Our Column

Tourist travel along the front has commenced.

Soft-ball should become a popular game this summer.

Who is to venture on our street first wearing a straw hat.

The popular song in Spain just now is "After you, my dear Alfonso."

Decided change in the weather this morning and it looks like a wet spell.

It is only age who fully and truly appreciate a happy face and cheerful manner.

People in towns and villages often wonder who kept the weeds out of the Garden of Eden.

To keep as young as you can and as long as you can is the only secret worth knowing.

Smith's Falls is trying to recognize its Horticultural Society. It should never have let it go down.

It was clean-up day in earnest judging by the amount of refuse taken away from in front of town residences.

It is never so bad but it might be worse and that is the proper view to take during this trade depression period.

Be careful with fire, and espscially at this season of the year. Don't leave any fire in your back yard at night.

Before Parliament determines on a proper scheme to help the farmers, the farmers will be at the edge of another winter.

The Bennett government was sustained yesterday by a vote of 111 to 77 on the Amendment to the adoption of the Speech from the Throne.

Now is the time to object to your assessment if you think you should. Don't wait until after the court of revision and then blame everyone but yourself.

The new C. P. R. time table is expected to come into force on Sunday next. If you want any train on Monday next better enquire before you start for the depot.

April 1931 will probably go down in the records as the hottest April ever known in Ontario. Perhaps some old-timer can tell us of one he remembers that can beat this year, but we doubt it.

Judging by the piled up furniture on verandahs, and bedding hung out on lines, there is many a husband without a home, and many a wife trying her best to make one. This spring housecleaning ma be necessary from a woman's point of view, but from a man's, it is one of the biggest nuisances ever thought of.

Construction of more than 1,850 miles of primary lines is called for in rural extention plans drawn up by the Ontario Hydro Commission, in addition to the 7,100 miles already constructed. The new programme will serve more than 9 700 customers. Rural extensions this year are allocated as follows: South-western Ontario, 1,051 miles; northern Ontario, 292 miles, and eastern Ontario, 519 miles.

After all, what is a government?" asks Senator Sir George Foster, and answers it in terms plain enough to be understood: "A government is a committee of the nation, elected and established according to our constitutional forms, upon which we throw the onerous duty of making a thorough examination into the condition of the country and of coming to reasoned conclusions and submitting plans and policies to the two Houses in order to give them effect and put them into operation." In a smaller way, so is the municipal council. But there is one addition, it being closer home, more criticism and frequently more abuse is piled on it says the Collingwood Bulletin.

There are fancier towns than our little town, there are towns that are bigger than this, and the people who live in the smaller towns, don't know what excitement they miss. There are things you see in a wealthier town, that you can't in a town that's small; and yet up and down, there is no other town, like our little town after all. It may be that the streets aren't long, they're not wide or maybe paved: but the neighbors you know in your own little town all welcome a fellow—it's great. In the glittering streets of the glittering town, with its palace and pavement and thrall, in the midst of the throng you will frequently long for your own little town after all. If you live and you work in your own little town, in spite of the fact that it's small, you'll find it a fact that our own little town, is the best little town after all.

Will Stop Trains

Reeve Ross of Winchester has received assurance from the C. P. R. Supt. at Smiths Falls that the midnight and early morning passenger trains going west and east respectively, will stop at Winchester on being flagged, or to accommodate passengers who wish to get off here. The prompt action taken by the Council, and the petition circulated has had the desired effect.

Was 95 Years Young Yesterday

Mrs. William Timmins, of Winchester, was 95 years young yesterday, Wednesday, April 22nd, and she was the recipient of many messages of congratulations and kind wishes. Mrs. Timmins is a regular attendant at the United Church, and walks from her home to the church every Sunday. She is also able to be about every day, performing her household duties. Her hearing and eyesight is excellent, and her memory most remarkable for one of her years. The Winchester Press joins with her many friends in congratulations and best wishes for many more years of health and happiness.

LOCAL AND GENERAL

The Annual Convention of the weekly Press Ass'n will meet at Regina this year with a side trip to Banff Springs.

The Galvin Players were greeted by a full house here on Friday last, when they presented the comedy drama, "Ritzy."

There will be a Celebration of Holy Communion in St. Matthias' Church next Sunday at 8 30 a. m., Sunday School at 3 p. m.

The Beach Manufacturing Co. are very busy at their factory here this spring, and are employing all the men they can handle.

On Friday evening there passed away one of Osgoode Station's highly respected citizens in the person of Martha James, wife of John Saunders, in her 72nd year, after an illness of some weeks.

The ladies who put on the play, "Who Cares," for the local W. C. T. U. last week, have been invited by the ladies of Winchester Springs United Church to put on the play and arrange for the rest of the program on Thursday night of next week.

Irwin Hilliard, K. C., formerly of Morriburg and at present Assistant Master of the Supreme Court of Ontario, is soon to be promoted to the position of Master-in-Chambers at Osgoode Hall according to an announcement made by Col. W. H. Price, Attorney General of Ontario. He succeeds Col. George A. Drew, who will be appointed as a commission to administer the Security of Frauds Acts of Ontario.

Enlarging Rink

Lovers of Hockey and Skating will be glad to learn that the Winchester Rink is to be enlarged so as to give more dressing room and also other much needed conveniences. Where the new well was drilled by the Municipality and the Rink Co., a covering for the new pump and a hose reel had to be built, and when this was considered the directors thought it a most opportune time to extend the 16ft. addition all the way across the front of the rink, and this gives the much desired extra space inside. The work is now proceeding, and will be completed in a couple of weeks, and when finished will make the Winchester Rink one of the best in Eastern Ontario.

Hearn—Christie

A wedding of Province-wide interest took place on Saturday afternoon at the residence of Dr. G. I. Christie, President of the Ontario Agricultural College, and Mrs. Christie, when their only daughter, Margaret, was united in marriage to Joseph Larkin Hearn, son of Dr. J. L. Hearn and Mrs. Hearn of Houston, Texas. Rev. W. J. Gallagher of Chalmers United Church officiated. Relatives and intimate friends of the family, members of the college faculty and their wives and many distinguished out of town guests were in attendance. The ceremony took place under a floral arch. The bride, descending the staircase with her father, to the strains of the wedding march from Lohengrin, played by Miss Freda Fowler, was a picture of girlish loveliness in a gown of shell pink lace made on moulded lines. The skirt with fitted hip line fell to the floor in graceful folds and a short jacket with long flowing sleeves featured the bodice. She wore a wide mohair hat of French blue and carried a bouquet of Ophelia roses and forget-me-nots looped with blue taffeta ribbons. Her shoes were of satin in the same shade. She was unattended A reception followed the ceremony, Mr. and Mrs. Christie, Dr. J. L. Hearn and Mrs. Hearn, Mrs. Joseph Myers of Bracebridge and Mrs. Ezra Summers of Winchester, Ont., receiving with the bride and groom. Mr. and Mrs. Hearn left on an extended honeymoon trip through the Canadian Northwest, and will spent the next year in California, where Mr. Hearn will continue his studies at the University of California.

A Pleasant Dinner Party of Chevrolet Salesman

The editor of the Winchester Press was a guest at a very pleasant dinner party held at St. Lawrence Hall, Morrisburg, on Wednesday evening this week, when Mr. Hart Melvin, who is Vice-Fresident and Sales Manager of the Melvin Company and its popular Chevrolet Car, was host. It was what he termed a "get-together" dinner of the representative salesman of Melvins and the Chevrolet Car in Dundas County, and a recognition of the splendid work done by the several salesmen during the spring season. It might be mentioned that each district has an objective in the matter of sales of Chevrolet cars, and as this district had, under the direction and organization of Melvins attained its objective up till the end of March, not only Hart, but each of his salesmen were in the very best of spirits, and the dinner party was a decided success in every respect. It might also be mentioned that Melvin's have built up in Winchester a business that is perhaps not excelled by any county district in the province. The dinner was an evidence of the splendid spirit of co operation and good fellowship that exists in the splendid organization. Another guest at the dinner party was Mr. E. W. Birkett of Ottawa, who has under his supervision this Eastern zone of General Motors for the handling of the Chevrolet and Oldsmobile cars. Mr. Birkett said that the sale of the Chevrolet cars in Canada so far this year had far exceeded their most hopeful expectations, but he was glad to inform Mr. Melvin and his salesmen that the Company was now able to meet all demands; although up till this month they were not able to meet the demands for the 1931 Chevrolet. Those present at the dinner party were Mr. Hart Melvin, Vice-President and Sales Manager of the Melvin Co., Wincheste.; Messrs. Albert Johnston, Parts and Service Manager of the Melvin Co., Winchester; E. W. Birkett, Ottawa; John Harback, Morrisburg; Ross Fetterly, Morrisburg; Chester Timmins, Howard Fetterly, of Winchester; H. Everetts, Iroquois; Fred Wells, Morrisburg; Ernest Trickey, Williamsburg; Milton Shaver, Chesterville. In Chesterville and Morrisburg Melvins have show rooms. We might add that the men who surrounded the tables were alert, keen and the right kind of salesmen, and after meeting and talking with them one is not surprised that the sale of Chevrolet cars in this section is far in excess of all other makes of cars.

LOCAL AND GENERAL

It is reported that the C. P. R. Station at Inkerman is to be closed.

Work at the rink is being rushed under the direction of Mr. Thos. Bailey.

Winchester has a clean appearance now, See that it keeps that cleans appearance all summer.

If you want some flowering plants to make your home surroundings attractive join the Horticultural Society and give an order for some plants to the Secretary, Mrs. George Armstrong. You get your plants at first cost.

Dr. John S. Dickey, of Newington, passed away at the Cornwall General Hospital Wednesday following a brief illness with pneumonia. The late Mr. Dickey was born at Williamsburg 58 years ago, the son of the late Mr. and Mrs. James Dickey.

Joseph Roy, 54 Lennox Street, Cornwall, is in Cornwall General Hospital, suffering from severe burns on the arms and body, which he received when he fell asleep while smoking a cigaret in a bedroom at Ernie's Hotel, Maplegrove, three miles west of Cornwall.

Mr. Vanamber Greer, of Toronto, Provincial Inspector of Public School Inspectors, was in Winchester this week on his official visit. Being an old Winchester boy, he was greeted by many old friends. He is one of the outstanding examples of the splendid success of a Winchester born boy.

The many friends of Mr. A. F. Utman will be pleased to learn that he has accepted a position with Hy. Bessin as Manager of the Boot and Shoe department and of the Men's Clothing department in his Winchester Store. Mr. Utman will continue to operate his service station with his son as Manager. Although Mr. Bessin is going to operate a store in the village of Russell, he will still reside in Winchester, and divide his time between the two places.

Time Table Changes

On Sunday, April 26th, a change in the time schedules of passanger trains on the C. P. R. eastern system comes into effect. For particulars apply to Mr. T. W. Boyce C. P. R. agent at Winchester.

Car and Truck in Collision

As Stewart Anderson was backing his Ford out from the end of Ault's Factory yesterday morning, Ruben Prunner came up the side street, and before either of them knew what had happened, they were out viewing the damage done. It was the Ford that suffered most. No bones were broken, although some fenders were badly bent.

Weather Pranks

While on Sunday last Ontario was enjoying midsummer weather and the sun was oppressively warm, in Western Alberta and Saskatchewan they had gero weather and in some parts heavy snow storms, with high winds. After all, Ontario is not such a bad place to live in, and the weather, like the people, is pretty well balanced.

A Record Sowing

Mr. J. E Lanoue, Melvin Settlement, will probably hold the record for some time for early sowing and early grain Of course Mr. Lanoue has one of the finest farms in Dundas County, but it is one of the best because Mr. Lanoue keeps it one of the best. To-day, April 23, Mr. Lanoue has 12 acres of wheat that is over 2 inches above the ground and he has 110 acres of grain sown. Many farmers are hard at work on the soil, but we doubt if many in Eastern Ontaria can claim to have over 100 acres in seed on the 23rd of April.

Something New

Here's a stunt for church organizations seeking a new idea for raising money. The young ladies' Bible Class of Petrolia United Church entertained their husbands at a banquet, which preceded a most interesting and amusing program. Following the program the unpatching of a suit of overalls, which had been patched as a means of raising money was undertaken. The overalls had been passed around and 182 patches had been sewed on, under each one of which a sum of money was placed. Jerry Taylor was dressed in the garment and the patches taken off by the members of the class. It was found that $45 had been raised by this means.

A Braeside Mountie

Many in Winchester will remember having met Mac, Carmichael, a nephew of Mrs. Geo. Cobourn, and who has in past years been a guest here both of Mr. and Mrs Cobourn and Mr. and Mrs. T. O. Keyes. The Ottawa Citizen of Saturday last has this to say of "Mac."

"When Mackie Carmichael was a barefooted lad around Braeside he was always profoundly impressed by all things military and his greatest pleasure was to wield a wooden sword and to emulate the manouvers of a soldier on parade. It was frequently his childish boast that some day he would wear a military uniform and revel in the sound of musketry. 'Tis not often that one finds his dreams come true so accurately.

"Mackie McLaren (Mac) Carmichael has been a member of the Royal Mounted Police for only two years, yet he has attained to honors and distinctions far above the ordinary. Four "Mounties" from all of Canada were chosen for the honors of the guard at the Canada Building that comprises part of the great British Empire Exhibition in South America, and the Braeside boy is one of the four Writing from the Canada Building down there to his mother. 'Mac" says that from 70,000 to 80,000 people visit the Canada Building every day and they seem to gaze awe-stricken at the "Mounties" in their scarlet tunics, spurs and sombreros. They have been lionized everywhere, second only to Sir George Perley and the other official delegates from the Dominion.

He is a son of Mr. and Mrs. John H. Carmichael of Braeside village, stands more than six feet in height, is only twenty-four years of age, and in facial expression and physique is a personality who would cause people anywhere to turn and gaze after him."

SOCIAL AND PERSONAL

Mr. and Mrs. P. A. McGregor and Annalea were week-end guests of Ottawa friends.

Mrs. R. M. Rodney of Brantford has returned home after attending the funeral of Mrs. Geo. Scott.

Dr. Seymour of Chesterville and W. C. Seymour of VanCamp attended their uncle's funeral on Wednesday last at Cardinal.

Mr. and Mrs. David Bruce and Mrs Alfred Jones attended the funeral of the late J. W. Seymour of Cardinal on Wednesday last.

Miss Helen Jamieson left Monday for Windsor to attend the Provincial Annual of the Womens' Missio ary Society of the Presbyterian Church, held this week in that city.

Messrs. Geo. and J. W. Beattie of Cornwall spent Sunday here with their father, Mr. D. Beattie and sister, Mrs. Earle. They were accompanied by Miss Reid and Miss Helen Beattie, also of Cornwall.

Mr. and Mrs. Floyd Riddell and Thelma and Delbert Riddell motored to Montreal on Thursday to take up their position on the Patterson Steamship Coteau dock. They were accompanied by Mr. Willis Riddell and friend, Miss Mattie Balkwill. Mr. Willis Riddell and Miss Mattie Balkwill and Delbert Riddell returned on Friday from Montreal.

Mrs. K. Helmer, who has not enjoyed very good health for sometime past was taken to the Cornwall hospital on Monday and had to be operated on, on Wednesday morning. The operation, a very delicate one, was successfully performed, and so far Mrs. Helmer is reported as progressing favourably. Her many friends wish for her speedy recovery.

Messrs. Geo. Elliott, Rupert Helmer, Mac Singleton, Bill Agnew, Ken Annable and Miss Mebel Waddell, all students at Queen's University, Kingston are now at their respective homes, here, after a strenuous term and examinations. The Press wishes them one and all the very best possible success.

Another Morrisburg Fire

The lumber mill and other building, besides a large quantity of lumber owned by A. H. Merkley, Morrisburg, were destroyed by fire last Thursday. The loss is estimated at over $35.000 and it is stated there is no insurance. The fire was caused by someone starting a grass fire near the premises, and the high wind caused it to spread.

To be Cement Road from Winchester to Carleton Boundary

The following appeared in the Ottawa paper of Friday last.

A bad stretch of Ottawa-Morrisburg Highway from the end of the present 22 miles of asphalt pavement under control of the Ottawa Suburban Roads Commission to the village of Winchester, a distance of 6.5 miles is to be repaved this year with a fine surface of cement concrete. The Ontario Department of Highways are now calling for tenders for the work which will likely cost about $150,000 as the type of surface specified involves an outlay of about $25,000 a mile. From Winchester on to Morrisburg the road is surfaced with macadam, and treated periodically with tar and oil. The new surface to be laid will be similar to that constructed on the Ottawa-Pembroke highway last year between South March and Carp.

Garden Plants

For reliable Tomato and Cabbage Plants. also Perennial Roots, buy them from Miss N. Merkley, Cameron Ave. Choice Plants at a moderate price.

52-1p Phone 602r24

CARD OF THANKS

Mr. and Mrs. W. J. Rodney wish to thank their friends and neighbours for their kind expressions of sympathy during their recent sad bereavement.

The Way of Life
By BRUCE BARTON

"If a Man Die, Shall He Live Again?"

IT is the age-old question, asked at the side of every bier.
And what can one say in answer to it?

Every one of us is taught in childhood to believe in God and an after life.

"The world just happened," say some men. "It created itself through the operation of natural laws."

But who or what established the natural laws and set them to operating?

When you can dump a load of bricks on a corner lot, and let me watch them arrange themselves into a house—when you can empty a handful of springs and wheels and screws on my desk, and let me see them gather themselves together into a watch—it will be easier for me to believe that all these thousands of worlds could have been created, balanced, and set to moving in their separate orbits, all without any directing intelligence at all.

Moreover, if there is no intelligence in the universe, then the universe has created something greater than itself—for it has created you and me.

Is it easy to believe that a universe without personality could have created us who have personality?

Isn't it *easier* to believe that our personality is a littly part of the great pervading Personality that has created and now permeates the universe?

And if there be a Personality in the universe—a God—what kind of God is He?

He must be at least as good as you or I. He could not have made us better than Himself. The worse can not create the better.

And if He is a good God, is it reasonable to suppose that He would have planted in human hearts this unquenchable yearning for immortality, and left that yearning unsatisfied?

You and I would not have done so.

Go where you will, from the most savage race to the most cultured, you will find that same instinctive assurance that death is not the end. Would a good God plant that assurance in his creatures merely to mock them?

Without immortality the world is an answerless riddle. We are born; we struggle up through slow years of development; and just as we have reached our highest point of usefulness—we are cut off.

It is *hard* for me to believe in a universe that made itself, and that ruthlessly casts away its most precious possession—human personality.

It is *easier* to believe that behind the universe is a guiding Intelligence, of whose personality my own is a tiny spark that shall not go out while He lives.

If I cannot prove that this is so, neither can any one prove to me that it is not so.

And, until some one can disprove it, I find it *easier,* more helpful, more efficient, to believe.

The Scrap Book

BEDOUIN LOVE SONG

By Bayard Taylor

From the Desert I come to thee
On a stallion shod with fire;
And the winds are left behind
In the speed of my desire.
Under thy window I stand,
And the midnight hears my cry:
I love thee, I love but thee,
With a love that shall not die
  Till the sun grows cold,
  And the stars are old,
  And the leaves of the Judgment
  Book unfold!

Look from thy window and see
My passion and my pain;
I lie on the sands below,
And I faint in thy disdain.
Let the night winds touch thy brow
With the heat of my burning sigh,
And melt thee to hear the vow
Of a love that shall not die
  Till the sun grows cold,
  And the stars are old,
  And the leaves of the Judgment
  Book unfold!

My steps are nightly driven,
By the fever in my breast,
To hear from thy lattice breathed
The words that shall give me rest.
Open the door of thy heart,
And open thy chamber door,
And my kisses shall teach thy lips
The love that shall fade no more
  Till the sun grows cold,
  And the stars are old,
  And the leaves of the Judgment
  Book unfold!

HUMORETTES

BUSINESS MAN: Do you think you know enough to be useful in this office?

BOY: Know enough? Why, I left my last place because the boss said I knew too much.

Judge: The two men were fighting with chairs. Didn't you try to establish peace?

Witness: No, there was not a third chair.

"What heavy, unwieldy things the old-fashioned wedding rings were," said the young girl catching sight of her grandmother's ring.

"Yes dear," was the reply. "In my day they were made to last a lifetime."

THE ROTARY MOVEMENT

GAVE THREE THOUSAND CLUBS TO THE WORLD.

Aims to Achieve Service to Others, and a Higher Ethical Standard In Commercial and Professional Dealings—Life of Founder.

On all sides one hears of the amazing growth of the Rotary movement. How, for instance, four years ago, London had only one Rotary Club, whereas now it boasts forty-four; how Rotary is expressed in 3,000 clubs scattered over forty-four countries of the world; and how in Great Britain alone there are 317 centres of Rotary with a combined membership of 15,000, writes Claude F. Luke in Tit-Bits.

Briefly, Rotary aims to achieve service to others, and a higher ethical standard in commercial and professional dealings. Its members are representatives of different callings; that is, in one Rotary Club you may find lawyer, doctor, motor manufacturer, newspaper proprietor, hotel manager, chemist, dramatist, novelist, and so on, but never two of the same trade in the same club.

Weekly luncheons are held at which each member takes his turn in addressing the others on some interesting and instructive side of his business, knowing that all his listeners are engaged in different callings from his own, and that therefore any secrets of process, product, or development he may divulge will not be given to trade rivals.

The founder of the Rotary movement is Paul P. Harris, a Chicago lawyer, who recently celebrated his sixtieth birthday and was accorded a tremendous reception in London by his brother Rotarians.

As a lad he went to Black River Academy, where a series of pranks ended in his being expelled. He passed on to Vermont University, whence he was again expelled—this time through the fault of others.

His first job was in a firm of quarriers as office-boy. He had to rise at five in the morning, walk to the office, attend to the stoves, sweep, dust, and generally serve as office "char." He stuck it for a year, made progress, went to Iowa to study law, and graduated in 1891.

That same year he made an important decision. He set aside the next five years for world travel. It was an ambitious program, as he had very little money to begin with; and when he reached San Francisco he had none at all!

However, he obtained a job as a reporter, to be paid only for what appeared in the paper from his pen. As there were scores of other young men in similar positions, his job meant furious competiton. With another reporter he decided to work his way to California.

They hiked off, camping out at nights, and working as odd laborers during the day. They lost themselves in the King's River Canyon, and only found habitation as their last scrap of supplies was consumed. But they reached Los Angeles, where Harris became a teacher in the Business College.

After nine months he returned to Denver and became an actor; next a reporter on the Rocky Mountain News; then a cowboy; and back again to reporting. Off again, he went this time to Florida and became a night clerk in a hotel. After a few weeks he tired and got a post as travelling salesman with a granite firm.

Next he yearned to see England. He secured a job as a cattleman on board the Baltimore, bound for Liverpool, and this was one of his worst experiences. The boat was tossed about for fourteen days by enormous seas before it limped into purt. Almost immediately Harris signed on for the return journey. Here, too, he fared badly. There were no mat-mattresses, blankets, or eating utensils for the cattlemen, and their only food was a mixture of potato and water known to seamen as "scouse," served three times a day.

After a spell in the American hayfields he came again to England, and could only afford the cheapest lodgings. To-day his London headquarters are in the Hotel Cecil.

His five years of travel were nearly over when he returned to America and tried his hand at orange picking at Buras, near the delta of the Mississippi. One night a fearful storm arose, and he, with all the local families who could reach it, sought safety in one of the few substantial houses in the district. Suddenly a rush of water poured in beneath the door, and almost at once the room was a-swim in a foot of water.

The Mississippi had burst its banks! Men seized children in their arms and burst open the door. More water poured in and soon they were up to their armpits in the icy flood. Harris staggered along holding an eight-year-old infant high above his head, while in places the water lapped into his mouth. At last he reached the one high spot in the neighborhood, where for the whole of that awful night the survivors knelt and prayed.

In the morning the storm had abated, though water covered the land for hundreds of miles around. A three-masted schooner floated above the orange orchard, and on a small plateau hundreds of horses, cows, dogs, hens, sheep, and scores of deadly moccasin snakes had found safety.

Soon after this incident, Harris went back to Chicago and practiced as a lawyer. It was out of loneliness that he, a new-comer in a large city, suffered in those early days that Rotary was born. He longed to meet his clients socially as well as in business, and to this end he formed the first Rotary Club with himself and three of his clients, a mining operator, a coal dealer, and a tailor, as members. To-day there is hardly a country in the world where, if you are a Rotarian, you may not be sure of a welcome from fellow-members.

MIS. 40, 1929

WOMEN PIRATES

There Are Plenty of Them In China To-day—The Life of Mary Read.

Many untravelled Britons who derive a sneaking delight from conning the red-blooded male exploits of pirates have read with surprise — and disappointment — of the appearance of lady pirates in the devious and muddy estuaries of chaotic China.

This is no new development, however. Lady pirates have ever been a commonplace institution of the Far East, though their functions are less specialized than those of their male colleagues. Theirs is a pleasantly diversified and domesticated piracy—throat-slitting, rocking the cradle, setting captured junks ablaze, cooking lunch, opium smuggling, mah-jong, and the throwing overboard of slaughtered victims, interspersed with a quiet half-hour or so of gossip with the other girls and a shampoo. True words, if spoken flippantly, may I assure you, write Bassett Digby, F.R.G.S., in Tit-Bits.

There are numbers of lady pirates, too, among the ranging proas haunting the remoter byways of the Malay Archipelago, worthy wives and mothers, good plain cooks, skilled needlewomen and navigators, deadly wielders of the dirk and most unpleasantly efficient with the cutlass.

You probably do not realize that, only a couple of centuries ago, we had some very workmanlike—or, should I say, workwomanlike—lady pirates of our own.

There was demure little Mary Read, for instance, who adopted the career at the age of thirteen and died in gaol some years later, slightly before sentence of death by hanging was to be carried out. In her crowded and not very brief career on the Spanish Main she set an example to adventurous young women that deserves better than the slowly descending dust of oblivion. . . .

Mary's "mother," who was married to a sailor, bore a son shortly after her husband left England on a voyage from which he was destined not to return. When the boy was a year old, the mother took him away with her from her late husband's prosperous relations, with whom she had been given a home, for a stay with her own friends, who were poor. While away, the boy baby died. The mother, loth to risk being cast off by the family that had been pensioning her, adopted a girl baby—Mary—dressed here in boy's clothes and passed her off as a lad.

When her mother died Mary, who was thirteen, got a job as boy attendant upon a French lady. Her next job was that of cabin boy on a man-o'-war, after which she turned up in Flanders as a cadet in an infantry regiment. Failing to land a commission, she changed over to the cavalry, and was getting on very nicely when disaster befell her. She fell in love—with an army comrade.

They both left the army a few months later, and were married. Her husband lived only a short time. After his death, Mary, impatient with domesticity, dressed again as a man, went to Holland and joined an infantry regiment. It bored her. She joined a ship sailing for the West Indies, which fell into the hands of British pirates, who fired her enthusiasm for the career. She joined the gang.

Aboard the vessel on which Mary found herself she encountered another young lady pirate, Anne Bonny, who was in love with the mutineer commander, Captain Rackham. There was a pretty how-de-do one day after the gallant and unscrupulous captain had discovered the two girls deep in an intimate tete-a-tete, for Mary, of course, was in male clothes. Anne had to give away Mary's secret in order that her life might be spared. Then harmony prevailed, and what proved to be a most lucrative cruise ensued.

For a while Captain Rackham's luck held. Then came an ill-fated morn when a British man-o'-war caught him red-handed "with the goods." The deck of the privateer became so palpably unhealthy an abiding place that everyone scuttled below, except Mary Read and Anne Bonny, with one male pirate (who was probably weak in the head). This exasperated Mary, who, having called down the hold in vain, exhorting the male pirates to emerge and acquit themselves like men, opened fire on them, killing one and wounding others.

The man-o'-war captured the privateer and Mary's career came to an unpleasant end.

Queen Elizabeth's Childhood.

Elizabeth, the daughter of Anne Boleyn, who afterwards became the famous Queen of England, was christened at a silver font in the Convent of the Grey Friars, near the favorite old palace of Greenwich. Gifts were showered upon the infant—golden bowls set with gems, and all sorts of wonderful things.

Elizabeth grew up into a clever as well as a pretty little girl. She spoke French and Italian fluently, knew Latin and Greek as well as something of other languages, although not specially fond of music could play very well. At the age of seven she made a shirt of cambric for her favorite little half brother, who afterwards became Edward VI.

When this little girl became queen, at the age of twenty-five she retained her childish love of presents, and all the ladies and courtiers spent all they could afford on gifts at Christmas and the New Year. The Queen gave presents in return, but not nearly such valuable ones. The King of Sweden, who hoped to win her hand, sent several shiploads of the best his country produced, including eighteen piebald horses.

Manufacturing In Canada.

Manufacturing in Canada in the past thirty years has increased 700 per cent., according to the Canadian Government Information Bureau.

Dog-Breeding In Old Country.

About 150,000 people are engaged in dog-breeding in the Old Country.

New Bodies by Fisher for the New Chevrolet

IN the new Chevrolet Six with longer wheelbase, you will quickly notice that Fisher Body craftsmen have created the roomiest and most beautiful body styles in Chevrolet history. Yet prices have been substantially reduced.

The smart, modern lines of the car are emphasized by the deepened radiator and new de luxe wire wheels . . . distinctive color harmonies and chrome-plate trimmings add a finishing touch.

Interiors are roomier . . . beautifully upholstered . . . and fashionably appointed. The front compartments are fully insulated against heat, cold and noise.

See the new Chevrolet Six at our showrooms. *You can own it with even more pride . . . buy it for even less money.*

Your Chevrolet dealer is listed under "General Motors" in the classified section of your 1931 'phone directory. . . . Ask him about the G M A C plan of deferred payments, and the General Motors Owner Service Policy. Ride in any one of the twelve smart, fine-performing models . . . priced from $610 at factory, taxes extra.

"Forward Canada!"

Across the Dominion is sweeping a wave of national enthusiasm . . . free and unbounded. Canadians everywhere are striking forward on the rising tide of a fresh and vigorous prosperity. General Motors of Canada, Limited, pays tribute to Canadian achievement with "Canada on Parade", a radio hour every Friday evening, typifying the spirit of Canada's progress. You are cordially invited to tune in on this all-Canadian broadcast.

Here are a few of the uses of Gyproc

GYPROC fireproof wallboard is manufactured from gypsum rock. It comes in sheets that are 4 to 10 feet long, 4 feet wide and 3/8 of an inch thick. It costs little, nails and cuts like lumber, has structural strength and insulation value. It is Canada's premier material for lining all interior walls, ceilings and partitions. Ask your dealer for a Gyproc direction sheet, it gives full details.

Store ceilings	Rest rooms	Poultry houses
Basements	Offices	Farm offices
Warehouses	Partitions	Harness rooms
Barns	Garages	Sheathing
Attic rooms	Under cornice	Ceilings
Fruit cellars	Dairies	Walls
Making old rooms new	Summer cottages	Sun porches
Store windows	Factories	Covering old plaster
Dressing rooms	Kitchens	Picture theatres

Australia Still is the Home Of World's Largest Nuggets

Other Gold Fields Continue to Be Outdistanced in the Output of Precious Metal Found in Lumps

To the gold seekers of modern days the Yukon and Klondike have furnished the romance of prosperity attained after intense hardship and the African Rand has given the largest production and cold profits gained through business methods, but Australia has led the world in the output of nuggets, those huge yellow harbingers of sudden wealth. The recent discovery of the "Golden Eagle" in the Larkinville alluvial field of Western Australia bears out this reputation of the Island Continent. It weighed 1,136 ounces, and was sold to the State Government for about $30,000. This was the largest nugget yet found in that district of Australia, being more than twice the size of the "Bobby Dazzler" discovered there in 1899.

The nuggets of record size were, however, discovered on the other side of the continent. The "Welcome Stranger," found near Dunolly, New South Wales, weighed about 2,500 ounces and was sold for a little less than $50,000 The "Welcome," discovered near Ballarat, Victoria, weighed 2,195 ounces and was worth more than $45,000. The "Blanche Barkly," which came from near Kingower, was priced at about $34,000. These finds were ma in the most thickly populated part of Australia, in the southeast corner, not far from such centres as Melbourne, Canberra and Sydney.

Straight to the north, nearly 1,000 miles from the Ballarat fields, was found one of the richest and most extraordinary gold mines in the world. A nameless hill in the Queensland bush was, in 1882, owned by a man named Gordon who earned a precarious livelihood by pasturing his cattle on it. The two Morgan brothers, prospecting that vicinity, found signs of gold on the 640-acre hill, and bought the land from Gordon at about $5 an acre. Mount Morgan turned out to be a veritable hill of gold.

Western Australia, where the latest large nugget was found, is for the most part an absolute desert. Here the total annual rainfall is only about five inches, and water can be obtained only by sinking deep wells. Yet it is one of the richest gold-mining regions in the world. The first discovery was made at Yilgarn, 210 miles east of Perth, the capital of the colony. From there prospectors spread further inland.

Although nuggets are occasionally found in other parts of the world, they do not compare in size with those of Australia. Canada produces the metal in pieces of ore combined with quartz. Yellow grains of gold, it will be recalled, were found at Sutter's Mill, near Sacramento, Cal., to start the westward trek of the Forty-niners. And in the Yukon and Alaska regions the precious stuff has usually been discovered in sand or gravel deposits.

. . . is a genial man, with an air of quiet strength that compels confidence. On his shoulders rests the responsibility for your safety.

Imbued with the finest traditions of British seamanship, he has spent his lifetime mastering the moods of the seven seas.

Street at Night

There's something rather lovely
About our street at night:
The dusky gabled houses
With here and there a light,
The pattern of the elm leaves
In lace work on the walk,
The church's bulky tower
Transformed to silver chalk,
The whistling velvet figures
Of homeward-faring men
Whose footfalls tap the silence
Till stillness wakes again,
The sky's brocaded curtain
Tassel tied with stars,
The post-historic monsters
We know as motor cars.
A kitten's furry-scurry
Across the street-lamp's arc—
Our street is rather lovely
To traverse after dark!
—Doris Wilder, in Poetry.

English School Head Teaches Pupils Juggling

The directress of a large English school has initiated a novelty in education, which, however surprising it appears at first consideration, says "Le Matin," after a little study reveals far more intelligence than is usually found in features of a similar character. She makes all her pupils learn juggling!

Thanks to long continued exercises of this sort with oranges, plates and other objects—a course which she has added to her lessons in gymnastics—the instructress is achieving the happiest results. Her pupils acquire a sense of perfect balance and equilibrium, and become able to coordinate every move and gesture in graceful rhythm with these rising and falling articles.

Such practices add to feminine charm and elegance; their bodies become more pliant and more lithesome, and their contours more natural and pleasing. For these advantages, what girl in France does not desire to take up juggling?

"The human hand is the most remarkable of all machinery which has not yet been fully exploited."—Raymond Duncan.

"I lament the importance of headlines and the unimportance of headwork."—G. K. Chesterton.

Old Mother Nature And Her Marvels

By Charles D. Stewart, Condensed from The New York Times Magazine.

Nature is, above all, an inventor. Her specialty is tools and machinery. The naturalist, taking things apart and looking into their construction, finds himself working in the atmosphere of a patent office. Life itself may be a mystery, but a mechanical motion may be at once so clever and so simple that the mind seizes upon it with delight Nature is full of such shrewd devices as are produced by the inventor.

In inventing a bird, for instance, Nature was confronted with a fine little problem. How was she to make a roosting bird that could tuck its head under its wing, settle down for a night's rest and go sound asleep without danger of falling off the perch?

The problem was solved by attaching to the cords which operate the toes an extremely long tendon—one which runs nearly the whole length of the leg and broadens into a muscle situated high up on the front of the thigh. This ingenious tendon passes over the knee in front, runs in a spiral direction 'round the bone of the lower leg, and then passes over the heel behind. As a result of this rigging over opposed joints the bending of the leg serves to put the muscle and tendon on the stretch, and the weight of the bird in settling down to sleep causes them to pull the toe tendons together. Thus the bird is clamped automatically to the perch. No brain work, no attention is required. It works while the bird sleeps.

Any bird that is equipped with Nature's Patent Roosting Clamp always brings her toes together every time she raises a foot in walking.

It isn't an easy feat to walk on stilts which have a hinge in the middle, as do those of the stork. And to tuck its head under its wing and take a nap while standing in water is more precarious still. Muscles which work very long are likely to become fatigued; and in such an event the stork would topple into the stream. To obviate anything like this, Nature has made a contrivance for locking the joint. The bone of the lower part of the leg is made to fit into a socket above it. When the two are allowed to come together the leg becomes as one piece of bone; the hinge is thrown out of service and muscular fatigue is prevented. This is Nature's self-acting lock-joint for the use of storks and other altitudinous birds.

The beehive presents to the mind an industrial community so completely given over to factory methods as to make us wonder whether it is not the bee, rather than man, who should be given the credit for the great idea behind the Industrial Age. Every bee carries with her a large assortment of tools, consisting of special adaptations of legs and joints, and of these tools the sting is an especially well-thought-out contrivance. It has the power and mechanism to drive itself into anything as thick and tough as a horse's hide, with a self-acting muscle of its own, which is detachable and even capable of going on working by a sort of pumping motion, and driving itself in after the bee has flown away.

The sting consists of two highly polished javelins, each with barbs like a fish-hook, fitted into a supporting sheath or scabbard, so that they can be alternately thrust forward by the self-acting muscle. The bee needs to insert only the first barb or two of the lance, and the self-acting muscle does the rest. Even if the bee loses her sting, the sting drills into the victim, emptying its bag of poison into the wound through a groove between the two sliding spears.

Here is a mechanism as ingenious as the self-starter or anything to be found on an automobile.

The poison gas of the World War was not new when one considers the insect world. The little Bombardier beetle, when danger threatens, fires off an explosive charge of an acrid and irritating gas. When a number of these beetles are alarmed and all fly at once, their little explosive shots seem like a miniature regiment in battle; each beetle is capable of producing from ten to twelve shots in succession.

And how about the submarine? It is this an invention unparalleled outside the patent office? Of course it is one thing for nature to make a fish capable of breathing water instead of air, and of remaining permanently below the surface, and another for man, a land animal, to do down into the water and stay submerged by means of a reserve supply of oxygen. But this is nothing new, either, in Nature's machine exhibit. The whale, a land animal which has been made over to fit conditions at sea, has storage places for carrying extra supplies of oxygen. Essentially the whale is as much a land animal as is a horse or a cow, but the young whale is fed from the breasts by a quick gulp, an act of rapid refueling among the tumultuous waves. The whale is provided with a thick wall of insulating fat against the cold, an essential part of the design to keep the engine of the warm-blooded animal going.

The oxygen reserves of the whale are extensive tracts of arteries and capillaries carrying a supply of oxygenated blood that is not needed when the whale is on the surface and breathing, but which is drawn upon during periods of submersion. The cry "Thar she blows!" which the sailor raises from the masthead, means that the whale is blowing off the carbon dioxide preparatory to filling its tanks and going down again.

Deep down in the fat of the whale are to be found the remnants of legs, which are taken as an evidence of evolution. But the whale has been so deeply made over by means of special devices that if it were deprived of them there would scarcely be any whale left.

It is scarcely known that an egg is a piece of machinery, a real, moving mechanism It is not simply an organism and a mystery, but works according to the principles of the magician's magic bottle and of physical laws. The chalaza, a thick cord of twisted, tough albumen stretching from the yolk on opposite sides to the two ends of the egg serves to hold the yolk in place. When an egg is turned in the fingers or rolled slowly back and forth the yolk does not revolve, but remains with one side always uppermost.

The means by which it does this is the weight on one side, due to the fatty globules on that side being heavier and denser than in the rest of the yolk. Floating in the white like a ship in ballast, it turns on the albumen cord like a ship's compass hanging in the gimbals; it is as true to the Zenith as a compass to the pole. The lighter, or uppermost side of the yolk bears on its surface the germ spot which represents the future chicken. As a result of the way the yolk is built this germ spot, being always uppermost, is near the warm body of the hen in hatching.

The chalaza is slack enough to let the yolk float near the upper surface of the egg—a further fine evidence of the needs of the chick to be close to the source of heat. Nor is that all. A chick or young bird even before its true lungs are formed, needs a small but constant supply of fresh air. There is a special organism by means of which it absorbs air through the shell, and for this reason all eggshells are porous. There is a great unity in the complications of the egg, the yolk as a whole being of less specific gravity than the white as a whole, all assisting in making the machinery act as it does.

The small flat place at the big end of the egg provides an air compartment for the use of the chick just before it is hatched. A chick develops with its head toward the big end; when it is fully formed and its lungs are ready for use, it pricks the slight membrane which forms a wall to this air space and takes its first breath. Inspired by this new access of energy, the chick gives the shell a vigorous peck and makes a hole through which it can continue breathing. The soft bill of the chick is provided with a point of flint-like hardness, which it uses for the purpose of breaking its shell and then discards.

Working models in our museums would be valuable to illustrate these principles of nature.

Music—Salt Sea Baths—Complimentary Tea Daily, 4 to 5 p.m.—
We will personally see to your comfort.

T. E. LANDOW, Mgr.
H. BRADFORD RICHMOND, Prop.

France Had 2,000,000 Tourists During 1930

Paris.—Two million tourists came to France in 1930 but they spent 30 per cent. less than in the preceding year when fewer came.

Even the number of American tourists increased, the French statisticians have learned to their surprise, but the after-crash traveler from America is less free in his expenditures than ever before. The French experts put that down to the probability that the Americans who have been traveling since the depression represent a different class of society than those who were traveling in the years of prosperity.

The figures of the French National Office of Tourism show that 313,000 visitors came to France from the United States or from neighboring countries in 1929, while the figure for 1930 is 406,000.

By far the greater influx to France from abroad was from England last year. For the different nations the list for last year shows 881,000 British, nearly all of whom remained in France for a considerable period; 1,110,000 Spaniards who, however, are ranked below the British because the number included some 400,000 frontier workers who crossed the border by reason of their employment, and 150,000 who merely traversed France en route to other countries; 100,000 Mexicans, South and Central Americans, and 700,000 Belgians, Germans and Central Europeans.

Yet despite this record number of visitors for the year, French hotels, and all tourist industries are complaining of exceptionally poor season. The chief sufferers have been the hotels de luxe, the big dressmaking establishments and jewelry and perfumery houses. The small hotels and little industries have done well.

From these statistics, M. Vallat, director of the Tourism Office, deduces that hopes cannot be raised too high by the prospects for the current year. French tradesmen who are hoping for the revival of the tourist trade through the International Colonial Exposition this year, must bear in mind that all the countries of the Continent and of the New World have suffered more than France from the economic depression.

A woman is known by the acquaintances she cuts.

Owl Laffs

Perk Up

Your nose may be battered, your jawbone nicked,
Your visage may be a sight,
But always remember you're never licked
No matter how badly they mess up your map,
It won't be beyond repair,
While still you can stand and fight.
And there still is a chance that you'll win the scrap
As long as the punch is there.
You'll make mistakes and you'll do things wrong—
The best of them always do;
But as soon as you get to going strong
Your grit will see you through.
They smashed Paul Jones to a fare-you-well,
But he didn't observe "goodnight,"
He merely paused in his tracks to yell
That he'd just begun to fight.
There'll be plenty of folks to peddle gloom
There'll be plenty of folks to say
That they see the terrible day of doom
Hurrying on its way.
But the fellow who knows that the fight is hard
And still has the nerve to grin,
And never gets rattled and drops his guard,
Is the fellow who's going to win.

Beautiful Modern Daughter—"Well, Mother, I proposed to Jim myself tonight."

Her Mother—"You must be mad, Edith!"

Daughter—"You're darned right I am. He turned me down."

A flapper who learned that Kipling had referred to woman as a "rag, a bone and a hank of hair" indignantly retorted: "Yes, and a man is merely a jag, a drone and a tank of hot air." Seems to be a case of about fifty-fifty.

Mrs. Hendricks—"That woman next door certainly has a violent temper. Have you seen her husband?"

Mr. Hendricks—"Yes, poor fellow. He look like her battered half."

The station-master rushed out of his room after hearing a crash on the platform. He discerned a disheveled young man sprawled out perfectly flat amoung confusion of overturned milk cans and the scattered contents of his travelling bag.

Station-Master (to small boy standing by admiring the scene)—"Was he trying to catch the train?"

The Boy—"He did catch it, but it got away again."

Mentioning an old flame has caused more than one flare-up.

Those long, skinny green things poking their heads up out of the earth are what the seed catalogues assured us would be cabbages.

Teacher—"When water becomes ice, what is the greatest change that takes place?"

Bright Student—"The price, sir."

Questions and Answers

What is a polecat? A cat that should be killed with a pole; the longer the pole the better.

Why wasn't Eve afraid of getting the measles. Because she Adam.

What is a dry dock? A doctor out of prescriptions.

What is a bigamist? The man who makes the same mistake twice.

Teacher (during test)—"I hope I didn't see you look at your book, Sam."

Samuel—"I hope you didn't, either."

When a girl is forbidden to smoke she starts to fume.

Mistress—"Bridget, prepare luncheon on the gasoline stove."

Bridget—"Indade, mum, I did try, but the stove wint out."

Mistress—"Then try to light it again."

Bridget—"Yes, mum, I will, but it's not come back yet. Y'see, it wint out through the roof, mum."

The Success of Sanctuary

Canada is a great believer in the criterion of figures. She even counts the birds in her sanctuaries and as a result the value of these establishments has been proved beyond any shadow of doubt. There are now more than forty such sanctuaries scattered across the country from Nova Scotia to British Columbia and it is safe to assure that no species of bird life now in existence will ever become extinct. As compared with 1925 the bird population of the reserved areas has actually increased by 19 per cent., the ten sea-bird sanctuaries in the Gulf of St. Lawrence being the scene of the hatching of well over 100,000 birds of 16 different species in 1930 alone. Some of the most important of the birds in Canada's reserves with their respective gains during the past five years are: elder duck 27 per cent., puffin 13 per cent., razor-billed auk 37 per cent., common murre 11 per cent., black guillemot, 134 per cent., herring gull 159 per cent. and common tern 57 per cent.

Watch Gasoline Tank

Trouble may result from allowing gasoline to get low in the tank, as this may cause sediment and water to be sucked into the feed line.

Lindbergh, America's famous airman, received 1,943 gifts after his famous solo flight across the Atlantic in May, 1927. Most of these took the form of medals, plaques, and other "mementoes."

Garden Talks

Rose Culture

Roses must have good drainage and it is best to give some protection in the form of fences, shrubbery or buildings on the north side. They should, however, be planted two or three feet in front of these windbreaks so that they will get full sun. Plant hybrid perpetuals three feet apart and hybrid teas two. The roots should be spread out when planting and the earth firmed well about the stocks. The point at which the roses are budded (union of stock and scion) should be buried two inches below the surface of the soil. Get in as early as possible and fertilize well.

Add Something New

While it is well to stick to varieties which one has found to do well in previous years for the bulk of the flower and vegetable planting, for the sake of interest and experience something new should be added each season. In this connection that section of the seed catalogue devoted to specialties will be found valuable. In this part are listed new varieties that have merit and special strains of well-known varieties that have been proved. There will also be some novelties. A few packets chosen from this section of the catalogue are advisable. Seedsmen are giving more and more attention to securing varieties of the best quality and to improving them. Descriptions of these specialties are usually very complete and furnish the necessary information on which to base selection.

Spinach

Spinach is now a standard vegetable in practically every garden and despite the tendency of some restaurant cooks to serve it with sand is undoubtedly growing popular. It is one of the first sown vegetables and also among the first to be harvested. It can go in at intervals of a couple of weeks from the time the soil is fit to work until June and will furnish delightful and healthful greens for the table until midsummer. This vegetable is at its best in a warm, rich, open soil. It should be heavily manured and like all other vegetables, especially those of the green variety, it must be pushed quickly along with fertilizers high in nitrogen. Spinach should be sown in rows at least twelve inches apart and after the plants are up well thin in the rows to eight inches apart. Bloomsdale or Savoy leaved is one of the hardiest and earliest variety. This, like the Victoria, is wrinkled like a Savoy cabbage. For late use King of Denmark is one of the most valuable of the recent introductions.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted.

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.F.T., Montreal.

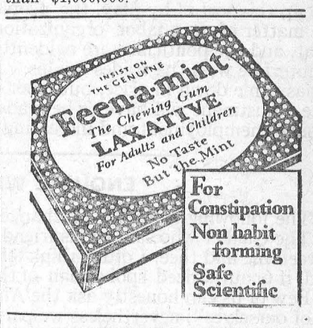
Sweden's Huge Garage

A garage of record size is soon to be built at Hornsborg, in Kungsholmen, Sweden, which will house 400 large motor buses. Work is to commence in the near future, and the garage is to be completed in January, 1931. The cost is to be more than $1,000,000.



FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c. Package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new Take it back. Your druggist is authorised to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes Ltd., Manchester Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

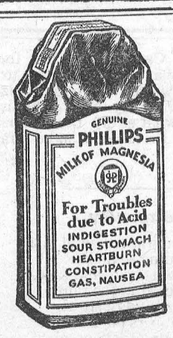
CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes: just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Fletcher's CASTORIA



When You OVER—INDULGE

EVERY man, woman and child will occasionally over-indulge. But don't suffer for your indiscretions. It's folly to do so when you can so easily sweeten and settle a sour, upset stomach with a little Phillips' Milk of Magnesia.

Hearty eaters have long since learned the quick comfort this perfect anti-acid brings. Smokers know how it neutralizes nicotine; brings back a sweet taste; guards the breath. Women know what it does for nausea—or sick headache. And when children have over-eaten—are bilious, constipated or otherwise upset—give them a little of the same, pleasant-tasting and milky-white Phillips' Milk of Magnesia.

You'll be through with crude methods once you learn the perfect way. Nothing else has the same quick, gentle effect. Doctors prescribe it for indigestion, nausea, heartburn, gas, sour stomach and headache. It has been standard with them for over 50 years.

Insist on genuine Phillips' Milk of Magnesia; a less perfect product may not act the same. The genuine is always a liquid—never in tablet form—and the name Phillips' is always on bottle and wrapper.

HARD TIMES AND ITS REMEDY

It would be amusing if it were not so sad to read the speeches ing delivered in the House of Commons, Ottawa, and the many- led views being expressed as to the cause and the remedy for the esent trade depression. There has not been one speech delivered at had not a strong tincture of party politics well mixed. The eader of the Opposition asks the Leader of the Government to fulfil s pre-election promises, and by a wave of his magic wand bring out in a few months a revival of trade, an end to unemployment, nd prosperity for the farmers. Then the Premier comes back and lls the House that when he came into office he found the conditions the country so much worse than he ever imagined that, while he as worked wonders, it will take some time yet to bring about the rosperity and contentment that he hopes to be able to bring about. n the meantime unemployment is apparently increasing, now that he temporary stimulus of the forced expenditure of sixty millions luring the past winter is about ended. And the farmer is faced with he fact that the products of his farm are going down in price, but he help he has to hire demands the war-time wages. The stopping of the importation of New Zealand butter was to help the dairy far- mer, but butter has not been so low as at the present time since be- fore the war. But day after day they discuss and talk about these thing at Ottawa, and while the people have to provide the funds to keep up this sort of by-play, the people are receiving little benefit. As a matter of fact labor organizations have our country by the throat, and the politicians are evidently afraid to do anything that will interfere with the trades unions. Everything we use, wear and eat has come down in price, but labor demands the war-time wage. Some adjustment will have to be made, otherwise there will be in- creasing unemployment and increasing trade depression.

ENQUIRE WITHIN

The following is from an exchange:—

The Quaker who said to his friend: "All the world is queer, and between me and thee, I often think thee is a little queer," is the valid, if unauthorized spokesman of the race.

Few of us can honestly ask the Almighty to "give us a gude con- ceit of ourselves"; nevertheless we persistently fasten the blame for our mishaps and misfortunes upon others.

When you "come a cropper" don't get up and curse the pave- ment, rail at society or find fault with Providence. Shake yourself and take a good square look at the fellow who lives under your hat.

Nine-tenths of the failures come from within and we only make things worse by grieving at what we call circumstances or fate. There is an eternally open door before the man who has faith in himself and backs it with brains and work.

Without faith in yourself and your job, you are beaten before you start. If you have faith as a grain of mustard seed you may say to the mountain, "be removed and cast into the sea," and it shall be done.

Don't look around. Look within!

PARENTAL CONTROL

The Police Commissioner of New York City, in dealing with the question of "Youth and Crime," said that in his opinion the chief cause of a youth becoming a criminal was "the lack of parental con- trol and religious training." A judge of the juvenile court in a large city recently remarked "of the many youths who came before him, he found that very few had ever attended a Sunday School, and most of them had been allowed to go where they pleased at night time." After all, the parents, or the home, is responsible for most crime. While there are exceptions, and while it is a known fact that the "very devil" seems to be born into some youths, the great majority may be so trained and disciplined in their youth so that their pathway through life will not be along criminal lines. The boys and girls who are allowed to roam the streets and go motoring over the highways at night are not likely to prove any credit to them- selves or their parents.

MULTIPLICITY OF INSPECTORS

The Collingwood Bulletin protests against the multiplicity of Government Inspectors who are becoming a sort of public nuisance to business men, and costing the province hundreds of thousands of dollars in salaries and expenses. Inspectors of drivers, of schools, of drug stores, of industrial places, sanitary inspectors, road inspectors, and now they are talking of more inspectors in connection with old age pensions. It seems like as though it was "anything in the way of a job to satisfy the party shouters." Party politics is costing the country more than the country can stand, and in these days of the need of practical economy, the government of our country cannot do better than begin at the fountain heads of extravagance and useless expenditure.

BEAUTIFY YOUR TOWN

Yesterday was "clean-up" day in Winchester and the municipal authorities certainly have done all that they can possibly do to main- tain the reputation of Winchester as the neatest, cleanest and best kept town in Eastern town. But there is much that is left for the individual citizen to do, and it is hoped that there will not be one who will neglect his duty in the matter of making their business and private premises as attractive as circumstances will permit. After all it only requires a little effort, labor well directed, and very little expense to make even an ordinary house and yard so that it will at- tract attention. Clear off all rubbish and leave no old newspapers lying about. A little fresh paint will make a wonderful difference, as well as act as a preservative. Just make up your mind to make your own premises as attractive as your neighbors.

Usurping Municipal Power

(Collingwood Bulletin)

Editor Rixon Rafter of the Arthur Enterprise speaks out against the usurp ing of municipal power by the provincial government, of which, by the way he is an ardent admirer and supporter. In a well reosoned article he says, "to such an extent have county councils been robbed of their legislative jurisdiction that there is a demand, which is growing stronger, that they be abolished altogether. In the case of municipal councils conditions are very similar and during the municipal campaigns a great deal was heard about these uncontrollable expenditures which amounted to a great deal more than the amounts over which local councils have full control. The powers of trustee boards, high school boards, and boards of education are very limited and the really important matters that come before them are decided in advance by some one or other at headquarters. Even in the wider sphere of provincial affairs, the tehdency which has robbed more local organizations of a large part of their usefulness is also at work. So it seems to be all along the line. Local hydro-electric commissions further another splendid example of the centralization of authority, while even in church matters congregations are having their apportionments figured out for them by officials at headquarters who are often, to say the least, not too familiar with gen- eral conditio Democracy during the glorified ideal in Canadian life but there seems a danger that we are drifting to a condition under which the average citizen will have as little to say in the establish- ment of what's what as did the ordinary individual under the fuedal or more tyran- nical systems."

Longevity

James Johnston was a careful man
He lived according to a plan
Of healthful living, safe and sane,
He never ventured in the rain,
Nor ever trod a muddy street
Without his rubbers on his feet,
He never stayed out late at night,
He exercised by morning light,
He wisely slept, he wisely ate,
His health was in a perfect state,
Until one mild and balmy day
He got the "flu" and passed away.

Bill Hossit was a careless man
He never lived by any plan,
He never cared a single whoop
For colds or measles or the croup,
He ventured out in rain or storm
Nor worried if his feet were warm,
He walked about in the wintry air
With summer socks and underwear;
The "flu" came on and passed away,
And Bill is on the job today.

Moral

The only way to live and thrive
Is to stay on earth and keep alive.

A Bill has been introduced in Ontario Legislature to compel parents to support their children up till the age of 16 years. If they don't, they can go to jail for three months. Naturally we ask, what is to become of the children if the parent is sent to jail?

The ten year period of time has passed which brings about the census taking. Ten years ago Canada's population was given as 8,788,483, and today it is thought it will be in the vicinity of 9,797,000 or practically ten million. In 1871 the pop- ulation was 3,485,761.

Acting in response to a petition present- ed by merchants and other business peo- ple, the municipal council of Brockville last week decided to join in the move- ment seeking the passage of federal legis- lation designating December 26th as a public holiday throughout the Dominion. A memorial to that effect is being present- ed to the Dominion government. As Christmas comes on Friday this year, the movement eis a timely one.

Latest available figures show a total of 7,100 miles of rural hydro lines in Ontario and it is proposed to add almost 2,000 more during 1931. Reductions in rates has had a lot to do with the recent rapid growth. Nearly every county now has hydro in the rural districts. The average cost for current to light the house and barn and run ordinary appliances such as toasters, washing machines and irons, is about $5 00 pet month. It runs consider- ably higher where a motor and a stove are operated. In addition to providing needed conveniences the development of rural hydro is expected to prove one of the biggest factors in improving farm conditions in Ontario in the future.

A man may drink watered milk for his weak stomach's sake, but the law will not allow him to sell it to others. He may read obscene and vicious books to satisfy the innate cravings of a corrupt nature, but the law will not allow him to engage in the sale of those books to others. If a man may drink liquor which poisons his whole being and converts him into a pauper and criminal to be a burden upon society, he certainly ought not to be al- lowed to engage in the sale of such liquor to others. The Prohibition Party believe, says and exchange that the selling of al- coholic liquors ought to be made a crime, just as the selling of watered milk, diseas- ed meat, or vicious books has already been made a crime.

School teacher—"This makes the fifth time I have punished you this week. What have you to say?"

Johnny—"I'm glad it's Friday."

A Modern Miracle

Let those who believe that the age of miracles is past consider the case of Earl Musselman, aged 22, of Philadelphia, who sightless since birth as a result of having been born without pupils in his eyes, has now been given vision through a very delicate operation performed by a Philadelphia surgeon.

Since the bandages has been removed from Musselman's eyes he has entered a new world, one in which light had taken the place of darkness, in which colour appeared in all its glories, in which hope and promise have succeeded gloom and despair. For Musselman has been blind since birth and would have remained blind until death but for the skill of a modern surgeon. No wonder he consid- ers that the operation performed by Dr. Moore is "wonderful, almost a miracle."

Modern surgery does not record such spectacular feats every day. But 365 days during the year lives are being sayed or protracted, new blessings are brought to suffering humanity, as a result of the advancements of surgical science. Well may the world acclaim those who, through the years, have developed the science and those who are to-day its ex- ponents. If there were no surgery count- less lives would be lost annually that are now saved.

Mortgage Sale of Farm

Under and by virtue of the powers contained in two certain mortgages which will be produced at the time of sale, there will be offered for sale by Public Auction, subject to a reserve bid, at the Law Office of W. J. Cass. on Main Street, in the Village of Winchester, on Wednesday, the 20th day of May, 1931, at two o'clock in the afternoon, by Ross Morrow, Auctioneer, the following property, namely:

All and Singular that certain parcel or tract of land and premises situate lying and being in the Township of Winchester in the County of Dundas, and being com- posed of the West Three Quarters of the West Half of Lot number Five in the Fifth Concession of said Township, con- taining SEVENTY-FIVE ACRES of land, more or less, excepting thereout and therefrom that part thereof now owned by the Canadian Pacific Railway Com- pany as a right of way.

Upon the said lands, which are clay loam, are a residence with five bedrooms, parlour, dining room, winter kitchen and summer kitchen, and a large splendidly equipped dairy barn with suitable out- buildings for dairying purposes, an orch- ard and two wells. This farm is on the County Highway and is a mile from Win- chester Village.

TERMS:—20% of the purchase money to be paid down at the time of sale and balance to be payable in thirty days or as may be arranged to meet the approval of the vendor.

For further particulars and conditions of sale apply to

W. J. CASS, Winchester, Ont.

OPPORTUNITY!

According to a questionaire sent out by the Dept. of Agriculture there is going to be an enormous decrease in the number of chicks raised in Canada this year. This together with the fact that we have a high tariff against foreign eggs, can mean only one thing—"Sky high prices for poultry and eggs next fall and winter."

Now is the time you will have to decide if you are going to have a flock of pullets to go in your laying house this fall. In a very short time it will be too late to take advantage of this opportunity to cash in on the high poultry and egg prices that, under the circumstances, are sure to prevail later in the season. Chicks must be started not later than April or May to make good winter layers. It is going to cost less to produce pullets this year than it ever did. Feed prices are low and we have made a substantial reduction in the price of chicks.

Following are our prices on both Single Comb W. Leghorns and Barred Plymouth Rocks.

Up to and Including	April 15th and April 22nd	April 29th and May 6th	May 13th and May 20th	May 27th and June 3rd	June 10th and June 17th
100	$16.00	$15.00	$14.00	$13.00	$12.00
500	$75.00	$70.00	$65.00	$60.00	$55.00
1000	$140.00	$130.00	$120.00	$110.00	$100.00

A limited number of week and two week old chicks at reasonable prices.

A few second hand incubators in hot air, hot water and all electric, at bargain prices.

A supply of brooder stoves, feeders, waterers, leg bands, water thermostts, incubator thermometers, etc., always on hand.

BERRYHOLM POULTRY FARM

D. LeRoy Berry, South Mountain.

FROM OUR DISTRICT CORRESPONDENTS

Metcalfe

Mrs. (Rev.) MacKay and family of Ottawa are moving into Mr. Harry Craig's house this week. Mr. MacKay is going to Toronto District to work for a few months and Mrs. MacKay and children will remain here until he looks over his new field of labor.

Mr. and Mrs. P. Griffith and two daughters of Ottawa spent the week end with the former's brother, Mr. H. Griffith here.

Quite a number from here wrote on the Civil Service Examinations in Ottawa last week.

Mr. and Mrs. Wilfred Latimer of Ottawa visited friends here on Saturday last.

There were no classes in the Senior Department of Public School last Friday as the teacher, Mr. J. Good, was absent writing off examinations.

Mr. and Mrs. J. Tierney and Mr. W Tierney of Ottawa spent Sunday with their sister, Mrs. J. Quinn.

Mr. J. Young, who has been in the Civic Hospital, Ottawa, for some time, was brought to his home here last Wednesday.

Members of the O. Y. B. Lodge here attended in a body the funeral of the late David Carson of Russell, on Saturday last. The large funeral procession passed through Metcalfe en route for interment at Greely Cemetery.

Miss Anna Walker, who underwent an operation for appendicitis two weeks ago has recovered.

Mr. J. Stuart of Kingston has been engaged as assistant in the Continuation Classes here. He is filling the place made vacant at Easter by the resignation of Miss Pratt, of North Gower.

Mrs. Herrington has returned from Montreal after spending the winter with her sister there.

The Misses Katie and Edith McInnis of Ottawa spent over Sunday with their mother here.

South Mountain

Mr. and Mrs. P. S. Boyd and family of Chesterville were callers in town on Sunday.

Mr. W. W. Bellinger and Miss Etta visited friends at Cardinal Saturday.

Miss Bertha Henderson of Pleasant Valley was a visitor in town on Tuesday.

Mr. and Mrs. Archie Sterling of Iroquois visited friends here recently.

Mr. and Mrs. Geo. Ennis of Iroquois and Mr. and Mrs. Ira Ennis of Inkerman spent Sunday with Mrs. Annie Ennis who, we are sorry to report, is ill.

Mrs Dave Thompson of Iroquois and Mrs. C. White of Oshawa visited friends here recently.

Mr Wm. Thompson of Guelph College is home for the summer.

Mr. W. J. Thorpe and family have moved to Heckston for the summer.

Mr. and Mrs. Claude Larabee and family of Iroquois passed through town on Sunday.

Miss Dolly Bristoun has returned to her home at Cardinal after visiting Miss Etta Bellinger.

Mr. and Mrs. Earl Mulholland of Ottawa Sundayed with Mr. and Mrs. Robt. Mulholland.

Mr. and Mrs. Erroll Barnhart and family of Ottawa were callers in town on Sunday.

Mr. Norman Barnhart is spending some time at Ottawa.

Mrs. Nathan Farrell has returned home after visiting friends at Chesterville

Miss Carrie Crawford of Kemptville is visiting Mrs Wm G. Farrell at present.

Morewood

Mr. and Mrs. M. Patterson of Gananoque visited one day with Mr. and Mrs. Henry Smirle.

Mr. and Mrs. J. D. MacMillan of Finch Mr and Mrs. Delbert Dillabough visited with Mrs. Lucy McIntosh.

Mr. and Mrs. Emerson Faulkner and family spent Sunday with Mr. and Mrs. Ward Johnston of Chesterville.

Mr. and Mrs. George Morgan of Luenberg spent Sunday with Mr. and Mrs. Allan Swerdfeger.

Miss Jean Faulkner visited with Miss Eva Swerdfeger on Sunday.

Mr. Norman Shaver took dinner with Mr. and Mrs. Will Swerdfeger on Sunday.

Mr. and Mrs. Nathaniel Merkley and son Emerald and daughter Dorothy of Bouck's Hill visited on Sunday with Mr. and Mrs. Orrin Dillabough.

Mr. and Mrs Arthur Steinberg spent Wednesday with Mrs. C. Merkley of Chesterville.

Mr. Emerson Faulkner, Mr. Willie Campbell Donald Gordon, Lyle Loughridge of the Gatineau spent the week-end at their homes here.

North Mountain News

Mr. and Mrs. Fred Dougall and little daughter of Merrickville were Sunday visitors at the home of Mr. and Mrs. Joe Hyndman.

Miss Mary Kerr of Kemptville was a Sunday guest of Mr. and Mrs. Alex Kerr.

Mr. and Mrs. Lloyd Bell and little daughter of North Gower spent Sunday with Mr. and Mrs. S. Fetterly.

Miss Hilda Brooks has returned from visiting friends in Smiths Falls.

Mrs. Byron Allen spent Friday in Ottawa.

Mr. Broder Scarlett is visiting friends in Ottawa.

Miss Walter Balkwill spent part of last week in Montreal with her sister, Mrs. Arthur Allen.

Mr. Floyd Logan and sister Gladys spent Friday in Ottawa visiting their mother who is convalesing after her recent operation.

Mr. Donald Dougall spent Sunday with friends in this community.

Pointers For Motorists

Now that the season is on all drivers should:

1. Dim their lights when meeting another car. This is very important.
2. Honk when passing another car.
3. Give every bit of one half of the highway when meeting another car.
4. Remember that from 25 to 35 miles per hour is a far safer speed than from 45 to 60.
5. That the one supreme thing in driving a car is to take no chances; always be on the safe side.
6. That if any one has an accident while driving a car, and it is afterwards found that he was under the influence of liquor, the public will have no sympathy for him whatever.

Trustee Was Fined

There are some laws which may be good in themselves, but which should not be enforced at all times. On some occasions, breeches of these statutes are overlooked, but a man may be haled into court and fined because somebody has a spite at him, and he has done wrong unwittingly and thereby gives his enemy a chance. Apparently, continues the Fergus News Record, that is what happened in a school section near Chesley. One of the trustees, Alex Jackson by name, ploughed the rural school garden, charging $1.50 for the work; a lower price than had been paid before. He must have had some enemy, for he was taken into court and fined $45. because he accepted pay for work done at the school while he was a trustee. But there is a bright side to the story. Mr. Jackson has good neighbors, and they felt sorry for him. They took up a collection to pay his fine and they raised $54 to compensate him for his loss of time and money. No law could prevent them from doing that.

The United Church

(Contributed)

For his earnest message of last Sunday morning, Rev. J. A. Waddell took the text, "He knoweth," which words are found frequently in the Bible but particular reference was made to Job 23:10, Ps. 103:14 and Dan. 2:22.

Job, amid all his suffering and trials had the consciousness that He knoweth the way I take, therefore guidance and help would be given. This was the case with the Psalmist and with Daniel in his prayer of thanksgiving.

When the Bible tells us that God knows we have to widen our thoughts of knowledge a great deal. There is thought love and wisdom in the heart of the eternal. It is hard to understand the meaning of dark experiences, but God knows and deals with us in tender sympathy if we cast our burdens upon Him.

"Hindrances that Help" was the evening subject with Ezek. 2, verses 1, 3 and 7 as a text.

The decision not to drift but to steer his or her life right is a most important one for any young person. Ezekiel was a young man in exile at this time when he received the command to stand, go and speak. There comes a time to all when decisions have to be made. We should meet them, greet them and beat them with a smile in God's name.

Difficulties challenge men to their best. The pastor urged meeting them in the right spirit and linking up with our Lord whose help we need always.

In Memoriam

In loving memory of Mrs. Wm. Steinberg and Mrs. Harold Fisher, who departed this life April 26, 1930, and May 28, 1927.

Oft times we think of you, dear mother,
And our hearts are sore wite pain;
All the earth would be Heaven,
Could we hear your voice again.

You bade no one your last farewell,
You waved your hand to none;
Your spirit fled before we knew
That you from us had gone.

Oft and oft our thoughts do wander
To a grave not far away;
Where we laid you dear mother,
Just one year ago to-day.

Inserted by Husband and Family.

In Memoriam

In loving memory of our dear mother, Mrs. W. W. Bellinger who departed this life April 15, 1930.

April brings back sad memories,
Tears in silence often flow,
Memory keeps dear mother near us
Though she died one year ago.

Nothing but memories as we journey on
Longing for the loved one dead and gone.

Only God knows the depth of our regret
But we shall remember when others forget.

Sadly missed by Husband and Family.

In Memoriam

In sad but loving memory of a dear wife and mother, Mrs. Charles Atchinson, who departed this life on April 21, 1930.

This month brings back sad memory
Of a dear one gone to rest,
And those who think of her
Are those who loved her best.

As we loved her so we miss her,
In our memory she is dear,
Loved, remembered, thought of always,
Brings many a silent tear.

Yes, again we hope to meet her,
When the days of life are freed,
Then in joy and peace will greet you,
Where no sorrowing tears are shed.

Short Hours and One Job Offered As Solution

Berlin—The commission appointed by the Chancellor, Dr. Heinrich Bruening, to study Germany's unemployment problem, suggested two partial solutions—general shortening of working hours and prohibition of civil servants engaging in side jobs.

The commission headed by the former Minister of Labor, Heinrich Brauns, believed that shortening of working hours would afford an opportunity for at least part time work to many who now are without jobs. The commission recommended that where industries proved recalcitrant to the plan the Government be empowered to fix the hours of work.

The commission urged also that all civil servants be prohibited from accepting remunerative jobs outside their regular civil service.

This same philosophy is a good horse in the stable, but an arrant jade on a journey.—Oliver Goldsmith.

Moose Jaw, Sask—The first factory in the Province of Saskatchewan for the manufacture of neckties, was opened in Moose Jaw recently by the Indestructable Neckwear Manufacturers Ltd. The factory is turning out around 100 dozen ties per week, but is behind in filling its orders, which have been larger than expected.

By MARIE ANN BEST

What do we plant when we plant a tree?
A thousand things that we daily see;
We plant the spire that out-towers the crag,
We plant the staff for our country's flag,
We plant the shade from the hot sun free,
We plant all these when we plant a tree. —Henry Abbey.

A Good Spring Appetizer and Spring Tonic—The Lowly Dandelion in Salad

Gather the early tender plant of dandelion. It is best when just showing on top of the ground. The whiter and more blanched it is the more delicate is the flavor. Sometimes it grows up long, blanched and delicious under fallen boards or around and under stones. Sometimes you may find it in a freshly plowed field. And you may be sure the farmer will be only too glad to see you come and gather all you can take away for it is an undesirable weed to him except when he uses it on his table, if he has also grown to like its slightly bitter taste.

Cut off the roots as you gather it and keep as free from grass as possible as you go along. Put it all in a large dishpan (it takes a lot of dandelion to make a good sized dish full for it goes together a good bit), cover well with warm salty water, wash through a number of waters to remove all the sand, then cut a few slices of bacon into dice and fry brown in large frying pan. Add ¼ to ½ cup white wine vinegar not too strong, 1 tblsp. sugar more or less according to taste, salt and pepper. When it is boiling add the dandelion. Turn it over and over with a spoon to get it well mixed until it is wilted, but do not boil or cook it. Put it into a salad bowl and cover with sliced hard boiled eggs,

This tastes very good with a ham and eggs dinner. Many people eat it every day in the spring if they have time to gather it until the dandelion grows too old.

An Easy Crumb Cake

2 cups pastry flour, 1½ cups brown sugar, ¾ cup butter, 2 teasp. baking powder, dash of cinnamon. Work above ingredients to crumbs, then take out ¾ of a cup and add to the remainder 2 eggs, not beaten, ¾ cup sweet milk and vanilla if desired. Beat up well. Put in greased pan and cover with the crumbs. Bake in moderate oven. Cool in the pan and cut pieces out as needed.

Twilight Hour Story—Chapter 18

About Wee Chickies and Other Little Friends

I told you last week that when they first brought Fluffy, the persian pussy, home, Rover didn't care about it very much. Of course he wouldn't hurt her because he knew Fluffy belonged to the house just as much as he did, but one day just shortly after Fluffy came she was outside enjoying a sun bath. Mamma and Billy were up town and Rover thought it would be fun to make Fluffy run and he actually chased her up a tree. She was so surprised to think he'd run after her, but she found she could climb a tree almost as easily as walking. But even when she was high above Rover she was so frightened that she kept on climbing up and up. Then when she was away up there and looked down she was so high up she was afraid to come down. I tell you Fluffy was glad when she saw Mamma Lady and Billy coming home just then. It happened a little neighbor boy saw Rover chase Fluffy, so he came over and said, "Rover chased Fluffy up the tree. I saw him."

Mamma Lady looked hard at Rover and said, "Rover, did you chase Fluffy up there? Shame! I didn't think you'd do that." And Rover hung his head and came over slowly, then when he got to Mamma Lady he put up his paw to shake hands. That was his way of saying he was sorry. But Mamma Lady had to punish him for doing that so he wouldn't do it again, and she took his head in her hand and slapped the side of his nose a few times. Not very hard, for, did you know, you don't often need to punish animals very hard to make them mind. But then you mustn't let them off altogether, either, for they must know what is right and what is wrong just the same as little boys and girls must be taught. Don't you think so?

Well, Fluffy was away up in the tree seeing all this, and when Mamma Lady looked up at her and called her, she was so excited and delighted she couldn't stand still. She called her again, and do you know what Fluffy did? She didn't climb down this time but she jumped down all the way. It may be she lost her balance, for the branch was so little away up there and she wasn't used to climbing yet. Anyway she jumped down all that way, and what do you think? She landed right on her paws. Kitties always fall on their paws if they slip, did you ever know that? They never fall on their sides where it would hurt like everything, the way we would most likely fall. No, they never do. Well, when she plunked down right beside Mamma Lady she didn't run either. No, she knew Rover wouldn't run after her again if Mamma Lady was there, so she just waited until Mamma Lady picked her up and took her into the house.

But Fluffy got back at Rover after a few days for running after her like that. She wasn't quite so afraid of him now when he'd come in the house. This is what she did: You see, when Rover is glad he wags his big tail, which is his way of saying he is happy. Well, when he came in one day feeling awfully good and wagging his brushy tail like a good fellow, Fluffy was behind him and she started to play with it. He was so surprised and stopped and looked round at her. But Fluffy knew he couldn't come after her with Billy around. She just hid until he stopped looking at her and as soon as he wagged it again she grabbed it again, and the only way he could keep Fluffy from pulling at his long hair was to keep it real still, and such a funny look came into his brown eyes. He didn't like standing still when he was feeling glad and not be able to wag his tail. Do you know, he had to go off in a corner if he wanted to wag his tail in comfort. Fluffy was pretty smart that time, don't you think? But I wonder what Jimmie Chick and the three little chick sisters have been doing all this time. We're going to find out next issue.

TALK

I don't like to talk with people who always agree with me. It is amusing to coquette with an echo a little while, but one soon tires of it.—O. W. Holmes.

Canada's Leading Hydro Systems

Department of the Interior Gives List of Eighteen With Largest Output in 1929

The large hydro-electric power systems of Canada are defined as those inter-connected undertakings under a common control and management that have each an annual output of 100,000,000 kilowatt-hours or more. The growth of such systems is of particular interest as illustrating the modern tendency towards interconnection and unified control. Interconnection promotes reliability of service; unified control makes possible the highest class of expert advice and increases the economy and efficiency of operation.

The Dominion Water Power and Hydrometric Bureau of the Department of the Interior has made an annual study of these systems since 1922, at which time there were seven such systems with a total output of about 6,602 million kilowatt-hours. By 1929 this had grown to eighteen systems with a generated output of nearly 17,000 million kilowatt-hours, these being all classed as "central electric power stations," and this output accounted for nearly 93 per cent. of the total amount generated by all central electric stations in the Dominion. It is, however, the total output including that purchased that determines the scope of operations and service to the public by each system—for instance the Montreal Light, Heat and Power Consolidated purchases over one-third of the energy it distributes to its customers.

The eighteen systems generating over 100,000,000 kilowatt-hours each in 1929 stood in order of their total output as follows:

1. Hydro-Electric Power Commission of Ontario.
2. Shawinigan Water & Power Company.
3. Duke-Price Power Company.
4. Gatineau Power Company.
5. Montreal Light, Heat & Power Consolidated.
6. Price Brothers and Company.
7. Winnipeg Electric Company (including Manitoba Power Co.)
8. Canadian Niagara Power Company.
9. West Kootenay Power Company.
10. City of Winnipeg Hydro-Electric System.
11. British Columbia Electric Power Corporation.
12. Canada Northern Power Corporation.
13. Abitibi Electric Development Company.
14. Dominion Power and Transmission Company.
15. Southern Canada Power Company.
16. Huronian Company.
17. Calgary Power Company.
18. Great Lakes Power Company.

Of the above systems the first five exceeded a thousand million kilowatt-hours each the Hydro-Electric Power Commission of Ontario leading with over four thousand million. These great hydro-electric power systems are well distributed from coast to coast—Quebec has 6, Ontario 7, Manitoba 2, Alberta 1, British Columbia 2. It is of interest to note also that it can be shown that in proportion to its population Canada has attained greater development of these highly modern large electric power systems than any other country.

The true art of memory is the art of attention.—Dr. Johnson.

In a Public Park

Once on a time (the fairies tell me so)
The trees grew weary of green livery,
Saying, "Why should not" we the radiance know
Wherewith the dainty garden flowers glow:
Would we not wear such beauty splendidly?"

Then jacaranda, borrowing the blue
Of skies in summer, wore it, and was proud
A little while; but certain gumtrees knew
A better secret, and the long day through
Waited till color stained a sunset cloud.

Saffron and rose and crimson then were blent
Burning toward beauty with a gentle flame
And when adown the leafy lanes I went
I saw the wise trees crowned so, and content
To face the rifled skies and know no shame.
—Ethel Davies the Australasian.

Protection of Wild Life

Colombo Times of Ceylon: By far the greater portion of fauna which year by year is destroyed throughout the world is made for the purpose of putting clothes on the backs of women, and it is quite obvious that so long as women demand feathers and furs, so long will there be those who will be able to supply them. Laws prohibiting destruction are utterly useless. In this connection the osprey is an outstanding example. Various countries have prohibited the importation of the osprey, but there is probably no country in the world where the osprey cannot be purchased. The only true solution would appear to be the punishment of those who wear the feathers or the furs of prohibited animals. The average woman does not wear either furs or feathers in places in which she cannot be seen by an envying sisterhood, but, on the contrary, she flaunts her acquirements with the greatest possible publicity. It would be a comparatively simple matter for those found wearing prohibited feathers or furs to be punished in the same way that a motorist without a number-plate or a licence is dealt with. It would, however, be an extraordinarily brave Government which would dare to introduce such legislation.

Mending Curtains

Springtime and house-cleaning time approach. Those muslin curtains need laundering and yet they are rather old and delicate to withstand another washing. Try this and see how well it succeeds: After the curtains are washed, starched and dampened, put a piece of thin white net under the worn parts and press the two together while ironing them. The damp starch will cause the net to stick to the curtains and the net backing will make them look like new. It will save hours of mending and when the curtains are hung the net will not be noticed in the fullness. Curtains mended in this way have been in use for two years or more and the results are very satisfactory.

He Wanted His Share

Midnight! Slowly the householder crept down the stairs. Suddenly he threw open the drawing-room door.

"Don't move!" he cried, pointing a gun at the man who crouched by the trophy case.

The burglar raised his hands.

"What's in that sack?" asked the householder.

The burglar lowered his hands and revealed a glittering array of silver cups and cutlery.

"Put them back on the sideboard at once," ordered the other.

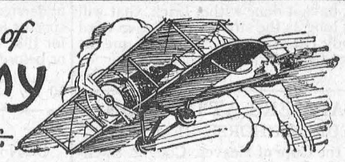
"Lumme, guv-nor," cried the burglar, a pained look on his face, "not all of it! Be fair! 'Arf belongs to the 'ouse next door."

Always act in such a way as to secure the love of your neighbor.—Pliny the Elder.

The language of friendship is not words, but meanings. It is an intelligence above language.—Henry D. Thoreau.

Sam was charged with theft, and his lawyer decided to put him in the witness-box. "Sam, if you tell a lie you know what will happen, I suppose?" asked the judge. "Yas, suh, replied Sam. I'll go to Hades and burn for a long time." "Quit right," said the judge. "And you know what will happen if you tell the truth?" "Yes, suh," said Sam. "We lose de case!"

The Adventures of Captain Jimmy and his Dog Scottie



There is a race of men who are born with a gift of roving, and a thought that all lands are home. They'll hang their hats in an Esquimaux Igloo, or a chinese Emperor's palace, and settle down as complacently as a black cat on a warm hearth rug. Give them a stout old pair of shoes and a new highway, or an old boat and a salt wind to push the sail, and they'll find their way into the queerest places—with absolute surety that all will come out right in the end.

If you asked these men why they get along so well, they might tell you that this is just because they have found that folks are much the same anywhere. They would tell you that the little black boys in Africa and the brown boys in India—yes, and the yellow boys in China—like to play at the same kind of games as you do, and that Big Folks are just Little Folks grown up.

In China, for instance, there are about 400,000,000 people, mostly Chinese. Some are wise and learned, others are poor and ignorant. Some are kind and honest—others dangerous and wicked. There are other things, too, in China. There are great bamboo forests full of tigers, bears and wild animals. There are shady rivers where pirate junk ships lie in wait for plunder. There are gilded temples with the funniest little spires and turrets, and there are frowning, forbidden cities away up in the mountains, where the bravest white man dare not go.

One bright morning Scottie and I talked it over, and decided to go to China and meet with new adventures. Inside of a week we were on board a steamer bound for Shanghai, and our good plane safely crated. Talk about your rough weather. They screwed down the hatches and shut all the portholes, while great black seas crashed over the ship, driven before the blast of a screaming east wind.

Landing in Shanghai, we began to assemble our plane. Just as the job was finished, reports came in that fighting had broken out between two rival armies less than a hundred miles away. I asked Scottie if he would be interested in going to the front, and he wagged his tail and danced about.

We must confess that Scottie didn't like the Chinese very well at first. Once he had been captured by Chinese bandits, and since then had carried a grudge against the entire race. He mixed with them just as a lighted match mixes with a keg of gunpowder.

Knowing the grouch Scottie carried I shouldn't have taken him with me when I went to see General Lu to ask for a pass to the front.

General Lu was located in a palace in a small walled city. Walking into the room he greeted us with dignity, shaking hands with himself in the Chinese fashion. General Lu was an immense man—very tall and stout, and gorgeously dressed in silks. He was extremely impressive to me—but he didn't impress Scottie a bit.

Imagine my dismay, when right in the midst of the bow, Scottie growled, and, tearing the leash from my hand, made a jump at him.

The General was startled—then angry. Instinctively he shot out a velvet slippered foot to ward off Scottie's attack, but the terrier was all ready for such a move. He dodged—and quick as a flash, he caught the slipper in his teeth, shaking and tugging, and pulling for all he was worth—finally making off with it.

There are times when whatever one says it is the wrong thing, so I waited for the next move. I glanced up, expecting to see the General order us put out, or what not, and much to my surprise he was smiling. The situation was so ludicrous that it had appealed to his sense of humor.

That was indeed a relief, and I apologized fluently for Scottie's shortcomings. General Lu stood and smiled and didn't understand a word of it. Then the interpreter began to talk in Chinese. Suddenly General Lu spoke sharply. I waited in suspense—so much depended on his answer.

(To be continued).

Father of Canning

"Father of the Canning Industry" is the name Nicholas Appert, a Frenchman, unknowingly made for himself. It was in 1809, after 15 years of constant experimenting, that Appert received from Napoleon I the prize offered by the French Government to anyone who discovered a way to supply suitable and well-preserved provisions to its military forces and described the process in a book that France could give to the world. This book was published in 1810 but not translated into English until 1820. The cash prize received by Appert for his discovery was the equivalent of $5000 and with it he started a canning business, outgrowths of which under the same name are still operated in France.

Appert called his products "Hermetically Sealed Foods," his "cans" being wide-mouth glass bottles, each with a cork carefully cut by hand, this being the only known method of preventing leaks and consequent spoilage of the food. The preserving and sealing of food in a "canister" of tin or other metal was the next development of the industry and explains the origin of the familiar "tin can" of today. In listing products on hand and in making out invoices, the early canners abbreviated the word "canister" to read "can." In consequence a "tin canister" soon became known as a "tin can," without any visible sign of the abbreviation."

A Slight Difference

The two bank clerks were exchanging confidences.

"I have a friend who has a fine time," said Nobbs airily. "He goes round all day in a motor and always carries heaps of cash."

"A millionaire, I should think," said the other enviously.

"Oh, no!" said the first. "He's a bus conductor."

"I have never known an explorer who was not either bankrupt or close to it."—Commander Richard E. Byrd.

Try this salad dressing...
it keeps for weeks!

KRAFT Salad Dressing is so thoroughly blended, it will keep for weeks. It stays good right down to the last tangy teaspoonful.

Best of all, it costs just one-half the price you're used to paying. A generous 12 ounce jar sells for only 25 cents. Get some today.

COMMA COST $2,000,000.

Strange Mistakes In Punctuation—The Printer's Duty.

Nowadays considerable stress is laid upon punctuation, and examiners are keen in ascertaining whether students are properly equipped in this respect. In fact, a recent examination paper contained the lines:—

Every lady in the land
Has twenty nails upon each hand
Five and twenty on hands and feet
This is true without deceit.

for the meaning to be shown by punctuation.

Evidently due attention was not paid to this subject formerly, or it would not have been necessary for Lord Lyttelton to pay some hundreds of pounds for the punctuation of his "History of Henry II."

Dr. Johnson states that he would not trust the printer, but employed a man who professed to be an expert, and yet, notwithstanding this great outlay, the work was badly done.

Printers must have taken on this duty in the past, for we find Lord Jeffrey, the Edinburgh reviewer, beseeching his printer not to "sprinkle his pepper box full of commas" too generously over his work.

This promiscuous sprinkling is responsible for some peculiar mistakes. An Irish advertiser, for instance, required "A country girl to wash and milk one cow," while another paper offered "A good stylish bicycle, £10 for sale, by a young lady enamelled black and geared to sixty-eight."

The United States suffered heavily through the wrongful placing of a comma some years ago. The Congress drafted a Tariff Bill, and in enumerating the articles to be admitted free included "all foreign fruit-plants."

When copying, however, the clerk omitted the hyphen, and placed a comma after fruit, so that the clause read, "all foreign fruit, plants, etc."

As the matter could not be rectified for about a year, all kinds of foreign fruits, such as lemons, oranges, grapes, bananas, and others, entered duty free, and the Government lost at least $2,000,000.

Liverpool has also had an experience of the value of the comma. In 1819 a contract was entered into for lighting the then town which read, "The lamps to be in number 4,050, of two spouts each, composed of twenty threads of cotton," but when the contractor proceeded to comply with this it was found that the comma should have proceeded, and not followed, the word each.

The intention was that each spout should contain twenty threads, but as this was not the contractor's idea of his obligation the contract was cancelled in order to avoid a lawsuit.

The omission of a comma gave rise to a court case a few years ago, says a writer in John o' London's Weekly. An address plate had been prepared, and as a comma had been left out after the figure 1 the purchaser refused to pay the account. The judge, however, did not think the comma was essential, and therefore directed that the engraver should be paid.

GLOBE-TROTTING.

American Seeing the World on a Dollar a Day.

An American globe-trotter, who has been wandering through Europe and some parts of Africa since 1910, and who is seeing the world on a dollar a day recently arrived in Edinburgh. His name is Frank Brendamour, his hobby and occupation seeing the world, and his chief eccentricity the keeping of a curious statistical record of his wanderings. In his youth he practiced, for a short time, as a doctor, but in 1910 he set out from New York to see the world and achieve liberty. For the first ten years, when he wandered afoot, he allowed himself half a dollar per day for all expenses. From 1920 he doubled that allowance, the reason for the increase being his determination to travel chiefly by vehicle for the next ten years.

His diary would delight the heart of the most ardent statistician. In it he has a record of every meal and the cost of it, where he slept each night, and what was charged for his bed, how he travelled and the money expended, his fare per mile, and many other peculiar calculations. On his self-imposed allowance of a dollar a day he has to be as frugal as an Aberdonian, and he looks with something like horror on British habits. Considering the economic circumstances of the Old Country, we are the most extravagant people in Europe, he told a Scotsman reporter. Our diet he considers very expensive, and the dollar has much less power here than on the Continent.

Something New In Railways.

A new idea in railways, the invention of an Edinburgh man, is about to be tried out. It consists of an open girder-work structure carried on supports at a fair height above the ground. The cigar-shaped trains, driven by airplane propellers, run on an overhead rail track, while above them, on top of the whole, is a road for motor traffic.

It is estimated that the trains will be able to attain a speed of 100 miles an hour, and that the cost of making a double line of this overhead railway will be only about a third of that of building a railway of the ordinary type. If this proves correct, there should be a big future for the new invention in the Dominions and other undeveloped or partially developed countries.

Travellers will join the trains at overhead platforms, which will be reached by means of lifts. An overhead railway system already exists in New York's elevated railway, completed in 1880.

Difficult Mountain Pass.

The Khyber Pass, the most important of the passes which lead into India from Afghanistan is a narrow defile winding between cliffs 600 to 1,000 feet high. At the narrowest part of the pass it is about 15 feet wide.

SMALL ARMS PIONEER.

Inventive Scots Minister Patented Percussion Lock.

The memory of a man who, although in Holy Orders, played a no small part in the development of modern munitions of war, is soon to be perpetuated in the Tower of London.

A tablet is being erected there to recall the association with that fortress of Rev. Alexander John Forsyth, M.A., LL.D., the inventor of the percussion lock for small arms.

Forsyth was born on Dec. 28, 1768, at Belhelvie, Aberdeenshire. He was educated at King's College, Aberdeen, ordained at the age of 23, and appointed to the parish church of his native town.

Arms and implements of war generally appear to have fascinated him. In 1800 he produced a detonating powder, for the secret of which it is said Napoleon offered him £20,000. But this he naturally refused, and following a series of successful experiments with detonating companies, he was invited by Lord Moira, Master-General of Ordnance, to work upon the production of percussion locks, and to carry out his efforts at the Tower.

After several years he was successful, and in 1807 had patented not only a percussion lock for small arms, but had also produced one for three-pounder guns. It seems, indeed, that Forsyth was too successful, for his achievement appears to have resulted in exhibitions of both envy and resentment, and some months later, while still experimenting at the Tower, Lord Chatham ordered him to leave there.

This was a severe blow to the young inventor, who thereupon returned to his ministerial duties in Scotland, and continued to work with the limited resources which were at his disposal there. In 1834 tests on his percussion lock resulted in the final approval of the invention, and two years later an issue of the experimental arms was made to the Third Grenadier Guards and the First Coldstream Guards. Afterwards percussion rifles were generally adopted for use in the British army, being first employed in action by the Second Battalion of the Border Regiment (55th) at Amoy in 1841.

A year before this a petition was presented to Parliament asking the Government to grant Forsyth a gratuity, but it was not until October, 1943, four months after the sudden death of the inventor, that approval was given for a grant of £1,000, which sum was equally divided among his surviving relations.

Major Charles Ffoulkes, keeper of the armory at the Tower, said to a Sunday Times representative:

"The more one looks into the history of this remarkable Scottish minister, the more one feels how much he achieved in revolutionizing small arms. He was also a remarkable man in other ways. For example, when the advantages of vaccination were first realized, he took it upon himself to vaccinate the whole of his parishioners.

"During the Peninsular wars, the French pirated the Forsyth lock wholesale, which resulted in the inventor taking action for infringement of his patent."

Major Ffoulkes related how recently at the Tower he decided to open one of the little priming boxes that were used by Forsyth, and in it was found a quantity of the original powder.

Giant Meals.

One of the biggest pots of soup ever made is a feature of a "gypsy party," which takes place yearly at Baildon, in Yorkshire, England.

Centuries ago there was an annual gathering of the gypsy tribes at Baildon. Later on the people of the district carried on the custom by having a gypsy camp of their own on the moor, preparing and eating a gypsy soup, and taking part in a number of ceremonies. This custom is now being revived, and the soup is to contain, among other ingredients, 500 lbs. of meat, 600 lbs. of peas, 300 lbs of potatoes, and 900 lbs. of other vegetables.

Yorkshire seems to take a special delight in Gargantuan repasts of this kind. Denby Dale is famous for its giant pies. One made last year contained the beef of four bullocks and 15 cwts. of potatoes. It was served to about 20,000 people, all of whom voted it excellent.

Preparing a giant dish of this kind is a ticklish job, but there was only one Denby Dale pie that was a failure. It was that baked in 1887, professional bakers being employed. Since then the women of Denby Dale have insisted on baking the pies themselves, and have always made a good job of it.

Sailors' Queer Trousers.

The creation of wide, bell-bottomed legs for sailors' trousers dates back to the seventeenth century. The origin and reason for this custom is at present a matter of some conjecture. The explanation may be that this type of trousers can be easily rolled up by the men when scrubbing down decks in bare feet. They also can be more easily kicked from the sailor's leg when he has to swim, and the lacing on the back is similarly explained. Another tradition for wearing of the trousers with wide legs is that this practice dates from the days when men made their own clothes by doubling broad leg-length strips of cloth, sewing two inner leg seams, and cutting between them, thus making the waist dimensions the same as the leg widths combined.

THE FAMILY DOCTOR

By JOHN JOSEPH GAINES, M.D.

SELF-DRUGGING

It grows on people—the habit of "taking something" for every little discomfort they happen to feel. Self-dosing is never the wise thing to do; you would not employ a physician to treat you who made no pretense to any knowledge of treating the sick or indisposed; now, would you? Then why do it to yourself?

A diagnosis of any indisposition is necessary before any sort of intelligent treatment can be instituted. Even the intelligent physician may be puzzled over the actual cause of a given complaint, often a comparatively trivial, yet a very annoying thing. Not long ago I met a lady who had spent over $500 on a peculiar neuralgic headache without more than temporary relief; she had taken every variety of "headache tablets" that she heard of—seriously impairing her blood and weakening her heart very perceptibly; I suggested examining her nasal passages and sinuses; "O, there's nothing wrong there—I have no catarrh," she insisted.

Nevertheless a few treatments to reduce the swollen turbinates cured the headache.

Many elderly men in the western section of our country are sure they have "prostate trouble." They hear their symptoms accurately described daily over the radio, by the advertising miracle-worker; they hear the promise of absolute cure by a simple operation—they make their own diagnosis, and drug themselves frantically without benefit; they accept the fakir's "simple operation," paying for it in advance with all the money they can scrape together; they reason that, if the quack were not honest, the government would not permit him to broadcast his ballyhoo! A nasty mess, isn't it? They do broadcast just the same; we are so busy trying to avoid foreign entanglements that we haven't time to protect our people from fraud!

Several men have recently lost their lives because of their own gullibility, according to newspaper reports, in one of our western states.

"THE BACKBONE"

The center-pole of the human "circus-tent," flippantly speaking. A column of vertebrae set one upon another, and bound together by the toughest and most durable of fibrous tissue known.

Its outstanding purposes are, first, to provide a very secure housing for that most important, major bundle of nerves called the spinal cord; it is a housing which is almost invulnerable against outside influence, and only the most violent force can break its continuity. Second, it must permit motion necessary for almost every phase of human activity, in which respect it is certainly a marvel of divine construction. It is built to stand a hundred years of active service—a thing no human contrivance can do.

I believe the human lumbar spine is the most powerful animal structure of which we have knowledge.

And yet, there are individuals who suppose that the segments called vertebrae slip about and become "luxated" as easily as would a string of spools, the plaything of a child of the seamstress. And, I have met people who honestly believed that all diseases of men and women are caused by the spinal vertebrae slipping from their hard-and-fast moorings; and that all such ailments can be put to rout by the proper replacement of the "slipped" vertebrae!

And, I know a good many people who don't believe anything of the kind—being one myself; I wouldn't want my vertebrae skidded around, even if such a thing were possible; in fact, a great Creator fashioned man so as to keep that very thing from being done.

Nevertheless, there is good in everything—including a sock in the spine. A sudden impact against the locality of a nerve-trunk is a valuable stimulant in certain conditions; I have seen good done in that way, hence do not condemn the intelligent use of the short-arm jolt, or the Leyden-jar spark—in fact anything used with capable understanding.

"TWILIGHT SLEEP"

Sounds almost alluring, doesn't it? Gives one a sort of dreamy feeling just to think of it. Yet, as used in medicine, and quackery as well, it is one of the most deadening combinations of drugs we have at our command.

The originators of the formula known as "H.M.C." claimed at first that a thigh might be amputated without pain under its influence. The attention of the medical world was attracted. That was a good many years ago; and the best surgeons of America are still using the safer method of aether anaesthesia; "twilight sleep" dropped back to its very limited sphere and stayed there.

Hyoscin, Morphin and Cactin are the ingredients of the compound; the first two are most powerful drugs, and the more so when used in combination; the latter has, if any effect at all, a very negligible one. My experience with "H.M.C." led me to abandon it early in its history as too dangerous to tamper with.

For instance, a patient of mine, an inebriate, was in delirium tremens—alcoholic mania; he had not slept for four days. Having tried everything else, in despair I gave him a dose of the new "twilight sleep." Well—it worked; within five minutes the man was snoring loudly, and almost blue from cyanosis; he breathed only six times per minute! I stayed at his bedside fourteen hours, until the poison wore away—never more anxious before or since. When he awoke he declared, looking wildly about him, that he had been drugged!

I told him if he hadn't, then there never had been a man drugged. He immediately ordered his belongings packed and left town and I didn't blame him. I blamed myself and the new "twilight sleep." Now I only use the stuff in eighth-grain doses, to soften the terrible pains in childbirth—and I haven't used it even that way in fifteen years.

The quack, however, uses "twilight sleep" as a slogan, and dopes his dupes in his own sweet way with the deadly thing.

Gains Seventeen Pounds

Anyone seeing Mary would find it hard to believe that this smiling young woman was a consumptive. Indeed, for Mary this word "was" is the best part of the whole story, for she fully believes that she is just about "cured" and ready to go back to work. "Why, in just three months they put nearly seventeen pounds weight on me," says she, with a hint of Irish brogue, "and me that weak when I came in that I had to be carried on a stretcher."

Mary has been in the Toronto Hospital for Consumptives for several months, but such is the skill of the doctors, such the result of good food, rest and careful nursing, that she again meets the world with a smile, and counts the days to the time when she will be able to work once more and help in her mother's support.

A great work this, that cares for many hundreds of the consumptive poor who otherwise would have to accept the hardships and uncertainties of being tended at home. Will you please help such as Mary to get well? Your subscription will be gratefully acknowledged if sent to Mr. A. E. Ames, 223 College Street, Toronto.

HENRY'S SHORTHAND SCHOOL

Ottawa, Ontario

No school in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913 left other Ottawa Schools to come to it.

Therefore, it is not surprising that business men, in advertising for stenographers should specially say, "Graduates of Henry's School preferred."

For particulars about our course, write D. E. HENRY, Director
62 Bank Street.

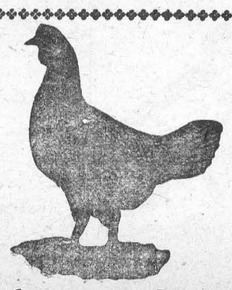
We also have plenty of Feeding Rolled Oats and Pinhead Oat Meal.



H. McMaster, Winchester, Ont.

Women's Institute

The April meeting in the Town Hall on Tuesday afternoon was not largely attended owing to the prevalence of house cleaning. The President, Mrs Robt. Suffell, occupied the chair In answer to roll call many plants and shrubs were named and their good qualities told about. After the reading of the minutes, the necessary business was transacted and Mrs. Cass was added to the Committee that had been appointed to interview the P. S. Board re the teaching of music in the school. The Secretary read some correspondence and announced that a special speaker will be here to address the Institute on June 12th, the subject to be announced later. The President announced that the annual meeting for election of officers will be held in May.

Mr Sweet in an interesting way told of the recent trip of Mrs. Sweet and himself to Atlantic City, of which the resident population is 60,000, but they often have as high as 200,000 visitors. Mr. Sweet made reference to the Board Walk, 66ft. wide and seven miles long. He also told of the Empire State building under construction in New York City. Its height is 1280 ft. Evidently their trip was very enjoyable.

Mrs. Cass delighted those present with a cheery Spring song.

After a vote of thanks was tendered Mrs, Cass and the accompanist, Miss Gardner, and also Mr. Sweet. The meeting closed by singing God Save the King.

Late Mrs. George Scott

On Friday, April 17th, after a long illness of many months, during which time she was constantly confined to her bed, Mrs. George Scott quietly passed to the "Great Beyond."

Born in Winchester on December 12th, 1860, Mrs. Scott had spent all her life in this village and all who knew her loved and respected her. In 1877 she married the late George Scott, he having predeceased her four years ago and of this union twelve children were born, eight of whom are still living, namely: Mrs. W. J. Rodney, Winchester, Ont.; Mrs. Aust Gray, Winchester, Ont.; Mr. George Scott, Ottawa, Ont.; Mr. William Scott, Winchester, Ont.; Mrs Max Rutherford, White Bear, Sask.: Mr. Ralph Scott, Watertown, N. Y.; Mr. Arnold Scott, Watertown, N. Y and Mr. Leonard Scott, Cleveland, Ohio.

For several years the deceased has been in very poor health, but she bore all her pain and suffering with cheerfulness and the deepest trust in the Lord whom she loved as much and served so faithfully.

The funeral service was held in the Baptist Church here, of which she was a member, and was conducted by Rev. Mr. Ostrom assisted by Rev Mr. Turner. A lovely hymn, "Some day we'll understand" was beautifully rendered by Mrs. Ostrom.

The floral offerings were very numerous and testified to the esteem with which Mrs. Scott was held by her friends. The floral offerings were as follows:—Pillow, Mr. and Mrs. W. J. Rodney and Mr. and Mrs. William Scott of Winchester.

Crosses—Mr. and Mrs. Leonard Scott, Cleaveland, Ohio. Mr. and Mrs. F. P. Phillips and Mr. and Mrs. D. B Blakely of Ottawa.

Wreaths—Grandchildren: Evelyn, Willow and Harry of Winchester. Mr. and Mrs. Max Rutherford, White Bear, Sask.

Sprays—Mr. A. J. Skelton of Calgary, Alberta. Mr. and Mrs. George Scott of Ottawa, Mr. Arnold Scott and Mr. Ralph Scott, of Watertown, N. Y., Mrs. Robert Rodney, Miss Edith Rodney and Mr. and Mrs. Cecil Rodney of Brantford, Ont., Mr. and Mrs. Aust Gray and family of Winchester.

Winchester Springs

Mr. Jay Bailey spent the week-end with friends at Renfrew.

Master Fred Henderson, son of Mr. and Mrs. Thos. Henderson was taken to the Cornwall Hospital by Dr. McLaughlin Thursday last and was operated on for appendicitis. His friends and schoolmates hope he soon will be able to return home.

Mrs. Robert Morrow spent a few days with Mr. and Mrs. Johnston Morrow at Stitsville.

Mr. and Mrs. Orren Casselman, Mr. and Mrs. A. J. Casselman and Melba were guests on Sunday of Mr. and Mrs. I. J. Casselman at Riverside.

Mrs. D. Kinkade of Russell is spending sometime with her daughter, Mrs Clifford Robinson.

Mr. Roy Runions spent Sunday with his parents at Farrenspoint.

Master Russell Carkner spent a few days with his grand parents near Winchester.

Miss Evelyn Wilson of Ottawa spent Sunday at her home here.

Mr. Hector Munro is on the sick list.

Sunday evening services will be withdrawn here and Rev. Morrison will preach at Toyshill Schoolhouse.

Mr. S. MacMillen from Newington is spending a few days with Mr. and Mrs. Holmer Patterson.

Mrs. Nora Merkley and Chesley spent Sunday with Mr. and Mrs. Andrew Fawcett of Inkerman.

Mr. and Mrs. Ralph Allison and son spent Sunday evening with Mr. and Mrs. Willie Fawcett at Inkerman.

Melvin News

Mr. George M. Carlyle of Dunbar is spending some time with his son, Mr. K. Carlyle.

Mr. Arthur Christie spent Wednesday in Montreal.

Visitors at the home of Mr. and Mrs. G. F. Beckstead on Sunday were: Mr. and Mrs. Ross Stata and family of Chesterville and Mr. and Mrs. Charles Beckstead and family of Dunbar.

Mrs. Sherwood Wilson of Ottawa spent the week end with her parents, Mr. and Mrs. J. E. Lanoue.

Auction Sale!

TERMS—$10. and under, Cash; over that amount four months credit on approved joint notes or 4% off for Cash.

D. Levine, Prop.

ROSS MORROW, Auctioneer.

Lucky It Wasn't the Hallelujah Chorus

John Philip Sousa loves to tell one about two members of his famous band, or rather, about their wives. One, a bride of a year, was pushing a purambulator in which were babies, triplets. The other had been only married for a few weeks.

"What beautiful babies!" exclaimed the newly married one.

"Yes," replied the proud mother, "and let me tell you the funniest coincidence. At our wedding, Mr. Sousa and some of the band serenaded us and they played "Three Little Maids" from the 'Mikado.' Isn't that funny?"

At this the other bride turned pale. "Good heaven!" she gasped. "We were serenaded too, and they played the Sextette from "Lucia."—Los Angeles Times.

Improving Store

Mr. H. Flora is making extensive changes in his store, and intends having a very attractive restaurant and lawn at the west side of the store where the vacant lot is now being filled and made ready. The interior of the store has been re-arranged and made more convenient.

Oh, why should the Spirit of Mortal be Proud?

By William Knox

Oh, why should the spirit of mortal be proud?
Like a swift—fleeting meteor, a fast flying cloud,
A flash of the lightning, a break of the wave,
Man passes from life to his rest in the grave.

The leaves of the oak and the willow shall fade,
Be scattered around and together be laid;
And the young and the old, the low and the high,
Shall molder to dust, and together shall lie.

The infant a mother attended and loved,
The mother that infant's affection who proved,
The husband that mother and infant who blessed,
Each, all, are away to their dwellings of rest.

The maid on whose cheek, on whose brow, in whose eye,
Shone beauty and pleasure—her triumphs are by;
And the memory of those who loved her and praised;
Are alike from the minds of the living erased.

The hand of the king that the sceptre hath borne,
The brow of the priest that the mitre hath worn,
The eye of the sage and the heart of the brave.
Are hidden and lost in the depth of the grave.

The peasant, whose lot was to sow and to reap,
The herdsman, who climbed with his flock up the steep,
The beggar, who wandered in search of his bread,
Have faded away like the grass that we tread.

The saint who enjoyed the communion of Heaven,
The sinner who dared to remain unforgiven,
The wise and the foolish, the guilty and just,
Have quietly mingled their bones in the dust.

So the multitude goes, like the flowers or the weed,
That withers away to let others succeed;
So the multitude comes, even those we behold,
To repeat every tale that has often been told.

For we are the same our fathers have been;
We see the same sights our fathers have seen,—
We drink the same stream and view the same sun,
And run the same course our fathers have run.

The thoughts we are thinking our fathers would think,
From the death we are shrinking our fathers would shrink,
To the life we are clinging they also would cling;
But it speeds from us all, like a bird on the wing.

They loved, but the story we cannot unfold;
They scorned, but the heart of the haughty is cold;
They grieved, but no wail from their slumbers will come;
They joyed but the tongue of their gladness is dumb.

They died, aye! they died; and we things that are now,
Who walk on the turf that lies over their brow,
Who make in their dwellings a transient abode,
Meet the things that they met on their pilgrimage road.

Yea! hope and despondency, pleasure and pain,
We mingle together in sunshine and rain;
And the smiles and the tears, the song and the dirge,
Still follow each other, like surge upon surge.

'Tis the wink of an eye, 'tis the draught of a breath;
From the blossom of health to the paleness of death,
From the gilded saloon to the bier and the shroud,—
Oh, why should the spirit of mortal be proud?

DOG BY-LAW

WARNING & NOTICE!

The By-law governing the keeping of dogs within the Municipality of Winchester provides as follows:

"No dog shall run at large in the village between the 1st day of May and the 31st day of October, except accompanied by owner or someone responsible.

Any dog found running at large, being vicious or doing damage to person or property, may be killed by the Village Constable. Any violation of this by-law leaves the owner liable to a fine of not less than $1.00 or more than $10.00 and costs."

J. C. EMPEY, Village Clerk.

Special Spring Reductions on USED CARS
