### PARTRIDGE HUNTING DATES ARE ISSUED

Announcement was made on Wednesday at Toronto, that partridge shooting in Ontario this fall will be allowed only during the regular deer season. No dogs will be allowed in hunting the birds, while the maximum bag for a day will be four, or 12 for the season.

In the district south of the French and Mattawa rivers, excluding the counties of Bruce, Grey, Simcoe, York, and the area south and west of there, and the counties of Leeds, Grenville, Dundas, Stormont, Gengarry and Carleton, partridge may be taken from Nov. 12 to Nov. 17, inclusive.

Deer hunting in section "A" as defined in the game laws, will be allowed from Oct. 22 to Oct. 27, inclusive. In section "B", Oct. 29 to Nov. 3 will be the season, while section "C" will be open from Nov. 12 to Nov. 17, inclusive.

### MR. JAMES S. JAMIESON, M.A.

Mr. James Smyth Jamieson, one of the outstanding Masters in the history of our Collegiate Institute, died at his home in Morrisburg on Friday Sept. 14th, after an illness extending over several weeks.

The imperishable memory of Collegiate days in Morrisburg, when the imparting of knowledge and inspiration of an exemplary character was the keynote of future success, will cause thousands of professional men and women established throughout the world, as well as citizens in all walks of life, to pause in this hour of sorrow, and share in the regret manifested in the death of a universally esteemed citizen of Morrisburg.

As a fitting tribute to the memory of one who has done so much to bring the Institute to its present high standard, the Board of Education caused the Union Jack to be flown at half-mast at the Collegiate, immediately after the death of Mr. Jamieson, until the remains were conveyed to their last resting place, on Tuesday.

The late Mr. Jamieson was born at Kars, Carleton County, Ontario, on August 20th, 1844, son of the late John Jamieson and Catherine Smyth.

He received his early education in his native town, obtaining a first-class certificate in 1867, after which he taught Public School at Glen Fay, County of Lanark, for two years. He was an honour graduate of Victoria University in English and History, in 1879, and was later engaged in teaching as follows: Three years as Headmaster of Pakenham High School; three years as Headmaster of Carleton Place High School; one year as Science and English Master of the Perth Collegiate Institute, and for nearly forty years, Principal of the Morrisburg Collegiate Institute.

He is survived by his widow, formerly Miss Sarah Clinton of Brockville; his daughter, Miss Edith Jamieson, and two sons, Mr. C.E. Jamieson of Napanee, and Mr. A.D. Jamieson of Toronto; one brother, Dr. A. Jamieson, Arnprior, and two sisters, Miss Mary Jamieson of Kars, and Mrs. John Elliott, Pakenham.

A private funeral service was held at the family residence on Monday evening at 8.00 o'clock. Rev. Dr. D.N. MacRae officiating. On Tuesday morning, the remains were conveyed to Kars, Ont., for interment in the family plot.

### VOTERS TO REGISTER

OCT. 15 TO NOV. 17

A general registration of voters under the new Franchise Act is called for by a proclamation issued by John Thompson, K.C., franchise commissioner, at Ottawa, on Wednesday. The proclamation provides that "such registration shall commence on the 15th day of October, 1934, and shall end on the 17th day of November, 1934."

"In accordance with the above enumeration in urban and rural polling divisions will commence on Monday, the 15th day of October, 1934, and shall end on Saturday, the 29th day of October, 1934."

"The rural enumerators will sit to revise and correct their preliminary lists on Tuesday, Wednesday and Thursday, the 13th, 14th and 15th days of November, 1935. The revision of the preliminary lists in urban polling divisions will commence on Monday, the 5th day of November, and will end on Saturday, the 17th day of November."

### MATILDA WOMEN'S INSTITUTE

At the monthly meeting of the Matilda Women's Institute, which was held at the home of Mrs. Lee Harkness, the local branch entertained the ladies of the Spencerville Women's Institute.

Mrs. Harkness' home, which was decorated for the occasion with asters and gladioli, was well filled with members and visitors. During the business period, the president, Mrs. Chas. Harkness, occupied the chair.

After the minutes of the previous meeting were read by the secretary, Mrs. Chas. Strader, and approved, the business was brought to a close, and the Spencerville president, Mrs. Percy Barnard, took charge of the program, which was given by the visitors, and consisted of a vocal solo by Mrs. Tripp, current events by Mrs. Bennett, and violin solos by Mrs. Moore. Matilda branch served lunch. Mrs. Peterson and Mrs. Boyd

### GRID LOOP FORMED IN DUNDAS COUNTY HIGH SCHOOLS

The first game of rugby football in connection with the High School Athletic Association of Dundas County, will be played on Saturday, October 13th, between Morrisburg and Iroquois, on the latter's grounds, and on the same date, Winchester and Chesterville will engage in a game at Chesterville.

On October 20th, Iroquois will play at Morrisburg, and Chesterville at Winchester against the home teams. Winners of the play-off will be in action on the 27th of October, place not yet decided on.

Officers for the association are as follows:

Hon. Pres.—G.H. Challies, M.L.A. President—J.E. Spinks, B.A., of Winchester High School. Sec'y-Treasurer—G.E. Power, B.A., Morrisburg Collegiate Institute. Representatives—A.J. LaForet, B.A. Chesterville High School; F.C. Beaupre, B.A., Iroquois High School.

### FIFTEEN-DAY SENTENCE FOR ELMA MOTORIST

Acil Bilow, of Elma, appeared before Magistrate McCormick last week, charged with being intoxicated while driving a motor car. He was convicted and sentenced to 15 days in jail, and an additional 15 days if he fails to pay the costs of the court.

Bilow was arrested last Friday night by Constable McLean of Chesterville, after his car had sideswiped a truck while crossing a bridge in that village. After hitting the truck, Bilow continued on his way. He was trailed by Constable McLean, who arrested him and turned him over to Provincial Officer Frank Rose, who placed him in Winchester jail over night. He is now in the counties jail at Cornwall, where his sentence will have to be served.

### RECEPTION TO BE HELD FOR MR. AND MRS. SIMPSON

As most people know, our popular and efficient District Representative of the Ontario Department of Agriculture is about to leave us, to take up similar work in Peel County. The news of his transfer by the powers that be, to this new field of activity, came as a great shock to his many friends and admirers in this district. It was felt at once that something should be done to show Mr. and Mrs. Simpson that their departure was much regretted, and to express in some way, in some measure the keen appreciation of Mr. Simpson's services, and the esteem in which they both are held in these counties of Dundas and Stormont.

Arrangements have been made accordingly, to hold a reception for this popular couple on the eve of their departure from our midst. This reception will be featured by the presentation of a souvenir of some kind, to remind them of the years spent in our midst, from which we have benefitted, and which we hope they have enjoyed.

The reception will be held in Merkle's Hall (Music Hall) in Morrisburg, on Tuesday evening, Sept. 25th, from 8 to 11. The presentation will be made about 9.30, and an orchestra will be in evidence. Light refreshments will be served, and it is anticipated many of Mr. and Mrs. Simpson's friends will be on hand to do honor to, and have a last word with these, our good friends, ere they leave us.

Anyone interested in this reception and presentation should get in touch with some member of the Committee, which in Morrisburg includes Messrs Fred Broder and Fred Barlow.

### VICTIM CARELESS, IS JURY'S VERDICT

"We find that Charles Simon of Maxville was under the influence of liquor, and was lying carelessly in the rear seat of a touring car, with head protruding over side of car," was the jury's finding in the death of Charles Simon, at St. Isidore de Prescott on the night of Aug. 31. Simon had been drinking, and was returning home in a car driven by Philip Guindon. The car had been driven into the rear of a truck parked off the paved portion of the road, and after the impact, Guindon had driven the car about 100 feet, before it fell off the roadway.

The jury also found Philip Guindon, driver of the car, under the influence of liquor, and that he was driving the car in a careless manner. Guindon had no driver's permit. Provincial Constable Wilfred Bertrand, of Hawkesbury, stated: "I found a gallon wine jug in the back seat. It was less than one-quarter full of wine."

Philip Guindon, driver of the car, admitted that he had had "five or six glasses of beer," but denied that he had had any wine.

One of the witnesses found Simon's cap near the scene of the accident, and said he had been told by Guindon that he was a Provincial Policeman, and to "turn it over". Asked by Crown Attorney J.G. Harness why he had said this, Guindon replied "Just as a joke".

Previous to the inquest, a criminal charge had been laid against Guindon. The inquest was held at Cornwall, on Thursday.

poured tea, and Mrs. Johnston, Mrs. Houlihan, Mrs. Hanson and Mrs. Taylor assisted in serving.

## CANADA

### OX COMES BACK.

Adversity often reverses the gears and down in Alabama the mule is disappearing and the ox is taking its place, all on the ground of necessity and economy. Some three thousand have been broken to harness, their cost being a quarter of that of the mule, and the cost of feeding them being much less, to say nothing of the potentialities for beef when they are to be disposed of.—Halifax Chronicle.

### GIFT OF HEAVEN.

Before the American College of Physicians, Dr. Nathaniel Kleitman undertook to expound the mystery of sleep. Pronouncing sleep the gift of heaven, the speaker exhibited no sort of resentment when some members of his audience took "forty winks" during his address and thus, in person, adopted the recipe and corroborated his own contention that all human folk are better for taking advantage of a refreshing nap.—Fredericton Gleaner.

### FOREST FIRE LOSSES.

Canada sustains a loss of ten million dollars a year on the average through forest fires, said the Government Information Bureau recently, and of these eighty-five per cent. are due to human agencies and more than half to pure carelessness.—Moncton Transcript.

### TOO OPTIMISTIC.

When the rural telephone system was started in Alberta, provision was made for 30,000 subscribers. At no time did the number of telephones in use reach 20,000 or more than 10,000 less than the capacity. At the present time there are 9,500 telephone subscribers on the rural lines and these are being operated at an annual deficit to the government of \$700,000.—Border Cities Star.

### EXCLUSIVE.

All the indications would seem to prove that only on this earth are there human joys and sorrows; revolutions and counter-revolutions; wedding bells and christenings; auto horns and jazz; traffic cops and taxes; radio and telephones, and all the other things which go to characterize what is known as humanity.—Brantford Expressor.

### DEEP WELLS.

An artesian well has been bored in Dakota over 2,000 feet in depth and a fine flow of water has been obtained from it. The well bored at the instance of Sir Adam Beck in London will be remembered on account of the opposition it aroused. West Chicago has a well 3,081 feet deep. St. Louis has one 3,843½ feet down. At Putnam Heights, Conn., there is one at 6,004 feet. One near Leipzig is 5,735 feet in depth. And still we are told that the earth is full of subterranean fires. The water is cool and fresh and pure from these depths. What's the answer?—Hamilton Herald.

### CANADIAN SHOPPING PERIODS IN ENGLAND.

The second of the series of four Canadian shopping periods, which are being organized in England during the present fiscal year by the Canadian Government Exhibition Commission in co-operation with the Director of Canadian trade publicity and the Trade Commissioners in the United Kingdom, was held in shop premises in Leicester from July 13 to 28.

Mr. J. A. MacDonald, Assistant Trade Commissioner, Bristol, writes that the public attendance was very satisfactory. Some 31,712 samples were sold, which represents a higher daily average for sales than at any previous Canada shop period with the exception of that held in Belfast in January of this year. The product sold included samples of Canadian canned fruits, vegetables, soups, fish, corn, tomato juice, and milk; macaroni products; bacon; ham; cheese; honey; maple syrup and sugar; table jellies; mushrooms; pickles and sauces. Numerous samples of Canadian cigarettes, tobacco, and matches were also disposed of. Certain new brands of honey, canned fruits, vegetables, soup, corn and tomato juice; pickles; macaroni products and tomato catsup were introduced to the trade in Leicester for the first time through the medium of the Canada Shop.—Toronto Mail and Empire.

### FICTION BLAMED.

With a good deal less crime fiction in circulation, there might be a little less real crime committed in the United States by the end of the year.—Quebec Chronicle-Telegraph.

### FREE PRESS!

Young writers looking for markets will be interested to learn that German newspapers can accept non-controversial crossword puzzles, household recipes and garden hints.—Kingston Whig-Standard.

**NOT IRREVERENCE—BLASPHEMY**  
Now and again there comes to us an irreverent moment when we are inclined to think that the world will

go on whether Mary and Doug are reconciled or not.—Ottawa Citizen.

### COURTESY SHOULD BEGIN AT BORDER.

In launching at Ottawa the Canadian Travel Bureau, the new Dominion sponsored tourist organization, Dr. R. J. Manion stressed the value of courtesy. Courtesy, he said, should begin at the border points where tourists enter, and every individual Canadian coming in contact with a tourist, should be as courteous and helpful as possible. This is sound advice.—St. Thomas Times-Journal.

### COST OF DEPRESSION.

In 1929 the city of Hamilton expended during the year \$7,390,352, according to the financial report, and in 1932 the sum spent was \$8,633,170. From 1930 to 1934, according to Mr. R. J. Menary, assistant city treasurer, Hamilton spent on relief construction and direct relief a total of \$13,328,896, of which sum the Governments contributed \$6,008,074, the difference of \$7,320,822 coming out of the municipality's coffers. Civic expenditures balance civic revenues and when these figures are placed beside relief costs we are able better to appreciate how much the depression has cost Hamilton.—Hamilton Spectator.

"Why do you never see bagpipes in pawn shops?" asks a paragrapher. Most likely because, when a bagpipe is of no further use as a musical instrument, the thrifty owner fills it with onions and oatmeal, boils it up and calls it haggis.—Border Cities Star.

### AND TWO ON ONE BIKE!

Accidents in which bicyclists figure are becoming more numerous locally. While the greatest care on the part of motorists is called for, it cannot be too strongly urged, especially on young cyclists, that for their own and others' safety, they should refrain from taking risks. Particularly is the practice of riding two abreast to be condemned.—Hamilton Spectator.

### COST OF AN ACCIDENT.

A Toronto motorist has had to pay about \$300 for the repair of his car after being run into by a tourist from across the border who entered the province with a car he had bought for \$50. He has returned home and nothing can be collected from him. The question arises whether unfit cars should be granted entrance. Measures are taken to ensure that Ontario cars must be fit.—Toronto Star.

### WHEN FLYING WAS NEW.

Under the caption "Ottawa 25 years ago," we find this in The Ottawa Journal:

The Journal was sceptical about the future of aircraft. It conceded that the airplane might become "a common means of amusement, of sport, of scientific observation," but saw little probability that it would ever be used in freight or passenger traffic, or in war except for observation, unless some new principle was discovered. Didn't they once say in England that no one could stand travel on a railway train going as fast as 25 miles an hour? And how many inventions in their embryo stage have been laughed at, not excepting the telephone of Alexander Graham Bell?—St. Catharines Standard.

### A Striking New Idea in Picketing

These young ladies aren't on strike, because as yet they haven't anything to strike about, but they are doing picket duty in front of a New York theater in protest against the monopoly California girls seem to have in the movies. Left to right are Olga Natchava, Helen Starr and Violet Roth. At last reports, the newsreels were the closest they had come to getting into the movies.

## THE EMPIRE

### EASY MONEY DOES IT.

Why is business improving in Gt. Britain? 1—Because foreign countries have confidence in our ability to manufacture and deliver according to contract. 2—Because the banks, by paying virtually no interest on deposits are forcing millions into productive channels.—London Sunday Referee.

### THE HYDE PARK WAY.

A valuable right of British citizens, long fought for and painfully won, is to march in procession, assemble, and speak freely. Why should that right be curtailed just because Blackshirts and Redshirts want to bash each other about? Let the Blackshirts blow off steam. Let the Redshirts blow off steam. Neither of them will get much of a meeting without the other.—London Daily Express.

### RUSSIA AND THE LEAGUE.

The re-emergence of Russia as one of the Great Powers can no longer be ignored, and it is in the interests of other nations, no less than in her own that she should take part in the affairs of the League.—Glasgow Herald.

### DOMINION AND BRITISH FARMER.

The only way out is to impose an import duty of 40 per cent. on foreign agricultural produce and one of 20 per cent. on Dominion produce. Once the tariff were imposed, British agriculture would have to sink or swim. It would certainly swim.—London Daily Mail.

Ten of Britain's most important cities will be linked by air mail tomorrow. This is progress. Rates will remain the same as for ordinary mails. Now the Postmaster-General should set about reducing the rate for mails through the services, say a penny by rail, and three-halfpence by air. That would be good for business, as well as progress.—London Sunday Dispatch.

### Next Generation May See Woman as President of U.S.

Chicago. — A woman president of the United States within the generation is predicted by Miss Lillian D. Rock, secretary of the National Association of Women Lawyers.

"I expect that within my own lifetime some brilliant woman will make her way from the ballot box to the presidency," she told the association's annual convention.

"All of our country's presidents have gone forth from women. What is to prevent woman herself from going forth to occupy this exalted post?"

Miss Rock asserted that the most important task facing the women lawyers was to increase the number of women judges. She charged that men lawyers and judges "are not sufficiently social-minded to even undertake the important task of interpreting the laws in the light of the new era."

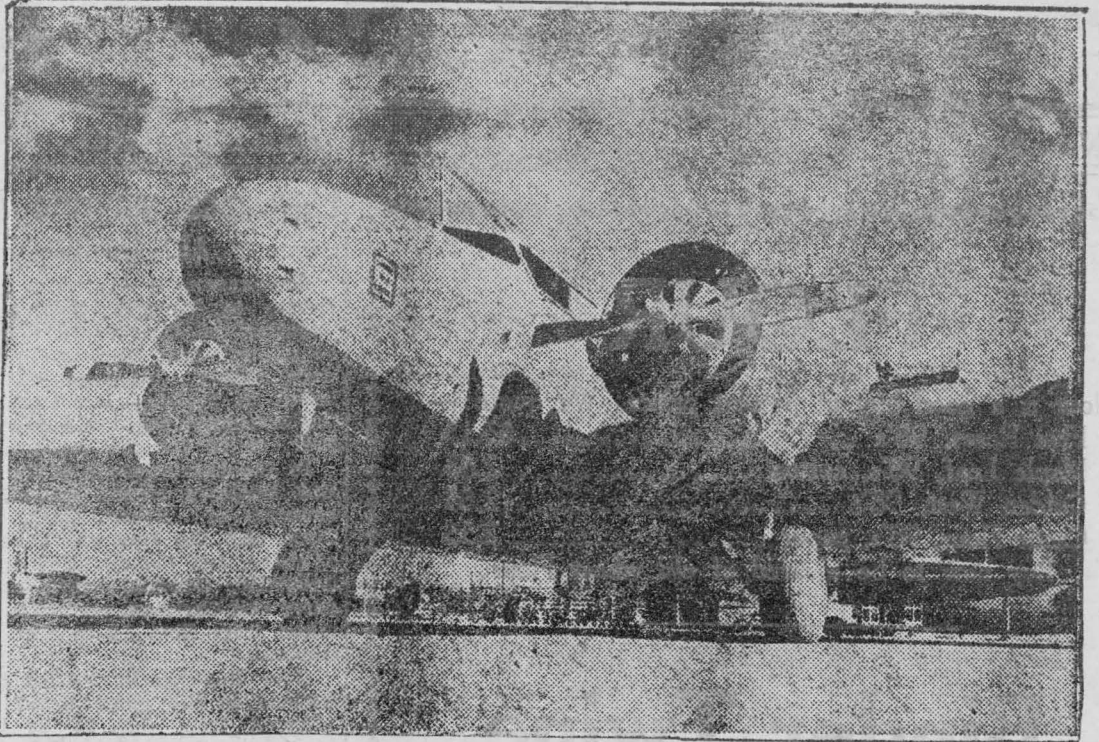

Women, she said, are more social-minded than men because in the ages past women were the ones who kept the family together.

### Morgan's Sister-in-Law "Totes" Own Golf Bag

Peabody, Mass.—Mrs. Stephen Van R. Crosby, of Boston, sister-in-law of J. P. Morgan, was among those forced to tote their own golf bags when 100 caddies struck for wage increases at Essex Country Club.

A young army routed a "strike-breaker" found carrying Mrs. Crosby's clubs.

## London-to-Melbourne Entry

Strikingly outlined against cloud-decked sky, this giant Boeing twin-motored plane will be flown by Col. Roscoe Turner and Clyde Pangborn in forth coming London-to-Melbourne air derby. Craft attains speed of 200 miles an hour.

## FIRST OF ROYAL FAMILY IN 29 YEARS TO 'MARRY ALIEN'

London, Eng.—Although several junior members of the British Royal family have sought mates from abroad in recent years, Prince George, whose betrothal to Princess Marina of Greece was announced, is the first of the sovereign to become engaged to a member of a foreign house in 29 years.

Princess Maud, fifth child of Edward VII, in 1896, married Prince Charles of Denmark, now King Haakon VII of Norway. The couple spent much time in England before their accession to the throne of Norway. Queen Maud still maintains a house adjoining the British royal residence at Sandringham.

"This was the only marriage of a child of the Prince of Wales (afterwards Edward VII) which came into touch with foreign politics," writes Sir Henry Lee in his life of Edward VII. "No political association was anticipated at the time, but twelve months later when Norway dissolved union with Sweden there was much international controversy over the choice of ruler for the newly established state. Princess Maud's father—then King Edward—intervened with success in an endeavor to persuade the Norwegians to make his son-in-law their king."

Sir Henry Lee in discussing the

marriage in 1889 of Princess Louise, Edward's eldest daughter, to the Earl of Fife, records "conventional opinion was somewhat critical of the alliance of the prince's youthful daughter to one below her rank, much her senior, but the union of Queen Victoria's fourth daughter to the Marquis of Lorne offered adequate precedent."

It is recalled the Earl of Fife was raised to the dignity of a dukedom on his marriage. It is expected Prince George will receive similar rank shortly. He is already older than any of his brothers when they received their titles, the Prince of Wales was so created on his 16th birthday, six weeks after his father's accession to the throne in 1910. Prince Albert was made Duke of York at the age of 24 and Prince Henry, Duke of Gloucester at 28. Prince George is now 31.

Many years ago King George revealed he had already chosen titles which in due course his sons would bear.

The order of succession to the throne follows: the Prince of Wales and issue; the Duke of York and issue—Princess Elizabeth and Princess Margaret; the Duke of Gloucester and issue; Prince George and issue; Princess Mary and issue.

## Judge Denies Test of Blood

To Show Paternity, Youth Who Refused to Wed Found Responsible

Detroit. — What is believed to be a legal precedent in Michigan was set by Circuit Judge Lester S. Moll when he denied a motion for a blood test to determine the paternity of a child. The opinion was handed down in the case of Ruben Jaffe, 20 years old, of Romulus. Judge Moll found Jaffe to be the child's father and referred the case to the friend of the Court. Jaffe is at liberty under bond. Suit was brought against Jaffe two months ago by a seventeen year old Romulus girl, Erwin I. Cohen, attorney for Jaffe, asked that a blood test be taken in an attempt to show the innocence of his client.

In denying Cohen's motion, Judge Moll explained that he had conferred with medical authorities and had come to the conclusion that there is "no reason to believe that blood tests would show the parentage." On other evidence he ruled that Jaffe was the father of the girl's daughter, born May 11.

According to Carl Schweikart, assistant prosecutor, parents of both parties agreed upon their marriage and the date was set for September 15, 1933. When the hour for the wedding arrived, Jaffe was discovered in Toledo, and refused to go through with the ceremony, Schweikart related.

## Unemployed Men Make Preserves

Winnipeg.—Unemployed married men, temporarily ceasing their search for work, have applied their energies toward preparing supplies for the winter. In a community kitchen here, 24 men have been canning fruits and vegetables. Their wives were busy, too, but they kept away from the community kitchen and instead, applied their skill in the making of winter garments at the Women's Community Centre.

More than 300 quarts of canned foods, including 15 jars of jelly were "put down" by the men. At first they received instructions from Miss G. Dutton, graduate in home economics at the Manitoba Agricultural College, but now they know the art of cooking tasty foods themselves.

## Pneumonia Cure Next

Discoverer of Infantile Paralysis Preventative Tells Plans

Philadelphia.—Pneumonia is next on the "public enemy" list of Dr. John A. Kolmer, the modest Philadelphia medical professor who claims discovery of the first preventative for infantile paralysis.

### LOOKS TO FUTURE.

Even in the excitement of announcing development of his anti-paralysis vaccine, the professor's future research plans and hopes were in the background of his thoughts.

Now that a way has been found to prevent the dread paralysis, he declared, there will be more time for his work on a vaccine to forestall pneumonia.

He has already developed a fluid, he disclosed, which has been used effectively in immunizing rabbits from the lung inflammation, and the same vaccine has met with "a large degree of success" in experiments in humans.

While carrying on the pneumonia work, he said, he will attempt to supplement his infantile paralysis vaccine with a serum to "cure" that disease after infection sets in.

He was experimenting along this line, the researcher explained, at the time of development of his preventative vaccine from the spinal cords of monkeys.

The 48-year-old professor, who divides his time between Temple University and the Independent Research Institute where the vaccine was developed, risked his life to test his discovery before publicly claiming success.

## Educator Supporter Of "More Arithmetic"

Ottawa.—That more arithmetic and less Latin should be taught in secondary schools, was the opinion expressed by F. A. Stuart, principal of Lisgar Collegiate, here recently in commenting on proposals of Hon. L. J. Simpson, Ontario Minister of Education to have more arithmetic taught.

"I should certainly like to see arithmetic stressed more," Mr. Stuart remarked. "At present, arithmetic is taught only in the second year of our collegiate, that is advanced arithmetic after the pupils have had an opportunity to become acquainted with al-

gebra. I'm sure practically all the teachers of the province are in favor of extension of the recommendation system regarding examinations. The system, with a gradual beginning, is working out well. I believe, too, that our graduation diplomas should be more generally accepted as equivalent to a matriculation certificate, except, of course, for those going on to university."

## Scientists On Track Of Rust-Proof Wheat

Toronto.—F. C. Nunnick, director of publicity for the Dominion Agriculture Department, has intimated that discovery of a rust-resistant wheat was not far off, and he added that information on the matter would be released soon.

As soon as it has been proven beyond all doubt that the variety of wheat would resist rust, the information would be made known, he declared.

"We have been working on it for a number of years," he said, "but we expect to be able to give it to the Western farmers soon."

He declared that the department results "are very encouraging" and it remained only to be proven "over a long period of time. Beyond that I can say nothing more at the present time."

Such a type of wheat would mean millions of dollars to the Western farmer whose crops have suffered from rust.

Mr. Nunnick said that the department was working also on a type of wheat which would combat saw-fly attacks. With a solid stemmed wheat, he added, the saw-fly would be unable to bore into it.

## Young People Often Neglect Their Teeth

Young strong people frequently neglect their teeth, writes a doctor. They give them a perfunctory scrub at night, but they fail to notice the onset of pyorrhea or septic gums.

I was called to a young man who was suffering from an acute inflammation of the ear. It was discharging freely showing that the ear drum had perforated spontaneously. He complained of having contracted a chill two weeks previously, which he had neglected.

On looking at his mouth I found the lower gums very septic with every front tooth loose in its socket. When the ear discharge dries up this young man must have all these dead teeth out and treatment applied to the gums to make them healthy.

## China's Hero Here

"China's only hope is to resist and resist," General Tsai Ting Kai, commander of the famous 19th Route Army that held the Japanese troop out of his native land.

NOW—

### SILVER AS IT AFFECTS CANADA

The United States recent move in the remonetization of silver continues to create a good deal of discussion both for and against the plan and many articles of interest have appeared on the subject in various publications. To the average Canadian citizen it may appear that all the hullabulo about the "White Metal" is of little interest to them and while the individual may not be affected directly through higher prices for silver, it is certain that from a national standpoint they should be very much interested in the subject as it would seem certain that Canada stands to benefit considerably should world prices for the metal go higher. That this seems likely is the opinion expressed by many experts who figure that .75 cents or even \$1.00 per ounce is a possibility next year.

Should this prediction be fulfilled the Dominion would benefit in a variety of ways, but generally through wider markets in the Orient for both natural and manufactured products. In considering this it should be kept in mind that of about eighteen hundred million human beings on this earth some twelve hundred million do not know gold as a standard of value. Silver is their standard. In India for example if a native worker is paid a bank note for his services he immediately rushes to change the paper into silver rupees. To him, that is the only real money. In China a somewhat similar situation exists and silver is their only recognized standard of value. Would it not thus appear that an increase in the price for silver would have the effect of increasing the purchasing power of these and other countries using the silver standard? This conclusion seems natural. China for example through the increased price would get more for her metal of which she has a huge stock and would therefore be able to buy more merchandise etc. As a Professor of Economics at one of Canada's leading Universities has stated, silver is beginning to move through Shanghai and through proceeds of sale of this metal in Europe and America, China will amass gold credits or possibly sterling credits. In view of the high price of gold bullion it seems unlikely that there will be any marked move-

ment of that metal to China, but rather that exports of merchandise from Europe and America will be made, among which are Canadian wheat and lumber, as well as manufactured products. The same authority says that with the Dominion Government committed to a fairly heavy purchase of silver that China may sell us silver and buy our products in exchange. From another angle any further increase in the price of silver is likely to lead to several old silver producing companies resuming operations, which will, of course, result in employment for a number of people and in other ways to increased business for mining supply houses, etc.

More important, however, from a mining standpoint is the increased interest which has already been making itself evident in the Great Bear Lake district, the only new silver field discovered in recent years. Activity has increased during the current season in this section and any further advance in the price of silver would undoubtedly lead to intensified efforts in the area, in turn resulting in further employment and purchasing of supplies of various kinds. Thus in a number of ways, Canada stands to benefit materially from higher prices for silver, so that individuals, both directly and indirectly should also be keenly interested in developments in connection with the remonetization of the "White Metal."

#### Ontario Mineral Output Gains

Mineral production from Ontario mines for the first six months of 1934 amounted to \$48,709,866.00 which compares with \$32,562,511.00 for the same period in 1933. Of the above total, gold production amounted to \$21,503,242.00 and it is interesting to note that these figures are taken on basis of the old standard rate of .2067 per ounce. In other words the half yearly output would show an even greater increase than at first appears. Nickel was the next largest item on the list with \$15,016,000.00 while copper at \$7,525,300.00 was third.

The report prepared by the Ontario Department of Mines for the half

year, from which the above figures were taken, states that the increase in tonnage mined by gold mining companies with a decline in per ounce recovery indicates that lower grade ores are being treated by the larger producers.

#### Construction Volume Advances

Contracts awarded for the month of August show an increase of 21 per cent over July and 11 per cent increase over June. The figures for the Dominion of Canada, as compiled by MacLean Building Reports Ltd., amounted to \$13,543,900 for August, \$11,190,500 for July, and \$12,208,900 for June. The total value of contracts awarded for the first eight months of

the year amounts to \$85,651,100 as compared with \$55,043,800 for the same period in 1933, an increase of 37.4 per cent.

Quebec lead the rest of the Provinces with a total of \$4,918,400 while Ontario followed closely with \$4,217,200 for the month.

#### McColl Frontenac Oil

The aggressive sales policy being pursued by McColl Frontenac Oil Co., Ltd., is reported to be bringing excellent results and it is anticipated that the company will obtain its full share of business from the increased consumption of fuel and lubricating oils. Earnings for the past four years have been well ahead of dividend requirements for the preferred and common stocks and in some quarters it is expected, that, before long, some increase in disbursements on the common stock may be anticipated.

#### Siscoe Gold Mines

In handling 10,319 tons in August, Siscoe Gold Mines, Ltd., established a new high record, the previous best being 10,259 tons in March. Production for the month amounted to \$174,857 which compares with \$146,620 for the same month in 1933 and \$181,294 in July this year. All figures are based on gold at \$35.00.

#### MacFarlane Long Lac Mines

Most recent reports coming from this company's property in the Long Lac Area continue to be of a very optimistic nature, particularly regarding the Number two vein which has been traced for a length of over two hundred feet, with average width running over sixteen feet.

The mineralized zone lies between the grey quartz porphyry of the footwall to the north and the chlorite schist hanging wall to the south. The strike of the vein is east-west with a dip to the south. The find is reported as being one of the most impressive looking in the district and northern buying is said to be largely responsible for the recent strength and activity in the shares.

#### Rouyn Reward Mines

This company is reported as having awarded contract for five thousand ft. of diamond drilling on its property adjoining Pontiac Rouyn in Rouyn Township, Quebec. Surface showings are said to be very encouraging and drilling will test conditions at depth. Should drilling results warrant it, a shaft will probably be started after drilling contract is completed.

#### Coniaurum Mines, Ltd.

Exploration at this company's property is recently reported to have picked up a new orebody on the 1000 foot level, west of the Goldale shaft. At time of writing ore length is said to be 280 feet, while on the 1250 foot level, what appears to be the same vein has been drifted on for over 40 feet and width averaging ten feet with values running .4 oz. per ton.

#### George Weston, Ltd.

It is reported that this company's earnings for the current year are running well ahead of 1933 when they were \$342,174 as against \$137,322 in 1932. The company during the depression years acquired modern plants in Canada, Great Britain and the United States at greatly depreciated prices and has consolidated these into a smooth and profitable organization, while other companies in the same line were operating in the red. The company has 174,136 common shares outstanding.

#### Long Lac Adair Mines

Further discoveries are reported from the Temagami property of Long Lac Adair Mines Ltd., by manager Frank Leslie, who states that north of the hill where the Number five vein faulted, after having been traced for a length of thirteen hundred and twenty-five feet, a new vein was picked up. Work on this vein has indicated a length of seven hundred feet at which point it runs into Cooks Lake. At the time of report, sufficient work has not been done to give details but vein appears to carry a lot of sulphides. Another vein, known as Number eight, showing six feet of heavy sulphides was also uncovered this week and had been opened up for a length of forty feet.

#### August Railway Reports

Gross revenues of the Canadian National Railways system for ten days ending August 31st, were \$4,886,852, an increase of \$48,923 over the same period in 1933.

Earnings of the Canadian Pacific Railway for week ending August 30th, totalled \$3,948,000 an increase of \$422,000 over the same week last year.

#### McMillan Gold Mines

The new 125 ton mill at this company's property in the West River mineral area has been brought into production and will gradually be brought up to its full capacity. Underground work is continuing to make good progress and millfeed will be taken from the 325 and 625 foot levels to start with. Later stoppeling will get under way on the 425 and 525 levels.

There is a sacredness in tears. They are not the mark of weakness, but of power. They speak more eloquently than ten thousand tongues.—W. Irving.

## Tumor Study Is Advanced

### Notable Discovery, Prolactin Cures Growth On Monkey

Baltimore, Md.—A notable tumor discovery, by which the recently found milk hormone, prolactin, was used with surgery to cause disappearance of a benign tumor in the breast of a male monkey, was reported in the American Journal of Cancer by three Johns Hopkins scientists.

Prolactin is a chemical secreted into the blood by the pituitary gland, at the base of the brain. It is so potent in inducing breast milk that it makes even a tomcat give milk.

Benign tumors are non-cancerous growths. Their study is hoped to offer more light on the cause and relief of cancer. Some medical men believe benign tumors may be forerunners of cancer, while the majority doubt it.

The experiment points to hormone unbalance as a definite cause of the benign breast tumors, male and female.

"Both new diagnostic procedures and new modes of therapy are suggested," says the report, which is made by Charles F. Geschiker, M.D., Dean Lewis, M.D., former president of the American Medical Association and Carl B. Hartman.

The non-malignant breast growths were produced in monkeys at Johns Hopkins by giving them a sex hormone, oestrin, this is a female hormone, but it induced the tumorous growths even in male monkeys.

The fact that men's glands also produce small amounts of this female hormone is cited to show that oestrin upsets may account for this type of tumor in the male human. Assays or biological tests also showed the presence of this hormone concentrated in excess in women with the benign breast troubles.

These oestrin observations strengthen the suspicion that hormone unbalance has something to do with benign breast tumors. They show too, that it is not an occasional great excess of oestrin that causes the tumors, but "prolonged and uninterrupted stimulation by oestrin."

The milk hormone prolactin which caused disappearance of male breast tumor is now being tried on female breast tumors of similar benign character.

Four types of this non-fatal tumor were studied. They were gynecomastia, which occurs most frequently in white males between the ages of 30 and 40, virginal hypertrophy, fibrosarcoma and cystic disease. The report said there might possibly be some connection also between oestrin and fibrosarcoma, a rare kind of breast cancer.

## Further Radio Control Seen

### U.S. BAR SESSION — AFFECTS CHARACTER, QUALITY OF SERVICE.

Milwaukee, Wis.—Additional regulation of communications affecting the "character, quality and quantity" of radio broadcasting service was predicted in a report discussed by an American Bar Association committee.

The association's committee on communications which forecast last year passage of legislation creating a federal communications commission well in advance of the introduction of the Dill-Rayburn bill will present its report to the association convention which opens here.

Explaining the expected changes in regulations will evolve from the requirement that the commission submit to Congress recommendations for new legislation on all phases of its activity, the report says "the commercial consequences of the commission's regulations will be far reaching, but in all probability the social consequences will be even greater."

"With the Communications Act of 1934 as the foundation, there will be erected thereon a further extension of the law, and it is this material which will truly determine the character of regulation sought to be exercised," the report says.

"On the part of the new commission, the rules, regulations and procedural methods established by it, will substantially affect not only the great investments already made in the communication field, and the commercial telephone, telegraph and radio service available, but also the character, quality and quantity of radio broadcasting service received by the people of the country."

## It's Liver That Makes You Feel So Wretched

### Wake up your Liver Bile

#### —No Calomel Necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c at all druggists. 54

## When Publishers Pay In Advance

(By Thomas R. Coward in Literary Observer.)

Soon after I entered the publishing business I thought it might not be a bad idea to read in advance some of the books to be brought out by the firm with which I was connected. At least, it would make a good impression.

I put in a request, therefore, for a set of galley proofs of a certain book the publication of which was some months in the offing. There was a complete description of it in the catalogue; there was a contract covering it, signed and in the safe; there was a jacket drawing in the manufacturing department against the day when salesmen's dummies should be made up, and the author, I knew, had received a substantial advance.

But no one, I discovered, had so much as seen the manuscript. It wasn't even in existence — at least not in its entirety. The author was working on it, the editor had seen the first two chapters and a resume of the rest.

I learned later, of course, that this procedure is very common in publishing and has resulted in some of the finest books on the market today—and some of the worst.

A publisher finds, for example, that there is some phase of world politics, some aspect of history, some interpretation of art, on which there is little or no information available outside the strictly technical or academic publications. He feels that there should be, that there is a market for it, that there are many people who would be interested in reading about such a phase or aspect or interpretation.

He looks over the field of writers who know something about the subject he selects, chooses one whom he feels by training and experience is competent to do the kind of book that he has in mind and who is not otherwise tied up with another publisher. He arranges a conference with the writer, perhaps takes him to lunch—a hallowed publishing tradition—and presents the idea to him.

They talk it over. The writer goes home, makes a rough working outline of what he thinks the book should be, maybe writes a chapter or two. Editor and writer confer again; revise, discuss and finally come to an agreement. A contract is signed and the author gets an advance on royalty.

And again there are times when a publisher is confronted with a problem something like this: Perhaps at a house party or at a bar or in a country jail he has met some one who has been the hero of a series of adventures that would make thrilling reading. This man may have looked upon strange corners of the globe or done things no man has done before. But he is not a writer.

It is at this point that the editor intervenes with the proper solution of the problem—a "ghost writer." Time was when a ghost writer was one of those persons who was known to exist, but who was never acknowledged openly. Within recent years, however, a much more rational attitude has sprung up toward this very useful workman.

The public has grown to realize that it is unreasonable to demand that a man should be a writer in addition to being a singer, explorer, song writer, aeronaut or lion tamer. The help of the ghost writer is now openly accepted and he is frequently given credit on the title page—and quite rightly so.

## Theories Are Put to Test

### Trench Fighting Now Obsolete, Strategists Maintain USE FEWER MEN

Rome.—Italian military authorities, calculating the results of the recent army manoeuvres, declared last week that trench warfare is obsolete.

#### TROOPS MOVE FASTER

This conclusion, they said results from their observations of the new rapidity in troop movements due partly to the greatly increased use of tanks.

They declared the first onslaught of tanks and fast moving troops would break through a line of trenches and force fighting out into the open. The movement would then become so rapid that there would be no opportunity to dig trenches nor would there be anything gained by digging them.

Contrasting the eventual war with the last they said that on the Western front when troops broke through, they entrenched themselves in new "inverted V" positions as they came up against machine gun fire.

#### FORCED RETIREMENT

The opposing forces then counter-attacked on the basis of the inverted V force the original attackers' retirement.

## Reducing Made Her Look Younger

### A Burden of Fat Gone

Here is another case where the trim, slim figure of youth has displaced the coarse, fat outline of middle age. It is a housekeeper writing. She says:—

"I cannot say what weight I was, but I was very fat — a burden to myself. I have taken three bottles of Kruschen Salts, and now I am quite slender. I am over 56, and people take me for 40. I am more than proud of myself. You can take it from me that every word of this is true. I took a teaspoonful in hot water every morning till I used three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough, for they are worth their weight in gold."—(Mrs.) A. H.

Kruschen Salts combat the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

In the eventual war, the Italian expert said, the attacking forces, after breaking through their enemy's lines, will not entrench but will continue to push forward with tanks. Consequently, the eventual war will be with the opposing forces moving back and forth much more rapidly over the battle territory with their gains and losses of ground much more considerable.

The experts said they also expected to fight the eventual war with much fewer men at the front, one reason being a greater use of mathematical weapons and another the difficulty of maintaining a service of supplies owing to enemy aircraft.

#### BRITAIN ACTS

London, Eng.—An increasing conviction that another war in Europe would be more open and mechanized than conflicts of the past has resulted in the creation this summer of Great Britain's first permanent tank brigade.

Explaining this important transformation within the army, a war office spokesman asserted that statements that "trench warfare has ended" are a matter of opinion. But the value of tanks is now firmly established, he added.

The ability of a large-sized tank force to make an effective move of 100 miles within 24 hours is no longer disputed, he said. But an important issue, he said, is the question of how much airplanes can interfere with the usefulness of tanks.

Only last week the first tank brigade participated in manoeuvres on the Wiltshire plains, while reconnoitering aircraft circled over the countryside across which the tanks were moving.

#### REFUSES TO COMMENT

While admitting that the planes were brought into the war game to make the effective operation of the tanks as difficult as possible, the war office spokesman declined to comment on the results of the manoeuvres.

Unofficial reports, however, said aviators found it difficult to keep sight of the tanks once they had deployed over the wooden countryside.

Three conditions tended to prevent a real test of the questions uppermost in the minds of British military authority.

First, privately-owned fences and other barriers which in war time would have been an obstacle, cramped the style of the tanks; second, that tanks were unaided by their own fighting aircraft, which normally would interfere with enemy planes; third, in real warfare the deductions of the enemy command would be likely to be more confused by many reports of tank movements.

#### IMPORTANT LESSON

It was understood that an important lesson learned in the manoeuvres was the ability of tanks to make changes in the direction of their movements without detection. It was also determined that they can be controlled easily despite wide dispersion.

The war office spokesman explained that prior to this year the British army possessed only temporary, separate tank units for training purposes.

The first brigade, now a permanent establishment, comprises a total of 205 tanks divided into four battalions. Three battalions are comprised of 27 medium and 2 light tanks each, while the fourth has 58 light tanks.

The concentration of tanks in one organization involves no increase in the total strength in tanks. The machines are up to 11 years old.

## News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

### Egg Exports

The outlook for egg exports to Great Britain this fall continues bright. The bulk of the exports will not start to move until October. With the storage stocks less than a year ago, the outlook for the egg market during the winter continues very favorable. Farmers are appreciating more and more the fact that poultry is providing a profitable route through which they may market some of their surplus grains.

### Killing the Flies

Most efforts to keep clear of stable flies have been restricted to spraying the flies on the cows. The suggestion is now made that the flies be fought in the stable as well. The idea is to spray while they are settled in the walls and ceiling. If this spraying is done in the early morning, it will be more effective as the flies are then sluggish in their movements. Late afternoon is also a good time. Close the stable and spray with a fine mist that fills the air. One part of formalin in 19 parts of milk or sweetened water makes a good and cheap spray. The same mixture may be left around in plates for the flies to drink. Keeping all manure cleared away from the stable and yards will remove breeding places for the flies, and reduce the nuisance. Where it is not convenient to move the manure to the fields, it should be kept in a screened shed.

### Apple Output Down

Early varieties of apples, which account for approximately 25 per cent. of the commercial crop in Ontario, yielded almost up to normal. The production of late varieties is most severely reduced, due to winter-killing of most exceptional proportions, and to frost damage at blossom time. The estimated commercial output of apples in Ontario is 320,600 barrels this year, as compared with 1,068,700 barrels in 1933. Exports of apples from Ontario, which attained a record volume of more than 500,000 barrels last season, are not expected to exceed 75,000 barrels this season. Early apples were in good demand, and prices received were considerably higher than for a number of years. Domestic prices of certain late varieties of apples may lift some of these varieties out of the potential export category, and in this event, exports from Ontario may be considerably below 75,000 barrels.

### Canadian Wool Clip

Canada uses about four million pounds of wool recovered from rags every year, in addition to her own domestic clip and imported supplies. The wool grown in Canada provides only about one-third of the requirement of the Canadian textile industry, so that the Dominion imports annually about eight million pounds of clean raw wool, and twelve million pounds of yarn and other semi-manufactures of wool. On the other hand, on an average about one-third of the wool grown in Canada is exported.

### Points on Hog Feeding

The big thing for the hog feeder to keep in mind, according to the Dominion Animal Husbandman, is, "the feeder needs the frame, but the packer wants the finish;" and the ideal type which sells as the "select" bacon hog must have both. Grow the frame first. Never feed more than the pigs will clean up; over-feeding, particularly of heavy or unbalanced rations, causes unthriftiness which in turn is the common cause of short, thick pigs. For the first four months, the pig should clean his trough and look for more.

### Good Care Essential

hTe properly balanced ration accomplishes wonderful results when fed to stock that is rightly bred, well managed and correctly housed.

Houses and equipment, such as brooders, feed hoppers, drinking pans, etc., that are sufficient to accommodate 100 chicks will not take care of 500. Satisfactory growth cannot be made under such conditions. Growing stock needs lots of feed; provide a good grain feed and a good growing mash in hoppers so the birds can get it.

condition of a carcass when it marketed depends almost entirely on the way the bird is cared

for up to the time it is killed. This means the way in which it is grown and the way it is fattened for market.

A poorly grown bird will not take on weight satisfactorily; its digestive organs have not developed sufficiently to handle the more or less concentrated feed that is fed during the fattening period, nor does the bird have the vitality to stand up under this fattening process.

### Current Crop Report

Frequent showers during the past two weeks in most parts of Ontario have freshened pastures and created good growing conditions for late crops which escaped frost injury. The rain has also materially assisted plowing, and many farmers have already begun this fall operation. Sowing of fall wheat is now under way. Prospects for fall feed are still below normal, and dairy cattle in some districts are being fed corn and other feed crops to supplement pasture. Generally speaking, livestock are not in as good condition as usual, owing to lack of feed. The early apple crop has been moving freely to the trade, with Dutchess virtually cleaned out, and Wealthies selling at fairly good prices. The yield of tomatoes will be light, but quality good. Some reports of excellent yields of grain are coming in from various counties.

Cutting of corn is under way and a good general harvest will assist to offset the shortage of other winter feed. Root crops promise an average yield, except sugar beets, which will be 30 to 50 p.c. under normal. The apple crop will be one-third or more below average, while peaches are estimated at only one-half an average crop. Good weather is needed to complete the harvest of flue-cured tobacco, already greatly impaired by frost and hail.

### Air and Potatoes

Careless storing of wet potatoes is responsible for unnecessary annual losses. Potatoes ought to be stored dry in a cool, well-ventilated cellar, which is perfectly dark. Piling potatoes in heaps in warm and poorly ventilated cellars creates the most favorable conditions for rotting. Before placing the potatoes in a cellar, wooden slats slightly apart should be nailed about six inches or more from the wall, and a temporary floor with cracks between the boards should be laid about six inches above the permanent floor. This will ensure air to circulate around and under the pile of potatoes. If it should so happen that the pile has to be very large, square ventilators made of wooden slats and running from top to bottom of the pile should be put in here and there. Together with the circulation of air at the sides and at the bottom of the pile, these ventilators will keep the potatoes in a much better condition than if they were in a solid pile. Another good plan is to keep the potatoes in large crates made with slats, the ventilation between the crates assisting very much in keeping the potatoes in good condition. The temperature of the storehouse or cellar should be kept at nearly 33 or 35 degrees F. as possible.

### MR. WARREN C. RAE

After a lingering illness, there passed away on Tuesday, Sept. 18, at his residence, River Road, west of Iroquois, a Great War veteran, in the person of Warren Clifford Rae. The deceased, who was in his 38th year, was born in Winchester township, the seventh of a family of ten children born to James Rae and Ellen Jamieson, farmers of the township.

In 1916 the late Mr. Rae joined the 154th Battalion as a sapper, and that same year left for France, where he served until after the armistice was signed, when he returned home, gassed. In 1920 he moved to Iroquois, and farmed for nine years, suffering poor health most of the time. In 1929 he entered the employ of the Department of Railways and Canals as a lock-hand, but was compelled to retire from work last fall, on account of ill health and had been failing gradually ever since.

In 1916 he married Vera Marcell, of Winchester, and to them was born one child, Beatrice. Possessed of a

fine character and kindly disposition, he made many friends.

The funeral service was military in character, and was held on Thursday at 1.30 p.m. at his late residence, with Rev. T. Knowles in charge. The cortege afterwards proceeded to Maple Ridge cemetery.

Mourning his loss, besides his widow and daughter, are five brothers, four of whom served in the Great War. They are: John, of Briercrest, Sask.; Oscar, of Shoal Lake, Man.; Edward, of Delavan, Sask.; Cecil, at Inkerman. Two sisters also survive, namely, Lillian, of Ottawa, and Mrs. McIntosh, of Winchester Springs.

### SUDDEN ARREST HAILED

#### AS END OF LONG SEARCH

New York, Sept. 20.—In swift, dramatic moves by the Lindbergh kidnapping case, police today announced the arrest of Bernard Richard Hauptmann, a German alien and the finding of part of the ransom money, and declared that a solution of one of the greatest mysteries of modern time was assured. Police Commissioner John F. O'Ryan, who announced that \$13,750 of the \$50,000 ransom money paid for the baby, later found dead, was found in Hauptmann's cellar in the Bronx, was asked:

"In your opinion, does this solve the Lindbergh kidnapping?"

General O'Ryan conferred for a few minutes with J. Edgar Hoover, head of the Bureau of Investigation of the United States Department of Justice, and said:

"Yes, it will."

After an afternoon filled with sensational rumors that the "break" long awaited had come, General O'Ryan emerged from secret conferences with Hoover and others at the Greenwich Police Station, and issued this terse statement:

"We have in custody the man who received the ransom money. He is Bernard Richard Hauptmann, of 1279 East 222nd Street, the Bronx. He is an alien, who came to this country as a stow away eleven years ago."

Among those at the police station was the man of many missions in the long hunt—"Jafsie"—Dr. John A. F. Condon, aged welfare worker, drawn into the search by the noted aviator, after other intermediaries

had failed.

It was "Jafsie" who paid the \$50,000 to the supposed kidnappers on the night of April 2, 1932, at a cemetery in the Bronx, a month after the kidnapping.

After the announcement of the arrest, General O'Ryan said Hauptmann was identified positively as the recipient of the ransom money, in the cemetery.

The identification was made by "witnesses," O'Ryan said. This was taken to mean "Jafsie" had seen the prisoner and had made the identification.

Hauptmann, placed in the prisoners' line-up later, was also identified by John Perrone, Bronx taxi-driver, as the man who, two days after "Jafsie" advertised himself as the Lindbergh negotiator, gave him a dollar to deliver a note to the Condor home. Hauptmann was in line with other prisoners. Perrone was led in.

"Pick out the man who handed you that note," Perrone was told.

Without hesitation, the taxi driver tapped Hauptmann on the shoulder.

"This is the man," he said.

Hauptmann had been closely watched by police and Federal agents since he paid for gasoline at a filling station several weeks ago with a \$10 gold certificate, identified by serial numbers issued to all banks as one of those in the ransom pay-off. The filling station proprietor remembering that gold certificates had been called in by the Treasurer, became suspicious, and notified police.

Hauptmann, it was reported, was driving an automobile identified as one stolen near Lakewood, N.J., the day before the Lindbergh baby, Charles Augustus Jr., was stolen from his crib in the second-floor nursery of the secluded Lindbergh home, in the Soudland Mountain district, near Hopewell, on the night of March 1, 1932.

### CASTORIA

For Infants and Children  
In Use For Over 30 Years

Always bears the  
Signature of *Dr. H. H. Hatcher*

### LABATT CASE SUSPECT SURRENDERS TO POLICE

Asserting he did not "have the first thing to do with this kidnapping," David Meisner, one of two men sought by Canadian and Detroit authorities in connection with the kidnapping a month ago of John Labatt, Ontario brewer, surrendered to detectives at Detroit, yesterday.

Meisner said he could produce "all the witnesses in the world—even policemen," to prove he was in Cincinnati at the time of the kidnapping for \$50,000 which, so far as known, has not been paid to date.

He surrendered to Inspector John Hoffman of the special investigation squad, after making an appointment Thursday afternoon. Hoffman said Meisner surrendered without any conditions.

The other man sought is Albert Pegram.

"I didn't have the first thing to do with this kidnapping; I don't know who pulled the snatch, and I don't know the first of the details," said Meisner. "I want to get myself out from under this indictment."

"I was at my home in Cincinnati during the whole time. I've got all kinds of witnesses—all the witnesses in the world. I can even bring up policemen to prove I was in Cincinnati."

Meisner said he was "willing to bring my witnesses to Detroit and they (the Canadian authorities and the Labatt family) can bring theirs over, too, and we'll go to bat here. If I can't satisfy these people that I didn't have anything to do with this kidnapping, I'll go to Canada or be arrested, without an extradition fight."

Meisner declared he was surrendering to Hoffman, because he felt sure of a square deal.

He added that, although he was not of the opinion he would be "railroaded" in Canada, he felt the thing was too big on that side of the border for him to be treated imprudently.

### MRS. HEBER HILL

Mrs. Heber Hill, nee Agnes Elizabeth Ray, passed away quietly at her home in Cornwall, after an illness of over three years. Mrs. Hill was born in Aultsville in 1880, and married to Heber Hill in 1901. Five children were born to this union.

### BUSINESS OPPORTUNITY

A retail business in books, stationery, school supplies, china, wallpaper and sporting goods is offered for sale. Premises may be bought or leased by responsible party. For further particulars, write P.O. BOX 569, Prescott, Ontario.

### The Leader

#### SUBSCRIPTION RATES

\$1.50 per year, strictly in advance to any address in Canada; when not paid within three months, \$2.00 per year to any address in Canada. Foreign subscriptions, \$2.00 in advance. All subscriptions date from the first day of the month.

#### ADVERTISING RATES

Display or open advertisements, one insertion, 50c per inch; second and following insertions, 35c per inch; 200 inches and over, by contract, not over one year, 20c per inch. All Legal, Government and Municipal display advertisements will be charged at 50c per inch, regardless of number of inches or number of insertions.

200 inches or more must be reserved at time of making contract in order to earn the 20c per inch rate, and no rebate will be allowed the advertiser, should more than 200 inches be taken out within one year without having been reserved by contract.

Should the advertiser fail to take out the number of inches contracted for, the amount of space used will be charged at the regular rate in force at the time of making contract.

Lost, Found, To Let, Wanted, Articles for Sale, etc., 5 lines and less, first insertion, 50c; each subsequent insertion, 35c.

NOTE—All small advertisements received by mail must be paid in advance.

Government, Legal and Municipal Notices, By-Laws, Election Returns, etc.: 15c per line for the first insertion; 10c per line for each subsequent insertion; 12 lines to the inch.

Advertisements ordered for insertion without instruction will be published until instructions are received to discontinue same.

Notwithstanding anything to the contrary that may appear in any contract, cuts left in our possession more than 30 days after date of insertion will be destroyed.

### NEW BANK NOTES COMING

Canada's new bank notes, to be issued in about four months, will be smaller than the present bills, but slightly shorter and wider than United States money. It is reported they will be 6 inches long, and 2 7/8 inches wide. The notes are now being printed, and will be issued when the Bank of Canada starts operations. It is reported they will bear the pictures of the King and Queen, and Prince of Wales.

### GEORGE AULT HANES

At his home in Chicago, Ill., on Thursday, Sept. 13th, George Ault Hanes passed suddenly away, after a few days' illness, in his 22nd year. Funeral services were held at Chicago on Sept. 15th. Besides his parents, Mr. and Mrs. Geo. H. Hanes, he leaves to mourn his loss, two sisters, Mary and Nell. The family, with Mr. and Mrs. Garnet Hanes, of Chicago, accompanied the remains on Sunday Sept. 16th, to Aultsville, Ont. The body rested at the home of his uncle, Mr. Claude Hanes, until Monday afternoon, when interment took place in the cemetery at Aultsville, with Rev. Mr. Morrison officiating.

Many beautiful flowers came with the remains, and more from those who loved him here testified to the sympathy felt for the family in their bereavement.

This young man's death was especially sad, since he was graduated this June from the Armour Institute of Technology, with the degree of Bachelor of Science in Mechanical Engineering.

### MRS. SARAH McINTOSH

There passed away at the home of her daughter, Mrs. G.H. Caldwell, Second Concession, Matilda, on Tuesday Sept. 4th, an old and respected resident, in the person of Mrs. Sarah McIntosh, in her 92nd year.

Deceased, whose maiden name was Sarah Hanes, a daughter of the late Jacob and Hanna Hanes, of Matilda, was the last member of that family. Despite her advanced age, deceased retained all her faculties, and had enjoyed good health until a few days previous to her death.

The funeral was held at her daughter's home, the service being conducted by Rev. T. Knowles, of Iroquois. Interment was made in Hainsville cemetery.

Surviving are her daughter, Mrs. G.H. Caldwell; eleven grandchildren and five great grandchildren.

## BANK OF CANADA

CAPITAL \$5,000,000

Divided into 100,000 Shares of \$50.00 Each

The Minister of Finance, pursuant to the provisions of the Bank of Canada Act, offers for public subscription:

100,000 Shares of the Capital Stock of the

BANK OF CANADA

Issue Price: \$50.00 a Share

PAYABLE AS FOLLOWS:

On Application - \$12.50 a Share  
On Jan. 2, 1935 - \$37.50 a Share

The Bank of Canada has been incorporated by the Parliament of Canada and given wide powers to operate as a central bank of issue and rediscount for Canada.

The Bank is authorized to pay cumulative dividends from its profits, after provision for expenses, depreciation, etc., at the rate of 4 1/2% per annum, payable half-yearly. Surplus profits are to be applied to the rest fund of the Bank or paid into the Consolidated Revenue Fund as provided by the Bank of Canada Act.

Not more than 50 shares may be held by or for the benefit of any one person. Shareholders must be British subjects ordinarily resident in Canada or corporations organized under Dominion or provincial laws and controlled by British subjects ordinarily resident in Canada.

Subscriptions should be mailed to the Minister of Finance, Ottawa, in envelopes marked "Bank of Canada Shares."

Payment must be made by a certified cheque on a chartered bank or by a bank draft or post office or express company money order, payable to the Receiver General of Canada.

As soon as possible after subscriptions have been received, allotments will be made and notice of the allotment will be mailed to the post office address furnished by the subscriber.

Further particulars will be found in the official prospectus and application form which may be obtained at the Department of Finance, the offices of the Assistant Receivers General, post offices, any branch of any chartered bank, and other financial institutions.

The Subscription List will open on September 17, 1934, and close on or before September 21, 1934, with or without notice, at the discretion of the Minister of Finance.

DEPARTMENT OF FINANCE, OTTAWA,  
SEPTEMBER 17, 1934.

## Night Noises Nil As London Sleeps

London — London's campaign to quiet the big city during sleeping hours was inaugurated with success recently. There was a stillness for 7½ hours that astonished the town.

By order of the Ministry of Transport, the sounding of automobile horns and sirens was prohibited between 11:30 p.m. and 7 a.m. in a five-mile area from Charing Cross. Motorists showed a readiness to respond and 3000 extra police, posted throughout the area, were rarely obliged to caution drivers.

Even the late-night outpouring from theaters with the usual frantic demand for taxis was conducted in comparative silence. When the first glint of sunrise burnished the cross of St. Paul's, market gardeners' lorries rumbled toward Covent Garden without a single blast.

### "QUAINT" HUMOR

The quaint humor of the Scottish bench in former days was illustrated by the sentence of one of the judges, "Ye're a very clever chiel, but ye'll be nane the waur o' a hangin'."

Issue No. 37-'34

## The TUDOR HOUSE

By MRS. STANLEY WRENCH

(Author of "Sing for the Moon" "Strange Lovers," etc.).

### SYNOPSIS

Michael Borde, 40, unmarried, born and bred in a Birmingham slum, is now a wealthy motor manufacturer. One day he visits the countryside around his old home and rescues Daphne Eden from a menacing tramp. He falls in love and proposes. Daphne accepts and introduces him to her father, who greets him with the words: "Get out of here you cur—you ruined my home—stole my wife—curse you!"

Daphne's father dies and she disappears. Michael explains to her friend, Mrs. Gregory, that he was misrepresented. He buys the old Tudor House owned by the Hamill-Hardys. Mrs. Gregory promises to mail a letter from him to Daphne.

"Why didn't I think of that? Of course, if Daphne's mother were found I could prove there was nothing in it," he said. "She may be dead, though."

For some time he sat musing. At one time Michael Borde would have declared arrogantly that with money you could do anything. Experience had taught him that money did not always yield results so quickly as he imagined, for in spite of all he had done to find Daphne's whereabouts he was none the wiser. With a woman like Mrs. Eden, however, as he remembered her, and it was odd to find how little he could remember and how blurred her image had grown, it might not be so difficult. If as Richard Eden had declared so vehemently, she was supposed to have eloped with him, it looked as though she had quitted that Midland town about the time he left, therefore her destination might be traceable. It was certain she had not gone back to Eden, and unless she were dead . . . here he shrugged his shoulders.

"Her sort don't die young," was what Michael Borde said rather bitterly. It was very annoying to find that a woman for whom he'd not cared twopenny should have power, after all these years, to work such disturbance. And in the first affair of the heart he had ever had.

He suddenly buried his face in his hands. Yes, he did care, he cared terribly. Daphne had become a disturbance in his life. He felt that he would never be able to concentrate upon business in the same way until once and for all he had discovered whether she would marry him now. It was difficult to write the letter, without giving himself away. He badly wanted to tell the whole unvarnished story, explain himself, for he thought it would be so easy. But since Lorna Gregory had advised the other thing, he simply begged Daphne to meet him in order to clear things up.

"Until you have heard what I have to say, Daphne, don't utter a word," he wrote. "I'm the prisoner at the bar, waiting to be judged. But any prisoner, even the lowest of the low, is given a chance to plead. I don't even ask for that. All I want is for you to give me the opportunity to state facts. Please be fair. Meet me at Stratford-on-Avon on Saturday at two o'clock. I will wait in the garden behind Shakespeare's house. If you prefer some other time or place, please let me know. Otherwise, I will wait there, and until you have told me you have cast me out of your heart for ever I shall still sign myself your devoted Michael."

The next day he handed this to Mrs. Gregory, watched her seal this in her own letter, and when the postman came with a delivery, she handed this to him with her other correspondence to be posted.

"I always do that," she said. "It saves that long walk down to the village. The Birches are not ordinary people, although she is postmistress and he is now acting postman. I'd like you to meet her some time, a charming woman. She has written to thank me today, just because I enquired of Denis. You can see the handwriting is that of an educated person."

He read the short note, passing it back with a smile. "Now Daphne knows I am here," he observed, "and she knows you must have told me that you know where she is. I haven't given her long in which to make up her mind, but, at any rate, if Saturday isn't convenient to her, it gives her a chance to let me know not to go on a wild goose chase."

That boyish smile, so anxiously asking for reassurance, again lit up his eyes.

### "WILL SHE COME?"

"I think she'll come, Michael," said Mrs. Gregory quietly. And in her heart Lorna Gregory believed what she said.

"If I were twenty years younger I should have fallen in love with you myself," she told him, and with a curiously shy gesture he got up and kissed her hand.

What Lorna Gregory thought then she did not voice aloud.

"What a proud woman I should be

to-day if I had a son like you," she told herself, and after he had gone she sat looking very thoughtful.

"I believe I'll do it," she said. "After all, he will live here at Wemburgh Lucy now. The land will be his."

She wrote a letter to her solicitor that evening asking him to come and see her the following week, as there was something in her will she wished to alter, and mentioning certain investments.

"I want you to be prepared for a somewhat drastic proposition from me," she wrote. "I have an excellent reason behind, which I will explain personally, as it is impossible to explain by letter all I have in mind. That I do not wish to make these changes hurriedly, I have suggested this day week for your consultation, as this leaves me time to think over what I have in mind."

That letter was posted, and in the meantime she received a reply from Daphne, but in it she made no mention of Michael Borde, or the enclosure in the letter from Mrs. Gregory which she now answered. On the assumption, however, that "no news is good news," and that no mention of Michael means that she intended to meet him, Lorna Gregory watched him set off in the Multiple racing model, wondering why she should have impressed so fustily upon him the need to be cautious, over driving.

"I'm like an old hen with her chickens, today," she told herself, as she lay back in her chair. "What do I know about modern cars? He must have thought me a fool."

He had smiled back in that charming, although cocksure way of his, waved his hand, and as that sharp pain ran over her body again, Lorna Gregory closed her eyes. Years ago that terrible accident in the hunting field had crippled her, and there were days, as now, when as well as physical pain, black spells of utter melancholia enveloped her, so that she was unable to think coherently.

A presentiment of evil hung around her, but this had happened before, and like a woman possessed of second sight, as she lay with closed eyes, she followed Michael on his journey along the white dusty road that wound from the bottom of the hills to Shakespeare land. Once or twice she plucked at the fringes of the cashmere shawl wrapped about her like one who counts a charm.

"Will she come . . . she will. She won't. . . I wonder if she will," ran the jumble of her thoughts.

Then that sharp stabbing pain ran through her again, she caught her breath, and out of a spell of what might have been unconsciousness heard the cuckoo calling down the vale, his cry answered from tree to tree. Hawthorn blossom scented the air, syringa hung budded beside her, ready to break into sweetness when the lilac was over, and near her feet a bed of green leaves held lilies of the valley, reminding her of Daphne again, for she had planted them here, so as to be near the house when Mrs. Gregory had been ill.

There were cowslips, too, Mother Mary's blossoms, another whim of Daphne's planting, for finding how much Mrs. Gregory loved their freckled favours, she had transplanted clumps from the meadows, bringing Ariel's messengers to the garden. Often she had told Daphne Eden she had "green fingers," since all she planted seemed to flourish.

Her eyes went to her watch. Michael would almost be there now. She plucked at her shawl again.

"Will she come . . . I wonder. Of course she will. She loves him. She must come . . . or I must find some other way . . ."

Meanwhile, all unconscious that he was the subject of her thoughts, Michael Borde waited, and he took out his watch. He was ahead of time. "Well, I've never been late for an appointment in my life," ran his thoughts. "Time is money. Haven't I dinned that into my brain from time everlasting? Take care of the minutes, and the hours will take care of themselves."

(To Be Continued.)

### Plumbing May Be Cause Of Amoebic Dysentery

Toronto—Prevention of amoebic dysentery by the inspection of plumbing in all of the larger and older buildings in the United States and Canada was the chief topic to be discussed by sanitary engineers at the international convention of the American Society of Sanitary Engineers held here.

The hazards of defective plumbing in older buildings as illustrated by the epidemic of amoebic dysentery in Chicago were dealt with by Thomas J. Claffy of the department of sanitary engineers of the Chicago Board of Health.

## What Does Your Handwriting Reveal?

GEO. ST. CLAIR

(Grapho-Analyst)

All Rights Reserved.

(Editor's Note: The striking interest in Character Reading from Handwriting is shown in the number of requests from readers who wish to have their own handwriting analysed, as well as that of their friends. Have YOU had YOURS analysed? The announcement following this article will interest you.

This week I am illustrating the writing of a lady with a rather strong character. This lady has a good deal of capacity for emotional feeling, but she also has, what in her case is a compensating factor, a strong mind. She feels deeply, but she also brings her mind into play, and uses her judgement.

*This is a sample  
handwriting.*

There are people who have a tremendous capacity for emotional feeling, and who are ruled completely by their feelings. They do things impulsively, without any careful pre-judgement, and are swayed hither and yon as their emotions dictate.

Not so with this lady! She feels deeply, and will often feel sympathetically disposed to other people. But her mind will prevent her from going to excess. She may be generous, but it will be a reasoned generosity, and not the blind impulsive generosity of people who are governed entirely by their heart and emotions.

In her particular case, there is another trait. She is inclined to consider her own self-interest in doing anything. She will be inclined to ask herself the question: What do I get out of this?

This lady has a very quick-thinking mind. She arrives at conclusions in a flash. Note the sharp-pointed 's' and 'm's. And she has a facile mind, also. Observe how the loop of the 'g' turns to the right, instead of normally twirling to the left, as most people do with this letter.

## Women Not Lonely In North

Eleven Hundred Miles From Civilization, There is so Much To Do and There are Many Visitors.

Cameron Bay, N.W.T. — "The Great Lone Land," it has often been called, but to the women who live on the Arctic rim the north country is far from lonely.

Eleven hundred miles from civilization, the few women living at Cameron Bay, mining settlement on Great Bear Lake are always busy and, even when cut off from civilization by the "in-between" season find plenty to do.

The two six weeks periods of "break-up" and "freeze-up" when nature opens and closes the waterways, are standout dates in the life of those northern dwellers. It is from these two seasons the women of Cameron Bay date all the events of their lives.

In the tiny log cabin village, Mrs. T. O. Byrnes, wife of the resident doctor, sometimes helps her husband with his cases and amuses herself with her radio and magazines brought in by airplane. Then there

is always her housework which in the primitive life of the north necessitates expending considerably more effort than that required by the city housewife. Mrs. Byrnes goes on occasional trips to the Great Bear Lake mines with the dog teams in the winter time. She is a graduate of St. Joseph's hospital, Toronto, and has lived at Cameron Bay for a year.

To Mrs. H. Reed, wife of the owner of View Inn, the long day is just one big round of visits from the trappers, miners, traders and policemen to whom the hotel is a rendezvous. A native of Spokane, Wash., Mrs. Reed has been at Cameron Bay for two years and is assisted by Mlle. Marie Onrat who came from Quebec City a year ago to visit her brother in the mines.

Marie became fascinated with the north country and is in no hurry to go home. In her few leisure hours she takes pictures, makes dresses, goes canoeing in the summer and in the winter goes for long drives behind her dogs.

Anne Swanson, daughter of the general storekeeper has a different set of activities. She spends her spare summer hours cultivating her tiny garden. In the winter there are bridge games and the occasional party to be attended.

But the gold grubbers of Great Bear hand the palm to Mrs. W. H. McDougall. Day after day "Ma" McDougall mends socks, overalls, mukluks, parkas and other garments for her "boys." She was born at Hay River, N.W.T., and has spent her whole life in the north.

## Film Players To Be Married

HEATHER ANGEL LEAVES FOR YUMA BY CAR WITH RALPH FORBES

Hollywood, Calif.—Ralph Forbes and Heather Angel, film players, are on their way to Yuma, Ariz., by automobile to be married.

Forbes, former husband of Ruth Chatterton, met Miss Angel about a year ago at a dinner party. They did not see much of each other for several months. Then six weeks ago they met again on a tennis court at the home of Charles Boyer and his wife, Pat Patterson, screen players. The romance began in earnest.

"We talked it over and thought ought to make our romance a permanent institution," said Forbes before they departed for Yuma. "I am sure we will be very happy," said Miss Angel.

She was brought to Hollywood from England by the Fox Studio and has just completed a picture, "Romance in the Rain."

## Mae West Gvies Big Gifts to Caste

Hollywood.—Mae West has passed around \$15,000 in presents to those who helped make and remake her latest picture, "Belle of the 90's," it was recently disclosed at her studio.

One of the gifts, a \$1,000 diamond ring, was instrumental in proving that the actress knows her jewels. The ring was too small for the recipient and he left it at a jeweler's to have it made larger. Miss West saw him wearing it at the studio and noticed the original blue-white sparkler had been replaced by a yellow diamond. In 15 minutes she was demanding how it happened and the jeweler insisted it was a mistake.

## Lord Montague Is Hot Dog Vendor

London, Eng.—Lord Edward Montagu, second son of the Duke of Manchester, is running a hot dog stand and making money, the Daily Express declares.

He started business at Maidenhead, famous Thames riverside resort, on Saturday with £1 (about \$5) in cash and said he made £4 within 24 hours. He sells hot dogs, coffee, soft drinks and sandwiches.

Lord Edward, who is 28, said he hopes to start a chain of stands.

"I think this is better than the French Foreign Legion," he said. Early this month he went to France to join the Foreign Legion but changed his mind at the last minute.

### Makes Good

London, Eng.—A Scotland Yard detective disguised himself as an ex-sailor selling matches, when he was in search of a "wanted" man. In this disguise he stood on a London sidewalk for six days and eventually secured his man. In the six days he also received nearly \$40 from kind-hearted passersby.

The authorities of Scotland Yard have ordered that the money shall be paid into the police funds. They consider the money was earned in the employer's time, and therefore belongs to the state.

## FALSE TEETH

Dr. WERNET'S POWDER

Dr. Wernet's Powder holds false plates so firmly and comfortably in place for 24 hours—they actually feel natural—eat, laugh, sing without fear of any slipping. Prescribed by world's most eminent dentists—they know it's the best—just sprinkle on. Inexpensive—any drugstore.

## Ideas Wanted

Artists and Authors, Amateur or Professional are invited to send us saleable Sketches, Illustrations, Designs, Short Stories and Articles.

### Are You Artistically Inclined?

We offer you practical instruction and criticism on Paintings, Landscapes and Flowers in Water Colours. Send a three cent stamped envelope for full information.

Vegetable Compound

## Woman's World

By Mair M. Morgan

### LEFT-OVERS

Some left-over dishes are so delicious that no apology is necessary even when guests are present. Here are two recipes—one for a meat dish and the other for a vegetable delicacy. Note how each calls for sugar—an ingredient that brings out the flavor and goes far toward making the dish a success.

### Hem Moulds

1 cup cooked ham, chopped fine  
2 tablespoons butter  
1/4 cup stale bread crumbs  
2-3 cup milk  
1 egg  
1 teaspoon sugar  
Salt and pepper  
Melt butter. Add bread crumbs and milk. Cook five minutes, stirring constantly. Add ham, egg slightly beaten, and seasonings, including sugar. Pour into buttered custard cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with a white sauce.

### Carrot Tips

Cut cooked carrots in cubes, reheat in medium white sauce seasoned with salt, pepper and a little sugar. Cut into rounds and rings, using a doughnut cutter for the latter. Toast the rings and rounds. Arrange a ring on each round, and fill with the creamed carrots. Garnish with parsley.

### ECONOMICAL AND TASTY

*Simmons Collage Peach Ice Cream*  
4 tablets for junket  
2 quarts milk  
1 pint cream  
1 cupful sugar  
2 teaspoonfuls vanilla  
3 cups crushed, sweetened peaches

Warm milk and cream slightly, add sugar and vanilla. Dissolve tablet for junket in one tablespoon cold water, stir into milk mixture quickly, pour into freezer can and let set until firm and cool. Place can in freezer, pack with ice and salt and freeze to thick mush. Add the crushed, sweetened peaches. Finish freezing. Save part of peaches to serve on top.

### Pumpkin Pie

1 1/2 cup steamed and strained pumpkin  
2-3 cup brown sugar  
1 teaspoon cinnamon  
1/2 teaspoon ginger  
1/2 teaspoon salt  
2 eggs (slightly beaten)  
2 tablespoons melted butter  
1 1/2 cups milk  
Mix first six ingredients together, add the melted butter and milk last. Line a pie plate with crust—build up around the edges. Bake in a moderate oven until it is set.

### English Rarebit

1 cup stale bread crumbs  
2 cups milk  
2 tablespoons butter  
Few grains cayenne  
1/2 cup soft mild cheese cut in small pieces  
1 egg  
1/2 teaspoon salt  
1 teaspoonful sauce  
Soak bread crumbs in milk. Melt butter, add crumbs and cheese. When cheese is melted, add egg slightly beaten and seasonings. Cook 3 minutes, and pour over fried tomatoes or toasted crackers. Serves six.

### DAINTIES FROM CANS

Keep a supply of canned goods on your emergency shelf and you need never worry about what to serve as a pleasing surprise dish when company comes. Here are two recipes for dishes that I feel sure will please the most discriminating taste:

### Pea Souffle

1 cup pureed peas  
4 tablespoons flour

4 tablespoons butter

1 cup milk

3 eggs

1 small onion chopped

1/2 teaspoon sugar

1/2 teaspoon salt

1/2 teaspoon paprika

Dash white pepper

1 tablespoon tomato catsup

Cook onion and seasonings in the fat until golden brown. Add flour and then milk as for a white sauce, stirring constantly. Remove from fire and add pea puree, heating until smooth. Beat in egg yolks thoroughly. Fold in stiffly beaten egg whites. Pour into a well greased baking dish and bake in a moderate oven, 375 degrees for about 30 minutes—until the souffle has puffed and is a delicate brown.

### Salmon Supreme

1 can salmon; 2 raw potatoes, sliced; 1 medium sized onion, sliced; 1 cup catsup; salt and pepper to taste. Slice a layer of potato in a glass baking dish, add layer of onion, salt and pepper to taste, then layer of salmon, then catsup. Continue until dish is filled. Bake for 1 hour. Garnish with French fried Bermuda onions.

How to French fry Bermuda onions: Cut onion in slices through rings so that each slice will make a large number of whole rings. Break slices into separate rings, drop these into thin batter and fry in a frying basket. Batter: 2 egg yolks, 1/2 cup sweet milk, 1/4 cup pastry flour, 1/2 teaspoon salt. Beat egg yolks light, add milk, flour and salt sifted together, beating ingredients together with egg beater.

### COOKIES FOR SCHOOL LUNCH

If the youngsters had a vote, cookies would head the list of delicacies for that school lunch basket. With sandwiches, fruit and a vacuum bottle of milk or a chocolate milk shake, they provide just the nutriment value required for rosy cheeks.

Use these short-cut, economical recipes and give your Bobby or Betty two or three extra ones in the school lunch box as a treat for friends.

### Peanut Butter Hermits

1 cup sweetened condensed milk  
6 tablespoons peanut butter  
1/4 teaspoon salt  
3/4 cup graham cracker crumbs  
Thoroughly blend together sweetened condensed milk and peanut butter. Add salt and graham cracker crumbs. Mix well. Drop by spoonfuls on buttered baking sheet. Bake 15 minutes or until brown in a moderately hot oven (375 degrees F.) Remove from pan immediately. Makes 1 1/2 dozen.

### Fruited Oatmeal Drops

1 1-3 cups (1 can) sweetened condensed milk  
1/4 cup molasses  
2 cups rolled oats  
1/2 cup nut meats, chopped  
1/2 cup seedless raisins  
Thoroughly blend sweetened condensed milk molasses and rolled oats in top of double boiler. Cook over boiling water 10 minutes or until mixture thickens, stirring constantly. Cool. Add nut meats and raisins. Mix well. Drop by spoonfuls on a buttered pan. Bake 15 minutes in a moderate oven (350 degrees F.). Remove from pan immediately. Makes 3 dozen.

### A HINT

Baking-boards and rolling pins will dry snow-white if wiped over with a cloth dipped in a saucer of water that has been mixed with a tablespoon peroxide of hydrogen.

### PERFECT CUP OF TEA

The Salada Tea Company offer the following suggestions for securing the best results in making tea:

The figures that registered a 9 to 1 triumph for Adolf Hitler in Germany's recent plebiscite are being scanned here by the leader-chancellor and his aides in the garden of the Berlin chancellery, after the vote had been counted. Left to right are Hitler, Dr. Paul Joseph Goebbels, minister of propaganda; and Minister Kerrl. Behind them in uniform is Adjutant Group-Leader Bruckner.

## The Sunday School Lesson

Lesson XIII.—September 23. *Isaiah Counsels Rulers.*—Isaiah, Chapters 7, 31, 36 and 37. Golden Text.—Thou wilt keep him in perfect peace, whose mind is stayed on thee; because he trusteth in thee.—Isa. 26:3.

TIME.—Unsuccessful invasion of Judah by Rezin and Pekah, B.C. 737. Unsuccessful invasion by Sennacherib, B.C. 701.

PLACE.—Jerusalem.

"Woe to them that go down to Egypt for help." Like all the other Hebrew prophets, Isaiah was a statesman as well as a preacher. He knew that the military strength of Egypt was grossly exaggerated, and he had no confidence whatever that Egypt would keep faith with Judah. "And rely on horses." Judah was a hilly country, and never could employ horses in warfare. "And trust in chariots because they are many, and in horsemen because they are very strong." The level plains of Egypt had always prompted that nation to the development of cavalry and the use of chariots. "But they look not unto the Holy One of Israel, neither seek Jehovah!" God to Isaiah is not simply high and lifted up, but he is a God of character. He is the God of Purity and Cleanliness. He is the God of Righteousness.

"Yet also he is wise." Isaiah is tremendously sarcastic here. "And will bring evil." He will bring evil on those that bring evil upon the world, as Isaiah goes on to say. "And will not call back his words." God will not withdraw his warnings; he cannot, for they spring from essential truth. "But will rise against the house of evil-doers." That is, against the company of foolish statesmen that are forcing Judah into this baleful connection with Egypt. "And against the help of them that work iniquity."

"Now the Egyptians are men, and not God." The Pharaoh of Egypt was worshipped as a god, and the people of Judah were placing their trust in the Egyptian army as if it were God and not a set of weak mortals. "And their horses flesh, and not spirit." The nobles of Judah seemed to rely on the Egyptian horses as if they were supernatural beings, able to charge against any foe and sweep them down. "And when Jehovah shall exercise his omnipotence, fulfilling the warnings he has uttered by his prophet. "Both he that helpeth (Egypt) shall stumble, and he that is helped (Judah) shall fall, and they shall be consumed together."

Both Egypt and Judah will be involved in a common destruction.

"For thus saith Jehovah unto me." God's word follows, in opposition to the foolish and empty words of the Jewish nobles who trust in Egypt.

"As the lion and the young lion growling over his prey." Lions were common in Palestine in ancient days. "If a multitude of shepherds be called forth against him." As the leaders of Judah are summoning in their alarm the multitude of Egyptian horsemen and chariots. "Will not be dismayed at their voice, nor abase himself for the noise of them." The king of beasts with his roar will put down the weak shouts of men. "So will Jehovah of hosts." Jehovah Sabaoth, the most majestic of God's titles. "Come down to fight upon mount Zion, and upon the hill thereof." Mount Zion was the original Jebusite stronghold captured by David.

"As birds hovering, so will Jehovah of hosts protect Jerusalem." Listen to this expansion of the metaphor of the hovering mother-bird in one of the Psalms: "He shall cover thee with his feathers, and under his wings shalt thou trust." "He will protect and deliver it, he will pass over and preserve it." As the death angel passed over the houses of the Israelites in Egypt, marked by the blood of the lamb sprinkled on doorposts and lintels, and did not slay the first-born there, so God spares his children and saves them from their doom.

"Turn ye unto him from whom ye have deeply revolted, O children of Israel." Then, as ever, this was the sum and substance of the prophet's teaching, conversion; with that, all was hope; without it, all was fear.

"For in that day." The day of the fall of the Assyrians at the hand of Jehovah, foretold in the next verse. "They shall cast away every man his idols of silver, and his idols of gold." In that day the Jews will see how vain was the Assyrian's trust in their idols. "Which your own hands have made unto you for a sin." "For a sin" means "to be to you an abiding cause of guilt and punishment."

"And the Assyrian shall fall by the sword, not of man." The point of this verse is that Assyria was not to fall by the sword of man at all, but by the sword of God. "And the sword, not of men, shall devour him." That is, destroy him. "And he shall flee from the sword, and his young men shall become subject to taskwork." As the young men of the Jews have been subjected to slavery.

"And his rock shall pass away by reason of terror." "His rock" is understood to mean the king of Assyria. "And his princess shall be dis-

mayed at the ensign." Instead of rallying around the flag, the Assyrian leaders will run away. "Saith Jehovah, whose fire is in Zion, and his furnace in Jerusalem. God is a bright light to his people, and a consuming fire to his foes.

"And the angel of Jehovah went forth." The great angel who in so many Bible scenes stands as the representative of the Almighty. "And smote in the camp of the Assyrians." This may refer to some powerful force which Sennacherib had sent to press the siege of Jerusalem by surrounding the city, preventing ingress and egress. "A hundred and fourscore and five thousand. This means, of course, that the invading force was very much larger than this very large number. "And when men arose early in the morning, these were all dead bodies." The cause of the destruction of the Assyrian host was probably a pestilence infecting the low-lying frontier of Egypt.

"So Sennacherib king of Assyria departed, and went and returned, and dwelt at Nineveh." Curious, though true it is, that Sennacherib never came to the Westland again, during the next twenty years of his life, preferring to confine his campaigns to more profitable territory and less dangerous areas.

## Fabric Creators Allow Imagination To Play

Fabric creators have seldom allowed their imaginations such free play as they have this year in styling novelty blouses, combinations for trimmings, blouses combinations with plain materials and accessories. And seldom have such extreme ideas been snapped up so rapidly by cutters. The more "amusing" the material the better it seems to be liked, and it cannot be denied that these "amusing" fabrics add much appeal to fall costumes.

Some which have registered most strongly are heavy dull synthetic basket weaves, covered with a raised patterning which looks like rows of tiny shirred ribbons, plain heavy crepes with tufts of shiny synthetic straw, faille with slit film or colored lamination woven in so as to give the effect of paillettes, and fabrics whose surfaces are covered with rows of synthetic yarn, silk, metal, or velvet pile fringe. Other really "amusing" materials are covered with little shirred "headings" of self material which are sometimes in a different color to the ground shade and sometimes edged with metal thread. Sheer materials woven in tucked effects are continuing also and are reported to be in good demand for collars, cuffs and sections of afternoon dresses.

## Vital Statistics

Paul Rayson in the New York Sun By way of minimizing the First symptoms of senility One only has to heed the sage Advice of those who act their age Slow down a bit, don't be so keen On overworking the machine, At forty, even the soundest man Had better formulate a plan To hoard the years like miser's gold Against the time of growing old. At least, such seems to be the gist, Of what I've read, But I insist That all this talk of powers that fail Can't make me emulate the snail! Statistics may appeal to those Who favor patience and repose, Still, I prefer to think myself Not quite ready for the sheaf. Ponce de Leon may have had, Some crazy notions but the lad Believed his Magic Fountain would, Renew lost youth and lustiness. Honor to him whose hope ran high— Such assurance can't say die! These human cells of mine can bear A few more years of wear and tear! Let the Grim Reaper mind his mowing There's time enough—I'll keep on going.

## English City Elects Woman Mayor

Halifax, England.—Councillor Miriam Lightowler, a Conservative member of the Town Council for ten years, was unanimously elected Mayor—the first woman to hold that position in Halifax.

By BUD FISHER

## MUTT AND JEFF—

## LOCAL AND GENERAL

Miss Grace Melkie, of Toronto, is spending a few days at her home in town.

The 54th Anniversary Services of the United Church, will be observed on Nov. 4th and 5th.

Mr. George H. Challies spent the early part of the week duck-hunting in the Bay of Quinte district. Mr. Challies reports a pleasant outing, and the ducks very plentiful.

Mrs. Oneill Marchand of St. Anne de Bellevue, Que., spent a couple of days this week with relatives in town.

Mr. and Mrs. Harvey Barkley and son Gordon, spent Sunday with Mr. and Mrs. George E. Earle, at Winchester.

Mr. Ralph Prosser, of the Bell Telephone Co., Cardinal, spent his holidays at the home of Mrs. Alice Dill.

Dr. and Mrs. Joyner, of Pembroke, spent the week-end with the latter's parents, Mr. and Mrs. Geo. D. Melkie.

Mrs. C.A. LaBelle and daughter Phyllis, of Montreal, have returned home, after spending two weeks at their home in Mariatown. They were accompanied to Montreal by the Misses Jean and Joyce LaBelle, who have spent the summer here.

Plans have been made for the Melkie Cup Meet, at a meeting held in Winchester on Friday last. The date is set for Friday, Oct. 5, at the Winchester Fair Grounds.

In the list of graduate nurses receiving diplomas from the Ontario Hospital, at Brockville, appear the names of Miss Helen Lida Markell, of Aultsville, Misses Helen Laura McLaughlin and Agnes Marguerite McLaughlin, of Chesterville.

Mr. Aaron Agulnik was removed this week to Brockville General Hospital, where he underwent an operation for appendicitis. He is still a patient in the hospital, but is recovering favorably.

Mr. Herman Sanford, who for the past three months has been employed with the firm of S.E. Errett in Morrisburg, returned to Prescott on Tuesday, where he will be engaged with the same firm.

Mr. C.J. Weegar who has been a patient in a Brockville Hospital, returned to his home in town, on Friday last. His many friends will be pleased to learn that his health is greatly improved.

Dr. A.L. Crewson, 122 Sydney Street, Cornwall, Ontario, will be away from his office from September 14th to 24th, both dates inclusive. The secretary will be at the office as usual.

By defeating Cobden in two straight games, the first by 913 at Cobden last Wednesday, and the second at the Fort Field diamond Monday afternoon by a score of 5-2, Prescott baseball team captured the Eastern Ontario Intermediate Championship for this season.

J. Hulbert Craig, prominent farmer of Osgoode Township for many years and secretary of the Metcalfe Fair, dropped dead in his home on Monday, while making final arrangements for the opening of the Metcalfe Fair Tuesday.

Don't forget the M.C.I. boys' Tag Days next Friday and Saturday. Tags are only 25c. Help the boys along, in their attempt to raise funds to purchase football equipment.

Hon. G. Howard Ferguson, Canadian high commissioner to Great Britain, and Mrs. Ferguson, who have been spending some months in Canada, will sail today from Quebec by the Empress of Australia, to return to London.

Rev. and Mrs. David Craig returned on Tuesday evening from their honeymoon trip to Toronto, Niagara Falls, and other western cities, and spent Wednesday with Mrs. Craig's parents, Mr. and Mrs. Jas. Ramage, leaving on Thursday for their home in Roblin, Ont.

Dr. E.F. MacIntosh announces the removal of his office and residence from the building on Main Street south, in which he has resided since coming to Morrisburg, to the building, first door west of the Public Library, on south side of Main Street, opposite the Regent Hotel.

On Saturday, Sept. 22nd, the Women's Missionary Society of the United Church will hold a Food Sale and Salad Tea, at the Parsonage, from 3-6 p.m. Admission 25c.

F.W. Snedden, M.D. C.M., of Ottawa, has purchased the equipment and medical practise of the late Dr. D. Johnston, Iroquois, and will open for business on Monday, Sept. 24th, in the office occupied by the late Dr. Johnston.

Mr. and Mrs. John Moffatt announce the engagement of Norma Jean, youngest daughter of Mrs. Moffatt and the late James E. Robinson of Winchester, to Harold Sutfell, son of Mrs. William N. Lannin and the late Mr. Lannin, of Winchester. Marriage to take place early in October.

Born—At Morrisburg, on Tuesday Sept. 11th, 1934, to Mr. and Mrs. Bernard Coligan, a son.

Married—At the United Church Manse, Chesterville, on Thursday, Sept. 13th, 1934, by Rev. R.C. Tait, Stanton Uriah Helmer, to Margaret Crump, both of Winchester Township.

Football is a rough game. Protection is needed for the players. Help protect the M.C.I. football team by buying a tag next Friday or Saturday.

Fatally injured when he was knocked down by an automobile while walking on the highway near Avonmore on Sept. 2, Elias Federly, 71-year-old Avonmore man, died in Cornwall hospital the following day. At the coroner's inquest, held at Cornwall on Sept. 14th, the driver of the automobile, Percy Millward, of Lunenburg, was not held responsible for the accident. Lengthy evidence was taken, and the jury's verdict was one of accidental death.

D'Arcy, the 8-year-old son of Mr. and Mrs. Grant Barkley, Chesterville, when doing a little rodeo stunt Saturday last, received a fractured left arm, as well as a dislocation of the left elbow. He undertook to ride a heifer in the pasture, and did fine, until coming to the gate, which was closed. The animal stopped suddenly, but D'Arcy sailed on, and received his injuries. He was removed to Brockville General Hospital, where he is reported doing well.

Dr. Thos. Goodison and Mrs. Goodison, arrived in town from Red Lake, Ont., on Saturday last, and enjoyed a visit with the latter's parents, Mr. and Mrs. Geo. Locke. They left later for Toronto, where they will spend the next few weeks. Dr. Goodison intends to take a short course in X-ray work, while in the city.

Eighteen municipalities, now in local option areas, have applied to the Liquor Control Board for the right to hold votes to decide if beverage rooms may be opened in their districts. Dates for plebiscites have been set in 11 municipalities. They are: Renfrew, Sept. 27; Cardinal, Oct. 9; Essex, Oct. 10; Chapleau, Oct. 10; Maxville, Oct. 15; South Grimsby, Oct. 17; Almonte, Oct. 17; Beamsville, Oct. 25; Blenheim, Oct. 30; Rodney, Oct. 30 and Tillbury West, Nov. 14.

Placed under lock and key by Provincial Officer Rose, a large green and black Marmon sedan awaits its owner at the farm of Chas. Graham, just east of Chesterville. It was discovered abandoned on the county road leading to Finch last week, and after it had not been moved for a day or two, the police were notified. The auto bears license MR-202, is green with black fenders, and had one tire missing, which was found in a battered condition in the ditch beside the car.

Velma Stuart, 16-year-old daughter of Mrs. A.C. Stuart, and the late Mr. Stuart, suffered severe injuries at her home, four miles north of Winchester, on Thursday last. While attempting to remove an obstruction from a belt on a gasoline engine that was in motion, the sleeve of her dress caught in the belt, pulling her right arm into the pulley on the engine, and whirling it between the belt and the arbor twice, before the engine stalled. The girl was removed to her home, and upon examination, it was revealed that her arm was fractured in two places below the elbow, with a compound fracture just above the elbow. She was later removed to Ottawa Civic Hospital.

The Orillia Terriers took the provincial senior lacrosse championship at Orillia last night, with a second straight win from Cornwall Island Indians by 10 to 4. Despite the fact that the Terriers more than doubled the score, the Indians gave the Orillia team the best opposition they have met this season. The dusky Islanders didn't know how to quit, and the pace never slackened during the game. Over 2,600 people paid to see the game, and the arena was jammed to the doors. Playing like demons, Cornwall kept the Orillia team and the crowd on their toes every minute of the game. Penalties were numerous, and several times during the game, fights were averted only through the efforts of Referee Kendall. Hickory was plentiful in the latter part of the game.

### MENARD—EMPEY

A quiet but pretty wedding took place at the R.C. Rectory, Morrisburg, Rev. Fr. Coyle officiating, on Monday Sept. 3rd, at 11 a.m., when Gertrude E. Empey, youngest daughter of Mr. Wm. B. Empey of Iroquois, became the bride of Vital Menard, son of Mr. and Mrs. J. Menard, Montreal, Que.

The bride was attractively gowned in an ensemble suit of pale blue crepe, with accessories to match, and carried a bouquet of roses and maiden hair fern. The bridesmaid was Miss Agnes Daye, and the groomsmen Louis Menard of Montreal, a brother of the groom.

Immediately following the ceremony, the happy couple left by train for a honeymoon trip to Niagara Falls and Toronto, the bride travelling in a suit of black velvet, with sable fur. They have now taken up residence in Iroquois.

On Thursday evening, Sept. 13th,

a wedding shower was tendered the bride, at the home of her father, when a large number of friends were present. Mrs. Menard received many beautiful and useful gifts, including several cheques, and at the close, the friends formed in a circle around her, and sang "For She's A Jolly Good Fellow". All then departed for their homes, wishing Mr. and Mrs. Menard many years of wedded bliss.

### PERMANENT WAVES

Ladies! Keep your hair soft, bright and healthy with a good Permanent Wave. Always remember that your hair gives the best expression of all your personality. A wonderful dress surely means a lot for a good appearance, but no personality is complete without having the hair nicely waved.

Take advantage of this new method of Permanent "Baby Clauko" that Paul is offering. Make appointments for Monday and Thursday evenings.

For particulars and appointments, see W.E. ADAMS, Barber, Morrisburg, Ontario.

### LOCALS WIN EXHIBITION

#### LACROSSE GAME, 6-2

Box Lacrosse made a "come-back" in Morrisburg last Friday night, and received an enthusiastic welcome.

Although the attendance was not what might have been hoped for, those spectators who saw the match were unanimous in their agreement that the locals and the visitors both played a better brand of lacrosse than was shown by the old St. Lawrence League of yesteryear.

Although it was only an exhibition game, with nothing at stake, Friday night's fixture was productive of some of the fastest and best lacrosse ever seen in the local arena, before the home team emerged victorious by a score of 6 goals to 2.

Harry Wilkins and Dan Locke stole the thunder for the locals, so far as carrying the ball was concerned, while Coligan and Ernie Eamon threw in enough bumps to make the game interesting. Caloren was the Card's shining star, scoring one of their goals from close range. The red-shirts' only other tally was of fluke variety, Mike O'Malley of the locals putting the ball in his own net, while attempting to clear.

Goal-getters on the home team were as follows: Dan Locke, 2; Carson, Clarke, Coligan and Wilkins, one each.

Although lacrosse is essentially a rough game, Friday night's tussle

A WISE OLD OWL sat on an oak;

R. LINK, Auctioneer.

### MRS. WESLEY SMITH

Sorrowing friends and neighbours filled Morewood United Church on Tuesday afternoon, paying tribute to the memory of Mrs. Wesley Smith, whose funeral was held from the family residence to the church. Members of the Women's Association, of which Mrs. Smith had long been a member, formed a guard of honour, as the body was carried into the church.

Born in the vicinity of Morewood 67 years ago, Mrs. Smith was the daughter of the late Charles McConnell and his wife, the former Jane Beattie. In 1886, she married. Taking a keen interest in the affairs of her church, she was an active member of the various organizations.

The funeral service was conducted by Rev. G.W. Smith of Morewood, assisted by Rev. R.W. Armstrong of Merrickville, and Rev. A. Nimmo, of Morewood.

Surviving, besides her husband, are two daughters, Ellice, at home, and Mrs. Lawrence Walker of Mountain township; three brothers, Alex and W.J. McConnell, both of Morewood, and Amon McConnell, of Morrisburg.

Interment was made in the family plot at Morewood cemetery.

was marred by only two penalties, when referee Gord. Smith banished Coligan, of the locals, and Robinson, of the Cards, for rough play.

The boys are putting up a great fight to give lacrosse a fresh start in Morrisburg. The least the fans can do is to give their support by attending the games, and cheering their representatives to victory.
