TROUBLES THAT COME

With Middle Age,
Frequently Caused By Using
Improper

Toilet Paper.

A prominent specialist estimates that the majority of people are inflicted with some form of rectal trouble. This condition is not surprising when one thinks of the gross indifference of most persons to the quality of Toilet Paper used in their homes. Only recently has the importance of Toilet Tissue to health been fully recognized.

Perhaps you have never heard of VELVATISSUE. It is as soft as fine linen, very absorbent, pure white and sterilized tissue. It is no longer necessary to use low grade, yellow ground wood toilet papers. Avoid trouble. Try

VELVATISSUE

MORRISBURG—ONTARIO

THE LATE CHAS. DUPRAU

Many expressions of sincere regret were heard on Saturday last, when it became known that Mr. Chas. Duprau, former principal of he Morrisburg Public School, had passed away at his home in Ottawa, after a short illness. Though a number of years have passed since Mr. Duprau severed his connection with the local Board of Education, the memories of professional services well performed, by an efficient servant, are still as fresh in the memories of our citizens, as were the memories of his native town dear to the departed. Having indelibly inscribed his name within the walls of our institutions of learning, the Public Schools were closed on Monday afternoon, as a fitting and last tribute of respect to the late Principal, the teachers accompanying the remains to their last resting place in the family plot at Riverside.

The following is from the Ottawa Evening Citizen:

Charles Robert Duprau, B.A., B. Paed., principal of Wellington St. public school and one of Ottawa's best beloved and most successful school principals, died after a week's illness, at his home, 1074 Gladstone Ave., on Saturday.

Born at Morrisburg on August 23, 1877, Mr. Duprau received his early education in the Morrisburg public and high schools. His first professional training was received at Morrisburg Model school. Later he attended the Ottawa Normal school, where he took an active part in the literary and athletic activities of the student body.

Mr Duprau's early teaching experience included positions in Williamsburg, Riverside and Morrisburg. In the latter place he had been principal of the public school for some years when he was appointed to the Ottawa staff. In Ottawa he taught in Elgin St. and Kent St. schools before serving for some years on the staff of Connaught public school. In 1923 he was appointed principal of the Wellington St. school. At this school Mr. Duprau acted as critic teacher for the Ottawa Normal school. He also served for several years as a teacher on the evening staff of the Ottawa Technical school

In 1922 Mr. Duprau was graduated from Queen's University with the degree of Bachelor of Arts. During his attendance at summer sessions he gave unselfishly of his time in the various activities of the students. The Curtis Memorial Scholarship was successfully founded largely through the efforts of Mr. Duprau. In 1925 he qualified as a public school inspector and in 1929 he acquired the degree of Bachelor of Pedagogy from Toronto University.

His fellow teachers have always reposed the most implicit confidence in Mr. Duprau's leadership and he, in turn, has given unselfishly of his time and ability to these organizations. He had just concluded a most successful term as district councillor of the Ontario Male Teachers' Federation for this district, and, since last Easter he had served as vice-president of the provincial body of the same organization. At the district meeting in Carleton Place on October 26, when he was first stricken by his last illness, it was confidently predicted that he would be the next president of the O.M.T.F He was active in the Public School Athletic Association, and had served as president of the organization.

As president of the Ottawa Men Teachers' Club, Mr. Duprau headed the committee that initiated the movement for group insurance which has just been granted to the male teachers by the Public School Board.

In fraternal circles, the deceased took an active part, particularly in the Independent Order of Oddfellows, of which order he was a past district deputy grand master. He was a member of Ionic lodge, R.F. and A.M., Westboro. He was also a devout member of St Matthew's Anglican Church.

Mr. Duprau is survived by his wife, two daughters, Helen and Marguerite, and one son Robert, all at home. A brother, Orrin W. Duprau, lives in Morrisburg and a sister, Mrs. Thomas Shoove, in Montreal.

Many friends and acquaintances, including fellow school teachers, braved the inclement weather at noon on Monday to pay their last respects to Charles R. Duprau, principal of Wellington St. school, when his funeral was held from the family residence, 1074 Gladstone Ave., to Morrisburg, Ont., for interment in the Whitney Memorial cemetery there.

Rev. Canon Robert Jefferson, rector of St. Matthew's Anglican church, officiated at the funeral service. He also gave a short talk to the fellow teachers of the late Mr. Duprau, in which he stressed the necessity of making the best use of their time and opportunities. Character was the main trait of a school teacher, he said, and told them that at all times they should be prepared for death.

The funeral was attended by practically every school teacher in the public schools of the city, representatives of the Public School Board, members of the different teachers' associations, and citizens from all walks of life. Pupils from Wellington street school, which was closed out of respect for the late principal, visited the home during the morning to pay their respects. It was one of the largest funerals in Ottawa for some time, and was a fitting tribute to the high esteem and popularity in which the late Mr. Duprau was held.

The chief mourners were his widow; one son Robert; two daughters, the Misses Helen and Marguerite; a brother, Orrin W. Duprau of Morrisburg; a sister, Mrs. Thomas Shoove of Montreal, and an aunt, Mrs. Mary Duprau, of Lindsay.

MRS. HEPBURN HONORED BY FRIENDS

The Womens Auxiliary and Guild of St. James Anglican Church met in St. James Hall on Friday last, to do honor to one of the congregation's oldest and most active members, Mrs. M. Hepburn, who leaves shortly to reside in Chicago with her daughter, Mrs. A.A. Martin. Mrs. C.J. Weegar, President of the Auxiliary, read a short address, and Mrs. Harry Pyper, Pres. of the Guild presented Mrs. Hepburn with a purse.

The following is the address:

To Mrs. Hepburn:

We, the members of St. James Church, learning with regret that you are leaving us, wish to express our deep appreciation of the long and faithful service you have rendered to our church. We wish to assure you that we have admired those sterling traits of character, which have made our work with you of the most pleasant possible nature. Your kindness and sympathy, your untiring devotion to duty, have caused us all to love you. We have always felt the inspiration of your presence, and we hope you may long be spared to enjoy perfect health and happiness. Please accept this purse of gold as a slight token of our high esteem and love and good wishes.

GLENGARRY BALLOTS NOT ATTESTED TO

When Returning Officer A.L. McDermid opened the ballot boxes for the Provincial election in Glengarry County at Apple Hill on Tuesday night, it was found that many of the boxes were neither locked nor sealed, that the return for one of the polls at Alexandria was not attested to. It was also found that Form No. 31, which is an affidavit to be signed by the Deputy Returning Officer after the closing of the poll, was missing from more than 75 per cent. of the boxes.

Mr. McDermid adjourned the official summing-up proceedings until Monday. In the meantime, he proposes to advise the Chief Election Officer in Toronto of the irregularities found.

Glengarry elected John A. Sangster, Liberal, to the Legislature in the election. According to the returns on election night, he was given 3,231 votes to the 3,189 secured by his opponent, Angus McGillis, Conservative. The seat formerly was Conservative.

How to Eat

We are very often told how to eat and how important it is that our meals consist of a variety of foods. The proper selection of foods is the first item to be considered, and the next is to eat food in the right way after it has been selected. The following suggestions are made to cover the important subject of How to Eat.

Moderation should be practiced at all times. It is harmful to overeat, even of the proper foods. Excess does harm; it throws an unreasonable strain on the body and so tends to wear it our early. Premature old age is the common result of neglect of the watchword, "moderation."

Meals should be eaten in a quiet, restful manner. Food is not readily digested when the body is tired, or when the individual is worried or angry. A rest before meals is recommended to overcome body fatigue. Arguments or scoldings should never be carried on at meal-time. Active exercise should not be taken immediately after eating. Exercise is needed by the body, but so is rest, and one of the times when comparative rest is required by the body is after eating.

This same idea of rest is the reason why meals should be eaten regularly. The number of meals and the hour is a matter of individual preference and custom. When meals are eaten irregularly, or when food is taken between meals, the digestive system is not given the periods of rest which it requires if it is to do its work properly. Eating between meals should be avoided. The person who requires extra nourishment should take it regularly.

Nature has provided means for the mastication of food. Food should be eaten slowly and it should be thoroughly chewed before it is swallowed. It should not be washed down with a drink before it is masticated. There is no objection to the use of beverages in moderation with meals, but they should be taken when the mouth is empty.

Moderation at all times! That is how to eat!

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Minard's Liniment for Neuritis.

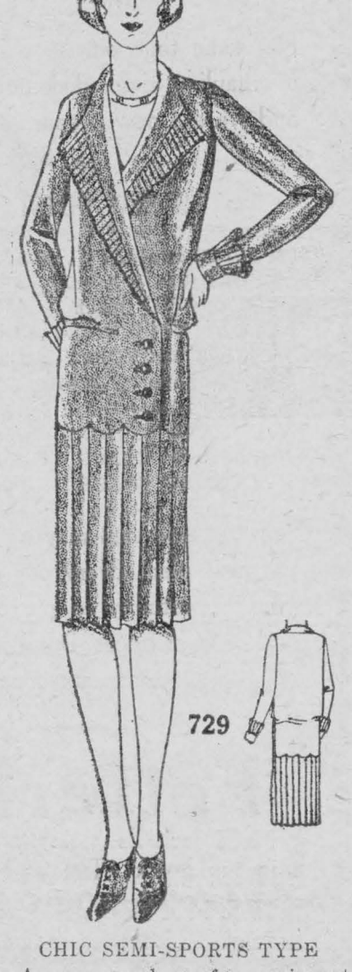

LOVE OF GOD

The love of God is like a flame
That burns away all earthly pain.
It gives our soul a second birth;
Bequeaths us thoughts of deeper worth.

To lighten every passing hour.
The Christian's heart an altar is
Where God's pure love will burn and
The love of God has still the power
live. —Jean Brough.

CHEERFUL WORDS

A sunny disposition is contagious. Start the day with cheerful words to those around you. Be cheerful and happy, and you can best be so by making others cheerful and happy.

729

CHIC SEMI-SPORTS TYPE

A swagger dress for semi-sports wear is sketched in army blue canton crepe. It affects Princess silhouette throuh molded bodice, that buttons at left side, giving the figure length. The surplice closing also detracts from the idth, by softening its line with rever collar with pleated ruffle. Long tight fitting sleeves have turn-back pleated cuffs, to complete this smart lingerie note so important in mode.

It will prove a lovely addition to your new wardrobe, and the small cost will surprise you.

Style No. 729 comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Featherweight tweed in tiny check or diagonal stripe is very attractive in beige and brown, mauve-red or plum shade.

Goya red kashmir jersey or navy blue wool crepe is smact for classroom. Printed jersey also chic.

Black crepe satin is serviceable for general occasions.

Printed novelty rayon crepe, canton crepe in petunia shade, faille silk crepe in hunter's green and crepe Marocain in tobacco brown fashionable.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by an early mail.

Separation

(Von meinem Bergli muss i scheiden).
Ach, frae the Garioch I maun wander,
Whaur a' thing's aye sae kind and fair;
To bide at hame is what I daurna,
But I maun se my lass ance mair.

May God be wi' you, dainty lassie!
Again, O, let me tak your hand.
For mony a lang you winna see fe,
For I maun seek a fremmyt land.

O, dinna greet, my bonnie dawty;
For we maun thole what e'en maun be.
But I'll be hame within the towmond,
And you can lippen aye on me.

I've gane ance mair and seen my lassie;
But, O, it's wracked my hert wi' pein.
For ae thing only noo I hunger:
To see again that lass o' mine.
—A. G. in the Glasgow Herald.

Health Madness

Truth (London): Articles are already appearing in daily papers on how to conquer "autumn depression." They follow quickly on tips for overcoming summer slackness. Very soon we shall be told the best way of relieving winter gloom, and after that we shall look eagerly for a specific against spring dejetion. Every season has its disability. We are rapidly becoming health mad. The great majority seems to be unable to make up their minds what to eat, drink, wear, or do without assistance.

THE "CANARY" MURDER CASE

© Charles Scribner's Sons

by S. S. VAN DINE AUTHOR of THE BENSON MURDER CASE

THE STORY SO FAR:

The thing that baffles Vance most is the jewel case. It had been opened with a steel chisel after being battered with a poker. It was found not far from the strangled body of Margaret Odell. In no way can anyone account for the presence of anyone in the apartment at the time of the murder, yet Vance is satisfied two men were there, one of them unaware of the presence of the other. Finger-prints lead to the arrest of Tony Skeel, after Cleaver and Dr. Lindquist have been questioned.

CHAPTER XX.

(Wednesday, Sept. 12, 9 a.m.)

The following day, which was Wednesday, not only brought forth an important and, as it appeared conclusive development in the Odell case but marked the beginnin gof Vance's active co-operation in the proceedings.

The psychological elements in the case had appealed to his irresistibly, and he felt even at this stage of the investigation, that a final answer could never be obtained along the usual police lines. At his request Markham had called for him at a little before nine o'clock, and we had driven direct to the district attorney's office.

Heath was waiting impatiently when we arrived. His eager and covertly triumphant expression plainly indicated good news.

"Things are breaking fine and dandy," he announced when we had sat down. He himself was too elated to relax, and stood before Markham's desk rolling a large black cigar between his fingers. "We got the Dude—six o'clock yesterday evening—and we got him right. One of the C.O. boys, named Riley, who was patrolling Sixth Avenue in the Thirties, saw him swing off a surface car and head for McAnerny's Pawn Shop. Right away Riley wig-wags the traffic officer on the corner and follows the Dude into McAnerny's. Pretty soon the traffic officer comes in with a patrolman, who he's picked up; and the three of 'em nab our stylish friend in the act of pawning this ring."

He tossed a square solitaire diamond in a filigred platinum setting on the district attorney's desk.

"I was at the office when they brought him in, and I sent Snitkin with the ring up to Harlem to see what the maid had to say about it, and she identified it as belonging to Odell."

"But, I say, it wasn't part of the jewelry the lady was wearing that night, was it, Sergeant?" Vance put the question casually.

Heath jerked about and eyed him with sullen calculation.

"What if it wasn't? It came out of that jimmied jewel-case—or I'm Ben Hur."

"Of course it did," murmured Vance, lapsing into lethargy.

"And that's where we're in luck," declared Heath, turning back to Markham. "It connects Skeel directly with the murder and the robbery."

"What has Skeel to say about it?" Markham was leaning orward intently. "I suppose you questioned him."

"I'll say we did," replied the sergeant; but his tone was troubled. "We had him up all night giving him the works. And the story he tells is this: he says the girl gave him the ring a week ago, and that he didn't see her again until the aternoon of day before yesterday. He came to her apartment between four and five—you remember the maid said she was out then—and entered and left the house by the side door, which was unlocked at that time.

"He admits he called again at half past nine that night, but he says that when he found she was out, he went straight home and stayed there.

"His alibi is that he sat up with his landlady till after midnight playing Khun Khan and drinking beer. I hopped up to his place this morning, and the old girl verified it. But that don't mean anything. The house he lives in is a pretty tough hang-out, and this landlady, besides being a heavy boozer, has been up the river a coupla times for shoplifting."

"What does Skeel say about the finger-prints?"

"He says, of course, he made 'em when he was there in the afternoon."

"And the one on the closet door-knob?"

Heath gave a derisive grunt.

"He's got an answer for that, too—says he thought he heard some one coming in, and locked himself in the clothes-closet. Didn't want to be seen and spoil any game Odell mighta been playing."

"Most considerate of him to keep out of the way," drawled Vance. "Touchin' loyalty, what?"

"You don't believe the rat, do you, Mr. Vance?" asked Heath, with indignant surprise.

"Can't say that I do. But our Antonio at least spins a consistent yarn."

"Too damn consistent to suit me," growled the sergeant.

"That's all you could get out of him?" It was plain that Markham was not pleased with the results of Heath's third degree of Skeel.

"That's about all, sir. He stuck to his story like a leech."

"You found no chisel in his room?"

Heath admitted that he hadn't.

"But you couldn't expect him to keep it around," he added.

Markham pondered the facts for several minutes.

"I can't see that we've got a very good case, however much we may be convinced of Skeel's guilt. His alibi may be thin, but taken in connection with the phone operator's testimony, I'm inclined to think it will hold tight in court."

"That about the ring, sir?" Heath was desperately disappointed. "And what about his threats, and his finger-prints, and his record of similar burglaries?"

"Contributory factors only," Markham explained. "What we need for a murder is more than a *prima facie* case. A good criminal lawyer could have him discharged in twenty minutes, even if I could secure an indictment. It's not impossible, you know, that the woman gave him the ring a week ago—you recall that the maid said he was demanding money from her about that time.

"And there's nothing to show that the finger-prints were not actually made late Monday afternoon. Moreover, we can't connect him in any way with the chisel, for we don't know who did the Park Avenue job last summer. His whole story fits the facts perfectly; and we haven't anything contradictory to offer."

Heath shrugged helplessly; all the wind had been taken out of his sails.

"What do you want done with him?" he asked desolately.

Markham considered—he, too, was discomfited.

"Before I answer I think I'll have a go at him myself."

He pressed a buzzer, and ordered a clerk to fill out the necessary requisition. When it had been signed in duplicate, he sent Swacker with it to Ben Hanlon.

"Do ask him about those silk shirts," suggested Vance. "And find out, if you can, if he considers a white waistcoat *de rigueur* with a dinner-acket."

"This office isn't a male millinery shop," snapped Markham.

"But Markham, dear, you won't learn anything else from this Petronius."

Ten minutes later a deputy sheriff from the Tombs entered with his handcuffed prisoner.

Skeel's appearance that morning belied his sobriquet of Dude. He was haggard and pale: his ordeal of the previous night had left its imprint upon him. He was unshaven; his hair was uncombed; the ends of his mustache drooped; and his cravat was awry. But despite his bedraggled condition, his manner was jaunty and contemptuous. He gave Heath a defiant leer, and faced the district attorney with swaggering indifference.

To Markham's questions he doggedly repeated the same story he had told Heath. He clung tenaciously to every detail o it with the ready accuracy of a man who had painstakingly memorized a lesson and was thoroughly familiar with it.

Markham coaxed, threatened, bullied. All hint of his usual affability was gone; he was like an inexorable dynamic machine. But Skeel, whose nerves seemed to be made o iron, withstood the vicious fire of his cross-questioning without wincing; and, I confess, his resistance somewhat aroused my admiration despite my revulsion toward him and all he stood for.

After half an hour Markham gave up, completely baffled in his efforts to elicit any damaging admissions from the man. He was about to dismiss him when Vance rose languidly and strolled to the district attorney's desk. Seating himself on the edge of it, he regarded Skeel with impersonal curiosity.

"So you're a devotee of Khun Khan, eh?" he remarked indifferently. "Silly game, what? More interestin' than Conquain or Rum, though. Used to be played in the London clubs. Of East Indian origin, I believe. . . You still play it with two decks, I suppose, and permit round-the-corner matter?"

An involuntary frown gathered on Skeel's forehead. He was used to violent district attorneys, and familiar with the bludgeoning methods of the police, but here was a type of inquisitor entirely new to him; and it was plain that he was both puzzled and apprehensive. He decided to meet this novel antagonist with a smirk of arrogant amusement.

" By the bye," continued Vance, with no change in tone, "can any one hidden in the clothes-press of the Odell living room see the davenport through the keyhole?"

Suddenly all trace of a smile was erased from the man's features.

"And I say," Vance hurried on, his eyes fixed steadily on the other, "why didn't you give the alarm?"

I was watching Skeel closely, and, though his set expression did not alter, I saw the pupils of his eyes dilate. Markham, also, I think, noted this phenomenon.

(To be continued.)

John Peel

Everybody kens John Peel. The song has carried his name round the world. But so have the "Pickwick Papers" carried the name of Mr. Pickwick. Both, in one sense, are very real and familiar figures. Both, in another sense, are legendary. Posterity may argue furiously whether Mr. Pickwick ever lived in the flesh. There may even be some among us to-day who will be surprised to learn that John Peel and his horn and his coat so gay had an actual existence on earth.

Such, however, is the fact, and plans were this year made to celebrate his memory. John Peel was born in 1776 and died in 1854; he hunted and drank, drank and hunted, among the Cumberland fells all his life; and at the recent commemoration his own famous horn was blown. But somehow these details seem meaningless, for John Peel lives after his death even more vigorously than when he ran his hounds on $200 a year.

"They say he ran amuck."
"How many miles would that be?"

Self-denial is that which exalts the beggar above the dignity of a king.

MOUNT ROYAL HOTEL Montreal

Real Dyes are *easier* to use

DIAMOND DYES are used by practically the same method as any other dye. They go on easier, though—more smoothly and evenly; without spotting or streaking. That's because they are made from real anilines, without a trace of fillers to injure fabrics or give things that redyed look.

Diamond Dyes *contain the highest quality anilines that money can buy.* That's why they give such clear, bright, new-looking colors, which keep their depth and brilliance so remarkably through wear and washings.

Next time you have dyeing to do, try Diamond Dyes—at our risk. See that they *are* easier to use. *Then compare results.* You will surely agree Diamond Dyes are better dyes. The *white package* of Diamond Dyes is the highest quality dye, prepared for general use. It will dye *or tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Needless Pain!

Nowadays, people take Aspirin for many little aches and pains, and as often as they encounter any pain.

Why not? It is a proven antidote for pain. It works!

And Aspirin tablets are absolutely harmless. You have the medical profession's word for that; they do not depress the heart.

So, don't let a cold "run its course." Don't wait for a headache to "wear off." Or regard neuralgia, neuritis, or even rheumatism as something you must endure. Only a physician can cope with the cause of such pain, but you can always turn to an Aspirin tablet for *relief*.

Aspirin is always available, and it never fails to help. Familiarize yourself with its many uses, and avoid a lot of needless suffering.

Canadian Orator World Champion

Roch Pinard of Montreal Wins Washington Contest

9 NATIONS COMPETE

French-Canadian Won Dominion Award at Toronto Last May

Washington.—Roch Pinard, of Montreal, representing the student orators of Canada, won the highest international honors in competition with eight others before members of the diplomatic corps and an audience of eight thousand in Constitutional Hall here recently. Herbert Schaumann, 19, of Interburg, Germany, was second, and Robeto Oritis Cris, 18, Oaxaca, Mexica, third.

Pinard took as the subject of his oration, "Canada Among the Nations," and his address and the manner of its delivery in the French tongue was adjudged the best among those made by the youth of England, the United States, France, Germany, Denmark, Mexico, Cuba and Peru.

It was a thriling moment for the many Canadians in the audience when it was announced M. Pinard had won the contest and the Sevres Vase offered by the government of France, but not more prideful than when in absolute stillness the young student, his face reflecting the earnestness of his thought, reached the peroration of his address and set forth to the representatives of other nations Canada's desire for peace.

Hesaid, "The duty which devolves on every people to-day is to co-operate toward the union and good understanding of the world. The last war, terrible and murderous if ever there was one, has filled every man with a new eagerness for tranquility and conciliation . . . . May I be allowed to offer in the name of my beloved country a contribution, feeble as yet, perhaps, but nevertheless sincere and generous. May I be allowed to hold out a friendly and fraternal hand to the sons of other countries . . . in a mutual impulse of friendship and enthusiasm it is our duty, young men in the twenties, who are justly called the hope of to-morrow, to keep burning the light enkindled by our ancestors so as to transmit it still more ardent and radiant to future generations an era of prosperity and happiness. Such is the wish I bring from Canada to all the nations."

Six Contest Judges

The judges of the contest were six, headed by Dr. Jan Herman Van Royen, minister of the Netherlands. J. B. C. De Marbois, of Upper Canada College, Toronto, was the Canadian judge.

U.S. Aids Project To Make Alaska Vast Farm Area

Agents Visit Middle West and Pacific Coast States to Interest Settlers

A project for the development of large tracts of agricultural land in connection with the Alaska Railway, a government-owned enterprize, is being launched with the idea of making Alaska one of the agricultural areas of the world, says "The San Francisco Chronicle," quoting Captain John H. Hughes, pioneer of the Alaska gold rush days of '99. Hughes recently arrived in San Francisco after conferring with Colonel Otto F. Ohlson, general manager of the line, who is sponsoring the project of throwing open these lands to colonization.

The United States Assistant Secretary of the Interior has just left with Colonel Ohlson for Alaska to look over the ground, while an agent has been sent by the company in the person of M. D. Snodgrass, to visit Pacific Coast states and the Middle West with the idea of organizing a party of prospective settlers to visit Alaska next August and convince them by first-hand observation of the opportunities the territory affords to future colonists. Arrangements have been made with railway and steamship lines for rates that will enable the visitors to make the trip at a minimum of expense and inconvenience.

The idea of transforming Alaska from a mining to an agricultural territory has long been entertained by Captain Hughes, who has been intimate with the development of that country since the earliest days. In 1924 he drew up a detailed report on agriculture in Alaska and within the last few years serious attention has been given to the subject.

The Alaskan Railway, which runs between Seward and Fairbanks and which, with its branches, comprises about 485 miles of track, was built by the United States government at a cost of $70,000,000 and costs the American taxpayers every year about $1,000,000 to pay the deficit of operating expenses, according to Captain Hughes, who attributes this loss to lack of outgoing freight. The railway runs through some of the most fertile land in the territory.

Industry and Unemployment

Canadian Forum (Toronto): It is clear that there must be something wrong with our present system when we find the administrators of our largest cities, cities bursting with wealth, roaring with industry, using the language of pain to keep unemployed men away from their gates, and all because there are a few hundred temporarily unemployed men already on their hands who have to be fed at the public expense. At present this fear of having unemployed workers is a national bogey; city vies with city in broadcasting warnings to workers to keep away from it when the winter comes round; labor organizations oppose all schemes for the immigration of British workers because of this fear of a labor surplus; youths who leave work on the lands and make for the cities because it is their perhaps mistaken ambition to be a sheet-metal worker, or a plumber, or a stockbroker, are looked upon as near criminals. Yet the truth is that we have less unemployment than almost any other industrial nation and if we once faced our "unemployment problem," this national bogey would shrivel to pigmy proportions.

Church Union in India

J. Scott Lidgett in the Spectator (London): It has long been apparent that if the West would not lead the way to reunion the East would be constrained to do so. For why should the Christians of India, China and Africa be forced into the separate moulds of Western Christianity, when many of these are becoming obsolete through spiritual and intellectual progress, and when, still more, most of them are alien to the Oriental spirit?

A gentleman lent his pony and trap to two ladies and told them to be careful to keep the rein off his tail. When they came back he asked them how they had managed. "When a shower came on we kept the umbrella over his tail," was the explanation.

No Trace Found of Danish Cadet Ship

Steamer Punee Returns to Port After Extensive Search

Sydney, N.S.W.—The steamer Junee has returned to port here, unsuccessful in its three months' attempt to unlock another mystery of the sea—the disappearance of the Danish cadet ship Kobenhavn with its crew of 70 naval students.

The Kobenhavn vanished January 21 last on a voyage from Buenos Aires to Australia.

For 80 days the Junee, chartered to search for the missing sailing vessel, traversed the sea lanes and some times the uncharted areas of the vast southern ocean. But the sea held its secret.

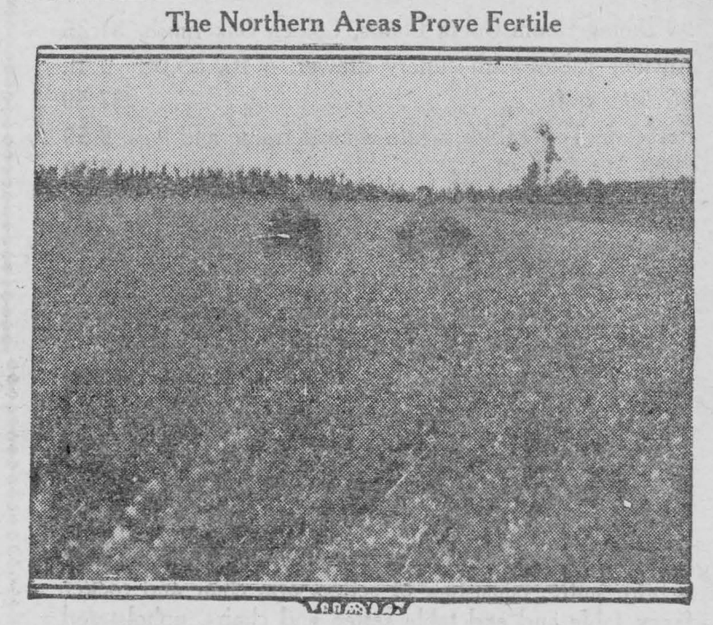

Capt. F. D. Fletcher, master of the Junee, said upon his return that there could be no doubt but that the Kobenhavn and its youthful crew had fallen victim to drifting ice.

The search for the Kobenhavn, extended over 2,200 miles, of which 4,950 were zig-zagged off the charted courses, proved to be a hazardous task for the Junee, Captain Fletcher said.

"I fully realized what was in store for us when, on opening my orders," he said, "I found we were instructed to zig-zag west on the 42nd parallel of south latitude. Running to the eastward in these latitudes is not looked forward to with joy by any seamen. To steam due west would not even be considered by any shipmaster in these latitudes at any season of the year.

"So when I knew that we were to zig-zag westwards in mid-winter against the full force of the westerlies, I anticipated that I was faced with a task which would try my ship and crew to the utmost."

The Northern Areas Prove Fertile

"ONTARIO'S OATS" MAY BE FROM FAR NORTH
No complaints about quality of oats crop is heard on this farm, near Englehart, in northern Ontario's clay belt.

New Zealand Has Many Problems

Employment For Newcomers Is Chief Difficulty, Agent Says

"Unlike Canada, which can absorb as many British immigrants as she can get, New Zealand is unfortunately affected by her inability to find adeuate employment for the constant newcomers to the country which seriously retards her progress as a consequence," declared F. G. Woods, general agent of the Canadian National Railways for New Zealand, who sailed recently in the Cunard liner Ascania for Europe.

"New Zealand, with a population of but one and one-quarter millions, including 60,000 Maoris, is otherwise making excellent progress. The country, which principally follows agricultural pursuits, is largely indebted to her wool markets which for the five and one-half months' period of their operations last year sold 600,000 bales at the average price of $100.00 per bale!" The export of frozen mutton and butter form an important part of her other activities.

"Last year exports exceeded her imports by the huge figure of $60,000,000 and, combined with her banking deposits, which exceeds withdrawals by $40,000,000 a highly satisfactory financial standing is assured."

LOVE AND LIGHT

Love and light and peace are just the elements of character least susceptible of verbal exposition. They represent an atmopshere rather than any ponderable or identifiable entity; one must live in them and as it were, feel the play of them to realize their power and beauty when embodied in a plenary nature and lovable personality.—Dr. C. M. Stuart.

A magistrate observes that the exercise of a little common sense would prevent many divorces. And many marriages.

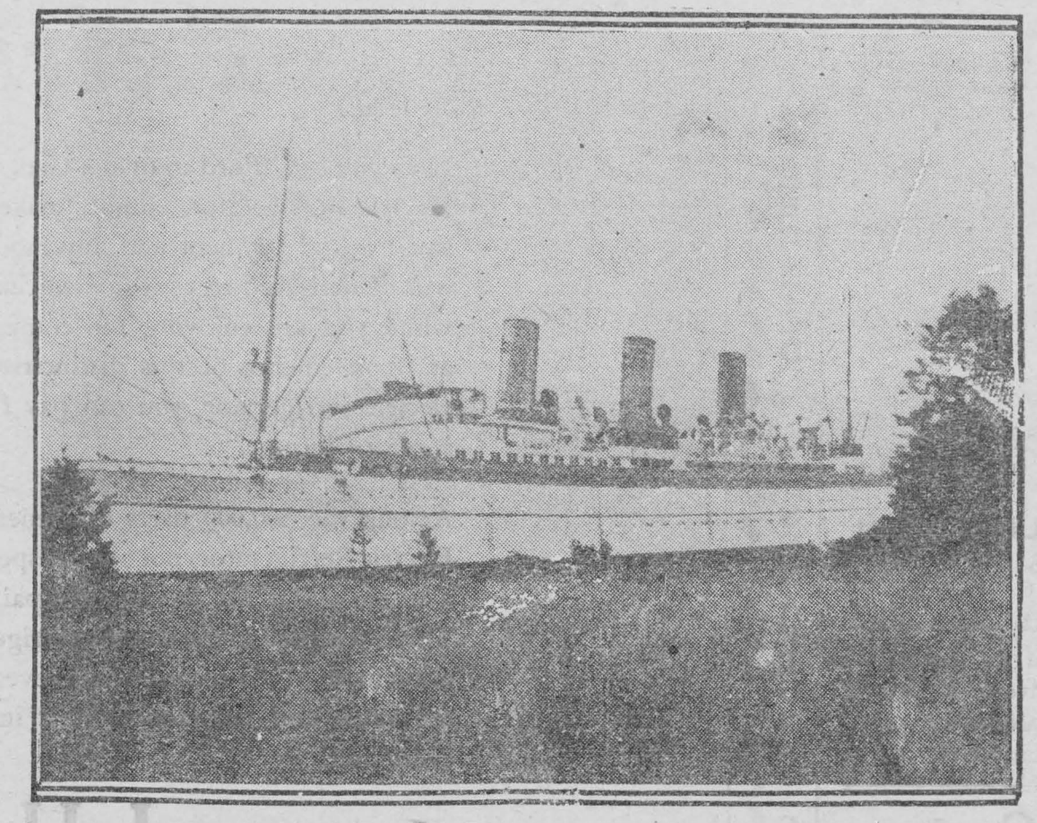

A little girl I know is an adept at turning the conversation. The other night her mother detected her in some misdemeanour and scolded her. The moment she ceased speaking the child looked up innocently and asked, "Does your nose ever itch, mummy?"

DIRECTORS GRATEFUL FOR HOSPITAL FUND

Cornwall, Ont., Nov. 1st, 1929

The Editor,
"Morrisburg Leader",
Morrisburg, Ont.

Dear Sir:—

We would like to take this opportunity of publicly thanking the citizens of the town of Cornwall and the United Counties of Stormont, Dundas and Glengarry, for their generous donations and support during the recent Campaign, for funds for the Cornwall General Hospital, which enabled the committee in charge of the Campaign, to go over the top, to the extent of almost $70,000.00.

The Campaign Committee also desire to express the warmest appreciation for the assistance rendered by the canvassers of the town of Cornwall, and by the following rural districts: Avonmore, Gravel Hill, Apple Hill, Moose Creek, Berwick, Aultsville, Farrans Point, Newington, Lunenburg, Finch, Iroquois, Morrisburg, Martintown, Northfield Station, Grants Corners, Tollgate, Williamstown, Monkland, Bainsville Lancaster, Wales, Mille Roches, Moulinette, Chesterville, Winchester and North Williamsburg.

Much of the credit for raising the above mentioned amount is reflected upon the energetic collectors.

The Committee composed of Messrs Geo. A. Stiles, K.C., Arnold N. Smith, M.P., Harry W. Snetsinger and Ned Smith, which waited upon executives of out-of-town corporations, and a second Committee comprised of Messrs A.C. Robertson, A.E. Hall, T.O. Clark, A.E. Currie and R.E. Snetsinger, which canvassed local firms, are deserving of the heartiest thanks, for their good work.

The Campaign Committee also appreciate the assistance rendered by the Misses Lillie Miller, Hazel Rivier and Mae Eaton, who did all the secretarial work in connection with the Campaign, and also wish to thank Mr. Harry W. Snetsinger, who placed his office at the disposal of the canvassers, as a Campaign Headquarters,—Mr. W.L. McFarlane, manager of the Cornwall Street Railway Co. who had advertising banners erected in various parts of the town,—the different speakers who were kind enough to address the Banquet meeting at the Cornwall Hotel, previous to the Campaign, and the Management of the Hotel, who catered for the occasion.

The splendid co-operation of the Press of the three United Counties, particularly the "Cornwall Standard" and the "Cornwall Freeholder" was a great factor contributing to the success of the Campaign, and the Committee extends its gratitude to the publishers and the staffs of "The Morrisburg Leader", "The Iroquois Post", "The South Mountain Herald", "The Winchester Press "The Alexandria Times", "Glengarry News", and the Cornwall newspapers.

Thanking all those who assisted in any way in making the Campaign the succes it was, and looking forward to a brighter and more prosperous future for the Cornwall General Hospital, we remain,

The Campaign Committee,—
Aaron Horovitz, Chairman,
W.L.G. Snetsinger, Sec'y
John H. Cline, Treasurer.

A few dollars down

Will put this most modern refrigerator in your home

GENERAL ELECTRIC
Refrigerator

Now you can afford to own a General Electric Refrigerator. Simply make a small initial payment and any model will be delivered to your home. Then, while you are enjoying the comfort and convenience of this distinctively electric refrigerator, you can pay for it out of income.

Among the 300,000 users of General Electric Refrigerators not one has spent a single dollar for service or repairs. This is a record in the electric refrigeration field . . . a record which reveals the value and satisfaction built into every unit.

Because the machinery is all on top it leaves the maximum space in the cabinet for food. There is no troublesome installation . . . simply plug it in to any convenient outlet.

The interior of the cabinet is always kept at the right temperature for preserving food. For regulating the speed of freezing ice cubes or frozen desserts there is an easily accessible temperature control.

Let us demonstrate the many other advantages of the General Electric Refrigerator. There is a model to suit your exact needs, and time payments to suit your purse. ER-1929

Mr. and Mrs. W.A. Wereley and son Lloyd and Mrs. David Sheets visited Mr and Mrs. Geo. Hall, Cornwall, the 3rd.

Mr. Willis Warner of Sandtown called on friends in the Grove Monday.

Mr and Mrs. Fred I. Dafoe and Miss Greta and Mr. and Mrs. W. Duprau spent Thursday as guests of Mr. and Mrs. Harold Anderson and family, 2nd Con.

Mrs. David Sheets of Massena Point, who spent the past week with her cousin, Mrs. W.A. Wereley and Mr. Wereley, returned to her home on Wednesday.

Mr. and Mrs. Wesley McCaslin of Iroquois were Thursday guests of Mr. and Mrs Frank Dafoe.

Mr. and Mrs. Willis Wereley and Mrs. David Sheets spent Wednesday with Mr. and Mrs. Jack McConnell, Gallingertown.

Mr. and Mrs. Fred Dafoe and Miss Greta and Miss Jean Armstrong attended the Hallowe'en party at Osnabruck Centre Wednesday eve.

Mr. Harry Buchanan was a week-end guest of his siser, Mrs. Harold Buchner and Mr. Buchner of Mille Roches.

Mr. and Mrs. Garnet Pruner and son Kenneth of Woodlands were recent guests of Mr. and Mrs. Mason Beckstead.

Mr. Wesley Ezard of Osnabruck Centre was a visitor of Mr. and Mrs Milton Crites recently.

A number of friends and neighbours gathered at the home of Mr. and Mrs. Ross Wells on Tuesday eve, Oct. 29th, to bid farewell before leaving for their new home in U.S. They were presented with a substantial purse. The pupils and teacher of the local school presented Basil and Preston Wells with two books as a remembrance. The evening was spent in dancing and games.

PAYNE VALLEY

Quite a number from here attended the inquest of Mr. Myles Johnston at Berwick on Monday.

Mrs. Derouche Barnum of Brockville and Mr. and Mrs. Guy Empey of Finch spent Friday with Mr. and Mrs. George Eligh.

Mr. and Mrs. William Dickson of Winchester and Mrs. Jack Jackson and daughters Helen and Margaret, Kemptville were recent visitors of Mr. and Mrs. Dan Campbell.

Mr. and Mrs. William Morrow and family of Maxwell and Mrs. J.M. McLennan and daughter Agnes of Moose Creek spent Sunday with Mr. and Mrs. Dan Campbell.

Mr. Duncan McKinnon and Florence, and Master Forbes Muir, spent Sunday at Mr. Allan McMillan's.

Miss Effie McIntosh returned to Kingston on Friday, after spending her holidays at her home here.

Guests at Mr. George Eligh's on Sunday were Mr. and Mrs. Abe Eligh and Mr. Clare Vance of Newington, Mr. and Mrs. Leslie Sephenson and baby Norma, and Miss Mae Eligh of Cornwall.

Mr. and Mrs. Clifford Eligh spent one day last week at the former's home, Newington.

ARCHER

Messrs Allen Gallinger and Garnet Dennison left on Wednesday for Glenfield, N.Y, where they have secured positions.

Miss Greta Gallinger is spending this week with her sister, Mrs. Clarence Loucks of Cardinal.

Mr. and Mrs. Ira Weegar and family of Elma, Mrs. Celia Lawrence of Massena, N.Y., Messrs D. Weegar of Gallingertown, A.W Weagant Robt. Weagant and Mert. O'Shaughnessy, spent Sunday at George Weagant's.

Mr. and Mrs. Mert. O'Shaughnessy of Hoasic were Sunday guests of Mrs. Gertrude Weagant and Robt

Mr. A.W Weagant spent Sunday with Mr. and Mrs. Joe Heagle.

Mr. and Mrs. Walter Watson and family of Colquhoun and Mr. Lyman Ault of Finch visited Mr. and Mrs. Chas. Ault this week.

Mr. Dwight Weegar of Massena, N.Y. spent the week-end at his home here.

Mrs Thomas of Morewood is spending some time with Mr. and Mrs. Chas. Ault.

Mrs. Carmi Froats of Gallingertown spent an afternoon recently with her mother, Mrs. J. Heagle.

Miss Beatrice Thompson is spending a couple weeks with friends in Morewood.

Mr. Alex. Weagant spent Sunday at Mr. Jos. Heagle's.

Mr. and Mrs. Walter Watson and family, Grantley, spent Sunday the guests of Mr. and Mrs. Chas. Ault.

Mr. and Mrs Ernest Heagle and family of Brockville, Mr. Arthur Heagle of Gallingertown spent Sunday with Mr. and Mrs. S. Heagle.

Mr. and Mrs. Jos Heagle took tea with Mr. and Mrs. J. Warren Wednesday evening.

GLEN BECKER

Mr. and Mrs. Merton Saddlemire and Miss Beatrice and Keith spent one day recently with Mrs Florence McIntosh, Winchester Springs.

Mr. and Mrs. Frank Merkley and children took tea at Mr. Stanley Saddlemire's one evening last week.

Mr. and Mrs. Saxon Hess and family of East Williamsburg spent Sunday with Mr. and Mrs. Earl VanAllen.

Mr. and Mrs. Dalton Saddlemire and Miss Edna and Morris, took tea with Mr. and Mrs. Frank Beckstead, Mariatown, on Sunday evening.

Rev. Mr. Stuart of Finch called at Mr. Merton Saddlemire's on Tuesday evening of this week.

Mr. and Mrs. Wm. Barclay and son Ivan of Williamsburg spent Tuesday with Mr. and Mrs. Chas. Watson.

Mr. and Mrs. Donald Beckstead of Maxville spent Sunday at their parental homes here.

Mr. and Mrs. Stanley Saddlemire, Mr. and Mrs. Howard Saddlemire and children spent Sunday at Mr. Merton Casselman's, Dundela.

Mr. and Mrs. John Casselman spent Thursday evening at Mr. Michael Casselman's.

Miss Lolo Henry of Nudell Bush spent a couple of days last week with Miss Laura Deeks.

Mr. and Mrs. Kenneth Beckstead spent Tuesday at Maxville with Mr. and Mrs. Donald Beckstead.

STRADERS HILL

Mrs. Elizabeth Strader has returned home after spending some time with friends at Winchester.

Mr. Cecil Hanson spent the week-end with his parents here.

Mr. and Mrs. Thos. Cunningham of Winchester Springs were recent guests of his sister, Mrs. Eslie Pitt and Mr. Pitt.

Miss M. Robinson of Elma was a guest of Mrs. B. Strader and family recently.

Mr. and Mrs. E. Foster of Morrisburg were recent guests of Mr. and Mrs. J .Hanson.

Mrs. G. Cunningham and Mrs. B. Keyes were visitors at Mr and Mrs. Eslie Pitt's recently.

Mr. Ogal Strader is spending some time with friends here.

CHURCH ROAD

Mrs. M. Shanette, Misses Ruby Shanette and Jean Cameron and Mr Hugh Shanette of Morrisburg spent the week-end with Mrs. Bowman and family.

Mrs. Ralph Schwerdfeger returned last week from Montreal General Hospital. Her many friends will be pleased to know she is improving rapidly.

Mr. and Mrs. Isaac Schell and children of Wyo were recent guests at Mr. P.D. Schell's.

Mrs. Harry Bowman of Glen Becker spent the past week with Mr. and Mrs. Ralph Schwerdfeger.

Miss Doris Tracy spent the week-end at her home in Morrisburg.

Mr. .E. Nesbitt was a recent caller through the vicinity.

Miss Mary Schwerdfeger of the M.C.I. spent the week-end at home

MARIATOWN

Mr. and Mrs. Harry Robinson are spending a few days with the latter's parents, Mr. and Mrs. R McVey.

Mr. A. McConnell made a business trip to Ottawa on Saturday.

Mrs. Lucy Casselman and family and Mr. Stanley Casselman spent Sunday at the home of Mrs. Alice Hanes in honor of her birthday.

Cook's Regulating Compound

A safe, reliable regulating medicine. Sold in three degrees of strength—No. 1, $1; No. 2, $3; No. 3, $5 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address:
THE COOK MEDICINE CO.,
TORONTO, ONT. (Formerly Windsor)

A Cake and Pastry Expert says:

"Since Purity is a strong, rich flour, with great expanding qualities use 1 tablespoon less per cup if your cake recipe calls for ordinary pastry or soft wheat flour. If it calls for milk, use half milk and half water (luke-warm) with Purity.

New Recipe for Flaky Pie Crust

For two pie shells use 2 cups Purity Flour, ½ teaspoon salt, ½ cup shortening ½ cup cold water. Mix flour and salt, cutting in the shortening until the mixture is like fine meal. Mix thoroughly with the water. Roll out thin, keeping it quite dry. For extra rich pastry use half butter and half lard.

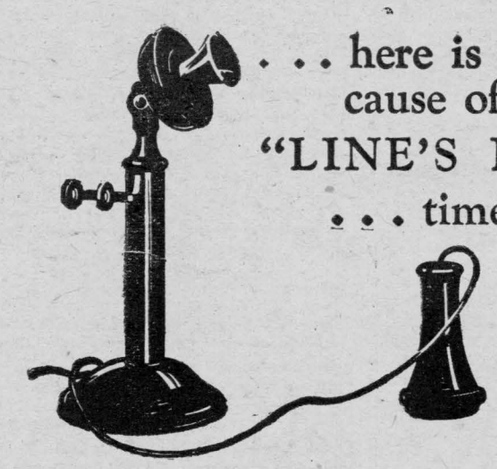

Send 30c for Purity Flour Cook Book.

PURITY FLOUR
Still the Best for Bread

. . . here is one cause of . . .
"LINE'S BUSY"
. . . time wasted

ANYONE trying to call this telephone will be told by the operator: "Line's Busy". But the line is not busy. It is really idle. Someone at the other end of the office is wanted and the telephone waits there until he arrives.

The idle telephone, with its receiver off the hook, is a common cause of "Line's Busy", and a common cause of uncompleted calls which are wasting two million minutes every day in Ontario and Quebec. Other causes of unnecessary "Line's Busy" are inadequate office equipment, long conversations during peak hours, trying to repeat too soon after the "busy" report, and asking another to get your party for you.

Many offices may not need more telephones, but they do need to have their present telephones more conveniently located. You may be losing calls because your line is thus "Busy" but really idle. And you may be losing business.

We want you to have the best possible telephone service and we are making every effort to provide it.* We are ready at any time to survey your telephone equipment and submit a report.

*New telephone plant and service improvements will mean an outlay, for 1929 alone, of more than $27,000,000.

THE BELL TELEPHONE COMPANY OF CANADA — LOCAL LONG DISTANCE TELEPHONE

With Christmas just 'round the corner
---*RIGHT NOW* is the time to order a
ROGERS-BATTERYLESS RADIO!

Supreme as a radio, superb as a phonograph, this wonderful instrument gives you radio or records at the flip of a handy switch. Rogers FINEST *creation for those who demand the finest for their homes!*

WITH the sales of Rogers Radio increasing on the average 100% each year for the past four years—the demand for "the *original* batteryless radio" every holiday season is tremendous. So if you are planning to say "Merry Christmas" to your family with a Rogers—*right now* is the time to place your order.

The New Rogers uses eight *Guaranteed* A/C Tubes. It is ruggedly built for long trouble-free service. It is completely shielded—minutely adjusted.

The cabinets are of distinctive beauty and finish. Electro-dynamic Speakers built into all console models. Automatic voltage regulator and phonograph plug-in-jack.

GUARANTEED PERFORMANCE—proven for the past five years in thousands of Canadian homes—yours with a Rogers.

Come in *now*, choose the model you prefer, and instruct us to deliver it for Christmas. Convenient payments, if desired.

Sunday School Lesson

November 10. Lesson VI—World Peace Through Mutual Understanding—Isaiah 2: 2-4; Acts 17. 22-28; John 4: 20, 21. Golden Text—They shall, not hurt nor destroy in all my holy mountain: for the earth shall be full of the knowledge of the Lord, as the waters cover the sea. —Isaiah 11: 9.

I. A VISION OF UNIVERSAL PEACE, Isa. 2: 2-4; 11: 6-10; 19: 23-25.

II. THE BROTHERHOOD OF MEN, Acts 17: 22-28; Eph. 4: 4-6; John 4: 20-21.

III. A PERFECT HUMANITY, Eph. 4: 13-19.

INTRODUCTION — There is much about war in the Bible, both in the way of civil strife, and of war between nations. Sometimes engagement in war seems to have been unavoidable, or to have been in response to the highest demands of duty and honor. For example, Abram hears that his kinsman Lot, and his family have been taken captive by bands of raiders from the East, and immediately arms his trained servants, follows hard upon the track of the raiders, and recovers the captives, Gen., chap. 14. The Midianite Arabs invade the cultivated lands of Israel, destroying and plundering so that they leave no sustenance for man or beast. The patriot Gideon gathers a little army of the bravest men and drives them out, Judges, chap. 6. David slays the giant champion of the Philistine invaders, and Saul wages war of defence throught his troubled reign against Ammonites, Arabs, and Philistines.

There were wars of aggression and of conquest, however, for which it is not easy, from the Christian point of view, to find justification. For example there were Joshua's war of conquest, Sampson's raids upon his Philistine neighbors, the murderous attack by the Danites upon the peaceful community of Laish, Judges, chap. 18, and David's subection of the Syrians of Damascus, 2 Sam. 8: 3-8. On these matters we are, perhaps, too far away, and our knowledge of them is too slight, to pass judgment. Our lesson shows us that in the end, both in the Old and in the New Testament, ideals of peace and international good will prevailed. Many of the prophets saw in their visions of the future a golden age of universal peace, and this was the theme of the angels whose song heralded the Saviour's advent.

I. A VISION OF UNIVERSAL PEACE, Isa. 2: 2-4; 11: 6-10; 19: 23-25.

The first of these passages is found also in Micah 4:1-4, with only slight variations. The prophets, or the editors of their books, appear to have inserted it from some other source. It will be worth while to compare other passages of prophecy in which there are similar expectations of a glorious future of service to humanity for Jerusalem and for her people. In Jer. 3: 17, "the nations shall be gathered" to Jerusalem, "to the name of the Lord," and shall do evil no more. In Zech. 2: 11 "Many nations shall be joined to the Lord," and shall be his people, and God will dwell in the midst of them. In Zech. 8: 20-22 "Many people and strong nations shall come to seek the Lord of hosts in Jerusalem, and to pray before the Lord." Compare 14: 16; Isa. 56: 7; 60: 3; 66: 23. In Zech. 9: 10 the Lord "shall speak peace unto the heathen," and his dominion shall be over all the earth. And in Ezek. 40: 2 and Zech. 14: 10, there is the same conception of Jerusalem as being "lifted up" as on "a very high mountain."

All this has been fulfilled in a remarkable way by the spiritual elevation of the holy city, and by the inspired teaching of her scriptures which have gone out to all the world. Jerusalem has become the prophet of the nations, and those who give heed to her teachings learn the ways of peace. For verse 3 compare Luke 24: 47.

In chap. 19: 23-25, there is a remarkable anticipation of a league of nations. The prophet sees in the future a highway out of Egypt to Assyria, passing through the land of Israel, and these three nations together serving the Lord and becoming a blessing in the midst of the earth. Religion will be the bond of this perfect union of nations which hitherto have been at deadly strife.

II. THE BROTHERHOOD OF MEN, Acts 17: 22-28; Eph. 4: 4-6; John 4: 20-21.

Long before the days of Paul this brotherhood had been recognized and declared by far-seeing men of the Hebrew race. In the story of creation God is the maker of all without distinction or difference. All races of men are declared to be descended from a common stock. Compare Amos 9: 7 and Psalm 100. Here Paul, in his address to a group of Athenians, asserts the same truth, and quotes from their own Greek poets in proof of his statement. The quotation (v. 28) is from a poet, Aratus, a Stoic, with whom, no doubt, his hearers were well acquainted.

Of God the Father of all men no image of gold or silver, or stone, graven by art and man's device, can be an adequate representation, v. 29. But though invisible he is not hard to find, he is not far from every one of us. In him we live and move and have our being. If this be true, and we believe it is true, of all men, how great the crime, so prevalent even today, of hatred, contempt, and scorn for men of other lands and races, and of other ways of thought and modes of life! How necessary it is that we should seek a better and closer understanding of our neighbors! That is the way to enduring peace. And the bond of peace will be finally in the common worship of God, whose sanctuary is not in Jerusalem, nor in Mount Gerizim, but wherever men approach him in spirit and in truth, John 4: 20-24. Then will be surely realized Paul's ideal of a redeemed humanity, one body and one spirit, and one Lord, Eph., chap. 4: 4-6.

III. A PERFECT HUMANITY, Eph. 4: 13-19.

This is the task of the church of Christ, and of all its workmen, to build the body of Christ (vs. 11, 12), the perfect man . . . the measure of the stature of the fulness of Christ, a new humanity (ch. 2: 15), cleansed from all evil ways of thought and conduct, truly Christlike.

658—Dress ensemble, one-piece dress with lap closing below round collar, long or short sleeves, separate belt, coat with raglan sleeves and turnback cuffs, convertible collar and patch pockets. For girls. 6, 8, 10, 12, 14 years.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto. Patterns sent by an early mail.

The "Small Investor"

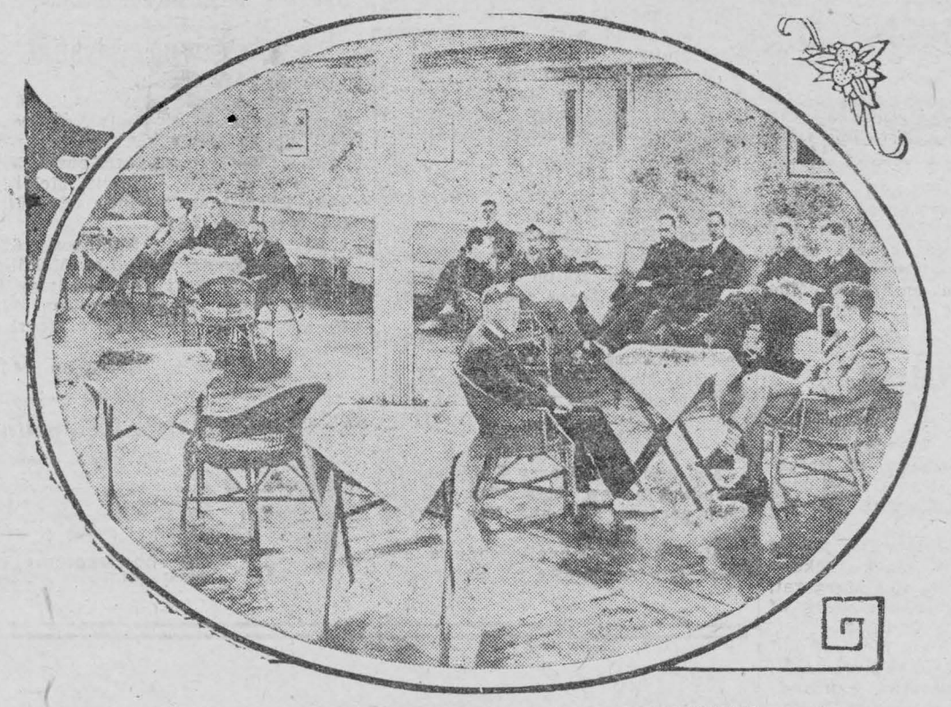

Truth (London): Though it may be an unpopular thing to say, the plain truth is that a good many so-called small investors are not investors at all in the strict sense of the word, but speculators, and reckless speculators into the bargain. Safety first securities do not appeal to them, nor are they satisfied with the yields of any investment that can be regarded as reasonably sound. They go out for big gains, and when they come to grief throw all the blame on the law and the Stock Exchange.

Culture

Culture is activity of thought, and receptiveness to beauty, and humane feeling. . . . In training a child to activity of thought, above all things we must beware of what I will call "inert ideas"—ideas merely received into the mind without being utilized, or tested, or thrown into fresh combinations. Education with inert ideas is not only useless: it is, above all things, harmful.—A. N. Whitehead in The New Republic.

See the commercial traveller,
How blithely doth he roam!
And he is never homesick, for
He's never long at home.

It Hardly Seems Possible That This Can be an Airship

Important Data On Ice is Found

Van Horne Expedition Under Dr. Barnes Carries On Successful Study

ICEBERG DETECTION

Findings Expected Materially to Aid in Fight to Clear River Channel

Details of the Van Horne Iceberg Expedition in the vicinity of Newfoundland last August when Dd. Howard T.Barnes, internationally-known ice engineer of McGill University, conducted a series of experiments in an attempt to free the St. Lawrence route from the iceberg menace were made known for the first time recently. Dr. Barnes gave a resume of the expedition and the results obtained before a meeting of the McGill Physical Society.

The Uvira, the boat with which the experiments were carried out, left New York on July 25 for Halifax where the Canadian equipment was taken on before the two-masted schooner with auxiliary engine left for St. Johns, Newfoundland. The actual experiments to make icebergs visible at nights or during fogs were carried out in Notre Dame Bay on the northeast of Newfoundland.

Important Discoveries

In opening his talk which was illustrated with a film of the trip and numerous slides Dr. Barnes stated that perhaps the most important discoveries yet made in regard to icebergs were disclosed during the expedition, which was made possible in such an extended scale through the generosity of Mr. Van Horne, a former Montrealer.

The object of the trip briefly was to find a means of detecting and thus avoiding icebergs at night or during a fog. The St. Lawrence route to Europe, the speaker said, was becoming more popular year by year by reason of its beauty. If the iceberg menace were removed, it would possibly be the most popular, and so bring great advantage to Canada.

The scene where the ill-fated Titanic went down, after striking an iceberg, was shown in a slide in which was also illustrated the north and south routes by way of the St. Lawrence to Europe. The only great disadvantage with the northern route through the Strait of Belle Isle, which was from two of three hundred miles shorter to Europe, was the cold Arctic current bringing down dangerous icebergs at certain seasons of the year when shipping schedules must be maintained, he said.

The route to the south of Newfoundland had also its dangers from icebergs and fogs, sometimes the more so as icebergs tended to break up on reaching warmer waters and so present the danger of collision with several icebergs where before only one existed.

Methods of Detection

Three different methods of detecting icebergs were tested as the opportunity granted. The first described was that afforded through the peculiar phenomena of warmer water in the vicinity of an iceberg. Contrary to general belief, Dr. Barnes pointed out, when tests are made with a microthermometer, as a ship comes in the vicinity of an iceberg, the temperature of the water is found to rise, while on approaching land the temperature is found to fall. Explanations of this seemingly contradiction were given.

The ship's navigator might, by taking the temperature of the water at the proper intervals and recording these findings on a curve or chart, be enabled to avoid shoals and icebergs by noting any unexpected fall or rise in the temperature in the water, the speaker said.

The second method of detecting icebergs at night or during fogs was to shoot thermit flares forward in the path of the ship's course and to watch for shadows of icebergs. The flare on the opposite side of the iceberg silhouetted it against the skyline and the ship's course could then be altered to avoid a collision.

The obvious weaknesses in such a method of detection with apparatus at present known were pointed out. These flares were subject to the caprice of the wind and were often carried far from their objective during stormy weather. They were most effective in calm weather, the speaker said.

Chance Discovery

The third method of iceberg detection, which was hailed by physicists and scientists present as being perhaps most portentous in possible applications and future results, was discovered to some extent by chance.

Dr. Barnes explained that icebergs in disintegrating give forth an irregular series of explosive sounds. Attempts were made to pick up these sounds, carried by the medium of the water, on the ordinary ship's submarine microphone but nothing was heard.

An improvised microphone consisting of a rubber hose with a funnel attached to one end and a sheet of rubber placed over the funnel to make the apparatus waterproof was then utilized.

Within a dstance of six miles of an icebery the explosive sounds were picked up. At five miles these "distinctive" sounds could be plainly heard, while at three miles distance they were quite loud.

This later finding is now receiving the attention of research workers and shipping men and it is expected that with mre suitable apparatus, but using the same principle, icebergs will be detected at a distance of five miles or more and thir position located quickly by means of the differential between two microphones placed at different positions on the bow of the ship. Ships will then be able to make full speed, or nearly full speed, and avoid collisions by knowing the location of icebergs in their paths.

The Royal Commission on Liquor

New Statesman (London): It is reported that the Commission will visit Canada and the United States to study Amerian liquor conditions on the spot. If this is true, we trust that they will also visit France and Italy and Germany, and seek to disover why the liquor problem in those countries is almost non-existent. Surely our aim should be to attain that happy combination of freedom and sobriety which rules practically all over France. We anticipate, however, that the proceedings of the Commission will turn out to be merely the old dreary farce of a conflict between fanatics, leading to nothing at all but a waste of public money.

"Her money is her only attraction." "Then time will surely add interest to her charms."

The Unemployment Problem

Kappa in the Nation and Athenaeum (London): Mr. Thomas is uncannily asute; but neither his training nor his habit of mind are such as to give the public much confidence in his power to tackle this formidable task . . . . He is, in fact, a lightweight in politics. There is grave doubt whether . . . . in Mr. Thomas we have the strong man we need for the job. His first step, the holiday visit to Canada, and its ludicrous results, have left a bad impression. There was no need for Mr. Thomas to go to Canada, but the lure of Empire was too much for him. He would have been far better employed at home, where, if at all, the job must be tackled and done.

PROTECTING TREES FROM RABBITS

Rabbits have in past winters done considerable damage to trees planted in shelter-belts on prairie farms. An effective method of protecting the trees from the pest has been found in lightly smearing the trees to a sufficient height with axle grease.

BLESSINGS

Great blessings that are won by prayer should be worn with thankfulness.—Goodwin.

The deepest depth of vurgarism is that of setting up money as the ark of the covenant.—Thomas Carlyle.

Two Tools Devised That Will Pierce Best Bank Vaults

"Fluxing Rod" and "Oxygen Lance" Can Be Used By But One Dozen Safe Experts

Not even a million-dollar vault would be proof against burglars armed with the latest and most powerful scientific cutting tools—the "fluxing rod" or the "oxygen lance"—with either one a criminal could cut through a steel wall a foot thick in five minutes.

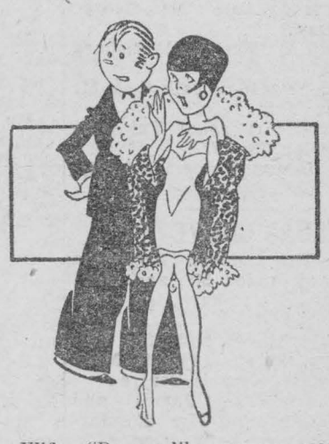

Against these potential tools of safe breakers no absolute defence is known. The financial world is waiting to see what super-criminal will use them, for to date none has dared to employ either.

So expert must be the men behind these insruments, writes Henry Morton Robinson in the November "Popular Science Monthly," that only a dozen men in the world are capable of breaking into a vault with them. Fortunately these men are not criminals. They are vault experts who have gained their "dangerous" knowledge by exhaustive experiments with torch, rod and lance upon metal targets, and their names are wel known. But so cautious is the financial world that it must even take account of the possibility that one of these men may turn criminal.

A torch and a "fluxing rod" can cut through any known combination of elements. Solid granite a foot thick can be pierced in ten minutes and crumbles under the rapid heating. Armor plate burns up in half that time. This magic rod is simply a stick of soft steel which the expert operator holds against the metal to be burned. Then he applies the oxyacetylene flame to the tip of the fluxing rod, which oxidizes so rapidly that the temperature can be raised to unbelievable heights.

The "ogygen lance" has been known for fifteen or twenty years to a few blast furnace experts. It consists of a long pipe about a quarter of an inch in diameter, through which axygen gas is forced under pressure. The business end of the pipe is heated red-hot by a cutter-burner. The hot iron ignites in the oxygen stream and flares fiercely. Held against any object it burns its way straight through Blast furnace men use the oxygen lance to free "rozen" tap holes in furnaces.

The best types of vaults now in existence are not designed to be proof against the fluxing rod and the oxygen lance, for that is impossible. They are engineered simply to delay entrance by an arch thief as long as possible. Every hour spent in safe breaking increases a criminal's risk of eing caught. One of he strongest vaults in this country might be proof for six hours against the attack of any one of the world's dozen superriminals. And although vault men fear the potentialities of the new scientific tools, there are practical objections to their widespread use. They require an immense amount of equipment and expert technical knowledge. Moreover, the oxygen lance generates such intense heat as to be dangerous to use without cumbersome shields. It generates billows of black smoke when it meets cast iron, leading to probable detection—a risk that few criminals would care to run.

Wife—"Do you like my new coat?" Hubby—"Yes, but I'll bet I won't be able to say the same for the bill."

MUTT AND JEFF— By BUD FISHER

The Queen's English Is What Jeff Desires.

Watch your growing children!

WATCH the health of your growing children! See that they have the health and energy necessary for their school work and play. For growing children—particularly girls—a rich supply of red blood is essential. Languor, nervousness, depression, fickle appetite or pallor indicate anaemia.

Dr. Williams' Pink Pills enrich the blood, prevent anaemia and build healthy bone and tissues. Thousands of mothers have proved this.

"My twelve-year-old girl," writes Mrs. Robert Devitt of Brougham, Ontario, "became so pale, so ill and nervous that we had to take her out of school. I tried Dr. Williams' Pink Pills for her and she gained in weight and strength. She is now the picture of health."

Buy a box of Dr. Williams' Pink Pills at all druggists and dealers in medicine or, postpaid, by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ontario.

Dr. Williams' PINK PILLS

"A HOUSEHOLD NAME IN 54 COUNTRIES"

"All Clear!"

Mark Barr in Collier's Weekly Tells How London Saved

"POMEROY'S PITS"

There is a quiet chap smoking his pipe as he putters in his Surrey garden, who smiles as he remembers his great triumph in science. He is still as little known as he was before his incredible experiment—but not so [illegible] because England was grateful. [illegible]emember the Zeppelin raids [illegible]n, of course. Feeling safe [illegible]ation and in the history of 2000 years free from hostile arms, London, astonished, suddenly found herself in the thick of action. It grew to be a war within a war—the Zeppelins against London, with Herr Mathy against an unknown man who was slow in appearing—a quiet chap, Pomeroy by name.

In 1914, on Christmas Eve, the one day in the year when people can least bear to think of war, the first bomb dropped on England. On Christmas Day another Zeppelin came, but was driven off at the mouth of the Thames. Then a New Year's visit, and this time there was death in England. Mathy was learning the lay of the English countryside. He learned it so well that later, when not a light glimmered in all England at night, he could follow the dull silver ribbon of the Thames, calling off the prominent buildings of London-town at this and that bend.

This was the manner of enemy we had; and his companion aces, Hirsch and Becker and the others, were almost as clever, certainly as brave. So London set desperately about the work of defense. The means at hand were inadequate: gallant lads spinning into the air in mechanical box-kites, ground gunners hurling one-pounders and five-pounders and shrapnel into the night skies more hopefully than accurately.

All Londoners jumped to the task of home defense. Men and women toiled 20 hours a day to put a ring of searchlights 40 miles in diameter around London. Young Lieutenant Warneford in his airplane managed to bring down a Zeppelin, not by firing uselessly into the bag—2000 bullet holes had failed to bring down an airship, owing to its many inflated compartments—but by zooming in the face of its machine guns and mowing down the officers at their gondola controls. He got the Victoria Cross; but he was killed in the next week. What we needed was a bullet that would ignite the Zeppelin gas.

Bombs began to fall often in London. Many were killed. And Mathy and his crowd went scot free. The results of the bombs varied greatly. The worst effect was that of a 700-pound charge of nitroglycerine which damaged no less than 400 buildings. There was a year of this sort of thing. Casualties and destruction grew worse. Something must be done.

The Inventions Board was organized hastily with strict orders to listen to every idea, suggestion, or plan. Some three hundred scientists were furnished with research facilities without stint, and set to work at the problem. I was one of these scientists. Then suddenly a message came to us—"Cease work." Somebody had perfected a bullet. Who, we wondered?

One day there had come into the harassed Inventions Board a quiet sort of man named Pomeroy.

"I've a scheme for burning the Zeppelins," he said timidly to an aide.

"What is it?" asked the aide, as patiently as is possible for a man who had listened to a thousand fruitless schemes.

"It's quite simple, sir. All you've got to do is put a pinch of dynamite in the nose of a machine-gun bullet and when it hits the Zeppelin—pop she goes!"

"Won't work. Sorry!" said the aide.

"But it has worked. I fired my bullet into a brick wall and it blew the bricks apart."

"There's your answer, Poweroy! Dynamite will explode that way, but not if it strikes the soft silk of a Zeppelin bag. You see, dynamite is nitroglycerine made safe by soaking it up in infusorial earth so that it loses its dangerous habit of going off at a feather's touch."

Pomeroy, keenly disappointed, went back to his little bicycle shop where his only research equipment was an old rifle and a bit of dynamite. But the very next day he was back. He sought out the same aide.

"I tried my bullet on a bit of silk—and it worked!"

The aide probably thought now that he was dealing with a mildly demented man; but Pomeroy persisted, and finally succeeded in getting a member of the Board to come and look at his invention. It must have been a rare scene in the bicycle shop; a man who knew nothing of science arranging a demonstration for a man who knew what dynamite couldn't do!

Pomeroy suspended a handkerchief, stretched it tightly on strings and fired his dynamite-nosed bullet through it; and the handkerchief went to ash.

Presently the scientist was on the tram, going home deep in thought. The tram itself was a perfect illustration of the secret overlooked by science which Pomeroy had quite innocently stumbled on. Here is the illustration: when you are in a tram or a train that is gathering speed, you are pressed back against your seat. In the same manner, the heavy infusorial earth of the dynamite in the bullet nose was set back, thus squeezing out in front a spray of pure nitroglycerine. And this would blow up on touching even a feather. The Admiralty at last had what it needed.

We found ourselves excitedly waiting for the next raid. The night of September 2, 1916, was a perfect night for a raid. Sure enough, after midnight we were awakened by the ground guns. I rushed to a window, thinking of Pomeroy. But soon the action began to die down; the ground fire ceasing and the searchlights fading. This could only mean a false alarm, or hat the Zeppelins had got clean away.

Then suddenly there was a miraculous flare in the sky. All London was lit up by a glaring fireworks-red, as vivid as sunlight; and one great gasp went up from the millions of watchers in the city. The lurid light showed people running from their houses into the streets. Two million cubic feet of hydrogen gas, and the great gasoline tanks made a light that was seen 20 miles away ,and during more than half a r inute the flaming airship dropped swiftly to earth.

Leefe Robinson was the pilot who had done it. He had hopped off at the first alarm, but everyone had missed the lone raider. Leefe scoured the clouds all the way to the coast, and was on his way home when he saw a dark shape below him—the Zeppelin LS-11, not Mathy's ship, sailing at 11,500 feet. Instantly he dived and poured his Pomeroys into her. She burst into bames at once.

The enemy did not realize yet that we had a certainty of defense. Kapitan Mathy was still carrying on. But very soon the little Pomeroy bullets brought down the next Zeppelin—at Billericay. And then came the sign that the enemy had doubts. Mathy himself came at a new height—14,000 feet. But the searchlights found him; a drum of Pomeroys snapped aloft, and once again the night sky was scarlet—Mathy was dead.

That was the end. The Pomeroy bullets had saved London—had made England invulnerable from airship attack.

His Hearing Restored

The invisible ear drum invented by A. O. Leonard, which resembles a miniature megaphone fitting inside the ear, entirely out of sight, is helping the hearing of a great many people. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. A request for information to A. O. Leonard, 70 Fifth Avenue Suite 437, New York City, will be given a prompt reply.—Advt.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

GUARD THE CHILDREN FROM AUTUMN COLDS

The Fall is the most severe season of the year for colds — one day is warm, the next cold and wet, and unless the mother is on her guard, the little ones are seized with colds that may hang on all winter. Baby's Own Tablets are mothers' best friend in preventing or banishing colds. They act as a gentle laxative, keeping the bowels and stomach free and sweet. An occasional dose of the Tablets will prevent colds, or if it does come on suddenly their prompt use will relieve the baby. The Tablets are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Settlers Who Settle

Saint John Telegraph-Journal (Ind.)—Three families out of one hundred settled in New Brunswick during 1928 have failed to stay put. Probably there may be more some other year. Possibly some others of the 1928 arrivals will, in the course of a year or so, drift away. But even so, even if no more than nine families out of ten fit permanently into a niche, it is a pretty good showing and argues generally careful selection of the settlers and farms.

All-expense Tours

"A desire on the part of travelers to go in special parties under expert tour management prompted our company to experiment with the all-expense, personally-escorted plan the past two winters," Passenger Traffic Manager W. J. Black, of the Santa Fe Railway, announced the other day. They were so popular we will repeat this winter. All necessary expenses are defrayed. The passenger pays a lump sum. The railroad takes care of all details from start to finish."

Five of these tours will be run by the Santa Fe in connection with the Burlington System, Chiago to California and back—a journey of about 6000 miles by rail, several hundred miles by motor, and requiring three weeks on the way. One will leave in January, two in February and two in March, 1930.

The itinerary includes the Indian-detour region around historic old Santa Fe, also Taos, where Kit Carson once lived. Grand Canyon National Park next will be visited, likewise Tijuana and Agua Caliente in Old Mexico. After viewing all principal points of interest in California—including Hollywood, Yosemite and Catalina—the return to Chicago will be by way of Feather River Canyon, Salt Lake City, the scenic Rockies of Colorado and Denver.

Britain's Milk Problem

G. T. Garratt in the Nation and Athenaeum (London): A special license should be required from all producers of liquid milk. All other milk should be labelled "commercial," and used exclusively for manufacturing into milk products. The license should only be granted to herds of more than a certain number of cows in milk—de minimis no curat lex. It should insist upon a proper water supply and cooling apparatus, a sterilizing plant, and a maximum bacteriological count.

SENTIMENT

Who can explain the operation of that sentiment which strips the object of our late passion of all its adventitious charms ,and reduces it to ordinary level?—G. P. Morris.

Minard's Liniment for Warts.

Empire "Crusade" Makes Progress

Notables Enlisting For Latest Effort Fathered in London

London. — The Empire crusade reached another stage when many notables met at dinner under the chairmanship of Sir Ave Bailey and heard Lord Melchett outline plans for the formation of an "Empire Crusaders'" organization with the object of the promotion of Empire trade by any means that an evamination of the problem suggest. Other speakers were Col. L. C. M. S. Amery, Lord Lloyd, Herbert Wiliams, and Sir Henry Croft. Those present included Sir Frederick Lewis, Lord Waring, V. A. Malcolmson, E. R. Peacock, Sir Henry Brittain, Henry Mond, Sir Edmund Vestey, Sir Harry McGowan, Sir Hugo Cunliffe-Owen, Lord Illingworth, F. C. Goodenough, Sir Herbert Austin, Sir William Lacks, Colonel R. W. Fennell, Sir Benjamin Morgan, Sir Robert Hadfield, John Bailey, and R. D. Blumenfeld. The standing of these people warrants the assumption that the Empire Trade crusade may become a far-reaching policy, removed to some extent from politics and possibly relieved of embarrassing free trade implications which would inevitably retard its progress here and overseas. Nevertheless, Lord Beaverbrook maintains a vigorous Empire free trade propaganda and has issued his manifesto in the Times, Morning Post, Daily News, and Daily Herald, calling attention to and explaining his campaign. There are numerous letters in the press demanding that Conservatism take a stronger line on the subject.

The Hampstead Parliament, a noted debating society, held a discussion on the Empire Free Trade problem and voted against the idea.

Lord Beaverbrook's activity is illustrated by the announcement just made of a "talkie" for Empire distribution, wherein he is shown and heard arguing the case. He is succeeding in forcing the Opposition press to deal editorially with his project.

SUMMER RESORTS IN NATIONAL FORESTS

A number of localities in the national forests in the provinces of Manitoba Saskatchewan, Alberta, and British Columbia have been found suitable for the establishment of summer resorts, and, in accordance with the policy of the Forest Service of the Department of the Interior, which administers the national forests, these resorts are being fitted with conveniences for summer residents and campers.

LOST POUNDS OF FAT —in 2 short weeks

Kruschen Salts will give many a fat person a joyous surprise. You can knock pounds off your weight and years off your age this safe and easy way. Every morning take "the little daily dose" of Kruschen in a glass of hot water before breakfast. This will mean that every particle of poisonous waste matter and harmful acids and gases is being expelled from the system. They are the cause of all the trouble because they remain in the system and accumulate in the form of excess, unhealthy fat. "I have lost several pounds in less than 2 weeks. It is so safe and easy. No dieting, no drugs. I have tried several other ways, but with no good results. Kruschen is all you claim it to be." Mrs. E. H.

After three or four weeks of the little daily dose, get on to the scales and see how many pounds of fat you have lost. Your mirror also will tell you what you have gained in health and vigour. Your eyes will sparkle, your skin will be clearer, you will feel unbelievably youthful and energetic—you will feel many pounds lighter and many years younger."

Red Rose Tea comes direct to us from the finest tea gardens, then straight to your grocer—brimful of flavor and freshness. Every package guaranteed. 70

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

INDUSTRIAL PSYCHOLOGY

What we have to avoid is not work; we have to avoid that which makes work a burden, sometimes an intolerable burden, sometimes an injury to life and health. What we have got to do is to see that exhausting labor is avoided, fitting the square pegs to the square holes, and the round pegs to the round holes, and at the same time to see that neither the square nor the round pegs are too large for the holes they are destined to fill.—The Earl of Balfour, K.G.

A TEACHER

Let the soldier be abroad if he will he can do nothing in this age. There is another personage, a personage less imposing in the eyes of some, perhaps insignificant. The schoolmaster is abroad, and I trust to him, armed with his primer, against the soldier in full military array.—Lord Brougham.

Stop Colds with Minard's Liniment.

TWO CLASSES

The human race is divided into two classes—those who go ahead and do something and those who sit still and inquire: "Why wasn't it done the other way?"—Oliver Wendell Holmes.

OCCUPATION

People who are occupied are never dull, are never melancholy, and never gt into mischief.

For 50 years the standard of excellence

"Now she's always hungry,"

...says TORONTO mother!

"NANCY is absolutely the picture of health again," says Mrs. D. Fraser, 6 Currie Ave., Toronto, Ontario. "A few weeks ago we had to force her to eat; now she's always hungry.

"I knew what to do when she became bilious, half-sick and listless, because we've always known about California Fig Syrup. Nancy's coated tongue and bad breath cleared up with the first few spoonfuls; and in just a few days her stomach and bowels were acting perfectly. She's gaining right along now."

California Fig Syrup has the full endorsement of the medical world. A pure vegetable product, loved by children. A gentle, but thorough cleanser of a youngster's system and a gentle energizer for sluggish bowels. A stimulator for lagging appetites and digestions; a help in building sturdy limbs and robust bodies.

The name *California* is important. No imitator can put that on his product.

There passed away at the General Hospital, Toronto, on Monday Oct. 21st, following an operation, Mrs. M S. Cassan, f Toronto, who was a resident of Iroquois for 25 years. Her husband was agent at the Iroquois C.N.R. station until a few years ago, when he was superannuated and they went to reside in Toronto.

• • •

Damage estimated at between $9,000 and $10,000 was caused at Crysler, six miles from Finch, early Monday, when fire destroyed a garage and restaurant, and threatened the business section of the village. Strenuous work by volunteer firemen kept the flames within bounds.

• • •

The first blast in the operations of cleaning out the shoals in the St. Lawrence River between Brockville and Kingston was shot off on Wednesday morning. The charge exploded was in the neighborhood of a ton of dynamite, and was carried out without any accident. The charge sent up a heavy spout of water and loosened a considerable quantity of rock.

Raoul Laflamme of St. Raphaels, Glengarry County, who was serving a term of life imprisonment at Portsmouth Penitentiary for the murder of his brother on June 10 of last year, died in the penitentiary hospital Sunday afternoon. At an inquest held at four o'clock Monday afternoon, a jury empanelled by Coroner S.J. Keyes returned a verdict that Laflamme came to his death of natural causes; that everything possible was done for him, and that no blame could be attached to anyone. Laflamme, who was sentenced to the life term by Mr. Justice Raney at the Fall Assizes at Cornwall on November 2, 1928, entered the penitentiary on December 4, according to the evidence given at the inquest by Deputy Warden Tucker.

GEORGE H. CHALLIES

NATIONAL ARMISTICE SERVICE AT CAPITAL

The National Armistice Day Service, under the auspices and direction of the Canadian Legion of the B.E.S.L. headquarters and the Ottawa branches, will be held at Parliament Hill, Ottawa, under the shadow of the Peace Tower, on Monday November 11th, at 11 a.m. This Canadian Legion National Armistice Day Service is one of the greatest and most solemn events of the year in Canada, and gives as many people as can attend an opportunity to assemble in the National Capital to honor the memory of those gallant young men and women who, during the Great War, gave their lives in the service of their country—Canada. Over 40,000 people attended the service last year.
