THE WINCHESTER PRESS

VOL XLII — WINCHESTER, THURSDAY, OCTOBER 18, 1928 — NO 25

COAL and WOOD

In our coal yard there is always a good supply of Coal and also Wood.

ANTHRACITE COAL

We have the famous *"Scranton"* and *"Lehigh Valley"* Coals in Stove and Chestnut Sizes.

Alberta (Lethbridge Diamond) one of the best Canadian Coals we can buy, makes real good fuel for stoves and furnaces.

PEAT

Expect a car in at once. This Peat is manufactured at Alfred, Ont., by the "Federal Department of Mines." We believe it is good. Give it a trial.

Our aim is to serve the public. Phone 149

FENNELL & WALLACE, Winchester, Ont.

Automobile Owners Attention!

We have just installed a electric valve grinding machine. This will enable us to do perfect valve grinding, which of course cannot be done by hand. Bring in your car and let us show you how your valves are ground with this machine. We assure you that you will be satisfied.

MELVIN'S GARAGE, Winchester, Ont.

Cloverdale Farmers' Club.

FARMERS ATTENTION !

This space in the Winchester Press should be read as a trend to Club Supplies. If you are unable to secure your supplies, do not become a Club Knocker. Just try being a Club Booster by placing your orders for supplies on time. If you desire a truck load just phone the President. It will be delivered at a reasonable charge.

We have just picked up a good buy on a car of Extra Quality Wheat. As this car is going fast, do not delay in placing your order, whether it be large or small.

H. STOODLEY, President.
THOS. STOBO, Secretary.

You Can't Afford It!

You can't afford to buy anything but the best in flour and feed—it is the cheapest in the long run.

And it is only the best that we handle.

H. McMaster, Winchester.

MEN'S WEAR - **UTMAN'S** - BOOTS SHOES

We invite you to drop in and inspect our goods and be convinced that our quality and prices are right.

We have Windbreakers for Men, Boys and Youths.

A new range of Pants for Men ranging from $2.50 to $5.00

Men's Blue Melton Overcoats $20.00

Men's Nice Tweed Overcoats at $18.00

Other lines worth consideration are our Mitts & Gloves, lined and unlined; Socks, Mackinaw Socks, Bush Rubbers, Rubber Boots, Ladies' Fine Footwear with style and good fit.

Have your feet looked after the Dr. Scholl way.

I am agent for the Canada Brass Products.

Telephone 65, A. F. UTMAN.

WORTH REPEATING AND REMEMBERING

Judging by some of our shop windows Halloween is not far away.

Thanksgiving Day less than three weeks away. After that Christmas.

An Auction Sale advertised in the Winchester Press is sure to attract a crowd.

When you see two men in the front seat and two women in the back they are married.

Many a mother wishes that girls would be as smart about their getting up as they are about their get-up.

Giving the tongue a rest once in a while is a grand idea. Too much talk in a small town always causes trouble.

The fall rains are becoming as serious a problem to the farmers as the spring rains were. Ontario has surely gone wet.

One of the cleanest cut remarks we have ever heard is, "The nice thing about telling the truth is that you do not have to remember what you did say."

Self-starters have taken the place of cranks with automobile. When the same thing happens to communities we will see better times and greater improvement.

The tourist "industry" is now quoted as Canada's second greatest source of income. It has amounted to $275,000,000 the past year. It is greater than the mineral production of the Dominion but less than the wheat exports.

Premier Ferguson announces that he will, at the next session of the Legislature, introduce an 'Old Age Pension Fund Bill.' It might be added that Premier Ferguson has been looking after not a few of the old chaps since he came into power—but they were all Tories

The Winchester Press wants to know if there is anything more deceptive than the covering of peaches. Editor Ross we're surprised!—Arnprior Chronicle.

Now, look here, brother Jeffery, the peaches you have in mind are not the peaches the Winchester Press was speaking about. We are much of the opinion that our Arnprior brother visits Keiths, at Ottawa, altogether too regularly.

Bowmanville Statesman—This is not original but from a western exchange. It is good and speaks truly, saying "Every person who has conducted a business in which the extending of credit is practised must be impressed with the large number of people in the world who appear to be dead-beats. There are a few in every community who make pretentions to business and social standing, yet were never known to pay a bill when it was due and seldom pay one at all, excepting as a result of hounding or legal action. On the other hand, we have today and always will have, the fellow who always seems to be up against it, who is always striving to meet his obligations, yet always slow pay, who will eventually meet his obligations. Morally there is no difference between one who fails to pay an honest debt when he can pay it, and one who robs a till or cracks a safe. In fact, if there be any decency in either, it appears to be on the side of the common criminal, who at least does not abuse confidence and friendship. Credit bureaus are gradually making the path of the dead-beat a little more thorny, but he still flourishes to an extent that is a serious handicap to honest citizens."

Interesting Subject

"The Problem of Life and How to solve It" is the subjecct of a series of talks being given by Rev. Dr. Cleaver, of Toronto, in the United Church this week. According to the reverened and learned preacher "Prayer" is the solution of the problem, and all life's difficulties, anxieties, cares, sorrows, can be solved by prayer. But, according to the preacher, it depends much on the kind of prayer. So one solution involves another problem. But Dr. Cleaver is a thoughtful and convincing speaker and a clever thinker, so if you are at all interested you may hear him to-night and to-morrow night on this important subject in the United Church.

Carswell—Summers

A very pretty but quiet wedding was solemnized at the home of Mr. and Mrs. C. A. Summers, on Thursday afternoon, October 11th, when their daughter, Ada Aileen, became the bride of Allan Bryson, son of Mr. and Mrs. A. A. Carswell, of Bryson, Que.

The bride was attended by her sister, Miss Clara Summers. The best man was Mr. Everett Carswell, brother of the groom.

Rev. W. E. Hamilton officiated. The ceremony was performed in the living room under an arch prettily banked with ferns and autumn flowers, which were also used in profusion throughout the house along with white bells and pink and white streamers.

The bride, who was given in marriage by her father, entered the living room to the strains of the Bridal Chorus from Lohrengrin, played by Miss Winonah Reveler, looked charming in a gown of rosebloom crepe romaine, and wore a bandeau of silver leaves in her hair. She carried a shower bouquet of sunset roses and maiden hair fern. The bridesmaid wore a dainty frock of gobelin blue and gold georgette with a corsage of pink roses and lilies-of-the-valley, and wore a gold bandeau in her hair.

During the signing of the register, Mrs. W. A. Kinch, sister of the bride, sang very sweetly, "O Promise Me."

Following the ceremony a buffet luncheon was served. Among the many beautiful gifts was a Silver Electric Percolator, the gift of the employees of the Gatineau Power Co.

Mr. and Mrs. Carswell left on a motor trip for Montreal, Que., and other eastern points For travelling the bride wore a smart costume in wood brown tones with hat, shoes and handbag to match.

On their return they will reside in Ottawa, Ont.

LOCAL AND GENERAL

Rev. H. A. Reid of Ottawa, will preach in the Baptist Church, Ormond, next Sunday morning and evening.

The Women's Missionary Society of the Presbyterian Church, will hold their annual Thank Offering on Sunday, Oct. 21st, at the morning service. Mrs. Chas. H. Thorburn, of Ottawa, Provincial Treasurer, will address this morning.

Mr. Stanley Jenkins, who as a lad worked in A. Sweet & Coy's store, was in town last week looking over old scenes and hunting up old acquaintances. It is over fifteen years since he left here. He is now a fairly prosprous business man at Utica, N. Y.

The Ladies Aid of the Presbyterian Church will hold a sale of home cooking and afternoon tea in the Sunday School Room on Saturday afternoon, Oct. 20th.

The October meeting of the W. C. T U. was held at the home of the President, Mrs. N. W. Beach. The Evangelistic Supt., Mrs. J. I. Johnston took charge of devotional exercises and gave a most inspiring message from Luke 19, setting forth the value of sincerity and earnestness in a true Christian life The President took charge of business part of the meeting. Minutes of last meeting were read and approved. A Card was read from Mrs. Edgecombe asking that a list of names of those wanting "Annual Report" be either sent or given to delegate. Mrs. Boyes, who had been chosen to attend Provincial Convention held in Toronto from Oct. 8th to 12th. Mrs. A Smith consented to help on Parlour Meeting Com. Meeting closed with Mizpah Benediction.

Evangelistic Meetings

Evangelistic meetings will be conducted by the evangelist J. M. Hames, of Greer, S. C., in the Wesleyan Methodist Church, Inkerman, from Oct. 24 to Nov. 11. The singing will be in charge of Miss Marion Whitney of Ottawa.

Anniversary Services

Anniversary service will be held in the United Church, at Inkerman, on Sunday and Monday, Oct. 28. 29. Rev. A. O. Lloyd, of South Mountain, will be the preacher on Sunday and Rev. Allworth Eardley, of Dominion Church. Ottawa will oonduct the Sunday evening service The anniversary supper will be held on the following Monday evening. Tickes for supper may be had at 50c each.

Awarded $1875 and Costs

At the Supreme Court of Canada, at Ottawa the case of Hiram and Bernice Shaver formerly of Winchester, and Elizabeth Cameron, of Ottawa, was tried. The case arose out of a collision that occurred last spring at the corner, a mile west of Winchester, when Miss Cameron, who was coming from Ottawa, in making the turn went to near the ditch at the south side. In order to save an upset she turned sharply to the left and came in collision with a car Mr. Shaver was driving. He had his wife and children with him, and they were all thrown into the ditch and somewhat cut and bruised After hearing all the evidence the plaintiffs were awarded in $1875 and costs.

The amount of damages was made up as follows: Mr. Shaver $500 Mrs. Shaver $800, the child $200, while $375 was allowed for medical and surgical expenses.

Coming Big Banquet

The Dundas Presbytery of the United Church have arranged for a big Laymen's Banquet to be held in Lannins Hall, Winchester, on the evening of Thursday, Nov. 8th. Rev Dr. Endicott, retiring Moderator of the General Council of the United Church in Canada, will be the chief speaker, and Mr. J. H. Gundy, of Toronto, an outstanding layman of the United Church, will be present to give an address. Dr. Endicott has recently returned from a world's survey of the work of the United Church, home and abroad, and his address will be worth a big effort to hear. The banquet is for the whole Presbytery, and is being put on and managed by the Ladies Aid of the Winchester Church. The tickets are placed at one dollar each, and it is expected that between three and four hundred ladies and gentlemen will be about the banqueting board, and listen to the splendid program of addresses and special music that is being prepared.

Was Complete Wreck

The remnants of Billy Lloyd's Chrysler Sedan, struck amidship by the fast C. P. R. Montreal-Toronto flier last week, were gathered up and brought back to the store room in the rear of Hotel Winchester. The engine was the largest remnant, and it was badly damaged. The front bumper and one bumperette were undamaged. But that was about all. A more complete wreck of a car would be hard to imagine. In fact the sedan was literally chewed up by the big locomotive. And just think of the awfulness had the car been filled with men and women. It makes one shudder to think of it. Say, one can't be too careful when aperoaching a railway crossing.

Chinaman Shot At

An attempt was made to rob Henry Fong's Chinese restaurant at Chesterville, on Tuesday night, and someone, as yet unknown, fired a shot at the Chinaman, missing him only by inches. At the time of the attempted holdup Fong was standing near the sink in his kitchen peeling potatoes when he heard a noise as if some one was coming in at the back door. He opened the inside door and passed out the screen door holding it open while he warned the party to get away. He was told to stop his noise and the shot was fired likely from a twenty gauge sawed-off shotgun judging from the unburned wad which was picked up later. The shot was low, passing through the open doorway and entering the woodwork of the sink about nine inches from the floor, going through the other side about six inches above the floor. When the holes were lined up it showed that whoever fired the shot must have stood inside the open shed about six feet from where Fong stood with the doors open. An electric light bulb had been removed from its socket in the shed to prevent Fong from getting a view of the intruder as he would switch the light on before opening the door. The latter has been place in the hands of Provincial Officer Jakeman.

LOCAL AND GENERAL

The Nation River is now almost as high as it was in the Spring.

Country side roads are impossible for a motor car, and some parts of the highways are not much better.

Keep in view the play to be presented on Thanksgiving night Nov. 12th, in behalf of the Public Library.

Special for Saturday, Oct. 20th—Felt Hats, regular $3.75 for $2.69, at Miss M. Brown's.

Mrs. Saunders, Toronto, specialist in Mathematics has been engage as teacher in the Winchester High School to succeed Mr. Ashdown.

Those giving 1.00 were, M. Bailey, Mrs. Eagleson, Mrs. Angus, A friend, C. A. Summers, M. D. McDiarmud, J. E. Utman, E Flora A. E. Goodfellow, W. F. Workman, C. Emerson, and Oscar Pierce. A friend 25cts. Total $50.25.

The regular monthly meeting of the Women's Institute will be held in the United Church Sunday School rooms on Wednesday afternoon at 3 o'clock at which a new President is to be elected. Will all interested in Institute work kindly be present. Notice the change in day.

On A Long Trip

Mr. Hilliard Annable, who with his mother Mrs Jas. Annable, left on a lengthy motor trip some weeks ago, writes from Bristow, Iowa. "Leaving for New Mexico, about 2000 miles. Going through Iowa, Nebraska, Kansas, Oklahoma, Texas and New Mexico. My mother is fine. I am hoping mother will lose her rheumatism in New Mexico. Had a lovely summer. My uncle here is running for State Representative. Mother and I want to be remembered to all friends. Mrs. Annable's address is 211N Ken Ave, Roswell, New Mexico, U. S. A.

Miscellaneous Shower

Mrs. G. C. Reveler and daughters were hostesses at a miscellaneous shower on Tuesday, October 9th in honor of Miss Ada Summers, whose marriage took place October 11th. The rooms were decorated with autumn flowers Miss Summers, who was taken by surprise, was the recipient of many beautiful gifts, which were presented in a large basket decorated in pink and white and was drawn in on a decorated wagon by Master Kenneth Watts. The guest of honor was seated on a decorated chair, which was banked with ferns and autumn flowers. The gifts were unwrapped by Miss Tottie Reveler while Mrs. Albert Johnston read the greetings. Ada thanked her many friends in a few well chosen words and then all joined in singing For She's a Jolly Good Fellow After refreshments were served the guests registered in the Bride's Book.

Annual Meeting

The annual meeting of the Winchester Citizen's Band was held on Wednesday, Oct. 10th, at the close of the weekly practice, nearly every member being present. The books showed that the Band had a very successful year, and after all expenses are paid, there will be a small cash balance, which is the first time in quite a number of years that the Band year hasn't ended up with a deficit to be paid off. The election of officers took place as follows:

President—Mr. Frank Hogoboam.
Vice President—Mr. Lorne Hogoboam.
Secretary—Mr. Oscar Wallace.
Treasurer—Mr. Geo. Mowatt.
Com. Member—Mr. John Johansen.
Auditors—Messrs Jack Latimer and Stewart Anderson.

Mr. J. H. Larue will, in all probability, be engaged as Band Master, for the coming year.

Motorized Romance

He was a sport model.
She was a runabout.
Both were self-starters.
They ran into each other by accident.
They broke the speed limit to the altar.
They garaged in a kitchen apartment.
They called it a home, but really it was only a parking place.
They thought they had more to say to each other than they could say in a lifetime, and both stepped on it.
But soon they ran out of gas.
They coasted a while, but the old boat could't swim uphill.
Each began to sigh for a new model.
The inevitable smashup quickly followed.
Now they are agreed that romance is a flivver.
But, all the same, both are in the used car market.—A. G. Reis.

SOCIAL AND PERSONAL

Miss Helen Taylor spent the week-end in Ottawa.

Mr. J. G. Challies of Morrisburg, was a visitor to Winchester this week.

Mrs. L. Wilson, Toronto, is the guest of her brother Mr. J. H. Ross and Mrs. Ross.

Mrs. A. E. Goodfellow who has been at her parenrs home at Thornberry, has returned home.

Miss Lillian Higginson, R. N., of Inkerman, spent the week-end with Mrs. Lorne Kinkaid.

Mr. and Mrs. Orr, of Hemmingford, Que., were guests of Mr. and Mrs. A. Sweet, this week.

Mr. and Mrs. C. L. Hartley, of Athens, spent the week end with Mr. and Mrs. Arnold Docksteader.

Rev. Dr. Cleaver, of Toronto, is guest at the United Church Parsonage during his stay in Winchester.

Miss Muriel Robinson spent the week-end the guest of her friend, Miss Phyllis Kendall, of Smith's Falls.

Mrs. Martin Fader has returned home after spending a week with Mr. and Mrs. P. H. Fader at Leamington, Ont.

Mrs. Boyd has returned home after spending the past week here with her mother Mrs. Ed Shaver, who is ill.

Misses Katherine Hartrick and Vera Gauthier, of Ottawa, were week end guests of Mr. and Mrs. A. D. Beattie.

Mr. Chas Cross, who has spent the past couple of months in the harvest fields of Saskatchewan, returned home on Monday.

Miss Grace Irving has returned from Kingston where she was the guest of the Misses Mae and Maude Rose for a few days.

Mr. and Mrs. Ralph Ault and daughter Joyce, of Montreal, were week end guests of the former's parents, Mr. and Mrs. J. W. Ault.

Mrs Thos Brayton and daughter, Marion, of North Bangor, N. Y., are the guests of the former's sister, Mrs. Geo Barkley.

The World's Plague of Noise

At a time when the boldest American criminals are known as "racketeers"—men, that is, who even in the midst of the general hubbub manage to make a racket—there is more than usual significance in a campaign being waged, in England and other countries, against what one indignant commentator calls the most "malignant plague" that civilization has ever confronted. "The noise question," says Prof. Henry J. Spooner, of the London Polytechnic School of Engineering, in the "Nineteenth Century", "is a world problem, and a very comprehensive one at that, involving interrelated factors of a wide range and great importance—factors that, strangely enough, have hitherto received little or no attention from the authorities responsible for the health of the comumniy." Professor Spooner goes on to call attention to the fact that a resolution was unanimously passed at the annual meeting of the British Medical Association at Cardiff, last July, about the effect of noise on public health. A few days later, the Home Secretary, in reply to a question by Sir Robert Thomas, M.P., relating to street noises, promised to discuss with the Ministers of Health and Transport whether anything could be done. Further, Professor Spooner is informed that the Society of Medical Officers of Health in England has forwarded a suggestion to the Medical Research Council that "the effect of extraneous noises on health" is a suitable subject for early investigation and research. And, best of all, he has reasons for believing that an appeal will soon be made to the Medical Organization of the League of Nations to consider the abatement of preventable noise in the cause of humanity.

The assumption that traffic and industrial noises can not be abated is vigorously disputed by Professor Spooner. "This common fallacy," he says, "can not be too emphatically denounced, as such statements display a lamentable amount of ignorance as to the pathological powers of the modern engineer. The regrettable fact is that engineers have very rarely been called upon to design machinery of any kind from the standpoin tof noise; and doubtless future generations will look upon these times as being barbaric—an age of folly vulgarized by an absence of quietude and repose, and notorious for uncontrolled devastating din that tortured the thinks, deprived countless invalids and workers of recuperative sleep, impoverished owners of traffic route properties, increased th overhead costs in modern business, and shortened the lives of countless sufferers." In this connection Professor Spooner explains that his deep and lasting interest in the prevention, elimination or reduction of unnecessary noise was first aroused by some very pathetic cases of nervous breakdown that came under his notice while he was professionally engaged on industrial noise problems many years ago. He continues:

"Had I not witnessed day by day and month by month the almost paralyzing effects of intermittent nerve-shattering noise on men who were physically strong, I could not have believed it possible. Since then I never pass a hospital or nursing home situated in a busy thoroughfore without a feeting of pity for the poor sufferers within, whose very lives may be dependent on the rcuperativ powers of undisturbed sleep. If 'the advance of civilization means but the enhanced capacity of the human race for suffering,' that capacity of the ordinary citizen is being severely taxed daily by the effects of noise and vibrations in traveling to and fro mhis work-place.

Serious Sheep Loss Can Be Prevented

A Little Iodine in Food Will Eliminate Goitre and Improve Health

A Great Scientific Achievement

Science now offers a means of eliminating many of the losses which were regarded as inevitable a few years ago. Goitre in sheep, hairlessness in pigs and joint-ill in colts, for instance, can all be prevented as a result of recent research. These three things, which exact a heavy toll in Canada each year, never visit the farm where the stockman feeds a little iodine, according to Lionel Stevenson, newly appointed Provincial Zoologist in Ontario.

Ioine, Dr. Stevenson points out, costs less for ten years than the loss or weakening of a single lamb. "There is no substitute," he says; "iodine must be present in the food. What you lose on one dead, weak or runt lamb, would pay for all the iodine required by your flock for ten years. Why take a chance with goitre when it costs little to insure your flock against such losses."

Not only does the use of iodine prevent goitre in sheep, but it also tones up the general health of the animal, according to Dr. Stevenson. There are larger lamb crops, greater gains in wool and meat, where iodine is regularly fed with the food ration.

The Canadian Co-operative Wool Growers recommend feeding iodine in the form of Potassium Iodide. Only one half ounce per sheep per year is required, but this amount, while small, is absolutely essential. "Buy medicated salt containing potassium iodide," they say, "or preferably, prepare it yourself by dissolving 4 ounces of potassium iodide in a pint of water. Sprinkle this over 100 pounds of salt and mix well. Let the sheep and lambs help themselves every day. Don't let the sheep get salt hungry."

"A girl's trump card is her femininity," says a popular woman novelist. That obviously means a short suit these days.

Forest Fire Caused by Smokers

A U.S. View of a Question Vital to Canada's Forest Wealth

Smokers have been responsible for over a third of all the man-caused forest fires in the national forests of Oregon and Washington, according to a report just issued by the U.S. Forest Service. With a total of 293 man-caused fires so far this season, 100 were started by careless smokers. According to a press bulletin just issued by the Service, every time a careless smoker throws a burning cigaret into the dry grass or needles of a forest floor he is giving the fire demons odds of qne to nine that it won't start a fire. We read:

"These odds, coupled with the fact that there is smoked and discarded in the United States the amazing total of 171,232 cigarets per minute, day and night, during the entire year, are believed to account for the large percentage of man-caused forest and brush fires that are started by smokers. Even if only one-third of the cigarets consumed throughout the country were smoked out-of-doors, there would still be over 50,000 chances a minute of a fire, foresters point out.

"To determine the fire hazard from smoking materials, P. D. Sale and F. M. Hoffheins, of the U. S. Bureau of Standards, recently made a series of tests with nine brands of cigarets and eleven brands of cigars. The tests were made by placing the lighted cigar or cigaret butts in a dry grass pad attached to a screen.

"Some tests were made in still air; others with winds of various velocities generated by a small electric fan. From measurements of butts found on concrete floors, pavements, and bare ground, it was estimated that the average cigaret butt is about one and one-fourth inches long; so half-length cigarets were lighted and burned down to one-fourth inches for use in these tests. Cigar-lengths used in the tests ranged from the whole to any length sufficient for relighting and testing.

"In fifty tests each with cigars and cigarets in still air no ignition of the grass took place. In a wind of one to three miles per hou the ignitions of cigarets amounted to 41.2 per cent.; in a three-to-four-mile wind 85.3 per cent.; in a four-to-five-mile wind, 50.8 per cent.; and in a five-to-eight-mile wind, 57.7 per cent.

"In cigar tests in a one-to-three-mile wind, the ignitions were 18.5 per cent.; in a three-to-four-mile wind, 8.1 per cent.; a four-to-five-mile wind, 25.4 per cent. The ignitions increased to 39.1 per cent. in a nine-to-twelve-mile wind, which was the highest in all the tests that were made.

"Cigarets took from 19.2 to 33.1 minutes to burn their full length; cigars from 2.3 to 5.17 minutes. The average time the cigarets took to ignite the grass was 5 to 9 minutes. The cigars took on the average for the various wind velocities and lengths all the way from 1 minute, 18 seconds to 4 minutes and 28 seconds.

Japs in Brazil

Tokyo.—Thirty thousand Japanese emigrants will eventually go to Brazil each year, according to Ikutaro Aoyagi, who has just returned from South America as a representative of the Federation of Foreign Immigration Associations. Although Japanese immigrants are welcomed by the Brazilian Government, he declared, they are slow in taking advantage of this opportunity, there being only 60,000 Japanese settlers in Brazil as opposed to more than 2,000,000 Italians and 1,000,000 Germans.

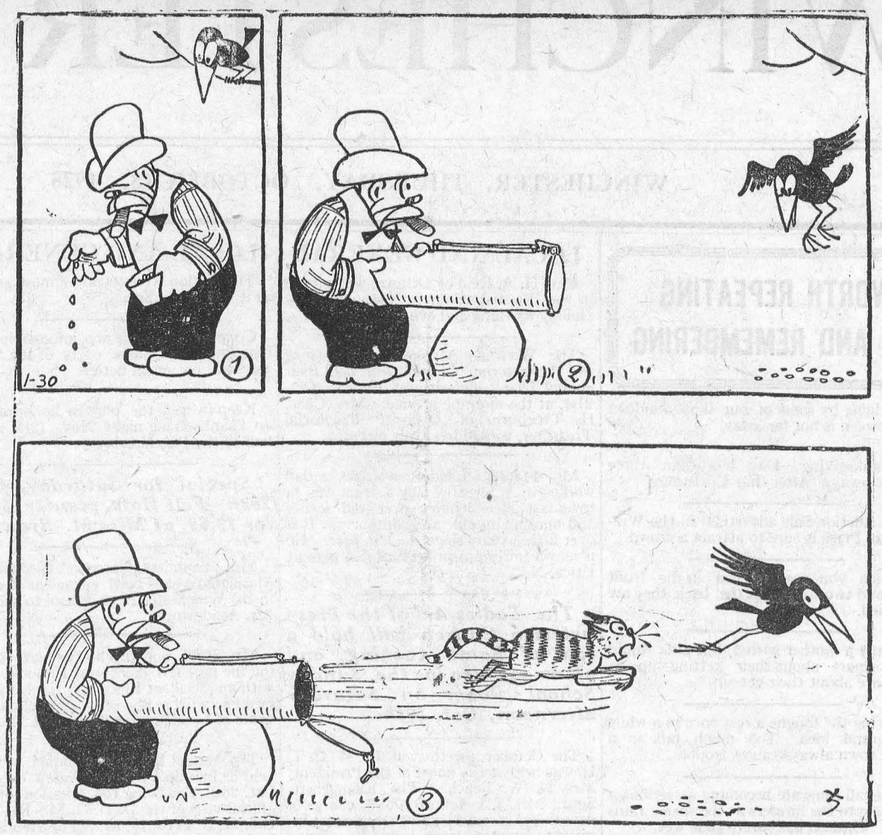
The federation has just bought 30,000 rectares off fertile land, about 200 miles south of Sao Paulo. Mr. Aoyagi expects to have 900 Japanese families settled on this land during the next three years. Another plantation of 130,000 hectares in the same district is to be purchased soon.

The work at first is not easy, he says. "The settlers have to cut down all the trees first and use the timber in building houses. This requires about a year's work. When the trees are felled and the land cleared, cultivation can begin. Coffee, rice, beans, corn and miscellaneous vegetables can be planted for the use of the colonists.

"Any Japanese who wishes to emigrate to Brazil should possess at least $1,000 in order to start life there. He needs it for traveling expenses, to buy the necessary agricultural implements, and to provide the first year's food for his family. After one year all that the settler has to buy are kerosene, oil, salt and clothes, for his fields will produce all the grains and vegetables necessary to feed him."

We all finally come to do the things we swore we wouldn't.

ADAMSON'S ADVENTURES—By O. Jacobsson.



Orange Culture Spreads Across Plains of Judea

Palestinian Jews Plant New Groves in Costal Area to Supply European Markets

Jerusalem.—The economic position of Palestine, according to the report just submitted by the British government to the League of Nations on the administration of that mandated country, points to an all-around improvement during the last year. The trade returns show a reduction in imports of £410,000, while exports of home products show an increase of almost £600,000 over last year's figure. There were fewer business failures, an increasing number of workers were absorbed by industrial enterprises and many undertakings had to run to full capacity both in day and night shifts to cope with home and foreign demands.

A striking feature is the development of the new industries established by Jewish immigrants and Zionist capitalists domiciled abroad. Cement exports amounted to four times the quantity given in the previous returns; table oils to eight times last year's figure, and a substantial increase was registered in exports of leather goods, hosiery and cigarettes.

UNEMPLOYMENT DECREASES

Up to the present this trade improvement appears to have been consistently maintained, so that there is every hope of the Holy Land entering upon a new period of economic prosperity.

A shortage of workers is already noticed, for the majority of those without employment are either unskilled, or building operatives, or physically unfit. The Manufacturers' Association complains that progress is being held up in the leather and knitted goods trade, the clothing and other industries, owing to a lack of qualified labor; a new tannery, for instance, has been forced to import Italian and Greek labor from Egypt.

But the factor mainly contributing to the improved situation in the labor market, and bringing in new capital, is the impetus that has been given to the orange growing industry. A boom in orange culture, the most important branch of Palestinian agriculture, has spread over the whole coastal plain of Judea and Samaria. Thirteen thousand dunam (3,250 acres), were laid out in new orange groves this year, and for additional acreage negotiations are still pending. The area so far yielding crops is about 30,000 dunam, while another 30,000 have been planted in the last five years.

FOREIGN JEW CAPITALISTS

American, Canadian, Hungarian, German and South African Jews are rivalling their fellow Jews in Palestine in this industry, impelled by two weighty considerations: the will to rebuild the Jewish homeland, and the enticing prospects of substantial profits (about 20 per cent. net on the investment) to be derived from this rapidly developing orange production.

A barrister was met by a friend the other day in the street with a number of law books. Pointing to the books, his friend said, "Why, I thought you carried all that stuff in your head!" "I do," quickly replied the lawyer with a wink; "these are for the judges."

Old Order Goes

Afghan Precedent Thrown to Winds as Queen Souriya Discards thePurdah

Calcutta—The news that Queen Souriya and members of the Afghan royal family have finally discarded the purdah and have dined unveiled in Kabul in the presence of persons other than members of their family, has come as a welcome surprise, says the Statesman.

There was some doubt as to whether, as in Persia, the Queen would on her return to Afghanistan disappear once more into the obscurity prescribed by the law of the mullahs. This event, therefore, is of great significance to the Moslem world. It is another tribute to the courage of King Amanullah, who has deliberately and at great personal risk thrown off the age-old yoke of the mullahs, who, though they may lament this affront to Islam, dare not openly belittle the King's command.

A deputation of mullahs waited on the King some time back and bewailed his act in allowing the members of his family to go unveiled in public. The King asked them if there was any purdah in their own villages.

"No, Your Majesty" they said "for the villagers are poor folk and their women must needs go out unveiled to earn their livelihood."

"Since you know charity begins at home," replied the King, "when you have made your villagers appreciate the blessings of the purdah come back to me and I will obey you."

So the mullahs departed unsuccessful.

SEA ELEPHANT QUITE SOCIABLE

He is a guest in the Berlin Zoo and allows his host to stand on him when he is accepting a little light refreshment.

A Great Scientific Achievement

Ottawa, Canada.—The development of Garnet wheat, a new variety of great promise, is almost an epic in the realm of scientific achievement, according to the Dominion Cerealist at the Canadian Government Experimental Farm, Ottawa. This new wheat was placed on the market only two years ago after almost half a century of patient but determined effort connected with its breeding and evolution.

In 1914 Garnet wheat was included in the regular variety test-plots at the Experimental Farm, at Ottawa. In 1919 it was tested at the Experimental Farms in the Prairie Provinces. In 1925 the Branch Farms were able to sow 320 acres, from which was produced about 9,700 bushels. In 1926, some 6,954 bushels of Garnet seed were offered to Prairie farmers with a four-bushel limit to any one farmer. Some 2,826 farmers, including 862 soldier settlers, secured two to four bushels lots and this, together with seed from increasing test samples by two or three seed growers, made a grand total of some 14,000 bushels, or enough to seed 12,000 acres.

This year Garnet wheat was observed growing in all parts of the west. The section east of Prince Albert and north of Tisdale, Sackatchewan, is practically a Garnet country. It is an early maturing variety. It usually ripens from six to twelve days ahead of Marquis and has consequently enabled the area of wheat production to be extended much further northward.

In 1903 it was reported wheat would never grow in the Peace River country, Alberta. This year Garnet was being cut here on August 21st. Crops were more advanced in the Peace River district than further south, and some of the west's finest crops were seen there. In the Rio Grande section of the Peace River country on August 22nd(31 varieties of wheat were identified, and of these 16 were Garnet, seven Marquis, five Huron, one Turkey, one Ruby, and one Reward, which indicates the way in which Garnet wheat is spreading in Western Canada. As an early maturer and good yielder it has no equal. Its discovery is regarded as an epoch-making contribution to Canadian agriculture.

Television Is Show Feature

Los Angeles Exhibit Proves New Subject Real Public Attraction

Los Angeles—Television radio-casts and receptions featured the sixth annual National Radio Exposition which was brought to a successful close here recently. Record crowds were in attendance at the Ambassador Auditorium, where the annual event was staged, every day of the six-day run.

The television booth was always a center of attraction. Here "seers-in" as well as "listeners-in" were afforded an opportunity to witness all of the steps in the process of television radio-casting and reception.

Under the supervision of a radio engineer images were radiocast from one part of the auditorium and picked up in another, and although in its early stages of development with ample room for improvement the demonstration was nevertheless interesting and pleasing to large gatherings of radio fans.

Many improvements in both cabinet work and the instruments themselves were noted, and the scores of display booths gave a comprehensive view of the year's developments in the radio field.

The cream of radio entertainment from 15 stations throughout Los Angeles County was heard during the exposition given alternately on five different stages in different parts of the auditorium. When one program was finished on a stage in one section of the building the lights were turned off on that stage and a stage in another part of the exposition would be illuminated and an other group of radio stars would appear.

Abit of color was added to the show when all the performers appeared in special costumes instead of street attire which they ordinarily wear when appearing before the microphone.

A new hotel known as the Marquis, named after the famous variety of wheat of that name, has been opened at Lethbridge, Alberta. It was built as a community enterprise at a cost of $275,000.

The notice declares that after the expiration of one month from the date of publication the company will apply to the Minister of Public Works for permission to construct the dam, locks and gates and carry on the development.

Economical Baby Garments

A slip made to be worn under baby dresses 22 inches long can generally be worn without alteration until the child is three or four years old. Then, if there is anything left, it can easily be lengthened by stitching to the buttonhole side of the shoulder strap a neat piece as wide as the shoulder and of the same material. Point each end of the new strap and make a new buttonhole to correspond with the button on the slip.

When baby begins to creep his dresses are often in his way. As a result, they wear out rapidly, due to constant strain. The busy mother will find it a great help to put three large snaps on the under side of the hem of each dress so the skirt may be snapped together between the legs. The fasteners do not show, so the dress may be worn snapped together or not as occasion demands.

Simple Creepers

Creepers for the baby that are easily made as well as easily buttoned and unbuttoned, washed and ironed, are cut from a plain kimono or butterfly pattern and finished with a narrow hem at the bottom. Of the same material make a pointed strap about 4 inches wide and 10 inches long when finished and adjust it to the middle of the front of the dress so the strap will come up between the legs and button at the back of the garment. Make three buttonholes on the strap at the back, one at each point, and sew on buttons to correspond.

These are much more convenient than bloomers both in the making and ironing. When the child walks, the strap may be removed and applied as two pockets over the most worn spots, if necessary. This gives him a short play dress and the entertainment that a pocket always affords little folk.

Rompers that are thin and outgrown so it is impossible to wear underclothing beneath them, often make splendid nightgowns for summer without any alteration whatever. Such little garments of nicer material and in good condition may be cut off at the top of the curve at the crotch and finished with a narrow hem or a binding of color to match the material, to form a smock if the child is a little girl, or to tuck into jumpers or suspender pants if a boy With a little care in the selection of material and style for the trousers, one may get together remarkably attractive suits at practically little or no expense.

Utilizing Discarded Items

When the baby grows too large for his basinette it is often a problem ho wto use his sheets to advantage. One mother uses these in couples for slips for the older girls and nightgowns for the smaller children. The latter are cut from the kimono pattern and have a seam at the shoulder. The portions cut out under the arms furnishes material for cuffs on the sleeves or for lengthening the sleeves, and a straight band for a loose collar at the neck of the tennis-flannel gowns.

By the way, if these kimono-style garments are put together at the underarm seem by a strip of straight goods about an inch wide, they can be worn until the cloth is in shreds without being torn across the armhole. The straight piece takes all the strain that otherwise comes at a sharp cut in the material.

To apply such a piece, cut off the underarm edge of the pattern about ½ an inch on both front and back portions and stitch both to the straight strip, one on each side of it. On nightgowns and underwear the strip may be sewed to form a flat seam and if the selvages are used as much as possible when cutting or tearing the strips, only one side of each strip will have to be folded down to give a smooth finish.

New Color in Stockings

Apparently the public has shown signs of tiring colors which has held sway for several seasons. At any rate drastic changes are appearing.

Blues and greens matching the tones of popular dress materials are offered for afternoon wear, and a color called valerie for red dresses. A subtle pink, named petale, is in vogue for white and silver slippers, as is also a delicate stocking dayed in opalescent ombre tints. Soiree, a pale mauve, is suitable for all frocks in the purple scale. A yellow green is offered for evening dresses of chartreuse and willow.

Ethyl—He said he would kiss me or die in the attempt. Methyl—And did you let him? Ethyl—Well, he has no life insurance, and I pitied his poor old mother.

MUTT AND JEFF—Bud Fisher

My Word! Look Who's in London.

OWL LAFFS

BY O.W.L. (ON WITH LAUGHTER)

Oh, horse, you are a wonderful no buttons to push, no horns to honk; you start yourself, no clutch to slip; no spark to miss, no gears to strip; no license buying every year with plates to screw on front and rear; no gas bills climbing up each day to steal the joy of life away; no speed cops chugging in your rear, yelling summons in your ear. Your inner tubes are all okey, and thank the Lord they stay that way; your sparkplugs never miss and fuss; your motor never makes us cuss; your frame is good for many a mile; your body never changes style; your wants are few and easy met; you've something on the auto yet.

Fable: Once upon a time a girl washed her hair and didn't mention it to nobody.

"You have only to mumble a few words in church to get married," says a writer. And a few in your sleep to get divorced.

Another way to reduce is to use a shorter swatter so you must jump higher to get flies on the ceiling.

When a woman gets sick she puts on a newly ironed nightgown and fixes up her hair, but when a man takes down he just piles into bed looking like something the cat dragged in.

"Erwin said that I was the handsomest and cleverest girl he had ever known."

"You should not marry a man who deceives you during the engagement."

Ma and Paw now get home at 3 a.m. Sister and Brother at 5 a.m.—who the heck is going to let Grandma in?

Honest intentions won't pay honest debts.

"Well, daddy," said the pretty girl excitedly, "I am engaged."

"You don't mean it!" her father exclaimed.

"Certainly not," said the pretty girl, "but it's great fun all the same."

Keeper (speaking of new arrivel at asylum): "What's the matter with this fellow?"

Superintendent: "He says the air is free and goes around releasing it from people's automobile tires."

INS AND OUTS OF IT

He came and borrowed five and I
Was out. It's just a sin;
I wouldn't have been out if I
Had not only been in.
—Boston Transcript.

I have no coin to fill a cup
In which my woes to drown;
The wretch came in and held me up;
That's why I'm out and down.

When better ones are built the musical comedies will sign them.

We will now render that old ballad entitled "Drink To Me Only With Thine Eyes—And You'll Stay Sober To-night."

UP-TO-DATE CHILDREN

"When I get married," said little Bess, "I'm going to marry a minister and then it won't cost anything for a wedding fee."

"When I get married," returned her playmate, "I'm going to marry a lawyer and then it won't cost anything for a divorce."

The married couple that does not pull together soon pulls apart.

It is pretty hard these days to tell whether it is opportunity knocking at your door, or another pedler.

"Give till it hurts" was a good slogan. Another one is "Pay till it hurst."

One reason golf is expensive is because the custom of dressing in a public locker room necessitates the discard of holey sockes and ragged undies.

She was only a street cleaner's daughter, but she'll never have white wings.

Why telegraph when it's cheaper and quicker to telawoman?

Veterinaries use Minard's Liniment.

Our standard of life is no longer our acreage, but our brain capacity and our science.—Sir Arthur Keith.

I've got it all over Senator Curtis; I belong to an Indian tribe of my own.—Governor Smith.

The Mediterranean, Once the Whole Known World

The world is on the march. Many a man or maid who might heretofore have had a circumscribed and limited life, now circles the globe, goes to South America and Africa, visits the picturesque West Indies region and enjoys the scenery and fathoms the mysteries of the Mediterranean which several centuries ago was the entire known world. What a thrill from day to day! What a broadening, inspiring experience!

Beyond doubt there is no more interesting region than the Mediterranean, and to-day its art, history and scenic wonders lure and fascinate thousands of tourists annually. Name but a few of its attractions—Egypt, Italy, Spain, Turkey, Syria, Palestine and the Isles of Greece where "Sappho loved and sung," and you have stirred a memory of longing in many hearts—hearts which yearn to have their wonderful dreams, covering the birthplace of the world, come true.

RHEUMATIC MISERY

Relief Can Only Come Through Better Blood—Liniments of No Use.

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the inflamed joints swell and the patient becomes a cripple. Most treatments simply aim to keep down the pain, hence with every unfavorable condition a renewed attack follows:

To cast out rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can best be done through a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new richness and redness. Thousands have tried this treatment with beneficial results. That every sufferer from rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most hopeful means of recovery is shown by the statement of Mr. David Carroll, Pictou, N.S., who says:—"For years I was troubled with rheumatism. The pains were not continuous, but they always returned, and kept getting worse. I tried so-called electric belts and many medicines, but did not get more than temporary relief. Only those who have suffered from this trouble will realize what I suffered at times. I had begun to despair of getting better when a friend urged me to try Dr. Williams' Pink Pills. In a short time I could feel this medicine helping me, so I gladly continued taking the pills and soon found that every trace of the trouble had disappeared and there was a great improvement in my general health. It is now two years since I took Dr. Williams' Pink Pills and I have not had the least twinge of the trouble in that time. That is why I confidently recommend the pills to other sufferers."

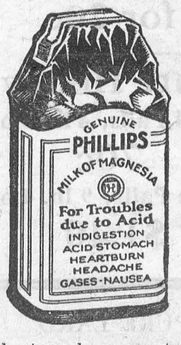
You can get these Pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Company, Brockville, Ont.

I am no longer a Congressman; I am now an institution.—Rep. John Q. Tilson.

Why should clever women be talked about and singled out as if they were performing dogs?—Dame Helen Gwynne Vaughan.

I have completely given up the game and I do not care whether I ever see another racquet.—Suzanne Lenglen.

If you use Red Rose Orange Pekoe Tea in 1928 you will enjoy Canada's finest tea and materially reduce your tea bills. Red Rose Orange Pekoe lasts longer because its additional strength and flavor make it go further. Every package guaranteed.
5-E



Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

FINANCIAL NEWS

East Sudbury Deep Buys Important Gold Mine

The officials of East Sudbury Deep Mines, Ltd., announce the important addition to their property holdings, in the acquisition of the La Bellevue Mine in the State of Oregon, a property that has already reached an advanced stage of development, and is considered to have highly attractive possibilities. Concluding an extensive examination, a series of negotiations were started some four months ago, and have resulted in the acquisition of this property within the last few weeks. It is understood that the number of ore shoots which have been opened up to date by comparatively shallow tunnel workings, have already indicated ore in access of $1,000,000. The officials plan a further extensive development of the La Bellevue vein, as well as the immediate preparation for stoping, and the early completion of a mill. A crew of men are now at work on the property, and an aggressive campaign is planned.

East Sudbury Deep has options on some 2,000 acres North of the Frood Mines in the Sudbury Basin. Two diamond drills have been continuously employed since last spring, and over 10,000 feet of drilling has been done. Results are reported as encouraging. Holes Nos. 3, 5, 7, 9 and 12, showing replacement deposits characteristic of this district. Further diamond drilling on the property has been curtailed, pending the erection of a customs smelter in the district. Present activities will be centred on the La Bellevue Gold Mine, in order to get this property on a production basis at the earliest possible date.

Mining Briefs

It is decided that a railway is warranted into Sherritt-Gordon property, a distance of 35 miles from rail head at the Flin Flon. The construction interests who have full equipment at the Flin Flon would like to go with it without delay. It would save something like $50,000 by not bringing this equipment south. The vital question is whether Sherritt-Gordon has proceeded sufficiently with development for such a step to be taken.

A brokerage house journal has just published an interesting view on the situation surrounding the large nickel producers and potential producers of Ontario. The journal states that the outstanding development of the past year has been the entry into Sudbury of powerful unknown interests—presumably United States Steel Corporation or interests closely allied—into the copper-nickel belt, using as its agents the Sudbury Basin and Longyear interests. The object of the group is then stated to be the establishment of an industry to mine and smelt copper-nickel ores in direct competition with International and Mond.

Spectacular copper discoveries, equal to the Sherritt-Gordon when that operation was in its initial stages, are reported from northern Manitoba. The scene of the latest find is at Oxford Lake, about 160 miles east and slightly north of Le Pas. Prospectors are flocking into the field, and it is reported that several big operators are in there in a big way. Among these are mentioned the Lindsley interests of Toronto. The ground is being staked up rapidly and many operators are rushing in supplies before the freeze-up. Further details of these finds will be forthcoming soon.

Most of Mond Nickel shares are held chiefly in England, and the outstanding success of this company, which is in the same boat as International Nickel, has recently attracted attention of British investors to International Nickel stock. This is interesting, because if the British take on stock in a big way it will be more broadly internationalized.

A somewhat similar broadening of the market for Mond Nickel has taken place, by the purchase on a substantial scale of Mond shares by Canadian interests. So large are Canadian holdings now that plans are under way to appoint a transfer agent in Toronto and elevate the stock from the mining section of the Toronto Stock Exchange to the regular board, where it will take its place beside International Nickel.

Halifax Shipyards Award Contract for Ice-Breaker

Halifax—Official notice has been received by the Halifax Shipyards, Ltd., of acceptance of their tender for construction of a new ice-breaker for the Dominion Government. The contract price is $1,220,000 and this tender, which was the lowest, was awarded over those of Canadian Vickers, Montreal, and the Davie Shipbuilding Co. of Quebec.

J. R. Nelson, manager of Halifax Shipyards, stated that work on the ice-breaker will commence immediately and the vessel will be ready for delivery to the Federal Government next fall. The new contract will provide steady work for upwards of 600 men for over a year.

Halifax Shipyards, Ltd., is a subsidiary company of the British Empire Steel Corporation.

Objects to Use of Term "Rayon"

New York—The Celanese Corporation of America has taken issue with the Better Business Bureau of New York City, Inc., on the latter's recent recommendation that the word "rayon" be used in conjunction with the name of its product. Its objection is based on the ground that celanese is so distinctly different from rayon in its chemical and physical properties that the adoption of the bureau's recommendation would cause confusion between the fabrics and articles of the company and these now referred to as rayon. The company further contends that the bureau has no authority to name a product, and that its action in this case can only result in confusion and misrepresentation. The company points out, in addition, that the local bureau's recommendation is contrary to the position taken by the National Better Business Bureau about three years ago.

The same arguments apply to Canadian Celanese, Ltd.

Stock Averages Up Month of September

Prices on the Toronto Stock Exchange in the month of September made an average gain of practically three points and the average of 60 stocks at the end of the month was approximately on the same level as of January 31 and over 5½ points above the close of 1927. Only three months in the current year have returned a higher average than at the end of September.

September average of 107.66 compares with a peak of 110.23 reached in April last and a low of 103.25 at the end of July.

Of four groups the utilities was the utilities was the only one to show a decline at 115.69, contrasted with 116.92 in the preceding month. The high for the year of 121.33 was attained in May last and the low of 115.21 in July. Passing of Twin City common dividend made for a decline of 8¼ points in the price of this issue and brought the average for the group of nine down materially.

Thirty listed common industrial stocks were up close to 3 points at 75.21, contrasted with 72.41 at the end of August. January saw the high of 79.20 established for the group and July the low of 70.94.

The unlisted group advanced over four points from 43.36 to 47.70. Goodyear Tire common gained 25, Farmers Dairy 4, Service Stations 8 and Hiram Walker-Gooderham and Worts 5. The oils were up in a body, Imperial advanced 6 and British American and International Petroleum from 2 to 4 points.

Bank stock boosted their average from 311.75 to 317.75. The high for the group of eight of 325.62 was attained in April last and the low of 300.75 in January. Striking gains were made by individual members of the group. Royal was up 23, Dominion 6, Imperial 5, Montreal 10 and Nova Scotia 10.

I don't know anything about politics, but I am emphatically at the disposal of the Democratic Party.—Bobby Jones.

You never can tell the sinner from the Christian. They drink the same drinks and smoke the same cigars.—Aimee Semple McPherson.

Minard's Liniment for aching joints.

40-Day Cape Town-Cairo Record Sought in Car

Cairo, Egypt.—G. S. Bouwer, a South African motorist, has left here by ordinary sedan automobile in an attempt to make the Cairo to Cape Town journey of 9,000 miles in forty days, thus breaking his own record from Cape Town to Cairo, the fastest journey yet recorded, of 117 days.

The route is as follows: London, Paris, Simplon Pass, Milan, Florence, Rome, Brindisi, by boat to Alexandria, Cairo, Wadi, Halfa, Khartoum.

A PROBLEM FOR YOUNG MOTHERS

Stomach troubles cause most of the distress of babyhood and childhood, and are the greatest problem that a young mother has to solve. The treatment for these digestive disturbances that make baby cry continually and disturb his sleep must be quick and effective, and, above all, perfectly safe.

The absolutely safe treatment for disturbances of the stomach and bowels is found in Baby's Own Tablets. Thousands of mothers have had their problem solved through them. They are guaranteed to be free from all injurious drugs and cannot possibly do harm to even the youngest babe—they always do good.

Baby's Own Tablets regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fevers and promote that health-giving sleep which is so necessary to the welfare of the baby or growing child. The Tablets are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Belgrade to Raze Birthplace of War

Belgrade. — The Club Narodna Obrana, Europe's most famous "plot house," where plans for the assassination of Archduke Franz Ferdinand and his consort were perfected in 1914 will soon be torn down to make room for an office building.

It was in this crumbling shanty that some of the darkest political plots in history have been hatched. Under its roof final instructions were given to Tchavrilovitch and Princip concerning the crime which precipitated the World War.

From this clubhouse as a centre most of the agitation against Austria-Hungary was carried on. Since the war it has been used as a headquarters for the dissemination of propaganda against Italy.

Minard's Liniment for Every Pain.

Children can fool the parents, but the parents can't fool the children.

Any Woman Can Look Stylish

By MAE MARTIN

Most stylish looking women know simple ways to make last season's things conform to this season's styles. Thousands of them have learned how easily they can transform a dress or blouse, or coat, by the quick magic of home tinting or dyeing. With true, fadeless Diamond Dyes, anyone can do this successfully. The "know-how" is in the dyes. Diamond Dyes don't streak or spot like inferior dyes. New, fashionable tints appear like magic over the out-of-style or faded colors. Tinting with Diamond Dyes is easy as bluing, and dyeing takes just a little more time. Only Diamond Dyes produce perfect results. They have been perfected by over 50 years' experince. Insist on them and save disappointment.

"Color Craft," my big new book of dollar-saving hints, wil be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Headaches

For a headache, however painful, inhale a little Minard's and bathe forehead. Speedy relief.

MINARD'S "KING OF PAIN" LINIMENT

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

RED ROSE TEA "is good tea"

Red Rose Orange Pekoe is the finest tea in the best package—Aluminum

Predicts Billion Bushel Wheat Crop

Ottawa, Canada—The 550,000,000 bushel wheat crop, which Canada is harvesting this year leads the "Grain World," of Chicago, in a recent issue to predict that within a comparatively short time the wheat producion of Canada will total 1,000,000,000 bushels annually.

If this happens, and the estimate is based on a consideration of the trend of wheat production during the last decade, it will entail a tremendous expansion in railway building, elevator construction, sales of agriculturel machinery, and general manufacturing. The total wheat production of the world this year is estimated to be 2,606,306,000 busheis or 50,000,000 bushels more than last year.

With Russia still importing wheat, the Orientai demands growing, the domestic demand increasing, and with the growth in population, it is logical to assume that the wheat production in Canada will continue to increase.

Auto Death Rate Shown

Automobile accidents in the seventy-seven largest cities of the country resulted in 588 deaths during August, as compared with 587 deaths from the same cause during August, 1927, according to figures of the American Motorists' Association.

Looks as if the watch on the Rhine were about to stop.

Minard's Liniment cleanses cuts, etc.

The alleged uneasiness in Europe is largely due to too much rattling of the olive-branch.

RUG YARN

$1.15 PER POUND UP. TWENTY-one samples free. Stocking & Yarn Mills, Dept. 1, Orillia, Ont.

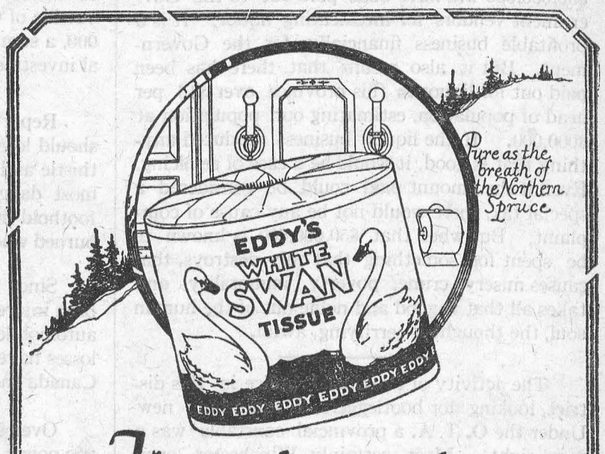
When replacing Eavestroughs or Conductor Pipes you will save money by specifying "QUEEN'S HEAD" Galvanized Sheets—"Good for 70 years." Ask any reliable Sheet Metal Worker.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.



You get better value in this *wrapped* roll of EDDY'S WHITE SWAN TISSUE

BECAUSE the tissue itself is so superior to what you get in the ordinary roll.

Snowy-white, velvety soft, even in texture. And *immaculately clean* because the big White Swan Roll is *completely wrapped*, absolutely dust-proof, guarded against all unnecessary handling.

Other popular EDDY TISSUES

"COTTAGE" The finest Tissue that money can buy. 3000 sheets.

"ONLIWON" Neat, handsome, compact. Highest grade tissue. Serves two sheets at a time.

"NAVY" A real good Roll, full weight. 700 sheets.

Not only is White Swan Tissue a better tissue—it is one of the most economical rolls you can buy. You get bigger weight, 750 sheets full count—a strictly sanitary Tissue, a paper worthy of its place in the well-appointed bathroom.

Ask your dealer for White Swan, the sanitary, big value Tissue Roll.

MR. BENNETT'S TASK

The Orillia Packet and Times, one of the staunchest Conservative weekly newspapers in Ontario, in speaking of the proposed visit to Ontario constituencies by the new Conservative Leader, Hon. Mr. Bennett says:—"Mr. Bennett will, too, have to face a situation which may embarass his candidates next election. The result of the introduction of Government Control was to force thousands of Conservatives who had been lifelong temperance men and women, to disagree with their party on this one issue, especially in the rural sections where the farmers have not been tied to party so strictly since the breach the U. F. O. made in the party ranks. Most of them have not broken their ties with the Conservative side, and still believe in the general policy of both the Dominion and Provincial leaders. But unfortunately, too many of the supporters of Govcrnment Control were carried away with their success and forgot the future, and acted as if they could get on without that independent section of the party."

It will be hard to heal the breach made by the introducing of the Liquor Policy into Ontario Politics by Premier Ferguson. It won him an election, but it lost the Conservative party its best supporters. And it is to hold those who broke away from the Ferguson Liquor wing to the old Conservative party that Mr. Bennett will have to use his best tactics. If he is accompanied by Premier Ferguson in his Ontario Campaign he may hold the Ferguson tories, but he won't win over many of the old time Conservatives who broke with Ferguson on the Liquor question.

ABOUT PARTY PATRONAGE

Every right and straight thinking man must admire the attitude of the Toronto Globe toward the abuses of party patronage, especially in the case of the Simcoe postmastership. In this case, of course, the Globe has a good cause, and irrefutable evidence of the trickery and meanness of party patronage. But while the Postmaster General does not show up well in this particular case, perhaps if the Globe would do a little investigating it would find a system of petty party patronage practiced right under its nose, compared with which the Simcoe case is a small affair. What would the Globe say if told that a lady who refused to act as poll clerk in the last provincial election because of her temperance principles, and told at the time of her refusal to act that she would be sorry for it, was cut off the list of lady judges at country fairs, without even an explanation. Yet such things, and even more flagrant instances of party spite, and withholding of patronage, are evident in this province, and as yet we have not heard a word of protest from the Globe. It certainly is not because the Globe does not know of this system of party patronage that is being carried to such a contemptible extreme in Ontario.

THE LIQUOR REVENUE

Ontario's Provincial Treasurer expects to be able to announce that the net revenue from Ontario's Liquor trade will be something like $8,000,000. That means that in Ontario something over $50,000,000 will have been paid out to the Government vendors for intoxicating liquor. It is a profitable business financially for the Government. But it also means that there has been paid out for liquor in this province over $16 per head of population, estimating our population at 3000,000. If the liquor business produced anything that is good, it would be a case of rejoicing. Even if the amount paid could be considered a special tax, there would not be any cause of complaint. But when that $50,000,000 is known to be spent for something that only destroys, that causes misery, crime, poverty, immorality, and takes all that is good and noble out of the human soul, the thought is terrifying, awful.

The activity of Provincial police in this district, looking for bootleggers, is something new Under the O. T. A. a provincial constable was a rare sight. Most certainly Winchester, even without a retail store, is not being benefited under the Government Control System.

OVERLOOKING THE GOOD

How quick we are to see the bad in a person and to overlook the good. Is there not a danger of keeping "evil" everlastingly before the eyes of the young and keeping in the background the "good." If you keep a child in a dark room long enough, their eyes will be blinded and hurt when brought into the bright sunlight. On the other hand if you keep a child in the bright sunlight, the going into a dark room is repulsive and depressing. If you always keep sin, evil, wickedness, before the vision of the young they will not see or know much of the brightness and gladness of life. That is why environment means so much to a chlld. The people who are everlastingly condemning and denouncing the young because they seek pleasures out of life, do more to drive from the Church the young people of today than any other cause.

ABOUT TAXES

Why is it, generally speaking, people refer to taxes, no matter what kind, as objectionable, as an unnecessary imposition inflicted by the powers in control. Probably there is no money paid out of your income from which you derive a greater benefit than from your taxes. In fact you would enjoy very few comforts and very little protection were it not for the taxes you pay. Of course some of the public money is wasted. So is a great deal of private money wasted, and you hear nothing about it. The reason we refer to this subject is because the season for paying taxes is approaching, and we want you to meet your obligation good naturedly, and with the feeling that you have received full value for what you pay into the public treasury.

The flour and grist milling industry of Canada now produces annually over 19,000,000 barrels of flour with a value of over $131,000,000. There are in the Dominion 1291 mills, representing a total capital investment of $58,000,000 and giving employment to 6348 persons.

1688—Quebec or New France	100,971 bushels
1734—Quebec or New France	737,882 bushels
1868—Canada	21,352,000 bushels
1898—Canada	63,398,000 bushels
1928—Canada	560,482,000 bushels

This table, prepared by the Department of Agriculture, very briefly gives an idea of the rate of increase in the production of wheat in this country.

History teachers in Toronto have asked Premier Ferguson, as minister of education, to investigate the plucking of about fifty percent of the province's candidates in the middle school examination in British history. That number, said a Toronto teacher, is twice as many as there have been in other years. The paper was fairly hard, but not difficult enough to account for such a slaughter. General opinion among the teachers is that the examiners have been too severe. The British history paper included nine questions of which candidates were to write on four.

20,578 jail terms were imposed on persons in Ontario last year. Of these liquor was responsible for 8,466 of the convictions. It took all other crimes in the calendar to make up the balance of the convictions. Burglary, robbery, etc, came next in the list with 3,060 convictions. It is quite apparent by these figures that drink is the predominating evil of the day.

One reason why Canada has not developed as it should is because Canadians with wealth show little faith in their home land. According to figures furnished investments of Canadians outside of Canada amount to nearly $1,500,000,000, a sum approximately one-quarter of the total investments in Canada of other countries.

Reports from all Ontario indicate farmers should lose no time in declaring war on the sow thistle and give it no quarter. It is one of the most dangerous weeds that has ever gotten a foothold in Canada. It should be uprooted and burned wherever seen.

Since 1921 more than 8.500,000 people have been injured and more than 100,000 killed by automobiles in the United States, while money losses have been more than $3.000,000,000. In Canada the proportion is about equal.

Over $900,000,000 is invested in hydro electric power plants in Canada and it is estimated that $80,000,000 is being spent this year in additional development.

Mr. and Mrs. Jas Johnson spent a couple days with their son, Mr. Earle Johnson, of Haddo.

Mr. Kenneth Hutt of Inkerman, spent Sunday with his sister, Mrs. Jos Steele.

Things Work Out

Because it rains when we wish it wouldn't,
Because men do what they often shouldn't,
Because crops fail and plans go wrong
Some of us grumble all day long,
Because somehow, in spite of care and doubt,
It seems at the last that things work out.

Because we lost when we hoped to gain,
Because we suffer a little pain,
Because we must work when we'd like to play—
Some of us whimper along life's way
But somehow, as day always follows the night,
Most of our troubles work out all right.

Because we cannot forever smile,
Because we must trudge in the dust a while,
Because we think that the way is long—
Some of us whimper that life's all wrong,
But somehow we live and our sky grows bright,
And everything seems to work out all right

So bend to your trouble and meet your care,
For the cloud must break and the sky grow fair,
Let the rain come down as it must and will,
But keep on working and hoping still,
For in spite of the grumblers who stand about,
Somehow it seems all things work out.

Selected.

Auction Sale

FARM STOCK & IMPLEMENTS

There will be offered for sale. by Public Auction on Lot 19 and 20, in the 10th Concession of Mountain Township, known as the David Porteous Farm, 3½ miles south of Vernon, on

ISSUE No. 41—'28

Fort Churchill Rapidly Growing

Hudson Bay Terminus Can Be Reached by Sea, Land and Airplane Services

Montreal — Government engineers have started the foundations of Canada's most northerly city, Fort Churchill. A tented town already has risen and temporary buildings have been erected where the Churchill River runs into Hudson Bay.

Fort Churchill can be reached by land, sea and air. Recently the government steamship Canadian Voyager steamed into Churchill with 3,750 tons of coal. On August 15 the Canadian Trooper went in with 3,500 tons of general cargo. The steamship Brockebank left Vancouver on July 31 with a cargo of fir for piling. She is now reported in Hudson Strait, having gone through the Panama Canal and northward. She will reach Churchill soon. There also is the steamer Odile, which left Montreal on September 3 and now is at Port Burwell, en route to Churchill.

More remarkable still are the voyages of two convoys, each with a huge and valuable dredge. One convoy has reached Fort Churchill and the other was reported well into Hudson Strait, having reached Port Burwell. These dredges are not built for long sea voyages, but are making the journey safely. On August 6 the powerful sea-going tug Ocean Eagle sailed from Montreal with Churchill Dredge 1 in tow and put in Gaspe for coal, being joined there by the Voyageur. The convoy then started north, passing through the Straits of Belle Isle, and arrived at Kig-la-Pait, on the Labrador coast, on August 20.

On August 23 the tug Dainty left Montreal with Dredge 2 and the hopper-barge Chesterfield. The Dainty belongs to the Irish Free State, being chartered by the Canadian government for the voyage to Fort Churchill. On her return she will sail from Churchill directly to Ireland, so probably will be the first vessel to make the direct trip after the establishment of Fort Churchill as he Hudson Bay terminus.

Going into Fort Churchill on the land side, the route for many years lay by rail to Mile 214, which was as far as the railway went. The train ran weekly—sometimes on the track and sometimes off it. To-day the road has gone to Mile 356, where it branches off from the old grade to Port Nelson and swings due north to Churchill. The steel has reached Mile 405 and is expected to reach Mile 440 this winter. Fort Churchill is Mile 505, or 505 miles from The Pas, Manitoba, the starting point.

The air base for Fort Churchill at present is at Deed Lake, at Mile 440. The machines follow a triangular route. They fly southeast to Jackfish Island, in the Nelson River; north on the second leg to Fort Churchill and back on the third to Deer Lake, where they are tested and refueled for the next trip. It was the use of airplanes to transport equipment and men which advanced the work a year.

Birds Appreciate Lights' Protection

Crowds Seek Hotel Grounds in Colombia Because of Night Prowlers

Puerto Berrio, olombia.—The swallows of Puerto Berrio, famous throughout the Republic, are interesting. These birds come nightly to roost in the palm grove of the hotel, where the electric lights of the grounds give them protection from night prowlers which the jungle does not afford.

As dusk approaches, thousands of the birds simultaneously appear in the sky, soaring above the hotel grounds in most interesting evolutions of flight. No confusion ensues as they seek suitable places, all chattering constantly.

There appears to be a definite understanding as to which part of the grove a detachment shall occupy. When the shade of a tropical night sweeps down, the last swallow has found a place in the grove, the chattering ceases, and all is quiet and serene under the lights of the hotel grounds which have never failed these birds for years.

"Do you think being able to get motion pictures over the radio will help any in getting families to spend more time at home?" asked the Curiour One. "No," growled the father, "they would rather go somewhere and spend 50 cents to see them than stick around home and see them for nothing."

Girls "Boss" Boys in British Schools, Says Veteran Master

London.—That girls owe their independent outlook entirely to the freedom of their clothes is the conviction of one of London's headmasters, Ernest G. Holland. Interviewed on his retirement, after fifty-one years of school work, this educator says that one of the most astonishing changes that has occurred in his experience is that girls now "boss the boys."

"Fifty years ago," Mr. Holland says, "and ever since, until recently, it has always been the boys who have dominated school life. Now everything is the other way, and the girls are aggressive and dominating."

Mr. Holland is convinced that feminine fashions have a great deal to do with this change in outlook. "In the old days," he says, "girls were hampered by their clothes. They wore disproportionately long skirts, had long, ridiculous hair in heavy plaits and had to affect an exaggerated shyness and modesty. Look at them now!"

He thinks that if men want to be as independent as women they will have to follow their lead in dress. "Men's clothes," he says, "are as absurd as women's were thirty years ago."

Canada Charts Arctic Air Lines as World Links

International Trade Routes Expected To Be Opened in Dominion Northland

Airplanes more than anything else are rolling back the map of Canada. The last year ahs seen more development in the far north than in practically all previous history. Airplanes have been responsible.

From the air hundreds of prospectors have landed in the so-called barren lands to stake claims; through the air supplies have been rushed to make possible rapid construction of the Hudson Bay Railway, which in another year will give to Canada another practical ocean port. Aviators have this year mapped and photographed hundreds of square miles of land previously unexplored and have created a new world record for this branch of exploration. The first Arctic air patrol has just completed a year's observations of weather conditions in Hudson straits and has shown that body of water, long dreaded by navigators, to be much more accessible than had been supposed.

International Routes Seen

But air work in Canada's north has just been preliminary to the development which geography and air discoveries make certain. Canada's position is such that in future international air trade routes the shortest and safest air lanes will traverse the Dominion.

The recent flight of the Greater Rockford was only the first attempt to blaze the Arctic air lones which soon will provide the long-sought short cut to Cathay. The future map of Canada, Vilhajalmur Stefansson, the Arctic explorer asserts, claims, will be striped with air routes between the great cities of North America and those of Europe and Asia.

Line to Orient Forecast

As by a sort of trick in geography Fort Churchill, Canada's new Arctic port, is nearer Liverpool than New York, so the northern air lines cut hundreds of miles off present trade routes. From New York to Peking by air across Canada is 3,000 miles shorter than by steamship. It can be made in a series of flights—Cochrane, Churchill, Fort Rae, Nome, and on over Okotsk, Siberia, to either Peking or Tokio. The entire course can be laid out so that there will never be more than 500 miles between outfitting stations to which gasoline supplies can now be shipped by rail and steamship. Stefansson asserts. From Cochrane to Okotsk an airplane probably would never be more than five miles away from a good landing place on a lake for flying boats in summer or for land planes with skids in winter.

From Seattle to Moscow, the Arctic provides an easy way; Chicago is on a straight line to Berlin via Cochrane, Ontario's most northerly town. From Detroit to any point in Europe the shortest and safest why leads across northern Ontario and Quebec.

The Arctic air lanes are bound to come, Canadian officials believe, and they are busy gathering information on flying conditions in the North. Airmen will co-operate with the Weather Bureau in obtaining definite data so long lacking in the North, and this will afford more accurate day-to-day forecasts for all this continent.—N.Y. Herald-Tribune.

Round Trip to Hell Is Sold in Norway

Copenhagen.—It is possible to get a return ticket from Hell in Norway.

An American tourist visiting Copenhagen provides the proof in the shape of a ticket.

There actually exists in Norway a railway station of this name. The American thought it worth while to take an extra return ticket from Hell to Drontheim to show his cronies when returning home.

For the first six months of 1928 the value of the mineral production of Canada totalled $105,632,571, an increase of $6,594,757 over the corresponding period last year. Gold production shows an increase of about one million dollars.

Good Old Days Vividly Recalled

OLD BERKELEY COACH LEAVING LONDON, STARTING JOURNEY TO OXFORD
Coaching from London to Oxford was revived when the picturesque old Berkeley coach left London for Oxford to inaugurate a service which continue throughout September. Seven teams of shorese were used for the 65 miles drive. This new sport or revived old one must improve the light horse interests.

Fine tea is always the most-desired. The slight falling off in price of cheaper teas cannot entice the tea-lover from his discriminating choice.

"SALADA" TEA

The Finest of All Fine Teas

A London Street Artist

London is the only place I know where to be a street-artist is an actual profession; but there are certain London streets you can never go through, at nightfall, without seeing, under the sunset's glow or the glimmering early gas, a picture drawn in colored chalks on the ray pavement of the sidewalk by some street-artist who is sure to get pennies enough from kindly passers-by to procure him supper and a bed. Sometimes he gets much more than that, if he has a ready wit and a scene-painter's dexterity. . . .

On Euston Road, near St. Pancras Church, just as you turn round the corner from Euston Square, there is one bit of gray sidewalk well beloved of the street-painters.

The Square is near-by, with its great old trees, where the birds build their nests as trustfully as if they were miles away in the country; where the grass is soft and green almost all winter; and where the little children who live in the houses on either side of the Square, play and cheep and chirrup like a human birds.

On a certain long-ago November night, when the sun looked like a great red ball of fire through the London fog, and the air was just keen enough to give the memory of . . . . summer a tantalizing charm, a street-artist, who had in those days taken possession of that special corner, came along with his materials and went to work. . . .

In the morning he was a newsboy and sold the morning papers. This was the profession adopted by the practical side of him; but when the sun grew low, the side of him that was not practical had its turn, and he became an artist. . . .

He had a fashion of talking to himself as he worked, not uncommon with those who have no one else to talk to. He glanced through the fog at the red sunset sky, and he said,—

"I'll just give 'em a bit of summer. I'll try that feller I saw on the doorstep."

And now, more quickly than you would have supposed possible to such untutored fingers, he sketched the doorstep of a humble house, and on this doorstep a boy, a fat, roly-poly little chap, not more than five years old. You could see that it was summer, by the boy. He had on only a ragged shirt and a pair of brief trousers, but he looked so warm that you would have been half tempted to fan him.

He had a great piece of bread and butter, well covered, too, with jam, in his fat little hand; and he had actually gone to sleep holding it, after taking a big, rapturous bite from one end. Beside him was a dog, his own dog evidently; and it had slipped its yellow head inside his arm, and was nibbling at the bread and butter. The dog's face was a study. Longing, fear, and daring, all were in it.

The picture was as faithful a bit of story-telling as you could find in a day's round among the studios. Dick—I don't think I told you the youngster's name was Dick—surveyed it with a truly artistic pride.

"Oh, Jimminy! Oh, Jimminy!" he cried exultantly. "I'd orter name it;" and he printed under it, in a style of letter he had acquired from the headings of the morning newspapers,—

"Nothin Venter Nothin Ave."

Then he drew a long, deep breath of content "My heyes?" he said; "but it is just like that little feller!" and he stood, as other artists stand in front of their easels, in absorbed contemplation of his triumph.—From "Stories Told at Twilight," by Mrs. L. C. Moulton.

"My husband is so good to his employes." "Is he?" "Yes. He came home late from the office last night, all tired out, and I heard him say in his sleep, 'Jim, I'm going to raise you another ten.' And business is so poor just now.'"

London Publishes "Britannia," a New 100-Page Weekly

London—A new Political and social weekly with the title "Britannia: A Complete Imperial Weekly Newspaper," and published by British National Newspapers, Ltd., has made its appearance. It is under the editorship of Gilbert Frankau, while Crawford Price, long associated with the European News Office of the Christian Science Monitor, is associate editor.

The style of the paper is that made familiar in the United States by the Saturday Evening Post. The announcement is made that the paper will be of 100 pages each week, with, in addition to its fiction and features, a page of foreign politics, two pages of home news, one page of news from the United States, a very comprehensive and scholarly critical department. The women's departments are to be a great feature of the publication.

The Inveresk Paper Company, owner of Britannia, owns also eight large illustrated weeklies, the London Daily Chronicle, and certain allied dailies. Britannia starts out with an advanced sale of 275,000 copies for its first issue, and is regarded here as likely to find a prominent place for itself among the weeklies of London.

To Harness Tides in Bay of Fundy

Plans of Proposed Dam and Power Site Deposited With Authorities

Ottawa.—The project for harnessing the tides in the Bay of Funday has moved a step forward with the announcement in the current issue of the Canada Gazette that the Canadian Dexter P. Cooper Company has deposited with the various public authorities as applied under the Navigable Waters Protection Act, a description of the site and the plans of a dam, locks and gates forming a part of a power development proposed to be built in Passamaquoddy Bay at Lettie, N.B.

The projected dam is to be constructed so as to run by "certain islands in Lettie Passage, Little Lettie Passage and Doyle Passage to Deer Island, and from Deer Island to the international boundary between the Dominion of Canada and the United States of America."

WRIGLEY'S NEW HANDY PACK P.K. CHEWING SWEET

A treat in the Peppermint-flavored sugar-coated jacket and another in the Peppermint-flavored gum inside—utmost value in long-lasting delight

Animal Myths

A collection of these, suggested by questions received by the staff of the New York Zoological Garden, is given by Raymond L. Ditmars, curator of the Department of Mammals and Reptiles, in an article, originally prepared as a radio talk, printed in "Science and Invention" (New York). Interest in animal life in this country is increasing, Mr. Ditmars tells us. He writes:

"There is developing a humane and sympathetic interest that is clearly indicated by the increasing mail received at the Zoological Park. We have to answer every kind of a query, from elephants being afraid of mice, through the maze of hoopsnake myths, to toads producing warts. Let us consider a few of these superstitions.

"The first to be cited is that of the hoop-snake, alleged to take its tail in its mouth and roll down-hill—or propel itself along a road. There is no serpent in the world that in its habits even indicates a basis for the story. When alarmed or excited some snakes may thrash around, and it is quite possible that they might accidentally grasp their tail in their mouth, but never with an idea of rolling away to safer regions. Nor has any snake in the world a sting in the tail. When correspondents have become insistent about the hoop-snake and power to sting with its tail, we have offered to pay a thousand dollars for even a young specimen that would perform. Twenty-five years of repetition of this offer have produced no hoop-snakes. In a similar fashion we dispose of the enthusiastic correspondent who insists he has records of seventy-five-foot boa-constrictors in the tropics. But in this instance the price being of alleged noble size, we are willing to increase the offer—even offering a thousand dollars for a dried, rolled skin.

"Next in order of the snake myths is that of the milk-snake. Many farmers firmly believe that there is a specified kind of snake that lurks around the barns and steals milk from the cows by actually milking the stock. Some blame the black snake for this pernicious habit. There is no doubt that certain snakes may warrant suspicion by their persistent lurking around barns and dairies. They are rodent-destroying species, and gather near human habitations owing to the abundance of rats and mice around the farms. A fair-sized serpent, if it were to crave milk, would be limited to contain not more than half a pint of fluid within its stomach. As serpents feed, it would not repeat the meal before a week An amount like this would produce no effect upon even a scrawny cow.

"Another query we receive is about horsehairs falling into a well and turning into snakes. This is explained by a singularly slender aquatic worm, technically known as Gordius, quite active, sometimes over a foot long and appearing like an animated horsehair.

"A common query is about rattlesnakes committing suicide when cornered. There is a story to the effect if a horsehair lariat is thrown in a circle and a rattler placed inside that it will not cross the rope, but, striking its fangs deeply into its body, quickly dies from the deadly venom. All venomous serpents are immune to their respective poisons. In the excitement of capture they often strike this way and that, and wound themselves with the poisonous fangs, but there is no bad effect from such injuries.

"I have tried the horse-hair lariat experiment a number of times and have seen rattlers calmly crawl over the rope—in fact have not noted that they even hesitated. This also eliminates the myth about the sleeping cowboy on the plains, seeking protection from prowling rattlers by sleeping within a large ring of his lariat.

The Easy Yoke

We are, each of us, determining every day the yoke we shall wear. Shall it be that of false gods and selfish burdens, which weigh down painfully and retard unnecessarily; or shall we assume the yoke of love and good will and peace to mankind, and, like the Master, seek only to serve, knowing that therein lies the heavenly way? Experience has proved the latter course to be fraught with rich reward, and happy are many who pursue it.

To-day there are many who have burmore or less heavy which are self-made, and which hinder a full expression of happiness and peace. Some may bear the burden of anxiety for loved ones, some the burden of remorse or resentment because of a past experience. Even the privilege of providing for others their daily needs may become a burden if accompanied by fear of self-pity. These are all bonds, chains forged by the wearer, but from which, happily, he may learn to free himself. One may begin at once, if he chooses, to throw off the old yoke and assume the new one; and he may learn from the life that Jesus lived just what the Master meant when he said, "My yoke is easy, and my burden is light." Jesus went about constantly doing good for others; but his was no anxious thought for those for whom he did so much. No unworthy ambition, no desire to bind or fetter others, no terrors of the future or vain regrets for the past, were his. Instead, his calm, complete reliance on the Father in heaven and his watchful trust in His guidance made his days wonderfully beautiful and useful. His yoke could never be other than a joy.—(From "The Christian Science Monitor.")

Holy Land Routs a Locust Army

Night Attack of Devastating Horde Turned Aside by Flame Guns in a Weird Conflict With Ancient Enemy

Jerusalem.—Why do hungry locusts migrate in incredible hosts? Science cannot tell us with certainty, though the plague goes back to Moses and whole libraries have been written on this cloudy curse. Palestine has always known this aerial visitation, so have Syria, Arabia and India. The Bible is full of allusions to agricultural havoc wrought by the locust, swarming in numbers wherewith no effort of man can cope. Orientals seem from of old to have accepted these devastating swarms as an "act of God." But today the afflicted Holy Land has a modern Department of Agriculture which is not fatalistic, but able and anxious to accept the hissing challenge, going forth to battle against the locust with every engine of war known to the modern laboratories of destruction.

A MOONLIGHT BATTLE.

In age-old Jerusalem:—a well-drained, well-lighted and prosperous Holy City—I have been watching a terrific rout by moonlight of the aerial enemy, with the Haifa Defence Corps and the Tiberias and Nazareth Field Companies in full offensive array using flame-guns and new chemical bombs of special design.

Advance forces of the aerial foe were first reported just north of Amman, in the lonely tracts of Transjordania. The defenders advanced at once, spreading out over a space of 18,000 Palestinian dunums, or about seven square miles. Here the fray was fiercest. We had soon taken no less than twenty-seven tons weight of live prisoners, together with more than 100 bushels of eggs. These last, in clusters of from 25 to 125, are laid by the females in little holes scraped in the sandy soil by their hind legs.

Behind our fighting lines we had 500 modern ploughs, turning over the ground where the eggs had been deposited. And our Arab and Hebrew camp followers were seen dumping these eggs into empty wells for unsanctified burial, with shrieks of excited triumph.

AN ARMY OF DEFENCE.

There were daylight campaigns with British engineer officers in command of the attacking forces and soldier-chemists and naturalists in trim khaki as well. The true migratory locust was in full force against us, darkening the Palestine sun in powerful yet curiously leisurely flight. The whole country appeared alive and covered with twinkling adults, and with young wingless 'hoppers" too, in various stages of moult.—Native Arab farmers say that the whole life of a locust is no more than a year, with only one or two broods. Eggs laid in the fall hatch out in the following spring. When quite young, the "hoppers" show a gregarious habit. The families will mass together until they are "as the sands of the sea for multitude." But by what laws they migrate in the search of food, and how they are led and directed on the march or in flight, still remain among Nature's baffling secrets.

For all the tons weight we took, and all the bushel baskets of eggs, those enemy forces continued to advance as though they had suffered no losses at all! Never have I imagined such a spectacle as we witnessed on the classic Plain of Isdraelon between Megiddo and Nazareth. My horse was often fetlock deep in red insects which had changed their color like chameleons, from a dull yellow-green when preparing to swarm in search of food. At times, indeed, my Arab mare was past her knees in the living, feeding masses that struggled upon grape vines and ripening grain and fruit.

Our scouts, both official and volunteer, continued to report fresh invasions, descended apparently from the blue without warning. New swarms were down and feeding greedily between Jaffa and Haifa. Other aerial army corps were devastating the orchards of Tulkeram, and also the line from Hebron to Artuf and the Bab el-Wad, at the edge of the Shephalah farming districts.

Even the roving Beduin were worried and afraid. It was strange to see gayly clad patriarchs down in Jericho at the telephone, praying for deliverance to white magicians up there in Jerusalem, where all knowledge was enthroned, and troops of khaki warriors armed with strange guns that shot out inextinguishable fires.

So ours was a harrassed Department of Agriculture. And at high noon, as disheartening battle swayed back and forth, there were human casualties in our scattered ranks. What wonder, seeing that the temperature, even in thick orange groves, was then above 106 degrees?

"We shall fight all night!" said our Commander-in-Chief. And so, as a pitiless sun sank over a poor and stony land, and faint airs played in brief stifling twilight, the Tiberias and Nazareth Field Companies sallied forth again with more than seventy of their special flame-guns. A great round moon, serene and pale, showed eerily now and then through dark drifting locust-clouds. Into the thick of these rose a squad of Royal Air Force planes. But these were soon forced down, with their radiators blocked and choked by enemy masses.

FLAMES ROUT ENEMY.

Was anything ever more wonderful as the moonlit advance of scientific troops against this recurrent Plague of Egypt? The hot Eastern night was soon rayed and pierced with broad tongues of dazzling flame, a mile long it seemed, that wilted and withered the locusts in countless myriads. We were now concentrating the assault on some ten square miles of invaded farm lands between Semakh and Daganiah. Here burned and scorched locusts lay in incredible heaps.

Our flame guns, strategically placed to anticipate new out-flanking motions of the invader, shot long bars of killing light in all directions, like the searchlights of a naval squadron searching out unseen attackers in a dark and stormy sea. And to all this the howls and yells in Arabic, Hebrew and broken English, and you will visualize the weirdest war scene ever staged in the Holy Land since Joshua advanced upon walled Jericho with his destructive jazz.

Toward dawn intelligence officers telephoned to the fighting front that the endless hosts were no longer continuing to settle on the crops and trees. The enemy were routed at last. More clouds of him seemed to turn back at Jisr Mejaniah, as though afraid to advance into our far-darting fire-zones. Vast columns of locusts were soon flying north-eastward toward the Syrian frontier. And immediately our own authorities, from their aeries in age-old towers in the Holy City, telegraphed news of the enemy's defeat and retreat to the French Ministry of Agriculture in far Damascus.

THE WEARY VITORS.

At down the Tiberia and Nazareth Field Companies packed up and left the field. On their way back to camp and barracks with their queer-looking ballistic and chemical gear, they met "mechanized" forces lumbering out to bury the dead—whose numbers no caravans of noughts could convey. There were many weary days and nights of work for those steam plough and mechanized shovels, and for gasoline trench-diggers and fussy Ford tractors.

Nor were the human victors gay after routing these migrating swarms of devastation. Many of them had fought in bloody campaigns of the World War, from Gallipoli to White Russia, and from Antwerp to the jungles of East Africa. And what our flame-gun experts said about swarming locusts in the Holy Land—in pure cockney and many other lingoes—as they lurched home at sunrise, weary and grim—cannot be printed in the story of the Insect Campaign.—N. Y. Times.

Prayer of World for Peace Planned on Armistice Day

Official Sanction Sought by International Order and Woman's Organizations

During a two-minute silence at 11 o'clock on the morning of Armistice Day, citizens of more than 40 countries will individually offer a definite prayer for peace, if plans now formulated are successful. Committees are now at work in 28 states, seeking official sanction of the plan, as the United States' contribution to this simultaneous world prayer.

Work is being done mainly by committees of the International Order of Service, and by women's organizations reaching all parts of the world, it was learned in Boston at a meeting sponsored by Mrs. J. D. Leland, one of the originators in the United States of the moment of silence, and attended by Capt. Max Wardall, secretary of the International rder of Service.

In Massachusetts, as an example effort is being made to have even traffic stop during the two minutes endorsing this move. Radio, public speaking, church services and motion set aside for silence on Nov. 11. Alvan T. Fuller, Governor of Massachusetts, is being asked to sign a proclamation pictures will be called into use to further the plan.

Captain Wardall believes that a brief silence, devoted to prayer, will tend to make a more fitting observance of the day than more martial celebrations and displays of arms and troops. The International Order of Service, he said, is also trying, through its chapters in 43 countries, to establish an international Peace Week, to start on Nov. 5 and end on Armistice Day.

"People must think in terms of peace and in an atmosphere of peace," said Captain Wardall. "Even with the magnificent gesture of the Kellogg treaties the work of establishing permanent peace has just begun. The firing of guns, parades and the constant showing of war films are but a few things that keep alive a war sentiment, indicating the romantic side of war with little hin of the worser aspects.

The peach crop of Canada this year will, it is estimated, total 687,690 bushels, compared with 347,580 bushels last year, an increase of 342,110 bushels.

The will of all nations is not pressure; it is reality.—Paul Boncour.

An ill-suppressed hysteria showed under Anita's efforts at composure. Higgins peered at them through his heavy-lensed spectacles.

The British High Commissioner

Sir William Clark has arrived in this Dominion to assume the duties of High Commissioner for Great Britain in Canada. It is forty-eight years since Canada named Sir Alexander Galt as her first High Commissioner in London, but Sir William is the first occupant of the complementary post to be chosen by Britain.

In the first interview given out on his arrival on these shores Sir William describes the functions which he has come here to carry out as "an additional channel of communication between the Government of Canada and that of Britain. . . . Co-operation and interconsultation have for long past, one is glad to think, been the keynote of the relations between the two governments and it is hoped that the creation of my appointment may make the bonds between them still closer. So far as in me lies it will be my earnest desire to do everything in my power to further that end."

Such a declaration will confound those pessimists who see in the new appointment some sinister effort to undermine the British Empire and to weaken the cordiality of the relations now existing between London and Ottawa.

Sir William Clark has had a wide experience in the machinery of government administration. He is a man of outstanding talent and strong personality, and it is hardly likely that he will ever consent to be nothing more than a transmitting agency between Ottawa and London. Sir William Clark announced that it will be his first task to travel throughout Canada from end to end in order to gain knowledge of the country and to discover the varying outlooks of the people in the different provinces. Such a course has everything to commend it, and when he has returned to Ottawa he will be in a far better position to interpret the negotiations in which he is to play the part of go-between. With such knowledge he will not merely be transmitter of communications, but a transmitter, interpretting the Canadian view with a detached and impersonal outlook, rather than the mere official viewpoint of a Cabinet which is bound to be influenced by the restrictions of political expediency.

The appointment of Sir William is a natural outcome of the Imperial Conference of 1928, by which the powers and privileges of the Governor-General in Canada were restricted, the Governor-General becoming the personal representative of the Sovereign while the ttawa Government transacted its business directly with the Cabinet at Westminster. This plan has worked well and the appointment of a High Commissioner should ensure an even smoother running of the machinery than created.

It is a tradition in England that she sends to Canada men of outstanding ability and brilliant gifts. To the long roster of men who have served the Empire so ably as Governors-General must now be added those who are to serve in the exalted office of High Commissioner. It will be a post demanding ability and qualities of rare tact and geniality. Sir William Clark's past record in the Board of Trade in India and in other branches of Imperil service warrants the confident expectation that he will set a standard in the new office worthy of the past which will be difficult to surpass. In so doing he will have the support and the good wishes of the united people of Canada.—Montreal Star.

Legs and the League

London Sunday Dispatch (Ind. Cons.): We congratulate the young women who effected an entrance to the Council room of the League of Nations without the guarantee of respectability afforded by stockings. If the League has a fault, it lies in a slight tendency to excessive detachment from common life. If its councillors follow the rest of the world in making the discovery of the female leg, it may help to humanize them and cannot hinder the work for peace.

Titles count for nothing nowadays. —Sir Oswald Mosley.

Canada's Premier Visits Trenches

Party of Distinguished Visitors From Dominon See Work in Progress

Paris.—Premier Mackenzie King of Canada, accompanied by a party of distinguished Canadian visitors to France, inspected the Vimy Monument and trenches occupied by Canadians along Vimy Ridge, scene of some of the most bitter encounters of the Great War.

The tour was a thorough one, and at its conclusion Premier King expressed the opinion that all the unexcavated trenches on the line the Canadians held so gallantly should be opened up so that visitors would be able to inspect the whole of the position occupied by Canadian troops. Up to the present only the main series of trenches has been excavated owing to the expense involved in the work. Premier King stated, however, that he believed Parliament would be willing to vote the necessary money to complete the work. He suggested that plaster casts or replicas of trench wall carvings made by Canadian soldiers be made up to go on exhibition in public institutions in the Dominion.

After viewing the pedestal to the Vimy Monument, which is rapidly nearing completion, and hearing an explanation of the landscape work being carried out, the Canadian party left for Lille, where industrialists interested in Dominion enterprises tendered a luncheon. Premier King, in replying to the welcome, declared that the Canadian Legation at Paris was a symbol of goodwill between France and Canadians in Canada on the one hand and the British Empire and the French Republic on the other.

A private car placed at their disposal by the French Government carried the Canadian party during the journey. Premier King was accompanied by Hon. Rodolphe Lemieux, Speaked of the Canadian House of Commons; Senator H. S. Beland and Mrs. Beland, Hon. Raoul Dandurand and Hon. Phillipe Roy, First Canadian Minister to France.

Major Seagrave Will Attempt to Beat Record

Car Being Built Which Is Designed to Travel 240 Miles Per Hour

London.—Further particulars are now available of the remarkable automobile with which Major Segrave, who was the first man to travel at over 200 miles per hour in a car is to attempt to establish a new speed record on Daytona Beach, Florida, next March.

Many features of the mechanism still remain a closely guarded secret, but it is designed to travel at least 240 miles an hour. The body is only 2 feet wide, the length 28 feet, and the weight 3½ tons. The Napier engine has been developed to give a maximum of 1,000 brake horsepower without forced induction. The brakes are specially designed to reduce the risk of heat, since they will have to enable the car to pull up from 240 miles in four miles.

One of the most remarkable features is the equipment of the car with telescopic sights. When traveling at 200 miles an hour or more it is impossible to steer by ordinary objects, and flags marking the course appear merely as a blurred line. With the aid of telescopic sights similar to those used with a rifle, the car will be steered much as a bullet is aimed. Two huge targets will be erected at Daytonia on a scaffolding above the electric-timing wires, one at the start and the other at the finish of the measured mile over which the attempt will be made.

Each target will have a huge bull's-eye. The driver when gathering speed will get the car's sight aligned with the bull's-eye on the first target and then drive straight for it, sighting on to the second bull's-eye as he enters the measured mile. Major Segrave's car is completely assembled. Its cost, which amounts to many thousands of pounds, is being borne by two London business men. The week after his attempt on the land speed record, Major Segrave proposes to attack the water speed record in a motorboat.

6,000,000-Year-Old Fossil Discovered in Central Asia

Roy Chapman Andrews Finds Remains of Mammal Believed to Have Been 25 Ft. High

Bombay.—A 6,000,000-year-old fossil of the earth's largest mammal is among the discoveries announced by the American Central Asiatic Expedition, just returned to Peiping (Peking) from a three-months' exploration in the interior of Mongolia. Roy Chapman Andrews, the leader, says that the monster is probably related to the Baluchitherium found in Baluchistan, and must have been at least 25 feet high and weighed 15 to 20 tons.

Mr. Andrews failed to find traces of the "Pre-dawn man" who he is convinced existed 2,000,000 years ago, but he is unexpectedly compenstated for this disappointment by the discovery of important traces of mazzolithic culture resembling azilian culture found in France (in a cave at Mas D' Azil) and in its later stages in Scandinavia. Those people appear to have dwelt among the Mongolian sand dunes about 20,000 years ago and were evidently vastly more numerous than the Mongols to-day.

Mr. Andrews thinks it probable that as Mongolia became more and more arid they migrated into China across Siberia, possibly as far as Alaska. The Andrews' exposition covered altogether 5,000 miles exploring and mapping much of the unknown territory.

To Make Sahara Bloom Like Rose

The French Have Scheme Which Will Change Africa's Future

An engineering scheme which, for boldness of conception, rivals Ferdinand de Lesseps's achievement in making the Suez Canal, is now under the consideration of the French Government. Mr. Albert Tardieu, Minister of Public Works, Mr. Painleve, Minister of War, Mr. Briand, Foreign Minister, and Mr. Jules Cambon, are all said to have express themselves favorably on the subject; while Mussolini has referred to the project as "a Roman idea," and has asked to be kept informed of its progress. The originator of the scheme is an American, Mr. Dwight Braman, of Boston, who was responsible for great irrigation works in California at the end of the last century. He proposes to redeem for cultivation an area of some 10,000 square miles in the Sahara Desert by letting in the waters of the Mediterranean Sea through long canals, and by damming the rivers that now flow south from the Atlas Mountians. The new inland sea, stretching from Biskra to the eastern coast of Tunis, would, it is expected, promote rainfalls and serve as a ready means of transport for the fertile lands to be opened up on its borders; and the building of dikes in the hills would enable trees to be planted where no vegetation has grown for 2,000 years. In short, as the London "Morning Post" expresses it, the anticipation is that "a barren and uninhabitable region would be converted into a land flowing with milk and honey, sheep and oxen, and inhabited by a prosperous population." The Morning Post continues:

"The prospect of supplying Europe with a new granary is certainly an attractive one; and it is not surprising to hear that such a scheme put forward by so serious and desponsible an undertaker should be under the consideration of the French Government. Algeria, Tunis, and Morocco would all be affected immediately, and apparently to their great economic benefit; but those who accepted responsibility for such an experiment would be bound to satisfy themselves that all the consequences had been measured. So audacious an interference with physography might well raise misgivings in timid minds. Does not the Prophet Amos declare that who 'calleth for the waters of the sea, and poureth them out upon the face of the earth, the Lord is His name?' And it is impossible not to reflect that it might be easier to do this thing than to undo it. On the other hand, some of man's greatest triumphs have been in the direction of modifying his environment to his needs and of reclaiming waste spaces to his use.

"Nor is it in the tradition of the French any more than of the British or the American genius, to shrink from great engineering enterprises. But what would be the effect, not only on North Africa, but on Southern Europe? Neither the engineers, nor the physiographers, nor the economists can answer that question confidently."

Macdonald's Tour of Canada

British Labor Leader Finds Mining Families Well Settled on Farms

In his last speech before leaving for home, J. Ramsay MacDonald, British Labor leader and former Premier, said he objected to the word "Empire" as implying force, while in reality the great genius of the British Empire was its ability to maintain itself in an ever-growing atmosphere of understanding, sympathy and self-respect.

Canada's outstanding problem today, he said, was immigration, a problem which was solvable if taken up with Great Britain in properly conducted council. Referring to recent criticism of Canada's handling of the 8,500 British miners who had been brought over to harvest the western crops, he declared that according to his knowledge not more than 3 or 4 per cent of them had any just grievance, which was a remarkable record. He had talked personally with some of those who had immigrated under the family settlement scheme and had found them greatly contented with their lot.

The question of the relationship between the dominions and the Motherland, continues Mr. MacDonald, was now superseded by the Empire's relationship to the world at large, as based on trade. In this direction little progress had been made as yet. He suggested that the man who would work out the problem of the relationship of the co-operative wheat pools to imperial trade might discover how to stabilize trade relations as between the self-governing dominions and the rest of the world. Which should come first, imperial trade or international trade? It was a question which demanded considerable thought.

DOESN'T GAS ON THE STEPS

"Does your feller ever gas on the steps with you in the evening?"

"I should say not. He steps on the gas with me in the evening, my dear."

The funeral of William Ezra Coons, took place from the residence of his son-in law, Mr. H. A. Brown, Brockville, where he died. The service was conducted by the Rev. William Wells, and interment was made in Point Iroquois cemetery, with the Rev. Thos. Knowles assisting. Deceased was born in Inkerman where he engaged some years in farming, going to Manitoba when quite a young man, returning he again took up farming on Point Iroquois, soon, however, going into railroad work, when he, with his family moved to Brockville. He continued in the employ of the C. N. R., until last July. His wife predeceased him 13 years ago.

The United Church

(Contributed)

Rev. Dr. Cleaver enlisted the sympathy and co-operation of his hearers on Sunday morning when in a few introductory remarks he answered the supposed query, "Why are you here?" He made it clear that he had come to share with us something of the joy he has received from the gospel of Jesus Christ. Taking the story of the Lost Jesus as told by Luke, Dr Cleaver gave a very earnest message. He said this was the most important event in the first 30 yrs of the life of Jesus. In looking down the ages the Church and the people are in danger of loosing Jesus. The inner circle of the Church are today losing Jesus. They can lose Him without knowing it We were urged just at the beginning of these meetings to search our hearts and see that we have not lost the pearl of great price

Dr. Cleaver said, "Everything without Christ is only rotten timber. Do you walk and talk with Him? If He has not first place in your hearts He can't be there. Find Jesus in the Church for God is in His Holy Temple.

For the evening Bible lesson the story of Ezekiel 47 was told by Dr. Cleaver who made us see the vision of the growing stream which represents the gospel of Jesus Christ. This stream came from underneath the house. "The Church's one foundation is Jesus Christ our Lord." The stream flowed out to the desert so the direction of the gospel of Jesus Christ is always to the desert where it is needed most. We are called to labor in the desert of human woe and sin. We were urged to link up with this stream and head for the desert.

The choir sang an anthem of praise in the morning, and "The day thou gavest now is ended," at night.

Billy McPhail, Allen Preston Ernest Helmer and Jean Waddell each received well bound New Testaments in recognition of faithful attendance at Church.

Dr. Cleaver is continuing to speak every night this week on, "The Problem of Life, and how to solve it." Monday night he talked on prayer saying it was the only solution of life's problem. His messages are very spiritual and uplifting. He will speak also at both services next Sunday.

Moore—McNeill

(Kenmore)

A very quiet marriage was solemnized at the United Church Manse, on Oct 10, 1928, when Jennie Isabelle, eldest daughter of Mr. and Mrs Jas McNeill Metcalfe, was united in marriage to Matthew Porteous Moore, eldest son of Mr. Harry Moore, and the late Mrs. Moore, of Vernon, by the Rev. J. H. Woodside.

The bride looked charming in new blue crepe faced satin with sand trimming with blonde shoes and stockings to match. Immediately after the ceremony the happy couple left for a trip through the States, going first to Madrid, N. Y., where a dainty supper was served by the bride's aunt, Mrs. A. B. Liscumb. The bride travelled in black silk trimmed with old rose, with rose beige coat and hat tan shoes and stockings, also purse to match.

On their return there was a reception held at the home of the bride's father, where about seventy guests signed the bride's book. Games and dancing were enjoyed by all until the small hours of the morning.

The bride and groom received many beautiful and useful gifts showing the high esteem in which they were held.

Mrs. A. B. Liscumb, Miss Florence Liscumb, and Mr. and Mrs. Fred Shaver and two children accompanied them home.

Presentation

On Monday evening, Oct. 8th about seventy friends and neighbors gathered together at the home of Mr. and Mrs. Ronald Carkner, Vernon, Ont., in honor of the approaching marriage of Mr. Matt Moore.

During the evening an address was read by Mr. Ronald Carkner and Mr. Arthur Porteous presented the groom-to-be with a purse of gold.

Mr. Moore replied in his usual jovial manner after which everyone joined in singing, 'For Matt's a Jolly Good Fellow.' The evening was spent in games and music and lunch was served at midnight.

Dear Matt:—

We have met here tonight on the eve of your approaching marriage to offer our congratulations to you and the estimable young lady who is to be your bride.

You are a lucky man to win such a lovely bride, and we wish you a long, prosperous and happy wedded life.

We extend to you and your bride a hearty welcome to our homes at any time you may come to see us which we hope will be often.

Please accept this purse of gold as a slight token of our esteem and friendship.

Signed on behalf of your neighbors and friends.

What Do You Think

The following case of what many people would call "Juvenile Depravity" is recorded by the Acton Free Press. To others it would appear to be a case of "Parental Depravity." What is your opinion. The five lads who were implicated in the theft of $129 from a Georgetown merchant's coat pocket, came before Judge Moore in the Juvenile Court on Monday morning at nine o'clock. Each of the five told a straightforward story of the part he had in the distribution of the money. The evidence showed that it was spent for candies, ice cream, cigarettes, cigarette holders, cigarette lighters, flashlights, girl's bracelets, pearl beads, compacts, handkerchiefs, etc. Between $70 and $80 of the stulen money was spent by the lads before attention was called to the matter and Chief Marshall began his investigation and received $50 and some of the purchases. The fathers of the boys who were in court during the trial, made up the balance of the money admitted to have been stolen. One boy admitted that he had spent $18 on himself for candies and ice cream. All the boys admitted smoking cigarettes, and two girls, who had received gifts from the boys, also admitted they had been smoking cigarettes. Evidence was adduced that several of the boys, under fourteen years of age, had purchased cigarettes from Georgetown dealers in violation of the law. Several cases under the statute forbidding the sale of tobacco or cigarette to minors, will likely follow this revelation.
