Our Column

An airplane flew over Winchester last Friday afternoon going west.

—Keep your dog tied up. The law says they must not run at large between May 15 and September.

Canada is now the fourth rubber manufacturing country in the world and her exports of rubber products last year reached $30,000 000.

Some of the town lawns are beginning to look very attractive. Next month will be the month of roses and then the lawns where roses bloom will be twice as attractive.

The number of Quebec and U. S. cars passing through Winchester this spring is evidence that the Whitney Memorial Highway is becoming a popular route to the Capital of Canada.

After one year of college Joseph telegraphs home to his brother Glenn, "Failed in everything, Prepare Papa."

Glenn telegraphs back to Joseph, "Papa prepared; prepare yourself."

—Ina Belle Castle

Before passing along any rumors, especially those that reflect on the honor or integrity of anyone in particular, it is well to verify the facts. It is surprising how little truth there is in gossip.—Farmers' Advocate.

The Winchester Press is willing to wager that every article written on "the dignity, the wisdom, the sound mental ability and the trustworthiness of old age" is written by men and women who have passed the half century mark.

In 1927, the United States exported to Canada no less than $835,878,090 worth of goods; United States exports to Great Britain exceeded these figures by some $4,000,000 Canada's exports to the United States for the same period were only $475,077,348.

The tag selling campaign carried out on the streets of Toronto last week by an army of young women, for the benefit of under-privileged children of the city, yielded $21,500 in cash and a wedding ring. The ring was found in one of the boxes and the donor is unknown.

The total fatalities from the use of the automobile in the United States for the year 1927 are estimated at 25,000. This seems an awful price to pay for rapid travel, but the difficulty is probably not so much the excessive speed as the carelessness and incompetence of the drivers.

It's what you think that makes this life
A failure or success;
The mind may fashion all things rife
With a grey hopelessness;
Or we may take the wiser course,
And summon to the van
Of our thought life—this truth, "We can
Because we think we can."

An iron tank, as big as a house, mounted on a big truck, passed through here on Saturday last from Ottawa to Cornwall. The top was fully 30 feet above the ground, and the driver had no easy task in finding his way along the streets, avoiding limbs of trees and cross wires. The tank looked as though it might hold half the water of the St. Lawrence.

A little chap was late in coming to school one day recently, and on entering the teacher severely asked Billy what kept him late. "That sign down there" said Billy. "And what has the sign to do with it" asked the teacher. "Well," Billy replied, "the sign says "School ahead go slow" and thats' what I did. The teacher questoned no further.

When we see the big trucks filled with green vegetables and fresh fruit arriving in Winchester in the early morning to sell their share to local dealers, one but gets a little glimpse of the keen competition and strenuous life of the city business man. The city may have attraction but the simple and quiet life of a nice little town not too far away from city privileges is the place for yours truly.

It is somewhat a farce, that provinces which have decided to go into the whiskey business in the name of temperance, treat each other as if they were foreign countries by insisting that every mouthful of liquor swallowed in any province must have been purchased in that province. Some day a move will be made to prevent a fellow smoking a cigar in Brockville that may have been given him Montreal —Brockville Recorder Times.

Lady Baldwin, wife of England's Prime Minister says she "cannot imagine anything nearer Paradise than Canada." That's all right from a visitor's point of view who is entertained at the best and with the best, with no responsibility. But Canada is like every other land, your Paradise is in your general state of mind and bodily condition. There are a good many people in Canada who think it anything but a paradise, but that is not Canada's fault.

The Call Of All Outdoors

After a few months of snowy joys, the finest of Winter pastimes palls, overcoats seem to weigh a ton, green becomes the most beautiful of colors in the spectrum. The call of Spring sounds loud and clear and with it we begin to plan for our Summer's vacation.

To choose from the varied delights of seashore or mountain lakeland, of resort hotel or camp, becomes a problem of never-ending delight.

Canadian National places Canada's choicest vacation spots within easy reach. Luxurious train service will take you to Jasper National Park or the Pacific Coast and Alaska, to the forest fastness of the Highlands of Ontario, to any one of many beautiful spots on the Lower St. Lawrence or to the delightful seaside and woodland havens of the Maritimes.

Literature and full information may be obtained from any Canadian National Agent.

LOCAL AND GENERAL

The concert of the Citizens Band from the hotel balcony on Saturday night was not given because of the rain.

Mr. Robert Workman and little son, Billy, are confined to their beds with pneumonia, and at time of writing are progressing favourably.

On Sunday next Whit-Sunday there will be a celebration of Holy Communion in St. Matthias' Church at 8 a. m. Sunday School at 3. p. m.

At the sectional meeting of the W. M. S. held in Morewood last Friday, Winchester had the largest representation of the Auxiliaries in this section.

At the conclusion of the play given by the Young People of Winchester Springs on Tuesday evening, those taking part were entertained by Mr. and Mrs. Eldon Fennell.

It is expected that construction of seven miles of permanent concrete pavement between Johnstown and Spencerville, on the Prescott-Ottawa highway, will commence about July.

A very heavy thunder storm visited this section on Saturday last, and an immense amount of water fell, flooding much low land. In most places the rain was needed, and will do far more good than harm.

The community of Oxford Mills lost one of its oldest and most highly respected citizens today when Mr. John Todd passed away at his home. The late Mr. John Todd was born in the township of Oxford, a short distance west of his present home, 77 years ago.

A meeting of the Executive Ontario Religious Education Council for the township of Winchester was held in the Baptist Church on Tuesday Evening. Arangements have been completed for the township convention to be held at Winchester Springs the latter part of June.

Mrs. Pearl E. Geer, 37, wife of William A. Geer, prominent Detroit attorney, and herself a figure in Detroit society, as well as a member of country clubs on this side of the river, is being held on $2000 bail on a charge of driving while intoxicated, following a smash-up in which her car demolished a milk-wagon.

Dr. Frank M. Higginson, son of Mr. and Mrs. William Higginson of Inkerman, Ont., has just graduated from Queen's University in medicine. Dr. Higginson intends taking his internship at Buffalo General Hospital. His brother Dr. Lorne Higginson, is a popular member of the profession residing at Pembroke, Ont.

The Ladies' Aid of St. Paul's Presbyterian Church will hold their Annual Anniversary supper, on Monday, June 4th. Supper will be served from 6 to 8, followed by a good program. Everybody invited to come. Tickets 50c.

On Monday evening, May 7, in the Music Hall, Chesterville, the citizens of the village and surrounding district guthered to bid farewell to Rev. Mr. and Mrs. W. M. Orok, upon the occasion of their removal to their new mission at Maitland. After a few remarks by the chairman, Mr. Hamilton, an interesting and pleasing short program was carried out with due solemnity. At the conclusion of the program an address was ably read by Dr. S. H. Hutt and a substantial purse was presented by G. H Barkley.

That Common Habit

Fault finding is the easiest thing in the world. Last Saturday we heard a man on St. Lawrence Street complain that those engaged in cleaning the street were not thorough enough Perhaps not, but they have improved the street, they had at least given it the appearance of being looked after. How much better to commend and encourage than to find fault and critize.

Women's Institute

The annual meeting of the Women's Institute was held in the United Church S. S. Hall on Wednesday, May 16th, the President, Mrs. Dukelow, presiding. There were eighteen members present.

After the reading of the minutes, a summary of the year's work was given, also the Treasurer's Report, showing a balance on hand of $249.57.

The mattee of membership in the League of Nations was mentioned and members of the Institute urged to join the Local Branch. It was moved by Mrs. J. H. Ross, seconded by Miss Grace Irving that the secretary pay the Federation Dues.

The President announced that a cheque for twenty-one dollars had been received from the Winchester Rink Co. It was moved by Mrs. L. Flora, seconded by Mrs. J. H. Ross that the Institute use twenty one dollars of this dividend to purchase two additional shares in the Winchester Rink Co. Carried. It was moved by Mrs. Wm Shaver, seconded by Mrs. Wm Lannin, that ten dollars be sent to aid the Red Cross Society in establishing Outpost Hospitals in Northern Ontario. The roll call was answered by 18 paying dues. The President then made a few remarks, referring to the many small things accomplished during her term of office. She thanked the members for their kindness and support, but declined to stand for the Presidency another year. The election of officers resulted as follows:

President (pro tem)—Mrs. R. Dukelow.
1st Vice Pres.—Mrs. B. F. Smith.
2nd Vice Pres.—Mrs. M. Moffatt.
Sec.-Treas. (pro tem)—Miss Margaret Holmes.
District Director—Mrs. L. Dixon.
Press Reporter—Mrs. Geo Earle.
Pianists—Mrs. A. Sweet, Mrs. B. F. Smith.
Auditors—Mrs. Wm Shaver, Mrs. J. H. Ross.
Directors—Mrs E. Merkley, Mrs. Wm Lannin, Miss G. Irving, Mrs. Ed Shaver.

Representatives to the District Annual, Mrs. J. W. Ault, Mrs. L. Flora, Mrs. R. Suffel, Mrs. Jacob Dixon, Mrs. B. F. Smith.

LOCAL AND GENERAL

Work at the new Public School is progressing most favorably.

The Anniversary services in connection with Winchester United Church are to be held on Sunday and Monday June 17th and 18th.

Mrs. Bert Payne, a well-known resident of the town-ship of South Gower, dropped dead at her home there last week after having been in poor health for several years.

On Friday morning last about 3.30 o'clock a man smashed the store window of Stacey's Jewellery shop in Brockville, and got away with diamond rings valued at over $1200. Although the police were soon on the scene the man escaped.

The 47th annual session of the Grand Lodge of the Orange Young Britons of British America and Newfoundland will be held in Perth on Thursday and Friday May 24th and 25. The lodge sessions will be held in the Sunday School Hall of St. Paul's United Church.

After having spent the winter months at Long Beach, Calif., Dr. S. J. Keyes, principal of the Normal School, and Mrs. Keyes have returned to the Capital. Dr. Keyes is much improved in health and will resume his duties at the commencement of the fall term.

Congratulations to Dr. Howard Justice who last week successfully passed all his exams at Queen's University, securing the degree of M. D. Besides this honor, Dr. Justice was successful in winning two valuable first prizes because of his excellent standing.

Mr. O. D. Casselman, of Chesterville, Ont., who for over a year sojourned with Mrs. Casselman, in the bright sunshine of the California Coast, was a visitor to Winchester last Friday and was greeted by many friends. Mr Casselman looks well and feels well, and we presume is well.

Mrs. Margaret Jane Biccum received word this morning of the death of her only sister Mrs. Eliza Condell, who died at her sons home Dr. Angus Condell in Brandon, Man. She leaves to mourn her loss two sons, Dr. Angus of Brandon, Man., and Dr. Will, of Edmonton, Alta., one sister Mrs. M. J. Biccum of Winchester, and one brother Allan McFadden, of Spencerville. She was in her 79th year. Her body is being brought to Spencerville for burial.

TARZAN one of the most popular of screen productions. There is not a moment through its production when you are not interested. It is a picture that grips you and holds you. You may enjoy it at Lannins Hall, Saturday and Monday nights, May 26 and 28. Usual prices.

About Money

At the Young People's meeting of the United Church, on Monday evening, Mr. J. D. Stewart gave a most interesting address on "Money." During the course of his remarks he said, Money was a medium of exchange. Among the primitive peoples, various commodities were used, such as cattle salt, tobacco, wine, whales teeth shells, etc,

The commercial nations found however, that metals made a much more convenient commodity for exchange. Gold, silver, lead and even tin and copper were used. These were much better because of their durability, uniformity and divisability.

All the chief nations he said are on the gold basis.

Mr. Stewart illustrated his address by biblical and historical references and made the occasion one of real interest to those who were present. At the olose, a very hearty vote of thanks was tendered the speaker.

Delegation Will Interview the Hydro Commission re Beach Proposition

The petitions circulated by citizens of Winchester during the past few weeks were, on Monday evening, presented to the Municipal Council and as a result a deputation consisting of Messrs M. Bailey, W. J. Cass, D. H. Weir and H. Nesbitt was appointed to wait upon the Ontario Hydro Commission, present the petitions and urge that the requests be granted.

After the fire that destroyed the Beach Factory, a public meeting of the citizens was called to see what inducements could be offered the Company to rebuild their factory. A committee was appointed to interview the Beach Co., and ascertain their desire in the matter. This was done, and resulted in a request that this municipality have transferred to the Beach Co. the right to supply this municipality with all its electric energy, at a cost not to exceed the prevailing cost of the Hydro Commission. This, as has been fully explained in the Press was to allow the Beach Co to make profitable use of their power at Iroquois, and thus become an inducement for them to rebuild their Furniture Factory in Winchester. The request is so reasonable that very few of our citizens refused to sign the petition and it is now up to the delegation to see that the petition is sufficiently impressed on the Hydro Commission. There is no reason in the world why the petition should not be granted, because it is the people who pay for the power who are asking for it. The rebuilding of the Furniture Factory will mean very much to the future of Winchester.

Following is the resolution of Council appointing delegates to Toronto.

Moved by Edgerton—McMaster, that the Municipal Council of the Village of Winchester approve of the petition of the ratepayers of the said Village of Winchester to the Hydro Electric Power Commission of Ontario requesting the Commission to make such mutual arrangements as will permit the corporation to take all its electric power from the Beach Interests, and yet conserve to the corporation its property rights as provided in its original contract between said Commission and the said Corporation, and urges that immediate action be taken in order that if possible a furniture factory may be obtained for said village as a result of such mutual arrangements.

SOCIAL AND PERSONAL

Mr. D. Beattie spent Monday with friends in Ottawa.

Miss Gladys Conley is visiting her aunt Mrs. Shaver of Ottawa.

Mr. J. T. Elnaugh has returned home after spending sometime in Ottawa.

Miss Hilda Sheldrick, of Montreal, spent the week-end at her home here.

Mrs. J. H. Faith spent last week with her nieces, the Misses York of Russell.

Rev. Mr. and Mrs Waddell and children visited friends in Kingston last week.

Miss Mary Roland, Kinston, was a guest of Miss Erma Beach over the week-end.

Mr. and Mrs. M. Fennell and family, visited relations in Morewood over Sunday.

Mr. A. S. Dillabough of Cloverdale, has been visiting friends at Chesterville this week.

Miss Jennie Beattie of Chesterville, was the week-end guest of Mr. and Mrs. A. D. Beattie.

Mr. and Mrs. Good of Ottawa, were guests of Mr. and Mrs. R. M. Wallace over the week-end.

Mrs. J. Dixon and son Nelson Dixon, are visiting Mr. and Mrs. Albert Dixon at Grimsby, Ont.

Miss Freda Robinson Reg. N. of Ottawa, is spending this week with Mr. and Mrs. C. R. Robinson.

Mr. and Mrs. D. Lavere left on Friday last for Mears, Mich., to attend the funeral of Mr. Lavere's brother J. H.

Mr. and Mrs. Geo. Barkley and little daughter Ruth, of Ottawa, spent the week-end with their friends here.

Mr. and Mrs. J. A. Beattie of Montreal, spent the first of this week here the guests of Mr. and Mrs. Geo. E. Earle.

Mr. and Mrs. J. H. Ross left on Wednesday on a motor trip to Brighton and Toronto. They will return on Saturday.

Mr. R. McVittie, Principal of one of the Public School at Kingston was a week end guest at home of Mr. and Mrs. A. W. Beach.

Mr. Edward Butcher left Tuesday by motor for London, Ont., to attend the B. Y. P. U. Convention being held there this week.

Visitors at the home of Mr. and Mrs. F. A. Fawcett, over the week-end were, Mrs. D. W. Meldrum, of Ottawa, and Mr. and Mrs. Charles Algate and little son Ray, of Massena, N. Y.

Mr. and Mrs. Enos Munro of Nation Valley, attended the Graduation Exercises of the Kingston General Hospital held in Grant Hall "Queens University" on Tuesday evening of last week. They were accompanied by Mr. and Mrs. O. W. Duprau of Morrisburg.

The following ladies, members of Winchester's Five Hundred Club, drove out to the summer home of one of their member, Mrs. B. L. Carr, a few miles west of Morrisburg, on Monday afternoon, and were very pleasantly entertained. Mrs. W. Colburn, Mrs. W. Lannin, Mrs. R. Preston, Mrs. W. Leonard, Mrs R. Elliott, Mrs. D. H. Weir, Mrs. H. Melvin, Miss M. King, Mrs. Albert Johnston, Mrs. Fay Scott, Mrs. H. Flora, and Mrs J. L. Dixon. During the afternoon Mrs. Colburn, who is moving to Almonte, was presented with an address and a beautiful silver platter.

Birth

At Winchester on May 20th, 1928, to Mr. and Mrs. Clarence Deeks a son.

Soft Ball Meeting

A meeting to organize a Soft Ball Leauge for the coming season will be held in J. L. Dixon's Hall, TO-NIGHT, Wednesday May 23rd, at 7.30 p. m. Everybody interested is invited to attend.

A Downpour

There was a regular cloud burst over this section on Tuesday and more water fell in half an hour than usually falls in a couple of days. Fields were flooded and the sides of roads were full of water. A little hail accompanied the storm but no damage done.

$30,000 To New School

At a meeting of the Municipal Council on Monday night the requisition of the School Board for $30,000 to build the new school was dealt with, and a by-law authorizing the issuing of twenty year debentures for that amount was giving its three readings, passed and signed.

Power Off Again

During the elec ric storm on Tuesday the fuse box at the top of the pole at Keyes corner burned out, and for a time attracted much attention. The big transformer at the power station was also injured, and as a consequence there was no lights and no power on Tuesday night or Wednesday morning.

Morewood I. O. O. F. Anniversary Service will be held in the Presbyterian Stone Church on Sunday, May 27th, at 2.30 p. m. All Brethren are invited to attend.

W. H. S. Cadet Inspection

The Cadet Corps of the Winchester High School will be inspected by Capt. V. W. S. Heron on Friday June 1 at 11 a. m. The officers this year are Capt. Wm. Agnew. Lieuts. Melvin Scott, Alex MacDonald and Dug. McLean; with Jack Boyes on the drum. A larger number than usual promise to be present. All the citizens are invited to attend. Games will take place afterwards. Everybody come.

Auto Driver Sentenced to Ontario Reformatory

For being intoxicated while in charge of an automobile, running on the wrong side of the road and knocking down and injuring a seventeen year old lad named Clifford Waldroff, Edward Sauve, of Moosecreek, was on Monday sentenced to one year definite and 364 days indefinite in the Ontario reformatory by Police Magistrate Milligan in the Cornwall police court. Sauve pleaded guilty to the charge which was laid by the provincial police, the affair taking place on the provincial highway west of Cornwall.

Her Own Detective

A Girl Suspect Clears Herself

By ELINOR MARSH

We were a "bunch" of a dozen boys and girls, averaging in age perhaps seventeen years. We were young enough to get up parties on the principle of "Dutch treat" and not old enough for a boy to feel that if he asked one of the girls to go to an amusement he must hire a carriage for the purpose of taking her. We had informal dances in each other's houses and each boy was detailed, as they say in the army, to escort a particular girl to the dance. In this way all the girls were transported without doubling up.

All went well, and we were having a merry time when Roy Stivers, one of the boys who had gone sweet on a girl outside the set, insisted on introducing her among us. We girls were not pleased at the introduction of one we knew nothing about, but we yielded gracefully, and I consented to Roy bringing her to a dance that was to come off at my house.

It is marvelous how a nice, well bred boy will go daft on a girl entirely out of his sphere and in every way beneath him. The moment we girls saw Roy's friend, Sarah Stearns, we knew that a firebrand had been introduced among us. But it is easier to let a person into a social clique than to get him or her out. Roy was one of our nicest fellows, and we did not wish to offend him. Sarah Stearns was not invited again to any of our little dances, but Roy asked her to go with him on excursions, theater parties and the like. He was the only son of a widow who gave him all the money he wished and, among other luxuries, a splendid motorcar. He was accustomed to take us all out in it between dances when we were holding our informal parties, and also took us on longer rides. Of course we could not object to his inviting Sarah to go on excursions in his car, and while so engaged we endeavored to treat her civilly.

Just before the spring opened Roy invited us all to go to his mother's country place for a week end. Of course Sarah Stearns would be of the party, Roy being at liberty to invite whom he pleased to his own home. Two-thirds of our "bunch" accepted, and Roy took us to our destination in his car. The others would not go on account of Sarah Stearns being of the party.

I wished very much to enjoy the fun, but Eleanor Trevor was my particular girl chum, and she was one who intended to stay away. I persuaded her to go, however, since my pleasure depended on her doing so.

Roy's mother acted as chaperon and did all in her power to make our stay in her house enjoyable. One evening we were dancing when all of a sudden the electric lights ceased to glow, and we were left in total darkness. My friend Eleanor was dancing with Charlie Hunt at the time. Charlie, like Roy, was given everything he wanted, and among other things he possessed was a valuable gold watch. Soon after the lights were extinguished there was a tug at his watch chain and, feeling for it, he found it broken. His watch was gone. He was dancing with Eleanor when the darkness came, and of course they ceased to whirl and disengaged themselves. Five minutes later, when the lights continued to glow, they were still standing near each other.

Charlie, not wishing to mar our festivities, said nothing at the time about the loss of the watch, but the matter soon leaked out. An unpleasant feature of the matter was that he was dancing with Eleanor when the lights went out, and the logical inference was that she had relieved him of it. Nevertheless, none of us believed anything of the kind.

Our host was very much troubled. It was evident that there was a thief among us. So far as circumstantial evidence was concerned it pointed to Eleanor Trevor. She knew nothing about Charlie's loss or the position in which she stood until I told her. She was not a person to cringe under such circumstances. With woman's intuition she at once spotted Sarah Stearns as being at the bottom of the trouble. She did not believe that Sarah had stolen the watch for the watch itself, but that she might inculpate Eleanor. Eleanor's theory was that Sarah had seen her dancing with Charlie when the lights had gone out and an opportunity had appeared to her of punishing the girl who she knew was in favor of ostracizing her from our set.

But Eleanor told no one except me of her suspicion, and I confess it seemed to me rather farfetched, though I did not say this to Eleanor.

"I've got a detective problem on my hands," said Eleanor to me, "and I'm especially interested in working it out. I wish you would give me the cold shoulder and ask the other girls to do the same."

"Why so?" I asked. "There's not one of us that believes for a moment that you are a thief."

"It will put Sarah Stearns off her guard and give me a better chance. If she took the watch—and I am sure she did—she must get rid of it. I'll take all possible pains to see that she doesn't send it away. I shall keep an eye on her all the while and note everything she does."

"I will aid you in that," I said.

The incident occurred on Saturday evening. All day Sunday either Eleanor or I kept watch on Sarah. Sunday afternoon she started with a letter in her hand for the postoffice. I told her that I had written a letter that I wished mailed. She offered to mail it for me. I went to my room for it, and when I came down had my hat and coat on and told her that I would go with her. To that she assented with at least apparent willingness. Whether or no she was going to get rid of the watch, she had no chance to do so, for I did not let her out of my sight for a moment.

Eleanor interfered with her going out later in the evening to take the air on the porch. We all went to bed early, or at least to our rooms. We girls were roomed on the second floor, and each was given a room to herself. Eleanor was in my room till 11 o'clock. She said she expected to be up all night to see that Sarah Stearns did not get rid of the watch, and her watch would not commence till all in the house were supposed to be asleep.

"What are you going to do?" I asked.

"I'm going to stay in the hall."

"Go to bed," I urged. "None of us believes that you are a thief. Besides, you are acting on a theory. You will lose your sleep for nothing."

"I have more chance of success than you think," she said. "Charlie has been very nice to me and has told me certain things about the watch that it is well for me to know."

"Then he knows you are hunting for it?"

"No, what he told me was said casually. But he does not believe I robbed him. At least he says he doesn't."

"But I don't see how any mark on the watch can do you any good except to identify it when you have got it, and you will have to get it before you can identify it."

Eleanor made no reply to this. She simply kissed me good night and went to her room. I was a long while getting to sleep, but when I did I slept till 4 o'clock in the morning, when I was awakened by her. She told me that she had been awake all night and asked me to get up and continue the watch that she might get some sleep. I did as she asked, but it was evident that she had failed, and I believed she was on a wild goose chase.

She was up for an 8 o'clock breakfast and looked quite fresh, considering that she had gone to bed so late. During the day I helped her occasionally in her vigil and again prevented Sarah Stearns from going out alone. This time I could see that she suspected me, though she concealed the fact quite well.

"The party is to break up tomorrow," said Eleanor to me. "We were only invited till Tuesday morning. Either I must get that watch tonight or remain smirched for the rest of my life."

I assured her that she was not nor ever would be smirched by any one of us, to which she replied that Sarah Stearns would spread the matter abroad in a way that could not be countered.

Roy took us to drive during the afternoon. Eleanor feigned a headache and remained at home. She charged me to keep my eyes upon Sarah Stearns every moment. I suggested to Eleanor that she was remaining at home that she might search for the missing watch, but she said that would be useless, for if Sarah had left it she had undoubtedly hidden it in a safe place, but she believed Sarah had it with her, and Eleanor relied on me to see that she did not get rid of it during the ride. I did my work, but without results.

That night, when Eleanor and I went to our rooms, as we passed Sarah Stearns' room I saw Eleanor look up at the transom. Then she went with me into my room and took from my closet a bamboo stick with a hook on one end and carried it away to her room. Just before 3 in the morning she came into my room and, holding her watch to my ear, asked me if I could hear it tick. I told her that I could hear it very distinctly. She removed it farther and farther from me, with each removal asking me if I could still hear it tick. When she had taken it some four or five yards from me I could still hear it.

"That will do," she said. "Your ear is far more keen than mine. It is now a few minutes before 3. Come with me."

She led me by the hand through the darkness to Sarah Stearns' door. Then she took the bamboo stick with the hook on the end and, feeling carefully for the transom by means of the hook, pulled it partly open, accomplishing the work without the slightest sound. This done, she put her arms around my knees and lifted me so that my ear was near the transom. She had held me there perhaps three minutes when I heard what sounded like a far distant chime faintly strike the hour of 3.

"Put me down," I whispered to Eleanor.

"Have you heard anything?" asked Eleanor.

"Yes; a chime."

She lowered me to the floor and, throwing her arms around my neck, gave me a bear hug.

"Now go and awaken some of the girls and bring them here," she said.

I did her bidding and collected every girl in the hall. Then Eleanor turned on the electric light and knocked gently on Sarah's door.

The door was unlocked, and we all went into the room. Eleanor went to the bed and from under a pillow took out the lost watch.

There was a chime strike in it, and Eleanor, knowing this, had based her operations on hearing it. But since the watch was under a pillow no one except with the keenest sense of hearing would have detected it.

The matter was hushed up on Roy's account, but we were no longer troubled with Miss Stearns.

HENRY'S SHORTHAND SCHOOL
Ottawa, Ontario

No school in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa Schools to come to it.

Therefore, it is not surprising that business men, in advertising for stenographers should specially say, "Graduates of Henry's School preferred."

For particulars about our course, write
D. E. HENRY, Director.
62 Bank Street.

You Can't Afford It!

You can't afford to buy anything but the best in flour and feed—it is the cheapest in the long run.

And it is only the best that we handle.

Lowe Brothers

HIGH STANDARD
OUTSIDE PAINT

Lowe Brothers Liquid Paint costs approximately ½c per square foot. This is another way of saying that "job cost," which should always be the measure of your painting cost, "High Standard" is the most economcal paint you can buy.

The reason is to be found in its exceptionally high quality, the fineness to which it is ground and the purity of materials used.

It gives a very high gloss. Wears evenly for years and comes ready for use in thirty handsome shades, and is very easy to apply. Try it when next you paint.

Price-½c. Sq. Ft.

Neptunite Varnish-Stain

Make scarred or faded furniture like new with this splendid Varnish Stain. It is exceptionally easy to apply and dries to a beautiful mirror-like gloss that is free from stickiness. It retains its beauty for a surprisingly long time and does not fade. Splendid for floors, furniture and woodwork.

For graining — beautiful effects, representative of the grain of handsome hardwoods can be obtained with Neptunite Graining Compound finished with Varnish stain. Comes in six attractive shades.

Neptunite Varnish

Lowe Brothers Neptunite Varnishes are ideal for either Exterior or Interior use.

They have the distinction of being the only varnishes made that have successfully withstood the heat from a Hot Iron on their surface. They will not turn white, crack under the hammer test, or show heel marks. Ice, snow or rain have no effect on them. They produce a remarkably beautiful finish; they wear longer and cost less than most good Varnishes.

Porch Floor Paint

Is Specially made to withstand the extreme hard usage to which a verandah floor is subjected. The scraping of feet and verandah furniture will not affect this finish when properly applied. It will stand up under the rigours of the weather and preserve your verandah floor for years.

Like all Lowe Brothers Products, Porch Floor Paint is very economical. It is easily applied and a pint of this paint will go almost as far as a quart of most any other so-called "cheap" exterior floor paint.

Porch Floor Paint is made in a splendid range of colors, one of which is sure to please

Mellotone Wall Paint

Walls that are finished with Mellotone need never be marred with finger prints or dust spots. Mellotone is washable, it may be washed with soap and water just as often as necessary without injury to its delicately beautiful finish. Mellotone combines all the durable qualities of an outside paint with the soft, attractive rest tones that are so much desired by particular people.

Mellotone is so easy to apply and lasts so long that its first cost is practically negligible. Comes in 16 beautiful shades.

Hard Drying Floor Paint

This is the floor paint that does away with the back breaking drudgery of scrubbing. Simply mop this high gloss finish and you have a floor to be proud of.

Hard Drying Floor Paint is a floor enamel of exceptional toughness. It dries over night with a glossy and elastic surface that will stand any amount of wear and will not chip off or crack.

Made in a variety of popular colors, ready for use.

British Boys Study Agriculture

The above shows a splendid group of British Public and Secondary school students who have just arrived at the Macdonald Agricultural College. Recruited by the Department of Colonization and Development of the Canadian Pacific Railway, these young men will pursue a two years' course at the College. During the summer months they will work on farms where places have been selected for them. On completion of their studies they will engage in various branches of Canadian agricultural operations, by which time they will be accustomed to Canadian methods.

The scheme under which these students were brought to Canada has now entered upon its fourth year of operation and the College authorities are thoroughly satisfied with the soundness of the plan. At the extreme left of the picture is Dr. H. Barton, Dean of the Faculty of Agriculture, Macdonald College, and at the extreme rightis Mr. L. H. Hamilton, Instructor in Agriculture, who is especially charged with the supervision of the students under this particular scheme.

Don't Make a Toy Out of Baby

-Babies Have Nerves-

By RUTH BRITTAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

Outboard Motors Now Used on Large Boats

Many people still think of the outboard motor as a dinky little tin-can affair that one fastens onto the rear end of an old rowboat and which stalls a few hundred feet out from dock to be puttered with indefinitely. If you are one of these you are due for an awakening, for now large boats are constructed with the use of out board motors in view from the beginning. They are now made with as many as four cylinders, and a twenty-five horsepower motor is fairly common. In the larger boats they are suspended in a well built into the boat. The advantages are that they avoid the troubles of shaft packing and that they can be lifted out of the boat, propeller and all, as one unit, for repairs. They will travel in shallow water, as the motor is made to lift automatically when an obstruction is hit and they will develop speeds up to thirty-five miles an hour. It is expected that 75,000 outboard motors will be built in the United States this year.

Their use is rapidly growing in Canada. Sale records show over 1,000 here sold during 1927.

"D'you hear Payne advertised for a wife?" "No! what happened?" "Got ten replies from men saying he could have theirs."

Officer on the bridge (much put out)—"Is there a blithering idiot at the end of this tube?" Voice from the engine-room—"Not at this end, sir."

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum. 13EW

OWL LAFFS

BY O.W.L. (ON WITH LAUGHTER)

EXPERT IN SOME BRANCHES

At mathematics women are
Not thought to be such birds,
And yet a woman is a star
At multiplying words.

The married men's quartet will now sing that popular selection, "My Wife Is An Open Book to Me, But I Cannot Shut Her Up."

"I want a rake—a metal one. That wooden one you sold me last year was no good. It had pyorrhoea!"

"Had pyorrhoea!"

"Yep! All the teeth fell out!"

Times change; and a short skirt when skirts were long is a long skirt when skirts are short.

After the elaborate ceremony the well-wishers were throwing the cutomary rice at the young people. One excited guest button-holed the bride's father and demanded, "Have you any old shoes?"

"Yes," replied the bill-footer patiently, "but sh-h! I'm wearing them."

LAYS AND RELAYS

I long for fame and fortune, too;
I long for duds and diamond rings;
I long for funny things to do—
Oh, gosh, I long for lots of things.

I do not long for gems or gold;
For fickle fame I worry not,
But when it's hot I long for cold,
And when it's cold I long for hot.

I do not long for gold or fame,
All weather I can stand with ease,
But I've a longing just the same
To reprint silly rhymes like these.

If one can curb his longing he
May reap reward two-fold or more;
Our longing's well in hand, you see,
We add this quatrain and count four.

A Scotchman has taken his children out of school because their teacher told him they paid attention.

Hubby, tackling his first meat pie: "Well, well, where did you get this?"

Young Wife: "I made that out of Mrs. Thomas's cook book. It's a—"

"Ah!" he broke in. "This leathery part is the binding, I suppose?"

A mistress of a boarding house hired a young Irish girl who had just arrived in this country. She was somewhat dubious of the girl's ability to wait on the table. So she said, "Norah, do you think you can wait on the table; I have ten boarder, you know?"

Norah: "Sure, and that's all right, ma'am. Why in Ireland I used to feed forty pigs every day."

Money is your servant if you know how to use it; your master if you don't.

Do you remember way back when torchlight parades were features of every political campaign?

There are 112 miles of thread in a pair of ladies' silk hose—and very few blocks of walking.

Every young man is where he is because that is his place.

Mines Contribute Over Four Billion

The aggregate value of Canada's mineral output during the forty years from 1886, when comprehensive statistics on the subject were first compiled, to 1926 reached the impressive figure of $4,013,518,027.

How To Insulate House Against Heat and Cold

"There are three general ways by which heat is lost or dissipated in our homes," writes W. A. Foster in the practical magazine "Successful Farming." "First," he explains, "the principle by which we secure heat from the sun—radiation. Secondly, the transfer of heat by air movements such as leakage about doors and windows. And third, by the heat transfer through our constructions, such as glass in our sash, the walls, floors or ceilings. The three principles are not wholly independent but are accumulative, consequently, the total heat loss is the sum of all three.

"In the average home there is considerable heat loss by radiation. Heat radiates from the walls after it passes through the materials used in the wall construction. One of our most familiar examples is the heat radiated from the chimney stack. The chimney closet is always warm due to the heat losses from the chimney itself. In the second principle — convection — heat losses from leakage are usually large in the average construction. While one needs ventilation or fresh air for health and comfort, the heat losses from leakage about loose-fitted sash and doors are usually in excess of the ventilation requirements in the average home.

"In frame construction," the "Successful Farming" article continues, "the dry joint between foundation and sill allows cold air to sift through into the basement, which makes the floor unreasonably cold. Extreme care should be taken to set the sill in a mortar bed and further care must be exercised to have a snug-fitting sheathing and siding, otherwise cold air will pass up through the space between the studding and find its way over ceiling and under flooring. While these methods of conserving heat are important they are often overlooked."

A REAL NERVE TONIC

The Source of All Nervousness is Weak, Watery Blood.

Many people, both men and women, find themselves run down through overwork, or anxieties. Such sufferers find themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from starved nerves.

Doctoring the nerves with poisonous sedatives is a terrible mistake. The only real nerve tonic is a good supply of rich red blood. Therefore to relieve nervousness and run-down health Dr. Williams' Pink Pills should be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and spirits and makes hitherto despondent people bright and cheerful. Miss Irene Denne, R.R. No. 1, Washago, Ont., tells what Dr. Williams' Pink Pills did for her as follows:—"I suffered for a long time with my nerves and a generally run-down condition. I grew so weak that I had to lie in bed a part of every day. I could not do any work and was taking medicine all the time, trying one medicine after another. I was advised to try Dr. Williams' Pink Pills, and I have reason to be thankful that I acted on this advice, as this was the first medicine that gave me any relief, and in a comparatively short time restored me to the blessing of good health. When I think of the marvellous good these pills did me, I can most highly recommend them to all weak, nervous people."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cent a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Sales made in 1927 by the Manitoba Co-operative Poultry Marketing Association amounted to $757,925.

Chic New Brims

The tiny, severe skullcap which was so universally popular for a long while has undergone modifications, so that, although it has not entirely disappeared, being worn still by very young girls, it has altered enough to follow fashion's trend for greater femininity. Undoubtedly the skullcap was artistic in that it followed the line of the head and allowed only simplicity in trimming, but, on the whole, the lines were too uncompromising and severe to become the matron. The adjective most aptly applied to it was "smart," which was synonymous with simple, but simplicity is giving way to intricacy, and to-day women would far rather step up to the boundary line of beauty—and over it. Soft materials and lines in frocks and hats bring out the charm and grace of face and figure, and it has become the fashion to look as beautiful as one can.

The innovation of the brim comes from Agnes of Paris, who is sponsoring it more than the other designers. She uses a headband of ivory satin on a hat in black jersey-straw, adds a wide brim to the ballibuntl cloche of the young girl and trims it simply with a black grosgrain band. On other models she catches the strip of ballibuntl that crosses the front of a shiny black satin toque, featuring, with an elaborate ornament, the long side effect that droops close to the face.

Felt hats are changed by using two-tone felt in becoming colors and having a swirl come to a point in the front of the hat and extend down over the ear. Or again, it is crossed high on one side and low on the other. This crown effect is worked out better with one stiff material, such as satin used with soft felt. Silk may felt; ballibuntl with felt and satin. be used with satin; jersey-straw with

Reboux features the hat with brim, but makes it like the little turn-up one on a child's hat. The hats, as a rule ,are still the skullcap type, developed in a combination of the new popular ballibuntl, made up in a modernistic design with some other material, and having a sharp, turn-up brim.

It has become the vogue to wear the semi-precious stones for color accent on the patsel frock. Yellow topaz, turquoise, amethyst, all the stones that are genuine but not of the first water, are used as bracelets, long necklaces and chokers. The deep brown carnelian, the sea-blue lapis lazuli, the cloud-pink rose quartz all gleam in relief against dark frocks.

On hats, also, the jeweled ornaments still continue to be used, and further elaboration is seen in the hats composed of tiny flowers or feathers, or even those with wisps of costly veils. Fashion has tipped its favor from the tiny, mannish hat to the excessively feminine one, but for the majority of women the moderate hat, neither too severe nor too elaborate, will be the safest tribute to fashion, as well as the most becoming style.

Hint About Sleeves

With soft, flimsy materials it sometimes is necessary to run a gathering string along the top of a sleeve in order to keep it from spreading and to get it smoothly into the armhole. Use the sewing machine and with a loose stitch sew along the top about where the seam afterward will come. Draw up the thread, and the material will go into the armhole much more smoothly than if gathered by hand. This way also takes less time.

Another things that seems to improve the longer you keep it is your temper.

A.: "I see the doctor's attending him again. What's he got?" B.: "Money."

Jones: "How much do you charge for toboggan rides?" Proprietor "We have a sliding scale."

Minard's Liniment for Toothache.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative, but do not gripe. They are soothing, but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in the home, and once a mother has used them for her little ones she will use nothing else. Thousands of mothers bear testimony as to this. Among them is Mrs. Hurst, Pine Falls, Man., who says:—"I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

How Titian Painted His First Picture

Titian the famous Venetian artist, painted his first picture with flower juices squeezed from Italian wild flowers on the wall of his father's cottage in a tiny village in northern Italy, Mary Newlin Roberts tells us in "Child Life Magazine."

"One hot day in spring on his way from school," writes Mrs. Roberts, "little Titian Vecelli clambered up the rocky slope of the hill where he lived and gathered bunches of wild flowers. When he reached the walls of his home he put the flowers down carefully in the shade and then he noticed his hands and sat up and stared. His brown fingers and palms were stained with every kind of color—purple and yellow and green and red and blue.

"Now it would be interesting to any boy to see that the stems of some Italian wild flowers and blossoming weeds hold juices that stain when they are squeezed hard by strong fingers on a hot day, but to little Titian Vecelli it meant far more, for the sight of the colors sent him dreaming at once. The tints on his hands reminded him of the fresco in the chapel and he rose slowly to his feet and glanced about with eager, wistful eyes. Nobody was at home and it was very quiet on the hilltop, and the bit of cottage wall nearby seemed waiting for something.

"Then Titian Vecelli set to work, all by himself in the shadow of the cottage wall, squeezing and staining any way that he could with his fingers and a little stick, painting his first picture so many years ago. Very slowly on the dull bare wall, a picture came to life. Figures seemed to spring out by magic under the small deft fingers of the boy. He was so very busy that he did not see his father come up behind him and stand with hands upraised in amazement, nor did he see his teacher, Signor Rostelli, climbing up the hill. He stood as quietly as Signor Vecelli and watched in silent amazement the picture on the wall growing bit by bit.

"At last when the sun had set, little Titian found that he could squeeze no more stains from the juicy, aromatic stems, and so with a sigh he backed away to look with rapture at the transformed wall. 'Had I the true colors of a painter, 'twould have more depth,' he breathed. 'But even so I am happy.' And backing farther still he collided with his father and Signor Rostelli who had drawn nearer and nearer."

NEW CAR

"Hello, Old top. New Car?"
"No! Old car, new top."

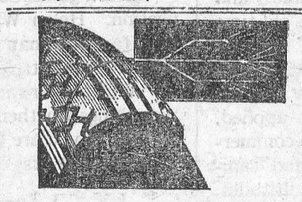
A reliable antiseptic—Minard's.

Women show more taste in their clothes now than they used to—and that isn't all.

"What will the modern girl be twenty years from now?" "Oh, about three years older."



Cut away section of a Gum-Dipped Tire showing one cord untwisted into 15 strands. Every fibre of every strand is insulated with rubber.

Why Gum-Dipping Increases Tire Life

A tire in use is being constantly bent backwards and forwards by road action. Such movement generates friction and heat that has a deteriorating effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because Gum-Dipping puts a coating of new live rubber around each separate cord that keeps it from rubbing against the cords that lie next to it. It stays cooler and therefore lasts longer.

MINARD'S "KING OF PAIN" LINIMENT

A Lovely Skin of Soft, Smooth Texture

Soft, glowing color and velvet smoothness are the skin's reflections of "Blood health" within.

TRU-BLOOD, the pleasant-to-take blood tonic, by acting directly on the blood and driving out impurities, corrects the underlying causes of skin affections and gives natural color and beauty to the complexion.

When taking TRU-BLOOD use Buckley's OINTMENT as an external treatment. This magic Ointment does wonders in correcting skin blemishes, in softening and beautifying the skin.

Read what these users say. One writes: "Tru-Blood is working marvels with me." Another says: "I recommend Tru-Blood to my neighbors and they find it better than any preparation they have ever used." Still another writes: "I cannot praise it enough. As long as I live I will never be without Tru-Blood."

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Byemoor, Alberta.—"The Change of Life was the trouble with me and I was run-down, thin, and weak and could not sleep, had a poor appetite and could not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a well woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends." MRS. WM. GOODKEY, Byemoor, Alberta.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tastless dose in water. It is pleasant, efficient and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

VICTORIA DAY

Thursday, May 24th, is observed in Canada as Victoria Day, to commemorate the memory of the most loved sovereign in British history. Queen Victoria was born May 24, 1819, or over one hundred and eight years ago. When the baby princess first saw daylight, Europe was all but prostrared by the shock of the Napoleonic wars. The times were hard. Bread was scarce and dear. The masses were ignorant and oppressed. Slavery was in full swing. The social manners of folk high and low savored of the taproom. The means of travel were slow and cumbersome as they were risky, and of facilities for speedy converse of nations there were none. At that time the galling burden of war debt, the pressure of severe taxation, and the discontent everywhere preached by demagogue agitators, spurred Contintal writers to predict the downfall of Great Britain, likening her parlour plight to that of ancient Carthage on the verge of ruin. And so the turmoil made itself felt, and reached a critical stage at the date of the Queen's accession.

For a century and a half prior to the date of her accession, no British monarch could honestly aver he had the affection of the populace. Queen Victoria gave loyalty in England a new lease of life.

One notable feature of the Victorian period was the ascent of the masses to political power and freedom. The pillory was abolished, penal laws were reformed, the right of public assembly was attained: and as pocket boroughs became obsolete the suffrages of the common people were extended. The ballot superseded the big stick just as gaslight superseded snuffy candles, and constitutional government replaced the old-time hustings, ?ust as the telegraph needle replaced the old-tashioned postboy and the town crier's bell. Another conspicuous feature was the triumph of scientific inventions, humanely applied, so that whilst coal and iron aroused the commercial energies of a nation, surgical arts and sanitary cultures became the salvation of multitudes. A third feature consists of the literary renaissance including such names as Bulwer Lytton, Dickens, Thackeray, Tennyson, Browning, George Elliott and John Ruskin.

A STANDARD TIME

It is about time some competent authority stepped in and insisted on a "Standard" time. The rural sections have no use for the "daylight" saving fad, because there is really no sense to it, and where adopted has caused confusion and annoyance, If the business and professional men of the cities want an extra hour in the evening let them close their places at five o'clock Standard time and open an hour earlier in the morning. On a motoring trip to Toronto one has to guess how and where to get a meal, because one town may have Standard and the next daylight saving time, and thereby you may miss a good meal. If we must have a change in time for the summer months let it be general and compulsory. As at present it is a very great nuisance.

THE SPENDING CRAZE

The farmer who finds he cannot afford to repaint his home, re-shingle his barn, or make other necessary improvement about his place, the ordinary citizen who finds he cannot afford to make the improvements he would like about his own little home, will not view with complacency the lavish expenditure of public funds for the beautification of the City of Ottawa, the homes of the Governors, and the increase in Judge's salaries amounting to many millions of dollars. There is reason in all things, but there is no reason why the big majority of taxpayers should do without necessary improvements to their property in order to satify the taste and fancy of what are sometimes called the idle rich. It would appear that both Dominion and Provincial Governments have become afflicted with a spending craze that is no promising.

Forke or Caldwell, which are we to believe. Can anyone imagine a man in public life like Caldwell inventing an interview and conversation with Hon. Mr. Forke, a man with whom he was apparently on friendly terms, just for the fun of the thing. Forke's hasty and emphatic denial has, to say the least, a fishy look.

NEVER TOO LATE

(Collier's Weekly)

If you want to lead, study. School will multiply enormously your chances of success in life.

What you are able to do and to learn will depend largely on how much education you have.

Measured on the lowest basis of dollars, schooling is the most profitable investment you can make for yourself or for your children.

Recently the Federal Bureau of Education published a study which shows in the most vivid way the money worth of schooling.

Untrained people earn from $400 to $1200 a year in this country.

Those with common school training range from $600 to 1500 a year.

High school products run from $850 to $2,450 on the average.

Those who have attended college get from $1400 to $5000, while college graduates' average income is $6000 a year.

In American industry generally there is one executive to twenty five workers. The bosses are all trained men and women.

If you have a good education you will have little difficulty proving your fitness for a well paid job. Lacking an education your chances at obtaining the more interesting opportunities are few.

And all this is chiefly the money side of the picture.

The other satisfactions are certainly not less important. Happiness and usefulness have often been associated with plain living and high thinking. Without schooling plain living can't be escaped and high thinking can't be attained.

The great value of education lies in the vistas it opens.

Without schooling only geniuses can think clearly and work with their minds.

Remember in connection with these conclusions that at no time are you too old to learn.

Your mind is about as receptive at forty years as it was during adolesence.

Your body is also much more flexible than most adults realize.

The fact that your early education may have been scant is no justification for continuing ill equipped through life.

Anyone in good health can broaden his horizon by study. Read books and read with a purpose. Other things being equal, no expenditure of time will reward you so well in ability and in happiness.

Learn games too, for play is essential to education. Helen Wainwright, the famous swimmer, taught a man nearly eighty years old the difficult crawl stroke.

Widen your range of interests by studying new things whether for work or for recreation. So long as you are learning you are growing and growth is the first essential to a healthy life.

GOING TO CHURCH

This season of the year, when there are so many Sunday diversions, is a good time to quote Theodore Roosevelt's nine reasons for going to church. These are they:

1. In this actual world a churchless community, a community where men have abandoned and scoffed at or ignored their religious needs, is a community on the rapid down grade.

2. Church work and church attendance mean the cultivation of the habit of feeling some responsibility for others.

3, There are enough holidays for most of us. Sundays differ from other holidays in the fact that there are fifty-two of them every year. Therefore, on Sundays go to church.

4. Yes, I know all the excuses. I know that one can worship the Creator in a grove of trees, or by a running book, or in a man's own house, just as well as in a church. But I also know, as a matter of cold fact, the average man does not thus worship.

5, He may not hear a good sermon at church. He will hear a sermon by a good man who. with his good wife, is engaged all the week in making hard lives a little easier.

6. He will listen to and take part in reading some beautiful passages from the Bible. And if he is not familiar with the Bible he has suffered a loss.

7 He will take part in singing some good hymns.

8. He will meet and nod or speak to good, quiet neighbors. He will come away feeling a little more charitable toward all the world, even toward those excessively foolish young men who regard church going as a soft performance.

0. I advocate a man's joining in church work for the sake of showing his faith by his works.

Gananoque people residing in Ottawa have organized a 'Home' Club. There are enough Winchester people residing in Ottawa to organize two 'Home' clubs.

Would you like when you grow old to read the life story you are now making? Think it over.

Metcalfe

Miss Clare Latimer and Mrs. S. Waddell, of Ottawa, visited Miss M. Latimer last week.

C. E. L. Morrow, of McGill University, and who is one of this year's graduates in Medicine, spent a few days recently with his parents, Dr. and Mrs. C. Morrow here.

Mr. Harold Hughes, of Ottawa, spent Friday here.

Mrs. M. McCullough and Miss Cupie McCullough spent the last of the week with friends in Ottawa.

Mr. James Cameron has purchased a beautiful 55 six cylinder Durant sedan from the Durant agent, Mr. S. S. Latimer here.

Miss L. Ralph spent the last of the week in Ottawa.

The farmers in this vicinity are very busy just now trying to get in their crops.

Mr. R. Blair spent the first few days of last week with relatives in Toronto.

Mrs. Herrington, of Russell, has rented part of Mrs. McInnis's home and moved here last week.

Mrs. Everett Morris and infant daughter has been in Ottawa the past three weeks undergoing special medical treatment.

Mr. and Mrs. J. Tierney, of Ottawa, visited with their daughter Mrs. James Quinn here.

Work on dredging the creek running through our village began last week.

The United Church
(Contributed)

The message given by Rev. J. A. Waddell on Sunday morning from Acts 1, verses 10 and 11, was appropriate for Ascension Day. No more poetic or beautiful scene, he said, had been presented to us than this story of the ascension. After briefly sketching the events leading up to this, he asked, "Why should these men in white speak thus to the disciples?' His answer was that they considered that these men were wasting valuable time instead of girding themselves for the tasks Jesus had given them, and going about their Father's business. Only in part has there been a response to this call. We have failed to get down to the business to which our Master has called us. "The gospel to every creature" is the slogan that Jesus has given us and it is incumbent on every man, woman, and child to have a share in this. Marvellous have been the results from the few who have responded. The Church today has to face the spirit of indifference. The pastor urged upon his hearers to measure up and respond in loving loyal obedience. The rendering of "Still, Still with Thee" by the choir with solo parts by Miss Jean Beach was very beautiful. Mr. Roy McVittie of Kingston sang very acceptably, "My God and Father, while I stray.'

The evening congregation was favored with a solo, "It was for me" by Mr. Earl Walker of Ottawa The pastor took the parable of the rich man as told in the 12th of Luke for his evening discourse with special reference to the latter part of verse 15. He said, In this parable we have material for a helpful study of human character. Let us look at it from the standpoint of the world. In this man we find much that is praiseworthy. He was industrious, thrifty, and used excellent judgment. He was a good citizen and respected by his neighbors. But Jesus looked at him from the light of eternity. This man failed to realize the great need of his own soul. He failed to recognize the source of his prosperity. What are the things we are setting our hearts upon? What shall it profit a man if he gain the whole world and lose his own soul?

Hugh McDiarmid

Hugh McDiarmid, an old and respected citizen of Avonmore, passed away at his home last week. He was 86 years of age, and had the unique distinction of being connected with the Roxborough Agricultural Society from its inception, over sixty years ago, acting in the capacity of secretary, and being active right up to the exhibition last fall. In this respect he was the oldest in point of continuous service of any agricultural society secretarp in the whole of Canada. Mr. McDiarmid was born in Scotland, but came to Canada when a child, and had resided in Avonmore ever since his wife died six weeks ago. Surviving are five sons and one daughter, Duncan H., Archie, Howard and Hugh A. and Mrs. Donald Grant, of Avonmore, and Alex, in Saskatchewan.

Tramps Are Plentiful

With the coming of spring and crows and new cars, have come also the annual appearance of tramps on the highways and in the towns and villages. One meets them now in twos and threes every mile or so along the roads, and they seek to hold up every motorist for a ride. Few drivers are reckless enough to pick up two or more of these gents at once. For the most part they are young men who look as if the hard work they seek to avoid would not do them any harm. Numerous of these weary Willies seek shelter at the local police station over night, and at times the accommodation is taxed to capacity Last Thursday night sixteen were given shelter there. Farmers' wives complain that the tramps are very bold and almost demand that food be given them No longer do they offer to do a little work in return for a hand-out, as in days gone by.—Gananoque Reporter.

Dundas Presbyterial Sectional Meeting

The second meeting of this Section, made up of twelve auxiliaries, met in Morewood, on Friday May 18th at 2 P. M. in the United Church with a large attendance.

Mrs. Stafford the new vice-Pres. of this section presided and opened the meeting with Hymn 295. The Devotional period was taken by ehe Winchester Springs Aux. Psalm 96 was read by Mrs. G. Myers and Mrs. Cecil McIntosh led in prayer. At this time a cordial welcome was extended to all by Mrs. Walter Coulthart Pres. of the Morewood Aux.

The Presbyterial Greetings from Mrs. Clark Hyndman, the Pres. were helpful and encouraging. She stated the real work of the Women's Missionary Society was done by the individual member in her own Society. Roll call by Auxiliaries showed Winchester and the largest representation. Reports from Aux's Circles, Mission Bands and Baby Bands denoted progress financially and spiritually. Out of twelve Aux. seven reported having Mission Bands.

A Program Com. for next year's Sectional Meeting was appointed, the personnel being Mrs. Stafford and the Presbyterial officers. An interesting and inspiring report of the recent Branch Meeting held in Sherbrooke was given by Mrs. I. Cross. Miss Lillian Connell Cor Sec'y gave her report of the entire work of the 45 Aux's and asked that the reports sent to the Treasurer and herself correspond.

Mrs. Murdock, Mission Bank Supt. for Dundas reported 81 subscribers to the Palm Branch and $735 sent to the Treasurer. Miss J. Smith, Sec'y Young Peoples work reported 13 Mission Circles and one C. G. I. T. Group. Mrs. Elliott of Prescott, Tresurer, reported $7000 sent to the Branch Treasurer.

A very pleasing Chorus by the Morewood Misson Band, entitled "Keep Sweet" was much enjoyed. Mrs. (Rev.) Harris, Pres. of the Glengarry Presbyterial then addressed the meeting and made vivid the needs of India, China and Africa by contrasting the life of their women and girls with that enjoyed in our own land. Much remains to be done in foreign lands, as well as in certain areas at home. A questionaire by Mrs. Hyndman solved difficulties for the inquiring ones and was of benefit to all. "Quiet Moments" was impressively conducted by Mrs. Hilliard. This clased the afternoon session after which the ladies of the Church served appetizing refreshment in the Church Dining Hall.

Rev. Mr. Stafford, Pastor of Morewood Church acted as Chairman for the evening session and opened the meeting with a short song service. The Devotional service was taken by the Elma Auxiliary. The scripture reading 1st Kings Chap. 19 with explanation, was given by Mrs. (Rev.) Hurst, and Mrs. Armstrong and Miss Beckstead each led in prayer. After a selection from the Morewood Choir Mrs. T. Houlehan of Chesterville Aux. gave a very practical paper on "Systimatic Giving or Tithing." This manner of giving would solve the financial problems of the church and prove a blessing to the individual member.

Hymn 295 was then sung and Miss King of Montreal in Immigration work for the W. M. S. was introduced by the Chairman. The address was listened to with deep interest as she told of deeds of kindness, friendship. sympathy and help given to the immigrants on their arrival at the ocean ports and railway centres. This offsets the official attitude to our new settlers which is necessarily somewhat repellant, and earns for the workers in Montreal, Quebec, Halifax and St. John the title of Serving Missionaries.

The report of the Courtesy Com. was read at this time by the Convenor, Mrs. J. W. Ault and adopted. A solo by Mrs. Percy Durant of Winchester Aux. was much enjoyed.

A Pageant "Voices of the Women" by the Morewood Mission Circle was well done and presented the claims of suffering sisters of other lands for help and a knowledge of Jesus to lighten the darkness in which they dwell.

Hymn 318 was then sung and the meeting was closed by all repeatiug the Mizpah benediction.

Bissell's Universal Carpet Sweepers

Wicker Waste Paper Baskets

THE M. F. BEACH CO., LIMITED, - Phone No. 3, Winchester, Ont.

Wanted—A Wife—A Husband

Wanted—A wife who can handle a broom,
To brush down the cobwebs and sweep up the room;
To make decent bread that a fellow can eat,
Not the horrible compound you everywhere meet;
Who knows how to broil, to fry and to roast,
Make a cup of good tea or a platter of toast.
A woman who washes, cooks, irons and stitches,
And sews up the rips in a fellow's old breeches
And makes her own garments—an item that grows
Quite highly expensive, as everyone knows;
A common sense creature, and still with a mind,
To teach and to guide—exaulted, refined;
A sort of an angel and housewife combined.

Wanted—A husband who thinks of his wife
As the help and the pride and the joy of his life;
Who is thoughtful to put all his garments away,
Who hangs up his slippers, brush and comb every day;
Who will bring in the water, the coal and the wood,
Nor grumble about it, and speak harsh or rude.
Who comes home to supper as he does, often late,
Blames not the tired wife because he has to wait;
Who thinks of her numberless steps here and there,
And paying no help, grudges naught she may wear;
If a man with these qualities—blest with a mind,
That knows true from false—wants a wife he will find,
There are still a few—wife and helpment combined.

Minded Her Own Business

An old farmer was driving a mare that interfered very badly. A passing friend observing the mare's antics, cried out

"Say, Si, that mare of yours interferes pretty bad, don't she?"

Si paused, spat voluminously, and shrilled:

"Yeh, she interferes all right, but she don't interfere with nobody but herself."

Here's how you pay for neglect

AN under-inflated tire soon gets into real trouble — broken side walls, a punctured inner tube — often a blowout.

Under-inflation is one of the chief causes of premature tire failure. Tests have proven that every 10% drop from the correct inflation causes a 20% drop in mileage.

Call at a Dominion Tire Depot and have your tires examined.

You are never far away from a 225

DOMINION TIRE DEPOT

THIS SPACE DEDICATED TO THE CAUSE OF EDUCATIONAL TEMPERANCE.

It'll Get Ye!

"If you make a friend of liquor
It'll get ye!
And the more you drink, the quicker
It'll get ye!
Make no boast of being strong
Just to jolly self along;
Every topper proves you wrong—
It'll get ye!"

"There's a demon in the bottle—
It'll get ye!
It has never failed to throttle—
It'll get ye!
It will wreck your life career,
Poison those whom you hold dear—
Bring you all the hell that's here—
It'll get ye!"

No Wine For Him

When Dr. Lorenz, a noted European surgeon, was being entertained at a banquet, he was noticed to turn his wine glass upside down as soon as he sat down to table.

"Why, Doctor, no wine?" said some-one near him. "No, thank you," was his answer, "I am a surgeon. Men, women and children trust me with their lives. I must keep myself at my best, or be untrue to those who trust me."

A splendid reason why every employee should not take Strong Drink. Alcohol clouds the judgement, dulls the wit, makes the grasp fumbling, the muscles and touch sluggish and uncertain. It prevents the man doing his best. "To put alcohol in the human brain is like putting sand in the bearings of an engine," said Edison.

Liquor Control!

The following letter by a "travelled" man has been published by the Ontario Newspaper. As an evidence of the good work being done by Government Control: "I wonder if you could throw a little light on the meaning, these days, of the word control, particularly Government Control. Travelling round many months in the year one sees a little more than the home folk, and, while amusing to see how this Government control works, it really makes one sad to see the younger generation particularly getting ruined by the easy access to the wet goods and keeping this up days at a time. Now in the North, if memory serves me correctly, it used to be against the law to have liquor places within four miles of a mining camp. Was this for the safety of the miners? If so, I fail to see it is any safer at at this day to allow it, if we are to judge by some of the sights we see when the bottle is empty and the liquid is elsewhere. We find now a liquor store in almost every small town, also in the mining camp—of course controlled? To make it easier of access, they are now at the moment putting up a brewery on a Northern mine property, to make a few and damn the rest. No one can doubt that, while the worst of this excessive drinking is the effect to mind and body, it is also having a tremendous effect on business generally. Ask the merchant now if his bills are being paid. If I can read the minds of sane men who quietly give thought to the well-being of the citizens generally in this fair land of ours, there will be a great change in the vote when opportunity occurs. May it be soon, is the wish of a

"SALADA" GREEN TEA 801

THE YELLOW SEVEN: THE HUT IN THE CLEARING

BY EDMUND SNELL.
ILLUSTRATED BY R.W. SATTERFIELD

BEGIN HERE TODAY.

Chai-Hung, influential Chinese, calls at the home of John Hewitt, Commissioner of Police at Jesselton, British North Borneo, to tell of the death of Mr. Allison, victim of a gang murder. Peter Pennington is detailed by the government to run to earth The Yellow Seven, a gang of Chinese bandits. Monica Viney lives with her brother, Capt. Hewitt. Pennington suspects Chai-Hung of being the leader of the bandits. Hewitt procures a warrant for the arrest of Chai-Hung.

NOW GO ON WITH THE STORY.

"Chai-Hung called here this afternoon."

Hewitt started.

"This afternoon!" he echoed incredulously.

She nodded.

"He asked if you were in—and said he was going away for some time. Mr. Pennington was here, too. He'll tell you all about it."

The Commissioner passed a weary hand over his black hair.

"Where is Pennington now?"

"I haven't seen him since tea."

A sudden movement in the wild garden outside attracted her attention. She stepped close up to the rail and peered into the blackness. Standing half in the shadow of a stunted palm, she saw a tall, gaunt figure, wearing a loose costume of pale blue material. Monica caught her brother's sleeve and pulled him forward.

"There's a man out there, Jack," she told him softly.

The Commissioner loked.

"It's Pennington, I suppose," he growled presently. "What the devil's he want to hang about the house like that for!"

At that moment, the scarecrow raised an arm and beckoned.

"How are we for time?"

She consulted her wrist-watch.

"You've twenty minutes before dinner. Don't stop out too long."

Hewitt looked at Monica. Thirty seconds later he had passed down the steps, making his way toward the tree.

Mrs. Viney went in to dress for dinner.

The deep-toned Ducun gong, reverberating in the stillness of the night, brought her back to the verandah. Her brother was nowhere to be seen. She hurried down the passage to his room, tapped on the door, then, getting no response, looked in. The room was empty and a glance sufficed to tell her he had not been there since his return. The neatly piled clean clothes were still where the servant had put them. Her mind slightly troubled, she invaded his office. As she stepped toward the writing-table, a grim sense of impending disaster swept over her. She thrust it from her resolutely, and pressed onward. Both hands resting on the wooden surface, she gazed horror-stricken before her at a dagger with a gilt handle that stuck upright in the table, its thin steel blade impaling a heap of torn paper fragments. Dimly, as her powers of reasoning stole back to her, she realized that the tattered document was the warrant for the arrest of Chai-Hung, and that the yellow handle of the knife bore seven distinct black dots on the side that was turned toward her—four on the upper half and three below.

Suddenly she became aware that Pennington—serene, immaculate—was at her elbow.

She swung round on him fiercely.

"Mr. Pennington, what does all this mean? Where is Jack? What have you done with him?"

Pennington was frankly puzzled.

"Jack? Captain Hewitt? I haven't seen him. Isn't he back yet?"

Monica caught her breath.

"Somebody beckoned to him from the garden," she raced on wildly. "We both thought it was you. Jack went out. He han't dressed for makan, and there's that on his table. For God's sake tell me what it all means."

Pennington guided her to a chair, then bent over the dagger. A second later, he had rushed from the room toward the kitchen-quarters.

She heard the voluble tones of the cook-boy, a yell of pain, the dragging of a heavy body along the floor and the servant was flung like a sack into the office, still clinging to a flimsy box with a metal handle—the only luggage he had brought with him when he arrived.

Pennington slammed the door and leant against it.

"Get up, you swine!" he said sternly. "Get up and find your tongue or, by heaven! I'll flay you alive!"

The boy scrambled to his feet and stood sullenly in the centre of the bare room.

"You will lead me to Chai-Hung!" hissed Pennington.

At the very sound of the name the Oriental trembled visibly.

The Englishman caught him by both

The servant was flung like a sack into the office.

shoulders and shook him violently. A volume of inarticulate grunts followed. Pennington plucked the knife from the woodwork.

"Mrs. Viney," he said over his shoulder, "do you mind waiting for me in the dining-room?"

At the entrance she looked back.

"What are you going to do?" she demanded fearfully.

He shrugged his shoulders helplessly.

"Please go," he whispered. "I've got to use every method I know to enable me to get on the track of your brother—before it's too late."

Collecting herself with an effort, she crept from the room, closing the door after her.

In the grim half-hour that followed she lost all sense of time. She looked up suddenly to see Pennington before her.

"I'm just off," he said quietly.

"Then you know—?"

"He has told me as much as I wanted to know."

She regarded him doubtfully.

"It all sounds so utterly hopeless," she declared.

Pennington was leaning against the table, eating bread and cheese alternately.

"You must remember, Mrs. Viney," he told her between the mouthfulls, "that I have made it my business to study the movements of our arch-bandit. It would be impossible for me to know all his hiding-places, but I have discovered a good few of them, sufficient, I feel convinced, to assist me in sifting fact from fiction. Wong-See—the intelligent youth I collared in the act of making a hurried exit—is a poor sort of creature when brought face to face with the serious problems of this life. By dint of dire threats and much patience, I gathered he was on the point of proceeding to Chai-Hung's lair, to the place where your brother has been taken. In effect, we have arrived at a delightful compromise. Wong-See is between Scylla and Charybdis: If he fails to join Chai-Hung—the vengeance of that gentleman will fall upon him, swiftly and surely, whether he seek refuge in China or any old island in the archipelago. The remaining horn of the dilemma is—" He stuck his tongue in his cheek. "—death by the most horrible torture imaginable—at the hands of 'he who sees in the dark,' otherwise—myself! Now comes the compromise. He is to proceed to Chai-Hung's hiding place, as he had originally intended, only with Pennington in his immediate rear. In this manner, he stands a sporting chance of dodging a horrible end at the hands of either."

He reached for his hat.

Monica slipped between him and the door.

"You're not going alone?"

"Most certainly."

She stamped her foot impatiently.

"You musn't do that!" she cried. "It's positively absurd. Supposing there are others waiting for Wong-See in the jungle?"

"I've been in tight corners before, Mrs. Viney," he reminded her gently, "and I've managed to squirm out of 'em somehow. If I attempt to start out with a crowd of native soldiers, the information will be tapped out on some native telegraph-system almost before the men have left the barracks. Hewitt will be spirited away and the chances of rescue will become a thousand times more remote."

"One more couldn't possibly do any harm," protested Monica.

"I'm not taking any chances," said Pennington.

"Take me!" said the girl, flushed to the roots of her hair.

"You?"

"Why not? I shall be at my wits' end if you leave me here alone." Her voice broke. "If Chai-Hung is plotting against one of us, why shouldn't he send for me while you are away, looking for Jack?"

Pennington glanced hurriedly at his watch, and Monica realized that her argument had gone home. She seized his acket impulsively with both hands.

Pennington's one weakness lay in his utter inexperience of the opposite sex.

"Come on, then," he said, with a gruffness that was new to her. "There's an electric torch in the right-hand drawer of your brother's desk. We may want it."

Trembling with excitement, she hurried in search of it, joining him a few seconds later at the foot of the verandah steps. Almost at the exact spot where she had seen the man who had impersonated Pennington, the cook-boy awaited the order to proceed.

Soon they had left the beaten track and were threading their way through tangled undergrowth, under branches so closely interwoven as to exclude the stars, the humming of countless legions of insects in their ears, the bright light of the electric torch describing an illuminated circle on the back of Wong-See.

The night air blew suddenly chill and a slight shiver ran through Monica.

Her companion brought his head almost level with her.

"Cold?" he demanded softly.

She smiled up at him.

"Not really. Actually, I'm supremely content."

They relapsed into silence again, and Pennington, conscious of a smoldering, inconsumable fire within, glanced covertly at the trim figure of the attractive widow who kept pace with him, and was glad that he had let her come. He quickened his step, until Monica found herself compelled to run to keep up with him.

Britain Losing New Hebrides, Says Traveler

French Hold on Islands is Held to be Rapidly Supplanting Other Influences

Adelaide, S. Aust.—That the New Hebrides—a group of about 80 islands some 1,400 miles from Sydney and with a population of 60,000—are in grave danger of becoming lost to British influence, is the opinion of Capt. G. T. Walden, a missionary familiar with the islands.

Mr. Walden, recently returned from a visit to the New Hebrides, and is concerned with the problem confronting those responsible for the future control of the islands and the well-being of their inhabitants. There are on the islands, he says, only about 1,300 Europeans, and the British are outnumbered more than two to one by the French, who are now laying claim to four-fifths of the land there.

Since the time Captain Cook waved the British flag over the islands, British influence has waned by the invasion of large numbers of Frenchmen, he said. In 1906 condominium administration was decided upon, with a Spanish chief justice and French and English judges.

There are two sets of coinages and two sets of stamps, and all the evidence given in the Condominium Court has to be translated into two languages, so that everybody can understand it. When the court reaches a decision, it remains for the national of the accused to enforce.

The British experience difficulty in securing sufficient labor. The French are indenting thousands of Indo-Chinese laborers. Missionaries are being blamed by planters for preventing the natives from being recruited, but the real reason why they will not go to distant plantations is that they find with a few acres of land and a few cocoanut trees that they can make a satisfactory living at home.

The island grows the cocoanuts (for copra), bananas, cotton and all kinds of tropical fruits; but Mr. Walden was informed that there is not a British plantation in the islands which is not under offer to the French. French steamers call more often at the islands than do the British, and the French send thousands of tons of copra to Europe every year.

The Condominium Court has been wrestling with the problem of French land claims since about 1911, but only 65 have been settled out of about 3,000. "If something is not done," said Mr. Walden, "it will not be long before Britain can say 'Good-bye' to its influence there."

EXTREMELY GRACEFUL.

Lustrous golden brown crepe satin combines with wrong side of fabric in a charming dress, with the outside front plaited at waistline and tied in a sash. Wool crepe, printed and plain crepe, two tones of silk crepe, georgette crepe and lightweight woolen with silk crepe are also fashionable for design No. 813. Patterns can be had in sizes 16, 18 and 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3⅛ yards of 40-inch material with 1½ yards of 32-inch contrasting and 1⅜ yards of 27-inch lining. Price 20c the pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by return mail.

CHANGING A TIRE

Operation 1—Remove hat and hoat. place robe on ground and crawl under the car. Adjust jack and raise car. Crawl out from under. With handkerchief remove grease from neck and collar. Immediately wipe perspiration from forehead. Now remove grease from forehead.

Operation 2—Call to wife: "Is brake on?" She will release brake and the car will roll off jack. Repeat operation 1.

Operation 3—Ask wife where in thunder she hid the lug wrench. Find wrench in side pocket. Unscrew lugs. Scar toe of shoe kicking tire free. Remove tire. Bark knckles of right hand on underside of fender.

Operation 4—Approach tire rack. Find it empty, and remember that spare tire is home in the garage flat!

Operation 5—Replace tire. Ride to nearest town at speed of eight miles an hour. Purchase new tire there.

Operation 6—continue joy-ride.—Life.

Bradford Mill to Be Sent to Canada

Announcement is Attracting Attention of Trade

Bradford—The announcement that the entire plant of a Bradford worsted spinner is to be shipped to Victoria, in British Columbia, has attracted much attention not only in textile but in other commercial circles. The removal of one mill, alhough not making much difference, so far as the total capacity of the Bradford district is concerned, is felt to be important in that trained operatives will be thrown out of work.

John Moore, who is taking his plant to Canada, says that he recently visited various Canadian cities to see what the prospects were for this purpose. The City of Victoria offered him a free mill site, free water up to a certain amount and freedom from municipal taxation for seven years. Discussing his plans he said:

"We shall import our tops from England mainly, and convert them into yarn in our mills, delivering them either in the gray or in the dyed state. About 120 operatives will be employed there, chiefly women and girls. The Canadian authorities wish to provide for their womenfolk. A few girls may be sent for later from England to teach the Canadian operatives."

Mr. Moore said he had decided to export his mill rather than to manufacture in England and attempt to export the product because competition from abroad had not been met by the Government through its safeguarding of industries, or tariff facilities, while Operation 1—Remove hat and coat, business difficult. He said that he had decided to go to Victoria because its climatic conditions for the worsted industry are ideal.

It is pointed out in Bradford that by exporting his mill Mr. Moore will not only place himself within the Canadian tariff wall but, as his machinery is all second-hand, he will be able to take it into Canada at low rates.

The shipment of this mill was referred to recently in Parliament, where government spokesmen expressed, skepticism regarding its removal. There is felt, however, no doubt, that it will be exported.

Evidence Found That Brazil and South Africa Were Once United

Theory of Vast Continent of "Gondwanaland" Supported by South African Expert, Who Discovers Similar Rock Formations on Either Coast of Ocean

Cape Town. The theory framed by the geologist, Wegener, that South Africa and South America were at one time in the history of the earth portions of one vast continent called "Gondwanaland," has found further support from Dr. Alex L. du Toit, the South African geologist.

Dr. du Toit went to South America in 1923, under the aegis of the Carnegie Institution, to study the rock structure in that country in its relation to the formations in South Africa.

In a recent address to the Geological Society of South Africa, Dr. du Toit said that the amazingly similar formations, structures, fossils and histories of the two continents parted by the South Atlantic went to support that revolutionary conception of earth structure known as the "Displacement Hypothesis." For long it had been recognized that over most of the lengthy period from the Devonian to the Cretaceous epoch South America, South Africa, Madagascar, India, Australia and the Antarctics must have been united into one great continent, styled by Suess "Gondwanaland."

Accepting this rather startling idea, it would follow that in the past Brazil was situated geographically very much closer to South Africa than to-day and was a near neighbor. Dr. du Toit pointed out the remarkable parallelism between the diamond and manganese deposits of South Africa and Brazil.

He discussed the presence in Brazil of diamondiferous "pipes" different to and older than the kimberlite or "blue-ground" pipes of South Africa. The erosion of such ancient volcanic throats could well have furnished the diamonds found embedded in the Lavras quartzites of Bahia. In Africa the gem was also present in several forpipes, for example in the Witwatersrand "blanket" and in the Somabula beds of Rhodesia.

Dr. du Toit suggested that quite possibly pipes of the type now known in Brazil may be represented in South Africa, though as yet undiscovered. Significant indeed was the occurrence of diamonds on the opposed coasts of Brazil on the one side of South West Africa and Namaqualand on the other. Much speculation had been indulged in regarding the origin of the gems in the latter areas, though the problem was apparently far from solution.

Professor R. B. Young said that the "continental drift theory" was a most attractive one, but it had one very important weakness. "So far as I know," said Professor Young, "no supporter of this theory has been able to point to any natural force sufficient to bring about this wonderful drifting apart of the continents."—Christian Science Monitor.

The First Air Excursion

AIR LINERS READY TO LEAVE CROYDON FOR THE GRAND NATIONAL

This was the first air excursion ever run to a race meeting. So heavy were the bookings that five of the big Handley-Page-Napier liners of the Imperial Airways were needed to accommodate the passengers.

The Motor Car Past and Present

Fundamentals of Engine Unchanged—But Fewer Nuts and Bolts, Better Timing, Ease of Control, More Exact Fitting of Parts.

Thirty-odd years ago an automobile was an invention which, in the belief of the average citizen, could never become successful because he did not choose to accept it in place of the horse and carriage. That his judgment was wrong is evidenced by the fac fact that over 20,000,000 motor vehicles were in use on the highways of the United States during 1927, which were produced in American factories.

The first automobile was necessarily a crude affair, which strangely resembled a steam calliope while in action. It had no claim to beauty, nor was it silent and easy to operate like the 1928 models, but the fundamentals of operation which impelled it to move down the street and up the hills have remained practically unchanged through the years.

Turning to the description of the Winton 40-horsepower automobile, Model M, produced in the early years of the industry, we find that it had four forward speeds, selective type; direct drive on third forward speed; smooth-as-silk multiple disk clutch; "offset" cylinders, preventing friction—loss of power; horizontal drive shaft; mechanical throttling carburetor; "shooting" oiler, mechanically operated; all working parts easily accessible; floating type rear axle; jump spark ignition; centrifugal pump cooling, and improved Winton twin springs.

Gas and Spark Plugs

While the language is somewhat different from that used to-day the fundamentals of locomotion are the same now as in those early days. The gasoline tank was placed on the rear of the vehicle. Compressed air entering through a tube caused a displacement of a volume of gas equal to the volume of air coming into the tank. The gasoline was forced through an auviliary tank into the carburetor, controlled by an adjustable needle valve, by means of which the flow was greater or less, according to individual needs. The air in the carburetor gathered a few drops of gasoline, which immediately evaporated into the air forming a mixture of gas.

This compressed gas was forced into the cylinder and ignitel by an electric spark. Spark plugs were employed similar in construction to those now in use. To produce the spark the automobile was equipped with an electric ignition system, the component parts of which were battery, commutator, switch, spark coil, spark plug, wire and spark advance lever. Many cars of the period from 1903 to 1907 used a double battery system so that should the dry battery run out, the storage battery was ready to give the necessary power to keep the vehicle running. In the automobile of to-day the same idea is carried out in a much simplified form, but the basic idea remains unchanged.

In describing the spark plugs of 1906 the Cleveland Automobile Institute says: "The spark plug is so constructed that, when energy reaches it from the batteries, the energy jumps a gap between the platinum points of the plug in the cylinder. When this jump occurs, a flash of flame bridges the gap. And, since this flame takes place in the cylinder at the exact moment when the cylinder is charged with compressed gas, the flame ignites the gas and causes its combustion and expansion."

The only practical difference between the operation of the first automobiles and those of the present day is in the timing and ease of control from the driving seat. When the automobile of 30 years ago was driven by a one-cylinder engine, which often missed fire, due to imperfect timing, the eight-in-line engine of 1928 is so constructed that each cylinder jumps the spark without loss of power at any point. Crudeness of operation has been succeeded by an easy motion which is almost entirely automatic.

Systems of Cooling

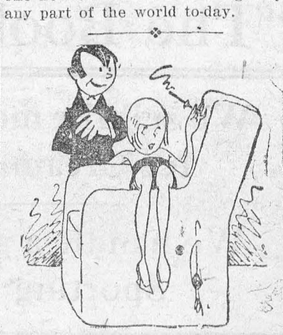
Two systems of cooling, one by air and the other by water, were used on the early models. In the air system a series of fins or pins were placed on the outer walls of the cylinder which came into contact with the rush of air occasioned by the speed of the car. Except in a few automobiles, this system has been displaced by the method of water cooling now in vogue. A notable instance of modern air cooling is the system employed by the Franklin car, which embodies the same ideas along much simpler lines.

Three water cooling systems were employed on the old-fashnioned cars, namely, thermo-syphon, gear pump, and centrifugal pump. In all of these systems water spaces were provided around the cylinders between the inner and the outer walls. The upper part of the water chambers, around the cylinders, was connected by a pipe to the radiator at the front of the car, where the water passed through tubes to the bottom of the radiator and thence flowed back to the lower part of the motor cylinder.

An illustration is given which is interesting and practical even to-day. "When water boils it leaves a deposit. The tea kettle is a familiar illustration. After a tea kettle has been used any considerable time, a coating appears at its bottom and sides. This is a deposit of lime. The same deposit of lime may be left in the radiator of an automobile and the precaution must therefore be taken that the radiator tubes be sufficiently large so that the deposit will not clog the passage of water." The years have taught automotive engineers this lesson so that the radiators on the modern cars are in no danger of clogging. However, the method of cooling to-day is based on the system used back in 1903.

How familiar this reads: "The multiple-disk clutch has proven so successful that it is rapidly displacing other types. Among numerous advantages in its favor are that it is small and compact, has metal-to-metal friction surfaces, and revolves in an oil bath, assuring its constant automatic lubrication. Except for certain minor changes the multiple-disk clutch seems to find favor in 1928 just as in 1906.

The great change in automobile construction has been the exact fitting of parts so that all unnecessary bolts, nuts, screws and other joinings have been taken out. The gasoline flow is entirely automatic to-day, the oil is filtered and used many times, the cylinders have been multiplied and the pistons shortened, while braking is on all four wheels. If Stephen Duryea, who brought out the first gasoline car in 1895, could see the 1928 model of any car on the market he would be justified in thinking that his conception of a motor-driven vehicle was quite as practical in its age as the one he would meet on the highway in any part of the world to-day.



He—"Jane is irresistible."

She—"I never put up much resistance either."

The Sundial Gun.

Sundials are not the only instruments that rely on the sun to make them of any use. There is a gun that fires a discharge at twelve o'clock every day, provided the sun is not hidden by clouds.

It is a small brass cannon, built in Paris in 1650. Its touch-hole has been elongated into a groove running in line with the north-south line on the dial. A teaspoonful of powder forms the charge, a little being also sprinkled upon the long touch-hole.

If the burning-glass lens held by adjustable arms above the cannot is set in the correct position, the concentration of the sun's rays will make the powder explode at midday.

All-Electric Village In Wales.

Llanuwchllyn, near Bala, claims that it is the most up-to-date village in Wales, for it is run entirely by electricity. Power is provided at 1½d. per unit. Every cottage is provided with electric light, electric cookers, electrical labor-saving devices, and the village carpenters and builders use electric saws and planes. The power-station is in a small wooden hut on the mountain-side.

What U. S. Newspapers Use.

The twenty-two thousand newspapers and periodicals in the United States using newsprint consume three million tons, or, for every working day, a strip of paper thirteen feet wide that would encircle the globe.

A "Language Island."

In Russia there is a "language island," where about a million and a half German-speaking people form a community founded in the first case by Catherine the Great.

World's Largest Volcano.

Kilauea, in Hawaii, is the largest active volcano in the world. The crater is three miles across.

How Eskimo Swain Conveys Sentiments to Maids.

North of the Arctic Circle a lovesick swain makes a big hit with the maid of his choice by serenading with a ballad entitled, "My Girl is Like a Fish."

That is the name of one of the most popular of Alaskan Indian love songs, recorded for the first time by two members of the faculty of the Cincinnati Conservatory of Music. Dr. Geo. Leighton and Rudolph Thomas are setting down the folk tunes and love songs of the Far North to preserve them for posterity.

"The Alaskan Indian youth who sang that song found it impossible to compare the charm of his sweetheart with anything he knew until he recalled the beauty of the vari-colored fish that inhabit nearby waters, John Fredson, Alaskan Indian, explained. "The girl, of course, recognized the unusual compliment and felt the warmth of her admirer's love for her."

Fredson, visiting Cincinnati at the home of a former missionary in Alaska, was persuaded to play the unrecorded Indian folk tunes on his violin, or to sing them to the accompaniment of rhythmic tappings of his bow in simulating drum beats. Dr. Leighton and Mr. Thomas wrote down the melodies.

Fredson wrote a description of each of the songs, none of which contains words, for each singer makes up his own words to suit his particular feelings and the occasion. Names of the tunes include "Down the Yukon," "Aurora Borealis," and "Don't Leave Me," as they were freely translated by Fredson, who is a student at the University of the South, in Tennessee.

FLOODS THAT HELP.

Suffering and Hardship Caused When River Don't Overflow Their Banks.

To the average person floods mean disaster, or, at the very least, intense discomfort and unpleasantness. But in other lands they are a very necessary part of the economy of nature, hailed with delight by the inhabitants.

Yet floods are potentially dangerous everywhere. But where they are usual and expected, as a rule no harm is done. For instance, the rise in the level of the Nile and the rivers of Iraq—the Euphrates and Tigris—is an annual occurrence, and steps to prevent damage to property and loss of life are taken accordingly.

The feeling as the level of the Nile creeps up the ancient Nilometer is one of tense expectancy, while the rejoicing which ensues when the flood level is reached beggars description. If the water reaches the normal flood level a year of prosperity is in sight, not only for the landowner, but for the peasantry, while superabundance can be expected the deeper the Nilometer is submerged.

In Iraq the flooding occurs twice a year, once on account of the winter rainfall and once as a result of the melting of the snows. Both in Iraq and Egypt irrigation is resorted to to supplement the flooding, and in the latter the flow of water is now largely controlled by marvellous dams and barrages.

Methods in Iraq are less elaborate, but the ingeniuity displayed by the natives in leading water to any desired spot by means of small earth dams, in which sluices are cut when a head of water is obtained, is really amazing, especially in view of the lack of education as known in this country.

Such crops as the nomadic tribes cultivate are sown on these occasions, and in some instances are left alone until they are ready for harvesting.

On the northern coast of Africa, where rivers are conspicuous by their absence, the rainfall alone has to be depended upon to flood the wadis or valleys. Here again the nomadic tribes plant the seed and leave the rest to nature.

Both in Egypt and Iraq the banks of the rivers are noted for the "bunds," or embankments. A constant watch has to be kept on these earthworks, especially in Iraq, where the rivers have been known to rise as much as twelve feet in a night. The Tigris and Euphrates have changed their course on many occasions when these embankments have been neglected, and many a British Tommy can tell of nights spent in reinforcing a bund in order to prevent the camp being flooded.

Valve-in-head Supreme
-in the Sky -at the Speedway -on the Road

Lindbergh, Maitland, Chamberlin, Byrd—all of the famous flyers of the day—use engines employing the Valve-in-Head principle in their record-breaking flights.

Practically every racing car entered in all the major speed classics of the past twelve years, as well as every winner of every important event, has also been Valve-in-Head equipped.

The famous McLaughlin-Buick Valve-in-Head Engine, developing more power than any other automobile engine of its size, has given conclusive proof of leadership in all elements of performance over a period of twenty-four years.

Choose McLaughlin-Buick—powered by the famous Valve-in-Head Engine—supreme in the sky, at the speedway, on the road!

Egg Prices Advancing.

The official Government Market Report of May 8th says: "The relative scarcity of eggs still continues in all parts of the country. Both Montreal and Toronto are finding it difficult to secure adequate supplies and competition is keen especially on Extras. While storing is going on freely stocks on hand are light compared with last year. The figures of the Montreal Board of Trade issued May 1st showed approximately 27000 cases of eggs in storage as compared with 55000 cases on May 1st, 1927."

This condition of the egg market at the season when prices are naturally lowest surely means that there will be more money made from poultry next year than there ever was before.

Obituary

One of the oldest residents of Winchester Springs has passed on to immortality in the person of Mrs. Munro, in her 72nd year, widow of the late John M. Munro, who predeceased her fifteen years ago.

Mrs. Munro was born at Nation Valley, where she resided until her marriage, forty-nine years ago, at which time she took up residence at Winchester Springs.

The funeral service was conducted on Tuesday, May 15th, at the United Church, by Rev. J. Hurst. Three of the favorite hymns of the deceased were rendered by the large concourse of friends assembled as a testimony of the high esteem and respect accorded Mrs. Munro.

The five cousins and one nephew who bore her to her last resting place in Maple Ridge beside her husband and two children were, Howard Nesbitt, Kenneth Nesbitt, Thomas Mundle, Ward Nesbitt, Robert Rennick and Charles Gray.

She leaves to mourn her loss, three daughters and one son, Miss Emma G. Munro, R. N., of Detroit, Mrs. J. F. Carscadden of Winchester Springs, Miss Mary Munro, of Detroit, and Hector on the homestead farm, four sisters and two brothers, Miss Nancy Gray, of Nation Valley, Mrs. J. A. Davidson, of Pointe du bois, Manitoba, Mrs. Alice Magee, of Cardinal, Mrs C. A. Beach, of Cornwall, Messrs Grant and Ernest Gray of Nation Valley, three grandchildren, and many nieces, nephews and sympathizing friends. Also an aunt Mrs. Jane Coons, of Ottawa, who recently spent her 85th birthday with her niece.

The floral tributes bore silent testimony to the place which Mrs. Munro had won in the hearts of all. The W. M. S., The Family, Mr. Grant Gray and family, Mr. and Mrs. Ernest Gray and family and Miss Nancy Gray, Mr. and Mrs. C. A. Beach, Mr. and Mrs. J. A. Davidson, Mr. and Mrs. Enos T. Munro, Mr. and Mrs. Howard Nesbitt, Mr. and Mrs Frank Nesbitt, Mr. and Mrs. A. E. Meldrum, Mr. and Mrs. W. J. Nesbitt, Mr. Clifford and Mr. Claude Beach, Miss Minnie and Miss Edith Baxter, Miss Malboit and Miss Wallen and Mrs. Moore, Miss Hurd, Miss Kasson and Miss Millane.

The life which Mrs. Munro had led was an example of high courage, true humility, helpfulness and service. She was a faithful, devoted and patient mother, and a true Christian.

I have known ancient ladies, who were quite
As lovely in their old-time grace
As silver birches clustered on a hill
Against the sky's bright face.
They have tranquil sanctity that clings
About each quiet deed and thought
As chaste as sleeping moonlight in a pool
Or stars in tree tops caught.
They have the dainty beauty of old lace
Or gardens fringed with dewy sod,
For here 'midst worldly things they seemed to win
Companionship with God.

ANCIENTS MADE GOOD GLASS

Knew How to Inject Colors of Various Sorts—Product Not Equal to Our Modern Kind.

The servants of Tut-Ankh-Amen, and Egyptians even more ancient than they, made better glass than any of the later glassmakers until the coming of modern science and technique to the aid of the art, according to Prof. B. Neumann of the Technical High School at Breslau.

Prof. Neumann has made physical and chemical analysis of a large number of samples of ancient glass, ranging from ancient Egyptian through Roman times down to Saracenic glasses of about 850 A.D. One fault ran through all the ancient glasses, though in varying degree. This was a somewhat too high alkali content in the mix, which made the product a "soft" glass, with lower resistance to corrosion and slower solution than that possessed by modern glasses.

This defect, says the German investigator, was more or less unavoidable, because the wood-fired glass furnaces could not develop sufficiently high temperatures, and the high alkali content had to be added to get the ingredients to melt together. The quality of the varieties of glass he examined was roughly proportional to its melting point. The Egyptian glass, which was the best, had a melting point of 760 to 880 degrees centigrade, while the poorest sample, a fifth-century Roman glass from the Rhine region, began to melt at 720 degrees.

From its earliest manufacture in Egypt, about 3500 B.C., until almost the beginning of the Christian era, glass was used almost wholly as a semi-precious stone, for ornaments. The ancients could not make a clear glass; the nearest approach was a light green. This was due to natural impurities in the ingredients. But they knew how to add colors, and made glasses in darker greens, reds, blues, yellow, violet, black and cloudy white.

After the invention of the blowing tube, the use of glass rapidly became general throughout the Roman world, which reached from the Euphrates to the Rhine, and the improvement in glass technique has been carried on steadily in one part of the world or another ever since.

"The End of a Perfect Day."

How many people know who Carrie Jacobs Bond is? Not one in a hundred. But everybody knows the song which made her fortune. She wrote the words and music of "The End of a Perfect Day." Her second husband died when she was thirty-two and left her with one child and little money. Although she had no capital or business experience, she started a business for publishing her own songs. The business grew until she had to enlarge her offices because the demand for "A Perfect Day" alone was so great. It was written after a day of motoring through beautiful scenery in California. The day closed with a most glorious sunset, and while she was dressing for dinner Mrs. Bond felt the need of expressing her thanks. "Almost at once came the words of 'A Perfect Day'," she says.

"I am Free," *she says:*

Kidney Trouble Ended by "Fruit-a-tives"

EVERETT, Ont.—"I was troubled for some years with dyspepsia, and kidney trouble, from which it was impossible to get relief until I started taking 'Fruit-a-tives' Now, thanks to 'Fruit-a-tives', I am free from those ailments and able to do my work without pain or fatigue.
Mrs. Thos. Evans.

"Fruit-a-tives," by the gentle natural action of intensified fruit juices and tonics, restores normal action of kidneys, stomach and bowels, and gives relief from backache, rheumatism, lumbago, neuralgia and headaches. 25c and 50c a box.
