Card of Thanks

Mrs. Dan Porteous and family wish to express their sincere thanks for the kindness and sympathy extended them during their recent bereavement. Ip

In Memorium

In loving memory of Ira Christie, who departed this life May 6, 1926. Gone but not Forgotten. Wife and Family.

Government Control!

We Buy Eggs according to Government Regulations.

The Goat.

A Schoolboy's Essay: "A goat is about as big as a sheep if the sheep is big enough. A female goat is called a buttress; a little goat is called a gotee. Goats are very useful for eating up things. A goat will eat up more things than an animal that ain't a goat. My father had a goat once. My father is an awful good man. Everything he says is so, even if it ain't so. That is all I know about goats."

If you are a producer proud of your product and do not sell by quality you are "The Goat."

If you are the buyer and do not buy according to quality you will be "the goat."

Our sales of Eggs last week were over 3500 doz. and we expect to reach 6000 doz. per week.

Price for Saturday and Monday for Extras 28c per dozen.

A full line of Chick Feed at reasonable prices. 100 bags Finest Quality Potatoes. Finest Dairy Butter sold on its merits.

Our Column

Sunday is Mothers Day. Wear a flower.

Leave your order for Flowers for Mother's Day, at FLORA'S

The rest of your days depend upon the rest of your nights.

Another snow storm visited the province of Alberta on Wednesday.

It's renewal time for you if your label says anything prior to May 7. Thank you!

Victoria Day, May 24th, is not far away. Will Winchester have any doings on that day?

The rain of Wednesday did much good, and already the trees, shrubs and grass are showing the result of the downfall.

The Press extends congratulations to Andrew S. Brown and J. D. Stewart, who this week celebrate birthday anniversaries.

The piles of rubbish displayed on the sides of the streets on Tuesday morning was an evidence of the need of a clean-up day.

The new liquor permits are to cost two dollars. But, as in the case of the automobile, it is not the initial outlay, but the maintenance, that counts up.

A man recently fainted three times at his own wedding. It was no use however. They waited until he came round the third time and then went on with it.

Enjoy a musical treat by hearing the Choir of Bell Street United Church, Ottawa, in their programme in the United Church, Winchester, on Friday night.

The Action Free Press, as all self-respecting newspapers should, has raised its voice in protest against the "Ready-made" editorials that fill the editorial page in too many weekly newspapers.

Bishop Fallon, of London, Ont., speaking at Stratford last week emphatically expressed himself a firm believer in temperance and said "if he had his way no Catholic in the Diocese of London would buy a liquor permit."

Thank Goodness Winchester isn't worrying about the location of its liquor supply store. Winchester has more to rejoice over than those places that are to have liquor stores. And time will fully confirm this statement.

Two sea serpents, each 30 feet long, with bulging eyes and pink and yellow necks, are reported of the British Columbia coast. They will be seeing the same kind of sea serpents in the St. Lawrence and Lake Ontario after May 16th.

The following Press would recommend to some of our local fishermen. Lord grant that I may catch a fish so large that even I

When speaking of it afterwards May have no cause to flee.

The Winchester Press wants to publish everything in the way of town or district news, and your co-operation will help a great deal. Send your news in early, as there is always a great deal of last-minute rush just before publication.

"Why should anyone be bad? Why should anyone be sad In this world of ours? Birds, sunshine and flowers, Butterflies, grass and trees, Outdoors, all of these; Indoors, there is Mother."

During the past week five persons in the Toronto district have been hurled into eternity by the cars in which they were riding being struck by a train at a level crossing. At that rate most of the food drivers who try to beat a train at a crossing will soon be out of reach of doing further harm. Unfortunately the innocent suffer with the drivers.

Bird Houses are not only ornamental about your premises, but they attract about your birds, and what can be more attractive than a lot of song birds about your home. Did you ever get out in the early morning and listen to their sweet, clear notes as they talk to one another, select their nesting place, and build their nests. A bird house is easily built. If you want a plan to build one you may secure it by writing to the Department of Agriculture either at Ottawa or Toronto, and one will be supplied you

Presented With Bouquets

At the congregational meeting of the United Church held on Wednesday evening, Mrs. Andrew Timmins, in her 90th year, and Mrs. Nicholas Shaver, in her 88th year, were each presented with a beautiful bouquet of carnations. The presentation was made by Rev. Mr. Waddell, on behalf of a few friends who thought the occasion one when they might show how much they admired those "Mothers in Israel" who, notwithstanding their advanced years are more faithful and regular in their attendance at church services than many at half their age. Rev. Mr. Waddell paid a just tribute to their saintly lives, and expressed his personal pleasure in the performance of so pleasing a duty.

Morewood United Church

At the annual congregational meeting held last Monday, May 2nd, in the Church Hall, there was a very good representative gathering totalling nearly one hundred members and adherents. In presenting the annual reports it was shown that this church has raised for all purposes during the year the sum of \$10,354, which proves to be the second highest grand total amongst the twenty-five churches of the Presbytery. Eleven joined the church during the year, only two of these by certificate. The membership is 231, and of this number 29 are non-resident.

The system of financing adopted for the new church year is that of the monthly duplex envelope. Envelopes will be available this month.

Elections to the three vacancies on the Sessions resulted in the choice of Messrs H. L. Conner, B. A., Wm. Richmond, Jas. Cameron.

Elections to the Com. of Stewards resulted in the re-election of the present nine members for another year, and the election of Messrs W. E. Fetterly, Walter Steven, J. W. Bogart for a term of two years.

Refreshments were served under the direction of the Adult Bible Class of the Sunday School.

The Anniversary Services will be held on Sunday and Monday, June 5th and 6th. Next Sunday, May 8th, at the morning service there will be the ceremony of setting apart the newly-elected elders.

LOCAL AND GENERAL

A tramp asked Andrew Davidson, aged farmer near Ottawa for a drink then clubbed him and ransacked his home.

Mr. O. J. Henderson, B. A., one of the recent honor graduates from Queen's University and formerly of Winchester High School Staff, has secured a position in the Orillia High School for the balance of the year.

Play "Looking for Mary Jane" by young people from Mountain in Morewood United Church Hall, Friday, May 6th, at 8 p. m. Admission 35 cents and 20 cents.

Wm H. Beattie, who was born in Morrisburg 82 years ago, and who served in the United States civil war with the 20th Regiment of New York Cavalry, in the ill-fated Custer expedition in the Western States, in the Philippines and in Cuba during the Spanish-American war, died last week at Watertown, N. Y., after a long illness. He was given a military funeral by an escort from Madison Barracks and buried in North Watertown cemetery.

For some weeks the Rev. S. S. Hughes, D. D., who was a pastor of the Winchester Methodist Church, has been in the hands of doctors and nurses. He was returning from visiting an old friend from Amnrior, Stanley B. Wilson, who had undergone an operation in one of the hospitals at Los Angeles. Mr. Hughes had almost reached home when he was hit by a reckless driver and left helpless and unconscious on the street while the man ran into the heavy traffic and disappeared. Mr. Hughes knew nothing till some time next day, when he felt the surgeon mending the broken bones. The right leg was broken and the knee and his whole body was badly bruised. Consciousness of the brain followed the heavy shock. It was a question if he could recover at all. He is now, after six weeks, in hospital, learning to walk again. It is a slow process.

Broke Finger

Evered Bicum, mail carrier, broke the index finger of his right hand on Saturday last when trying to crank a Ford car. Dr. McKendry dressed the hand, but the finger was badly smashed.

Early Grain

Mr. J. E. Lanoue, Melvin Settlement, is an enterprising farmer, and always up to date. This Spring, however he is a little ahead of time for he has 53 acres of grain sown and the grain is now over 3 inches above the soil.

Don't Want Change

The sensible people of Cornwall would not submit to a change to daylight saving time proposed by their municipal council, and did not hesitate to promptly express their disapproval when the council tried to force this so-called daylight saving on them. The fact may suit a certain crowd in the cities, but in small towns and rural communities it is a big nuisance.

New Church at Huntingdon

The Church at Huntingdon, Que., which was burned about a year ago has just been rebuilt, and the beautiful new structure will be dedicated on Friday, May 13th. The dedication services will be continued on Sunday. The pastor, the Rev. J. I. Hughes, is an old Winchester boy and congratulations are in order, on the completion of so great a task.

Strong Statement This

Clinton News-Record: G. S. Spry, advertising manager of the Huron & Erie Mortgage Corporation, recently stated that a Huron county man had told him that the amount of money gathered in by unscrupulous salesmen of worthless stock in the county in 1925 would pay off every farm mortgage within the county limits. This is a strong statement, and we do not know whether it is correct or not, but there is no doubt at all that these stock salesmen garner in a lot of coin during the year. Mr. Spry advised that everyone investigate before investing. "It is better," he said, "to lose one good investment by waiting than to be loaded up with a bad one." Your local financial man will give you sound advice about investments.

A Musical Treat

The Bell St. United Church Choir of Ottawa, under the leadership of Mrs. Orr (nee Pauline Sparling) will give a splendid musical program in the United Church, Winchester, to-morrow (Friday) night. The Concert will begin at 8 o'clock. The admission is only 25c. It will prove an musical treat and there should be a large attendance.

W. C. T. U.

At the regular monthly meeting held yesterday afternoon in the Public Library the Pres. Mrs. N. W. Beach occupied the chair. The singing of "Rock of Ages" opened the meeting after which Mrs. (Dr.) McKendry conducted an interesting clip sheet program which was an unanswerable demonstration of the fact that the Bible recognized intoxicating and adulterating wines, approving the latter and disapproving the former.

The Pres. reported having represented the Union at Rink meeting and having given a cheque for \$15. Notice was given that \$30. is due May 16th, and the Pres. was authorized to pay this.

Mrs. Flora read a letter from Mrs. Chalmers of Morrisburg, on Christian Stewardship. It was thought that this matter should not be neglected by our Union.

The Pres. reported receiving word from Mrs. Merrill that she might come some time after May 20th, to speak at a Mother's Meeting. Three ladies were added to the Committee for this meeting, and it was decided to have a money shower at this meeting in aid of the Budget. A nominating committee was named to bring a list of officers to next meeting. A discussion took place as to change of day of meeting. This was left over until next meeting. A suggestion was made that we hold the meetings in the homes. This met with approval. Annual report blanks were given out.

LOCAL AND GENERAL

The remains of the late Mrs. Blake Durant were laid to rest in the Vancamp cemetery on Monday.

The many friends of Nurse Miss Susie Dixon, are very sorry to hear of her illness and hope for a speedy recovery.

Mr. H. B. Fetterly leaves on Wednesday night to attend some important meetings of the General Council of the United Church in connection with the Department of Religious Education. Mr. Fetterly is the lay representative of the Montreal and Ottawa Conference.

A mild epidemic of measles, numbering 1,092 cases, placed this disease at the head of the list for contagious diseases at Toronto during the month of April, figures issued by the Department of Health show. Of this number, 513 were cases of German measles. In March the number of cases of measles was 906. Scarlet Fever was the next most prevalent, 216 cases being reported, compared with 244 in March.

Fresh Fish at Erratt's Meat Market Friday and Saturday.

Thirty weeks in big time vaudeville have just been completed by the Goodrich Silvertown Cord Orchestra and the Silver-Masked Tenor. On May 5 they go back on the air through W. E. A. F. and a network of 18 other stations to give the radio audience a new series of concerts. These concerts will be given every Thursday night throughout the summer between the hours of 9 and 10 Eastern Standard Time. The return to the radio studio of this orchestra and the famed Irish tenor, who hides his face behind a mask, will be welcomed by millions of radio fans.

Coming to Winchester

Rev. G. O. Davies, B. A., formerly of the Anglican rural deanery of Leeds and recently of Rawdon, has accepted charge of the parish of Winchester, in the diocese of Ottawa, and preached farewell services on Sunday last at the Brockville Record and Times. Rev. Mr. Davies with his wife and three children is expected to arrive in Winchester to-morrow, and will hold his first service in Winchester on Sunday evening at 7.30 o'clock.

Winchester Baseball Club

At an organization meeting of the Winchester Baseball Club held in Flora's ice cream parlour on the evening of Friday, April 28th at 7.15 p. m., the following officers for 1927 were elected. Hon. Pres.—Rev. John A. Waddell. Pres.—R. M. Elliott. Vice Pres.—Willie Carkner. Sec'y.—W. H. Agnew. Treas. & Business Manager—Harry Flora. Coach—Earl Shaver. Advisory Committee consisting of three members with J. L. Dixon chairman. W. H. Agnew, Sec'y.

Queen's Graduates

Among the recent graduates from Queen's University were pleased to note the following: Miss Sadie G. Miller, Kemptville, with honors in History and English. Miss Grace Wert, B. A., Avonmore, Ont., Specialist in History and English. Mr. O. J. Henderson, Bowmanville, Ont., Specialist in Mathematics and Physics. Mr. Gordon Suffel, B. Sc., Inkerman, degree of M. Sc. Miss Bernice Sargent, Chesterville, B. A. degree of M. A. Mr. C. W. Marcellus of Williamsburg secured an honor B. A. and the Arts Research Scholarship of \$500. Charles Coulthart, Chesterville, also gained his B. A. degree.

The United Church

(Contributed)

At the Sunday morning service the pastor told the children a story of a Serbian peasant which was a lesson in the joy of humble service through which God is found.

Titus 2:10 was the morning text. The historical setting of this epistle was given, showing that Titus was a convert to the faith of Jesus Christ under Paul, and in this letter from the latter to the former we see love and counsel. Many of its admonitions could be used by us to-day. Mr. Waddell spoke of the power of an upright, generous and unblameable life as a Christian. He said, "Preaching alone has never won any great victories for the Kingdom of God. It has been effective only as it has borne fruit in good lives. Do our faces and lives advertise that it is a good thing to follow Christ?" He advised us to live so near to Christ that He will have some chance to transform and beautify our lives. The choir sang, "We Worship Thee."

In the evening an impressive memorial service was conducted by Rev. J. A. Waddell in honor of those who had slipped away during the past year to be with God.

The pastor read the names of which there was an unusually large number of active members. He took Ex. 12:24 as a text and said we had met to pay a loving tribute to these friends and even in the midst of our sorrow we could find reason for thanksgiving. This service should mean a day of consecration. Strengthen the things that remain, is the message to us, and Go out to Comfort others with the comfort wherewith you have been comforted. Be not forgetful of the claims of God upon our lives and dedicate the residue of our days to Him.

A suitable selection was given by the Choir.

Next Sunday morning the Mothers Day program will be given under the direction of the Sunday School.

BRODER MEMORIAL

Under the authority of the Memorial Committee for the County of Dundas a meeting will be held in the Town Hall, Winchester, on Saturday evening, May 7th at 8 o'clock to arrange for a canvass of the Village in the interest of the project. John McCormick, N. W. Beach, Aaron Sweet, local committee. Winchester, April 30th, 1927.

SOCIAL AND PERSONAL

Misses Marjorie Wallace and Laura Dukelow spent Sunday at Kars.

Mr. Harold Dukelow of South Gower, spent Saturday at his home here.

Mr. and Mrs. Arthur Shaver, of Kemptville, were guests of Mrs. Flora on Monday.

Misses Greta, Adrienne and Minnie Earle spent the week end at their parent's home here.

Miss Laura Fawcett spent a few days last week with her sister, Mrs. Chas. Algate, of Massena, N. Y.

Mrs. Wm. Hughes left on Tuesday to spend this week with Mr. and Mrs. H. R. Patterson of Merrickville.

Miss Eileen McCauley who has been confined to her bed for several weeks is now able to be out again.

Mr. Charles M. French, of Blanche, Que., was a week end guest at the home of Mr. and Mrs. Geo. Earle.

Mr. and Mrs. D. E. Francis left last Tuesday for Mount Kisco, after spending the winter with relatives here.

Mr. T. J. MacLaughlin and daughter, Audrey, of Ottawa, were Sunday guests of Miss Hazel Bowman, of Inkerman.

Mr. and Mrs. Roy Annable, Dorothy and Doris visited at Mr. Walter Moffats, and Mrs. Howard Annable spent Sunday with friends in Cornwall.

The Late Joseph Steed

Died, at his home, Morrisburg, Wednesday April 27th, 1927, Mr. Joseph Steed, aged 91 years. Joseph Steed was born on lot seven concession two Matilda, on the 17th day of January 1836. On Wednesday, April 28th, he heard the summons "Come ye blessed & c" and gladly obeyed, having often expressed the desire to "depart." He was one of a family of twelve, ten girls and two boys and the last survivor of them. He was the older of the boys and at the early age of six, having become suddenly bereaved of his father, took upon himself at that early age, the duty of caring for his mother. He assisted in the construction of our canal and the building of the railroad, walking from his home to his work along the Flag Road. The canal was not dug by steam shovels but by men with wheelbarrows and scrapers. His first job was carrying water to the men and carrying his slender wages to his mother who was no pleasure like along the Flag Road for in those early days, wolves were still in this neighborhood, one coming and calling on his mother at her kitchen door. In 1870, he removed with his mother to lot two, concession five, Winchester, and shortly afterwards made a long friend of the late Hon. Andrew Broder, for whom he drew many a load of merchandise from Morrisburg to Winchester. These were the palmy days for Morrisburg, before Winchester had a railroad. Later in 1889 he removed to Mountain, near Hallville, and in 1896 came to Morrisburg. Meantime in 1885 his mother, at the advanced age of 86 passed on, leaving behind the whole family of twelve.

Mr. Steed, by his unfailing kindness, honesty and devotion to service, faithfully rendered, endeared himself in all places where he resided. He was not long in Morrisburg until those sterling, kindly qualities won for him a host of friends. A very pleasing surprise was given him by a few friends on the evening of his 91st birthday, when they gathered at his home all had supper with him.

Cleland—Ellis

The home of Mr. and Mrs. R. J. Ellis, Iroquois, was the scene of a pretty wedding on Saturday morning, April 23rd, at 10.30 o'clock, when their second daughter, Vera Pearl, became the bride of Mr. Gordon Cleland, eldest son of Mr. and Mrs. Wm. Cleland, of South Mountain. The room of the home was tastefully decorated in a color scheme of pink and white and the large bay window of the drawing room before which the bridal party stood, was banked with Easter lilies, geraniums and ferns.

The bride, who was unattended, and given away by her father, was becomingly attired in a gown of Mother Goose georgette with rose beige and gold trimmings. She carried a bouquet of roses and sweet peas and her only ornament was a handsome string of pearls.

Rev. M. J. Robinson, pastor of the United Church, of which the bride was a member, performed the ceremony, while her sister, Mrs. James Everett, presided at the piano, playing Mendelssohn's wedding march.

Following the ceremony a wedding dinner was served was unattended, and after which Mr. and Mrs. Cleland left for Toronto, Hamilton and other points. The bride's travelling costume was of rosewood flat crepe, with a coat of same shade, trimmed with fur, and a small hat to match.

On their return Mr. and Mrs. Cleland will take up residence in South Mountain. —Iroquois Post.

Died

At the residence of her daughter, Mrs. Thos. McQuat, Winchester, on Wed., May 4, 1927, Margaret Burns, wife of John Midgach, in the 81st year of her age. The funeral service will be held in the United Church on Friday, May 6th, at 1.30 o'clock in the afternoon. Interment at Maple Ridge Cemetery.

Auction Sale!

The undersigned will sell by Public Auction on Lot 16, Con. 8, in the township of Winchester, 3 1/2 miles south west of Morewood, on Wednesday, May 11th, 1927, at 1.30 p. m. sharp, the chattels of the Estate of the late Charles Smith, consisting of,—

Banff's Big Indian Pow Wow a Colorful Spectacle

The Stoney Indians, who live near Banff, Alberta, in the Canadian Rockies, believe in the old adage: "All work and no play makes Chief Jack a dull boy," or words to that effect. Consequently, when they leave their Morley Reserve in July for their annual Pow Wow, at Banff, they put on for two or three days one of the most colorful and unique spectacles seen in North America. Headed by such noted chiefs as Moosekiller, otherwise Peter Wesley, who still has Queen Victoria's treaty flag; Horsefoot, Hector Crawler, Medicine man; Walking Buffalo, Johnnie Bearsaw, David Bearsaw, Green Hills and Spotted Eagle, they parade each morning through the streets of Banff and to the courtyard of the Banff Springs Hotel, resplendent in gorgeous trappings of bead-work, ermine tails and eagle feathers. The squaws and bucks have on more war

paint than a Broadway flapper, and even the horses are painted.

Tiny papooses are carried in moss bags on their mother's backs, or on the old travois, and their little, shining faces seem to reflect the happiness of all these "people of the woods" in being back again in the mountains which they loved to roam. These Indians are thrifty. Some of them have ranches in the foothills of the Canadian Rockies; they cut and export wood. The squaws do beautiful bead-work, which they sell; the trap-lines yield valuable furs; and, on the whole, the Stonies are the most capable and business-like of the Western Canadian Indians.

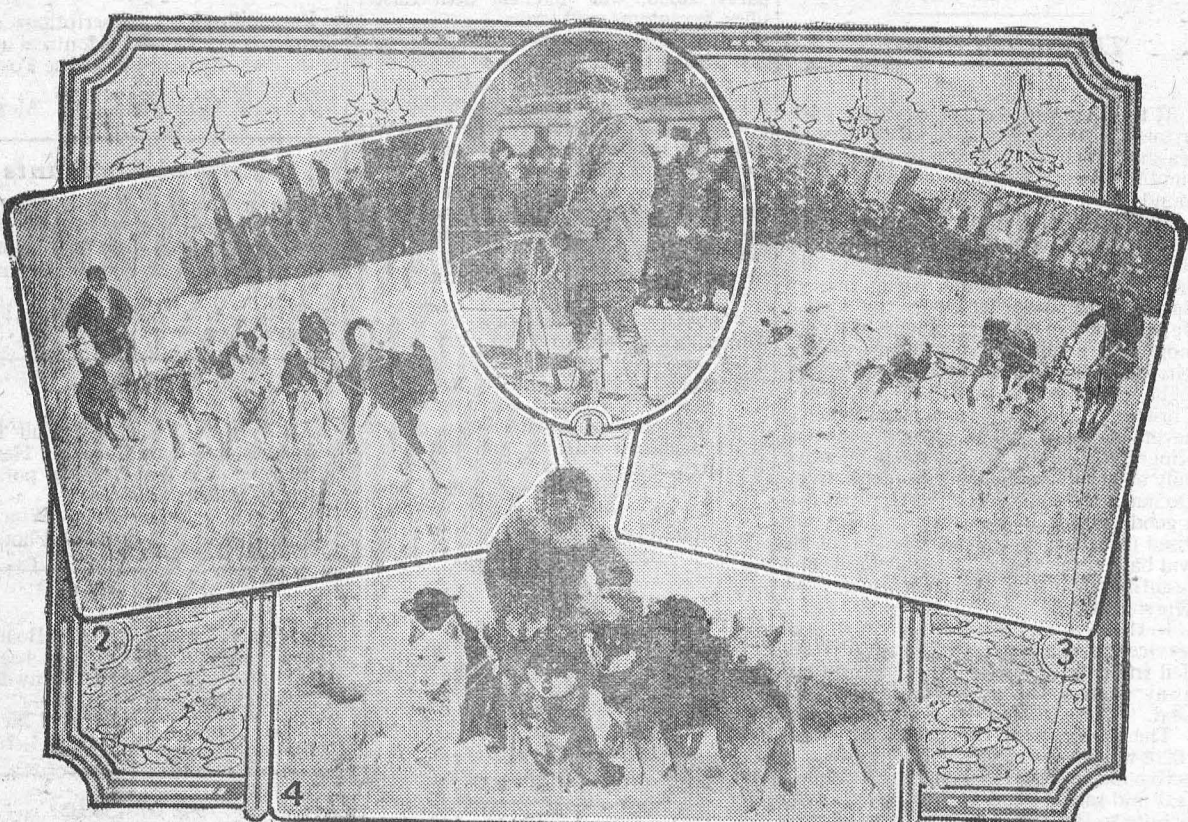

Tribal sports, bow and arrow contests, pony races, tepee pitching in the shortest time, "squaw races," wrestling on horseback by bucks, horse racing contests by young Indians and many other events, equally interesting, are staged daily in the Elk Pasture near Buffalo Park. In a lovely meadow surrounded by mile-high mountains. The tepees are pitched along the sides of a vast rectangle and many are painted in fantastic designs, lending a dash of color to the scene. Meals are cooked in the open, squaws carry wood and water while little children romp and play around the tepees. In the evenings, the Indians dance in a circle to the music of tom-toms and sing the weird songs which their ancestors have sung for centuries on the shores of near-by Lake Minnewanka the "Spirit Water" of the Stonies.

Exercising for Health

Health courses under carefully trained instructors are taken advantage of by hundreds of Bell Telephone girls all over the system. Classes of from 10 to 18 young women each, are taught the care of the body, its nourishment, habits of good living, care of the sick, and first aid in both accident and illness. The courses cover a period of twelve weeks. At the completion of the course those who qualify are awarded certificates. The exercises taught have been developed by specialists who have given the subject of health conservation and promotion exhaustive study.

Youth Victorious in Quebec Dog Derby

1—Emile St. Goddard, winner of Eastern International Dog Derby. 2—St. Goddard's team on the home stretch. 3—Paddy Nolan, 15-year-old musher and team which ran fourth. 4—Alaska's entry, Leonard Seppala, runner-up in race.

Youth made a successful bid for supremacy in the dog racing realm when Emile St. Goddard, 19-year-old dog musher from the Pas, Manitoba, won the Eastern International Dog Derby held at Quebec February 21, 22 and 23. His team of seven highly-trained greyhound huskies dashed over the finish line of the three-day race, covering the 120 gruelling miles in 11 hours and 37½ minutes, beating all previous records by 54 minutes and 35 seconds. He secured for the second time, the first in 1925, the handsome cup donated by the Quebec International Dog Sled Derby Club.

Leonard Seppala, hero of the epic race with serum to the stricken Alaskan city of Nome, was a strong contender in the Quebec classic and finished just 20 minutes behind St. Goddard. Seppala, experienced driver as he is, was forced to give way to a man 30 years younger, driving a team of better-trained huskies than his own. Seppala bettered St. Goddard's time by several minutes in the last day of the race, as the winner was forced to stay on the sled a greater

part of the race owing to a strain-tendon in his leg. George Chevrolet disputed every inch of the hilly course for second place but was beaten out by the Alaskan musher.

"Paddy" Nolan the 15-year-old constant made one of the most remarkable showings in dog racing annals when he finished fourth out of fourteen entries. He added glory to the reputation made last year, when, although his dogs were disqualified for fighting, he stuck to the trail and finished ninth in a field of 20, the whole of the distance being run in a blinding blizzard. A gloom however has been cast over the Nolan household recently for the day after Paddy's great race his mother, who had been lying ill in the hospital, died. After each day of the race Paddy would leave his dogs in charge of friends and go to his mother's bedside at the hospital. The courage of this lad is a general topic of discussions, and old and experienced mushers are concerned over his performances.

Young St. Goddard hails from the northern Manitoba town where the

use of dogs is a commercial necessity. Here it was that dog racing in Canada first took place. A group of devotees, wishing to perpetuate the Alaskan Sweepstakes, which died out in 1915, gathered in the Snake Room of the Opasquai Hotel and arranged to hold an annual race which they have carried out. St. Goddard has been the winner of this long race at The Pas several years, including the race in January.

Out of 100 dogs in the recent race at Quebec, there were but three recognized "lead" dogs. They were "Tobey," St. Goddard's leader; "Fritz," Seppala's lead dog and "Rondo," trained by the youthful Nolan. Frank Dupuis, winner of the race last year, finished 5th with but three dogs in harness. It is the driver who can successfully train the leader of the pack who is going to pilot his team to victory. Dogs in a team are not unlike any other racing animals; there must be a guide. Seppala's famous Alaskan malamutes entered the Canadian race this year scoring victory. They battled heroically but lost to a better-trained team.

Here and There

Toronto.—For the first time since silver foxes have been exhibited at the Royal Winter Fair here, Ontario breeders have seriously challenged the supremacy of the Prince Edward Island fox farmers.

Immigration to Canada for the first nine months of the calendar year 1926 shows an increase of 66 per cent over the same period a year ago according to a statement issued recently by the Department of Immigration and Colonization.

Moncton, New Brunswick.—Frozen blueberries are now being shipped in quantity to Cleveland and other centres in the United States. So far eight carloads have left Moncton, and so that the fruit will remain frozen. Two more carloads are about to go forward.

Victoria, British Columbia.—Famous Players-Lasky are to establish a plant in British Columbia for film production, it was announced in connection with the \$15,000,000 concern known as the Famous Players-Canadian Corporation, Limited, of Toronto.

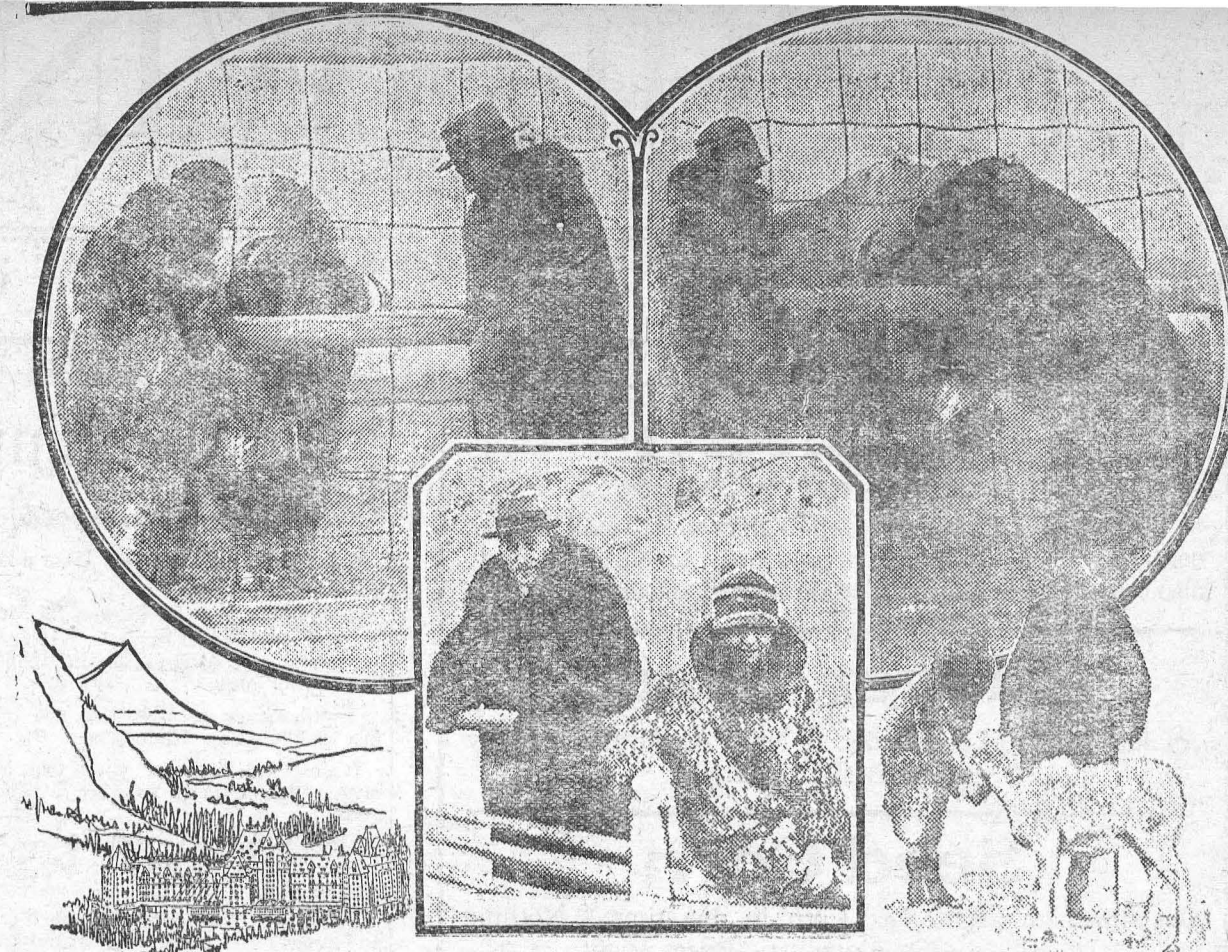

Traffic in grain from Winnipeg along the Canadian Pacific Railway lines this year has been heavier than last year by over 12,000,000 bushels. With 110,298,085 bushels marketed and 63,010 cars loaded the increases over last year's ten month period were 12,188,437 bushels and 3,538 cars.

Antwerp, Belgium.—When the Canadian Pacific steamer Melita arrived recently, she was given an official welcome and a great popular demonstration as the ten thousandth vessel to enter the port of Antwerp this year. An elaborate programme was arranged in her honor.

Saint John.—Moose are reported nearly three times as plentiful this year than last in the Tobique district, according to Burton L. Moore, well-known guide. The rapid increase of these big game animals points to migrations into the territory. Guides and sportsmen have not yet decided the source of the movement.

A great service to the travellers on the C.P.R. lines will be put into effect with the first sailing of the winter season of the C. P. liner "Melita," when for the sailings of C. P. liners from Saint John to Europe between December 1st and April 12th, through tourist sleeping cars will be operated on C.P.R. trains from Winnipeg direct to the ship's side at the New Brunswick port.

Peking, China.—Over 400 passengers aboard the Canadian Pacific Empress of Scotland, now on a tour of the world, the largest number of foreigners, except the military, ever to invade the city, were admitted recently to the Forbidden City for the first time since the young Emperor of China evacuated it, when he was driven out to Tientsin, two years ago. The Manchuria War Lord Marshal Chang Tso Lin accorded safe convoy to the party and every courtesy was shown to the visitors in their tour through a city which so far has been rigorously shut off from intercourse with the western world.

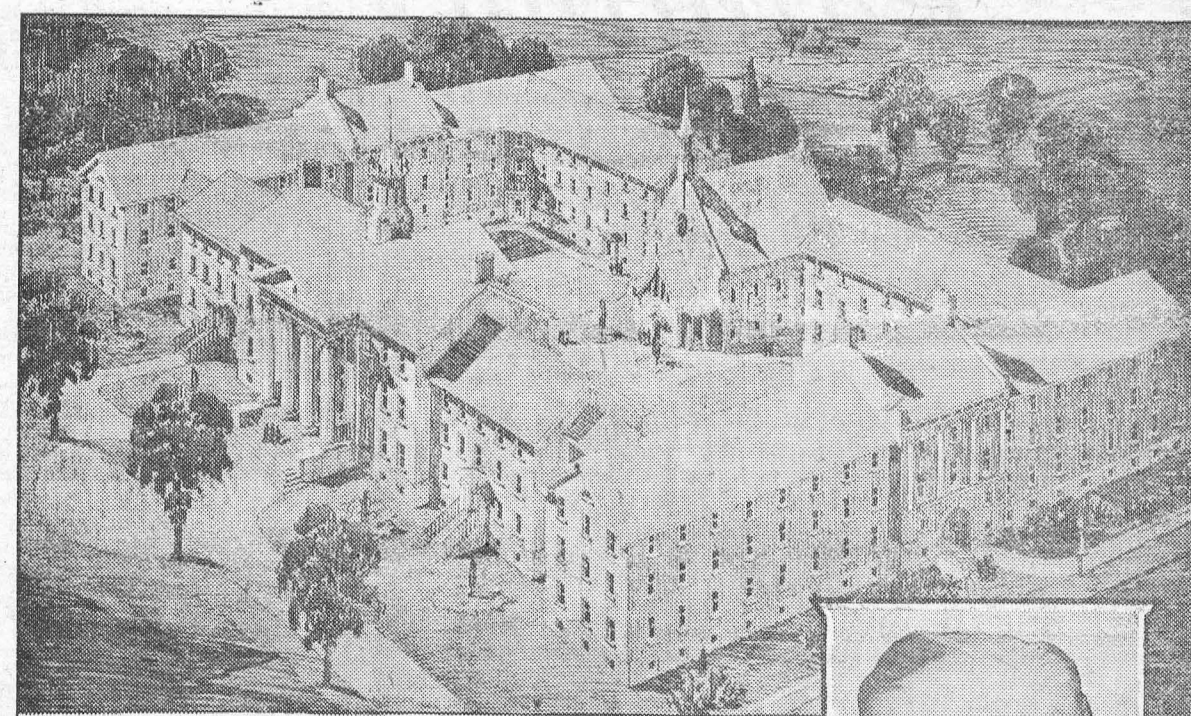

Their Excellencies Make Friends in Banff

On their recent first official tour of the Dominion across to the Pacific Coast, not the least attractive place visited by Viscount Willingdon, Governor-General of Canada, and Lady Willingdon, was Banff, Alberta, in the Canadian Rockies, famous for the beauty of its scenery and the hospitality afforded by the Banff Springs Hotel, one of the most imposing and beautiful buildings of its kind on the North American Continent which is shown lower left.

As a record of their visit the accompanying unusual photographs were taken by kind permission of Their Excellencies. They show Lord and Lady Willingdon each in turn feeding a massive specimen of Buffalo, who spends his lordly leisure in the Buffalo Park at Banff, another of

the great attractions of the town. Furred to his hooves, the monster animal, like a survival from some pre-historic period, gently and calmly takes his meals from the hands of his distinguished hosts. Another photograph shows Their Excellencies feeding a baby buffalo by hand, while yet another gives us Their Excellencies at a point of vantage on the top of one of the corals at the Banff Park. Lady Willingdon is seated at her ease, but His Lordship has climbed to the very top of the coral and both are enjoying the view from this unusual position. It is safe to assume that Their Excellencies will treasure these photographs as a record of a visit which, although part of an official tour, was not in this case altogether as austere as such tours are apt to be.

New Home For Canada's Oldest University

Cut Shows Assemblage of King's College Buildings. Inset: His Excellency, Viscount Willingdon, Governor-General of Canada.

After 137 years of higher educational work in Nova Scotia, King's College, Canada's oldest university, is to have a new home. The above drawing shows the proposed buildings, which will resemble in character Oxford University, to be built as soon as the present campaign has attained its desired objective.

King's University stands as the only real monument in Nova Scotia to the United Empire Loyalist pioneers. In 1789 the U. E. L.'s who had come to the Dominion from New York planted an "acorn" in the establishment at Windsor, Nova Scotia, of King's College. Full University powers were granted in 1802 by Royal Charter, which was the first one received outside of the British Isles. From a dream in the

souls of those pioneer Loyalists King's has reached a recognized and honored place in the Dominion.

Many famous Canadians have been Kingsmen. Sir James Cochran, Sir Frederick Borden, Judge Thomas Chandler Halliburton (Sam Slick), Basil King, Rev. H. A. Cody, and Canon Allan P. Shattford, are a few of King's products.

In 1923 King's took the first step towards a confederation of Maritime Colleges; the College was removed to Halifax and became associated with Dalhousie University.

A year ago King's launched a campaign for \$500,000, having received a promise from the Carnegie Corporation of \$600,000 conditional upon the raising of the first amount. Up to date the total pledged in the

Maritime Provinces, Ontario, Quebec and England is \$340,000, and only \$100,000 more is needed.

His Excellency, Viscount Willingdon, Governor-General of Canada, has accepted the office of Patron of the Rebuilding and Endowment Fund.

The Newest Discovery in Interior Finishes

A Brushing Lacquer

Pyro-Lac

Dries In 30 Minutes

Never since the advent of Ready-Mixed Paints has such a wonderful finish as Pyro-Lac been produced. Drying in half an hour to a beautiful, almost indestructible semi-gloss finish, Pyro-Lac is the answer to all the interior decorating problems of the busy housewife.

No need to turn your house upside down when you redecorate this spring; no need to wait for twenty-four to forty-eight hours between coats—if you use Pyro-Lac. Do over your floors and walls on them in an hour or two—refinish your furniture with Pyro-Lac after lunch and use it at dinner the same evening.

PYRO-LAC FOR FLOORS

Pyro-Lac will withstand far more abuse than an ordinary varnish or floor enamel. Moreover, you can finish your floor and use it within an hour or two.

Slate Gray, Sandalwood, Golden Yellow and Stone Gray are colors particularly suited for floors.

PYRO-LAC FOR WOODWORK

Owing to its rapid drying, its surprising durability and the beauty of its coloring, make Pyro-Lac particularly desirable for use on Woodwork.

Where a satin or eggshell gloss finish is desired, Pyro-Lac is unsurpassed. Moreover, Pyro-Lac may be rubbed and polished like a varnish or enamel.

Features of PYRO-LAC

Pyro-Lac dries in 30 minutes. Any amateur following directions can use Pyro-Lac. Pyro-Lac will outwear most Paints or Varnishes. Pyro-Lac's Semi-Gloss improves with wear and scrubbing. Pyro-Lac levels out to a beautiful uniform surface. Pyro-Lac comes in 14 bright, attractive colors.

PYRO-LAC FOR FURNITURE

Breakfast Room—Kitchen—Porch or Den Furniture and other pieces can be beautifully and permanently finished within an hour with Pyro-Lac.

Pyro-Lac cannot be marred by boiling water and hot dishes and in this is far superior to most enamels.

PYRO-LAC FOR TOYS

For refinishing and brightening up Toys, Glass, Pottery, etc., Pyro-Lac will be found one of the greatest conveniences about the home or shop.

Its fast drying enables one to do in a couple of hours what it formerly required two or three days to do.

A. SWEET & CO.

SOME WONDERS OF VEGETABLE WORLD

In botany, certain trees and plants stand out from the majority, owing to their monstrous size, eccentric shape, and mysterious properties.

In Sumatra have been found the largest flowers yet discovered. On one species of the trees in that island grows parasitically a large, carbuncle-like bud, which expands into a flower measuring from three to six feet across.

Its cup will hold twelve pints of fluid, and its weight is fourteen pounds. This flower was discovered by Sir Thomas Raffles and Dr. Arnold, and hence its name, "Rafflesia Arnoldi." Its exceptional size and curious scent, which resembles that of tainted beef, would make it an extraordinary and unpleasant boutonniere.

In Western Sumatra grows a still larger flower, *Amorphallus Titanum*. This plant has two stages of existence—first as a flower, next as a tree. The flower grows to about three feet in height, and measures about the same across. Its appearance is grand; but the smell, like that of the former flower, is offensive, an odor being emitted from the cone like decaying fish. Within the cone are the seeds of the plant, growing out of the stem.

When the flower dies it falls away, and then the stem shoots rapidly into the air. Increasing in circumference as it does so, it grows to the height of eight feet. On the top are clusters of seeds, some four hundred in number. Each seed is as large as a date, and of a bright holly-berried red.

Another large flower is the well-known *Victoria Regia*, one of the grandest and most beautiful of aquatic plants. It was discovered by Sir Robert H. Schomburgk in 1837, in a river at Bericeo, South America. The leaves of the specimen here met with measured from five to six feet in diameter, the flower fifteen inches across.

We now come to a series of plants that seem destined by Providence to keep down the multitudes of flies that swarm in the tropics. The Pitcher plant and the Side-saddle are the most noticeable. They both contain in their flowers a self-distilled fluid, which attracts numerous insects, which, allured by the moisture, fall in and are drowned.

Venus' Fly-trap (*Dionaea Muscipula*) catches insects in another way. As soon as a fly is alighted within the two fleshy lobes armed with spines, they close together, killing the creature within, and then open for a fresh victim.

The Carrion flower is also useful in diminishing the number of insect plagues. This curious flower is a native of South Africa. It gives out an odor that resembles decaying animal matter, and beguiles female flies to lay their eggs upon it. The larvae when hatched find out their mamma's mistake to their cost, and perish in large numbers.

The Lattice-leaf plant, so called from its resemblance to lattice blinds, is a native of Madagascar. It is one of the most extraordinary plants in existence, because the leaves have the ribs and veins only, and appear but as the skeletons. The tissue usually found in the interstices is quite absent. It is an aquatic plant, and looks exceedingly delicate and graceful as it floats on the surface of the water.

The Sensitive plant (*Mimosa pudica*) possesses the curious property of shrinking, and the leaves fold up at the slightest touch. Even the breath strongly directed on it has the same effect. At night the leaflets close together, as also do the partial leaves, and the common footstalk bends toward the chief stem, remaining thus until dawn recalls them all to their former position.

Of the curiosities of the vegetable world the Cactus tribe are among the most striking. One is called the Spanish, *Visnaga* (a topiwick), the spines of which are arranged in clusters on the ribs of the plant, being utilized for that purpose. They are also used as pins to fasten the poncho, or cloak. The other specimen is

one of many that grows to a considerable height.

Of the Fungus tribe one interesting variety is the "puff ball." It throws out its seed in a fine powder, and this the wind carries and distributes for miles, impregnating the earth with myriads of similar fungi.

Of large trees, one of the most useful is the Bamboo. It grows in the East Indies, China, Japan, and other warm climates. Some species grow with great rapidity. Ten feet in a fortnight has been noticed to be reached by one plant. Some bamboos reach the height of one hundred feet. Old stalks grow to five and six inches in diameter, and are used for water-pipes, bottles, circular boxes, poles for scaffolding and building purposes, walking-sticks and musical instruments.

The wood is split and woven into cloth for sails, mats and cordage, and the pith produces bread, starch and paper. The Bamboo is thus almost invaluable to the natives of the tropics.

The Bottle tree is a native of Australia. It has the curious peculiarity of the trunk swelling, from a short distance from the ground, until it assumes a globular shape.

The Dragon's Blood is considered to be one of the longest-lived of trees. It is a native of the island of Teneriffe. The finest specimen known is the giant tree of Orstava, and is said to have been seen in the year 1400, when it was as large as it is now.

This tree is named from its product—the astringent resin known as dragon's blood, a substance formerly used in medicine, but now chiefly known as a red varnish.

The East Indies are remarkable for strange growths in trees. We could fill pages with extraordinary varieties. The Banyan tree throws out branches which, descending in line to the ground, take root, and in turn become auxiliary stems. Thus, in course of time, one tree will cover an enormous space.

A specimen growing on the banks of the Nerubudda, although it has suffered badly from floods, which have washed large portions away, still measures two thousand feet in circumference. It has three hundred and twenty main trunks, while the smaller stems exceed three thousand in number. It is reputed on good authority to have on one occasion sheltered seven thousand persons.

Canadian Made Wines.

It may surprise many people to learn that Canada is a large manufacturer of native wines, nearly three million dollars being invested in the various plants. The manufacture of wines in the home undoubtedly reaches a very considerable total also, but no figures are available as to the quantities produced in this way. The value of the wines produced commercially amount to about one and one-half million dollars annually, the number of gallons being one and one-third millions. Most of the production comes from Ontario.

Oil and Fertilizer from Fish.

Considerable attention has been given of recent years to the production of fertilizer and oil from the herring type of fish, and on the Pacific Coast especially considerable capital investment has been made. It takes about six tons of raw herrings to make one ton of fertilizer and 300 gallons of oil.

No One Can Overtax Brain, Declares British Surgeon.

A famous British surgeon, Sir Arthur Keith, claims that there is no greater nonsense talked than that brain worry may bring on "brain fever." He admits that one may overtax his physical endurance by habitual study and that one may damage his body if he neglects it, but he certainly will not damage his brain. Sir Arthur's belief is that no one will ever succeed in using his brain up to its full capacity.

Successful Baking!

It depends largely on the flour you use. We believe you'll welcome this suggestion—try Purity, the rich, vigorous Flour—made from the finest Western wheat. Thousands of cooks say Purity Flour is best for cakes, pies, buns and bread.

PURITY FLOUR

Well-Known Home Builder Quickly Restored to Health

Victim of Nervous Indigestion, Loss of Sleep and Intolerable Pain, Father of 8 Children Finds Long-Sought Relief, Strength Restored. Praises Tanlac

Joseph A. Brunet, a well-known Montreal building contractor, 7053 Bover Street, says: "The brain, muscle and splendid health of the strongest man will break under the strain of modern living."

"I was suffering untold agonies when I began taking Tanlac. My strength had vanished, I couldn't work efficiently, I couldn't enjoy life as other men did. I had lost weight and was wracked by knife-like pains."

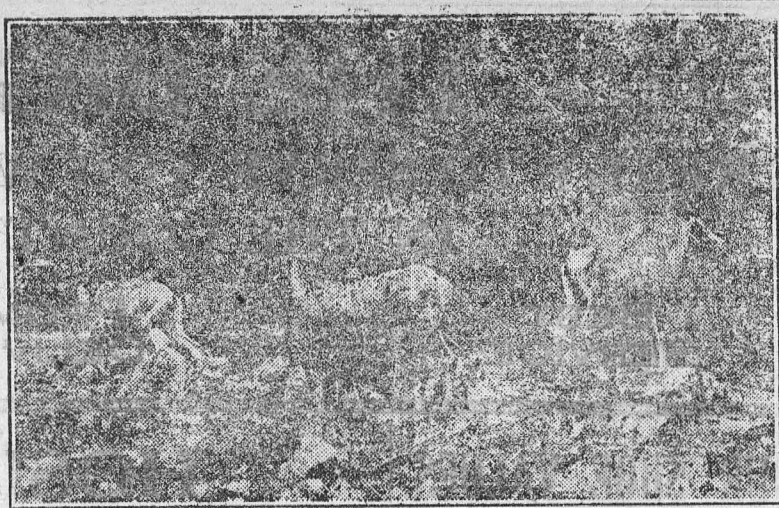

"I was completely discouraged when Tanlac was recommended to me and I took it. I recommend it to anyone who is ailing."

"This tonic worked wonders with me. Quickly my old strength returned. I began to have a great appetite and ate everything without a sign of pain. Once more I knew what it was to have a good night's sleep. Tanlac certainly put me on my feet, made me stronger and gave me better health than I have had in years."

Tanlac usually banishes pain. Conquers ailments and builds up strength in debilitated bodies. It relieves the system of poison caused by constipation

and sluggish liver. It is nature's own remedy made from roots, barks and herbs according to the famous Tanlac formula. Danish sickness from your life and enjoy the benefits of golden health. Begin taking Tanlac. The first bottle usually brings results that will surprise you. Ask your druggist for Tanlac—today!

WHY LAMBS LEAVE HOME

Fifty-three mountain sheep left their native haunts at Banff recently, and were shipped by Canadian Pacific Express to their new home at Kamloops. The consignment, which was the result of a month's trapping operations carried on by the Royal Mounted Police wardens, was made at the request of the government of British Columbia, to restock localities where the numbers of mountain sheep are depleted.

The sheep trap, into which the unsuspecting sheep is lured by a lump of salt (a great delicacy) is erected of poles on the lines of a bird trap. His mouth watering, the sheep enters the trap only to find that the door has closed behind him. Later men appear with crates, and his only alternative is to enter. The sheep does so docilely enough, although an old battling ram occasionally causes a bit of trouble and it is necessary to rope him.

FLOWER GROWING COAST TO COAST

Canada "Says it With Flowers" at Her Golden Jubilee This Summer.

PRODUCTS VALUED FOR HARDY QUALITIES.

Probably no greater sensation was caused at the British Empire Exhibition at Wembley than when the Canadian buildings were flooded with thousands of peonies grown in Canada, flowers of a size and beauty not before seen in the Old Country. In the far too general conception of Canada which exists overseas people scarcely credit that these lovely blooms, before which they stood long in admiration, had come from a country of such reputed rigorous climate and hardy conditions of life. These blossoms went a long way in eradicating misconceptions on certain phases of Canadian existence.

Canada in 1927 celebrates her golden jubilee, and it is interesting to note that her gift to the Motherland on this occasion will not take the form of one of the better known staple products with which the Dominion is familiarly associated, but a mass of one hundred thousand peony blooms. Every passenger ship during July, in which month the Canadian Dominion was born, to sail for a British port, will carry on board supplies of peonies grown in Canada and donated to the Old Land by the Canadian Government. The Canadian Government building in London will be filled with them and newspapers in the country will be the recipients of a gift of blooms. Royalty and other notables will be presented with bouquets of peonies. Flowers will be shipped until the available supply has been distributed to all who desire, and apply for them.

Splendid Advertisement for Canada.

These blooms should be a novel and potent advertisement for Canada as they find their way into homes in all parts of the British Isles. They should indicate that besides a winter of vigor which aids in the production of the world's best wheat and makes possible winter sports which are unparalleled, Canada has a summer of equal attractiveness which ripens wheat and creates opportunity for an altogether different order of diversion which lures holidaymakers from all over the American continent and beyond.

The summer in Canada is a season of a profusion of lovely, varied-colored blooms, both those growing wild in forest and on prairie and those which have been cultivated about Canadian dwellings. From Digby in Nova Scotia, buried in the spring in its cherry blossoms, to Victoria, British Columbia, where the most delicate blooms thrive in the open uninterfered throughout the year, Canada is a series of fair gardens which for variety and beauty no country can excel. Canada has a greater percentage of home-owners than perhaps any other country and a proportionately greater attention to home surroundings would appear to exist. Opportunity in the way of space being generous, the settings of Canadian cities and towns are uniformly attractive.

Thriving and Growing Industry.

Floriculture is accordingly a thriving and growing industry in Canada. In the 1921 census a total of 6,614 individuals described themselves as florists and nurserymen, of whom 225 were women. For the first time the Dominion Bureau of Statistics has collected data on the sale and values of outdoor and indoor ornamental trees, shrubs and plants, and cut flowers. Besides indicating the thriving condition of floriculture in Canada this data, which takes no cognizance of plantings for afforestation or commercial purposes, illustrates the wide possibilities of the Dominion in this direction and the extensive use made of such outdoor beautifiers.

In the 75 complete schedules received, 9 were from Quebec and New Brunswick, 40 from Ontario, 9 from the Prairie Provinces, and 17 from British Columbia. This is believed to include most of the leading growers, and the results afford a fairly complete conspectus of the Canadian floricultural industry in its present state of development. The total value of the floricultural and decorative plant production by Canada in the year ended June 1st, 1926, was \$1,582,464. The value of cut flowers was \$1,295,028, representing 82 per cent. of the total.

Exports Extending.

Roses for outside planting were sold to the number of 99,635, of the value of \$34,492, and other ornamental trees, shrubs, and bushes for outdoor planting 905,868, of the value of \$86,133. In-

door plants were sold to the extent of 631,918 with a value of \$153,586, the most popular being geranium, tulip, narcissus, ferns, spirea, and lilacs. Flowering bulbs numbered 160,071 valued at \$8,175. A total of 15,268,154 cut flowers, grown both inside and outside, were disposed of during the year, the most popular varieties being roses, carnations, chrysanthemums, lilacs of the valley, tulips and daffodils.

While practically this entire production is for domestic consumption, the products of Canadian floriculture are known far afield and have been in demand for their hardy qualities. Plants, shrubs, trees and vines have left Canada to the value of almost half a million dollars in a single year, the greater part for the United States. Seed of the sweet pea and other flowers grown there, and nurseries in the Prairie Provinces, where one would least expect to find such gentle phases of agriculture, are able to supply the big centres of the Middle Western States with a variety of blooms at holiday seasons.

Obligato.

When you hear a bird sing
In spring,
The sun goes riding high;
The wide sky
Is a glad blue cry;
Small leaves applaud,
And from the sod
Violets nod.
I heard a bird song
Long, long
Before spring.
Only a wind-worn pine,
And the grey whine
Of a lost thing
Accompanying.
No grave from the sky,
No lift from the sea;
But there was I
Out of an old pain,
Out of blighting rain,
Touching God!
—Lena Hall, in "Late Adventure."

Follow the Sun.

"Such a pleasant room—it gets so much sun!"
You often hear a proud householder make this remark about one of his rooms. But, unfortunately, the room that gets the morning sun will often be dull in the afternoon, and vice versa.

In some of the newer houses you may have one room with windows facing three points of the compass, and in that case you get a pretty good share of sunshine. The latest idea, however, goes still further—it is a villa built on a turntable, so that by pressing a button you can make the room you are sitting in follow the sun.

The revolving villa is a good idea, but as there is a button in every room, two sun-lovers in different parts of the house might give the rest of the inmates rather a "giddy" time.

MOTHERS PRAISE BABY'S OWN TABLETS

Mrs. L. M. Brown, Walton, N.S., says:—"I cannot recommend Baby's Own Tablets too highly. I have found them invaluable for the ailments of little ones." Mrs. Brown's testimony is the same as that of thousands of other mothers who have used the Tablets. To use them once is a sure guarantee that they will always be kept in the home as long as there are babies or young children to be cared for. The Tablets are a laxative—mild but thorough in action—which never fail to regulate the stomach and bowels; relieve constipation and indigestion; break up colds and simple fevers and make the dreaded teething period easy. In fact you banish all the minor ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In Spring.

I almost had forgotten
How nice the spring could be,
How soft and green the grasses
And leafy every tree.
I didn't quite remember
The garden was so sweet,
How happy it would make me
To just walk down our street.
—Alix Thorne.

There exists a continuous line of Dominion Lands survey monuments along the water route from Northern Alberta to the Arctic Ocean. These monuments, established by the Topographical Survey, Department of the Interior, serve to locate the positions of mineral claims, squatters' improvements, trading posts, etc. The surveys have been the basis of a series of map sheets covering the transportation routes.

For distemper—Minard's Liniment.

Hawaii Hears Toronto from Station C.F.R.B.

When the Rogers Batteryless Radio Station C.F.R.B. at Toronto, Canada, put on its late program on March 15th, almost two thousand replies were received, including over one hundred telegrams from nearly all of the forty-eight States in the United States and seven out of the nine Canadian Provinces. In addition to this, a letter was received from Mexico, and a little more than one week later, a letter arrived by Air Mail from Walluku, Hawaii, from Mr. A. F. Costa, Postmaster, at Walluku, who stated that he not only picked up the station, but listened right through until it signed off. He gave details of the different numbers on the program and the running comment which was made by the announcer in connection with telegrams received. Following this, in the regular mail, came a letter from Mr. H. E. Corey, Receiving Engineer of the Radio Corporation of America, at the Koko Head Station, Honolulu, Hawaii, stating he heard C.F.R.B. on a three-tube set with loud-speaker volume.

This, undoubtedly, establishes a record for long distance broadcasting on a regular program from Toronto, and the fact that this was accomplished at a Batteryless Broadcasting Station, conceived and perfected in Toronto, and the first station of its kind in the world, is a great tribute to Canada's contribution towards radio progress and a wonderful compliment to young E. S. Rogers, the Toronto engineer responsible for this station.

TONE UP THE BLOOD AND NERVES NOW

Dr. Williams' Pink Pills Have No Equal for This Purpose.

Anaemia, or lack of good blood, causes not only pale faces and white lips; it is the root of many pains and miseries. It is the cause of shattered nerves, headaches and backaches, and the always tired feeling from which so many women and girls suffer. To regain new health and strength the blood should be enriched through the tonic treatment with Dr. Williams' Pink Pills. This medicine has brought new health and strength to thousands of weak, despondent people.

Among those who have found new health through the use of this medicine is Mrs. Gregory J. Murphy, East Ship Harbor, N.S., who says:—"I bless the day I heard of Dr. Williams' Pink Pills. Before I began their use I was in a run-down and very weak condition. The least exertion would leave me breathless and tired out. Housework was a trial, and at times I felt very despondent. A friend advised me to try Dr. Williams' Pink Pills and I got six boxes. I had not been taking the pills very long until I began to improve in health, and continuing their use they restored me to my former good health. I also gave the pills to my daughter, who was anemic and run-down, with the same good results. Now I always have the pills in the house, and would not like to be without them."

Get a box of Dr. Williams' Pink Pills from your druggist to-day, or send 50 cents to The Dr. Williams' Medicine Co., Brockville, Ont., and a box will be sent you post paid. A little book, "Building Up the Blood," which explains the treatment, will be sent free on request.

Coining Jokes.

This is a common and very legitimate figure of speech as applied to the labors of burlesque writers and contributors to comic periodicals; but there is an instance in which a joke was actually coined, struck from a graven die, and issued from a legal mint. The fact is historical, and is as follows:

In the year 1679 the Danes advanced with a large force upon Hamburg, but after a siege of considerable duration, seeing little hope of ultimate success, they finally withdrew and marched back.

Thereupon the Hamburgers caused a medal to be struck in commemoration of the event. On one side of this numismatic curiosity was this inscription:

"The King of Denmark came before Hamburg. What he gained by it will be seen on the other side."

On the other side was a total blank.

Buck Up and Boast.

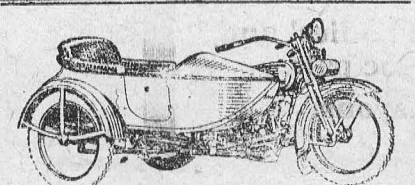

Give a little, live a little, try a little mirth; sing a little, bring a little happiness to earth. Pray a little, play a little, jest a little, if the heart is sad. Spend a little, send a little to another's door; give a little, live a little, love a little more.—A. Nutt in Ottawa Citizen.

Things taste so good we can't help eating too much, now and then. Don't suffer for it. Take Seigel's Syrup. Any drug store.

Some men fold their trousers every night, but do not fold their minds; it is an odd sense of values.—Dr. William E. Orchard.

Kill warts with Minard's Liniment.

In London I am but a bird of passage. I own no house, I am not a tenant, I just live in a house from which I can be ejected at any moment without compensation.—Stanley Baldwin.

For power, for speed, for dependability under all conditions, you'll find the 1927 Twin unmatched now more than ever. The Harley-Davidson stands without a rival.

In clean, bright Aluminum RED ROSE TEA "is good tea"

When you serve RED ROSE ORANGE PEKOE to your family you are giving them the best tea you can buy.

Spring Opening.

Usually the song of the robin announces the beginning of Spring, but this year an entirely different tune heralds the passing of Old Man Winter. The hum of the motorcycle on the open road is a sure sign that Summer in all its glory is just around the corner. When the dyed-in-the-wool devotee of the motorcycle bestirs himself and hits for the open road, it is an assured fact that it's safe to follow him. This year, more than ever, the motorcycle will be seen in ever increasing numbers on the highways and byways. The recent introduction of the Single Cylinder model has sold the motorcycle to thousands who heretofore were content to leave that pleasurable form of touring to the younger generation. Because of the ease with which the Single is handled the older element have taken to the two-wheeler and now it is a common sight to see father and son, and yes, mother too, enjoying an outing via motorcycle. Because of the joy which Spring brings to all, and particularly the motorcyclist, all Harley-Davidson dealers have organized a "Spring Opening Week" which is designed to celebrate the beginning of the riding and touring season. Walter Andrews, Toronto Harley-Davidson Dealer, has arranged quite an elaborate program for "Spring Opening Week," May 2nd to 7th. Open house will be the order both day and evening for the entire period. Brand new 1927 models will be on display at the store and the public are invited to inspect the machines and if desired to ride them.

Going fishing—take Minard's Liniment.

Malta, the traditional Melita of the New Testament, has now issued a new 10s. postage stamp showing the figure of St. Paul.

Spring Time is CELERY KING Time

Brew a cup of this fine old vegetable tonic. It is all the spring medicine you need. It drives out winter's poisons, improves the appetite and makes you feel better right away. CELERY KING is good for the whole family. At druggists, 30c & 60c.

Free Treatments For DEAFNESS

Head Noises from Nasal Catarrh

Hearing Restored

I have an original home treatment for deafness and head noises from nasal catarrh which I want every sufferer to try free—without obligation. For many years I suffered from nasal catarrh and head noises. I perfected a treatment which completely restored my hearing. I gave it to others and they were able to hear again. Since that time, hundreds have used it successfully.

Dr. W. O. Coffee

This Is FREE

I feel so sure that this treatment will restore hearing and head noises from nasal catarrh that I want every sufferer to try it free. I want to prove at my expense that the results are quick and convincing.

It is the best treatment that I have found in 42 years' practice as eye, ear, nose and throat specialist.

25,000 Treatments To Be GIVEN AWAY This Month

These treatments cost you nothing. The results are quick and convincing. You will feel the difference the first day. I have found that 90 per cent. of the cases of deafness and head noises are caused primarily by nasal catarrh. If not treated at once, it causes rheumatism and many other troubles. Usually one ear is affected first, the deafness grows worse with every severe cold until the other ear is affected. My original home treatment will stop all this. I have restored hearing in many extreme cases; one woman had been growing deaf for 48 years; a man 86 years old who had been deaf for many years can now hear again. Hundreds

of other instances similar to these have told me of the treatment's success.

TRY IT FREE

In addition, I will send you absolutely free my new book on Deafness, Head Noises and Catarrh. It discusses fully the curable and incurable kinds of deafness.

Write today for this free test treatment. State if you are deaf, have head noises or just nasal catarrh or head catarrh. Write the name of your name plainly. Do not expect that I may not answer again. For 30 days I am going to give away 25,000 free treatments.

WHAT IS YOUR POSITION?

You are a booster or a knocker, there is no middle ground; to which class do you belong? The man who does the most good for his home town is not always the man who receives the most credit. There are plenty of true boosters who not only do not allow the opportunity to pass to say a good word or do some act for the betterment of his home, but create opportunities to do so. He is the citizen of whom every one is proud, with like individuals the situation is created whereby it is possible that some other good citizen who has not done so much work will come along and reap the benefit of the work of the others. The real honest to goodness booster is not jealous when the other is given credit, he gets his reward in the consciousness of having benefitted the town. Because one does not knock his home town, does nothing as a matter of fact one way or the other, will not relieve him of the charge of a knocker. Not to take an affirmative position in matters of interest to the town, and there are always matters of interest, places one on the negative side. There is absolutely no way in which to remain neutral, for if that position is attempted, there will necessarily be many who will construe it as being opposed to any proposition and with the construction goes the influence. Be a real booster and let your position be so certain that those who run may read.

REMEMBER MOTHER

Mother's Day inspired many loving messages from sons and daughters to their mothers in the old home. One of these, which The Press was privileged to see in homely but affectionate phrases set to rhyme, as follows:

"Thought you might like a note this time
Written by hand, and put in rhyme,
From the little lad, 'as' used to be,
Who wore velvet suits, and slept on your knee,
Telling how he remembers things—
(My how the fact of memory clings!)
Of the ginger cookies you used to make,
Of the twisted doughnuts you used to bake,
Of the stories you read to little Ed,
Before he toddled off to bed.
Of the days, not quite so far gone by,
When you let him revel in lemon pie,
Of the socks you mended—trousers, too,
Of all the things you used to do,
When I think of them all, O mother mine,
These things aren't far from the Divine!"

Needless to say that Mother's heart was filled with joy upon reading the message from her grown boy.

PRESBYTERY MEETING FOR DUNDAS COUNTY

United Church Gathering
Held at Chesterville

Dundas Presbytery of the United Church held the April meeting at Chesterville with all the ministers present, and a large delegation of laymen. Rev. John H. Miller of Kemptonville, chairman of Presbytery, presided at the session which continued over two days, and Rev. Chas. H. Brown of Inkeram, acted as secretary in succession to Rev. J. W. Clarke, who is now settled at Rosemount Avenue church in Montreal.

Rev. Dr. Wm. Munroe, secretary of the Montreal and Ottawa conference, was in attendance and gave encouraging information in regard to the progress of the work of the church within the bounds of the conference.

The work of the Woman's Missionary Society was dealt with by Mrs. W. S. L. Merrill of Morrisburg, president of Dundas Presbytery. Upwards of \$10,000 was raised by the auxiliaries and circles and bands during the last year, being an increase over former years. Mrs. Merrill outlined plans that were in preparation for the further extension of the work in the coming year.

Rev. R. E. Newman of Matilda South, Rev. W. W. Armstrong of Eastons Corners, Rev. G. S. Wood of Algonquin, and Rev. R. M. Pounder of Chesterville made request through the Presbytery to the Settlement committee for a change of pastoral relation. At the conference session to be held at Montreal in June the Settlement committee will deal with these matters.

A committee of Presbytery reported on the re-arrangement of Algonquin, Augusta and North Augusta pastoral charges. The recommendation is that two charges be constituted. North Augusta to be composed of North Augusta, Algonquin, Manhard and Shiloh churches, and Augusta comprise Maynard, Donville and Bethel churches. The recommendation of the committee was unanimously adopted.

The request of Williamsburg for permission to sell the former Methodist church and use the proceeds in improving St. Andrew's United Church was granted.

Nominations were made by Presbytery to the various conference committees for the ensuing year as follows: Settlement committee, Rev. W. R. Johnston of Spencerville and Mr. M. Maguire, Maintenance and Extension, Mr. H. B. Fetterly of Winchester and Rev. A. F. Fokes of Brinston. Home Mission committee, Rev. R. P. Stafford of Morewood and Mr. T. Wallace of Stanley. Foreign Missions, Rev. A. M. Russell of Williamsburg and Mrs. J. Holt Murray of Maynard. Social Service and Evangelism, Rev. J. Hurst of Elma and Mr. J. Tinkas. Religious Education, Rev. P. Pollitt of South Mountain and Mr. J. O. Beggs of Hallville. Colleges, Mr. Jos. Everett, of Iroquois, Law and Legislation, Mr. I. Hilliard of Morrisburg. Candidates for the Ministry, Rev. E. Lawson of Morrisburg. Beneficiary funds, Rev. J. A. Waddell of Winchester. Superannuation fund, Rev. Wm. Howitt of Prescott.

In the report presented by the treasurer the amount received to date for the current year was \$27,000 for Maintenance and Extension Fund.

Chesterville Ladies Aid Society kindly provided entertainment for the delegates and were extended the cordial thanks of those present for the courtesy. At the evening session addresses were given by Rev. G. N. Maxwell of Merrickville and Mr. I. Hilliard of Morrisburg. The church choir was in attendance and rendered several very excellent selections of vocal and instrumental music.

ADVERTISING WINCHESTER

Whether any real benefits follows is problematical, but this we can affirm, the Winchester Press has brought Winchester before the attention of the people of Canada from the Atlantic to the Pacific. Last week the Editor received a letter from a gentleman living at St. Thomas, Ont., in which he writes "I do not know you, but I have often seen your manly and outspoken views against the liquor traffic, and I want to thank you for it." This is very encouraging and helpful. To know that the influence of your editorial column is more than local is encouraging. There is in Toronto what is known as the Dominion Press Clipping Agency, who occasionally send us a bundle of clippings, extracts copied from the Winchester Press Editorial page and the list includes papers from Halifax to Vancouver. The latest bundle contains extracts copied from the Press by such papers as: Montreal Gazette, Forest Free Press, Almonte Gazette, Toronto Telegram, Toronto Star, Toronto Globe, Brockville Recorder, Kingston Whig, Standard Moncton N. B., Transcript C. P. Canadian, Mount Forest Confederate Beaver Progress, Hanover Post, Kitchener Record, Sault Ste Marie Star, Sudbury News, North Bay Despatch, Moose Jaw Times, Winnipeg Free Press, Peterboro Examiner, Windsor Star, Halifax Chronicle, Vancouver Province, Calgary Herald, Edmonton Bulletin, and dozens of other papers all over the Dominion. And we can even boast that we have seen an item from the Winchester Press screened in a Toronto Movie Theatre. All of which goes to show that Winchester is a familiar name all over Canada, and let us hope we live up to our reputation.

THE WEEKLY NEWSPAPER AND COMMUNITY

Everywhere there is a growing understanding among business men that the newspaper, while an individual business problem of some publisher, is at the same time, a community proposition—a community asset. The newspaper serves the community more than the man who publishes it. The time is coming when everywhere business men will feel a personal interest in the newspaper's welfare. The fact has been shown that a community cannot make progress without it. It can exist, but it cannot grow. With this realization there has also come an understanding that one newspaper serves better than two or three. It has become a simple problem of business mathematics to centre the strength of a community behind the newspaper that has made itself, through work and service, the strongest journalistic factor in community development. So far as Canadian newspapers are concerned, there have gone out of business since 1914, 55 daily newspapers, while 260 weekly newspapers have suspended publication or been absorbed by the other paper in the town. In some counties of Ontario, from four to eight weeklies have suspended publication. The announcement of newspaper consolidations will continue. The results will be better and more outstanding weekly papers with improved service to advertisers, subscribers and the community generally.—Stirling News-Argus.

Safety Rules For Gasoline

- Remember that you must take no chances with gasoline; it is one of the most dangerous explosives in common use.
- It must always be kept in tightly fastened cans; never in glass bottles.
- It should never be uncovered within the house nor at any point where its fumes can travel to an open flame, a live coal, or a spark.
- Do not use it for cleaning, if you can get a safe cleaning operation.
- Gasoline in quantity should be kept in underground tanks.
- No one should be allowed to smoke in a garage.
- No one should be allowed to smoke in an automobile while its gasoline tank is being filled.
- Do not use water upon a gasoline or coal-oil fire; use a chemical extinguisher, or else throw earth or sand upon it.

COSSACKS OF THE DON.

Have Warlike Character and Skill In Horsemanship.

Once more I see the vast steppes of Southeastern Russia, the banks of old calm Father Don, writes Prince Alexis Oplenaky in a London paper, and the big settlements, with their clean white houses surrounded by fruit trees, and vineyards famous for their sparkling wine. Memories crowd thick upon me—memories of a peaceful country of sunshine, song, and beautiful women, fields of wheat and rich grain lands, during the long summer days of Southern Russia.

To understand these remarkable people you have to go back to the sixteenth century, when the most independent spirits refused to submit to the czar's laws and fled to new territories. In this way Siberia was conquered in the reign of Ivan the Terrible by Yermak, a Cossack chief and pirate.

The czars recognized these settlements and gave them rights of land ownership and self-government. In return the Cossack had to fight the wild Mongol hordes that poured in from the east and south. Thus they developed a resolute independence, a warlike character, and a skill in horsemanship that put them among the finest cavalrymen of the world.

The Don Province alone sent more than 100 regiments during the German front in the war. They were the last to surrender to the Red yoke which now rests on our unhappy people. They fought gallantly in the White armies for their own homes and land, and I do not believe that even now the Red rules have wiped out the old Cossack traditions. One cannot change in a short time the soul of a people.

The Cossacks' soul is well expressed in the traditional songs. They reveal all the average Russian's instinct for harmony plus an Oriental color. Characteristically Russian, too, is the note of abiding sadness. To sit by a camp fire and hear a band of these wild horsemen sing beneath the stars is an experience that cuts deep and leaves memories that ever haunt you.

Congo's Big Game Disappearing.

It is reported that 30,000 male elephants are being killed every year in the Belgian Congo, and the native custom of elephant trapping has resulted in the death of a larger number of female and young elephants without tusks and therefore useless for the ivory market. Natives were leaving agricultural work in order to look after elephant traps, which captured, of course, all classes of elephants and not merely ivory bearers. As a result the whole breed is being reduced, the average weight of tusks being eight pounds less to-day than before the war. Hippopotami and rhinoceroses, gorillas and antelopes were also fast disappearing from certain districts, while certain varieties of small and gray-plumaged birds formerly plentiful in the Congo are now seldom seen except on women's hats. More severe enforcement of existing hunting regulations and the taking of new and stronger measures for the preservation of big game by marking out forest reserves where hunting would be forbidden, is being advocated.

Wanted

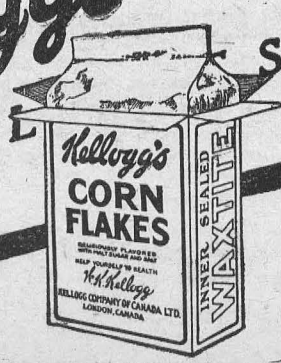

Cattle of all kinds, milkers and springers, also dry cattle and good calves and hogs. Loading every week. Highest market price paid. O. W. Deeks. Phone 100 511fc.

We get to school early

"Our mother gives us early breakfasts... big bowls of Kellogg's Corn Flakes and nice sweet milk."
No wonder kiddies love Kellogg's! It's flavor! Matchless crispness! And Kellogg's are so good for everybody. More than 11,000,000 people demand them daily!
Serve with milk or cream. And add canned or fresh fruits—or honey. Order at hotels, cafeterias. On diners. Sold by all grocers.
Made by Kellogg in London, Ont. Oven-fresh in the inner-sealed red-and-green package. Imitations cannot equal Kellogg's wonder-flavor.

A NEW BLOOMER DRESS.

Smartly simple is the attractive blouser dress shown here and a very easy style to fashion. Contrasting material is effectively used for the scalloped collar, short band, sleeves, tie, and facing on the lower edge of the skirt. There are short gathers at each shoulder and the dress opens for a short distance at the front under the tie. The bloomers have elastic run through the top and leg casings. NO. 1554 is in sizes 4, 6, 8 and 10 years. Size 6 requires 2 1/2 yards 36-inch material, or 1 1/2 yards 54-inch, and 5/8 yard 36-inch contrasting material. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

How to Produce Clean Milk.

Milk is one of the most important and valuable articles of food when it is fresh and clean, and its purity depends almost altogether on the producer. In fact ninety-nine per cent. of contamination in milk is controllable by the producer himself if he will take the trouble to understand what its sources are and if he is willing to exercise ordinary sanitary precautions. A new pamphlet on producing clean milk, issued by the Dominion Department of Agriculture, contains a great deal of information on the different ways in which milk is spoiled and gives clear instructions on how to avoid these sources of contamination. It emphasizes the fact that clean milk may be produced under the simplest conditions and with but comparatively crude equipment provided proper care is taken, while even with the most modern facilities a producer may deliver grossly contaminated milk if his methods of handling are careless.

The Substitute.

Little Betty was anxious to own a cat, but her father had a great aversion to them and turned a deaf ear to all her pleadings. He did say, however, that she could have a dog if she could find a nice, well-behaved one that wouldn't bite the baby.

One day, while walking with her mother, Betty saw a kitten frisking along beside her.

She turned a wistful face to her mother and said: "Oh, mummy! See! It doesn't seem to belong to any one! Can't I take it home?"

"But, Betty, daddy says you can have a dog, but not a cat."

"Well, mummy, can't we take it home and use it for a dog?"

Corn Belt Extending Northward.

A decade ago it was thoroughly believed that the Prairies were too far north for successful corn growing, but the results achieved in the past two or three seasons have thoroughly disproven this fallacy. In 1925 the production of fodder corn in the Prairie Provinces was 861,000 tons, valued at \$5,396,000. Both acreage and production figures are showing a steady increase.

Fur Farming in B.C.

British Columbia is rapidly organizing a fur farming industry of considerable importance and some very ambitious schemes for the "franchising" of muskrats are being put into effect. The province already has a revenue of \$5,000,000 annually from raw furs but with fur farming the value is suitable for furthering the industry and an ideal climate is being built for the future of British Columbia furs is bright indeed.

THE WATER SUPPLY EXPERIENCE OF AN ONTARIO FARMER

By R. S. STEVENSON, Ancaster, Wentworth County.

Previous to 1881 I was dependent on a well, a pond and a cistern for water supply to household and livestock on a large farm. The pumps were located outdoors near the buildings, giving all the troubles usually experienced in operating an exposed pump; well troubles developed, and considerable labor was expended getting the required water into a pail or water trough. In 1881 I decided to make use of a spring located in the wood lot 1,200 feet from the farm buildings and at a lower level of 120 feet. The spring was high enough up to give a fall sufficient to operate a hydraulic ram. A ram was installed in 1881 to pump the water to the buildings; it continued in service until 1921, a period of forty years, when it was taken out and replaced by a ram of modern type. During the period of forty years I estimate that this ram pumped to the house and farm buildings, by delivering its continuous three-quarter inch stream day in and day out, a total of 10,512,000 gallons. This is considerably more than we required for domestic and livestock purposes, and much of it ran to waste. There was always an abundance of water and no trouble was experienced in keeping a threshing engine supplied on the threshing days which, by the way, were the days of heaviest demand on the water supply.

STORY OF PROGRESS.

At first the water was pumped into a large wooden tank located in a shelter immediately behind the house and handy to the back door. The overflow ran to a large water trough near the stable. This arrangement continued for a number of years, giving so much better service than the old pump and pond that everyone was satisfied and did not want anything better. As time advanced the old cook-stove wore out and a new range, equipped with a waterfront, was purchased. The waterfront idea was not common knowledge in very many farm homes, so the presence of the waterfront in the new kitchen range started another chain of thought and action; getting the water into that waterfront and making full use of the fuel that we were burning. A large supply of hot water on tap at a kitchen sink was something worth striving for, after we had seen the light. The ram had been pumping water to the back door for a number of years; it was now decided to bring the water inside, so the pipe line was extended from the old outdoor terminal to the room above the kitchen, delivering the spring water in a large galvanized iron tank. With the water in the house away from frost and at an elevation above the kitchen range, it was an easy matter to connect the elevated tank with water to the kitchen boiler and waterfront. Hot water was on tap in the kitchen at last. This was thirty years ago. Cold water was delivered at the sink through a branch in the cold water pipe line.

LIME GIVES TROUBLE.

Everything was fine for a year until the lime in the water accumulated in the water front and disturbing rumblings started. The hard water from the spring proving, in this instance, to contain too much lime, a change of waterfront was necessary, and it was decided to hitch up with the soft water cistern. We knew that there could be no trouble with lime then. A suitable pump was set up at one end of the sink and connected by pipe with the galvanized tank overhead that had been used for the hard spring water. No further trouble was experienced in the twenty years following while we occupied the house. We had to pump the water to the supply tank by hand. A modern

bath, wash-bowl, and toilet were added to the system and were much appreciated. In addition to supplying water to the house a branch line was delivering water to a large cement storage tank in the stable, and from this tank water was piped where needed for the large herd of cattle, horses, sheep and swine. That old hydraulic ram purchased in 1881 at a cost of \$16 worked constantly for 40 years and in that time pumped to a height of 120 feet and to a distance of 1,200 feet enough water to fill a tank, if such a tank could be built, 200 feet long, 100 feet wide and 100 feet deep. We did not need it all, water was running to waste every day. Just how much time and how much backache we saved ourselves over those forty years by putting that spring to work, it is difficult to say; with one hundred head of stock to water, as well as provide the domestic supply, it would have kept one man pretty busy on the pump handle. Furthermore, that little elevated spring and hydraulic ram put the water just where we wanted it.

Feeding Cautions.

There is a great but needless loss in newly hatched chicks, due to too heavy an dttoo early feeding.

Many a poultry feeder, wishing to give the chicks a little extra attention and help them along, feeds them too early, throws in too much scratch feed or feeds them too often.

This, if practised extensively during the first week, puts a heavy drain upon their constitutions. The yolk, which is drawn into the young bird's body before hatching time, is not assimilated properly. Digestive disorders and diarrhea, from which many chicks succumb, are the result. Too heavy early feeding causes heavy brooder losses—much more so, in fact, than result from faulty temperature or inherited diseases.

If for the first ten days we could just keep the chicks hungry, feeding them often but only a little at a time, being sure that the feed is wholesome, giving them almost nothing but ground grain or mash, and this fed in hoppers with very limited feedings of chick grain in the litter, the problem would be solved.

Canadian Pork Products on the British Market.

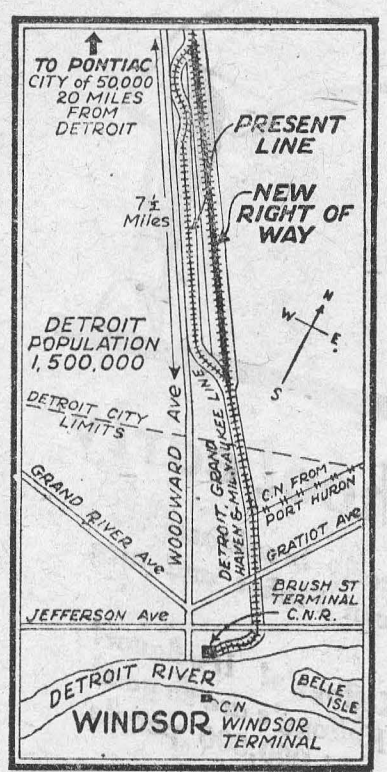

The quality of the Canadian pork products offered on the British market in 1926 showed steady improvement, yet according to the annual Live Stock Market and Meat Trade Review of the Dominion Department of Agriculture, supply was often inadequate in volume to meet the demand. Quite often during the year Canadian supplies on the overseas market were so negligible in relation to supplies from other countries as to greatly affect the status of our product. At the same time Denmark was marketing very heavy supplies and some other European countries more than doubled their offerings of the previous years and found a generally ready market.

In 1926 Canada sold to Britain 90,843,600 pounds of bacon, as compared with 130,503,700 pounds in 1925. There was also a considerable decrease in our export of hams to Britain. It is pointed out in the Review that Canada's reduced exports were entirely due to the shortage in supply, home values being largely above an export basis. If the pig crop had been larger its products would still have found a ready market. At the same time the lack of volume of our exports to Britain is jeopardizing our position on that market, especially since some European countries, such as Latvia, Poland, Holland and Sweden, newcomers in the bacon market, are rapidly gaining a foothold there. Economical production in larger volume is absolutely necessary if Canada's pork products are to remain a factor in the British market.

Watering Horses.

Very warm horses should not be allowed to drink their fill of cold water, nor should they be given grain until they have been cooled off somewhat.

In the final analysis, the individual dairyman can do more to boost his profits by culling out poor milkers than he can in any other way. It takes organization to improve buying and selling conditions.

New Detroit-Pontiac Route.

Plan above illustrates the route that will be taken by the Detroit, Grand Haven and Milwaukee Railway—a subsidiary of the Canadian National—between Detroit and Pontiac, when the new right of way is taken over. Both the city of Detroit and the railway gain by the change. The former will be enabled to go ahead with its plan for making Woodward Avenue into a first-class broad thoroughfare, while the railway, as well as securing a more direct and slightly shorter track, gains a 100 foot right of way, 1 place of the old one, which narrowed down to 30 feet in places, and made it impossible for a double track to be built. Pontiac is growing by leaps and bounds, and the passenger and freight traffic demand at least a double track between the two cities.

World's Insects.

Conservative scientists estimate that there are probably 3,500,000 kinds of insects in the world.

Superior to any other green tea sold.

WE NEED A GOOD BREAKFAST START THE DAY RIGHT

BY NELL B. NICHOLS.

Breakfast is the most widely discussed meal. Nutrition authorities are lamenting the way it is slighted. Some folks refuse to eat at an early hour. In many homes a very light meal is served. Countless women have the false impression that this dislike for food in the morning cannot be altered. Many homemakers believe there is almost no chance for variety in breakfasts.

Almost everyone agrees that the first meal of the day needs to be substantial. Many hours elapse between it and supper. After a long night the digestive system is ready to work. The body wants fuel, for many of the world's difficult tasks are performed before noon. Common sense, as well as a study of physiology, shows that the body energy is produced by body fuel, or food. Moreover, three daily repasts of approximately the same size make the toll of digestion less strenuous. Knowledge of these facts may not make for ease in solving the breakfast problem. The difficulty many of us face is that of persuading the members of the family to eat sufficient amounts of the food placed on the table. As a rule little trouble is experienced with the men who attend to the chores before dining. Exercise outdoors stimulates their appetites. Children frequently do not eat enough. During the morning when they are at school or in the field a great strain is placed on their physical well-being. Chances are they will overeat at the next meal. Indigestion may result.

My first suggestion for making breakfasts more popular is to vary the menu from day to day. Tempting food has accomplished much in my household. When this fails I know of nothing to employ except discipline. A blanket menu that may be used successfully for all breakfasts is fruit, cereal, eggs, bread and a beverage. Two additions are valuable, especially to men who work outdoors. They are breakfast meat, such as bacon, ham and sausage, and jelly or jam.

There is a reason for including all of these foodstuffs. Fruits have strange abilities, due to the vitamins, acids and mineral elements they contain, to keep bodies in tone. Oranges are especially wholesome. Experiments indicate that this citrus fruit has wonderful health giving qualities. Then there are prunes, raisins, figs, apples and many other kinds of fresh and dried fruits.

Cereals are great energy producers. Children are active, which means they require an abundance of fuel foods. Their rapid growth makes additional demands. Cereals not only are fine foods but they also possess remarkable adaptability. Fruit may be cooked with them or served with them if they are prepared. Top milk is introduced into the diet with them. There is a decrease in the individual consumption of butter fat in recent years. Evidence has been found in the laboratories that the absence of adequate amounts of Vitamin A, found in cream and whole milk is one of the important causes of diseases of the upper respiratory system, such as mastoid, nasal and ear infections. Every child needs a quart of milk daily. Cereals aid in making children willing to take milk. Eggs are valuable because of their fuel qualities and mineral content. The yolk is especially rich in iron. Then, too, eggs from hens which spend considerable time in the sunshine are activated foods. This means they contain something which makes for an abundance of red blood and for a resistance to disease. Another property of activated foods is that they help the lime taken in milk and other foods to form tissues, bones and teeth. It is one of the marvels of the age, this discovery that activated foods supply the body with a material similar to that in the sun's short rays.

I vote for a hot beverage such as coffee, as it is relished by most grown-ups. It puts them in a happy frame of mind. Boiled coffee has a better flavor than the percolated beverage. Here is the best method for coffee-making. The coffee grounds are

mixed with an egg and cold water. This is allowed to boil three minutes. The fine flavor, they believe, is due to the fact that the albumen of the egg precipitates the tannin, the substance that makes coffee bitter.

Breads offer great variety. Toast, biscuits, muffins and pancakes are favorites. Adults who are active will enjoy meat, which supplies them with energy. A colorful dish of jelly satisfies the sweet tooth and is excellent fuel.

INTRODUCES VARIETY. My experiments have been made to determine how variety may be introduced into breakfasts. Science has demonstrated that an adequate meal is needed. The homemaker's problem is to find ways to tempt the appetite. I am presenting a few menus which show that elegance can be obtained in the first repast of the day. These meals are appropriate for the family and for the critical guest:

- Orange Juice
- Oatmeal with a Pitcher of Top Milk
- Poached Eggs on Chicken Hash
- Toast Coffee
- Baked Rhubarb
- Corn Flakes with Top Milk
- Raisin Bran Muffins
- Buttered Eggs Coffee
- Stewed Figs
- Cereal w/ Top Milk
- Creamed Codfish on Toast
- Egg Muffins Coffee
- Grapefruit with Strawberries
- Bacon Baked Eggs
- Toast Jelly
- Stewed Prunes with Orange Juice
- Oatmeal Griddle Cakes Maple Syrup
- Sausage Jelly
- Apple Sauce
- Bran Flakes Bacon
- French Omelet Coffee
- Jelly Coffee
- Grapefruit
- French Omelet Creamed Potatoes
- Coffee Bread Coffee
- Baked Apples
- Fried Salt Pork Baked Potatoes
- Milk Gravy Coffee
- Graham Muffins Coffee
- Stewed Rhubarb
- Whole Wheat Cereal Top Milk
- Poached Eggs on Milk Toast Coffee
- Fresh Pineapple
- Rolled Oats with Top Milk
- Buttered Eggs Toast
- Coffee
- Canned Fruit
- Creamed Eggs on Whole-Wheat Toast
- Jelly Coffee

The Multi-Titled House Wife.

The busy home-maker, be that home a lordly castle or a lowly kraal, seldom calls herself by any fine name. She may just call herself a house-keeper, yet in reality she can boast of perhaps more titles and degrees than any scion of a royal house. This woman in the home must be an artist to make her surroundings lovely and fitting. She must be a chemist to know the values and the effects of food. She must be a psychologist to know how to meet the problems of temperament and tendency that confront her. She must be a sociologist to understand how the problems of home—sanitation, food inspection, and others, reach out into the community.

Keep Rear Light Bright.

Wipe off the rear light occasionally with a bit of chamois. Mud and dust settle on this lamp and often obscure its rays so that they are of little value when most needed—at night.

The man who buys all his feed has no business in dairying.

He ought to raise his roughage and silage, if nothing more. If he raises a part of the grain, so much the better. Grow good legume hay and silage, and with good cows you can make a profit on purchased concentrates.

Don't tell the neighborhood what you are going to do.

Get right down to work and let your neighbors guess for themselves. They'll be over soon enough to offer advice, and ten chances to one the neighbor who wants to drop you a hint needs advice badly himself.

188UE No. 17—27.

SPRING CRUP OF CALVES

HOW TO RAISE BABY BEEF ON SKIM MILK.

Experiments at the O. A. C. Show You Can Do the Milking, Sell the Cream and Still Have a Good Calf.

(Contributed by Ontario Department of Agriculture, Toronto.)

Many breeders of beef cattle prefer to hand-milk their cows and, with the growing demand for young and handy-weight beef, the question of the possibility of making baby beef on skim milk is a live one. Of course, no one will argue that better baby beef can be made with skim milk than with whole milk, but many believe it impossible to satisfactorily finish calves at baby beef age and weight without whole-milk for most of the feeding period.

An experiment with four good grade Shorthorn calves by a pure-bred bull and fed off with skim milk gave us some rather valuable results. The calves were put in in late January and February, 1924, and marketed in late January, 1925, at just about twelve months old and at an average weight of approximately 800 pounds each. They graded choice handy-weight cattle and were very choice baby beef in carcass. They made a daily gain per steer of 1.941 pounds, a profit over cost of feed of \$54.85 and a profit of \$34.85 over all costs, including initial cost of calves. We were pleased indeed with the results. These were good cattle, finished ready for market at the popular weight and grade, had given good market prices for feed consumed and had taken practically no whole milk after the first three weeks of age. There are some possibilities in this direction, but good beef type calves are necessary to start with and more than the usual care in feeding is necessary. It would not be advisable to try it with dairy-bred stock and certain care in feeding and housing are essential, but it looks possible to make fairly good baby beef from skim milk calves of the right beef breeding if they are fed right and kept in the stable, preferably in box stalls.

The Dairy Veal Calf.

Experiments have shown that dairy-bred steers and heifers are not suitable for beef production, so it becomes necessary to dispose of many calves from commercial milk-producing herds as well as cull calves from pure-bred herds. Most people do not like to destroy such calves at birth and so try to veal them off. While a dairy-bred calf does not make as good veal as a beef-bred calf, if he is to be eaten at all he is more likely to meet expenses and more nearly suit the consumer as veal than as any other kind of meat. With a number of calves in our own herd—Holsteins, Ayrshires and Jerseys—we found they averaged 71 pounds each at birth, that is, feeding for several weeks it took 7.95 pounds of whole milk for a pound of gain in weight, and the work showed that the best way to handle such calves is to give them whole milk for the first three weeks of their lives and get them on the market as soon after that as possible, or, in the case of the heifers, to keep by week in feeding whole milk to an average dairy-bred veal calf after he is three weeks of age, at which time he is marketable. Calves should, however, be put in the best possible condition if to be marketed at that age, as poor calves injure the market for all veal.—Dept. of Animal Husbandry, O. A. College.

The Big Co-Op.

The Big Co-Op. can fix, and force buyers to accept fair and uniform grades; can establish its own brands and maintain an exclusive market for them through advertising.

The Big Co-Op. can develop new uses for a product; can find new markets where none existed previously; can usually find a sale for low grade products, without damaging the market for higher qualities.

The Big Co-Op. can make sure of the credit of the buyers, and thus avoid fraud; and can establish retail outlets for its products when necessary.

The Big Co-Op. can blend and process the product, and collect the profits thereof.

The Big Co-Op. can demand and secure better railroad service, and the cheapest storage and insurance rates.

The Big Co-Op. can sometimes sell the product direct to the manufacturer, exporter, or retailer, reducing speculative danger and collecting the intermediate profit. A single farmer or a small Co-Op. can not do this.

AN AID TO THE STAPLES.

When Fencing Rough Land Nick the Posts.

The up and down pull exerted on the staples used in keeping wire fencing in position is often so great as to loosen and extract the staples holding the wires to the posts on higher ground. A sagging fence is worse than useless as it tempts stock to go over and mow down the wire. All wires may be kept tight and in place by simply cutting a shallow notch in the post where the wires are to be held and then resting the wire on the shoulder of the notch. The post will then support the pull whether up or down, and the staple can do its part in holding the wire in to the post, all that a staple is intended to do.—L. Stevenson, Director of Extension, O. A. College.

Canada Thistles.

The best way to kill Canada thistles is to use a short rotation of three or not more than four years, such as a grain crop seeded down with red or sweet clover, left one year to pasture or hay, followed by a hoe crop and sown with grain and reseeded. Timothy seed may be sown with the clover and it may be left in meadow two years. The clover plant does most of the work in smothering thistles and in being cut at a time that will be very hard on thistles. Being hollow, water gets in the stems causing decay.

CEMENT and TILE.

As Spring approaches, you will be thinking of both your Cement and Tile Needs. I have just unloaded a car of Cement and am prepared to take care of your requirements. We make a Specialty of delivering both Cement and Tile. You will find our prices right. Give me a call before buying.

TOMATO IS POPULAR

POINTS TO SECURE SUCCESSFUL PRODUCTION.

Wide Range of Choice Both With Reference to Soils and Fertilizers—Pruning and Harvesting.

(Contributed by Ontario Department of Agriculture, Toronto.)

Tomatoes are grown extensively as a truck crop, as a market garden crop and in the home garden. The field acreage grown for canning in Ontario has reached many thousand acres. Soils.

The tomato does well on a wide range of soils. However, for the early crop light sandy or gravelly loams are preferred, while for a heavy yield, later crop, the rich sandy loams or clay loams are preferred. Fertilizers and Manures.

General recommendations at best can only be a guide for the use of fertilizers and manures with this crop. The character and treatment of the soil, along with what may be the ultimate use of the crop, together with the length of season for the district, all help to suggest what treatment is needed. It is generally recognized that the tomato crop requires a soil in a high state of fertility. Fresh manure should not be applied just previous to the setting of the plants, far better if applied the previous autumn, or with the previous crop. Tomatoes will do well following clover, ploughed under the previous autumn. Of the commercial fertilizers, those bearing relatively high quantities of available phosphorus are most generally satisfactory. Sometimes a light application of nitrate of soda applied just when early plants are setting a start is useful to help them on after the shock of transplanting from frame to field. Since early fruiting and ripening is important with this crop, too much nitrogen will prolong the growth at the expense of early fruiting. Planting.

Tomato plants are tender and should not be set out into the field until after danger from frost is over. Previous to setting out they should be well watered and as much of the soil and roots be moved with the plant as possible. It is well to choose a dull day or else delay planting until late afternoon.

The usual distance of setting the plants is four by four feet. Various methods are used to facilitate the work of setting—some growers plough out furrows, others mark their fields and dig the holes, while the most common method with the small grower is to use a trowel in setting the plants. It is good practice to set plants somewhat deeper than they were growing in the pot or box. Firm the soil well around the roots of the plant, this is important. Cultivation.

Cultivation should be frequent. Keep all weed growth down. As the plants develop the tillage should become more shallow and finally cease when injury to the roots is noticed. Growing Staked Tomatoes.

Many commercial growers produce a crop of tomatoes from plants supported by stakes and pruned to a single stem. This is an excellent way to grow the home garden crop. Training.

Plants may be set from twelve to eighteen inches apart in rows that are three or four feet apart. Individual stakes of wood or iron may be used to support the plants or such may be supported by tying to wires. Raffles is the most satisfactory tying material, used as a loop around the plant stem and attached to the support. Pruning.

In order to produce a single stem plant, all side shoots and suckers must be pinched off as soon as they appear. Harvesting.

Tomatoes allowed to ripen on the vine have a superior flavor, so fully colored fruits only should be pulled. The eleven-quart basket is the most popular marketing package used in Ontario at the present time.

Firm, sound, well graded, clean fruits only, should be packed for market.—Dept. of Horticulture, O. A. College.

ALFALFA.

Food Reserve and Ability to Withstand the Winter.

Chemical analyses of the roots of alfalfa plants, the roots of which have been made to determine the amount of carbohydrates and both soluble and insoluble nitrogen present. The roots of plants that were allowed to come to full bloom showed more than twice as much reserve food as did the roots of plants that were cut in the bud or one-tenth bloom stage. It has also been noted that plants that are harvested when the bloom is full come through the winter with less loss. The more vigorous condition of the root, as indicated by chemical analysis, for the plant that is allowed to come to full bloom and harvested only twice in the season, is a big factor in carrying the plants over winter. Many alfalfa fields are ruined by late September and October cutting—the roots are left in a too weakened condition to stand the rigors of winter.—L. Stevenson, Director of Extension, O. A. College.

A fourth laboratory analysis and field test of the commercial product known as "Solagro" at the O. A. College by special request. The results of this test tallied with those that were previously reported by the Department, and were to the effect that this product, which retails at six dollars per gallon, is of no benefit to crops on ordinary soil.

The New and Finer PONTIAC SIX

Youthful, Rakish, Colorful

EVER since the Pontiac Six flashed into the market, folks have been wondering, "When will General Motors build a sport roadster on the Pontiac Six chassis? How soon will Pontiac Six power, speed, beauty and endurance be offered in a dashing, low-slung two to four passenger type?"

Now . . . here it is! As lithe as a thoroughbred, as happy as a lark, as smart as a debutante just back from Paris.

Lucerne Blue is the prevailing color—Lucerne Blue Duco brightened by striping in Faerie Red. And just as far from the commonplace is everything else about the car—grey shark grain leather upholstery, nickel-plated windshield side arms, a completely removable top of double texture grey—and a swanky, flaring rear deck with a spacious disappearing rumble seat!

You never saw a sport roadster quite like this—quite as alert, as intimate, as refreshing to the eye. And if there's youth in your blood—or youth in years—you'll be wanting it some day soon—because it's a splendid quality car, through and through.

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

W. H. Fetterly & Co. Morrisburg, Ont.

AT NEW LOW PRICES

The coils of your element are a vital part of your electric range. To provide safe, fast, reliable service they must be protected.

McClary's Speediron Element is insured against all injury by its removable cast-iron cooking surface. This protects the coils absolutely—giving long life, safety and assuring dependability. Utensils and food may fall on the element without damaging it in the slightest.

Why not enjoy these exclusive cooking advantages? See McClary's Electric Range demonstrated at your dealers. There is a style, a size and a price to suit your exact requirements.

Also see McClary's A & F Electric Water Heater and Fibreform Tank Cover

(Crawf C. Slack)
We may think perhaps we're clever, but, my friends, let us drive slow. For presumption off is followed by regretting, that I know: In our line we may be skilful, but we cannot know it all. Too in judgment let's be careful, lest a judgment on us fall. Selfishness and pride may lure us, and mislead us to decide. When we should have viewed the matter from the other fellow's side; We cannot always tell exactly what's before us as we go, So let's stop and look and listen, ease the gas off and drive slow. Very often I've discovered that a lot of people knew And were posted on some subjects that I didn't think were true. And I would have went on groping in my blindness day by day. If I hadn't stopped and listened to all they had to say; Too, some of the choicest lessons, precious as the golden rules, I have learned on common by-ways travelled by supposed fools. So let us proceed with caution as we travel to and fro, Watch for danger signs and listen, put the brake on and drive slow. If we all would drive with caution thinking not alone of self, And pick up the other fellow with no limosine or pelf, If we'd help the other fellow and not wound him, doff you see, How much fairer, brighter, better this old world of ours would be. Let us make the road we travel broad and open all the way, Let us make our seat-mate Kindness, heading all he has to say, Let us watch the common by-ways for the outcast and the law, Let us stop and look and listen for them, friend, as we drive slow. Friends, let's stop our saintly posing, and with candor play our part, With a conscience that a nickle will not make or break our heart, Let us travel more for goodness, and a little less for show, Let us watch the way for derelicts—stop, look, listen, and drive slow.

Winchester Springs

Mrs. D. Kinkade, of Russell, is spending some time with Mr. and Mrs. Clifford Robinson.
Mrs. Floyd Shaver and children and Mr. Howard Durant of Hainsville, spent Sunday last with Mr. and Mrs. J. H. Shaver.
Mr. Roy McIntosh purchased a new Pontiac Sedan.
Mr. and Mrs. F. Coons and family, of Winchester, spent Sunday with Mr. and Mrs. T. Cunningham.
Mr. and Mrs. A. Loucks attended the funeral of the late Mrs. Charles Bouck at Iroquois.

of Williamsburg, spent one day recently with Mrs. Annie McIntosh. Mr. Barkley re-opened the store known as the late J. A. McIntosh property.

The monthly meeting of the W. M. S. of the United Church was held in the church hall on Tuesday afternoon at 2 p. m., there being a good attendance. After the meeting was closed a very pleasing event took place when Rev. Hirst baptised Mabel Irene, the infant daughter of Mr. and Mrs. C. Thompson, after which the ladies served lunch.
Miss Mina Holmes visited at Hainsville on Sunday.
Mrs. Kenneth Durant, of Cass Bridge, Mrs. Carmon Johnston and baby, of Inkerman spent a few days with their parents, Mr. and Mrs. P. McIntosh last week.

Mrs. Walter Hummel and children, of Chesterville, spent the week end at the home of the former's parents, Mr. and Mrs. G. Beckstead.
Mrs. Ira Christie, of Winchester, spent the week end at the home of her son; Mr. Arthur Christie.
Miss Hilda Black, of Ottawa, spent the week end with her parents, Mr. and Mrs. M. R. Black.
Mr. and Mrs. Willie Masterson and children of Chesterville spent Sunday at the home of Mrs. Leon O'Neil.
Mrs. Richard Scott and little daughter Marion spent the week end with Mr. and Mrs. J. Scott, Winchester.
Mrs. U. L. Steinburg spent part of the week with friends in Ottawa.

Card of Thanks

I wish to thank friends and neighbors for their many deeds of kindness and great sympathy shown during the illness and death of my mother, the late Mrs. James Froats especially the Rev. Mrs. Brown and Ladies of the United Church, Inkerman, for their gift.
Inserted by her daughter, Mrs. Geo. Hummel, Winchester Springs.

Empress Shoes

Every one is lucky once in a while but when it comes to buying shoes luck can never take the place of knowledge.

The solid satisfaction that comes from getting just the shoe you want, just the shoe your feet need every time you buy is not a matter of guess work. You have only to go to a store that sell Empress shoes then you will always find the same dependable qualities and perfect shoe fitting service that makes your shoe buying a sure thing.

For the month of May we are giving up all thought of profit in order that you may enjoy the comforts of a pair of Empress shoes.

Price \$5.50 per pair and we give you a rebate of \$1.00

This is for the month of May only.

For Feet that Tire from walking.

The hands are strong, capable and untiring because they have freedom to work, and to move your feet will be comfortable and tireless too, if you change from the ordinary foot-wear to the **Empress Shoe for Women**—they give welcome comfort to women who must be on their feet a great deal.

Empress shoes are patterned from the lines of the foot, the shoe is carefully lasted to follow the mould of the underfoot and lend restful support to the arch. To encourage every woman to wear Empress Shoes we will for the month of MAY give a refund of \$1.00 on every pair—the price is the same \$5.50 per pair but with the rebate you will have high-class shoes at the price of the ordinary ones. This offer is for the month of May only.
