Pretty Wedding at St. Mary's

St. Mary's Church, Morrisburg, was the scene of a pretty wedding on Saturday, May 20th, when Rosemary Laurin and Eric Lorne Honey were united in marriage. Rev. D. W. MacDonald, assisted by Rev. L. S. Woolfrey of Russell, performed the 4:00 p.m. double ring ceremony. For the occasion, the church was decorated with spring flowers. Miss Rosemary Coligan played the wedding music.

The bride is the daughter of Mr. and Mrs. Arthur Laurin of Morrisburg and the groom is the son of Mr. and Mrs. Lorne Honey of Russell.

Given in marriage by her father, the bride was lovely in a floor length gown of polyester with sheer overlay, made on fitted lines to the waist, mandarin collar, long full sheer sleeves, with wide cuffs, a lace ruffle around the bodice and slightly full skirt. Her full length veil was held in place by a ring of turquoise tinted fugi mums and white stephanotis, and she carried a cascade bouquet of stephanotis, centered by a white orchid.

The matron of honor, Mrs. Garth Baker of Ottawa, chose a floor-length gown of white and turquoise, empire waisted, the bodice trimmed with turquoise ribbons, with mandarin collar and long full sleeves. She wore a ring of fuigi mums tinted turquoise and daisies in her hair, and carried a basket of shasta daisies and fuigi mums tinted turquoise, with white streamers.

The flower girl, Miss Theresa Laurin, niece of the bride, wore a floor length gown of blue flowered voile, with fitted bodice, full skirt, mandarin collar, long, full sleeves with wide cuffs, and a floor length white sheer frilled pinafore. A ring of turquoise tinted fuigi mums and daisies formed her headdress and she carried a miniature basket of shasta daisies and turquoise tinted fuigi mums with white streamers.

Groomsman was Donald Honey and rign bearer was Edward Honey, both brothers of the groom and ushers were Harry Honey, brother of the groom and Sam Laurin, brother of the bride.

Following the ceremony a reception was held at St. James Hall for 100 guests. The bride's mother chose a mauve street length dress with tan accessories and a corsage of talisman roses. The mother of the groom was wearing a green coat and dress ensemble with white accessories and a corsage of white roses.

For a trip to Quebec City, the bride donned a two-piece suit of red, white and black plaid, with fitted jacket and long skirt, white accessories, and a corsage of stephanotis centered with a white gardenia. Upon their return they will reside in Ottawa.

Guests were present from Mississauga, Waterdown, Markham, Colborne, Napanee, Brockville, Ottawa, Prescott Russell, Winchester, Chesterville, Kirkland Que. and Morrisburg.

Monteith-MacDonald Wedding at Knox Church

Yellow carnations decorated the altar of Knox Presbyterian church, Morrisburg, on Friday, May 5th for the marriage of Bonnie Jean MacDonald and Douglas Bain Monteith. Rev. T. Boyd performed the 7 p.m. ceremony.

The bride is the daughter of Mr. and Mrs. Murray MacDonald, Morrisburg, and the groom is the son of Mrs. Effie Monteith and the late David Monteith of Morrisburg.

Given in marriage by her father the bride chose a floor length gown of white nylon, with lace bodice, short lace sleeves, chapel train and shoulder length veil. Her bouquet was of yellow roses, white carnations and baby's breath.

The maid of honor was Miss Brenda MacDonald, twin of the bride, and bridesmaid was Mrs. Jane Dennison of Cornwall. They were identically attired in yellow gowns covered with tiers of baby lace, short sleeved, and floor length with yellow ribbons and bow at the back. They carried cascade bouquets of yellow roses, white carnations and baby's breath.

Groomsman was Wayne Dennison of Cornwall; and ushers were Mark MacDonald, brother of the bride, and Gordon Fairbairn, brother-in-law of the groom.

Following the ceremony, a reception was held at Treasure Island Inn, Ingleside, for 80 guests. For receiving the guests, the bride's mother wore a suit of two-tone maue fortrel and a corsage of multi color carnations. The mother of the groom chose a navy and white suit and corsage of multi color carnations.

For a trip to Sault Ste. Marie, Mich., Carnia, Chatham and Galt, the bride wore a pant suit of green tweed with brown accessories and a corsage of yellow carnations. On their return they have taken up residence in Cornwall where both are employed.

Guests attended from Morrisburg Ottawa, Cornwall, South Mountain Inkerman, Athens, Limoges, Chesterville and Glen Becker.

NEW BUSINESS TO OPEN IN WILLIAMSBURG

Residents of Williamsburg are pleased to learn of a new firm opening for business in that village.

Gerald Smyth, a young man of the community is opening a new body shop. Equipped with the most modern equipment, the new shop will be located on Church St., west of High 31, on the Dwain Hess property.

Mr. Smyth started his apprenticeship in 1966, receivng his licence in 1969. He has been employed in General Motors, Ford and Chrysler shops. Citzens and officials of the village joined in extending a welcome to this new addition to the business community of Williamsburg, and wishing Mr. Smyth every success.

PIONEERS AND BRINSTON COMBINE IN METRO LOOP

The Dundas Senior Men's Fastball League in existence since 1934 has broadened its horizons. The League has joined with the Ottawa Metro League to have one top league with best ball in the area.

The new league, to be known as the Dundas-Metro Fastball League, will be made up of two sections and the clubs will play a partial interlocking schedule. The Metro clubs are Hul awa and Russell. Dundas entries are, Brockville, Cardinal, Domville, Kemptville and Williamsburg.

Brinston Bears and Williamsburg Pioneers have joined forces — going under the name of Williamsburg-Brinston ioneers. The Pioneers will play part of their games at Brinston and part at Williamsburg.

The league opened their schedule on May 17th with Domville edging the Pioneers 2-1 with Onstein the winning pitcher and Belanger the loser. Hull downed Russell 8-2 with a 4 hitter by Claude Lafleur.

The Pioneers host Domville on Friday, May 26th, 8 p.m. at Brinston.

Tonight (Friday) the Morrisburg Recreation Committee will sponsor the Morrisburg Minor Hockey Banquet at the Civc Centre at 6:30 p.m. Tickets are available at Charlies Sport Shop. The guest speaker will be Bill Collins.

Dressmaker Artists Model Own Creations for Institute

Claire Delage and Bonnie Jarvis of Morrisburg were among the dressmaker artists who modelled ensembles which they had made at the May meeting of Iroquois Women's Institute, held Thursday at Iroquois Civic Centre.

Slack suits, hot pants, party dresses, street dresses and two-piece costumes were modelled by their gifted makers. Many were original designs beautified with braid, hand embroidery and other finishing touches. As each ensemble was shown, Mrs. Gwen Parmeter, commentator, quoted the price involved. The amazing fact was that not one of these three (and sometimes four) piece interchangeable sets of wearing apparel cost a maximum of $20.00 complete. One interesting pant and top set was made from two remnants costing a total of $5.00.

For color, everything was popular — brilliant prints, pastels and solid colors, ranging through the spectrum. Materials were mainly crimp and jersey.

The models in the show were housewives who had attended Institute courses at some time during their lives. They were: Jean Christie, Prescott; Wilma Bowden, Cardinal; Bonnie Jarvis and Claire Delage, Morrisburg; and from Iroquois: Marrion Warren, Vi Hare, Dorothy McMillan, Irene Haldane, Norma Delagarde, Mary Falshaw, Ann Cassentree, Jean Clerry, Carolyn McGee, Arlene Eckford, Bernie Sisty, Yvonne Tompkins, Marion Davis, Shirley Moffat and Audrey Moke.

Iroquois Women's Institute will host the Glen-Stor-Dun Lodge Birthday Party May 29. Local churches have been contacted to supply items of entertainment for the program. The June meeting is to be a picnic at the home of Arnie Banford.

This year, Iroquois Institute celebrates its 60th birthday and tentative plans were discussed. A committee was appointed to investigate the possibilities of a July garden party. It had been hoped that this might tie in with the village summer festival which opens its activities with a fly-in scheduled for July 23rd.

Mrs. Hare, president, conducted the meeting, when Mrs. Ivan Seeley and Mrs. Lloyd C. Davis presented impromptu reports on the district annual meeting held earlier in the day at Morrisburg.

A group of vocalists, with their guitars, entertained and led community singing under the guidance of Mrs. Archie Bray. Singers were Sister Mary Leonard, Linda Snider and June Boulerice of Morrisburg, and Mrs. Therese Chartrand, Iroquois.

Vows are Heard at St. Peter's Church

St. Peter's Lutheran Church, Williamsburg, was the scene of a pretty wedding last Saturday, when Rev. John Boemer solemnized the marriage ceremony uniting in marriage Brenda Belle Whitteker and Michael Stanley Waddell, at two o'clock in the afternoon.

The bride is the daughter of Mr. and Mrs. Johnny Whitteker, Williamsburg; Mr. Waddell is the son of Mr. and Mrs. Stanley Waddell of Dixon's Corners.

Ushers for the occasion were Brian Whitteker, brother of the bride and Eric Riddell. Vuc Kovinich, of Cornwall, assisted the groom and Mrs. Vivian Johnston, organist accompanied soloist Mrs. Lyle VanAllen.

Mr. Whitteker gave his daughter in marriage. For her wedding, the bride was attired in a Pegoda Crepe bridal gown, styled on princess lines, with French guipure lace accent. The skirt of the gown extended into a chapel length train. A floral headdress held her tiered escalloped silk illusion evil and she carried a crescent of white, blue and yellow mums. Her attendants, Betty Whitteker, sister of the bride and Mrs. Harold Theriault and Mrs. Roger Kavaner, the bride's cousins, were gowned alike in floor length gowns with blue silk taffeta bodices, multi-folral skirts, sheer sleeves and deep frills at the neckline and the cuffs. They carried hand bouquets of yellow, white and blue mums.

The mother of the bride wore a coat and dress ensemble, in shrimp with black accessories and a corsage of red roses. The groom's mother chose a turquoise sheath dress, matching jacket and shoes, white accessories and a corsage of pink roses.

Following the ceremony a dinner reception was held in hte Church hall. Out of town guests were present from Toronto, Ottawa, Brockville, Mallorytown, Cornwall, Kingston, Chesterville, Morrisburg, Iroquois and Smiths Falls.

Mr. and Mrs. Waddell will reside at Mississauga.

Prior to her marriage, the bride was honoured on two occasions at miscellaneous showers arranged in her honour. Hostesses for the events were Mrs. Harold Theriault, Mrs. Ed. Hanson, Mrs. Roger Tupper, Mrs. Hubert Wells, Mrs. Frank Mullen, Mrs. Ronnie Casselman.

MORRISBURG'S OVER 90 CITIZENS PRESENTED WITH PLAQUES AT TEA

Morrisburg area residents were presented with framed plaques for having passed their ninetieth birth days at an afternoon tea held Friday, May 19 at Morrisburg Civic Centre. Presentations were made by Reeve Carlton F. McInnis to the nine honored guests attending the occasion conducted under convenership of Miss Gladys Bayne, Chairman of the special events committee of Morrisburg Senior Citizens' Club, the hosting group.

The plaques noted that they were issued under sign and seal of the reeve and clerk-treasurer Lloyd C. C. Barkley and given by Morrisburg Council. Mr. McInnis spoke briefly telling of the formation of the Senior Citizens' Club at Morrisburg which held its first meeting last July and which today with 38 members is an active and enthusiastic organization.

Since members of the local Women's Institute had contributed to the success of the occasion and because of the Institute Annual meeting held at Morrisburg the previous day, Mr. McInnis enlarged the theme "The Past Enriches the Future". He said, "Our Senior Citizens have made our community what it is, and Council is thanking them for their contribution, attempting to make a payment on that which can never be repaid". He added, "To the nine who have been able to come today, we are proud of you".

Mrs. Clyde Manning, president Sr. Citizen's Club, Miss Mary VanAllen, a member of the starting committee of the organization and Wm. Godkin, vice president, constituted the reception committee. Presiding at the tea table were Jrs. Wm. H. Wilson, Mrs. James Harvey, Mrs. Cephus Smyth, Mrs. Archie Murphy, Mrs. Arthur Flynn, Mrs. E.A. Hill. Those assisting were: Mrs G.D. Dix, Mrs. Greta Strader, Mrs. C.I. Briggs, Mrs. G.L. Moodie.

The damask-covered tea table was centred with an attractive arrangement of spring flowers in a crystal bowl and flanked by four tall yellow tapers in matching candle holders. Some 200 well-wishers attended the 3 p.m. celebration in the Civic Auditorium. Tables were arranged circling the room. Following serving of tea the nine honored guests were invited to occupy comfortable armchairs forming a semi-circle. They were presented with corsages — red roses for the ladies and carnations for the gentlemen . . . a gift of Mr. Fred H. Broder.

The "over 90" members attending were: Miss Annabel Barkley, Mrs. Mabel Carr, Mrs. Jim Casselman (Lillian); Mrs. Mary Mallen; Mrs. Henry Clark; Mrs. Mary Houghton; Mrs. Annie Bowman; Matthew Beckstead; Mrs. Fred H. Broder.

Following the occasion, Mr. and Mrs. Manning and Wm. Godkin delivered plaques to those unable to attend.

Photo shows l. to r. front row: Mrs. Mabel Carr; Mrs. Lillian Casselman; Miss Annabel Barkley; Mrs. Mary Houghton; Mrs. Luke Mallan. Standing: Matthew Beckstead; Mrs. Annie Bowman; Mrs. Harriet Clark; Fred H. Broder.

More Co-operation Needed

Response to date has been very small to an appeal for names and addresses of former residents who might be interested in returning to their home town for "Old Home Week" June 28th — July 4th. Members of the Senior Citizens Club have volunteered to contact these persons, if names and addresses are forthcoming. All it takes is a little more co-operation to help ensure the success of this week, now drawing very close. The committee in charge of that week have lined up a really complete program which can be enjoyed by all. Have YOU given any thought to helping out in this way?

An Unperceived Asset

A queer quirk in the collective Canadian personality is that bilingualism, our possession of two official languages, is widely considered a liability, instead of, as it actually s, a major national asset and cause for pride.

All Canadians are not compelled to know both their country's languages and many Canadians s peak neither correctly — but the advantages of some knowledge of both are enormous.

Some of these advantages are practical: the ability to reply in the same language in which one is asked a question; to read La Presse and The Free Press with equal ease; to possess two ways of articulating any idea with the option of using the one which says it best.

Culturally, knowledge of English and French lays open the treasures of the two greatest literatures of the modern world.

But perhaps Canada's two-language status is most valuable when a bilingual Canadian travels. For he can go scarcely anywhere without finding someone who can understand him. In the majority of the new nations of Africa, English or French is almost certain to be one of the official languages. The same is true in the nations of the former British and French empires on the other continents.

Bilingualism is our unperceived asset. We should be enjoying our two languages instead of squabbling over them. Rather than threatening anyone's job for not knowing one of them, we should be devising an educational system through which every Canadian child will learn and love both the tongues which are his inheritance — *The Gananoque Reporter.*

TENDERS

SEALED TENDERS, in triplicate, addressed to "Stormont, Dundas and Glengarry County Board of Education, P.O. Box 158, 305 Baldwin Ave., Cornwall, Ont." and entitled "Tender for Addition to North Dundas District High School, R.R. No. 3, Chesterville, Ont." will be received by the Architect on behalf of the Undersigned until

3:00 P.M., E.D.S.T. on TUESDAY, JUNE 13th, 1972

Contract documents with instructions to Bidders may be obtained from the Architect, William R. Mack, 120 Sydney St., Cornwall, Ont., upon deposit of a certified cheque made payable to the Architect in the amount of $100.00; which sum will be refunded upon reurn of he documents in good condition within 96 hours of the closing of Tenders.

Contract documents may be examined at the following locations:

KINGSON BUILDERS' EXCHANGE
OTTAWA CONSTRUCTION ASSOCIATION
OFFICE OF THE ARCHITECT

Mechanical and Elecrical Sub-contractors shall submit their Bids to General Contracors hrough, and on forms provided by, the Cornwall Bid Depository, c/o Guaranty Trust Company of Canada, 250 Pitt St., Cornwall, Ont., where their Tenders will close not later than

3:00 P.M., E.D.S.T. on MONDAY, JUNE 12th, 1972

General Contractors shall enclose with their Tenders a Bid Bond or Certified Cheque made payable to the "Stormont, Dundas & Glengarry County Board of Education" in an amount of not less than 10% of their Tendered Sum; and the successful General Contractor will be required to furnish the Owners with a Performance Bond in the amoun of 100% of the Contract Price. and a Labour and Material Payment Bond for the same amount.

The lowest or any Tender will not necessarily be accepted.

D. N. SHUTTLEWORTH, C.A.,
Secretary-Treasurer and
Business Administratotr

Stormont, Dundas & Glengarry
County Board of Education.

Yours Sincerely . . .

BY MRS. WELLWOOD ADAM

I always been inerested in the questions of children, and also in the difficulties of getting answers to them. I tried to write about this particular subject in the April 6th issue of the Morrisburg Leader, and as a result someone asked me for some more ideas if I could.

Well, I suppose there will be times when a child only wants a simple answer to his question, and then he finds he gets a whole page from an encyclopedia, so to speak! One mother of a five year old, passed me this story which I feel illustrates this point.

She was busy making sandwiches for her church group of women, when her small son dashed in:— "Mummy, where did I come from?" Now the mother had recently attended a group meeting of mothers who had eagerly studied how to give the right answer when their children asked such questions. So she was well prepared with the story of the birds and the bees but wished her son had not come in at this time to ask her.

Anyway, she put first things first and left her sandwich making while she endeavoured to talk with the little boy. After a few minutes, the child became restless, and made for the door "I only wanted to know, Mummy, what town I came from. Johnny says he comes from Montreal!"

Which **proved a point**, because we quite often **need to listen to the** questioner as **well as** to the question before we **even start to answer**, so it **doesn't** do to answer **any** question until we **give it s o m e** thought **first.** And I **think when** questions come our way about **God,** as they certainly do from time to time I also think we have a wealth of opportunity to teach a child if we just take the time to think and ponder. It takes a lot of time and effort to come to right and honest answers.

I am sure it would be a good idea if parents, teachers, leaders of scouts, cubs, guides brownies, cam;s. Sunday schools etc.—all collected the question children ask them, then meet as a group afterwards and discuss how best they should be answered. Especially in the light of their own understanding of what God is like.

I read somewhere that to have good parents, teachers, and leaders, ultimately mean a 'Pathway to God and if you feel as serious as I do about this matter of answering children's questions . . . then this pathway could be travelled with happiness on both sides for a long time.

ACCIDENTS IN HOME ARE DOUBLE THOSE AT WORK

Home is where the hazard is, warns the Industrial Accident Prevention Association. For every person injured at work, two are injured by accidents at home.

During their 1972 **safety drive,** more than 51,000 member firms of the Association want to keep their employees on the job. Therefore avoiding accidents at all times whether working at home or on the job is essential

So, is you've got your own home workshop, the I.A.P.A. has some safety tips for you. Do not store gasoline, naptha, benzene. thinner or varnish remover in glass bottles. Should the bottles break, and the contents evaporate quickly, an explosion will result from ignition by the flame of a gas water heater, or similar sources.

Dispose of all oily rags and papers as soon as you are through with them.

Keep litter cleaned up and burned. Keep basement and garage floor clean.

Oil on the floor can cause you to slip and fall. Wipe it up and put sawdust on the spot to absorb all traces.

Be sure electrical equipment and wiring is sound. Keep workshop tables clean free of scraps, tools and material not being used.

Pull the plug when the blade or knives of a machine are being hand led. Don't depend on a snap switch.

A sharp tool is a safer tool. Take time to keep them well dressed.

Be clear headed and alert at all times when operating machinery. When friends call and watch, do not try to carry on a conversation and run a machine at the same time. Do not operate power tools if you're emotionally upset or worried. Keep your mind on your work and your fingers on your hands.

Children should not be allowed in the shop when machinery is running. Where small children are about, the power supply should be kept locked at all times when not in use.

Most machine jobs in the home are one-man jobs. Warn people to keep hands off unless you ask for help and give instructions.

GORDON BLAIR'S OTTAWA REPORT

The Rights of Women

The usual cynicism about burial of reports of Royal Commissions does not apply to the Report on the Status of Women, because the women of Canada are not going to let any government forget it. Bryce Mackasey recently summarized in the House the major steps already taken to implement its recommendations.

Many Important Improvements

Within the Federal Government, a special agency headed by a woman is coordinating action on the report. In the Public Service, promotion and appointment of women to senior positions is being accelerated and special training and even part-time employment is being offered to women. The amended Canada Labour Code will now prohibit employment discrimination on the basis of sex or marital status. (This applies also to discrimination for age — important to all Canadians —male or female).

Women will be eligible for retraining assistance if they have worked outside the home for at least one year at any time. The new Unemployment Insurance Act provides universal coverage and maternity benefits. Maternity leave is now obligatory under the revised Canada Labour Standards Code.— Family planning is being better co ordinated and supported by the Department of National Health and Welfare. The Local Initiatives Program this winter paid for the construction of 90 day care centres across Canada and child care expenses are now tax deductible. The changed Criminal Code provides for equal jury duty for women in criminal cases. The Government's role has not been merely passive, because it has contributed to the support of responsible discussion of the Report.

I have a particular interest in this subject because my mother was a widow and while I was growing up had to go out to work. I have long been aware of the many discriminations based on law, tradition and ancient habits of thought which have prevented many able women from playing their full role in the life of our country. The steps now being taken to remove these discriminations will benefit us all by opening the door to fuller participation by women in all aspects of our national life.

Opportunities for Youth

The Opportunities for Youth Programs announced in our constituency will provide employment for approximately 80 young people in 8 communities. All projects are directed to community service and include recreation programs in Kemptville, Johnstown, Kars, Manotick, Metcalfe and Prescott. A day care program for underprivileged children will be operated by an Iroquois group. All are good projects and have broad community support.

The difference between this year and last is that the projects are spread more evenly throughout the constituency. There have been severe disappointments because here, as elsewhere in Canada there were something like 6 applications for every project which could be approved within the budget.

Lesson Learned

Some lessons must be learned from the experience of last year and this. One is that not every project — no matter how excellent — can be repeated year after year. Other people and other projects are entitled to a chance and, moreover, the initial idea of this program was to stimulate community activity and thinking and not to create commitments which would extend indefinitely into the future. It is to be hoped that communities will look carefully at the work being done by all the projects this year with the view of deciding whether they are worthwhile and how they might be carried on under different auspices next year.

It is also obvious that the programs must be mounted earlier so that students whose projects are not accepted will have a longer time to look for alternate work. This kind of beneficial program for useful student activity in the summer is not the exclusive preserve of the Federal Government and some provinces, notably Ontario, have significant programs which have been equally beneficial and better liaison between the governments would appear to be necessary.

48 FIFTH STREET — MORRISBURG

: Dundas Farm News :

Believe it or not spring has finally sprung. It was officially spring on the 21st of March and there has been many times since that first breath of spring, that many of us have felt like sending mother nature a bottle of scope. Yet we are gratified to hear from the weather man that history will be made on Thursday as the sun will appear for a few hours. History is also being made as the new Assistant taps away at his first news letter. I am certain that by this time, almost everyone in the county is aware of the fact, that changes have been made in the personnel in the County Agricultural Office. As of May 1st, I, John Anderson will be your assistant, under Tom Clapp who will take over for Doug Keys. Unfortunately, Doug is leaving us to go to the Agricultural Office in Wentworth County.

Well it is a pleasant sight these days to travel around the county and see the lush green growth, as the grass emerges from its winter rest, to the clean fresh air of our county. I might also mention that there has been a lot of serious winterkill in the area. The following is a resume of a report prepared by Don Bielby, Soils and Crops Special ist.

Legume Winterkill—Situation 1972

During the last five days, hay fields have finally started to grow. As many people expected there has been considerable winterkill to the alfalfa and trefoil. The damage ranges from 10 to 90 percent, and the extent of winterkilling is more in last years new seeding than in the established fields. Some farmers do have hay in the barn, which can be used to supplement this years crop which will probably be poorer yielding. Those putting up alfalfa haylage this year will be hurt the most. However, unless some re-seeding of alfalfa is carried out this year, hay and haylage from alfalfa will be short in June of 1973.

There are three alternatives which may be used to increase the alfalfa acreage:

1. The best fields may be improved by re-seeding the damaged areas. Using a spike-toothed harrow, cultivator, or a disc, scratch the soil to a depth of about one-half inch. Broadcast 5 to 8 lb. of alfalfa seed per acre over the area and then shake the seed to the soil surface with a chain harrow. Good soil contact is important. Culti-packing or rolling may be desirable depending on the field.

2. The worst fields should be broken up and re-seeded this spring either direct or with a nurse crop.

3. Thirdly, some fields which have very little alfalfa left; but a satisfactory grass stand, may be fertilized this spring with 30 lb. of nitrogen per acre. This will increase production for this year. It may be advisable to break up these fields and re-seed with an alfalfa mixture in August.

In summary, remember shortage of hay or haylage need not be a problem in the future, as there are several alternatives to take.

Dundas County 4-H

I am proud to say at this time, that I find it a pleasure to be working with such a fine group of youth Most of the projects and programs are now well established, and running well. The overall 4-H program in the county is different this year, thanks to the creative thinking of the members and the leaders. To those farm youth, that didn't desire to partake in the program this year, or were not aware of our program. I welcome you to feel free to join us at some of our events. I don't know if many of you realize that the newest revolution in North America today, is the agricultural revolution among our farm youth So to the members and Non-members, I personally invite you to gather in a STEW SESSION some evening, and we will JAM on the position and responsibility of the youth in the agricultural community. To our present members I remind you of the compulsory June and July sessions which I mentioned in the Office News on 4H.

Pasture Scene

With those lush green pastures starting to re-appear as we mentioned earlier comes the problem of spring and summer feeding of Dairy Cows. So, let us start thinking of steps to take in Prevention in a Drop of Production during the summer.

Most dairy cows are able to produce 35 to 40 lbs. of milk per day on good pasture, without getting too thin. But we culled those last fall and now we have to think of the good old Berthas who are producing 50 to 60 lbs. of milk per day. Bertha requires more energy and protein, in short she requires grain.

Calibration of Flood-Jet Nozzles

Tables are available at your local Agricultural Office for the calibration of flood-jet nozzles. These are for the kits being sold for mounting on discs or sprayers. The kits are designed to apply a relatively low volume of herbicide to the soil, immediately in front of an incorporation tool. If you have such a kit or arrangement contact your local agricultural office if you desire tables to adjust your calibration of nozzles.

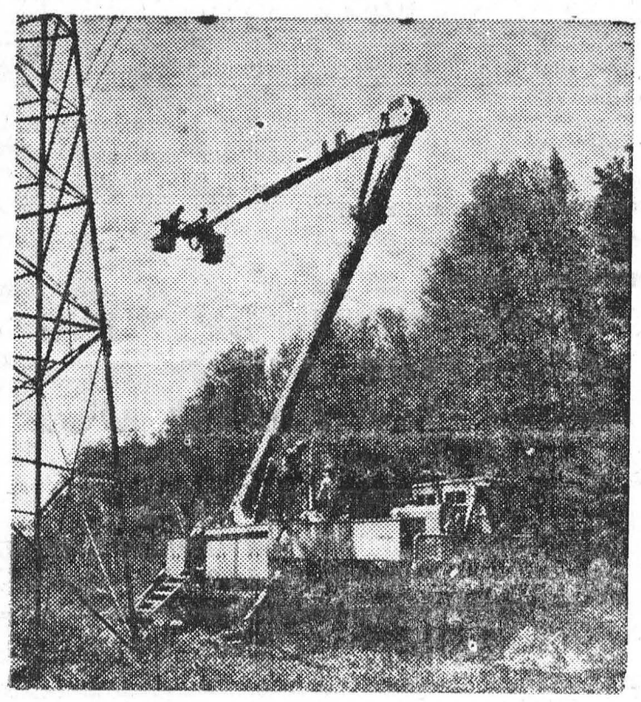
So until next week:

Fat Cow to Skinny Cow: It looks like you have been in a famine

Skinny Cow to Fat Cow: Yes, and it looks like you caused it.

Reminder

Freeman Miller will have his office visit on June 1st from 1 p.m. to 3:30 p.m. in the Agricultural Office.



Long Arm of the Foremost

Ontario Hydro's first "Foremost" makes life easier for linemen. The 29-ton, double-track vehicle lifts crews 75 feet in the air in insulated buckets, so they can work on live 230,000-volt lines without climbing towers. With this equipment much muscle work and fatigue is avoided, and senior linemen can work aloft with the younger members of the crew.

Motorists aren't likely to meet the Foremost on the highway — it's not a practical move for the 41-foot giant. While its plentiful track area rests lightly on a roadway's pavement (four pounds per square inch), at its maximum 12 miles an hour it indents the surface. So it rides from job to job on a companion 21-ton float.

Built in Calgary, the Foremost was originally designed to work in muskeg on the Alberta oil fields. Hydro added the insulated boom and buckets for line retensioning and other transmission applications.

THINK METRIC

That's the message of a new publication called "Metrication: A Guide for Consumers," released today by Consumer and Corporate Affairs Minister Robert Andras.

The 24-page booklet outlines how the metric system will likely affect the everyday life of Canadians. If they are buying groceries, driving a car, making a dress or listening to the weather report, they will be faced with new units of measurement. The essential simplicity of the system and the ease of doing metric calculations are explained.

The booklet gives a brief account of the reasoning behind the government's decision to change from the present Canadian inch-pound units to metric units some time in the future. The changeover will be made easier by new regulations to be issued under the Consumer Packaging and Labelling Act requiring the marking of net contents on packaged goods in both Canadian and metric units. The booklet stresses that people will have to begin thinking in metric terms and should not try to remember a lot of complex conversion factors.

Why change?

The main reason for the changeover, which will have its main impact on industry, is that Canada has to catch up with most of the rest of the world. Now about 90 per cent of the world's population lives in metric countries and the bulk of international trade is conducted in metric units. The need for Canada to adopt a universal system of measurement has become urgent if we are to maintain our position as one of the major trading nations of the world.

"Metrication: A Guide for Consumers" is available free of charge from the Information and Public Relations Branch, Department of Consumer and Corporate Affairs, Ottawa, K1A 0C9.

Women Executives Face Job Descrimination

Getting Ahead on The Job

Although many women try to get ahead by concentrating on the so-called "female" professions, one reached the top by seeking "the kinds of jobs that women are not expected to have." She's Ersa Poston, president of New York State's civil service commission and holder of the highest civil service job in that state.

Commissioner Poston notes that most managerial jobs, both in government and in the private sector, are invariably controlled by men. "A qualified woman can't get near them," she says, "unless the man doing the hiring is terribly liberated himself." In most cases, when a man rather than a woman is selected for a high-level job, she adds "you'd have a devil of a time trying to prove it was discriminatory. It's so very subtle. Yet it happens all the time."

Ersa Poston knew from the start that she didn't want to be put in any of these "patronizing feminine kinds of positions" in civil service, she says. "I wanted to be treated as a professional. But I realized, as I worked my way up the managerial ladder, that I had to keep proving I could handle the requirements of the job, as any new boss would."

No Frivolity

"We women executives are often accused of spending half our time with frivolities," Mrs. Poston observes. "When I first became Civil Service Commissioner, I was shocked to discover the men thoughout I'd have my staff do all the work, while I spent most of my time at the hairdresser's or at cocktail parties." Mrs. Poston's male colleagues have since learned otherwise. "I don't capitalize on being a woman. I don't flaunt my feminity," she declares. "I make a point of dealing with both men and women in an honest day-to-day, face-to-face relationship. Their time is important. My time is important. Being open and direct with one another is the only way to get our jobs done."

The commissioner notes that although she herself has shied away from traditionally female occupations, numerous job opportunities for women do exist in these fields. "We can't buy enough, grow enough or build enough social workers," she says. "We must often go outside the country — and waive our usual citizenship requirements — in order to get them." There are also serious shortages, she reports, of librarians, dieticians, occupational therapists and physiotherapists.

Entry Level Jobs

Women are always in demand too for entry level clerical jobs in civil service, Mr. Poston notes. Men supervisors often find mature women "more acceptable" for such jobs than girls fresh out of school, she adds. "The men claim," Ersa Poston says, "that after they've taken the time to train the girls, they usually go off, get married and have babies.

"But whether women operate on higher or lower vocational levels," Mrs. Poston declares, "they're not being given the opportunities for position, promotion and the other opportunities that go with equal employment. Discrimination is quite prevalent. Many of us are still subject to what — by now — should be history."

Home Accidents Double Those at Work

Many industrial supervisors and safety specialists from all over Eastern Ontario will gather in Brockville on May 31st for the 37th Annual Meeting of the Ottawa-St. Lawrence Division of the Ontario Industrial Accident Prevention Association. The Division covers the Pembroke-Brockville-Cornwall triangle. For some years past this meeting has alternated between Ottawa and Brockville.

The meeting, in addition to the election of Officers for the 1972-73 season, includes a full afternoon and evening of discussions concerning various aspects of injury and accident prevention. Guest Speakers for the two afternoon sessions and the dinner are coming from Toronto.

One afternoon session will consider the problems of Noise and Loss of Hearing presented by Dr. Margaret Hayley of the Ontario Workmen's Compensation Board. Dr. Haylay, a native Scot practised in England, India and Ontario before joining the Board in 1967 to specialize in noise and resultant hearing problems. The Workmen's Compensation Board is experiencing an increase in hearing loss claims and Dr. Hayley will give the meeting the latest information on escalating industrial hazard.

Mr. Fred Blayney, Assistant Manager of the I.A.P.A. Training Centre, will review the many problems of personal lifting and offer safeguards for this hazard. Back injuries are a major difficulty experienced by the Workmen's Compensation Board. Mr. Blayney has been with the IAPA staff since 1957 and is well known for many Safety courses he has given throughout Ontario and elsewhere.

Dinner Speaker Dr. Dorothy Burton is a Pembroke native who trained as a Nurse and subsequently graduated as a Medical Doctor from the University of Toronto. After general practise including industrial medicine, she joined the Workmen's Compensation Board in 1955. Although her present area of interest is industrial disease, she will discuss "How Claims Are Administered" which will be of special interest to people in industry and detail establishments responsible for the processing of industrial injury and illness claims.

Although there is no Registration Fee, advance registration is recommended. Enquiries should be directed to the Division Secretary, Mrs. Helen Dennett, 151 Slater st., Ottawa.

CUT OUT HERE

RESCUE BREATHING (MOUTH-TO-MOUTH)

THE CANADIAN RED CROSS SOCIETY

Start immediately: The sooner you start, the greater the chance of success.

Open airway by lifting neck with one hand and tilting the head back with the other hand.

Pinch nostrils to prevent air leakage. Maintain open airway by keeping the neck elevated.

Seal your mouth tightly around the victim's mouth and blow in. The victim's chest should rise.

Remove mouth. Release nostrils. Listen for air escaping from lungs. Watch for chest to fall.

CUT OUT HERE

REPEAT LAST THREE STEPS TWELVE TO FIFTEEN TIMES PER MINUTE.

IF AIR PASSAGES ARE NOT OPEN: Check neck and head positions, CLEAR mouth and throat of foreign substances.

For infants and children, cover entire mouth and nose with your mouth. Use small puffs of air about 20 times per minute.

USE RESCUE BREATHING when persons have stopped breathing as a result of: DROWNING, CHOKING, ELECTRIC SHOCK, HEART ATTACK, SUFFOCATION and GAS POISONING.

Don't give up. Send someone for a doctor. Continue until medical help arrives or breathing is restored.

Here's the Answer

LOCAL and GENERAL

Mrs. Richard Casselman has just returned home from Winchester Memorial Hospital, where he underwent surgery.

Mr. and Mrs. William Laurin and Jean-Paul of Markham were guests of Mr. and Mrs. C. McKoy for the holiday week end.

Friends will regret to learn that Mr. John Scully is a patient in hospital at Kingston.

Congratulations are extended to Mr. and Mrs. John Rice who celebrated their 25th wedding anniversary last week end.

Mr. and Mrs. Robert Barclay of Waterdown and Mrs. Alex Cumming of Ottawa were guests of Mr. and Mrs. Alex Barclay.

Mr. and Mrs. Steve Merrill of Toronto were week end guests at the home of their parents, Mr. and Mrs. D. C. Merrill.

Mr. and Mrs. John Laurin and Mr. and Mrs. Terry Laurin and family of Mississauga were week end guests of Mr. and Mrs. A. Laurin.

Mrs. Beernard Brunt is attending a convention of the Catholic Women's League at Kingston.

Mr. and Mrs. John Robertson of Kirkland, Que., and Miss Elaine Laurin of Brockville were in town on Saturday to attend the wedding of their sister.

Mrs. George Baker has returned home from Winchester Hospital after undergoing surgery.

Mrs. Edwin Rice is a patient in Winchester Hospital.

The United Counties Boowmabile will be at the following locations in the area next week: Tuesday, May 30, Williamsburg C. 11:30 to 12:00; Inkerman C. 1:30 to 2:00; Hallville 3:15 to 3:30; Mountain 3:45 to 4:15. Wednesday, May 31, Long Sault C. 11:15 to 1:00; Gallingertown 2:15 to 2:30; Boucks Hill 2:45 to 3:00; Winchester Spgs 3:30 to 4:30.

Mrs. Miriam Salmon spent the holiday week end in Kingston and attended the 25th reunion of her graduating class from the Kingston General Hospital.

Winners in the Lions 100 Club drawing for May 13th are holders of tickets No. 7 and No. 37.

FORTHCOMING MARRIAGE

Mr. and Mrs. Eugene McCann of Brinston wish to announce the forthcoming marriage of their daughter, Sandra Jean, to Mr. Daniel William Rice, Morrisburg, Ont. The wedding will take place on Saturday, June 17, at 4 o'clock in the United Church, Brinston, Ont. There will be open house at Morrisburg Legion at 8:00 p.m. Everyone is welcome.

RECENT BIRTHS AT WINCHESTER MEMORIAL HOSPITAL

May 15, 1972 to Mr. and Mrs. Noel Potter, Winchester. A daughter

May 17, 1972 to Mr. and Mrs. Hubert Barkley, Morrisburg. A son

May 19, 1972 to Mr. and Mrs. Clifford Warren, Winchester. Twin daughters.

May 20, 1972 to Mr. and Mrs. Stephen Beckstead, Williamsburg RR2. A daughter.

May 21, 1972 to Mr. and Mrs. Bill Bootsma, South Mountain RR1 A son.

May 21, 1972 to Mr. and Mrs. Ronald Elliott, Chesterville, RR3. A daughter.

May 22, 1972 to Mr. and Mrs. Brendan Boyle, 60 Riverbrook Rd., Ottawa. A son.

May 22, 1972 to Mr. and Mrs. Ronald Warren, Kenmore. A son.

ACHIEVEMENT DAY HELD BY DUNDAS 4-H CLUB

Self-expression and attractive useful bedroom accessories were the products of the recent 4-H Homemaking Club, "Accessories For The Bedroom", in Dundas County. About sixty girls in Dundas East completed the project by attending Achievement Day on May 12, 1972, at Winchester Public School.

Throughout the project, the girls studied colour schemes and furniture arrangement, and learned how to make several accessories suitable for their bedroom — bedspreads cushions, dresser scarves with Italian Hemstitching or piping trim, waste baskets, lampshades and desk pads. The great array of individuality was demonstrated whe all girls displayed their articles at Achievement Day. A sincere thank you is extended to all leaders who helped with the project.

During the afternoon, the members had a chance to teach their visitors the material taught in the project. Clubs participating were.— Morewood No. 1 — an exhibit, commented on by Judy Crump; Morewood No. 2 — a skit by Holly Carruthers, Linda Como, Helena Tesselaar, Lorna Crump; Riverside Heights — a skit by Diana Walker, Janet Beckstead, Lori Faulkner; Williamsburg — an exhibits commented on by Laurie McIntosh; Winchester No. 2 — an exhibit by Linda Holmes; Winchester No. 3 — an exhibit by Cheryl Reoch; Winchester No. 4 — a demonstration by all members with Sharon Hutchinson commenting. Greetings were extended to the girls by Mrs. Hyndman, President of Dundas District Women's Institute.

For the completion of six Homemaking Club projects, Marlene McMahon, Morewood No 1 Club, earned her County Honours pin and certificate.

The Achievement Day was organized by County Home Economist, Miss Lorraine Holding, who was assisted by Mrs. Louise Umoessien, Home Economist for Carleton and Grenville Counties.

All are welcome to attend the program for Dundas West Achievement Day on May 27, 1972 at South Mountain Oddfellows Hall. The afternoon program will begin at 1:15 p.m.

NURSING DIRECTOR IS FETED ON RETIREMENT

Retiring director of nurses at the Brockville Psychiatric hospital, Mrs. M. Edythe Wilkins was honored with a dinner and dance at the Skyline Hotel on Friday evening May 5.

Mrs. Wilkins has been director of nursing at BPH for the past five years and assistant director for 12 years prior to that under Mrs. E.M. Orr.

Relatives, friends and members of the staff, as well as former staff members, gathered at the hotel and following a delicious buffet dinner, presented her with several gifts, as indication of the high esteem in which she was held.

A resume of her nursing career and early life was given by the master of ceremonies, Don Bruce, who has been her administrative assistant. Mrs. Wilkins replied and thanked all those with whom she had worked, sometimes under trying conditions, who have co-operated in so many ways to improve the standard of care for those in the hospital.

She stressed her wish that in the future all staff connected with the hospital would put forth a concentrated effort to help in organizing and developing new programs and ideas as they come along. She thanked all those who had helped to make the occasion such a surprise and success.

Mrs. Wilkins began her nursing career by entering training at the hospital in March of 1939, and graduating in 1942. She did general duty until 1945 on ward three and was ward supervisor on No. 4. In 1945 she went to University of Toronto, returning in 1946 as an instructor of Anatomy and Pharmacology.

In 1953 she became the assistant superintendent of nurses and continued in the teaching field until 1955 when she assumed full time duties as assistant superintendent of nurses. On the retirement of Mrs. Orr in 1967, she took over the reins and got involved with the unification of nursing service and all the headaches that were associated with it.

FROM MORRISBURG

The former Edythe Laurin, she was born and brought up in Morrisburg. Much of her spare time was spent as a printer's helper, as her father ran the Morrisburg weekly paper.

Married in 1935, she has two children, one of whom was able to attend the hospital's farewell party. Dick and his wife came from Sarnia, but her daughter Carol, unable to make it, sent a telegram of regrets.

With the thought of support of her family in 1939, she decided that nursing was a fairly secure profession and so entered training that March. She was one of the first married women in Ontario to enter the school of nursing. Her husband Harry Wilkins, who served in the Merchant Marine during the war, died in 1945.

Active in church and community endeavours, Mrs. Wilkins has participated in many activities in various organizations as well as in her own hospital choir. With her retirement starting June 1, she hopes to have a lot more time to spend with her grandchildren.

R. Douglas Goodbun, hospital administrator, made a presentation on behalf of the staff, Elvira Saxen assistant director of nursing, gifts from some of her well-wishers, Mrs Elizabeth Howard a presentation from the instructors, and Father Desmarais a gift from the R.C. patients.

Gifts were also presented from her family and friends. Relatives were there from Lindsay, Morrisburg, Prescott, Ottawa and Napanee.

TO TEACH IN AFRICA DR. DONALD C. CROBER

Dr. Donald C. Crober, son of Mr. and Mrs. Charles M. Crober of Morrisburg, who is professor of Animal Science at the Noa Scotia Agricultural College in Truro, Nova Scotia, left last week for Kampala, Uganda, and a temporary teaching assignment at Makerere University.

31-year old Dr. Crober is going to Africa as part of a co-operative program which involves the Nova Scotia Agricultural College, the University of Saskatchewan, and the federal government's Canadian International Development Agency.

He will teach animal science in the faculty of Agriculture at Makerere University and will direct a number of research projects. He will be returning to his post at the N.S.A.C. at the conclusion of his African assignment. He joined the staff at N.S.A.C. last year.

A native of Morrisburg he graduated with a Master of Science degree, majoring in poultry science and animal breeding, from McGill University (MacDonald campus) in 1964. He completed studies for his doctorate in 1969, at the University of British Columbia. Prior to going to Truro, he worked for two years for the Canadian Wildlife Service in Ottawa.

His wife, Kathy and son Jim are accompanying Dr Crober to Africa.

MAY MEETING OF ST. PETER'S LCW AT WILLIAMSBURG

Twenty members attended St. Peter's L.C.W. meeting on Wednesday evening in the church hall. The program, "Come Holy Spirit, Bring Life, Bring Identity" was presented by Mrs. Graham Froats and Mrs. Lyale VanAllen. Hymns sung were, "Come Holy Spirit, God and Lord", "Spirit of God, descend upon my Heart", and "Come Gracious Spirit, Heavenly Dove".

It was decided that a donation of $25.00 be set to the Seaway District Community Services.

A vote of thanks was extended to the ladies responsible for re-decorating the church hall and kitchen, the rear stairway and the minister's room.

The meeting closed with the missionary benediction.

91ST BIRTHDAY FOR MRS. SADDLEMIRE

To very few is given the joy and distinction of celebrating their 91st birthday, but this honor came to one of Williamsburg's most highly esteemed resident Mrs. Merton Saddlemire, who observed that event on Saturday, May 20, 1972 with a family dinner.

During the afterooon several ladies called and wished the celebrant a very happy birthday. Mrs. Saddlemire was presented with a lovely decorated birthday cake.

Congratulations and best wishes were received from her many relatives and friends, all deeply appreciated. These happy events are long remembered. All wish Mrs. Saddlemire continued good health and many more years to follow.

HAYLAGE DAY ON JUNE 14TH AT KEMPTVILLE

Wednesday, June 14 is haylage day at Kemptville College of Agricultural Technology. The program will feature personnel of the Ontario Ministry of Agriculture and Food.

The story of haylage production will be told in tours that start every hour between 10 a.m. and 2 p.m. Length will be about 2 hours. Topics include selecting the proper plant species for good haylage; the proper cutting time; the proper chopping time; typical machinery used; representative storage systems including both upright and horizontal silos; methods of getting it into the storage area, utilization of haylage in a feeding program; and the economics of a haylage system.

The program, which is free of charge, will be held on the farm facilities of Kemptville college. If weather conditions are doubtful, farmers should contact their local agricultural office after 9 a.m. on the 14. If weather forces cancellation, the program will be held next day

MORRISBURG SCOUTS ATTEND CAMPOREE

The 50th Anniversary of the Council Camporee was held at the Jacques Cartier Park at Morristown, New York. This is an annual event and the theme this year was called a "Pirates Weekend."

58 Troops of Boy Scouts competed for top prizes with one troop from Brockville and a troop from Morrisburg entering from Canada. Over 900 Boy Scouts, Rovers and Venturers had a tremendous week end.

1st Morrisburg Troop was successful in winning a first in Troop Competition which included knot tying,, compass reading, nature, fire-building and first-aid.

They also received a third in Troop Participation, and a third in Troop Campsite which included cleanliness and neatness around their own site.

Scouters Doug Smith, Dr. Roger Diement and their families accompanied the troop and are very proud of the boys accomplishments.

1st Morrisburg Troop will be attending a Spring Camporee for weekend and are planning on bringing home the top trophy.

Boy Scouts attending the Camporee at Morristown were: Dave Jarvis, Arthur Marcellus, Lee Markel, Randy Chesboro, Ron Pickles, Bob Wagner, Paul Binks, Steve Fraser, Dave Marston, Frank MacIntyre, Mark Devaul, Steve Smith, Gary Jarvis, Jeff Cassel, Wayne Markel.

New Manager Named For Hydro's Eastern Region

T. Edward Flinn has been named the new manager of Ontario Hydro Eastern Region it was announced today. The appointment is effective July 1 and he succeeds Alex M. Pedersen who is retiring.

Mr. Flinn has been manager of Hydro's Northeastern Region, with head office at North Bay, for the last four years. He brings to his new duties a broad experience in various Commission operations.—Head office for the Eastern Region is Belleville.

Mr. Flinn is succeeded as manager of Northern Region by Lavern Coles.

Mr. Flinn was born and educated in Toronto and received his Bachelor of Science degree in Electrical Engineering from the University of Toronto. He joined Ontario Hydro in 1939.

After a succession of increasingly responsible positions with Ontario Hydro he was named manager of Northeastern Region in July, 1968. He is a member of the Rotary Club of North Bay, of the Association of Professional Engineers of Ontario and the Engineering Institute of Canada.

He replaces Mr. Pederson who headed Eastern Region for 13 years, and a total of 41 years with Ontario Hydro. Born in Denmark he was educated at the University of Copenhagen and graduated from Queen's University, Kingston, Ontario with a B.S.Sc. in Electrical Engineering .

Members of the Senior Citizens' Club, whose telephone numbers are listed below, will be pleased to accept names and send form letters to past residents who may be interested in returning to Morrisburg for Old Home Week.

Two Are Candidates For Ministry

Two people, George Tomita of St. Paul's United Church at Cornwall and Miss Jean Barkley of St. James' at Avonmore were designated and received as candidates for the ministry at the meeting of Seaway Valley Presbytery of the United Church at Merrickville.

The chairman, Rev. Robert Pentinga of Cardinal was absent and chairman-elect Rev Douglas McKay of Williamstown, was chairman.

A point of interest was the fact that future representation in the presbytery will be increased, with the two Cornwall churches allowed four delegates to meetings after July 1, and other churches in proportion to the number of the congregation accorded three, two or one each. At present each congregation has one delegate. There will be 110 members of presbytery after the new system comes into effect.

Rev. Oliver Howard of Toronto, speaking for the Divison of Ministry and Personnel in the church, indicated that there are now 2,400 pastoral charges, down from 2,700 in 1960, a number which reflects the amalgamation of churches and depopulation of rural areas. He indicated that 1974 will probably bring a shortage of ministers in the church.

May 21 is church union Sunday and ministers are asked to make reference to this topic in their services. Presbyteny was informed that Seaway Presbytery would be responsible for part of a special workshop on the church in rural communities during Montreal and Ottawa Conference at Bishop's University May 27 to June 1.

METS SWAMPED VALLEYFIELD

Last Friday, the Morrisburg Junior Mets Lacrosse team outchecked and outplayed a much weaker Valleyfield team to surge onto a 13-3 victory. The game was plagued by penalties with 5 majors and 22 minors. The Mets concentrated on defensive play and were led by great goaltending by Donnie McNairn.

NEW TREATMENT PLANT FOR WASTE AT CAN. STARCH

The abandoned Galops canal near Cardinal is being converted into an aerated lagoon to treat industrial waste from The Canada Starch Company Ltd. plant and sanitary waste from the village of Cardinal, Environment Minister James Auld announced today.

The $860,000 installation, recently approved by the Ministry of the Environment, is scheduled for completion late this year. The lagoon will be about 1,000 feet long, 130 feet wide and 25 feet deep, serviced with five submerged turbine aerators. A chlorinated effluent meeting Ministry standards will be discharged to the St. Lawrence River.

The treatment facility, to be built by Canada Starch on a cost-sharing basis with the village, will solve a local problem, Mr. Auld said.

"In circumstances like this, it's an ideal solution," Mr. Auld said. "The municipal waste will provide phosphorus and nitrogen to allow proper bacteriological treatment of the industrial waste."

EASTERN ONTARIO CORN CROP IN MORE ACREAGE IN

The results of a survey of seed corn companies, conducted by the Kemptville College of Agricultural Technology, indicated a 26.4 percent increase in seed corn sales in eastern Ontario in 1970.

The corn acreage in the Ottawa Valley has nearly doubled since 1966 and now stands at approximately 200,000 acres in the 14 eastern Ontario counties. Local grain corn has replaced substantial amounts of imported small grains and corn as livestock feed. Corn acreage will increase 15 to 20 percent annually in the years to come because of increased local feed and industrial requirements (10 million bushels) Most industrial requirements are being met by corn coming in from southwestern Ontario and the United States.

The corn growers in eastern Ontario, however, have a price advantage over the rest of Ontario and the United States because land prices are still relatively low, and transportation costs to local markets are minimal.

A New Life

Dear Margaret Brookfield:

I'm 55. Just one year ago, my husband — who was five years older than I—died. He had always complained of ulcers, but until the last two years, I didn't realize he was actually an alcoholic. He died horribly of cirrhosis of the liver, as well as other ailments, including metal ones. During those last two years, our family life and our marital life were both unbearable (I would rather look back to the better years, when we had many good times with the family and a good social life with our friends.) At this point, my 21-year-old son and my 23-year-old daughter are still at home with me. My daughter just became engaged, while my son decided to take over his father's business, rather than go back to school and complete his degree in engineering. (My son doesn't date—at least not regularly—but has many friends. And I don't want him to feel I'm dependent on him in any way, since this might interfere with any plans he might have for his own future.) Although my husband left me financially well-situated, I definitely feel something is missing from my life. When I was a member of Alanon—which I joined because of my husband's drinking—I learned that when women who married alcoholics want to remarry, they're often attracted to the same type of person. Although I dislike being single, I worry about making the same mistake all over again. N.K.

Dear N.K.:

There's no reason in the world that you shouldn't think about remarrying. Since your children are self-sufficient, you certainly should be thinking of your own future. And you're obviously familiar with the warning signs of alcoholism because of your membership in Alanon—the family auxiliary organization of Alcoholics Anonymous.—Since you've already learned from experience what the pitfalls and problems there might be, perhaps you can make a better, happier life for yourself now with a more stable person.

Diagnosis: Boredom

Dear Margaret Brookfield:

I'm 49 and since I had a complete hysterectomy four years ago, I've taken estrogen regularly, according to my doctor's prescription. Yet I feel tired all the time and must push myself to do my housework. My two daughters are away at school this year and my husband is all tied up with his work at the office. I've gone back to the doctor about my constant fatigue, but he states my problem is boredom. Is that possible? D.D.

Dear D.D.:

It's not only possible, it's probable. After all, life's problems cannot be solved by medication alone. Estrogen, for example, may help compensate for the hormone deficiency caused either by a hysterectomy or by the menopause itself. Although proper medical care can put us in better shape to cope with life's challenges, actually coping with them is up to the individual involved. If the problem is boredom, then the solution is to find something really stimulating. It might be a job, volunteer work, a hobby, learning a new language, mastering a new style of cooking, or countless other activities. Why not begin exploring around a bit to find out which activity gives you real satisfaction. It's the best way to get some zest back in your life.

CARE

THIS IS THE WORLD OF CARE:

Providing nutritious food for school children and pre-schoolers, health services for the sick and handicapped, facilities and equipment for basic schooling and technical training, tools and equipment for community endeavours. Your support of CARE makes such things possible for millions of individuals around the world.

One dollar per person each year would do it!

Spawning Affects Fishing

Spring fishing usually begins about the same time fish start spawning. Years ago it was generally thought wise to prohibit fishing during spawning season. Not anymore, for biologists have proven that, in most cases, fishing during spawning has little effect on fish populations. Therefore, seasons are now open for most favorite species.

In some cases spawning contributes to good fishing. But with other species, information from Red Fisher at Mercury outboard shows, that spawning has little effect on angling success.

Bluegill are a favorite catch for spring anglers. Spawning begins early and continues into July. This is often true where nests are damaged by floods or muddy water. Bluegills differ from other members of the sunfish family in that they incline to spawn in a colony. Anglers take advantage of this to fill their stringers. Look for bluegill colony nests near shore, in water one to three feet deep.

Largemouth bass don't stay on the spawning bed too long. After the eggs are laid, the male guards the nest. Eggs hatch within a week, and the fry disperse within four days after hatching. When on the nest the male will not range away for food, however, he will strike lures coming through his nesting area.

Muskies pick shallow water over a soft bottom. Eggs are scattered and no protection is given them. Water temperatures from 42 to 48 degrees bring about muskie runs. Spawning done, the fish return to dense weed beds. Look for them there fishing with noisy top-water lures, or shallow-running spoons.

Northern pike follow much the same spawning routines as do muskie. They do not protect the eggs or young, and the best spring fishing is in heavy weed cover.

Hard, clean bottoms—gravel or sand—make spawning sites for walleye. Again, like pike and muskie, they give no protection to eggs or young. No definite spawning nests are built. Fish minnows over rocks and along sand dropoffs.

White bass spawn in schools, running upstream until a suitable shoal is found, then depositing eggs and milt and deserting their progeny. Spinners, lead-nosed jigs are best [illegible] Fish fast, deep water.

Question: The varnish on our entrance hall floor is badly worn with bare wood exposed in one place. Must I remove the old varnish before applying a new coat?

Answer: Not if instead of varnish you use a fast-drying polyurethane wood finish called Fasteron which can be applied directly over the old varnish.

This clear wood finish is excellent for halls and other high traffic areas because of its extreme durability. It resists abrasion and doesn't waterspot, so mud, grit, and water tracked in from outdoors can be washed or wiped away without damage to this finish.

And, with a normal drying time of only two hours, your family won't be unnecessarily inconvenienced while you refinish the floor.

TOUCH UP BARE SPOT FIRST

For best results, sand any blistered areas, then remove all wax, polish, and dust or dirt from the floor by washing with pure turpentine and clean rags. Brush a coat of Fasteron on the worn area. Complete the job two hours later by applying the finish to the entire floor.

You didn't mention the size of your hall, but one imperial gallon of Fasteron will cover an area of approximately 500 square feet.

FOR FURNITURE AND EXTERIOR USE

This wood finish may also be used for furniture, panelling, and other fine finishes. It is available in either a Gloss or Satin Finish. Fasteron Satin tends to minimize imperfections in the surface of older floors and furniture and produces an attractive rubbed effect.

Because it's waterproof, this finish is especially suitable for exterior wood and boats. It has unusual resistance to both fresh and salt water. Again, because of its fast drying time, several coats may be applied in the same day for added protection.

For additional information on this non-explosive polyurethane wood finish, write to Tom Tremfix, The Tremco Manufacturing Company (Canada) Ltd., 220 Wicksteed Ave., Toronto 17, Ontario.

BY TOM TREMFIX

Question: Although I haven't been able to find any evidence of water seepage due to a break in the house foundation, our basement has a damp, musty odour that is particularly noticeable during months when the furnace is not operating. The walls are cinder block and the floor is concrete. Is there some way I can get rid of the musty smell?

Answer: If the floor and walls are sound, the damp mustiness you mention could result from moisture condensation in the rooms below ground level where ventilation is seldom as good as on the upper floors.

You could apply a coat of rubber-base concrete paint to the floor which would do a lot to overcome the moisture problem. A paint called Colortread is formulated for use on concrete floors, porches, patios, and steps. Because of its rubber content it's unaffected by free moisture underneath the paint film.

PREPARATION

If your basement floor has never been painted, the only pre-treatment would be to make it as dry and dust-free as possible before rolling on this concrete paint. If there is old paint on the surfaces to be covered, this should be removed. On very smooth concrete floors, etching with a muriatic acid solution is recommended.

GLOSS FINISH— EASY MAINTENANCE

This particular paint will cover solidly in one coat and dry in 2 to 3 hours to a high gloss which is easy to keep clean. It's available in a choice of five colours: Red, Light Gray, Silver Gray, Light Green, and Sand. One imperial gallon will cover approximately 400 square feet.

ELIMINATES "DUSTING"

Particularly in high traffic areas, concrete floors tend to "dust" which makes them difficult to keep clean. Colortread completely eliminates this problem. Basements can be quickly cleaned with a sponge mop and outdoor surfaces hosed off.

For information on rubber-base concrete paints, write to Tom Tremfix, The Tremco Manufacturing Company (Canada) Ltd., 220 Wicksteed Ave., Toronto 17, Canada.

Short Takes

No Other Word for It

Originally a trademark, the word "cellophane" was declared a generic term by court decree in 1941. It had proven so appropriate to the product that the courts declared that no other word could describe it.

* * *

Virgin Forest

The most extensive virgin forest in the world today is the Amazon Valley forest extending from the Atlantic coast into the foothills of the Andes and from Bolivia through Colombia, Venezuela and the Guianas.

* * *

Canine Hearing

Tests show that dogs can tell apart sounds which are so close in pitch that the average human being is not able to tell the difference. Experiments conducted on dogs show they can distinguish between musical notes one-quarter-note apart.

* * *

Garden of Eden

Most scholars agree that the garden of Eden was somewhere in the vicinity of the Tigris-Euphrates valley. Some locate it about 100 miles north of Baghdad; others believe it was located on the site of the sacred city of Eridu in Babylonia near the Persian Gulf.

* * *

Gandy Dancer

A gandy dancer is any worker in a railroad section gang. One theory of the origin of this colorful name is that it may have come from the ganderlike tremulations of a man tamping ties.

Strictly Fresh

It's all right to build one's self up, just so long as you include an emergency escape in the project.

Seedless Cucumbers For Eating Pleasure

What is your image of a cucumber? Most people visualize a green fruit about 8 inches long and 2 inches thick, with a fairly tough skin, seeds, and, in many cases, the ability to cause "burps" after eating. Nearly all outdoor-grown cucumbers are of this type, as are most of the greenhouse-grown cucumbers in Ontario. Within the past three or four years, however, there has been an increasing interest by Ontario growers in the greenhouse production of seedless cucumbers. These cucumbers, often referred to as European, Dutch, or English, are 12 to 18 inches long, seedless, mild, non-bitter, of high quality, have a thin, edible skin, and seldom cause burps. In fact, they are sometimes called "burpless" cucumbers. The fruit is truly and typically a greenhouse or controlled environment product, as it cannot normally be grown outdoors. These cucumbers are parthenocarpic, which means they develop without pollination, and is the reason they are seedless. Field cucumbers and the commonly grown greenhouse varieties such as Burpee Hybrid and High Mark II require honeybees for pollination. For production of the long seedless cucumbers, on the other hand, it is essential that bees and all oher pollinationg insects be kept out of the greehouse. Otherwise, the fruits, after pollination, become off-shape, bulbous, seedy and unmarketable.

A recent survey indicated that approximately 15 percent, or 12 acres of all greenhouse-grown cucumbers in Intario are now of the European type. Total production is increasing substantially each year.

Although seedless cucumbers have been grown for many years in Britain and Europe, it is only since 1968 that the Horticultural Research Institute of Ontario at Vineland Station has started research programs with this crop. All varieties grown at present originated in Holland or Denmark. Ontario research has included extensive variety testing (25 varieties evaluated since spring 1968), pruning and training techniques, straw-bale and related bed cultures, and treatments with growth-regulating chemicals such as Ethrel. The Canada Department of Agriculture Research Station at Harrow, plans nutrition experiments with seedless cucumbers in 1971. Results of several variety trials at Vineland Station indicate that Toska is the earliest and most productive variety of those tested, followed by Bambina and Pin-Up. Sporu has produced the best quality and fruit size.

Because seedless cucumbers are so tender and thin-skinned, more careful handling is essential. The fruits tend to wilt and break down more quickly than the shorter American types unless proper handling, temperature, and humidity are provided. A temperature of about 50 degrees F and high humidity are required to maintain quality. Storage temperatures below 45 degrees F, e.g. refrigeration, cause skin pitting and deterioration. The low humidity and high temperatures common in most grocery stores cause the fruits to wilt and lose quality rapidly. In Europe, seedless cucumbers are sometimes wrapped in plastic sleeves or similar coverings to maintain their freshness for a longer time.

Harvest of the spring crop usually begins in March. Anyone who has not yet had the pleasure of eating, or at least tasting, a fresh seedless European cucumber should attempt to remedy the situation at his earliest convenience this spring.

Happy Homemaking

By BARBARA BAKER

Mark around the pattern with color crayon before cutting materials that ravel easily, and the cloth will not ravel when cut.

* * *

Use a small zigzag stitch when sewing bonded knits— it gives stretch to seams.

* * *

When patching a trouser leg, slip a rolled-up magazine inside and let it unroll. This will hold the material smooth as you sew on the patch.

* * *

Sew down the outside of the zipper tape about 1½ inches on either side to prevent curling or waving of a zipper at the top of a blouse or dress.

* * *

The lining should be preshrunk when making a garment that is to be lined. Preshrinking may be accomplished by placing lining in a bathtub, let warm water run on it until it is thoroughly wet, remove from tub without wringing and hang on line to dry. It will dry straight and not require pressing.

ADELAIDE DANIELS SAYS

WATCH THOSE HIDDEN WEIGHT BOOSTERS

Anybody who is inclined to put on unwanted pounds has all kinds of insidious enemies lurking in the refrigerator and kitchen cupboard. And the surprising thing is how often we fail to recognize the enemy.

It may be an extra doughnut (surely that won't do any harm); or a bit of creamed vegetable that the family didn't use; or a little leftover pudding that shouldn't be wasted.

Then there are even less obvious weight builders that catch people off guard unless they're pointed out to them.

I was hearing the other day of a woman who was almost in tears as she discussed her weight problem with her doctor.

"I'm eating much less pasta than I did," she said. "We have just ordinary servings of meat and vegetables — and lots of fruit. I don't know why I'm putting on weight."

"How much coffee do you drink?" the doctor asked her.

"Oh, maybe 12 or 14 cups a day."

"And how much sugar in each cup?"

"Perhaps two teaspoons, perhaps three," was the answer.

It's as easy as that to consume more food than you need. And any food beyond your daily needs is just naturally stored as fat. Continue it year after year, and the result can be disastrous.

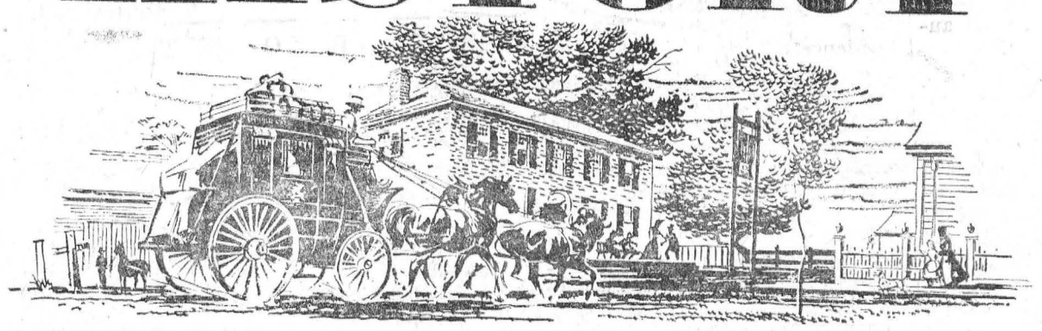
If weight is a problem with you, and you insist on drinking over 10 cups of coffee a day (which, by the way, I think is too much), try cutting down on sugar. Or ask your doctor about a sugar-free sweetener that he would approve for you. Or eliminate sweetener entirely.

The same goes for cream in your coffee.

You may not like the first few days of coffee without cream or sugar. But give it a chance. You're likely to end up wondering why you ever masked the wonderful flavour of good coffee with sugar or cream.

(Adelaide Daniels is Founder & Director of Weight Watchers of Ontario Limited)

HOLIDAY IN HISTORY



UPPER CANADA VILLAGE

ONTARIO'S LIVING HERITAGE

It is 1784-1867. You are there. A time machine has drawn you back into the 19th century, back to the days before Canada's Confederation. You will see the smithy, demonstrations of spinning and weaving, the Upper Canada mail coach clattering over the corduroy roads of yesterday. You will enjoy home-cooked meals in the 1850 surroundings of Willard's Hotel. History comes magically to life at Upper Canada Village. You will love it.

Close at hand are lush green parks, sandy beaches, marinas, fully equipped camping and trailer sites, an excellent golf course, riding stables and all sorts of outstanding recreational facilities. Come to Upper Canada Village and have a holiday in history. Upper Canada Village is just off the MacDonald Cartier Freeway (Highway 401).

Upper Canada Village on Highway 2 near Morrisburg is open daily from MID MAY TO MID OCTOBER

IN MEMORIAM

SMITH—In loving memory of a dear husband and father, George F. Smith, who passed away May 22, 1962.
There's a face that haunts us ever,
There's a voice we long to hear,
A smile we'll remember forever,
Though we try to forget every tear.
There's sad but sweet remembrance here's memory fond and true,
There's a token of affection, dear,
And heartache still for you.
—Sadly missed by
THE FAMILY.

SHAYLER—In loving memory of a dear wife and mother, Mrs. John Shayler (Agnes), who passed away May 22, 1968.
Just a thought of sweet remembrance,
Just a memory sad and true,
Just the love and sweet devotion
Of those who think of you.
—Always remembered by husband, John; daughters, Jessie and Anne; son, John, and Families.

DENTAL TOPICS—

YOUR CHILD AND A KNOCKED-OUT TOOTH

Did you know that if your child suddenly had a tooth completely knocked out that a dentist could reimplant the tooth into the place from where it came out. Although the tooth will, with a few exceptions, eventually loosen and come out it is considered worthwhile as it gives the child that much more time to have and use his own tooth.

The important factors in the success of this treatment are to keep the tooth moist and to get to a dentist as soon as possible.

The child should be given the following instructions. If he has an accident and one of his teeth is knocked out, he should try to find the tooth. He should then keep it moist by wrapping it in a wet cloth or tissue. If nothing is available, he should be told to hold thre tooth in the side of his mouth. He should either get home as quickly as possible or, if he is old enough to go directly to the dentist's office.

The dentist will seal up the centre of the tooth where the live tissue is, then implant the tooth back in the socket, and splint it with wires or plastic until it heals. In most cases the tooth will re-attach and render useful service for a while.
