THE MORRISBURG LEADER

VOL. 95, NO. 22 — MORRISBURG, ONTARIO, FRIDAY, MAY 31st, 1957 — $2.50 YR. IN CANADA; $3.50 IN U.S.A.

Authorized as Second Class Mail Matter by the Post Office Department, Ottawa.

NEW FEDERAL BUILDING ASSURED

Several months of active efforts by the Morrisburg Chamber of Commerce, supported and endorsed by the Council were climaxed last week when Reeve George E. Beavers received a letter from the Minister of Public Works, Hon. Robert H. Winters, stating that the Federal Govern ment were prepared to erect a separate building to house initially the Post Office and with provision for later expansion as the need may arise for further offices or the Federal Government. A one year lease has been arranged for temporary quarters of the Post Office in the Shopping Centre, to allow for pre-engineering planning and erecting the new Federal Building.

At a special Council Meeting called to confer with Hydro concerning the possibility of erecting an additional 24 low rental housing units with 2 bedrooms and also discussing the new Civic Building, a Council resolution was passed proposing a formal offer to make available land to the Federal Government in the Civic Centre for their new building. This will be on the corner of Fifth and Highway No. 31 and extending northward to the re-located Highway No. 2, as is mutually agreed on.

It is envisioned that in the Civic Centre there will eventually be Federal, Municipal and Provincial Government Buildings. Many will recall at public meetings and discussions during the past two years that such a plan was ably put forth by Mr. Stanley Frost, at that time a consultant with the Ontario Department of Planning and Development. Two of the three proposed buildings are now assured by the Civic and Federal Governments' decisions to erect their buildings here. It is proposed to make land available to the Provincial Government to house some of their Department Offices with headquarters in Morrisburg.

With the Registry Office for Dundas County, offices of the County Health Unit and Children's Aid Society located here, the growth of the area will have a focal point of importance in all branches of governmental matters in Morrisburg.

It is a tribute to the collaboration of local citizens with the Chamber of Commerce and the Morrisburg Coun cil, together with the Federal Government, Hydro and other government bodies, all of whom have a stake in the successful rehabilitation of this town, that planning provision is being provided to make for a better Morrisburg of tomorrow.

With the growth and prosperity of Canada our local program and accomplishment is one in which all citizens can be proud to have had a part.

Letters To The Editor

Re Red Shield Appeal

Dear Mr. Laurin—We have been very gratified to hear of the splendid result of the Red Shield Campaign. Please therefore accept our hearty thanks for all that you personally have done toward bringing this to pass. Yours sincerely,

L. BURSEY, Brigadier.

PRETTY BELLEVILLE BRIDE IS NATIVE OF MORRISBURG

Mr. and Mrs. David Charles Camp are shown following their recent marriage in Christ Church, Belleville The bride is the former Miss Lois Agnes Weagant, daughter of Mr. and Mrs. Luke Weagant of Belleville, and formerly of Morrisburg (a grand daughter of Mr. and Mrs. Arthur Weagant of Morrisburg) and her bridegroom is the son of Mrs. William Camp and the late Mr. Camp of Picton.

—Photo and plate by courtesy of The Belleville Ontario Intelligencer.

FORMER MORRISBURG GIRL MARRIED AT BELLEVILLE.

Christ Church, Belleville, was the settiing on Saturday, May 4th at 2.30 p.m. for a lovely spring wedding, when Lois Agnes Weagant, daughter of Mr. and Mrs. Luke Weagant of Belleville, became the bride of David Charles Camp of Trento, Ont., son of Mrs. Wm. Camp, and the late Mr. Camp. The Rev. E. Smith, assistant rector of the church officiated. Shasta mums and white snapdragons adorned the altar.

Mr. J. B. Herdman, church organist, rendered the wedding music and accompanied the choir of six boys who sang, "O Perfect Love" and "The Wedding Psalm".

Giiven in marriage by her father, Mr. Luke Weagant, the bride was radiant in her long bridal gown of white Chantilly lace, fashioned with molded strapless bodice, and accented by a bolero with Peter Pan collar and long lily-pointed sleeves. The billowing skirt of nylon net over taffeta and nylon net underskirts featured a large peplum of matching lace. he wore a seed pearl tiara with finger-tip veil, and carried a shower bouquet of roses.

Mrs. Roy Miller of Trenton, as matron of honor, was attired in green brocaded taffeta in ballerina length, fashioned on Princess lines. The bridesmaid, Miss Kathleen Camp of Picton, wore an identical gown to that of the matron of honor, but in yellw, with matching feather headdress, shoes and gloves. All carried Shasta daisy white mums mingled with yellw rosebuds and fern.

Mr. Donald Camp pof Picton, was groomsman, while Mr. Victor Camp also of Picton and Mr. Lloyd Weagant, of R. R. 7, Belleville, perform the duties of ushers.

olowing the ceremony the reception was held in Christ Church parish hall, where the bride's table was daintily appointed with white damask, and centered by a three tiered wedding cake, topped with a miniature bride and bridegroom beside a tiny altar, adorned with lily of the valley, and encircled about the base with clusters of white Shasta mums.

The bride's mother received, wearing navy blue silk crepe with checked taffeta inserts in the skirt, white accessories and pink rosebud corsage. The bridegroom's mother assisted. attired in navy silk crepe with nylon lace jacket, pink accessories and a pink rosebud corsage.

For the wedding trip to Cornwall, through the Adirondack Mountains, Utica, Niagara Falls and Toronto, the bride wore a light brown knitted suit, with dark brown accessories, and corsage of yellow rosebuds. Upon their return the young couple will reside in Trenton.

Guests were present from Montreal, Massena, N. Y., Farran's Point, Toronto, Madoc, Picton, Milford, Bloomfield, Trenton and Morrisburg.

ANNOUNCE MUSEUM HOURS FOR SUMMER MONTHS

Extended hours for the summer months for its temporary museum at Morrisburg are announced by the Ontario-St. Lawrence Development Commission in an advertisement in another column of this issue. The exhibits will be open to the public all day from Monday through Saturday and also on Sunday afternoon.

Among recent uotstanding contributions to this collection were a large number of household and other articles used by the Hayunga family some of which had been the property of Rev. Herman Hayunga, pastor of the Lutheran Church at Riverside from 1826 to 1837. Mrs. Fred Hayunga, Morrisburg, is the donor of these historic objects.

Following is a list of additional contributors to the museum.

Mrs. J. A. Anderson, Cornwall; Mrs. C. S. Ault, Aultsville, W. Beddingfield, Aultsville, Mrs. J. Alex Brown, Dickinson's Landing, W. A. Cameron, Mountain, Miss Helen Campbell, Wales, Mrs. J. L. Casselman, Morrisburg, Mr. and Mrs. G. W. Colquhoun, Williamsburg, Mr. and Mrs. James Connors, Wales, Mrs T. Grant Coughler, Winchester Springs, Lt. Col. R. F. Craig, V.D. Brockville, W. S. Elliott, Dickinsons Landing, G. W. Ferguson, Brandon, Man., Mrs Stewart Gravely, Cornwall, Mrs. Richard V. Greene, Brockville, George E. Hill, Williamsburg, Mrs. Thos. J. Keyes, Winchester Springs, Ed. Hart, Wales, Charles F. Marselis, Winchester, Mrs. M. Masterman, Wales, Mrs. J. MacMillan, Wales, J. P. and M. O. P. MacNaughton, Brockville, Miss M. J. McDonald, Cornwall, Donald McLaren, Wales, Mrs Margaret McCleverty, Wales, Mr. and Mrs. Albert J. McLaurin, Cornwall, Miss Grace Merkley, Morrisburug, David and Gordon Monteith, South Mountain, Mr. and Mrs. Harry Morgan, Wales, Mrs. John F. Murphy, Dickinson's Landing, Mrs. Robert Norval, Williamsburg, V. Peever, Wales, Mrs. Howard Ransom, Dorval, Mr. and Mrs. Arthur Robertson, Cornwall, Henry Shaver, Wales, Mr. and Mrs. Milton Shaver, Williamsburg, Mrs. T. R. Sheriidan, Delta, Frank Stewart, Morrisburg, Robert F. Stayner, Brockville, Edmund Tett, Newboro, Mrs. Percy Warner, Wales, Mr. and Mrs. Robert Weagant, Williamsburg, Fred Weagant, South Mountain, Mrs. Wm. A. Wert, Wales, Mr. and Mrs. Samuel Whaley, Delta.

CASSELL — COUNTRYMAN

On Friday, May 24th, a double ring ceremony wah officiated by the Rev J. Maxwell Allen in the United Church parsonage, when Miss Marjorie Countryman, daughter of Mr. and Mrs. Milton Countryman of Gallingertown, became the bride of Mr. Harry R. Cassell, son of Mr. and Mrs. R. D. Cassell, of Morrisburg.

The bride was dressed in a white and blue flowered dress and wore a corsage of sweetheart roses. She was attended by Miss Rose Cougler of Morrisburg, who was attired in a pink taffeta dress and wore a corsage of blue carnations.

Mr. Harold Bowman acted as best man.

Following a reception held at the BrBuce Lodge, the happy couple left for a wedding trip to Niagara Falls and other Western points.

GIVE DATES FOR NEXT POLIO CLINICS

For those receiving their second polio vaccine injection, the clinic is being held at the Morrisburg Public School on June 5th at 1.30 p.m. At Williamsburg Public School, the clinic will be hed on June 6th at 9 a.m. There will be no clinic at Aultsville or Winchester Springs.

AUCTION SALE

At the home of Alex McLaren, on Fifth St., on SATURDAY, JUNE 1st at 1.30 p.m. —All household effects.

DOMINION STORES TO SEND 50 GIRL GUIDES TO CENTENNIAL CAMP

Dominion Stores Limited will send 50 Girl Guides, all expenses paid to the Girl Guide Centennary Camp from August 8th to 19th. This Centennary Camp, situated on Doe Lake, just north of Huntsville, Ont., will be one of the most important events in Guide activity in this generation. It will be attended by Girl Guides from every corner of the globe, including 500 from all across Canada. Of the 500 from Canada, 50 will be guests of Dominion Stores.

These 50 Guides will be chosen on a regional basis in co-operation with the Girl Guides Association, through an essay contest "What it Means to be a Girl Guide". Entry forms for the contest are being distributed by the Guides' organization.

The Centenary Camp, held as part of the celebrations for the centenary of the birth of Lord Baden-Powell, founder of the Scout and Guide movement, will be located at one of the most beautiful spots in Ontario, Doe Lake, just north of Huntsville. Guide leaders have been laying plans for the Camp for months and they are confident that it will be a milestone in Guid ehistory. It is anticipated that some 1500 girls will be attending, with 500 from Canada, 500 from the U. S., and another 500 from various parts of the world.

TO THE ELECTORS OF GRENVILLE-DUNDAS

A. CLAIR CASSELMAN

Prescott, Ont.,

Dear Elector:

As the candidate of the Progressive Conservative Party I am appealing for your support on June 10th.

I give you herewith my views and those of my party on a few of the outstanding subjects confronting us.

We believe grave danger to confederation is resulting from the centralization of taxing powers at Ottawa. The Provinces are being left insufficient tax income to fulfill their committments, resulting in turn in insufficient grants by the Pro vinces to the Municipalities. Municipalities are then forced to go deeply into debt or overtax home owners farm owners and industries to meet soaring educational and improvement costs.

We believe the present tight money policies should be drastically revised, thereby making it possible for the people to purchase badly needed homes and appliances. Tight money policies make it impossible to business and commerce to finance expansion and to prpovide more jobs with better pay and better products.

Our markets within the Commonwealth and without which have been virtually lost under the Liberal policy of relying solely upon export to the United States, must be re-estabished. We strongly oppose the direlt sale of our natural resources to the United States. We should build up our own secondary industries to produce many of the finished goods which we now import. Under —pYresent Liberal policy the wages from such industries are being put into the pockets of the American Labourer, rather than the Canadian. A Progressive-Conservative Government will develop Canada for the benefit of Canadians first.

We strongly advocate the right of the people, through their elected rep resentatives, to a voice in the govern ment of their country. The present government, py its overwhelming majority, dictated that no member of the House of Commons could criticize the Trans Canada Pipe Line Bill. We believe that the Pipe Line will be economically good for Canada, but we deplore the methods employed to secure its passing. The government failed to give information or to allow debate on the subject by the imposition of closure in a manner never before used in any democratic parliament. The government introduced closure before a single mord was uttered by any mem ber of the Opposition. In this, the government had the complete support of the Social Credit Party.

The Progressive Conservative Party recognizes the vital place of Agriculture in our national economy. In eight years the cost of commodities and services the Canadian farmer must buy has increased by 24.6% while the prices of agricultural products have dropped 11.6%. We will cure this impossible situation and provide a felxible price support program to insure an adequate parity for agricultural producers bosed on a fair price cost relationship.

We insist that there is now insufficient provision for the aged, disabled and veteran. We stand pledged to increase the present provisions immediately.

Yours faithfully,

A. CLAIR CASSELMAN,

Royal Scandal

Charles Edward Stuart, known to posterity as Bonnie Prince Charlie, is a romantic figure in history. His love life was as turbulent as the military adventures through which he strove to regain a throne; and his marriage was short-lived and unhappy.

He was fifty-two when he married, already ravaged by drink and dissipation. The years of exile had been spent wandering through Europe with a succession of mistresses until he settled down for a time with an early love, Clementina Walkinshaw.

Charles was so jealous of her that he had a contraption of bells fixed round her bed. When she turned over they rang furiously. Charles would then come dashing in expecting to find her with a lover. Finally, she could stand his temper no longer and fled.

Charles, who had also quarrelled with his father, James, the Old Pretender, and his brother Henry, had only a handful of friends left. On his father's death he went to live in Rome, made it up with his brother and accepted a family legacy.

He was advised to take a bride and beget a legitimate heir. An emissary was sent through Europe to hunt for a suitable young woman. The most promising seemed to be the nineteen-year-old Princess Louise de Stolberg. Louise, who was penniless but ambitious and dreamed of one day becoming a queen, jumped at the chance.

In the spring of 1772 Louise arrived at Macerata outside Rome, where she was to meet her aging lover. The first sight of Charles must have shaken her considerably, for she hadn't bargained for such a wreck. She greeted the bridegroom with a smile, however, and two hours later they were married.

Charles was delighted with his youthful bride. Her tall figure, fair skin and brilliant smile pleased him so much that he immediately increased her pin money by a thousand crowns. After five days' honeymoon he led her back to Rome. Everyone turned out for the occasion. Louise was enchanted with the fuss, and her beauty and gay spirits soon earned her the title, Queen of Hearts.

Charles was proud of her success and for a while stopped drinking. But not for long.

Snubbed by the Pope who would only recognize him as the Count of Albany, Charles' temper reverted to its usual violence. He took to drinking heavily again. Louise's life became a nightmare.

Suspicious and jealous, Charles would never leave her alone. He had all the entries to her private apartments blocked, except the one which led from his room to hers. They moved to Florence.

Charles behaviour grew worse. Every evening he would order a carriage and insist on Loiuse going with him to the opera. Often he was so drunk that servants had to half-carry him into the carriage. At the opera a couch was moved into his box so that he could lie down and sleep it off, snoring loudly, at times nearly drowning the singers' voices.

For six years she endured her married life with Charles. Always intellectually inclined, she found pleasure in the arts, especially literature. Life seemed to offer no further happiness until she met the handsome young poet, Count Vittorio Alfieri, who was visiting Florence to get over the effects of a disastrous love affair.

Louise liked him at once and even Charles took to him. Soon Loiuse and Alfiero were deeply in love. Permission was given for Alfiero to teach Louise Italian, and after dinner, when Charles settled down for a nap, the young couple sat on the couch with their study books.

When the snores from the chair grew loud enough they would hold hands and whisper together. Louise began to find her husband more repulsive than ever. They quarrelled violently and he took to insulting her in public.

One night after a drunken orgy, Charles crashed his way into her bedroom and nearly murdered her. Louise now went in fear of her life. So Alfieri made a bold and ingenious plan to free her from bondage.

Two of his friends called on Louise one morning and suggested that she and Charles should visit a neighbouring convent to see the fine needlework done by the nuns. Charles agreed and they all set off by carriage.

When they came to the convent Louise was handed out and escorted to the door. Charles followed but the Mother Superior had been briefed.

As soon as Louise entered, the door was slammed and locked and Charles was left outside.

Realizing he had been tricked, he banged the door furiously. A nun opened the grating and told him that the Countess of Albany had taken refuge in the convent and would remain there.

Husband and wife never met again. Louis went back to Rome, and Alfieri followed. The lovers remained together until Alfieri's death many years later.

Nice Pick-up

When Charel Kemp took a $5-a-week job as a shop assistant in South Africa he little guessed he would become a multi-millionaire. He had just fought off a drastic attack of polio and counted himself lucky to hold down a job at all.

Yet today Charel can still scarcely believe his luck, for at his feet he found the biggest emerald the world has ever known.

After his shop work Charel became a policeman, worked his way through and on retirement bought himself a little emerald mine. With native labour it was cheap to run and produced just enough stones to make it interesting.

Then one bright day recently Charel told his brother: "This is going to be a big day. I can feel it!" He still doesn't know why he said it. But at the mine, black in the granite yet with green patches burning through, was the emerald, large as a paving stone.

Charel found himself blinking not at just a 100-carat or even 1,000-carat giant but at a gigantic 11 pounds of cool fire, later assessed at 24,000 carats. At $900 per carat, the mammoth may be worth $24,000,000. Much may depend on colour density and fractures, but sufficient huge stones could be cut from the emerald to swamp the market.

Second only to the diamond in worth, chief world supplies of emeralds come at present from Soviet Russia. An emerald engagement ring may be more significant than you think, for the ancients considered the stone had magic properties to aid motherhood.

YOU PUSH TOO HARD! — Horsing around are these two bears in the London Zoo. Rusk gets toppled from the swing by playmate Nikki. The latter is a gift from Russian leaders Bulganin and Kruschev to Princess Anne, daughter of Queen Elizabeth.

LEAF FOR HER BOOK — An original way of sending greetings brings a smile of pleasure to the face of recipient Maria Rossi of Rome, Italy. Sending "best wishes to all and to Peter," on a real magnolia leaf, the friend wrote with China ink.

TABLE TALKS
by Jane Andrews.

Now it's about time to start making your jams and jellies for next winter's use. All too often summer slips by, and come October, the jam and jelly cupboard is bare. So why not get off to a good start now. At this time of the year just about everybody clamors for a change in diet, and along comes the strawberry crop to help you make delicious sweet spreads.

Modern methods of preparation have taken the guesswork out of jam and jelly making. Today, we know that any fruit — even those known as non-jelling fruits — can easily be made into delicious jams and jellies. This modern method is so simple and controlled that even a beginner will be successful. Based on a short boil of just 1 minute — only long enough to sterilize the mixture and prevent spoilage — it calls for balanced proportions of fruit acid, sugar and pectin. And, of course, the secret of success is to add commercial fruit pectin in either liquid or crystal form.

While pectin occurs naturally in all fruits, some contain more than others, and the amount varies with the degree of ripeness, being greatest in slightly underripe fruit. When fruits are fully ripe, flavor and color are best, but unfortunately, there are very few fruits which contain enough pectin to form a jel when fully ripe. Before the advent of commercial fruit pectin, a housewife would use a mixture of underripe and ripe fruit or a mixture of a low and a high pectin fruit. Then she would have to boil her jelly or jam 20 to 30 minutes, or until the fruit acid, sugar and pectin were in proper proportion to make the mixture jel. Results depended on complicated tests and the homemaker was never sure if her jam or jelly would set.

Today, the homemaker can make jam or jelly with perfect confidence in the results. She uses fully ripe fruit for best flavor and color, follows tested recipes — adds pectin in either liquid or crystal form and just 15 minutes after her fruit or juice has been prepared, the jam or jelly has been bottled and paraffined and is ready to be put away.

She knows, too, that her jam or jelly will have the delicious natural flavor and color of fully ripe fruit, because the cooking time is so short that very little evaporation takes place. What's more, the modern method is also the economical way, because she will get up to 50% more jam or jelly than she would with the long boil method from the same amount of fruit.

And here is a selection of our favourite jams and jelly recipes. Some are old favourites, some have a new flavor idea — as the addition of spices or grated orange or lemon rind. But all are simple to make — delicious to eat — and pretty to look at.

Of course some of the fruits mentioned aren't in season yet—but it might be a good idea to clip these recipes and save them for future use.

* * *

STRAWBERRY JAM

3¾ cups prepared fruit
¼ cup strained lemon juice
7 cups sugar
½ bottle liquid fruit pectin

To prepare fruit. Crush completely, one layer at a time, about 2 quarts fully ripe strawberries. Measure 3¾ cups into a very large saucepan. Add lemon juice.

To make jam. Add sugar to fruit in saucepan and mix well. Place over high heat, bring to a **full rolling boil,** and **boil hard 1 minute,** stirring constantly. Remove from heat and at once stir in liquid fruit pectin. Then stir and skim by turns for 5 minutes to cool slightly, to prevent floating fruit. Ladle quickly into glasses. Paraffin at once. Makes about 10 six-ounce glasses.

VARIATIONS

Spiced Strawberry Jam. Use recipe for strawberry Jam. Add ½ teaspoon each allspice, cinnamon, and ground cloves, or any desired combination of spices, to crushed strawberries.

Lemon Strawberry Jam. First, scald glasses as usual and place ¼ teaspoon grated lemon rind in bottom of each glass (or in just one or several of the glasses, if desired). Then make Strawberry Jam as directed, ladle into the glasses, and stir quickly to blend flavors. Paraffin.

Orange Strawberry Jam. First scald glases as usual and place ¼ teaspoon grated orange rind in bottom of each glass (or in just one or several of the glasses, if desired). Then make Strawberry Jam as directed, ladle into the glasses, and stir quickly to blend flavors. Paraffin.

STRAWBERRY PRESERVES

Yield: about 10 medium glasses (5 lbs. preserves)
6 cups small whole berries about 2 pts. firm ripe strawberries)
½ cup water
7 cups (3 lbs.) sugar
½ bottle liquid fruit pectin

Hull about 2 quarts firm ripe small strawberries. Measure 6 cups whole berries (firmly packed without crushing) into a very large suacepan. Add water and sugar.

Place over high heat and bring to a **full rolling boil,** stirring carefully to keep fruit whole. Reduce heat and boil gently 3 minutes. Remove from heat and at once stir in liquid fruit pectin. Skim off foam with metal spoon. Then let cool about 1 hour, to help prevent floating fruit. Ladle into glasses. Cover preserves at once with ⅛ inch hot paraffin.

RASPBERRY JAM

4 cups prepared fruit (about 2 quarts ripe red raspberries)
6½ cups sugar
½ bottle liquid fruit pectin

First, prepare fruit. Crush completely, one layer at a time, about 2 quarts fully ripe raspberries. (If desired, sieve half of pulp to remove some of the seeds.) Measure 4 cups into a very large suacepan.

To make jam. Add sugar to fruit in suacepan, and mix well. Place over high heat, bring to a **full rolling boil,** and **boil hard 1 minute,** stirring constantly. Remove from heat and at once stir in liquid fruit pectin. Then stir and skim by turns for 5 minutes to cool slightly, to prevent floating fruit. Ladle quickly into glasses. Paraffin at once. Makes about 10 six-ounce glasses.

* * *

More jam and jelly recipes will be published next week.

Sat In Furnace To Keep Cool

A man walked into a blazing furnace, carrying a lump of raw steak. The steak was cooked to a turn, but the man wasn't harmed. On another occasion he sat in a wicker chair while it burned away beneath him . . . again he wasn't harmed.

The furnace temperature reached 1,200 degrees Fahrenheit, but the man, an American engineer, kept cool because he was wearing a new type of aluminum-coated suit designed for repair work to furnaces, kilns and ovens.

Much lighter to wear than the normal asbestos used for fire-fighting, these suits give far greater freedom of movement in confined spaces. Foundry workers who run the risk of being splashed by molten metal would also find these outfits invaluable.

A Permanent Refrigerator

How about a chicken dinner made from fowl frozen for 18 years?

"Good," is the verdict of a man who ate one.

He is retired Commander James C. McCoy of Neptune Beach, near Jacksonville.

McCoy returned recently from the Antarctic. There he visited the site of the Little America camp he helped set up in 1939.

After digging down through about 35 feet of ice, McCoy and his companions found the huts and took out food stored in them for 18 years.

They dined on chicken, vegetables, bread and butter left over from the expedition of 1939-41. Loss of some flavor was the only shortcoming, according to McCoy.

His report sheds light on the late Adm. Richard E. Byrd's suggestion that the Antarctic ice could be used as a storehouse for enormous supplies of food, such as surplus wheat and dairy products.

Scientific research at the bottom of the globe may uncover many other ways in which that vast region can be useful to mankind.—Miami Herald.

Funny Ferry

The Ancient Mariner would be outraged by the ferry. "Arrow of the South," which plies between Messina, Sicily, and the Italian mainland.

Not exactly 'shipshape' by conventional standards, there are good reasons why the new vessel looks like a cross between a space ship and a seaplane. It has a remarkable turn of speed.

Made largely of aluminum, it consists of a keel on two structures resembling seaplane pontoons. Only the rear of the keel and the propeller touch the water.

There is an unusual international flavour to this vessel. It was designed in Germany, developed in Russia, patented in Switzerland, and built in Sicily at a cost of about $180,000. The ferry which is claimed to be practically unsinkable, provides accommodation for 72 people, has a cruising speed of 46 miles per hour, and a top speed of approximately 62 miles per hour. Engineers are convinced that larger vessels of the same design can be built to accommodate 400 people and 100 tons of cargo.

HIS SYSTEM

"Yes," said Browne, "when my wife and I have an argument I always have the last word."

"Do you?" said his friend, with an admiring tone in his voice, "How?"

"I apologize," was the resigned reply.

IT'S 'EYES RIGHT!' . . .

. . . and all hands on deck for inspection when dancer Helen Wood visits the aircraft carrier Valley Forge. And . . .

. . . IT'S 'EYES LEFT!' . . .

. . . as Helen, named by the crew as their "Anchor Girl," paces the flight deck on the arm of Ensign Samuel Weinstein, below.

The SUNDAY SCHOOL LESSON

By Rev. R. Barclay Warren
B.A., B.D.

Brothers Divided
Genesis 27: 30-38, 41

Memory Selection: He that loveth not his brother whom he hath seen, how can he love God whom he hath not seen? 1 John 4:20b.

Family troubles cause much of today's unhappiness. We parents do not see our errors soon enough. It is obvious that we cannot raise our children exactly as we were raised. The world about us has changed. We must adjust to the changing scene without sacrificing any of the essential values.

Jacob and Esau were twins. Esau was the older. He was a light-hearted chap who loved to hunt. Jacob was a man of the fields. He knew that the birthright and patriarchal blessing belonged to the older brother. But Jacob coveted it for himself. One day when Esau came in hungry from the hunt Jacob saw his chance. Esau wanted some of the pottage which Jacob had. "Alright," said Jacob, "but you must first sell me your birthright." Esau agreed. Both men were in the wrong: Jacob, because he unnecessarily tempted his brother and Esau because he so lightly esteemed his birthright.

Later, Jacob in connivance with his mother, deceived his father and secured the patriarchal blessing. Esau was bitter about this and planned to kill Jacob as soon as the father died. But again Rebekah in her favourtism of Jacob stepped in and arranged for Jacob to go home to her people.

Jacob was doubtless the better man to father the tribes of Israel. It had been revealed to Rebekah before the birth of the twins that the elder should serve the younger. Prophecy is history written in advance. But it isn't necessary to resort to unworthy tactics to accomplish God's design.

It's far from a perfect world. But let us pattern our lives after the example set for us by Jesus Christ. We need His forgiveness of our sins and His grace moment by moment to live the fight life in a sinful world. His grace is sufficient.

American Views On Little Cars

A sign seen recently in the rear window of an American car said, "Help stamp out little cars." If you are one of the "big car" drivers who looks with scorn or even sympathy on someone purring down the road in a car a third the size of yours, you should read Mr. Wherry's book.

It will give you a new tolerance for these little autos and you may even find yourself buying one. Mr. Wherry took on a big task for himself in writing this book which is an evaluation of 18 foreign economy cars being imported for the American market. (He defines an economy car as one selling for less than $2,000, thereby eliminating sports cars.)

Just about all of the 18 Mr. Wherry subjected to a test over American roads and viewed them with an eye for what an American wants in an automobile.

He makes a strong case for the size, construction, suspension, and mechanical features of these little cars.

It is necessary for the American driver to reassess what he wants in a car before he can accept an economy vehicle. To aid in doing this, Mr. Wherry quotes from an advertisement for one of these cars:

"Do you often carry six full-sized adults in your car? Do you often carry a baby elephant with you? Do you enjoy paying out lots of money for gasoline? Do you need two tons of weight to take your wife shopping? Do you often need to travel faster than 60 miles an hour?"

If the reader answers "no" to three or more of these questions he may be in the market for a small car, it is suggested.

Here are some of Mr. Wherry's comments on the cars he tested:

German Volkswagen: "Is the Volkswagen overrated? No, it is not. Neither is it perfect, but it comes as close to being that as any car in its European price class, and the care that went into its engineering and that has gone into its fabrication to date forces one to agree that its sales success has been merited."

British Morris Minor: ". . . while its sales have never been spectacular it has its devotees who swear by it and not at it. Reliability, good worth for the cost, and superbly easy handling and good economy have earned it a good reputation to the point that right now some dealers say it is in short supply. . . . Morris bodies show good workmanship and rival the quality of many costlier cars in this respect."

French Renault 750: "Frankly it is not the smartest appearing car, but it has many other more necessary virtues when one considers utility and the purse . . . the little Renault scores high in economy; it's rugged and finish and over-all workmanship is more than one would normally expect at such a low price."

Swedish Volvo PV444: "The writer has put in well over 1,200 miles driving Volvos, and while the styling does not impress, the comfort and exceptional performance and roadholding do . . . One must look close to try to find misaligned body panels; they don't exist on the Volvo . . ."

Mr. Wherry has been a free-lance writer in the automotive field for a number of years and at present is Detroit editor of Motor Trend magazine.

His fascinating book is inclined to make the reader eager to go out and test drive or even buy one of these little cars. But there comes a disappointment for which Mr. Wherry does not adequately prepare the reader. Distributors and service facilities for all but a few of these cars are spotty and mostly along the East and West Coasts. However, this situation is improving as these foreign firms learn more about what is necessary to sell the American market.

Anyone who purchases one of these economical cars must be ready for one thing, as Mr. Wherry puts it: ". . . you may cease to be the recipient of a joyous welcome when you drive into your gas station because your visits will become far less frequent and your old pal at the pump might forget who you are."

MERRY MENAGERIE

"In my next courtship I'm going to skip that bowing routine!"

Farmer: "I've just been bitten by a dog."

Doctor: "Was he a rabid dog?"

Farmer: "No sir, just plain old bird dog."

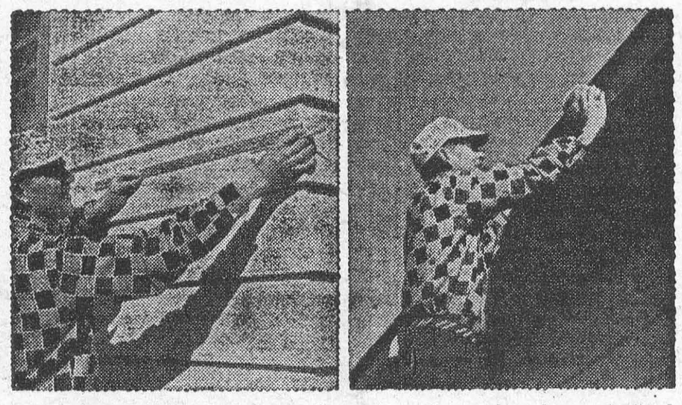
WRONG SIGN — Lying down on the job isn't the approved way of getting ahead. However, there comes a time, such as this warm spring day, when taking a nap seems more important than being one of the "men working."

THE FARM FRONT
by John Russell

THE RIGHT WAY TO PAINT YOUR HOUSE

There is a right and a wrong way to do any job, as any good do-it-yourselfer knows. The right way is usually the easier and more economical in the long run.

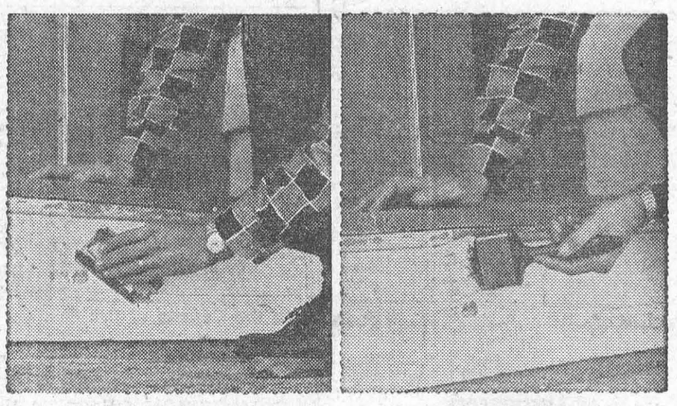
This is particularly true in painting a house, according to the experts.



They suggest that once the color scheme has been decided upon the next step is to estimate how much paint to buy. To do this, measure the distance in feet around the house and then multiply it by the height to the eave-line. Add extras such as gable ends. Don't deduct for doors and windows as these compensate for the amount of paint needed for eaves and clapboard edges. Divide the total by 550 for the number of gallons needed for each coat. Doors, windows, screens and similar trim usually require 15 per cent of the amount needed to coat the house once.

Next step is to prepare the house. Dust, dirt, cracked and peeling paint can cause a lot of heartache later if you paint over them. Start cleaning at the corner gable so that you don't throw dirt on clean areas. Soap and water will take the dirt off, but only scraping, sanding or burning will take the scaling paint off. When scraping remember to work with the grain so as not to mar the wood.

All knots uncovered by the scraping should be sealed with knot sealer so that any sap left in the wood will not "bleed" through the paint and discolor it.

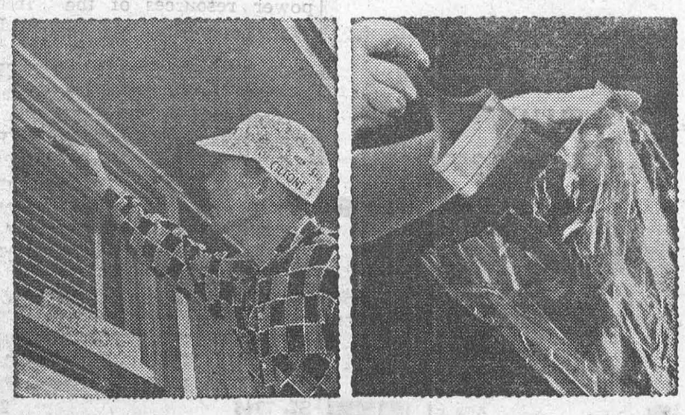


A first or primer coat is a must for areas that have been scraped. Then all cracks and nail holes should be filled with putty. The primer coat prevents the finish coat from sinking in and causing high and low gloss spots.

For a smooth, even color, paint sould be mixed thoroughly before you start and should be given a stir every now and then throughout the job. First, pour the oil off the top of the can. Mix the pigment thoroughly; pour the oil back and then pour the paint from one can to another a few times.

Begin by painting the gables. They will usually be a different color from the body of the house and should any paint spill, it won't land on freshly painted parts below. Paint the gables all around the house in one go so that if you have to quit for a day or so, or from one weekend to the next, the house won't look patchy.

Of course, the finished job will look patchy if too heavy a coat of paint is applied, because it will run and wrinkle. Dip the brush in half way, then slap it lightly against the inside of the can to work off the excess. Don't scrape the brush on the rim of the can.



Paint under the clapboard edges before doing broad flat areas so you won't scrape paint off when the bristles of your brush overlap the edge of the board.

Finally, when painting windows, paint all small trim first for the same reason. Should any paint get on the glass, cover the tip of a screwdriver with a cloth and wipe the paint off immediately. Don't forget to hoist the inner window and lower the outer to get at those parts of the frame which normally would be hidden. A small, two-inch brush is best for this sort of work and a four-inch brush for open areas.

When the painting job is done, clean your brushes in turpentine or varsol, and wrap them in the polythene bag fruit and vegetables come in these days. This will keep them soft for the next time you need them.

Javelin Hurler Has Unique Style

A sketchy poll of the Penn Relays coaches and officials who had witnessed Miguel Quadra Salcedo's demonstration of his unique side-arm delivery of the javelin throw failed to produce a single vote that the Spaniard's style was illegal or in any way contrary to amended rules of the International Amateur Athletic Federation.

Instead of using the normal overhand toss employed by most javelin throwers, the Spanish student of the Puerto Rico College of Agriculture and Mechanics twists his body sideways and then uncoils to deliver the javelin with a side-arm action. His three throws in the Franklin Field exhibition measured 250, 250 and 265 feet. In an earlier practice session, he tossed the spear 287 feet. The accepted world record is 281 feet 2 inches, and is held by Egil Danielsen of Norway.

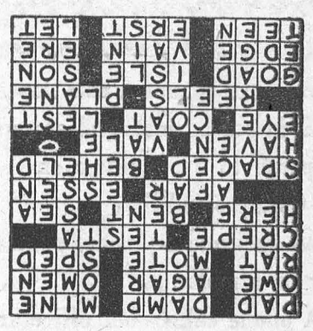
Salcedo was limited to an exhibition at the Penn Relays because he had transferred to the Puerto Rican college only last January and had not completed the full year required of transfer students under the National Collegiate A.A. rules.

A year ago. Salcedo astounded the track and field world with his prodigious throws. At that time, he did start with his back toward the throwing area and this was clearly against the rules which do not permit a javelin thrower to spin in the fashion employed by discus throwers and hammer throwers. But since Salcedo has elminated the spin he does seem to conform to the new rules.

Salcedo developed his technique as a youngster in Northern Spain throwing knives underhand for play. For the most part the coaches agreed that he was tremendous.

The American Athletic Union has barred Salcedo's technique from competition pending further study.

Upsidedown to Prevent Peeking



HE REALLY DELIVERS THE MAIL

By ROSETTE HARGROVE
NEA Staff Correspondent

CHAVAGNAC - LAFAYETTE, France—(NEA)—The world's first "intercontinental flying postman" is back home on his local route with this Gallic observation about the U.S.A.

"The big American cities look like the big French cities and American cows look exactly like French cows. Also, the American people are very charming. But one thing made it somewhat difficult — they do not speak French".

This, however, did not prevent Abel Charbonnier, a rugged 31-year-old rural postman, from delivering the mail on his appointed rounds, despite the fact the rounds in this case involved a flight to America.

As any American might suspect, Charbonnier's trip was the outgrowth of a radio show, a French program called "You Are Formidable".

The program tells the story of outstanding persons, and not long ago devoted itself to Abraham Spanel, a 56-year-old American businessman who has spent thousands of dollars in the U.S. press to defend France.

"You Are Formidable" asked its listeners to express thanks to Spanel by sending him a few words on a picture post-card, and voila! some 1,361,000 Frenchmen responded.

Undaunted by the deluge, the radio station had a further idea. Why not get a postman from Chavagnac-Lafayette (pop. 827) to carry all this mail to the U.S.? The selection was natural, of course, this being an anniversary in the "Lafayette we are here" history.

Charbonnier was sawing wood in his backyard when he got the word from his superiors to make the trip. His duty was clear, even if he was not overly excited.

"Don't worry," he told his wife, matter-of-factly. "I'll be back in three or four days."

When Charbonnier reached Paris, the radio program directors were as overjoyed as any Madison Avenue producer would have been, for Charbonnier was real.

"If he had not existed we would have had to invent him," they said, happily.

Charbonnier was even more than they had expected. One of his forefathers, he explained, had fought with General Lafayette.

Before his Atlantic flight, Charbonnier got his first look at gay city life. He was taken to the Casino de Paris. But Charbonnier was not impressed. "It is always the same thing," he said. "Girls, and then more girls."

In America he stayed at the Waldorf-Astoria, delivered his mail to Spanel, quaffed champagne with the French ambassador, and then flew home again.

Back in his daily routine—he tends his small farm before and after his 20-mile mail route—he admits there was some excitement connected with his trip.

"All I can say however, is that it was some chore," he declares. "I would rather do a double delivery round at Chavagnac-Lafayette any day."

POSTMAN'S RETURN — After carrying the mail to the U.S., Abel Charbonnier gets a greeting back home in France from his wife (center) and Mrs. Abraham Spanel.

YOU'RE NOT A GOOD DRIVER

IF YOU DON'T SIGNAL

The driver in the car behind can't read your mind. When you plan to turn, slow down, park, or pull out from the curb, let him know with a signal. It's the law. It's the sign of a thoughtful driver.

HOW GOOD ARE YOUR DRIVING HABITS?

DEPARTMENT OF HIGHWAYS—ONTARIO

WILLIAMSBURG

Mrs. Clifford Casselman spent some time recently in Toronto, caring for her sister, Mrs. Herman Little, who had the misfortune to catch her hand in the wringer of her electric washer. Mrs. Little's many friends in the district will be glad to know that she is recovering nicely. Mrs. Casselman has now returned home.

Mr. and Mrs. Basil W. Watson of Williamsburg entertained at a birthday party in honor of his grandmother, Mrs. Martha Eligh, 414 Bedford St., Cornwall on her 87th birthday on Sunday, May 19th. Among those present were her son, Mr. J. B. Watson of Carman, Man.; her grandson, Mr. Winston C. Watson of Reedy Creek, Man.; her son, Mr. Walter E. Watson and family of Colquhoun; her daughter, Mrs. Myrtle Garlough, of Strader's Hill; her grandson, Mr. Colmer Watson and family of Morrisburg; and her granddaughter, Mrs. Lionel Grant and Mr. Grant, of Cornwall. A presentation of a Gruen watch was made to Mrs. Eligh by the family and a beautiful birthday cake, lighted by 87 candles enhanced the occasion.

CHURCH ROAD

Mr. and Mrs. Roy Rice were recent callers with Mr. and Mrs. Robert Burns.

Mr. and Mrs. James Styles and family of Iroquois were recent callers with the former's parents, Mr. and Mrs. W. M. Styles.

Mr. and Mrs. James Bennie, Mr. and Mrs. Samuel Tremblett of Toronto were week end guests of Mr. and Mrs. Robert Burns.

Mr. and Mrs. Lorne Barkley and daughter of Iroquois were guests with Mr. and Mrs. Archie Crowder on Sunday.

Mr. and Mrs. David Smith visiter relatives at Vankleek Hill on Saturday.

Mr. and Mrs. Wiliam Dafoe spent Sunday afternoon in Morrisburg.

Mr. and Mrs. Fred Casseman and Mrs. Donald Casselman, Marilyn, and Gordon of Brockville, spent the Monday, 20th, the the home of Mr. and Mrs. Robert Burns.

Mrs. D. J. Stitt, Morrisburg, was a guest of Mrs. Jas. Schwerdfeger last week.

Mr. and Mrs. Homer Schwerdfeger spent Tuesday at the later's parenal home.

Miss Debbie Swerdfeger, Cornwall spent last week with Mr. and Mrs. Ralph Schwerdfeger.

GALLINGERTOWN

We welcome Mr. and Mrs. Harvey Dillabough in our community. They have moved in the house formerly owned by the late Andrew Collins.

Mr. and Mrs. Fred C. Gallinger visited Mr. and Mrs. Walter Cheley at Morrisburg on Tuesday.

Mr. and Mrs. Olin Ault of Colquhoun visited Mr. and Mrs. David Alguire on Saturday evening.

Mr. and Mrs. Fred C. Gallinger spent Sunday with Mr. and Mrs. Jas. Henry at Moulinette.

Mr. and Mrs. Thos. Schwerdfeger of Archer, were recenet guests with Mr. and Mrs. David Alguire.

Skinny men, women gain 5, 10, 15 lbs.

Get New Pep, Vim, Vigor

What a thrill! Bony limbs fill out; ugly hollows fill up; neck no longer scrawny; body loses half-starved, sickly "beanpole" look—because of poor appetite due to lack of iron. Thousands of girls, women, men, who never could gain before, are now proud of shapely, healthy-looking bodies.

They thank Ostrex Tonic Tablets. Contains iron, vitamin B_1, calcium. Helps build blood, improve appetite and digestion so food gives you more strength and nourishment; helps put flesh on bare bones.

Get Lovely Curves

As you gain pounds, you gain lovelier curves too. Try Ostrex Tonic Tablets today. See how quick they help build up body "skinny" due to iron deficiency. "Get-acquainted" size only 60¢. At all druggists.

FOR YOUNG MEN OF SIXTEEN

The Canadian Army Soldier Apprentice Plan offers you trades training while you learn. On the 1st of June the Canadian Army will enrol a limited number of physically fit young men of 16 years of age, with Grade 8 education, and train them as tradesmen in 19 different trades. Trades training will consist of a two year course starting in September. When finished the course the Soldier Apprentice serves three years with a regular unit. This plan provides —

- Half pay to the age of 17 then full pay
- 30 days paid holidays a year
- Medical and dental care
- Travel and adventure
- A healthy active outdoor life with sports
- Good opportunities for advancement.

Only a limited number can be accepted. Interested applicants must not delay. Mail the coupon below or contact your nearest recruiting station.

ARE **YOU** GETTING
BANK OF NOVA SCOTIA SERVICE?

ANNE HIRST
Your Family Counselor

"Dear Anne Hirst: I am almost beside myself! My mother was brought up under the rigid control of her parents, and now they are trying to run my life for me. They don't like my boy friend because I met him in camp and his people live across the country. (He is stationed nearby until he sails for service abroad.)

"They insist my mother make me follow the silliest rules! I'm nearly 18, but I've got no say in the hours I keep. Mother says I must be in by 11:30, even on week-ends, and if I'm not she throws a scene right in front of him; you know no nice boy is going to stand that long. Why can't I be as free as other girls my age?

"I could handle my mother all right, for we get along fine until her family steps in. But this time I'm standing on my rights. We want to get married before he leaves, and though I'd be willing to wait, I'm afraid I'll lose him if I say so. He is a decent chap who is liked by all my friends and their parents, and I'm wild about him.

"Besides, if we get married, my grandparents would have to stop their interference.

BARBARA"

I doubt that you could influence your mother on this matter. She has not met your friend's family (which every parent wants to do) and even you do not know whether he has written them he is engaged. They could very reasonably object to his marrying anybody before he has begun the career he plans after his service ends.

What is chiefly bothering you, I'm afraid, is that you are being made to obey. You seek marriage as the one escape from discipline, I expect. There you are wrong. Discipline is one of the essential planks in the marriage platform, and when it has to be self-administered it presents a hazard which you have not realized. When a girl marries she pledges to try to adjust herself to her husband's way of thinking and living; in your present emotional state you are rebelling against making any adjustments to anybody.

Perhaps you do not know that in your province you cannot marry without your mother's consent until you are 21. It will promote your cause if you relax now, and cheerfully wait until your soldier comes home. If you keep on rebelling and breaking rules, your mother and your grandparents will only put on more pressure; they could make it impossible for you to see him again, you know.

Tell your soldier that if he helps you to do as your mother asks (instead of encouraging you to disobey her rules), he will double his chances for her approval to marry you later. Such an appeal will test his character; if he is all you think, he will co-operate — which will end this futile controversy and make everyone happier. Think it over.

* * *

WORRY IS DESTRUCTIVE

"Dear Anne Hirst: I am constantly on edge. I am one of a large family, all of whom are very close and dear to one another, but there always seems to be trouble somewhere! A brother's daughter has an accident, or a niece is taken ill. Every time the telephone rings I expect bad news. It is getting me down.

"Is there any cure for this?

AFRAID."

One of the most devastating habits is worrying. As we look back, though, we see how much energy we have expended in anticipating troubles that never occurred. There is always something to get us down if we let it.

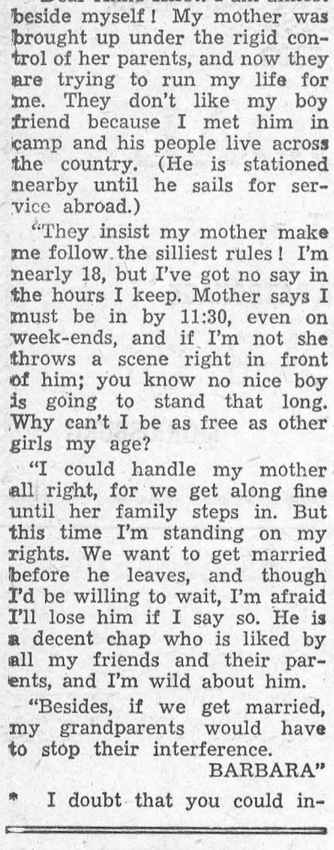
Every time misfortune has attacked your family you have met it ably and given what aid you could. You always will. Why drain strength by fearing anything? We can meet whatever comes, so isn't it foolish to get all upset beforehand?

Faith in yourself is essential, and strength comes as it is required. Cultivate serenity and you will achieve it. Knowledge is power; you know yourself to be able to step in when help is needed so face each day with confidence. It is all a matter of thinking, and as you practice you will succeed in staying tranquil.

* * *

If your opinions clash with your mother's, tell Anne Hirst about it. She can explain why parents feel as they do, and help you maintain harmony in the family. Address her at Box 1, 123 Eighteenth St., New Toronto, Ont.

Needle Painting



777

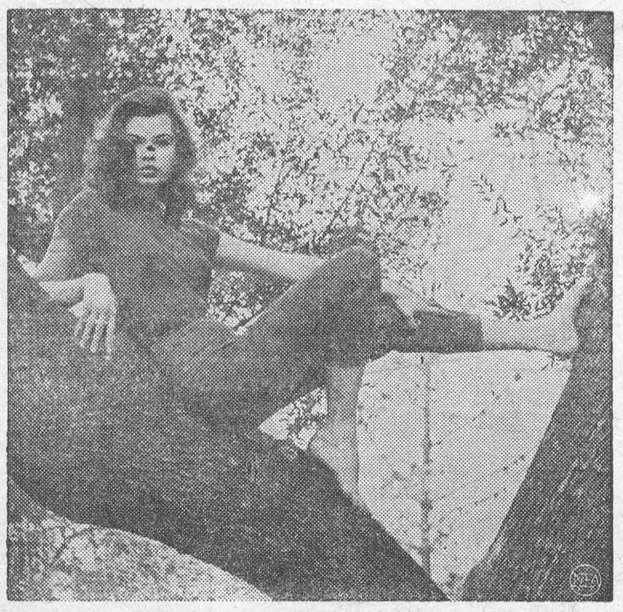
by Laura Wheeler

Display your artistry with needle and thread! It's really easy; mainly outline and single stitch used for this lovely panel —done in glowing, true peacock colors!

Pattern 777: Transfer of picture 15x19¾ inches. Colour chart is easy, fun to follow.

Send **THIRTY-FIVE CENTS** (stamps cannot be accepted, use postal note for safety) for this pattern to Laura Wheeler, Box 1, 123 Eighteenth St., New Toronto, Ont. Print plainly **PATTERN NUMBER**, your **NAME** and **ADDRESS.**

Two FREE Patterns as a gift to our readers—printed right in our NEW Laura Wheeler Needlecraft Book for 1957! Dozens of other new designs you'll want to order—easy, fascinating handwork for yourself, your home. Be sure to send 25 cents for your copy of this book now—don't miss it!



LITHE AND LOVELY — Beauty like this doesn't grow on trees, but this shady oak in a park makes a perfect setting for beautiful Susan Harrison, who's on her way to Hollywood stardom. A native of the Bronx, the former waitress has a costar role in movie "Sweet Smell of Success."

ANOTHER CONQUEST — Princess Margaret, whose name has been linked romantically with a number of men since the end of her romance with Capt. Peter Townsend, adds another admirer in this Cub Scout rubbing his nose in bashful admiration. The princess, as president of the Church of England Youth Council, visited the group of Girl Guides and Wolf Cub Scouts at the Harcliffe Housing Estate in Bristol, England.

CHRONICLES OF GINGER FARM
by Gwendoline P. Clarke

For the past week Partner and I have been making daily trips from Halfway House to Ginger Farm, gathering up more of our belongings each day, still sorting, discarding and burning. Even at that I know we are keeping far more stuff than we srould. I know, too, that it won't be very long before we shall want something or other that has been destroyed. It always happens that way, doesn't it?

To our sorrow the poor old farm is beginning to look neglected already. The grass needs cutting and sweet rocket has practically taken over the flower beds. Sweet rocket, a favorite with humming-birds, is a lovely sweet-scented perennial but I suppose it should be classed as a weed because of the way it spreads. Cutting it down doesn't do any good. The only way to keep it under control is pull it up by the roots—and if there is no one around to pull it, what then?

Every day Partner and I have taken the electric kettle and a lunch along with us when we go to the farm and then about four o'clock we sit down to a most incongruous afternoon tea. Tea made in an old silver teapot, cups without handles and our table is a small homemade affair that was formerly used, first as a stand to wash the cream separator and later the milking machine. We little thought its final purpose would be to act as a table for afternoon tea during the last days of our occupancy of the farm. Tea over, we work until after five and then we head for home. But all is not well at home either. The television has gone temperamental. Sometimes a picture comes on the screen and sometimes it doesn't. My watch is also protesting against the even tenure of its life being disturbed and so refuses to function. But our major problem has been Rusty. We thought we could keep him but that doesn't seem possible. There seems to be a dog on every lot. Dogs that have been well trained from puppyhood to stay within bounds. On the farm Rusty stayed within bounds too—but his boundary was a hundred acres. Here if we let him loose he runs like a deer, so he is tied up more than he should be. Our neighbour tells us that he howls most of the time when we are away at the farm. Under such conditions to keep Rusty would be a pleasure neither to us nor to him. And so this afternoon we are taking Rusty to a new home — a very lovely home where he will have not one but two hundred acres to run around in and a Dalmatian puppy to play with.

Well, I suppose most people have been worrying about the cool weather. For several days it looked as if we were going to have an early spring. Frosty nights soon dispelled that idea. I hope no one had geraniums or summer annuals planted out. Apparently the old adage still holds good—wait until after the 24th of May. That can be done with boxed plants but what about fruit blossoms over which we have no control. The warm sun encouraged buds to swell and now if Jack Frost has done any permanent damage we can expect a light fruit crop — and that will be just too bad for growers and consumers alike. But at the moment I am more concerned about the low price of eggs. For about ten weeks the price has remained static — 35 cents to shippers for grade A Large. This time last year the price was 43 cents—and that is as low as it should be if there is to be any margin of profit for the poultry farmer. Since we shall soon be buying eggs I suppose we should be glad. But we are not. Leaving the farm doesn't mean losing sight of the farmer's viewpoint. We raised chickens, sold eggs, kept cows and shipped milk for too many years for us ever to forget. Probably it is a case of once a farmer always a farmer. Perhaps that is why I find it hard to remember to put the milk bottles out at night. And if I forget I can't say to Partner — "You might bring me a can of milk from the barn tonight." And I wouldn't have to put tokens in the can either!

Ah well, this transition period is bound to be a little difficult. We can't expect anything else. No doubt as the weeks go by we shall probably get a better perspective of the advantages and disadvantages resulting from he move we have made. Already we have found out that we have very nice neighbours. On one side of us a young Scottish couple who are expecting their first baby in three weeks. On the other side a Polish exfarmer, his wife and little girl. They spend every spare minute in their garden. They are very friendly and helpful. Right opposite there is a doctor and his family. He has an office at the house. Quite a comforting thought to know there is a doctor so handy. Back of us is an amateur gardener so we shall have the joy of seeing beautiful flowers without looking after them. Which is just as well for this year as our garden land doesn't look too promising. But there are plenty of young ash trees plus plum and blackthorn along the fence so we shall at least have a little shade and greenery, especially as just beyond the trees there is a golf course with the greenest grass I ever saw.

Modern Etiquette

by Roberta Lee

Q. When should one tip the porter on a train—at the beginning, during, or at the end of the journey?

A. At the end of the journey.

Q. Is it all right, when entertaining dinner guests, to use a folded napkin to brush crumbs off the table?

A. This is quite all right.

Q. When the first course at a dinner party is crabmeat, served either in a tomato or on a lettuce leaf, is the correct implement to use a salad fork or an oyster fork?

A. An oyster fork is used if the crabmeat is served in a cocktail glass, and a salad fork is used if it is served on a plate.

Marilyn Monroe's Half-Sister

Not long ago a little boy of seven took home some photographs of Marilyn Monroe. His mother looked at them with more than ordinary interest, then said, emphatically, "I should so much like to meet her."

A natural enough desire, for 38-year-old Mrs. Olava Marlene Nielson is Marilyn's half-sister. Although so closely related, the lives of the two women could hardly be more different.

Marilyn Monroe, glamorous, rich, famous, talented, is the most fêted, admired and publicized actress in the world today.

Mrs. Nielson, the wife of a Danish baker, mother of four fine sons, is a quietly-spoken woman who shuns publicity of any kind, lives in a pleasant farmhouse near Copenhagen, and has never even seen her glamorous sister on or off the screen.

At this, one of the very few interviews she has ever granted, Marlene Nielson showed the only photographs she possessed of Marilyn, and explained that only recently had she realized the success Marilyn had achieved.

Talking through an interpreter for she speaks no English, Marlene Nielson said how distressed she had been by Marilyn's previous unhappy life and marriages. She had never doubted, though, that Marilyn was trying very hard to find a happy home and she was delighted to hear of her idyllic marriage to Arthur Miller.

Marlene remembers her father quite clearly, though he died tragically and while still quite young in a car crash when visiting the United States to study the possibilities of emigrating.

Hans Mortensen was a Norwegian farmer of high standing and a leading citizen of Haugesand. Marlene describes him as "a God-fearing, forthright man," who was devoted to her mother.

Marilyn Monroe, his little daughter born in America, was only a baby when he died. And for her his death meant the beginning of a series of foster homes, with a spell in an orphanage that taught her to be self-sufficient and to make the best of her environment, but gave her very little happiness.

The death of Mortensen also changed things entirely for his family in Norway. Their financial position deteriorated and, in the spring of 1936, the children were moved to Denmark.

There Marlene met and, in the following year, married Hans Christian Nielson.

"My husband and I are farming people," she explained. "We work hard, but we have a good, full life, a comfortable income and are very happy."

Marlene's friends and neighbours in the small military town of Holbaek, thirty miles from Copenhagen, pay little attention to the fact that she is the sister of the glamorous Marilyn Monroe. They like this neatly dressed, friendly woman who lives in a charming, comfortable, modern home, which she runs with model efficiency.

Marlene Nielson says very firmly that she has never wanted to go to the United States, even to visit her famous sister, because she feels that Denmark "is a more stable and rational place to live in." Her only brother is happily settled in Toronto, Canada.

Perhaps one day Mr. and Mrs. Arthur Miller will succeed in disguising themselves as just ordinary tourists and will manage to pay a private visit to the Nielsons. They'd enjoy it, for it would seem, from Marlene's experience, that Denmark is a country where even Marilyn Monroe could walk around without being besieged by gaping sightseers — and yet be welcome with friendliness.—From "Tit-Bits."

WHAT A JURY!

The judge was disgruntled at the jury's decision and asked the foreman: "What possible excuse did you have for acquitting this man accused of murder?"

"Insanity," the foreman replied.

"What!" exploded the judge. "All twelve of you?"

Loveliest Lines!

ISSUE 22 — 1957

CITED FOR GOLDEN DEEDS — Eight-year-old Charles Neil Gibbs, Jr., is awarded the United Cerebral Palsy's Golden Deed Crusade Medal by Gen. Randolph McC. Pate, Marine Corps commandant, during ceremonies at Corps headquarters, Charles has traveled thousands of miles to aid the 600,000 victims of cerebral palsy. Until two years ago the 1956 Cerebral Palsy poster boy was unable to walk. He now gets around with the aid of crutches and braces.

Insects, Animals Forecast Weather

Attending an evening garden party, a well-known British naturalist was asked by a friend whether he thought it was time she fetched her jacket. He gazed at his watch for several seconds, then told her that he thought it was hardly cool enough, since the temperature was 72 degrees.

Mystified, the woman asked to see the "wonder" watch. But the naturalist laughed and explained how he had been able to tell the temperature by it.

In a near-by shrubbery a tree cricket had been chirping merrily all the evening. He had recognized it as the kind known to naturalists as the temperature cricket, and all he had to do to find out the temperature was to count the number of chirps it gave in seven seconds, double this number and then add forty-two.

It had in fact chirped fifteen times in the seven seconds.

Many creatures make handy temperature gauges, varying the activities according to whether it's hot or cold.

For example, except for the so-called warm-blooded animals (mammals and birds), all animals depend for their body temperatures upon the temperature of the air surrounding them. And the rate at which they can move depends upon how warm their muscles are.

This explains why on a hot afternoon a lizard can run away too fast for you to catch it; whereas on a cool day it is only capable of sluggish movement.

The chirruping of the cricket is produced by rubbing the serrated edges of its fore-wings together, while its close relative, the grasshopper, "sings" by rubbing the hind leg against the fore-wing. Both, of course, are the result of the muscle movements, and therefore the rate varies according to the temperature.

Perhaps the most famous of all the insects whose voices very according to the temperature is another kind of tree cricket called the katydid, a curious name derived from the sound that it makes.

As the sun begins to set, so the katydids begin their chorus. If the temperature is above 77° they give their full call, which sounds like "Katy did," with every syllable emphasized. Then, as the evening wears on and the air cools down, the songs gets progressively shorter and weaker.

Below 77° Katy suddenly becomes innocent of whatever misdemeanour she was formerly accused, for all the crickets now sing "Katy didn't." At 73°, however, they again change their minds and proclaim unanimously that "Katy did."

And so they go on, contradicting themselves every time the temperature falls another three degrees, passing through "Katy didn't," "Katy did," "didn't" and finally reaching "did" at about 60°, after which silence reigns for the rest of the night.

Making use of insects to determine the temperature is quite a new idea, but the idea of getting a weather forecast from animals dates from much earlier times. One of the most widely used of these animal weather prophets is the European tree frog, a handsome little bright green creature.

In many parts of Europe these frogs are kept in glass jars, and inside each jar is a tiny ladder. The frogs climb up and down the ladders, and the positions they take up are supposed to indicate what kind of weather is on the way. The whole effect is very attractive, but its reliability is rather doubtful.

Some creatures show quite obvious changes of behaviour when the weather is about to alter, and are specially sensitive to the approach of storms and heavy rain.

In some parts of Europe there is a little freshwater fish called the weather fish or thunder fish, which is sensitive to changes in air pressure. When a storm is on the way these little fish become very energetic, and can be seen splashing about on the surface. Sometimes they give warning as long as twenty-four hours before a storm arrives.

Eels are sensitive to approaching stormy weather and become very active. Perhaps in their case they are excited at the prospects of a storm, because heavy rain washes an abundance of worms, and insects of various kinds into the river, thus providing them with a welcome feast. In earlier times the eel fishermen of the fens used to entice eels towards the surface of the water by beating drums. The eels obviously thought a thunderstorm had arrived.

Incidentally, the dying duck in a thunderstorm has some basis of fact. A duck has a particularly thin skull, and is for this reason unusually sensitive to sudden changes in air pressure. Frequently therefore ducks do become extremely restless and ill at ease just before and during a thunderstorm.

Sometimes, though, these animal weather signs are based on fallacies. For example, it used to be a common belief among people who lived in Hampstead that the sea lions at the London Zoo were able to foretell rain, because whenever they could hear them barking rain usually followed. In fact, all this meant was that the sea-lions could only be heard when the wind was south-westerly. At other times voices didn't carry as far as Hampstead!

Spiders are said to strengthen their webs if bad weather is likely, and careful observation of a spider at work once enabled the French army to capture a Dutch town.

In 1794, a French officer imprisoned at Utrecht had nothing better to do than to watch the spiders in his cell going about their daily tasks of web building. Soon he realized their activities varied with the weather, and that they seemed able to foretell changes. After a while he, too, was able to make a pretty accurate twenty-four-hour forecast by watching what they were doing.

When the canals froze with the onset of winter, the French Army invaded Holland, taking their artillery and equipment across the ice. Just when the operation was getting well under way a sudden thaw set in, and the French general ordered a hasty retreat.

The prisoner had been watching his spiders carefully, however, and he learned from them that the thaw would last less than twenty-four hours. Somehow he managed to get a message to this effect through to the general, and the retreat was called off. The spiders' forecast turned out to be quite correct, and within a few day Utrecht was taken and the observant prisoner was released.

OFF ON MOMENTOUS JOURNEY — Members of the R.A.F. volunteer crew manning the Valiant four-jet bomber that dropped Britain's first dydrogen bomb over Christmas Island in the South Pacific are shown boarding the craft before taking off from Wittering, England, in March, 1957. Left to right are: Wing Commander Kenneth Hubbard, pilot (at top of ladder entering plane); Flying Officer Robert Beeson, co-pilot; Flight Lt. Edward Larraway, electronics officer Flight Lt. Allan Washbrook, navigator and bombardier; and Flight Lt. Eric Hood, navigator. At extreme left is member of the ground crew.

Broke Old Record

On June 29, 1956, Jacques Anquetil of France broke a world's record, which had stood in bicycle racing for 14 years, by propelling his bicycle over a total of 28.682 miles in one hour. Success came on the Frenchman's third assault on the record, which he beat by 394 yards at the Vigorelli course in Milan, Italy.

And what about the bicycle? Well, it was made of aluminum, and the entire machine was a mere 14.3 lbs.

GRAVE ANNOUNCEMENT

An acute shortage in cemetery space in Greece led recently to the appearance of the following advertisement in an Athens newspaper: "TO LET: Space for one coffin in luxurious family grave in Anapafeos cemetery, centrally located, easily accessible."

NINE PLAYERS AND A MASCOT — If the Fisher family of Terminal, Texas, ever fields a baseball team it will be able to man all position and have sister Susan handling the bat rack. Lined up for this family photo they are, from left: Frank, 2; Patrick, 4; Michael, 6; Eugene, 8; Jerry, 9; Jimmy, 11; Tommy, 13; Joe, 15; John Jr., 17; Mrs. Fisher holding Susan, 3 months, and John Fisher Sa. Daddy, already topped in hight by two of his sons, is a painter.

The GREEN THUMB by Gordon Smith

No Hurry

Don't fret even if Spring is getting on and the garden isn't. In most parts of Canada there is still plenty of time for planting flowers and vegetables. In many parts of this country as a matter of fact, it is an early season indeed where much planting is possible before mid-May. Rushing will do far more harm than good. Both soil and air should start to really warm up before it is safe to risk most flower and vegetable seeds.

There are a few things like the first lettuce and radishes, garden peas and a few onions which one can plant just about as soon as the last snow leaves. But the big bulk of the vegetable planting, things like carrots, beets, beans, potatoes, cabbage and so on are not safe until danger from frost is about over. And tender things like melons, tomatoes, cucumbers and corn should not be planted or set outside until all danger of frost is over.

The same holds true in the flower lines too. The hardy things that will withstand a bit of frost are not too numerous and include sweet peas, cosmos, marigolds and a few others which are listed as hardy in the seed catalogue. Most flowers, however, so far as Canada is concerned, are only semi-hardy and planting these while there is still danger of frost and the soil is cold, is largely a waste of time. Then if they do grow, they are liable to be stunted by cold and later sown seed will be farther ahead in the end.

A Fine Bed

The finer the soil, the better the seed bed, and especially when the seed sown is small, like that of the poppy or alyssum among the flowers, and lettuce and carrots in the vegetable line. If the seed bed is coarse, and lumpy, it will be impossible to keep out air and either the seeds will not germinate at all or they are liable to produce only weak plants. It will pay well to run rake or cultivator through a few extra times, and in very heavy lumpy clay, if one can add a bit of sand and humus, it will make a big and favourable difference.

Avoid These

The two commonest mistakes made by amateur gardeners are planting too thick and too deep. Seed is usually small but the plants produced from that seed may be several feet tall. Bearing this in mind, we should spread seed thinly, never closer than an inch or so, and even when so spaced, most things will require rigid thinning later on.

And almost every one is inclined to plant far too deeply. With tiny seed such as that of lettuce, carrots, cosmos, zinnias, poppies and alyssum, which are not much larger than the head of a pin or shingle nail, it is not necessary to cover at all. We sow these in the finest soil and merely press in. Then, if possible, we keep the soil dampened until germination starts. With larger seeds such as nasturtiums, peas, beans and corn, one should cover lightly, say a quarter to half inch. With bulbs or corms of gladiolus, dahlias, or potatoes one plants four to eight inches deep.

Power Saves Labour

Where the lot is fairly large, a garden tractor and a power lawn mower will save time and hard work. These machines are not expensive and, given minimum care, they will last for many years. They will do the work at least five times faster than by hand. It is a mistake to purchase too large equipment, especially in tractors. The smaller types are much more easily handled and with attachments will do almost every chore, except heavy plowing.

JARVIS — HOLLISTER

St. David's Church, Wales, was the scene of a pretty spring wedding on Saturday May 11th, when Bonnie Carole Hollister, daughter of Mr. and Mrs. Basil Hollister of Aultsville became the bride of Gerald Edward Jarvis, son of Mr. and Mrs. Harold Jarvis of Morrisburg.

Rev. J. L. F. MacMorine officiated at the double ring ceremony.

Mrs. Muriel Davies played the nuptial music and accompanied the soloist, Gordon Thom, of Morrisburg, who sang "O Perfect Love" and "O Promise Me". The altar was decorated with white chrysanthemums and the guest pews marked with white satin bows.

Given in marriage by her father, the bride wore a floor length gown of white chiffon organza over very full double taffeta hooped skirts, the bodice featuring long lace sleeves, coming to points over the hands. Her finger tip veil of tulle illusion, was held by a matching sequin coronet and she carried a cascade bouquet of American Beauty roses and white chrysanthemums.

She was attended by Miss Anna Helmer as maid of honor, Miss Joyce Hollister, her sister and Miss Dallas Hollister, a cousin, as bridesmaids.

The maid of honor wore a floor length sleeveless gown of mauve nylon lace over taffeta with matching bolero and bandeau and a cascade bouquet of yellow and white chrysanthemums.

The gowns of the bridesmaids were fashioned similarly to that of the maid of honour, Miss Joyce Hollister wearing Nile green and carrying yellow and green mums and Miss Dallas Hollister, yellow with mauve and white chrysanthemums.

The ittle flower girl wore yellow nylon and lace with bandeau of yellow roses. She carried a nosegay of mauve and yellow mums.

William Jarvis of Morrisburg, was best man for his brother and the ushers were Lyle Millward and Ernest Dillabough.

Mrs. Hollister, mother of the bride, wore a blue floral silk gown with accordian pleated skirt, beige accessories and a corsage of pink carnations.

Mrs. Jarvis, the groom's mother, was wearing a grey wool suit with pale blue accessories and a corsage of red roses.

Following the ceremony, a reception was held in St. David's Hall, which was decorated with white chrysanthemums. The young couple left later for a motor trip to the United States. For travelling, the bride wore a beige suit with pink accessories and a corsage of pink carnations. On their return they will reside in Aultsville.

Out of town guests were present from Brockville, Ottawa, Cornwall, Avonmore, Morrisburg, Iroquois and Bainsville.

FRONT END LOADER

EXCAVIATING, LEVELLING, by the hour or contract. Loading gravel, fill or manure. Phone Iroquois OL 2-4659. 21-2c.

THENCE Southerly to the Northwest angle of Lot 36, Registered Plan No. 37;

THENCE Wtsterly along the Southern limit of Canal Street (also known as Riverside Drive) to a point to a point 60 feet Easterly from the Northeast angle of Lot 34, Registered Plan No. 37;

THENCE NORTHERLY in a straight line to the point of commenctment.
C. W. LLOYD, O. L. S.,
For Chief Surveyor.

CANADIA NCLUB TO HOLD 2nd MEETING ON THURSDAY

The second meeting of the Morrisburg and District Canadian Club, and the only other spring meeting will be held on Thursday, June 6th at 7 p.m., dayligt saving time at the Music Hall, Morrisburg. The speaker will be Inspector A. Witts, of the Traffic Safety Office of the Ontario Provincial Police, Toronto. He will speak on traffic problems generally in view of the increasing difficulty experienced in this area due to new roads being created.

Inspector Witts has spent many years speaking on traffic safety and comes very well recommended.

The remaining three meetings for the current year will be held in the fall, and while it is not at this certain just where they will be held, all members will be notified in due course concerning them.

Skinny men, women gain 5, 10, 15 lbs.

Get New Pep, Too. Be Thrilled With Results – or Pay Nothing

What a thrill! Bony arms, legs fill out; ugly hollows fill up; neck no longer scrawny; body loses half-starved, sickly look. Thousands, who never could gain before, are now proud of shapely, healthy-looking bodies. They thank the special vigor-building and flesh-building tonic, Ostrex. Its tonics, stimulants, invigorators, iron, vitamin B_1, calcium, enrich blood, improve appetite and digestion so food gives you more strength and nourishment; put flesh on bare bones. Mrs. L. Savard, Mattagami Heights, Ont., writes, "I gained 16 lbs. Tired feeling, nervousness gone, too." Another user, Mrs. Marc Gagnon, Cap Chat, P.Q., writes, "I gained 13 lbs. Health fine. My rundown husband gained 15 lbs. New pep."

Don't fear getting really fat. Stop when you've gained the 5, 10, 15 or 20 lbs. you wish. Money back if you're not delighted. Costs little. New "get-acquainted" size *only* 60¢. Refuse substitutes. Ostrex has given results when other tonics failed. Try famous Ostrex Tonic Tablets for new vigor and added pounds, this very day At all druggists.
