushes.

The old canes of raspberries and blackberries should all be removed before the new wood gets too far advanced. Sometimes I have seen these old canes left in the patch for years at a time, until it became almost impossible to get around to pick the berries. The right time to cut them out is just after the fruit has been picked, for then any insect or fungus trouble will be eliminated before it gets a chance to move over into the young canes.

No cane that has borne fruit will bear again. Next year's fruit will be on the new canes that grow during the season when the previous year's canes are fruiting. If the work is not done then, it should be done at the first opportunity after, and never later than the time the plants begin to swell the buds in the spring. You can remove weak new growths then, and thin strong canes to three or four to the hill with advantage. You gain in quality to make up for the number of berries you remove.

Spraying Apples.

The Department of Entomology of the Ontario Agricultural College conducted spraying experiments on a ten-acre block of McIntosh and Snow varieties at Simcoe in Norfolk County. The whole orchard, with the exception of the trees kept for checks were sprayed, part of it receiving four applications and part only three. The crop was fairly good—about 1,000 barrels—and the results from both commercial and the investigational standpoints very satisfactory, the percentage of apples absolutely free from worms or scab or defect of any kind being 93.4, whereas the checks (unsprayed trees) had an average of 91.2 per cent. of scab alone. One of the objects of the experiment was to show that even McIntosh and Snow apples could be kept free, or almost free, from worms and scab by good spraying.

Roads, to be good roads, must be good roads on bad days.

THE CHILDREN'S HOUR

DR. QUACK FOX TAKES A TUMBLE AND LEARNS A LESSON.

Do all our little folks remember how Dr. Quack Fox fooled Bruin by giving him a bottle of cough syrup for a bottle of "Sooth-all?"

Well, it was just a week from the very day that Dr. Quack Fox played this trick that he found it necessary to again take the road that lead past Rolly Rabbit's house. As he neared the house he chuckled to think how cleverly he had fooled Bruin and made a profit for himself.

"That was a good trick on Bruin," he said to himself. "I wonder when he discovered it? I would like to know, but I guess I won't stop to find out. I might get one played on me."

In fact, he was thinking so much about his clever little trick that he did not look where he was going. Just as he was right in front of Rolly's house, he stubbed his toe on a rock in the path and down he went, kerplunk. His case flew open and bottles scattered in every direction.

Rolly was preparing a porridge for the noon meal by the kitchen window, and saw it all. At first he wanted to laugh, but his heart was kind and gracious. Forgetting the mean trick, Dr. Fox had played on his friend, he hastened out to help him.

The doctor was just picking himself up when Rolly reached him.

"Oh, sir, are you hurt?" asked Rolly sympathetically.

"My toe is," said Dr. Fox, "and my knee hurts dreadfully where it bumped the rock."

"Oh, I'm so sorry," said Rolly. "Come right in the house. We will fix it up in just a few minutes. I am sure that I have something that will help it." And so Dr. Fox went limping along into the house with Rolly Rabbit, groaning at every step.

Bruin sat reading the last edition of Woodland News when they came in, and was quite surprised when he saw who it was. But when Rolly Rabbit explained that the doctor had fallen and hurt himself badly, he was just as anxious to help as Rolly.

In a short time they had the bruised foot all bandaged with "Sooth-all."

"And does that feel better?" asked Bruin as he tied the last bandage.

"Oh, ever so much better," replied Dr. Fox. "Thank you both so much."

"Oh, we are very glad to help you," said Rolly.

"And may I ask why?" asked Dr. Fox.

"Because we would like to be helped that way ourselves," answered Rolly.

As Dr. Quack Fox limped toward the door, he said, "I have learned a lesson from you to-day. I can't thank you enough for all you have done for me. You have been kind to me even after I played that mean trick on Bruin. Now I know what friends really mean and I'm going to try to make more of them. I hope that some day I can do something to help you."

To stick labels on syrup cans, reduce varnish with alcohol to a thin paste. If it gets thick by evaporation, add alcohol and it will be as good as ever.

How contagions spread

IN the world of school and play all children are equal. Youngsters from homes less clean than yours come into intimate contact with your children.

To guard against contagion, make sure that your children are completely cleaned and purified whenever they come in from play.

Your great ally is Lifebuoy Health Soap. The safe antiseptic ingredient of Lifebuoy penetrates each dirt-laden pore. Rich, creamy lather carries it into every cranny of the skin. The healthful odour vanishes a few seconds after use, but the protection remains.

LIFEBUOY
HEALTH SOAP
More than Soap - a Health Habit

Keep your children safe with Lifebuoy. Teach them to use it often.

Best Varieties of Roses

Unless one has plenty of ground and financial resources, it is wise to select carefully the varieties of roses to be planted in the garden. Because a rose wins a National Society medal in England, or in fact in any other country, it does not follow that it would succeed in an Ontario garden. Many of the most beautiful varieties are weak growers and sparse bloomers. Others, again, may be subject to disease and yield a crop only after much troublesome treatment for mildew and blackspot. The Ontario Rose Society has done good work in analyzing the roses grown in the province with a view to establishing a list of those that are most dependable. A canvass amongst the members in different parts of the province resulted in the securing of a list of twelve of the most popular varieties, as follows:

Frau Karl Druschi, white, belongs to the Hybrid Perpetual class. Blooms fairly constantly throughout the summer and fall months.

Gruss an Teplitz, a Hybrid Tea, bright scarlet. The flowers are borne in clusters and are highly fragrant.

Madame Edouard Herriot, shrimp pink Hybrid Tea, very attractive.

Mrs. John Laing, Hybrid Tea, pink, gives especially fine bloom in the autumn.

Richmond, a red rose, blooms well in September after heavy June crop.

Ophelia, pink Hybrid Tea. Is charming in the bud and open stage; very fragrant.

Caroline Testout, pink Hybrid Tea. This variety made the Pacific Coast City of Portland famous for its roses.

General McArthur, a red rose of the Hybrid Tea class. Has stood the test of many years.

J. B. Clark is a show rose in the red class. Very productive during the main crop season and gives a small return in the autumn.

Ulrich Brunner, a Hybrid Perpetual of great size and fine fragrance.

Killarney is a greenhouse and garden rose of a pink color.

Lady Alice Stanley, a pink rose not unlike Killarney both in color and habit of growth.

Roses of most of these varieties are often obtainable as premiums with membership in horticultural societies. Through this medium these fine varieties are found growing almost everywhere in the province.—Ontario Horticultural Association.

A Garden of Herbs

BY A. B. CUTTING.

In the garden of long ago, there was always a corner or bed devoted to the culture of herbs.

The six suggested here are well worth growing. Spearmint, which should be available to every housewife, is not included because sprigs for use or roots for planting easily can be secured from a friend or neighbor.

Dill—One of the best of the comparatively newer herbs. It grows from two to two and a half feet high. Culture same as for carrots. The seeds, gathered when ripe, are used as a flavoring for condiments and pickles, and sometimes for medicine. Although an annual, the plant will reproduce itself by volunteer seedings from seed ripened and fallen.

Lavender—An aromatic shrubby plant not used in food but one of the most worthwhile herbs for the garden. When growing, it is beautiful and its flowers, when dried, are delightful for scenting household linen. It delights in a fine, rich, rather limy soil but requires somewhat more shade than the other herbs. Needs protection in cold districts in winter. Can be increased by dividing the old roots.

Sweet Marjoram—A perennial but generally grown as an annual. The seeds are very small and should merely be pressed into the soil. The leaves and other green parts are used in summer and dried in winter for seasoning. A few plants will add to the interest of any garden.

Sage—One of the most extensively used plants for seasoning. Sometimes used as a tonic in domestic medicine. Grows from one to one and a half feet high. In very cold districts, the plants need protection in winter. Everyone is familiar with this old-timer.

Summer Savory—Even the smallest garden plots should provide room for home-grown summer savory, if no other herbs. Grows eight to twelve inches high. The seed is very small. The leaves and young shoots may be used for flavoring in summer or the leaves, small stems and the flowers dried for seasoning in winter. Some European folks put up (or down) a few sprigs of this herb with garden beans in a brine. These flavored beans are then cooked as wanted with fresh meats and potatoes.

Thyme—A shrubby plant about 10 inches high, the small aromatic leaves of which are used for flavoring. Will stand transplanting. Generally hardy but may need protection in extremely cold districts. The broad-leaved English variety is best.

Many of the herbs may be planted as edging to borders or may be grown beside the paths and walks. A bed, a border or a corner given over entirely to herbs gives greater satisfaction; they are thus more easily cared for, more easily gathered and do not interfere with the other crops. They are generally easily grown in rich, mellow, well-worked soil. Sow the seeds in spring in shallow drills about one foot apart, and when the plants are up three or four inches thin out and transplant. Cultivate until midsummer and then mulch around the plant with straw to prevent sanding of the foliage by fall rains. In the north and east it is safest to protect all the perennial kinds in winter.

Those that are grown for their leaves should be gathered in the morning of a fine day as soon as the dew is off and dried quickly. If stored before they are perfectly dry, the leaves are likely to mold. The proper stage of growth for harvesting is just before the plants reach full bloom. Herbs should be cut before being frozen, although freezing may not injure them.

Any one interested in growing herbs on a commercial scale for medicinal or other purposes should write to the Department of Agriculture, Ottawa, or his, or her, provincial department of agriculture or experiment station for advice respecting the possibilities in the district concerned and for bulletins and other sources of information on the subject.

Leg Weakness in Chicks.

By S. W. Knipe.

Leg weakness is an ailment prevalent with closely confined chicks. Probably it is more correctly termed a "symptom" rather than a disease since it apparently may occur under different methods of feeding and management and in different forms, such as rheumatism, neuritis, and rickets.

Symptoms.—As the name implies, the legs become weak. It starts with an unsteadiness and the chicks soon lose use of the legs. The appetite usually continues to be good at first. The largest and most vigorous chicks are often the worst afflicted. It occurs in chicks from one to six months of age. Rheumatism and gout usually show enlarged joints.

Causes.—Little is definitely known as to the cause of leg weakness in chicks. Lack of green food, mineral matter, fresh air, exercise and sunshine, deficiency in the vitamine content in the ration, overfeeding of highly nutritious feeds, too much heat, damp quarters, and overcrowding are causes most often assigned for leg weakness.

Prevention and Cure.—It is a generally recognized fact that chicks which have access to the ground outside after they are a week old, rarely ever become affected with leg weakness.

Whether this provides exercise, sunshine, fresh air, green feed or minerals from the soil is an unanswered question. Nevertheless, the results are certain. When the weather is cool even a few minutes outside daily will be effective in preventing or curing leg weakness.

When weather conditions are bad and the chicks must be kept indoors the following will be beneficial:

Keep sand or fine litter on the floor.

Provide fresh pieces of sod each day.

Feed grain in clean dry litter to induce exercise.

Keep the brooder house well ventilated.

Supply green feed such as sprouted oats, lettuce, green alfalfa or clover.

Mix 5 pounds of granulated bone in 100 pounds of mash or feed the bone in a hopper.

Sometimes wood or hard coal ashes placed in a corner of the brooder house apparently have a value in preventing and curing leg weakness. The chicks will eat it readily and it can do no harm.

The surest means of both prevention and cure is to get the chicks outside as much as possible after they are a few days old.

Electric Circuit Troubles.

When the ammeter shows that the electrical system is not functioning as it should, a voltmeter offers a simple and quick method of discovering whether the wiring of the generating circuit is at fault. Readings are taken at various points of the circuit; first one from the live terminal of the generator to the frame of the car; then one from the live-battery terminal to the frame of the car. Taken with the engine running, these readings should be approximately the same, the reading from the generator being possibly half a volt higher than that from the battery.

Trouble due to poor connections or a break in the wiring is indicated when the generator voltage shows much higher than that from the battery. If the readings indicate trouble here, other points in the circuit between the battery and the generator should be tested, and the break or poor connection will be found in between the places where there is considerable difference in the voltmeter's readings on the same circuit.

He is not here; for He is risen as He said. Come see the place where the Lord lay.

RED ROSE COFFEE

Pure! No chicory or any adulterant in this choice coffee C-2

Surnames and Their Origin

O'SULLIVAN.

Variations—Sullivan.
Racial Origin—Irish.
Source—A given name.

O'Sullivan is one of the most ancient family names in Ireland. Whereas, in all the races of northern Europe which originally had some form of clan or tribal organization, some connection can be traced between a large percentage of the modern surnames and the ancient nomenclature, the connection often is more or less vague, and likely to stretch across a gap in history between the abandonment of the clan system and the development of the modern surname. This is not true of Ireland. Among the Irish there has been no gap.

By far the greater number of Irish names to be found in Canada to-day trace back in an unbroken line to the clan and sept names. (The sept is a subdivision of the clan). In fact, there are many persons in Ireland to-day who, among their countrymen, are still known to the hereditary chieftains of these ancient lines. Such persons are colloquially known by their surnames with the article "The" as a prefix. Thus "The O'Sullivan is the man who would be the head of the O'Sullivan clan did modern conditions permit of the actual maintenance of the ancient system.

The given name from which the name O'Sullivan is derived is Suilleabhain, that is, as nearly as it can be represented by English letters, for the Irish alphabet and pronounciation differs considerably from the English. But the spelling is probably a closer representation of the sound. The prefix "O" is simply a contraction of "Hua," meaning "the descendants of.

THACKERAY.

Variations — Thackery, Thackuray, Thackman, Thacker, Thatcher.
Racial Origin—English.
Source—An occupation.

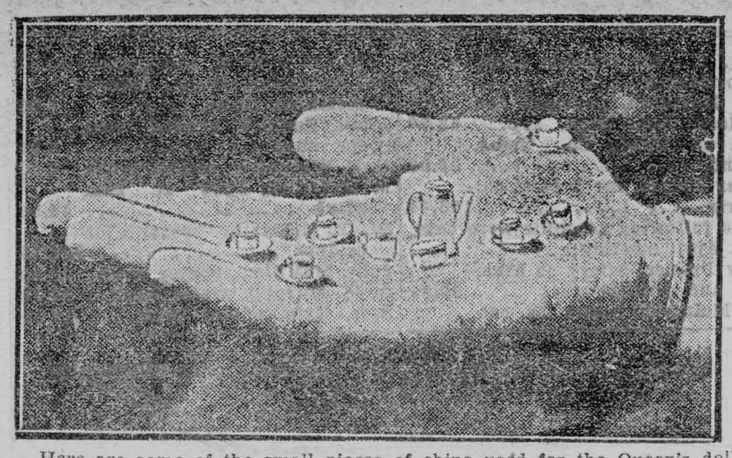

In the governmental and religious records, tax lists and the like of medieval England such names as "Roger le Thaccer" and "Hobbe le Thechere" are to be found.

At that time, of course, the appendages to the given names for the most part were purely descriptive, signifying the trade with which their bearers followed. The trade was that of roofing, for with rare exceptions the ordinary house of the Middle Ages had a thatched roof.

Later the same names are met, but here and there minus the "le," showing that in some cases at least they were being used as real and not merely descriptive names. Still later such combinations as "Walter Thaccer, le Cordwainer," proved that the name had become a family one, and that the said Walter was not a thatcher at all, though his name might indicate it.

The harsher pronunciation generally developed in the northern parts of England and the softer in the south, just as the same word became "church" in the south and "kirk" in the north, or "fisk" in the north and "fish" in the south, or again "dike" in the north and "ditch" in the south.

The flourishing ending "'ay," later developing in some cases to a plain "y," were simply whimsical or vain endings added in much the same spirit that some names were Latinized to show the learning of their bearers.

Here are some of the small pieces of china used for the Queen's doll house, which are actual replicas of genuine china sets, but made in one-twelfth regular size.

SPRING IMPURITIES DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This Season.

Dr. Williams' Pink Pills are an all-year-round tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purifying and enriching, and every dose of these pills helps to enrich the blood. In the spring one feels weak and tired—Dr. Williams' Pink Pills give strength. In the spring the appetite is often poor—Dr. Williams' Pink Pills develop the appetite, tone the stomach and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils—Dr. Williams' Pink Pills clear the skin because they go to the root of the trouble in the blood. In the spring anaemia, rheumatism, indigestion, neuralgia and many other troubles are most persistent because of poor, weak blood, and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people dose themselves with purgatives, but these only further weaken themselves. A purgative merely gallops through the system, emptying the bowels, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood which reaches every organ in the body, bringing new strength and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Sold by all medicine dealers or sent by mail at 50c a box by The Dr. Williams' Medicine Co., Brockville, Ont.

The Back Parlor.

We have most of us seen it; when doors have been open
We have got just a glimpse of it, cosy and bright,
The fire in the grate and the funny old sofa,
The lamp shining homeliness over the night;
We have turned from our buying a moment to pop
Right into that parlor behind the old shop.

And sometimes there's been a nice clatter of dishes,
And sometimes a waft of the hot toast for tea,
And sometimes a mingle of relish so toothsome,
We have wondered whatever the fragrance could be;
It seemed just the place for a chat and a chop,
That little back parlor behind the old shop.

It hasn't fine ornaments, just a few photos,
And bowls of Sweet Williams and posies like that,
A loud-ticking clock and a bookshelf of prizes,
And drowsily purring an old tabby cat;
But tiredness and worry away from us drop;
We love that back parlor behind the old shop.

Passed!

Farmer—"So you've had some experience, have you?"
New Man—"Yes, sir."
Farmer—"Well, what side of a cow do you sit on to milk?"
New Man—"The outside."

Ask for Minard's and take no other.

I have never had time, not even five minutes, to be tempted to do anything against the moral law, the civil law, or any law whatever. If I were to hazard a guess as to what young people should do to avoid temptation, it would be to get a job and work at it so hard that temptation would not exist for them. —Thomas A. Edison.

If you sulk in the corner and refuse to play the game, you do quite as much harm to yourself as you do to anybody else.—Mr. Asquith.

How Many Pounds Would You Like to Gain in a Week?

If you are thin and want to gain Weight; weak and want to be strong, I will send you a sample of famous Alexander Vitamines, absolutely Free. No money, just name and address for sample. ALEXANDER LABORATORIES, 334 Bohan Building, Toronto, Canada.

World's Most Ancient Building.

It was King A-an-ni-pad-da of Ur, in Messopotamia, who built the oldest building in the world which is still standing.

He reigned about 4,500 years before the birth of Christ, and the building is thus about 6,500 years old. Ur was the native place of Abraham and the city of Nebuchadnezzar.

The King's name and title were learned by the chance discovery of a gold scaraboid bead, on which they were engraved.

Mr. C. Woolley, leader of the joint expedition of the British Museum and the University Museum of Pennsylvania, made the discovery during the excavations, at Ur. The little temple which is the oldest building in the world is at Tel el Obeid, about four miles from Ur.

ALL FOODS SHOULD BE SEALED.

The medical profession very generally advocate that all food products should be sold in sealed packages. All cities rigorously inspect butcher shops to prevent meat from being infected, many prohibit milk from being sold in bulk and gradually this will come with everything. "SALADA" was the first to introduce the package idea as regards tea, over thirty-two years ago, and "SALADA" is still a little purer and a little better than other teas. It has by far the largest sale.

Icebergs Help Industry.

Of all dangers that beset ships engaged in the North Atlantic traffic there is none so great as that of the iceberg.

These great floating islands of ice will soon begin to drift down from the north, and so well is the peril recognized that, in the spring, ships crossing the herring pond take a more southerly course than at other times of the year. Icebergs are not only dangerous in themselves, but they also cause fogs which hide them and make the risks even greater than they would otherwise be.

The idea that an iceberg could possibly have any use would make the average sea captain gasp, yet one of the biggest of marine industries has been helped considerably by icebergs.

Nearly all the codfish from which are made that wonderful medicine, cod-liver oil, are caught on the Banks of Newfoundland, a vast area of shallows which run far out into the sea. It is known that this great submarine plateau is composed entirely of rock and earth dropped by melting icebergs. The great icebergs come down from the huge glaciers of the west coast of Greenland, and their bases are full of detritus—earth, gravel, and rock. An single berg carries enough to build a village.

All this stuff is shed as the ice melts, and in course of ages has built up the Banks. The process still continues, and the debris deposited on the sea bottom makes it the great breeding place for cod, herring, and other fish. It contains food for these fish, and if the great bergs ceased to drift south this gigantic fishing industry might soon be a thing of the past.

ASPIRIN

Beware of Imitations!

BAYER

Demand

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-three years for

Colds	Headache
Toothache	Lumbago
Neuritis	Rheumatism
Neuralgia	Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

A High Grade of Paper.

"I want some paper", the small boy said to the storekeeper.

"What kind of paper?"

"Better make it fly paper," was the reply. "I'm going to make a kite."

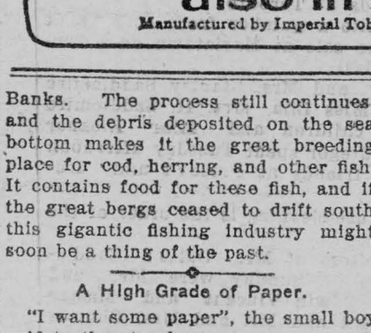

The Glass Blowers.

Young Wife—"Chester, dearest, how do they arrange these pickles so nicely in the bottles?"

Young Husband—"They pile the pickles up, Petsey, and then they blow the bottles about them."

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Rheumatism

Minard's penetrates to the root of the trouble and eases pain. The universal remedy.

MINARD'S "KING OF PAIN" LINIMENT

Improve Your Appearance

More Phosphate if you want your complexion to clear, eyes to brighten, and skin to become soft and smooth. Thin, nerve-exhausted people grow strong on Bitro-Phosphate and druggists guarantee it. Price $1 per pkge. Arrow Chemical Co., 25 Front St. East, Toronto, Ont.

For the Kidneys

Kidney troubles are frequently caused by badly digested food which overtaxes these organs to eliminate the irritant acids formed. Help your stomach to properly digest the food by taking 15 to 30 drops of Extract of Roots, sold as Mother Seigel's Curative Syrup, and your kidney disorder will promptly disappear. Get the genuine at your druggist.

THEY TELL THEIR NEIGHBORS

Women Tell Each Other How They Were Helped by Lydia E. Pinkham's Vegetable Compound

Woodbridge, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for female troubles. I would have headaches, backaches, pains between my shoulders and under my shoulder-blades and dragging down feelings on each side. I was sometimes unable to do my work and felt very badly. My mother-in-law told me about the Vegetable Compound and I got some right away. It has done me more good than any other medicine I ever took and I recommend it to my neighbors. You are quite welcome to use this letter as a testimonial if you think it will help some poor sufferer."—Mrs. EDGAR SIMMONS, R. R. 2, Woodbridge, Ont.

In nearly every neighborhood in every town and city in this country there are women who have been helped by Lydia E. Pinkham's Vegetable Compound in the treatment of ailments peculiar to their sex, and they take pleasure in passing the good word along to other women. Therefore, if you are troubled in this way, why not give Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

SPRING WEATHER HARD ON BABY

The Canadian Spring weather—one day mild and bright; the next raw and blustery, is extremely hard on the baby. Conditions are such that the mother cannot take the little one out for the fresh air so much to be desired. He is confined to the house which is often over-heated and badly ventilated. He catches cold; his little stomach and bowels become disordered and the mother soon has a sick baby to look after. To prevent this an occasional dose of Baby's Own Tablets should be given. They regulate the stomach and bowels, thus preventing or relieving colds, simple fevers, colic or any other of the many minor ills of childhood. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Some Illustrious Weights.

In an old London inn known as the Sign of the Coffee Mill Mr. E. V. Lucas found a pair of scales on which during a century and a half many notable men were weighed. Ever since the year 1765 records of illustrous and also of regal ponderosity have been kept at the place, which is in St. James Street. If you want to know how much Charles Lamb weighed in 1814, writes Mr. Lucas in the Romance of Old London, I can tell you that when he was thirty-nine years old he turned the scale in his boots at one hundred and twenty-nine pounds, much more that I was expecting. But his boots may have been heavy.

I discovered that Lord Byron, who we know was sensitive about his bulk, was weighed many times, first in 1806, when he was living at No. 8, only five doors away; then he weighed one hundred and ninety-four pounds in his boots. The realization must have distressed exceedingly one who lived in fear of embonpoint even to the extreme of drinking vinegar and generally mortifying the flesh. In 1811 in shoes only—he had got his weight down to one hundred and thirty-seven and a half pounds. Tom Moore seems similarly to have decreased, for in 1807 he was one hundred and forty-isix pounds and in 1809 one hundred and twenty-five.

Another famous man, one who also could have had no wish to lose his figure and who will go down in history as much for his insolent question as to the identity of the Prince Regent —"Who's your fat friend?"—as for his fastidiousness in ties, was Beau Brummell. In 1798 Brummell stood at one hundred and seventy-two pounds in boots, in 1811 at one hundred and ninety-two pounds in boots and frock, and in 1815 at one hundred and seventy-eight pounds in shoes. In 1816 the Beau had to fly from the creditors to Calais,. None the less there is still one more entry, in 1822, suggesting that he was able to visit the scenes of his old triumps again; and then he was one hundred and fifty-three pounds in boots.

As for the "fat friend," later George IV., he evidently earned the epithet. In 1791 he weighed two hundred and forty-two pounds in boots, in 1798 two hundred and twenty-four pounds "after gout," in 1800 two hundred and forty-seven pounds in hat and boots, and later that year two hundred and twenty-nine pounds "after gout." In 1803 "with gout" he weighed two hundred and eighteen pounds.

The figures help us to picture those solid men of a century ago. We can see them trotting or mincing or promenading with an air, small and large, down the sunny side of St. James Street to weigh themselves before dinner.

Labor's High-Class Club.

The workmen of Havana, says a writer in Travel, have achieved a position for themselves. Probably in no other part of the world has the laboring man such a club as exists in the opera house building in Havana. The subscription is high—it is two dollars a month—but so are wages, and every chauffeur, cigar maker and domestic servant seems to belong to it.

The rooms are of marble decorated with paintings by famous artists. There is a school; there is free medical attendance; and there are benefits at death. The workmen themselves own and manage the building.

In the cigar factories the larger rooms are furnished with a high rostrum from which during working hours readers, paid by the workmen, declaim politican articles from the daily newspapers or poetry or fiction. On one of my visits the reader was dealing with high politics at the top of his voice. What he had to say was not flattering to the otherside, as I judged from the stamping of his feet and the sawing and clutching of his disengaged hand. But you could not judge from the impassive faces of his employers as they rolled their cigars whether they agreed with the newspaper or not. At any rate they must have felt that they were getting their money's worth from the reader.

His Hearing Restored.

The invisible ear drum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth avenue, New York city, will be given a prompt reply. advt

Pluck wins! It always wins! Though days be slow and nights be dark 'twixt days that come and go, still pluck will win. Its average is sure. He wins the most who can the most endure, who faces issues, he who never shirks, who waits and watches and who always works.

It is fraud to accept what you cannot repay.

Keep Minard's Liniment in the house.

GRANTLEY

Mr. and Mrs. Peter Zeron of Newington spent a day last week with Mr. and Mrs. James Hesson.

Mr. Jack Hart of Porcupine spent the week end with his sister Mrs. Thos. Carr.

Miss Winnie Gallinger returned to her home in Hamilton on Saturday accompanied by her mother Mrs Elijah Gallinger.

The cheese factory is running with Mr. Allan Coir as cheese maker.

Mr. Milton Carr spent one day last week with Mr. John Bagart.

Miss Jane Hart of Montreal is spending her Easter holiday at her home here.

Mr. and Mrs. A. Wells and family of Aultsville and Miss Hazel of Grenadier Island spent Sunday at Mr. and Mrs. Milton Carr's.

Mr. and Mrs. Charles McMillan and family spent Sunday with Mr. and Mrs. Don. Carr.

Miss Charlotte Carr is spending her Easter Holidays in Chesterville

Mrs. W. T. Hart underwent an operation on Thursday last. We all hope to see her out again soon.

Mr. and Mrs. Bert McMillan spent Sunday with Mr. Wm. Hollister, Osnabruck.

Mrs. Perrault is able to be out of doors after her recent illness.

Mrs. Osborne McMillan spent a few days last week with Mrs. Don. Carr.

Mr. George Eligh of Avonmore spent a few hours with Mr. Milton Carr on Sunday.

The Misses Lottie and Bessie Taylor and Anna Perrault spent Sunday evening with Miss Wilda Beckstead.

Mr. and Mrs. Wallace Myers spent Sunday evening with Mr. and Mrs. C. McMillan.

CEDAR GROVE

Mr. and Mrs. Earl McIntosh visited Mr. and Mrs. Arnold Crites, 3rd Ave. on Thursday.

Miss Ethel Copas is spending the Easter holidays with Mr. and Mrs. Stuart Wier, Farrans Point.

M. S. BECKSTEAD, Clerk

Makes Permanently Bright, Beautiful Walls

Two of the most exclusive Canadian Hotels placed an order recently with Lowe Brothers for 5,000 gallons of Mellotone Flat Wall Paint. The luxurious appointments of these large hotels, as is well known, is of paramount importance—but it was not alone for its beauty, but as well for its economical features that Mellotone was chosen.

Mellotone is popular in the most humble homes as well as the palatial hotels, clubs, apartment houses, and public buildings. And all use it for the same artistic and Economical considerations.

Lowe Brothers Mellotone

Mellotone's refinement of color, its ease of application and the fact that it can be washed with soap and water all tend to add to its popularity as the most appropriate, sanitary and economical Flat Wall Paint sold.

"Tired and Worried Nervous and Despondent"

Mrs. M. Chevalier, Belle River, Ont., writes:

"For eight years I suffered from despondency and nervousness. Sometimes I could not sleep at night for worrying and the next day I would be so tired that my work was a burden to me. I began using Dr. Chase's Nerve Food and can say I am now entirely relieved of the nervousness from which I used to suffer, and things do not worry me as they used to.

"Dr. Chase's Ointment also relieved me of eczema on my arms, which had bothered me for three years. My house is never without Dr. Chase's Medicines."

Dr. Chase's Nerve Food

COLLEGE

Cornwall, Ontario

CORNWALL
GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by:

Fees from paying patients.

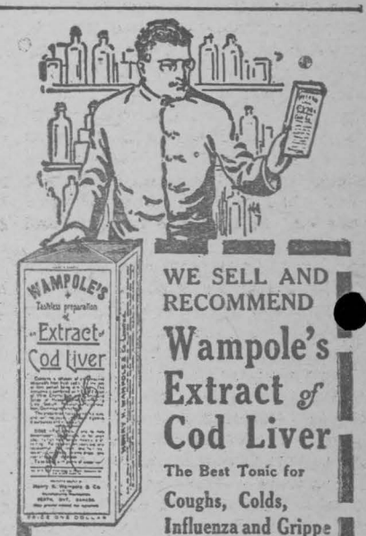

Grants from the Government and Municipalities.

Donations and subscriptions from Churches Corporations, Societies and Individuals, the last being the largest source of revenue.

YOU ARE ASKED TO ASSIST IN THIS WORK

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund.

If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

The Woman of To-Day

STORING WINTER CLOTHING.

Along with the other housecleaning problems there is the one of storing the winter clothing. It is here that the old adage, "An ounce of prevention is worth a pound of cure," applies, for to have silk and woolen and furs from the wily moth, one must use every preventative.

To store unused woolens, silks and furs in an attic or clothespress will serve as an excellent breeding place for the moth. It is best that all such material should be carefully cleaned before storing in order that no moths be present.

They may be put up in several different ways with a degree of safety. Paper bags or pasteboard boxes may be used for storage of these materials, but care must be taken to seal them carefully with gummed strips before putting them aside. A generous supply of moth balls may be sprinkled in to serve as an added precaution.

Clothing free from moths may be stored in cedar chests or tight wooden boxes which have been painted on the inside with the oil of red cedar. This method is much to be preferred, since odor of red cedar wood is pleasant to most people.

All washable woolens should be washed and ironed before storing. Clothing must be aired, brushed and sponged before being packed away. Carpets and rugs should be cleaned and swept with a damp broom dipped in kerosene. Infested areas of carpets may be steamed, using a wet towel and a hot flat-iron.

Closets from which moth-infested clothing has been removed should be wiped down with a damp mop moistened with kerosene, since the larva, when ready to pulpate, ofttimes migrate for their food supply and fasten themselves to the ceiling and shelves.

USING MAPLE SYRUP.

On days when you are too tired to fuss with an elaborate dessert, try this one:

Cover a fresh slice of bread, cut about an inch thick and two or three inches square, with fresh maple syrup or shaved maple sugar. Serve with thin cream.

Maple Cream Filling—Cook three-fourths cupful of maple syrup, and a tablespoonful of butter, then pour gradually into the stiffly beaten whites of two eggs. When mixture is smooth, add one-half cupful of whipped cream, and a few drops of maple syrup.

Maple Syrup Cake—½ cup butter, 3 rounding tablespoons sugar, 1½ cups maple syrup, 4 tbsp. cream, buttermilk, 2 tsp. soda, 2 eggs, 4½ cups flour, 1 tsp. cream of tartar.

Cream the butter. Add the maple syrup. Put cream in a cup and fill with buttermilk. Add soda and stir. Add well-beaten eggs and flour to which cream of tartar has been added. Spices, nuts or fruit may be added if one wishes to change the maple flavor. Bake in a loaf.

LEARNING FROM OTHERS.

A homemaker without an open mind is like a turtle encasing herself in a hard shell at the mere approach of a suggestion. Her home may be solid along structural lines but its progress is slow and will not keep apace with the moving tide of new ideas.

You have met the woman who cannot accept a new idea from another person until it has become so incorporated in her mind that she is convinced that she thought of it herself. That friend is defrauding her family, her friends and herself of the increased comfort and happiness that greater progress in the development of her home might afford.

Some of the best methods relating to our home job we may learn from our friends, if we will only select them wisely and adopt them for our own. Each housekeeper works out some part of her daily schedule just a little more carefully than does some other friend and close observation even without questions will surprise one to see just how many steps Mrs. S. does save in preparing a meal or how Mrs. B. finds time to do so much sewing.

In the selection of new home or kitchen conveniences it is well to learn the opinions of other housekeepers before investing. What may appear to be a convenience might really become an expensive inconvenience. With a few well chosen conveniences the farm wife can do her work much more efficiently than if she has too many.

We need, then, with an open mind to choose the new methods, suggestions and conveniences according to our daily needs, that our work will be easier and that me may have a few minutes for recreation and fresh air.

MOTHER'S OCCUPATION

On the enrollment card for young people to fill out on entrance to college, there is a request for the name or parent or guardian, then the name of their occupation. One boy, whose father was dead, gave his mother's name on the parent line and on the blank requesting occupation he wrote the word "Mother."

There has been a lot of discussion in the past year about who are the great women. There are so many fathers, daughters, sons and friend of mothers who have planted in their hearts the picture of some woman—in most cases their own mother—whose life was or is obscure. They cannot prove to the world her greatness, but they will not allow fame to place a name above their mothers.

Several women who have won fame in careers are now telling the world that were they to choose again it would be for a home, husband and children. Perhaps even the census man may some day take the schoolboy's suggestion and admit that the occupation of mother is worthy of the name.

A POPULAR STYLE.

4684. This becoming little model may be of gingham, pongee, sateen or printed voile. It is also good for linen, serge or wool crepe. The guimpe may be of lawn or batiste.

The Pattern is cut in 4 Sizes: 4, 6, 8 and 10 years. A 6-year size requires 1½ yard of material for the Dress and 1½ for Guimpe 36 inches wide. With short sleeves the Guimpe will require 1 yard.

Pattern mailed to any address on receipt of 15c in silver, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

Send 15c in silver for our up-to-date Spring and Summer 1924 Book of Fashions.

TO SAVE THE DRIPPINGS.

There is always a great deal of left-over fat on the farm. Here is an excellent way in which to save it. With a can opener the centre is cut from the lid of a syrup can and a circular piece of muslin—an old salt bag is ideal for this—a little larger than the rim is sewed to the rim with coarse thread. This top acts as a strainer, is always in place and keeps out dust and flies.

Sentimental.

"Let me see," said the young man thoughtfully. "I've got to buy some flowers, and some chocolates, and theatre tickets, and——"

"Doing mental arithmetic?" asked the senior clerk.

"No, sentimental arithmetic," was the reply.

The highest roost is not the safest roost.

(Copyright Thomas Allen).

CHAPTER XL.—(Cont'd.)

Kirby stepped to the door connecting with an outer office and threw it open. Mr. and Mrs. Hull, Olson and the Chief of Police followed Phyllis Harriman into the room. More chairs were brought in.

The Chief sat nearest the door, one leg thrown lazily across the other. He had a fat brown cigar in his hand. Sometimes he chewed on the end of it, but he was not smoking. He was an Irishman, and as it happened open-minded. He liked this brown-faced young fellow from Wyoming—never had believed him guilty from the first. Moreover, he was willing his detective bureau should get a jolt from an outsider. It might spur them up in future.

"Chief, is there anything you want to say?" Kirby asked.

"Not a wor-rd. I'm sittin' in a parquet seat. It's your show, son."

Kirby's disarming smile won the Chief's heart. "I want to say now that I've talked with the Chief several times. He's given me a lot of good tips an' I've worked under his direction."

The head of the police force grinned. The tips he had given Lane had been of no value, but he was quite willing to take any public credit there might be. He sat back and listened now while Kirby told his story.

"Outside of the Chief every one here is connected closely with this case an' is involved in it. It happens that every man an' woman of us were in my uncle's apartments either at the time of his death or just before or after." Kirby raised a hand to meet Olson's protest. "Oh, I know. You weren't in the rooms, but you were on the fire escape outside. From the angle of the police you may have been in. All you had to do was to pass through an open window."

There was a moment's silence, while Kirby hesitated in what order to tell his facts. Hull mopped the back of his overflowing neck. Phyllis Cunningham moistened her dry lips. A cord in her throat ached tensely.

"Suspicion fell first on me an' on Hull," Kirby went on. "You've seen it all thrashed out in the papers. I had been unfriendly to my uncle for years, an' I was seen goin' to his rooms an' leavin' them that evening. My own suspicion was directed to Hull, especially when he an' Mrs. Hull at the coroner's inquest changed the time so as to get me into my uncle's apartment half an hour earlier than I had been there. I'd caught them in a panic of terror when I knocked on their door. They'd lied to get me into trouble. Hull had quarrelled with Uncle James an' had threatened to go after him with a gun in *two days* after that time—and it was *just forty-eight hours later he was killed.* It looked a lot like Hull to me.

"I had one big advantage, Chief, a lot of inside facts not open to you," the cattleman explained. "I knew for instance, that Miss McLean here had been in the rooms just before me. She was the young woman my uncle had the appointment to meet there before ten o'clock. You will remember Mr. Blanton's testimony. Miss McLean an' I compared notes, so we were able to shave down the time during which the murder must have taken place. We worked together. She gave me other important data. Perhaps she had better tell in her own words about the clue she found that we followed."

Rose turned to the Chief. Her young face flew a charming flag of color. Her hair, in crisp tendrils beneath the edge of the small hat she wore, was the ripe gold of wheat-tips in the shock. The tender blue of violets was in her eyes.

"I told you about how I found Mr. Cunningham tied to his chair, Chief I forgot to say that in the living room there was a faint odor of perfume. On my way upstairs I passed in the dark a man and a woman. I had got a whiff of the same perfume then. It was violet. So I knew they had been in the apartment just before me. Mr. Lane discovered later that Miss Harriman used that scent."

"Which opened up a new field of speculation," Kirby went on. "We began to run down facts an' learned that my cousin James had secretly married Miss Harriman at Golden a month before. My uncle had just learned the news. He had a new will made by his lawyer, one that cut James off without a cent an' left his property to Jack Cunningham."

"That will was never signed," Jack broke in quickly.

Kirby looked at Jack and smiled cynically. "No, it was never signed. Your brother discovered that when he looked the will over at Uncle's desk a few minutes after his death."

James did not wink an eye in distress. The hand of the woman sitting beside him went out instantly to his in a warm, swift pressure. She was white to the lips, but her thought was for the man she loved and not for herself. Kirby scored another mark to her credit.

"Cumulative evidence pointed to James Cunningham," continued Kirby. "He tried to destroy the proof of his marriage to Miss Harriman. He later pretended to lose an important paper that might have cleared up the case. He tried to get me to drop the matter an' go back to Wyoming. The coil wound closer around him.

"About this time another factor attracted my attention. I had the good luck to unearth at Dry Valley the man who had written threatening letters to my uncle an' to discover that he was stayin' next door to the Paradox the very night of the murder. More, my friend Sanborn an' I guessed he had actually been on the fire escape of the Wyndham an' seen somethin' of importance through the window. Later I forced a statement from Olson. He told all he had seen that night."

Kirby turned to the rancher from Dry Valley and had him tell his story. When he had finished, the cattleman made comment.

"On the face of it Olson's story leaves in doubt the question of who actually killed my uncle. If he was tellin' the whole truth, his evidence points either to the Hulls or my cousin James. But it was quite possible he had seen my uncle tied up an' helpless, an' had himself stepped through the window an' shot him. Am I right, Chief?"

The Chief nodded grimly. "Right, son."

"You told me you didn't think I did it," Olson burst out bitterly.

"An' I tell you so again," Kirby answered, smiling. "I was mentionin' possibilities. On your evidence it lies between my cousin James an' the Hulls. It was the Hulls that had tied him up after Cass Hull knocked him senseless. It was Hull who had given him two days more to live. And that's not all. Not an hour an' a half ago I had a talk with Mrs. Hull. She admitted, under pressure, *that she returned to my uncle's apartment again to release him from the chair.* She was alone with him, an' he was wholly in her power. She is a woman with a passionate sense of injury. What happened then nobody else saw."

Mrs. Hull opened her yellow, wrinkled lips to speak, but Kirby checked her. "Not yet, Mrs. Hull. I'll return to the subject. If you wish you can defend yourself then."

He stopped a second time to find the logical way of proceeding with his story. The silence in the room was tense. The proverbial pin could have been heard. Only one person in the room except Kirby knew where the lightning was going to strike. That person sat by the door chewing the end of a cigar passively. A woman gave a strangled little sob of pent emotion.

"I've been leaving Horikawa out of the story," the cattleman went on. I've got to bring him in now. He's the hinge on which it all swings. *The man or woman that killed my uncle killed Horikawa too.*"

James Cunningham, sitting opposite Kirby with his cold eyes steadily fixed on him, for the first time gave visible sign of his anxiety. It came in the form of a little gulping sound in his throat.

"Cole Sanborn and I found Horikawa in the room where he had been killed. The doctors thought he must have been dead about a day. Just a day before this time Miss McLean an' I met James Cunningham comin' out of the Paragon. He was white an' shaking. He was sufferin' from nausea, an' his arm was badly strained. He explained it by sayin' he had fallen downstairs. Later, I wondered about that fall. I'm still wonderin'. Had he just come out of the apartment where Horikawa was hidin' Had the tendons of that arm been strained by a jiu-jitsu twist? *And had he left Horikawa behind him dead on the bed?*"

James, white to the lips, looked steadily at his cousin. "A very ingenious theory. I've always complimented you on your imagination," he said, a little hoarsely, as though from a parched throat.

"You do not desire to make any explanation?" Kirby asked.

"Thanks, no. I'm not on trial for my life here, am I?" answered the oil broker quietly, with obvious irony.

His wife was sobbing softly. The man's arm went round her and tightened in wordless comfort.

From his pocket Kirby drew the envelope upon which he had a few hours earlier penciled the time schedule relating to his uncle's death.

"One of the points that struck me earliest about this mystery was the man who solved it would have to work out pretty close to the time element. Inside of an hour ten people beside Uncle James were in his rooms. They must 'a' trod on each other's heels right fast, I figured. So I checked up the time as carefully as I could. Here's the schedule I made out. Mebbe you' like to see it." He handed the envelope to James.

Jack rose and looked over his brother's shoulder. His quick eye ran down the list. "I gte the rest of it," he said. "But what does X mean?"

(To be continued.)

The Official Baby.

The arrival of a party of Swazi chiefs in England reminds the London Chronicle of the visit of a similar deputation in 1894 and its introducton to Queen Victoria, which shook a little even her experienced equanimity.

"We come, O great mother," translated the interpreter, "to bring to thee our babe. Take him, O mother, to thy knees; fold him to thy breast."

At that stage the queen was becoming alarmed. "But where is the child?" she cried. "I don't see him."

"Here, O Mother," said the Swazi, gravely bringing forward a powerful savage six feet tall and weighing considerably more than two hundred pounds. "Here he is."

THE CANADA STARCH CO. LIMITED 5

CHEVROLET

gives Quality Transportation

at the Lowest Cost per Mile

THE automobile as a productive factor in Canadian business has proved of greater value than any other single invention. By shortening distances and time, the automobile brings buyer and seller together more quickly, conveniently and economically than any other means of transportation.

The automobile has increased man's earning power many times over. And Chevrolet, the lowest-priced quality car in the world provides this efficient transportation at a lower price per mile than does any other car built.

Continuous daily service under difficult conditions only proves the complete dependability and stamina of this practical car.

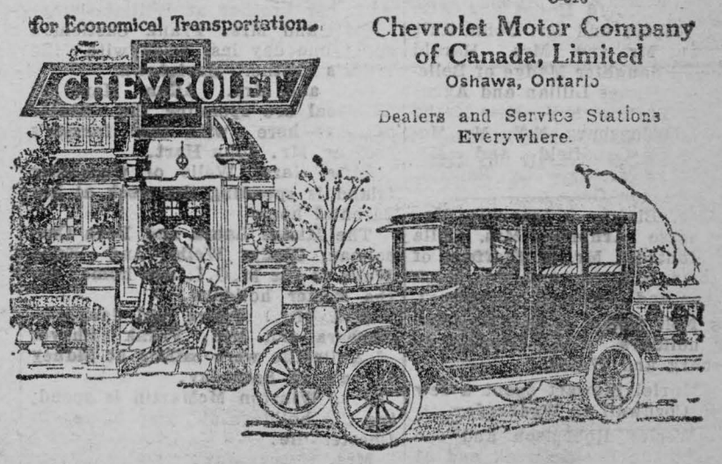

In appearance Chevrolet does credit to any business house or professional or private person. In appointments and equipment it is as complete as the most discriminating owner could wish.

Chevrolet is an investment that will pay good dividends. Investigate.

Canada from Coast to Coast

St. John's, Nfld.—Advices received from the sealing fleet now in the Gulf are to the effect that the ships are within striking distance of the main herd of seals. Captain Kean, of the Terra Nova, advises that he is steaming into the white coats off White Bay, and that the floe is well covered, and that all the other six ships, which are within a few miles of him, will likely secure paying voyages, too.

Halifax, N.S.—The apple movement for this season is practically over, the total export movement via Halifax over the Dominion Atlantic Railway, to date, being 1,132,392 barrels. There are still a few thousand barrels to move before the stocks in the various warehouses are cleaned up.

Fredericton, N.B.—There is a considerable boom in the hardwood industry of New Brunswick at the present time, mill at Juniper and Forester being operated with both day and night shifts. In addition to these mills, there are four other mills in the same vicinity engaged in cutting hardwood.

Montreal, Que.—Immigration this year has started off well, the arrivals during February having been 6,106, an increase of 86 per cent. over that for the same month last year. This brings the total arrivals during the eleven months ending February to 135,128, an increase of 104 per cent. The arrivals during the period ending February have been divided as follows: British, 67,023; from the United States, 19,120; from all other countries, 48,992.

Fort William, Ont.—Plans are almost completed for the two million dollar paper mill to be erected by the Great Lakes Paper Co., according to a statement made by the president of the company, J. H. Black. It is expected that work will begin this summer.

Winnipeg, Man.—Manitoba begins the task of replenishing its game resources next month, when a covey of Hungarian partridges, now en route to Winnipeg from Czecho-Slovakia, will be released in a quiet district in the province. Local sportsmen are sponsoring this move and bear the entire expense of bringing these birds from Europe.

Saskatoon, Sask.—More than one hundred swine breeders have taken advantage of a special educational short course in bacon and hog production conducted by the University of Saskatchewan recently. Lectures and practical demonstrations on different phases of the industry were given. Judging competitions in which hogs were judged before and after being slaughtered was one of the features.

Edmonton, Alta.—More than $2,000,000 worth of raw furs are received in Edmonton annually, and a fur exchange will be established here. It is expected that this institution will give a useful impetus to this important Alberta industry.

Vancouver, B.C.—A recent announcement indicates that the Vancouver Harbor Board contemplates the erection of a cold storage plant. This will prove a boon to the shipping interests, and render valuable assistance to the movement of fresh fruits, vegetables and fish through Vancouver, and also be the means of producing ice, which will be sold to fish boats and the general public.

Dawson City, Y.T.—It is reported that more than 50 claims have been recorded following the recent strike of high-grade ore in Beaver district, 60 miles north of Keno. Many outfits are leaving for the new camp, and considerabl development is looked for in the near future.

LEAVING THE BARREN WESTERN ISLES FOR A LAND OF PROMISE

The three hundred Hebrideans, who arrived at St. John, N.B., recently, are here shown bidding farewell to their friends just as the C.P.R. liner Marloch is casting off at Lochboisdale, South Uist. Driven from their barren island by driving blizzards and the closing of foreign fish markets, these sturdy settlers hope to find life more congenial and profitable in Canada.

Dr. Frederick G. Banting, of Toronto, hailed by eminent scientists as the peer of Pasteur for his great discovery of insulin to alleviate the suffering from diabetes, is shown in New York, where he went as a guest of the Sulgrave Institution, and also to raise funds to continue his research work at the University of Toronto.

DEFECTIVE EYESIGHT IN RURAL SCHOOLS

The Canadian National Institute for the Blind has for some time been carrying on definite negotiations with various Provincial Government Departments with a view to drawing attention to cases of defective vision among rural school children, as well as in the large cities and towns. In the larger cities and towns, sight-saving classes can be established with but slight difficulty owing to concentration of a large number of children and the comparatively short distance that must be traversed by pupils who, because of their defective vision, must attend a special class at some central point. For rural schools, however, the sight saving class will be difficult to arrange, since owing to the individual cases being scattered over a fairly large area, say a county, it would be necessary to arrange for concentration at the county town and provide boarding facilities, etc.

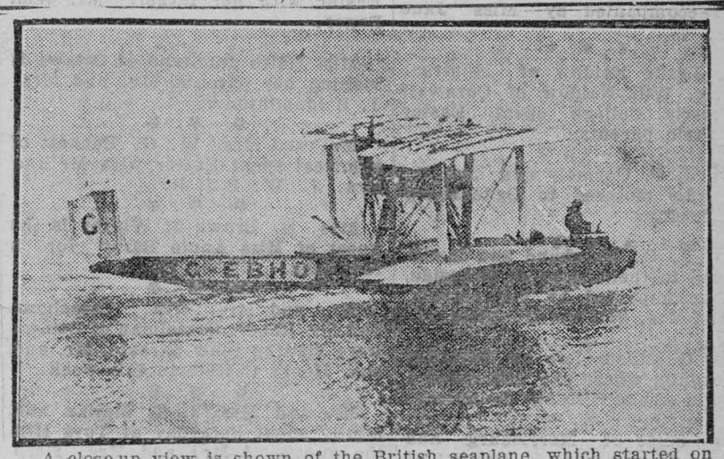

The scheme at present under consideration, as suggested by the Institute, is simple, and possesses many advantages. Chief among these are, first, assistance can be rendered to the child in the school it would regularly attend. Second, cost of various appliances would be very small, and third, the whole scheme could be handled with little delay. In short, the scheme is as follows: That Dept. of Health nurses or school nurses where such are available, should test the eyes of all school children, referring those cases needing treatment or glasses to proper authorities. Next, the school teachers at present employed should through the medium of the Dept. of Education instructions, assisted by their inspectors and through school conventions and advice from attending nurses, be acquainted with the degree of special attention necessary for the individual case of defective sight in their school room. The actual arrangements to be provided in the school room would be briefly as follows: That a desk should be chosen properly suited in size to the child in question. That this should be placed in the best lighted portion of the room. That the child should be provided with essential large type text books and be relieved as much as possible from blackboard work.

This scheme would accomplish fifty to seventy-five per cent. of the relief that would be secured through a regularly established sight-saving class and would possess the above noted advantages of little expense and practically immediate application.

There are children in our rural schools who are at present called dunces. A dull mind, however, is not the trouble in many cases. Defective sight is often responsible. This is a serious matter and requires your co-operation. It may be true that there is only one case in your school but this can be no excuse for neglect. One child's sight, no matter where located, is worth saving. We have known many children subject to no more, nor no less, neglect, who have lost their sight irreparably. If you know of a case in your own community where a child's eyes are obviously weak or defective, do not lose time, but write immediately to this office stating particulars. —The Canadian National Institute for the Blind, Pearson Hall, Toronto.

Nationalities in 1921 Canadian Census

English	2,545,496	Hebrew	126,196
French	2,452,782	Dutch	117,509
Scotch	1,173,824	Austrian	107,671
Irish	1,107,817	Ukranian	106,721
German	294,636	Russian	100,064

A close-up view is shown of the British seaplane, which started on a round-the-world flight from near Southampton recently.

Apple shipments from British Columbia during 1923 to the United Kingdom and Scandinavian ports amounted to 781 cars. Only a small proportion of B.C. apples went via the Panama Canal.

Already 200 reservations have been made at the Palliser Hotel for the period of the Calgary Stampede next July. The Boston Tourist Co. has made 50 reservations and 135 visitors are coming from the Sioux City, Iowa. One hundred and fifty more are expected from Chicago and 100 from St. Paul.

R.C.M.P. Sergeant Returns from Long Patrol

Completing his trip of many thousands of miles by dog train, Sergeant Hubert Thorne, of the R.C.M.P. reached Edmonton early this month, bringing with him the official report of the hanging of the two Eskimos at Herschel Island. Sergeant Thorne carried north the confirmation of the death sentence.

Both men were hanged in the old "bone house" of the American whalers on Herschel Island, and by Special Constable Gill, who was sent north by way of the Mackenzie last year for the execution. Both met their fate with stoicism of the Eskimo.

Both men had a long list of killings to account for, and each was feared by the other natives of Coronation Gulf, and the country to the east; neither of them will be regretted, and for many moons, as the Eskimos discuss the topics of the day in their igloos by the light of the blubber oil lamps, the story of the fate of Alikomiak and Matamafana will be produced.

In spite of the fact that Sergeant Thorne was held up by mild weather last fall in the Yukon, he lived up to the expectations of the force that the Mounties are to be at the right place at the right time; he rushed the last 300 miles of his flying trip over the ice and snow, and trotted his dogs into the station at Herschel Island one day before the date set for the execution to find that the condemned men were to be granted a reprieve until February 1.

In regard to his trip, when interviewed at the barracks at Edmonton, Sergeant Thorne was found to be uncommunicative and dismissed the matter by saying that "it was nothing out of the ordinary—just one of the usual patrols, but a little longer."

Scheme to Use Artificial Moonlight in Centre London

A scheme looking toward the flooding of the whole inner area of London with artificial moonlight after nightfall will be brought before the Institute of Public Light Engineers, which has just been organized here. The plan calls for flood lighting of the city from eight powerful constellations of electric lights, which would surmount steel towers 500 feet high, distributed over a wide area.

Supporters of the scheme say the present method of lighting great cities by thousands of small electric lamps involves an enormous waste of light, due to the rays hitting the sides of houses and shops before their full power is exhausted.

Adoption of the new scheme, it is said, would result in better lighting and make London practically shadowless, as well as cutting the cost of illuminating the city's 2,223 miles of streets, which as at present lighted by the system of individual lamps costs almost £1,000 nightly.

French Add New English Words to Their Language

In view of the long-heralded publication of the first volume of the great dictionary at which the Academie Francaise has been working such a long time, the savants spent a whole week recently examining a certain number of neologisms which are sneaking into the language by the back door of sports, says a Paris despatch.

They decided after long debate to admit into the dictionary the words bookmaker, boy scout, bridge, camping, club (referring to the ancient game of golf), court (referring to the also ancient game of tennis) and champion.

All of these words may instantly be recognized as being less French than English. For reasons which have not been disclosed the academicians rejected three words—canter, crack and crawl.

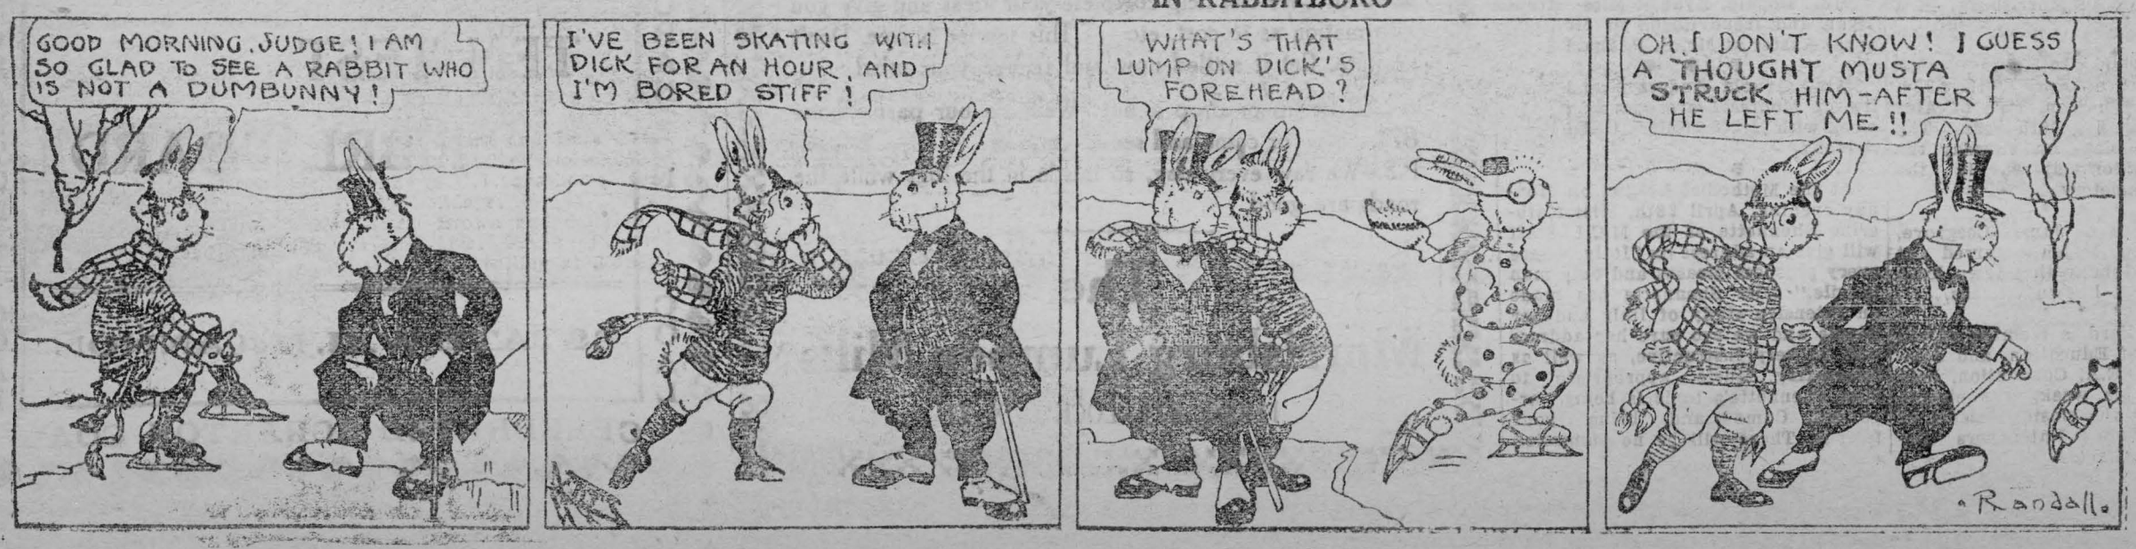

Whether the pitcher strikes the stone or the stone the pitcher, it is bad for the pitcher.

LUDENDORFF OF GERMANY, MUSSOLINI OF ITALY AND POINCARE OF FRANCE

In the renaissance of aggressive nationalism which is the actuating force in European politics to-day, the dominating figures are the three leaders shown above. On the left is General Erich von Ludendorff, former General war lord. Despite the ignominious surrender which Ludendorff made during the Bavarian beer-cellar putsch last autumn, he was immediately restored as the great national hero following his emergence from the whitewash bath administered by the Munich court which was trying him for treason. It is reported that he is once again carrying on is intrigues. In the centre is Premier Benito Mussolini, who at the head of the "Blackshirts" scotched the outbreak of communism in Italy and has just obtained constitutional endorsement for his fascist policies in a sweeping victory at the polls. On the right is Raymond Poincare, premier of France, who, despite his unpopular domestic program, has succeeded in obtaining practically unanimous support for his reconstituted cabinet on the strength of his firm-handed foreign policy.

A Practical Suggestion

Many of our Patrons have found it both convenient and time-saving to have an extra pair of glasses on hand in case they break the ones they are wearing. The extra pair enables you to continue with your work without the loss of time consumed in waiting for repairs or replacements.

EVERY GARMENT
Guaranteed Moth Proof

IF I WAS THINKING about buying a Suit, and an experienced, seasoned, and reliable merchant had a line with over 250 new and attractive fabrics, pleasingly priced at $25.00, $35.00 up to $60.00 per suit, made to my individual taste and measure, with money back guarantee, I'd investigate,

WOULDN'T YOU?

That's all I ask—no obligation.

NASH

Our Best Farm Boot

Positively the best shoe made for farm wear, Solid Oak tanned soles, and retanned uppers that will resist barnyard acids; absolutely waterproof, strongly built, but light in weight, and fully guaranteed by their maker against defect. This is positively the best work shoe made. It will pay you to look over these shoes. DON'T FORGET, DRY FEET GUARANTEED.

We can give you right away service on shoe repairing, harness repairing, rubber footwear and vulcanizing. All repairing done by up-to-date machinery.

We sell all kinds of shoes and harness repairs, leather taps, soles, rubber heels, etc.

The Great West Life Assurance Company

The Total and Permanent Disability Benefit provides that if the insured is totally and permanently disabled:—

1. All premiums are cancelled.
2. A monthly income is paid the insured.
3. Profits are paid in the regular way if on with profit plan.
4. Loan and surrender values are not affected.
5. The full sum insured is payable at maturity.

LIFE INSURANCE

Without Medical Examination Policies are issued for $2000 or less on all regular plans.

A guaranteed monthly income for life may be secured by means of an income policy which provides for the payment of the proceeds of the policy as a monthly income for a definite term of years or for life. Free information sent upon request.
