Births

At Winchester, on Apl. 12th, 1926, to Mr. and Mrs Earl Shaver, a daughter.

At Winchester, on April 12th, 1926, to Mr. and Mrs. Archie Jackson, a daughter.

Card of Thanks

Mr. and Mrs F. R. Pratt, of Brockville wish to thank their many kind friends and neighbors and also the choir of St. Paul's Church, and Rev Mr. Kirkwood, of Ormond, for their assistance and acts of kindness during their recent sad bereavement in the death of Mrs. Martha Salter. 49p.

Law On Maple Syrup

An order in council has been passed establishing new regulations governing the sale of maple syrup. The regulations are as follows: All packages or containers such as bottles, jars and cans containg maple syrup exposed for sale, offered for sale, or sold to the consuming public, shall be labelled to show plainly and distinctly:

(a) The name of the article.

(b) The name and address of any individual or firm assuming responsibility for the packing

(c) Volume and net weight of contents.

New Presbyterial Meets

(Contributed.)

Union of the Women's Missionary Societies of the former Methodist Congregational, and Presbyterian bodies was consummated at a great public inaugural service held yesterday morning in the United Church, Winchester.

Prayers, scripture readings, and hymns of praise made up this service after which an impressive Communion service was conducted around the altar rail by Rev. J. A. Waddell, the pastor of the Church, assisted by Revs. Johnston, Clarke, Maxwell and Matheson.

Greetings from Dundas Presbytery were brought by Rev. A. B. Johnston, of Spencerville.

The Interim Committee of thirteen members occupied the platform during part of this session, which was presided over by Mrs. Merrill.

Words of welcome were given from the local Auxiliary by the Pres., Mrs. Earle. These were ably replied to by Miss Connell, of Spencerville.

The attendance was very large and representative, delegates and visitors being present from all parts of Grenville and Dundas. At the opening of the inaugural service the three groups of representatives of the united societies entered the church doors singing, "The Church's One Foundation." Miss Phillips presided at the organ and Mrs. P. Durant led in the service of song. The ushers were Miss Annie Walker and Dr. Fetterly.

AFTERNOON SESSION

Mrs. Clarke Hyndman presided during the first part of the afternoon session and conducted the opening devotional exercises, reading a short scripture message from John on love on which an exposition was given, followed by earnest prayer by Miss Fairbairn. A roll-call of Auxiliaries, Y. W's, Circles and Bands showed a large representation from the majority of charges, although a few places were not represented because of the bad roads. Hallville had the largest number present.

Among business matters discussed was the matter of membership fee, whether it should be one dollar a year or less. It was decided to make it one dollar. This was in the form of a memorial to the Board in Toronto. Presbyterial meeting is to be held in October, and the officers expenses are to be paid. Meals served at Presbyterials are to be charged for at the rate of 25c a meal. A number of suggested bylaws were submitted and approved.

In a survey of the new Presbyterial, Miss Connell said that one Circle, one Band, and seven auxiliaries had come in from the former Brockville District. Mrs. Hyndman reported fourteen auxiliaries, three Y.W.A's., and four Mission Bands coming in from the Brockville Presbyterial. Mrs. (Rev.) Millar said that the Perth District was bringing in eight auxiliaries, and one Band.

Mrs. Merill, in reporting for Matilda District, said that twenty-three auxiliaries eleven Circles and nineteen Bands had come in from the former Matilda District.

Mrs. W. H. Henderson, of Ottawa, presided at election of officers. The report of the nominating Committee was brought in by Mrs. (Rev.) Miller:

Pres.—Mrs. Merrill, Morrisburg.
1st Vice Pres—Mrs. Hyndman, Hallville
2nd Vice Pres.—Mrs. Hilliard, Morrisburg.
3rd Vice Pres.—Mrs. Anderson, Heckston.
4th Vice Pres.—Mrs. Murray, Maynard
Cor. Sec.—Miss Connell, Spencerville.
Rec. Sec.—Mrs. Snider, Kemptville.
Treas.—Mrs. Elliott, Prescott.
Young People's Work—Miss J. Smith, Heckston.
Children's Work—Mrs. J. Murdock, Shanley.
Associate helpers—Mrs. McCarley, of Shanley.
Supply Sec.—Miss Farlinger, Morrisburg.
Missionary Monthly—Mrs. Coleman, Hallville.
Christian Stewardship—Mrs. Earle, of Winchester.
Stranger's Sec'y—Mrs. Nash, Iroquois.

This report was adopted unaminously.

Delegates to Branch Meeting were appointed as follows: Miss Pearson and Mrs. R. J. Dougall, of Merrickville; Mrs. Murray, of Maynard; Miss Fairbairn, of Spencerville; Mrs. W. H. Casselman, of Chesterville, Mrs. A. B. Allison, Morewood, Mrs. (Rev) Wright, Cardinal, Mrs. (Rev.) Miller was appointed a member of the Branch Nominating Committee.

Mrs. Henderson conducted an interesting and helpful round table conference in which many difficulties were solved. South Mountain extended an invitation to the Presbyterial to meet there next October, which was accepted.

An inspirational consecration service was conducted by Mrs. Hill and in which she gave the meaning of the word "consecration" to give oneself unreservedly to the service of God. Why should we do so? Because God expects us to do this. Are we prepared to give our time, our talents, and our service unreservedly to God? The consecration hymn was sung, followed by prayer by Mrs. Hyndman. Miss Edna Shaver presided at the organ at this session.

The afternoon ushers were, Misses Tottie Reveler and Jessie Preston. Excellent meals were served by a splendid refreshment Committee in the Sunday School Hall, to which all did ample justice.

EVENING SESSION

Rev. J. A. Waddell, pastor of the Convention Church, presided at this session except when greetings were being brought just at the opening when Mrs. Hilliard had charge, The W. M. S. of St. Paul's Presbyterian Church sent greetings with Mrs. Empey, who expressed the co-operation of their Society in our missionary work. Mrs. (Rev.) Butcher in speaking for the Baptist ladies asked for God's blessing upon our work and the indwelling of His spirit in his workers. Mrs. Ritchie, on behalf of the Women's Institute spoke of the home missionary work of this organization in comparison with the larger work of the W. M. S.

The W. C. T. U. was represented by Mrs. N. W. Beach, who said that the W. C. T. U. should be the right hand of the W. M. S.

Reply to these greetings was ably made by Mrs. A. O. Watts, of Merrickville, in which she feelingly referred to each of these organizations.

With Rev. Waddell were associated on the platform, Mrs W. H. Henderson, Mrs. Clarke Hyndman and Mrs. Merill. After singing, All Hail the Power of Jesus Name, Rev. Waddell led in prayer and the then read a missionary message from God's Word. Rev. J. W. Clarke, of Hallville, in introducing the officers of the new Executive made a masterly, elo-

(Continued on last page)

LOCAL AND GENERAL

Main and St. Lawrence streets will soon need the sprinkler.

Rev. J. A. Gibb, returned missionary from Japan, will speak in the Wesleyan Church on Sunday morning, April 25th.

Cars are now running between Vernon and Ottawa, but the road from Winchester to Vernon is as yet impossible for cars.

Mr. G. A. McIntyre, district plant Superintendent of the Bell Telephone Co., at Kingston has been transferred to Cornwall.

Luther Burbank, of California, known as the plant wizard, and who is responsible for our seedless orange, died on Sunday last. He was 77 years of age.

It has been learned that Rev. S. F. Newton, pastor of the United Church, of Lachine fractured his right arm at the wrist last week while cranking his car.

A few barrels of good sound apples to clear at bargain prices. Fennell and Wallace.

If you want to get plants, trees or shrubs, for spring planting, you can get them through the Horticultural Society and get the best and at lowest prices Get a premium list from the secretary, Mr. Robert Ault.

The copper wire strung from the upper power house at Morrisburg to the "tin plate" works there some years ago was last week taken down and sold, for approximately $1,000, which will be used in making necessary repairs to the power house The wire being much too large for ordinary service had no other than scrap value and had to be removed from the poles, as a number of the cross bars had rotted and were about to fall.

A Gold Fish Sale will be held at the Rexall Drug Store, April 23rd and 24th. Further particulars in next week's Press.

Last Thursday forenoon, the home of Mr. Vince Bolton, who resides south-east of Baldwin's Bridge, was completely destroyed by fire. The blaze was caused by a defective chimney. The contents of the downstairs was all that was saved and the insurance policy had expired last June leaving no insurance. Mr. Bolton has had a great loss in this blaze although his insurance policy was past due, he should receive consideration of some kind from the company as he has been paying in to it for over twenty-seven years.—Mountain Herald.

The following from the Regina Leader of April 3rd, refers to a brother of Mr. John Gibson and Mrs. George Fraser, of Winchester: Mrs. Hilda S. Knight, Sidney, B. C., and A. W. Gibson, Regina, were married Wednesday at six o'clock by Rev. McElroy Thompson, Carmichael United Church, at the home of Mr. and Mrs. R. O. Berwick, 2260 Halifax street. A number of friends of the bridal couple were present, The bride wore a gown of jade and silver cut velvet and a bouquet of orange blossoms and heather. After the wedding dinner was served Mr. and Mrs Gibson left on a honeymoon trip. They will reside in Regina.

By special request, the choir of St. Paul's Presbyterian Church, will repeat the Easter Cantata, "The Conquering King" on Monday evening, April 19th, at 8 o'clock. Silver collection.

The time table for the annual departmenlal examinations has been issued by the Ontario Department of Education and will run from Monday, June 21st, to Tuesday, July 1, inclusive. High School entrance examinations will be held on Monday, Tuesday and Wednesday, June 28, 29 and 30. Lower School examinations will be from Friday, June 25, to Wednesday, June 30, inclusive. Middle School papers will be on all dates from June 21 to July 6, with the exception of June 29 and 30 and July 1, on which no examinations of any form will be written, and Upper School examinations will be from June 21 to July 1, inclusive.

St. Paul's New Minister

Rev. C. G. Graham, of Mount Bridges, Ont., will to-morrow, Friday, Apl. 16th be inducted into the pastorate of St. Paul's Presbyterian Church, Winchester, Rev. D. O. McArthur, Moderator, South Mountain, will preside. After the induction a public reception will be held. Rev. Mr. Graham is a young unmarried man, and is reputed to be a good speaker, an earnest and energetic worker. St. Paul's has been without a regular pastor for several months, and the congregation will be delighted to have a regular pastor again.

The Late Mrs. Shaver

It was with sincere regret that the residents of Winchester and vicinity learned of the death of Mrs. Byron Shaver, on Monday night, at her late residence after remaining unconscious for almost a week from a stroke. The late Mrs. Shaver, daughter of the late Mr. and Mrs. Robert Graham, was born at South Mountain where she lived until her marriage. She has resided in Winchester for a number of years, and was a popular and highly esteemed citizen, she was a devoted member of the Presbyterian Church, and was always interested in all its departments of work though laid aside from active duty by ill health which she bore with patience and christian fortitude.

She is survived by a loving and a devoted husband, two sisters, Miss Jennie, of Winchester and Mrs. Brunton, of Russell, four brothers, James, R. K. and Anson, of South Mountain, and Andrew C. of Calgary, Alta.

The funeral service was conducted from her late residence by Rev. Mr. McArthur, of South Mountain basing his remarks on first verse of the 5th Chap. of 2 Cor. emphasizing the great need of our being ready for the call of the Master as the deceased was.

The funeral was largely attended by friends and relatives, the floral tributes were as follows showing the esteem of the deceased.

Husband and Miss Jennie Graham, sister, Wreath. Mr. and Mrs. Brunton, and Mr. and Mrs. Anson Graham, Sprays. Mr. and Mrs. T. O. Keyes and Harold, Crosss. Staff of T. O. Keyes Store, Wreath. Dr. and Mrs. Bean, Mound. W. M. S. and Ladies Aid Presbyterian Church, Wreath. L. D. Munroe, Mr. and Mrs. R. M. Elliott, Mr. and Mrs. Thos. Annable and Mr. and Mrs. Geo. Fraser, Sprays.

LOCAL AND GENERAL

Shut up—your hens.

And now we have neither sleighing or wheeling.

The highway between Ottawa and Prescott is now free from snow.

St. Matthias Church Service Sunday morning, April 18th, 10.30 A. M.

By the end of this month our University students will all be home again.

Cornwall is to have an old home week from July 31 to Aug. 7th and plans were completed last week.

The disappearance of snow is a reminder that a "clean up" day is not far away. It can't come too soon.

Dr. George Boothe, V. S., a native of Osgoode, has sold his practice at Palmerston and has opened an office in Russell.

And now, why couldn't the Women's Institute invite the grandfathers to their social afternoon as well as the grandmothers.

The highway between Kingston and Toronto is clear and cars are now travelling between Brockville and Kingston. In another two weeks the highway will likely be open for car traffic all the way to Montreal.

Rev. T. P. Shaver, of Brinston, has been appointed Superintendent of the Boys' Farm at Mitchell, Ont., in connection with the Social Service work of the United Church. Mr. Shaver has resigned the Matilda pastorate and will leave shortly to assume his new duties.

A petition, signed by a large majority of the business men of Morrisburg, was presented to the Council at their last regular meeting asking that a by-law be passed, officially declaring Mondays, Wednesdays and Fridays, early closing nights in Morrisburg.

After being in effect for five months, a period which inciuded the Christmas rush of parcels, the parcel post rates which went into effect on October 24 last have been cancelled and the lower rates which existed prior to that date will again prevail on and afeer Apr. 12. Parcels up to 15 pounds will be carried.

The Toronto Star announced "on good authority" that the largest power plant in America will be built in Morrisburg by the Ontario Hydro Electric Commission providing that a permit is issued by the Dominion Government for construction at that point. The Government has held up the permit pending the report of the International Board of Engineers.

Prof. George D. Ferguson, of Kingston, the oldest living graduate of Queen's University, who received the degree of B. A. in the year 1854, will have an important place in the forthcoming motion picture which will depict the developement of the university and its student activities. Dr. Ferguson, at the age of 96 years, is still very active, and his appearance in the movies will be most interesting.

Death at VanCamp.

Mr. Wm. Shaver, of VanCamp, aged 73 years, father of Mr. Geo. E. Shaver, Winchester, died on Tuesday last and will be buried to-morrow, Friday, at 1 o'clock in the afternoon.

SOCIAL AND PERSONAL

Master George McKeown spent the Easter holidays with friends in Ottawa.

Mrs. Franklin Poole spent the last two weeks the guest of Mr. and Mrs. P. F. Poole.

Mr. Charles Weary spent the holidays the guest of Mrs. Robert Meldrum, of Berwick.

Mrs. Sam Wylie, of Hallville, spent a day with Mr. and Mrs. P. F. Poole, of Winchester.

Mr. Cecil Summers has returned home after visiting his sister, in North Augusta, for the past few days.

The Misses Eva Fawcett and Hazel Thompson spent the week-end with Miss Pearl Bellinger, of Vancamp.

Mrs. Eliza Alexander Bullard of Madrid, N. Y., is spending a month with her neice, Mrs. John R. Scott.

Miss Annie Sharpe returned to her school Monday evening, after spending the holidays at her home here.

Mrs Albert Derby and daughter, Bertha spent the Easter week at the home of Mr. Eddie Wilson, of Ottawa.

Dr. Empey, of Hammond, N. Y., who spent the Easter season with his mother here, returned home on Monday last.

Mr. and Mrs. J. W. Locke, of Lawrence N. Y., were last week guests of Mr. and Mrs. Geo. F. Mowat, at Winchester Hotel

Mrs. Chas. Turner, of Cardinal, and Mrs. Geo. Cass, of Chesterville, were guests of Mrs. W. F. Workman this week.

It is rumoured that the Earl of Cavan is to be the next Gov.-General of Canada succeeding Baron Byng, the present holder of the office.

Visitors at the home of Mr. and Mrs. G. S. Coons last week were, Mrs. Lorne Boyd, of South Mountain, Mrs. John Fayder, Mrs. P. Poole and son Ralph, of Winchester.

There passed away at Arnprior, Ont., on Saturday last, Lavina Williams, wife of Mr. Walter King, and sister-in-law of Mrs. Flora, Mrs. Wm. Shaver and Miss King, of Winchester. The funeral took place on Monday. Mrs. Wm. Shaver went up on Sunday evening and was present at the funeral.

Rev. W. H. Summers, of Carthage, N. Y., has been spending the past week with relatives in town. He also made a trip to Summerstown, looking up some records of his ancestors, with the view of writing a family history. He intends having a monument erected in that town in honor of his great, great Grandfather, Andrew Summers, one of the original U. E. Loyalists.

Women's Institute

Do not forget Grandmother's Day next Tuesday the 20th, at 3 o'clock, in the Town Hall. Every member is to bring a grandmother who is not already a member. Roll Call is to be answered by naming things our grandmothers missed. Mrs. Campbell will give an address on, Making the Commonplace Life Interesting. A paper will be given on 'Pioneer Days' and old songs will be sung. A cup of tea will be served by the Executive.

Pasture

Good pasture one and one half miles north of Ormond, known as the McIntosh Farm. Pasture open May 10.

Frank Coulthart,
Winchester, R. R. 1.

The Automobile

MOST OF AUTO BLAZES CAUSED BY BACK-FIRING.

Automobiles do not catch on fire nowadays as frequently as they used to. Manufacturers have made them about as nearly fireproof as possible. Brick houses are also considered quite fireproof. Yet the average home owner doesn't care to take a chance on insurance protection. He knows that such houses do sometimes burn. The wise automobile owner realizes that there is a possibility of his car burning up and gets insurance protection. For when a car does burn the destruction is apt to be complete. Yet motor car fire insurance is inexpensive.

However, when a brick house burns down the owner receives the full amount for which it was insured. This is not true of the automobile. The owner of a car destroyed by flames gets a sum which represents the actual market value of the machine at the time the loss took place. Such an arrangement is really fair, for on any other basis, whenever the owner of an insured car got tired of it and found he could not possibly sell at the price he paid for the machine, all he had to do was to stimulate a convenient fire. This would enable him to recuperate whatever loss he had sustained through depreciation.

KEEP DRIP PAN CLEAN.

The most general cause of an automobile fire comes from back-firing. And the principal reason for back-firing is too lean a mixture fed to the cylinders. When there is a back-fire a sheet of flame comes from the air intake of the carburetor. If there is anything inflammable nearby it is very apt to catch on fire.

Gasoline vaporizes so quickly that if there is gasoline in the drip pan there is apt to be a sufficient mixture around the carburetor to make trouble. The idea is to keep the drip pan free from gasoline. See that there is no leak in the supply pipe or in the connection to the carburetor. Also see that there is no overflow coming from carburetor due to poor seating of the float valve.

Operating a car at high speed for a long distance may cause the exhaust pipe to become hot. If it is next to any wood, this may cause a fire, especially if there is an accumulation of grease and oil in the wodwork. To minimize this danger do not drive continuously at top speed and keep the woodwork free from grease and oil.

The exhaust pipe also heats up when the engine is run with a greatly retarded spark. Sometimes it will become red hot and set the woodwork on fire. Fires have also been known to catch by opening the muffler "cut-out" in the starting up. This danger is greater inside the garage than out of doors, since there is usually more or less spilled grease and gasoline on the garage floor.

PERIL IN SHORT CIRCUIT.

Another cause of fire comes from short-circuiting of the ignition or lighting systems when a storage battery is used. A short circuit may heat one of the wires red hot and burn off the insulation. If there is any accumulation of grease or oil or gasoline near by a fire is liable to start.

Another form of fire insurance protection which ought to be a part of the equipment of every car, is one or two fire extinguishers. Some fire insurance concerns give a reduced rate to cars thus equipped.

After having taken every precaution possible to prevent your automobile from catching on fire, it may some day nevertheless be found in flames. It is worth while to have in mind what to do on finding your car on fire. The time required to figure this out after a fire has started may mean a heap of twisted ruins instead of an automobile.

First grab your fire extinguisher. Locate the position of the fire and work the extinguisher to the limit.

FAMOUS BRITISH AIRMAN COMPLETES DARING FLIGHT

Alan J. Cobham, the flying ace, greeted when he returned to England after his sensational 16,000-mile dash to Cape Town, South Africa, and return. Cobham sped home at an average rate of 100 miles, breaking all time records for the flight.

A BRITISH HEROINE

The light in St. Helen's lighthouse, near Campbridge on the Isle of Wight, was kept flashing for three nights by the 14-year-old daughter of the lighthouse keeper. The girl was marooned there Saturday afternoon without food, except one loaf of bread and a small piece of cake, but nevertheless she carried out her father's duties valiantly.

Mr. Langtan, the keeper, and his wife rowed ashore on Saturday in a rough sea to fetch food and oil to the lighthousse, says the Daily Mail. While they were ashore the sea rose in its fury and notwithstanding several attempts made in a lifeboat and motorboat the father and mother were unable to return to the beacon.

Aside from anxiety for his daughter, left alone in the lighthouse, with scarcely any food, Mr. Langtan was distressed lest she would not realize the necessity of lighting the lamp, which is one of the most important along the coast. Great was his relief when punctually the light beamed and remained flashing throughout the night.

The gale raged all day Sunday, making vain the attempts of the lifeboat men and fishermen to take the keeper back. Again night fell, and again the light shone at the appointed hour. As time passed the anxiety of the parents deepened; they pictured the girl as hungry, and perhaps frightened and going without sleep.

They and the girl, however, were to continue the ordeal, for Monday the gale was worse than ever and passage across the three miles of raging seas was impossible.

The third night came, and again the light gleamed forth at the proper hour, as if the lighthouse keeper himself had been there at his task. Not until 5 o'clock Tuesday afternoon did the sea quiet sufficiently to enable the parents to return. They reached the lighthouse in a motor-boat. This was so badly buffeted by the waves that the crew did not venture to return to the mainland.

As the flash worked regularly while Mr. and Mrs. Langton were ashore, it was evident that the girl kept awake at night and wound every four hours the clockwork apparatus which turns the light.

Milk Products Old.

Butter was known for at least 2000 years before the Christian era. It was not used as food, however, but mostly as a medicine and ointment, and in some parts was employed as an illuminant for lamps. The butter was churned crudely in skin bags or pouches, and was a very inferior article. Cheese has been known since the earliest times, the oldest mention of it occurring in 1400 B.C.

Green's Folly.

We put up a prize for the largest fish,
and the trip was over and done,
And the money we'd paid when the fish
was weighed, for Green's was
the largest one.
And the rods were packed and the
goods were stacked, and we'd
only an hour to wait,
When Green said: "Oh, I would like to
go for a few more casts with
fate.

"Will one of you men come out with
me?" But each of them shook
his head.
"We've packed our stuff and we've had
enough, and the time's too
short," they said.
Said Green: "Take note, I will row the
boat for the one who is game
to go."
Then Chappy rose, and he said: "Here
goes. Get out in the boat and
row."

Let Green now tell what next took
place with the first cast Chapman made,
He hooked a trout that was just about
three times what his own catch
weighed,
And those minutes flew on the waters
blue, which he's coaxed his
friend to share,
Cost the fifty beans which were in his
jeans for the prize changed
hands right there.

Oh, the moral's plain. When the prize
is yours, though you've still an
hour to wait;
When the contest's done and men say
you've won, don't further risk
with fate.
Don't coax men out on the stream for
trout. Hang on to the joy you
own.
Sit down content in your shack or tent
and let well enopgh alone!

Gave Up the Job.

About the year 1500, during a battle between the Swedes and Danes, Bishop Beldenack, in charge of the Danes, began thinking how hard the Swedes fought.

He had with him a guide who had been living in Sweden and he asked his man "What foods do these Swedes live on?"

"Well," said the guide, "They live mostly on bread and water, but when the corn crop fails they mix their water with ground bark, nor do they care much for cold or heat or hunger or thirst."

"Aha," said the Bishop, "A people who live on wood and who drink water the devil himself, far less man, will not be able to overcome. We will go home."

Vitamins for Animals.

It is found that animals that have had a liberal diet store up in their bodies enough vitamin A to last a long time if they are deprived of it.

The Waiting Trees

After all their buffetings they stand
with heads unbowed. The bracken
about their feet is massed in tufts and
hummocks, beaten down by the
storms. The dried and bleached
grasses are bent and broken, but the
trees are erect. Their leaves have
been stripped, twigs and occasional
small branches have been pruned
away by the winds, but the trees themselves
are impressive in their disciplined
upstandingness.

They are there in naked individuality,
oak and ash, birch and beech,
sycamore and elm. One sees them
in all their unconcealed character of
bole and branch, of twig and bud.
Every species has its own characteristic
form. Nor are trees of the same
species ever quite alike. Boles of the
silver birch, for instance, are all differently
marked. Washed by the rains
they look in early spring sunlight as
though the fairies had scrubbed them.
What character there is in the waiting
buds—the black buds of the ash that
resemble specks of soot, the brown
buds of the beech, the thick, gummy
buds of the horse chestnut, the brown
pinhead buds of the oak.

Yet in their patient waiting the
trees are one. They stand at attention
in the year's early days. Behind
their passive exteriors there are the
stirrings of vitality. Long before the
buds begin to open the sap begins to
rise. It is wonderful how early it
starts, preceding the first swelling of
the buds. In winter the flow of sap
stops and the tree sleeps. Then the
tree "awakens," and long before there
is any outward sign, within it begins
to stir. There are more happenings
behind the erect boles than appear to
the eye on a February day. What
mighty forces begin to stir in those
apparently sleeping tree giants, forces
wonderfully quiet, and yet in any
single tree mightier than a thunderstorm,
forces that will presently open
two or three or ten thousand hermetically
sealed doors, and set free the
contained leaves.

Foresight is one of the first essentials of wise living. What foresight there is in trees, every bud a marvelous example. Long before the old year comes to an end, trees prepare for the year that shall be. The new leaves are there before the old leaves fall. If we started our year as fully prepared as trees to respond to the challenges and opportunities of existence, how wise would our lives be! Trees are wiser than we. They have no need to hustle, for they took time by the forelock. So they patiently stand and wait, greatly impressive in the soft light of an early spring day.

Lowell in a poem called "The Beggar" pictures one who goes to the trees and streams, asking for an alms; of the brook he asks for a portion of its merriment, of the oak he asks for its gift of strength. So one might pay a pilgrimage in the early year to the trees of the field, and ask for something of their spirit of wisdom, that one may be prepared as they are for spring, with all its lovely challenges.

The Park at Dawn.

Soon through the smoky haze
The park begins to raise
Its outlines clearer into daylight
prose;
Ever with fresh amaze
The sleepless fountains praise
Morn that has gilt the city as it gilds
the rose.

—Charles de Kay.

The Farmer Remembers the Somme.

Will they never fade or pass!
The mud, and the misty figures endlessy coming
In file through the foul morass,
And the gray flood-water lipping the
reeds and grass,
And the steel wings drumming.

The hills are bright in the sun:
There's nothing changed or marred in
the well known places;
When work for the day is done
There's talk, and quiet laughter, and
gleams of fun
On the old folks' faces.

I have returned to these—
The farm, and the kindly Bush, and
the young calves lowing;
But all my mind now sees
Is a quaking bog in a mist—stark,
snapped trees,
And the dark Somme flowing.

—Vance Palmer.

The Thousandfold Beauty.

There has always been among men a measuring of the useful against the beautiful, as though they were antagonistic, as though the useful were not the beautiful in every-day working dress, and as though the beautiful were not the useful in perfumed garments of glory. And so they have strictly begrudged the time and money and space necessary for the existence of the beautiful, as if that were so much abstracted from the heritage of humanity. . . .

Your practical men are kept in sufficient animation to be practical by the beauty which is about them. They do not know it any more than the flower knows that it owes . . . its beauty to the sun. . . . It is the thousandfold beauty, meeting our eyes at every turn that saves us. It is what cost so much as Mary's pound of spikenard, poured forth in what seems to be such a waste to eyes like Judas's which fills the world with odor, and comes to be monumental, when ledgers and bank-books are clean forgotten.—Charles F. Deems.

Low Infant Mortality.

From New Zealand comes the report that a new low world-record for births was established there for the biths was established there for the year 1924, for which complete statistics have been compiled. Encouragement is felt particularly in a reduction of deaths of infants under one month from 29 to 24 per 1,000. This gain is attributed to the fact that public heath nurses are supplied with the names and addresses of mothers within a few days of childbirth, so that offers of aid may be extended immediately. Dr. Truby King, founder of the Royal New Zealand Society, is quoted by the report as placing the irreducible infant mortality at 30.

Healthy Occupation.

Dr. Charles H. Mayo, the eminent surgeon, says that he has found that letter-carriers are about the healthiest lot of men in the country. If that is so, it is safe to say that they owe their good health to the fact that their occupation obliges them to walk several miles a day n the open air. There is no better preventive medicine than that in the pharmacopoeia.

The Young in a Pouch.

The mother opossum, like the kangaroo, carries its young in a pouch.

Some Useful Cupboard Adaptions.

A useful washstand and toilet table was made by converting a spacious cupboard in the following way: The cupboard had four shelves; the upper two were removed and the two that were left were covered with oilcloth. On the upper shelf a washing jug and basin were placed, while the lower shelf was useful for hats, shoes and so on.

A roomy three-cornered many-shelved cupboard in a narrow hall was converted into a hall-wardrobe by the removal of all shelves with the exception of the top one, which formed a convenient place for gloves, clothes-brushes and hats. On the underside of the remaining shelf a brass rod for coat hangers was hung. After these fitments had been installed, there was still space in the cupboard to hold umbrellas and walking sticks.

April Weather.

Oh, hush, my heart, and take thine
ease,
For here is April weather!
The daffodils beneath the trees
Are all a-row together.

The thrush is back with his old note;
The scarlet tulip blowing,
And white, ay, white as my love's
throat.
The dogwood boughs are glowing.

The lilac bush is sweet again,
Down every wind that passes,
Fly flakes from hedgerow and from
lane,
The bees are in the grasses.

And grief goes out and joy comes in,
And care is but a feather,
And every lad his love can win,
For here is April weather.

—Lizette W. Reese.

Not For a Second.

He—"Let me hold your hand for a second?"

She—"No; if I'm not the very first you can't hold it at all!"

Where There Was Nothing Doing.

When Mark Twain in his early days was the editor of a Missouri paper, a superstitious subscriber wrote to him saying that he had found a spider in his paper and asking whether that was a sign of good luck or bad. The humorist wrote him this, and he printed it:

"Old Subscriber: Finding a spider in your paper was neither good luck nor bad for you. The spider was merely looking over our paper to see which merchant is not advertising, so he can go to that store, spin his web over the door, and lead a life of undisturbed peace ever afterward."

A Pocket Umbrella.

An umbrella that folds into a package 10 inches long and two inches in diameter has been invented.

Think Right.

Think smiles, and smiles shall be;
Think doubt, and hope will flee.
Think love, and love will grow;
Think hate, and hate you'll know.

Think good, and good is here;
Think vice—its jaws appear!
Think joy, and joy ne'er ends;
Think gloom, and dusk descends.

Think faith, and faith's at hand;
Think ill—it stalks the land.
Think peace, sublime and sweet,
And you that peace will meet.

Think fear, with brooding mind,
And failure's close behind.
Think this: "I'm Going to Win!"
Think not of what has been.
Think "Victory"; think "I Can!"
Then you're a Winning Man!

—David V. Bush.

Install Radio Phones on Trains.

Telephone subscribers throughout Germany soon will be able to get into prompt communication with friends traveling on any one of the thirty-six express trains criss-crossing the country.

The wireless telephone equipment installed three months ago on the Berlin-Hamburg line, while not profitable, has been so successful that the Railway Administration and the Ministry of Posts and Telegraphs has decided to extend the services to nearly all express trains. The system will be installed immediately on the Berlin-Munich express in an experiment which will be closely watched by experts, since it is feared that the high tension electric power cables which parallel the tracks for miles may interfere with radio reception and transmission.

Helping Him Enjoy Himself.

The fisherman had had hard luck all day, says the Argonaut, but as the afternoon was waning he landed a two-pound beauty.

The village idiot, who happened to be passing, stopped and looked at it. "Is that there fish for sale, mister?" he asked.

"No, sir," said the fisherman. "I'm a sportsman, not a huckster. I fish solely for the pleasure of catching 'em."

The village idiot kicked the flapping fish back into the river.

"Well," he said, "now you can have some pleasure ketchin' that feller again."

A Royal Rebuke.

To carry a cane or any kind of stick, in the presence of the Mikado of Japan has long been forbidden by court etiquette. It is therefore a graceful concession that has been greated to the aged and enfeebled Admiral Count Togo, commander of the fleet that destroyed the Russian fleet in the battle of the Sea of Japan, the right to carry a cane whenever he visits the royal court. It somehow recalls—perhaps by its unlikeness—that cleverly mild rebuke which Charles II. administered to William Penn when, true to Quaker custom, he entered the royal presence with his hat on. The king at once uncovered. "Friend Charles," asked Penn, "Why does thee remove thy hat?" "Because," replied Charles, "it is the custom for only one person to be uncovered where I am."

Growing the Gladiolus for Ornamental Effect

By Henry J. Moore, Ontario Horticultural Association.

The average person who grows the Gladiolus will merely purchase the corns which are of a flowering size and plant them to produce flowers during the first year. It is not necessary to have a special plot for the plants unless the object is to raise flowers or corms for sale in which case better cultivation can be effected when the plot is devoted to the gladiolus. When grown for sale the plants are usually set out nine inches apart in rows which may be two or three feet apart to allow of cultivation. The corms are planted about three inches deep during May.

It is, however, with the culture of the Gladiolus for ornamental effect that this article will deal. It is not fully realized by even many expert growers that the full beauty of the plant when in full flower is revealed only when compared with other garden subjects or when growing in company with them.

Even the person who owns but a small border may grow a few gladioli among the herbaceous perennials where they will be perfectly at home because growing in proper company. What plant is better adapted for the herbaceous border than the Gladiolus? It is a perennial although it has to be lifted in the fall in Canada. The stately spikes afford variety to the border but harmonize with other flowering plants. A great deal, however, depends upon the arrangement of the bulbs and the choice of their position in relation to that of other subjects.

For use in the herbaceous border the corms should be planted in numbers of perhaps twelve in masses. Smaller numbers will, however, make a nice clump. Straight lines of the corms should never be planted in the border if ornamental effect is desired. Formality of this kind should be strictly avoided. The natural beauty of the entire border will be impaired or be spoiled by the inclusion of a formal line.

When planting the corms a position about the middle of the border is a good one for masses of gladioli. Only a few widely separated masses, however, should be planted. The tall herbaceous perennials will act as a background and the dwarf ones a foreground to the flowers The corms in the masses should be about nine inches apart. The masses should never be so placed that the tall perennials obscure the gladioli when in flower. Nor should they be placed so near the front of the border as to stand out abruptly as to be most conspicuous.

The gladiolus, like all other garden subjects, requires care and attention if it is to produce the finest flowers and corms. Cultivation produces good leaves which help to feed the corms which are annually formed on the old ones. The food of the plants is elaborated in the leaves—that is prepared for use.

It is not usually regarded that the cutting of the flowering spikes for decorative purposes entails much skill; here the amateur often makes a great mistake. He cuts away too much foliage with the spike, which results in the partial starvation of the corms, and the roots for successful blooming the following season.

When digging the crop of gladiolus during late autumn the plants should be raised by means of a digging fork and the corms spread out on the ground if the weather is dry and favorable. If wet, the corms had better be spread out on dry shelves in an airy place. Those who have no proper storage place may use shallow boxes or even baskets in which to store the corms. A moderately dry atmosphere and a temperature of about 45 deg. F. in the storage place will be proper.

Do not lift the corms until the leaves and stems commence to show a ripened condition; even should a light frost occur the corms will not be injured. Frost should, however, not be allowed to reach them after the corms are lifted.

Why We Say It.

"The Bitter End."

This is one of those phrases that have only an apparent fitness and appropriateness to certain occasions, for "to the bitter end" has no connection with tragedy and stress, but is a simple nautical term.

It is impossible to say where it first appears in literature, but Defoe certainly uses it in its original sense in his great novel of adventure, "Robinson Crusoe." Here is the passage:—

By noon the sea went very high indeed and our ship rode forecastle in, shipped several seas, and we thought once or twice that our anchor had come home, upon which our master ordered out the sheet-anchor, so that we rode with two anchors ahead, and the cables veered out to the bitter end.

What did Defoe mean by "the bitter end"? He certainly did not mean to use these words in a metaphorical sense. He was simply referring to the "bitt," the nautical term for the turn of a cable, and the "bitter end" is that part of the cable that is wound around the bitt. "The biter end," therefore, is the extreme end.

As far as is known, Defoe never ventuerd farther afield than Spain and Portugal. He was the son of a butcher, and, having risked his life with Monmouth and helped to put William III. on the throne, he knew more about soldiering than about the sea. Yet he makes the sea so realistic in his great book that one can imagine oneself in his storms and shipwrecks.

These things are miracles of constructive imagination, and no amount of education could enable a man who had not genius to attain the same perfection. Thus the use of the phrase "to the bitter end" becomes a sort of touchstone by which the accuracy and genius of Defoe can be measured.

A Candid Advertisement.

Truth will out, even in advertisements, as another misprint shows:

"Wanted, a general servant to do the work of a small horse."

MUTT AND JEFF—By Bud Fisher.

Augustus Mutt is Kidding His Better Half.

RED ROSE TEA
"is good tea"

You've been intending to try Red Rose sometime. Why not now?

Mr. "It."

The French can claim the distinction of having the shortest surname in the world. It is "O," and is quite common in Paris. A Madame Theresa O was for many years the proprietress of a Parisian cafe. "O" is also the name of a village in Normandy, and the chateau is occupied by the Marquis d'O!

The next shortest surname is Irish —"Ek"; this is also found in Sweden. An explorer, well-known in his day, was named —John Ek, and one of his recendants, named Eda Ek, could probably claim that she had the shortest names in the world.

Of towns with short names, there are "A" in Sweden and "U" in the Chinese province of Honan There is also. in another province, a village with the name of "Y." In Europe there are several rivers named "Aa," but the palm, geographically, must be given to "Y," a small bay in the Zuyder Zee.

In England there are many three-lettered names, but in the churchyard round a ruined Dorset church there are gravestones erected in memory of several members of a family named "It" This name was either changed or the family has died out for none bear it to-day.

Peanut Shell Alcohol.

A factory for the manufacture of industrial alcohol from peanut shells is to be established at Marseilles, France.

easier ironing

The labor of lifting your iron about a hundred and fifty times in the course of an ordinary ironing is the equivalent of raising nearly half a ton. The Hotpoint Iron never needs to be lifted at all, but simply tips back on its specially-constructed heel rest. This is one of the Four Features that make Hotpoint Ironing "the easier way".

Ask your dealer.

THE Hotpoint IRON

Standard Hotpoint Iron $5.50.
Special Hotpoint Iron $1 extra.

H-27-B

A Canadian General Electric Product

Why April Chosen for Save-the-Forest-Week.

His Excellency the Governor General has appointed, by Royal Proclamation, the days April 18 to 24 inclusive as Save-the-Forest-Week. Last year a week at about the same period was designated for this purpose. There was a loyal enthusiastic response to the proclamation and much good resulted from the work done.

Suggestions have been made that publicity directed towards forest fire prevention should not be confined to any one week but should be continuous. This is, of course, very true and the forest authorities throughout Canada have work organized on a year-long basis. Nevertheless the focussing of the public mind on the subject through concentraton of all forces during a special week has also very important advantages, chief of which is that for a short period a high degree of intensity of publicity can be attained. The forest authorities and co-operating organizations have not the resources or facilities at their disposal to sustain such intensive effort over long periods of time. For these reasons a special Save-the-Forest-Week is considered advantageous.

The week chosen is selected in the month of April for two reasons. The first of these is that in a large part of Canada the period of highest fire hazard in the forest is the fortnight succeeding the disappearance of the snow from the woods. During the warm days, which come at this time, the sun beats down through leafless trees, and the dead leaves and twigs and the dried-out grass and herbage of the previous season's growth become tinder, in which the smallest spark may start a conflagration In another fortnight new growth appears and the danger is over until dry weather brings other hazards later in the season.

The second reason is that April comes in the season in which people usually make their plans for holidaying in the woods, and a word, a suggestion or a warning now will bear good fruit during the whole danger period. The fact that this year the United States authorities have selected the same week as Canada shows that it is generally agreed that the selection of a week in the month of April may be expected to produce the best results.

Shakespeare Supreme.

Shakespeare continued his reign as the most popular foreign dramatist in the German theatre in the season just closing. Although modern English and American productions have appeared in ever increasing numbers, there was no dramatist able to challenge the Bard of Avon's hold on the favor of the German public.

This season there have been more than 2000 producions of twenty-seven Shakespearean dramas by about 200 separate companies. "Twelfth Night" headed the list, having been given 231 times by thirty-four companies. Next in order came "The Taming of the Shrew," "The Merchant of Venice," "A Midsummer Night's Dream," "Othello" and "Macbeth." "Hamlet ranked only twelfth on the list this season, while "Anthony and Cleopatra" came twenty-third.

More than twenty-five German cities had fifteen or more Shakespearean presentations, Berlin leading with more than 500.

No Pacifiers of Babies.

French babies may howl, but their mothers may no longer hush them with pacifiers, nipples, which attached to rings, merely defraud infantile desires. Dr. Pinard, a famous baby specialist, has had a law put through the Chamber of Deputies forbidding manufacture of "sucettes," as the French cal them, as causing adenoids and many childish complaints.

Minard's Liniment used by physicians.

Workers in the artificial silk factories seem to be almost immune from influenza, because of the chemicals used.

Are You Hitting on Six Cylinders

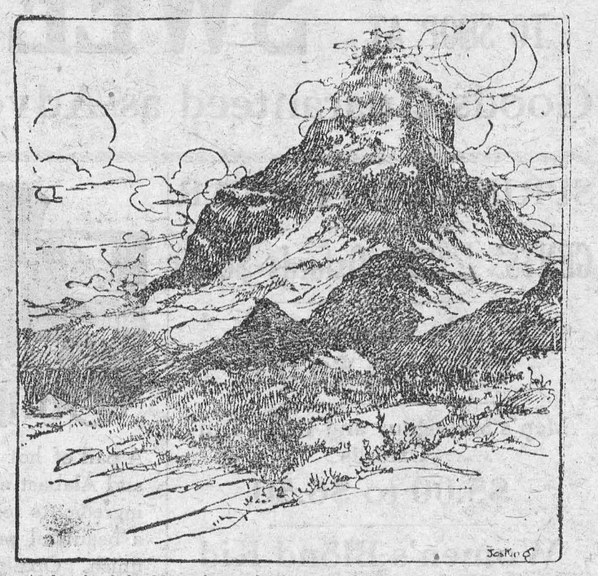
EARTH'S CRUST IS SHRINKING

It Wrinkles Up and We Call the Result Mountain Chains.



A sketch of the Matterhorn, the famous Alpine peak, is reproduced here. It is 14,705 feet high. A party headed by Edward Whymper was the first to ascend it. But four of the party lost their lives in the attempt. That was in 1865.

Secrets of Science.

By David Dietz.

The atmosphere, rains, rivers, glaciers and oceans, as we have seen. are continuously at work wearing away the land.

If these forces were the only ones at work. the continents would be levelled into featureless plains stretching from ocean to ocean and all the sedimentary rocks would be in even layers upon the ocean bottom.

But a second group of forces counterbalance the work of the first group. This second group tends to uplift the land.

As a result of these forces. we find the continents marked with great chains of mountains. We find layers of sedimentary rocks which formed under water now lifted high above sea-level and bent and buckled and twisted out of their original shape.

We also find a third type of rock whose formation was brought about by these forces.

The forces which cause the uplifting of the continents and the mountain ranges upon them, are due to the contraction of the earth. many geologists believe.

Contraction is thought to be due to loss of heat and to molecular rearrangement of the materials in the interior of the earth.

As the earth contracts, the outer crust or surface of the earth becomes too large for it. Consequently it collapses. Parts sink. Other parts are buckled up into great wrinkles by this sinking.

Geologists know that the continents are composed of lighter rocks such as the granites. while the ocean beds are composed of heavier rocks known as basalts.

Consequently in these readjustments due to shrinkage, the heavier ocean beds tend to sink while the lighter masses composing the continents are pushed up and elevated.

Geologists have a theory known as the theory of isistasy. According to this theory, the crust of the earth is considered as floating, so to speak, upon the molten but rigid interior of the earth.

According to this theory, the heavier materia's. such as the ocean beds. settle down because of their weight. This causes the lighter materials. the continents, to rise.

Because of the rigidity of the earth, the contraction process cannot be a gradual one.

It is periodic. The tendency toward shrinkage sets up tremendous strains in the structure of the earth's crust. These strains next get so great that the material gives way to them.

The shrinkage first sets up strains which cause small movements of portions of the earth' surface. The difference of elevation caused by these small warpings is usually only several hundred feet.

These small warpings in time set up strains which cause a breaking and greater re-adjustment between the rising and settling portion. At these times, the shortening, folding and breaking of the earth's crust causes the rise of great mountain ranges.

Geologists believe that eight readjustments of this nature have taken place in North America in the course of the world's history.

Finally there are the great periods of major re-adjustment when the continents are lifted as units above sea-level.

Geologists believe there have been six such major readjustments in the world's history.

Next article—Earthquakes.

BABY'S HEALTH IN THE SPRING

Can Best Be Guarded With Baby's Own Tablets.

The Spring is a time of anxiety to mothers who have little ones in the home. Conditions make it necessary to keep the baby indoors. He is often confined to overheated, badly ventilated rooms and catches colds which rack his whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will prevent colds, constipation or colic and keep baby well. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Twinge.

I was fifty when Mother died
Really I do not mind
Living alone. My thoughts range wide;
Everyone is kind;
Life slips smoothly along the groove.
I am too schooled to miss
What I never was free to have—
Love and a lover's kiss..

Only my vanity feels a twinge!
Now I shall never know
Whether Love would have turned the hinge
Had I been free to go,
For I have the chin of the Wentworth clan's
Unsought women; but then
I have eyes like my mother's eyes
That had the "come hither" for men.

Life is good and I am content
With its peaceful ebb and flow,
Only—my vanity feels a twinge.
Now I shall never know!
—May Williams Ward.

In Nutcombe Wood.

One never knows It may be you will meet
No one at all. It may be fairy feet
Will tiptoe lightly down the sun-splashed glade,
And—they will stand and watch you unafraid,
Then vanish. Sometimes Peter Rabbit gay
Will stop to nod upon his homeward way.
And once——long years ago—(I shan't forget
That summer evening)—God Himself I met.
—Joe Walker.

Gas, biliousness, heartburn, dyspepsia, and similiar ills will not trouble you if you take Seigel's Syrup. Any drug store.

Popular Colors Among Winged Folk.

Bees and humming birds, as well as boys and girls and grown folk, have their favorite colors. Bees and humming birds, however, continue their preference to flowers, and do not include neckties, gowns and hats.

Sir John Lubbock proved by some amazing experiments that bees prefer blue to all other shades in blossoms. The discovery has likewise been made that where red flowers are most plentiful, there will be found most frequently the dainty humming bird. Of course, this does not mean that bees and humming birds do not visit flowers of other shades as well. It only shows that when they can, they turn to the color each likes best. Bees are especially fond of the blue fleur-de-lis, the Canadian blueflag of the marshy meadows. They delight in the blue-capped lobelia, too, more than in its cousin, the native cardinal flower. Other blue flowers of garden and field and roadside have been found to be to the bees' particular liking.

Red flowers, on the other hand, to which the humming birds eagerly fly, are the blossom of the trumpet creeper, the trumpet honeysuckle. the red columbine, the cardinal flower; and in the garden the little "ruby throat" is often found hovering over the gladiolus blooms, the most common colors of which have always ranged from pink to crimson-red.—From Better Homes and Gardens.

"DIAMOND DYES"
COLOR THINGS NEW
Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings —everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Some of the screws used in watches are so small that it takes 380,000 of them to weigh a pound.

Minard's Liniment for dandruff.

NEW BLOOD NEEDED IN THE SPRING TIME

Try Dr. Williams' Pink Pills as a Blood Improving, Health-Restoring Tonic.

Every man, woman and child needs new, rich, red blood at this time of the year. That is a scientific fact. All doctors know it. The blood grows thin and poor in the winter; there is not enough of it, and spring shows the effect. Take notice and see how many people are pale and sallow at this time of the year. They complain of being easily tired, their appetite is poor, and they are often depressed and low-spirited. That is Mother Nature urging them to improve their blood supply; but often their digestion is weakened so that they cannot turn food into blood without help. Here is where modern medical science comes to the rescue. Dr. Williams' Pink Pills have a direct action on the blood and enable you to get full use of the blood-making elements in your meals. You soon feel their effect—your appetite improves, your nerves are steadier, color returns to the cheeks and lips, you have more vim and energy and can work with less fatigue.

The value of Dr. Williams' Pink Pills to all who are in what is known as a run-down condition of health is proved by the experience of Mrs. Alex. McKenzie, Schumacher, Ont, who says:—"I was in a completely run-down condition. Nervousness, sleeplessness, and loss of vitality were all taking their toll. I felt miserable all the time and began to feel that my case was hopeless, as I had taken a number of remedies with little or no relief. I had often read of Dr. Williams' Pink Pills, and finally decided to try them. I got a half dozen boxes, and by the time I had taken about half of them, there was no doubt I had at last found the medicine I needed to restore my health. I continued the use of the pills, gaining strength day by day, until I was soon enjoying good health and happiness. I strongly recommend Dr. Williams' Pink Pills to every man, woman or child who is in a rundown condition, feeling sure that the pills will soon restore them to health and strength."

Whether you are seriously ill or merely feel easily tired and out-of-sorts, you should try Dr. Williams' Pink Pills this spring. They are sold by medicine dealers everywhere, or will be sent by mail at 50 cents a box, by writing The Dr. Williams' Medicine Co., Brockville, Ont.

"Knights of Labor."

The cross of the "Knights of Labor" is a distinction planned to reward the merit of French workmen. It is intended to honor workers who in annual competition may earn special distinction for application, skill or productivity.

A bill before the Chamber of Deputies authorizes the government to prepare the decoration, choose the color of the ribbon, and announce the establishment of the order by decres. It authorizes the nomination of 1000 knights, 100 officers and ten commanders.

Minard's Liniment for colds.

Our skulls are changing in shape, according to Miss V. George, a London scientist, who believes that our faces are growing longer and narrower.

100,000 Die Yearly From Kidney Diseases

Authorities Say 50% Due to Neglect

Kidney disorders are largely caused by poverty of the blood causing nervousness, headache, sleeplessness, etc. Warner's Safe Kidney and Liver Remedy helps improve the condition of the blood and its circulation as well as removing waste matter and poisons from the blood.

Don't neglect the first symptoms but use this 50 year old remedy. Neglect will soon have serious troubles developing.

Sold by all druggists. Price $1.25 per bottle. Warner's Safe Remedies Co., Toronto, Ontario.

TIRED FEET

Bathe well with Minard's in warm water. It quickly soothes and draws out the inflammation.

MINARD'S "KING OF PAIN" LINIMENT

ISSUE No. 15—'26.

EASY TRICKS

Where Strength Doesn't Count

Hand to a spectator a spool of cotton thread. Ask him to double the thread and to see whether or not he can break it with his fingers. He will find little difficulty in doing this, although the thread selected for the trick should be strong enough to make him exert a little strength.

Tell him that the little effort he exerted was due to the fact that he was unable to exert the whole strength of his arm in the job. Ask him to stand erect, his hands, palms in, hanging at his side. Now lead the thread twice around his body, the strands resting on the middle joints of his fingers. Pull it tightly and tie it firmly.

He is now to break it by the outward pressure of his hands. While, in many cases, he can do it, he will find the effort required is out of all proportion to the effort he expended when he broke the same thread with his fingers.

(Clip this out and paste it, with other of the series, in a scrapbook.)

THIS WOMAN NOW WELL

Her Suffering Relieved and Health Restored by Lydia E. Pinkham's Vegetable Compound

Toronto, Ontario.—"I am certainly very grateful for the benefit I have received from Lydia E. Pinkham's Vegetable Compound, also the Sanative Wash and the Liver Pills. In the early spring I was suffering so much from loss of blood that I thought I would never be any better, as doctor's medicine relieved me only for the time being. I saw the Vegetable Compound advertised in the 'Toronto Star,' and I find the Vegetable Compound Tablets the best for me. I have been taking them since Spring, and I intend keeping them by me all the time. After reading your Private Text-Book I saw it was necessary to use Lydia E. Pinkham's Sanative Wash, and I can safely say I feel a different woman. My friends remark how well I look. I am a very busy woman, but I am ready at all times to boost your medicines."—Mrs. CHARLES GIFFIN, 949 Landsdowne Avenue, Toronto, Ontario.

You may be having an experience similar to Mrs. Giffin's and will be interested to know what she did. Every sick woman can feel confident that Lydia E. Pinkham's Vegetable Compound will help her, since we are told that it does help 98 out of every 100 women who take it.

A FAIR DEAL

After all nothing could be fairer than the attitude of Premier Ferguson on the Township Trustee Board question. There is a lot of silly talk about trying to dictate to the farmers, trying to put one over on the schools, and trying to force on the rural school sections something they don't want. That is just what Premier Ferguson is trying to avoid. He first proposed, or suggested a change. He then had a Bill framed that would, if adopted, bring about a change. This Bill, or copies of it, he sent to every school board in the province. He asked them to study it, to analyze it, to record their objections, and suggest any changes they thought would be for the better. He told them the Bill would not become law this year. Now what could be fairer? The Press may not see eye to eye with Premier Ferguson in all his doings, but we are bound to give him credit for being as fair and above board in his attitude on this Township Trustee Board as any man can possibly be. The Bill has many supporters. The more it is understood the less opposition there is to it. In time a system something like it proposes will be adopted, and will be found to be a great advantage. Many who talk the loudest against it understand it the least. But that is generally the way. Premier Ferguson has at least got the ratepayers thinking along lines of improving our school system, and that in itself is good.

BOOTLEGGERS AND SMUGGLERS

Bootlegging has an ugly sound. We associate it with the man who peddles liquor about back lanes on dark nights, or deals it out in some other sly and underhand way. We associate him with the low down class of evil doers. And yet the man who goes to the city and brings home a bottle of liquor hidden in his grip or a flask in his hip pocket is just as much a bootlegger and a criminal as the man who does his work in the night time and on back streets.

Likewise, the smuggler is associated with those who openly defy, and in every conceivable and underhand manner evade the paying of duty on goods they bring into this country. Yet the fashionable church gower, the young lady or gentleman who take a trip to a United States City and brings back certain wearing apparel or personal adornment, on which they should pay duty, but do not, are just as much smugglers as the man who in the darkness of the night steals across the border with goods that are dutiable.

Rt. Hon. George P. Graham, speaking at a church banquet, at Brockville last week, spoke words that are timely, and worthy of the greatest publicity. He said, "If the Church members in the Dominion of Canada would pay duty on the goods that they are now smuggling into this country the debt of Canada would be reduced by several more millions of dollars every year."

"You have to be honest with the State as well as with the Church." "You say that the bootlegger is an awful chap. And so he is, but how much worse is he than the smuggler? Don't do things yourselves that you think terrible in others. If you were to come home with something on the hip your wife would probably and rightly kick you. Look out that she doesn't kick you with a smuggled shoe. "Smuggling goods into Canada is doing the country out of money that rightly belongs to it."

A NECESSARY PRECAUTION

No one would think of putting poison in the food, or where a neighbors would be endangered by it. Yet many people will permit in their back yard a menace that is as deadly as any poison, and one that is likely to reach not only a neighbour, but far beyond. We refer to the presence of the back yard of filth and decayed matter that is germ infected and likely to spread disease in the community. Particularly at this season of the year are all citizens called upon to use the utmost precaution and not allow the accumulation of the winter months to spread disease germs in their neighbourhood. The easiest way to get rid of such accumulation is to dig a hole and bury it. Some people are wise enough to dig the hole in the fall, and when the warm spring sun mealts the matter it is easily buried. Now is the time to give particular attention to these matters.

A GOOD MAN PASSES

While many may not agree with Luther Burbank, the great plant wizard, in his belief that there is no soul, and that death ends all, there is a vast multitude who will admire his noble and high ambition to unselfishly serve his fellowmen without thought of reward, either here or hereafter. He is reported to have said just before passing away, that "we must look for survival only in the spirit of the good we have done in passing through life." "If it has been a good life, it has been sufficient." "There is no need for another. Once here and gone the human life has served its purpose."

Not a very comforting doctrine to the great majority, too many of whom, we fear, are good only because they fear the consequence of not being good, and their hope for reward for their goodness. His was a noble and unselfish spirit. He did good because he loved to do good, and he worked for others because he practiced and believed in the principle that the greatest happiness in life is in serving others. It may not be exactly orthodox but we venture the opinion that despite his expressed belief Luther Burbank is enjoying a good man's hereafter.

DON'T WANT THAT KIND

It is argued by some opponents of prohibition that a prohibitory law keeps many tourists from coming to Ontario, and that they go to Quebec instead because they can get liquor if they want to. The statement is not backed by the record of tourists who visited the two provinces during 1925. Even if there was any force to the argument, Ontario can well afford to do without tourists who are attracted by the license to satisfy their appetite for liquor. A prohibition law may be hard to enforce, but no harder than a license law after a few years trial. Premier Ferguson is showing uncommon wisdom in not committing himself to any Government Control liquor system. If, as he claims, he is seeking to learn the will of the people on this question, we know what his decision must be—no meddling with the O. T. A.

Mr. and Mrs. James Patterson, of Cass Bridge were the guest of Mr. Elijah Clark, on Friday.

Mr. and Mrs. W. J. Riddle and grandson, Delbert were the guest of Mr. Arthur Williams, on Sunday evening.

The United Church

(contributed)

Rev. J. A. Waddell took as his morning subject, the great and precious promises as spoken of by Peter in 11 Peter 1:4. Peter had learned by experience the full meaning and power of these promises and found in them veritable reservoirs of blessings. These promises kept him steadfast and true in the midst of persecution. God's promises are sure representing His love and care. They cover all our need There is some promise to fit into every experience. If we make them our own. our lives will be better and purer.

Luke 24:26 was the evening text. Humbly and reverently we may ask the question and seek to find some reason why Jesus had to suffer on the Cross. Sin was opposed to Christ and responsible for His death. It is a dangerous thing and should be shunned. Jesus endured the cross that we might be saved from sin. Wherever we go in human experience we find that Jesus has trod this way before. If we could only appreciate Gods great love to us when He gave His only Son, it would transform our lives. Throug the spirit of the Cross all that is unselfis will be removed from our lives. Th choir by request repeated a portion of the cantata, "Immortality," also an Easter anthem and the Easter solo by Mrs Hutt.

Beach—Colborne

At the home of the bride, at Hyndman, on Wednesday, April 7th, by Rev. Mathewson, of Heckston, at 7 p. m., Miss Laura Alberta Colborne to Mr. Myron Beach of Winchester. After the ceremony a dainty wedding supper was served to the happy couple and immediate friends The Press with their friends wish them success and happiness.

In Memorium

In loving memory of Jacob Dixon, who entered into rest, April 9th, 1925.

Peacefully sleeping, resting at last,
The world's weary troubles and trials are past;
In silence he suffered, in patience he bore,
Till God called him home, to suffer no more.

Mrs. Jacob Dixon and family.

Mrs. Martha Salter

After an illness of five months, Martha Kennedy, beloved wife of the late Jonathan Salter passed peacefully away at the residence of Mr. and Mrs. F. R. Pratt, Brockville, on April 6th, in her 79th year.

The late Mrs. Salter was born at Winchester Springs, Sept. 1848, and resided there for a number of years.

In 1864 she became the wife of Jonathan Salter, who predeceased her 20 years ago. She is survived by one sister, Mrs Mary Wylie, of South Mountain, and a number of nephews and neices, of whom Mrs. F. R. Pratt, Brockville, is one. In religion, Mrs. Salter was a Presbyterian, and a member of St. Paul's Church. She was a very kindly disposition, and ever ready to lend a helping hand to all in need.

The funeral took place from her late residence, on Thursday afternoon, at one o'clock, remains being placed in vault at Maple Ridge Cemetery.

In the absence of the Presbyterian Minister, the service was conducted by the Rev. Mr. Kirkwood, Baptist Minister, of Ormond. The choir of St. Paul's Presbyterian Church were present and led the singing.

Floral expressions of sympathy. Spray—Mrs. Mary Wylie, sister; Wreath—Mr. and Mrs. F. R. Pratt, Brockville; Spray—Mrs. A. Cochrane, Nurse; Spray—W. M. S. of St. Paul's Presbyterian Church. Spray—Dr. Janet and Holdaway, Brockville.

The Pall Bearers were, Messrs H. Empey, Wm. Dixon, C. Carkner, J. Robinson, Wm. Johnston and N. Carkner.

Late Charles H. Deeks

The sincerest sympathy of this community is extended to Mr. and Mrs. Orton Deeks, whose home is just south of the C. P. R. depot, in the sad and unexpected loss of their eldest son, Charles H. Deeks, which occurred on Saturday last at the General Hospital, Cornwall, at the age of 14 years. The young lad was taken with appendicites, and on the advice of a physician was taken to the hospital at Cornwall, but too late for a successful operation, and he died shortly after his arrival at the hospital. He was a bright lad and very much liked by all his associates, and his sudden passing has left a vacancy in the home and among his companions that is very much felt. The funeral service was held on Monday afternoon, in the United Church, as the Wesleyan Church, where the family attend, was too small to accommodate the service. The service was in charge of Rev. Mr Scobie, of Westboro, and he was assisted by Revs. Mr. Waddell, United Church, Mr. Butcher, Baptist, and Mr. Robinson, of Inkerman. The church was completely filled, and the service a most impressive one. The remains were taken to Maple Ridge cemetery.

The floral tributes were very beautiful there being a mound from Teacher and scholars, of Summers School, where the young lad was a scholar, also from S. S. No. 20, a pillow from the parents and grandmother and Mr. and Mrs. G. Christie and a wreath from Mr. Colin Anderson.

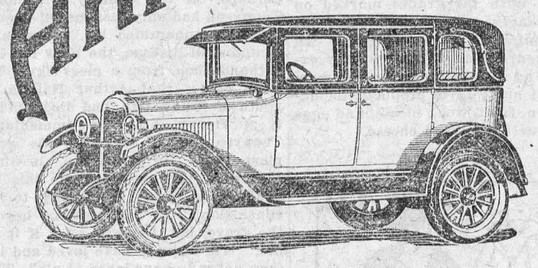
CHEVROLET

Announces



The Landau

CHEVROLET has added another beautiful model to its line — the Landau — a handsome five-passenger car, with Fisher Body finished in Arizona Grey Duco.

The Landau reaches a new pinnacle of small car luxuriousness, having a seal grain leather top, with distinctive Landau irons and smart D-shaped windows in the rear.

It is upholstered in rich velour, which harmonizes with the exterior finish, and is provided with a folding foot-rest and a robe rail. Pockets are built into the rear doors and the rear compartment is supplied with a smoking set.

Possessing the economy, ease of operation, quick acceleration and abundant power for which all Chevrolet models are famous, the new Landau represents a combination of value and quality never before presented in a car in its price class.

Greater Quality at Low Cost

Sir Thomas Lipton arrived at New York on Monday on the Leviathan with confirmation of his purpose to file his fifth challenge for the American cup, international yachting trophy. Although efforts to obtain definite statements regarding the Irish yachtsman's plans were submerged in the ripple of good natured repartee which crossed the Atlantic with genial challenger, the visiting sportsman admitted that he had "the finest collection of cups in the world, but I'd give them all for the American Cup."

Treasurer's Land Tax Sale

Rivers Supply Sea With Tons of Salt.

The amount of water in the oceans is 302,000,000 cubic miles, or thirteen times the volume of all the land above sea level. The average height of the various land areas above the level of the sea is about forty-four one-hundredths of a mile, the average depth of the sea is somewhat over two miles, says an American writer.

Each year the sea receives 157,000,000 tons of sodium from the rivers into which the rains have washed it from the soil. Let us see what the flow of a river means in this connection.

Every year the Mississippi River carries to the sea 98,369,000 tons of saline matter, taken from an area of 1,259,000 square miles; the waters of the St. Lawrence bring down 29,278,000 tons from an area of 286,900 square miles; the Colorado delivers 13,416,400 tons from 225,000 square miles and the Potomac brings down 771,000 tons from 9,650 square miles.

An average of the waters of nineteen rivers shows 762,587 tons of saline matter for each cubic mile of river water.

Thousands of millions of tons of gold are dissolved in the waters of the ocean, in a concentration of from half a grain to one grain per ton of water. At this concentration there would be $10 worth of gold in each 250 to 500 tons of ocean water.

Except in the extreme north and south the temperatures of the ocean below the surface sink rapidly at first and then more slowly. Taking the ocean as a whole, the temperature of all the water below 3,000 feet is less than 40 degrees. On the bottom at 9,000 feet or more it is only 35.2 degrees. The great mass of ocean water therefore, has a temperature not much above the freezing point.

Tip on Tacking.

Tacks are elusive and hammers in the inexpert hand bruise the fingers easily. Try this: Stick the tack through stiff paper or light cardboard, then hold the paper in the desired position. Thus you may bang away at Mr. Tack until he is subdued.

Keep Young with Rinso

Your doctor will tell you the old-fashioned wash-day is one of woman's greatest foes.

Strained backs, ugly hands, jangled nerves and short tempers—all come from the everlasting rub-rub-rubbing on the ancient washboard.

The modern way is to let Rinso do the work.

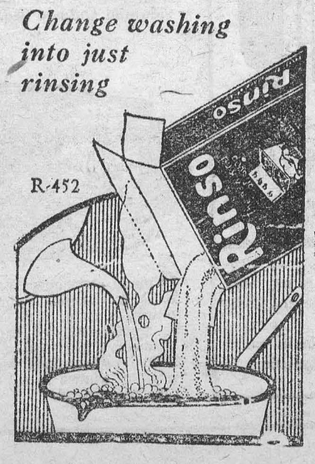
Change the hard work of washing to just rinsing.

Simply dissolve Rinso in the wash-water, put in the clothes, soak for 2 hours or more and just rinse.

Let Rinso do your next washing.

Made by the makers of Lux.

Change washing into just rinsing



THE GRACEFUL JABOT.

Jabot draping, when done as cleverly as in both front and side of the frock above, is the epitome of gracefulness. Novelty silk on a light background was selected for the development of the frock, with a plain harmonizing color for jabot and set-in vestee, which emphasizes the V-shaped neck. The sleeves are long and narrow, and the plain back maintains the slender silhouette. No. 1190 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 bust requires 4⅞ yards 36-inch, or 3 yards 54-inch material. Price 20c.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

English Laborer Digs Up Roman Coins.

A discovery of Roman silver coins has been made near Boar's Head, Wigan, England, known to industry as a coal mining center, but also identified by historians as the British Coccium of the Romans, a station where two Roman roads crossed, which is mentioned in the tenth itinerary of the Emperor Marcus Aurelius Antonius, says "The London Times."

The coins were discovered by a laborer while digging a shallow trench in a field. They were not enclosed in any sort of receptacle, but were nevertheless, on the whole, in a remarkably good state of preservation, though some were mere corroded discs which fell to pieces on being handled. Altogether some fifty silver coins were unearthed, in addition to a number of fragments. Unaware of their value, the finder distributed them among his fellow workmen. One, however, happened to be submitted to Mr. Arthur J. Hawkes, the Wigan county librarian, who identified it, and was ultimately successful in obtaining practically all the coins for the Wigan Public Library Committee and they will be preserved for Wigan's future museum. On being cleaned some of the coins might almost have come fresh from the mint a generation or so ago.

The names of the Roman Emperors and their consorts so far identified on the coins, with the dates of their respective reigns, are as follows (?) Galbo (68), Domitian (81-96), Trojan (98-117), Hadrian (117-138), Antoninus Pius (138-161), Faustina the Elder (wife of Antoninus Pius (138-141), Crispina Augusta (wife of Commodus (180-192), Julia Augusta (wife of Lucius Septimius Severus((193-211), Septimius Geta Caesar (198-209), Plautillae Augusta (wife of Caracalla) (died 212), Caracalla (212-217), Macrinus (217), Elagabalus (Marcus Aurelius Antoninus) (218-222), Alexander Severus (222-235) and Julia Mamaea (mother of Alexander Severus) (222-235).

Other discoveries of Roman coins which have been made at Wigan from time to time have included coins of the emperors Probus and Gallienus, coins of Victorinus and Tetricus (two of the "Thirty Tyrants" of Gaul) and a very fine gold coin of the reign of Vitellius (A.D. 59).

Decline in Tonnage at U.S. Ports.

Improved methods in handling grain at Canadian Atlantic ports and the opening of large coal fields in Nova Scotia, the Shipping Board's Bureau of Resarch declares, have altered the position of United States North Atlantic and Great Lakes ports, "which have heretofore participated largely in these movements." The result, it is said, has been the establishment of a "balanced traffic in eastbound grain and westbound coal" for the railroads of the Canadian territory.

Fluctuations in foreign commerce in grain, petroleum and coal, through North Atlantic ports the Bureau found, "More than offset the general increase in hundreds of other commodities handled during the fiscal year 1925."

Getting the Worst of it at Both Ends.

Little Mary always had an objection ready to hand either about going to bed at night or getting up in the morning. One night, when her mother reminded her that it was her bedtime, she said:

"It isn't fair. At night you tell me I'm too little to stay up, and in the morning you say that I'm too big to stay in bed."

Canada's Dairy Production.

There was an increased production last year of 1,769,846 lbs. of butter and 18,361,364 lbs. of cheese in Canada compared with that of the previous year. All the provinces excepting Ontario, which was stationary, and Alberta, which shows a decrease of 12.8 per cent. show an increase in butter, Saskatchewan taking the lead with 17.7 per cent. of an increase. In cheese Prince Edward Island shows a decrease of 2.4 per cent. and Alberta 19.9 per cent. All the other provinces show an increase, Quebec of 33.4 per cent., Manitoba of 28.3 per cent., Saskatchewan of 70.2 per cent., New Brunswick of 18.1 per cent., Ontario of 4.8 per cent., British Columbia of 2.3 per cent., and Nova Scotia of 1 per cent. These figures are taken from a recent issue of the News Letter published by the Dominion Dairy and Cold Storage Branch. The Commissioner requests all cheese factories and creameries to send in statements annually of their production to him at Ottawa for compilation and publication in the News Letter.

Beneficial Effect of Grading.

There is abundance of evidence that the system of grading adopted in Canada is having a beneficial effect. To this fact, Dr. J. A. Ruddick, Dominion Dairy and Cold Storage Commissioner, bears testimony. He further says that improvement in marketing conditions has also aided in raising the status of butter and cheese. As regards butter, he declares that nowhere is the improvement in quality more noticeable than in Ontario. Under the old conditions before grading was established, continues Dr. Ruddick, exporters were not always too careful of the quality of the different lots with which they filled orders for "finest" cheese or butter. With the grades marked on the packages the quality turns out more uniformly as represented. In recent years grading has greatly extended and is now applied in the marketing of many farm products, including grain, fruit, wool, meats, and eggs as well as butter and cheese.

Gold Mine.

Tom—"He calls her "Sweetheart mine"

Dick—"Yes, he's working her for gold."

A Riviera for Wales.

There is no reason why the villages of Wales should not be as beautiful as any of those that lie on the slopes of Italian hills or the shores of the Riviera, according to Mr. R. G. Williams-Ellis, the well-known decorative artist, who constructed Llangoed Castle.

To prove his contention, Mr. Williams-Ellis is building a little village, to be named Port Meirion, on a promontory near Portmadoc. It is his aim to make a colony of houses "as native to the soil and as much in harmony with the lovely surroundings as any white-walled township of the South."

In Mr. Williams-Ellis' view, Wales, which is one of the loveliest countries in the world, is spoilt by its villages and townships, which are quite out of keeping with the beauty of the surrounding scenery. He hopes that Port Meirion will show what can be done by taste and imagination in building to improve the Principality.

The project has the whole-hearted backing of Mrs. Williams-Ellis, who is a daughter of Mr. St. Loe Strachey. It is hoped that representatives of every class of people who love artistic surroundings will be attracted to Port Meirion, and for their convenience every comfort devised by modern ingenuity is being embodied in the houses under construction A party of architects ,writers, and others visited Wales at Easter in order to see the progress being made with the scheme.

Spring Fever.

When, as a child, I had a "fever," mother gave me delicious cooling drinks, laid heavenly touches of ice on head and hands, told me quieting tales and kept away from all that could fret or affright.

To-day, I have spring fever! The doctors have no cure for it. The nurses rather view it with contempt. But "Mother" understands — the Great Mother whose other name is Nature. To her I turn in my captivating distress.

What a Mother she is! Never a rebuke glimmers in her great wise eyes; never a doubt mars the wonder of her grave smile. She just beckons to me and, knowing her high misintrations these many years, I follow.

Upon my hot brow her breezes lay their fluttering fingers——fingers that feel as laughter sounds, the sweet laughter of innocent children Upon my lips, athirst for drink that shall bless soul as well as body, fall the sparkling fluids of her skies. I am given ineffable incense to inhale—the Mother's own Breath—essence of all her new-born flowers. For my tired eyes, her sunshine and quiet shade. For my restless feet, her green-brown earth paths. For my yearning ears, her bird-song and wind voices. My fever is cured!—Ada Melville Shaw.

My Concrete Hog Floor.

My concrete hog-feeding floor paid for itself inside of two years by saving about one-third of the corn I give my hogs while they are on full feed. I built the floor myself after I found that unless the ground was frozen hard most of the corn that spilled out of the feeder was trampled into the ground before the hogs could pick it up.—C. C.

Memories.

Larkspur and lilies jostling one another,
A tangle of gillyflowers brown and gold;
Dreams, there are dreams in the satin of the lilies,
And memories that heal in the brown and gold.

A porch new thatched with heavy, heavy roses,
Facing out westward to the warm day's end;
A crooked unreasonable roof of visions
Above it—you see it at the beechlane's bend.

Down the path, and between the rebel roses
Diligent bees go gathering in their store;
At work with his castles of earth and air and wonder
I see a child—who is a child no more.

—Olwen A. Joergens.

"'Tis Better to Have Loved."

This truth came, borne on bier and pall;
I feel it when I sorrow most;
'Tis better to have loved and lost
Than never to have loved at all.

It was Alfred Tennyson who came to this conclusion concerning the true value of love. When he went up to Cambridge as a youth he met another young man of similar tastes, named Arthur Henry Hallam.

Tennyson took his chum home with him ot Somersby Vicarage, where Hallam fell in love with his sister Emily and became engaged to her. Hallam had a tremendous admiration for his poet friend, and he told Gladstone, who was born in the same year as Tennyson, that he "promised fair to be the greatest pot of our generation, perhaps of our century," although Tennyson had only just turned twenty.

Then, unheralded by any sign or symptom of disease, the blow fell like a thunderbolt from a clear sky. The news came that Arthur Hallam, a youth of twenty-two, had died suddenly at Vienna. Almost immediately Tennyson began to write his great masterpiece, "In Memoriam," in which he argues the question: "Is this the end?" He comes eventually to the conclusion that life persists beyond the grave, but, he says, even if it did not, "'Tis beter to have loved and lost than never to have loved at all." That is to say, love, whether for wife or friend, is its own reward, and has an influence on character and life quite independent of death.

Music and Shakespeare.

The late Sir Frederick Bridge, C.V.O., M.A., Mus. Doc., formerly organist at Westminster Abbey, was an ardent student of the music of Shakespeare's day, and just before his death, published an excellent small work, "Shakespeare Music in the Plays and Early Operas," from which the following facts are taken:

"Music in Shakespeare's day was considered as important a branch of knowledge as Latin or fencing."

"In Shakespeare's day the man who did not know how to sing at sight was not considered well brought up."

"All the upper class houses in Elizabethan days boasted of having a chest of viols."

"In Shapespeare's day the accompaniments to the songs were upon lutes and viols. The lute was a fretted instrument, picked after the manner of the guitar, but with a pear-shaped body like the mandolin and a long neck. It was in most instances larger than the guitar. It was said to cost as much to keep a good lute in condition as to keep a good horse. They were valued very highly, and in order that they might not be exposed to the weather, they were kept in a bed between the rug and the blanket."

"In the early representations of 'Hamlet,' the soliloquies of the dismal Dane were often spoken to musical accompaniment."

Invades the "Lords."

Miss Margaret H. Kidd, of the Scottish bar, who is the first woman barrister to appear before the House of Lords. She is appearing in an appeal.

Perfume in a Ring.

A perfume bag has been designed with a cameo setting concealing the container filled with cologne. A spring arrangement shoots a spray of the scent with a slight pressure of the ring finger.

Young Tender Leaves

are sealed in air-tight aluminum foil. Their fresh flavor is finer than any Japan or Gunpowder. Try SALADA.

LITTLE IDEAS HAVE LED TO GREAT THINGS

The present vast rubber trade owes much of its existence to the simple invention of a Belfast veterinary surgeon.

This Irish doctor was concerned chiefly with an attempt to improve his boy's bicycle, and evolved the idea of the pneumatic tire. The name of the doctor, Dunlop, is perpetuated in a concern employing over twenty-eight thousand people, with factories all over the world.

But Dunlop's little idea represents even more than the development of factories for producing rubber tires. The development of mechanical transport has resulted from it.

If there had teen no such thing as the pneumatic tire thirty years ago, the development of motor-cars could not have come about, for the materials the automobile engineers had at their disposal at that time were incapable of withstanding the stress and strains of high speeds over rough road surfaces. The advent of the pneumatic tire smoothed away the difficulties and made the motor-car possible.

But the outcome of this one little idea of Dunlop's goes still further. From the motor-car sprang the aeroplane! Had it not been for the motor-car, it would not have been possible for engine designers to construct motors of sufficiently light weight to enable aeroplanes to fly and maintain themselves in the air for more than a few minutes on end.

* * * *

There are people living to-day who were born before matches, as we know them, were made, for in Mr. William Henry Beable's book, "Romance of Great Businesses," he tells us that it is less than a hundred years ago since John Walker, of Stockon-on-Tees, invented the first match, for which he charged a shilling a hundred, with an additional twopence for the tin container.

In each box was a piece of sandpaper, which had to be doubled over the head of the match, and the latter drawn out forcibly.

To-day Bryant & May's alone employ over 4,000 men and women. They have their own forests, and grow their own trees from seed.

One of their machines turns out 56,000 match splints a minute!

* * * *

Coventry is to-day famous for its bicycles and motor-cars. But if you had been in London in 1869 you might have seen an Englishman, who had been resident in Paris, riding an extraordinary machine. It had two wheels of almost equal size ,show with iron, a slightly curved backbone, and a saddle into which the rider had to get the best way he could.

The spectators, to use the man's own words, were filled with "surprise, fear, laughter, astonishment, admiration and pity."

This "Velocipede" was brought to England by Mr. Rowley B. Turner for the purpose of having it reproduced here. In a few years it was taken up, and from it was developed the modern bicycle and motor-car.

It is interesting to note that it was not until November, 1896, that the law of England permitted a mechanically propelled vehicle to be driven on a public road at more than a walking pace.

Previously, in order to ensure that the four miles an hour limit should not be exceeded, a pedestrian had to go ahead of such vehicles displaying a red flag as a symbol of the danger that was approaching—and this less than thirty years ago!—A. R. W.

Civilization.

Civilization conveys to the average mind a picture of complexity rather than simplicity, of refinement instead of primitive crudity, of sophistication, artifice and ingenious invention that have supplanted rude illiteracy and rough-hewn device. Civilization prescribes deference, chivalry and courtesy in place of the boisterous assertiveness of physical dominion; it inculcates self-restraint and good manners and mindfulness of other people and their comfort.

But civilization cannot be suddenly impoverished, nor is it a mushroom, overnight growth. A nation cannot decide on the spur of the instant that it will emerge from darkness into light, put away medieval survivals of politics, economics or esthetics and suddenly join the family circle of modern nations. A man cannot make up his mind all at once to acquire immediately the inner nature and the outward graces of a gentleman; he cannot merely assume the garb that creates the picture and ignore the slow, essential processes of self-discipline and education that make him a deirable member of polite society.

Civilization, for a man or a nation, is a gradual structure, not an ex temporization. It must rest on the solid basis of successive contributions, taking a long time and undeviating patience. It must be built like the coral island, by the accretion day by day. The world as we behold it is the product of innumerable toiling lives that went before our own. Each of thosee who preceded us gave what he had to give for the general benefit or disadvantage and went his way. Whether we construct or destroy, help or hinder, bless or curse our time, our neighborhood, we are giving ourselves to a great collective result, and in our turn what we bring to the improvement or defacement of the world is assessed for the good or the evil thing it is. Positive or negative, the record stands as we have made it. What civilization is, what the social order becomes, depends on what we severally are and gives each of us an importance that forbids us to say that it makes no difference what we do.

Pope's Long Day.

Pope Pius XI. rises at 6 in the morning and seldom retires before midnight.

After Every Meal
It doesn't take much to keep you in trim. Nature only asks a little help.
Wrigley's, after every meal, benefits teeth, breath, appetite and digestion.
A Flavor for Every Taste

Face Up to Life.

It is not an easy thing to look oneself fully in the face. We are often twitted about our vanity, but it is trying for anyone to consider himself, because we each are aware of certain things in life which none other knows.

Yet it is a very necessary thing for us to lay all our weaknesses and virtues on the table and examine them in private from time to time. Not to do it is an expression of weakness. If we are afraid of anything we are slaves to that thing.

It is unnecessary to indulge too much in self-examination. None of us is perfect, and to linger a thought upon the unworthy is to miss the ideal. A man may be so concerned with the muckrake that he is unaware of the sun above him and his life will become sordid. To take oneself too seriously is unhealthy.

But there is the honest side of life which does face up to its claims and discovers the means by which failure may be changed to conquest, and retreat become progress.

Surely none of us is satisfied with his treatment of life's opportunities and possibilities and responsibilities? We have missed so many and shirked so many more. Had we but grasped them at the moment, life would have been very different with us. We were left behind in the race just because we were not ready to start; or someone passed us because we omitted to equip ourselves for the ordeal.

The tendency with many of us is to blame these omissions. It must be true in such instances to say: "If it hadn't been for so-and-so we should have won." Yes, but how do you explain the "if"? That surely is your business and not another's. It is always cowardly to switch attention from one's own failure on to another.

Facing up to life is just having the courage to blame oneself for not doing better, and determining to improve in future. In a frank and honest way, ask questions about life in general and do it fearlessly. Get to know what relation there is between your life and that of every other thing. Measure them up and face them squarely and, in the name of all that is best, having counted the cost, move on and make the goal.

There are far more prizes in the world than we imagine. The honor often goes to another because we are slipshod and careless Life is always too big a thing to be careless about. Let the utmost be for the highest; do not doubt the possibility of failure.

So forget the wrong things said and done. They have blotted our copybook undoubtedly—but every life has its blot The more important thing is to guard against further blotting.

Improvement is to be progressive and to make to-morrow grander than to-day.

Men and women of grit have made the world; and they have been those who could climb and not grow tired of the job they had undertaken.

Life is always a grander thing than death. It has its problems, but the more there are the bigger the compliment life pays to us. The man who hasn't strength and stamina to fight temptation is rarely tempted. It is the man who is capable of the better thing who is tempted by the lesser.

Still Another Sense.

"Harry," said a sailor, looking up from his writing to consult a friend, "do you spell 'sense' with a c or an s?"

"That depends," said the friend. "Do you refer to money or to brains?"

"Aw, I don't mean either of them," was the reply. "I want to say, 'I ain't seen him sense.'"

Canada from Coast to Coast

Summerside, P.E.I.—The export trade for the year 1925 of live foxes from Prince Edward Island, according to a report of the Provincial Government, numbered 5,728 up to December 30th, and as there were many shipments delayed into January, the total would probably exceed 6,000 animals. The shipments of silver fox furs were also good, about 8,000 skins having been shipped out of the island. Judging from returns received for these skins, it is estimated that there will be a million dollars from furs, so that the total revenue from fur farming on Prince Edward Island last year will exceed the three million dollar mark.

Halifax, N.S.—The Canadian champion two-year-old Ayrshire heifer, "Princess Beatrice" 3rd, owned and bred by the Nova Scotia Agricultural College, has again made a record in supply of milk and butter fat. From January 12 to March 15, she produced 4,010 lbs. of milk or an average of 67 lbs. a day. In butter fat the figures reach a total over the same period of 220 lbs., equal to 275 lbs. of butter or a daily average production of 4.7 lbs.

Fredericton, N.B.—In the past season, according to the Provincial Dept. of Lands, 1,235 moose and 3,508 deer were killed in New Brunswick. Of the former 207 fell to the guns of non-resident hunters and 617 of the latter. In the same year the animals killed for fur included 1,567 raccoon; 6,017 skunk; 18,314 muskrat; 5,410 foxes; 9,470 ermine; 177 martin; 2,823 mink; 105 otter; 67 fisher and 192 bear.

Montreal, Que.—Three hundred and fifty buyers, representing firms in England, Germany, the United States and Canada, attended the opening here of the spring sellings of the Canadian Fur Auctions Sales Co. Keen interest in the offerings was evident and generally speaking prices ruled higher than at the sale last fall.

Toronto, Ont.—At the annual meeting of the Canadian Co-operative Wool Growers, Ltd., it was shown that in the past year the association had sold well over three and a half million pounds of wool for well over a million dollars. This was an increase of 1,225,000 lbs. over the previous year and indicated that 1925 was one of the most successful years in the association's history.

Portage La Prairie, Man.—With an authorized capital of $300,000 the Manitoba Cordage Co. has been organized for the purpose of manufacturing commercial twines, etc. A factory building has been leased here and machinery is now being installed. Experiments in hemp culture carried on during the past five years have proven that a good quality of fibre hemp can be grown in this country. The factory will begin operations shortly on several hundred tons of hemp grown last year.

Regina, Sask.—Creamery butter production in the Province of Saskatchewan during the month of February totalled 732,703 pounds, as against 620,518 pounds a year ago or an increase of 112,185 pounds or 18 per cent. The increased output was general throughout the province, the southern district recording an increase of 19.5 per cent. and the central district 15.1 per cent.

Lethbridge, Alta.—Southern Alberta is to see a very large acreage planted to fodder corn and sweet clover this season. Farmers are already bringing in large quantities of seed for these crops. There will be several thousand acres in sweet clover, and the corn acreage, which was last season estimated at 73,000 acres, will probably surpass the 100,000 acre mark for this year for the province as a whole, with the bulk of it grown in Southern Alberta.

Victoria, B.C.—Official announcement has been made by the Provincial Minister of Lands of the creation of two new forest reserves, totalling more than 2,000 square miles. One of these areas lies north of Burns Lake, in the Babine district, and the other is on the Sonora Islands.

HEROIC WOMAN WAR SURGEON

Above is Dr. Mary Lee Edwards, of New York City, formerly of Toronto, the only Canadian woman to be honored by the French government with the Croix de Guerre. Aside from conducting a private practice in New York, she is on the surgical staff of two hospitals. Originally intending to work among the women and children of refugee families, Dr. Edwards and two other women went to France. Their first hospital was blown up before occupation. As a result they threw in their lot with the French medical service, working in a large evacuation hospital for eight hour stretches. The building was frequently under bombardment.

FLAMING FIELD OF OIL BURSTS BOUNDS SPREADING DEVASTATION

Furious Fires in California Cause Loss of $15,000,000 in Oil and Farm Property—Two Lives Lost.

A despatch from San Luis Obispo, California, says:—Heralded by a series of thunderous explosions in reservoir No. 2, a flaming sea of oil on Thursday night burst the bounds of the Union Oil Company tank farm fire here, wiping several farm houses off the landscape with its sponge of flames as it engulfed a small valley to the north of the main blaze.

As the second twilight of fire and smoke settled down on Thursday night over the farm, six great reservoirs and at least several smaller surface tanks were burning in the centre of a flaming field of oil that extended from two miles in one direction and from 25 feet to three-quarters of a mile in the other.

More than 6,000,000 barrels of oil incapable of being salvaged were feeding the flames, with an ultimate probable loss in oil and equipment of upwards of $15,000,000.

Two lives were sacrificed in the fire early on Thursday when A. H. Seeber, a Civil War veteran, and his son, William F. Seeber, were killed in an explosion which is believed to have attended the boiling over of one of the tremendous flaming reservoirs. Doris Seeber, daughter of the elder man, was slightly injured in the blast, which demolished their home, about 300 yards from the blazing oil.

Oil fire experts, helpless in the face of the disaster, which is rated as the greatest petroleum conflagration in the history of the American oil industry, believe that the flames which broke out when lightning struck one of the reservoirs, will continue on their destructive way for another four or five days. The fire cannot be subdued, they assert. It must burn itself out.

A tremendous column of dense, blue-black smoke was rising hundreds of feet in the air and was fully three-quarters of a mile in diameter.

Bursts of flame occasionally flashed across its sable sides, and dull, muffled explosions that rocked the earth sounded intermittently as the boiling, burning fluid spilled over the edges of the reservoirs on to the rain-soaked soil.

San Luis Creek, meandering over two miles of ground and at one place running within ten feet of the coast highway, was a flaming ribbon of light as the burning contents of the reservoirs and tanks poured along its bed.

In an effort to prevent this spearhead of flame crossing the highway, the main artery north and south, a large gang of men were feverishly throwing up earth works.

To the north, along the level ground, at least six ranch houses with their barns and outbuildings had been engulfed by nightfall. This added disaster, however, had been anticipated, and the occupants, with their belongings, moved out long before the sea of fire reached the farms.

Bishop Pleads for Clean Press.

A strong appeal has been made for a cleaner press, especially for the elimination of crime and divorce news in papers largely confined to Sunday circulation, by the Bishop of Swansea and Brecon, addressing the delegates of the National Free Church Council, held at Llandrindod Wells, in Wales. He said it was a strange irony that the efforts of the church to raise the moral tone of Sunday should be offset by many columns of unwholesome matter calculated to corrupt the minds of young people.

He added that it was not a case of supply and demand, but a case where the supply created the demand. In his opinion only the prompt passage of the clean press bill now before Parliament would meet the situation.

Other speakers referred to the reported intention of the Chancellor of the Exchequer to place a tax on betting and said the Government would seek such a means of revenue at the price of the degradation of the people and at its own peril.

Sufficiency.

I am but one,
My power is very small,
But take me, use me,
Till setting sun,
Thou who art All in All.

I am so frail,
Too weak to contemplate;
But Thou art mighty,
And can avail
To make my smallness great!

—Thomas Curtis Clarke.

"TRAIL OF '98" LEAVES PITTANCES IN ITS WAKE

Heirs of Klondike Gold Veterans Who Died in North Receive Dwindled Estates.

A despatch from Ottawa says:—The history of the early rush to the Klondike gold fields in the nineties, of the trials, the hopes and the tragic deaths of the veterans of the "Trail of '98," is all recorded in cold figures in the records of the Auditor-General's Department in Ottawa. These records are those of the unclaimed estates of Yukoners who died leaving properties which have since dwindled to nothing by the depreciation of the gold claims. Of the 54 estates recorded, the total amount approximates only $9,000.

George P. Mackenzie, former Gold Commissioner of the Yukon, now in charge of exploration work and Arctic expeditions of the Canadian Government, knows most of the "sourdoughs" included in the records. Among those he personally recollects are Oluf Olson, at one time Dawson City's wealthiest and most influential citizen. His vast real estate holdings, purchased with his profits, deteriorated when the gold craze ceased. His unclaimed fortune has been reduced to $2,300.

Another famous character was B. J. McGee of White Horse, miner, fighter, gambler and lover, said to be the hero of many of Robert W. Service's poems of the Yukon. His fortune has dwindled to $201.

The total assets of other famous characters of the "Trail of '98," including Thomas H. Buchanan, Horace Stewart and R. Anderson, have dwindled to mere pittances. They all have died in recent years in the "frozen North."

German Princes Sold 296,166 Subjects to Fight Wars

A despatch from Berlin says:—Investigation into the manner in which some of the fortunes of Germany's former royal houses were acquired, in connection with the question of indemnification by the Republic, has disclosed that Germany princelings up to the nineteenth century had "sold" 296,166 of their subjects for $3,750,000 to England, for army services against the American colonies, the French and other enemies.

Duke Karl Wilhelm Ferdinand, of Braunschweig, sent 4,300 men to England for $38 a head, it is disclosed, with an additional indemnity of $22 a head for each man killed in action, three wounded men to be counted as one dead one.

Landgrave Frederick II. of Hesse "sold" 12,000 Hessians at $75 a head, with an annual "rental" fee of $500,000.

There has been produced a letter from the Landgrave of Hessen-Cassel to Baron Hohendorf, his commanding officer in the American colonies, in which the writer commended the Baron "for seeing to it that 1,950 of the Landgrave's peons in the Battle of Trenton only 300 escaped alive."

"Be sure and send an itemized statement of the losses to London," the letter continues, "as the English minister wants to pay me for only 1,455 killed. I am entirely dissatisfied with Major Mindorf, who, according to dispatches, succeeded in saving his battalion of Hessians."

British Shoe Workers.

Excepting America, no country pays its operatives in the boot and shoe trade as well as Britain, according to Thomas F. Richards, president of the National Union of Boot and Shoe Operatives, in the last report of this organization. Even America, Mr. Richard says, does not provide for its workers in the fibre stiffening branch as well as Britain.

"Our evidence from one particular firm," he continues, "shows that the rates (considering the cost of living) are economically lower than ours, that the national agreement's conditions of this country are much higher than that in the American factory."

General Sir George Cory

Who is visiting the home of his parents in Toronto after four years spent with army headquarters in India. Sir George, who was attached to the Indian army for four years, believes that conditions in India are becoming more settled, despite the racial riots which occurred recently in Calcutta. The distinguished soldier expects to resume his work with the British army after an extended stay in Toronto.

British Country Folk Find City Life Cheaper

A despatch from London says:—Country gentlemen in England who have been hard hit financially by the war and its aftermath, are deserting the green fields for the bright lights because rent and food are cheaper in the cities.

Sir Walter Gilbey, whose forefathers were among the largest land owners in England, is the most recent of this class to announce desertion of the land because farming these days does not pay.

Sir Walter said he had lost more than £5,000 in five years, and that his 450 acres at Eisenham, Essex, the last of the famous agricultural estate created by his father, who once owned 8,000 acres, are now offered for sale. A London flat will be his home hereafter.

Trees Along Main Roads.

Since the Minister of Transport called a conference to discuss the planting of trees along arterial roads, the Middlesex County Council, England, has prepared a program involving an expenditure of £4204 for tree planting along 24 miles of arterial roads. All the roads selected are 100 feet wide and planting will cost £1 per tree. That is for 1926 only, and further plans are in hand for future years.

The Great West Road is to have a mile each of red and white chestnuts and green and copper birches. The Great Cambridge Road will have a mile each of Norwegian maple, both beeches, Cornish elm, oak, both chestnuts and lime. The North Circular Road is to have oak, elm, and ash. Other roads have been allotted these trees in varying combinations.

Huge Crop of Winter Wheat Expected in Western States

A despatch from Rochester, N.Y., says:—A record crop of winter wheat, amounting to 340,000,000 bushels, will be produced in the States of Kansas, Oklahoma, Texas and Nebraska, according to trade surveys presented to the Atlantic States Shippers' Advisory Board. This compares with a production of 141,245,000 bushels for 1925. The estimate was made by the American Railway Association.

Notre Dame Relic.

Among the interesting relics preserved in Notre Dame cathedral, in Paris, is the robe worn by Pope Pius VII. at the coronation of the first Napoleon.

KEPT LIGHTHOUSE BEACON FLASHING FOR THREE NIGHTS

All England recently rang with the story of how Ethel Langton, the 14-year-old daughter of the keeper of St. Helen's lighthouse, off Bembridge, Isle of Wight, kept the beacon burning for three nights during a violent storm. Her parents, who had gone to the mainland for supplies, were unable to return because of the heavy seas and the father worried in case the girl would not realize the importance of lighting the lantern. At the appointed time, however, the warning flash pierced the darkness. Ethel had a twenty-foot climb every four hours to the beacon tower to wind the special apparatus which keeps the light flashing. On the left is Ethel with her dog, her only companion during her long vigil. On the right she is seen climbing to the tower, where she had to attend to the lantern.

CANADIAN DOLLAR ABOVE PAR IN N. YORK

For First Time This Year Dominion Money Commands Premium.

A despatch from New York says:—For the first time this year, the Canadian dollar moved to a premium last week in the New York foreign exchange market. It was quoted at 1-64 of 1 per cent. over par, as against a discount that had prevailed since the first of this year and that had resulted in a steady shipment of gold from the Dominion to the United States. If the present relationship should be maintained, bankers believe that a return movement of gold from the United States to Canada may set in in the near future.

The highest discount on the Canadian dollar that has prevailed this year was 5-8 of 1 per cent., established on March 3. Canadian exchange has been gradually strengthening in recent days, and the discount on Wednesday has been reduced to 3-32 of 1 per cent. Unusual activity developed and under a liberal demand the rate was pushed over par.

The resumption of sailings from Canadian ports and general navigation on the Great Lakes, which are counted on to result in largely increased exports from Canada, were declared to be the chief factors responsible for the strength in Canadian exchange. It was the seasonal shrinkage in United States purchases of Canadian commodities last winter that caused a reversal of the movement of gold from the United States to Canada.

American shipments of gold to Canada last October, when the exchange rate was in the neighborhood of present figure, amounted to about $40,000,000. Canadian shipments to the United States this year have been approximately $66,000,000.

The present low money rates in the New York market and the large supplies of funds available here are understood to be causing a tendency for the transfer of money to Canada for financing commercial and industrial activity in that country.

Surgery Restores Woman Who Slept for 30 Months

A despatch from Pound, Wis., says:—Mrs. Molly Stankowitz, 40-year-old "dream woman of Pound," who mystified the medical world by sleeping for 30 months with only three or four short interruptions, has been awakened and returned to health by the removal of several large stones from her kidneys.

Surgeons who have observed and attended her case are of the opinion it is without parallel. For almost three years the patient lay in a comatose condition, able to take liquid food only through a tube. Although unable to speak or move a muscle while sick, she claims to have been aware of everything going on about her, a fact unknown to those who attended her.

Mother Bore Triplets After Long Sea Voyage

A despatch from Toronto says:—That the hardihood of the newcomers to Canada is equal to that of the pioneers of the Dominion was evidenced on Monday by a young mother who gave birth to triplets upon arrival at St. John. Refusing all assistance and accepting nothing in the way of charity but a little warm milk tendered by the Dominion Express messenger, she continued her journey without delay, and arrived in Toronto safely. Upon arrival she was taken to the home of Robert MacAdam, 131 Ranleigh Ave., where, with her son and two daughters, she was reported as "doing well."

Orphans' Bank Accounts.

According to the Thirty-Second Annual Report of Mr. J. J. Kelso, the Children's Aid Societies of the Province hold in trust for wards of the Society deposits amounting to $105,000. This money is kept in individual bank accounts and the amounts run from $5 to $3,000. It is paid out to the children just as soon as they are fairly established in life.

THE WEEK'S MARKETS

TORONTO.

Man. wheat—No. 1 North., $1.63¾; No. 2 North., $1.55¾; No. 3 North., not quoted.

Man. oats—No. 2 CW, nominal; No. 3, not quoted; No. 1 feed, 49¼c; No. 2 feed, 47¼c; Western grain quotations on c.i.f. bay ports.

Am. corn—No. 2 yellow, track, Toronto, 85c; No. 3 yellow, 83c.

Millfeed—Del. Montreal freights, bags included: Bran, per ton, $30.25 to $31.25; shorts, per ton, $32.25 to $33.25; middlings, $39.25 to $40.25; good feed flour, per bag, $2.30.

Ont. oats—40 to 42c, f.o.b. shipping points.

Ont. good milling wheat—$1.30 to $1.32, f.o.b. shipping points, according to freights.

Barley, malting—62 to 64c.

Buckwheat—No. 2, 72c.

Rye—No. 2, 85c.

Am. corn, track, Toronto—No. 2 yellow, 84½c; No. 3 yellow, 82½c.

Man. flour—First pat., $8.60, Toronto; do, 2nd pat., $7.90.

Ont. flour—Toronto, 90 per cent. pat., per barrel, in carlots, Toronto, $5.75; seaboard, in bulk, $5.75.

Straw—Carlots, per ton, $9 to $9.50.

Screenings—Standard, recleaned, f.o.b. bay ports, per ton, $22.50.

Cheese—New, large, 22c; twins, 22½c; triplets, 23c; Stiltons, 24c. Old, large, 28 to 30c; twins, 29 to 31c; triplets, 30 to 32c.

Butter—Finest creamery prints, 48c; No. 1 creamery, 46 to 47c; No. 2, 45 to 46c. Dairy prints, 41 to 42c.

Eggs—Fresh extras, in cartons, 36 to 37c; fresh extras, loose, 36c; fresh firsts, 33c.

Dressed poultry—Chickens, spring, lb., 35 to 37c; hens, over, 4 to 5 lbs., 30c; do, 3 to 4 lbs., 27c; roosters, 25c; ducklings, 5 lbs. and up, 30 to 31c; turkeys, 40c.

Beans—Can. hand-picked, $2.60 per bushels; primes, $2.40 per bushel.

Maple produce—Syrup, per imp. gal., $2.40; per 5-gal., $2.30 per gal.; maple sugar, lb., 25 to 26c; maple syrup, new, per gal., $2.50.

Honey—50-lb. tins, 11½ to 12c per lb.; 10-lb. tins, 11¾ to 12c; 5-lb. tins, 11 to 12¼c; 2½-lb. tins, 14 to 14½c.

Smoked meats—Hams, med., 29 to 31c; cooked hams, 43 to 45c; smoked rolls, 22c; cottage, 25 to 27c; breakfast bacon, 32 to 36c; special brand breakfast bacon, 33 to 39c; backs, boneless, 35 to 43c.

Cured meats—Long clear bacon, 50 to 70 lbs., $24.25; 70 to 90 lbs., $23.75; 20 lbs. and up, $22.34; lightweight rolls in barrels, $42.50; heavyweight rolls, $39.50 per bbl. Lard—Pure tierces, 18 to 18½c; tubs, 18½ to 19c; pails, 19½ to 20c; prints, 20½ to 21c; shortening, tierces, 15 to 15½c; tubs, 15½ to 16c; pails, 16 to 16½c; blocks, 17½ to 18c.

Heavy steers, choice, $7.50 to $8.25; do, good, $7 to $7.25; butcher steers, choice, $7 to $7.50; do, good, $6.25 to $6.75; do, com to med., $5 to $6; butcher heifers, choice, $6.50 to $7.25; do, good, $6 to $6.50; do, com., $5 to $5.50; butcher cows, choice, $5.25 to $6; do, fair to good, $4 to $5; butcher bulls, good, $5 to $5.75; bolognas, $3.50 to $4; canners and cutters, $2.50 to $3.50; springers, choice, $80 to $90; good milch cows, $70 to $80; medium cows, $45 to $60; feeders, good, $6.25 to $6.75; do, fair, $5 to $6; stockers, good, 5 to $5.50; do, fair, $4.50 to $5; calves, choice, $12 to $12.25; do, good, $10 to $11; do, lights, $5 to $9.50; good lambs, $13.75 to $14; do, med., $12.75 to $13.50; do, culls, $10 to $11; good light sheep, $7 to $9; heavy sheep and bucks, $5.50 to $6.50; hogs, thick smooths, fed and watered, $13.60; do, f.o.b., $13; do, country points, $12.75; do, off cars, $14; do, thick fats, f.o.b., $12.50; select premiums, $2.65.

MONTREAL.

Oats, Can. west., No. 2, 67c; do, No. 3, 63c; extra No. 1 feed, 59c. Flour, Man. spring wheat pats., firsts, $8.60; seconds, $8.10; strong bakers', $7.90; winter pats., choice, $6.10 to $6.15. Rolled oats, bag 90 lbs., $3.20 to $3.30. Bran, $30.25. Shorts, $32.25. Middlings, $39.25. Hay, No. 2, per ton, car lots, $13.50. Cheese, finest westerns, 25c.

Butter, No. 1 pasteurized, 38½ to 39c. Eggs, fresh extras, 38c; do., fresh firsts, 34c. Potatoes, Quebec, per bag, car lots, $3.50.

Cows, canner and cutter quality, $2.50 to $3.25; calves, fair quality, $7; do, poorer quality, $6 to $6.25; hogs, $14.50.

Canadian Mermaid

Miss Eva Morrison, daughter of the police chief of Pictou, N.S., who is planning to swim the English Channel. She is at present training in Boston.

FIVE KILLED, FIFTY HURT, IN TRAIN WRECK

New York-Atlantic City Express Locomotive Leaps Into Air Dragging Six Pullmans.

A despatch from New York says:—Five persons were killed and fifty injured at 5.30 o'clock Thursday afternoon, when the New York-Atlantic City Express, which left this city at 3.15 p.m. was derailed at Delair, near Camden, N.J. The train bound for Atlantic City consisted of ten Pullman parlor cars, occupied mostly by Philadelphia commuters to Atlantic City.

The express, known as train number 1077, was en route direct from New York to Atlantic City. It left this city at 3.15 and arrived at 5.10 in Bordentown, N.J., where Philadelphia commuters and others board it.

Engineer Prebles and Fireman Anthony Rankin, twenty-seven, Jersey City, were thrown into the heap and buried under wreckage. Before they died they sobbed and begged to be killed and taken out of their misery as escaping steam scalded them. They died before they could be rescued from the wreck.

The locomotive, going at a fast rate through the semi-darkness of fog and rain, is believed to have struck an open switch.

Woman Doctor Warns About the "Fat Forties"

A despatch from London says:—"Beware of the hungry forties!" is the warning of Dr. Elizabeth Sloan Chester gives to persons who are inclined to obesity. So-called "hunger" in the case of stout, middle-aged persons often is "due to dilated or congested digestive organs, which need fasting, rest and re-education," Dr. Chester says:

"Babies suffering from overeating are often put on a diet of albumen water for several days, and what suits a baby will not hurt a well-nourished, over-plump adult," Dr. Chester remarks.

"When obesity has overcome a man or woman, fasting is usually necessary at the beginning of a cure. No food for three or four days, with pints of orange or lemon juice, will eliminate a fair quantity of poison from the system."

New Zealand Acquires Headquarters in London

A despatch from London says:—New Zealand has followed the lead of South Africa and Australia, and acquired building at Charing Cross as official headquarters in London. It has purchased the former home of the British Medical Association.

Australia house is at Aldwych, which was proposed by Earl Grey as a site for Canada.

Natural Resources Bulletin.

The snow is not yet off the ground, nevertheless every mail brings inquiries from the United States for information about automobile roads, canoe routes, camp sites and other details regarding summer holiday possibilities in Canada. Letters from such widely scattered points as Ann Arbor, Michigan; Shrewsbury, New Jersey; Madison, Wisconsin; Lowville, New York; Texarkana, Texas; Indianapolis, Indiana; and Orwizburg, Pennsylvania, have arrived in an interval of a few hours.

Most of the inquiries are relatively simple requests for maps and information about automobile road conditions and accommodation that may be expected. A great many want to visit the best fishing districts. A surprisingly large proportion state that they wish to get entirely away from the travelled and popular routes. A passable road, a quiet bit of woods, a lake and fish, are what most of the males and some of the family parties state they want most. Several intend to travel into country that offers a choice for permanent summer residence. When they strike the spot that suits them they intend to purchase it for recreation in future years. A few are interested in the mining camps and still others want to leave all trodden paths for the silent stretches of the canoe "trails." Some are even so venturesome as to be planning canoe trips into the Hudson and James Bay country. The routes to Fort Albany and Port Nelson are especially popular.

Indeed the demand for information as to canoe routes has become so insistent and widespread that the service has been obliged to get out reports on upwards of a hundred trips of this character, a general summary of which has had to be prepared for the benefit of those who had rather vague ideas as to what part of the country they wished to include in their travels.

The character of the questions asked shows that the traveling public is learning to plan its vacations very thoroughly and well in advance of the actual tourist movement. The volume of correspondence that has already developed this year indicates clearly the tourist movement for the coming season in Canada will exceed all previous records in every way.

Doctors Quarantine Train and Vaccinate Passengers

A despatch from Winnipeg says:—A train conveying a patient afflicted with smallpox was sidetracked on Thursday before it reached the city limits, while every passenger and member of the train crew was compelled to submit to vaccination. The train operated over a branch line in Manitoba.

Dr. A. J. Douglas, City Medical Health Officer, with a staff of medical men, met the train several miles from the city. Every coach was ordered locked and a virtual quarantine declared. All the passengers returned to their homes.

The smallpox patient died in a Winnipeg hospital.

Roar of Niagara Falls Has Been Definitely Measured

A despatch from Niagara Falls, Ont., says:—Niagara Falls is far noisier than any point in New York City, exhaustive tests undertaken here have proved. The tests showed that the two noisiest spots are at the foot of the American Falls and directly in front of the Cave of the Winds. Both these places are defined as deafening. The instruments measured 70 units there, compared with 55 units at the noisiest place in New York Sixth Ave. and 34th Street. The quietest spots are at Terrapin Point and at the Whirlpool Rapids on this side. The tests were made with an audiometer, by the Bell Telephone Company.

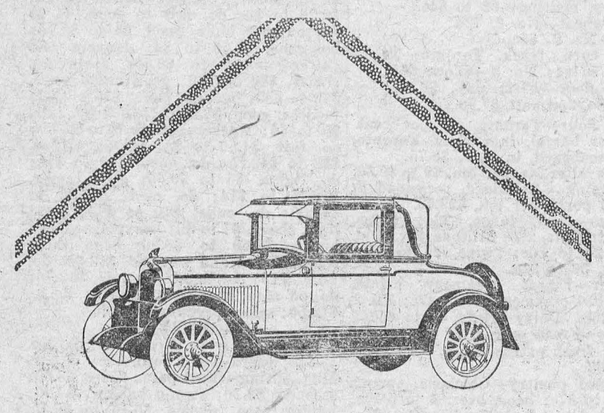
"The Book Store." A. H. DUNCAN.



A NEW VALUE

THE Pontiac Six represents the full scope of General Motors' engineering skill, manufacturing experience, production facilities and purchasing power — *at a price so unexpectedly low that only General Motors could possibly achieve it.*

In its field and at its price, the Pontiac Six, body by Fisher, is an achievement no less important than the invention of the first six-cylinder engine. This is true simply and solely because the Pontiac Six introduces elements of beauty, size, stamina, comfort and brilliant performance entirely without precedent in a car of its class.

The Pontiac Six is now being displayed in our showroom and you are urged to inspect it thoroughly.

The low G.M.A.C. financing rates are available to purchasers of the Pontiac Six on time.

A. E. Goodfellow,

Winchester - - Ontario.

quent address, charging them with the responsibilities of their office and saying their great need was a deeper consecration. He set before them a great task of enthusing all the women of this Presbyterial with missionary zeal, and made them feel the worth-whileness of their task. He then offered a very earnest prayer for God's blessing and Holy Spirit to rest upon each member. Mrs. Merill in a few pleasing words, introduced Mrs. Henderson who gave the missionary address of the evening. She asked us to inqure of ourselves "What is my share in the lifting up of the Christ?"

It is the glorious privilege of man to pass on the gospel story, when we have received power then are we able to go on and tell this story. She said we do not know the meaning of the word sacrifice to-day in comparison with those pioneers who have gone before. On the mission fields of the United Church of Canada the sun never sets. Every man, woman and child is needed in this great work. "Canada for Christ" should be our slogan In the home mission fields there is a great untouched area to whom the W. M. S. can minister. She told of the need of missiona.y workers in India China and other foreign fields. How are we going to meet this need? We must go quickly and tell. We must convince ourselves of the present need. She spoke of the indifference at the home base. The love, sympathy and gifts of every woman is needed. Divine power is through human leadership. The Master is giving to each of us a harp and asking us to put in the strings—optimism, hope, patience, love and hard work. Do not put in any undue criticisms or selfish desire. The Master will sweep His fingers over these strings and this strain shall swell "Our Jesus has done all things well."

Miss Phillips kindly contributed a most enjoyable solo while Miss Edna Shaver presided at the organ. The choir sang "Love Divine All Loves Excelling" in which Mrs. Hazel Hutt and Miss Annie Walker took solo parts.

The report of the Courtesy Committee was brought in by Mrs. McDougall, of Jasper and a hearty vote of thanks was tendered to all who in any way contributed to make this gathering a success.

The singing of "Breathe on me Breath of, God" and prayer by Rev. Mr. Clarke closed a very helpful and successful Missionary Convention.

The law respecting the responsibility of an automobile driver for the safety of any person that may be driving with him has been amended. It used to be that if you asked a friend to go for a drive with you, and an accident occurred, whether you were responsible for it or not, you was liable for the safety of the person driving with you, and if they suffered in the accident and claimed damages from you, you was liable. The way the law stands now, the claiment would have to prove that the accident was due to the drivers own negligence.

Toy's Hill

Mr. H. McQuig, of Winchester, was the guest of Mr. and Mrs. David Gallagher on Tuesday.

Miss Beatrice Peterson spent the week-end at Brinston.

Mr. and Mrs. Ralph Adams, of Hulbert were Sunday guests of Mr. and Mrs. Austin Haggerty.

Catalogue Time

Where now the winds of March are blowing
The garden seeds will soon be growing,
My muse shall sing man's yearly need
For onion sets and spinach seed,
Shall sing likewise that gay deceiver,
Which stimulates our garden fever,
The subtle seedsman's catalogue
Whose charms our better judgment fog,
Its pictured beets and peas and chard
Were never grown in my back yard.
My radishes are not so red,
My pumpkins not so widely spread,
My lettuces refuse to head.
The seedsman is an optimist
And loves the brighter side, I wist.
He does not show in colored plate
The woolly worms that lie in wait,
No dark brown spots like mine are seen
On his prolific greenpod bean.
And yet for planting all agog,
I love that yearly catalogue.
I hail with joy each harmless fable
And plant new squashes for my table.
For though my cukes be bitter things,
My cabbage full of worms, by jings,
And all my snap beans full of strings,
Still to my heart the brown earth calls,
And all her summers, springs and falls,
Shall find my legs in overalls;
Shall find me spading loam and sand
With blisters on each hand.

One Year More

If I had but one year to live
One year to help; one year to give;
One year to love; one year to bless
One year of better things to stress
One year to sing; one year to smile;
To brighten earth a little while;
One year to sing my Master's praise;
One year to fill with work my days
One year to strive for a reward
When I should stand before my Lord
I think that I would spend each day
In just the very self-same way
That I do now. For from afar
The call may come to cross the bar
At any time, and I must be
Prepared to meet eternity.
So if I have a year to live,
Or just one day in which to give
A pleasant smile, a helping hand,
A mind that tries to understand
A fellow-creature when in need,
'Tis one with me—I take no-heed;
But try to live each day He sends
To serve my gracious Master's ends.

Little Things

Our lives are filled with little things,
And every day its measure brings,
To one and all of good and ill,
To choose and fashion as we will.
The thousand nameless little things,
The hopes, the fears, the smarts, the stings,
That round our lives as moments fly,
Till lo, a day has hastened by.

They mean so much, our words, our deeds,
Are like a host of scattered seeds,
That spring up here, and blossom there,
Until they greet us everywhere,
And some are drifted far and wide,
As a strange plant borne by the tide,
Takes root upon a distant shore,
Where it was never known before.

The frown we carried yesterday,
May travel many miles away,
And lodge in some discouraged soul,
Now struggling on to reach its goal.
The blessing shared, the smile we gave,
May help a weary one to save.
God make us feel our brother's need,
And scatter only helpful seed.

A Friend In Need

"A friend in need," my neighbor said to me—
"A friend indeed is what I mean to be;
In time of trouble I will come to you,
And in the hour of need you'll find me true."

I thought a bit, and took him by the hand,
"My friend," said I, "you do not understand
The inner meaning of that simple rhyme,
A friend is what the heart needs all the time."
