NOTES AND COMMENTS BY THE EDITOR

Now for fall plowing.

Take in your tender house plants.

The elderberry crop is good, and the berry makes excellent wine.

Now that preserving season is nearly over look for a drop in the price of sugar.

Too many parcels from city Stores are coming through the post office. Do your trading at home.

The chief burden of labor organizations seems to be to see how little they can labor and how big pay they can get for it.

The modern youngster may not reach his majority until he is twenty-one, but what he don't know before that age his dad can't tell him.

The man or woman who writes an anonymous letter and signs it "a Friend" is both a liar and a coward; and newspaper editors know a few of them.

Don't drop loose papers, envelopes and wrappers on the street. This practise makes the streets look untidy, and gives the guilty ones a reputation for carelessness, and disregard for appearances.

The Counties Engineer said a few months ago that he would make the road to the C. P. R. station in Winchester as smooth as a board, but he did not say how many knot holes the board contained. It must have been full of them.

Henry Ford says wealth is not rightly distributed. When we compare Henry's bank account with our overdrawn account we fully agree with him. If ever Henry gets to broadcasting his wealth or that of the other millionaires, we will at once wire him our address.

A writer says that there is no authority anywhere for calling a certain style of automobile "coop," and that it should be pronounced "coopay." But in conversation almost everywhere the incorrect term is used. It is wrong dead wrong, but if its use is continued the word will eventually find its way into the dictionaries.

No wonder so many newspapers are going out of business or amalgamating, says the Swift Current Herald. On nothing have the trust monopolists such a stranglehold as on printing paper and printing machinery, and the costs of these essential publishing requisites have mounted beyond all previous bounds.

The other day Magistrate Maxwell of St. Thomas, in dealing with a man convicted of driving a car while intoxicated, in addition other penalties imposed prohibited the culprit from driving his own or any car for one year. The penalty is not too severe. A drunken man driving an automobile is almost at great a public menace as a mad dog running amuck.

It is related by a visitor to a remote part of Northern Scotland, that among the sights of a wild coast, was a beautiful monument, erected to the memory of sailors who were drowned near the spot. On the monument was the following addition to the usual inscription; "Erected by the generosity of the Scottish people of this district from part of the money taken from the dead bodies."

About "Long" Meetings

Our minister ran over time at church today—five minutes. He preached twenty-eight minutes. That made an hour and five minutes service, which is too much. So some people say, and if our preacher doesn't watch out they will be handing him his hat and asking what's his hurry. An hour and five minutes in church is an outrageous long time. I was wondering how these folks stood it to sit three hours at the theatre the other night, and two and a half hours at the movies, and I never heard of a dance one hour long, or a sixty minute card party. People seem to want to get their money's worth when they go to shows and things. Well, perhaps, that's why they want one hour at church. That's all they've paid for. I never thought of that.—Exchange.

A Gloomy Outlook.

Foster, the well known weather prophet whose weather predictions are now published weekly by many newspapers, gives this warning. He says:— I repeat the warnings: North America will not produce enough grain in 1925 to feed our own people and live stock. A great drouth, equal to that which nearly destroyed Russia, is almost as sure as sunrise. As middle and southern Russia will get good crops in 1925, that country will supply our wants, but North America will pay cash for Russia's 1925 grain. I earnestly and positively warn farmers to save parts of their 1923 and 1924 crops for the great disaster of 1925. All the crops of northwestern Russia and the late crops of Australia and New Zealand for 1925 will be poor. My cropweather forecasts do not fail along these cropweather drouth lines; were positive, clearly made and good for past seven cropseasons.

May He Rest In Peace

Breathe there a man with soul so dead,
Who never to himself hath said;
"My trade of late is getting bad,
I'll try another ten-inch ad."
If such there be, go mark him well—
For him, no bank account shall swell;
No angel watch the golden stair
To welcome home a millionaire
The man who never asks for trade
By local line or ad displayed,
Cares more for rest than worldly gain,
And patronage but gives him pain.
Tread lightly, friends, let no rude sound
Disturb his solitude profound;
Here let hi live in calm repose,
Unsought except by men he owes;
And when he dies, go plant him deep,
That naught may break his dreamless sleep.
Wherein no clamour may dispel
The quiet that he loved so well;
And that the world may know its loss,
Place on his grave a wreath of moss;
And on a stone above: "Here lies
A chump who wouldn't advertise."

SOCIAL AND PERSONAL NOTES

Miss Edith Price spent a few days visiting friends in Montreal.

T. O. Keyes and family are spending the week at River Beaudette, Que.

Silas Utman has left Brinston and taken a position in a store in Ottawa.

Mrs. C. A. Coons of Chesterville was the guest of Mrs. G. E. Earle on Monday.

Miss Evelyn Armstrong was the guest of her sisters in Ottawa the last of the week.

Mr. James Irving, of Pinkham, Sask., is the guest of his nephew, Mr. Scott Irving.

Mr. and Mrs. James A. Beattie of Montreal, are guests of Mr. and Mrs. Robert Beattie.

Miss B. Elliott, and Miss Helen Agnew leave next week to attend Queen's University, Kingston.

Mrs. Annie Smirle of Vancouver, B. C., was the guest of her niece Mrs. J. W. H. Summers last week.

Mr. and Mrs. J. W. H. Summers and family were the guests of Mr. J. H. Loughridge of Morewood on Sunday.

Miss Irene Carkner and Miss Luva Barclay have returned home after visiting Mrs. Sam Rae, of Richmond, Ont.

Mrs. Wm. Faith returned home last Friday having spent the summer visiting her nieces at Morewood and Chesterville.

Rev. J. R Earle who is home on furlough from China, will preach in the Methodist Church here next Sunday evening.

Miss Agnes C. Bell of Winchester. has gone to Brockville to take a stenographer's course at the Brockville Business College.

Rev. M. I. Robinson, of Shawville, Que. assisted Rev. J. Waddell in the evening service in the Methodist Church on Sunday.

Mr. and Mrs. Jas. Anderson spent last week in Ottawa with their daughter Mrs. Wyman and were accompanied home by their granddaughter Shirley Wyman.

Miss Idena Jones returned home from the General Protestant Hospital last week where she had been taken in a rather serious condition. Glad to report she is getting along splendidly.

Mrs. Eliza Keyes has spent the past week in Smith's Falls with her daughter, Mrs. Hugh Allison, whose little son Arthur underwent a critical operation on Friday last in the hospital there.

A very pretty wedding was solemnized at Stewarton Presbyterian Church Ottawa on Tuesday afternoon when Mr. J. H. Smythe, of Thonbury Ont., a brother of Mrs. A. E. Goodfellow, of Winchester, was united in matrimony to Jean McGilvery, of Dundee, Scotland. The wedding is the result of a courtship which began when Mr. Smythe was serving overseas during the war. Miss McGilvery came to Canada a couple of months ago, and has been the guest of Mrs. Goodfellow, here, and during her stay has made many friends, who all join in congratulations and best wishes, Mr. Smythe is an officer on one of the Lake Superior Steamers, and will likely make his home at Port Arthur, Ont., but will for some time at least remain with his bride in Ontario. Mr. and Mrs. A. E. Goodfellow were present at the wedding after which they all returned to Winchester, and Mr. and Mrs. Smythe left yesterday for Toronto.

Mr. W. T. Ellis, of the Ottawa Experimental Farm Staff, who each year spends a few weeks holidays with his friends at Rosehaven, was a caller at the Press Office last week and renewed his subscription for the 40th time, and paid the editor the compliment of publishing a paper "worth while." Mr. Ellis has, so to speak, been with the Ottawa Experimental Farm since its infancy, going there the same year that the late Dr. Saunders took charge He has seen many acres of swamp and brush land reclaimed, and made into fields of finest grain production. He has seen rough and uncultivated fields made into beautiful lawns driveways and flower gardens. The beautiful row of stately Elm trees along one driveway were all planted by Mr. Ellis many years ago. Mr. Ellis is now in his 70th year, but he looks much younger. His living close to nature, his aesthetic taste, his out-of-door occupation have preserved in him a youthful and hopeful spirit. Mr. Ellis tells an interesting story of the development of the Ottawa Experimental Farm.

Gilroy—Burgess

A charming wedding ceremony was solemnized at 3 p.m. September 11, at St. Patrick's church, Stafford, when Jean, youngest daughter of Mr. Thomas L. Burgess, became the bride of Mr. Albert Gordon Gilroy, of Winchester, son of Mr. and Mrs. E. F. Gilroy, of Brockville. Rev. Mr. Ferrier officiated, Mrs. Ferrier played the wedding march and Miss Worthy Mick sang a solo dnring the signing of the register.

The church was beautitully decorated with cut flowers. Given in marriage by her father, the bride looked charming in a gown of navy canton crepe beautifully beaded with opalesent beads, and large picture hat of black pan velvet and ermine stole. She wore the gift of the groom a diamond bar pin and ear rings and carried a bouquet of roses and maiden hair fern.

Miss Ray Burke, of Ottawa, was bridesmaid and Miss Addie Watson, of Ottawa, Maid of honor

Mr. Hamilton Brown, of Ottawa, attended the groom.

The gifts of the groom were onyx rings to the maid-of-honor and to the bridesmaid, and to Miss Mick he gave sn onyx bar pin- To the best man a pair of white gold cuff links.

A reception was held at the bride's home. Mrs. H Burgess received the guests and later a most sumptuous dinner was served. Miss Agnes Collins and Miss E. Robinson, of Ottawa, and Miss Edna Burgess and Mrs. Seigel were the waiters at the bride's table.

The bride and groom left on a motor trip to Brockville and Syracuse and other points The bride travelled in a tailored navy blue tricotine suit, a grey hat and a mole fur.

The bride received many valuable and pretty presents, among them a set of flat silver from her recent employer, Mr. Meyer Lepsson. of the NuVogue, and another set of flat silverware from the girls of the Nu Vogue.

Mr. and Mrs. Gilroy have taken up residence in their home on Center Street.

The second installment of your municipal taxes will soon be due, and then

LOCAL AND GENERAL JOTTINGS

Apple picking time.

The people missed the Saturday night band concert.

Suppose we start another agitation for a covered rink.

Mr. Lannin hopes to have his new hall ready by the first week in November.

The motor buses did a good business during the Ottawa Fair. Three trips a day for each line, and nearly every bus filled.

Billie Agnew is down with Scarlet Fever which developed on Monday last, and which means that Billie won't be able to take part in the High School sports nor in the Meikle cup contests this year.

The Ottawa exhibition had a somewhat smaller total attendance this year, but the weather was unfavourable. In every other way the exhibition was much better than in former years.

Died—At Morrisburg, Wednesday September 12th, 1923, Mary Jane Froats, wife of Wm. H. Fetterly, in her 59th year. The funeral will be conducted from her late residence, Main street, to St. Pauls Lutheran Church, Sunday, Sept. 16th at two p.m. Interment at Riverside cemetery.

The bowling tournament held on the local green last Friday afternoon and evening proved a most enjoyable day of sport for the several teams participating, although the number of visiting teams was not what was expected. At the last moment Kemptville and Prescott sent word that they could not come. There were two rinks from Alexandria, one from Victoria, Ottawa, and the local teams were helped out in the afternoon by Messrs. Price and Elliott of Chesterville. The Ottawa team were the champions of the day, defeating a local team in the last draw. It was a friendly game throughout, and although the weather was a little chilly, the games were enjoyed and keenly contested. The visitors and local members of the club were splendidly entertained at a banquet, given by the ladies and served in the school room of St. Paul's Church. Rev. Mr. Glassford, president of the local club, welcomed the guests, and expressed the hope that next year they would all come again, when a tournament where prizes would be competed for would be put up. Brief replies were made by the visitors, and a very enjoyable social hour was spent by all.

Reduction of Electric Rates

Mr. Empey, clerk and Mr. VanBridger, Supt. of Hydro Electric here, have received word from the Secretary of the Hydro-Commission that a reduction in Hydro light and power rates, effective at once, has been decided on, which we understand will amount to about 20 per cent off the old rates, and the usual 10 per cent for prompt payment It is also announced that in January 1924, a further reduction will probably be made. The reduction applies to our municipal lighting. The old rate of $19.50 for 100 watt lamp is now $13.

Consolidated School Opening.

There was a large crowd at the opening of the North Mountain Consolidated School at Hallville yesterday, and the new school in all its perfect appointments, it's spacious Assembly Hall, its modern equipment and well furnished class rooms, was greatly admired. There was a large number of speakers present, including representative from the Educational Dept. at Toronto, Dr. Putman, Inspector of Schools, Ottawa; S. J. Keyes, of Ottawa Normal School, repsesentative of Kemptville Ag. College, A. Sweet, M. P. P., and John McCormick, of Winchester, Reeve Robinson, of Mountain, Rev. Mr. McKinnon, of Peterboro, and formerly, of Hallville, and many others. Mr. H. B. Fetterly, I. P. S., presided. The musical part of the program was furnished by the Winchester Citizens' Band. There were Athletic Sports, and in the evening the ladies served dinner. The promised play, "It Pays to Advertise" was not presented owing to the illness of one of the performers, but there was an excellent Quartette of singers from Ottawa. and much community singing which was greatly enjoyed The trustees are well pfeased with the success of the opening. Many from here were present.

Women's Institute

There was a good attendance of ladies on Tuesday afternoon to show their interest in the cakes exhibited by the girls The financial report showed a good balance in the Treasury after all bills had been paid, including the purchase of chairs from Mr. T. O. Keyes for the Band to use on the Hotel balcony while giving their Saturday night concerts. After the business part was over, Mrs. G. F. Armstrong took the chair as Convenor of the Program Committee and called upon Mrs Robert Suffel to give the introductory part of the life of Bliss Carman. Mrs. Armstrong followed with some interesting sketches of his life and short selections from his poems, Mrs. Earle concluded the study with a short reading along the same line, and Frances Eagleson recited so nicely one of Carman's poems; "Woodland Rain." Miss Phillips kindly contributed a well-executed piano solo

After this the decision of the judges, Mesdames Preston, Angus and J. W. Ault was given as follows;—Best dark layer cake—first prize, Dorothy Wallace; second prize, Effie Fisher. Best light layer cake—first prize, Mable Suffel, second prize, Violet McCourtie. The other contestants were highly commended for their cakes. Books were given for first prizes, and boxes of notepaper for second prizes.

A vote of thanks was given Miss Phillips, the girls who so kindly donated their cakes to the Institute to be sold, and to the committee in charge,

Ice-cream and cake were served, and the remainder of the cakes found ready sale.

Just A Comparison

Winchester has been paying up till the present $85 per horse power. The rate is now $65. Ottawa pays $11.75, Welland $12.66, Peterboro $16.46, Kingston 19.74 and so on. Whether West or East, the rate is about one-third paid in this section Another revision downward would be

LOCAL AND GENERAL JOTTINGS

Corn Roasts are in order.

The Public School teachers attended the opening exercise of the Mountain Consolidated School yesterday afternoon, and the children enjoyed the half holiday.

Mr. Jas. Irving, of Pinkham, Sask., who is visiting here, showed the Press a sample head of Marques wheat from his farm containing nearly 40 kernels. If Mr. Irving has a field of such wheat it ought to prove a big yield.

Mr. Price, manager of the Molsons Bank at Chesterville. is to move to Western Ontario, where he has been appointed to take charge of another branch. Mr. Price will be missed among the bowlers of this district.

Mr. and Mrs. Emmerson Faulkner and son Donald of Morewood have arrived home after spending the past week at Toronto, also visiting Mr. and Mrs. Hugh Rodney at Milton and while there enjoying a motor trip through Hamilton and Grimsby.

The High School Annual Sports will be held on the Fair Grounds on Tuesday, Sept. 25 commencing at one o'clock. A number of interesting events will be contested and special prizes will be awarded to Jr. and Sr. Champions of boys and girls. Admission 15c. Come and boost your own school.

Valuable Hen.

There is nothing of the slacker in a hen owned by G. L. Cotnam, of Pembroke, which appears to have a full sense of its duty in these days of under-production. This industrious fowl, which only hatched out a brood of chickens six weeks ago, got back on the job Sunday morning and started to lay. She laid an egg each day until Wednesday when she laid two eggs, making a total of five eggs in four days.—Pembroke Standard.

Tips Thankfully Taken

Tip the Press Office. If you see an accident or any unusual happening, phone us. If you have some one visiting you know of, or some one being in town, or going away, phone us. If you will keep your eyes and ears open for the new and unusual, it will help us make a better paper for you and our other readers. We can't know everything, and we can't be everywhere. Tips are appreciated Phone 21.

Everything in Mens and Womens Winter wearables—Penmans and Stanfields Underwear, Penmans Cashmere Hose—all wool and silk and wool mixtures.

D. C. Bush.

The famous 6 reel comedy entitled, "The Crossroads of New York" will be shown in the Town Hall one night only, Saturday, Sept. 22nd. Prices 35c and 25c.

Mrs. Eleanor Allison

It becomes our duty to record the death of an old and highly respected resident, in the person of Mrs. Eleanor Allison, who died at the old Allison homestead near Dunbar, Ontario, on the morning of Friday September 14th, 1923. Two months ago Mrs. Allison suffered a stroke of paralyis, which seemed at the time to be serions, but from which she made considerable recovery. The shock however proved too much for one in her advanced years, and gradually losing her strength she passed peacefully away.

She was born in Cornwall, Ont., April 24th seventy-nine years ago, and was a daughter of the late Andrew Sproule. At the age of six she came to Willlamsburg Township with her parents. In the year 1867 she was married to the late William R. Allison of Dunbar. Of this union were born, two daughters, Jennie and Carrie, and four sons, Carlton, Anson, Hugh and Fred. Theirs was a model christian home which greatly enriched the community.

While young, Mrs. Allison devoted her life to the fulfilment of the christian ideal and became a faithful and worthy member of the Elma Methodist Church. She loved and served her Saviour loyally and well. Quiet, unassuming, frank and genuine she made a host of friends, who today prize very highly the richness of her friendship. She was an ideal wife and a loving and devoted mother.

The departure of Mrs. Allison is rendered doubly sad following closely upon the death of her son Fred whose filial and parental care in the home seemed indispensable. For the sorrowing friends the sincere sympathy of the community is expressed,

The funeral service which was conducted by her pastor Rev. J. B. Howe, assisted by Rev. H. S. Cooke of Morewood took place Sunday afternoon September 16th from the old homestead to the Elma Cemetery, where burial was made in the family plot.

New Northway Coats this week. We believe we are giving the best Values obtainable, not only in Ready-to-wear Garments, but in all lines of Dry Goods and Home Furnishings,

D. C. Bush.

NOTICE !

Delicious! Economical!

SPECIAL DIETS FOR THE UNDERNOURISHED CHILD.

A child may be undernourished after an acute illness or operation, or because of a tendency to tuberculosis. He must have more calories per day than the normal child, for he needs increased building and repair material. But the diet cannot be made simply greater in quantity. The stomach capacity remains the same and often the child lacks a normal appetite. So the extra calories must be tucked in the same bulk of food.

On the other hand, the diet must not be so concentrated as to cause constipation, for that in itself will aggravate the lack of appetite and general lower body tone.

So add milk, eggs, butter, cream and gelatine, wherever possible, to make each dish more nutritious. Do not increase sweets; they will make a false gain in weight without nourishing in the fundamental sense. Keep the fruits and vegetables in good proportion.

THE CHILD OF SIX WHO WILL NOT DRINK MILK; A 1,600-CALORIE DIET.

Breakfast—Orange, apple, baked, or prunes, etc. Cereal cooked in one-quarter water and three-quaters milk in double boiler; toast, butter. Diluted cocoa or milk, flavored with cereal coffee.

10 a.m.—Caramel junket or creamy blanc mange; zwieback.

Dinner—Minced chicken in cream sauce. Baked potato, beaten creamy with milk, green vegetables, bread and butter. Cooked fruit with rice cooked partly in milk.

Supper—Vegetable cream soup, toast and butter, custard or tapioca cream.

PLEASANT KITCHENS.

Color is an important matter in the kitchen. From a mistaken idea that dull, dark colors make the work easier by making less cleaning necessary, too many kitchens are painted and papered in colors that depress and discourage the worker. This idea about the value of color is not a fad but an established and proved fact. Experiments with colors conducted upon our returned soldier boys who are suffering from shell shock are of the utmost interest and importance to every busy country housewife.

Let the colors in your kitchen be light and cheerful. In this respect, ignore the prevailing fashion and have what you like best. Yellow makes sunshine and cheer. Light blue is cool. Silver gray is soothing. One busy woman gets the greatest satisfaction from her kitchen done over in pink. "I've always loved pink," she says, "but I've had to live long years with drab and dark blue and dull green. My pink kitchen makes me think of apple blossoms and roses and June mornings even in December. I had the choice of decorating the parlor or the kitchen, so I chose the kitchen. And I had it pink."

You may smile at the idea of a pink kitchen. But if you could see how it lightens the hard work of this lover of rosiness you would realize that her pleasure and satisfaction far outweigh all the established precedents in the world.—A. M. A.

SEASONABLE RECIPES.

Cucumber catsup—One dozen large cucumbers, one quart of vinegar, one tablespoonful of salt, one-quarter teaspoonful of cayenne pepper. Gather the cucumbers before the sun strikes them and keep in a cool place until used. Peel the cucumbers and run them through a food-chopper. Drain off the water. Heat the vinegar and pepper and salt to boiling point; pour at once over the cucumber pulp, bottle and seal. Cucumbers bottled in this way retain their fresh flavor and make a particularly good sauce to serve with beefsteak.

Grape catsup is new to many. It requires four pounds of grapes, two tablespoonfuls of cinnamon, one tablespoonful each of cloves and allspice, one-quarter of a teaspoonful of cayenne pepper (if desired), one cupful of vinegar, one teaspoonful of salt and one and one-half pounds of sugar. Wash and stem the grapes and steam them over water until soft. Put through a colander or sieve, discarding the skins and seeds. To the portion which passes through the sieve add spices, sugar, salt and vinegar and let simmer for fifteen minutes. Bottle and seal. Use whole spices tied in a cloth while cooking and remove before bottling. Grapes of the acid variety are preferred to very sweet ones.

Concentrated vegetable soup mixture is convenient to have on hand and consists of one quart of tomato pulp, one pint of corn or tiny Lima beans, one pint of okra, one small onion (chopped), one-half cupful of chopped sweet red pepper, one and one-half teaspoonfuls of salt and three teaspoonfuls of sugar. Cook the tomatoes, pepper, and onion, put through a sieve to remove seeds, and cook down to about the consistency of catsup. Add the corn or beans and okra, which have been prepared as for canning, add the seasoning and cook all together for ten minutes. Pack at once into hot jars, and process in water-bath or water-seal continuously for two hours; or under five pounds steam pressure, for sixty minutes; or under ten pounds steam pressure for forty minutes. Remove the jars from the canner and seal at once. Tin cans should be plunged immediately into cold water and cooled as quickly as possible. When cool, store in a dark, dry, cool place.

A STYLISH BLOUSE.

4432. The model has the new hip band finish, and the popular "front drape" in cascade effect. Figured silk was used in this instance. One could use crepe, or georgette, or, combine two materials, using crepe for the body of the blouse and georgette for sleeve and jabot.

The Pattern is cut in 7 Sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires 2½ yards of 40-inch material.

Pattern mailed to any address on receipt of 15c in silver or stamps, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

God's Plan.

The class in physics were studying magnets. After a number of experiments the teacher took several sheets of paper and a box of steel filings. At his bidding the pupils sprinkled the filings on the papers; the fine particles looked like grains of sand that might have fallen from the hand of a heedless child.

"Now," said the teacher to one of the boys, "take your paper of filings and place it on top of that magnet."

The boy did so, and there was a sudden stirring among the particles. In a second the filings had arranged themselves in beautiful symmetrical patterns. Every particle on the paper seemed to have found its proper place. Out of confusion the magnet had brought order.

How jumbled and scattered life seems at times! How can wickedness and goodness both be working for the glory of God? How can we reconcile joy and sorrow, love and hate, life and death? How can there be any plan to things?

It may be that while we are in this world we shall not be able to see the infinite plan that takes account of all things and fits them into their proper places to bring glory to God and good to his children. Nevertheless, can we not wait until that day when life will appear to us like filings on a sheet of paper above a magnet? Then we shall see everything in its proper place; then we shall see the perfect pattern.

Sambo Scores.

A medical board was testing the mentality of a negro soldier.

"Do you ever hear voices without being able to tell who is speaking or where the sound comes from?"

"Yes, suh," answered the negro.

"And when does this occur?"

"When I'se talkin' over de telephone."

CHAPTER VIII.

BY MEANS OF THE FIRE ESCAPE.

Kirby Lane stood with fascinated eyes looking down at the glove, muscles and brain alike paralyzed. The receiver was in his hand, close to his ear.

A voice from the other end of the wire drifted to him. "Number, please."

Automatically he hung the receiver on the hook. Dazed though he was, the rough rider knew that the police were the last people in the world he wanted to see just now.

All his life he had lived the adventure of the outdoors. For twelve months he had served at the front, part of the time with the forces in the Argonne. He had ridden stampedes and fought through blizzards. He had tamed the worst outlaw horses the West could produce. But he had never been so shock-shaken as he was now. A fact impossibly but dreadfully true confronted him. Wild Rose had been alone with his uncle in these rooms, had listened with breathless horror while Kirby climbed the stairs, had been trapped by his arrival, and had fought like a wolf to make her escape. He remembered the wild cry of her outraged heart, "Nothing's too bad for a man like that."

Lane was sick with fear. It ran through him and sapped his supple strength like an illness. It was not possible that Rose could have done this in her right mind. But he had heard a doctor say once that under stress of great emotion people sometimes went momentarily insane. His friend had been greatly wrought up from anxiety, pain, fever, and lack of sleep.

In replacing the telephone he had accidentally pushed aside a book. Beneath it was a slip of paper on which had been penciled a note. He read it, without any interest.

Mr. Hull he come see you. He sorry you not here. He say maybe perhaps make honorable call some other time.

S. Horikawa.

An electric bell buzzed through the apartment. The sound of it startled Kirby as though it had been the warning of a rattlesnake close to his head. Some one was at the outer door ringing for admission. It would never do for him to be caught here.

He had been trained to swift thought reactions. Quickly but noiselessly he stepped to the door and released the catch of the Yale lock so that it would not open from the outside without a key. He switched off the light and passed through the living-room into the bedchamber. His whole desire now was to be gone from the building as soon as possible. The bedroom also he darkened before he stepped to the window and crept through it to the platform of the fire escape.

The glove was still in his hand. He thrust it into his pocket as he began the descent. The iron ladder ran down the building to the alley. It ended ten feet above the ground. Kirby lowered himself and dropped. He turned to the right down the alley toward Glenarm Street.

A man was standing at the corner of the alley trying to light a cigar. He was a reporter on the "Times," just returning from the Press Club where he had been playing in a pool tournament.

He stopped Lane. "Can you lend me a match, friend?"

The cattleman handed him three or four and started to go.

"Just a mo'," the newspaperman said, striking a light. "Do you always"—uff, puff— "leave your rooms"—puff, puff, puff—"by the fire escape?"

Kirby looked at him in silence, thinking furiously. He had been caught, after all. Ther were witnesses to prove he had gone up to his uncle's rooms. Here was another to testify he had left by the fire escape. The best he could say was that he was very unlucky.

"Never mind, friend," the newspaperman went on. "You don't look like a second-storey worker to yours truly." He broke into a little amused chuckle. "I reckon friend husband, who never comes home till Saturday night, happened around unexpectedly and the fire escape looked good to you. Am I right?"

The Wyoming man managed a grin. It was not a mirthful one, but it served.

"You're a wizard," he said admiringly.

The reporter had met a bootlegger earlier in the evening and had two or three drinks. He was mellow. "Oh, I'm wise," he said with a wink. "Chuck Ellis isn't anybody's fool. Beat it, Lothario, while the beating's good." The last sentence and the gesture that accompanied the words were humorous exaggerations of old-time melodrama.

Lane took his advice without delay.

CHAPTER IX.

THE STORY IN THE NEWS.

From a booth in a drug store on Sixteenth Street Kirby telephoned the police that James Cunningham had been murdered at his home in the Paradox Apartments. He stayed to answer no questions, but hung up at once. From a side door of the store he stepped out to Welton Street and walked to his hotel.

He passed a wretched night. The distress that flooded his mind was due less to his own danger than to his anxiety for Rose. His course of action was not at all clear to him in case he should be identified as the man who had been seen going to and coming from the apartment of the murdered man. He could not explain why he was there without implicating Rose and her sister. He would not betray them. That of course. But he had told his cousins why he was going. Would their story not start a hunt for the woman in the case?

Man is an illogical biped. Before Kirby had seen the glove on the table and associated it with the crime, his feelings had been that the gallows was the proper end of so cruel a murderer. Now he not only intended to protect Rose, but his heart was filled with pity for her. He understood her better than he did any other woman, her loyalty and love and swift, upblazing anger. Even if her hand had fired the shot, he told himself, it was not Wild Rose who had done it—not the little friend he had come to know and like so well, but a tortured woman beside herself with grief for the sister to whom she had always been a mother too.

He slept little, and that brokenly. With the dawn he was out on the street to buy a copy of the "News." The story of the murder had the two columns on the right-hand side of the front page and broke over to the third. He hurried back to his room to read it behind a locked door.

The story was of a kind in which newspapers revel. Cunningham was a well-known character, several times a millionaire. His death even by illness would have been worth a column. But the horrible and grewsome way of his taking off, the mystery surrounding it, the absence of any apparent motive unless it were revenge, all whetted the appetite of the editors. It was a big "story," one that would run for many days, and the "News" played it strong.

As Kirby had expected, he was selected as the probable assassin. A reporter had interviewed Mr. and Mrs. Cass Hull, who occupied the apartment just below that of the murdered man. They had told him that a young man, a stranger to them, powerfully built and dressed like a prosperous ranchman, had knocked on their door about 9.20 to ask the way to the apartment of Cunningham. Hull explained that he remembered the time particularly because he happened to be winding the clock at the moment.

A description of Lane was given in a two-column "box." He read it with no amusement. It was too deadly accurate for comfort.

> The supposed assassin of James Cunningham is described by Mrs. Cass Hull as dressed in a pepper-and-salt suit and a white, pinched-in cattleman's hat. He is about six feet tall, between 25 and 30 years old, weighing about 200 or perhaps 210 pounds. His hair is a light brown and his face tanned from the sun.

His age and his weight were overstated, and his clothes were almost a khaki brown. Otherwise Mrs. Hull had given a very close description of him, considering her state of mind at the moment when she had seen him.

There was one sentence of the story he read over two or three times. Hull and his wife agreed that it was about 9.20 when he had knocked at their door, unless it was a printer's error or the reporter had made a mistake. Kirby knew this was wrong. He had looked at his watch just before he had entered the Paradox Apartment. He had stopped directly under a street globe, and the time was 9.55.

Had the Hulls deliberately shifted the time back thirty-five minutes? If so, why? He remembered how stark terror had stared out of both their faces. Did they know more about the murder than they pretended? When he had mentioned his uncle's name the woman had been close to collapse, though, of course, he could not be sure that had been the reason. To his mind there flashed the memory of the note he had seen on the table. The man had called on Cunningham and left word he might call again. Was it possible the Hulls had just come down from the apartment above when he had knocked on their door? If so, how did the presence of Rose fit into the schedule?

Lane pounced on the fear and the evasion of the Hulls as an out for Wild Rose. It was only a morsel of hope, but he made the most of it.

The newspaper was inclined to bring up-stage the mysterious man who had called up the police at 10.25 to tell them that Cunningham had been murdered in his rooms. Who was this man? Could he be the murderer? If so, why should he telephone the police and start immediately the hunt after him? If not the killer, how did he know that a crime had been committed less than an hour before?

As soon as he had eaten breakfast, Kirby walked round to the boarding-house on Cherokee Street where Wild Rose was staying with her sister. Rose was out, he learned from the landlady. He asked if he might see her sister. His anxiety was so great he could not leave without a word of her.

Presently Esther came down to the parlor where the young man waited for her. Lane introduced himself as a friend of Rose. He was worried about her, he said. She seemed to him in a highly wrought-up, nervous state. He wondered if it would not be well to get her out of Denver.

Esther swallowed a lump in her throat. She had never seen Rose so jumpy, she agreed. Last night she had gone out for an hour alone. The look in her eyes when she had come back had frightened Esther. She had gone at once to her bedroom and locked the door, but her sister had heard her moving about for hours.

Then, suddenly, Esther's throat swelled and she began to sob. She knew well enough that she was at the bottom of Wild Rose's worries.

"Where is she now?" asked Kirby gently.

"I don't know. She didn't tell me where she was going. There's—there's something queer about her. I—I'm afraid."

"What are you afraid of?"

"She's so—so kinda fierce," Esther wailed.

It was impossible to explain, even to this big brown friend of Rose who looked as though his quiet strength could move mountains. He was a man. Besides, every instinct in her drove to keep hidden the secret that some day would tell itself.

Her eyes fell. They rested on the "News" some boarder had tossed on the table beside which she stood. Her thoughts were of herself and the plight in which she had become involved. She looked at the big headlines of the paper and for the moment did not see them. What she did see was disgrace, the shipwreck of the young life she loved so much.

Her pupils dilated. The words of the headline penetrated to the brain. A hand clutched at her heart. She read again hazily—

JAMES CUNNINGHAM MURDERED

—then collapsed fainting into a chair.

(To be continued.)

AN IRISH TRIBUTE TO COLLINS AND GRIFFITH

The Irish people celebrated the first anniversary of the death of Michael Collins and Arthur Griffith by unveiling a fine cenotaph in their honor. It was erected near the Government buildings in Dublin, and is of Celtic design with medallion portraits of the two men on its face, and surmounted by a Celtic Cross.

Inventing An Island.

Phantom islands have very often been created for the purpose of making money out of a credulous public, says an English writer.

A supposed traveller will come with news of an unknown island which is teeming with mineral wealth. He is immensely excited, of course, and takes the whole world into his confidence. Never has there been such an island, he declares, as he roughly describes where it is situated. There is a fortune to be made out of its minerals if only he had the money to supply the necessary plant.

Money is usually forthcoming, and then the adventurer sets sail for his imaginary island—never to return.

Another audacious fellow with a Press agent as accomplice will announce that the King of Moringa is about to visit Eigland. The newspapers will contain full reports of his progress, and a vast crowd will be waiting to welcome the bogus sovereign. The Press agent has done his work well!

The monarch arrives in royal state, and puts up at the best hotel. Society seizes upon the latest "lion," and he is feted to the skies. Amazing stories are told of the Island of Moringa, and the deceiver makes the most of his fame.

Suddenly he disappears, leaving enormous debts behind him, and society learns to late that the Island of Moringa never existed.

Some stamp collectors are simple souls who readily fall into the traps set by wily adventurers. Beautifully printed stamps are issued from some imaginary island, and really keen stamp collectors will pay fabulous sums of money to possess such a rare specimen. They regard each other with suspicion and jealousy, and make secret deals with the adventurer or his accomplices in order to go one better than their rivals.

The adventurer rises to the occasion but sooner r later he is bound to disappear, and then the collectors will find to their dismay that the wonderful stamp is faked. The island from which it was issued is built of 'airy nothing."

Just Suited Him.

They sat at the edge of the wood, gazing dreamily at the reapers tolling in the sunny fields, at the scarlet poppies that glowed amid the golden grain, and at each other.

"Darling," he cried, " I swear by this great tree whose spreading branches shade us from the heat—by this noble tree I swear that I have never loved before."

The girl smiled faintly.

"You always say such appropriate things, Dick," she murmured. "This is a chestnut tree."

Scheme of Life.

"Stop, look, listen!"

The reflective man stopped to read the railroad warning.

"Those three words illustrate the whole scheme of life," he said.

"How?"

"You see a pretty girl, you stop; you look; after you marry her you listen."

PORT OF VANCOUVER CONTINUES PROGRESS

WESTERN GATEWAY TO THE DOMINION.

Grain Elevators and Brokerage Houses Being Erected and Steamship Lines Inaugurated.

Official figures for the past year of navigation have disclosed the fact that Vancouver has the greatest ocean tonage of any Canadian seaport. Vancouver's business has so developed that it is now the largest grain port on the entire Pacific coast and ranks as third on the seaboard in the volume of general freight handled, having in the past year left Seattle and Tacoma behind.

In the year 1922 a total of 16,641 ships entered the port. A total of 716 ocean-going vessels with a gross tonnage of 3,967,000 tons arrived and departed as against 476 vessels of 2,946,000 tons in the previous year. In the same year 1,550,000 tons of cargo were handled as against 998,000 tons in 1921. The port, amongst other things, was called upon to handle 225,000,000 feet of lumber; 14,460,000 bushels of grain; 482,000 barrels of flour; and 153,000 cases of apples, all of which figures show substantial increases when compared with the respective handlings of 1921.

Since the war the prestige of Vancouver as a port has increased in a most remarkable manner and it has rapidly come to assume a position of significant importance among world ports. The average monthly arrivals of deep-sea ships in the past year, for instance, was 58, whereas ten years ago this average was 10, and twenty years ago 6.

Expansion of Trade to the Orient.

Though there has been a vast increase in the volume of all phases of business at the Port of Vancouver in recent yars owing to the great expansion of Canadian trade with the Orient and Antipodes and the greater use made of the Panama Canal in conducting business with Europe, the really outstanding development has been in the export of wheat. From purely insignificant shipments in 1920, a total of approximately six million bushels of wheat was shipped in 1921. From July, 1922, to March 31st, 1923, the port handled 16,361,249 bushels against 16,146,317 bushels for all other Canadian Pacific coast ports. It is expected that in all Vancouver will have accounted for the shipment of 18,000,000 bushels of the 1922 wheat crop as against 7,500,000 bushels of the 1921 crop, and predictions made anticipate Vancouver handling a still greater quantity of the yield of the Prairie Provinces in 1923.

Increased Grain Storage.

Great activity prevails at Vancouver this summer in the port's endeavor to more adequately equip itself for the new place it has been called upon to fill in Canadian and world economic affairs. This is particularly true in augmenting grain storage and accommodation. The Government's elevator is being increased to a total capacity of 808,000 bushels, and a new elevator being constructed to hold 2,000,000 bushels which, it is expected, will be ready by the early months of 1924. By that time, it is possible, through other additions, that the grain storage accommodation of the port will have reached 5,000,000 bushels.

The new importance of the port is naturally attracting wide attention. Many companies are engaged in, or contemplating, erecting grain elevators, and British, American and Canadian grain brokerage houses. The port now has its own grain exchange setting the prices for the locality. Three new lines announced their intention of sailing from the port this summer, one to the Orient, one to Australia and one to Montreal.

Application of Music.

The value of music as a means of improving the mind is now beginning to be realized.

Music has the same mind training value as Latin, Greek, and the higher forms of mathematics, with the added advantage that it can be taught in the lower school grades and need not be discarded when the student has completed his education.

Authorities have gone far into the comparison of the absolute mental concentration required in the study of mathematics and of musical art, and the consensus of opinion seems to be in favor of music in about the ratio of 3 to 1. That is, one hour of intensive application in calculus or higher mathematics.

This does not apply to the mere playing for amusement or in a perfunctory way, but to real reconstructive mechanical and artistic work, such as would be required in the study of solos or etudes upon the piano, violin, etc., or in orchestra or band organizations when studying works by eminent composers.

Iona Ford.

Inspector (to little girl in front row)—"What is your name?"

Little Girl—"Iona."

"Inspector—"No, your surname."

Little Girl—"Please, sir, I would rather not tell you."

Inspector—"Come, come, you needn't be afraid of me."

Little Girl—"Are you sure you won't laugh?"

Inspector—"Quite. Of course I wont laugh."

Little Girl—"Please, sir, it's Ford."

Mr. Man—

Mystery of the Jungle.

The well-known explorer, Mr. Up De Graff, while in the interior of the Brazilian jungle, imagined for a brief period that he had encountered a diplodocus—an extinct prehistoric monster.

The mistake was an excusable one. The Diploduocus, when alive, was a huge ungainly beast with an immensely long neck and a ridiculously small head.

Mr. De Graff saw just such a head and neck emerge from the jungle to a height of fully ten feet. From the creature's head, which swayed from side to side as if in search of prey, there projected a pair of spiked horns.

The explorer remained motionless, his curiosity keyed to the highest pitch. "If this is the neck," he said to himself, "what will its body be like?" And then there flashed through his mind a possible solution—"the diplodocus at last."

As I watched for the beast to expose its body (he writes in his book, "Head Hunters of the Amazon"), its neck lurched forward and it hooked its horns away among the tangled vines which clung to the tree. The neck withdrew, slowly and gracefully, leaving what I had taken to be an animal's head suspended from the vines, the putrid skin sticking to the skull from which there still hung two or three vertebrae.

Then it was that I recognized the phenomenon which I had come across once or twice before, the head of a deer hanging from a tree. How such an animal could ever climb a tree had appeared an absolutely insoluble problem until that day.

The anaconda—for such it was after ridding itself of that portion of its prey which it could not swallow, withdrew slowly to find a spot where it could sleep off its meal in peace.

Anacondas are, of course, gigantic snakes, the biggest known. Apparently these reptiles, although they have been known to swallow horses and cattle, cannot negotiate the head of a spike-horn deer; so, in order not to be deprised of so toothsome a morsel, they swallow the body and wait until they can break off the half-rotten head from the partly digested trunk.

That they must wait a considerable length of time before they can accomplish this feat is certain, for the head of which I saw that anaconda rid itself was already in an advanced stage of decomposition. Afterwards I learnt from the Indians that what I had seen is of common occurrence in the forest.

Fooled!

A small boy came hurriedly down the street, and halted breathlessly in front of a stranger who was walking in the same direction.

"Have you lost a dollar?" he asked.

"Yes, yes, I believe I have!" said the stranger, feeling in his pockets. "Have you found one?"

"Oh, no," said the boy. "I just wanted to find out how many have been lost to-day. Yours makes fifty-five."

Bright Prospects.

(About to take her first swimming lesson)—"How is that man getting along you were teaching this morning?"

"Why he drowned about an hour ago."

Sentence Amended.

The average school pupil seems to have considerable trouble in pronouncing the terminal "g" of present participles.

"Robert," said a teacher during the reading lesson, "please read the first sentence."

A diminutive lad rose to his feet and read: "See that horse runnin'."

"Don't forget the 'g,' Robert," admonished the teacher.

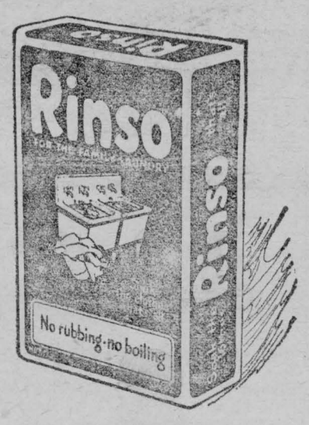
"Gee! See that horse runnin'."

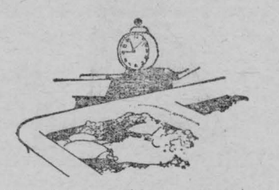
Bovril makes you feel ten years younger

Dissolve in boiling water

Use enough to get a big lasting suds

Big lasting suds—one secret of Rinso's amazing power to dissolve dirt. If you don't get lasting suds, you have not used enough Rinso.





Soak an hour or more Overnight if you wish—
(Colored clothes only half an hour)

After soaking, only the most soiled clothes need a light rubbing with dry Rinso.

Your clothes don't need boiling if you use Rinso. But if you like to boil your white cottons, use enough Rinso solution to get the suds you like.

Rinso is made by the largest soap makers in the world to do the family wash as easily and safely as LUX does fine things.

TORONTO R302

HEALTH EDUCATION

BY DR. J. J. MIDDLETON
Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Vaccination is the surest way to protection against smallpox. Although bitterly opposed by many, it has won on its merit and is now widely practiced over the whole civilized world. Although smallpox inoculation was practiced in England and America during the latter part of the eighteenth century it was due to an observant English physician, Edward Jenner, to discover vaccination as it is practiced to-day. Hitherto, matter taken from a pustule of a patient suffering from natural smallpox was injected under the skin and he or she thus developed a mild case of smallpox. But this procedure had certain drawbacks. While inoculation was followed by a milder form of the disease, owing to the fact that the person inoculated was in good health at the time, the disease thus acquired was contagious, and those acquiring it by contagion developed it in an aggravated and often fatal form. Consequently, inoculation lost its popularity for a time, but was revived in England and America after it was found unnecessary to take the matter for inoculation from a person who had natural smallpox, but that it could be taken from the arm of a person who had been inoculated, and that it could be transferred from arm to arm quite indefinitely. Jenner's discovery was epoch-making. He lived in a dairy country in Gloucestershire, and as was the custom with doctors he had occasion to inoculate numerous persons for smallpox. From time to time he noticed that among the cows in his home district a disease appeared, marked by the presence of pustules on the teats, and known as cowpox. Oftentimes milkers who had even slight abrasions on their hands would become infected after milking cows with these pustules on their udders. Pustules would develop on the fingers and hands of these milkers, and some of them would go to the doctors for inoculation against smallpox. It became quite generally known among the doctors practicing inoculation that persons who had had cowpox did not develop smallpox following inoculation.

Jenner was not the first to make this observation, but he was the first to investigate scientifically the relation between these diseases. On May 14, 1796, he took some matter from a cowpox sore on the hand of a dairymaid and used it to inoculate James Phipps, a healthy boy about eight years of age. This treatment was followed by a single pustule which rapidly formed a scab and dried up, leaving only a scar. Six weeks later, Jenner inoculated this boy with smallpox; the inoculation was without effect.

During the next five years more than five thousand persons were first inoculated with cowpox and subsequently with smallpox, and in no instance did the second inoculation have any effect.

In the whole history of scientific experimentation there has never been an investigation so widely tested with human beings rather than animals.

There has been much opposition to vaccination but the results of this simple procedure speak for themselves. Its history has been a remarkable one. Even as far back as 1805, Napoleon ordered that all of his soldiers who had not had smallpox should be vaccinated. France soon offered free vaccine to all those who were not able to pay for it. The Empress of Russia ordered that the first child submitted to the operation should receive the name of Vaccinof and should be educated at public expense. Spain sent ships carrying doctors and vaccine matter to its wide domains in the Western Hemisphere. Jenner sent vaccine to a tribe of American Indians suffering from smallpox, and after proving its value the Indians, returned the following message: We send a belt and string of wampum in token of our acceptance of your precious gift, and we beseech the Great Spirit to take care of you in this world and in the Land of Spirits.

Railroad Man Gives Out Surprising Facts

"If any in my family were sick with stomach trouble or run-down condition, I would rather have one bottle of Tanlac than all the other remedies put together," is the positive statement of F. A. Barrowcliff, 8 Locomotive St., Hamilton, Ont., well-known yardman for the Grand Trunk Railroad.

"My wife's health was restored by the Tanlac treatment in such short order it was astonishing, for she suffered so terribly with nervousness, headaches, sleeplessness and loss of appetite that I thought she would break down completely. She went meal after meal without eating, and was so fearfully weak the care of our five children and the housework was more than she could do.

"After her first few doses of Tanlac my wife was like an entirely different person, and hasn't had a sick spell since she quit taking the medicine six months ago. Tanlac has certainly been a blessing in our house, and we are glad to recommend it."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

With The Boy Scouts

With the Boy Scouts. . . . . . .

Dominion Camp Chief Rodney C. Wood is expected to return to Canada from England before the end of September. During the summer months Mr. Wood had charge of Gillwell Park, the British Scoutmaster Training Centre, in the place of Camp Chief Gidney, who has spent the same period in America.

Ontario Scouts welcome Mr. A. C. Skelton, late of St. John, New Brunswick, to the province. Mr. Skelton was Provincial Commissioner for New Brunswick for several years and was also President of the St. John Local Association. He is now manager of the principal office of the Bank of Montreal in Hamilton.

The Boy Scouts of America fire by friction record of eleven seconds held by Scout James Walker of Waterbury, Conn., was recently broken by Scout Dudley Smith of Independence, Missouri, who got fire in 9 1-5 seconds. Scout Smith also holds the American flint and steel record of 4 3-5 seconds. That's pretty fast work! We wonder what are the best times being made by Ontario Scouts with the fire-sticks?

Iroquois Falls, Erin, Schreiber, Elmira, Havelock, Alexandria and Clarkson have recently formed Boy Scout troops, which are now chartered, and within the past few weeks charters have been issued by Provincial Headquarters for second troops in Bracebridge and Pembroke. New troops are in various stages of formation in twenty-five to thirty other Ontario centres. Will your village or town take its place in the Boy Scout column" this year?

The Boy Scouts of the United States have received a gift of $100,000 which is to be utilized in a campaign looking forward to the elimination of the "Dick Deadwood" style of fiction and to substitute healthy reading for boys.

A leading article in the September issue of "The Trail," the monthly paper which the Boy Scouts Association prints for its leaders, says the following under the heading "Back to School":

"School bells ring again this month. "Scoutmasters! Discuss with your older boys the great advantages of a thorough education and inspire them to acquire one. Education will put them in a better position to earn, will improve their prospects of winning positions of leadership, will equip them better for service, and will make life more worth while in a thousand ways."

The Canada Cycle and Motor Company, of Weston, Ont., has consented to the extension of the dates for the 1923 C.C.M. Competitions and Cyclist Scouts from September 1st (the originally announced closing date) to September 30th.

This means that many troops which have not yet reported still have time to conduct troop contests and name winners for the C.C.M. prizes, one set of which is available for every troop having three or more qualified Cyclist Scouts.

Printed particulars regarding the competitions and the C.C.M. prizes (they consist of bicycle lamps, automobile skates, hockey boots, bicycle bells, tires and inner tubes) may be had from Provincial Headquarters, Bloor and Sherbourne Streets, Toronto, upon application.

A new pamphlet entitled "How to Organize a Boy Scout Troop" has just been published by Provincial Headquarters. Persons interested in the formation of new Troops should write for it.

Cuticura Soap shaves without mug.

A TREATISE on the Horse—FREE!

This book is one of the best ever written for the horseman and the farmer. In plain, everyday, understandable English it deals with every ailment that horseflesh is heir to, and tells how to treat them. It has chapters on shoes and shoeing, breeding and feeding. The book is worth many dollars to the handler of horses, but all you have to do is to ask your druggist for it. It is absolutely free. Here is one opinion:

SOUTH BERWICK, N.S., Jan. 19, 1922.
"Please send me by mail your GREAT book showing positions and actions of sick horses. Have been using your Kendall's Spavin Treatment for years and think it is a great treatment."
PERLY CORKUM.

If your druggist has not a copy of the book left write us direct.

Dr. B. J. KENDALL CO., Enosburg Falls, Vt., U.S.A. 8

MRS. DAVIS NERVOUS WRECK

Tells Women How She Was Restored to Perfect Health by Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"I cannot speak too highly of what Lydia E. Pinkham's Vegetable Compound has done for me. I was a nervous wreck and I just had to force myself to do my work. Even the sound of my own children playing made me feel as if I must scream if they did not get away from me. I could not even speak right to my husband. The doctor said he could do nothing for me. My husband's mother advised me to take the Vegetable Compound and I started it at once. I was able to do my work once more and it was a pleasure, not a burden. Now I have a fine bouncing baby and am able to nurse her and enjoy doing my work. I cannot help recommending such a medicine, and any one seeing me before I took it, and seeing me now, can see what it does for me. I am only too pleased for you to use my testimonial."—Mrs. EMILY DAVIS, 721 McGee Street, Winnipeg, Man.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ont. This book contains valuable information. C

ASPIRIN

EASY TRICKS

No. 44

The Endless String

Ask a friend to take off his coat. Tie the ends of a string, about nine feet long, together and slip it over his right arm. Ask your friend to place his right hand in one of the pockets on the right side of his vest. So far the trick is easy—but now—

Ask him to remove the string from his arm without breaking it, untying it or taking his right hand out of his vest pocket. It seems impossible but it can be done. Show your friend how to do it by putting the string on yourself in the manner indicated and proceeding in this manner:

With the left hand, reach inside the vest, out through the right arm hole and grasp the string. Pull it through the armhole. Then put the loop over your head and then through the opposite armhole from the inside of the vest. Reach up under your vest and draw the string down around your body. The finish of the stunt will now be apparent. Draw the string down over your feet—and the trick is done.

(Clip this out and paste it, with other of the series, in a scrapbook.)

The Prince and the Veterans.

Two interesting incidents marked the recent visit of the Prince of Wales to Worksop and Welbeck Abbey.

The Prince drove through the town slowly in one of the Duke of Portland's open cars. In the main street a halt was made, and the Prince presented to each of four disabled soldiers a key with which to open his new home, built for the men by Sir John Robinson at Worksop Manor. The drive was then continued slowly through the streets amidst great enthusiasm.

Later, near the ornamental gates which give access to Welbeck by the Duke's private drive, Mr. John Jones, aged 96, a resident of Worksop, was presented to the Prince. Mr. Jones, 70 years ago, started work as a miner at Shiraoak's colliery, afterwards becoming manager and later a director of the campany.

The increased cost of fine teas has tempted some to try cheap, inferior teas to their sorrow. It is real economy to use "SALADA" since it yields to the pound more cups of a satisfying infusion and besides has such a fresh, delicious flavor.

Eyeglasses mounted on gold handles are said to be superseding the horn-rimmed spectacles among "smart" men.

Do You Collect Postage Stamps.

The boom in stamp collecting continues, and to-day the number of people who collect stamps is believed to exceed that of all other collectors lumped together.

The field is enormous, for there are now 23,000 varieties of stamps in existence. But if you include variations in shade, paper, perforation, and the like, you could probably increase the number up to thirty-five or forty thousand.

Stamp collecting began about 1861, when an English schoolmaster began to encourage his boys to collect postage stamps. The first stamp-collector's advertisement appeared three years later.

The biggest collection on record was that of the Turkish Government, which numbered seventeen million stamps. It was divided into 280 lots, and sold. With the proceeds was built one section of the Baghdad railway.

The most valuable collection belongs to a Frenchman, and is said to be worth a quarter of a million pounds. Two wealthy Americans, Mr. G. H. Worthington and Mr. C. L. Peall, are credited with collections each worth about $500,000.

The collection of the late Earl of Crawford realized about $100,000, while King George has a collection which is almost unrivalled.

The Real Danger.

The small delivery boy was delivering to a new customer and had encountered a huge dog in the yard.

"Come in," said the lady, "he does not bite."

The boy still hung back. "Does he swallow?" he asked.

A GOOD MEDICINE FOR THE BABY

Nothing can equal Baby's Own Tablets as a medicine for little ones. They are a laxative, mild but thorough in action, and never fail to relieve constipation, colic, colds and simple fevers. Once a mother has used them she will use nothing else. Concerning them Mrs. Saluste Pelletier, St. Damas des Aulaines, Que., writes:—"I always keep a box of Baby's Own Tablets in the house. They are the best medicine I know of for little ones and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

My Apple Tart.

My girl's not much,
She doesn't know
What makes the seasons
Come and go.
She couldn't name
The farthest star,
Or tell you what
Electrons are.
But say! I'll tell
The whole world wide,
She knows her stuff—
I'm satisfied!

—Warren L. Bassett.

Too Risky for Doggie.

The beautiful movie queen was obdurate.

"I will not jump off that cliff."

Her press agent attempted to reason with her.

"Why, you have risked your complexion a thousand times in worse jumps than that."

"But this director is a brute," she explained.

"Heh?" he asked.

"He wants me to jump with my dog in my arms."

Ask for Minard's and take no other.

"The three score years and ten limit for life is founded on error," says a

A FINE COMPLEXION

Can Be Had Through Keeping the Blood Rich and Pure.

A girl's complexion is something more than a matter of concern to her vanity. It is an indication of the state of her health. Pallor in a growing girl means a thinning of the blood. Eruptions mean impurities in the blood. Mothers should be watchful of their daughters' complexions and see to it that these signs are corrected—not covered up.

When a girl in her teens becomes pale and sallow, especially if, at the same time, she shows an inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements that Dr. Williams' Pink Pills can supply, but the physical signs are plain. The girl with a bad complexion, or who suffers from occasional headaches, who is easily tired and breathless after slight exertion, should begin taking Dr. Williams' Pink Pills at once. A good appetite, sparkling eyes and rosy cheeks follow the fair use of this medicine.

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Climate and Character.

That different climates determine different types of people is now a well-recognized fact. Medical experts are not only agreed that climate exerts a great influence on the formation or deterioration of character, but they are beginning to give a scientific accounting for the same after years of research.

Those who inhabit a country where the mountains run down to the sea are superstitious, imaginative and realize how infinitesimal any man is in the ultmate scheme of things. Mountain people are short in stature and so are their animals, as may be seen in the Shetland, Devon and Welsh ponies.

Explaining the inability of the white man to adapt himself to the colored man's country, and vice versa. Dr. Leonard Williams, Royal Institution, London, says it is a question of skin pigmentation.

The function of the pigment in the colored races is to intercept the active rays, thus the deleterious effect of the solar spectrum at a certain angle on human beings is counteracted by the pigment. In India, for instance, the inhabitants show a varying degree of pigment, and accompanying this difference is a marked difference in character and characteristics. As pigment varies with climate, so does character vary.

Climate is the reason why the British are great colonizers. Their white skin, according to Dr. Williams' theory has given them reserves of energy which has lured them to the furtherest ends of the world, where, by service and sacrifice, they hope to establish themselves and their British civilization.

Man adopts himself to climate or climate compels adaptation and influences the human being, physically and mentally. Civilized man is influenced also by the environment, irrespective of climate, mentality and physically, although climate is the most potent factor in this direction.

Argument for Industry.

Old Hen—"I'll give you a piece of good advice."

Young Hen—"What is it?"

Old Hen—"An egg a day keeps the butcher away!"

Advertisements ordered for insertion "until forbidden," and those sent without written instruction, will appear until written orders are received for to discontinue same.

Thursday, Sept. 20, 1923

Sir Adam Beck Lowers Rates.

To thee, oh Sir Adam, are the users of Electric energy very grateful for your long delayed consideration of repeated requests for a reduction in rates. We know Sir Knight, that we are practically at thy mercy, and for some years have we submissively, but grumblingly paid what was demanded of us. Thy "power" is mighty, when Prime Ministers have bowed to thy dictation,and Legislative Assemblies have not dared to overrule thy authority. Public ownership of Hydro-Electric is a wonderful triumph for you Sir Adam, but the taxpayers continue to pay, pay, pay.

Education and Politics.

The Premier of Ontario, Hon. G. Howard Ferguson, as Minister of Education, is not setting a very good example in using his office to show favoritism to political friends by issuing special permits for sons of Conservative workers and supporters to pass into High School without having passed the necessary examination, or having received a percentage of marks that warrant the Board of Examiners recommending the child for promotion. From information imparted the Press just such a case has occurred in this section. A lad who wrote for Entrance failed. The parents asked the Examining Board to revise his papers, and if possible put the lad through. The Board very obligingly did so, but found that the low percentage of marks obtained did not warrant his promotion, and for them to acceed to the urging of the parents would not only be an injustice to the boy himself, but to many other students whose standing was better than his, but not good enough to secure them entrance to High School. The father of the lad then took his case to the Minister of Education, the Hon. G. Howard Ferguson, Premier of Ontario, and the Board of Examiners received notice to issue the necessary permit, which was done. The Press gives publicity to this incident because we believe it a public duty to do so, not only in the interests of Education, but in justice to the Board of Examiners. It was no kindness to the lad to be thus promoted, and the parents of the boy have made a sad mistake in securing his promotion unmerited, and which will prove a serious handicap to the boy in his educational career. In granting the request of the parents, who are his personal and political friends, the Hon. Minister of Education, has used his office to a bad end, and brought our Educational system not only into the realm of politics, but into ill-repute.

Although the Conservative party swept the Province at the late election, its leader is as yet on trile, and if he continues to use his high office to such personal and petty ends, he will not long retain the confidence and respect of the great party of which he is at present the official head in the Province of Ontario.

The People Want Security

An advertisement of one of our chartered banks reads, "Provide for old age by starting a savings account in the ——— Bank" etc. Judging from recent events depositors in our Canadian banks have not much security. If the banks fail their savings are all gone.

The Strenuous Public Life

Politics must be a very strenuous business for successful politicians. Premier King and some of his ministers are over in England having a good time at the country's expense, and Premier Ferguson has gone on a long trip up north with the Governor-General and a few congenial friends for an outing, at the country's expense. The poor unsuccessful Politicians have to stay at home and metaphorically speaking, saw wood.

Consolidated Schools

The official opening of the North Mountain Consolidated School at Hallville yesterday was an event that should prove a precursor of many similar events in Eastern Ontario.

The North Mountain school is a credit to the foresight and the enterprise of those responsible for its erection, and in a few years its usefulness and efficiency will convince the community that its establishment was a wise move. If the County of Dundas had a few more such schools in properly located districts it would prove not only a great educational advantage, but an economical move financially.

Very Creditable Number

The Press extends congratulations to its esteemed contemporary, The Renfrew Mercury, on its splendid "Home Week" issue, an issue that must have entailed an unusual amount of labor in research, in detail, in arrangement and mechanical ability. Many of the illustrations of "The Early days of Renfrew" are very interesting to even a stranger to that town, and the collecting of them, and the compiling of the early history of that beautiful and enterprising town repesents hard and careful work and long preparation. The Renfrew Mercury has for many years ranked among the leading weekly newspapers of Canada, and under the guidance of its new proprietor, Bro. Davies, has gained in influence and attractiveness. As a souvenir of Renfrew's Home Week this issue of the Murcury will be much valued, and that its 32 pages so well and neatly arranged and printed is the product of the Mercury staff and office, is an achievement that not only its publisher, but the town of Renfrew may well be proud of.

Ferguson Makes a Mistake.

The Progressive or Farmers party in the Province of Ontario can easily afford to smile at the somewhat silly and ill-advised declaration of Premier Howard Ferguson, that only the Liberal leader will be recognized as the official opposition leader in the Ontario Legislature. It is an attitude toward a strong and very influential organization in the public life of the province of Ontario that a wise and broad minded leader would hesitate to publicly announce,and savors somewhat of the "Swelled head" autocratic. Premier Ferguson cannot squelch the Farmers party in Ontario by refusing to recognize their representatives in the Legislature; and while he may deny them official recognition and their leader the extra indemnity he himself received when leader of the smallest groupe in the last Legislature, he but creates a feeling in the public mind that it is not either a liberal or fair play attitude.

"Now will you be good" said Premier Ferguson, when with a sweep of his official arm he blots out the U. F. O. leader in the Ontario Legislature.

Canadians need no longer laugh at the woman who put her spare cash in a stocking and hid it under a mattress.

Now if coal could only be raised on the farm the price would soon come down.

Would not be Without Zutoo Tablets At Any Cost

Mr. A. O. Norton, the millionaire Jack Manufacturer, of Boston, who recently died, was a great "booster" for Zutoo Tablets.
He suffered from headaches from childhood and when he found Zutoo Tablets stopped these headaches in a few minutes and left no bad effect, he began recommending them to his family and friends. In an unsolicited letter, Mr. Norton says in closing:
"My family use them when ever needed with equally good results. I have frequently given them to friends who were suffering from Headache and they never failed to give quick relief. I always carry Zutoo Tablets in my grip on the road and WOULD NOT BE WITHOUT THEM AT ANY COST."

Winchester, Ont.

South Mountain

Born—To Mr. and Mrs. Ed. Strader on Thursday, Sept. 13th, a daughter.

Born—To Mr. and Mrs. Ed. McIntosh on Sunday, Sept. 16th, a daughter.

Mr. Lyman Hess, of Perth, attended the funeral of the late Henry Colborne on Saturday last.

Mr. and Mrs. R. W. Boyd accompanied by Mr. and Mrs. W. E. Boyd, of Hainsville, are spenking a few days at Watertown, N. Y.

Mr. Geo. Moulton is spending some time at his home here after being at Thorold for the summer.

The Anniversary Services which were held in the Presbyterian Church on Sunday last were splendidly attended and the Rev. R. J. M. Glassford delivered two splendid sermons.

Dr. J. and Dr. E. Colborne, of New York were home hese a few days last week in attendance of their father's funeral.

Mr. and Mrs. R. Todd, were up to Kemptville, on Sunday.

Mr. and Mrs. Asa Berry, occompanied by the Misses Naomi Berry and Freda Robinson were up to Kemptville Monday.

Mr. and Mrs. Norman Armstrong were guests of Shanley friends on Sunday.

Miss Enid Hinton was a guest Sunday of the Misses Todd.

Messrs Roy Ennis and B. Swerdfeger, P. Burrell, Inkerman. spent Sunday evening in town.

Mrs. H. Cleland and Miss Jessie were up to Kemptville on Friday.

Mr. and Mrs. Anson Graham and Miss Linda Hess were callers at Kemptville on Friday.

Mr and Mrs. Lorne Boyd were down to Winchester on Monday.

Mr. Earl Barnhart, of Ottawa spent the week-end at his home here.

Miss Ella McGannon left for his Southern home this week after a lengthy visit with her sister, Mrs. M. Berry.

Morewood

There will be two special services next Sunday, Sept. 23rd in the Methodist Church. In the morning at eleven o'clock, there will be a Missionary service at which the Rev. James R, Earle, a returned missionary from China, and a former Morewood boy will preach.

In the evening at 7.30 there will be a Union Service in the interest of the "Bible Society" at which the Rev. William F. Crawford, District Secretary will preach. We are sure that many from Morewood and surrounding districts will avail themselves of the opportunity to hear these two gentlemen. Come early to both services and secure a seat.

Mrs, Fred Farmiloe spent last week with friends at Winchester.

Miss Bertha Coulthart has returned home from visiting friends at Winchester and Chesterville.

Mr. and Mrs. W. Reveller and Mr. W. Werte attended the funeral of the late Mrs. Wm. Fetterly at Morrisburg on Sunday.

Rev. H. S. Cooke attended the District meeting of the Methodists held at Finch on Friday.

Miss Ellice Smith of Mountain spent the week end at her home here.

Mr. and Mrs. Shaw and children of Melvin were guests of Mr. and Mrs. Albert Steinburg on Sunday.

Rev. Jobb and Mr. Wm. Gordon left on Monday for a few weeks fishing along the upper Ottawa.

Mr. James Parkins of Smith Falls spent the week end at his home here.

Miss Jyles of the H. S. Staff spent the week end at her home in Ottawa.

A large number from here attended the Ottawa fair last week.

A number of our people were at the opening ceremonies of the North Mountain Consolidated School on Wednesday.

W. M. S. Conference.

The W. M. S. of Brockville Presbyterial took the opportunity of the Prerbytery meeting in Prescott to hold a Conference on their own work. An unusually large number of women were thus able to attend and with two exceptions, all the officers were present. Each secretary took up her own line of work, and the discussions brought out many helpful suggestions.

The treasurer informed us that the amount received by her up to the present time was in considerable increase over that remitted at this time last year. This may have been due, partly to more prompt remittance month by month; and partly to the fact that some Thank Offering money had been sent in earlier than usual. But, as the Objective for 1923 is $5000, it will be necessary to make every effort to increase our givings over those of last year that this may be fully reached. The financial committee in each Auxiliary should take careful stock now, and see that all is set for a successful completion of the year's work. On an average, each Auxiliary should raise from $16 to $20 more than last year. Also, the treasurer would like every Auxiliary treasurer to remember that all money sent to her should be by Money-order or Bank-Draft—not by cheque, as there is always a discount on cheques.

Among other suggestions which may be helpful to Auxiliaries, are the following:—
Supply,—"All bales must contain two lists of contents;—one inside and one on the outside of the package.
Library Sec. "Any Auxiliary wishing to send books or magazines, should furnish Miss Ross, Cardinal, with a description of them, when she will advise re shipment:—thus avoiding expense.
Literature Sec. wishes "Every Auxiliary ordering literature, whether through her or not, to send her (Mrs. Pillon, Prescott) before the close of the year, a complete list of such literature.
Y. W. A. Secretary—Mrs. McNish, Lyn wants to have the addresses of the Secretaries or presidents of every Y. W. A. and C. G. I. T. group in the Presbyterial.
The Press Sec. would like to have reports sent her of any Section Presbyterial meetings.

At noon, the ladies, along with the members of Presbytery sat down to a bountiful and delicious luncheon provided by the Prescott Auxiliary, and enjoyed a delightful social hour.

Altogether the occasion was one to be long remembered with pleasure and profit.

Autos Collide.

Mr. Peter A. McDonald and family, of Ormond, while on their way to Ottawa on Saturday last were struck by a McLaughlin Runabout, which was coming in the opposite direction. As near as the writer can understand, Mr. McDonald was passing a car which was stopped on the roadside, when the McLaughlin car struck. The McLaughlin was an American car and was travelling at too great a speed to let the other car by,

Fortunately no one was seriously injured, but Mrs. McDonald had a bad cut in her face which needed four stitches to close it. The McLaughlin car was a complete wreck, while the Chevrolet was only

FIVE YEARS' AGONY ENDED

When He Took "Fruit-a-tives" For Rheumatism

The Medicine Made From Fruit

There can be no doubt that "Fruit-a-tives" is the long sought remedy for Rheumatism and Lumbago. From all over Canada come letters testifying to this fact.

Mr. John E. Guilderson of Parrsboro, N.S. writes: "I suffered badly with Rheumatism for five years—tried different medicines—was treated by doctors in Amherst—and here at home—but the Rheumatism came back.

In 1916, I saw an advertisement for "Fruit-a-tives" and took a box and got relief, so I took them for about six months and the Rheumatism was all gone and I have never felt it since".

50c. a box, 6 for $2.50, trial size 25c. At dealers or from Fruit-a-tives Limited, Ottawa, Ont.

Dedication

The dedication of the Wesleyan Methodist Church, Inkerman. The New Wesleyan Methodist Church at Inkerman will be opened with a three days Convention, September 28, 29 & 30. Three services will be held each day 10.30 a.m,, 2.30 and 7.30 p.m. The preachers of the Canada Conference and others are expected no be present and expound the truth.

The ministry of song will be conducted by Misses Edith and Lillian Stevensons, of Mooers, N. Y,, and local talent, Don't fail to come and hear these distsnguished and Spirit-filled singers as they bring their messages of song under the direction of the Spirit.

Free entertainment to those coming from a distance Those who anticipate coming will be met at the Inkerman Station, if timely notice is given to W. R. Rennick, Winchester, Ont.

Ministers and Christians of all denominations are most cordially invited and their co-operation desired in this campaign for souls.

Edwin Claxton, Pastor.

ADMINISTRATOR'S

Until You Try "SALADA" H457

GREEN TEA

you have not tasted the best.
Fresh, fragrant and pure. Try it.

WITH SUGAR AND SPICE.

Pears that lack flavor are usually more abundant than the well-flavored varieties. A certain amount of such pears should be canned and used in salads. Others can be improved in flavor if two tablespoonfuls of crushed pineapple are added to each quart jar of the pears. The canned pineapple can be used if the fresh fruit is unobtainable.

Excellent pepper relish is made with one peck of green tomatoes (cut small), four red peppers, four green peppers (remove seeds), two cupfuls of celery cut in short lengths, two cupfuls of sliced onion, six cupfuls of vinegar, one-half cupful of mustard seed and two cupfuls of brown sugar. Put all vegetables through a food-chopper, add one-half cupful of salt and let stand all night. Drain and put with the other ingredients, cook until soft, pack in jars and seal.

Sweet cucumber pickles—Soak cucumbers in brine for twenty-four hours. Rinse, drain, and wipe dry. Place in a kettle, and cover with the following vinegar mixture one quart of vinegar, one cupful of brown sugar, eight whole cloves, six allspice, six blades of mace, eight whole black peppers. Heat the pickles slowly to the boiling point, and pack at once in jars, cover with the vinegar, add a piece of horseradish to each jar, then seal. Other vegetables used in sweet pickles may be added if a mixed pickle is desired.

Nine-day pickles—This is an old country recipe, and even though nine days are necessary for making them, the result is worth the time spent. Prepare a brine of four quarts of water and one pint of salt. Soak large, whole cucumbers in this for three days. Drain, then soak them in clear water for three days. Drain again, cut the cucumbers in slices one inch thick and simmer for two hours in weak vinegar. For seven pounds of cucumbers, use three pounds of brown sugar, one pint of vinegar, one ounce each of cinnamon, allspice and celery seed. Boil sugar and vinegar to a syrup. Drain the cucumbers from the vinegar, pack in glass jars or stone crocks, and cover with the syrup. Pour off and reheat syrup for three days in succession, and after the third time add covers to jars and seal.

Apple butter made of Tallman Sweets is considered especially good. Other varieties of sweet apples are not so desirable. Cook down three gallons of freshly made cider (made from acid or subacid apples) to one gallon. Pare, core and quarter the Tallman Sweets. Add to the cider and place on the back of the stove to cook slowly until done. If the Sweets, as well as the apples used for cider, are perfectly matured and have their full sugar content, no sugar will be needed. If a sweeter product is desired sugar may be added to taste. Add spices last, in the proportion of one part cloves to two parts cinnamon (ground) and according to taste, as tastes vary in this matter.

PROBLEM OF CLEANING RUGS.

Rugs and dirt are natural affinities, but unlawful ones nevertheless, with the grievance all on the side of the rug, for the nicer the rug and the deeper its beauty as to pile and weight the more closely clings the dirt, and to destructive ends! Rug dirt is such a complex offender. It consists of the dust blown on to the rug and that which falls from the clothing and shoes, short hairs, if there is a cat or dog admitted to the house; threads and ravelings, lint and fluff, bits of paper, imbedded dirt and grit. Particularly the latter is harmful, for it works at the roots of the rug's fibres and finally destroys them from that source. The more a rug is walked on the more deeply imbedded this dirt becomes, so that surface sweepings only removes a small percentage and can't begin to loosen the grit worked into the loose fibres of an Axminster, Wilton or Chenille rug, or into the loops of a Brussels. Nor can surface sweeping extract the dirt from the woven threads of an Ingrain carpet or the braided, twisted and woven "grass" rugs.

So in the preservation of rugs there enters the immediate necessity for sweeping from the bottom up if such a thing were possible. This was arrived at in the old days by beating the rugs from the under side, and as a last resort by scrubbing them briskly with stiff brushes and a gentle soapsuds. Nowadays the suction cleaner (invented for the preservation of rugs, according to one manufacturer) not only gently draws the imbedded dirt out but removes all kinds of surface litter and dust as well. So effectively have good machines gone about their cleaning business that rug dealers sponsor their use and even urge the purchase of such cleaners.

There is much to be said from the sanitation viewpoint as well. Clean rugs mean cleaner rooms, fresher air and, in general, brighter and more livable homes. They save labor, too, for the woman who does her own housework.

Now, how to select a cleaner by looking at it. It cannot be done! Only trial in the home will tell a woman whether a cleaner will do her sweeping most satisfactorily or not. At the same time, to choose from the many models on the market is not an easy task, so a safe rule to follow is to go to an established dealer, choose from the makes which are manufactured by well organized firms of long standing, and try out the cleaner yourself in your own house. Most dealers for the standard makes of vacuum cleaners will deliver a machine to your house and instruct you in the use of all the attachments as well as of the machine for the most satisfactory cleaning. You can tell in a few trials whether it seems too heavy, or is awkward, or has a nerve-trying screech.

A COMFORTABLE BLOOMER DRESS

4475. The front of this model has pocket sections inserted at the sides. The sleeve may be finished in wrist or short length. Percale with bindings of white linene was used in this instance. The model is cut in 4 Sizes: 4, 6, 8, and 10 years. An 8-year size requires 3¾ yards of 27-inch material.

Pattern mailed to any address on receipt of 15c in silver or stamps, by the Wilson Publishing Co., 73 West Adelaide St., Toronto. Allow two weeks for receipt of pattern.

NO MORE STICKY IRONS.

To prevent irons sticking to articles which have been starched, drop a lump of alum into the starch while it is still hot, and stir slowly till the alum is completely dissolved.

A piece the size of a walnut to a quart of starch will be found about the right proportion to give the most satisfactory results.—Mrs. E. E. B.

Her Finery.

When on the woods the early frost
  Let fall its spangled cloak,
A dryad left at break of day
  Her refuge in the oak,
And shivering in the chilly breeze
  That swept the countryside,
Lay down upon a mossy bank
  Among the ferns and died.

The sumac berries are her beads
  Of coral round and red,
The goldenrod was once the plume
  That graced her russet head.
The aster with its fringe displays
  The remnant of her gown,
The withered leaves beneath our feet
  Are all her sandals brown.

CHAPTER X.

KIRBY ASKS A DIRECT QUESTION.

The story of the Cunningham mystery, as it was already being called, filled the early editions of the afternoon papers. The "Times" had the scoop of the day. It was a story signed by Chuck Ellis, who had seen the alleged murderer climb down by a fire escape from the window of Cunningham's bedroom and had actually talked with the man as he emerged from the alley. His description of the suspect tallied fairly closely with that of Mrs. Hull, but it corrected errors in regard to weight, age, and color of clothes.

As Kirby walked to the Equitable Building to keep his appointment with his cousins, it would not have surprised him if at any moment an officer had touched him on the shoulder and told him he was under arrest.

Entering the office of the oil broker, where the two brothers were waiting for him, Kirby had a sense of an interrupted conversation. They had been talking about him, he guessed. The atmosphere was electric.

James spoke quickly, to bridge any embarrassment. "This is a dreadful thing about Uncle James. I've never been so shocked before in my life. The crime was absolutely fiendish."

Kirby nodded. "Or else the deed of some insane person. Men in their right senses don't do such things."

"No," agreed James. "Murder's one thing. Such coldblooded deviltry is quite another. There may be insanity connected with it. But one thing is sure. I'll not rest till the villain's run to earth and punished."

His eyes met those of his cousin. They were cold and bleak.

"Do you think I did it?" asked Kirby quietly.

The directness of the question took James aback. After the fraction of a second's hesitation he spoke. "If I did I wouldn't be going to lunch with you."

Jack cut in. Excitement had banished his usual almost insolent indolence. His dark eyes burned with a consuming fire. "Let's put our cards on the table. We think you're the man the police are looking for—the one described in the papers."

"What makes you think that?"

"You told us you were going to see him as soon as he got back from the Springs. The description fits you to a T. You can't get away with an alibi so far as I'm concerned."

"All right," said the rough rider, his low, even voice unruffled by excitement. "If I can't, I can't. We'll say I'm the man who came down the fire escape. What then?"

James was watching his cousin steadily. The pupils of his eyes narrowed. He took the answer out of his brother's mouth. "Then we think you probably know something about this mystery that you'll want to tell us. You must have been on the spot very soon after the murderer escaped. Perhaps you saw him."

Kirby told the story of his night's adventure, omitting any reference whatever to Wild Rose or to anybody else in the apartment when he entered.

After he had finished, James made his comment. "You've been very frank, Kirby. I accept your story. A guilty man would have denied being in the apartment, or he would have left town and disappeared."

The range rider smiled sardonically. "I'm not so sure of that. You've got the goods on me. I can't deny I'm the man the police are lookin' for. Mrs. Hull would identify me. So would this reporter Ellis. All you would have to do would be to hand my name to the nearest officer. An' I can't run away without confessin' guilt. Even if I had killed Uncle James, I couldn't do much except tell some story like the one I've told you."

"It wouldn't go far in a courtroom," Jack said.

"Not far," admitted Kirby. "By the way, you haven't expressed an opinion, Jack. Do you think I shot Uncle James?"

Jack looked at him, almost sullenly, and looked away. He poked at the corner of the desk with the ferrule of his cane. "I don't know who shot him. You had quarreled with him, and you went to have another row with him. A cop told me that some one who knew how to tie ropes fastened the knots around his arms and throat. You beat it from the room by the fire escape. A jury would hang you high as Haman on that evidence. Damn it, there's a bad bruise on your chin wasn't there when we saw you yesterday. For all I know he may have done it before you put him out."

"I struck against a corner in the darkness," Kirby said.

"That's what *you* say. You've got to explain it somehow. I think your story's fishy, if you ask me."

"Then you'd better call up the police," suggested Lane.

"I didn't say I was going to call the cops," retorted Jack sulkily.

James looked at his cousin. Kirby Lane was strong. You could not deny his strength, audacious yet patient. He was a forty-horsepower man with the smile of a boy. Moreover, his face was a certificate of manhood. It was a recommendation more effective than words.

"I think you're wrong, Jack," the older brother said. "Kirby had no more to do with this than I had."

"Thanks," Kirby nodded.

"Let's investigate this man Hull. What Kirby says fits in with what you saw a couple of evenings ago, Jack. I'm assuming he's the same man Uncle flung downstairs. Uncle told you he was a blackmailer. *There's* one lead. Let's follow it."

Reluctantly Kirby broached one angle of the subject that must be faced. "What about this girl in Uncle's office—the one in trouble? Are we goin' to bring her into this?"

There was a moment's silence. Jack's black eyes slid from Lane to his brother. It struck Kirby that he was waiting tensely for the decision of James, though the reason for his anxiety was not apparent.

James gave the matter consideration, then spoke judicially. "Better leave her out of it. No need to smirch Uncle's reputation unless it's absolutely necessary. We don't want the newspapers gloating over any more scandals than they need."

The cattleman breathed freer. He had an odd feeling that Jack, too, was relieved. Had the young man, after uncle's reputation than he had given him credit for?

As the three cousins stepped out of the Equitable Building to Stout Street a newsboy was calling an extra.

"A-l-l 'bout Cunn'n'ham myst'ry. Huxtry! Huxtry!"

Kirby bought a paper. A streamer headline in red flashed at him.

HORIKAWA, VALET OF CUNNINGHAM, DISAPPEARS.

The lead to the story below was to the effect that Cunningham had drawn two thousand dollars in large bills from the bank the day of his death. Horikawa could not be found, and the police had a theory that he had killed and robbed his master for this money.

CHAPTER XI.

THE CORONER'S INQUEST.

If Kirby had been playing his own hand only he would have gone to the police and told them he was the man who had been seen leaving the Paradox Apartments by the fire escape. But he could not do this without running the risk of implicating Wild Rose. Awkward questions would be fired at him that he could not answer. He decided not to run away from arrest, but not to surrender himself. If the police rounded him up, he could not help it; if they did not, so much the better.

He made two more attempts to see Wild Rose during the day, but he could not find her at home. When he at last did see her it was at the inquest, where he had gone to learn all that he could of the circumstances surrounding the murder.

There was a risk in attending. He recognized that. But he was moved by an imperative urge to find out all that was possible of the affair. The force that drove him was the need in his heart to exonerate his friend. Though he recognized the weight of evidence against her, he could not believe her guilty. Under tremendous provocation it might be in character for her to have shot his uncle in self-defense or while in extreme anger. But all his knowledge of her cried out that she could never have chloroformed him, tied him up, then taken his life while he was helpless. She was too fine and loyal to her code, too good a sportsman, far too tender-hearted, for such a thing.

Yet the evidence assaulted this conviction of his soul. If the Wild Rose in the dingy court-room had been his friend of the outdoor spaces, he would have rejected as absurd the possibility that she had killed his uncle. But his heart sank when he looked at this wan-faced woman who came late and slipped inconspicuously into a back seat, whose eyes avoided his, who was so plainly keyed up to a tremendously high pitch. She was dressed in a dark-blue tailored serge and a black sailor hat, benath the rim of which the shadows on her face were dark.

The room was jammed with people. Every aisle was packed and hundreds were turned away. In the audience was a scattering of fashionably dressed women, for it was possible the inquest might develop a sensation.

The coroner was a short, fat, little man with a highly developed sense of his importance. It was his hour, and he made the most of it. His methods were him own. The young assistant district attorney lounging by the table played second fiddle.

(To be continued.)

A Perfect Excuse.

Nurse was bringing little Betty home from a party and took her hand to help her up a high curbstone.

"Good gracious, Betty," she cried, "how sticky your hands are!"

"So would yours be," replied Betty serenely, "if you had two meringues and a chocolate eclair in your muff."

Oatmeal is responsible for more defective teeth than either white flour or rice.

Reductio ad Absurdum.

First Man—"My wife was successful with the exercises, and was reduced to a hundred and twenty pounds."

Second Man—"Mine failed and was reduced to tears."

The Gray Day.

To-day is a ragged wanderer
From November's calendar—
It is never a September day—
The wind blows raw,
The leaves whip and turn,
The trees bend in agony
And rain drips ceaselessly
From a gray sky. . . .

Out in the garden
My poppies nod
Scarlet, pink, golden,
Trying to make me remember
That it is still
A long way to winter.

The cornflowers are blown and browsy,
And the hydrangeas
Sweep against the grass,
Too rain heavy to hold up their heads.

No, it isn't winter yet,
But why, cold, gloomy day,
Did you come to remind me
That it is no longer summer?

The poppy petals drop and blow
And only the seed pods bend
Awkward and ugly
Under the wind. . . .
It is a sign . . . .
Summer has fulfilled her purpose;
The harvest hurries. . . .

Oh, let us draw the curtains
And forget!
Perhaps the sun will shine
To-morrow. . . .

—Abigail Cresson.

Britain's Holiday Islands.

It is probably no exaggeration to say that the Isle of Man is the most popular holiday island in the world. Its glens and even its mountains are turned into show places, whilst Douglas is, perhaps, next to Blackpool, the most enterprising seaside town in the British Isles.

The Isle of Wight is what the House of Lords is to the House of Commons, when compared with Manxland. "Man" is a democrat "Wight" is an aristocrat. "Wight" is the headquarters of the Royal Yacht Squadron, and Cowes Week is one of the great events of the season.

But the Isle of Wight has a popular side, as the fronts at Ryde, Sandown, Ventnor, and even Cowes itself can prove. It is, moreover, the paradise of the char-a-bancs, for its hills are easily climbable, and its roads are excellent. Moreover, it has some of the loveliest coast scenery to be found anywhere.

The Channel Islands belong to Britain, although they lie nearer to France, and their visiting list is correspondingly international; but the fine service of steamboats from the southern ports of England is making these lovely islands better known to holiday-makers, even from the North and from Scotland.

Jersey, Guernsey, Alderney, and Sark, not forgetting the tiny Isle of Herm, which belongs to an English novelist, are all gems set in the sea.

Then there is Anglesey, the only island which is also a county of England and Wales. Most people know Anglesey only as the first bit of the way from Holyhead to London. Yet, year by year, by virtue of splendid golf courses and fine hydros, the Welsh county separated from the mainland by the Menai Straits, and connected with the mainland by two historic bridges, is coming more and more into prominence as a holiday centre.

The Difference.

Economical Wife—"What's the difference if I make your shirts or you buy them at the store?"

Hubby—"The fit."

In three hours a commercial aviator dusted poison over four hundred and sixty acres of cotton near Corpus Christi, Texas, for a price of fifteen cents an acre. Whether the poison applied in that way is effective against the boll weevil is not yet known.

Eider Down, Potential Canadian Industry

Investigations carried on by several ornithologists in the Gulf of St. Lawrence and more northern parts of Canada have brought to light the possibility of an industry of considerable magnitude in the production of eider down. Thousands of eider ducks nest on the rocky shores of the Gulf of St. Lawrence and northword while a few scattered breeding places are also to be found farther south, and these nesting grounds provide a potential source of supply of down which is in demand in commerce.

The eider duck is an insectivorous bird which, in addition to its protective virtues, can be made to provide a direct and handsome revenue. Yet no attempt has been made in Canada to exploit the thousands of birds, and opportunity exists for the building up of an industry which, with the adequate protection of the birds, would be permanent, and, in fact, increasing.

The industry can be made a permanent one, because it is not necessary to kill the birds to secure the down which is in such demand. In fact, where the most down is collected it is found that the birds increase in numbers most rapidly. The ducks pluck the down from their bodies to line their nests, and it is from the nests that it is gathered. Two collections of down are made each year, the first being made shortly after the nests are built. This procedure does not interfere with the hatching of the eggs as the ducks immediately provide a new supply. The second collection is made after the eggs are hatched and the nests abandoned for the season.

The conservation of the eider duck in Europe has been practised for many years, and has resulted in the building up of profitable industries in many locations, especially in Iceland and Norway. There the birds are carefully protected in the nesting seasons, even the discharging of guns in the vicinity of nesting places being strictly forbidden. Under such protection the birds become exceedingly tame and live around human habitations as fearlessly as barnyard fowl. An idea of the value placed on the eider duck in these countries may be gained from the fact that not long ago an island off the coast of Iceland, eight square miles in extent, sold for approximately $200,000 solely on account of the eider down produced there.

The down is valued highly and the prices range from $2.50 to $5.00 a pound. It is much sought after for the manufacture of quilts, comforters, etc., owing to the fact that it combines a minimum of weight with a maximum of warmth. Each nest, it is estimated, supplies slightly over an ounce of down per season, and at the present prices should produce from 30 cents to 50 cents worth of down each year.

Under existing laws eider ducks in Canada are partially protected by Dominion and provincial authorities, and it is probable, as a result of the investigations which have been conducted, that complete protection will be extended. Strangely, the possibilities of developing a valuable industry have thus far been neglected by residents of the shores of the St. Lawrence Gulf and along the Arctic coast who have in the eider duck a valuable resource, to some extent unique, in that its potentialities increase the more extensively it is exploited.

Most of the successful women riders at the English Olympia horse show this year used an old-fashioned side-saddle. Only four of twenty-one competitors rode astride. Princess Mary, as a leader of fashion, rides side-saddle, and others point out that a woman not only looks more graceful riding in that way but needs to be a better horse-woman.

Rain-Making Insects.

Seventy years ago David Livingstone discovered a "rain-tree" which showered a quart of liquid from its leaves in about an hour. He did not know the cause until it was discovered that the so-called rain-trees of tropical regions belonged to many families, and that the cause was not of vegetable origin at all, but the work of an insect.

Most gardeners, especially those who grow carnations, are familiar with a little green insect called a frog-hopper or cuckoo-spit. It is, in fact, a kind of aphis which has developed a remarkable projective adaptation in the form of the "spit."

This is the sap of the young plant, worked up by the insect, which sucks it up so greedily that the surplus oozes through its delicate skin. This fluid, overflowing, is lashed into froth by the creature's "tail." The whipped-up liquid finally surrounds the creature's body and makes a sort of veil.

The same thing occurs in the case of the "rain-trees." The tropical insects are also of the aphis order, but larger and more numerous, so their attack on the tree causes the strange and, at times, beneficial "rain."

Colors That Attract Customers.

You may pack pills in a pale blue wrapper, but if you sell chocolates the best colors for the covers or boxes are red, orange, or bright yellow. A good rich brown is not to be despised, but a green or blue is useless.

Indeed, these colors will actually deter a purchaser, even though the contents of the package are of the highest standard.

Manufacturers are only just beginning to realize the importance of colors in the sale of their wares. Red and orange are warm colors; they excite enthusiasm.

Green is an excellent color for the walls of a room; so is pale primrose. These are soft, restful colors, and good for the eyes. You do not want a wall which constantly attracts the eyes, but you do want warm, bright, striking colors to attract purchasers to goods displayed in shop windows.

Notice, too, the matter of books—how many are bound in red and how brilliant are the wrappers in which most are shown nowadays. The salesman who studies colors and who understands them is the one who succeeds.

The First Lifeboat.

One of the most extraordinary cases of what may be called an accidental invention is that of the liftboat. A man named Wouldhave was out walking one day when he was asked by an old woman to help her lift a can of water which she had filled by means of a broken wooden bowl.

The bowl was floating on the surface of the water, and as he talked to the woman, Wouldhave turned it over with his finger. It immediately righted itself. Amused by its antics he repeated the performance; then it struck him that he had made a wonderful discovery. The result of his chance meeting was the self-righting lifeboat, which was designed by him on the lines of the broken bowl.

What he had discovered was that anything made of floating material and shaped like one half of a basin could float only with its convex surface downwards. A boat made on these lines cannot remain upside down for more than an instant when it is turned over by a heavy sea.

Rosewood and mahogany are so plentiful in Mexico that many copper mines are timbered with rosewood, and mahogany is used for locomotive fuel.

HEALTH EDUCATION

BY DR. J. J. MIDDLETON

Provincial Board of Health, Ontario

Dr. Middleton will be glad to answer questions on Public Health matters through this column. Address him at Spadina House, Spadina Crescent, Toronto.

Does poverty affect the health of children and contribute to the high death rate among infants? All indications point to the fact that it does.

There are many causes of infant mortality. Lack of knowledge on the part of the parent is supposed to be responsible for many of these deaths, but this is not the only cause. What about poverty? What about low wages that compel a family to eke out an existence just above what is required to keep body and soul together? There are many such pitable plights of families, and the sooner such conditions are put right, the sooner will the standard of citizenship be raised. The nation that in war time permits its soldiers to make war on women and children is rightly considered as beyond the pale of citizenship. What may be said of the nation that in peace time allows its infants to be murdered? Is Canada such a nation? It is to be hoped not, and yet our infant mortality rate is far too high. What is the relationship between this infant mortality rate and the family income? Vancouver, B.C., has an infant mortality rate of fifty-five (one of the lowest in the Dominion of Canada) and the average salary of Vancouver is more than $1,250.

In Montreal where the infant mortality rate is above 155, the average earning capacity of parents is less than $450 per year.

Living conditions in Canada and the United States are somewhat similar, and what we know of conditions there may be an index of what is prevalent here.

"Six careful and painstaking surveys made by the Government seem to fasten the indictment of baby murderers upon us as a nation," says one writer. "We are murdering babies by permitting their parents to be paid so little in wages that the babies die without a chance to live."

The latest revelation of that condition comes from Gary, Indiana, old Judge Gary's "Model Village," built by the steel trust. The children's bureau of the department of labor has just completed a year's study of infant mortality there which shows: An increase of infant mortality corresponding to the fall of the earnings of the chief bread winners. When the earnings amounted to at least $1,850 a year the infant death rate was 89.4. When the earnings ranged between $1,050 and $1,850 the death rate was 127.1. When the earnings fell below $1,050 the death rate rose to 137.8.

Said the bureau's report: The heavier toll was taken by the gastric and intestinal diseases due to the inability of the mothers to feed their babies at the breast, inability to purchase enough wholesome milk, bad housing and lack of sanitation.

It should be the wish of every citizen and the aim of every statesman to maintain and increase the standards of living which exist in our country. There is some faint hope that the industrial outlook on this continent may lead us to believe that poverty as a cause of infant mortality may soon be considerably reduced.

Antique Instruments.

The tradition of the superiority of antique 'cellos has followed that of the violin. We find people paying a thousand or more dollars for old instruments that are in no wise superior to well-made new ones costing a third of the price, while in some respects they are positively inferior. This tradition is fostered by two classes, the dealer in old instruments and the lover of antiques. Both are probably honest in their beliefs that the old is superior to the new, and it is easy to see how the lover of things ancient should be carried away by sentimentality, for he is seldom a good player who can appreciate an instrument on its merits alone. But why a dealer, who is usually an expert, should be misled by a phantasy, is a different matter.

He is not only misled, he works upon the credulity of the unthinking public by the glowing description of rare instruments that he prints in his catalogues. More than that, he claims to be able to restore old dust-covered, worm-eaten, battered-up instruments to things of beauty and value, with an emphasis on the value. The result is that anyone who possesses a cheap copy of a Stradivari, with a fake label inside, believes that he holds one of the world's masterpieces at his disposal, and judging by the prices that appear in some of the catalogues, he feels that he ought to be able to sell it before nightfall for money enough to buy and stock a good farm. A trip to a dealer will be prompt to dispel any such illusions, for he learns that the dealers possess all the fine instruments, while those of the world at large are fakes.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to children. The complaints of that season, which are cholera infantum, colic, diarrhoea and dysentery come on so quickly that often a little one is beyond aid before the mother realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of such aid to mothers during hot weather as Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The best Chinese razors are made of old horseshoes.

Minard's Liniment Heals Cuts.

King George's Trip to Scotland.

When King George and Queen Mary go to Scotland for their annual visit at this time of the year it is not a simple matter—at least for anyone except the British sovereigns. There is a huge amount of preliminary work to be done.

For instance, even the chief cook at Buckingham Palace must go north to be ready to cater to the royal taste when their majesties are in residence at Balmoral, and even one of the royal carriages must be shipped to Scotland to be there in case of necessity. Also as the King has to do considerable motoring one of his big cars must be sent in advance.

Then there is the question of the King's wardrobe. It is incumbent upon him to appear sometimes in kilts and at other times in tweeds when on the moors shooting grouse. There is at least one official in his retinue who cannot be dispensed with and that is his mailman.

The King's mail always is handled separately and when he travels there is an employee of the postoffice who looks after the Royal mail. It is sent in a special bag and it is the job of this official to see that no delay is occasioned in transmitting letters and documents to the British sovereign.

There is no time of the year which the King relishes more than his excursion to Scotland during the shooting season. He is a keen sportsman and one of the best shots in the United Kingdom. If he had his own way about it he probably would prefer to go to Scotland in as simple a manner as any other subject of his realm, which is also the way the Prince of Wales likes to travel. But being a King there is a great deal of formality connected with his journey from London to the north country.

She—"You and Tom are fast friends, aren't you?"

He—"Yes, but he's faster than I am."

HARVEST INVASION OF WESTERN CANADA

SITUATION IS UNIQUE IN MANY WAYS.

East Helps Out the West at Critical Period — Britishers Coming in Large Numbers.

The initial steps in the handling of the prairie grain, between the growing fields and the elevator, is in itself an undertaking of some magnitude, calling into requisition the labor of a vast army of men, and this great force has each year to be brought into the Prairie Provinces from the Eastern and Western extremities of the country. The Government, railways, and other agencies concerned are already looking ahead to the needs of this period, and conservatively estimate that the Canadian West will need the assistance of sixty thousand men to harvest its bumper yield.

The situation as it develops each autumn is a curious one and in many ways unique. For the greater part of the year the Western Provinces are able to get along quite well with their farm man-power, and the farmer unaided, or with his regular help, accomplishes all the necessary farm operations. With the ripening of the crop, however, and in the consideration that the time for harvesting is limited, the task has extended beyond his capabilities and he depends largely upon the introduction of temporary labor to successfully secure his crop.

Proper Distribution Difficult.

The provision of adequate farm help to the Western Provinces at harvest time has constituted one of Canada's problems since that area became developed agriculturally. If too many men are sent out, or an insufficient number, the problem remains unsolved. Proper distribution has always been difficult.

The matter of the provision of adequate and sufficient farm help, which shall at the same time not be in excess of demand, has now been practically solved through the co-operation of the Canadian Government and railways. The Government labor bureau, operating throughout all the provinces, have made this possible. They are acquainted with ecployment conditions at every point, and Ottawa, through receiving daily reports, is at all times apprised of the labor situation. The Government is thus able to tell very approximately how many men will be needed and just in what sections they will be required.

It is the business of the railways to arrange for the securing and transportation of these men from the East and extreme West to the prairies and for the periodical arrival at specific centres. The bureaux attend to the matter of distribution, sending the men out to the districts where they are most urgently needed. Thus every farmer who makes early application to one of the employment offices for a harvest helper is assured of being supplied with one just when his crop is quite ready to be stocked, granted that sufficient help is available from the East.

Special Harvesters' Trains.

It is naturally to the interest of the railroads that the Western crop should be harvested as safely and rapidly as possible, and special trains with harvesters are run to the West from the Maritimes, Quebec and Ontario. Tickets are issued at very low fares, and a certificate accompanies each ticket, which is left by the harvester with the station agent at his destination. Provided than one month's harvest work is completed and the farmer for whom the man has worked signs a certificate to this effect, the harvester is entitled to the same low rate back to his home.

Naturally all do not return to the East when harvesting is completed, and these excursions have in the past been fertile recruiting grounds for the agricultural lands of the prairies. Many men, too, come up over the international border to see the West by this cheap means, and, having seen, remain there. In a year or two they have their own crops to harvest and thresh and are themselves seeking helpers from the East.

The harvest season is, roughly, from the first week in August up to the last week in November. Early in August, depending upon the state of the Western crop, the first excursions leave points in Eastern Canada, and towards the end of November the last leaves the West, bringing back the stragglers who have not finally decided to throw in their lot with the West. Thus annually the East helps out the West in a critical period and performs a not unimportant part of the actual harvesting of the grain crop of the Prairie Provinces.

Ready for the Job.

James (who has come to London with a view to emigrating, stops before a news agent's shop to look at a placard with a large line upon it, 'Situation in Russia")—"I've come about the situation you're advertising."

News Agent—"What situation?"

James (pointing to poster)—"It's the one in Russia I'm after."

News Agent—"Pooh; that's on the state of affairs."

James—"I don't care whose estate it's on—I'll take it."

You may inherit wealth you have not earned, but only work will enable you to keep it.

The flavor of tea deteriorates rapidly if the tea is exposed to the air. You should never, therefore, accept bulk tea when you can buy "SALADA," which is sealed in air-tight aluminum to preserve its delicious freshness.

Undertakers are unknown in Japan. When a person dies there, the body is encoffined and buried by a member of the family.

Minard's Liniment for Dandruff.

Giants of the Air.

Now that the British Government has accepted in principle a big scheme for the building of huge airships for passenger traffic, we can look forward to the day when we shall be able to travel to Egypt in just over a day and night, and to India in seventy hours, says a London writer.

Commander Burney, M.P., who proposed the scheme some eighteen months ago, has great faith in the durability and reliability of the enormous vessels which he proposes to construct for the World Airway.

In 1921 the whole world was thrilled by the marvellous achievement of the British rigid airship R. 34, commanded by E. M. Maitland. During that year R. 34 flew to America and back, the outward journey taking 108 hours and the return flight 75 hours.

R. 38, the largest airship in the world, having beaten all previous records in her trial flights, was sold to the United States. But during 1921 both these aerial cruisers came to disaster. The R. 34 was wrecked at Howden on January 19th, and on August 24th the R. 38 fell in flames into the Humber, only five of her crew of forty-nine being saved.

The new aerial liners will be nearly twice as large as the R. 34. The best way to get an idea of the size of these new airships is to compare them with a mammoth liner. For instance, the aerial monster will be 760 feet in length, just 2 feet shorter than the Mauretania; but this ship is only 88 feet in breadth, while the diameter of the airship will be 120 feet!

And as for speed, the air liner will be able to travel comfortably at a speed of 80 miles per hour—more than twice as fast as the Mauretania.

Passengers on these great airships will be as comfortable as on the Aquitania, or in one of London's famous hotels. In the near future it will be customary to travel by air to Egypt, India, and possibly even Australia, and passengers will have their comfort studied to the limit of possibility.

The first passenger airship will have cabins fitted with single berths—one cabin for each passenger—and each cabin will be fitted with a writing-table, a dressing-table, and a 'tip-up" wash basin.

For the use of passengers during the day there will be a lounge and a smoking-saloon, furnished like those in use in the chief London clubs. Matches, of course, will not be allowed on board, but electric lighters will be provided.

The restaurant, capable of seating about eighty persons, will supply the necessaries of life on a lavish scale. Food will be cooked in electric ovens which will derive their power from the seven separate engines which will propel this veritable hotel de luxe.

One hundred and fifty passengers will be carried, as well as a large crew, and the airship will be able to cruise 3,000 miles without coming to earth.

RHEUMATIC SUFFERERS

May Obtain Relief by Enriching the Blood Supply.

In the days of our fathers and grandfathers, rheumatism was thought to be the unavoidable penalty of middle life and old age. Almost every elderly person had rheumatism, as well as many young people. It was thought that rheumatism was the mere effect of exposure to cold and damp, and it was treated with liniments and hot applications, which sometimes gave temporary relief, but did not remove the trouble. In these days there were many cripples. Now, medical science understands that rheumatism is a disease of the blood, and that with good, rich, red blood any man or woman of any age can defy rheumatism. There are many elderly people who have never felt a twinge of rheumatism, and many who have conquered it by simply keeping their blood rich and pure. The blood enriching qualities of Dr. Williams' Pink Pills is becoming every year more widely known, and the more general use of these pills has robbed rheumatism of its terrors. At the first sign of poor blood, which is shown by loss of appetite, dull skin and dim eyes, protect yourself against further ravages of disease by taking Dr. Williams' Pink Pills. They have helped thousands—if you give them a fair trial they will not disappoint you.

You can get these pills through any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Daring Rescue from S.S. Marburn

Thomas Bruin, Liverpool, boatswain of the Canadian Pacific S.S. Marburn, made an heroic rescue at sea. While off Glasgow and engaged in boat drill in the manner ordained by Board of Trade regulations, George Davidson, an able seaman, lost his balance and fell overboard. Bruin jumped to the sea with his clothes and heavy boots, reaching Davidson when he came up for the second time. This is Bruin's second jump overboard. Last summer at Montreal a companion had the same mishap, but unfortunately the seaman had struck his head on some floating object and did not rise immediately to the surface. Bruin dived unsuccessfully for his companion, who was found some days later.

Members of the crew made a presentation to Bruin on his return voyage, and the Log of the S.S. Marburn will be a permanent memorial of the boatswain's bravery.

Graduate Nurse Finds "The Perfect Remedy"

"From my long experience as a professional nurse, I do not hesitate to say Tanlac is nature's most perfect remedy," is the far-reaching statement given out for publication recently by Mrs. I. A. Borden, 425 Pontius Ave., Seattle, Wash., a graduate of the National Temperance Hospital, Chicago.

"I have used Tanlac exclusively for seven years in the treatment of my charity patients," said Mrs. Borden, "and my experience has been that for keeping the stomach, liver, kidneys and bowels functioning properly, and for toning up the system in general, it has no equal.

"About a year ago I had a lady patient who could not keep a thing on her stomach, not even water. I prevailed on her to try Tanlac and after the sixth bottle she could eat absolutely anything she wanted without the slightest bad after-effects.

"I had another patient who simply could not eat. I got him started on Tanlac and by the time he finished three bottles he was eating ravenously and able to work.

"These two instances that are typical of the wonderful merits of the medicine. My confidence in Tanlac is unlimited."

Tanlac is for sale by all good druggists.

EASY TRICKS

No. 43

The Four Aces

In this clever trick, the four aces are dealt face down on the table. On each ace, three other cards are placed. The magician says the usual magic word—and all of the aces fly to one of the heaps. A little arrangement of the cards is necessary.

The four aces are displayed as in the illustration. Do not display them for long because a keen-eyed spectator might discover the fact that behind the ace of clubs three other cards are hiding. The "fan" of cards is closed and placed, face down, on the top of the pack of cards.

The audience believes that the four aces are on the top of the pack. Really three other cards are on the top of the aces. The first of these is dealt on the table with the remark: "I'll put the first ace here." The second is dealt with the remark: "—and the second ace here". Care must be taken not to show the faces of the three cards. On the fourth card, which really is an ace, deal the next three cards—the three remaining aces. Three cards are dealt on each of the other three (alleged) aces. The trick is now completed but don't forget the magic words and any other hocus pocus.

(Clip this out and paste it, with other of the series, in a scrapbook.)

Digging With Dynamite.

In the old days digging a drainage canal was a long and expensive business. It can be done to-day quickly and cheaply, not with picks and shovels, but by means of explosives. It is possible to control their action so closely that they can be made to blast out canals and ditches exactly as they are planned.

A recent feat was the construction of a canal 700ft. long, 12ft. wide, and 4½ft. deep in half a day! It was desired to drain a swamp in order to add its land to a valuable farm. The line of the necessary canal was marked out, and workmen armed with picks and crowbars buried sticks of dynamite at regular intervals. There were three rows of holes spaced 2ft. apart. Each stick was buried 23ft. deep.

When all was ready, a specially fused detonator was inserted into one of the holes. Its fuse was lit and the workers retired. They had just reached safety when there was a tremendous explosion, the first stick having caused all the others to detonate.

When the men returned to the scene they found the canal ready dug in one second. Water was beginning to flow through it, and in two or three days the former swamp was showing signs of drying up. Today it is bearing heavy crops of grain.

Keep Minard's Liniment in the house.

Among the wilder tribes of the Caucasus every child is taught to use the dagger almost as soon as he can walk. The children first learn to stab water without making a splash, and by incessant practice they acquire an extraordinary command over the weapon.

What Song Will You Have to Eat?

Making the rounds of the popular music publishers these days is just like walking into a market. The publishers will soon have to have their stuff licensed under the Pure Food and Drug Act instead of having them copyrighted.

The list of the latest song hits resembles a music publishers' picnic menu.

Menu

"Yes, We Have No Bananas"
"Hey! You Want Any Codfish?"
"Pickles"
"Cut Yourself a Piece of Cake and Make Yourself at Home"
"I Want An Apple on the Stick"
Re-Heated Coffee—"Don't You Try to Two-Saucer Me"
"Sugar"

And to Complete the Meal with Nuts we have "Hot Roasted Peanuts.",
To keep the food from spoiling we have "The Grandest Iceman."

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

There's only one safe way of climbing in business, and that is to stay on the level.

Ask for Minard's and take no other.

If unsalted fat is used in making pastry, salt should be added in the proportion of one-quarter teaspoonful of salt to one cup of flour.

BABIES LOVE MRS. WINSLOW'S SYRUP

The Infants' and Children's Regulator

Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly overcomes colic, diarrhoea, flatulency and other like disorders. The open published formula appears on every lable.

At All Druggists

For all the Family

Strains, sprains and pains, overworked muscles, a twinge of rheumatism—all of them answer at once to Kendall's Spavin Treatment. Kendall's penetrates right to the sore spot—soothes, cools and heals. Kendall's Spavin Treatment, known for more than 40 years as Kendall's Spavin Cure, is economical and clean—no mussiness, no continued rubbing, no bandaging. 10

KENDALL'S SPAVIN TREATMENT

EXCRUCIATING PAINS, CRAMPS

Entirely Remedied by Lydia E. Pinkham's Vegetable Compound

Eberts, Ont.—"I started with cramps and bearing-down pains at the age of eleven years, and I would get so nervous I could hardly stay in bed, and I had such pains that I would scream, and my mother would call the doctor to give me something to take. At eighteen I married, and I have four healthy children, but I still have pains in my right side. I am a farmer's wife with more work than I am able to do. I have taken three bottles of Lydia E. Pinkham's Vegetable Compound and I feel that it is helping me every day. My sister-in-law, who has been taking your medicine for some time and uses your Sanative Wash, told me about it and I recommend it now, as I have received great relief from it."—Mrs. NELSON YOTT, R. R. 1, Eberts, Ont.

Lydia E. Pinkham's Vegetable Compound is a medicine for ailments common to women. It has been used for such troubles for nearly fifty years, and thousands of women have found relief as did Mrs. Yott, by taking this splendid medicine.

If you are suffering from irregularity, painful times, nervousness, headache, backache or melancholia, you should at once begin to take Lydia E. Pinkham's Vegetable Compound. It is excellent to strengthen the system and help to perform its functions with ease and regularity. C

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Toy's Hill

Messrs. Rumsey and Arnold Peterson and Master Ward Peterson spent Sunday at Spencerville the guests of Mr. and Mrs. Frank Dukelow. Mr. Thos. Peterson accompanied them home.

Rev. and Mrs. Mahlon I. Robinson of Shawville spent the week at the latter's home here.

Mr. and Mrs. Sterling Coons and family and Miss E. Droppo spent Sunday afternoon at Chesterville.

Mr. Lee McIntosh of Albany, N. Y., has been visiting his cousin Mr. Frank McIntosh.

Mrs. Hugh McCann of Hexton is spending the week with her sister, Mrs. Herb Houlahan.

Mr. and Mrs. Geo. Barkley of Williamsburg spent Sunday with Mrs. Louisa McIntosh.

A number from here aftended the Exhibition at Ottawa last week.

The Bull Got Drunk.

The story comes from Westport, says the Perth Courier, that a farmer near that village made a few gallons of "home brew" not so much for his "stomach's sake" as for his pocket's sake, and left the mess in a cooler out in the back yard to cool, While in this stage, the farm bull came along, and the odor of the seductive fluid attractitg him to the danger spot, the attraction, as in the case of many a two-legged animal, was too strong to be resisted. He tasted and drank and drank on until the whole of the contents of the cooler was in his stomach, with the inevitable consequences. When the farmer came along, some time later, he saw an empty cooler and a bull lying prone on the ground motionless and helpless, whether dead or not was not then apparent. For four days the bull lay there without change, and then it staggered to its feet, showing that it had not been dead, but only dead drunk. Reader, this is no fish story, but a true one.

The liability of Municipal Councils for keeping streets and highways in safe condition has again been proven. Judgment has been given for $200.15 for the plaintiff in the case of Charles Neilson v. the City of Stratford and the Police Commission, which was heard some time ago, The counter claim of the city was disallowed and no costs given in the counter claim. Full costs were granted in the original case. The action arose out of the accident last fall at the corner of Water and Waterloo Streets. Mr. Neilson's car was damaged.

PILES Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c. stamp for postage.

The Band At Ottawa.

The following item was taken from the Ottawa Citizen of September 14th:—

The Winchester Citizens' Band, under the leadership of Mr. J. H. Larue, played remarkably well and made an excellent impression upon those who heard it. There were 21 players on the stand and all played with every evidence of keen interest and enthusiasm over their work

In their home town they give a concert every Saturday night, using the balcony of the Hotel Winchester as a band stand.

They gave a high-class program lasting for one and a half hours, and large attendences are always on hand to enjoy these musical treats.

The program played yesterday afternoon was as follows:

1. Tenth Regiment March Hall
2. Overture—Scenes from Opera Land Hayes
3. Waltz—Firelight Fancies—Rosekranz
4. Descriptive—Tenting Tonight- Ripley
5. Overture—Mignonette— Bautam
6. Selection—Bohemian Girl— Balfe
7. Overture—Home Songs— Schuman
8. March -El Capitan— Sousa

W. C. T. U.

The meeting yesterday afternoon was held at the home of Mrs. J. J. Empey who presided. It was decided to hold the parlour meeting the latter part of November and the Medal Contest on Nov. 12, Thanksgiving night, also to hold the regular monthly meetings during the winter months in the homes of the members. Mrs. M. Moffat was appointed Asst-Treas., and Mrs. Bailey was elected delegate to attend the Provincial Convention in Brantford Oct. 15th to 20th. Miss Empey was chosen Supt. of the Little White Ribboners, and Mrs. (Dr.) McKeown Supt. of L. T. L. work in the Presby, Mission Band. These ladies take Mrs. Copeland's place in this work. Mrs. Bolton conducted the devotional exercises. Mrs. I Hughes gave a very interesting report of the Counties Convention held at Lancaster in July in which W. C. T. U. women were urged to fight on until the demon of intemperance is banished from our land.

Obituary

Died at 56 Frisby Street, Winnipeg, on Wednesday, September 6th, 1923, Mrs David Mundle, aged 93 years. Mrs. David Mundle was the oldest daughter of the late Mr. Thomas Christie, one of the pioneers in the early settlement of the Township of Windnester. Mrs. Mundle before her marrlage was Miss Anna Christie. She taught the first school that was opened on Maple Ridge, the building was then located where now is the south-east section of Maple Ridge Cemetery. Miss Christie married Mr. David Mundle, of South Gower with whom she lived until his death. After she became a widow, she moved with her daughter, Miss Effa Mundle, to Winnipeg, where she was kindly and tenderly cared for until her death. Mrs. Mundle was a member of the Baptist Church, a kind aud loving mother, a sincere and faithful friend, a neighbor who never worried in the performance of acts of kindness towards the needy and the poor. Aiter a long life of usefulness, God has taken her to himself.

Must Honor Canadian Flag

The practice of American tourists passing through Canada with the U. S. flag displayed on their cars, unaccompanied by a Canadian or British flag, has often been noticed with regard to autos passing through the country. In this regard the Lincoln County Council has decided to ask the Federal Government to instruct customs officers at all frontier points of entry to inform visitors that if they wish to display "Old Glory" they must also exhibit a Canadian flag while on Canadian soil.
