XXIII, No. 15

MORRISBURG, ONT. FRIDAY, MAY 22 1925

SEED CORN

The Flint varieties are becoming very scarce and many will have to substitute with Dent's. We still have considerable Dents left, which we are offering at a low price.

Red Clover Seed

We are offering the balance of our Red Clover No. 1 at 30c a pound. This is a snap for those who failed to secure alfalfa seed or alsike.

EGGS

Top price can always be obtained when you sell your eggs to us.

THE UNITED FARMERS CO-OPERATIVE CO.
LIMITED
MORRISBURG, ONT.

MRS. JAS. MURRAY

Following a very brief illness, the death occurred about midnight on Wednesday, 13th May 1925, of Mrs. James Murray, at the family residence, 89 Church St., Brockville, in her 62nd year.

The late Mrs. Murray was born at Smiths Falls, a daughter of the late Mr. and Mrs. Thos. Baird, and since 1877, had resided in Morrisburg, until going to Brockville in 1919. She was twice married, her first husband, Mr. William Ebon Gillard, being killed in an explosion of a gas buoy on the Canadian Government Steamer Scout in Kingston harbor on April 18th, 1905. Her marriage to Mr. Murray took place in September 1919. Besides her husband, she is survived by two sons and five daughters by her first marriage. The surviving members of her family are—Messrs. Clarence Gillard, Oshawa; Clinton Gillard, Rochester, N.Y.; Mrs. Edith Hamilton, Massena, N.Y.; Mrs. Violet Deschamps, Prescott; Mrs. Harold Duval, Morrisburg; Mrs. F.W. Fulford, Brockville and Miss Grace Gillard at home. She is also survived by two sisters and two brothers, viz—Mrs. Matthew Ferguson, Saginaw, Mich.; Mrs. James Prosser, Merrickville, Messrs. Thos. Baird, South River, Ont., and George Baird, Smiths Falls.

In religion, the late Mrs. Murray was an Anglican and a member of Trinity Church, Brockville. She was of a very lovable disposition and a fond and faithful mother.

A short service conducted by the Rev. A. F. C. Whalley, M.A. was held at the family residence at 1 o'clock and the remains were conveyed by motor hearse from Brockville on Saturday, May 16th to Morrisburg St. James Church, where the funeral service was conducted by Ven. Archdeacon Carson, after which the remains were interred in St. James cemetery.

Relatives and friends who attended the funeral from a distance were Messrs. C. E. Gillard, Oshawa; C. B. Gillard, Rochester, N.Y.; Mrs. Edith Hamilton, Massena, N.Y.; Mrs. Violet Deschamps, Prescott; Mrs. Harold Duval; Mr. and Mrs. Matthew Ferguson, Saginaw, Mich.; Mr. and Mrs. Geo. Baird and Mrs. C. Gray, Smith Falls; Mrs. Jas. Prosser, Morrisburg and Miss Laura Prosser, Merrickville.

MR. W. C. FROATS

Mr. William Clinton Froats, who was born at Froatsburn 52 years ago, a son of the late Cornelius Froats, and for many years a resident of Morrisburg, died at Cornwall General Hospital Friday, May 15th, where he had been taken for treatment the day previous.

Although Mr. Froats had not, for some time, been enjoying good health, he did not think that his illness was serious, and consequently did not cause any alarm among his immediate relatives. The news of his sudden death, therefore came as a great shock to his wife, who received the message on Friday morning.

He is survived by his widow; two brothers, Allan and John, both of Froatsburn and one sister, Mrs. Colin Carter of Mariatown.

The remains were conveyed to his late home in Morrisburg, by motor hearse on Friday afternoon, and the funeral was held at Knox Church on Monday, May 18th, Rev. Mr. McKenzie officiating.

The pall-bearers were Messrs. Wm. Adams Wm. Fisher, S. O. Casselman, Frank Stuart, H. Williams and Wm. Burris.

Interment was made in Mount Pleasant Cemetery.

MISS C. V. PILLAR

On Wednesday the interment took place at St. John's cemetery, Riverside, of the remains of the late Miss Catherine Victoria Pillar, who died on February 19th, 1925, at the residence of her cousin Mrs. John M. Gill, of Brockville.

The burial service was conducted by the Rev. W. Davis of Brockville. Among those present were Mr. Robert Gill, Mrs. Norman MacLeod of Brockville and Dr. Wm. Meikle of Morrisburg.

The following is taken from the Brockville "Recorder and Times" of February 19th, 1925.

"Miss Catherine Victoria Pillar, a resident of Brockville for the past 43 years, passed away this morning at the residence of her cousin, Mrs. John M. Gill, 181 King street east, after an illness of only three days, in her 91st year.

Miss Pillar was a daughter of the late Michael Pillar and his wife, formerly Miss Nancy Loucks, sturdy United Empire Loyalists. She was born at East Williamsburg, Ont., on January 25, 1835, and resided there until coming to Brockville 43 years ago to make her home with Mrs. Gill.

The deceased had been in excellent health until three days ago when she developed a cold, and this morning she sank into a sleep from which she never rallied death coming quietly and peacefully. The late Miss Pillar was of a very cheerful nature and was keenly interested in the world's affairs until within four or five hours of her demise.

In religion she was an Anglican a devoted member of St. Paul's church since coming to Brockville and was of an unselfish, sweet and Christian disposition. She had many friends who mourn her passing.

A nephew and two nieces, Mr. Ar-

BOARD DECIDES TO BUILD ON FAIR GROUNDS

The following are the Secretary's minutes of the meetings held during the week—

Special meeting of the Board of Education was held in the Town Hall on Monday, May 18th, at 7.30 p.m. Present—Chairman, J. L. Casselman, A. H. Hunter, Mrs. D. C. Bush, J. H. Meikle, T. Coligan, W. J. Fetterly, Archdeacon Carson, M. A. Campbell, F. H. Meikle and G. H. Merkley.

The meeting was called to consider the selection of a school site, erection of a school-building and the selection of an architect. The majority of the members of the Village Council and a number of the citizens were at the meeting, and there was a general discussion of the several topics.

Moved by T. Coligan, seconded by A. H. Hunter, that we decide to build a new school on the Fair Grounds.—Carried.

Moved by F. H. Meikle, seconded by Mrs. D. C. Bush, that we build a Collegiate Institute.—Carried.

Moved by F. H. Meikle, seconded by T. Coligan, that we ask Messrs. Richards and Abra, architects, of Ottawa, to meet the Board Wednesday evening next.

Moved in amendment—M. A. Campbell, seconded by C. O. Carson, that we ask Messrs. Richards and Abra, also Messrs. Millson and Burgess, of Ottawa, to meet the Board Wednesday evening and that the Cornwall Board of Education be consulted to find out if they are satisfied with the construction and supervision of their school.—Amendment carried.

On May 19th the following resolution was handed to the Secretary, signed by a majority of the Board. Moved by M. A. Campbell, seconded by C. O. Carson, that the Secretary be instructed to invite Messrs. Millson & Burgess, architects, to meet this School Board on a separate night from our meeting with Abra & Co.

Wednesday, May 20th—Adjourned meeting of the Board of Education was held in the Town Hall at 7.30 p.m. Present—J. L. Casselman, F. H. Meikle, A. H. Hunter, Mrs. D. C. Bush, M. A. Campbell, W. J. Fetterly, J. H. Meikle, T. Coligan, C. O. Carson, G. H. Merkley.

Messrs. Richards & Abra of Ottawa were present and submitted a sketch drawing of a proposed school for purposes of discussion.

The architects were given more definite ideas as to the Board's requirements and they are to prepare additional sketches showing several arrangements of the required classrooms and these drawings will be submitted to the Board at a meeting to be held in the Town Hall on Monday evening next, May 25th at 7.30.

The Architects, with a committee from the Board viewed the school site on Thursday morning, to assist them in preparing their plans.

The Board, having already been seriously handicapped in the preliminary work of rebuilding our collegiate, by the Department's delay, decided to call a meeting on Monday night, and according to the minutes from the Secretary, two motions were carried—one "that we build a new school on the Fair Grounds," the other, "that we build a Collegiate Institute," which, when summed up probably means that the Board decided to have a building erected, suitable to replace our Collegiate Institute, which was recently destroyed by fire of unknown origin, and that the building be erected on the Fair Grounds.

The meeting, which according to the secretary's minutes, was called to "consider" matters, developed into business of a much more definite nature, and the Board "decided" to take some very definite steps.

Example, is the best precedent, and it is possible that the Board may defeat the good which they seek to accomplish, in their efforts to proceed with building operations as rapidly as possible, if they lose sight of the importance of keeping the citizens united.

An organization, composed of a finance committee; a building committee, and a publicity committee would, in our opinion, be the best method of working in harmony with our citizens, and would therefore be the means of instilling in every ratepayer, a personal interest in the building. When we have created individual pride, and given every citizen an opportunity of outwardly expressing his pride and good will, thus we will have changed what is at present a burden to many, into a pleasant task and be assured of the future success of our Collegiate Institute.

The work of replacing our loss does not end at the erection of a building. There is the matter of equipment, and replacing, if possible, by contributions or otherwise, the many donations destroyed, such as memorial tablets, etc. This work could be assigned to one of the proposed committees, and is next in importance, to the building and site.

It is therefore to be hoped that our Board of Education will reflect a moment; appoint their committees, and take the citizens into their confidence before it is too late.

thor Loucks and Miss Loucks, of Batfield, Sask., and Miss Snyder of Penetanguishene, Ont., are her surviving relatives.

The Success of the Coach as McLAUGHLIN-BUICK Builds It

EVERYONE who has seen the Coach as McLaughlin-Buick builds it knows why this Coach has received such sweeping public approval.

The McLaughlin-Buick Coach is a real closed car—built to McLaughlin-Buick's high closed-car standards. Fisher body. Graceful lines. Two wide doors enable rear seat passengers to enter or leave either door without disturbing people in front seats. DUOCO finish. Different colors for each of two Coach models.

Every detail of McLaughlin-Buick power, comfort, dependability and economy is present in both Master Six and Special Six Coach models. Yet the prices are lower than you'd expect to pay for open cars of such quality.

SNOW CHECKS FIRES AT FORT WILLIAM

Lake Steamers Arrive at Soo Covered With Foot of Ice.

Sault Ste. Marie, Ont., May 17.—One of the worst storms for the month of May was experienced Saturday night by boats on Lake Superior. The high northeast winds, accompanied with rain and snow, drove traffic to hug the north shore route. Down-bound steamers reached the Soo today covered with a foot of ice and snow. Some of the old-time sailors had never experienced anything like it for this season of the year.

Fort William, May 17.—This district was visited by falls of snow last night and this morning, which put a damper on the forest fires and placed them under control. Three aeroplanes will be here on Monday from the East to form an aeroplane lookout base for forest fires, which will be established at Sioux Lookout.

Sarnia, May 17.—Sarnia shivered in almost a wintry temperature today, in marked contrast to the summer thunderstorm which passed over the district Saturday evening. To-day the wind blowing from the lakes was the coolest for some weeks. Farmers, however, were rejoicing at the helpful rain of Saturday, and are now looking for sunshine, the lack of which is proving a detriment to the field and garden crops.

PEMBROKE YOUTH SAVES YOUNG GIRL

Gallant Rescue from Under Wheels of Locomotive at Risk of His Life.

A despatch from Pembroke says:—The residents of Pembroke are acclaiming 19-year-old Howard Riley a hero as a result of a daring rescue which he performed when he snatched the unconscious form of Muriel Switzer, aged 23, from in front of a fast freight train here.

Miss Switzer had tripped across the Canadian Pacific Railway tracks at Moffatt's Crossing at the west end of the town, and had fallen unconscious. Riley, who was some distance behind her, saw the fast freight thundering down the track toward her prostrate body, and, running as fast as he could, was just in time to jump the track and at the same time drag the girl literally from under the wheels of the locomotive.

Had he been a second later both he and the girl would have met with a horrible death.

Man Swept to Death in Current at Peterboro Lock

Peterboro, May 17.—James E. Heron, 44 years of age, was drowned at 8 o'clock to-night when he slipped from a stone at Peterboro lock and was whirled downstream in the swift current from the sluice. He was a good swimmer, and several attempts were made to save him, but his overcoat and the cold water weakened his efforts and the current prevented help. He leaves his wife and seven children, the eldest of whom is 15.

Abolish War Duty Stamps on Cheques of \$5 or Less

A despatch from Montreal says:—The Canadian Manufacturers' Association received information from Ottawa that the new regulations introduced in the House of Commons providing for the abolition of war duty excise stamps on cheques of \$5 or less will become effective on July 1.

Teaching in the Navy.

For teaching purposes the British Navy has adopted the cinematograph, and a film showing the procedure for parading colors has been prepared.

BUSH FIRES RAGE IN THUNDER BAY DISTRICT 5000 SQUARE MILES

A despatch from Fort William, Ont., says:—According to reports filtering in to the head of the lakes, an area of about five thousand square miles in the sparsely settled region to the east and west is menaced by forest fires. In the burned-out territories there are the smouldering ruins of numerous homes that belonged to hardy settlers. In the Wolf Mountain and Silver Mountain districts to the west numerous homes in the clearings have been consumed. One homesteader, John Crisp, more than sixty years old, is believed to have perished in a fire that swept that district Wednesday and he has not been seen since. It is believed that he must have been sleeping when the fire came toward his clearing and that he was unable to outrun the flames. While it is possible that he may have escaped, it is not considered that the chance is very bright. With the exception of Mr. Crisp, there is no definite report as to losses of life, although many settlers in the Silver Mountain area are said to have had narrow escapes, and many others are prepared to leave their homes as soon as the danger draws near. In several sections valuable areas of pulpwood timber have been destroyed or are in danger.

Reports from Nipigon, one of the most beautiful spots in Northern Ontario, tell of a brave fight throughout Wednesday night to save the town.

Messages from the Youth of Canada to the King and Queen

On June 29th, in Trafalgar Square, London, King George and Queen Mary are to open "Canada Building." Keys of gold, silver and nickel from the mines of Northern Ontario will be used at the ceremony.

The Canadian High Commissioner will present the keys to Their Majesties. With the keys he will present messages from the youth of Canada, one for the King signed by a Canadian boy, and one for the Queen signed by a Canadian girl.

Selection of the boy and girl most worthy to sign these messages will be made by Sir William Mulock and Sir Arthur Currie. The young persons selected will be:—

"The boy and the girl attending any primary or secondary school, public, separate or private, whose natural endowments or attainments as pupils or in the arts or any other sphere of worthy endeavor, or who have performed such heroic action as, combined with qualities of character, will make that boy and girl fitting representatives of the youth of Canada to sign the messages to the King and Queen on the occasion of the opening by Their Majesties of Canada Building, in London, England, on June 29, 1925."

Right Rev. William D. Reeve first bishop of Mackenzie River and for many years bishop assistant of the Anglican Diocese of Toronto, who died May 12, at his home, in Toronto.

New German stamps are to bear the portraits of noted Germans.

THEIR MAJESTIES, THE KEYS AND THE CANADA BUILDING

His Majesty King George V. and Her Majesty Queen Mary, who, on June 29, will open "Canada Building," Canada's new headquarters in Trafalgar Square (upper right), the set of keys from Ontario mines with which the King will open the building. There are four sets of keys, one for the King, one for the Queen, one for Canada's prime minister, and one for Canada's high Commissioner in London. Each set contains a gold, silver and nickel key, made in Canada, with metals donated by Dome, Hollinger, McIntyre, Keeley, Nipissing, Mining Corporation and Mond. (Lower left) Trafalgar Square, at the heart of the Empire, with Nelson's monument in the centre, and with the new "Canada Building" at the left, facing Trafalgar Square and Cockspur Street. (Lower right) Rt. Hon. W. L. Mackenzie King, prime minister of Canada, to whom one of the sets of keys will be presented, and Hon. Peter Larkin, Canadian high Commissioner, who originated the idea of having the keys for the opening made of metals from the famous mines, and who will also be presented with a set of keys.

Amy Lowell Dies at Her Brookline Home

A despatch from Brookline, Mass., says:—Amy Lowell, long the out-

standing exponent of free verse in America, and noted for her essays and literary criticism, is dead at her home here, "Sevenels," at the age of 51.

CROSS-WORD PUZZLE

©THE INTERNATIONAL SYNDICATE.

SUGGESTIONS FOR SOLVING CROSS-WORD PUZZLES

Start out by filling in the words of which you feel reasonably sure. These will give you a clue to other words crossing them, and they in turn to still others. A letter belongs in each white space, words starting at the numbered squares and running either horizontally or vertically or both.

HORIZONTAL

- 1—Sweetheart
- 5—Fishing implement
- 8—A crack
- 13—Land surface
- 14—A Jewish festival
- 16—Always
- 17—Incomplete
- 18—Assemble
- 19—Otherwise
- 20—Afflicted with grave disease
- 22—Reaches a finish
- 23—A street car
- 25—Sour
- 28—To move back
- 30—Explosive machine
- 33—Account book
- 37—A variegated waxy quartz
- 38—Not fastened
- 39—Hereditary
- 42—Colored
- 43—To replace
- 46—To throw
- 47—Weapons
- 51—To scorch
- 53—Subdued
- 56—Assistant to military officer
- 58—Small dog
- 59—Wishes
- 60—Therefore
- 61—Firm
- 63—Tidy
- 64—To inundate
- 65—A speck
- 66—Disease of caisson workers

VERTICAL

- 1—Part of a coat
- 2—Verbal
- 3—Russian measure of distance
- 4—Consumer
- 5—Govern
- 6—Correlative of "either"
- 7—Cubes of chance
- 9—Bar of metal
- 10—Happening
- 11—To ward off
- 12—A lock of hair
- 14—Concealed in the hand
- 15—Subject to death
- 21—To peel
- 24—Amount overdue (pl.)
- 26—A studio
- 27—To commence
- 29—To besiege

Surnames and Their Origin

HUBBARD

Variations—Hubert, Fitzhubert.
Racial Origin—English.
Source—A given name.

Hubert is one of the old Anglo-Saxon given names which survived the influence of the Norman invasion, not in this case in spite of it, but probably in a measure because of it, for Hubert was a Norman given name as well as Saxon.

The Normans were a Teutonic race, though they had adopted a tongue as the result of their invasions of Northern France which was a form of Latin developed first under Celtic influence and then under that of their own original Teutonic speech. In consequence, though the language they spoke was practically the forerunner of modern French, their nomenclature remained more largely Teutonic.

The name means, literally, "bright-hued." For "hiewe" was the Anglo-Saxon forerunner of our modern word "hue," just as "beohrt" or "beort" was the ancestor of our modern "bright" and in Germany found its counterpart in "brecht."

It became a family name through its use to designate parentage, at first either with the ending "son" or the Norman prefix "Fitz," which, incidentally, was the form into which the old Latin word "filius" finally became shortened and twisted through the successive influences of Celtic and Teutonic tongues in Northern France.

Hubbard and Hubert, of course, are but variations of the same name.

BURTON

Racial Origin—English.
Source—A locality.

Finally names which have been derived from places are not heard to trace, once you have a clue to the country from which they came, and these clues are often contained in the name themselves, though it is not always safe to rely upon them.

Whenever you see a name ending in "ton," however, it's a fairly safe assumption that it's English, that the "ton" means "town" and that the family name was first the name of a place.

Burton is still the name of a place.

WE WANT CHURNING CREAM

in fact there are a number of communities in England with histories reaching back to Anglo-Saxon days, which are known by this name.

The use of place names as surnames came about in the first place to designate the individual by the locality he had come from. They were never applied to persons who still dwelt there for the reason that such use of the name would have constituted no differentiation among people all of whom lived there. The only exception to this is in the case of families which exercised overlordship over the place mentioned.

Two explanations are offered of how the place name originated. One ascribes the first syllable to the fact that the locality was thickly grown with burrs, the other to a now obsolete word denoting a hill. The chances are that the latter is the true explanation in the majority of cases.

Not Broken As Yet.

Mother—"That girl next door has broken the record playing the phonograph!"

Dad—"Not by a long shot—it's in damnably good condition, I'd say."

Words We Shouldn't Use.

Indian ink does not come from India and never did. It ought to be called Chinese ink. Rice-paper is not made from rice or any part of the rice plant. Train oil is not so called because it is used to lubricate trains. It is a whale oil, and was called "train" by Scandinavian fishers.

A buttery has nothing to do with butter, but is the place where the butler, or bottler, works. China is seldom made in that country, and has become a misnomer used in place of porcelain. Tartan is not a material, but a pattern.

The water-rat is not a rat at all but a vole; nor has the country-dance anything to do with the country. It ought to be countriedance—or opposite-dance. Cat-calls has nothing to do with cats; neither has catgut. The first is the call for the cat (catastrophe or conclusion) of a Greek drama, and the second is a corruption of gut-cord.

Gooseberry has no connection with the bird, but ought to be gooseberry, or rough-berry; neither has "gooseberry fool" anything to do with "fool." The "French" of the dish is "foule de groseilles." Pantry is not associated with pans, but with bread (pain); while outlet has nothing to do with the chopping or cutting of meat, but means a little rib.

Sentence Sermons.

Most People Don't Want To find work as much as they want to get a job.

To think they have been fooled in making their investments.

To believe the truth if it is uncomfortable.

To hear the man who insists upon preaching about duty.

To know unpleasant facts if pleasant falsehoods are believable.

To be held responsible for good government after election day.

Frescoes recently uncovered at Eton College chapel were painted by an Englishman, William Baker, about 1470.

NURSES

The Toronto Hospital for Incurables, in affiliation with Bellevue and Allied Hospitals, New York City offers a three years' Course of Training to young women, having the required education, and desirous of becoming nurses. This Hospital has adopted the eight-hour system. The pupils receive uniforms of the School, a monthly allowance and travelling expenses to and from New York. For further information apply to the Superintendent.

A Negligible Detail.

Good reporters, they say in newspaper offices, are born, not made. Certainly some men who can write cleverly never acquire the "nose for news" that a reporter needs if he is to be successful. Mr. Lincoln Springfield, on the staff of the Pall Mall Gazette and the London Opinion, tells in his book of reminiscences of one such man, whom he calls Jewell.

Down at Blackwall at the Thames Iron-works, he writes, H. M. S. Albion was to be launched one June afternoon by the Duchess of Cork (the present queen); and this occurred to me to be just the kind of story that Jewell would do prettily and gracefully.

Sure enough, Jewell wrote a brilliant description of the scene—the nearest thing to a Turner sunset that you could get in manuscript. I was on the point of sending it up to the compositor and was glowing with pleasure over my judgment in having selected Jewell for the job when a messenger placed on my desk a report from the tape machine, announcing that thirty people had been drowned at the launching. As the ship took the water the displacement had submerged a staging where masses of spectators were assembled. Several hundred of them were thrown into the water, and more than thirty could not be rescued. In Jewell's masterpiece of scenic effect there had not been a hint of any disaster, of anything at all untoward.

I demanded an explanation from Jewell. Hadn't he seen anything of the catastrophe?

"Well," replied the languid Jewell, "I did see some people bobbing about in the water as I came away, but I didn't stay to see why they were there."

MAKE CARE OF BABIES EASIER

Stomach disturbances and constipation are responsible for much of the peevishness of babies and young children. When the baby is cross or irritable the mother should not resort to so-called soothing mixtures to correct the trouble for in the majority of cases these mixtures simply drug the child into an unnatural sleep. What is needed is a gentle laxative that will sweeten the stomach and regulate the bowels. Such a remedy is found in Baby's Own Tablets. They are easy to take and are guaranteed to be entirely free from opiates and narcotics. Concerning them, Mrs. Jos. Tousignant, Ste. Sophie, Que., writes: "I would like all mothers to know that I feel there is no other medicine to equal Baby's Own Tablets. I always keep a box in the house and their prompt use never fails to restore my little ones to health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Every true Mother is God's vicar. Her children see Him in her, learn of Him from her, and believe as she believes about life and its values.

The first time he went to church they threw water on him. The second time they threw rice on him. The last time they threw dirt on him.

Sentence Sermons.

It Always Costs More—To put off your creditors than to put up the cash.

To keep up with the crowd than to swallow your pride.

To remain ignorant than to become a trained workman.

To hold a prejudice than to surrender an opinion.

To make an enemy than to keep a friend.

To repair a reputation than to keep to the right.

To avoid the truth than to face the facts.

NEW STRENGTH FOR WEAK GIRLS

Can be Had Through the Rich, Red Blood Made by Dr. Williams' Pink Pills.

There comes a time in the life of almost every girl when weakness attacks her. The strain upon her blood supply is too great, and there comes headaches and backaches, loss of appetite, attacks of dizziness, heart palpitation, a constant weariness and a tendency to a decline. All these symptoms may not be present in any particular case, but the presence of any one of them shows the necessity for prompt treatment. And the very best treatment is through the blood-making tonic qualities of Dr. Williams' Pink Pills. They are the one thing needed to maintain the health of growing girls and women of mature years.

Here is a bit of strong proof:—Miss Matilda Brean, King Highway, Newcastle, N.B., says:—"I was in an extremely run-down and nervous condition. I was losing flesh, had a poor appetite, always pale, and suffered frequently from headaches. In fact my condition can best be described as miserable. I had tried several treatments but they did not help me in the least. Then, reading one day about Dr. Williams' Pink Pills, I decided to try them. After using three boxes I was much improved, but continued until I had taken six boxes, with the result that I am now well and strong, with good color and a hearty appetite. In view of what Dr. Williams' Pink Pills have done for me I cannot recommend them too highly."

You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Why Pure Bred Sires.

Canadian live stock men are intensely interested in the extension of the market for beef and beef products. In order to compete successfully against other countries we must improve the quality of our live stock.

The Argentine Republic is without a doubt the hardest competitor for the English market. To-day they are able to place a large quantity of beef on the English market at a very much lower price than Canadians. This product is very much superior in quality. Therefore, the question confronting us is, what can we do to beat this competition?

As we look over the reports of auction sales held in Great Britain during the last ten years, we find that the big ranch owners of the Argentine have paid enormous prices for bulls to head their pure bred herds.

Men who know conditions in the Argentine say that these high priced bulls are first used on the smaller herds and later turned in on the range of cattle. It is little wonder that the quality of beef animals in that country is exceptionally high. Thus, we can readily see that we must follow the example of our strongest competitors and use only high class pure bred bulls on all our grade herds.

Figures from our Canadian stock yards show that only about 2% of the stock marketed during 1919 was fit for export trade.

To those who sit down and figure out the loss sustained, the figures are startling.

The average farmer loses about \$30 to \$40 per head on steers bred from grade sires.

Facts prove that on every instance, the steers from pure bred sires, not only sell for higher prices, but make more rapid and more economical gains than those sired by grade bulls.

While we are well aware that high prices are obtainable for almost any kind of beef animal, yet it is very clear, to those who follow market reports closely, that the low grade stock are the first to suffer when the markets take a downward drop.

It is, therefore, quite clear that the use of grade sires is a losing proposition viewed from any angle.

It is high time that we discard inferior bulls whether they be grade or scrub purebreds.

This is important because of the fact that the bull used on a herd influences all the years of calf crops.

Discard the inferior type of bull and increase your year's income.

Why It's Dogwood.

Dogwood owes its name to its similarity of sound and writing to dogwood, a shortened form of daggerwood, so called because it was formerly used to make daggers or sticks to hold together meat roasted over an open fire.

The man who can say "Good morning" with a smile has the right start for a pleasant day.

Wonderland.

What high adventure holds a deeper lure

Than coming to possess a garden, made

By hands long since beneath the greensward laid?

An old, wild garden, where quaint blooms endure,

And small, shy, sweet things, wistful and demure,

Beneath the clutter of the borders hide,

And locust-boughs their fragrances divide

With hedgerows, holding privacy secure.

Eager and thrilled and reverent, one bends

To watch some strange bud's slow, unfolding hue,

And each bright, sunshine-burnished petal lends

Beauty and charm and wonderment anew

To revelations, which become a part

Of secret joys, that nestle in one's heart!

—Charlotte Becker.

Minard's Liniment for Colds.

Eyes That Baffle.

The new German banknotes now in circulation have been designed expressly to discourage the forger, whose uncanny skill in his illegal "art" has kept the Berlin police on tenderhooks, during recent years.

Four pictures by Holbein are being used to adorn the 10, 20, 50 and 100-mark notes. The original of one of them, it may be mentioned, is in Windsor Castle. All four pictures are remarkable for the eyes, and it is stated that the expression of the faces will be changed if any one tries to reproduce them from a reproduction. In such a case the eyes will assume a distinct squint.

As a further precaution the new banknotes will be made of a kind of paper never before used by the Reichsbank. This paper is manufactured from the ramie, the Asiatic fibre used in the making of incandescent gas mantles. The new notes will stand crumpling, washing, drying and ironing in a manner that would have been impossible with any previous issue.

Poor Health.

A motorist stopping at a farmhouse for a glass of water was surprised when a man apparently well past his ninetieth milestone hastened to the well to pump him a cold fresh drink.

"Pretty good health, Grandpa?" suggested the visitor, to which the old man replied: "Well, I've lived here 90-odd years and never had a doctor but twice, but my son in the city he keeps telling me farmin' don't agree with me and I'll die before my time unless I pack up and come to live with him."

ECZEMA IN RASH AND BLISTERS

Had to Keep Hands Bandaged. Cuticura Healed.

"Eczema broke out in a rash and blisters between my fingers and on the backs of my hands. The skin was red and swollen and used to peel off. It itched and burned badly and was awfully sore especially when I put my hands in water. I had to keep my hands bandaged. I sent for a free sample of Cuticura Soap and Ointment and it helped me. I purchased more and after using one cake of Cuticura Soap and one box of Cuticura Ointment I was completely healed." (Signed) Miss Nettie Keese, R. R. 1, Listowel, Ontario.

Cuticura Soap, Ointment and Talcum are all you need for everyday toilet and nursery purposes. Sample Each Free by Mail. Address: Canadian Depot: "Eaton's," 514, Montreal. Price: Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

HER NERVES BETTER NOW

Received Much Benefit by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ontario.—"I started to get weak after my second child was born, and kept on getting worse until I could not do my own housework and was so bad with my nerves that I was afraid to stay alone at any time. I had a girl working for me a whole year before I was able to do my washing again. Through a friend I learned of Lydia E. Pinkham's Vegetable Compound and took four bottles of it. I gave birth to a baby boy the 4th day of September, 1922. I am still doing my own work and washing. Of course, I don't feel well every day because I don't get my rest as the baby is so cross. But when I get my rest I feel fine. I am still taking the Vegetable Compound and am going to keep on with it until cured. My nerves are a lot better since taking it. I can stay alone day or night and not be the least frightened. You can use this letter as a testimonial and I will answer letters from women asking about the Vegetable Compound."

—Mrs. CHARLES CARSON, 27 Forsythe Street, Chatham, Ontario.
Mrs. Carson is willing to write to any girl or woman suffering from female troubles.

Lock Street

Filters Your Gasoline

Gives more Pep to Your Motor

Made and guaranteed by the manufacturers of the famous Alemite Lubricating System.

If you could see the gasoline your motor contends with, you would not be surprised that it sometimes rebels. The trouble is that practically all gasoline contains some dirt and water. Bits of rubber and fibre rot from the filling hose, water condenses from the air inside the fuel tank, metal flakes peel off and pass through the gasoline pipe and into the carburetor. Naturally the delicate needle valve of your carburetor is clogged and thrown out of adjustment. Then your motor sputters and misses and perhaps stalls completely.

ALEMITE GAS-CO-LATOR

attached to your vacuum tank provides the very fine filtration necessary for gasoline before it passes into the carburetor.

Perfectly clean gasoline means new pep and power greater flexibility and fewer repair bills. It will give you a new conception of motoring.

"Nerves in Bad State Could Not Sleep"

Mrs. H. N. Tardell, Harrowsmith, Ont., writes:

"My nerves were in a very bad state, and for nearly six months I did not know what it was to have a good night's rest. I could not eat, and never felt well. I heard about Dr. Chase's Nerve Food, and thought I would try it. After taking it for a few days I began to feel better, and soon was able to sleep well at night. My appetite also returned, and I felt stronger and better, and after taking three boxes of Dr. Chase's Nerve Food I was quite well. I have also given the Nerve Food to my little girl, with good results."

PROTECTION against fire. Protection against cold drafts, vermin, repairs, deterioration — these are only a few advantages Gyproc gives your farm.

Gyproc is fireproof wall-board made of solid rock. It comes in convenient ceiling-high sections that can be sawed and nailed like lumber. Light and easy to handle.

Gyproc is durable and permanent. No repairs are ever necessary. Yet the cost of construction is less than lumber because Gyproc can be applied in half the time.

Ask your carpenter or builders' supply agent about Gyproc.

McCORMICK-DEERING

(Primrose)

Ball-Bearing Cream Separators win satisfied friends everywhere

Several years ago the Primrose reached the point where it was as nearly perfect as any plain-bearing machine could be. But the engineers were not content to stop there. They realized that close skimming is doubly desirable when coupled with easy turning. The result of their determination to combine the two is the McCormick-Deering Primrose Ball-Bearing Cream Separator—a mechanical masterpiece.

These close skimming, easy-turning machines have been in use throughout East Canada for several years. They have been used and compared with other machines by thousands of farmers. They are being adopted in ever-increasing numbers on the strength of their superior work and construction.

Earn more dairy dollars with less work

The McCormick-Deering dealer in your locality can supply you with one of these machines in exactly the right size for your herd. Talk to him about a McCormick-Deering Primrose and make plans to let it start earning for you at once. Complete information mailed on request.

Appearance of Tea No Guide

The only way to test tea is to taste it. Many people have the idea that a finely rolled and tippy tea is superior in flavour to a large rough leaf. In reality this is not of necessity the case. The altitude at which the tea plant grows determines the amount of essential oil and alkaloid theine in the leaf. The essential oil gives tea its flavour; the theine contributes the stimulating value. The only way to insure always receiving a uniform quality is to insist upon a skilfully blended and scientifically sealed tea like "SALADA" whose reliability, goodness and delicious flavour have become a household word.

"SALADA"

Kit Kennedy

BY S. R. CROCKETT.

CHAPTER XXII.—(Cont'd.)

Kit could swim a little. Georgie Elphinstone had taught him the breast stroke, but it was pleasanter and more interesting to wrestle near the shore with Royal, because at swimming he had no chance, whereas near the beach he was on more equal terms. The sun poured down upon his white glistening body. He shouted aloud in the young gladness of his heart. Duty, schoolmasters, lesson books hid under broad stones, hours of exiles and entrances, leathern taws and the moral law, were all alike forgotten.

"Ouch—let's have another!" barked Royal, lumbering outwards like a great pot-walloping elephant through the shallows to become instantly perfectly graceful in the amber depths, "come and have another!" And Kit went. The water was still chillish, for it was early in the year. But the violence of the exercise and the racing of the young blood through his veins kept Kit warm for the better part of an hour.

Then he began to think of putting on his clothes. He waded ashore, feeling as the water fell away from him and the fanning wind blew, as if he had left part of himself behind in the water. He wished he had kept his sugar piece till now.

"Ouff—uff!" barked Royal behind him, "call yourself a swimmer and going out already—look at me!"

And the doubtful Newfoundland pushed right across the loch for the woods on the further side.

"Oh, no doubt," said Kit in reply, turning to watch him, "it's very easy for you, staying in the water with all that hair on. Try it in your bare skin and see how you like it."

Then he held up his foot to try how it felt to have the water run between his toes. This proved interesting with the right foot, so Kit repeated the operation on the left. A little shiver of cold began to strike downward along his spine. He would put on his clothes. Where were they? Oh, yes, he remembered, behind that broom bush on the bank. He sprang up the short turf and rounded the waving green and gold of the obstacle.

There sat his mother beside them.

CHAPTER XXIII.

KIT'S EYES ARE OPENED.

Kit stopped, abashed and ashamed. There is, doubtless, a disembodied moral law, a spiritual essence of right somewhere in the air about us but we seldom let it alight on us till it comes in human guise. We rather shoo it off like a troublesome fly.

Kit Kennedy remembered for the first time that he ought to have gone to school.

ISSUE No. 20—25.

somehow seemed suddenly to have grown misty and far away.

"He was your father," said the woman Lilius, very softly.

There was a long silence between them twain, so long that Royal dropped his head and pretended to go to sleep.

"Is he dead, mither?" said Kit at last, the realities of life humming in his ears and making his heart like chill water within him.

"No, he is not dead," said Lilius Mac Walter, her face looking ashen grey and drawn in the insolent optimism of the morning sunshine.

Kit thought a while, and then said, with an indignant ring in his voice, "How you must hate him, mither!"

There was a little rustling beyond the dyke in the broom into which Kit had thrown the stick. A thrush which had flown in as if to visit its nest flew out again, "cheking" crossly.

His mother did not answer, so Kit repeated his words, "How you must hate that man, mither!"

With eyes pulsing and misty, like the sky over the Northern sea where the ice floats, Lilius replied. She did not sigh—sighing is for hopeful people who are only temporarily unhappy. But this woman was hopeless, expectationless, convicted on a life sentence from which she did not mean to appeal.

"Hate him—no. I do not hate that man, Kit," she said, slowly, but very distinctly. "Rather, God forgive him and me—I love him still. For a woman who once loves truly, Kit, as I loved your father, there is in this life no escape, no hope. I do not know about the next. At any rate she loves to the end. You do not understand. Nor can any man fully understand. Like a wasp that is crushed a man turns to sting that which hurts him. But when a woman is bruised, wounded to the death, ground to powder, if the heel be the heel of the man she loves, it cannot grind the great love out of her heart. Such love as this, Kit, does not come at will. It does not go at bidding. It is there, Kit. You do not understand. You never will, wholly, for you are a man. But that is the truth. God has made woman so that because I loved that man once I must love him always!"

The relieving tears welled up silently in the grey-blue eyes. There they stood for a moment like water in an over-full glass held by a sort of surface tension. Then they ran slowly over and dripped unheeded one by one upon her lap. One fell on Kit's hand. It was warm.

"Oh, mither, dinna!" he cried, agonized, snatching his hand away with the swift intolerance of youth for mental suffering—an unknown and foolish thing to healthy childhood.

"Do you love Walter Mac Walter?" said Kit presently, with the remorseless curiosity of youth, whose inquiries sometimes sting like lashes, sometimes cut like knives.

Lilius started at his words. She formed her lips for some vehement answer. But it was unspoken. The fire that leaped into her eyes died out as swiftly. For a space she was silent, and when she spoke it was in a low, even, colorless voice.

"No!" she said, "I do not love Walter Mac Walter."

"Did you never love him?" pursued pitiless youth.

"I never loved him!"

"Then why did you marry him?"

In all her life's trials Lilius never had to endure (save once) any moment so terrible as this.

She tried to speak, but a pulsing check rose rebelliously in her throat and she stammered like a speaker who has suddenly forgotten his next sentence.

"Kit—Kit! Oh, Kit," she gasped, "you are cruel. My lad—my lad—but you do not mean to be. I will tell you—yes, you shall know. I married Walter Mac Walter because I thought my heart was dead—because of the man, your father. I thought he did not love me, that he had deceived me. My mother said, 'Marry the man for your father's sake. The debt crushes him to the ground. He is a good man. Love will come afterwards.' I did wrong, Kit, I sinned against love. But do not hate me, Kit. I will die if you hate me. I have gotten so little out of life—I who expected so much. I cannot bear that you should hate me, Kit. At least, I have not deserved that."

The boy felt the tears well up in his own eyes. He did not understand. He could not. Yet Lilius was wise, for the effort to understand made a deeper impression on Kit's mind than if he had understood all. The mys-

Mustard

aids Digestion

Mustard stimulates the flow of saliva, and of the gastric juices in the stomach. It neutralizes the richness of fat foods, makes them easier to digest and assists you in assimilating your food.

Mustard makes ordinary dishes more tasty. Always have it on the table—freshly mixed with cold water for every meal.

ECLIPSE FASHIONS

Exclusive Patterns
by Hazel Rogers

THE BABY'S FIRST SHORT CLOTHES.

When baby is ready for short clothes mother will be happy to find this combination pattern, No. 1174, which contains a short coat, with or without cape, short jacket and bonnet. Just everything for "bye-bye" land. The simple coat is made with a yoke that always adds a little graceful touch to the straight line. The round collar gives a tailored finish and is cut for comfort. The cape adds warmth for the first days. It may be sewed in one seam with the collar to the coat or made and used separately. For the cool days and warm evenings, when just some light wrap is wanted the simple little jacket with set-in sleeves will quite answer every need. The bonnet with a rever that is becoming to every baby face fits nicely by the use of small plaits at the neckline. Cut in one size and requires 2 1/4 yards for the entire outfit. Price 20c.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Orders filled by return mail.

tery of suffering sobered him. He grew older and wiser each moment. By instinct this woman had reached the truth that to make children trust you, you must appeal to their understandings as well as to their hearts.

Kit Kennedy reached his hand across to his mother and laid it on hers. She took her left hand and gently patted it. Then she went on again.

"My boy," she said, "I did wrong. I sinned against love. But I have been punished, and God, I think, looks upon it so. 'Whom He loveth He chasteneth.' I heard Mr. Osborne say it. But not as if he knew it. Not as I know it. If I have sinned greatly I have also been greatly punished, and God does not exact the penalty in both worlds. Kit, be a good man. Be true. Speak the truth and take the consequences. If you do wrong, as you will, stand up to the punishment. Kit, do not run from trouble, as—as he did. If he had remained God knows how proudly, how gladly I would have stood by his side—aye, through disgrace, poverty, and death. But he was afraid and went away. Oh, Kit, do not flinch, stand up to the storm, and be sure that the woman who loves you will stand beside you. I tell you her heart will be proud and rejoicing because she knows it is done for the man she loves!"

A rabbit or some wild thing stirred in the broom bush. Kit turned his head quickly, but saw nothing. Having spoken out, Lilius Mac Walter's heart was happier than it had been for years. The burden was eased. An unseen hand seemed to lift it from her shoulders.

"You do not hate me for this, Kit?" she said with a yearning pitifulness in her eyes.

The boy sobbed one great sob, felt his face go cold, and then fell on his mother's neck.

"Mither!" was all he said.

And from the heart of Lilius, the sinned-against, the year-long pain ebbed away.

It was some time before these two friends found articulate words again. When they did it was the woman who began to speak in a hushed tone. Kit had forgotten his eleven years, his adult superiority, his dignity of man. He lay with his head on his mother's breast. She kissed his hair and brow as often as she would. And that was not seldom. God did not grudge her this season and slowed the universe to make it longer. He had done as much for Joshua upon a less important occasion. But overhead a dark and threatening cloud drew down from the Giron Hills, thunder brooding within its blue-black bosom.

"Kit," the woman said, gently, "you are a clever boy. I want you to be something in the world. I am sure

Minard's Liniment Fine for the Hair.

"For all washing and cleaning you can't beat this soap—"

says Mrs. Experience, who chooses soap for its economy and labour-saving value.

"Sunlight puts the sunshine of cleanliness into the home! For washing clothes, dishes, wood-work, linoleums, in fact, for anything that can be cleaned with soap and water—I call on Sunlight. And Sunlight does its work so well and leaves everything sweet and clean.

"Sunlight really is economical, too! You see, every bit of it is pure, cleansing soap, containing no filling or hardening materials, which are only waste as far as we women are concerned.

"You get greater cleaning value out of a pure laundry soap—and so I say, 'Always keep a good supply of Sunlight on hand'. It really improves with age. And because of its purity, Sunlight is kind to your hands and keeps them smooth and comfortable." Sunlight is made by Lever Brothers Limited, Toronto.

9-60

Sunlight Soap

you can be if you like. For your mother's sake, try. You must do it for yourself. I cannot help you. Your grandfather and grandmother are too poor to aid you. You must help yourself. I do not want you to be only a plowman. There is more in you than that. Only remember that mere money-making is nothing, Kit; I want you to be a scholar, like your father. But with the strength he had not. Perhaps one day, who knows, God may repent Him of the evil. No, I must not think of it. It is impossible!" She paused, and was silent a long while.

Kit did not interrupt or ask any questions this time. He was pilloved contentedly under his mother's chin. He liked it—when he was sure that no one could see him. Also he was forming great resolves within him. For a boy of eleven can make resolves—and sometimes keep them better than a man of forty.

"Mother, I am going to be a great man," said the reformed truant. And even as he spoke there came a vivid flash, and the thunder broke above in sonorous mirth at Kit's daring!

"All right, we'll see!" said Kit Kennedy, leaping up and shaking his fist at the elements.

(To be continued.)

The Elephant's Years.

It is said that an elephant does not reach proper maturity until it is forty years old, and that it may live for a century.

For Sore Feet—Minard's Liniment.

Hollerday.

"Come, come," said a distracted father, who had endured the children's noise till patience ceased to be a virtue; "there's no reason why you should scream and holler so."

"Why, father," said one of the little fellows, "don't you know this is a holler-day?"

BEAUTIFY IT WITH "DIAMOND DYES"

Perfect home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Destroying Weeds by Means of Chemicals

While the hoe and the cultivator are likely to remain as the two most efficient weapons to use in the combat with weeds there are certain cases where the use of some chemical may be extremely desirable. A good example of the latter is the case of a grain crop infested with an annual such as wild mustard where it is possible by spraying with iron sulphate or copper sulphate to injure the weed to such an extent that it is unable to ripen its seeds.

There are also numerous plots of waste ground in towns, miles of roadsides all over the country, railroad tracks, and large areas of stony or rocky ground that cannot be cultivated, where the employment of chemical means for keeping down weeds might profitably be considered.

The spray should be applied in fine calm weather when there is a probability that no rain will fall during the next 24 hours. The amount of spraying mixture will vary somewhat with the kind of spraying machine used, but as a general rule at least 60 gallons are necessary to cover an acre. The spray should be applied while the weeds are young.

The chemical substances that are most employed for killing weeds are sulphuric acid, iron sulphate, copper sulphate, common salt, caustic soda, sodium arsenite, carbolic acid, orchard heating oil and fuel oil. After the use of some of these the soil remains sterile until the chemical has been washed out by the rain. In calculating the strength to be used it has to be remembered that a gallon of water weighs 10 pounds.

Fighting Weeds.

We used to think the main object of cultivation had to do with making a dust mulch. We used to think summer fallow out in the dry country was a matter of making a dust mulch in order to save moisture.

The new orthodoxy, arrived at by trials and measurements rather than by the old plan of merely thinking out a thing, puts the dust mulch hypothesis pretty much to one side. The new orthodoxy lays the blame for the necessity of this summer work on weeds.

Careful trials have shown that where land is already clean of weeds and grass, cultivating between the rows of crops has precious little effect one way or another when the result is measured by yield. On some steep or hard-baked lands it does have a bearing on the moisture problem, but it has been found that the effect of cultivation on such soils is to enable the land to catch and soak in the water rather than to hold it.

And out in the dry country careful studies showed that the good effect of summer cultivation lay entirely in the elimination of weeds; showed that a dry surface acted as a moisture-retaining blanket whether stirred or not.

This new point of view has one mighty practical bearing on farm work. Any everyday farmer knows that cultivators must be kept going if a good crop is to be raised. At first blush he is not concerned as to whether the theory of cultivation ties on to weed control or to moisture saving. On second thought he is finding that it does make a deal of difference.

The Best Sink Value Ever Offered

Entirely new type of Sink at a remarkably low price. The base is rust-resisting Armco iron, coated with purest white enamel, same as refrigerators, electric ranges, etc. Sold complete with all fittings and instructions.

SMP Enameled Sinks

Price Complete \$12.00

SMP Enameled Drain Board—Price \$6.00

Wonderful value. White enameled Armco iron base. Very strong; handsome; handy. These new SMP Sinks and Drain Boards sold by all plumbers and hardware stores, or write direct to

THE SHEET METAL PRODUCTS CO. LIMITED
MONTREAL TORONTO WINNIPEG 183A
EDMONTON VANCOUVER CALGARY

Sulphuric acid or oil of vitriol has a corrosive effect on the spraying apparatus and can be used only in a weak solution varying from 3 to 10 per cent. It has no injurious effect on wheat, oats, or barley crops and has a fertilizing effect on the soil.

Iron sulphate or copperas is used in a solution of 15 to 20 per cent. but cannot be applied with safety to a crop of beans or flax.

Copper sulphate or bluestone can be used instead of iron sulphate but only in a solution of 1½ to 2½ per cent.

Common salt or sodium chloride is used in a strength of 20 to 25 per cent. It checks the growth of other plants besides weeds until it has been washed out by rain.

Caustic soda or sodium hydrate is used in a 5 per cent. solution. It kills all kinds of vegetation.

Sodium arsenite is used at the rate of 2 pounds to 60 gallons of water. It is very poisonous and the powder is dangerous to health if inhaled. It kills all vegetation.

Carbolic acid is used in a solution of 12½ per cent. or stronger.

Orchard heating oil is applied at full strength in a fine mist. It destroys all vegetation but is not poisonous and does not injure the soil.

Fuel oil can be used on waste ground or garden paths. After its use the soil remains sterile for a considerable period.

Of the various patent weed killers "Atlas A" was tested during the summer of 1920 on various weeds and gave good results.

The old type of cultivator share is not a good weed killer. It was designed back in the days when we were all thinking in dust mulch terms. Today the summer fallow work is being largely done with the duck-foot type of cultivator. Crop cultivators are being equipped with this same type of share—a type which cuts off rather than wiggles up any weedy growth encountered.

And incidentally, if anybody has a weed-free field—a field which naturally stays weed free throughout the season—frequent cultivation does more harm than good. Any doubting Thomas, if he be so fortunate as to have such a clean field, can prove this to his own satisfaction by leaving a few rows without more cultivation than necessary to keep weeds and grass away.—B. H.

Oiling the Harness.

I spent 22 years of my life making and oiling harness, and would not want any one to oil leather for me while it is wet. Water and oil are enemies. Oil does not go where water is if it can avoid it. Oil put on a wet or half-wet strap will largely stay on the outside, and the water will gradually come out through it, giving the leather a nasty and slimy feeling for many weeks thereafter. Let the straps get dry, not bone-hard. Roll the straps and dip them in the oil, laying them on a metal surface to drain back into the oiling pan. When all the oil has drained off that will hang them in a warm place well away from the fire till dry, then wipe the straps and buckles clean with a dry cloth. Take a good grade of harness soap and a moist sponge, wet the soap and get a good lot of it on the sponge (not lather) and draw each strap through the soap about three times. Assemble the harness and let it hang in a warm room for 24 hours, and you have a No. 1 job that will stay pliable.—F. T.

Darkened nests will do much toward preventing the egg-eating habit.

Clean the windows in the hen house with newspaper—nothing better.

Feeding Top Lambs.

Most farmers have the general opinion that sheep will find their own living and that it is not necessary to give them much feed or attention. It is a well-known fact that sheep will graze on weeds around the fence rows and over rough land and find a great part of their living, but farmers in the spring-lamb sections make a mistake when they fail to give breeding ewes enough feed to bring them through the winter in good condition.

Practical farmers seem to overlook the fact that the ewe must maintain her own body, produce a fleece of wool and develop a fetus during the winter months. Unless she is properly fed she cannot do this work. Improperly fed ewes produce small, weak lambs. These lambs have been improperly nourished through the different stages of development and after they are born are stunted for lack of milk.

If lambs are to be made "tops" they must be well nourished from the time they are born until they are sent to market. They should be made to grow rapidly and take on flesh regularly. Lambs are best fed through their mothers for the first two months of their life. For this reason the ewes should be fed a milk-producing ration.

A ration consisting of oats, bran and alfalfa, clover or soy beans, is best from lambing time until good grazing is available. Ewes do not require a large quantity of feed; in fact, they fare better when they are not overfed. One-half to one pound per head a day of the ration mentioned is sufficient for average ewes. They should have what they will clean up.

After the lambs learn to eat they should be fed grain from a creep. This method of feeding them prevents the ewes from having too much grain and gives the lambs the advantage of extra grain along with their mothers' milk. A very small quantity of grain fed in this manner will give splendid results in growing and finishing lambs for the early market. The flock should be kept on the small grains, such as rye, barley or wheat, as much as possible during the winter and early spring months; in fact, every farmer who raises sheep should make it a point to have a small grain pasture for his sheep.

The ewes and lambs should be turned to fresh pastures as early in spring as it will supply good grazing. Clover is one of the best pastures for sheep. The flock will do well also on early blue-grass pasture.

One of the best annual pastures that can be seeded is a combination of oats and rape. When sown together they afford a maximum of good grazing.

Renting Out a Cow.

You speak of renting out a cow. I have been using this plan for ten years: I furnish a cow to some one near town who has children going to school, or a young man working in town. The party furnishes the pasture and the feed, and brings me two quarts of milk a day. I keep two buckets, one of which the party uses. I place the other on the porch and then when he brings the milk he sets his down and takes the empty one.

I usually have a month's vacation—this would mean that I receive two quarts of milk 335 days, and I also get the calf. I change cows when I feel the other is getting old and I usually get as much for her as I had paid, so there is really no depreciation. My figures for one cow last year showed a net profit of \$35.70.—V. B.

I have found the best way to repair traces which wear through, or break at the point where the backband is attached, is to insert an oval link about three or four inches long in the trace. I fasten the oval link to the trace with hame clips, slipping the hame clips in the oval link and riveting them to the trace. The backband is then fastened to the oval link, and the job is complete and stronger than when new.—O. S.

Utility is the science, and beauty the art of poultry keeping.

A TRICK FOR THE YOUNG MAGICIAN

BY S. R. WHITE.

The "Gloves and Sausage" is not only a startling trick but it causes great amusement as well. The performer enters wearing gloves. He removes these and rolls them up into a ball. He throws them into the air, but instead of the gloves, a string of real sausage leaves his hand, and the gloves vanish.

The method of doing this trick is very simple. The string of sausage is placed in the performer's right sleeve before his appearance. The gloves should be of white silk, or of some other soft material so that they may be rolled into a small ball.

To the glove which is worn on the left hand should be attached one end of a piece of rubber band, or elastic, the other end of which is securely fastened to the belt strap or suspender button on the left side, under the coat. Standing with his left side to the audience, the elastic is concealed by the magician's forearm and coat. His right arm should be held in a horizontal position in order that the sausage secreted there will not fall out before it is time.

The gloves are removed and the right one is rolled into the left one.

FERTILIZING THE GARDEN

By M. B. Davis, B.S.A., Assistant Dominion Horticulturist.

Most amateur gardeners depend largely upon the use of manure as the main source of fertilizer material and this is good practice, but often a little commercial fertilizer can be used as a supplement to very great advantage.

Manure contains large quantities of nitrogen, some phosphorus and potash, which are the three constituents generally lacking in most garden soils. In addition the manure contains a large amount of organic or vegetable material which on decay, supplies the humus and organic acids necessary to maintain a good physical condition and to assist in bringing into solution forms of plant food otherwise unavailable for plant growth; so that either manure or some sort of green manure crop is essential in any garden; even though large quantities of nitrogen, phosphorus and potash are supplied as fertilizers.

Nitrogen is the most unstable of our elements and the most variable. In the early spring, even on well manured land, the nitrogen supply is low and it does not increase until the weather begins to warm up and the soil gets pretty well heated and worked. Decomposition of the vegetable material must be progressing before there is much nitrogen available for the plant and, as the nitrogen in manure is locked up mostly as vegetable matter, we say it is slowly available. It is liberated throughout the season and the manure we apply this spring will act as a sort of reservoir for our nitrogen supply all summer.

But if we want early growth on our lettuce, for instance, we can afford to supplement the manure by a light application of nitrate of soda, which is already available for the plant, and the response will be very rapid. Sometimes we want to bring our celery along a little quicker, an application of nitrate for this purpose is excellent. In fact, wherever we are growing plants for their foliage and not for the root or for their fruit, applications of quickly available nitrogen are excellent. On the other hand, where we want root, as in the carrot, beet or onion, we only resort to nitrate when the manure supply is deficient. For these we supplement with phosphorus, and if we want quick response we use acid phosphate instead of the bone meal, which is much more slowly available.

In the growing of flowers it is necessary only to bear in mind that where we want increased growth, such as in a hedge or a specimen shrub for instance, we supplement our manure with nitrate of soda; where we want perfection of bloom or fruit we resort to the addition of phosphorus in the form of acid phosphate and in extreme cases also to potash, as muriate of potash.

For most crops and most soils the above mentioned elements may be supplied in the following forms and at the following rates: Nitrogen, as nitrate of soda, at the rate of 7½ lbs. to 100 square feet. Phosphorus, as acid phosphate, at the rate of 10 lbs. to 100 square feet. Potash as muriate of potash, at the rate of 2½ lbs. to 100 square feet.

Poor Thing!
Bobby Bug—"Boo-hoo! I want building blocks with letters on them!"

It is estimated that the production of farm eggs in Canada for 1924 was 212,648,685 dozens of the value of \$50,322,439, as compared with 202,186,508 dozens of the value of \$48,770,780 in 1923.

A DAY'S MEALS FOR A CHILD

What is your plan for feeding your child? Do you think only about keeping indigestible foods away from him? If so, you are behind the times. Or do you think first about serving him the foods his body needs? If so, you are modern and up-to-date.

Below are some bills of fare for children which contain all the things needed for their development.

First, there is at least a pint of milk in each day's ration. Many children want more and can take it without leaving out other essential foods. Under these circumstances they ought to have more.

Second, there is an egg in the first bill of fare and a little meat or fish in the others. This is for iron.

Third, there is fruit in two meals out of three. This is a good rule to keep in mind all the time. Fresh fruit is best—juice or pulp for very young children. If fresh fruit can not be obtained, dried fruit may be used at one meal and either a little tomato juice or a raw green vegetable, such as lettuce, in the other. These foods are the watch dogs of the diet. They help to keep off disease.

Fourth, every meal in these rations provides for "roughage." In some meals it is supplied by potatoes. In others it is supplied by whole-grain cereal breakfast foods or whole-wheat bread. This means that the food will have enough bulk to prevent constipation.

Fifth, at one meal there is a vegetable other than potatoes.

Sixth, every meal contains a little butter or cream. Something very much needed by children is in butter-fat and it is well to give them a little

of it besides that which they get in the milk.

Make a list of the foods your child eats and see if all six of these different kinds of food are included each day: Milk, eggs, vegetables, fruit, whole-grain cereals, and butter or cream.

Suggested Bill of Fare for a Child of Two.

Breakfast—Juice of half an orange; whole-grain cereal, mush, milk, two-thirds of a cup, or more if wanted; toast; butter.

Dinner—Coddled eggs; baked potato; spinach, bread; butter; pulp of cooked prunes, cookie.

Supper—Milk, one and one-third cups, or more if wanted; whole-wheat bread; butter.

Suggested Bill of Fare for Child of Five.

Breakfast—Baked apple; whole-grain cereal mush; milk, half pint, or more if wanted; bread; butter.

Dinner—Boiled potato; creamed codfish; string beans; bread; butter; cup custard; cookie.

Supper—Milk, half pint, or more if wanted; whole wheat bread; date marmalade.

Suggested Bill of Fare for Child From Eight to Ten.

Breakfast—Berries; whole-grain cereal mush; milk, two-thirds pint, or more if wanted; bread; butter; sugar, one level tablespoon.

Dinner—Beef stew with potatoes and carrots or tomato; bread; butter; tapioca cream; ginger snaps.

Supper—Cream of lettuce soup; graham bread toasted; butter; honey or syrup; milk if wanted.

In Private.

Eight of them sat at table and each had a fling at Dickie—grandparents and parents, sister and brother—and their missiles, though only of words, were sharp and stinging and Dickie grew "madder" every minute.

He seemed a tough little proposition, it is true. He had pitched greedily into the feeding process as soon as he had noisily and rudely taken possession of his chair.

Grandfather and Grandmother looked frowningly at him. Their projectiles began with "In my day—"

"Look at those hands!" big sister demanded of the company in general. "I'd be afraid to eat the bread they touched, but Dick seems to thrive on a germ diet."

Big brother's ammunition required a big gun. He raised his voice for the mention of some "perfectly awful" thing Dickie had done that day, and Dickie's shortcomings, which were generally very short indeed, were resurrected and hammered at one after another.

Father looked as fierce as a South Sea Islander as he said, "I'll tend to you later."

Mother wound up by saying, "I can't do a thing in the world with him," her voice a despairing plaint.

There was no such ugly trouble in the family near by, though it included a boy of Dickie's age and proclivities. For fault in the presence of the family, a quiet "Go to your room, Tommy," from his mother was sufficient.

It was true that one might have thought Thomas had been shod by the blacksmith judging by the noise he made climbing the steps, but he obeyed. One cannot expect ill temper to be wiped out magically, only that it be treated sensibly and considerably, regard for the child's future regulating word and action.

Dickie's mother visiting Tommy's mother on one of these occasions, appreciated the even flow of cheerful conversation that continued uninterrupted by Tommy's defection. It was so different from the general squabble in her own home that followed misbehavior by Dickie.

When Tommy's mother reappeared, and her son had dashed out of doors to his play, the less successful mother put her plea:

"Please tell me how you settle things so easily. I can't do anything with Dickie. I believe he takes a pride in his successful rebellions."

"I make it a rule never to correct Tommy in the presence of others," her friend answered quietly. "Notice that tree," she continued, pointing through the window to a fine, straight little beauty. "A few months after it was planted it began to lean. I set the gardener to work. He drove a strong stake, the top pointing as directly to the sky as if a plummet had been hung as a guide from the cloud above it, and to it he fastened the young, growing thing. Not with flimsy strings that would break in a day—as inefficient as intermittent discipline—nor did he pull it violently into place, allowing others to join in the rough treatment. No, alone he tied it with strong bands neither harsh nor confining, leaving it room to grow true to the guide, upright. My dear, a mother may be the strength that will keep the child growing straight, bound and protected by bands that will not break—truth, affection, respect. The child respects the mother who shows respect for him. One of the ways of doing this is by recognizing his one, inviolable right—correction in private."

Nobody has any right to find life uninteresting or unrewarding who sees within the sphere of his own activity a wrong he can help to remedy, or within himself an evil he can hope to overcome.—Charles W. Eliot.

Leg Weakness.

Leg weakness in chicks is generally due to artificial conditions, with too much crowding, too little open air activity and not enough contact with mother earth. Many people make the mistake of "coddling" chicks in bad weather, keeping them almost constantly housed. This is almost certain to lead to delicacy and leg weakness, especially if the birds are kept for any length of time on cement or wooden floors. Earth that they can scratch in is a necessity to young chicks. They should all be kept in open-air runs placed on grass or earth and fine gravel, preferably a mixture of both grass and gravel soil.

Bright Cushions.

Homemade cushions to brighten long seats are best made of the cotton felt used for mattresses. It comes in layers, is sold by the square foot and can be cut the desired width by the dealer.

The edges will be square for boxing and cushions will be found springy, yet soft, and will keep their shape.

You can take this or leave it—there is no substitute for plain hard work in paying off the mortgage on a farm. The good old-fashioned kind of hard work that means getting up with the sun, milking the cows, feeding and harnessing the horses before breakfast, and being in the furrow by seven o'clock—that's what makes farming pay.—G. McK.

For mildew on roses spray with bicarbonate of soda, an ounce to a gallon of water. There are commercial sprays you can use effectively, too.

During the seventeenth century it was the custom of English women to wear the engagement ring on the thumb.

LOCAL AND GENERAL

Automobile Bumpers Renickelled MORASH FOUNDRY

Post Office hours for Victoria Day, Monday, May 25th—Open from 8 a. m. to 9 a. m.; open from 5 p. m. to 6 p. m.

Mr. Wm. Nixon, one of the artists who broadcasts regularly from C.N.R.O. Station, Ottawa, will contribute to the Curriers Minstrels Entertainment.

I'll meet you at the races at Morrisburg, on June 3rd (King's Birthday.)

Mr. Floyd Fisher left recently for Detroit, Mich., where he has secured a position in the office of the Studebaker Company.

Dr. C. A. Louden wishes to announce that he will move into his new offices in the George Reddick estate on the County Road, one block north of the present location on May 31st.

Lettuce for sale at Geo. W. Harrison's.

Mrs. Cartesen and little grandson of Ottawa spent the week end with her daughter, Mrs. F. Fentiman.

Born—On May 14th to Mr. and Mrs. Harry Smyth a son and daughter.

Born—At Morrisburg, on Tuesday, May 12th, to Mr. and Mrs. A. A. McKoy, a son.

Miss B. Rowat of Simcoe spent a few days at the home of Mr. W. K. Farlinger.

A new directory of Brockville issued last week gives the population of the town and its immediate vicinity as 12,245.

Robert McVey recently piper with the Governor General's Footguards, will assist at the Curriers Minstrels, Saturday night.

You can take almost any other outing, almost any other day, but you cannot afford to take any other outing on the King's Birthday—Attend the horse races at Morrisburg on June 3rd.

The Dominion and Provincial Bonds are the last word in safety. If you have money to invest, call me by phone and I will show you my list. Also money to lend on farm security at a low rate of interest and on easy terms—J. A. Riddell, Jr.

Three young men met a watery grave between the American shore and the foot of Barnhart's Island on May 15th, when a scow on which Clarence Cowell, Donald McMillan and Abel Vice were ferrying sheep and young cattle capsized in the swift current, sending men and animals into the river.

Out of about 30 numbers on the Curriers' program for Saturday night, only three are the same as given in the last show.

Rev. Mr. Lawson, Mrs. Merrill and Mrs. Jas. Challies motored to Kingston this week to attend the last district meeting of the Methodist Church.

Monday, May 25th, Victoria Day, will be observed at the post office as a public holiday.

Mrs. J. A. McKoy, who has spent the past couple of months with her son, Mr. A. A. McKoy, was taken to St. Vincent de Paul Hospital, Brockville, on Sunday, where she will undergo treatment.

On Sunday, May 31st, the Rev. I. W. Pierce of Toronto on behalf of the American Relief Association of Canada will give an address in the Methodist Church at 10.30 a. m. and in the evening at 7.15 in the Presbyterian Church and 15 to 8 in the Lutheran Church. All come to hear of the good work and of our 90 little Armenian boys at Georgetown, Ont., to become good Canadians and also of the dear little chap that Morrisburg and surrounding country has financially adopted.

A special meeting of the Brockville Presbytery was held in the Presbyterian church, Prescott, on Tuesday afternoon, May 12, with the Moderator, Rev. Wm. Merilees of Iroquois, in the chair and a large number present. Three resignations were dealt with, those of Rev. Wm. Morrison, of Spencerville, to take effect on May 13th, 1925, Rev. J. M. McGurrie, of Cardinal, to take effect on June 10th, 1925, and Rev. Mr. Jobb, of Morewood, which, owing to the congregation not having received due notice, could not be dealt with. A resolution was moved to nominate a Unionist Moderator and a Unionist clerk to take the place of the present moderator, Rev. Wm. Merilees, of Iroquois, and of the clerk, Rev. Dr. P. A. McLeod of Kemptonville, both of whom are anti-Unionists. The vote was defeated by a vote of 17 to 16. Many other matters were dealt with and on motion the meeting adjourned.

Vegetable and Flower Plants of all kinds for sale at Geo. W. Harrison's.

Born, Riverside, Morrisburg, Ont., on May 17th, to Mr. and Mrs. John W. Casselman, a daughter—Alleen

Having accepted the position of teller with the First National Bank at Detroit, Mr. Wm. Buckingham left this week to assume his new duties.

Miss Dorothy McMartin, R.N., returned home from New York on Saturday after having spent the past year in the United States.

As the date approaches on which the horse races will be held in Morrisburg, those in charge are completing their program and are endeavoring to make the day a most interesting one to lovers of good horse races.

Seven teachers were dismissed from the Collegiate Institute of Smiths Falls by the board of trustees at their regular meeting held in the town hall. No apparent reason was given for the attitude taken by the board, other than it was officially stated that the dismissal was not for inefficiency. During the meeting, while this subject was under discussion, the board excluded the press from the council chamber, and a lengthy discussion ensued. When interviewed, Dr. E. H. Wickware, chair man of the board, said that at the present time the board had nothing to say on the matter. It is understood, however, that in a few cases the dismissals were at the request of the principal, Mr. G. E. Evans.

The Awatto Quartette of Ottawa will assist at the Curriers Minstrels, Saturday night, May 23rd.

This week a consignment of pick-erel fry was received from the Provincial Fish Hatchery at Glenora and was put in the bay below the wharf. The fry in this year's consignment were considerably more developed than those placed in local waters a year ago.

Mr. William Rae passed away at the home of his sister, Mrs. Baldrey, in Chesterville, on Sunday morning last.

METHODIST CHURCH

10.30 A.M.—Religion's Real Strength.

7.00 P.M.—National Young Men. Special music at both services by the Awatto Male Quartette, Ottawa, and Mr. Wm. Nixon.

AN APPRECIATION

Mr. Wm. N. Lannin, the popular proprietor of the Iroquois Point Pavilion, who was formerly a resident of Winchester, and now residing with his family, in Iroquois, has during the last two years, conducted the dances at the pavilion under his personal supervision, and in a manner which is a credit to himself and the community.

Last week, Mr. Lannin's orchestra, under the leadership of Mr. Ben Hokea, filled an engagement at Canton, N.Y., and on their return trip, Mr. Lannin kindly consented, as an act of charity, to have the orchestra give a concert at the Bureau of Diocesan Charities, Ogdensburg. Rev. James J. Lacey, who is in charge of the Bureau, expresses his appreciation in the following terms—

"My Dear Mr. Lannin,—I am sending you herewith a clipping taken from the Monday morning edition of our local Republican Journal. You will find a brief reference made to the great kindness you and your company of splendid musicians showed us last Sunday afternoon. It would be, indeed very difficult for me to tell you how greatly we appreciate the wonderful treat you gave us.

"In my own name as well as in the names of the good Sisters and the army of poor—young and old—depending upon us, I want to express to you—and through you—to Ben Hokea and his associates our most cordial thanks. I know full well such magnanimous acts as your visit here last Sunday is prompted by a higher and better motive than that of receiving merely the thanks or plaudits of creatures. God it is who inspires such generous deeds and greater and better than anything we could or would say by way of thanking you will be His reward.

"With renewed expressions of gratitude for the most unusual treat you gave us, and praying God to bless you all always, I am,

Very sincerely and gratefully yours,

JAMES J. LACEY,
Supt. of Diocesan Charities.

SILVER CUP COMPETITION

In order to encourage the cheese makers of Dundas County in their efforts to improve conditions, Mr. A. A. Sweet, M.P.P., has issued a circular letter, setting forth the conditions and terms of a competition for which he is offering a silver cup. The conditions are as follows—

1. In cleanliness and general sanitary conditions of the factory and appliances for the making and storing of cheese.
2. Care of the grounds surrounding the factory with a view to making them attractive and pleasing to people passing along the highway—

the doing away with unsightly and malodorous drains, cesspools, etc.

3. Plants, shrubs and paint may do much to improve the general appearance of the premises. Don't be afraid to use them.

Awards in this competition will be made by the department of Agriculture.
