OBITUARY

W. H. McGANNON

Once more there devolves on us this week the sad, but ever-recurring duty of recording the visitation of the stern Angel of Death to a lately bright and happy home. On this occasion it is to a devoted husband, a kind and loving father, that the dread summons to surrender his stewardship has come. "Will McGannon is dead." This freshly-coined sentence, heard on every hand, conveyed the sad news that awaited the residents of this village last Saturday morning. Although the announcement had been expected for some days, yet it came as a shock that sent a thrill of pain to every heart, and cast a gloom over the whole community. Mr. McGannon was taken ill about three weeks ago, suffering from a severe attack of Diabetes. From the first it was realized that his illness was of a very serious nature, and everything humanly possible was done to afford him relief and restore his shattered health. For a time he seemed to respond, and rallied sufficiently to arouse sanguine hopes for recovery. However, the improvement was rather apparent than real. His once robust constitution, long undermined by too unremitting attention to duty, was unequaled to the struggle, and day by day he grew steadily weaker until Saturday at 6 a.m. he passed quitely and peacefully away. His last moments were brightened by the presence at his side of his sorrowing loved ones, and by the tireless attentions of the two devoted Sisters of Charity who had nursed him all through his illness. Fortified by the last Sacraments, he awaited the end resigned and fearless, comforted and strengthened by the consoling ministration of the Church he loved so well and served so loyally. Death is always sad, and that last parting with the nearest and dearest in this world is of necessity sorrowful, but circumstances such as these can rob death of its terror, and make that great trial seem as simple and as natural as the coming on of nightfall, or the going down of the bright sun, which leaves us still the starlight of hope, and the promise of a more glorious and lasting day.

The late William Henry McGannon was born at the old homestead near Prescott 68 years ago. In 1872 when 21 years of age, he moved to Morrisburg to become proprietor of the St Lawrence Hall, a position which he filled for about 37 years. Under his efficient management the hotel soon acquired among the travelling public the reputation of being one of the best equipped and best conducted houses along the line. In 1906 he married Miss Kate Gormley who, with one child, William Ambrose, survives. About ten years ago Mr. McGannon leased the hotel, and opened an office on the opposite side of Main street, having decided to devote his attention to the coal business in which he had for years been engaged. Besides fuel, he dealt to some extent in cement roofing, electrical supplies and insurance. He was town ticket agent for the G.T.R., local express agent, and Town Treasurer. Energetic, painstaking, self-forgetting, he was possessed of rare ability and an uncommon capacity for work. One of the best known residents of this locality, he was universally recognized as a plain, blunt, honest man; a man of high principles and unblemished honor. Next to his home and family, he loved his work. He was rarely absent from his office where he reigned supreme as everybody's servant and everybody's friend. By the poor and needy he will be long remembered for his many deeds of charity. No worthy cause ever appealed to him in vain. A prominent and Zealous member of St. Mary's congregation, he was ever ready to give his time and his best efforts to promote the interests of the Church, even at times, to the detriment of his own. In his remarks last Sunday Rev. Father Meehan paid to Mr McGannon the high compliment of saying that "he was a model Catholic, and a man of whom the members of this congregation have good reason to feel proud." The funeral took place at 9 o'clock, Monday morning, from his late residence on Canal street to St. Marys Church and Cemetery. The services were conducted by Rev. J. A. Meehan The pall-bearers were: Dr. Fred McGannon, Edward McGannon, Wm. Callaghan, S. P. Ryan, John Barry, and Edward Costello. If additional proof were required of the universal esteem in which the deceased was held, ample evidences were abundantly manifested in the heart-felt expressions of sorrow heard on every side, in the many tokens of sympathy in the form of spiritual and floral offerings received at the house of mourning, and above all in the vast throng of sorrowing friends and neighbors who attended the funeral, crowding St. Mary's Church to the doors, and the large number who with grief-bowed heads followed his mortal remains to their last resting place in the Silent City of the Dead. Besides his widow and little son, Mr. McGannon is survived by three brothers and one sister, namely, Dr. Fred and Mrs. Costello residing in Ogdensburg, Edward of Prescott, and Walter of Morrisburg.

"Some time when all life's lessons have been learned,
And sun and stars forever more have set,
The things which our weak judgment here have spurned—
The things o'er which we grieved with lashes wet—
Will flash before us out of life's dark night,
As stars shine most in deep tints of blue;
And we shall see how all God's plans were right,
And how what seemed reproof was love most true."

JUNIOR FARMERS' PLOWING COMPETITION

Prize Winners in the Junior Farmers' Plowing Competition Held in Dundas

Stubble Class—

First Prize, walking plow, won by R. F. Jackson, Mountain.

Second prize, $7 in cash and silver medal, won by Elias Johnson, Inkerman.

Third prize, $6 in cash, won by J. Deeks, Williamsburg.

Fourth prize, $5 in cash, won by Willard Baker, Chesterville.

Fifth prize, $4 in cash, won by Basil Glover, R.R. No. 2, Iroquois.

Sixth prize, $2 in cash, won by Victor Armstrong, R R. No. 3, Winchester.

Seventh prize, $1 in cash, won by Cecil Wallace, R.R. No. 2, Iroquois.

Sod Class—

First prize, walking plow, won by John O. Zeron,, Morrisburg.

Second prize, $7 in cash and silver medal, won by Arnold McIntosh, Berwick.

There was keen competition in the stubble class, which was well filled. The young men performed their work credibly and the fact that a special effort was put forth to do better work means that each boy is more capable of performing good work than he was before entering the competition.

The sod class was not so well filled only two having completed a sufficient amount of plowing to make a competition.

The competition was open to any young man under 25 years of age in Greater Dundas. Mr. O. D. Casselman, M.P., kindly donated the cash for the cash prizes. The County Board of Agriculture donated the silver medals. The competition was arranged by the Commission of Conservation in co-operation with the Department of Agriculture through the Agricultural Representative at Morrisburg

ANOTHER REFERENDUM ON THE LIQUOR QUESTION

Premier Drury has expressed himself in favor of the Ontario Government making application to the Dominion Government for a referendum on the question of importation of liquor into the province of Ontario.

"Beyond question, the party of which I am leader will throw its weight at the next session for an application to the Dominion Government for a referendum," he said. "We will apply without delay. It is the only way to make the present law effective, and will go a long way, I hope, towards stopping the "bootlegging" that must prevail as long as importation is permitted. I do not anticipate any change in the law of the province. Such as we have will be properly enforced. The only thing left for us to do is to make the application to Ottawa, and that will be done early in the session if the Government has its way."

MATILDA COUNCIL

Regular meeting of Matilda Council was held in Barkley's Hall, Dixons Corners, Saturday, Nov. 15th, 1919.

Members all present.

The following accounts were paid: R. S. Pelton, printing to date, $67, Eli Keeler, work on road east of Dixon's 21.30; Sawyer-Massey Co., repairs for crusher $44.85; Jas. Monpetit, repairs on spreader waggons $4.00; John Fossitt, repairs on waggons, $2.00; Robt. Cooper, repairs, $1.70; Ellery Barkley, stone $9.00; Arthur Whitteker, 115 rods wire fence $13.80; Michael Casselman, 46 loads stone $23 00; Eckford Johnston, work and plank $5.14; Alex Shaver, sheep killed by dogs, $12.67; B. Glover, sheep valuator $1.00; Edward Hodge, repairing bridge $1.20; M. F. Beach Co., cement $85.50; Beach & Render, cement $31.50; R. H. Bradfield, gass pipe, $110.81; J. F. Casselman, labor on bridges $149-50; Henry Hanson, wire fence and stone $35.36; J. F. Casselman, stone $26.00; John Johnson, wire fence, $9.12; B. Merkley, work on road, $2.00; John Barkley, hall rent and repairs on crusher, $3.50; Joseph Louden, stone and work on road, $19.20; Thos Morrow, labor and material, Brown bridge $36 50; John Sypes, work on east b'd'r'y, $6.50; F. M. Eagleson, John Lewis award, $37.00; The Clerk, fees, John Lewis award $5.50; John Lewis, board and assistance, $5.00; Geo. Kennedy, $1.50;; W. Fader, assistance, 75c.; D. Hamilton, assistance, $1.00; The Clerk, copying assessment roll for County Clerk, $25.00.

Moved by Messrs. Thompson and Timlick, the Council adjourned to meet in Cooper's Hall, Brinston, Sat. Dec. 13, 1919, unless sooner called by the Reeve.

J. J. PAYNE, Clerk

MARRIED

At Church of St. Matthew and St. James, Mossley Hill, Liverpool, England, on November 25th, Doris Mabel daughter of Mr. and Mrs. Charles Simpson "Beulah Lodge", Cressington Park, Liverpool, to Alfred Farlinger Casselman, son of Mr. and Mrs J. Clinton Casselman of Winchester Avenue, Westmount, Que.

87 Years of Service

The foundation stone of any Bank's success must be service to the public.

The 87 years of steady growth of this Bank, its steady increase in assets and resources, are a measure of the sound, consistent, friendly service it extends to its customers.

May we not serve you, too?

The Slip of the Sign

By EARL R. RICE.

The terrific storm that raged over a Western city one night in June a few years ago put scores of telephone, telegraph and electric-light wires out of commission. On the following day many men worked overtime in repairing the damage.

Among them was John Vincent, a young repair man in the service of the Abelson Electric Sign Company. At half past six o'clock, after working all day, he went to the top of one of the tallest buildings in town to repair a sign there. Ordinarily the job would have gone over until another day, but a great convention was being held in the city, and a large retail firm with goods to sell that had their store in the building demanded that their huge sign be put into working order. Boomerfield & Speckitt's peerless products were useful, indispensable and cheap, and the flaring sign that so informed the public from the top of the skyscraper had to give its nightly message.

"Fix it up," was the order that the company sent to the young repair man; and although John had worked long and hard that day, he promised to do his best.

As the elevator rose swiftly to the fourteenth floor, the last below the roof, John said to his assistant, "We'll hurry this piece as fast as we can. If it's too bad, we'll make temporary repairs and come back in the morning. It's the last job for the day, and I'll be glad when we get down."

"So will I," said the assistant. "Half a dozen jobs like this is enough for one day. I've been dizzy ever since we left the last one."

John laughed. "After you have been with us a while you'll get used to the high ones. I felt that way at first."

But as they stepped out of the cage, John looked sharply at his assistant.

"You're all right, Brown?" he asked.

"Yes," Brown replied. "Or I will be when we get to work."

Together they proceeded to the roof, where John looked the situation over. Boomerfield & Speckitt's sign was twenty-five feet high by thirty feet wide. The front leaned slightly forward. The upper framework was of light but strong iron strips, and the lower part was of heavier stuff. The bolts that tied the joint together seemed heavy and strong, and those that fastened the whole structure to the roof were nearly an inch thick. The bottom of the frame rested scarcely a yard from the edge of the roof, and there was barely space enough for a man to walk between it and the battlement in front. The forward tilt of the sign brought the upper part of the frame almost in line with the ledge.

Here and there a stack or chimney pierced the flat, sanded roof, and over near one corner of the sign a flagpole rose skyward. John noticed that the flag at the top of the mast had been supplemented by a convention banner, and that in the fitful breeze both flags now swung out at full length, now hung limp round the pole.

Much to his satisfaction, John found that the big sign had suffered little damage. A few broken bulbs and some loosened connections were apparently all that needed attention. Those that were on the lower part of the frame where he could reach them he soon took care of.

"Now for those near the top," said John. "Hand me the stuff, Brown, and I'll go up."

Working from side to side as occasion demanded, John climbed slowly up the back of the iron frame. Perched twenty feet above the roof, he worked deftly. He took this dizzy task coolly—it was all in his day's work. Looking down, he said to his assistant:

"Where is that coil of wire we brought? I've got to fasten this brace. The bolt is out."

"Just a minute," said Brown. "I think it's over with the tools." He stepped round to the end of the sign. "Here it is. Sall I throw it up or bring it?"

"Throw it," said John.

Catching the wire, he quickly clipped the needed length, twisted it into place with his pliers, and threw the coil over his shoulders.

"I'll have to have another half dozen bulbs," he announced a moment later.

"You've got the last of the box," said Brown.

"Then get the box we left by the elevator. Be as quick as you can, for I'm getting tired."

Brown disappeared down the stairway. John, waiting in the twilight, looked anxiously up at the work above.

"I'll see how many I need," he thought.

Climbing higher, he shifted his position over toward the end of the sign. As he did so, he felt the frame shake slightly, but he did not worry about it. As he turned again toward the middle of the sign, however, he was startled to find that the whole structure had tilted dangerously over toward the front. His weight on the upper bars had thrown the centre of gravity outside the edge of the roof, and slowly but surely the heavy frame was settling over the ledge. He looked down, and for a moment his head swam, for his view was clear—straight to the crowds in the street ten stories below.

The danger of his position flashed upon him and for a moment paralyzed every nerve. Only for a moment, however, did he hesitate. He turned quickly to get down from the upper bars; as he did so the coil of wire round his shoulders caught over a projecting end of iron and the downward pull of his body wedged it fast. He pulled to free himself, but the effort only tightened the coil.

Even fractions of a second were precious. He could feel the steady slipping and buckling of the framework; in fact, the sign had sagged so far that the whole upper half hung over the street. John groaned as he thought of what would happen when those iron bars, massed into a great projectile, went hurtling down into the crowd below. But those bars must not fall! He must save those men and women on the sidewalk, and himself, too!

"O Brown!" he called. But Brown did not answer. Through some misunderstanding, the box he had gone to get had been moved, and he had signaled to the elevator boy; he was waiting there, wholly unaware of his mate's danger.

"It's no use! I've got to do it myself!" John said to himself.

There was need of haste. In its forward thrust the great sign was at an angle of nearly forty degrees from the perpendicular. Soon the uprights along its front would rest on the masonwork battlement and the final strain would come. If they broke, the upper part of the frame would go crashing down. If the uprights held, the weight at the outer end of the lever thus formed would probably tear loose the bolts holding the sign to the roof, and the whole affair would go hurtling into the street. In either case, death threatened John and the people below.

Scarcely daring to move, John twisted his shoulders round till he could draw himself down and out of the coil of wire that held him. As he did so he had to face the street, and in that moment he saw what he should have to do.

An iron brace that had run straight up the front of the frame had sprung loose at its lower end and now swung dangling in the air from its fastening near the top. It occurred to him in a flash that if he could reach that swinging bar and thrust the end of it against a window top below he could stop the tipping sign long enough for help to arrive. But to do it he must be quick.

Cautiously he thrust out his hand to grasp the bar. It was eight inches beyond his reach.

He dared not climb higher, for that would hasten the fatal plunge. Thrusting his hand into his pocket for a tool, he brought out his pliers, and with trembling hand again reached out.

Out, out he stretched his arm and body until it seemed that he must fail. But no! The teeth of the pliers closed over the edge of the brace as a gust of wind swayed it toward him. Drawing it in, he guided the lower end toward the ledge below. He was not a moment too soon, for an instant later the weight of the frame settled with a faint jar upon the brace. Holding his breath, John waited. Would it hold? His chest heaved, his eyes stared, his muscles ached as he shrank back from the threat of that terrible fall.

But it held. A feeling of security came to him, and he backed away toward the roof and safety!

He had hesitated only long enough to clip a strand of wire and pull it after him. As soon as he was safe over the ledge and saw the sanded roof below him, he leaped down from the buckled frame, carried the wire to the chimney forty feet away and made it fast round the bricks.

When Brown came up the stairway a minute later he found John wild-eyed and faint. But the big sign was safely anchored. Together they cut the rope from the flagstaff and added its strength to that of the wire.

"It will miss one night of advertising, but that's better than what might have happened," said John as they finished anchoring the sign.

(The End.)

Minard's Liniment for sale everywhere.

Woman's Sphere

Consistency.

Consistency is one of the fundamental qualities of discipline, and from my own experience I have found it to be most important. It should always be accompanied by kindness. More mothers have troubles with their children because of their own inconsistency than for any other one reason.

Johnnie comes home from school and asks, "Mother, may I go over to Billy Baker's to play?" and Mother, knowing that Billy's influence is not good, refuses. Johnny displays more or less temper, but Mother is firm, and Johnnie stays at home. A few days later, however, Johnnie makes the same request, and Mother, who is entertaining a caller, lets him go for a little while. This is a case of inconsistency, and, in order to save one scene, Mother is laying a good foundation for many more. The probability is that had she replied, "Mother has told you before," the matter would have ended there, or even if he had cried a little and "made a scene," the son would have had a valuable lesson and learned that Mother meant what she said. His love for the moment might have been shaken, but eventually Johnnie would have been a happier boy and his love and respect for his mother would have been greater.

The value of consistency cannot be overestimated. The tiniest baby should be dealt with kindly but firmly. A mother can develop the teasing habit in her child while he is still in his cradle if she lacks this quality of consistency. At one time when her baby cries she does not pick him up, for she says, "It is not good for him and he is forming bad habits." But the next day, if she is nervous and unwilling to endure his noise, she yields "just for once." The result is that she gives in to her child more or less through his later childhood.

Again, with an older child, the mother will partially concede, a sort of compromise, and the child is keen enough to know that he has gained his point, and each time he will seek to gain a little more, until the mother realizes when it is too late that her problem is great and her word really has very little weight.

My advice is: Be considerate in your requirements of a child, and then be consistent in seeing that these requirements are carried out. Irritable, nagging mothers and unattractive, nervous children would be almost unknown if the former could realize the importance of kindness and consistency. Lack of sympathy and strained relations between parents and their older children often spring from habitual inconsistency.

Perhaps the most important thing of all is this: When you make a legitimate request you must know within yourself that you expect it to be carried out. Then if you are disobeyed you must calmly, but definitely and emphatically, see to it that your request is complied with. This method cannot be practiced to-day and neglected to-morrow, but must be consistently followed.

The future happiness, character and well-being of your little one depend entirely upon firm, wise and consistent guidance. It is these fundamental qualities of mother-discipline that train the strong-willed little sons and daughters into splendid men and women.

Let's Start a Propaganda in Favor of Work.

The crying need of the world to-day is for workers. Certainly there was never a time when so much work was waiting to be done, nor when so few people were willing to do it. The manufacturer in his plant, the farmer in his fields, the merchant in his store and the housekeeper in her kitchen are all uttering the same cry, "Send us help."

At that there seems to be plenty of people who might work. But no one seems to be standing about waiting for the jobs that are open for them. It begins almost to seem as if no one really wanted to work.

It is rather foolish to place the blame for present conditions on any class, though capital is trying to shift it all on labor and labor is blaming capital. Everybody is more or less to blame. Such is the nice adjustment of things in this world that no one can claim to be all right, and everybody else all wrong.

I've been wondering a great deal lately just how far we mothers have been wrong? How much of the responsibility for present conditions must we assume? Just what has been our attitude towards work, real work that is productive, like farming or cooking or sewing or washing or manufacturing? Have we held these jobs up before our children as the most desirable for them? Or have we warned them to steer clear of hard work and look for something easy and pleasant?

We have always worked hard ourselves. Too hard by far, the most of us. And we've hoped with all our hearts that when our children grew up they might have things easy. We've talked it before them, what a dog's life was the farmer's, and how housework was nothing but slavery. Unconsciously our sons and our daughters have absorbed the idea that the necessary work of life was sort of beneath them. They have gotten the impression that life for them should be a sort of holiday, a place where they could do a smattering of work in a haphazard way and demand a big salary for it. They have not come up with the good old-fashioned training we had ourselves.

Don't you remember when you were coming along that mother's favorite maxims were, "All play and no work makes Jack a lazy boy," and, "What soever thy hand finds to do, do it with thy might?" When you were being brought up the schools hadn't discovered that children were to be taught without their knowing it, that study was to be made play for them. Your mother never heard that children were to be allowed self-expression; she had an idea that children were to be given certain tasks to perform at stated times, and to be taught to mind, be respectful to their elders and obey the law.

You are the result of your mother's training, a law-abiding, hard-working, sober citizen. The present generation is the result of our training, a world full of idlers, looking for short hours, light work, high pay and considerable license where law touches their personal liberty.

We are reaping what we have sown. It is rather late to correct our faults, but when we're brooding over present conditions and laying the blame on others, let's try to turn the current of our thoughts. Let's try to repair as best we can, and start a current of thought in favor of real, honest work, work of the kind the world needs.

Minard's Liniment Relieves Neuralgia.

The efforts to raise the German vessels scuttled at Scapa Flow have resulted in one battleship, three cruisers and fifteen destroyers being floated.

Place squash on shelves in a dry room near the furnace or in a warm attic room. They must not be in a damp or frosty place. They will stand a great deal of heat and dry air, but little moisture. If you want squash or pumpkins to keep well, handle them carefully so they are not bruised.

$79 for this beautiful CABINET PHONOGRAPH

Learning From My Neighbors.

A large part of what I know about farming has been learned from my neighbors. From some I have learned things I ought to do; from others, things I ought not to do.

Andrew Baker, whose farm corners with mine, is one of the men from whom I have learned much. Andrew is a specialist in raising hogs. He has studied pork and porkers since he was a boy, with a diligence and reverence for his subject that would do credit to a college professor. He has fed hogs of all ages and sizes, and in all the ways imaginable. He can tell you all the details of feeds, and how to make the most out of them.

One day last week I went over to spend an afternoon with Andrew. I had not seen him for nearly two months, and was sure he had much to tell me. He likes to talk on his favorite subject—pigs. As I had hoped, he was out with his pigs, going from one lot to another, studying the results of some experiments he was carrying on. So deep was his study that he did not notice me drive up. I hitched my horse, and was about to slip up and give him a friendly slap on the shoulder, when he turned suddenly and saw me. His face lit up with a smile as he gave me a hearty greeting.

"Hello, expert!" I said as I walked up to shake hands. "What are you up to now?"

"In the first place I am no expert," said he; "and as for what I am doing, I am trying to figure out why I don't know more about my business—why I sometimes succeed and sometimes fail."

I soon found myself listening intently to his account of what he had been doing.

"There," he said, "is a pen of five hogs which I have fed as farmers often do, in a pen where it is muddy, as you can see. If you want a hog to eat his head off, that's the way to do it. I weighed those pigs yesterday, and they have made an average gain of about .3 of a pound a day for the last two months. They have had all the corn they could eat, but nothing else, and they have gained only seven pounds for each bushel of corn they have eaten. You see their condition. It is really cruelty to animals, but I wanted to satisfy myself on this one point."

We walked over to another pen where there were five other pigs fed cornmeal and tankage. He said they had made very satisfactory gains, but at too high a cost. Even with present high prices for hogs it did not pay him to feed that way. "But come out here in this clover field," said he. "I am not ashamed to show you what I am doing there. Those pigs are harvesting hay and converting it into pork."

It was a thrifty sight to see the thrifty, growing hogs wading through clover that almost covered them. From all sides came the grunt, which, in pig language, means satisfaction, contentment, and good health. It was really good to see their clean, glossy coats. There was certainly no tuberculosis nor cholera amongst them.

"I weighed these pigs at weaning time," said Andrew; "then again in June. Their feed was corn, a little tankage, and this clover pasture. They had made an average gain of a pound a day, and had made 25 pounds of pork for every bushel of corn fed them. I weighed them again yesterday. Since June they have gained three-quarters of a pound a day, and for every bushel of corn fed they have produced 17½ pounds of pork. You see," he continued, "as they become older they take on weight more slowly, and it takes more feed to make a pound of gain."

"What do you do," I asked, "when the price of corn goes up?"

"If there is too great a rise in price, and not a corresponding rise in the price of hogs, I simply cut down the feed of corn a little and make them consume more pasture. Of course, there is a limit beyond which this should not be carried. Just at present I could pay $2 a bushel for corn and still make money. It's all in the pasture. I can't afford to raise hogs without it. Next year I hope to have an alfalfa pasture; that is the best of all."

We crossed the clover field and walked through the woodlot. As we emerged on the other side we came upon a field of a beautiful green crop that was new to me.

"What is this?" I asked as we waded out into the luxuriant growth that came up under our arms.

"This," said he, "is my winter pasture."

"Winter pasture!" I exclaimed. "But won't the frost kill it? And besides, how can the hogs reach up to pasture this stuff?"

Andrew laughed at me for this, but immediately explained:

"You see, these pods are beginning to harden. In a few days these leaves will begin to turn yellow. Then we will cut and shock the crop, and put it in the sheds and barn. During the winter we feed it out in racks as hay to our hogs. It takes the place of pasture, you see; saves the expense of buying high-priced feeds, and makes every pound of corn do its best in producing pork. It furnishes the exact food elements that are needed with corn, and prevents entirely such results as you saw in that first pen. This soybean crop," he added, "is one of the most valuable I grow on my farm."

I could but marvel at the completeness of his plans—every season of the year provided for to produce pork most efficiently, and at the lowest possible cost.

It was getting late, so I bade Andrew good-bye, and turned my horse down the road. On my way home I stopped a moment to see another neighbor who had moved into the neighborhood only the year before. I had hoped to learn something from him, too, but in this I was disappointed. In a bare lot by the roadside on his farm were about 50 shotes that would weigh 100 to 125 pounds each. They were not fat, and from their appearance I judged that they were not thrifty. I saw some wagons in the barn lot ready for loading.

My new neighbor told me he had sold his hogs, that they were not doing well, and that he could not afford to feed corn at the present high prices. He also said he was going out of the hog business. I took in the situation, and decided not to argue the matter for fear I might lose friendly relations with him. I invited him to come over some time and spend an afternoon with me, and incidentally told him what a delightful visit I had had that afternoon on Andrew Baker's farm. I suggested further that we all get together occasionally to discuss our farm problems.

I turned from this farm with a heavy heart. "There," said I to myself, "is a man not living up to his opportunities."

Saving Labor and Fertility With a Litter Carrier.

A good litter carrier used for conveying the manure from behind the stalls to the spreader or manure pit is in my opinion an absolute necessity on every well-managed farm. With one of these carriers properly installed you are able to clean out the barn thoroughly in about one-half the time it ordinarily takes to do the job by any other method. The work of cleaning out the stables is not only made much easier, and done better too, perhaps, but the task is less disagreeable than forking and wheeling, especially during the warm months of the year. The manure can also be put, with little effort on our part, just where we want it. Hired help does not object to cleaning the stables often and thoroughly when the barn is equipped with a good carrier. The result is a clean barn that is presentable at all times.

I noticed in a government estimate some time ago that more than $100 is lost annually on the average farm by not properly caring for the manure. This estimate undoubtedly is very low, as the average farm is not equipped properly in the handling and storing of manure. A manure carrier and a pit as well are unquestionably good investments on a farm of average size.

It has been carefully estimated that a dozen cows will produce about $400 worth, or better, of manure each year. Now, unless some provision is made to save the liquid manure the value of this output yearly will be only about one-half of its original value. This alone ought to prove even to the most skeptical that a manure pit made of concrete is a good investment for us.

The litter carrier and manure pit go hand in hand. They are both useful. The former saves labor and time, while the latter saves all the fertilizing value to be found in the manure, which alone is an item of great importance.

A Land Measure.

I have made a land measure with which I can quickly measure a field or strip of fence. It is made from three pieces of boards two inches wide and five and one-half feet long, fastened together in a triangle. I mark one corner with some bright-colored paint, then roll the measure along, counting each time the marked corner comes to the ground. Every count is one rod. To find the number of acres in a square field, multiply the width by the length and divide by 160.—J. U.

It is harmful to silk stockings to iron them.

Never permit yourself to comment unfavorably upon a friend.

Flax raising in Australia has passed the experimental stage and the industry is becoming firmly established.

AUTUMN

THERE is a nip in the air these mornings that must be rather sharp to the man who scrapes his chin when shaving himself.

If he used a Gillette Safety Razor, he would positively enjoy shaving *every* morning, he would look his best at all times, and there would be no cutting or chafing of the skin!

Furthermore, in the time he now takes to get his old razor edge as near right as he can, he could finish shaving with the Gillette.

Stropping and Honing would be a thing of the past for him. That alone is worth $5,—the price of a

Keep Your Machinery Under Cover---It Pays

To house machinery does not always do so much good as is commonly supposed. To house machinery under any condition and not properly care for it otherwise is very poor care. Machinery may be just as well off in the shade of a tree, as if it is stored in a leaky, open, poorly drained shed, or in a combined machine shed and hen roost.

There is no question but that it pays to house machinery properly, as it not only adds a great deal of life to the machine, but it also adds to the general appearance of the farm. Where a man is interested enough in his machinery to house it properly, he is also interested enough to care for it otherwise.

A great deal of farm machinery can be placed in a small space if properly arranged. When storing the machinery, it should be placed in the shed according to the time it will have to be removed. The machinery that will be used late the next season should be placed in the back part of the shed and that which is to be used early in the season should be placed in front, so that it will not be necessary to remove a great deal of machinery in order to get what is needed first.

The following list of machinery can be housed in a two-storey shed 20 x 30 feet. The shed has a small side door and a large double door at one end:

On the first floor: A set of blacksmith tools with bench (repair work is done in the shed), riding plow, two cultivators, beet cultivator, binder, mower, grindstone, hayrake, grain drill, two smoothing harrows (two sections each), slip scraper, and lister.

On the second floor: A hay-tedder (taken apart), several light tools, stoves (stored while not in use), some household goods, and other articles too numerous to mention. When there are large crops, grain is sometimes stored on the second floor of the shed. The owner of the shed unhesitatingly states that it is plenty large enough for the implements on 160 acres, providing the wagon and buggy can be stored in some other building. The time required for storing this machinery and removing it each year is estimated by the owner to be one-half day for himself and hired man.

It is not always necessary or advisable to construct a special building for storing farm machinery. Often a very good place can be made in the barn or other buildings. By taking some of the parts off certain machines, they can be easily stored in what otherwise might be waste space.

It is a common practice to build a machine shed on the side of some other building. Such a shed can be built cheaply, and if properly closed to keep out the weather and poultry, is a good investment.

Characteristics of a Good Implement Shed.

1. It must be thoroughly drained so that the implements do not stand in a wet place.
2. It must protect against sun, wind and moisture.
3. It must not be too expensive.
4. It should be located in a convenient spot and so arranged as to be easily used.

The material from which the shed is made will depend upon the cost and the locality. Very good sheds are made of wood-frame construction, covered with sheet iron. Other good ones can be made of wood-frame construction, sided with barn siding, drop siding, or with ship-lap. Shingles, corrugated iron or patent roofing make good roofs for machine sheds.

Clean and thoroughly oil machinery at the end of the season. With such machinery as the binder or mower it is a good plan to thoroughly oil all bearings and wearing parts just before finishing the season. After removing all dirt, wipe the entire machine with an oiled rag or waste. The wearing parts especially should be well greased with tallow or axle grease. If the entire machine is to be housed, these wearing parts do not need to be removed from the machine; but if not, they should be removed and stored in a dry place.

Cultivator shovels, plowshares and attachments which have been removed and greased should be placed where there is no chance for them to get damp. A good plan is to place them in a gunny sack and suspend them from the rafters of the shed or barn.

As the machinery is being stored, all which need repairs or paint should be labeled so that it can not be overlooked, and repairs can be made in the winter when farm work is not crowding.

It pays to keep the farm machinery thoroughly painted. This is especially true with machinery largely constructed of wood. The paint fills all pores and cracks, prevents checking, prolongs the life of the machine and also adds very much to its appearance. Two or three dollars' worth of a good, ready-mixed paint for outside use, or carriage paint, applied each year to the machinery, will add many times the cost of the paint to the value of the machinery.

Busy Balance Wheel.

The balance wheel of an average watch makes 300 vibrations every minute, 18,000 each hour, 432,000 in a day, or 157,788,000 a year.

Always ice a cake while warm.

Cream puffs take 25 minutes to bake.

Health Talks

By John B. Huber, A.M.,M.D

Address communications to 73 Adelaide St. West, Toronto

Questions and Answers.

I am 18 years old and a high school student. I am 5 feet 2 inches high and weigh 120 pounds. I am somewhat athletically inclined. My friends torment me—call me "shrimp" and things like that. My father is 5 feet 6 inches tall and weighs about 150 pounds. My mother is only 5 feet tall. Now here are my questions: Will I grow any taller? People tell me that I will not. Because my parents are of the short kind, does it necessarily mean that I'll have to be short? Are there any ways of making children grow? In other words, how can I grow? I do want to be so much taller than I am. I shall be grateful to you all my life if you can make me grow.

Answer—You will have up to 21 to attain your full growth. After that not much can be done to make you taller. Plenty of exercise may add an inch or two. Short parents have been known to have giant sons. But why should you care, Rufus? It isn't height that makes the man. Think of Grant who just barely got into the fighting class. And Napoleon who wasn't much over four feet. On the other hand I have known some welter weights not fit to black anybody's boots!

Coaling Up the Human Machine.

Food is material which supplies energy for the bodily activities, which enters into its structure and which so regulates the vital processes as to produce and to preserve health.

Calories represent the energy value of food and the energy requirements of our bodies. One person's requirements vary from 2,300 to 3,500 calories the day, less for the desk worker, more for the manual laborer.

Vitamines are substances existing in whole grain cereals, fruits, vegetables, bread, rice, milk, etc. They are essential to the growth and regulation of the bodily processes. They are found in cereals and vegetables in or near the husks or skin; hence the importance of not wasting these important and essential food parts.

Protein is the foodstuff necessary for building muscular tissue. It abounds in lean meat, milk, white of egg, wheat, cheese, beans, etc. Protein also furnishes heat and energy, but not to so great extent as do carbohydrates and fats.

Carbohydrates are starches and sugars. They are found mostly in cereals, vegetables and fruits.

Fats are found in butter, cream, oils and bacon; they also supply energy and heat. An excess of them helps for an energy reserve in the body.

Poultry

It seems strange how suddenly the nature of a male bird can be changed. Here we have two full brothers, reared together, apparently happy in each other's company. All of a sudden something turns up, a challenge follows, and war is declared.

Fighting in the poultry yard must be prevented. Birds are not only disfigured by fighting, but frequently, especially during cold weather, canker results from bad wounds. These wounds should be promptly treated—first washed with hot water and then anointed with carbolated vaseline. Kept in a dry, comfortable pen or cage alone for a few days, the sores will heal quickly and the bird will be fit to put back into the pen.

To permit a whipped bird to remain in the pen with his hens may tempt the hens to pick at his sores and make his condition worse. Besides, he will be mopish and lose appetite, and it will take a longer time for him to recover.

In going in and out of the different yards, a careless attendant is likely to leave gates open, or the latches on the doors may work loose, or some other inexcusable piece of negligence may let males together and cause a deadly combat between the two best males on the place, resulting in a severe loss.

Hens, too, are apt to become quarrelsome at times, especially to a newcomer, and frequently do damage to each other. But they soon forget their grievances.

Fight Insects in Autumn.

Now is the time to start next year's campaign against the insect foe. Do not wait until the cabbage plants are being riddled by the cabbage worm next spring or until the squash vines wilt before the attack of armies of small but very hungry squash bugs. These may be the descendants of individuals which could have been killed the fall before.

One of the best times to fight some of our common injurious insects is in the fall of the year. The cabbage worm, squash bug, and many other notorious "bugs" pass the winter among the stalks and vines of the last season's crop or hide away in rubbish about gardens and fields. Many of these will be destroyed if potato vines, squash vines, cabbage leaves and stumps and other crop remnants are gathered and burned soon after the harvest. All boards, brush, weeds and other rubbish should be added to the bonfire.

White grubs, wire worms, cutworms and other insects pass the winter in the ground, oftentimes in earthen cells shaped by their own feet. Many of these will not be on hand in the spring to start new families if their winter homes are disturbed by the plough this fall. Some would be killed by exposure after having their cells broken open; others would become the prey of birds and animals, while still others would be buried too deep for them to emerge in the spring. Fall ploughing, whenever possible, or spading in the garden is one of the important methods to use in insect warfare.

There are some insects that we are certain to have in injurious numbers each year and so it is wise to use preventive measures against these, rather than wait until the crops are attacked. Much good can be accomplished along this line by cleaning up crop remnants and rubbish and by fall plowing.

One Way to Trap Fox.

Old trappers know that the fox will nearly always show marked interest in anything that looks like the remains of a camp fire. Usually, too, he will dig around in the ashes, doubtless entertaining the belief that something in the way of food has been left by his enemy—man.

Therefore, when out trapping fox it is a good plan to make a bed of ashes. On this bed of ashes place scraps of meat, being careful not to touch the meat with the bare hands, for that would give it the human scent and scarce away the quarry.

Bait the ash bed three or four times, allowing the foxes to visit it unharmed. Then set your trap, carefully covering it with loose ashes. Next, burn a little grass over the place where the trap is set, to make the place look natural. Stake the trap securely, or else have a good clog on the end of your chain. Then put fresh bait near it, using leather gloves doing this, as well as in previous operations.

The fox, satisfied by reason of previous visits that the ash bed is a fine source of supply, and a safe one, too, will be almost sure to spring the trap.

Another good place to make a fox set is on logs or saplings that bridge streams, one trap at each end. Then if the first one fails to catch him you still have a chance with the second.

In all operations for fox, be careful that you do not let the human scent get either on traps, food baits, or scents.

OBITUARY

MRS. CATHERINE A. REDDICK

An old and respected resident of Williamsburg township in the person of Mrs. Catherine Reddick, died at her home on Friday, Nov. 21st, in her 71st year after only a few weeks' illness.

Deceased, whose maiden name was Catherine Weegar, was the daughter of the late Adam Weegar, Williamsburg Township. In 1872 she was married to Mr. Christopher Reddick, who predeceased her some 30 years ago. She is survived by two sons, Frank of Syracuse, N.Y., and Percy J. at home, also one sister and one brother, Mrs. Adam Barkley, of Glen Becker and Mr. Jacob Weegar of this town.

The funeral service, which was attended by a large number of relatives and friends, was conducted in St. Paul's Lutheran Church on Sunday at 11 a.m. Rev. J. E. Bermon officiating. Interment was made in Mount Pleasant cemetery.

The pall-bearers were her six nephews: Geo. W. Reddick, John A. Reddick, Sylvester Barkley, Mason Barkley, John Bowman and Morley Bowman.

JAMES BUCKINGHAM

The death occurred at the Eastern Hospital, Brockville, Sunday evening, Nov. 23rd., of Mr. James Buckingham, for many years a resident of "Riverside." The funeral took place Wednesday at one o'clock, the services being held in the Anglican Church at Riverside, Rev. C. O. Carson officiating. The late Mr. Buckingham was born in Watford, Herdfordshire, England, on 3rd June, 1867. He came to Riverside in July 1906 as head gardener at "Edgehill" On the 30th March this year, he had the misfortune to meet with an accident from the effects of which he never recovered. He fell from the upper storey of the barn to the floor below, striking on his head. He gradually grew worse and was removed to the hospital where he passed away. He leaves to mourn, a widow and two children, also a brother, Arthur, and sister, Emma Buckingham, residing in England. The family have the sympathy of the entire community in their sad bereavement.

MR. G. W. FARRELL
(Montreal Star)

Word was received from Boston of G. W. Farrell. Mr. Farrell, who had been in ill health for the past year, was very well known here.

He was a member of the one time firm of Farrell, Mather & Co., investment brokers, and Farrell, Seely & Co, members of the Montreal Stock Exchange.

He was born in Halifax, where his father, the late Dr. Farrell, was a prominent physician and at one time a member of the Nova Scotia Legislature.

The deceased was for a number of years prominent in Montreal's social and business life. Although only 41 years of age at the time of his death he had made a host of friends. He had not been actively engaged in business for the past year, his health having failed him. He was a trustee of St. Patrick's Church and belonged to the St. James, Montreal Hunt and the Forest and Stream Clubs.

LATE HERMAN RANEY

On Sunday evening, November 23, at the home of Mrs. James Steen, 230 Columbia Ave., Rochester, N.Y., Mr. Herman Raney, late of Aultsville Ont, passed from this earthly life in the 85th year of his age. About seven weeks ago, accompanied by his wife and daughter, Martha, he had gone to spend the winter with them, and with two married daughters and their husbands who live in Rochester. During that time he had taken an interest in his new surroundings, making new friends, and on Sunday attending public worship and a Bible Class for elderly people in the S.S. About a week before his death he showed signs of feebleness, but apparently recovered strength, and on Saturday evening led in family devotion with clearness and strength of thought. Death came peacefully as the result of cerebral hemorrage. A brief service was held at the home by the pastor of Cornhill Methodist Church, and on Friday a public funeral service was held in the Methodist Church at Aultsville where the remains were conveyed for interment. Rev. C. D. Baldwin delivered a very thoughtful and inspiring sermon, based on Psalm 12-1, and the choir led in appropriate hymn.

For fifty-five years the deceased was engaged as a lumber merchant, and was a well-known figure on the waterways of the St. Lawrence from Kingston to Quebec, and in many places in Eastern Ontario and in Northern New York. He was a man of strong convictions, often strongly expressed, but his honesty held the respect of a host of friends. He is survived by his widow (in her 84th year), who has the sympathy of many friends in Aultsville and surroundings. He is also survived by one sister, Mrs. Hannah McLear of New York City; six children, Mrs. E. Shaver, Osnabruck, Hon. Wm. E Raney, K.C., Attorney-General, Toronto; Rev. W. H. Raney, Renfrew; Mrs. James Steen, Mrs. S. J. Campbell, Miss Martha Raney of Rochester, and also thirty-two grand-children and great-grandchildren, who were represented at the funeral by Mrs. D. B. Warner., Fraser Raney, L.L.B., Ralph Shaver, and Miss Nellie Shaver. Two grandsons, Lt Paul Raney, and Lance Cpl. Albert Shaver, P.R.C.L.I., fell in the great war. A third grandson, Lt. H. G. Raney, returned, and is now in Vernon, B.C.

AN APPRECIATION

The Late Wm. McGannon

Allow me space for a few thoughts referring to the subject of this article.

No time in my life with the citizens of Morrisburg have I felt it so keenly as the loss of Wm. McGannon. How mysterious the ways of God are. He would have been among the last to be taken were it in mens' hands. However, we have to submit to the will of God at the last.

I gave expression to a thought in public which I wish to repeat here for fear it may be misquotted or misapplied. I said: "If all the citizens of Morrisburg were of the type of the late Mr. McGannon, we would have no use for lawyers." In business he was the squarest man I ever dealt with, although we differed in some points. I do not believe in hotel business, but he kept the law strictly. His acts of charity were many. He will be missed by so many of our citizens. How meaningless all I have said is after the man is gone from us. Honor a man's acts if good, while he is living. Let us not make a mistake just here. Even the good acts of a man in his natural state will not save him. If it were so man would be his own Saviour.

Christ said to Nicodemus. "Marvel not; you must be born again." He could not understand that. St. John 3.7. That is the teaching of the Gospel, which is not preached today; hence the coldness of the churches. Churches are a worldly institution. How much better would it be for us to submit ourselves to God during life.

The bereaved have our sympathy.

B. S. Wickware.

MISSION CIRCLE

The annual sale of fancy articles, food, dressed dolls, will be held in the basement of Methodist Church, Thursday, Dec. 11th. Refreshments will be served from 3 p.m.

FOR SALE

278 feet of poultry wire; a number of stove pipes; some quary stone; household effects, and other articles too numerous to mention.—Call Mondays or Saturdays.

The Refinement of Purity

CAREFUL cooks know the value of purity. In the making of cakes or pastry they use those ingredients which they believe to be pure and wholesome.

To apply this "insistence on purity" to sugar, is no easy matter—for nearly all sugars look alike to those not expert in detecting variation. The safe course is to use a sugar that comes from refineries in which purity is a boast.

In the Dominion Sugar refineries the boast is backed by a standing invitation to the public to visit and inspect the plants in which Dominion Crystal Sugar is made.

In Dominion Crystal Sugar the housewives of Canada have one sugar that can be depended upon for that Purity which is so essential to successful culinary effort.

This is the only sugar that may be rightly termed "Canadian from the ground up." We do import the finest raw cane sugar and refine it—but our pride is in the product we make from Canadian sugar beets.

Vaudeville

"VOIX DE VILLE" said Jean Chardavoine, a French musician; and thus came into being three hundred and fifty years ago what to-day we call "Vaudeville".

Vaudeville is the melting pot of the dramatic and musical arts. In it nothing is out of place; it includes drama, comedy, tragedy, farce and burlesque; and every form of music from grand opera to jazz is heard upon its stage.

Every city has its favorite vaudeville house. But you—who live at a distance from the great cities—can have vaudeville right in your home, with

The NEW EDISON
"The Phonograph with a Soul"

This marvellous instrument—that is every other instrument in one—will RE-CREATE everything that vaudeville has to offer—the entire magic of the theatre staged for your amusement and pleasure, in your parlor or living room.

Why not let the New Edison bring this wonderful variety of entertainment into your home?

"Edison and Music" is a beautiful book that you should have. Just ask for it and "What the Critics Say" too—it proves Edison superiority.

GERMAN MOTION PICTURE FILMS OF U-BOAT MURDERS FOUND

Camera Men on Submarine Took Views of Undersea Vessels Shelling British Ships—Were Designed For Exhibition in Germany.

A despatch from New York says:—Motion picture films taken from the archives of Grand Admiral von Tirpitz in the former Kaiser's admiralty, and showing allied vessels being torpedoed by German U-boats during the world war, have been brought here by J. H. Macksum, a Knights of Columbus secretary. The films, which were designed for exhibition by Germany on the day of its triumph, were made by camera men on a submarine which was commissioned to cruise about the Irish Coast and photograph merchant vessels after they had been attacked by undersea craft. This boat used more than 40,000 feet of film.

"It was largely through the influence of the present German Government that the films came into my possession," said Mr. Macksum, who had charge of the motion picture work for the Knights of Columbus in France and Germany. "During the revolution the Admiralty offices were raided by the mobs and the canisters containing the celluloid reels became scattered about. At Coblenz I made friends with a former high ranking army officer and he secured the films from a revolutionary leader whom he knew posessed them."

The pictures depict the U-boats shelling four British vessels while those on the ships were swimming for lifeboats and rafts. A torpedo leaving the tube of a submarine and speeding toward its victims is also shown.

CANADA SELLS SURPLUS WHEAT

Receives Cash For Every Bushel of Grain.

A despatch from London says:—With contracts with Britain, Belgium and Italy for the supply of wheat signed, and contracts with France, Poland and Portugal for wheat, barley and flour, now under negotiation, Canada sees her way clear to the disposal of the whole of the year's exportable grain surplus. So far over 800,000 tons of wheat are actually contracted for. It is expected there will shortly be an announcement of the sale of 200,000 tons of wheat to France, which will be paid for on a cash basis, and a sale of flour, which will probably be financed under the French credit of $25,000,000. It is understood Poland is dickering for wheat, but there is difficulty in the matter of payment, and Portugal has enquired for Canadian barley. Canada has not sold a bushel of wheat except for cash, as it is considered our foreign credits should not be used for the supply of such a necessity, wheat being almost legal tender in Europe these days. The Dominion's greatest difficulty has been to sell flour, and France may therefore be allowed to use her credit to pay for what she takes in that line.

High Prices For Canadian War Goods

A despatch from London says:—Dealers and the general public are very keen to get hold of surplus Canadian military stores. A five-day sale, including a varied assortment of 2,400 lots, realized £3,300. Some prices obtained were phenomenal. Canadian grey blankets, costing 29 shillings a pair new, sold for 19 shillings a pair after four years' wear. Tools brought higher prices than the original cost. New boots fetched 21 shillings a pair. Repaired pairs went at 11 shillings. Repaired boots, not guaranteed, made 5 shillings 9 pence. Much used typewriters—128 Underwoods—realized 20 per cent. over cost. The highest price obtained was £25.

British Warships to Carry Commercial Men

A despatch from London says:—British commercial travelers and the representatives of business houses are to be permitted passage aboard every British warship leaving the country for abroad. This, according to Sir Hamar Greenwood, Under-Secretary for Home Affairs, who made the announcement before the Association of British Chambers of Commerce, is "a move unique in the history of the Empire." Walter Hume Long, the First Lord of the Admiralty, has given his assent to this special service, Sir Hamar declared.

French and Arab Troops To Replace British in Syria

A despatch from London says:—Andrew Bonar Law, Government leader in the House of Commons, announced that the Government was arranging with France and Prince Feisal, son of the King of the Hedjaz, for the immediate withdrawal of the British troops from Syria and the assumption of the duties of occupation by the French and Arabs, pending the conclusion of the peace treaty.

Ontario's New Prime Minister

Ernest Charles Drury, who is likely to be Ontario's next Premier, farms 250 acres at Crown Hill. Crown Hill is one of those little places that lost its postoffice when rural mail routes were organized, but it is about five miles from Barrie on the "Penetang" road. Two hundred acres of Mr. Drury's possessions were selected and pioneered by Mr. Drury's great-grandfather in 1819, and have been in possession of the family ever since. The new Leader is a good, practical farmer, with the added advantage of a course at the Guelph College and the degree of B.S.A. He hasn't specialized in his farming to any great extent, though perhaps he takes more pride in his herd of dual-purpose Shorthorns than in anything else. Of late years he has given much attention to the U.F.O. movement, with particular relation to the tariff. Always he has been active in the community life at Crown Hill. The fact that the church and the school are almost at his door made easy his attendance at these meeting places.

E. C. Drury, who has been chosen leader of the United Farmers-Labor parties in Ontario.

The new Leader is a little over forty years of age, is strong and well built, and has a determined look. His family consists of wife and five children, three boys and two girls. His eldest son will be able to run the farm while father runs the politics of the Province. In religion Mr. Drury is a Methodist.

Treaty Effective On Armistice Day

A despatch from London says:—The German Peace Treaty may come into effect on the anniversary of Armistice Day. It was announced by Cecil Harmsworth, Under-Secretary for Foreign Affairs, in the House of Commons, that the Government hoped the treaty would be formally ratified on November 11 and come into force the same day.

Payments Made Russia By Britain in Two Years

A despatch from London says:—Cecil Harmsworth, Under-Secretary for Foreign Affairs, in the House of Commons, said that Constantin Nabokoff, who represented Russia at London, had received from Great Britain, between March, 1917, and March, 1919, when payments ceased, more than £184,000,000.

DIVIDE REMAINING GERMAN WARSIHPS

Majority to Go to France and Italy, Consent of Allies.

A despatch from Paris says:—The Germans must make reparation for the destruction of the Scapa Flow fleet, but this must be paid in other naval material or in property of the German Government which otherwise would not be subject to reparations.

This is the decision of the Supreme Council after hearing reports on the matter, these reports holding Germany responsible for the sinking.

In this connection it is learned that the United States and Great Britain are about to consent that the remaining German warships shall be divided instead of being destroyed, the majority going to France and Italy. This represents a victory for the French.

40,000 Died of Starvation In Petrograd in One Month

Stockholm, Nov. 2.—A despatch to the Tidende from Helsingfors says the famine in Petrograd is assuming terrible proportions. Forty thousand persons have died from starvation within a month, it is declared.

Petrograd has been without bread for the last two weeks, thousands of persons dying daily, according to information brought to Helsingfors yesterday by a Finn who escaped from a prison camp at Moscow on Oct. 12.

Arab Horse Given To King George

A despatch from London says:—The Arab stallion and a 250-year old golden sword which belonged to a Monarch of Persia were presented to King George at Buckingham Palace by Sheik Ahmed, a nephew of the present ruler of Koweit.

GERMANY MUST MAKE GOOD ALL VIOLATIONS OF ARMISTICE

Compelled to Surrender Cruisers and Destroyers to Replace Those Sunk at Scapa Flow and Surrender Equipment of Equal Value to Battleships.

Paris, Nov. 2.—Demand will be made of Germany that all violations of the armistice shall be made good. This has been called upon by the Supreme Council, which has completed the protocal to the German treaty.

The protocol provides that Germany shall surrender cruisers and destroyers to replace those sunk at Scapa Flow, and also surrender floating drydocks, lighters, trains, tugs and other naval equipments equal in value to that of the first-class battleships destroyed, which Germany cannot replace.

There is no provision in the protocol as to how the warships and naval supplies shall be divided among the Allied and associated powers. Germany has been asked to send a commission to Paris to sign the protocol and attend the formal ratification of the treaty.

The Supreme Council has completed its reply to the Bulgarian request for changes in the peace treaty, and will probably submit it to the Bulgarian representatives to-morrow, granting ten days for the signature.

UNITED STATES FEDERAL ORDER FAILS TO CHECK MINERS' WALKOUT

United Mine Workers of America Go Out Without Leadership — Federal Government Seizing Coal Supplies.

Chicago, Nov. 2.—Information obtained from the bituminous coal fields of the United States, in which more than 400,000 members of the United Mine Workers of America have been ordered out on strike, to-night indicated that there would be nothing which could check the momentum of the walkout despite the temporary restraining order which was issued Friday in the United States District Court at Indianapolis. Deprived of the directing heads of its leaders, as a result of injunction, the membership of the union was prepared to enter the first full working day since the strike order became effective in an effort to demonstrate its ability to halt the production of soft coal throughout the nation.

The operators, so far as available reports show, have not yet made plans to combat the strike, notwithstanding the fact that troops, both Federal and State, have been sent in many instances to localities from which they might best guard the coal properties in the contingency of violent efforts to prevent non-union men from taking the places of the strikers. On the other hand, there has been no reports of picketing activity by members of the unions. Both operators and strikers apparently had decided to await developments before either of them takes a further definite step in the controversy.

Reports from various railroad centres showed that seizure of coal in transit, as ordered by the Federal Government, had begun. Hundreds of coal-laden cars in transit were taken over by directors of the Fuel Administration, and were side-tracked to await possible distribution under the administration's priority schedule.

CANADIAN EGGS ON LONDON MARKET

Throngs of Citizens Feast Eyes on Shipment of Rare Food.

A despatch from London says:—A throng of Londoners round the Canadian Government shop in Charing Cross on Friday feasted ravished eyes on a window full of magnificent Canadian eggs. In the good old days eggs and bacon was the world-renowned breakfast of the Englishman. That was before eggs rose to 11 cents apiece and promptly disappeared from currency—an economic cataclysm which cast a gloom on the Englishman's whole existence, and must be held to account in some degree for the prevailing unrest. In the announcement, attached to the astonishing eggs, that "Canada will ship six million dozen eggs to Great Britain this year" the Londoner, weary of the Food Controller's manna, caught the first glimpse of the post-war land of promise.

CANADA TO GET SHARE OF COAL

United States Will Not Discriminate Against Canada.

Ottawa, Nov. 2.—There will be no discrimination against Canada in the matter of coal supply from the United States, the Government has been informed, and Canada will have her share of the output the same as before. This was the statement of Sir George Foster, Acting Premier, to the Canadian Press to-night.

Sir George stated that the coal outlook, which is made serious by the present tie-up in the United States mines, was receiving serious consideration from the Government.

"We have been assured," he said "that Canada will be treated the same as in other years in regard to supplying us with coal. As long as there is coal available there will be no discrimination against us because we are on this side of the boundary."

Considerable uneasiness is felt in many quarters, however, if the strike should last long enough to eat up the supplies already on hand, in which case, of course, the export from the United States would be materially reduced, if not altogether cut off.

Unique Gift to Prince From Montreal Hebrews

A despatch from Montreal says:—Gifts of many kinds have been presented to the Prince of Wales during his tour of the Dominion, but one that differed from the rest was that presented to him during his visit to the Baron de Hirsch Institute. A tablet of gold, on which were carved the Ten Commandments, was presented to the Prince, the tablet being handed to him by Sylvia Lillian Cohen, the nine-year-old daughter of Mr. Lyon Cohen. The commandments were in Hebrew characters, but the words "Presented to his Royal Highness the Prince of Wales from the Jewish citizens of Montreal" were in English.

MILLION FROM LINER PASSENGERS

Enterprising Victory Loan Canvasser Has Already Sold $624,000.

Halifax, Nov. 2.—A new record in Victory Loan campaigning was made last night, when J. C. Stredder raised the total subscriptions from the Cunarder Mauretania to $315,00, giving the liner eight crests on her Prince of Wales' flag, one more than the Adriatic carried away from Halifax on Thursday. This brings the aggregate subscribed by passengers, mostly Americans and British, on transatlantic liners in Halifax during the week up to $624,000.

Mr. Stredder, who is a local insurance manager, conceived the idea of canvassing the liners coming to Halifax. His first adventure on the Adriatic met with a fine response, and when he brought the Lieutenant-Governor aboard to present the Prince of Wales' flag Mr. Stredder started a new drive, backed by British M.P.'s and enthusiastic Americans, which brought the Adriatic's total to $275,000 before she cailed.

The Lapland came next, and Mr. Stredder and his aide, A. S. Carten, extracted $32,000 from her passengers. Two days on the Mauretania have yielded $317,000, with the prospect of more to come.

Monday morning Mr. Stredder boarded the Carmania, which has among her passengers Sir Thomas Lipton, and before the week is out expects to have a round million from the liners.

Sugar Shortage May Become More Acute

A despatch from Ottawa says:—The sugar shortage in Canada promises to become more acute, owing to non-arrival of raw sugar, consequent on the longshoremen's strike at New York. The Canadian Trade Commission has taken a firm stand against further export of sugar, and also advises that as a temporary measure, the demand for sugar for domestic use should be met by the refiners before the manufacturers of products containing sugar are supplied.

J. P. Morgan Subscribes $1,000,000 to Loan

A despatch from Montreal says:—Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, authorizes the announcement of a subscription to the Victory Loan of $1,000,000 made by Messrs. J. P. Morgan Company, New York, through Bank of Montreal, their representatives.

It is believed that this is the first direct subscription by Messrs. Morgan to any of the public issues made by the allies.

Many Trains Discontinued By United States Railroads

New York, Nov. 2.—Sixty-one trains on the various branches of the New York Central Railroad and nine on the West Shore Railroad will be discontinued temporarily to conserve the fuel supply because of the coal strike, it was announced officially here to-day.

BRINGING UP FATHER

THE NERVOUS SCHOOL CHILD

Needs Rich, Red Blood to Regain Health and Strength.

Many children start school in excellent health, but after a short time home work, examinations, hurried meals and crowded school rooms cause their blood to become weak and thin, their nerves over wrought and their color and spirits lost. It is a great mistake to let matters drift when boys and girls show symptoms of nervousness or weak blood. They are almost sure to fall victims of St. Vitus dance, or drift into debility that leads to other troubles. Regular meals, outdoor exercise and plenty of sleep are necessary to combat the nervous wear of school life. But it is still more important that parents should pay strict attention to the school child's blood supply. Keep this rich and red by giving Dr. Williams' Pink Pills according to directions and the boy or girl will be sturdy and fit for school. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the statement of Mrs. Pearl G. Harrington, Kingsville, Ont., who says:—"I have often felt that I should write you and let you know what Dr. Williams' Pink Pills did for me. At the age of thirteen I was afflicted with St. Vitus dance. The trouble became so severe that I had to be taken from school. I was given medical treatment but it did not help me, in fact I was steadily growing worse. Then a friend advised my mother to give me Dr. Williams' Pink Pills, which she did, with the happiest results, as the pills completely cured me and I was again able to take up my studies and attend school. Again about three years ago I was attacked with nervous prostration and once more took Dr. Williams' Pink Pills, and after using five boxes was fully restored. I cannot praise these pills too highly as I believe they will cure any case of St. Vitus dance, or restore anyone who is weak, nervous or run down.

You can safely give Dr. Williams' Pink Pills to the most delicate child, or take them yourself with equally good results when you need a blood tonic. These pills are sold by all dealers in medicine, or will be sent by mail, post paid, at 50 cents a box or six boxes for $2.50, by The Dr. Williams' Medicine Co., Brockville, Ont.

On many farms there are more or less piles of half-rotted manure lying around the barnyard that are in the way at threshing time, but would be valuable if scattered over the pastures.

[redacted]

Until the year 1914, the Long Service ribbon for the Army was similar to that for the Victoria Cross. The only difference was in width, the latter being a fraction of an inch wider. Such was official intelligence.

No less than eleven ribbons recognized by the authorities are entirely blue.

After Waterloo, the Chief Engraver of the Mint was commissioned to prepare a fitting medal for presentation to the leaders of the victorious armies. He did so, but took thirty years to complete the work.

The medal for Culloden was the first to be provided with a ribbon of definite pattern. Before then, each wearer suspended his decoration with any sort of ribbon he pleased.

"Hard Service."

That is the motto of Lord Allenby, the hero of the Palestine Campaign.

He is known in the Service as "the Bull," not because of his massive physique—he is said to have the biggest neck in the Army—but on account of the manner in which he changed and drove away incompetent officers.

He is a man of original sayings. "I would rather have a drunken army than a stale one," is one of them.

How the Eskimo Gets His Meat.

That meat production can be developed in the arctic and subarctic regions of Canada is believed by the Government, which is investigating reindeer with a view to introducing them into the far northern regions of that country.

The reindeer lives principally on the moss, which covers thousands of miles of country in Canada, Alaska, and Siberia, and is a domesticated animal. It is not generally known that the reindeer is not a native of Alaska, but was introduced there in 1891 by Sheldon Jackson, then general agent of education in Alaska.

He discovered that the natural food supply of the Eskimo was fast disappearing with the incoming of the white hunters, and that unless something was done the Government either would have to feed 20,000 natives or else let them starve.

The solution was the reindeer which he introduced in 1891, and later an appropriation was received from the Government for carrying on this work.

Most Appreciative.

The impulsiveness of great men has led to amusing incidents. This story of Rossetti, who was an ardent lover of rare and beautiful china, is one in point:

The great man dined one evening with friends who had learned from him the joys of china collecting. The dinner was served in beautiful specimens of various sorts of ware, and, for the better display of the dishes, was set out on the table. The salmon was served in an especially precious dish. When the cover was removed, Rossetti started, leaned over to examine the dish, took it in both hands and turned it upside down to see the marks on the back. The salmon, of course, fell out on the table cloth, but Rossetti paid no attention, and only exclaimed:

"The very dish I was going to get to-morrow!"

The lady was so elated at having got the dish ahead of her guest that she quite forgave the irreverent treatment of her salmon and of her table cloth.

NOTHING TO EQUAL BAYB'S OWN TABLETS

Mrs. Alfred Naud, Natagan River, Que., writes:—"I do not think there is any other medicine to equal Baby's Own Tablets for little ones. I have used them for my baby and would use nothing else." What Mrs. Naud says thousands of other mothers say. They have found by trial that the Tablets always do just what is claimed for them. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus banish indigestion, constipation, colic, colds, etc. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Where Water Melons Grow.

Melons were first extensively cultivated in France early in the seventeenth century, but were known to the ancients from the commencement of our era. The Egyptians grew them.

They are said to have been carried to America by Columbus, and to the Malay Archipelago by the Portuguese. No other fruit is so variable in foliage and habit, or undergoes so many metamorphoses by crossing its varieties, all of which are fertile.

They are grown extensively in Asia, but little care is bestowed on their cultivation, and they consequently never improve. They grow on sand banks left dry by the falling rivers; if near a town a portion of the crop can be sold, but most of it is valueless, as it rots if taken any distance by cart or boat. With improved communication there might be a sale for most of it.

Minard's Liniment Cures Garget in Cows.

Did You Ever Try This to Wake Up a Boy?

"What is the best method of waking a soundly sleeping person?" is a question quite a few millions of persons would like to have answered, there being few who have not or do not continue to exhaust every scheme and method known to them to rouse some heavy-headed members of their families in time to eat breakfast and get to office or school on time.

"With an odor, undoubtedly," a well-known physician replied to the question. "The sense of smell is the most easily aroused of any of the five. We have trained ourselves to disregard noises—else we would get no sleep at all in a city. In the country, the same sounds which we utterly disregard in town would awaken us instantly. To shake a person is more or less successful, as a rule, but often it serves to only half rouse the sleeper, and he turns over and goes to sleep again, or, if he does wake, he is apt to be in a bad temper. Any really unusual noise is effective, but one can't think of a new noise-making method every morning.

"When an odor is used, however, the sleeper wakes at once—is wide awake. Almost any odor will answer, if not too faint. Perfume of any kind is especially good. Ammonia, camphor—in fact anything with a decided odor will do, but it should not be too powerful, or the awakening will be violent."

BIFF!

Stop jolting Liver and Bowels with violent drugs, but take "Cascarets."

"Dynamiting" bile out of your system with calomel and other sickening purgatives is all wrong. Salts, Oil, and Cathartic Waters act by flooding the bowels with the digestive juices which are vital to the stomach. Cascarets are different. They act as a tonic to the bowel muscles, which is the only sensible way to relieve a bilious attack, a sour, acid stomach, or constipated bowels. There is no griping or inconvenience. You naturally return to regularity and cheerfulness. Cascarets cost very little and they work while you sleep.

Valuable Old Violins.

Violins made by Stradivari are rarely worth less than $5,000. One recently realized $15,000 and a cello $20,000. Yet Antonio Stradivari sold his fiddles for about $20 each! An old Strad, like an old coin, always fires our imagination. Sometimes they do represent a fortune, but, unfortunately, there are so many spurious instruments about that many a person is doomed to disappointment.

A druggist can obtain an imitation of MINARD'S LINIMENT from a Toronto house at a very low price, and have it labeled his own product.

This greasy imitation is the poorest one we have yet seen of the many that every Tom, Dick and Harry has tried to introduce.

Ask for MINARD'S and you will get it.

Taking Census in India.

Taking a census in India always arouses the popular superstitions and dread of unknown evils. After the last census of the Bhils their chiefs insisted on a new Imperial obligation that "in future no Bhil woman should ever be weighed," they fearing that the plumpest and heaviest women, the national beauties, were being checked off for appropriation by the census takers.

MONEY ORDERS.

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

[illegible] good, big draft horses and sell them before they wear out.

Occasional lots of clover seed contain the seeds of such weeds as wild mustard, bladder campion or other serious pests. It is never safe to use seed whose weed seed content is not known.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You simply say to the drug store man, "Give me a quarter of an ounce of freezone." This will cost very little but is sufficient to remove every hard or soft corn from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn should relieve the soreness instantly, and soon the entire corn, root and all, dries up and can be lifted out with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that, while freezone is sticky, it dries in a moment, and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin.

Don't let father die of infection or lockjaw from whittling at his corns, but clip this out and make him try it.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California."

ED. 7. ISSUE No. 45—'19.

BITS OF HUMOR FROM HERE & THERE

Slugs to be Shot.

Aunt Jane was desirous of purchasing a gun for her nephew. The shopkeeper produced a couple.

"This one shoots caps and this one slugs," he said.

"Oh, thank you," exclaimed Tommy's aunt. "I'll have the second one, for we're troubled terribly by those slugs."

A Very Raw "Rooky."

New Recruit (to Quartermaster)—"Can I have my puttees changed, sir?"

Quartermaster (eyeing puttees—"But your puttees are new—you've only had them a few days. Why do you want them changed?"

New Recruit—"They're too tight, sir."

Money in "Antiques."

X.—"Gee whiz! Is that Smithson who just went by in his motor-car? When I knew him a few years ago he had a second-hand furniture shop."

Y.—"He still has. Only he has moved it to a fashionable street and labelled the same stock 'Antiques.' "

Their Demands.

Street Cleaners—"We demand narrower streets and wider brooms."

Firemen—"All buildings must be built of asbestos. We want cooler flames."

Policemen—"We must not be required to catch motor bandits. Inspectors must go."

Garbage Men—"All trash must be neatly dusted before being thrown out."

Milk Men—"Later mornings; fewer babies."

Minard's Liniment Cures Distemper.

Transparent Mountain.

In the island of San Domingo there is a remarkable salt mountain, a mass of crystalline salt nearly four miles long, estimated to contain nearly ninety million tons, and said to be so clear that medium-sized print can be read through a block a foot thick.

DON'T NEGLECT A RHEUMATIC PAIN

dangerous

Apply a *little*, don't *rub*, let it *penetrate*, and—good-by twinge! Same for external aches, pains, strains, stiffness of joints or muscles, lameness, bruises.

Instant relief without mussiness or soiled clothing. Reliable—the biggest selling liniment year after year. Economical by reason of enormous sales. Keep a big bottle ready at all times. Made in Canada. Ask your druggist for Sloan's Liniment.

SITUATIONS VACANT.

ARE YOU LOOKING FOR AN OPENING to prove your ability? Or, are you just drifting along on the principle that "everything comes to him who waits"—without much thought of your efficiency? If you are in the latter class, be up and doing—train your mind and memory so as to be ready for Opportunity when it comes your way. In other words, Pelmanise! If you know you have ability, why not use the waiting moments to improve your efficiency and incidentally acquire that Personality which means so much in seeking Success? Small town or big city, or on the township side line, it matters not—the Pelman System is conducted by mail. "Mind and Memory" tells you all about it. It is a book that's free and lays no obligation upon you to enroll, though you'll be surprised to find how moderate is the fee required. Write for the book and particulars to-day to the Pelman Institute, 765 Temple Building, Toronto, Canada.

The Most Healthful and Economical Drink

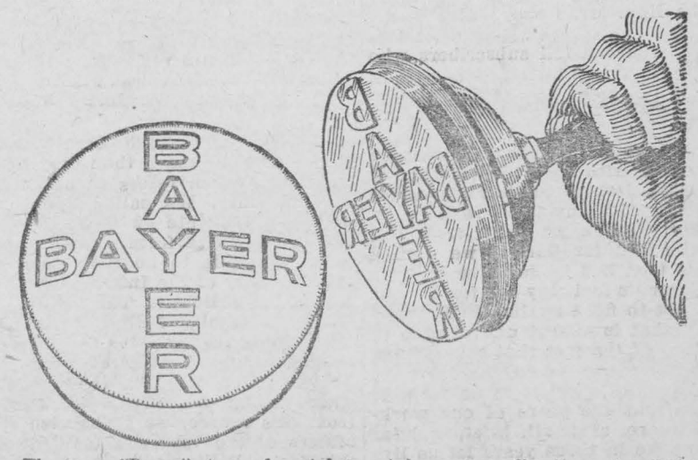
INSTANT POSTUM

Made in a moment, in the cup, and there's no waste.

It Satisfies!

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"



The name "Bayer" stamped on tablets positively identifies the only genuine Aspirin,—the Aspirin prescribed by physicians for over nineteen years and now made in Canada.

Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains proper directions for Colds, Headache, Toothache, Earache, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

..Remember the "Rocky Road to Dublin", Music Hall, Friday, Dec. 5.

..Thursday, Dec. 4th, the Women of St. James Guild will hold their annual Supper and Xmas Bazaar in St. James Hall. Home-made Candy; Fish Pond; Dolls, and Xmas Gifts to buy for all your friends.

One hundred real "egg layers" on each of the 750,000 farms in Canada is the slogan adopted by a poultry club just formed at Winnipeg, as announced by R. J. Young, secretary. Allowing a net profit of a dollar per hen this would mean an annual revenue of $75,000,000, he declared. An elaborate campaign to forward this project will be waged.

Critical condition of coal supply makes it probable that material reduction in passenger train service will be made effective Sunday, Nov. 30th.

Mrs. Jas. Brodie and children of Montreal are spending a week with her mother, Mrs. Philip Fetterly.

Mrs. Herbert H. Bradfield was in Montreal this week.

We sincerely regret to learn of the serious illness of Mr. Geo. N. Lavis who is confined in a hospital in Minneapolis, Minn.. Mr. Lavis contracted a severe cold in the early autumn which he was unable to break up It will be remembered that on Dec. 17th, last Mr. Lavis conducted one of the most successful sales e er held in Eastern Ontario, consisting of Farm Pure-bred stock and machinery. His son, the late Geo. Audene Lavis who was responsible for a greater part of the success of the sale, died only a few days after, of influenza, and was buried in the Methodist cemetery west of town. His widow, Carrie Broder Lavis and two children reside with Mr. and Mrs. Geo. N. Lavis at 3024 James Ave. So. Minneapolis, Minn.

A meeting, called for the purpose of reorganizing the Curling Club for the coming winter, will be held at the curling rink on Tuesday, Dec. 2nd. All interested, are requested to attend.—Fred S. Broder

The annual free distribution of samples of seed grain is being conducted at the Central Experimental Farm, Ottawa, by the Dominion Cerealist. Applications must be on printed forms which may be obtained from the Dominion Cerealist. As the stock of seed is limited, farmers are advised to apply early.

Seventy-seven passenger trains may be temporarily removed from the Grand Trunk lines in Ontario owing to coal shortage.

There is not likely to be any reduction in the price of Canadian cheese; the fact is that there is a brisk demand for every pound and the supply this year will not nearly equal the demand The Food Controller in England announces that in view of the depletion of the ministry's stock of cheese by the recent emergency issue made in consequence of the strike, he has now decided to purchase the estimated balance of 5,500 tons of this season's exportable surplus of Canadian make.

Mr. S. B. White, G. T. R. operator has taken over the express agency which was formerly in charge of the late Mr. W. H. McGannon, and the parcels will hereafter be received at the G. T. R. station. Mr. John Bell is in charge of the delivery.

A general meeting of the Milk Producers and Shippers from Cardinal and all points east to Moulinette, will be held at the Agricultural Office, Morrisburg, on Thursday, Dec. 4th., at one o'clock sharp for the organization of a local branch of the Montreal Milk Producers' Co-operative Agricultural Association. Mr. W. L. Carr, Huntingdon, Que., Secretary of the Association, will address the meeting.

Mrs. Sam Williams and children, who spent a couple of weeks with her sister, Mrs. C J. Weegar returned to her home in New Castle, Pen., on Tuesday.

Our readers will be interested to know that the rumor to the effect that Mr. W. H. Casselman, M.P., intended resigning his seat in favor of the Hon. Mr. Raney, is not true. Mr Casselman in a recent letter says: "You can tell subscribers who are my friends, that I have no intention of betraying them. I am not at the beck and call of any man or party."

Mr. Arnold Jarvis, having secured a position with the Morgan Co., of Montreal, left to assume his duties with this company on Tuesday.

"For Canada we want a better moral state; for Canada we want a people that has its head in Heaven, wherever its feet may be; for Canada we want to fight against this materialism that is almost unavoidable in the face of the fact that a multitude of people have made more money than they know what to do with, to realize that the years of our working life are, after all, brief, and for God's sake in those years let us live for a result, not in those things which perish, but for those things which endure.—Principal Taylor of Queen's University.

The teachers of Ontario are organizing a federation for the purpose of improving their status in the community, and of working together for their mutual advantage. It is expected that ten thousand teachers will seek membership.

Born—November 22, to Mr. and Mrs. Roy Casselman, a daughter

Mr. W. K. Farlinger returned home on Wednesday after some three weeks' treatment in the General Hospital, Montreal.

Miss Von Doran returned home on Wednesday, after spending a week in Toronto.

The scarcity of draft horses both for city trade and farm work exists not only in Great Britain but on the continent. Belgium is in need of large numbers of moderately priced horses. In the Agricultural Gazette for October appears a statement by Mr. H. S. Arkell, Live Stock Commissioner, who recently visited Europe and found on inquiring into the horse trade that France is in the market for farm horses of the Percheron type. In that country work horses are scarce and worth six thousand francs each. Greece, according to the Live Stock Commissioner, is now making inquiries regarding light horses and dairy cattle.

Mr. and Mrs. Fred D. VanAllen left this week to spend the winter in Ottawa and Montreal with his two daughters.

Mr. Calvin Saddlemire returned to his home in Winnipeg on Wednesday, Nov. 19th, after spending some three weeks in this vicinity, having been called to the bedside of his father, the late Ezra Saddlemire, who died on Nov. 3rd.

Mrs. Delmar Marshall of Watertown is visiting Mrs. Allie Prunner.

Mr. [illegible] B. Fetterly, M. A., inspector of Public Schools paid the local schools a visit this week

Mr. John Patterson of Winchester Springs, a very highly respected citizen of that place, died on Friday, Nov. 21 at the age of 76 years.

Mrs. W. H. E. Warner of Toronto was the guest of her parents, Mr. and Mrs. W. L. Southworth for the past week:

CORRESPONDENCE

Editor, The Leader.
Town.

Dear Sir,—As a charter-member of the Women's Institute, I feel it would not be fair to our Society, nor would it be courteous to you from whom we have always received the greatest consideration and help, to ignore your spirited attack on us in last week's Leader. Were we to do so we might merit the epithet "oysters" to which your correspondent, with as little gallantry as courage, likened us in his anonymous letter.

I think you are unjust in your criticism. To act upon it would compel us to make definite charges (which you carefully avoid doing) against a man who was so recently added to the Collegiate staff that he was as little known as were his domestic affairs. Even were they familiar to us, I question our right to dictate to the men on the school board. Either they have the mental and moral qualifications to be trustees for our young people, or it is the duty of the ratepayers to see that they are not there at all.

When the Women's Institute has representation on the school board, I can assure sir, it will not be slow to act there in the interests of the children.

Your anonymous correspondent's objection to our society being opposed to the time-waisting and obselete custom of a house-to-house canvass for votes is like "the flowers that bloom in the Spring—It has nothing to do with the case.

Yours very sincerely.
..GRACE D. MERKLEY,
Secretary Women's Institute.

Note—Nothing could ever strike wider from the mark than the above statement which refers to us shirking our duty. We called upon the Women's Institute as a worthy organization, to perform a duty which was impossible to an individual. If the Secretary of the Institute will refer to the article in The Leader of Friday, November 14th, she will find that we challenged the Board of Education to reveal certain irregularities which were said to exist. There being no effective response from this source, we acquainted the officers of the Women's Institute of this fact. Failing redress, we made what the Secretary terms a "spirited attack" on the Women's Institute by stating that "failing to put themselves on record as being opposed to the indifference of the Board, their silence gave consent to the irregularities."

The Women's Institute enjoys an irreproachable record, and the high standard of their institution reflects an influence which, if brought to bear upon the Board, would have caused an investigation.

OVERCOATS

FOR the professional and civilian who insist on staple garments of quiet and good taste, we suggest a "CHESTERFIELD" in greys and dark colors. This overcoat can be made to suit the many different seasons by selecting weights and texture recommendable to the different temperatures.

Clothes made by us bear the guarantee that any garment not satisfactory may be returned.
