Our Column

An average of 44 vehicles and more than 130 persons crossed the Peace Bridge going to or from Canada, each minute of 1930, according to the figures compiled for presentation to the corporation which coutrols the bridge.

At the annual meeting of the Montreal Graduated Nurses Association held in Montreal on Monday, Miss Agnes Jamieson, who is a native of Nation Valley, Winchester Township, was elected President of the Association, which has a membership of over 800.

The highest advertising rate of any periodical in Americа is charged by the Ladies Home Journal, which is $9,500 for a full page. Woman's Home Companion rate is $9,400; Delinator $9,200; Pictorial Review and McCall's Magazine, $8,800 each; Saturday Evening Post which has the largest circulation $8,000; Collier's, $5,500; True Story, $4,500 and Liberty $4,250. And it pays.

Mrs. James Johnston, of Cass Bridge, has informed the Press that some of her ducks have already started to lay eggs. This is very unusual at this time of year. She also hands out some information that will stop hens from eating their eggs Feed the hens newspaper as soon as you find out they are eating their eggs. Mrs Johnston tried this and it stopped her hens from the bad habit at once.

Stole Geese and Chickens

Mr. Jas. Bowman, Cass Bridge, was a very surprised man on Friday morning last when he visited his barn and discovered that certain parties had been there before him, and had carried away his stock of geese and chickens, or as many as they could capture. The thieves were evidently familiar with the premises as they cut their way through a barb wire fence, then cut the wires fastening the barn doors. They came in a rig of some kind to carry their steal away, but left the impression of their boots in some snow, which may help to their conviction. The matter is in the hands of the police.

First Council Meeting

The first meeting of the Winchester Council was held on Monday morning last, all the members being present. The only change in the Council is that Mr. A. E Goodfellow is replaced by Mr. P. McGregor. As the Council assembled they noticed a large pound box of chocolates on the table, a present to the 'Reeve, Clerk and Councillors" from the caretaker, Mr. Wm. Quart. Mr. Quart has made the annual contribution for many years, and never does it lose its sweetness nor its appreciation by the recipients, and Mr. Quart may rest assured that his kindly act was not only appreciated, but eagerly and quickly devoured. In this respect the finance committee showed the greatest proficiency, especially in the devouring.

A number of accounts were submitted and passed.

Out of the Relief fund of $5000, already over half the amount has been expended, nearly a thousand dollars having been spent for tile, heads for manholes, and other materials.

A by law, appointing the following officers, was read, passed and signed.

J. C. Empey, Clerk and Treasurer, Salary $135.00.

J. D. Stewart, Collector of Taxes, Salary $55.00.

J. C. Empey, Services in connection with Hydro, $350 00.

H. W. Empey, Assessor, Salary $50.00.

Carl Rice, Auditor, Salary $7.00.

Edward Shaver, Auditor, Salary $7.00.

Herb Helmer, Constable. Sanitary Inspector, School Attendance and Charity Warden. Salary $100 00.

Wm. Quart, Caretaker of Town Hall, Salary $100.00.

Fence Veiwers, Frank Parker, F. F. Davidson, and R. J. Empey.

Pound Keepers, William Hay, F. F. Davidson and J. E. Christie.

Dr. McLaughlin, Medical Officer of Health.

Member of High School Board, W. J. Cass.

Member of Board of Health, A. E. Goodfellow.

Passed, signed and sealed this 12th day of January, A. D. 1931.

J. H. Ross, Reeve; J. C. Empey, Clerk.

The Committees for the year are as follows:

Finance—A. Johnston and P. McGregor, Streets—Geo. Earle and P. McGregor, Property—Thos Bailey and A. Johnston. The Reeve acts as a member of each committee.

An important deputation waited on the Council in the persons of Messrs. N. W. Beach, A Sweet and T. O. Keyes Their object was to have the Council pass a resolution asking the reeve to urge upon the attention of the Counties' Council at its next session some action with a view to relieving the rural sections of the heavy taxes that were being imposed on them, particularly with reference to roads. Mr. Beach, as spokesman, pointed out that the burden was becoming more irksome each year, that many farmers were finding it almost impossible to meet their obligations, and what effected the farmer also effected the business man, particularly in the rural sections. He thought that if some united action could be taken by the Counties' Councils of the province toward having the government relieve the municipalities of the twenty per cent of the cost of the building and maintenance of our King's Highways; of having some of the tax on gasoline reverted to the municipalities; of increasing the grants to our schools, it would be a practical way of helping the farming community. With this in view he submitted a resolution for endorsation by the Council.

The resolution, which was moved by Geo. Earle and seconded by Thos. Bailey, read as follows:

"That owing to the depressed condition of the farmers throughout the province and the burden of taxation under which they are operating, a portion of which is expended on King's Highway, and whereas a very large revenue is collected by the Provincial Government from gasoline tax and motor licenses, the Council considers the Highway Department should assume the total cost of Said Highways and relieve the taxpayers to that extent. That the Reeve is hereby requested to carry the matter to the Counties' Council to procure their co-operation in carrying it into effect."

It being noon hour, the Council adjourned to meet again on Thursday night, 15th inst. at 7.30 o'clock, when the matter of furnishing further employment to those in need will be taken up.

LOCAL AND GENERAL

The death occurred at the general hospital, Cornwall, of Miss Margaret Armstrong, eldest daughter of the late Mr. and Mrs. John Armstrong. She was born in the second concession, Matilda, north of Iroquois, but for the past 26 years her home had been in Morrisburg.

A pleasant surprise, in the form of a farewell shower, was tendered Miss Eleanor Hitsman at the home of Mrs. Gemeroy on Tuesday night. A short address was read as soon as the guests arrived and Mrs. C. Rice presented Eleanor with a Hat Box and lovely purse. Eleanor responded in a few words but the sudden surprise made many words impossible but she wished her friends to know she would never forget their kind thoughtfulness.

Kempville Advance reports that while driving Mrs. S. Forsythe to her home in Oxford Township, on Monday, of last week, James A Sanderson, Conservative candidate in Grenville, met with an accident. It is thought that the steering gear beacame locked and threw the car into the ditch. Mrs. Forsythe received cuts on her face and hand, and was somewhet haken up. Mr. Anderson escaped with a shaking up and a few bruises. Dr. Gordon, Kemptville, attended to Mrs Forsythe.

Isabel, the little three-year-old daughter of Mr. and Mrs. Byrtle Hess, and Frederick, the little two-year old son of Mr. and Mrs. George Strader all of Williamsburg, while playing behind the counter in Mr. Strader's store one day last week, found a box of kidney pills and between them ate half of the box of pills. When they were first noticed, the children were taken seriously ill and only for the prompt medical attention of Dr. Locke they would have died. They have now fully recovered.

At an early hour last Friday evening, following a short illness James Wesley Gilroy, one of Kemptville's most highly respseted citizens, died at his home on Prescott street, Kemptville. Mr. Gilroy was born in South Mountain, 79 years ago, where he lived until 10 years ago, when he moved to Kemptville. He was an active worker in the Presbyterian church, having been an elder in the South Mountain church and superintendant of the Sunday School. Since moving to Kemptville he had been an ardent worker and regular attendant in the church and Sunday School. He was a member of the Orange Order. Besides his widow he is survived by one son, John Wesley Gilroy, of South Mountain, and one daughter at home. Six brothers, John, Gilbert, and Edwin, of South Mountain; Albert, of Ogdensburg, N. Y.; Charlie, of North Dakota; Edmond, in Saskatchewan. The funeral was held from the house to St. Paul's Church on Monday at 1 p. m., where service was conducted by Rev. W. J. Hurlow. Interment was in South Mountain cemeterv.

Just Like Others

A friend of the Winchester Press from Melvin Settlement called in on Saturday last and apologized because he had allowed his subscription to run over several months, and to make amends, paid up for another year in advance. "Do you know," he said, "I have often come to town intending to call in and pay my subscription, but I would forget until on my way home again. I suppose if it was a bigger amount I would remember, but it makes me feel mean every time I look at the label on the paper and see that my subscription is overdue." This man is just like hundreds of others, and while the Press appreciates their kindly thoughts and intentions, it don't help us much when each week our bills have to be met, and many of them can't be put off because we forgot to think at the proper time. Particularly will the Press appreciate a kindly remembrance from subscribers in the United States, and in other provinces in the Dominion.

Late Mr. Duchesneau

There passed away after a short illness Wednesday, Jan. 7, at the Civic Hospital, Victor Duchesneau of Winchester, age 75. The funeral took place from his residence, Centre Street, at 2 p. m., Monday, Jan. 12th, to St. Matthias Church, thence to Springhill cemetery. He leaves to mourn, his winow, formerly Mary Duncan of Vernon, four children, Ernest and Merrill of Hartney, Fred and Mrs. Graham of California. Step-children are: D. Duncan of North Gower, G, Duncan of Messana, Thos. of North Augusta, Roy and Robert of Ottawa, Isaac, Wilbert, and Kenneth of Vernou, Mrs. Charles Goodman of Ottawa, Mrs. Bryson, Foster, of Twin Elm, Mrs. D. Little, of Russell, Mrs. Harold Levere, Winchester.

Late Mrs. Chas. Casselman

On Saturday morning, Jan. 3rd, 1931, at her late home, Cass Bridge, a well known and highly respected person, Mrs. Chas. Casselman, passed peacefully away after a lingering illness, in her 70th year. She was the youngest daughter of the late Mr. and Mrs. Adam Ulman of Crysler. In Oct. 1885, she was united in marriage to Charles Casselman, third son of the late Mr. and Mrs. Levi Casselman of Williamsburg. At once they took up farming at Casselman where they resided until they moved to her late home twenty three years ago. To this union were born three sons of whom Frank passed away in his infancy. The funeral service took place on Monday at her late home. The service was conducted by her pastor, Rev. Mr. Morrison of Elma, assisted by Rev. Mr. Waddell, Winchester, both of whom visited her during her long illness. The sermon was a very appropriate one. The pastor took for his text Judges 5 and part of the 31st verse, "But let them that love him be as the Sun when he goeth forth in might." The minister spoke very kindly of the deceased and referred to her as one who would be greatly missed by her loved ones and the community. The choir rendered very beautifully, "When the Roll is called up Yonder," which was the deceased's favourite hymn. After the service the remains were conveyed to Morewood Presbyterian Cemetery.

Besides her sorrowing husband, she is survived by two sons, Bernice at home, and Ellis of Dunbar, also their wives and two grandsons Lloyd and Harold; and one brother, Nelson Ulman of Crysler.

The pall bearers were D. Munro, T. McQuat, W. Link, C. Robinson, P. McIntosh and W. Steele.

The floral tributes were: Gates Ajar—The Family, Pillow—Mr. and Mrs. John McDiarmid and Mrs. A. Carruthers; Wreath—Mr. and Mrs. Mahlon Shaver. Mount—Mrs. Anna Baker and family, Spray—W. M. S. Winchester Springs United Church.

LOCAL AND GENERAL

Last night was the coldest night this winter, the thermometer reaching over 15 below zero. It was 10 below at 9 a. m. this morning, but a bright sun and clear air made the atmosphere bracing.

Phil Strader, a student of the Morrisburg Collegiate Institute, whose home is in Williamspurg, received notice last week that he has won one of the T. Eaton Co. Scholarships at the Ottario Agricultural College at Guelph.

Fire of unknown origin which completely destroyeq a bakeshop, contents, automobile, aud delivery trnck, broke out at an early hour on Tuesday morning last week at Berwick. The owner of the shop, Mr. Arthur Pommınville, has a loss to the extent of $2.000. which is only covered by $1.200 insurance. The bakery was situated on a corner along the main street and at one time other buildings were in danger owing to the lack of water.

Facing charges of the theft of an auto mobile owned by Bervl McIntosh, Finch, T. Alfred Carr of Finch and Charles Hamilton of Jarvis, Ontario, are in the Counties' Jail at Cornwall, says the Freeholder, on remand. Carr was arrested by Provincial Constable Wilfrid Bertrand at Finch, while Hamilton was taken into custody at Montreal by the same officer. The car, which was stolen from a parking place near Finch Arena last Thursday night, has been located at Hudson, Que., where, it is alleged, it was sold for $10. Carr pleaded guilty to the theft charge.

Mr. Phil Fader, of Leamington, son of Martin Fader of town, was again elected as Councillor on the Leamington Council Board last week. Six were elected out of ten candidates, and Phil ran second highest. A by lsw submitted by Phil, and voted on last week, to have the number of council members rednced from 10 to 7, carried by over 800 majority. The people of that place also voted on whether a liquor store would be established in Leamington or not. This was defeated by a large majority, and no liquor store will be forthcoming which is good jndgment on the part of the ratepayers.

The New Chevrolet

Melvins have on exhibition the new 1931 Chevrolet Car, and it is a beauty, no getting around it, it looks the last thing for the price on wheels to-day. Snappy and attractive in appearance, with all the latest improvements, fine upholstering, and in fact a car that a couple of years ago would command double the money. You just ought to see this new Chev.

Saying Good-bye to Howard

Between forty and fifty admirers and friends of G. H. Ferguson, the new High Commissioner to London, went to Kemptville last evening to be present at the big farewell gathering held in the Agricultural Hall there. Mr. and Mrs. Ferguson received their friends from the surrounding district, and the gathering was presided over by A. C. Casselman, M. P., Prescott. It was a large gathering, and even though a "good-bye," everyone seemed to be happy.

Arrange for Valentine Day

The first meeting of the Mizpah Mission Circle for 1931 had a most encouraging attendance at its meeting on Friday last.

The Presient, Mrs. Ben. Carr occupied the chair. Slides showing many phases of Japanese life were shown and greatly appreciated.

The Executive reported plans for a Valentine Tea and money shower to be held on Saturday, Feb. 14.

After the meeting a social half hour was spent over the tea cups.

Deaths At Chesterville

Chesterville, like Winchester, has been visited with several bereavements during the past two weeks. Many prominent citizens have been laid to rest. This (Thursday) morning at Chesterville a prominent merchant and respected citizen in the person of H. J McMahon, was called away by death. He leaves a widow but no family. Within the past few days two more deaths occurred. One an old and respected resident in the person of Mrs. John Hummell, and Mr. John Sorrell. Although Mr. Sorrell was not in the best of health for some time, he was on the street, when taken suddenly ill, followed by severe hemorraghes, after which he sank gradually until death occurred. The deceased was 50 years of age, and the father of Johnny Sorrell, professional hockey player, who was hurriedly summoned from Chicago where he was with the Detroit hockey team playing a game

Rev. J. B. McLeod Passes

Many hearts were saddened when on Sunday last it became known through announcements in the churches, thst Rev. J. B. McLeod, for some years pastor of St. Paul,s Presbyterian Church in Winchester, had passed away after a months illness, at the age of 59 years. Although it is some twelve years since Rev. Mr. McLeod left Winchester, his very charming personality, his deep devotion to things sacred, his scholarship and his devotion to duty will have left their last impression on this community, and to his widow and family goes out from here the very kindest sympathies.

The Montreal Gazette says; "Rev. Mr. MacLeod had been in Montreal since 1918, when he came to occupy the position of City Chaplain for the Presbyterian Chnrch. He later served in this capacity with the United Church of Canada and for several years he had been Quebec Secretary of the Social Service Council of Canada. He was widely known in the city and his loss will be regretted by his many frienbs and acquaintances here and in other parts of the Dominion.

Born in Springton, P. E. I., in 1871, Mr. McLeod attended Prince of Wales College in Charlottetown. Upon graduation, he taught school for several years on the Island before coming to McGill University for an Arts course. He was awarded the degree of B. A., with honours in philosophy, in 1899, and then entered for theological studies at the Presbyterian College, obtaining the degree of B. D., in 1902, being the gold medalist of his year and winning the travelling scholarship.

He is survived by his wife, formerly Helena Brodie, of Montreal, four sons, Dr. Wendell McLeod, of Montreal, Robert Brodie McLeod, of Cornell University, Kenneth Ogilvie and Angus Archibald McLeod, both of Montreal; and two brothers, Rev. D. M McLeod, of Alexandria, and Rev. A. B. McLeod, of Escondido, California.

SOCIAL AND PERSONAL

Mrs. W. B. Hamilton of Chesterville spent Friday with her aunt, Mrs. J. H. Faith.

Miss Ellen E. Smith, of the Boyne, was visiting her sister, Mrs. L. Belway, on Tuesday.

Miss Mildred Kenny, of Mountain, spent last week with Mr. Mrs. Arnold Docksteader.

Mrs. Jennie Fitzgerald, of Smith's Falls is spending this week with her sister, Mrs. Victor Duchesneau.

Mr. and Mrs. J. M. Jackson and family of Kemptville, spent Sunday with the latter's parents, Mr. and Mrs. Wm. Dickson

Mr. Joe Barrett, of the Civil Service Commission, Ottawa, is spending the week in Winchester, the guest of Mr. Hy. Bessin.

Mr. and Mrs. George Beattie and Mr. and Mrs. Delbert Dillabough, of Cornwall spent Sunday with Mr. and Mrs. Arnold Docksteader.

Dr. George I. Christie, President of the O. A. C., Guelph, Ont., spent Tuesday with his brother, Mr. Ernest Christie and Mrs. Christie.

Dr. and Mrs. J. C. Gemeroy of Detroit, and Miss Isabelle Gemeroy, training in Montreal General Hospital, were weekend guests at their parental home.

Mr. and Mrs. B. S. Ross and daughters of New Westminster B. C., have returned home after visiting Mrs. Ross's sister Mrs. Ida M. Baldwin of Inkerman, Ont.

Mr. Erle Helmer and Mr. Sherman Ball returned home Monday night after attending the funeral of their brother-in-law, the late J. H. Gormon, at Merrickville.

Snow Plow at Work

Thanks to the activity and influence of our local member, Mr. George Challies, of Morrisburg, the big government snow plow is at work keeping the road open between Morrisburg and the Carleton boundary. It is doing good work, but of course the season so far has not been a hard one, and the drifts are not many or deep. However it is a satisfaction to motorists who want to travel to know they can get to Ottawa or to highway no.2 on the St. Lawrence with comparative ease in tne winter time.

Three Deaths

During the past week three deaths have occurred, removing from this community three familiar and well known residents—

Mr. Victor Duchesneau, of whose death a notice appears elsewhere in this issue.

Nehemiah Carkner, age 76, who died on Tuesday last. An obituary will be published next week.

Mrs. Melissa Prunner, aged 77 years, of Melvin Settlement, mother of Ruben Prunner, died on Monday last. An obituary notice will be published next week.

About The Weather

It is hard to satisfy everyone. The hockey-players, curlers and rink directors want cold, snappy weather. The farmers, and many who live in villages are praying for the January thaw. They want rain and water. Some farmers are hauling water many miles for their cattle, and the wells are being drained. Yes, many want a regular old time January thaw. We do not know how ma y want snow, but the drivers of cars are hoping that there won't be any more snowstorms. So there you are. What pleases one displeases another It is the variety and contrariness of life that makes it most interesting. If your wife never frowned you would never appreciate the pleasantness of her smile. If your husband never showed temper, you would never half appreciate his good nature and forbearance. After all its a jolly old world and a fine lot of people if you only take things as they come and don't grumble too much.

Birth

At Winchester, Ont., on Saturday, Jan. 10th, 1931, to Mr. and Mrs. Harold Keyes, a son—Bobby Allan.

At the Women's Hospital, Allan Park, Dearborn, Mich., on Saturday Jan. 10th, 1931, to Mr. and Mrs. Russel J. Belway, (nee Mary Smith of the Boyne) a daughter. (Stillborn.)

FOR SALE

25 tons good quality hay at $9.00 per ton in barn. Apply to T. O. Keyes.

CARD OF THANKS

We thank the people of Winchester and vicinity for the many acts of kindness they have tendered us since the fire.

Mr. and Mrs. Wm. Billings.

Flying Arctic Air Mail Is Touch and Go Affair

At Seasons of Freeze-Up and Break-Up, Planes Need Skiis at One End, Pontoons at Other of Long Run

Fort McMurray, the southern terminus of the Commercial Airways mail routes, lies just south of 58 degrees N. Lat., and Aklavik, the northern terminus, just below 70 degrees N. Lat. Between these two points lie almost 2,000 miles of mighty rivers and lakes and trackless wilderness.

In the Summer season the mail planes are equipped with pontoons for landing on the only airdromes the North possesses—the lakes and rivers. During the Winter the pontoons are replaced by skis for snow landings on the frozen watercourses. The 12 degrees of latitude that separate the terminals and the fact that one base is some 2,000 miles nearer the North Pole than the other, give rise to two seasons of the year which are peculiar to Northern conditions. These are the "break-up" season in the Spring, when the ice is going out of the rivers, and the "freeze-up" season in the Fall, when the rivers are being mantled with ice. During these two periods every year all flying is at a standstill.

The situation is simply that on the northern end of the run skis are required while open water on the southern end compels the use of pontoons. Hence the aircraft have to wait until the whole run is frozen in solidly and the southern part usually does not freeze up until about a month after the northern. Advantage is taken of this lull in the operations to overhaul the engines and planes, remove the pontoons and fit the skis. It is holiday time for the pilots and mechanics.

Hazards of Arctic Mail

The last seaplane to leave Fort McMurray for Aklavik this year did so on Oct. 1, piloted by W. N. Sherlock. His log was a typical example of the touch-and-go business of flying the Arctic mail. He left McMurray loaded with 358 pounds of mail, 168 pounds of last-minute express, two passengers and 100 pounds of their baggage, and reached Fort Fitzgerald that night. In the morning the machine left Fort Fitzgerald northbound with 408 pounds of mail, 163 pounds of express and the two passengers, Bishop and Mrs. Geddes, on board. After stopping at Fort Smith, the pilot reached Fort Resolution, where he picked up some additional mail. The load out consisted of 681 pounds of mail, 163 pounds of express and the passengers. The night was spent at Hay River.

Fort Providence was reached on the morning of the third and, after leaving 56 pounds of mail, Sherlock pushed on to Fort Simpson. The two passengers disembarked at this post and the load was further reduced by leaving 100 pounds of express, 100 pounds of mail and a like amount of baggage.

At Fort Simpson a passenger was picked up for Fort Norman—the cook for the new wireless station there. The rest of the load consisted of 465 pounds of mail, sixty-eight pounds of express and fifty pounds of baggage.

The weather had turned colder even before Fort Simpson was reached and the machine ran into snow. In the afternoon the weather turned still worse and snow began to fall heavily. The visibility became so bad that the machine was forced to land in the Mackenzie River. Four compulsory forced landings were made between Fort Simpson and Wrigley and with the darkness came abandonment of any hope of getting to Wrigley that night. The machine was tied up and the night spent at the mouth of the Willow River.

On the 4th the weather cleared somewhat and the machine was flown into Fort Wrigley, then on to Norman, where the cook was delivered safely to the officer in charge of the wireless station. The machine left Norman with 385 pounds of mail and thirty-five pounds of express and, after stopping at Fort Good Hope, landed at Arctic Red River just at dusk. Two passengers were picked up at Fort Good Hope for Aklavik.

Ice Begins to Threaten

At Arctic Red River it was noticed that ice was forming all along the shore and sheets of ice were flowing down the river. The following morning the floe ice in the river seemed to be thickening up. However, Sherlock took off for Fort McPherson and, after landing there, pushed on to Aklavik. He set the machine down in the river opposite the post at 11.40 a.m., unloaded the mail and took on the southbound mail as quickly as possible. One passenger for Fort McMurray also was taken aboard. Ice was forming very rapidly along the shore and the spray froze to the float struts and wires as Sherlock taxied out in midstream for the take-off. His visit to Aklavik did not last more than twenty minutes, as the machine was literally freezing in while he was there.

Good weather and a helping wind enabled him to reach Fort Good Hope that night after stopping for a few minutes at Arctic Red River and Fort McPherson. At Good Hope a passenger was picked up for Fort Norman. On putting into this latter post he found Lieutenant and Mrs. Hastings waiting to be taken to Fort Simpson. This wireless officer had a power boat at Fort Norman and had intended returning to Simpson by boat, but the floe ice in the river made it impossible to do this. The only cat in the northwest territories was carried from Norman to Simpson. This was a pet of the Hastings family and had accompanied them on the trip from Simpson to Norman by boat.

A short stop was made at Wrigley and then Simpson was reached at 6.30 p.m. Lieutenant and Mrs. Hastings disembarked and their places were taken by two priests traveling to Fort Providence, while 200 pounds of express and mail were taken aboard. The night was spent at Fort Providence.

On the 7th, after landing at Hay River, Resolution and Fort Smith, Fort Fitzgerald was reached and two passengers for Fort McMurray were picked up. The night was spent at Fort Chipewyan, just an hour and a half from home. Darkness had shut down. Fort McMurray was reached on the 8th. The load consisted of three passengers, 200 pounds of express and 150 pounds of mail. This completed the round trip of the last mail before the freeze-up. No further communication with the north was possible, except by wireless, for at least six weeks, and when the machines again went in they were fitted with skiis.

New Field Created By Clever Woman

London—Mrs. Beatrice Davies has found for herself a new career. She has discovered that there is an opening for a new profession in the line of Announcer as Dress Parades, and is busy making a remarkable success of it.

Mrs. Davies did not set out to discover her profession. It so happened that she held a post in one of the big London stores in which it was her duty to sell frocks.

She grew to know the technical names of everything pertaining to frocks, and, most important of all, to know exactly which line would best set off each customer.

One day, when her store was arranging a fashion parade, she was asked to stand beside the platform and announce the price of each model as it appeared.

"Nobody exactly told me to do more than that," she explains, "but how could one refrain from adding, after stating the price, one word in explanation of the pretty things we were showing?" And so the thing grew.

Mrs. Davies left her store, and it was not long before she found herself employed first in one place, then in another, "explaining the pretty things" in a way which adds to the pleasure of seeing them and give to each parade something of the nature of a real entertainment.

Canadian Coal Industry

The last three years in the Canadian coal industry have shown a larger output than any similar period in the history of mining in the Dominion. Two of the three years have seen new records established. The year 1929 showed a slight decline, but the output even in that year was nearly 12 per cent. higher than the average production of the past five years. Within the five-year period the increase in output has been nearly 30 per cent. Canadian mines last year supplied approximately one-half of the coal consumed in the country. Imports came largely from the United States, while there were similar quantities from the United Kingdom.

The Canadian fuel problem is geographical in character. The Dominion possesses abundant supplies of coal, but these are situated at the extreme ends of the country. The two central Provinces of Ontario and Quebec are without local coal supplies, though at present certain deposits are under investigation in the northern part of Ontario. As a result of the distribution of coal within the Dominion, there are large imports into Quebec and Ontario from the conveniently situated mines in the United States.

Through a Glass Darkly

If I could be as sure of life
As I am sure of death,
It would be easier by far
To draw this constant breath.

If I could see the gates of life
Swing wide on such delights
As swing the gallant gates of death,
I should sleep well o' nights.

But life is such a twisted thing,
And death it goes so straight
Between the stars and through the moon.
Oh, I must not be late—

And I must not be hesitant,
But step with valiance out
Beyond the little lanes of life
To learn what death's about.
—Barbara Young in The New York Times.

Like the Rest of Us

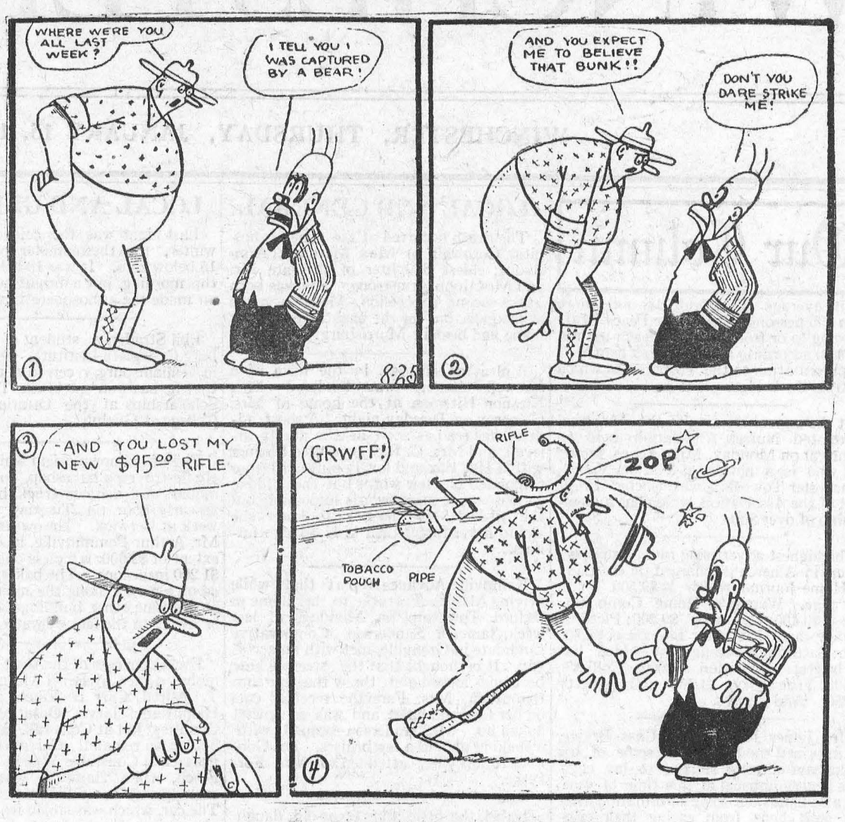
Hubby—"Tell him I've got all I need."—Judge.

"ADAMSON'S ADVENTURES"



The Bear Returns a Few Things.

Horrors of Dreaded Smallpox Unknown to People of To-day

King, Courtier and Peasant of Past Ages Ravaged by Loathsome Disease—To-day Mankind Protected by Process of Vaccination

In some respects the poorest Canadian of today is more fortunate than the most powerful king or emperor of a few hundred years ago.

Consider for example how you who are reading this article are protected against smallpox, through the process known as vaccination. Before the days of vaccination we find that smallpox killed such notable people as William II of Orange; Emperor Joseph I of Germany; Peter II, Emperor of Russia; the Prince of Prussia; Louis XV of France; two children of Charles I of England; a son of James II of England, also his daughter, Queen Mary and her uncle, the Duke of Gloucester; the son of Louis XIV and Louis, Duke of Burgundy. Many other notables suffered from the disease but escaped death as for example Queen Anne of England; Peter III of Russia; Louis XIV of France, William III and Queen Maria Theresa of Austria.

We have all heard something of these smallpox horrors of a bygone day. We have all heard of places so smitten by the disease that the living were insufficient to bury the dead, and how grass grew in the middle of once busy streets and sidewalks because there weren't enough human feet left to tramp it down. But we all know that no such condition as that exists to-day. What then has brought about this change? The answer to that question is "Vaccination". Vaccination which is protecting your life against smallpox—that is if you are vaccinated as of course everyone should be—has saved millions of human lives.

In the year 1870 a young English doctor named Edward Jenner began to study smallpox. In those days this terrible disease was as I have stated one of the greatest of all killers of men. Jenner, visited by a young country woman who came to him for medical advice, was told by her that she could never take smallpox. "For," she said, "I have had cowpox." This singular remark impressed Jenner very much and he began to investigate. Cowpox is a disease resembling smallpox but it affects cows. Human beings can take cowpox but only in a mild form. Jenner found that among milkmaids smallpox was comparatively rare. He also found a kind of superstition to the effect that those who had taken cowpox were immune from smallpox. Jenner resolved to put this old folk tale to the test of science. He selected a healthy boy of about eight years of age and inoculated him with cowpox from a sore on a dairy maid's hand. On the ninth day afterwards the lad had a slight chill, and headache, lost his appetite and felt a little sick. The next day he was perfectly well. The sores on his arm healed without causing the least trouble. Now in those days it was customary to inoculate well people with smallpox virus so that they developed a mild case of smallpox which protected them from all future cases. Again and again Jenner introduced smallpox virus into the lad's system as was the custom at that time, but found it absolutely impossible to make the lad contract even the mildest case of smallpox. Jenner had succeeded. Vaccination was discovered and the doom of smallpox became a foregone conclusion.

News of this conquest spread over the world like wildfire. Napoleon had all his soldiers who had never had smallpox, vaccinated. The Empress of Russia urged her subjects to be vaccinated and ordered that the first child so treated should be called Vaccinoff and educated at the public expense. She presented Jenner with a diamond ring The Government of Spain in 1803 sent a whole fleet to introduce vaccination throughout Spanish possessions in the old and new world. In Sicily and Naples religious processions were formed for receiving the "blessed vaccine." In 1802 the British Parliament gave Jenner ten thousand pounds. In 1812 the discovery of vaccination was celebrated in Berlin and from all over the world messages of praise and gratitude poured in upon Jenner.

So you see in those days people were grimly aware of the horror of smallpox and knew how to thank the man who conquered it for them. Today we should be no less appreciative of this great boon which protects us against one of the most loathsome of all diseases. Every man, woman and child in Canada should be vaccinated. Our article for next week will also be devoted to the story of this disease and of its conquest.

Old Walls in Pembrokeshire

Built unknown years ago by what dead hands
Stout walls, breast-high, of clay-embedded stone
Are now with grass and weeds quite overgrown,
Hidden by wild-flowers, draped with trailing strands,
Of fern and bramble, bed-straw, and rich bands
Of fragrant honeysuckle, fully blown;
Here campion, speedwell, scabious are strown,
The thistle in gay clusters proudly stands,
And here flit butterflies armongst bell heather,
And spiders hang their webs on prickly gorse,
Dog-daisies blow, convolvulus together
Binds fox-glove stalks their beauty to endorse;
Hides underneath all day the solemn toad,
Nor dares till dark to try the adventurous road.
—K. L. MacCuaig, in the Commonwealth.

Hey-Day

Come and go a-berrying,
Would you wiser be!
Come and learn that everything
Younger is than we—

We who almost dared to think
In our wearying
There were no more springs to drink,
No more pails to swing!

We were dusty with our books,
Come and let us go
Out among the lyric brooks,
Where the verses grow,

Where the world is one delight
Made of many a song
Lasting till the nod of night,
Lovely all day long.

Till the smallest glimmering nook
Holds the moon in glory;
And the heavens are the book
And the stars the story!

There the peaceful earth is sweet,
Either way it lies—
Under unacquainted feet
Or in tired eyes.
—Witter Bynner, in "Young Harvard."

Success

The ordinary man thinks he can get what he wants out of life if he has but the price to pay for it, and to get that price without success. Yet there are others, not a few, who know that success quite as often lies in the relinquishing of wealth as in its accumulation; who find it in the putting aside of fame and poverty rather than in grasping them. There are many "ordinary" people, or those whom the world calls such, who have learned that a true manhood or womanhood is the finest success earth has to offer, whatever its surroundings may be.

Great Desires

The ideal of life is in our blood and never will be lost. Sad will be the day for any man when he becomes contented with the thoughts he is thinking and the deeds he is doing—where there is not forever beating at the doors of his soul some great desire to do something larger, which he knows that he was meant and made to do.—Phillips Brooks.

Silence

Mr. Daily was taking his leisure after the evening meal, seated comfortably in his armchair in front of the drawing-room fire.

"How quietly our new maid moves about," he said to his wife, after a while. "You wouldn't think she was in the house."

His wife glared back at him.

"She isn't," came her reply. "She left this morning."

Willingness

Docility is a willingness to learn, a readiness to go through the drudgery and labor connected with learning. Such a man will be open to learn from Nature and Scripture, and from any man, woman, child, or thing that has aught which is valuable to impart.—Dr. Scudder.

Cold Compressed Air From Texas Oil Wells Baffles Geologists

Nature Continues to Astonish Men of Science—But Man Bodly Harnesses Force Even Though Phenomenon Remains Mystery

Snyder, Tex.—One of the greatest mysteries in Texas to geologists, that of the source and cause of the frigid compressed air which comes from wells in the section around Snyder, has been heightened by the bringing in of another well of enormous compressed air flow in a new locality five miles from the other wells. The latest discovery was made in a test for oil that was being drilled by Selfert, Dibble & Blackburn.

The air stratum was encountered at a depth of 1,171 feet. The air rushed out of the hole with a tremendous roar and quickly covered the derrick with frozen moisture. The flow was brought under control and preparations are being made to harness it for use in boilers in industries of nearby communities.

The first of these strange wells was completed near Snyder about five years ago. The air was below the zero mark in temperature and during the hot summer days, when the surface temperature was 90 to 100 degrees, the freezing air from the well was used for refrigerating vegetables and other products. Later it was turned into boilers of industrial plants and the power used as a substitute for steam. Since the original discovery two other similar wells have been brought in here and are furnishing power for boilers. Many geologists of note have visited the freak wells, but none of them has been able to explain the phenomena. For a time it was thought that the product of the wells might be non-inflammable helium gas, but an analysis showed that it was pure oxygen.

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

3190

All the smart young women are wearing snappy jacket suits of lightweight woolen.

The one sketched is just adorable with the bodice of dress in lighter blending tone.

The pointed treatment of skirt creates a flat slimness through the hips and waist. The snug fit of the skirt is what makes it so popular. Note the low placement of fulness with three inverted plaits at front and one at centre-back which flare only in motion.

Style No. 3190 can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Spanish red tweed in diagonal weave with beige wool jersey bodice is youthfully smart.

Hunter's green wool jersey is sportive made entirely of the one fabric.

Wool crepe, silk crepe, kasha, canton crepe and tweed-like rayon crepes are suitable for this chic model that may be worn all through the spring.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving the number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred, wrap it carefully) for each number and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Master: "How did you puncture the tire so badly?" Chauffeur: "Ran over a bottle, sir." "Didn't you see it in time?" "No, sir; the man had it in his pocket."

Customer: "The sausages you sent to me were meat at one end and bread-crumbs at the other. Butcher: "Quite so, madam. In these hard times it is very difficult to make both ends 'meat,'"

Canada's Fisheries Report Good Year

Outstanding Increase is in Salmon Pack on Pacific Coast

Although prices were lower, Canada's catch of sea fish and shell fish in the first nine months of the past year was larger by some 30,000,000 pounds than the catch in the corresponding period of 1929. The outstanding increase was in the salmon pack on the Pacific coast, in which it is already clear there will be a new record established for the year. The combined catch of all varieties of sea fish and shell fish in the nine months' period was approximately 818,570,000 pounds, compared with 788,201,700 pounds in the first three-quarters of 1929.

Increase on Pacific Coast

The sea fisheries for the month of September showed an increase on the Atlantic. For the two coasts together there was a drop of 32,900,000 pounds in the catch. On the Atlantic coast decreases were fairly general in nearly all the principal fisheries, although Quebec and Nova Scotia both fared better as regards mackerel than they had done in 1929, and there was an increased catch in Nova Scotia halibut. The major lobster fishing for the month was in New Brunswick, and the catch there was nearly 1,997,000 pounds compared with 1,311,400 pounds in September, 1929. The total catch of lobsters on the coast as a whole since the beginning of the late season of 1929 was 40,105,200 pounds, while in the preceding corresponding period landings totalled only 36,498,900 pounds.

On the Pacific coast, salmon and pilchard landings for September were both well ahead of the totals for the same month of 1929, though in each case the value was less than a year ago. The salmon catch amounted to about 33,643,000 pounds, a gain of over 600,000 pounds. The pilchard catch was 58,240,000 pounds, against 50,326,200 pounds in September last year. The month's halibut fishery was much less productive than the halibut operations in September, 1929. In September of the present year the catch was 2,874,000 pounds, compared with 3,493,800 pounds in September, 1929.

For the British Columbia salmon pack figures are now available up to Oct. 11, at which date it had reached 1,920,509 cases, or more than 590,000 cases above the pack total for the full year 1929, and only 74,689 cases less than the record quantity put up in 1926. There have been large increases this year in the pack of all varieties of salmon in British Columbia except cohoes. The sockeye pack increased by over 187,000 cases. Pink production has more than doubled as has also the production of springs. There have been substantial gains in the case of chums, bluebacks and steelheads, although the pack of the last-named is never large. There is little question but that the pack for the full year will set a new record for the British Columbia canned salmon industry.

That Would Be Extra

The customer was obviously annoyed, so the waitress approached him to see what the trouble was about.

"Is there something wrong?" she asked.

"Wrong!" snapped the customer angrily. "Look, there's a fly in the bottom of my cup. What does it mean?"

"Sorry!" returned the girl. "I'm a waitress, not a fortune-teller."

Judge Nation by Child Death Rate

Infant Mortality in Index of Any Civilization

This is part of an article on Infant Mortality, prepared by The Social Hygiene Council. Part two will follow next week.

One of the best criteria of the civilization o fa nation is the care which it expends on its infants. The only method of estimating this is by observing the infant mortality rate. This is usually computed on the number of infants out of every 1000 born who do not live until the end of the first year.

It is a common superstition that the rearing of children is instinctive with the human race. Nothing could be farther from the truth. The mother must be taught how to care for her child if the child is to have any sort of a chance of surviving the dangerous first year and of reaching a healthy maturity. Poverty may be an excuse in some quarters for not giving a child all that it needs. But poverty is no excuse nowadays for not knowing what the child needs and how to take care of it. Ignorance on the part of the mother is inexcusable as there are health centres throughout the country to which those within reach may go at regular intervals and which will send reliable information to women in outlying districts.

Although ignorance, as I have said, is no excuse, it, with poverty, is still the greatest cause of a high mortality rate among infants. Poverty affects the child both before and after birth in several different ways. The child of really poor parents, particularly if they are of the proud kind and will not accept aid when it is offered them, is often undernourished either because the mother is herself undernourished and unable to nourish the infant sufficiently or because the child, if artificially fed, doesn't get enough of the right kind of food. Then too, living conditions for the child are apt to be crowded and more or less unhealthy. Poverty may force the mother out to work which is bad for herself and the child. A working mother is unable to nurse her baby and the infant is sometimes left at home in the care of some incompetent person, such as a small child or an ignorant older person.

The ally of poverty—ignorance—is usually helped along by meddlesome older persons who are more ignorant than the mother herself and who are sometimes superstitious. I have known of the most preposterous remedies being used by an ignorant mother at the suggestion of some busybody of a woman who, perhaps, learned it from her grandmother—or perhaps invented it herself.

The mother should learn from her physician or from a competent nurse and if neither of these are available because of the mother's isolation in some inaccessible country district then from the literature which can be obtained from a number of sources.

Children of ignorant mothers are rarely properly bathed, rarely get sufficient sunlight, enough fresh air or the right kind of food. They are nearly always treated as if germs were non-existent. Their bottles are sometimes filthy from a scientific standpoint.

A public health nurse once told me of a thing she saw one time. It is hardly believable. The nurse was paying her first visit to a poor family and it happened to be what the mother figured was the baby's feeding time. The mother was putting milk into a bottle which she carefully washed under the tap before putting the milk into it. The procedure was to fill a tumbler with milk and then pour it into the baby's bottle from that. As the nurse watched wide-eyed a fly fell into the glass of milk. The mother calmly picked it out with her dirty fingers and went on filling the infant's bottle. Needles to say that mother had a few lessons in the preparation of feeding for babies within the next few days.

A baby's food must be wholesome and pure. With a mother who is both poor and ignorant such a standard is impossible. A mother who knows what she is doing but who is poor and unable to afford the proper surroundings finds it hard to maintain the standards necessary if her baby is to grow up with an even chance in the world.

A mother between the ages of twenty-five and thirty has the best chance of giving birth to a healthy child—one which will be able to resist the dangers besetting it during the first year. Care of the infant should begin long before the child is born as the physical condition of the mother is of the utmost importance. If the mother is poor and undernourished or suffering from any of the complications of pregnancy the child's chances of life are greatly lessened. If the mother has to work she should arrange it that she has some rest before the birth of the baby. The death of weakly infants, due to overwork and undernourishment on the part of the mothers, forms a great part of the infant mortality rate.

It is quite obvious the part that poverty plays in keeping up our infant mortality rate—and in bringing children poorly equipped to maturity. Bad housing and poor sanitation are detrimental to the health of the child. Families that are forced to live in cramped quarters of one or two rooms cannot but suffer. There is lack of fresh air and sunlight, there is dirt and filth tracked in from the street by many feet, and—a very important consideration—a lack of proper storage space for food. Nearly always there is a complete lack of refrigeration—all these things tend to lessen a child's chances for life and in life. As long as our cities have slums th mortality rate will not be lessened. Great strides have been taken by the health authorities, but there is much work yet to be done. The work of health officers in connection with housing is no bed of roses. You may find it hard to believe but their efforts are often misunderstood and they are always meeting strong opposition from different quarters. No landlord—unless he is very public spirited, will allow a house or building of his to be condemned without a fight. There are many landlords of course who are ready and willing to help in any way possible. They very often need no word from the health officers that their properties are uninhabitable and they make changes or rebuild of their own volition.

If you are a landolrd you can help greatly by taking a pride in your properties and by seeing to it that they are a help instead of a hindrance in the solution of the very real housing problem.

You must not think that the problem is confined wholly to the cities. Towns and villages have it just as well. I know of an Ontario town where a great percentage of the houses are on the market for sale or rent. The same economic conditions that have reduced the town to this have made the poorer residents so poor that they cannot afford to pay even the ridiculously low rental that are asked for excellent brick houses in the best of condition. Many of these people are living in what are real slums and under unsanitary, unwholesome conditions. Without hurting the town any, ninety per cent.—yes, 100 per cent.—of the bad houses could be condemned. But—and here is the problem—in that town everybody knows everybody else. It is extremely hard for the health officers to do anything at all.

Statistics compiled in England show that the infant mortality rate varies directly with the amount of space in which a family has to live.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and thus drive out constipation and indigestion; break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes:—"I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

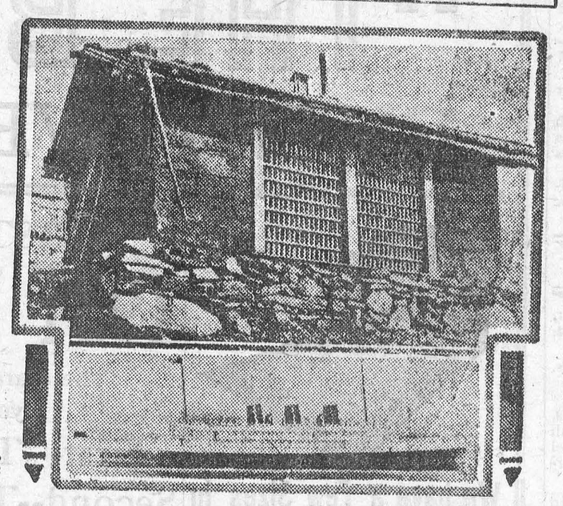
Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Wiliams' Medicine Co., Brockville, Ont.

A Pioneer in Photographic Mapping

Canada was the first country to make practical use of photography in surveying, on an extensive scale. Methods of photographic surveying were developed over forty years ago by the late Dr. Deville, Surveyor General, Department of the Interior, and large areas of the Rogky Mountains have been so surveyed.

Minard's—50 Year Record of Success.

Picturesque Yukon House Has Bottles in Window



This is a house of hospitality whose owner combined his extravagance in entertainment with an innate modesty in home economy by using the bottles left after his guests had departed to make a substantial and unique filling for an empty window frame. Window panes were scarce in the Yukon in those days of the Gold Rush and the chances are that before the bottles were placed in the opening, paper or hide was used to let the sun rays in and to keep out as much as possible of the cold and rain. The Yukon and Alaska are alive with mementoes of a past that is dead. Each summer thousands of tourists from the United States and Canada, and many from overseas as well, take the colorful journey across the continent through the great wheat fields of the prairies and by Jasper Park and Mount Robson in the Canadian Rockies—Mount Robson is the highest peak in the Rockies—to Vancouver and Prince Rupert where steamers equipped with every modern detail take them through the Inside Passage to the glamourous land on the Midnight Sun.

The lower picture shows the Prince Henry, newly constructed ship of the Canadian National Steamships, which will make its first voyage on this popular run from Vancouver on July 3. Launched by Ishbel MacDDonald, popular run from Vancouver on July 3. Launched by Ishbel MacDonald, for the Canadian National Pacific Coast Service. Two others, the Prince Robert and the Prince David will ply between Vancouver, Victoria and Seattle. The Prince Henry will supplement the Alaska service already afforded by the CNS Prince Rupert and Prince George of the same line which have become widely known among travellers on the Pacific Coast.

Britons Make Own Beer

High Excise Tax Encourages Home Industry and Works Greatly to Injury of Brewers

London.—Bootlegging, an industry supposedly confined mainly to the United States, is now baffling British excise authorities. Home brewing of beer is being carried out on a large scale, according to customs officials.

Such practice eliminates paying the duty now enforced by the Government, Brewers' associations are objecting to the new underground liquor traffic. A Government inquiry is to be made and some form of national control suggested.

Penny a Pint

Packets of malt and hops and other ingredients necessary to make three gallons of beer can be secured from the corner grocer, or nearest drug store, for about 35 cents. The bootleg brand can be made for two cents a pint, compared with the usual price of 16 cents a pint now charged.

Official figures show that during the past 16 years the annual consumption of legal beer has decreased by 67,952,286 gallons. Cellar and kitchen breweries are held largely responsible for this diminution.

Beer is excisable if it contains the alcohol equivalent of 2 per cent. proof spirits. Packets now sold with the proper ingredients also contain printed instructions for correct brewing.

Still Increases

An excise official said about the existing condition when questioned: "We know that home brewing is on the increase, and we are taking all possible precautions to discover those making beer without license. There have been many prosecutions this year.

"We are almost powerless, for a house to house search is obviously impossible. We take immediate action, however, on information received, or evidence obtained by police."

Many Uses for Spruce

The wood of all Canadian spruces is tasteless and orourless, making it valuable for food containers. It is also in great demand for musical instruments, principally for organ pipes, piano sounding boards, violin backs, etc.

ST. VITUS DANCE SUFFERER MADE WELL

Nerves Strengthened Through the Use of Dr. Williams Pink Pills.

Time after time cases are brought to the notice of the public where sufferers from nervous troubles have been relieved by Dr. Williams' Pink Pills—where victims of St. Vitus Dance have been made well through the use of these pills after other medicines have failed to be of benefit. The reason for this is that Dr. Williams' Pink Pills act directly upon the blood—they make new, rich red blood and in thus banishing all impurities from the blood strengthen the nerves and make St. Vitus Dance impossible.

Mrs. P. Donnelly, Montreal, Que., is one more grateful mother who wishes to add her testimony to those already published. She says:—"My little girl, aged eleven, was a great sufferer from St. Vitus Dance. Several doctors prescribed for her without benefit. She was in the hospital for two weeks—still no benefit. I then saw an advertisement recommending Dr. Williams' Pink Pills for St. Vitus Dance, so decided to try them. My little girl had only taken a couple of boxes when I noticed some improvement so I continued with the treatment till now she is completely free from the trouble and can enjoy herself as other children do. I can highly recommend Dr. Williams' Pink Pills to anyone suffering from St. Vitus Dance or any other form of nervous trouble, for what these pills have done for my daughter I am sure they will do for others."

Dr. Williams' Pink Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Do You Know—

A slice of lemon stewed with the prunes will greatly improve their flavor?

If you rinse cooked noodles with hot water they will not stick together.

You can make pistachio flavoring by mixing equal parts of vanilla and almond flavoring?

Before washing new lace curtains, calico, or anything containing lime, soak them overnight in water to which salt has been added. This takes out all the lime and, consequently, saves seoap and labor.

An egg is "new -laid" for ten to twelve days; it is "fresh" until it is twenty-one days old; then it becomes a "cooking-egg."

If a cracked egg has to be boiled, wrap it in greased paper, tie with string and put in boiling water.

To give a stove a good polish, mix a teaspoonful of powdered alum with two ounces of blacklead and apply in the usual way.

When cleaning knives mix a pinch of carbonate of soda with the bath-brick. They can then be polished quickly and easily.

Moist table salt will remove egg stains from silver.

A cupful of fine ashes and two teaspoonfuls of bicarbonate of soda mixed with water into a smoth paste make an excellent polish for metals.

Varnish may be brightened by rubbing with a cloth moistened in linseed oil.

A few drops of lemon juice added to the dough when making pastry renders it more digestible.

SELF-DENIAL

The hardest doctrine to practice is the doctrine of self-denial. This is a doctrine that pinches.

Use Minard's in the Stable.

ISSUE No. 17—'30

Owl Laffs

Best Friend (Meow!)—Mary, where did you get that gorgeous diamond ring?"

Young Widow (Purr, Purr!)—"You remember when John dear died he left $1,000 for a memorial store? Well, this is it."

Bait digging time has come, the happiest of the year.

It is sai dthat a good diamond will cut through nearly anything. It certainly can make a hole in a bank account.

Suitor—"Can you tell me anything about your sister's hobbies?"

Small Brother—"All I know is she don't wear any in the summer."

A man and his wife were hotly discussing the merits of a book. Finally, the wife said to her husband: "No, John, you can't appreciate it—you never wrote a book yourself."

"No," retorted John, "and I never laid an egg, but I'm a better judge of an ometet than any hen in the state."

Some salesmen were vaccinated with rusty phonograph needles, judging from their sales talk.

Imagine His Embarrassment

Little Oscar Duckling
Met the world witha frown,
When he first discovered
That his pants were down.

"Public speaking a business asset," says a headline. Go down the street any day and see it demonstrated. And that brings to mind the question, why does everybody else want to talk when you are trying to say something? Why will a girl stock up on hose and then go bare-legged?

Little Junior, six years old, from the city, was visiting his grandmother in the country. He had been going to school and had been copying his A B C's. He went to help her gather the eggs and, finding the china nest egg, cried out: "Look, grandma, what kind of egg is this?"

Grandma—"Put that one back in the nest and leave it for a nest egg."

Junior—"What do they have to have it for, grandma, to copy by?"

Cheer up, folks. Lett he dentists do all of the looking down in the mouth.

Toastmaster (to principal speaker:—"Oh, Mr. Brady."

Speaker—"Yes?"

Toastmaster—"Had we better have your speech now, or shall we let the people enjoy themselves a little while longer?"

The law can be enforced, all right. You never saw anybody kick a bulldog.

A pretty girl likes to be told she's intelligent, and an intelligent girl likes to be told she's pretty.

"Waiter, take this steak back."

"I can not, sir! You have bent it."

Elizabeth had not heard from Bill for a long time. Finally there came to her doorstep a very large box. Elizabeth fainted when she read on the label: "Bill inside."

After a man has lived 65 or 70 years he learns that he doesn't amount to much.

Mother—"Please keep quiet, son, my head is just about to split."

Small Offspring—"If I keep quiet, can I see it split?"

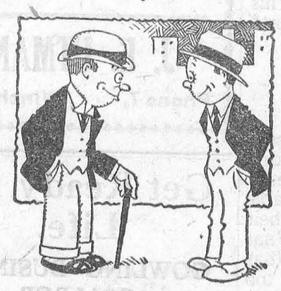
Am an is made or marred by his use of spare five-minute periods.

In just a few more days college graduates wil be astonished to find out that the average boss doens't know or care what "frat" they belong to.

Father (wrathfully)—"Your conduct has made you the talk of the town."

Daughter—"Yes, but how long will it last? Some darn aviator will fly across the Pacific or something, and I'll have to do it all over again."

Minard's Will Kill Corns.



The Suburbonite: "What will be the outcome of the simple life?"

The City Man: "A simple death."

FOR THE

Woman Reader

Choosing a Vocation

Choosing one's mate, one's religion, an done's vocation are three very important matters upon which the success or failure of one's after life may depend. None of these choices are to be made lightly.

In choosing a vocation, one should consider the following points about the industry he is thinking of entering:

Scope—What about the variety of its products or lines of work? What about its geagraphical distribution?

Importance—Are many people engaged in it? Has it much money value? Is much capital invested in it? Will it have a normal or abnormal growth and is that likely to be steady? What is its value to society?

Demand for product—Is it local, national, or international? Temporary, permanent, seasonal? Staple, declining, growing?

Requirements—What innate qualities would be demanded for success? What dispositional? What special gifts? What habits and standards? What preparation, knowledge, skill?

Conditions of Employment — What hours would be required? What as to its healthfulness? What risks or hazards would one meet in it? What rewards might one expect as to wages or salary? What competition would one meet? Would the chance of promotion be good? Could one work at this vocation to old age? Does it give opportunity for education and intellectual and social advancement?

The New House

Newspapers and magazines are giving architecture prizes to a type of house which resembles the abode houses of the Indians or the Spanish homes of stone and cement. They have flat roofs, definite forms, sharp angles, plain surfaces and good proportions. At first one is inclined not to like them, but as they are further studied and more frequently seen, they are more appreciated and are becoming more popular. They typify the vigor and strength of the life of today.

The present demand in house-building is for a greater sense of space, a keener feeling of perspective, more light, simple and harmonious lines and space wel utilized and not overcrowded. Tassels, fringes, carvings, dodads and germ catchers are absent from these forceful modern homes. Simplicity, expensive and luxurious, prevails. The hardness and monotony is relieved by a play of bright colors. Strong reds and blues and purples and orange appear in pillows and hangings.

A new invention is the bathroom where one may take a sunbath by lolling in the window which is glazed with ultra violet glass. It permits the health giving violet ray to flood into the room.

Cement and metal take the place of wood and, incidentally, the modernistic house is easy to clean and is fireproof.

Cooking Vegetables

There are four general ways of cooking vegetables: steaming, pressure cooking, boiling in a small amount of water, and boiling in twice the amount of water needed. Considering the great value of the mineral salts in vegetables, the first methods are the most desirable.

Water dissolves these precious salts out of the vegetables. What a waste is it then to drain that valuable water down the sink! It is better to retainal the mineral constituents in the vegetables themselves, as can be done by steaming or near-steaming them.

Calcium, iodine, iron and phosphorus are indispensable to health. Many a mysterious ill is due to the lack of one or more of these elements. Cook in the very smallest amount of water your turnips, parsnips, onions, kohlrabi, beets, spinach, cauliflower, cabbage, beet greens, string beans, asparagus, celery, potatoes and carrots. If you have to drain water off them, save it for soups and gravies. Best of all, eat as many vegetables raw as are fit for that. Use them in salads.

Minard's Kills Dandruff.

Largest Deposit of Diatomite

The largest deposit of diatomite in the Dominion at present known is in the vicinity of Quesnel in central British Columbia where material of pure grade occurs in beds forty feet thick that extend over a large area.

Bring colds and other sickness. Keep Minard's in the medicine chest. It's a great preventative.

MINARD'S "KING OF PAIN" LINIMENT

OPEN SORES

HEAL IN QUICKEST TIME KNOWN

"Sores on leg, ulcers, for months. Doctors failed to heal. Then 'Sootha-Salva' healed them in few days." Jules Simard. "Sootha-Salva" heals sores, ulcers, boils, burns, scalds, eczema, like magic. All druggists.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

How well you look!

"I am writing you again to express my sincere gratitude for the continued success I have maintained through my daily dose of Kruschen. Only last week a man met me (who saw me a few months ago when I was crippled with rheumatism). His first remark was how well I looked. I replied, 'Yes, I have only Kruschen Salts to thank.' He said he was feeling 'off colour' and would start the Kruschen habit next day. I always recommend Kruschen Salts." JAS. F. WOOLNER.
Original letter on file for inspection.

Kruschen Salts is obtainable at drug and department stores in Canada at 75c. a bottle. A bottle contains enough to last for 4 or 5 months—good health for half-a-cent a day.

I Was Weak, Skinny, "After Baby Came Gained 22 lbs."

"After baby was born I was very weak, skinny. Since taking Ironized Yeast feel fine. Gained 22 lbs."—Mrs. Laura Benoit.

Thousands write new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ugly hollows fill out. Bony limbs get graceful roundness. Muddy skin gets clear and rosy like magic. Nervousness, indigestion, constipation vanish overnight. Sound sleep, new pep from very first day.

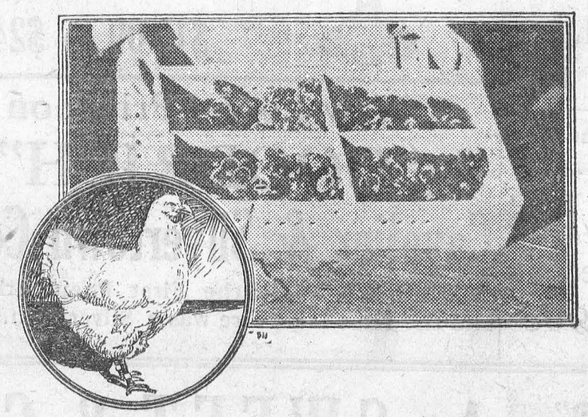
Two great tonics in one—special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in ½ time. No yeasty taste, no gas.

So quite being "skinny", tired, unattractive. Get Ironized Yeast from druggist to-day. Feel great to-morrow. Money back from manufacturer if not delighted with quick results.

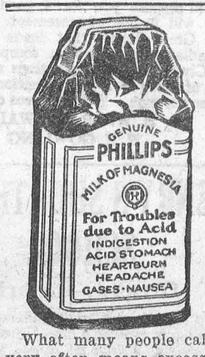
Rheumatism GONE

"After years of rheumatism, now in perfect health," says Mr. A. Duchaarme. Thousands write rheumatic pains, neuritis, vanish like magic with "Fruit-a-tives". Constipation, indigestion end overnight. Nerves quiet. Get "Fruit-a-tives" from druggist today.

One Day Old, But Lively



Every spring millions of baby chicks go out from the British Columbia coast and Vancouver Island to the interior of the province and the Prairie Provinces. Hatched earlier on the milder Pacific slopes than elsewhere in Canada, they are rushed by Express across the country to poultry breeders inland. Taken when they are but one day old, they are placed in cardboard boxes with breathing holes punched in them, and loaded into express cars kept at just the right temperature for their benefit. They can go 72 hours without food or water. Above package has just been landed at Vancouver and is being examined prior to train shipment. According to officials of the Canadian Pacific Express Company which annually handles millions of these fluffy balls, the traffic is growing steadily from year to year.



When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 5 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I had been married about a year and my strength was leaving me on account of my condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a girl chum told me to take the Vegetable Compound. I am so thankful I did because it strengthened my whole system and now I feel perfectly well and have a sweet little baby boy."—Mrs. J. B. Stalker, Bancroft, Ontario.

THE WORLD IS IMPROVING

Who seeks for heaven, alone to save his soul,
May keep the path, but will not reach the goal;
While he who works in love may wander far,
Yet God will bring him where the blessed are.
—Henry VanDyke.

No, this is not a sermon, but a few thoughts inspired by these words of VanDyke. So many people are pessimistic as to the condition of the people, and the outlook for the future, of society, Christianity, and our civilization, that thoughtful men and women are wondering what; if any, foundation exists for this pessimism.

War is caused by selfishness, and without foreseeing theological knowledge, it might well be said that selfishness is the most devastating sin of the age. To-day, more than ever before in the history of the world, mankind is treating mankind as brothers, and it only required the touch of depression to afford the opportunity of displaying the heart of man at its best. Every call issued on behalf of the needy or unfortunate, has been greeted by a hearty and liberal response, and men and women who can are dividing their substance with those in need. The hungry are being fed, the naked clothed, and the needy ministered unto, with a hearty willingness unexcelled in the history of the world. Practical religion is blazing its way into the hearts and activities of the people in a manner so effective that the veriest pessimist cannot but be astounded, if not convinced.

Van Dyke in the pithy campact quoted, deals a crushing blow at the selfishness of man, and particularly chides the so-called Christian, whose chief aim in life appears to be get to Heaven himself, regardless of the trials and tribulations of others. This individual may be on the highway all right, but he is not getting anywhere. The man whose thoughts are all for himself may pray, and even shout Hallelujah! but he is just an ordinary bundle of selfishness, and that being his chief characteristic, he would be very lonesome indeed in Heaven, even if he managed to squeese in.

The world is moving in the direction of "doing as well as saying" and the religion of today, while on the old and solid foundation so revered by our fathers, is being closely scrutinized for practical results "Show me your faith by your work," is the demand, and the response of Christendom is overwhelming.

Although endowed with almost unbounding charity the world is somehow growing weary of the brand of piety that permits its possessor to stand on what he calls the "highway of holiness," hoping to hitch-hike his way to Heaven, through the efforts of others instead of taking up his burden and doing his share in making the path easier for everybody.

The world is growing better and the people are realizing more and more, that if the ideal is to be attained, selfishness must be crucified.—Brockville Recorder & Times.

HOW THE L. C. A. IS WORKING

The every day story of the city and town police court is doing more to condemn the liquor traffic law and to promote the cause of temperance than all the lectures and leaflets that are produced. The records deal with actual facts, and everyday of the week the daily papers are filled with reports such as the following taken from the Brockville Recorder-Times of a few days ago. It is not an unusual case. The habit of procuring a bottle of liquor, getting a young girl into a car, and then the usual sad tragedy of life is the daily story being told in the career of too many young men, who now find it so easy to procure the liquor. Following is one of many such cases recorded in our police courts:—

"In police court this morning Magistrate George A. Wright sentenced Ernest Hawkins, a local taxi-driver, to six months imprisonment following his conviction on a charge of giving liquor to minors. It was the third offence registered against Hawkins under the Liquor Control Act and in passing sentence Magistrate Wright said:

"I would like to make plain my attitude toward offences concerning the conduct and morals of young girls. Recently Chief Constable Brown has been investigating closely instances of this nature, but unfortunately corroborative evidence against the men concerned was not obtainable. One girl of 14 years confessed to being intoxicated on several occasions and of being taken advantage of by young men. It is a serious offence giving liquor to minors and particularly when these minors are young girls. I regret to have to make this statement, but I would like it clearly understood that anyone convicted in this court of such an infraction of the Liquor Control Act need not anticipate leniency." A young married woman who was charged with public intoxication, arising out of the circumstances of the case in which Hawkins was involved, was fined $15 and costs, and a girl, 14 years old, who was also found guilty of immoral conduct and intoxication, was sentenced to an indefinite term in the Alexandria Industrial School, Toronto."

ABOUT SELF-SACRIFICE

A woman, 75 years of age, fell dead when standing in a "breadline" in New York City, waiting to receive her box of bread. Investigation proved that this poor woman had not only $5000 deposited in the bank, but fairly well-off relations. In other words she was simply a miser. She loved money, and suffered for her love of it. Other women will sacrifice even greater comfort for the sake of their husband or their children, and are sometimes admired for their self sacrifice. It is questionable if too much self-sacrifice is good either for the one who makes the sacrifice or the ones for whom such sacrifices are made. This poor woman is an example. There are many others who are living just as absurdly, but they don't realize it. This subject of the real benefits of personal self sacrifices is well worth more careful consideration and study.

NECESSARY QUALIFICATIONS

The Bureau of Municipal Research for Ontario, in a recent issue sets out sertain qualities that should be sought in candidates seeking election to municipal offices. They include such qualities as, Honesty Courage, Interest in Public Affairs, Soundness of Judgement and able to express their views clearly and tersely. All very necessary in their way, but not so necessary in many places as the following: What church does he attend? What societies does he belong to? What political party does he follow? The latter counts for much in too many localities, and have counted more with a majority of the electorate than the qualifications set fourth by the Bureau of Municipal Research.

W. M. S. at VanCamp

The December meeting of the Women's Missionary Society of Van Camp was held in Grace United Church. Eleven members being present. Meeting opened with hymn, "My faith looks up to Thee," followed by prayer by Mrs. Herb Van Allen and Mrs. Townsend. Repeated 23 Psalm in unison. Minutes of last meeting read and approved. Members answered roll with choice word mottos. The birthday box was opened amounting to $14.20, the box was decided to be carried on another year with Mrs. W. Seymour, Supt. An allocation of $150. was realized.

Mrs. W. Seymour read the devotional leaflet, "Give us this day our daily bread."

Election of officers followed:

President—Mrs. T. F. Townsend; 1st Vice President—Mrs. W. H. Taylor; 2nd Vice President—Mrs. W. Seymour; Rec. Sec'y—Mrs. Geo. Walter; Cor. Sec'y Mrs W. Rose; Treasurer—Mrs. Willis VanAllen; Supt. of Mite Boxes—Mrs. Archie Levere; Organist—Mrs. Wes. Rose, Assistant—Mrs. Willis VanAllen; Christian Stewardship—Mrs. Ed. Crowber; Stranger Sec'y—Mrs. Jud. Levere; Supply Sec'y—Mrs. Arthur Williams; Associate Helper—Mrs. W. J. Riddell; Sec'y of Temperance—Mrs. W. Seymour; Miss. Monthly—Mrs. Wes. Rose; Press Sec'y—Miss K. Seymour.

HENRY'S SHORTHAND SCHOOL
Ottawa, Ontario
No school in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa Schools to come to it.
Therefore, it is not surprising that business men, in advertising for stenographers should specially say, "Graduates of Henry's School preferred."
For particulars about our course, write
D. E. HENRY, Director
62 Bank Street.

Mr. Dakins of the N. M. C. School staff, spent the week-end at his home at Van Allen's Corners.

The Annual S. S. Meeting of St. Andrews Church was held in the church on Tuesday night.

Miss Helen Latourell B. A., returned from New York and resumed her work in school after her recent operation.

Mrs. Arthur Allen is visiting at the home of her father this week.

Inkerman Races

The races held on the Nation River at Inkerman on Saturday last were a decided success. There was a good attendance and much interest taken. There were two classes. In the Free-for-all, the horse of Jas. Hyndman won first place, and John Adam's horse came in second. In the Classified race B. Timmin's horse came in first and Jas. Barkley's second, and Howard Wylie's third.

In the Farmer's race Mike Dunbp came first, Clifford McKee came second, and E. Johnston came third. The starters were were Elgin Montgomery, the always reliable, and Mr. Sheriff, who was on to his job. Time-keeper, Mr. John Hurley The Committee in charge were James Barkley, Geo. Timmins and J. B. Timmins.

The United Church

(Contributed)

The pastor on Sunday morning lssued a ringing challenge for whole hearted service to our Lord and Master, when he spoke from 2nd Chron. 31:21, on the description given there of one of the best Kings of Judah, Hezekiah. The secret of the wonderful life of this wonderful man was the dominating purpose expressed in the text. John Wesley said 'Give me a hundred men filled with the power of God, and I will set the world afire," and he did it. We must be prepared to meet difficnlties, but there is great power in this whole-hearted service to overcome temptations and to keep us true to the trust committed to us.

From Luke 4: 16, at the eveuing service Rev. J. A. Waddell spoke on the customs of Jesus, which were regular participation in the Sabbeth worship private devotion and getting under folk's burdens. He said for the sustaining of our spiritual life we cannot afford to do without attendance at church. We miss the essential thing if we fail to meet to worship God. The pastor urged his hearers to catch the contagion of the Master's example in this respect.

W. M. S. Annual Meeting

Sixty-three members attended the Annual Meeting of the Woman's Missionary Society of the United Church in the Sunday School on Thursday last.

Devotional exercises were conducted by Mrs Russell Crowder who gave a very helpful paper entitled "One moment please", followed by a questionaire on Christian Stewardship.

A very impressive Installation Service was conducted by Rev. J. A. Waddell, the officers for 1931 being charged with the responsibilities of their various duties, after which they, with the other members of the society, reconsecrated themselves to the work of the society A hymn of Consecration brought this part of the meeting to a close.

The reports for the year 1930 as given by the retiring officers indicated that the year had been one of conspicuous success both financially and spiritually. The treasurer, Mrs. Preston, reported that the society had raised $676.39 during the year besides the bales which had been forwarded by the Supply Committee.

Mrs. Keyes, the President thanked the members for the co operation in the past and asked for their continued help in the future. She explained the contest for the group system which will be followed this year.

A challenging paper entitled "Preparation for the Master's work" given by Mrs. J. A. Waddell brought this very interesting session to a close.

St. Paul's Ladies' Aid Society

A year of marked success was reviewed at the Annual meeting of St Paul's Ladies' Aid Society, held Thursday afternoon at the home of Mrs. McCourtie. Mrs. Rowat Kennedy popular president, presided. Gratifying reports of the year's work were given by the Treasurer, Secretary and Group leaders of the various departments, that the Society had raised more than the full amount of its allocation. Rev Mr. W. D. Turner voiced his appreciation of the splendid work done on behalf of the Society. The Secretary, Mrs. McCourtie, in her resume of the year's work, spoke of the well-attended meetings and interest maintained throughout the year. The Treasurer, Mrs Geo Angus, announced receipts for the year of $2,014.82 and an expenditure of $1,816 32 All pledges and expenses had been fully met. The following officers were elected for 1931:

Honorary President—Mrs. Wm. Gardner, President—Mrs. M. Moffatt, Vice-Presidents—Mrs. Rowat Kennedy, Mrs Chester Robinson, Mrs Thos. Boyes; Secretary—Miss Grace Irving; Treasurer—Mrs. Geo. Angus; Press Secretary—Miss Mary Empey; Pianist—Mrs. B. Smith; Management Committee—Mrs. A. Smith, Miss M. Empey; Auditors—Miss Mary Algate, Mrs. McCourtie; Flower Committee—Mrs. Stewart. Mrs. Alex Summers, Mrs. Munroe, Mrs A. Suffell, Miss R. Quart, Mrs. A. Smith. Mrs. Albert McIntosh.

In Memoriam

Inserted in loving memory of our dear father, James Middagh, who departed this life on January 17th, 1921, and who awaits our re-union.

Harry and Edward.

The Farmer

The writer thinks, the poet sings.
The craftsmen fashion wondrous things,
The doctor heals, the lawyer pleads,
The miner follows precious leads;
But this or that, what e'er befall,
The farmer he must feed them all.

The farmer's trade is one of worth:
He's partners with the sky and earth,
He's partners with the sun and rain.
And no man loses for his gain;
And men may rise and men may fall,
But the farmer he must feed them all.

God bless the man who sows the wheat,
Who finds us milk and fruit aud meat;
May his purse be heavy, his heart be light,
His cattle and corn and all go right;
God bless the seeds his hands let fall,
For the farmer he must feed us all.

A Helpful New Year's Prayer

Give me a good digestion, Lord,
And also something to digest;
Give me a healthy body, Lord,
With sense to keep it at its best.
Give me a healthy mind, good Lord,
To keep the good and pure in sight;
Which, seeing sin, is not appalled,
But finds a way to set it right!

Give me a mind that is not bored,
That does not whimper, whine, or sigh,
Don't let me worry overmuch,
About the fussy thing called "I."
Give me a sense of humor, Lord;
Give me the grace to see a joke
To get some happiness from life,
And pass it on to other folk.

This prayer may well be seen on the wall in one of the chapels of Chester Cathedral, England, where it has been reverently regarded for many years.

A Prayer

This I would make my prayer:
That no one's weight of care
Shall heavier be,
Because of me;
That one now weak and faint
Shall never make complaint
That I have flung the stone.
Which caused his groan.

Lord, let it ne'er be said
That I have dared to tread
A heartless road,
And plied a goad
Upon a fellow back,
Or white or black,
Compelling helpless him
To run to serve my whim.

I would not come to power
For one brief hour
To rule and fright
To show my might:
If help I cannot give,
Humbly I choose to live,
To wear a crown.

INNER SPRING **MATTRESSES** FOR COMFORT FIRST

The Quality "Comfortaire" Spring Filled Mattress brings to you Rest and Health. The Bigger and Finer 1931 Chevrolet

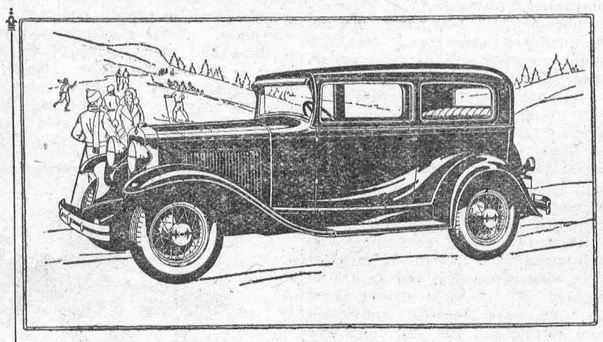
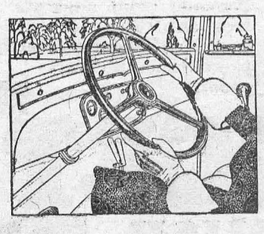
New models of the Chevrolet, now on display throughout Canada, show many improvements and refinements. Above is the beautiful sport sedan, with radiator grille and cowl lamps and six wire wheels. The circle in the center gives an idea of the extensively changed front end design of the entire 1931 line. The arched tie-bar of chrome nickel and the horn mounted beneath the left headlamp are characteristic. Wheelbase of the 1931 Chevrolet is longer and all the interiors are roomier. This is shown in the lower picture, which reveals the space in the driving compartment, and also indicates the clear vision provided. Prices of 1931 Chevrolet are lower even than those for 1930.

Chevrolet offers six-cylinder performance, greater beauty at lower cost than ever before



THE distinction achieved by the handsome new body lines, de luxe wire wheels and added wheelbase of the new Chevrolet Six is evident. And beneath the hood is a six-cylinder, 50-horsepower motor. It is a pleasure to drive the new Chevrolet because six cylinders are so smooth and quiet and restful.

The new car has many other features certain to appeal to every buyer in the low price field. Exceptional power and acceleration. Finger-tip control of the wheel in turning and parking. Rugged frame and axles. Roomier interiors. Unusual economy of gas and oil. And new, low prices . . . the lowest at which any Chevrolet has ever been introduced.



Chevrolet's policy has always been one of service to the public . . . The G M A C plan of deferred payments offers the lowest financing charges in the industry . . . and the General Motors Owner Service policy assures lasting satisfaction.

Monstrous Lie About Vaccine Frightens Many

Vaccination is Sole Means to Prevent Smallpox

This is one of a weekly series of health articles sponsored by the Canadian Social Hygiene Council.

Sometimes one cannot help regretting that people cannot be sent to jail for telling lies. Because there are some lies which do more damage than earthquakes, fires and floods. Here is a malicious wicked falsehood which has killed many people, and hindered the public health authorities of every country in the world in their earnest and sincere attempts to save lives from disease.

It is this: that vaccination against smallpox is a dangerous practice. There has never ben a more dangerous lie. It is not even reasonable.

When a smallpox scare comes and the Medical Officer of Health of your community urges vaccination ,what earthly good can it do him to have a dangerous, unsanitary treatment imposed upon hundreds of thousands of innocent men, women and children? His job is to keep down the deathrate in the community. That's what he's paid for, and if he doesn't do it, he will be discharged, and another doctor will be appointed in his place. Therefore it is in his best interests to select, wisely the best methods of preventing the spread of sickness. Therefore, again, he selects vaccination to prevent smallpox.

For any doctor of good repute in his profession will tell you that smallpox is one of the most loathsome diseases in the world, and that vaccination is the only known and proven preventive.

Read now how this vacine is prepared. Then, if you still doubt its harmlessness, and its great value, you must be very determined indeed to condemn one of the greatest boons mankind has every enjoyed.

Doctors carefully select a healthy calf, of about 200 pounds. You who love animals will be glad to hear that this calf is not called to undergo any suffering or pain whatever. It is kept more scrupulously clean, and is fed better food, and receives more care and attention than if it were used for any other purpose. And when it has to die, its end is painless, in pleasing contrast to the death of its brothers and sisters who are used for food.

First this calf is placed in quarantine for a week, to make sure that it is healthy. It is then scrubbed in a tub, even its feet, and then strapped on a table. Sterile cotton leggings are put on its feet and legs. Then its abdominal wall is carefully shaved and bathed in alcohol.

A clean, sterile instrument is then brought, and the shaven spot on the calf is lightly scraped with it. Lightly, mark you. Blood must not be drawn, for if it is the doctor must start over again. Vaccine is allowed to enter the calf's system through the slight abrasions that are thus made. The process complete, the calf is put in a clean room all by itself and fed with milk. Its temperature is taken twice a day, and night and day attendants are stationed to see that the animal is kept clean and safe.

Let us now consider what has been done, a healthy calf has been vaccinated with the germ of cow-pox. Why? Because the calf, being healthy, will develop in its system what doctors call antibodies, which are the weapons nature gives the animal to fight off the cow-pox. What is the purpose of this? The doctors want those antibodies, so that they can give them to human beings who, in turn, will then be able to fight off the smallpox. Why will cow-pox antibodies fight off the smallpox? That is the secret of vaccination, the great scientific fact with which mankind has been enabled to conquer this horrible disease.

Now to return to the calf. Five or six days after it has been vaccinated, there begin to appear what are called "vaccine vescicles." Then the doctors chloroform the calf, The whole area is washed off with sterile warm water, a process that sometimes takes two hours or more, and the vaccine firus is removed. But the doctors are not through yet. hey examine the calf's internal organs to make sure that it is absolutely fre from disease. For if there is the slightest suspicion of disease, the virus has to be thrown away and the whole process has been wasted.

What the doctors have got from the calf is called "Green-virus." It still must go through processes to remove every bit of extraneous bacteria. Through a very fine bronze wire gauze, the green virus is ground, with a mixture of glycerine and carbolic acid. These rapidly kill all bacteria present and a kind of creamy substance is left. This is the vaccine but still it is not ready for use on humans. It is put on ice, and tried out on animals, rabbits usually being used.

If these rigid tests have been passed, the vaccine is put into individual tubes, each containing enough for one person.

There is the whole process. Now, what chance can it possibly offer, for mistakes to occur? And as for the actual administration of the vaccine, surely our doctors, who usher us into the world, keep us as healthy as we will let them during our journey through it, and finally ease our departure from it ,surely we can trust them to administer it!

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

It's typically sports! A charming wearable type that adapts itself to all the season's new fabrics.

Several dresses may be made from this Style No. 2841 and each one appear entirely different.

It is sketched in wool jersey in chartreuse green, with dash of soft brown in grosgrain ribbon piping, bow tie and suede belt. Applied neckband gives smart finish to becoming collarless Vionnet neckline.

It comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Orangey-red or violet blue silk crepe is effective to complete ensemble.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Our Shrinking Heritage

Canada is shrinking fast. We have been taught to onsider it a country of "magnificent distances," a resounding phrase which does not always imply unalloyed advantage. The distances are still there, but they are no longer magnificent.

For what is distance to your aviator? While we ,earth-bound ones take a "fast" train or "step on the gas" and think ourselves really hustling along if we make sixty miles an hour, he nonchalantly does his hundred and fifty and comes down grumbling about being held back by winds.

Lately two young gentlemen flew their plane from St. Hubert to Saint John, New Brunswick, and back. The machine left the local airport about the time most Montreal commuters were getting the 8.43 for town and was back again not long after said commuters had finished a late lunch. The return pilot, Captain Cripps, seems to have been bothered a bit by head winds, otherwise the machine might have made a really fast trip!

Let these young men keep this sort of thing up a little longer, and it will not be possible for any of us to stay on the ground. The aged, even the middle,aged- may be scared nearly to death, but it will be worth it. Ten years from now the "provinces down by the sea" and the "middle' and "far" west won't mean a thing to any of us. They will be right next door. —Montreal Star.

They that can give up essential liberty to obtain a little temporary safety deserve neither liberty nor safety. —Benjamin Franklin.

PRUDENCE

You may find two witty men, ten clever men, and twenty foolish men, before you will find one prudent—or thrifty—man.—Old Humphrey.

An advertiser wants a typist for billing. Plenty can do the cooing.

Exercise Well Not Violently

Steady Exercise Adds to Life —Violent Exercise Cuts it Short

This is one of a series of weekly health articles sponsored by the Canadian Social Hygiene Council.

Nowadays one hears a great deal about exercise. It is fashionable to keep in trim, and a very good fashion it is too. Unfortauntely however, it is just as easy for a certain type of person to do himself harm by improper exercise as by not taking any at all. Too little is conducive to a weakly constitution; too much is apt to result in very serious consequences indeed. For moderation in everything, is an excellent motto and applies with especial force and significance to this particular problem.

Man is a creature of impulse and all to frequently we see a flabby, more or less middle-aged individual who for years has given himself over to luxurious and easy living, suddenly take it into his head to reform. He feels the need for more exercise, and so he suddenly puts on a whirlwind campaign of golf, or tennis or squash that would tax the energy of a man in perfect condition. Consequently when it is all over he has not only done himself more harm than good by straining the muscles and possibly organs, almost certainly over-taxing his heart and doing no good to his arteries, but he also has quite taken the edge from his desire to be a "he-man" and consequently settles down to another period of inactivity until once more a spasmodic urge moves him to action.

This sort of thing is decidedly harmful and even dangerous. Exercise should be steady, moderate, calculated to satisfy the particular needs of the individual taking it. It should continue from day to day and be kept up all the time. A good rule is have a physician examine you before you go in for any form of recreation. The Universities make this a rule. If a is a good rule for healthy vigorous young men to follow, it is certainly a better one for their fathers and uncles. Follow it, whatever your age might be then if you observe the excellent practice of being examined regularly by your physician ,you can consult him from time to time as to the suitability of the form of physical activity that you are practicing. The importance of some form of exercise for everyone's muscle development can not be over-estimated. The muscles of the body are made up of many strands and these are composed of very fine fibres. The fibres are again divided into separate parts or segments, each one of which has its own blood and nerve supply. As we all know the muscles are so constructed that they must be used often because the more work they do the stronger they become. Everyone knows how weak a convalescent patient is upon arising from a sick bed after many weeks. Similarly if a man were to tie up his arm for a considerable length of time he would find when he did come to use it that inactivity had robbed that member of all its strength. Usually the best exercise one can get is something that ne likes to do. Fortunate indeed is the man or woman who can play golf or tennis or swim, or play almost any game and get real pleasure out of it. Yet for those who can not there are many very simple and enjoyable exercises quite as good. One of these is walking.

A great doctor once wrote that the best way to acquire a good complexion is to take a pot of paint two miles from home and walk every day to see if anybody has moved it. But remember walking and strolling are different things, and strolling is what most people do when they think they are walking. For one thing a good walker carries himself erectly, strides out, spurning the ground. Try the plan of setting yourself a certain distance to walk every day. If your time will allow make it a good long walk. You will find this is one of the most excellent forms of exercise that you can take and is in itself sufficient to keep the average person in ordinarily good trim.

Select a destination two miles from your home. Start out with your shoulders back, head up, chin tilted, arms swinging. In other words march along as though you were in the army. Wear comfortable, loose clothing and allow yourself half an hour to do the two miles. That is a program which if carried out consistently day by day whenever the weather permits will do a great deal towards improving the health of any one. Of course children are in a different class from adults as regards exercise ,just as they are in most other matters, and the average small boy would get no great fun out of walking as a regular sport. But as a rule children look after their own exercise pretty well, and the parents has little cause for worry on this score, providing the child is kept out of danger and is regularly examined as every child should be by the family physician.

Children who are kept at home in houses that are apt to be over-heated and poorly ventilated are at a great disadvantage compared to the healthy happy youngsters whose mothers encourage them to be out-doors every minute of the time that is posible, so that they can build up the health which is going to mean so much to them when they grow older. For much of a child's life, should be made up of tag, baseball, marbles, kite flying, paper chases lacrosse, bicycle riding, rowing, paddling, swimming, skating, hockey snowball fights, skting and sliding, each in its own season.

Of course children do not do any of these things because they think it is good for them. They play games because they like them and if an adult will take a leaf out of childhood's book in this regard he will profit. Unquestionably exercise should be enjoyable. It should be a recreation not a drudgery.

And of course one of the most important things about your physical program is this; try and keep in the outdoors. Gardening is exellent. The habit of taking photographs is an excellent one. If you have a car, leave it at home once in a while.

But if you cannot ge out very easily and above all regularly then here are three little exercises that you will find very beneficial if you carry them out day after day. Suppose you try them just for a few weeks every morning when you get up, every evening when you go to bed, and watch the resultant improvement.

(1) Stand erect, feet together, hands at sides. Count one, raising arms sideward and upward inhaling through the nostrils. Count two lowering the arms sideward to position exhaling strongly through the mouth. Repeat this exercise four times.

(2) Stand erect hands on hips, feet spread. Count one, twisting and bending to one side, touching the hands to the floor at the side of foot. Count two, coming back to position again. Do this eight times, right and left side alternately.

(3) Lie on the floor face down, with palms of hands flat opposite shoulder pits. Count one pushing body up until arms are straight. Hold the body straight, so that when you are up the body will be resting on the toes and the palms of the hands. Count two, returning to the floor. Do this eight times.

With these exercises you will not be getting any more exertion than you would if you were playing badminton. It just seems harder work. However, if badminton and that sort of thing is out of reach, these exercises will do just as much good, particularly if you do them in the fresh air. And if you go at them as if they are a game, and go at them regularly, your health will surely benefit.

TEMPER

A stubborn mind conduces as little to wisdom, or even to knowledge, as a stubborn temper to happiness. —Southey.

Hero worship is strongest where there is least regard for human freedom.—Herbert Spencer.

A KIND FATHER

God is a kind Father. He sets us all in places where he wishes us to be employed, and that employment is truly "our Father's business.' He chooses work for every creature which will be delightful to them, if they do it simply and humbly. He gives us always strength enough and sense enough for what He wants us to do; if we either tire ourselves or puzzle ourselves, it is our own fault. And we may always be sure, whatever we are doing, that we cannot be pleasing Him if we are not happy ourselves.—John Ruskin.

A great man is made up of qualities that meet or make great occasions.—J. R. Lowell.

British Mountain Climbers To Attempt "Home of Gods"

Expedition Planned Early This Year to Scale Second Highest Peak in Empire

London.—A group of British mountain climbers is planning a new attempt to reach the home of the Buddhist gods.

Plans are almost complete for an expedition early in 1931 to Mount Kamet, in the Himalayas, second highest peak in the British Empire, and yet unscaled. If the climbers succeed they will have reached a higher summit than any other party.

Led by Frank Smythe, a member of the expedition which was defeated on Kinchenjunga slopes last year, the party will leave London for India late in February.

Mount Kamet, 25,431 feet high, is one of the loftiest of the western Himalayan range. Other attempts to scale it have been made, but the most successful did not reach within 2,000 feet of the top.

Smythe will be accompanied by Squadron Leader E. B. Beauman, R. L. Holdsworth and Dr. Raymond Green, of Oxford.

"We shall start from Almore at the east base of the mountain." Smythe said, "We shall, of course, have to encounter the opposition of superstition.

"Buddhists believe that the mountain tops are the homes of the gods and that a strange race of extraordinary ape-like men—the snowmen—inhabit the mountains. I hope to be able to break down these beliefs."

Flowerpot Island To Be Reinforced

Ottawa Acts to Protect Land From Erosion in Georgian Bay

Ottawa.—Flowerpot Island in Georgian Bay has been turned over to the National Parks' Branch of the Department of Interior. It is situated at the north end of Bruce Peninsula and is known as Flowerpot because of two rock formations that resemble huge flower pots. They have been formed by erosion of the waves and have trees growing on the top. The parks branch will reinforce the "Flowerpots" as their bases are in danger of being entirely eaten away by the action of the waves.

The island contains 475 acres and will be left in its present wild state, except that shelters and other accommodations for campers will be provided. The lighthouse and lighthouse keeper's home will not be disturbed; the portion of the island they occupy will remain the property of the Department of Marine.

The National Park will now have 28 or 29 islands in Georgian Bay for the use of the public. Flowerpot Island was surrendered by the Chippewa Indians in 1956 and has been held in trust recently by the Department of Indian Affairs, to which the parks branch will pay $165 for it.

Farmer Finds Diamond Worth a Fortune

Rio De Janeiro, Brazil—A magnificent blue-white diamond, weighing 51 carats, has been found accidentally by a poor field worker near the village of Balisa, State of Goyas, who sold it for less than $10,000 to some wealthy farmers of the Araguaya River diamond district. The unique stone was later resold to a Rio diamond merchant, its price not being disclosed. It had to be cut in two sizes, the largest weighing 20 carats and the smaller 10.

This is not the first large diamond found in Brazil. Since the first diamonds were discovered in 1725, Brazilian mines have yielded numerous matchless stones. The crown stone of Portugal, known as the Braganza, was discovered in Brazil, on the slopes of the Itambe Mountains, State of Minas Geraes. It has the fabulous weight of 1680 carats. The famous "Star of the South" which weighs 125½ carats and which belongs to the Gaekwar of Baradio, was discovered in the Bagagem diamond district, and weighed 255½ carats before cutting. It is one of the most marvelous gems of its kind, being valued at over $100,000

Among the most important recent discoveries, the matchless pink diamond "Southern Cross" stands out. The purchasers of this stone say it is the largest pink diamond in the world. It was found July, 1929, in the Abaete River diamond district, Minas Geraes, and weighs 118 carats. The stone is still uncut.

Echoes of Fashion

The latest feminine touch to one's wardrobe is the trimmed hat. Hats for dressy wear are bedecked with ostrich, either in a group of tiny tips, or with the long plume. The more tailored hat shows a contrasting trim of either cocques or quills.

Stiff velvets are a fashion feature in the ultra-evening gowns for the "coming-out" ensemble. A fitted line reaches well below the hip, which breaks into a decided fullness accentuated by the stiffness of the fabric. A matching wrap of clinging velvet has collar and cuffs trimmed with the starched velvet.

Alpaca mohair is an important material for mid-season resort wear, and will continue its popularity into the spring. It comes in various patterns, but of selfcolor. For the three-piece costumes it is considered very chic. Shoes and bags are also being made of this material.

Much handwork is seen on the new sports togs. Hand-crochet mesh lace is shown in conjunction with linen and silk. Deep yokes are featured, as well as tricky belts and cuffs.

Australia to Limit Alien Immigration

Canberra, Australia.—The Government has decided to restrict alien immigration until the country's position improves sufficiently to warrant the lifting of the ban.

The Commonwealth wishes to cooperate with all countries concerned and has notified the shipping companies that it is undesirable to give facilities to immigrants for travel to Australia.

Apart from British immigrants, only those already possessing permits issued on behalf of the Government will be permitted to enter the country. Tourists and business men will not be affected.

The man around the corner says it must be some other corner that prosperity is around

Toronto to Have Huge Telescope

Astronomical Observatory Will Be Erected By Mrs. D. A. Dunlap

Toronto.—An astronomical observatory which will be one of the finest in the world will be erected in Toronto in the near future, according to a recent announcement by Prof. C. A. Chant, head of the Department of Astronomy, University of Toronto. The observatory will be erected by Mrs. D. A. Dunlap, and her son, D. Moffat Dunlap, as a memorial to the late David A. Dunlap, who died six years ago and will be known as the "David Dunlap Observatory."

The outstanding feature of the observatory will be a large reflecting telescope 74 inches in diameter. There is only one of greater aperture in the world, that on Mount Wilson in California. The instrument is already under construction in England, and will be housed in a circular metal building. The building will be erected near the city on a large acreage to be converted into a park, and the park itself will be known as David Dunlap Park. The observatory will be under the department of astronomy, of the university, while the faculty of forestry will be in charge of development of the park.

Astronomy and geology were both favorite studies of the late David Dunlap, but the former had a peculiar attraction for him. He was a keen student of the heavens. The new project, Prof. Chant stated, has been under consideration for the last five years, and will now be brought to completion. In working out the plans, Mrs. Dunlap has had the assistance of Professor Chant, one of Canada's best known astronomers.

Telegraph Wires Sing Weather Note

Like the proverbial squeal of the pig in the packing houses,, science finally has found a use even for the singing sound of telegraph wires in the wind. At a recent meeting of the Academy of Sciences, in Paris, M. Albert Nodon, already known for researches in weather science and in radio, described a way of using this singing of the wires to forecast the weather. If two reasonably long wires are strung on pole lines at right angles to each other, one wire running north and south, for example, while the other wire runs east and west, it is noticed, M. Nodon reports, that the singing of one of these wires represents at any one instant, a different intensity or a different musical note from the singing of the other wire. Using special electric recorders to keep track of these variations, M. Nodon found that they correspond almost exactly with the arrival of oceanic or other storms. Sound waves or air currents from the storms themselves cannot explain the phenomena, M. Nodon states, for the wires begin to sing while the storm still is scores or hundreds of miles away. The true mechanism, he believes, is that electric charges in the atmosphere in advance of a storm set the wires into vibration as a result of electro-static charges on the clouds or ets on the plains and prairies long the ground. Amateur weather prophhave claimed that telegraph wires sing before a storm, only to be ridiculed by weather experts. Now M. Nodon brings them the beginnings of vindication.

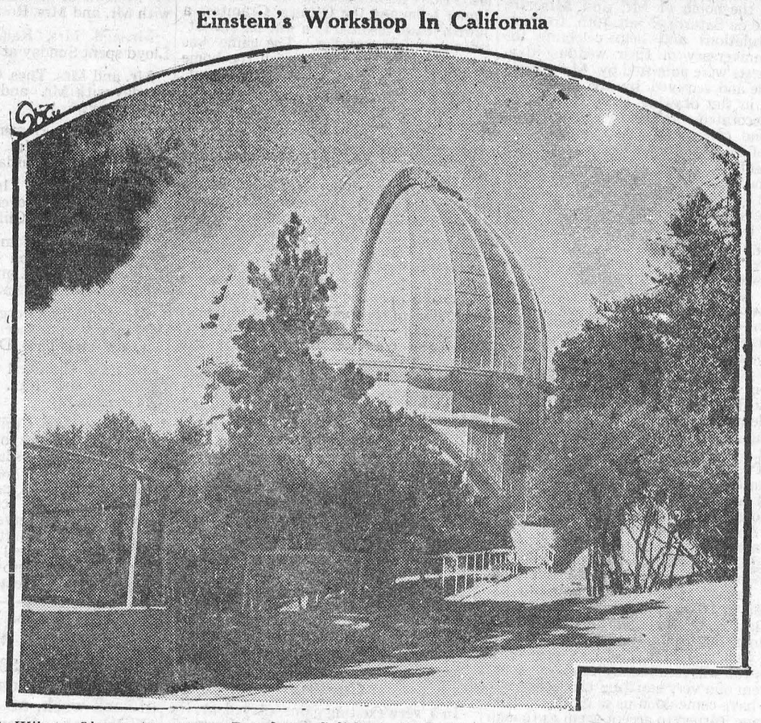
Ottawa Seismograph Registers Earthquake

Ottawa.—An earthquake of four hours' duration was registered on the seismograph at the Dominion Experimental Farm Observatory here the morning of January 2nd. The quake, whose epicentre was estimated to be 2,530 miles distant from the Capital, was described by the seismologist as severe. Owing to the light character of the preliminary tremors, it was impossible to determine the direction from here of the quake's origin.

Swans

Seven swans, like galleons,
Came sailing by today,
Seven yellow beaks over seven white throats,
Down among the mud-banks and bones of old boats,
Thinking all the time of their quiet castle moats
Where the cool-leafed, broad-leafed water lily floats.
Seven swans, like galleons,
Came sailing by today,
Cream curving necks like the prows of stately ships,
In among the dead wharves and gangrene-rotten ships.
Thinking all the time of where the placid willow sips,
And the rainbow-flashing, lightning-dashing kingfisher dips.
—John Desmond Sheridan, in Everyman.

Einstein's Workshop In California



Mount Wilson Observatory, near Pasadena, Calif., inside which is 100-inch telescope, where Prof. Albert Einstein will carry on his research work while on his visit to California.

Gold Crisis Parley Opens in Paris

Paris—The problem of gold reserves, which is troubling both France and England, the former because they are too large, the latter because they are too small, is being discussed by treasury representatives of the French and British Governments, who are meeting in Paris for a series of preliminary discussions, leading to a later conference in London. While France has been accumulating the world's second largest gold reserve, there has been a simultaneous drain on British gold stocks, and the present conversations are being undertaken with a view to the best means whereby the two countries can cooperate to solve their respective problems.

It is now generally recognized that the Bank of France has been for some time seeking means to prevent a further influx of gold, it is said, which has not come about through any desire to accumulate vast stocks, but from natural economic causes. The manager of the Paris branch of the Westminster Foreign Bank, in a statement to the continental edition of the Daily Mail, declares that the only real remedy appears to be the increase of French foreign investments, which he considers imminent.

There is no doubt that, should Franco-British conversations result in a better distribution of gold, an important step would have been taken toward amelioration of economic conditions in Europe generally.

Solitude

By BETTY GOURRE (Toronto) ..

O- blessed Solitude!
Midst jostling crowds,
That press upon each side,
The hostile eyes,
That stare,
These strangers
Everywhere.
How I long to be alone,
Leave the busy towns behind,
And, in solitude
True friendship find.

O! blessed quiet!
Away from noisy cars,
That throng the roads,
The chattering, the talk,
Of the people, as they walk,
How I long to be alone,
Leave the noisy towns behind,
And, in perfect quietness,
True peace find.

Communication in the Far North

The Canadian Air Mail Service established a record for communication with Canada's Northland, when the through initial mail flight from McMurray, Alberta, to Aklavik, N.W.T., was completed in eleven hours running time—a distance of 1,676 miles. The revolutionary speed of this accomplishment, as compared with former methods of land and water communication, may be gauged when it is pointed out that the scheduled time of the winter service was formerly about 73 days between the points mentioned and the summer service 15 days.

Aviators Have Battle With Coyotte in 'Plane

Belle Fourche, S.D.—Details of a battle between two aviators and a wounded coyote in an airplane above a Dakota prairie were told recently by Clyde Ice, aviator.

With a gunner as his companion, Ice was cruising over the prairie when the coyote was sighted and shot from the plane. The aviators landed, tossed the animal into the cockpit and took off.

As the plane attained altitude, the coyote suddenly revived and attacked the gunner. He fought with his bare hands and was severely bitten. Ice left his controls a moment and joined in the battle.

The plane began to fall and spin while in the cockpit both men fought the beast.

Finally Ice struck the coyote on the head with a wrench and returned to the controls in time to prevent a crash. He also suffered severe lacerations.

The aviators took no more chances. The coyote was thrown overboard and they landed to have their wounds dressed.

Gt. Britain Leads In Shipbuilding

Tonnage in 1930 Falls Below 1929 Total, However

The shipbuilding returns of Lloyd's Register for the quarter ending Sept. 30, 1930, which have just been published, show that the tonnage of merchant shipping under construction in Great Britain and Ireland, namely, 1,116,746, is not only 275,317 tons less than that in hand at the end of the previous quarter, but is 331,609 tons less than that under construction on Sept. 30, 1929.

It is, however, some slight consolation to find that the tonnage under construction in foreign countries on Sept. 30 last—namely, 1,452,290—has also declined by some 213,000 tons, as compared with the total at the end of the previous quarter. The total for all foreign shipbuilding countries, with the exception of those for France and Italy, show more or less substantial declines.

Great Britain and Ireland occupied first place. Italy moved up to second place with 315,940 horsepower; the United States was third with 242,514 horsepower; Germany fourth, with 241,895 horsepower and France fifth with 151,200 horsepower. Denmark and Sweden each contributed upward of 100,000 horsepower. In conclusion, it should be pointed out that the tonnage figures quoted above are gross tons, and that no account has been taken in the returns of vessels of less than 100 tons gross.

Slick Irons

A bit of an old candle, used on a folded newspaper to run your iron over, is one of the most efficacious methods of making your electric iron smooth and slick.

Canadian Paintings Go To Argentina

Seventy-five Pictures Taken Mainly From National Gallery Collection

Ottawa.—Canadian art will be exhibited at the British Empire Trade exposition which is to be held at Buenos Aires during the months of March and April next year. Through E. L. McColl, Canadian Trade Commissioner in the Argentine capital space has been set aside in the Canadian section and a group of 75 Canadian paintings will be displayed. Those pictures have been taken mainly from the National Gallery collection.

1931 Exhibition.

The 1931 exhibition of the National Art Gallery wil lbe opened formally by His Excellency the Governor-General on January 15, it was announced here recently. Unless Lord Willingdon remains in Canada for the opening of the next session of parliament, this function will probably be his last public one in this country.

There will be the customary exhibition of Canadian art, the collection being more nationally representative this year than previously. Every province of the Dominion will have representation, it was declared

Ontario House Will Open February 12

Toronto.—The Ontario Legislature will open on Thursday, Feb. 12, Premier George S. Henry announced recently. It is expected the hous will sit for six weeks and be adjourned before Easter.

The date set for the opening is that immediately following the polling day for the by-elections in Hamilton West and Grenville, the former made vacant by the death of Hon. Fred T. Smye, minister without portfolio, and the latter by the resignation of Hon. G. Howard Ferguson, on his appointment to the Canadian High Commissionership in London.

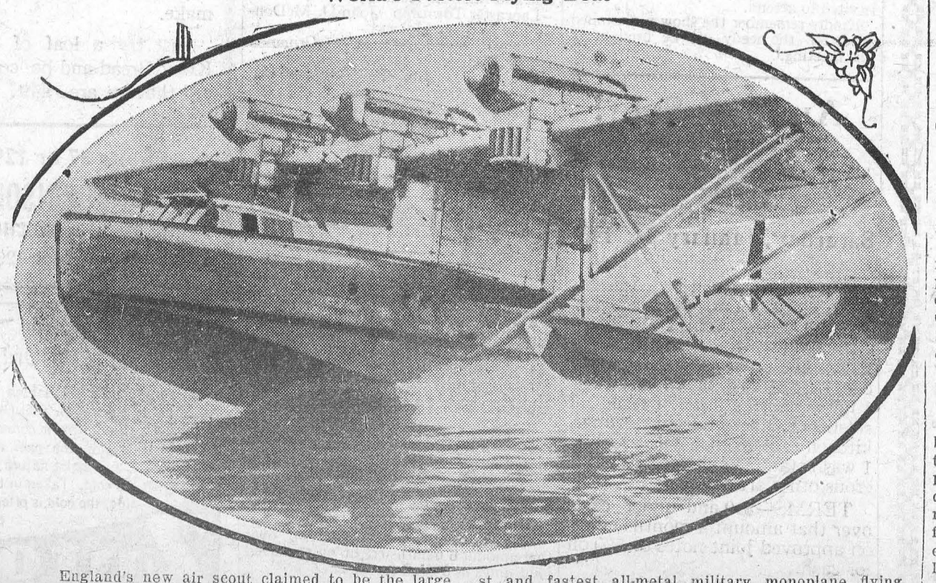
Empire Reforestation

Canada is yearly playing a bigger part in Empire reforestation. Fifty-three per cent. of the tree seed exported from the Dominion has gone to Great Britain, 40 per cent. to New Zealand, and the remainder to Australia, Ireland and other parts of the Empire. During the past 10 years the British Forestry Commission has planted 140,000 acres of softwoods, the greater part of the seed having been sent from Canada.

Canada's 1930 Field Crops

Ottawa.—The total value of Canada's principal field crops in 1930 is estimated at $629,146,000, compared with $948,981,400 in 1929, and $1,125,003,000 in 1928, according to an estimate in the crop report of the Dominion Bureau of Statistics. Value of the wheat crop last year is placed at $173,589,000, compared with $319,715,000 in 1929.

World's Fastest Flying Boat



England's new air scout claimed to be the large st and fastest all-metal military monoplane flying boat. The Sydney weighs about 10 tons.

Canadian Imports Touch Billion Mark

Domestic Exports Estimated to Total $900,000,000 for Year

BASIS OF 11 MONTHS

Ottawa, Jan. 1st.—When returns are all in for 1930 it is estimated that the total imports of Canada will be found to have reached a value of just over one billion dollars. The value of domestic goods exported from the Dominion will probably amount to about nine hundred million dollars.

Figures covering the trade of Canada for 11 months of the calendar year are now available. They show that, up to the end of November the Dominion imported goods valued at $948,141,545. During the same 11-month period exports from Canada reached a value of $819,086,698. These totals constitute a considerable falling off from the corresponding 11 months of 1929 when imports amount to $1,214,627,537, and exports to $1,093,391,958.

In order to arrive at an estimate of Canada's trade for the calendar year it is useful to turn back to the figures of imports and exports for December, 1929, and make them the basis of the estimate for the month just ended. In December of last year the Dominion's imports of foreign goods were valued at $84,365,155. Domestic exports were valued at $88,520,355. Taking into consideration the general falling off in trade, it is estimated that both imports and exports during the present month will approximate sixty-four millions. This figure added to the known totals for the 11 months gives total imports of approximately $1,012,000,000 and total exports of approximately $883,000,000.

Total Tax Revenues

The total customs, excise and income tax revenues for the 11 months of the past calendar year, that is up to November 30 last, was $302,036,000. During the corresponding period of 1929 it was $375,090,695. Again December figures are not available, and the total for that month must necessarily be estimated. During December 1929, customs and excise net revenue amounted to $23,831,187, while income tax revenue totalled $611,293. This was a total national revenue, from these sources, of $24,442,480. With the decrease in trade it is expected there will be a falling-off in customs revenue during the past month, despite the higher tariff schedules. However, should customs, excise and income tax last month approximate the corresponding month a year ago and yield 24 million, the total revenue from these sources for the calendar year would be in the neighborhood of $326,000,000.

For the calendar year, 1929, customs and excise net revenue amounted to $330,247,881, while income tax yielded to the extent of $69,285,295. This was a total of $399,533,176.

King George Answers Lord Mayor's Message

Sandringham, England.—The King, in answering New Year's greetings of the Lord Mayor, addressed the following message to citizens of London:

"Pray assure Londoners that I reciprocate their warm greetings. I am touched by their kindly allusions in their message to my complete restoration to health, for which I am thankful to God.

"While I am hopeful for satisfactory results from the recent important conferences, the most sanguine minds cannot fail to realize the difficulties and anxieties which confront us at home and overseas.

"All the more, we must stand united with the people resolutely determined to find and follow the sure road which leads the Empire to lasting peace and prosperity."

Cheek

A very young man-about-town entered the hairdressing establishment for a quick shave.

Much to his annoyance, however, the shop was full of people waiting to be attended to.

"I say, my man," he said, "how long before I can get a shave?"

The barber, who was working at full speed, looked him up and down.

"Well, sir," he said curtly, "you might be able to start in about a couple of years."

Unmarried Workers' Wages Cut in Chile

Santiago, Chile.—A decree by Don Rodolfo Jaramillo, Finance Minister, on Dec. 30, fixed the 1931 budget at 1,054,636,714 pesos, approximately $127,000,000, for expenses, and estimated 1,039,617,387 as receipts. The apparent deficit is more than overcome by the order for a 15 per cent. reduction in salaries for all unmarried public employees.

Canada Leads World With Hydro Electrics

Ottawa.—With $1,000,000,000 invested in electric stations Canada emerged from 1930 one of the world's leaders in water power development.

The Department of the Interior estimates a maximum of 43,000,000 horsepower could be generated from Canadian rivers and turbines totaling 6,000,000 horsepower have already been installed, most of them in the past decade.

Four Travel Cheaply

Air-minded parties of four will soon be able to make trips from Manchester, England, in a specially fitted airplane at a lower rate than from any other airport in Great Britain. The rate will be 8d. a mile for parties of four, and the new plane which Northern Air Lines are putting on will have luxurious seating arrangements and a special heating and ventilating system.

Sunday School Lesson

January 18. Lesson III—The Ministry of John the Baptist—Luke 3: 7-17. Golden Text—Bring forth therefore fruits worthy of repentance.—Luke 3: 8.

V. 15. We are told that many people wondered whether John the Baptist might not be Christ. The word "Christ" is of Greek origin and means anointed. It thus corresponds exactly with the Hebrew term "Messiah." In the Old Testament "Messiah" hardly occurs as a title, but many people are thought of as "anointed" in a special way. Thus kings or high priests, or even foreigners, such as Cyrus (Isa. 45: 1), might be spoken of as "mine anointed."

In the time of Jesus the term had come to have a technical meaning. For long centuries now the Jews had been subjected to one great heathen empire after another; at this time they were a part of the Roman Empire; they were allowed certain special privileges in it and almost complete religious freedom; but they had nothing like the liberty and independence of "Dominion status." They were held down by military force, and felt that in spite of religious liberty their national life was thwarted and spoilt by the heathen oppression. They were perhaps the proudest and bravest race in the Empire, and they dreamed of freedom. God, as many of them thought, must raise up for them a Deliverer, a great king in their midst, as David had been who should restore and increase the ancient glories of their nation. This Deliverer, for whose reign they hoped, they called "Messiah."

This hope and widespread expectation was much more than political. The world, as they saw it, was given over to evil; the best of them were much concerned for the triumph of righteousness and the spread of true religion than they were for their own national aggrandizement. Surely, they felt, the world had suffered the rule of Satan and of the heathen long enough; surely God must soon overthrow sin and evil, and establish his glorious kingdom of righteousness and peace and true religion! The expectation of Messiah was widespread, but not, it seems, universal; many thought that the Messiah would be an earthly king and deliverer like David; others thought of a mysterious, angelic Being who should appear on the clouds of heaven. It was not unnatural that in the excitement of John's "Revival" some should wonder whether he might not be the expected Messiah.

V. 16. But this was not John's function. He was like the outrider who precedes the royal carriage, or like the servant who cuts a way through the thick brush, that his master may follow. He was the herald, the forerunner of the Messiah, not the Messiah himself. John had baptized with water, immersing his disciples in the Jordan, but there would follow him "the stronger One"—apparently he meant Messiah—who should baptize men "with the holy Spirit, and with fire."

This phrase combines two very different ideas. What is meant by "fire" the following verses show. John proclaimed the near advent of the fiery Judgment. In the Day of Judgment the worthless chaff would be given to the flames and burnt. Hence, the future baptism would be a baptism of "fire." It would not, however, be quite true to say that John the Baptist preached "hell fire," for his meaning is that the wicked, the chaff, will be destroyed, not that they will be eternally punished. We ought not to expect to find in his teaching a realization of God as the Father of infinite mercy as the divine Shepherd who seeks for the lost sheep "until he find." It is not very clear how John could have spoken of a baptism of fire and of the holy Spirit at the same time, and it is possible, though not certain, that the words, "and with the holy Spirit," were added by the Christians to correspond better with the real facts, for though the coming of Jesus was in a real sense a Judgment (see John 3: 19), yet, actually, Christian baptism was a baptism of the Spirit.

"Denunciation is an ineffective method. It is very doubtful if scolding ever does any good. Righteous indignation may sometimes be needed, but it is not enough. Rebuke for failure in duty will only aggravate, unless the better way can be shown. Humanity need not despair, but hope. The gospel is positive, not a mere negation of evil, but the overcoming of evil with good. Herein is its glory. Duty can be achieved, and conscience can be void of offence, and righteousness can, and presently will, cover the earth like a garment."

In Acts 19: 2 we read of a company of disciples in Ephesus who knew of John's baptism, but knew nothing of a pouring out of the holy Spirit. It was this new "Spirit," given to Christians, which chiefly distinguished John's baptism from that of Jesus. The receiving of the holy Spirit, which was the seal and proof that a man was a Christian, was associated with baptism, sometimes because it was given in baptism, sometimes because it immediately preceded baptism. When we think of baptism by the holy Spirit we should not have in mind the strange "speaking with tongues," so much as the new power and hope and character which came with Christianity.

John is here represented as looking forward to the coming of Messiah (though the name is not used) whose shoe-lace he felt himself unworthy to untie.

Obligations

No man can be under an obligation to believe anything, who hath not sufficient means whereby he may be assured that such a thing is true.—Tillotson.

A clergyman recently gave a young woman of his acquaintance a very bad quarter of an hour. On her wedding day he sent her a telegram which, as received, ran: "John iv. 18." On looking up the text the girl was horrified to read: "For thou hast had five husbands; and he whom thou now hast is not thy husband." After they had restored the young woman to consciousness, inquiry was made at the telegraph office, when it was found that the operator had omitted the letter o numeral indicating the first Epistle John I. iv. 18 reads: "There is no fea in love; but perfect love casteth ou fear."

NOTICE

"To Those Who Are Interested in Poultry"

The time is drawing near when you will be wondering where to buy your "Baby Chicks & Hatching Eggs." Why not buy at home, this year, in your own County of Dundas, from a real poultry breeder.

I have been consistently breeding High Egg Production and Large Size into my Leghorns, until now at the age of 5½ months they weigh from 4 to 4½ lbs., and are maintaining a 50% production. My matings this year are the best I have ever produced. They are headed with R. O. P. Cockerels with records running frem 200 to 285 24 to 27 oz. eggs.

I have added one pen of Barred Rocks to my flock this year and am offering a limited number of chicks and eggs from this carefully selected pen. They are all headed by individually pedigreed cockerels from the Kemptville Agricultural College with records running from 200 279 of 24 to 28 oz. eggs. Write for prices and particulars or, better still, come and visit us at

"Hillcrest Poultry Farm"

Golden Wedding

About fifty friends and relatives gathered at the home of Mr. and Mrs. Ira Annable on Saturday, Jan. 10th, to bring congratulations and help celebrate the 50th anniversary of their wedding day. The guests were admitted by Miss Edna Annable and received by the bride and groom, in the drawing room which was gaily decorated with yellow daffodils, narcissi and carnations. The golden sunshine of the day lent its lustre to the joyous event.

In the dining room the artistically arranged dinner table was much admired, golden "mums," tall yellow tapers, weddings bells and dainty yellow favors, helping to carry out the golden color scheme, while the three-storied wedding cake, with its gilded leaves occupied the usual place of prominence. After the sumptuous banquet prepared by daughters and daughter-in-law had been served by Misses Muriel and Norma Robinson, telegrams were read from friends in Moosejaw, Sask., Calgary, Alta.; and Nelson, B. C.

Rev. J. A. Waddell in behalf of the assembled friends then offered a few words of congratulation and called on Mr. Aaron Sweet who read the following address, Mr. T. A. Scott making the presentation:

Dear Mr. and Mrs. Annable—A number of your friends have gathered here today to congratulate you on this the Fiftieth Anniversary of your Wedding Day. This is a distinction that not many couples are permitted to enjoy, and it is all the more remarkable from the fact that your family circle remains unbroken. Father, mother and children, all well, and the latter comfortably settled almost within calling distance of the old home.

As you look back over the past fifty years you will recall many changes, some of them of a very startling character, but they have come upon us so gradually that we have learned to accept them as though we had been accustomed to them all our days. Just to mention a few of them:

The Telephone. How would we ever put in our spare time without the privilege of listening in and knowing all about what our neighbors are saying and doing?

The Electric Light has made our homes in the evening seem like mid-day, but, at the same time, has not kept the young people in the house to the extent that many parents would wish. You may remember the joys of courting by candlelight, a pleasure unknown to the young people of to-day.

The Canadian Pacific Railway has linked us up with the outside world and made us feel much nearer to the centre of things than was the case fifty years ago.

Another means of transportation, The Automobile, has developed from a noisy contraption capable of going fifteen miles an hour (when it went at all) to the silent luxurious cars of to-day gliding alone at sixty or eighty miles an hour. The advent of the Automobile has brought about radical changes in road building so that the rural roads of to-day are equal to the city boulevards of the olden times.

Then we have those venturesome spirits who take to the air and soar across oceans and continents at a speed undreamed of when you were in your teens.

Just think of the wonderful system of Radio Service which is developing some new feature nearly every day. Who would ever have thought of sitting comfortably in our homes in Winchester and listening to an Address given by His Majesty King George V. in London, England? Now the Wizards of Electricity are developing a system of Television by which you can sit in your own home and not only hear the voice but see the features of a speaker on the other side of the ocean.

We are glad that you have been here to share in all these wonders and that you may yet see many others as they are developed from time to time, and our prayer is that you may be kept by the Giver of All Good until He sees fit to call you home.

And just now, will you accept this Purse of Gold as a token of the high esteem in which you are held by the friends and neighbors who have known you all these years.

Mrs. Annable, because of her husband's ill health, made the reply in a few well chosen words, thanking the friends for their good wishes and gift.

An hour of social fellowship followed, during which stories of former days were related, and the company joined in some old time community songs, Miss Norma Robinson sang very sweetly "Little Mother o' Mine." Mrs. Aaron Sweet, Mrs. David Melvin and Mrs. Ernest Steele contributed musical numbers and Master Gordon Hutchinson gave a recitation. The celebration festivities were continued in the evening when the younger set gathered to extend their felicitations and share in the joy of the happy occasion

In 1881 Mr. Ira Annable married Miss Janet Christie of Patterson's Corners, near Oxford Mills, the ceremony being performed by the Rev. Mr. Canning After a short residence in Winchestar village they moved to Melvin Settlement, locating in their present home about thirty years ago. A remarkable feature of their wedded life is that the family circle remains unbroken, five children and eight grandchildren blessing their union and all living within easy access of home. The members of their family are: Mrs. John Moffatt, Winchester, Mr. Lawrence Annable, Winchester, Mrs Harold Hutchinson, Iroquois; Mrs. Ernest Steele, Winchester, and Mrs. Charles Simon, Spencerville.

The Press joins with the members of the United Church and all other friends in wishing Mr. and Mrs. Annable continued happiness in the coming years.

Wowen's Institute

An interesting meeting will be held in the Town Hall next Tuesday, Jan 20, at 3. p. m., when roll call will be answered with, "What country I wish to see, and why." A good programme full of fun will be enjoyed. Refreshments will be served. New members, and those who wish to become members are especially invited to attend.

Kindly remember the shower of canned goods for the needy, to be brought to this meeting.

MRS. GEO. SCOTT, Prop.
Ross Morrow, Auctioneer.

Ottawa Granites Win

The hockey match played on local ice last Friday night between the Winchester Junior team and the Ottawa Granites, a Jewish team, resulted in a win for the latter, the score being 2-1. The game was fast and clean throughout, with the home boys getting the best of the play and out shooting their opponents 13-10. Winchester's lone goal was registered by Hugh Slater, while Florence and Epstein counted for the Granites This game marked the first appearance of the local team in action this year and, taking this into consideration, every man on the team turned in a fine performance. Crowder, Stuart and Hoy, who are new members of the team, all showed up to advantage, while Slater Kenney and Helmer, who are graduates from the town league, also played in stellar fashion. The regulars or old members of the team are playing the best game of their career and with a more games under their belt should be able to meet any team of its class with little worry. There were no stars on the visitor's team, every man played steady, useful hockey. The line-ups follow:

Granites—goal, Hyman; def., Torontow and Greenberg; centre, Levinson; wings, Feller and Florence; subs, Levinsky, Epstein, Dover and Pozitsky.

Winchester—goal, Hoy; def., Stuart and Barkley, centre, Summers; wings, Wylie and Slater; subs, Gemeroy, Crowder, Kenney and Helmer.

The Granite team is under the management of Mr. Hy. Bessin, one of Winchester's leading merchants, and it was through him that the contest was arranged. There was a large crowd in attendance, the gate receipts amounting to around $75.00.

Curling

In a very exciting game, played at the local Curling Rink on Tuesday afternoon, in the presence of a large crowd, the champion "Pin Holders" rink, composed of Messrs. Len Mills, skip; Lorne Kinkaid, Rowat Kennedy and Rev G. O. Davies, were defeated and lost the pins to a rink composed of Messrs J. F. Gibson, skip; Ted Payne. J. D. Stewart and W. J. Stewart. The next team challenging for the coveted set of pins is composed of Messrs. H. L. Lee, D H. Weir Walter Moffatt and B. L. Carr.

Another double-header of the Town Hockey League is scheduled for to night and this series is creating much interest among fans. The Oddfellows cross sticks with the Speedboys while Hy. Bessin's Buzzers will tackle Hart Melvin's Chevrolets. Both games will be hard-fought and as there is no admission fee for these games a large crowd of fans will likely be on hand to cheer the boys along.

Morewood Wins

The first game of the C. O. V. J. Hockey League took place at the local arena last night when the Morewood team got the best end of a 2 0 score. The game was fast and well played in spots, but the home boys were unable to beat Steinburg in the visitor's net who rose to the heights of brilliancy on several occasions to save many hard drives. Morewood has a nice working team but are not so much better than Winchester when shots are considered. The locals had 17 drives on the opposing net, while the visitors had only 4 on Winchester, two of them being goals. Morewood's goals were scored by McLeod and McConnell in the first and second period.

For the locals Barkley played a beautiful game with Wylie and Slater working pretty on the wings. Th rest of the team also showed up well. For Morewood, Rombough, Glasgow and McLeod worked the best, with McConnell and Hayes doing some effective work at the defence. Their main star, however, was their goal tender.

Ten penalties were meted out by Referee Bill Gamble. six to Morewood and four to Winchester. The line-ups were as follows;

Morewood—goal, Steinburg; def., McConnell and Hayes; centre, Glasgow; wings, Rombough and McLeod; subs., K. McConnell, Dillabough and Loughridge.

Winchester—goal, Hoy; def., Barkley and Stuart; centre, Summers, wings Slater and Wylie; subs., Gemeroy, Kenny and Helmer.

Junior League Standing

Team	P	W	L	T	F	A	Pt
Chesterville	3	3	0	0	9	1	6
