THE WINCHESTER PRESS

VOL. XLIV — WINCHESTER, THURSDAY, AUGUST 28, 1930 — NO 18

Announcement

For the accomodation of those using mixed feeds we have installed a large, modern type FEED MIXER. This machine will mix thoroughly and quickly any kind of ground feed or grain for cattle, hogs or poultry and will make a much better ration than is possible by hand.

The charge for mixing will be only a trifle; bring in your own grain, have it ground and your Dairy Ration, Poultry Mash, etc. mixed while you wait. We carry a stock of all ingredients used in the best Growing, Laying and Fattening Mashes.

FENNELL & WALLACE, Winchester, Ont.

Our Column

The Canadian National Exhibition is now on at Toronto

School re-opens on Tuesday next. How time flies, only two monthe till Halloween.

As far as this section is concerned the different crops have been of the bumper kind.

Wednesday, September 10, is now reported to be the probable date for the opening of the special session of Parliament to deal with the unemployment.

A Prince Edward boy planted one peck of potatoes and had a yield of 23 bushels. If that youth follows farming and has always such good luck he will be a rich man in due course.

"Doing business without advertising," says some one or other "is like winking at a girl in the dark. You know what you are doing but nobody else does!" When you want people to know what you are doing, printed advertising is a big factor.

Business men who do not advertise aggressively to-day, are just sleeping while local competitors, neighboring cities, door to door pedlars and mail order houses are getting the business they should get. Be one of the wideawake ones who profit most!

In the Middle School examination results, we were pleased to note that Ralph Derby, son of Mr. and Mrs Albert Derby completed his Junior Matriculation by passing with five firsts and three seconds, while Lester Bell, son of Mr. and Mrs. Leonard Bell, had three firsts, three seconds, a third and a credit.

Manners are not like clothes; it is a bad thing to have two suits of them—one for best, and one for every day. Wear your best manners all the time; they suffer more by being put away than by constant use. If you keep your best manners for company they will fit you badly: and your visitor will suspect they were put on for him.

Again the editor's table has been decorated, and this time with a sheaf of Alaska Oats, grown by Mr. C. Hitsman on Dr. P. McLaughlin's farm. The sheaf is four feet six inches in length, and the oats are well headed out. The field of grain is standing up well and Mr. Hitsman expects to have a yield of sixty bushels to the acre.

The Acton Free Press has changed its form from the old style 4 page blanket sheet to the more modern 8 page 7 column size. It is a more convenient as well as a more attractive size and form, and the wonder is that the Acton Free Press so long adhered to the old style when in every other respect it has always been, not only an up to date newspaper, but a leader in the weekly newspaper sphere. The Winchester Press extends congratulations and best wishes.

Commits Suicide

Thomas Robert Shelp, 45, well known farmer who lived about three miles from Russell, was found dead, hanging by a rope feom the head of the staircase in his home, about nine o'clock last Friday morning. Upon discovery, Dr. D S. MacDougall, coroner, was called and pronounced life extinct. No inquest will be held. According to Dr. MacDougall, Shelp had been despondent for sometime and was to have been taken to the Ontario Hospital, Brockville, in a few days. He had spoken of taking his on different occasions.

Seriously Injured

Mr. and Mrs. W. J. Way, 50 High Park boulevard, Toronto, narrowly escaped drowning when the car which Mr Way was driving on the Montreal Toronto highway skidded off the road and stopped on the brink of the canal, four miles east of Morrisburg, Sunday afternoon. Both occupants of the car were seriously injured as the auto stopped against a tree and then turned over less than five feet from the water. Mrs. Way received serious injuries to her head, a fractured nose, cuts and abrasions on both arms and legs, while Mr. Way has serious internal injuries to his chest and cuts on hands and legs.

Editor On Visit

The editor and publisher of the Winchester Press is off on a vacation. He doesn't know how long he will be away, probably eight or ten days but he is motoring, and expects to visit Toronto, Orillia, North Bay, Sault Ste Marie, in Ontario, and Escanaba, Green Bay, Milwaukee, Evanston, Chicago, Detroit, in the United States, then returning home via St. Thomas, Hamilton and Toronto, covering a distance of about 1500 miles, and an extent of territory that would circle most of the province of Ontario. During his vacation Mr. Ross expects to take some notes of the places he visits, and will endeavor to give Press readers some idea of what he saw.

Ayrshire Awards At Ottawa Fair

The chief feature of the Cattle Exhibition on Wednesday at the Central Canada Exhibition was the judging of Ayrshires. Floyd Riddell and Son, Mountain, Ont., secured the first ribbon award by Judge Melvin Begg, Moose Creek, Ont., for their bull calf, Brousedale Sir Henry, which was placed first in a high class showing of Junior Bull Calves. It was the first venture of this firm in the exhibition ring and the quality and finish of their stock on exhibition gives indication of future victories in the show ring. They also showed two animals in the County Herd, which consisted of six, taking second place, which was under the management of J. A. Simpson, Agricultural Representative. They also had 3 Ayrshires, beget of one Sire, winning second place, also in Class 373. 3 Junior Heifers, calved after Jan. 1st, 1930, taking 3rd, 5th and 6th. namely, Brousedale Marie Jewel, Brousedale Jennie Lee, and Brousedale Gold Crest, which are all calves of three-year old heifers and sired by Penshurst Beauty King of Penshurst.

LOCAL AND GENERAL

A meeting of the Presidents of W. M. S. Auxiliaries of this section of Dundas-Grenville Presbyterial was held at the home of Mrs. Earle yesterday afternoon to plan the program for the Sectional meeting to be held at Winchester Springs on Sept. 30th, forenoon and afternoon sessions.

Seventeen convicts in penitentiary at Kingston passed Ontario department of education examinations. Seven secured High School entrance, three passed in subjects for Lower School matriculation, one passed Middle School work and five obtained Upper School examinations Only one out of 18 failed. Two won first class honors, and two took second class honors.

After 39 years in China, Rev. Dr George E. Hartwell, one of the founders of the Christian church in Szechuon province, has returned to Canada. A native of Leeds county and a graduate of the Athens high school, he went out from Queen's University in 1891 as one of the first Canadian Methodist missionaries to West China. Dr. Hartwell penetrated many new sections of China, where in some parts he was the first white man to be seen. He came through the 1895 riots, the Boxer rebellion of 1900 and the revolutions of 1912 and 1927, and many intervening troublesome periods.

Col. J. Keiller MacKay, D. S. O., of Hamilton, Ont., was named president of Ontario command, Canadian Legion, at the closing session of the fourth annual convention held at Hamilton. Col. J. F. Picking, V. D., of St. Thomas, and M. McIntyre Hood of Oshawa, are vice-presidents, and Harry Bray Toronto, convention chairman. Col. B, O. Hooper, D. S. O., M. G., of Toronto, was chosen treasurer. The next convention will be held in Oshawa.

A resolution favoring the taking of an Ontario census of unemployed veterans by the Canadian Legion was approved.

A Narrow Escape

On her way to the office Wednesday morning, Muriel Robinson was knocked down by an automobile at the corner of Spark and Metcalfe St. A cop was soon on the scene and picked her up in a dazed condition. The doctor was summoned but found no bones broken and she was fortunate enough to escape with just a few bruises.

Died This Morning

As we are about to go to press, we are sorry to learn of the sudden death of Mrs. John E. Parker, who resides with her son and daughter on Main Street west. Mrs. Parker is the mother of Mrs. R. M. Elliott, Mrs Frank Smith, Miss Ella and Mr. Frank Parker She was in her 81st year. The funeral will be held in the United Church here at 2 p. m. on Saturday. An obituary notice will appear in next week's issue of the Press.

Killed By Train

A fatal accident occurred on the C. P. R. Tracks, just west of the Railway bridge below Chesterville, at 4.30 a. m. yesterday morning, when Gerald Kearns, aged 27, son of Mr. and Mrs. John P. Kearns was struck by a west bound freight train and believed to have been instantly killed.

He had been to the village of Chesterville the night before attending a dance, and was returning to the home of his parents, two miles east of Chesterville, via the railroad, when the accident occurred. Just how it happened we are not in a position to say. The engineer saw the man when, but a few yards away, but could not avoid striking him, the distance being too short to stop the heavy train. However, after the accident the train was brought to a halt and the train crew picked the young man up at the bottom of a 50-foot embankment. He was brought to Chesterville and Dr. H. H. Casselman was summoned but life had taken its flight before the doctor arrived. The right side of his face, and head were crushed and his shoulders and right arm fractured. Dr. McLaughlin, the coroner, was notified and has decided to hold an inquest, in the Town Hall, Chesterville, on Monday next at 3 p. m.

HELEN SMITH,
A. T. C. M.
Teacher of Piano
Phone 34

Farewell Party

On Monday evening last, a large circle of friends gathered at the home of Mrs. Faye Scott, to say "Farewell" to her daughter, Olga, who leaves next week to enter the Training School for Nurses in the Montreal General Hospital. The party assembled at 8 p. m., and was a complete surprise to Olga. During the evening, Miss Scott was presented with a beautiful silk umbrella, accompanied by an appropriate address, which follows:

Dear Olga:—This is a very happy occasion, also one of deep regret. We are delighted and proud that your High School work has been so successfully completed and that you are ready to enter into a new sphere of duty Although, we deeply regret that your chosen work takes you away from us, yet we are happy with you in your choice of a noble profession.

During your years amongst us, you have endeared yourself to all your friends. Your bright, sunny disposition has brought pleasure and cheer to all with whom you came in contact. Your presence will be missed, perhaps mostly in your home, where you have been a dutiful daughter and an efficient helper. In all activities of the community you will be missed on accont of your readiness to assist with your time and efforts. Your keen executive ability has been a great asset in all your undertakings and has been much appreciated by your fellow-workers.

We, your friends and school mates, wish to take this opportunity of expressing to you our sincere affection and ask you to accept this gift as a token of our good wishes and esteem. We wish you the best of health and all success in your new work.

* * *

After a musical treat rendered by Miss Helen Timmins on the piano, a dainty lunch was served by the hostesses, Mesdames J. L. Dixon, J. W. L. Boyd and H. D. Hutt. The party broke up about ten o'clock, and before leaving, all present wished Miss Scott every success in her new undertaking.

SOCIAL AND PERSONAL

Mrs. Wilbur Heslop, son and daughter, of Lindsay, Ont., were the guests of Mrs. F. A. Coons, on Wednesday of last week.

The Citizen's Band cancelled their concert on Saturday night owing to the wet weather, but will continue as usual this week-end.

A Pie Social will be held on Barrie's Mill Grounds, Chesterville, to-night, under the auspices of St. Andrew's Presbyterian Church. Both the menu and program will be of the best variety.

The engagement is announced of Helen Geddes Agnew, B. A., daughter of Mrs. James H. Ross, Winchester, Ont., and the late Dr. William E. Agnew, of Albany, N. Y., to Dr. John Royden Emery, of White Plains, N. Y., son of Mrs. Emery of Kingston, Ont., and the late Dr. George F. Emery, of Ottawa, Ont. The wedding will take place the latter part of September.

Mr. and Mrs. D. L. McIntyre announce the engagement of their daughter, Vera Edna, to Mr. Norman Merton Durant, son of the late Mr. and Mrs. N. M. Durant of Vankleek Hill, Ont., the wedding to take place the latter part of September. Mr. Durant is a nephew of Mrs. N. W. Beach of Winchester, and lived here before moving to Toronto.

An invitation to Rev. A. G. Cameron, pastor of St. Giles Presbyterian Church, Ottawa, and formerly pastor of St. John's Church, Brockville, to become pastor of St. Paul's Presbyterian Church, Kemptville, will be forwarded to the Capital as the result of a largely attended meeting of the congregation of the local church. Rev. William MacLean, of South Mountain, moderator of the charge, presided at the meeting, which was practically unanimous in issuing the call to Rev. Mr. Cameron The church has been without a pastor since June, when Rev. A. J. Fowlie departed for Almonte.

The village of Toledo, in Leeds county, was the scene of a disastrous fire at an early hour Saturday morning when a garage, service station, and residence, owned by Lloyd DeWolfe, as well as a residence owned by Mrs. Michael Donovan, with most of their contents were completely destroyed. The DeWolfe family managed to escape in their night attire, so quickly did the flames spread from the garage to the residence.

In connection with the residence of Mrs Donovan, there was also a store, and in that of Mr. DeWolfe, a harness shop, the contents of which were destroyed by flames. The loss is heavy, with only a small amount of insurance.

Died

At the residence of his daughter, Mrs. A. H. McCauley, Ottawa, Ontario, on Sunday, August 24, 1930, Joseph A. York, formerly of Metcalfe Ont., in his 81st year.

Raided Dance Hall

In their campaign to stamp out violations of the Liquor Control Act of Ontario at public gatherings throughout the district, Provincial Police swooped down upon a dance at Finch last week and gathered five men into their net. As a result, three were convicted of having liquor illegally and two of consuming, when they appeared in police court at Cornwall. Alex Barriger was convicted on a second offence of having and was sentenced to a three months' term at the counties' jail.

Ottawa District Play-Downs

The first game of the Ottawa District Baseball Playdowns took place on the local diamond on Monday night, when Winchester was defeated by Riversides 12-7. The game was quite exciting in spots but blunders and errors spelled defeat for the local team, while Riversides played a steady game right to the finish In the first two innings, Riversides gathered three runs while the local team failed to score. In the third inning, Winchester received one run and Riversides one but in the fourth inning Winchester counted four times making the score 5-4 for the locals. Winchester held this lead for three innings, but in the seventh Riversides forged ahead again on some bad plays handed out by Winchester. In the eighth the locals nearly evened the score, but then Riversides came back in the ninth and made their total 12 while the local team failed to collect a run on their last batting. Had the local team had all their regular players on the line-up, we dare say they would not have been defeated, but under the circumstances they put up a fine battle and that is all one can expect.

The second game was played at Ottawa last night. The game was closer than the score would indicate, but the local boys, handicapped by the absence of two of their regular players, just couldn't get going on the strange diamond at Landsdowne Park.

Sad Death At Chesterville

On Sunday morning, Aug. 24th, there passed away, very suddenly, at the home of her parents, Mr. and Mrs. Orval Colquhoun, Chesterville, Una May Agnes Colquhoun, in her 17th year. Previous to her death, Miss Colquhoun was in the best of health. On Saturday night she attended a moving picture show in Chesterville, and had listened in on the radio afterwards. Before retiring for the night she had been talking with her parents and evidently was in the best of spirits. About 4.30 a. m. next morning, her father, who sleeps in a room nearby, heard distressful noises and upon going to his daughter's room, found her gasping for breath. He immediately called Dr. H. H. Casselman but before the doctor arrived the girl had passed away. Dr. McLaughlin, the coroner, was notified, and after careful inquiry, decided that death was due to natural causes and that an inquest was not necessary.

The young girl was a fourth form student in Chesterville High School, and an intelligent scholar. She had hoped to be a teacher in the near future. On former occasions, she had complained of being short of breath at times, but this was thought to be caused from an attack of Scarlet Fever which she had only recovered from a few months ago.

The funeral was held at Chesterville on Tuesday of this week, and the sympathy of the entire community goes out to the bereaved parents in the loss of their dearly beloved daughter.

SOCIAL AND PERSONAL

Miss Mildred Rae is visiting Miss Bessie Jackson, Iroquois.

Miss Doris Tweedie of Smiths Falls is the guest of Miss Nora Elliott.

Miss Norma Robinson left Monday to take a Business Course at Ottawa.

Mr. Hugh Knowland, of Prescott, spent a few days with his sisters, here, this week

Dr. Meredith and Mr. Potter visited the former's parents at Lacolle, Que., on Sunday.

Misses Helen and Mary Ellis of Ottawa are spending part of their holidays at their home here.

Mr. Ernest Gilroy of Brockville, is spending this week the guest of his aunt and uncle, Mr. and Mrs. E. A. Gilroy.

Miss Margaret Lasalle, nurse in-training at Ogdensburg, N. Y., was the guest of her sister, Mrs. Jas. H. Larue, on Monday.

Mr. and Mrs. Geo. Earle were guests of Mr. and Mrs. R. Peterson of Toyes Hill on Sunday.

Miss Emma Gardner returned home on Wednesday after having spent a delightful holiday at Edgehill on the St. Lawrence.

Mr. and Mrs. O. Henderson of Toronto, were guests of friends in town this week. Mr. Henderson was formerly on our High School staff.

Miss Hilda Gilroy of Brockville, has returned home having spent the past week the guest of her aunt and uncle, Mr. and Mrs. E. A. Gilroy.

Mr. and Mrs. W. J. Gilroy of Brockville, and Mr. and Mrs. Alf Barnes of Windsor, Ont., were Sunday guests of Mr. and Mrs. E. A. Gilroy.

Mrs. P. L. Gagnon and daughter, Miss Norma, of Durham, Ont., who have been spending the past week the guests of Mrs. Rowat Elliott, returned home yesterday.

Mr. and Mrs. W. J. Clinick, of Woodstock, and Mr. and Mrs. C. G. Simon of Spencerville, were week-end guests of the latter's parents, Mr. and Mrs. Ira Annable.

Hyman Bessin returned to Montreal this morning to complete his fall buying. Hy. was in Montreal Monday and Tuesday but returned to Winchester yesterday evening.

Mrs. Lyman G. Ellis of Moures, N. Y., returned home on Wednesday, after spending the past two weeks at the home of Mr. and Mrs. A. F. Utman and other relatives of this vicinity.

Mr. and Mrs. J. G. Brannon and daughter, Betty, of Kingston, accompanied by Mr. and Mrs. T. J. Wylie, of Winchester, motored to Montreal and spent last week-end with relatives there.

Mr. and Mrs. C. J. Cass, of Ogdensburg, N. Y., and Mr. and Mrs. Wilbur Cass, of Utica, N. Y., who were visiting friends at Cass Bridge, visited Miss Ursula Cass here, before returning home this week.

Mrs. W. L. Palmer and grandsons, Donald and Harold, Miss Bennett, Mr. and Mrs. Rae Halliday and Mr. and Mrs. Wm. Kearney, all of Ottawa, were guests at the Jamieson home the first of the week.

Mr. and Mrs. Wm. Price of Winchester, Mr. and Mrs. Howard Price of Cornwall, and Mr. and Mrs. W. E. Hamilton of Ottawa, visited friends and relatives at Stoneburg, Cleveland, Ohio, and Detroit, Mich., last week.

Mr. and Mrs. Russell Beach, of Ottawa, announce the engagement of their only daughter, Bessie, to John, eldest son of Mr. and Mrs. John Weed of Noroton Heights, Conn. Marriage to take place early in September.

Registrar Dies

Although ill for a considerable length of time, the death of Robert Johnston Dillen, aged 74, at his residence in Morrisburg, last week, came as sudden news to citizens of Morrisburg and vicinity. Mr. Dillen, who has been Registrar for Dundas County at Morrisburg for the past 23 years, having been appointed by Sir James P. Whitney in 1907, was very well known in Morrisburg and surrounding towns and villages.

Mr. Keyes Writes Again

The following letter tells of the further progress of Mr. and Mrs. T. O. Keyes on their western trip. In a private note Mr. Keyes says they have enjoyed exceptional weather, are both well, and enjoying every day of their outing. He writes:

"August 5th and 6th was spent in visiting the principle stores and parks in Winnipeg, and on August 7th we drove by auto north to Lockport and Old Fort Garry. On the 9th we motored 90 miles south to Morden to visit the Experimental Farm, and back to Winnipeg in the evening. The crops between Winnipeg and Morden were good, the worst thing I saw in this district was sow thistle, some fields had more thistles than grain.

On Monday we came north to Melfort. A lot of crops along the way were very poor, some of the wheat and oats not more than a foot high. The crops around Melfort are good. I spent three days driving among the farmers and was in the best field of wheat I have ever seen. I had the pleasure of riding around the field on a combine The grain was in swath and this machine picked it up, threshed it and elevated the grain to a large hopper on top where a truck drove along side and by pulling a lever emptied the grain into the truck and away he went to the Elevator and was back by the time the hopper was full again. This is the most wonderful piece of harvesting machinery I have ever seen. This same machine cuts and threshes at the same time if the grain is good and ripe. I am taking home snaps of this outfit.

Yesterday morning we left Melfort at 5.15 a. m. by auto and drove north to Prince Albert, 75 miles before breakfast, through a good farming section. We passed through streaks where the crops were completely destroyed by hail. After breakfast we came on north 100 miles to Big River, the last 25 miles in the bush, (don't ask any questions about the roads.)

I am camping on Ladder Lake, close to the Royal Canadian Air Force. This is controlled by the Dominion Government. We see the sea-planes landing and taking off from the lake right in front of our camp."

Buy Fruit

For Preserving NOW.

PEACHES—The good quality Peaches are now on, these are excellent for eating or preserving.

PLUMS & GAGES—The crop is very light this year, but prices are reasonable now. Buy your plums and gages NOW as prices are sure to advance.

PEARS—The Bartletts are now ready.

Unemployed in Europe 5,949,287 Germany With 2,757,000 Heads List

London, Aug. 9. — Unemployment reached a new high record in the Old World with the announcement recently by Germany that her total number of persons out of work was 2,757,000. As Great Britain's unemployed officially passed the 2,000,000 mark last month, it is estimated that in six European countries there are to-day at least 5,949,287 persons listed as out of work.

Italy, with 322,287 officially reported jobless, 114,094 of them women; France, with upward of 100,000 on strike and 20,000 out of work involuntarily, and Hungary, with 400,000, mostly agriculturists, idle, brought the total to 5,949,287 officially out of work, while Austria added 450,000 to the roll.

The London Daily Herald on March 3 reported that the total of unemployed in the entire world was 16,000,000.

Great Britain's army of unemployed has been growing since last Autumn and went past the 2,000,000-mark on July 28. As registered in labor exchanges throughout the country, British unemployment, it then was disclosed in official reports, had increased 857,000 in a single year.

In Britain the industries which have suffered most are textiles, with nearly 450,000 idle; transport, with 433,000; building trades, 170,000; coal mining, 255,000, and engineering in its various branches, 413,000.

Germany has experienced an increase of 1,000,000 unemployed in the last year, of whom 51,000 lost their jobs in the last fortnight. In Berlin alone there are 326,935 jobless, as shown in July reports, among whom are 70,000 metal workers; 31,000 building trades workers, 32,000 clerical workers and 5,200 technicians of various lines. Added to these is the usual large representation of unskilled toilers.

Italy's outlook took a turn for the better recently when the government made known that extensive plans had been made for employment in State work of many thousands of persons. The government held the attitude that the gains in unemployment must be checked before Winter and to that end laid down an extensive road-building program to begin Sept. 1 and 15, employing 37,000 men and costing upwards of $10,000,000.

Summer Snow

Has to be seen to be believed. This is town of Stettler, Alta., after a midsummer snow and hail storm dreaded by farmers.

R-100 May Repeat Visit to Canada

Great Airship Now Swings at Mooring After 57-hour Crossing

Cardington, England.—The R-100, largest airship in the world, lay in her home berth (Sunday, Aug. 17th,) after successfully completing a 57-hour crossing of the Atlantic ocean from Canada.

The airship arrived over Cardington airport at 10.40 a.m. Saturday (4.40 a.m. E.S.T.), and was safely moored one hour and 20 minutes later.

Wing Commander R. B. Colmore, Major G. H. Scott and others on the trip believe the success of the initial transatlantic flight is a sure augury for a regular airline service between Canada and Great Britain. They envisage a bi-weekly service of airships de luxe, each carrying passengers and from five to ten tons of mail, under co-operation with the Canadian and British Governments, with private capital.

Meanwhile, they believe the R-100 should be kept in commission on some commercial basis, being sent back to Canada for further experimental investigation, and have frequent transatlantic flights carrying passengers and mails instead of lying idle at Cardington.

Sir Dennistoun Burney, designer of the ship and also a passenger, already has advanced a program for the ship to go back and forth between Canada and England, the British and Canadian Government to co-operate with private capital for the development of a regular service.

The outward crossing was made without incident, except for a tear in one of the fins. After 13 days in Canada the R-100 started for home and made excellent time until she reached the mid-Atlantic.

There she encountered heavy wind and rain which slowed the speed at one time to 15 miles an hour, but later the weather cleared up and the big ship, with a tail wind boosting her along, sped over the ocean at 92 miles an hour. The delay was enough to spoil the hope of a record crossing, but her time was considered good.

Crowds Witness Landing

The dirigible left Montreal at 8.28 o'clock last Wednesday night and completed the 3,287-mile crossing in 57 hours 12 minutes of flying time, as shown by the log.

Great crowds witnessed the landing, giving a warm welcome to the members of the crew and the passengers. Then, after sending a consignment of fresh Canadian flowers to the Queen and a box of Canadian peaches to the Prince of Wales, the officers and men went to their homes for rest, while the lessons of the flight were studied by Britain's air experts.

Comfort, Speed, Safety

E. W. Grange of Ottawa, Ont., who was correspondent for the Associated Press and the Reuter Agency of London on the return journey, spoke enthusiastically of the comfort, speed and safety of the airship.

It is believed that better co-operative measures between Great Britain and Canada for mapping Atlantic weather will result from the flight. Much valuable information regarding air currents was obtained and the knowledge gained will be applied to the charting of future flights.

Observers pointed out that had the meteorological data for Atlantic weather forecasts been complete and prompt, the navigating officers might have avoided the storm which delayed their progress.

Regina Flier Creates New Altitude Record

Regina.—Creating what is believed to be a record for Western Canada, and breaking the Regina altitude flying record, R. B. Keffer, of the Regina Flying Club, climbed to 18,250 feet over the city recently. As Regina is about 1,800 feet above sea level, Pilot Keffer reached the height of more than 20,000 feet. Mr. Keffer carried a thermometer with him on his flight. Freezing point was just about 15,000 feet. At 18,200 feet, the temperature was 20 degrees Fahrenheit or 12 degrees of frost. It took him seventy minutes to make the upward climb, but only ten minutes to descend.

EFFENDI

Effendi, a title of respect in Oriental countries equivalent to the English "sir," is given to members of the learned professions and to government officials who have no higher titles.

Naples Again Swept By Violent Storm

Seventy Injured When Terrific Gale Levels Market in Early Morning

Naples.—Almost three weeks after the earthquake which laid waste wide areas of Southern Italy, Naples again was the scene of a disaster on August 15th which left death and ruin in its wake. A storm of unprecedented violence burst over the city in the early morning, and did a great amount of damage, especially to the agricultural market, Poggioreale, which was completely razed. According to official figures, four persons were killed and more than seventy injured, of whom twenty are seriously hurt.

When the Poggioreale market was just beginning to be crowded with peasants coming in from the country to sell their products, the storm broke, sweeping the city from one end to the other, unroofing houses, knocking down chimneys, uprooting trees and laying low all overhead wires.

Houses shook so much under the violence of the storm that many person jumped out of their beds, believing another earthquake was upon them, rushed into the streets, and called upon the saints to save them. It was some time before confidence was restored and the people returned to their houses and shelter from the driving rain.

Over the Poggioreale market the storm assumed the character of a veritable tornado. It swept down howling upon the market, tearing at all obstacles. Peasants there with their oxcarts, horses, mules and oxen rushed wildly for shelter, while the beasts stampeded among the people and injured many. Soon the air was filled with flying pieces of wood, brick, stones, baskets, fruit and other objects, which rained down upon the fleeing people.

Prince of Wales Now Miniature Golf Fan

His Royal Highness Plays Game With Belgian Queen

Brussels.—The Prince of Wales has become a miniature golf course fan during his visit here.

The first evening after dinner at Laeken Castle, he took Queen Elizabeth to the miniature links of the royal palace and played until dusk.

The Prince's fondness for dancing also was evident recently at the British embassy where Lady Grantville, using high strategy, sent the band home at 2.30 a.m. so that the Prince could get some rest for a busy program.

Camp as Part of School Urged Upon Educators

The inclusion of camp life in the scheme of public education was advocated recently by Dr. Goodwin Watson, professor of education in Teachers College, Columbia University, in an address before 1,000 school administrators and educators.

"My suggestion is," said Dr. Watson, "why not include in public education several months each year, fall, winter and spring, as well as summer, the free creative activities of an informal and democratically organized camp? There seems to be as much good reason for a board of education to acquire property for, and to run, a good public camp for boys, girls and adults, as there is for running a city school building.

"Many youngsters now spend more waking hours in camp than they do in school. There is good evidence that health gains are made during a summer in camp that are not attained by a year of schooling, and is not health one of our objectives in education? There is clear evidence that happiness depends more upon the kind of at-home-ness in the woods, and acceptability of other people as it develops in camp life, than upon all the literature, art and music of the formal school."

Sewing Machines Given To Unemployed Women

Mexico City.—A group of women, unable to find employment, took their troubles to General Manuel Perez Trevino, Mexican Secretary of Agriculture. He knew of no suitable jobs to offer them but, gave them ten sewing machines and advised them to start a co-operative sewing society.

The women thus equipped will apply to clothing manufacturers for piece work which they may do at their homes.

Le Bourget Airport Shows Big Turnover

Goods imported and exported at Le Bourget Airport, Paris, show a steady increase during the last nine years, according to reports to the Department of Commerce. During 1927 the number of packages imported was 30,293, while the number exported was 81,669. Figures for packages imported and exported for the years 1928 and 1929, respectively, were: Imported, 56,050 and 73,326, and exported, 115,662 and 128,681. The increase in value of shipments has been more or less parallel with the increase in amount.

From England, France receives at Le Bourget shipments consisting of dogs, gold and platinum, cotton and woolen cloth, mens wearing apparel, cords, racquets, etc.; from Belgium, laces, embroideries, lingerie and furs, and from the Netherlands, fresh cut flowers, paintings, tungsten filament and strings for musical instruments and racquets. Germany sends, among other things, electric apparatus, surgical dressings, scientific apparatus of measure and control, imitation jewelry, hides and Morocco leather goods. Austria and Czecho-slavokia also send Morocco leather goods, skins, imitation jewelry and small glassware.

Adjustment Made In Train Service

Brockville.—The application of the Canadia National Railways for an adjustment in the train service between Brockville and Westport was heard by Calvin Lawrence and T. C. Norris of the Board of Railway Commissioners here recently, when judgment was given granting the application of the railway, which proposes to discontinue the motor train service, two trips each way daily, except Sunday, and substitute therefor a steam train making one trip each way daily, except Sunday, to become effective with the change of time in September. Representatives of the railway showed that motor car and bus traffic had interfered to such an extent with the railway's business that on this branch the motor train for the last three months of last year had operated at a cost of approximately 50 cents a mile, while the revenue was from 10 cents to 12 cents per mile.

Sir Harry Lauder Greets Americans

Glasgow.—Sir Harry Lauder was the central figure of a gay welcoming party which greeted 1,600 American Scots who arrived recently on the steamships Caledonia and Transylvania.

The tourists, members of the Order of Scottish Clans, hailed Sir Harry enthusiastically, clamoring for a speech and songs. Sir Harry said, in a brief address: "I hope your stay in Scotland will be most enjoyable and that you will go home impressed and invigorated by the visit."

And Artistic Effort

Mistress: "I can see a spider web in the corner, Ethel! To what do you attribute that?"

Maid: "To a spider, ma'am."

Observatory Claims the Stars Rotate Faster Than Sun or Earth

Chicago.—The stars are rotating with an average velocity of fifty kilometers a second, compared to the sun's rate of two kilometers at its equator and the comparatively poky revolution of the earth at about 400 meters a second at the equator. These figures of the rate of rotation of the stars were arrived at by C. T. Elvey, of the Yerkes Observatory of the University of Chicago.

Because the stars are so far away from the earth, it is impossible to get an image larger than a dot of light, even with the biggest telescopes. The rate of rotation cannot be determined, therefore, by the same means used to measure the rotation of the sun, which is large enough and sufficiently close to the earth to give a large image in a telescope.

Mr. Elvey has used the absorption line of the spectrum of ionized magnesium given off by the stars to measure their rate of rotation measuring the spectrum line of fifty-nine different stars to get his average of fifty kilometers a second.

Because the star is rotating half of it is approaching the earth and half receding so that the light waves change in length just as the pitch of a bell changes as a person hearing it approaches or travels away. This change of wave in the light waves produces a widening of the spectrum band, the amount of widening indicating the speed of rotation.

There is a considerable element of error in the figures, it is admitted, because a true rate of rotation can be obtained only when the rotation is at right angles to the line of sight from the earth. The more the axis of the star is inclined away from a right angle to the earth, the less reliable the earth, the less reliable the error, and it is impossible to ascertain the angle of any star. The average figure for a large group of stars, however, gives a fairly accurate result.

"Flying Amy" Gets $50,000 For Flight

London. — Amy Johnson, Britain's London-to-Australia flying heroine, made a triumphal progress in sunshine and rain squalls through the streets of London recently.

Britons, anxious to see "Flying Amy," lined the streets as they do when royalty appears. The aviatrix, whose personality charmed a dozen countries on her recent record air journey, went to a hotel where Britain's conquering youth of 1930, most of them girl celebrities, attended a welcoming luncheon and saw her receive a cheque for £10,000 from the London Daily Mail which, maintaining the traditions of Lord Northcliffe for fostering aviation, rewarded her for her success on the Australian hop.

Raw Pork Eaten in Any Form Called Dangerous

Washington. — A new warning against the eating of raw pork in any form was issued recently by the Department of Agricultre, in view of the death of three persons and the illness of thirty others recently in Reading, Pa., caused by the disease, trichinosis, which resembles typhoid fever and does not respond to treatment.

The victims, it was found, had contracted the disease by eating raw pork sausage, which contained the minute parasitic worms, called trichinae, that infest the meat of swine without noticeably injuring the animals, but may be taken into the human body in insufficiently cooked pork with disastrous results.

"All fresh pork, in whatever form, should be thoroughly cooked to make it safe,' the warning said.

Mother was trying hard to arrange a match between her daughter and the wealthy young landowner. "Beatrice," she said to her daughter, "if Harold asks you to be his wife to-night tell him to speak to me." Beatrice nodded, and then said: "And if he

Empress of Japan Seeks New Record

C.P.R. Liner Would Cut Time Across Atlantic

Yokohama.—Seeking to lower the seven-year-old record for steamship crossing of the Pacific, the Canadian Pacific liner Empress of Japan sailed at 6 p.m. Aug. 14th (1 a.m. Pacific standard time) for Vancouver, B.C., her first voyage between these ports.

The Empress of Japan must arrive before 11.53 a.m. (Pacific standard time), Aug. 22 to shatter the mark made by the Empress of Canada, also of the Canadian Pacific Line. In June, 1923, the Empress of Canada sailed from Yokohama to Vancouver in eight days 10 hours and 53 minutes, averaging 20.6 knots for the 4,814 land miles comprising the great circle route.

The new ship was designed to make 21 knots but in tests easily did 23. She has a gross tonnage of 26,000. She was built in Glasgow, at a cost of $7,500,000 and launched last December. Her maiden voyage was a trip from Southampton to the Far East by way of the Suez Canal. She is 666 feet long, has luxurious accommodations for 1,212 passengers and a beam of 87 feet.

Canada Ranks Fourth In Use of Telephone

Toronto — Latest statistics issued by the Bell Telehone Company show Canada has the fourth laregst number of telephones among the countries of the world. There are 1,334,534 telephones in use throughout the Dominion, or 13.7 for each 100 of the population.

"The fundamental obstacle to peace is our hereditary contentious psychology, perhaps dormant but always explosive."—Sir Henry Worth Thornton.

Shopkeeper: "Why not try one of our Rip Van Winkle rugs, madam?" Prospective purchaser: "What kind are they?" Shopkeeper: "They have an unusually long nap!'

Birthday Present

President Hoover being presented with buffalo horn at White House for his fifty-sixth birthday by delegation of Boy Scouts from district of Columbia, representing Boy Scouts of America.

King's Physician Visiting Canada

Lord Dawson of Penn Praises Medical Schools of Dominion

Montreal.—"The medical schools of Montreal and Toronto are amongst the best in the Empire," said Lord Dawson of Penn, physician in ordinary to His Majesty King George, who arrived here recently. He came from England on the Empress of Australia for a visit to Canada. Lord Dawson, who is accompanied by Lady Dawson and their youngest daughter, Hon. Rosemary Dawson, will also visit Ottawa, Kingston and Toronto before going to Winnipeg to attend the British Medical Association convention.

"His Majesty has made a complete recovery and is in excellent health," Lord Dawson replied to a question. Lord Dawson, with the galaxy of medical and surgical skill he gathered round him during the critical period of His Majesty's illness over a year ago, was undoubtedly responsible for saving the King's life.

Lord Dawson is here for a holiday, in addition to the British Medical Association meetings. He said he was always glad of an opportunity to come to Canada. "I like to visit your big cities, Toronto, Montreal, Ottawa and Winnipeg, and to profit by the large amount there is to learn here. And I mean not only general knowledge but also what is to be learned with regard to the profession of medicine. Your medical schools of Montreal and Toronto are amongst the best in the Empire.

Relaxation Good Medicine

"Relaxation is the essence of a holiday and in planning to go out to the west after the British Medical Association meetings are finished and lose myself in the Rockies, I am just applying good medicine to myself.'

Asked if he would visit the British Columbia coast the King's physician said that to his regret he could not do so this visit. The far west, he said, was so important as to need a visit for that special purpose. He thought Canada too vast a country to be looked at hurriedly and of this, his first visit to the west, he said, "the essence of travel is that one must not move about so much that one hasnt' time to see things."

Artery Test Only Sure Death Test

There is only one sure test for telling whether or not a person is really dead, says Sir Bernard Spilsbury, medical expert of Scotland Yard. This famous authority on criminological science in a recent address before the British Undertakers' Association stated that the mere stoppage of the heart doe not necessarily mean death. He poined out that many individuals have been revived by medical or surgical aid after the heart had stopped beating several minutes.

The one sure test, Sir Bernard stated, is to open up an artery and see if it bleeds as all living arteries should. He pointed out, however, that this method seldom was practiced, except at the specific request of those who feared being buried alive.

Another unreliable sign of death, said Sir Bernard, is the absence of breathing. Many persons have been resuscitated long after breathing stopped.

Sir Bernard agrees with other scientists that, although there is little probabiliy of any one's being buried alive nowadays, the only perfect precaution against it is to have an artery opened by a medical man.

Dirty Pockets Are Germ-Laden Nests

Any doctor will tell you that you habitually carry about with you an army of germs on your clothes. Your pockets often present a happy hunting-ground for disease-carrying germs.

You can verify this statement by emptying a single pocket. When you turn it inside out, what do you find? Little clouds of fine dust spurt from the folds and a kind of whitefluff line the seams. Were a bacteriologist to analyse these he could classify at least nineteen varieties of germs.

When you use your handkerchief you carry these germs from pocket to mouth, nose, and throat. That white fluff in your pocket may be comparatively harmless when dry, but let it become damp through the heat of your body or a shower of rain and it provides an ideal breeding ground for virulent germs.

Do you realize the constituents of that fine powdery dust in your pockets? Some of it is copper, formed probably by pennies rubbing together. Now copper dust contains verdigris, which we know to be a deadly poison. A touch of this dust on your lips from your handkerchief might have serious results. Nicotine dust, another potent poison, is almost certain to be found in your pocket, and phosphorus from the heads of matches.

Keep your pockets clean. Give them a periodical turn-out, brushing the linings and then washing them in disinfectant.

Not in True Colors

The two city business men were talking about their respective employees.

"Yes," said one, "old Smithson has grown grey-haired in my service."

The other sniffed contemptuously.

"That's nothing," he said. "I've got a girl with me who has grown yellow, brown, and red-haired in my service."—Answers.

Cries for help had attracted Percy's attention. A big man was beating a much smaller individual. "Leave him alone!" shouted Percy, who threw himself into the fray and knocked out the big man with a well-timed upper-cut. "Thanks," said the little man after he had pulled himself together. "Now look 'ere, you share the 10-bob note I took off 'im."

Contented Cow Used For Dinner

A contented cow met some hungry heroes in a field.

The cow belonged to French peasants, living near Marigny who had fled from danger in June, 1928, and left the beast behind.

The heroes were American Marines, we are told by Capt. John W. Thomason in "Fix Bayonets" (Scribner's).

The Marines had had no rations that day, nor had they any prospects. So, the writer tells us, "all hands took thought and designated a robust corporal as executioner. He claimed to have been a butcher." Reading on of what happened to delay the Marines in preparing their meal:

He was leading the cow decently away from the road, when a long gray car boomed up, halted with the touch of swank that Headquarters chauffeurs always affect, and disgorged a very angry colonel. The colonel's eye was cold upon the interested group around the cow. They stood now to attention, the cow alone remaining tranquil.

"Lieutenant, what are you donig there?"

"Sir, you see, the men haven't had anything to eat, and I thought, sir—we found this cow wanderin' around—we'd like to chip in and buy her."

"I see, sir, I see! You were going to kill this cow, the property of some worthy French family. You will bear in mind, Lieutenant, that we are in France to protect the lives and property of our allies from the Germans. Release that animal at once!"

The Marines sat down in the wheat and observed the cow.

"Property of our gallant allies, yeh!"

"Old man's in an awful humor."

The lieutenant sucked a straw reflectively. His sergeant solaced himself with tobacco. The cow ruminated, quite content. She had nourished herself at will for three delightful days, since her people, in a farm over toward Torcy, where, at the minute, the Boche was killing a battalion of French territorials, had incomprehensibly turned her out and vanished.

"I was a quartermaster sergeant once," said the platoon sergeant dreamily. "I remember just what the cut of beef are. There'd be fine sirloin on that cow-critter, now. . . . Mr. Ashby."

"If we was to take that cow over an' tie her in that brush—she oughten to be out here in the open, anyway—might draw fire. Shell's liable to hit anything."

"Sergeant, you heard what the colonel said. But if you think she'd be safer, I'd suggest voluntee'rs. And by the way, I want a piece of tenderloin."

The cow was duly secured in the wood, men risking their lives thereby. The Boche shelled methodically for two hours, and the Marines were reduced to a fearful state of nerves, saying to themselves:

"Is th at dam' heifer gonna live forever?"

This was June 5; the battalion near Marigny, on the left of the Marine Brigade, had a feeling that they were going in to-morrow. The men thought lazily on events, and lounged in the wheat, and watched that clump of trees. At last an agonized bellow.

Well, she's stopt one! Thought she musta dug in. Let's go get it."

Children to Learn To Use Both Hands

Paris, France.—The French Academy of Medicine wants all French children to be ambidextrous, contending that if human beings could use both hands with equal facility the world's production in industry, art, science and agriculture could be increased one-third.

There is nothing new in the academy's idea, for Benjamin Franklin formulated it 150 years ago and defended his theory while Ambassador in Paris. Franklin himself could draw or eat with either hand and was very glad to be ambidextrous when his right arm was paralyzed by rheumatism.

The academy has ordered posters printed to be sent all over France, posted in schools and in homes. They read:

"We have two hands. Why should one of them be useless? The left hand equals the right. Give your children the habit to use both hands with equal ease. The future is for the ambidextrous."

Dr. Armaingaud deciared before the academy that the habit of using only one hand, generally the right, was ridiculous, needless and obsolete. He suggest that when children start to eat they should be taught to eat with the left hand and write or draw with the right.

He is convinced that any adult can make his left hand as useful as his right after two months of effort. The easiest training for an unused hand, he says, is in the use of eating implements. The hardest is to use an inexperienced hand in writing or drawing straight lines, but this is all a question of muscular training.

England's Smokiest City

The record for being the smokiest place in England is held by Newcastle-on-Tyne ,where about 900 tons of dust, ash, and tar settle on a square mile of the city in twelve months. Burnley and Rochdale come next, with London fouth on the list.

A number of Scottish yokels, on seeing an old fiddler in the street, went over to him, and one, handing him some coppers, asked him to play "Scots Wha Hae," The old fiddler took the money ,and went rasping away the same as before. The yokels getting tired of this, the spokesman again went over to the fiddler and said to him, "Hi, mon, that's no' Scots Wha Hae'!" "I ken," replied the old fiddler; "that's the skirmish before the battle!"

For 77 Years approved by the mothers of Canada

Canada's Original Arrowroot Biscuits baked in Canada by Christie's since 1853.

Christie's Arrowroots

The Technique of Discipline

Anna Mae Brady

In the lobby of a large hotel sat two mothers resting after a strenuous afternoon of shopping. They were not acquainted, but each had a little son, and these children being unhampered by conventionality soon formed an acquaintanceship.

It was not long before the boys had pushed aside the rug and were sliding over the shiny surface of the floor. They fell often, laughing noisily and were perfectly unconscious of the looks of annoyance thrown in their direction by grown ups whose childhood was so far in the distance that they had forgotten it ever existed.

"Dick Kendal," called his mother in a shrill voice that told of frayed nerves and tired muscles, "Dick Kendal, I want you to come right here and sit down. You are always doing something I do not want you to do. Next time I'll leave you at home."

A few of the onlookers smiled their approval at the humiliation of Dick, who sat down by his mother and began to kick viciously at the chair near him. His mother glared angrily as if his conduct were unforgivable. No doubt Dick would hear more about it later.

The other boy continued to run and slide across the floor bumping the wall and rebounding like a ball. He was entirely unaware of the fact that he was the center of attention.

"Paul," called his mother in a quiet voice, "wouldn't you like to have me read you a story out of the book we bought to-day?"

"Oh yes, Mother," Paul cried coming quickly to her side. "The one about the animal circus. Wont' you please read that one?"

"I'll be glad to," his mother told him. "But you'd better straighten up a bit first." Then, when the rug was replaced, putting her hand on his knee, she said, smiling, "I couldn't have done that any better myself!"

Each mother was successful in having her son discontinue the noisy play that was irritating other people. But what a difference in their technique!

If one is continually being told that he is a bad boy he will come to think he is, and it follows, of course, that he is apt to be "bad." If, on the other hand, he is made to feel that he is a respected member of society, who wishes to do his part and who does it as well as he can, it follows just as surely that he will become like the picture he sees of himself. Moreover, the characteristics he develops in childhood will form a big part in determining lasting attitudes both toward himself and toward life as well.

Mental pictures play a big part in human conduct—too big to be ignored by parents who are striving to lay the foundation for the future happiness and success of their children.—Issued by the National Kindergarten Association, 8 West 40th Street, New York City. These articles are appearing weekly in our columns.

EAGLE BRAND CONDENSED MILK

NURSE your child, of course, if possible, but don't experiment with all sorts of food that you know little about.

Eagle Brand has been the standard infant food since 1857. It is entirely pure, it is exceedingly digestible and there is an ever ready supply at any dealer's no matter where you live or where you go.

Great Collection Of Mummies Found

London.—What is believed to be the biggest collection of mummies ever found together in one place has been discovered in Egypt near the Sphinx.

Dr. Selem Hassan, professor of Egyptology in the University of Cairo and honorary keeper of the Cairo Museum, who directed the excavations, is now in London.

When work was about to be closed down for the season he came upon four layers of mummies, he told a reporter recently.

"It is impossible to say exactly how many mummies there are," he said, "but the number is very large. I examined only one of them, and I have satisfied myself that they are the mummies of very important people. There were leaves of gold on the breast, and the wrappings were covered with hieroglyphics.

"They appear to be about 5,000 years old. The work of excavating them will occupy about two or three years.

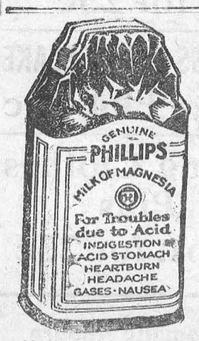
"I have also discovered what I am pretty certain is a vast royal temple of the fifth dynasty. If I am correct, this 5,000-years-old temple should contain great riches in the shape of jewels and statues and other relics of enormous archaeological importance."

Dr. Hassan's discoveries have been made in the great tomb of Ra Ouer, the biggest ever found in Egypt. Ra Ouer (a name meaning "The Great Sun"), was the high Priest of Nekheb (goddess of Upper and Lower Egypt) and right-hand man of eferrirka-ra, who reigned nearly 5,000 years ago.

FOUR FROGS

Four frogs buried for 17 years in the middle of a brick wall of a Canadian penitentiary were found alive and well when the building was torn down recently.

Minard's Liniment removes Warts.



When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

First Aid Champions

This team has taken the First Air championship of Canada and incidentally has captured trophies emblematic of the championship of railway teams in Canada; the Wallace Nesbitt Cup; the Montizambert First Aid contest; and the Ontario Provincial championship. They are the Canadian Pacific Railway's freight office first aid team of Toronto. Back row:—A. G. Shakespeare, director; and W. J. Turk. Front row:—A. T. Curle, Chas. Sellen, W. T. Warren, and H. H. Braid.

A Sneezing Lesson

How do you sneeze? Here are some of the rules for correct sneezing given to a class of children recently.

Hold your handkerchief in your left hand—don't use your right, because you may be shaking hands with someone shortly. Take hold of the bony part of the nose, by the bridge, but be sure you don't pinch the soft nostrils.

When you feel you are about to sneeze, bend your head until it almost touches your chest, and sneeze with your mouth open. Never sniff after a sneeze, but blow the nose and continue doing so until nothing but air comes down.

Never borrow a handkerchief. Carry, if you can, a tethered handkerchief, one tied to a button near your pocket.

Sneezing keeps the passages free and will be found to clear up some kinds of eye trouble, defects in the ears, and also help you to avoid colds.

Was Run Down Now Well Again

Takes Pleasure in Recommending Dr. Williams' Pink Pills.

To the woman in the home illness is almost a calamity. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she is easily tired, is depressed and nervous and has no appetite. In a word, she is anaemic and badly needs help—the health-help that only Dr. Williams' Pink Pills can give her. These pills make rich, red blood which brings new strength and energy to weak, despondent sufferers. Concerning them, Mrs. Paul Rail, Coin du Banc., Que., says: "I was badly run-down, slept poorly, and awoke as tired as when I went to bed. My appetite was poor and I felt miserable. I took six boxes of Dr. Williams' Pink Pills and they completely renewed my health."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Wiliams' Medicine Co., Brockville, Ont.

Garden Hints

It is better to water plants in the early morning or at evening when the sun is less hot. Watering at noonday is often hard for the flowers, and also tends to cake the earth in the garden.

It is well to water thoroughly and not as often rather than to water a little each day. Frequent watering keeps the roots of plants near the surface of the ground and does not develop sturdy roots that can stand drought.

It is helpful, when flowers with large leaves wilt, to remove some of the biggest leaves. Such flowers as marigolds, for instance, which wilt often when first set out, are quickly revived by this attention.

It is better to irrigate than sprinkle the garden. Water allowed to run in around the base of plants where it is needed and cultivation of the soil after the water has soaked in, conserves the moisture to a surprising degree.

It is a good plan when moving and resetting large plants, trees or shrubs, to observe their compass location and reset them in the same relative position.

A Revival

A white wool skirt topped with a sleeveless jumper worn over a lingerie blouse is another new revival. The jumper is belted in brown leather to carry out the sports alliance of brown and white. Smart tennis frocks wear most original belts, often in color to match little Shantung jackets.

For Blisters — Minard's Liniment.

Bingle: "When you found that you had not got your fare, did the conductor of the tramcar make you get off and walk?" Mawls: "Only get off; he didn't seem to care whether I walked or sat down!"

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

Yachting Primitive Sport, Says Lipton

Sailing a Yacht to Him is Of The Essence of All Sport

By SIR THOMAS LIPTON

Engineers and scientists will build better and more wonderful ships than the great Atlantic liners, but nothing will ever be built that will fire the imagination and add so much to sea romance as the sailing ships.

Sailing a yacht to me is of the essence of all sport. Courage and physical fitness are needed, also decision and accuracy of judgment. Yacht racing is something more than merely skimming over the sea; it is an adventurous wretle with primitive nature and the complete enslaving of her riotous moods.

With Spinnaker set and bellied, ballon-jibs bending the topmast, and mainsail stretching its utmost to catch every breath of wind, our racing yacht resembles a great bird under human control, and guided by a man's hand:

I can imagine no greater happiness than to be seated at the helm of the Shamrock, measuring a distance, judging a cross wind, serious, critical, with a practised eye taking the challenge and counter-challenge of my opponents in the race.

From the moment we jockey for the best position on the starting line, off at gunfire, until the moment of re-crossing the line—winning or losing, either is thrilling as long as the sport has been fiercely contested—it is one long, breathless pleasure.

During the race we are at the mercy of two wills—man's will and the wind's will. It is a contest with nature, sea and wind, and the triumph is more meritorious if the odds are against us.

A yacht has character, individuality a soul. You can lavish affection on a yacht, it becomes a part of your life, and during racing days it is your life!

For over thirty years my Shamrocks have provided me with unstinted happiness, and I know they have given great pleasure to thousands of others, mostly landsmen, who have been thrilled by the intense excitement of the international yacht races with America.

This dose of happy excitement and thrilling expectancy will be repeated again during the coming America Cup races in September.

With Shamrock IV., my last challenger, we won two races out of five; this year with Shamrock V. we hope to win at least three races, and make sure.

There can be nothing more thrilling in sport than a modern yacht race, both for the participators and the spectators. It is a great and satisfying sport, simple and primitive in expression, and has its beginnings in the birth of human adventure.

Keep Children Well During Hot Weather

Every mother knows how fatal the hot summer months are to small children. Cholera, infantum, diarrhoea, dysentry, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Love in the Winds

By RICHARD HOVEY

When I am standing on a mountain crest,
Or hold the tiller in the dashing spray,
My love of you leaps foaming in my breast,
Shouts with the winds and sweeps to their foray,
My heart bounds with the horses of the sea
And plunges in the wild ride of the night,
Flaunts in the teeth of tempest the large glee
That rides out Fate and welcome gods to fight.

Ho, love, I laugh aloud and for love of you,
Glad that our love is fellow to rough weather—
No fretful orchid hothoused from the dew,
But hale and hardy as the highland heather,
Rejoiceing in the wind that stings and thrills,
Comrade of ocean, playmate of the hills.

"Fashions are created in Paris but made in America."—Princess Radziwill.

Have Minard's Liniment on your shelf.

Owl Laffs

How time flies! It's now only a little over three months until we'll all be swapping and same-to-you-ing again.

The Modern Chicago Youth on Christmas Morning

Youth of Seven (crying as if his heart would break and holding a six-shooter in his hand)—"Boo-hoo-oo!"

Nearby—"What's the matter son?"

Youth—"I wanted Santa Claus to bring me one with a pearl handle."

A wife is a person who begins at the middle to squeeze a tube of tooth paste.

Saving for a rainy day is a dry subject to the spendthrift.

It is not the quality of the meat but the cheerfulness of the guests, that makes the feast.

Five per cent. seems a pitifully small return on your money until you have tried to get ten per cent. and lose your principal.

She—"Where do all the bugs go in winter?"

He—"Search me."

She—"No, thanks, I just wanted to know."

The Weekly Recipe

Build a little fence of trust around to-day,
Fill the space with loving work, and therein stay;
Look not through the sheltering bars upon to-morrow,
God will help thee bear what comes of joy and sorrow.

Helen—"My sweetheart gave me a rainbow kiss."

Edith—"What kind of a kiss is that?"

Helen—"The one that comes after a storm."

Our idea of a man truly going down in defeat is one with falling arches.

In a small church a child was brought forward to be baptized. The young minister, taking the little one in his arms, said: "Beloved hearers, no one can foretell the future of this little child. He may grow up to be a great business man like Henry Ford, or a great labor leader like J. T. Thomas, and it is possible he might become the Prime Minister of England."

Turning to the mother, he inquired: "What is the name of the child?"

"Mary Ann," was the reply.

Some love is priceless, and some is content with as much alimony as it can get.

Doctor—"Now young man, what have you got to say for yourself?"

His Son (in for a licking)—"How about a little local anesthetic?"

Many a man is in advance of his age—and most women are behind in theirs.

A daring chap suggests that telling women the exact truth about themselves will do them good. Maybe, but we resign from that healing art right now.

Our idea of a pessimist is the fellow who rinses out a fresh sanitary cup direct from its sanitary container, before using it.

Some men have to pay the manicurist a fancy price just for the sake of getting their hands held.

Parting advice: Put a little water on the comb.

We know a man who is so lucky that once, when the street was lined with cars for blocks, another driver moved out just as he got to the point where he wanted to park.

Pain Relieved by Heat—Article in The Literary Digest. Good idea. When somebody gives you a pain in the neck, just get hot under the collar, and the pain will melt away.

A man dropped a bundle of laundry to the pavement yesterday and broke both bottles.

Phonographs are new used in Parisian telephone exchanges to inform users of certain stock phrases as: "The line is occupied; call again, please," and "The number is changed; consult a new directory."

Minard's Liniment for Neuralgia.

By using a steel ball as a diving chamber, a New York scientist has gone to a depth of 800 feet below the surface of the set. He carried on a telephone conversation with people on the tug.

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued taking one teaspoonful in warm water every morning. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides.

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not only feel better but I look better, so all my friends say.

"I shall never be without Kruschen Salts, will never cease taking my daily dose and more than glad to highly recommend it for the great good that is in it."—Mrs. S. A. Solomon.

"P.S.—You may think I am exaggerating by writing such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

Cuticura Toilet Preparations

Delightfully fragrant, highly developed toilet accessories—a most reliable method of cleansing and beautifying the skin and hair. 25c. each everywhere—*Samples free of "Cuticura," Box 2616, Montreal, Canada.*

"Please teacher—"

Only teachers know how trying it is at times to deal with a roomful of children.

What a relief, sometimes, when closing hour comes.

Take time then, to make a cup of tea.

Nothing so soothing for tired nerves.

RED ROSE TEA "is good tea" 106

TWO QUALITIES — RED LABEL & ORANGE PEKOE

Savages Feel Pain Same as White Folks

Although the Australian native or "black-fellow" is believed by anthropologists to respresent the lowest and most primitive human race now surviving on earth, tests of the senses and mental abilities of these people, reported recently to the Royal Society of Australia by H. K. Fry, show little if any difference between them and the whites. The children of the Australian race, Mr. Fry reports, seem to have slightly keener vision that white children of the same age. Among all the Australians, children or adults, the abilities of the eyes are the same as among white people. Optical illusions, for example, affect whites and Australians in precisely similar ways. The Australians have little or no appreciation of what artists call perspective, Mr. Fry found, so that they do not readily see "depths" in a picture, but this apparent deficiency turned out to be merely lack of education in this conventional idea. When trained to see perspective, as white children are trained automatically by seeing pictures from their earliest days, the Australians showed quite as good appreciation of it as anybody else. Recognition and appreciation of numbers was also the same as in whites, although the Australians lacked such results of education as the multiplication table and other elements of conventional arithmetic. The sense of pain and that of touch were found to be the same among Australians as among whites, combating the familiar but probably baseless idea that savages appear stoical under suffering because they really do not feel the pain severely.

"ESTABLISHMENT OF A PORT"

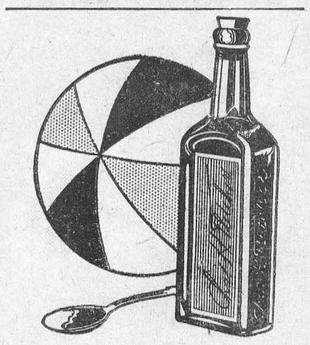
"Establishment of a port" is the technical term for the time that elapses between the moon's transit across the meridian at new or full moon and the time of high water at that place, and is used as a basis for the computation of the tides.

Alec: "It's a fine aircastle you've built. How do you propose to get into it? By airship?" Claude: "No," by heiress!"

The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

MINARD'S "KING OF PAIN" LINIMENT



If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

Iceland's New Stamp

To commemorate the millenary of the establishment of her government, the Althing, Iceland, has isued a special series of sixteen handsome postage stamps.

Their subjects recall Icelands' Viking ancestry, and we see the intrepid Viking sailors braving a storm (5 aurar) in their winter camp (7 aurar), and naming the island according to their own custom (15 aurar).

There are four stamps specially devoted to the Althing and its history. Lake Thingvalla Vatn, near which, at Thingvellir, the first Althing was held in 930, appears in the 30 aurar value. And we are shown this actual meeting in progress on the 50 aurar specimen. In the 25 aurar stamp, woodgatherers of Iceland are depicted.

Ludwig Hesshaimer, an Austrian engraver, who is responsible for producing the dies for these stamps, revives interest in the Icelandic runes—that country's ancient alphabet. He has incorporated them in the frames of several of the labels.

AEROXON With The Pin

The Honey Fly Catcher

You Must Do Your Bit in the war against the fly, carrier of germs and breeder of disease.

It is proven that AEROXON is one of the most convenient and most efficient means of combating this fly evil. It is convenient, because of the push-pin. It is hygienic, flies never get away when once caught. Each spiral gives three weeks' perfect service.

Legal, Municipal and Government advertising 12c per line first insertion and 6c line for each following. 12 lines to inch.

THURSDAY, AUGUST 28th, 1930.

The Temperance Question.

For over twenty years the editor of the Winchester Press has been fighting the national curse of intemperance and the liquor traffic. No one has more sympathy for the man who has become a slave to the liquor habit than we have. But our labor and our efforts have been directed not so much toward reforming the drunkard as they have been toward saving the boys from the awful curse that surrounds and is ever spreading alluring traps to catch them. And the most logical, the easiest and safest way to save the coming generation is to remove the temptation of liquor as far from them as possible.

During the past few months some very able and almost convincing addresses have been delivered, both in Canada and the United States, on the question of Prohibition. Men of education, men who are entitled to public respect, have advanced, in their way of thinking, many plausible arguments against prohibition. So have some women in the United States.

By thinking along a certain line one can almost convince oneself of anything. We have not the slightest doubt as to the sincerity of those opponents of prohibition. But reading their addresses we find that nearly all of them pursue one line of thought. They object to Prohibition because it interferes with the liberty of the people, it takes from man a pleasure they think he has a right to enjoy, irrespective of the effect it may have on those who fall a victim to its tenacious hold. It is also, they claim, an inciter to crime, it creates a system of illegal trafficing, and diverts a great source of revenue from the government into the pockets of the few who give their attention and their ability to this illegal traffic.

It is further claimed that many good men and women, prominent in church and social life, are opposed to prohition.

The Press was told only recently, that if the United Church did not drop its opposition to the Liquor Control Act, it would lose many of its most liberal contributors and prominent members.

Besides, it is pointed out, especially in Ontario, that the majority of the people have declared, by their votes, that they are in favor of the present Liquor Control Act as against a prohibitory Act.

All of which gives one cause for serious thought and consideration. To keep an open mind, to give careful consideration to both sides of an argument, to be fair to your opponents, and credit them with unselfish and sincere motive to promote what they believe to be the best interests of the people as a whole on this very vexed question of Prohibition and Control of the liquor traffic, should be the attitude of every thinking person,

And that is why the Press is publishing this article. We do not wish to be misunderstood in any respect, but we want to be perfectly fair and considerate.

Having lived more than the three score years, and having seen much of life, we look back, and after a careful review of the situation we cannot conclude other than that alcohol is our greatest national curse. It has wrecked more homes, it has ruined more promising careers, it has robbed of manhood and parental regard more husbands and fathers, it has caused more suffering and heartaches, it has driven more men to crime and women to shame, than any other agency known to civilization—and this we say, because of what we have personally seen, because of what statistics and history reveal.

Futher, so far as the attitude of certain churches and church members are concerned, we do not take the position that they do not believe what they practice in their support of the liquor traffic, but we do think that they allow their minds to travel in a single track, and will not, probably for selfish, social or political reasons, give the question that fair consideration and research that it deserves Very few people but believe in their hearts that the God they worship is a God who hates sin, and who desires his people to live clean, wholesome; honest and useful lives. Alcohol is the enemy of such. No real good ever has, or ever will come from the free use of spirituous liquor as a beverage, and no one who has studied this question will ever give his sanction to its use in such a manner.

So, notwithstanding the set-back in Ontario, notwithstanding the boycott by government officials, nothwithstanding the ill-will and opposition of political friends and foes, the editor of the Winchester Press will fight this liquor question as long as his mind can think and his hand use a pencil.

Will Cornwall Separate

Appearance would indicate that the town of Cornwall intends to apply for separation from the United Counties. The Town Council sent a committee to Oshawa to see how separation was working there, and from reports received they seem to have been impressed favorably with the idea of separation. The Cornwall Freeholder advises caution, and think that too hasty action might tell against Cornwall becoming a good sized city in the near future by taking in, or annexing, the suburban parts. So far as the Counties are concerned, it is not likely to make much difference financially, because future Councils will, to use an old saying, "have to cut the clothes according to the measure." Perhaps the time is not far distant when County Councils will be done away with altogether.

Do You Wish The World Were Better

Do you wish the world were better?
Let me tell you what to do:
Set a watch upon your actions,
Keep them always straight and true,
Rid your mind of selfish motives,
Let your thoughts be clean and high.
You can make a little Eden
Of the space you occupy

Do you wish the world were happy?
Then remember day by day
Just to scatter seeds of kindness
As you pass along the way;
For the pleasures of the many
May be oftimes traced to one,
As the hand that plants an acorn
Shelters armies from the sun.

—Ella Wheeler Wilcox.

Melvin News

Miss Beth Carlyle of Dunbar and Miss Jessie Johnston of Cardinal spent last week at the home of the former's brother, Mrs. Kenneth Carlyle.

Mr. Ferdinand Perron Mr. Alfred Salvail and Mr. and Mrs. Mainville, and two children, all of Montreal, spent the week-end at the home of Mr. and Mrs. J. E. Lanoue.

Mrs. Jack Barrett of Massena, N. Y., spent last week with her parents, Mr. and Mrs. M. R. Black.

A number from here attended the Ottawa Exhibition last week.

Mrs. A. Salvail and daughter, of Montreal, returned to their home on Monday after spending the last two weeks at the home of Mr. and Mrs. J. E. Lanoue.

Mrs. Isaac Hughes of Winchester is spending this week with her daughter, Mrs. Arthur Christie.

Miss Eva Gibson returned home Thursday evening after spending some time with friends in Ottawa, accompanied by her cousin, Miss Ina Vergin, of Ottawa.

Mr. and Mrs. Jim Johnston and family, of Cass Bridge, spent Sunday at the home of the former's daughter, Mrs. Dalton Robinson.

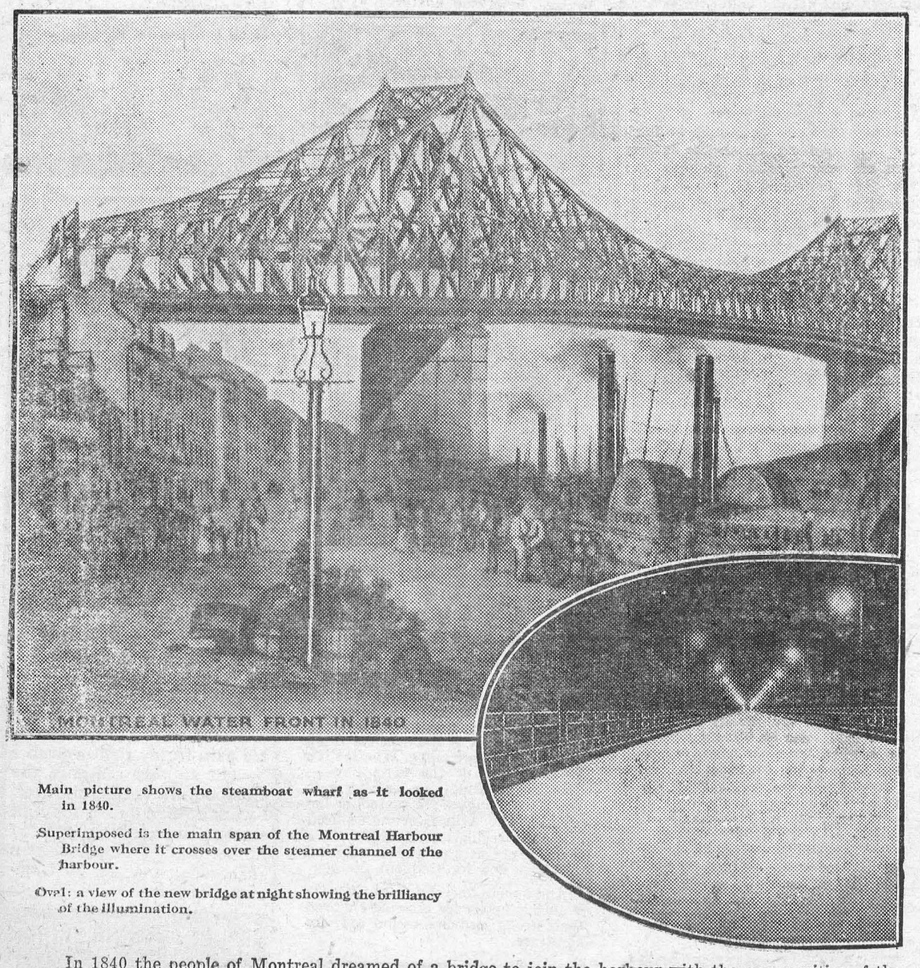
Mrs. J. F. McVey of Winchester, spent Tuesday with her daughter, Mrs. Kenneth Carlyle.

Mrs. Albert Steinberg of Morewood, and Mrs Georgia Rorison of Carleton Place, spent part of last week at the home of Mr. and Mrs. M. R. Black.

Mr. and Mrs. Ed. Strader, Mr. and Mrs. Alvia Strader of Brinston, and Mrs. Marcia Streder of Cass Bridge, spent Sunday at the home of Mr. and Mrs. Elgin Black.

Mr. and Mrs. Robt. Bethune and baby, Gordon, of Braeside, spent Sunday at the home of Mr. and Mrs. S. A. Greer.

A Dream of Ninety Years Ago Comes True



Main picture shows the steamboat wharf as it looked in 1840.

Superimposed is the main span of the Montreal Harbour Bridge where it crosses over the steamer channel of the harbour.

Oval: a view of the new bridge at night showing the brilliancy of the illumination.

In 1840 the people of Montreal dreamed of a bridge to join the harbour with the communities of the South Shore. The site they then selected was that on which now stands the magnificent structure known to us, three generations later, as the Montreal Harbour Bridge, officially opened on May 24th, 1930.

The single 16 candle-power gas lamp in the foreground is typical of the scientific darkness of its day, for it was not till 1880 that electric light was installed in the Harbour of Montreal. Today the dream of ninety years ago is realized in the bridge—one of the world's finest monuments to modern science and engineering—illuminated by 165 one-thousand candle-power incandescent electric lamps—a total of 165,000 candle-power. Special plans for this unique installation were designed by the engineers of the Harbour Commission in conjunction with illumination engineers of the Northern Electric Company Limited.

Mr. Alex Taylor and son Lorne, of Grantley, Mr. Clayton Hummel and Grant Taylor of Yonkers, N. Y. and Jimmie Hummel, of Chesterville, spent Sunday with Mr. and Mrs Geo. Hummel.

Mrs. A. J. Casselman and Melba, spent the week-end with her mother, at Toys Hill.

Mr. Sidney Froats of Beckstead, spent Monday with Mr. Earl Hummel.

Mrs. Ralph Allison and Master Lloyd, spent sometime with Mr. and Mrs. E. Johnston at Toys Hill.

Mr. J Casselman and Delmer Wilson had tea Sunday evening with Mr. Myles Hummel.

Mr. and Mrs. H. Patterson and family, called on Mrs. A. Bailey, recently.

Mr. Dalton Thompson and family, called at the Hummel home Sunday. Miss Lera accompanied them home for a few days.

Mrs. W. W. Stinson and family, of Ottawa, Mr. and Mrs. Wallie Bolten, Mr. Lloyd Casselman and Mr. Roy Weaver, of Richville, N. Y., spent Sunday with Mr. and Mrs. Thos. D Nesbitt.

Mr. and Mrs. F. Bolten and Mrs. Duff spent Sunday at Avonmore.

Morewood

Mrs. Joseph MacFarlane of Combmere, spent a week with Miss Ellis Smith.

Mrs. Abner Dillabongh and daughter Sybil, spent the past week with her sister, Mrs. Basil Brooks of Trenton.

Mr. Fred Weaver is spending a few days with friends at Adirondacks.

Mr. and Mrs. Harry McKercher and daughter of Toronto, Mrs. McIntosh of Winchester Springs, visited on Sunday with Mr. and Mrs. Wesly Reveller.

Mr. and Mrs. James Smith, Mr. Thos. Hamilton and Mr. and Mrs. Willie Hamilton of Chesterville, spent Sunday with Mr. and Mrs. Ira Barrington.

Mr. and Mrs. J. T. Flegg of Glen Bush, spent Sunday with Mr. and Mrs. George Flegg.

Mrs. Lettie Bogart and daughters, Jean and Kathleen spent a few days with friends at Gravel Hill.

Mr. and Mrs. W. H. Coventry, Miss Pearl E. Coventry, Mrs. Violette Pease and child, MissMarguerite Coventry and Miss Evangeline Coventry of Chicago, spent Monday with Mr. and Mrs. George Bogart.

Miss Margaret Carlyle and Mr. Hugh Fetterley of Ottawa, spent the week-end with Mr. and Mrs. Lyle Gibbons of Brockville.

SWERDFEGER—HUFFMAN

At the Athens United Church a pretty wedding was solemnized on Saturday, August 16, at 3 o'clock, when Ruth Augusta, daughter of Mr. and Mrs. W. J. Huffman, became the bride of Rowat Clifford Swerdfeger, Toronto, son of Mr. and Mrs. W. N. Swerdfeger of Morewood.

The Bride, who was given in marriage by her father, was smartly gowned in pale pink chiffon with picture hat and shoes to match, and carried a shower bouquet of Ophelia roses. She was attended by Miss Eleanor Sloan, Kingston, who was gowned in powder blue chiffon with matching hat and shoes and wore a corsage bouquet of roses and cornflowers.

The bridegroom was supported by Mr. W. M. Drummond, of the Staff of Toronto University.

The ceremony was conducted by Rev. M. I. Robinson and the wedding music was played by Mr. Murray Curtis.

Following the ceremony a reception was held at the home of the bride's parents, after which Mr. and Mrs. Swerdfeger left on a motor trip to Quebec. The bride and bridegroom are graduates of Queen's University. On their return they will reside in Toronto.

The Present

We live but in the present,
The future is unknown—
Tomorrow is a mystery,
Today is all our own.
The chance that fortune lends to us
May vanish while we wait,
So spend your life's rich treasures
Before it is too late.

The tender words unspoken,
The letters never sent,
The long-forgotten messages,
The wealth of love unspent.
For these some hearts are breaking,
For these some loved ones wait—
So show them that you care for them
Before it is too late.

ALCOHOL

More alcohol is being distilled in the United States than ever before. That has nothing to do with prohibition. The use of alcohol in industry has multiplied enormously since the war. The new chemical industries use it in a thousand ways. Next to sulphuric acid, it is the most important of all chemicals. Business would stop, in hundreds of lines, if the manufacture of alcohol stopped. But less grain is being used for alcohol than before. Molasses and potatoes are the chief sources of industrial alcohol. The sugar-growers of Louisiana are getting real money now for what used to be pure waste, and the potato growers of Maine, Michigan, Maryland and the other potato centers have a more stable market for their product.

CITIZENSHIP

Becoming a citizen of the United States ought to be as impressive as joining a church or a lodge. When you join a church it is a solemn occasion. You are welcomed into the communion by a ceremony in which minister, elders, deacons or other officials take the lead and the whole congregation participates. When you join a lodge you are, for the moment, the central figure among the brothers; you are made to feel that you have achieved a new importance in their eyes, a new dignity in your own esteem. But when a man or woman goes into a naturalization court to get his final papers he is treated as if Uncle Sam wished he had stayed at home.

It would be a useful service for any Chamber of Commerce to undertake to make of the admission of aliens to citizenship an occasion for public rejoicing. And if the same idea could be extended to an annual welcome to the new American-born voters who have just come of age, that would certainly help impress upon them the responsibilities and the dignity of American citizenship.

TENDERS WANTED!

Tenders for Drainage Work

Sealed tenders addressed to the undersigned will be received up to Saturday, Aug. 30th, 1930, for the excavation of the Mullen Drain Improvement, Con's. 4 to 2 in the Townships of Mountain and Winchester. The length of the drain is 19182 ft. The amount of excavation is 6872 cu. yards. Each tender must be accompanied by a certifide cheque payable to the treasurer of the Municipality for 5% of the tender. All or any bids may be rejected if not satisfactory to the Council of the Municipality.

Plans, profiles, specifications and tender forms may be seen at the offices of the undersigned.

What Makes a Job Good?

ONE morning the elevator starter was breaking in a new elevator-boy.

At noon the new boy was running the car alone. He had on a uniform, and was starting and stopping with the confidence of a veteran.

From apprentice to professional in a couple of hours.

What thoughts are in that young fellow's head as he receives his instructions from the gray-haired veteran?

How can he fail to look forward and see in the older man a picture of himself twenty years from now.

He is taking up a low paid job—a job with no future. Twenty years from now he will be just where he is to-day—only older, with a grasp on the job somewhat less secure. His experience will count for nothing, because it is experience that any other man can gain in a couple of days.

He may from time to time, force an increase in his pay. But the increases will not be large. Why?

Because he learned the job in two days. And in any other two days the company can find plenty of men who will learn just as fast and take the job away from him.

Recently I met in a hotel restaurant a friend of mine who has just come back from England after taking special work in surgery under some of the greatest men in the world.

He is thirty-one years old: it is fourteen years since he entered college.

For ter of those fourteen years he has been in medical schools, in hospitals, and in foreign countries studying.

Fourteen long years of hard, uninterrupted study. Years made more difficult by the necessity for self-support: and filled sometimes with questionings, as he has seen his college class-mates moving forward to their places as well paid physicians, and he lingering still in school.

Yet with what result?

He has acquired a specialized training such as only a few other men in New York possess.

He will begin life with an income of several thousands; he will pay back his educational debts in a couple of years; in ten years his income will be tens of thousands.

Fourteen years of his life went into the mastery of his profession. But he need have no fear of losing what he has gained. **No other man can displace him, except at the cost of fourteen years of work.**

And when he said it he epitomized the philosophy of Business.

The job that the gods sell for two hours' training is worth just what it costs.

Only that job is worth much which has tied to it the price tag of constant, unceasing study and work.

NOTICE!

Parties assessed in either the Lough, Barkley, Moriety or Kittle Creek Improvement Drains in Winchester Township have the privilege of paying their assessment before September 1st, after which time debentures will be sold.

Still Fresh

With fresh vegetables and fruit now plentiful on every hand, one might wonder at a group of men in the packing industry sitting down recently to dinner at which were served cantaloupe, steaks, asparagus, green peas, and ripe strawberries, all two years old, and yet delightfully fresh. It was simply a demonstration of the new quick-freezing system of preserving food. Anyhow, what is a year or so more or less?

Keans: "When I got home very late last night my wife met me in the hall and for a full minute she regarded me in silence." Bliggs: "At length she spoke:" Keans: "Yes, also she spoke at length!"

Native—"Yes, we always have a west wind here." Visitor—"But the wind is coming from the east now." Native—"That's the west wind coming back."

Watch Your Baby's Teething Antics

If you had to eat sharp-pronged cactus leaves you might be willing to look like a camel. That poor animal of the desert must eat thorny foods, so Nature provided that he should have very prominent teeth and lips that could stretch up over them. This may help in keeping that hump-backed animal from having bleeding lips and a sore mouth.

But since we are not obliged to reach down into prickly cactus to get food, we ought to see to it that our faces and jaws look like normal human beings. We should not let little babies suck their thumbs, or that demon of invention called the "pacifier.' We should not starve our children by neglecting to see that the prospective and nursing mother gets proper foods with which to nourish the beginning, the hidden teeth. When the children are older we should keep on giving them proper foods and also attend to the cleaning of their newly erupted teeth. The dentist should examine their mouths with a view to preventing trouble both from disease of the teeth and malformation of the jaws.

Camping Grounds for Germs

Raw vegetables and fruits and whole wheat, or whole grain cereals, are better than sweets. Natural sweets such as honey, raisins, dates, and figs are better than candies when sweets are given.

Neglected teeth, and unclean and abscessed teeth, are the camping ground for all sorts of germs, which are breeders of that condition known as pyorrhea. In this disease the bone supporting the teeth, the membrane which fastens the teeth to the bone, and the gums are gradually destroyed so that the teeth become loosened and are eventually lost.

Healthy gums are hard and tough and should not bleed. Teeth and gums which have been properly brushed and cared for from babyhood should not become diseased except under exceptional conditions.

The formation of the jaw and the proper relationship of the teeth to one another are important, since they contribute to the appearance and health of the teeth and to the tissues that support them. They are important also for the mastication of food which is so essential to health.

When the teeth and jaws are brought together in mastication, or closed, they are in "occlusion." If they are straight and even it is called "normal occlusion." If they do not meet properly and are irregular there is "mal-occlusion."

Seven Golden Rules

The upper incisors are wider than the lower and should overlap them like the blades of shears. The bicuspids and molars have cusps which grind the food; they come together like cogs in a wheel.

The ugly projection of the jaws sometimes seen in people is not necessary. It may be caused by pacifiers, teething rings, thumb sucking, mouth breathing, the premature loss of baby's teeth, or the loss of the six-year molar, which is a permanent tooth. Any of these things by changing the pressure of the muscles of the jaws may cause the bones to develop abnormally, thus causing a misshapen face.

Everyone is entitled to straight teeth, normal jaws, and a good-featured face. If you would prevent your child from having a face like a camel's observe the following rules:

See that the expectant mother has foods that build good teeth and bone.

See that the child has foods that build good teeth and bone.

See that the food is of a type that will demand exercise of the teeth and jaws in chewing.

See that the teeth and gums are kept clean and healthy.

See that the child has no pernicious habits which cause "malocclusion."

See that the baby teeth are not lost before their time.

See that the six-year or first permanent molars are saved.

Snigger—"I'm sorry your wife opened that business letter I sent you. You told me she never opened your mail." Snogger—"She doesn't as a rule, but you marked that one 'private.'"

Nature hates to disappoint the man who is always looking for the worst to happen.

Watch Your Calories And Reduce Slowly

By Marie Ann Best

What is a Calorie?—Article 4

A calorie is a heat unit, and is the amount of heat necessary to raise one pound of water four degrees on the Fahrenheit thermometer. This is ascertained by the use of an apparatus especially made to find out the heat values which the different kinds of food possess.

So a calorie is not heat. It is not food. It is simply a unit of measure.

We want to know then, how many calories of food we should have each day to bring on this reduction in weight.

In next weeks' article we will explain more fully how many calories are allowable and still reduce. Just now it is enough to know that 1200 calories per day should reduce the average person about 2 pounds each week. If it causes more loss of weight than two pounds add a few calories, and if you do not reduce on 1200 try 1000 calories.

Do not try to reduce any more than two, or at the very most three pounds per week, under under a doctor's care.

This does not apply to the first week or so, when you may note a drop of 4 or 5 lbs. or even 6 lbs. This is the easiest fat to get rid of since it is not quite formed as yet and is watery in texture. As you progress you will find yourself reduce about two pounds per week.

All foods have calories, some kinds having many more calories than others. We over-weights want to know how we can eat only 1200 calories a day and still not have to endure the gnawing pangs of hunger which break down our resolutions to reduce.

There is a way. But first there are two important principles to remember when trying to reduce.

1. We must cut down on the calories of food we usually eat. The number of calories must be decreased until it supplies less than the amount of energy fuel needed.

2. We must increase the energy expenditure by exercise, but (and this is important), we must not eat more calories with the increased exercise.

The reward comes when we find the reducing is accomplished because we refrained from eating enough high caloried foods to provide for that exercise, so the body draws on the surplus fat for fuel to supply the energy and heat needed. We took longer walks, perhaps, or worked harder in our homes, but when we were hungry we ate something satisfying but low in calories.

Perhaps we ate a big lettuce and vegetable salad with one slice of bread and butter instead of two or three. But remember, one is very necessary. It is important to eat some of all the main foods whether high or low in calories. Although fruit is a little high in calories, it is very beneficial for it teems with vitamns and mineral matter. One secures more good out of a large sliced orange, which counts 100 calories, and a piece of light cake, which counts about 200 calories, than out of a piece of pie with two crusts, which counts 350 calories. If you are still hungry, have a bigger salad. Tea and coffee have no calories, but the cream and sugar have. Learn to take it clear if you can. I have gradually grown to be very fond of coffee with no sugar. One can do without certain things quite nicely if one is allowed to chose one's own way of what to cut down on.

We will now discuss calories of food. If foods you like are not listed, judge its value by something like it whose food value you have ascertained. Observe the following:

1. After every meal do not fail to count up your calories in your handy note book and add them up at the end of the day. If you overate your alloted quantity of 1200 calories per day you will need to make up for it the next day, but be sure to eat your three meals.

2. It is a good custom to save about 50 calories for half a cup of warm skim milk, a cupful of bovril, or a couple of crackers before you retire at night. An empty stomach is hard to sleep on.

3. As the foods appear with their calories in the different menus of average helpings, copy them out under their proper headings fo future and easy reference. These comprise meats, fish, vegetables, fruits, dairy products, breads, breakfast foods, candy, pastries, sauces, nuts. Measurements are only aproximate, but you will reduce on them.

Suggested Menus of 1200 Calories Daily

On arising drink not one, but two glases of cold water. It acts as a tonic to the stomach if taken first thing in the morning.

If necessary for free elimination drink two cups more of hot water just before breakfast.

(For the term average helping the initials a.h. will be used).

Breakfast

	Calories
½ large grapefruit or 1 large orange	100
1 teaspoonful whit sugar	25
2 slices melba toast 3 in. by 4½ in. or 1 slice white or brown bread	100
Butter, ½ tblsp.	50
Coffee, clear	00

Drink freely between meals. Get the habit. A glass of water, preferably warm, takes away the hungry feeling.

Dinner

	Calories
Beef roast (no fat) a.h. 4 oz. or fish lean, halibut or cod, 4 oz.	150
1 medium size potato	100
Large chunk of twenty minute boiled cabbage or 4 tblsps. carrots	20
Lemon Juice on cabbage is good, 1 scant tsp. butter	20
1 baked banana or 1 glass junket	125
Tea—1 teasp. thin cream, 25; sugar	50

Supper

Salad

Lettuce ¼ solid head, 20c; asparagus 3 stalks, 15c; celery, 4 stalks, 10c	45
Salad dressing, ½ tblsp.	50
1 slice brown or white bread	50
½ Tblsp. Butter	50
One stewed apple, 50c; with one teasp. sugar, 25c or one medium canned peach, with juice	75
Plain sugar or oatmeal cookie	775
Coffee, cream, 1 tblsp, 50; 1 tsp. sugar, 25	75
Before retiring ½ glass hot skim milk, 40c; or soda cracker, 25	40
Total for the day	1200c

A few common baking ingredients in calories are: 1 cup sugar 840; 1 cup whole milk 100; 1 cup flour, graham or white, 460.

Recipes

Baked Bananas, 750 Calories—1-6—125c.

(Bananas baked are very easily digested).

6 bananas 1tsp. brown sugar
1 tblsp. butter 2 tblsp. water

Peel bananas and place whole on greased flat dish. Spread with rest of butter, sprinkle with sugar, add water and bake 30 minutes, till they are brown. A little lemon juice is good.

If baked in skins do not add anything else. The skins pop open. Serve skins and all.

Melba Toast, 1 Slice, 50c

(Very digestible, which counts less than bread).

Cut bread quite thin, lay slices in fairly hot oven, dry out and allow to become a delicate brown. Burns easily. This can be kept and warmed up just before using.

Uncooked Salad Dressing

(1 medium tblsp.—100 calories)

1 can sweetened condensed milk	1600
1 egg	80
1 tsp. mustard or more	0
Salt	0
Mineral Oil, ½ cup	0
1 tblsp. vinegar	0
Juice of 1 lemon	30

Put vinegar lemon juice and mustard smoothed in juice into sealer. Add slightly beaten egg and condensed milk and as much mineral oil as you wish, also seasoning, and close jar tight. Shake till well mixed. When using add cream if desired. When using add cream if desired. Will keep indefinitely in cool place.

Drug-taking is very widespread in Egypt, where it is estimated that 500,000 out of a population of 14,000,000 are victims of the vice. Egyptians are said to spend nearly $5 per head of the total population on drugs annually.

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

Marine blue is Fashion's favorite colour and is truly delightful in sheer linen covered with tiny pink dots.

Cottons and linens are shown smart preference at all fashionable gatherings, which makes it most interesting for the woman who sews. They are so easily handled and made at such a substantial saving.

Style No. 3470 features chic femininity coupled with sophisticated smartness. It's the moulded slim silhouette with low flared fulness. The puff sleeves are fascinatingly lovely.

It comes in sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Other interesting combinations are daffodil yellow and white handkerchief lawn, dusty-pink sports-weight linen with polka-dots in deeper tone and matching leather belt, nile green pique and printed tub silk in light blue colouring.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

A racing yacht is being run solely by women. It is dreadfully undermanned.

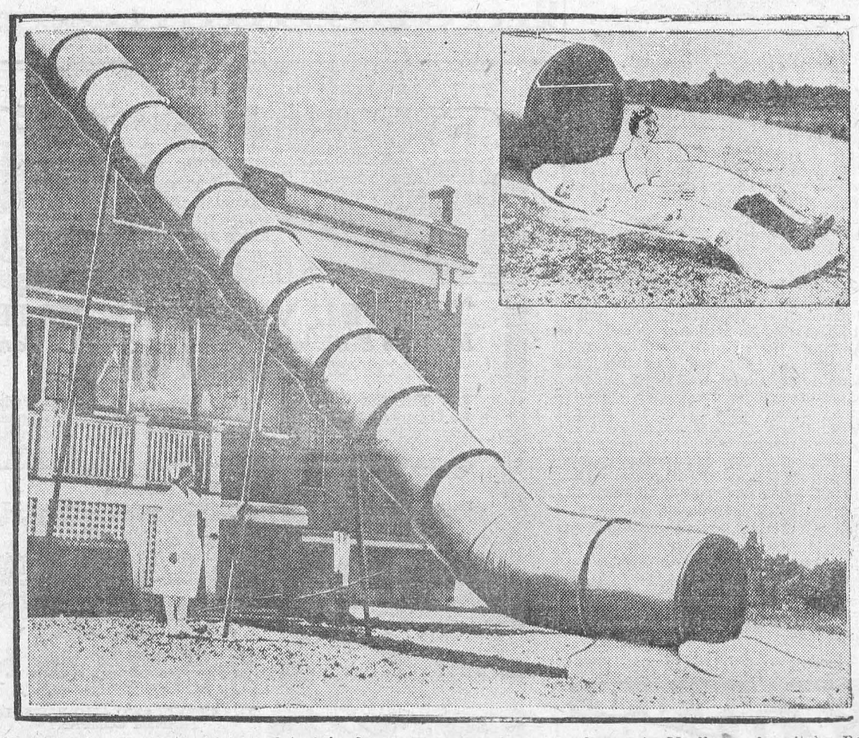
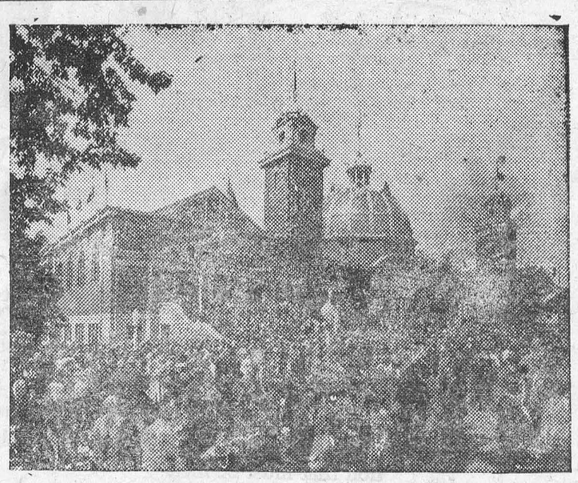
Modern Fire Escape



Shooting the chutes to safety is latest in fire-escapes and is seen here at Marlboro hospital, Boston, Mass., to bring patients from upper wards.



Canadian National Exhibition crowds throng Dominion Government Building to view local products and those of far off lands.

Canada Gets Lion's Share of Tourist Trade — C.N.E. Powerful Attraction

Of all U.S. tourist money spent in foreign countries, Canada gets the lion's share—34 per cent.—according to Babson. Of all Canada's sightseeing attractions, none exerts the powerful annual draw of the Canadian National Exhibition in Toronto.

How many Americans visit this, the world's largest exposition, is not definitely known, but it is far up in the thousands, and every state contributes to the total. In a 1929 check-up made in one of the exposition's parking areas where 10,000 motors were lined side by side, there were license plates of 42 different states. Visitors come, in addition, by every rail and water route and by air.

Magnitude of the spectacle is possibly its greatest appeal.

This year, the dates are August 22 to September 6 inclusive. Canada's greatest annual celebration is a thousand expositions in one. Any attempt to survey it in the course of a few words is apt, therefore, to be bewildering. Its attractions range from art galleries to battles for world's swimming titles; from mammoth historical pageantry to "sea flea" races; from shows of blooded livestock to concerts by the Exhibition's gigantic 2,000-voice choir.

The scene of these festivals is both Exhibition Park and Exhibition City. Its 350 acres on the edge of Lake Ontario include wide stretches of velvet lawns, rose gardens, groves of trees and horticultural spectacles which are unique in themselves.

Its buildings, scores of them, are stately permanent edifices, carved out of stone or built of steel, brick and concrete. The magnificent new home of the National Motor Show alone cost more than a million. The Coliseum and Live Stock Pavilion, with an arena seating 12,000 people in comfort and 16½ acres under one roof, is the largest exhibition structure in the world. Exhibition City has nine miles of its own paved streets, its own internal transportation system, railroad terminal where sightseers step straight from the trains to the Park; as well as bus, coach, and street car lines, linking it with every other section of Toronto and outside points. Twenty million dollars, in all, is invested in equipment, land and buildings.

This year displays from every corner of the Dominion are being given special prominence in the showings. They come from points as scattered as the Yukon and the Canadian Rockies, the Pacific Coast fisheries, the wheat plains of the Prairies, northern gold fields, and southern industrial centres, habitants of Quebec and the Maritime Provinces. From the British Isles comes the finest, the largest and the most elaborate exhibits ever sent to this continent. A score of other nations will also be represented—the Gold Coast, British West Africa and Sierra Leone, Bermuda, Jamaica, the Orient and other parts of Europe and Asia.

The displays cover art, agriculture and industry. A day in Exhibition City is a transcontinental tour through Canada in miniature, and a bird's-eye view of the globe.

The Exposition is one vast carnival. Thirty concert bands are heard in recital, including one great unit of outstanding musicians, the All-Canada Permanent Force Band under Captain Charles O'Neill of historic Quebec Citadel. Four times during exposition weeks, the spectacular 2,000-voice choir under Dr. H. A. Fricker, M.A., F.R.C.O., attracts music lovers from widely scattered sections of America to hear its concerts.

Every evening on a thousand-foot stage, 1,500 performers appear in a huge musical pageant and dramatic spectacle, "Les Voyageurs," before audiences averaging 25,000 nightly. This enormous production, unequalled anywhere else on the continent, is the climax of each day's celebration and concludes with a pyrotechnic blaze of light and color which uses the entire sky-line as its background.

Sport spectacles are daily events. On August 27th picked natators from the four corners of the world compete in a 15-mile swimming Marathon for a fortune in prizes and a world championship. Preceding this on August 22nd, international mermaids race for the women's world title over a 10-mile distance. These swims are held on the Exposition waterfront with every foot of the course in plain view to spectators scattered along a mile and a half of sea-wall and boulevard. Exhibition Park has a natural grand stand with sightseeing accommodation for a quarter of a million individuals.

The roar of the mosquito fleet in the International Outboard Motorboat speed trials is a thrill in any language. Seaplane races with international competitors are equally exciting. World champions will also appear in rowing and sculling events, canoeing and yacht races. Radio announcers whose names are known to every fan in America will broadcast a number of these contests.

For good measure there are dog and cat shows, a baby show, judging competitions, floral parade, warriors' parade, fashion and handicraft shows, a superb horse show in the Coliseum's tanbark arena, and a mile of midway which includes practically every known variety of amusement devices.

The Canadian National Exhibition is easy to reach. Fifty-five million Americans live within 500 miles of Toronto. There are special rates on all railroads, steamship lines, and airways. A network of de luxe highways lead to the Exhibition from every point of entry on the U.S. border. Hotel accommodation includes some of the finest hostelries on the continent, among them the largest and most luxurious in the British Empire.

But a feature of Toronto during the annual exposition which always impresses visitors is the city's hospitality to its guests. Thousands of homes are thrown open to visitors where modern and comfortable accommodation may be secured. Under the direction of the Canadian National Exhibition an elaborate downtown Information Bureau offers complete details of available residences. All are carefully inspected and approved.

For half a century Toronto's hospitality at this time has been a civic tradition. Rates are not raised above normal. There is not only ample accommodation, but inexpensive accommodation—no lack of it. This year will be one of the greatest and most spectacular celebrations in the Canadian National Exhibition's entire history, and as a holiday trip, one which is entirely alone in the diversity of its attractions.

Beaconsfield Proverbs

The fool wonders, the wise man asks.

The oldest pig must look for the knife.

Who asks in God's name, asks for two.

Courage is fire, and bullying is smoke.

An obedient wife commands her husband.

Business with a stranger is title enough.

There's no fishing for trout in dry breeches.

We cannot eat the fruit while the tree is in blossom.

Canadian National Exhibition attendance eclipses that of any other annual exposition in the world.

Manufacturers' Building one of the most popular at the Canadian National Exhibition.

C.N.E. Horticultural Show Big Feature Oasis to Visitors on Hot Exhibition Days

A keen demand for space in Horticultral Hall by many growers, and the numerous and insistent requests for information that are coming in daily, augers well for the success of the forthcoming Horticultural Display of the Canadian National Exhibition's "All Canada Year" celebration.

The Horticultural Committee, who have much to do with the designing of the Show, and the general layout of the building, at their initial meeting of the year, expressed themselves as well pleased at the big crowds attracted to the display, and the full measure of approval that attended their efforts in 1929. The cool and entrancing beautiful interior of this building proves to be a veritable oasis on the sweltering hot days of Exhibition period, and its restful confines are appreciated not only by flower enthusiasts, but by many thousands of the general run of Exhibition visitors. The committee heartily approved of again adhering to the side wall plan, which proved so outstandingly successful for the proper staging of the large group displays. The decorated screening, and subdued lighting effects which made these groups appear really fairyland like, will again be taken full advantage of. In an effort to further enhance the attractiveness of plants and groups, several important changes have been made in this division, and prize money has been materially increased and extended. Though a great deal of floor space is directed to the professional exhibits, the interests of the small grower and amateur gardener is well taken care of and the classes for the latter are seasonably most comprehensive. The Toronto Horticultural Society again features at this show with two splendid special prize lists, catering to Horticultral Society members, and another special class of great educational value to visitors will be the "Specimen Backyard Garden," a class that will show what can be done on an ordinary city lot by those who have horticultural leanings.

The Horticultural Building Display runs the full period of Exhibition, Aug. 22nd to September 6th, and there is no charge for admittance. The annual prize list now being mailed contains full information, classifications, etc., and is mailed free on request to H. W. Waters, General Manager, Lumsden Building, Toronto.

Reproduction of Theme Poster adopted by Canadian National Exhibition to typify "All-Canada Year"

Gigantic Music Festival Will Thrill Spectators With Song and Pageant

Simultaneously with the fourteen days of the world's largest annual exposition, the Canadian National Exhibition at Toronto, the Dominion stages a continuous music festival.

Pageantry, massed choruses, scores of ensembles in brass, a musical Mardi Gras and an elaborate series of competitions are all features of this section of the program.

This year, the Canadian celebration is to be held from August 22 to September 6 inclusive with Wednesday, August 27 set aside as Music Day. Under the direction of Dr. Herbert Fricker, M.A., F.R.C.O., the gigantic Exhibition Chorus of 2,000 voices will give a series of four concerts in the Coliseum, an immense arena seating more than 10,000 listeners. They are to be heard on August 23 and 28, September 2 and 8. Accompanying the chorus, there will be a new Canadian military unit, the All Canada Permanent Force Band under Capt. Charles O'Neill. Including seventy-six musicians drawn from Canada's historic regiments from the Quebec Citadel to the west, the unit has been organized specially for the celebration and will, in addition, give open-air recitals daily.

Thirty other bands will also play during the fourteen days of exposition, among them Canada's finest aggregations.

Each night, with a cast of 1,500 performers on a 1000-foot stage, a mammoth spectacle, "Les Voyageurs" is being staged. These immense productions have become in the nature of a national tradition, attracting audiences of 25,000 for each performance. Reservations have been coming in since February.

While essentially pictorial, the musical features of the pageant are in themselves unique. Invariably, each showing is preceded by a few minutes of community singing and the effect of a chorus of 25,000 voices, clearly audible throughout the entire 350 acres of Exhibition City each evening just at dusk, is, in itself a never-to-be-forgotten thrill.

On Music Day, the great park and waterfront is given over to melody. The affair has an informal and spontaneous atmosphere which sets it apart. Between 100,000 and 250,000 spectators throng the grounds and waterfront. Dozens of strolling troubadors in the costumes of all nations mingle with the thousands on the lawns, giving impromptu recitals in every convenient space. They sing madrigals, glees and roundelays, sea chanteys, ballads and folk music. In the costumes of all nations, French-Canadians, Czecho-Slovakians, Hungarian gypsies, Irish, Scottish and Russian, they are interspersed with groups of dancers. Choirs from foreign colonies singing their national airs are among the most interesting ensembles.

Musical competitions are many and varied. Choral societies, church and commercial choirs as well as choirs of men's voices and women's voices all take part. Other vocal departments include classes for quartettes and duets as well as coloratura, lyric, dramatic and mezzo sopranos, lyric and robust tenors, baritones, basses and children's voices. There are 13 distinct classes for violin, cello and piano and seven for cornet and trombone in the brass department as well as two for brass quartettes.

Novelties include harmonica contests, singly and en masse, held on Young Canada Day when nearly a quarter of a million children attend; Old Time Fiddlers' competitions which bring the veterans from dozens of back townships and for Canada's large percentage of citizens with Scottish blood, a series of matches with the pipes.

Band competitions are held separately and scores of Canadian groups enter.

Elaborate displays staged by the music trades in the Music Building and a national radio show in the Electrical Building are parts of the general exhibits crowding the scores of beautiful permanent edifices.

"Why do you insist that fancy bathing suits ought to be encouraged?"

"Because, they tend to prevent people from going into the water, where they might be drowned."

Unnecessary Repetition: "Then you won't marry me?" "No—a thousand times no!" "You needn't say 'No' a thousand times," said the rejected suitor, resentfully. "I only asked you once!"

There goes a woman who must have heard that lemon juice is good for the complexion."

"Why do you think so?"

"She has such a sour looking face."

Major-General Seely: A nation whose motto is "safety first" is doomed to extinction.

An American widow was anxious to conceal the fact that her late husband had been electrocuted for murder. When inquiries were made she replied that "he occupied the chair of applied electricity at one of our public institutions."

Have You Seen Them?

I've seen "ropewalk" down the lane,
And "sheeprun" in the vale,
I've seen a "dogwatch" on a ship,
And the "cowslip" in the dale.
I've seen "abundance" on a plate,
And the "lamplight" on the floor;
I've seen a "catfish" in the sea
And a "hatstand" by the door.

Experience

A Christian's experience is like a rainbow, made up of drops of the grief of earth, and beams of the bliss of Heaven.—Spurgeon.

Hard Words

Hard words are like hailstones in summer, beating down and destroying what they would nourish were they melted into drops.

A woman who did not understand the language of business went into the Bank of England and asked to consult someone about her war loan holding. The clerk to whom she talked happened to be rather a grave person. He inquired: "Is it a case of conversion or redemption, madam?" "Conversion? Redemption?" faltered the woman. "Er—pardon me, is this the Bank of England or the Church of England?"

Pithy Paragraphs

On the Worlds' Largest Annual Exhibition

"All-Canada Year" at the Canadian National Exhibition is an ideal time for Canadians in other countries to return to their native land and see Canada from coast-to-coast.

* * * * *

The cost of constructing the Ontario Government Building at the Canadian National Exhibition was approximately $700,000.

* * * *

Canada's National Motor Show at the Canadian National Exhibition, Toronto, occupies 120,000 square feet in the new Automotive Building.

* * * *

The Live Stock Pavilion at the Canadian National Exhibition Coliseum accommodates 2,000 head of cattle, 1,500 sheep and 1,200 swine.

* * * *

The new Engineering and Electrical Building, costing $650,000, was officially opened at the 1928 Canadian National Exhibition.

* * * *

Music Day, one of outstanding attractiveness at the Canadian National Exhibition, falls this year on Thursday, August 28th.

A feature of Opening Day at the Canadian National Exhibition this year will be the 5th Marathon World Championship Women's Swimming Race. The five prize winners in this event will be eligible to compete against the men in the main section Marathon scheduled for Wednesday, August 27th.

OBITUARIES

Cardinal Loses An Old Resident

An aged resident of Cardinal died in the person of Mrs. Kavanaugh, formerly Catherine Savor, in her 83rd year, who for the past three years had been in failing health. She was the widow of Matthew Kavanaugh, who predeceased her a short time ago. She was a native of Matilda township, moving to Cardinal at the time of her marriage.

She is survived by a daughter, Mrs. William Adams, of Cardinal, 14 grandchildren and six great-grandchildren. One of the former, Miss Catherine Kavanaugh has lived with her from childhood.

The funeral service was held at Sacred Heart Roman Catholic Church, of which she was a most devout member. High mass was conducted by Rev. Father James, and mass was served by two of her grandsons, Gerald and Garnet Kavanaugh. The largest number of spiritual and floral tributes the esteem in which she was held.

Late Sterling Strader

The funeral of Sterling Strader, aged resident of Shanly, who passed away in the Brockville General hospital on Monday of last week at 6 p. m., the victim of infectious gangrene, was held on Thursday afternoon, August 21, with prayers at his late residence, thence to the United church of Shanly for service, followed by interment in the adjoining cemetery. Rev. John L. Hodgson, of Shanly, officiated and was assisted by a full choir and organ.

The late Mr. Strader was born on April 16, 1852, in the sixth concession, township of Matilda, county of Dundas, the son of David and Margaret Strader. He was twice married, his second wife being Miss Adeline Merkley, of Mariatown. Three children of the first marriage (Mesdames William Mellon, of Iroquois; Peter Charleton of Canton, N. Y., and Mildred Sullivan, of Pawtucket R. I., and two children of the second marriage, Mrs. Ruby Beach, of Port Colborne, and Mrs. Mae Hutchcroft, of Cardinal, survive his loss, as does his widow.

The deceased was a farmer and had spent practically all his life in and around the Shanly community. The pall-bearers were six old neighbors and friends, Burton Sloan, Howard McFadden, John A. Kennedy, Maurice Tousaw, William Brown and Jerry Perry.

The United Church

(Contributed)

Rev. Hector Beach again brought thougtful messages. He spoke from John 8th chapter, his subject being "Massed Religion" and in the evening his subject was "The way of Faith" as shown in Hebrews 11th. chapter, which he said has been called "The battle abbey of faith." He reminded the young that the tasks we overcome successfully are those we face with our feet firmly on a faith that will bear us up. Faith is the substance of things hoped for. If we hope with faith we have substance in our hope. Faith is the evidence of things unseen. We need the assurance that we are accepted with God. By faith we receive the seal of our sonship. Those who have great faith in God are the ones who can realize his presence. We want belief in a God on whom we can depend. By grace are we saved through faith. We were urged to pray daily for a deepening of our faith in Christ Jesus.

Car Broken Into And Clothes Stolen

(Trenton Courier)

Mr Fred Pelletier living on French Road, Detroit, Michigan, and who is Deputy Clerk of the Court of Common Pleas in that city, stopped overnight in Trenton on Saturday, and when he awoke and was ready to be on his journey found that the window of his car had been broken and a suitcase with valuable belongings in it stolen.

Mr. Pelletier was on his way to Chesterville, Ontario, to pay a visit to his father and on the way he broke the journey by stopping off in this town at the Royal Hotel. Part of his baggage, consisting of a suitcase with $90.00 worth of clothing was left in the front seat of the car, which was locked and parked in the rear of the establishment. During the early hours of the morning the window of the auto was smashed open with the aid of a crowbar. The police strongly suspect that the thief was a hobo as he took a stale lunch with him that had been left in the car. Blankets and overcoats resting on the back seat were left untouched.

Dundas Soft Ball League

	Won	Lost	Tied
South Mountain	8	2	0
Inkerman	7	3	0
Brinston	6	4	0
Hainsville	4	5	1
Hulbert	4	6	0
Dundela	1	8	1

On Saturday, Sept. 6th, a Field Day is being held at Cardinal where the final game between Inkerman and South Mountain will be played. The winners of this game will meet the winners of Grenville County to determine the winners of Dundas-Grenville Presbytery.

Mountain

Good News For Winchester

You will be glad to know that one of the Winchester Old Boys, in the person of the Rev. H. F. Faflamme, will visit Win-Winchester on Sunday, August 31st. You are invited to see, hear, and meet Rev. Laflamme at the Baptist Church, where he will speak both morning and evening. His subjects for the services will be:—11 a. m.—"Pentecost." 7.30 p. m.—A Gospel Message.

Lannin's Hall

After weeks of painting, plastering and repairing, Lannin's Hall is now completed and it sure was worth the effort of Harold Lannin, who is the future manager. It is finished in pale and dark green, with green streamers and Chinese lanterns artistically arranged around the lights. It will be opened on Thursday night next with a big dance and any who wish, may attend and inspect the newly decorated assembly hall. It is, without a doubt, the most beautiful hall in Eastern Ontario, that is for a village the size of Winchester.

At the dances a large crystal ball will be operated in the rays of colored flood lights and this will be a very beautiful spectacle to gaze upon.

Do You Know That?

CANADA SHIPS:
Potatoes to Brazil.
Macaroni to China.
Razors to Denmark.
Pure seed to Russia.
Eggs to Buenos Aires.
Jerseys to Mississippi.
Alberta wool to Japan.
Onions to New Zealand.

Newsprint to Australia; muskrats to Germany.
B. C. apples to South Africa, Scandinavia, Dutch East Indies and mainly Archipelago.

A Humane Weatherman

If I were running the world I would have it rain only between 2 and 5 a. m. Anyone who was out then ought to get wet.—William Lyon Phelps.

New Piano Like Human Voice.

A Science Service bulletin says: A new type of piano, which is called a revolutionary musical development, has just been patented at Washington by Dr. John Hays Hammond, Jr.

The invention increases the sonority of the piano, lengthens the vibrations and sustains the capacity and volume of the tone. Often the pianist has desired to influence the tone of the piano after the keys are struck. With the new instrument it is possible to do this and to produce a vibrato tone which so far could only be produced by the human voice or by string instruments.

The new piano looks very much like the usual piano except that the strings are enclosed in a sound-tight casing having two sets of shutters, one above the strings and the other below the sounding board, which are opened and closed by means of a fourth pedal. The shutters act as reflectors and produce an effect called "acoustic regeneration," sustaining the sound vibrations for a much longer time than is possible in the ordinary piano. Manipulation of the extra pedal remove inflexibility and shortness, the chief drawback of the old piano tone. The tone effects and shading made possible have caused the instrument to be called a "breathing piano."

Deadly Stone Fish.

A deadly fish that has killed people who have trodden on it by injecting poison into their feet is described by Mr. Geoffrey Tandy, B.A., assistant keeper of the Department of Botany at the Natural History Museum, South Kensington. It is called the stone fish. It was one of many strange things seen on the Great Barrier Reef of Australia by the marine biological expedition. Mr. Tandy, who accompanied the expedition, describes it as "a genuine horror both in appearance and effects. He is repulsive-looking, of a dirty greenish brown color and very underhung. His danger lies in the row of spines on his back. These can be erect, and they contain a very deadly and, I believe, unknown poison." A painful and unduly protracted death is the fate of most people who have made too close an acquaintance with the stone fish.

THE MOUNTAIN FAIR

Thursday & Friday,

Sept. 11 & 12, 1930

Two full days of Races and Exhibits are the special features of Mountain Fair.

This year the Directors are giving special attention to Trials of Speed and are offering around $500.00 in Races.

Midway and Aeroplane.

Over $450.00 in special prizes

Chesterville Band in attendance.

Concert both nights, Dance last night of Fair.

Do not fail to attend this event on both days.

Something doing all the time.

H. E. A. Cleland, Sec'y-Treas.

You Can Buy Money

Spend Your Money In a Bank

YOU buy many things on the instalment plan—why not buy money?

You can soon buy $1,000 if you treat your savings as a monthly bill—an obligation that must be met.

Ask for a copy of our Budget Book. It will help you to save.
