MORRISBURG — ONTARIO

THE EASTERN CONFERENCE OF LUTHERAN SYNOD

The Eastern Conference of the Evangelical Lutheran Synod of Canada met in St. Johns Church at Riverside on Sept 15th and 16th. In the absence of the President, Secretary Kutter opened the Convention at 2 o'clock Sept. 15th. The election of officers resulted as follows:

Rev. T. Iseler of Williamsburg President.

Rev. J. Kutter of Arnprior, Ont., Secretary-Treasurer.

Reports of the different Pastors showed that steady progress was made in the Parishes..

Dr. C. H. Little of the Waterloo Seminary presented a paper entitled "Is there a Millennium?" His sound and able arguments convinced the assembly that the Bible teaches no Millennium. The Conference, with a rising ovation, greeted the arrival of Rev. Reble of Hamilton, President of the Canada Synod.

At the evening service Holy Communion was administered. Dr. Little preached the Sermon, his theme being: "Jesus a real Saviour of real sinners" The leturgical Service was conducted by the Rev. Heller of Montreal.

The morning Session of Sept. 16 was opened with devotions by the Rev. Reble. The President of the Canada Synod presented three matters to the Conference for action:

1. That this district hold an annual Sunday School Convention.

(2) That a Committee on Systematic Benevolence be appointed to co-operate with the Synodical Treasurer.

(3) That the work of the National Lutheran Council be heartily supported.

After discussion of these subjects the Conference took the necessary action. The Convention was closed according to the order of the Common Service Book.

The Womens Missionary Society of the Eastern Conference of the Ev. Luth. Synod of Canada met in St. Johns, Riverside on the afternoon of Sept. 16th. Rev. Iseler opened the meeting. The election of officers resulted as follows:—

President—Mrs. John McMartin, Morrisburg.

1st Vice-President—Mrs. Jesse I. Casselman, Riverside.

2nd Vice President—Mrs. Ross Beckstead, Williamsburg.

Secretary—Mrs. Bjorkland, Montland, Montreal.

Treasurer—Mrs. Nathan Barclay, Dunbar.

Two very interesting addresses on the work of the Society were given by Rev. Reble of Hamilton and Rev. M. O. Heller of Montreal.

MISS J. G. WINGARD

Miss Jennie Gertrude Wingard, a lady well and highly esteemed in her native village and community, youngest daughter of the late Mr. and Mrs. John Wingard, passed away at her home, Williamsburg on Tuesday evening, September 21st; after a brief illness in her 55th year

A perfect lady at all times and under all circumstances, she commanded the respect of all who knew her and her death to the community came as a shock. She was a faithful member of the United Church, Williamsburg, and by her faithful attendance from Sabbath to Sabbath showed her Christian fortitude and devotion toward the sacred teachings of her Heavenly Master. She is survived by one sister, Mrs. Alex. Algire, Williamsburg; and three brothers; George and Isaac, Williamsburg and Charles, Moulinette The funeral services were held at her late home and were conducted by her pastor Rev. A. Russell. Interment took place in the Williamsburg cemetery..

MRS. CHAS. W. LOUCKS

Word has been received here of the sad news of the death of Mrs. Charles W. Loucks, on September 1st, at Grace Hospital, Detroit. Mrs. Loucks was formerly Miss Priscilla Adams, daughter of Mr. and Mrs. John Adams of Ludlow, England. The deceased had been ill one week, having come through a successful operation for appendicitis. Death resulted from chronic heart trouble which came very suddenly and was a distinct shock to her friends and relatives. The funeral service was held from the deceased's late residence 1096 Chalmers Ave., and was conducted by Rev. Dr. Malaney of Christ Episcopal Church of which she was a member. Interment was made in Evergreen cemetery.

The high esteem in which she was held was shown by the numerous floral offerings, some of which were as follows:

Sprays from Mr. and Mrs. J. A. Tyo, New York; Mr. and Mrs. H. C. Lake, Tonawanda; Mr. and Mrs. H. D. Pyper Morrisburg; Mr. and Mrs. Dr. Medler, Mr. and Mrs. Dill and son, Mr. and Mrs. Norman Peters, Mr. and Mrs. Ed. Peters; Mr. Boyne; Mrs. Lillian Duncanson, Mr. and Mrs. Majors, Mr. and Mrs. Harry Duncanson; Miss Frances Peters; Mrs. Roading; Miss Snowden; Mr. and Mrs. J. Duthie; Mr. and Mrs. W. G. Cleve Mr. and Mrs. J. Horn, Detroit; Wreaths from The Detroit Edison Co., Newcombe Endicott Co., Standard Laundry; Mr. and Mrs. Herbert Cassel; Mr. and Mrs. Charles Ownes; Mr. George Colman; Mr. Adolph Hebelt, Detroit; Basket from Hudson Beauty Parlor, Detroit.

The pall bearers were as follows: Messrs. Norman Peters; Adolph Hobelt; Harry Duncanson; James Duthie; W. F. Dill and Dr. Medler.

The sympathy of the numerous friends and relatives here are extended to Mr. Loucks, who is an old Morrisburg boy. The loss sustained by him is all the more keen owing to the fact that he was just married to his late wife a little over a year ago.

MR. J CLEMENT MEETS WITH PAINFUL ACCIDENT

Saturday last John Clement, son of Mr. and Mrs. James Clement of Dunbar, had his right leg broken just above the ankle in an unusual manner. While taking a cow from the home farm to Williamsburg, which had been loaded on a wagon wiith a double box the animal became untied and while Mr. Clement's attention was diverted for a moment it attempted to jump from the front of the waggon and in so doing knocked the young man from where he was standing to the ground, his leg being caught by a chain in such a manner that it was broken but he was thrown free as the horses became frightened and ran away otherwise there might have been more serious consequences. The accident happened near Dunbar where the horses dashed into Mr. Dillabough's corn field and made a complete circle through the standing corn with the waggon attached before they were caught as they were returning to the road.

PUBLIC SCHOOL FIELD DAY

The Public School Field Day will be held on the Fair Grounds Friday October 1st. The winners of events No. 1, 2, 7, 9, 14, 20, 25; 27; 30; 32 and 33 will be taken to the Dundas County School Fair at Winchester Springs on Oct. 2nd to compete for the Shield presented by the Men Teachers' Federation of Dundas County.

ORDER OF EVENTS

1. Boys' 100 yards dash, 12 years and over.
2. Girls' 75 yards dash, 12 years and over.
3. Boys' 220 yards' dash, 9, 10, 11 years.
4. Girls' 75 yards dash, 9, 10 and 11 years.
5. Boys' 75 yards dash, 8 years and under.
6. Girls' 75 yards dash 8 years and under.
7. Boys' Running Hop, Step and Jump, 12 years and over.
8. Girls, Driving Nails, 12 years and over.
9. Boys' Running Broad Jump, 9, 10 and 11 years.
10. Girls' Doll Carriage Race, 8 years and under.
11. Boys' Sack Race, 8 years and under.
12. Boys' Shoe Race, any age.
13. Boys' Mile Race, 12 years and over.
14. Girls' Throwing the Basket Ball, 11 years and over.
15. Boys'Half Mile, 9, 10 and 11 years.
16. Girls, Driving Nails, 8 years and under.
17. Boys' Horse Back Race, 8 years and under.
18. Girls' 50-yard Race, 6 and 7 years.
19. Boys' 50-yard Race, 6 and 7 years.
20. Boys' High Jump, any age over 8 years.
21. Girls' Bicycle Race, any age.
22. Boys' Bicycle Race, any age.
23. Girls' Hoop Race, 8 years and under.
24. Boys' Hoop Race, 8 years and under.
25. Boys' Three-legged Race, 9 10 and 11 years.
26. Girls' Three-legged Race, any age over 8 years.
27. Boys' Three-legged Race, 12 years and over.
28. Girls' Egg Race, any age over 8 years.
29. Boys' Three-legged Race, 8 years and under.
30. Girls' Potato Race any age, over 8 years.
31. Girls' Potato Race, 8 years and under.
32. Boys' Relay Race, any age, over 8 years, 440 yards.
33. Girls' Relay Race, any age over 8 years, 300 yards.
34. Boys' Wheelbarrow Race, 8 years and under.
35. Mr. C. L. Baker's Special.

General Admission 25c; tickets may be bought from Public School Pupils at 15c until Thursday night, Sept. 30th.

Judges—Mr. J. H. Meikle; Rev. Burkholder; Rev. Carson; Rev. Lawson; Father Meagher. Starter, Rev. Jacobi. Clerk—J. M. Whitteker.

Remember the date and spend the afternoon with the children.

MINERALS IN LIVE STOCK FEEDING

Much has been written concerning the subject. Many advertisements appear descriptive of the virtues of commercial mineral mixtures. In a general way, it is difficult to prescribe mineral supplements for live stock. Almost as well try to prescribe plant foods in the way of fertilizers without knowing the nature of the particular soil to be fed, and in particular the chemical analysis (as disclosing the deficiencies) of same.

The kind of stock, the age, the kind and quantities of food fed, the nature and analysis of the soil growing all or a part of this feed, whether or not abnormal characteristics (deficiency diseases) appear regularly in the animals so fed,—these are some of the factors concerning which knowledge is necessary before authentic information may be given. In this connection, deficiency in, say, the lime content of the plant, further reflected upon the condition of the animal consuming the plant. To a very limited extent this is true. The point is that while there is relatively little variation in the lime content of fodders, irrespective of the soil mineral content, and that the crop will lack in yield rather than constituent—the crop grown on a deficient soil tends toward the low range in the lacking soil constituent, and continuous feeding of such a fodder may ultimately reflect this deficiency on live stock consuming it.

Roughly speaking, the animal body contains the same ash materials as are found in plants, and, as a general rule, the elements essential to the life of plants are essential to the life of animals. Without going into a dissertation on the mineral composition of plants and animals, let it be stated that calcium, phosphorus, potassium, magnesium, sulphur and iron are possibly the most important elements as found in the plant and as required by the animal body. Of these, calcium and phosphorus are of prime importance, and mainly through lack of these, unsatisfactory conditions (as caused by mineral deficiency) are found in live stock.

Under ordinary conditions, as already stated, where the ration has fair variety and adequate quantities are fed, there is little danger of lack of mineral. The results of feeding ill-balanced rations, insufficiently supplied, cannot be overcome by feeding supplementary mineral mixtures. Correct feeding of the soil, the featuring of leguminous crops (clover and alfalfa), the following of good feeding practice and the regular supplying of common salt, all are important in this connection.

Nevertheless, the use of mineral supplements is, in many cases, good practice, particularly with dairy cattle, pigs, and pregnant or nursing females generally. With the latter a ration high in lime and phosphorus is required. Then, too, the nature of the feeds available may make necessary certain mineral additions to the ration. For example, some of the common feeds low in lime or calcium and calcium phosphate are straw and chaff, cereals and their by-products and roots. On the other hand, feeds high in lime are, hay from legumes, alfalfa in particular, certain grasses and many of the leguminous seeds. The small grains, wheat bran, malt sprouts, brewers' grains, linseed meal, etc., are all high in phosphoric acid.

The following figures are significant as disclosing the calcium content on a dry matter basis of certain roughages: alfalfa, 2.5 per cent; red clover, 1.58 per cent.; timothy hay, .39 per cent.; corn stover, .41 per cent.; oat straw, .36 per cent.; wheat straw, .22 per cent.

From the foregoing brief comments, it would appear that, within certain limits, the feeder may control the mineral constituent of his live stock rations through the feeds he grows and uses.

There follows a brief discussion of mineral constituents as applying to the ration of the different classes of stock.

Horses—Show fewer conditions attributable to mineral deficiency than other kinds of farm stock.

1. Salt regularly.

2. Ground or pulverized charcoal may be very useful. Feeding a handful or two during the week in grain or mash supplies phosphates and a good digestant at the same time.

3. Lime may be needed in some districts, and may be administered as ground lime stone in feed or as lime water in the drinking water.

4. Potassium iodide crystals administered at the rate of one-eighth of an ounce (one small teaspoon, level) on the first and fifteenth of each month, dissolved in drinking water, would appear highly beneficial in the case of in-foal mares as a preventive to joint ill and weakness in foals. Start administering this in November with the spring bred mare.

Cattle—Very frequently are insufficiently supplied with minerals, particularly high-producing dairy cows.

1. Feed a well balanced ration, making the feeding of leguminous roughages (alfalfa if possible) a feature.

2. Supply salt regularly. Iodized salt has special virtues. It may be purchased in block form or made up,—two to four ounces potassium iodide dissolved in water and sprinkled over one hundred pounds of dry salt. Mix thoroughly.

3. Edible bone meal (not fertilizer) or bone char, where it may be secured, forms an excellent source of bone phosphate. Feeding a pound to a pound and a half per hundred pounds meal is good practice and may effectively supplement the heavy demands of the high-producing cow.

Where cattle show an abnormal or depraved appetite for bones, wood, etc., the result of deficient rations, this condition may be gradually corrected by the use of a mixture of bone meal, ground charcoal and salt. Further, there is considerable evidence pointing toward the probability of assistance from supplementary bone meal feeding in the matter of abortion infection control. If so, this must come through the strengthening or toning of the system generally and the genital organs in particular.

4. Pulverized charcoal or chick size charcoal may be fed to advantage, one and one-half to two pounds per hundredweight of meal. Charcoal is high in phosphates and is a good absorbent and cleanser for the intestinal tract.

5. Lime is best fed to cattle through leguminous roughages. It may be fed in the form of ground limestone with salt or mixed in the meal.

Finally, no amount of mineral mixture, bone meal, phosphates or lime, will greatly change the condition of the underfed "straw stack" cows, so common. The major consideration in Canada is better feeding, particularly as applied to calves, growing stock and dry cows.

Sheep—With one notable exception, sheep, as a rule, have not received or seemed to need the attention given other classes of stock in regard to mineral. Subsisting largely on pasture and hay or roughage crops and having access to the earth itself, their demands seem to be met with a plentiful and continued supply of salt, preferably rock salt.

An Attractive Recess.

In many homes an otherwise beautiful living room, dining room or other apartment is marred by an old-fashioned shallow closet with glass doors, set into one of the walls. Usually there are drawers below, or an inclosed space, and the shelves above for the china.

Either these shelves are crammed with china in a manner that could interest no one, or else they are packed with unsightly odds and ends, and the whole concealed by curtains hung behind the glass doors. This is an unattractive sight, but a common one.

A closet of this kind can, however, easily be transformed into something very lovely and strikingly distinctive, something that will enhance the interest of the entire room.

First remove the glass in the doors, if the framework of the doors is extremely narrow. But if it is wide, remove the doors and their hinges and have a narrow framework without any glass fitted around the opening. If possible have the board across the top arch-shaped.

Paint or stain this framework and all the inside of the recess, including the shelves, to match the other woodwork of the room. If all the shelves are rounded or cut into an attractive shape across the front so much the better, although they will look well if straight.

The effect thus produced is that of a shallow recess in the wall, and besides contributing an interesting, distinctive note to the room, will add slightly to its apparent size, which in many rooms is desirable.

Place on these shelves any handsome ornaments, such as bronzes or pieces of really ornamental china or glass. A decorated box would look well at the bottom. A few colorful books, not too large, standing securely between book-ends, may occupy the centre of one or two middle shelves. Almost anything will be attractive in this recess, provided one sternly resists the temptation to fill it with objects that have neither beauty nor interest. The shelves must not look cluttered. They must not be filled from end to end. Only one object, or just a few, depending on size, should stand on each shelf. This gives distinction. Of course the shelves should not have on them doilies or anything of that nature.

The Joss Flower in Bowls.

Have you grown the Joss flower in bowls filled with pebbles and water? Interesting and so easily cultivated and flowered, it can yet be started to bloom early in midwinter. It is a species of polyanthus narcissus and is known under several popular names, such as Sacred or Good Luck Lily of China and Japan, Flower of the Gods, Water Fairy Lily. A succession of showy plants may be grown for home decoration by keeping a reserve of bulbs in a dry cool place, starting them at intervals.

The bulbs are very large and the flowers are white with a yellow cup, borne several on a stem. Each bulb produces several flower stems, the flowers being single and very fragrant.

The cultural requirements of the Joss flower are very simple and readily followed. Shallow fancy bowls are filled to within half an inch of their rims with small pebbles and a few pieces of charcoal, the latter to keep the water sweet. According to the size of the bowl, one to three or four bulbs are placed in the bowl, partly embedding their base among the pebbles. But first score the large bulb with a sharp knife, running it to a depth of a quarter of an inch across the bulb in both directions. This is to facilitate the free egress of the shoots which are dormant in the bulb.

After setting the bulb among the pebbles add sufficient water to cover the pebbles. The bowls are then placed in a dark cupboard in a cool room until growth commences, when they are removed to a light position in a room from which cold drafts are excluded. During this period a cool room best suits them, and they should be kept as near the window as possible. Fresh water must be added from time to time. When the flower stems are about six inches high they should be supported. This can be done by inserting a piece of stout wire in the bulb and securing the flower stem to it.

Apple-Tomato Catsup.

Wash and mash thoroughly a half bushel of ripe tomatoes. Put in an aluminum kettle with two tablespoonfuls of salt. Boil until tender. Cool and mash through a sieve. Take half a gallon of the thin juice, add two pounds of sugar, one teaspoonful each of whole cloves and black pepper, six blades of mace, two sticks of cinnamon, one-half teaspoon of ginger and six medium-sized onions minced fine. Let this boil until well flavored with spices. Strain and add three quarts of sifted apple sauce and the rest of the tomato pulp. Boil until thick. Then add one quart of cider vinegar and one-half teaspoon of cayenne pepper, boil twenty minutes. Seal while scalding hot. This is ready for immediate use, but improves with age. —Mrs. G. S.

Unkind.

Lady (in drug store)—"I want some insect powder."

Polite Clerk—"Will you take it with you?"

Lady—"No, I'll have the bugs call and you can give it to them."

DISTINCTIVE APPEARANCE AND MODERATE COST

By Baldwin & Green, Architects.

This home, 21 ft. 6 in. x 35 ft., has already been erected by a client of the architects and including hot air heating, plumbing fixtures and septic tank, cost $5,500. The exterior walls are of lapped siding laid over tar paper and tongue and groove sheeting. The concrete cellar extends under the whole house and contains storage space for fruit and vegetables.

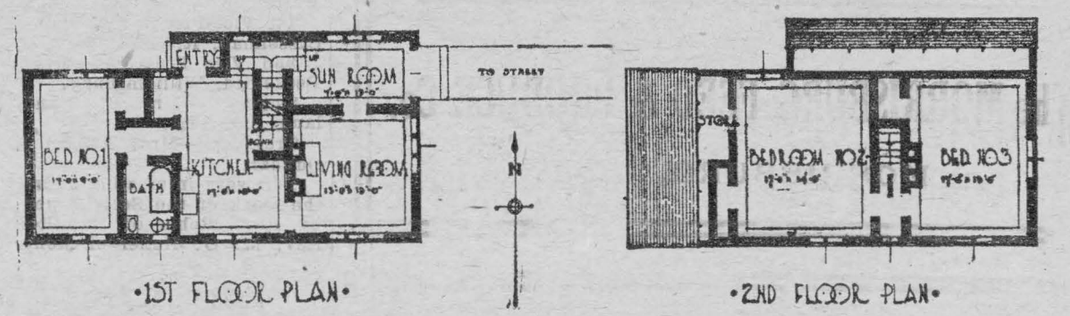
An interesting feature of the first floor plan is the elimination of the entrance hall, or what would be equally true, its enlargement to form a sunroom. This arrangement is far more preferable than a small hall for it really performs the same functions and at the same time is ever so much more utilitarian.

The living room is 13 ft. x 13 ft. and the light problem is well taken care of by the two groups of casement windows. More important than the area of the windows themselves is the fact that the light from these sources is absolutely unobstructed. Roof projections for verandahs are usually the most prolific source of trouble in this respect and it is invariably the living room which suffers.

As there is no dining room, the kitchen, 17 ft. x 10 ft., is intended to serve in a dual capacity. The large cupboard just inside the door contains a built-in refrigerator with outside icing door. This, of course, in addition to facilitating icing during the summer, also precludes the necessity of it in winter.

The architect's client insisted on a bedroom and bathroom downstairs and the dimensions of the former, 17 ft. x 9 ft. 6 in., indicate that his wishes have been complied with. The other two bedrooms upstairs are also exceedingly large, 17 ft. x 14 ft. 6 in. and 17 ft. x 13 ft. Spacious clothes closets and a store room complete the second floor plan, which could easily be altered to suit other preferences.

Readers desiring further information regarding the plans and specifications of this house should communicate with the architect direct. Address, Messrs. Baldwin & Greene, 31 Bloor St. E., Toronto, Ont.



•1ST FLOOR PLAN•

•2ND FLOOR PLAN•

Question. Is a one-inch air space between a tile wall and the plaster coat sufficient to eliminate dampness?

Yes. And it is desirable to have water-proof paper applied between the furring system and the tile. Some patented wall bearing tile forms are available that do not require furring.

A County Fair Party.

The invitations were huge poster-like affairs with pictures of horses, pigs and chickens pasted upon them. They bore the news that the Hickville County Fair would meet on the following date and that no one but hicks would be admitted. All the guests arrived in costume. The home had been turned into a veritable fair-ground. Rugs had been rolled up and most of the furniture put into one room. Gay pictures and posters hung on all walls, and in every corner was a stand of some kind. Each guest was given a handful of paper money to spend.

There was a whole row of "nigger" babies made from corncobs. For the paltry sum of one dime you might have three throws at them; for each doll you might hit you received a stick of gum.

The house of horrors was open to any one for twenty-five cents. It was completely dark and especially gruesome. One was told to put his hands in the lake, which was full of fishes and worms. It was the bathtub partly full of water and in which floated cooked spaghetti.

One had to get down on his knees to get to the next place, and this required crawling through an old auto tire. One had to shake hands with the ghost, who held out a clammy hand, an old water-soaked glove.

On a counter was a small mechanical donkey, along the track were numbers. The guest choosing the number where the donkey stopped got the money.

Hooks had been placed on a small board and hung on the wall. Under the hooks were pasted numbers. For ten cents you might buy three rubber jar rings to throw. Beautiful gum kewpies were the prizes.

Presently the lunch counter sprang into prominence. There you could buy piping hot lunches with imitation money.

The last thing of the evening was the raffling of the big motor car. This was a toy car.—Mrs. W. E. D.

Making Sure.

The electrician was puzzled. "Hi!" he called to his assistant, "put your hand on one of those wires."

The assistant did as he was told.

"Feel anything?"

"No."

"Good!" said the electrician. "I wasn't sure which was which. Don't touch the other or you'll drop dead."

CAN HANDS THAT WORK BE BEAUTIFUL?

BY SARA SWAIN ADAMS.

I once heard a great artist say: "No one's hands are ever beautiful until they have worked with their hands." This is actually true, for a characterless hand is an ugly hand. Haven't you seen them? Haven't you seen pudgy, puffy, colorless hands?

The crudest, roughest working hand is fine to look at beside such hands!

Look at your own hands.

Are they red, with rough skin and broken nails? They may look neglected, but they have a fine character of their own—and all they need is a little outside care and they will gain your admiration for their individual beauty as well as your love for their capability.

Let me talk directly to you, Mrs. Housewife, Mrs. Farmwoman, Mrs. Mother of Children: You can continue to do every physical bit of work your hands have always been doing and still give them an outward beauty.

Suppose your hands are in the very worst possible condition. Suppose they are rough and hard and red. The very first thing you must do is to help the skin of these rough hands to a normal softness and smoothness. You need a pair of large, clean, white cotton gloves. You can buy them at a trifling sum from any general store. You also need a jar of good, pure cleansing cream. Wash your hands carefully at night before retiring. Use warm water and a pure white soap. If the dirt seems ingrained, just soak your hands in the warm sudsy water for a few minutes. Then rinse them thoroughly in clear warm water and dry. Now take your cleansing cream, a little at a time until your hands and wrists are well covered.

AFTER WASHING THE DISHES.

Work the cream well into the hands and wrists, using a similar movement to the one you use in washing your hands. Pinch the tips of your fingers and rub the nails with a rotary movement. Slide your hands down to your wrists and rub up and down as well as around.

After you have given your hands this treatment slip on the big cotton gloves and go to bed. Keep the gloves on as long as you can—all night if possible—but even if they slip off in your sleep your hands will have received their benefit and the next morning you will see an improvement in their appearance.

Of course, your hands will be a little more tender. Therefore, on the following day you should watch them a bit. Don't thrust them into hot dishwater—you can wash your dishes with warm water and soap and get them just as clean. Use all the hot water you want as your dishes stand in the drain, but keep your hands away from the ruinous effects of water that is too hot. After you have washed the dishes, rub a little cleansing cream into your hands again, wipe them off, and hold them in a pan of cool water or under the cold-water faucet to firm the skin after using the cream.

Please don't let this seem a long, tedious duty. When you make it a daily habit you will find that you do it as instinctively as you dry your hands after they have been in water.

And that's another important thing! Always dry your hands carefully.

If you have your hands in water a great deal you should begin to keep a stack of soft old towels or white cloths—cheesecloth, old table linen, bed sheets—anything so long as it is white and clean and absorbs well. Here is another little habit. If you begin it you will never think of giving your wet hands a little rub with the convenient apron, leaving the skin of your hands damp and susceptible to the air.

Here are a few suggestions in treating the stains you are apt to be troubled with in the average home work:

Pumice, either powdered or in cake form, will remove the fresh stains made by paring potatoes, fruits and so forth. Keep it on your kitchen sink and use as soon as possible after getting the stain.

You will find a freshly cut lemon will remove stains also, and will subdue tan and freckles. Apply at night after bathing, leave on till dry, rinse the face with cool water, then rub on a little night cream.

Mr. Booth Tarkington thinks that within fifty years the skirt as an article of women's apparel will have disappeared. Our own guess is that long before that time the skirt will be as long and perhaps as voluminous as in the days of good Queen Victoria.

Wrestling the All-Round Sport.

Do you want to be the strongest boy in your neighborhood? Do you want to know what sport will develop your strength faster than any other? Are you interested in a sport that will give you all-round athletic ability and make you more capable in other sports than anything else you can do?

Wrestling will do these things for you. It will make every muscle in your body stronger. A boy who wrestles ten or fifteen minutes, two or three times a week for a year, will be amazed at the results.

A peculiar thing about wrestlers, I have observed in several years as a college wrestling coach, is that it makes fat boys slim and slim boys husky. Last year I had a boy who in five and a half months grew from 132 pounds to 158 pounds, and it was all muscle—an increase of twenty-six pounds of muscle. Every one of you fellows can do the same.

Training in wrestling is a wonderful aid to a boy who aspires to shine on the football field. Wrestling teaches you how to fall without getting hurt, a very important thing in football. Football also wants you to take an opponent off his feet, and wrestling is the science of doing that.

Maybe you'd like to know about one or two of the simple but effective holds. In time you can learn a score of wrestling holds, but remember this: Lay off torture holds that might result in injury to your opponent. You don't want to hurt a friend and you are not wrestling for fame or money.

The half nelson is a well-known hold in wrestling and you should know it. Here's the way to practice it: First, get to your knees, both of you, with your heads in the same direction. However, the boy you are going to work the hold on should be about a foot ahead of you. You are on his right side. Now turn toward him so that your head is over his right ribs. Put your right hand under his right arm pit and slide it on through over the back of his neck. With your left hand reach in between his knees and grab his right knee. Now lift with both hands and you will turn him right over on his back.

Probably the best hold to take a man off his feet is the leg dive. You are standing face to face. Suddenly bring both your hands up to within a few inches of his face, and then just as suddenly change the direction of your hands, dropping them to encircle his knees and at the same time push him over backward.

Preparing Bed and Planting Bulbs.

Hardy bulbs have the strength for their first blooming season in the bulb to a large extent and yet a good soil will increase the size of bloom and is quite important in making good bulbs for the future blooming. The soil should be sandy, and if I have heavy soil I try to get some sand, or coal ashes will serve if the cinders are out. I want a mellow soil, for that is best; and for fertilizer I use bone meal, as bulbs will not stand any manure touching them, even if rotted. If you wish to use manure it can be mixed into the soil at the bottom of the bed if covered with a couple of inches of mellow soil under the bulbs. Plant all bulbs with four times their diameter of firmed soil over them. Some use sand about each bulb, but this will not be necessary unless the soil contains some manure.—A. H.

So much is a man worth as he esteems himself.—Rabelais.

TWELVE HUNDRED PEOPLE KILLED IN FURIOUS TEMPEST ON FLORIDA COAST

West Palm Beach, Fla., Sept. 19.—Approximately 1,000 persons were reported killed, thousands injured and 38,000 rendered homeless in the West Indian hurricane that lashed the lower coast of Florida on Friday night and Saturday, and swept across the state into the Gulf of Mexico on Sunday.

Property damage was estimated at between $25,000,000 and $125,000,000.

Miami, Miami Beach, Fort Lauderdale and the Moore Haven vicinity, 75 miles northwest of Miami, were the heaviest sufferers.

Forty white women and children were reported drowned in the Lake Region around Moore Haven, and the death toll for that section was estimated at 140.

Unconfirmed reports said that bodies were strewn along the road between Moore Haven and Clewiston.

One hundred and fifty were reported dead at Miami Beach, 80 at Miami and 100 at Fort Lauderdale. Hollywood and other suburban cities of Miami suffered heavy losses.

The gale, reaching a velocity of 120 miles at Miami Beach Saturday, whipped across the Everglades and had an estimated intensity of between 75 and 90 miles an hour when it passed over the west coast into the gulf Sunday.

The west coast was spared of casualties, but heavy damage was done to citrus fruit, growers and shippers said.

Miami was without drinking water from Friday evening until Sunday. Shipping in the Miami harbor was hard hit and thousands of buildings were reported damaged. Water was knee deep in the streets, persons arriving at West Palm Beach from Miami said.

The Pullman Company offered its full resources in equipment to carry doctors, nurses, food, water and supplies into the stricken area.

FAMILY WIPED OUT BY LIGHTNING BOLT

Mantle of Snow Covers the Prairies, Damaging Crops—Price Advances.

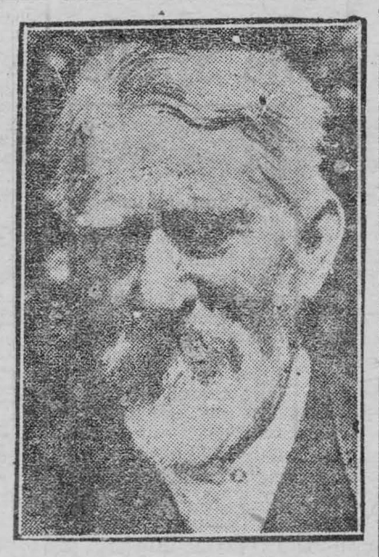
Winnipeg, Man.—A toll of four deaths and damage to ungarnered crops, the extent of which will not be determined for some time, were left in the wake of snow, rain and hail storms which have swept Western Canada.

F. Willis, a farmer in the Rama District of Saskatchewan, his wife and two children, were killed when a lightning bolt struck their home during the height of one of the worst electrical storms experienced in that district. The farmhouse was in a mass of flames when neighbors reached the scene. They were unable to check the fire, and the frail dwelling burned to the ground. The bodies of the four victims, charred almost beyond recognition, were later recovered from the ruins.

The unusual weather disturbances brought the first touch of Winter to Alberta, parts of Eastern British Columbia, and Western Saskatchewan. In several sections of Alberta the snowfall reached mid-Winter proportions, the maximum snowfall being reported from Edmonton, where it reached a depth of one foot. In other parts of the province the mantle of snow varies from one to six inches. A sharp drop in temperature, with seven degrees of frost in the Edmonton district, accompanied the snowfall.

Practically the whole of the Prairie Provinces have been drenched by rains during the past two days, and grave concern is felt over the continued delay of harvesting operations. The grain is reported to be sprouting in the stooks in those localities where intermittent rains have prevented threshing for a period of ten days to three weeks. Some reduction in grain values is also feared.

The unseasonable weather has brought about a sharp advance in grain quotations. During the past week the price of wheat advanced 8½ cents on the Winnipeg Grain Exchange.



Charles St. John
Whose death in his 82nd year removes the last white survivor of those who accompanied David Livingstone on his African Expedition.

FOUR KILLED WHEN FREIGHT CARS CRASH

Head-on Collision Occurred During Dense Fog Near Kent Bridge.

Chatham, Ont., Sept. 19.—In a collision between two C.P.R. freight trains yesterday morning in a dense fog two miles east of Kent Bridge, four of the train crews were either instantly killed or fatally injured. The dead are:

Robert Robinson, brakeman, London, died in hospital.

David Brown, engineer, London, instantly killed.

Albert Willsie, fireman, London, instantly killed.

G. B. Sewart, fireman, London, died shortly after accident.

Edward Rutledge, engineer, whose home is at 704 Elias Street, London, will recover, attendants at St. Joseph's Hospital said to-day. He is suffering from a broken arm, and bodily bruises.

Robinson, aged 47, died in the Public General Hospital late Saturday night. He was thrown clear of the train when the collision occurred, and was so badly injured that physicians said it was impossible for him to recover. His right leg was broken in two places, and he suffered wounds about the hips, shoulders and head, as well as internal injuries. His widow, two daughters and a son survive.

Willsie was thrown clear, and was instantly killed. Stewart and Brown were pinned in the wreckage, the former living for about half an hour. Brown met death instantly.

Two Men Starve for Three Days in Northern Bush

Sudbury, John G. Simms and W. E. Masson of Little Current, lost since Monday night on the north shore of Georgian Bay, were located by a search party early Friday afternoon. The pair were found huddled around a fire on the beach between Fraser Bay and Bay Finn, and, although only five miles from the Village of Killarney, were not aware of the fact. Neither had tasted food for three days.

Simms and Masson set out Monday afternoon in a 45-foot motor boat for Bay Finn, a distance of 15 miles, where Masson was to act as scrutineer at the polls. On their failure to make their destination, a search party was organized, and the boat, with propeller clogged with weeds, was found in a beached condition. Tracks leading from the craft convinced the searchers that the pair were alive, and the search was maintained.

It now appears that the missing men had mistaken Fraser Bay for Bay Finn, and in landing had stranded their boat.

Woman Instantly Killed While Riding in Side-Car

Montreal, Que.—Mrs. Charlemagne L. Auer, 31, of this city, was instantly killed Friday night, when the motorcycle in which she was a passenger capsized. Her husband, who accompanied her, was slightly injured. The machine overturned when her husband suddenly applied the brakes to avoid striking a boy on a bicycle.

GANG OF DESPERADOES DEFY MOUNTED POLICE AND ESCAPE WITH RUM

Halifax.—A force of Royal Canadian Mounted Police are scouring the countryside in the vicinity of Tantallon, a fishing village on St. Margaret's Bay, near here, in search of a gang of eight, headed, it is claimed, by "Wild Archie" McNeil, a Cape Breton boxer of some local prominence, and 13 kegs of rum, factors in an all-night battle between officers of the law and members of the rum-running fraternity.

Thursday afternoon, shortly after 14 kegs of rum had been seized on the property of Edmund Smith, at Tantallon, by Customs officials, a gang of eight men drove up in a car and openly threatened the officers. Revolvers were drawn and the gang were finally induced to disperse. Some hours later a start was made for Halifax with the seized rum in a motor truck. Suddenly all four tires went flat and it was discovered that the road had been littered with nails and broken glass.

Temporary repairs were made, but it was found that on account of the condition of the tires little progress could be made. Attempts to communicate with Halifax by telephone were unsuccessful, and it was found that the wire had been cut.

It was then decided to spend the night at Glenhaven, where the rum was stored under guard in a barn belonging to John Smith. Shortly thereafter the barn was attacked, and following a barrage of rifle and revolver shots an entrance was effected, the guards on duty, in view of the numbers opposing them, secreting themselves in the haymow. The gang then made off with 13 kegs, missing one remaining in the motor truck.

Up to a late hour on Friday none of the desperadoes had been apprehended.

BLAME WOOD ALCOHOL FOR KILLING TWO MEN

Juries at Niagara and Belleville Attribute Deaths to Poison Drinks.

Belleville, Sept. 19.—That death was the result of drinking methylhydrate was the verdict of a Coroner's jury inquiring into the death of Chas. MacDonald of Ottawa at Trenton yesterday.

Percy C. MacKay, formerly a plantation manager in the Malaga Islands, and at present a laborer on the Canadian National Railways, told of having purchased alcohol from a drug store, pretending that it was wanted for a spirit lamp. He said that he had made the purchase with money given him by MacDonald, and that when he had pointed out to him the poison label on the bottle, MacDonald had replied that there would be considerably more "kick" in it.

Niagara Falls, Ont., Sept. 19.—"Acute alcoholism" was judged to be the cause of the death of Walter Lyle Miller of this city by a Coroner's jury here. Miller had been found dead in the rear seat of a sedan car last Sunday. According to evidence, the man, along with four others, had been drinking heavily here and at a place in Thorold.

Queen's University Museum Receives Historic Gift

A unique presentation has been made to the Queen's Museum in the form of a level used by H.R.H. the Princess Louise in laying the cornerstone of the old Arts Buildidng at the university in 1879. The presentation was made by Robert Gage, Utica, N.Y., superintending architect of the work. Inscribed on the gauge is the following: "This level was used by H.R.H. the Princess Louise in laying the corner-stone of the old Arts Building. Presented by Robert Gage, superintending architect.

Lord Willingdon to Attend Fall Convocation at McGill

Montreal.—Lord Willingdon, Canada's new Governor-General, will attend the fall convocation at McGill University on October 6.

An announcement to this effect was made at McGill, when Sir Arthur Currie received a cable from Lord Willingdon accepting the invitation which had been extended to him.

This will be the first public appearance of the new Governor-General.

Women outnumber men by about 40,000 in Northern Ireland.

LEVEL OF GREAT LAKES CHANGES 7-YEAR CYCLE

Lake Michigan Shows Signs of Returning to Previous High Level.

Ludington, Mich, Sept. 19.—The level of Lake Michigan is showing a surprising rise, and marine men predict that the seven-year cycle in the lowering and raising of the water is holding through.

"The lake level is rising gradually," says Captain William Rosie, in charge of the Government dredge. "It is a steady rise that appears likely to continue. The level has risen four or five inches since last spring. It is about the same as one year ago at this time. The level continued to drop last year, however, and it was the lowest in history during January, February and March of this year. But following the period of low level the lake started to rise."

Old mariners say that for some reason as yet unexplained the level of the Great Lakes changes in cycles of seven years. The level continues to decrease for seven years and then comes back. Figures prove this to be true, but no one has been able to discover the cause. The lake during the present cycle reached a new low level. This cycle was reached a year ago, and the increase should have started at that time.

Canadian is Honored by London University

London.—It has been announced here that Philip Joseph, who graduated in law from McGill University in 1924, has had his thesis for the degree of doctor of philosophy accepted by London University. The work for which Joseph will receive a doctorate is a 500-page book on the diplomatic policies of all the great powers with regard to China, entitled "China's Fin De Siecle." He was also admitted recently to membership in the British Institute of International Affairs. He is now in Canada. In October he will be admitted to the English Bar.

AMMONIA SALTS IN GATINEAU DISTRICT

Valuable Mine Discovered Near Hull is Second on Continent.

Hull, Sept. 19.—Reports of the discovery of a valuable mine of ammonia salts in the Gatineau district, on the Gens River, about 65 miles above Maniwaki, is made here to-day.

The find was made by Delphis Ricard of Hull last spring, and since then Government experts from the Quebec Provincial Mines Dept. have been over the property, and have declared that it is a valuable asset to the Dominion's natural resources.

It is stated that there is only one other mine like it on the American continent, which is in Colorado.

NINE STATES ADDED TO LEAGUE COUNCIL; GERMANY REPRESENTED

Geneva.—The new Council of the League of Nations, enlarged to 14 members by election in the Assembly, and having present Dr. Gustav Stresemman as the representative of the German Republic, began its proceedings with an act of homage to Woodrow Wilson as founder of the League.

This homage took the form of accepting in advance a bust of the ex-President which will be presented to to League by Mr. and Mrs. R. J. Caldwell of New York.

The States chosen for the non-permanent seats in the Council are Poland, Roumania, Czechoslovakia, Belgium, Colombia, Chile, Salvador, Holland and China. Though the Irish Free State had anounced its candidacy for a seat to represent the British Dominions in the Council, it received only ten votes. Colombia received 46 out of a total of 49.

Dr. Benes's plea for concord, sincerity and collaboration in the furtherance of the high aims of the League was followed with tense interest by the crowded Council Chamber. After extending a warm welcome to Germany, whose adhesion, he said, meant so much to the furtue destiny of Europe, Dr. Benes declared that there were no plans, no entrenched camps, no opposing factions in the Council, but only men whose pulse must ever beat to the fulfilment of the high aim of putting into practice the fundamental principles of the Covenant of the League.

The Council decided to push forward the project for the establishment of an Armenian national home. It adopted a resolution that the Council would promote the settlement of the Armenian refugees in Erivan when the necessary $7,000,000 was subscribed by Armenian organizations and charities generally, and would devote the League organization to helping the project of a national home.

London.—The entry of Germany into the League of Nations is the greatest single step toward European peace since the foundation of the League, according to Lord Grey of Fallodon, who as Sir Edward Grey, was British Foreign Secretary when the Great War broke out, in a speech at the opening of the Liberal bazaar at Alnwick. He added that the entry of Russia into the League would do something of great importance, and that the door for its entry was open as soon as the Government of Russia had passed through the transition stage and was willing to accept the obligations of the League Covenant and work for peace, not trouble.

"The Locarno pact and the entry of Germany into the League," he continued, "have made it more remote and more improbable—I would like even to say impossible—that there should be any war between the three countires, Britain, Germany and France, than it ever has been in their lifetime. There is a certain danger of a setback if there is too much uncritical gush about it."

The Duty of the British and French Governments, continued Lord Grey, is to transform mistrust in Germany gradually into confidence, and the duty of the German Government is to remove the misgivings felt in the allied countries.

TURK'S ISLAND SWEPT BY HURRICANE CARRYING AWAY ALL SHIPPING

Halifax, N.S.—A hurricane swept Turk's Island Thursday and carried away all shipping, completely demolished many houses and changed the entire sea front, according to a report reaching the Halifax and Bermuda Co. During the afternoon the wind reached a velocity of 150 miles a hour, leaving ruin and desolation in its wake, paticularly along the coast where all houses were badly damaged. Hardly a house escaped, the report stated, and many salt lighters were lost. At the time, the message was sent, no loss of life had been reported. The island's supply of foodstuffs were short and assistance was needed.

Friday evening's cable read in part as follows:

"Hurricane of great intensity passed over Turk's Island on the 16th instant. Barometer at 8 a.m., was 29.91. It started to fall rapidly and at 1 p.m. was 29.26 and still falling. The centre of the storm apparently passed over Grand Turk at 4 p.m., carrying everything in its wake, the wind at that hour having gained a velocity of 150 miles per hour, blowing from the northwest. At 6 p.m. the storm showed signs of abatement and the wind veered round to the southwest."

McMILLAN—MORRISON

An exceptionally pretty wedding was solemnized on Thursday, Sept. 16th, at St. Paul's Anglican church Cardinal, when Helen Alexander, only daughter of Mr. and Mrs. Phillip Morrison, was united in marriage with Mr. Edwin McMillan of Lachine, Quebec, son of Mr. McMillan of that town and the late Mrs. McMillan. Rev. Canon French, rector of St. Paul's Church was the officiating clergyman. The bride who was given away by her father, looked charming in a handsome gown of white georgette, with veil of silk net arranged in coronet style, with bandeau trimmed with orange blossoms. She carried a shower bouquet of pale pink roses. Mrs. Jack Donnelly of Morrisburg was matron of honor, and wore green georgette with large black picture hat of satin and her bouquet was of mauve asters. The bridesmaids were Miss Lucia Atwater of Lockport, N.Y., and Miss Atwater was gowned in a very pretty dress of georgette in rose color, beaded, and bouquet of asters in rose color. Miss Stetham was pretty in a simple dress of pale blue georgette, and carried red asters, both wore black velvet picture hats. Little Miss Ferna Stetham niece of the bride, was a dainty flower girl in yellow georgette, with poke bonnet of yellow, and carried a basket of yellow zinnias. The groom was supported by Mr. James Morrison, brother of the bride, and Mr. Jack Donnelly of Morrisburg, who also acted as ushers. During the signing of the register, Mr. Clarence Bigelow of Wales sang. Immediately after the ceremony a reception was held at the home of the bride's parents The bride and groom left for Detroit to spend their honeymoon, before taking up residence at Lachine. The bride travelled in a dress of green canton crepe trimmed with sand, with shoes, hose and small hat to match, with top coat of sand color, fur-trimmed.

IN MEMORIAM

In loving memory of Elsie Radley beloved wife of James Courtney who departed this life Sept. 23rd, 1925.
We loved her, yes we loved her,
But Jesus loved her more
And He has sweetly called her
To yonder shining shore.

The Golden Gates were opened
A gentle voice said come,
And with the farewell words unspoken,
She calmly entered home.

Inserted by James Courtney, Mr. and Mrs. Kenneth Courtney and family.

AUCTION SALE

There will be sold by Public Auction, Wed. Sept 29 at 1 o'clock, on Mill Street, second house north of Merkley's Saw Mill, the following articles:

Indigestion and Bilious Spells

Mrs. Kempton Crocker, Hantsport, Bishopville, Kings Co., N.S. writes:—"My husband suffered from kidney and liver derangements and lame back, for two years. Nothing seemed to help him. We read in Dr. Chase's Almanac of Dr. Chase's Kidney-Liver pills and he tried them. By the time he had taken two boxes he was quite well again.

PERHAPS it has never occurred to you that your troubles from indigestion are really caused by torpid liver action and consequent constipation of the bowels. Stomach tablets and lotions sometimes afford temporary relief but they do not get at the cause.

Dr. Chase's Kidney-Liver Pills positively remove the cause of trouble by their direct and combined action on the liver, kidneys and bowels. A single box will convince you of their efficiency.

Price at Factory—Sales Tax Extra

No Excise Tax on Canadian-Built Pontiac

PONTIAC SIX—now built in Canada—is selling at prices still more amazingly low. The Excise Tax has been removed and the benefit passed along to the purchaser.

The low price of Pontiac Six is set without sacrifice of the high quality which General Motors built into the first Pontiac Six.

A fine car—of masterful power, brilliant flexibility, enduring stamina—beautiful to the eye, roomy, comfortable—at a price so low that only General Motors, with its enormous purchasing and manufacturing facilities, could achieve it. Pontiac has brought a new standard of quality into the field of low-priced sixes.

Only a ride in the Pontiac Six can reveal to you the quality and performance that are combined with the Pontiac's strikingly low price.

cc

Cook's Regulating Compound

A safe, reliable regulating medicine. Sold in three degrees of strength—No. 1, $1; No. 2, $3; No. 3, $5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COOK MEDICINE CO., TORONTO, ONT. (Formerly Windsor)

Your real problem

The day has gone by when any merchant need consider himself "a small-town merchant." Some surprisingly large businesses are being conducted in the smaller towns by wide-awake merchants who realize that they can secure very wide distribution by using Long Distance.

Distribution is your real problem — not buying or producing. If Long Distance will enable you to materially increase your sales — practically bring the distant customer into your store — as it will, why not follow Henry Ford's advice: "Don't wait, telephone!"

Hupmobile

Millions More
to make Hupmobile Six the
Finest Six under $2000

Hupmobile has spent many extra millions the last 18 years to build superior quality into Hupmobiles.

Hupmobile continues to spend extra millions today to make its Six the finest Six under $2000. Hupmobile has always built only one way—it has always kept faith with its own standards. That's why the name Hupmobile means as much as it does.

That is why you can buy this great Six in the absolute assurance that it gives you Hupmobile performance, value and economy.

Owners reap the benefit—and Hupmobile finds its six-cylinder car in growing demand month after month and year after year.

Those extra millions show in far finer workmanship, in far more thorough inspection, in better steels and in building to scrupulously close measurements.

Hupmobile could build its great Six to ordinary standards, and it would still be one of the foremost cars in America from the standpoint of acceleration, of comfort, of steering and riding ease, of roadability.

But it would not have that surpassing smoothness, that wonderful dependability, that ability to stay away from the repair shop months on end, which makes the Hupmobile Six the great car it is.

Hupmobile Six a Leader, Also, In Complete, Modern Equipment

What goes into a motor car is vastly more important than what goes on it. You will not buy, of course, on mere externals and non-essentials, but on proven performance, dependability, long life, and low cost of maintenance. To superiority in these fundamentals, however, the Hupmobile Six also joins the latest and most complete equipment to be found on any car in its price class.

Oil filter, gasoline filter—low gasoline consumption, thermostatic heat control, snubbers, vision-ventilating windshield, dash gasoline gauge, clear vision bodies, color options—Mohair upholstery in latest mode, walnut grained panels on instrument board and window ledges, 4-wheel brakes, special vibration damper, headlights with tilting beam lenses and double filament bulbs.

Sedan, five-passenger, four door, $1385. Coupe, two-passenger, with rumble seat, $1385. Touring, five-passenger, $1325. Equipment includes 30 x 5.25 balloon tires, four-wheel brakes. All prices f. o. b. Detroit, plus revenue tax.

The Doctor's Love Story

BY H. DEVERE STACKPOOLE.

PART III.

She had been that fateful evening to Carter's to buy a tin of salmon, carrying Pat. She had planned to visit Naylor's front window in the street beyond to have a glimpse at the Christmas tree which was being exhibited, though it was nearly a month before Christmas, which she had seen once already and which she proposed to see every evening, if possible, just as people go again and again to see a play. But Carter's had kept her waiting a terribly long time—so long that only by running as hard as she could pelt could she do the business in hand and get back without the chance of skelping.

But she couldn't run with Pat, so she stuck him in the doorway where she had played so often and which seemed quite safe—him and the salmon—and she hadn't been more than a minute looking into the window before she ran back to find Pat gone.

O'Flynn asked for no more, not even the genesis of the suppositious big man with the black beard. He knew. She had not dared to confess her crime.

He left her happy with two ounces of licorice balls and a scarcely relieved mind, for she had come almost to believe in her own story. Then he turned north toward Cunningham Mansions.

Pat had got to be returned.

There were no two ways about that.

You can't knowingly rob a mother of a child, even though the mother is a Mrs. McGinnis and her habitat Conway Street, W.

He arrived at Cunningham Mansions in a distinctly gruff mood. Margaret let him in. She was all smiles.

She showed him in without a word—a wonderful fact where she was concerned—showed him into the sitting room, where Julia Corkran, her legs off the sofa, to use his expression, was seated in an armchair by the fire stitching.

The fact that she looked better was nothing. What checked him was the fact that she looked younger, more material, more "full of blood."

He listened to her wonderful story of the poor mite that had been left at the door, scarce heeding, he knew the story so well; scarce listening, occupied almost entirely with the change in her, a change of which she herself seemed absolutely unconscious.

Then he followed her into her bedroom, where there was a fire and where by her bedside stood a glorified cot, in which his majesty, Pat, filled with the finest of milk, was sleeping the sleep of the just.

A new hygienic feeding bottle was on the dainty dressing table; things were warming by the fire.

He took it all in, and then, as he watched her bending over the cot, he took in the tremendous fact that he had made this woman a mother.

He had come to tell her the child belonged to another woman and had to be given back. He left without doing so. He could not bring himself to the words or the act. He told himself that he would just as soon take a pistol and shoot her, and then he told himself that, all the same, it had to be done.

This mental discussion took place as he came along New Oxford street in the direction of where he lived.

His mind, made agile by the stimulus of the business, sought hither and thither for an avenue out of this perplexity. Maybe Mrs. McGinnis would consent to part—or, at all events, stand off and adopt an attitude of benevolent neutrality for the child's sake.

The contrast of the Corkran flat and the McGinnis menage appeared before him, deluding him for a moment to believe that no woman in her sane mind would rob the child of its present and prospective advantages.

For a moment only. He knew the poor and he knew his people. He knew that if Pat were to be discovered in Buckingham Palace, in the monkey house of the zoo, or the children's ward of the workhouse infirmary, it would be all the same to Mrs. McGinnis. She did not want a future that she could not visualize for the child. She wanted Pat.

No. There was only one way out—restitution; and, arrived home, he called Norah down, closed the door of the sitting room, and opened his mind.

Norah had to do the business—it was a woman's business, anyhow. She could see Margaret and have a talk with her and between them they could break it to the poor creature.

Norah did not like the thing a bit, but she assented. She never said a word to show her feelings. She was that sort.

"I'll go, when I've done me cookin'," said Norah. And she went.

She was back just before O'Flynn had returned from his evening round, back and sitting in the kitchen with a shawl over her head.

"I couldn't find it in me heart to do it," wailed Norah before he spoke a word. "I couldn't find it in me heart to do it. It's the life and all he is to her, and she wid her beautiful face like the Blessed Virgin hangin' over him. Sure, what's Mrs. McGinnis, lettin' him run wild about the streets wid that girul? Hasn't she enough childer not to be botherin' about the cratur? You tould me yourself the place was like a warren wid them. Childer or not, she can stick. Hand nor foot will I lift for her to fetch him back."

"Then," said the doctor, "I'll just have to fetch him myself."

"Not you," said Norah, suddenly divesting herself of the shawl and furiously addressing herself to the peeling of some potatoes waiting in a bowl.

She was right in a way. As things were standing, O'Flynn would never have had the heart to do the business. But things were not going to stand like that.

It was next day at noon that he received a note from Margaret, the gist of which ran:

For the Lord's sake, come at once. Her aunt, Miss Hancock, has called and won't believe her. She's here now, and I'm keepin' her till you come, though maybe she won't believe you either. Margaret Driscoll.

O'Flynn whistled. In their simple-mindedness neither he, Margaret nor Julia had ever thought of this. He knew what it was that Miss Hancock wouldn't believe, and he had seen the lady once. High-nosed, antique, aristocratic, rather flighty in manner, and with that slight crack in her that seems to run through all Ireland in its people, making them so charming, yet not making, somehow, for clarity of vision and temperate views in the cracked ones.

If she wouldn't believe Julia and Margaret, she certainly would not believe him.

He said this to himself as he got into his overcoat and put on his hat. Then, feeling like a man who holds the ace and queen and knows the king is out, he got into a cab and drove to fetch Mrs. McGinnis.

The routing of Miss Hancock, though a most satisfactory business, was spoiled for the visitors by the conduct of their ally.

Mrs. McGinnis, despite O'Flynn's fine words and promises and despite Julia's fears, refused to part with Pat. She took him away with her, wrapped in a blanket. She showered blessings on all and sundry from the angel's down, but to the suggestion that he should be "left for a bit" she was deaf and to Julia's tears she was blind. She was, in fact, in the mental condition of a cat who has just recovered a kitten. Her one instinct was to carry him off—and she did.

O'Flynn walked home followed by the vision of Julia—Julia standing by the fire in the sitting room, her foot on the fender, her hand on the mantelpiece, her eyes on the burning coals, "controlling herself," while in the next room stood the empty basinette. And it was all his fault. He had never told her the truth of the matter, and she fancied still that Pat had been left at her door by some unknown person.

"I've just got to write her and tell her the truth," he said to himself, and, sure enough, that evening, when the patients were done with, down he sat to the most difficult job he had ever undertaken, for he found when he came to the business that he had to tell her the truth on more points than one.

His heart was moved in him. Julia, the friend and sometimes troublesome patient, had turned into something else.

It was the vision of her standing in her loneliness by the fire that did it—though maybe it had been creeping on him for a long time, this new feeling so impossible to express fully in words.

"I didn't know when I left him on your doorstep I'd left my heart with him," wrote he, "but there it is for you to love and to hold or to kick with your foot." He pursed his lips in thought, then went on and on, covering three sheets of paper, and ending, "If you feel you want to say 'no,' don't say it just send me a telegram with the one word, 'Impossible.' Send it so I may get it before 5 o'clock to-morrow evening. If I hear nothing, then I'll know it's all right, and I will call and see you the day after to-morrow."

He sent Norah to Cunningham Mansions with this note.

Next day he went about his business as usual. Five o'clock found him in the Strand. He had seen the last of his patients an hour ago, but he couldn't go home yet—he went along looking at the shop windows till he reached Charing Cross, then he came slowly back.

Arrived home, he shut the hall door and came to the foot of the stairs.

"Norah," he called out, "has there been any telegram for me?"

"Telegram" came Norah's voice. "No, sir; there's been nothin' but the ould rate collector botherin' to see you."

"God bless him," said O'Flynn.

(The End.)

Minard's Liniment for toothache.

Ruth.

Thomas Hood wrote but little serious poetry, but it has sufficed to give him a high and assured place among the great, if not among the greatest.

She stood breast-high amid the corn,
Clasped by the golden light of morn,
Like the sweetheart of the sun,
Who many a glowing kiss had won.

On her cheek an autumn flush
Deeply ripened;—such a blush
In the midst of brown was born,
Like red poppies grown with corn.

Round her eyes her tresses fell,
Which were blacketst none could tell,
But long lashes veiled a light,
That had else been al. too bright.

And her hat, with shady brim,
Made her tressy forehead dim—
Thus she stood amid the stooks,
Praising God with sweetest looks.

Sure, I said, heaven did not mean
Where I reap thou shouldst but glean,
Lay thy sheaf adown and come,
Share my harvest and my home.

The Glory That Is.

Little I know of Greece;
Why then is my thought abloom
When I hear that simple word?
Why do I find "Grecian" the loveliest
of adjectives?
Why in my reading
Do I pause, transported, over the worn
phrase—
"The blue Ægean."
And why do these old words
Glimmer to me like stars over the
sea:—
Mycenæ, Mitylene, Thermopylæ, Salamis?
Why should there be a quieting
In that old reference, "The Blue
Ægean?"

—A. E. Johnson.

Child.

She paused on airy restless feet,
The wind stood still; a half-sung note
Was caught to silence
In a brown bird's throat.

A petal, dropping from the thorn,
Hung poised upon the air as still
As stars at evening
Hang above the hill.

She ran. The wind ran with her;
The bird took up his song just where
He'd stopped; the petal
Fell upon her hair.

—Abigail Cresson, in Poetry.

"IDEAL Fashions" by Jean Belle Hamilton

1414

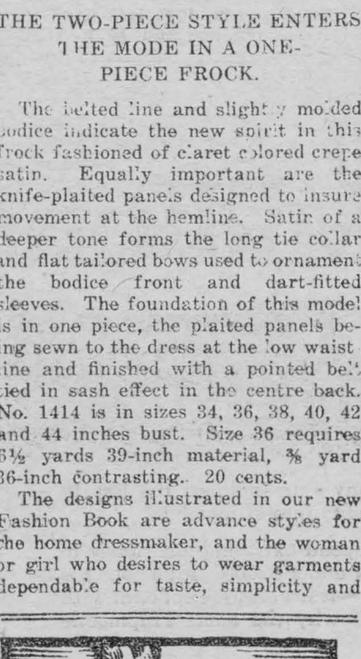
THE TWO-PIECE STYLE ENTERS THE MODE IN A ONE-PIECE FROCK.

The belted line and slightly molded bodice indicate the new spirit in this frock fashioned of claret colored crepe satin. Equally important are the knife-plaited panels designed to insure movement at the hemline. Satin of a deeper tone forms the long tie collar and flat tailored bows used to ornament the bodice front and dart-fitted sleeves. The foundation of this model is in one piece, the plaited panels being sewn to the dress at the low waist line and finished with a pointed belt tied in sash effect in the centre back. No. 1414 is in sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 6½ yards 39-inch material, ⅜ yard 36-inch contrasting. 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.



Dainty Underwear for 15 cts!

Those delicate, true tints the fabric had when new! You can do such tinting if you use *real* dye. Soft, but perfect shades for all your underthings, stockings, etc.

And don't stop with tinting! You can Diamond dye dresses, even your old suit. The true tones in Diamond dyes make home dyeing just as perfect as any professional could do. Any material, any color—right over the old. Diamond dye your drapes and curtains, too. So easy, it's fun—and how economical!

FREE: your druggist will *give* you the Diamond Dye Cyclopedia; valuable suggestions and easy directions, with piece-goods samples of color. Or, big illustrated book Color Craft postpaid—write DIAMOND DYES, Dept. N1, Windsor, Ontario.

Diamond Dyes

Make it NEW for 15 cts!

When Sheraton Designed Furniture.

Thomas Sheraton, the visionary, is representative of designers who influenced their contemporaries in a remarkable degree, but who did not actually practice the art of cabinet-making to any great extent themselves. Sheraton's designs were a fine quarry for more practical men with greater aptitude for business, but he often had not money enough for the bare necessaries of existence.

Sheraton went to London in 1790, passing on in 1806, so that his active work as a designer extended only over a period of six years. He designed furniture for the love of his art. His style is rich with piquant suggestiveness; and in color it is alluring, while in form it is always elegant and refined.

Drawing-rooms in Sheraton's time were furnished with sideboards, secretaries and cabinets on which inlaid ornament was lavished, and the marquetry displayed fine taste as well as elaborate craftsmanship.

Beautiful tables with painted and inlaid tops were much in fashion during Sheraton's period. He was a genius in the invention and construction of complicated articles—such as tables which opened out to make a writing desk, or dressing-tables with concealed mirrors and other accessories. During the eighteenth century, bedrooms were frequently reception rooms, and Sheraton found opportunities for inventing folding furniture which enlarged the accommodation. The lady's dressing case became a card table, and he designed alcove beds, sofa beds and summer beds for coolness.

Bookcases of all kinds and seizes are included in Sheraton's designs—some of these large enough to fill the side of a room.

The French sofa-bed was the forerunner of the sofa which Sheraton fully developed into a drawing-room piece in white and gold. He designed also ample conversation seats, which were luxurious sofas with slender legs.

Minard's Liniment for bruises.

Why "Canada"?

Canada was originally discovered and colonized by the French, by whom it was originally called "New France." Then Jacques Cartier, hearing the Indians use the term "Kannatha" for a collection of huts or a village, applied it to almost the whole of the country, softening it to "Canada." This name was retained after the British conquest of the great territory, though one small part still retains the old name of French Canada.

The Waist that wouldn't wear out

IT was an extra fine piece of crepe—

It was never laundered with anything but Lux and lukewarm water—

It wore and wore until it went out of style—

To keep the wardrobe **Fresh** and **Beautiful** *nothing so good as*

Answering King's Speech.

The "address" is the answer to the king's speech, moved in both houses of the British Parliament. In former times it contained an answer to each paragraph in the speech, but is now a single resolution expressing the thanks of the house to the sovereign. Each house deliberates over the contents of the speech and takes a vote. If only amendments condemning the policy of the government are moved to the address and carried the ministry usually resigns.

Queer Everywhere

Fair friend, to traveler who has just returned from exploring the interior of Asia—"I suppose you saw some very queer people away off there?"

Traveler—"Not any queerer than we see every day right here."

In 1880 there were two hens to every person in the country. Now, it is said, there are four. How, then, does one account for the high price of eggs?

ARE YOU AFRAID OF YOUR MEALS?

Proof That the Stomach is Weak and Needs Toning Up.

Are you one of the many sufferers who dread meal time? Hungry, and yet afraid to eat, because of the pains and discomforts that follow. When the stomach is out of order the whole system suffers, and as the blood becomes thin and watery it becomes increasingly difficult to correct the digestive disorder. There is no tonic for the stomach that is not a tonic for the whole body; thus a blood-building tonic such as Dr. Williams' Pink Pills, not only relieves indigestion, but adds to the general strength. Mr. D. J. Shaw, Selkirk Road, P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot for me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three more boxes and found I had a genuine remedy. I continued the treatment, took moderate exercise, could take plain food without suffering as formerly, and proved that these pills make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach or nerve troubles will make no mistake in giving Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write to-day for a copy of the free booklet "What to Eat and How to Eat."

The Four Friends.

Ernest was an elephant, a great big fellow,
Leonard was a lion with a six-foot tail,
George was a goat, and his beard was yellow,
And James was a very small snail.

Leonard had a stall, and a great big strong one,
Ernest had a manger, and its walls were thick,
George found a pen, but I think it was the wrong one,
And James sat down on a brick.

Ernest started trumpeting, and cracked his manger,
Leonard started roaring, and shivered his stall,
James gave the hugle of a snail in danger
And nobody heard his at all.

Ernest started trumpeting and raised such a rumpus,
Leonard started roaring and trying to kick,
James went a journey with the goat's new compass
And he reached the end of his brick.

Ernest was an elephant and very well-intentioned,
Leonard was a lion with a brave new tail,
George was a goat, as I think I have mentioned,
But James was only a snail.

Rabindranath Tagore

Sir Rabindranath Tagore, noted Indian poet and philosopher, as he appears in his latest and most striking photograph.

The Morning Joy of Morning Glories.

Well-informed people call them ipomea; others call them convolvulus; but the old country name of "morning glories" best expresses the daily delight they bring.

The potentialities of happiness in a penny packet of seeds are always great; but the morning glories seem a little to surpass all others, especially for those who can have but few flowers to cultivate, whose activities must be confined to the pots or boxes on a roof terrace or window sill. Morning glories are ready to grow anywhere and for anyone; just as in the country they will fling themselves over a fence, a porch, or a chicken house, so will they veil with beauty a window frame, a chimney or an ugly bit of city wall. And they are delightful in all their doings from first to last, behaving with a companionable precision which enables one to count upon their charming activities and movements almost from day to day. The slender stalks race upward at amazing speed, thickening and intertwining until they form veritable rose, azure blue, and white, and all richly clothed in leaves. Soon the buds begin to appear, those slender fluted, pointed buds which open out morning by morning into perfect chalice-shaped blooms, violet and rose, azure blue, and white, and all the delicately flushed and tinted shades between.

Each evening one may see just how many, among the innumerable buds at different stages, are ready for to-morrow's blooming: each morning if one rise early enough, they will be found still closely folded, but, with the sun, they open before one's very eyes into perfect flowers; exquisite in form, and color, and growth upon the parent vine. For a few hours the beauty lasts; then, without any sign of disorder or decay, the morning's flowers droop and drop, leaving the vine orderly and prepared for the next day's display.

And all this delight may be enjoyed, not only by the fortunate who spend their summers in the country, but by those in town offices and narrow rooms, who through many months each day may partake of the flowers' offering of loveliness.

Military Strategy.

Uncle William stood watching his nephew and some other boys playing at soldiers attacking a fort. After a moment or two had passed he called his nephew to him and said:

"Look here, Fred. If your side can take the fort within half an hour I'll give you half a dollar."

Fred accepted the offer and hastened to his friends with the news.

About two minutes later he returned to his uncle and said:

"Uncle, can I have the half a dollar? We've taken the fort all right."

"That was pretty smart," remarked Uncle William, as he handed over the coin. "May I inquire as to how you out-generalled the enemy?"

"Oh," replied nephew Fred, "that was quite easy. I just offered the other side a quarter to give in."

The Purpose of Laws.

For all lawes (saie they) be made and publyshed onely to the intente that by them every man should be put in remembrance of his dewtie.—More, in "Utopia."

In Jasper National Park, Alberta, there are about 640 miles of standard trails by which tourists may visit the outlying scenic attractions.

Copies of the Regulations issued by the Minister of Education may be obtained from the Deputy Minister, Parliament Buildings, Toronto.

Surnames and Their Origin

DRAKE.

Racial Origin—Anglo-Norman.
Source—A given name.

Drake is one of those family names which sounds as though there were no doubt about it's being of Anglo-Saxon origin.

While the Anglo-Saxon origin is not unlikely, however, the fact remains that the records point to a Norman-French origin in more cases than to the former.

The family name in its older form was "Fitz Draco" and sometimes "Fitz Drogo."

Incidentally, it has nothing to do with ducks. The given name of "Draco" and its other forms, "Drogo," "Draca," "Drag," "Thrag," "Draeger" and "Draeke," had a meaning of "strength' or "force." The forms ending in "o" were those used by the Normans. "Draca" was the Anglo-Saxon form, as also 'Drag" and "Thrag," and, while these might easily have produced the surname of Drake, there is little tangible evidence to show that they actually did so. "Draeger" was the Danish form of the given name and "Draeke" the Flemish.

FALLON.

Variations—Falone, Falloone, Fallin.
Racial Origin—Irish.
Source—A given name.

Here is a family name which is almost as old as that of O'Beirne; that is to say, it is about 700 or 800 years old, which, as the ages of family names go in England and on the Continent, is pretty old.

In the year 1200 knighthood was "in flower," and all Europe was cut up into petty principalities and baronies, and the sway of kings was merely nominal. Countries, as we conceive of them to-day, can hardly be said to have existed. France, Germany and Italy were merely geographical terms. The old East Roman Empire, lineal heir of the civilization of ancient Rome, was hardly yet in its grave. The Mohammedans were threatening to sweep over Europe as the Teutonic tribes had done when they laid the old empire of Rome low.

It was roughly at about this time that the Fallons gave up the family or clan name of O'Beirne and became the "O'Fallains," adopting the name of "Fallan" the chieftain, as their clan name.

THE ONTARIO DENTAL HEALTH DAY

Province Wide Public Health Effort Promises to be a Great Success.

The Ontario Dental Health Day to be held on Wednesday, October 20th, will be something new in so far as this country is concerned. We have had special days of various kinds but we have never had one set aside for the purpose of informing the public how to protect themselves from the ravages of Dental diseases. The importance of the movement and the necessity for some such activity cannot be gainsaid and the Ontario Department of Health deserves credit for initiating this effort to educate the public in regard to the prevention of tooth decay and pyorrhea.

Many instructive and helpful activities are being arranged and the leading health, educational and social welfare organizations are all co-operating in a most enthusiastic manner. The dentists of the province will give free dental examination and advice to all who request it upon that day. In the larger centres special clinics will be arranged and in the smaller places the dentists will receive the patients in their own offices.

General educational events will also be held. These will take the form of public meetings and mass meetings of school children. In order to stimulate interest in Oral Hygiene among the boys and girls the service clubs are donating prizes to be given to the pupils writing the best essays or preparing the most attractive posters on this subject. Through the kindness and courtesy of the, Ontario Motion Picture Bureau and the Toronto Film Board a short motion picture film will be shown in the leading theatres and the Radio stations wil broadcast useful information on Dental Health. One of the most attractive features of this educational effort will be the window displays arranged by the druggists and many of the merchants who carry fruit, vegetables and other wholesome foods. The programme for the prevention of dental diseases will also be brought to the attention of the people through newspaper, billboard and street car advertisements.

"Late" Marriages Worry the Japanese.

That the Japanese family system, upon which the whole social structure of the country has been built, has been almost completely broken down without the knowledge of the country is the interpretation placed by some Japanese writers upon marriage statistics just issued by the Government.

A survey has shown that the average age of marriage for young men is now between 25 and 29 years, while that for girls is between 20 and 24. Japanese observers point out that not more than twenty years ago such "late marriages" would have been considered a menace to the welfare of the State, and declare that a revolution of the family system has occurred in less than twenty years.

Even in the early days of this century, it is explained, the principal social duty in Japan was perpetuation of the family, and this presupposed early marriage. Girls who waited until they were 20 were rare, and young men were married at 21 years or earlier. But economic force has destroyed this system.

The head of most families can no longer assure support to young married couples while they are getting a start in life. Ambitious young men must attend unversities, from which they do not graduate before they are 25, and after that often obtain a bare living salary for years. Late marriage has been the inevitable result.

Conservative writers regard these statistics with alarm. They declare that Japan's strength has come from the family system and that social chaos impends. But other writers regard the prompt overthrow of the old system as a healthy sign. They point with pride to the fact that Japan has taken her place with other progressive nations in this as in other respects.

Rub your scalp with Minard's Liniment

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

World's Oldest Rose Tree.

At Hildesheim, in Germany, grows what is believed to be the oldest rose tree in the world. It covers nearly the whole of the east side of the parish church.

In the records of the church references are made over a period of fully a tousand years to the training, pruning, and methods of preserving it.

The roots are visible in the crypt of the church.

Minard's Liniment relieves stiffness.

No Gambolling.

"Spring in the air, Mr. Crotchet."

"Eh?"

"Why should I? eh, why should I?"

"I said, 'Spring in the air!'"

One Sea.

The wave which murmurs beneath Eastern skies
And feels the hot kiss of a copper sun
Perchance has known the ice-fields, and is one
With that which thunders where the boulders rise
Around the Cornish coast; or yet has run
A race on Southern pools, where coral lies.

—J. E. McKnight, in "The Sea Anthology," edited by A. H. Bartlett.

His Stone.

Two gentlemen stopped on the street to talk. One was wearing a large diamond tie pin.

"Isaacs," said the other, "dot is a fine diamont you have it. Vare you get it?"

"Vell," explained Isaacs, "my brother he died unt left $450 for a stone. Unt dis is d' stone."

Solitudes.

My heart is a dark forest where no voice is heard,
Nor sound of foot by day or night—nor echo borne
Down the long aisles and shadowy arches, of a horn,
Trembling—nor cry of beast, nor call of any bird.

But always through the deep solitudes a grieving wind
Moves like the voice of a vast prayer; it is your love
Lifting and bending leaf and bough —while, far above,
One though soars like a hawk in the heaven of my mind.

—John Hall Wheelock.

Every Day You Live—

—Can be bankrupted if you borrow trouble from to-morrow.

—Begins life all over again if you start new with the morning.

—Has more pleasant things in it than disagreeable.

—Is a product of all of your yesterdays.

—Is filled with just as many responsibilities as opportunities.

—Will run smoother if you start it with a prayer.

—You can find a hundred reasons for being happy if you look for them.

WOMAN COULD HARDLY WALK

Mrs. Horn Tells how Lydia E. Pinkham's Vegetable Compound Restored Her Health

Hamilton, Ont.—"I have taken Lydia E. Pinkham's Vegetable Compound and would not be without it now. I had a female trouble so badly I could hardly walk and I was all run-down and could hardly get around to do my housework. I would be in bed three or four days at a time. I was told by a friend to try your Vegetable Compound. I did, and by the time I took two bottles I was beginning to get around again. I took ten bottles in all, and now I am all right again and doing my own work. I have six grown-ups to work for, so I have plenty to do. I also used Lydia E. Pinkham's Sanative Wash, and I think it is good. But I owe my health to the Vegetable Compound, and I think if more of it was used women would be better off. I would not be without it if it cost much more."—Mrs. NELLIE HORN, 28 St. Matthews Avenue, Hamilton, Ontario.

Do you feel broken down, nervous and weak sometimes? Lydia E. Pinkham's Vegetable Compound is excellent to take at such a time. It always helps, and if taken regularly and persistently, will relieve this condition. G

For the last few days Mr. Geo. Barr of the Ontario Dairy Department, Mr. G. C. Publow of the Kingston Dairy School, and Mr. Alex McGruer, director of the Dairymen's Association of the County of Dundas have been visiting the cheese factories of the county in order to make the award in the competition for the Silver Cup donated by Mr. Aaron Sweet, M.L.A. Last evening Mr. Barr stated that he had found a wonderful improvement both in the factories themselves, the outside appearance and in the cheese produced. Let the good work continue.—Winchester Press.

• • •

Four Registered Clydesdale horses owned by a Mr. Mulharvey, and valued at $1200 were instantly killed by lightning at the Metcalfe Fair on Wednesday at noon, when a bolt of lightning struck a tree in the fair grounds under which the horses were tied. A colt that stood between two of the horses was unharmed. A large pig was also killed by lightning at the same time.

PROTECTION FROM FIRE AND WEATHER

..TORONTO ASPHALT ROOFING, made by the exclusive Milne System from the finest materials produced, make the ideal covering for your home. This roofing is not affected by extreme change in temperature; will not crack, curl or split, and being a non-conductor of temperature, it keeps your house cool in summer and warm in winter. The Fire Resistant Qualitis of Toronto Asphalt Roofing have been proven and you benefit by thelow insurance rates you get by using this Superior Roofing.

ECONOMY

You save on the initial cost when you buy Toronto Asphalt Roofing because it requires no painting or staining and it is easier to lay. The first cost is the last and it will outlast its competitors.

BEAUTY

Made in soft, pleasing tones of red, green; heather or blue black and has that distinctive beauty and charm which make it a wonderful asset to any home. It costs more because it's worth more, but it's worth more than it costs—SEE SAMPLES AND GET PRICES.
