HENRY'S Shorthand School Ottawa, Ont.

No School in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa schools to come to it.

Therefore, it is not surprising that business men, in advertising for stenographers, should specially say, "Graduates of Henry's School preferred."

Bolster---Chapman

A charming wedding was held at the home of Mr. and Mrs. A. E. Bolster last Saturday afternoon, April 18th, when Louise Agnes Chapman, only daughter of Mr. and Mrs. R. F. Chapman, of Brandon, Man., was united in marriage to Alfred Launcelot Bolster, of Montreal, son of Mr. and Mrs. A. E. Bolster, Rev. R. E. Newman officiating. Relatives and friends of the family were in attendance.

The house was beautifully decorated with spring flowers, tall vases of roses and carnations lent beauty to the hall and living room.

The ceremony took place beneath an arch of smilax and white carnations banked at the foot with drooping ferns and stately white lillies.

The bride, descending the stairs with Mr. A. E. Bolster, to the strains of Mendelssohn's Wedding March played by Miss Elsie Hewitt, was a picture of girlish loveliness in a gown of flowered blue silk and large drooping black mohair hat and carried an arm bouquet of Sunset roses.

Miss Betty Bolster, sister of the groom, was the bride's attendant and wore a blue chiffon dress and carried a bouquet of daffodils.

Mr. J. D. Fitzgerald, of Montreal, acted as best man.

During the signing of the register, Miss Jessie Bolter sang "Because," and later in the afternoon Mrs. W. N. Fulton contributed a solo. Misses Rae Dixon, Jean Fulton and Elsie Hewitt assisted in the dining room which was decorated with crimson and white roses, the bride's table being centred with a silver basket filled with these.

Mr. and Mrs. Bolster left on the afternoon train for their new home in Montreal.

The out-of-town guests included Mrs. D. W. Carmichael, and Mrs. MacD. Fitzgerald, of Peterboro; Mr. and Mrs. L. C. Thomas and Robbie, Mr. and Mrs. L. Bentham and Miss Jessie Bolster, of Ottawa; Mr. and Mrs. Arnold Morrison, and Mr. J. D. Fitzgerald, of Montreal.

Mr. E. L. Bronskill Presented With Ring by Oddfellows

Tuesday evening when Chesterville Oddfellows were "at home" to about one hundred of their members and invited guests at a progressive euchre and dance in their hall, advantage was taken of the occasion to do honour to one of their number, when Mr. E. L. Bronskill, who is being moved in the service of the Bank of Nova Scotia from the position as manager of the local branch, which he has occupied during the past seven years, to a similar position at Maxville. An address expressing regret at his departure from Chesterville, and appreciation of his many good qualities was read by Dr. D. C. Seymour, while the presentation of a handsome ring was made at the proper moment by Mr. Geo. H. Barkley.

Mr. Bronskill replied briefly but with much feeling, thanking his fellow members of the order for the many favours he had received at their hands, and trusted that he would be permitted to return many times to Chesterville and renew the pleasant associations which had been formed.

The presentation was made at an interlude following an hour of euchre when the lady's prize was won by Mrs. A. E. Bolster and the gentleman's by Mr. Robert Allison, followed by the serving of refreshments and dancing.

A Close Call for Russell

Wednesday afternoon, April 15th, about four o'clock the Imperial Oil Truck stopped at McArthur's Garage, Russell, and started to fill the gas tank. Some young fellows were sitting on the steps beside the intake pipe, smoking. As the gas was running one of them lighted his cigarette and tossed the match away. In less than a second the gas fumes had ignited and the gas man pulled the truck away to avoid an explosion. Several gallons of gas spilled in doing so and a sheet of flame shot as high as the garage. People are timid in fear of an explosion, but J. C. Hamilton brought a heavy tarpaulin and covered the flames, smothering them. The fact that an explosion was avoided was miraculous as the fire raged for about ten minutes right over the intake pipe which was wide open. If it had exploded the oil truck and tank would have gone, and, owing to the formation of the land, the shock would have destroyed a great deal of property, and as the school children were just out, the probability of a heavy death toll more than likely. As it was, our town was very lucky.—Russell Leader.

HOCKEY MEETING

A public meeting will be held in the Music Hall, Saturday, April 25th, at 7.30 p.m., for the purpose of election of officers for the Senior Hockey Club for next season. All parties interested in hockey are requested to be present when prospects for next season will be discussed.

Chesterville Lawn Bowling Club

Monday evening a fair number turned out in response to the call for the re-organization of the Chesterville Lawn Bowling Club for the 1931 season. when more enthusiasm than usual was manifest, which was not diminished when the report of the treasurer showed a balance on the right side of more than fifty dollars.

Mr. E. L. Bronskill has been treasurer for the past several years and the club regrets that his transfer as manager of the Bank of Nova Scotia to Maxville necessitated the election of another. To show their appreciation of Mr. Bronskill's services, on motion of Dr. Clayton, seconded by Mr. Eric Casselman, he was made an honorary member of the club.

Considerable discussion was brought forth on the advisability of joining the Provincial Bowling Association which was left undecided until further information was gained as to the intentions of some of the other clubs of the district. The general feeling seemed to be that the proposed organization was not going to work out to any advantage for the smaller clubs, much in the same manner as the hockey moguls have put the skids more or less under the country clubs.

During discussion of the matter of fees it was brought out that nearly all the surrounding clubs charged a higher rate than Chesterville, but it was decided that as in past years the fee will remain at five dollars per member.

The greens have never come through the winter in better shape than this season and everything points to a most interesting and successful time this summer.

Following are the officer:
Hon. Pres.—Dr. D. C. Seymour
President—A. O. Robertson
Vice-Pres.—Dr. Clayton
Treasurer—Jas. Hanna
Secretary—A. E. Jarvis
Greens Committee—C. L. Hamlen, B. C. Pankratz, Thos. Flynn, Eric Casselman and G. C. Lacey.

Secretary Jarvis' Report for 1930.

June 3rd.—Our Seventh Annual Tournament was staged Tuesday in ideal weather with entries from Ottawa, Kemptville, Alexandria and Winchester and four from the home club. The greens were in most excellent condition, resulting in very keen contests throughout the day.

The first event was won by Ned Connor's rink from the Ottawa Bowling Club; Dr. Cheney, of Alexandria, skipped the runners-up.

Mr. Bingham, of Prescott, won the prize in the second event.

Chesterville's rinks, while failing to land in the prize money, put up stiff opposition all along the line but just didn't get the breaks when they would have meant wins.

June 5th.—Mr. Hanna skipped the winning rink in our local "Candy Night" competition, Dunc McElheran, "Daddy" Reaburn and Alf. Jarvis being the rink.

June 12th.—Dr. Hutt's rink was winner of the candy night competition with "Daddy" Reaburn and Alf Jarvis.

June 14th.—A rink skipped by Dr. Hutt with Lacey, Elliot and Hanna, took part in the Ottawa Club's Jamboree competition and, although winning three out of four games, failed to reach a high enough aggregate to land in the money.

July 3rd.—Dr. Clayton skipped the winning rink in our local prize night, Hamlin, Elliot and Jarvis being the rink.

July 9.—Geo. Shay skipped the winning rink in our local prize night, Hamlin and Eric Casselman being the rink.

July 17th.—W. O. Dixon skipped the winning rink in our local prize night, with Lawson, Barwick and Flynn.

July 31.—Three rinks from the local club had a most enjoyable evening at Winchester when they were the guests of that club along with a couple of rinks from Iroquois. After the game refreshments were served.

August 2nd.—The local club entertained three rinks from the New Edinburgh Club, of Ottawa, in a friendly match when three games of eight ends each were played, resulting in the home rinks being a few points up on the evening's play.

Monday, Aug. 11th.—A rink composed of Lacey, Dixon, Hutt, Hanna, skip, took part in the Eastern Association tournament in Ottawa and while not winning first prize made a very good showing in being the runners-up in the Eastern after being eliminated from the Dominion in their third game by one point by Asselt'ne, of Kingston. In the Eastern they won three games and were again defeated by the same Kingston rink which had also been relegated to the Eastern, the winners of which received silverware, the locals getting solid leather bags as their share at the termination of play about two o'clock Tuesday morning.

Friday, Aug. 15.—Two rinks from Chesterville—Hanna, skip; Casselman, Lacey and Clayton; Dixon, skip; Hess, Seymour and Jarvis, played two rinks from Alexandria on the Winchester greens in the Governor-General's competition and lost out by a few points.

Friday, Aug. 22.—The club enjoyed a visit of two rinks from the Iroquois club and two from Winchester when friendly games were played and refreshments served afterwards.

Tuesday, Aug. 26.—A rink composed of Hamlin, Clayton, Lawson, and Dixon as skip played in the St. Lawrence tournament at Brockville, winning one game and losing two and, although still in the running for the third event, had to default on account of business preventing their continuance in Wednesday's play.

Friday, Aug. 29.—In Winchester, two rinks represented Chesterville with Hanna, skip, Dixon 3rd,, Hess 2nd, and Lacey leading, winning the main event for which individual prizes were electric toasters. Lacey and Hanna also won the doubles.

In rink games and doubles at Iroquois on September 1st, two rinks from Chesterville failed to withstand the battle and fell by the wayside. The honours of the club however was worthily upheld when Eric Casselman and Frank Hess won through in the doubles to carry home handsome trophies.

Sept. 6.—A very successful doubles bowling tournament was held on Saturday by the local club when fourteen rinks took part in the day's play, Ottawa, Winchester and Brockville being the outside clubs represented, three of the handsome trophies finding their destinations in the places named, with the fourth going to members of the local club.

The first event was won by Algie and partner, of Brockville, second place being won by Hanna and Lacey.

The second event went to Lee and Johnston, of Winchester, Jackson and Barrie, of Ottawa Centrals, taking second.

Mr. Omer Robb, of Smiths Falls, was the lucky holder of the ticket which made him owner of a choice of set of four bowls, a 97-piece dinner set, or a vacuum cleaner.

The holder of the "Buttons" at the termination of the season's play were Hanna and Hamlin.

The last prize night was won by Peake, Hunt, Jarvis and Hanna, skip.

Bank Manager Transferred

Many citizens regretted very much this week to learn of the transfer of Mr. E. L. Bronskill, local manager of the Bank of Nova Scotia during the past seven years, to a similar position at Maxville, which will necessitate the removal of the family to that place. During his stay in Chesterville Mr. Bonskill has taken an active interest in the welfare of the village, in its athletics and socially, having been closely identified with the erection of the covered skating and curling rinks, the lawn bowling club and the tennis club, while at all times with Mrs. Bronskill they have taken active interest in the work of Holy Trinity church. Mrs. Bronskill, who is an accomplished musician, has given freely of her talent in the work of the Women's Institute and to all other matters pertainig to the welfare of the community.

Several functions have been held during the week in honour of Mrs. Bronskill, among which was one by the Women's Guild of Holy Trinity church when a handsome bridge lamp was presented. The Women's Institute and the Bridge Club have also been active in expressing their regret at the departure of Mrs. Bronskill.

Mr. M. B. Stewart, of Maxville, will succeed Mr. Bronskill as local manager of the bank and will shortly take up his residence here. He is a Maxville boy and entered the service of the bank in his home town. After serving in junior positions in several of the branches in the district, he was appointed manager at Moose Creek later going to Maxville.

Former Maxville Bank Clerk Given Three Months

Three months in the Ontario Reformatory, and an indefinite period of two years thereafter was the sentence imposed in Police Court, Ottawa, yesterday morning on Angus R. McEwen, aged 20, former bank clerk of Maxville, on each of two charges of obtaining money by passing spurious cheques on Ottawa banks.

McEwen was found guilty of obtaining fraudulently a sum of $2,200 from the Somerset street branch of the Bank of Nova Scotia, and $152.50 from the Rideau street branch of the Bank of Montreal.

Through his counsel, O. Howe, barrister, the accused pleaded guilty to both charges, and asked for leniency on grounds of previous exemplary character and of physical disabilities sustained in playing football.

In passing sentence, Magistrate Hopewell stated that he could find no excuse for the young man's action.

The United Church Hymnary

THE HYMNARY is now completed. I gave my order over a week ago for a number of copies of the books to be shipped at once. We now have samples in stock.

J. A. Watson, Hamilton

On Tuesday of this week the death occurred at his residence, 82 Gore street, Hamilton, of Mr. J. A. Watson after a long and painful illness. In addition to his wife (née Annie McMurray) he leaves one son, Harry, at home. The funeral is taking place today (Thursday) in charge of the Oddfellows, of which fraternity he had been a life-long member.

Dr. J. H. Dickey, Newington

Dr. John H. Dickey, of Newington, died at the Cornwall general hospital Wednesday following a brief illness of pneumonia. Dr. Dickey was born at Williamsburg 58 years ago, son of the late Mr. and Mrs. James Dickey. He was graduated from Queen's University, Kingston, and after that took a post graduate course in New York City. For the past 25 years he had practiced at Newington.

He attended St. Andrew's United Church, Newington, and was an elder of that body.

Surviving are his widow, who before her marriage was Annie McIntosh; three sons, James, of Ottawa; Sutherland and George, of Newington; three daughters, Misses Marion, Jean and Florence, of Newington; two brothers, George, of Montreal, and William, of Williamsburg, and one sister, Mrs. George Smith, Iroquois.

The funeral will be held from his late residence, Newington, on Friday, April 24. The body will be taken to St. Andrew's church at 7 a.m., where friends may view the body before services, which will be held at 2 p.m. Interment will be in Hillcrest cemetery, Newington.

Mrs. Geo. Scott, Winchester

About noon last Friday, April 17th, Mrs. Scott, widow of the late George Scott of Clarence street, Winchester, passed away after a great deal of suffering, borne patiently. Since last August, she has resided at the home of her daughter, Mrs. W. J. Rodney, who has tenderly cared for her.

Mrs. Scott was in her 71st year and had been in poor health for six years.

Her pastor, Rev. J. Ostrom, conducted her funeral at 1.30 p.m. Sunday in the Baptist church. The large attendance of friends showed the high esteem in which the deceased was held.

Bog Fires Near Monklands Cause Loss House and Barn

Underground bog fires, which have burned over an area of approximately ten acres north of Monklands village, 18 miles east of Chesterville, during the past week, Tuesday broke the surface and started a grass fire which extended over a wide area.

A frame house and a barn on the farm of Percy McPherson were destroyed, as a result, with a loss of $2,000 . Neither building was occupied. Neighbours rallied in an attempt to save the buildings but were hampered by lack of fire fighting facilities.

Watches are being set to prevent a recurrence of the fire. The bog fires are an annual affair in the Monklands area, but have this year reached unprecedented proportions owing to the unusual dryness of the soil in the swamps.

LECTURE POSTPONED

The illustrated lecture on the "Passion Play" by Rev. C. F. Logan, of Ottawa, advertised to be held April 24th, has been postponed to a date which will be announced later.

Spontaneous Fire Burns Boy's Pants

Stratford, April 20.—Teddy Higgins, six-year-od son of Mr. and Mrs. M. I. Higgins, 28 Hibernia street, suffered severe burns on his right leg between the knee and the thigh in a manner that is puzzling to his parents and the local police.

Teddy was standing on the stones at the north side of the bridge over the Avon at the dam, when his trousers suddenly burst into flames. Three companions, Jack Carnerie, Jimmie Carnerie and Teddy Butler, pushed him into the shallow water, thereby probably saving his life.

The little victim was rushed to his home by his three companions where he was undressed by his mother ,who at first thought that he must have had matches in his pocket, which had ignited his trousers. But by this time the burn had spread.

When Teddy's mother applied ointment to the burn, she was surprised to see the flesh sparkle sending off sparks which she described as like those from a cigarette lighter. A physician who arrived a few moments later found the same condition when he first applied dressing to the burn.

Some idea of the strength of the substance which caused the burns may be gained from the fact that holes were burned through a towel which was wrapped around his body after his trousers were removed.

After the trousers were taken off the lad they were thrown on the floor of the verandah. Later it was noticed that they were sparking like a wire which has been short circuited, and still later it was noticed that the verandah floor had been charred in several places were the trousers had been lying. They were then put in the furnace, from which a strong odour, which Mr. Higgins describes as like that from a sulphur match, now emanates.

The physician attending the victim has expressed the belief that the burns were caused by phosphorus, but he is puzzled as to where the lad could have come into contact with this substance.

Moderator Finds Son's Pyjamas Latter Suspects Dad Swore

Rt. Rev. E. H. Oliver, of Saskatoon, moderator of the United Church of Canada, last night revealed himself as a pioneer—or at least a suspected one—in the somewhat strange field of Pullman car misadventures.

Coming east from his home a few days ago, he said, in addressing the York Bible class annual banquet at Toronto, he discovered on his first night on the train that his wife had inadvertently put into his suitcase his 13-year-old son's pyjamas. As the moderator is a man of impressive stature and not particularly slim, there was nothing for him to do but mail them back from Winnipeg. He had just learned he said, that when the package arrived back home and was opened, his son commented: "Well, I guess Dad is the first moderator ever to swear!"

Callander Swept By $60,000 Blaze

Callander, April 20.—Damage estimated at more than $60,000 was caused by fire which for a time threatened to wipe out this northern village to-day.

One hotel, the Canadian National Railways station and freight sheds, three business structures and adjoining buildings, were entirely destroyed and four families are homeless.

For four hours volunteer firemen from here and from Powassan, coupled with reinforcements from North Bay, fought desperately to check the spread of the flames, and were only victorious when a fortunate change of wind came to their assistance.

The fire began in the basement of the Pacific Hotel, one of the oldest buildings in the village. The hotel had just been completely remodelled, workmen completing their task only on Saturday. The fire rapidly spread throughout the structure, and in a few minutes had spread to the adjoining buildings.

A strong westerly wind sweeping from Lake Nipissing fanned the flames to a fury, and the C. N. R. station and freight sheds were next to go. A few minutes later the entire block was ablaze. Communications to outside points were cut off simultaneously with the electric light and to-night Callander is using candles and lamps. It will require some days to complete repairs to the public utility services.

Much credit is give the fire-fighters of the Ontario Forestry branch, who battled gallantly in a futile attempt to check the spread of the flames. Assisted by volunteers, the forestry men worked desperately until reinforcements arrived and brought the blaze under control.

In the Raffle.

Recently a Los Angeles shop received the following letter from a distressed debtor: "Dear Sir: I have many bills to settle, so each week I put them all in a hat and draw out one, which I pay. It may be your turn next week, but no more of your threats or I won't put you in the raffle."

News and Information For the Busy Farmer

Furnished by the Ontario Department of Agriculture.

Don't turn the dairy cows on pasture too early in the spring is the advice of good authority. Early spring grass is watery and immature. Wait until the grass is three or four inches high.

B Better Farm

The Richmond Hill Agricultural Society has decided to inaugurate a "Better Farm" competition this year for which a silver trophy has been secured.

The contestants, it is stipulated, must be bona fide farmers, residing within a radius of 12 miles from the village of Richmond Hill, which is a short distance north of Toronto, and cultivating fifty acres or more. The judging will be on the basis of neatness of ground and surrundings, condition of buildings, state of cultivation, freedom from weeds, and care and quality of live stock.

Guelph Dairy School Results

Another group of Dairy Short Courses has just concluded at the Ontario Agricultural College, Guelph. A total of 194 were registered this year and the students came from many counties, and from all all the Eastern provinces of Canada. Australia, Denmark, Holland and the Provinces of Nova Scotia, New Brunswick, Prince Edward Island and Quebec had representatives in the class. The most of the students, as usual, came from Western Ontario. H. D. Harrison, of Burgessville, Ont., headed the proficiency list, and C. L. Machan, West Monkton, Ont., was second.

Care of Baby Chicks

Fresh clean water is of vital importance for baby chicks. It constitutes more than one-half of the chick's body and in addition it helps to soften and digest the food, plus assisting in the carrying of waste out of the system. For the first week the chicks should receive luke warm water.

It is generally dangerous to put any disinfectant in the water. Some may poison the chicks, while others do not go so well with the feed. Clean lukewarm water given in clean drinking fountains is by far the safest. Make it a point to thoroughly clean the drinking vessels once a day, and, if convenient, scald them.

If not using a wire floor in the brooderhouse, it is best to put the drinking fountains on a platform with a wire cloth top. This will keep the chicks away from the wet litter, brought about by the water they spill. The litter around the drinking fountains offers a wonderful chance for infection of coccidiosis and kindred diseases.

Cron Growing Competition

A record enrolment of members for the 1931 Junior Half-Acre Dent Corn Growing Competition for Kent County has been received at the Department of Agriculture office, Chatham. Already 150 young people have entered and more are expected. This compares with 110 entries last year. The competition is open to any young girl or boy in the county under 18 years of age. The types of corn to be distributed this year are Yellow Dent, Golden Glow, White Cap, and White Dent. An increased interest in corn-growing in the county is said to be largely responsible for this effort upon the part of the young farmers.

On Feeding Hogs

With an abundance of low priced coarse grains and wheat available, there is an apparent tendency on the part of farmers to overfeed their market hogs. This is shown by the increase in the average of hogs now coming on the market. The two-hundred pound hog is the ideal market weight. With the price of lard what it is today, relatively lower than the price of bacon, it is the bacon type which means money to the producer. Farmers should watch hog feeding closely to guard against both light weight and excess fat—he must keep away from the out-weight grades if he is going to get the top of the market for his hogs.

Co-Ordinate Junior Work

Having as its main object the co-ordination of all junior farm and club work of the various provinces, thus bringing it into line with a nation-wide agricultural policy, a new organization known as the Canadian Council on Boys and Girls' School Club Work, has been established with headquarters at Ottawa. A permanent secretary has been appointed and the new plan will come into operation at once. Boys' and girls' club work has become a very vital factor in determining the quality of live stock and other classes of production in most provinces, and, while the provincial agricultural authorities will continue to supervise their farm clubs as in the past, the new organization should result in greater co-ordination and greater uniformity of policy. The new Central Council will sponsor the holding of national championship contests and exhibits at the Royal Winter Fair at Toronto for swine clubs, calf-feeding and cattle-breeding clubs, potato and seed grain clubs. Nearly 15,000 Canadian farm boys and girls, representing some 820 clubs, are engaged in some form of agricultural club work. Ontario has 143 clubs with 3,253 members.

Sow Good Barley Seed

Ontario producers of barley for the industrial market have received real encouragement in the form of a guaranteed minimum price. But this guarantee applies only to better class barley of a grade equal to the standard laid down in the Grain Act for No. 3 Extra. This quality requirement should create a greater interest by growers in the seed they put in the ground this spring. According to available information, the supply of real high-class barley in the province is abundant and the price reasonable.

A compilation of statistics over a period of 47 years shows that barley has outyielded oats by approximately 150 pounds per acre, while in years of unfavourable weather, such as 1930, this increase amounted to twice this figure. Barley also helps in planning crop rotations. In one season, it provides an opportunity to clean up the land, to grow paying crops, and to seed down to the best advantage with hay for the following year.

Current Crop Report

According to the reports of the Agricultural Representatives, fall wheat is doing exceptionally well and even fields that did not have a good top last fall made a rapid recovery and prospects are that fall wheat will be an average or even better crop. Clovers and alfalfa that were not up well last fall, due to weather, are looking well. There will be considerable increase in the acreage of alfalfa this year due to two factors: one that the seed is very reasonable in price, and the other alfalfa demonstrated last fall that it would withstand dry weather better than any other hay or clover crop. There has been a very great demand for certified Irish Cobbler seed potatoes and indications are that the acreage of this variety will be increased from ten to twenty percent. Live stock, especially cattle, came through the winter in excellent shape. Many farmers are reporting heavy losses of young pigs. These losses are considered by some to the heavy feeding of grain to brood sows.

Clean the Cornfield

There have been rumors that the Corn Borer Act would not be enforced this year. Such rumors are unfounded. The pro-entomologist in March called a meeting of the corn borer inspectors, discussed with them their duties and gave instructions that there should be no slackening up in the enforcement of the act. He said the borer was just as dangerous as ever and the only safeguard against serious loss to the corn lay in a thorough clean-up every year, each farmer doing his share. It was pointed out that the weather was a very important factor in determining whether we could get a reduction in the number of borers in any particular year . Some years the weather would favour the insect so much that all a good clean-up could do would be to prevent a very large increase. Other years the weather would help us and there would be a decrease.

Farmers and also corn growers in cities and town are urged to co-operate by having all corn remnants destroyed not later than May 20th.

"That's the cats pyjamas," remarked Mr. Henpeck as he picked up his wife's sleeping togs.

A certain man had the reputation of never being able to say "Yes" or "No" in reply to a plain question. One day two ladies of his acquaintance were discussing this peculiarity, when one of them said that she felt sure that she could make him say "No!" flatly. The next time she met him she said to him, "Let me see, Mr. Robinson—you are a widower, are you not?" "As much a widower, madam," he answered, with a polite bow, "as it is possible for a man to be who was never married!"

"Can I interest you in an attachment for your typewriter?" asked a young traveller.

"No," growled the storekeeper. "My wife still reminds me of the attachment I had for my last typewriter."

—o—

"I want to ask one more question," said a little boy. "Well?" queried his tired mother. "When a hole comes in a stocking, what becomes of the piece of stocking that was thre before the hole came?"

MR. FARMER!

A TIMELY SUGGESTION.

Your Trucks, Tractors, Wagons, Implements and other Farm Equipment represent a big investment!

You would need a great many bushels of Wheat or other Farm Produce to pay for the cost of replacement or repairs!

If you could lengthen their period of usefulness by two or three, or four years, the benefit to you in dollars and cents would be very great. Wouldn't it?

You *can* reduce your yearly cost! You *can* increase the productiveness of your implements! You *can* preserve your investment by painting your implements with—

Lowe Brothers HIGH STANDARD

Truck & Tractor - Paint -

For the small sum of about $4.00 you can completely paint a wagon two coats, and thereby add at least two years to its life.

Lowe Brothers' Truck and Tractor Paint, which is specially made for the purpose, comes in six bright colors and Aluminum. It is very economical and can save you hundreds of dollars.

Why not preserve your assets now?

One Pint of Lowe Brothers Paint will go as far, as One Quart of Cheap and Inferior Paint. . . .

Come in and get a Color Card.

Perth Man Fatally Injured While Harrowing

Perth, April 20.—Dragged under a spring-toothed harrow over two acres of farm land, after the horses had bolted, Daniel Ryan, aged about 50, a farmer living about two miles from Perth on the Carleton Place road, was fatally injured this afternoon .He died half an hour after admittance to the War Memorial hospital here.

While cultivating a field with the spring-tooth harrow about 3.'0 p.m., one of the horses, a colt, kicked over the pole of the machine. The pole snapped, causing the harrow to drop and throw Mr. Ryan from his seat.

When the colt got lose, the other horse became frightened and began to run. Mr. Ryan was pinned beneath the harrow and was dragged two acres before the horses stopped. His plight was first noticed by a neighbour, Patrick Spence, who removed Mr. Ryan from under the harrow and called Blair's ambulance from Perth.

Mr. Ryan was rushed to the hospital, where he died half an hour later. His only apparent injuries were a broken right leg, broken knee cap and a severe abrasion on his right side. It is believed he suffered from internal injuries which hastened his death.

Not Satisfied With Milk Prices

Carp Review.—Representatives of the Ottawa Valley Milk Producers' Association last week rejected the offer of the city distributors to pay during April $1.86 a hundred pounds for 3.4 grade milk. The dairy farmers had asked $2.00 a hundred for April and May, which was a drop of 16 cents from the price paid during the winter months.

The producers consider there was too great a spread between the price paid to them and the price asked the consumer for bottled milk. The producers receive only $1.86 while they say the dairies receive $4.40 per hundred for the bottled milk.

The meeting broke up without any agreement being made or any definite arrangement reached. It is expected another meeting will shortly be held.

Many Accidents At Cornwall

Cigarette Burns Serious.

Joseph Roy, 54, Lennox street, Cornwall, is in Cornwall General hospital suffering from severe burns on the arms and body which he received when he fell asleep while smoking a cigarette.

Injured in Freight Yard.

When she was pinned between a yard freight and an unloading platform at the C. N. R. station Saturday evening, Hilda Michaud, 14, of 124 Eight street East, received injuries to her right arm which necessitated her removal to Hotel Dieu hospital.

Three Hurt in Auto Accident.

Hugh Scott and Donat Primeau, of Cornwall, are in Hotel Dieu hospital, suffering with severe injuries received in an automobile accident, which occurred on the King's highway at Gray's Creek, about four miles east of Cornwall at noon, Sunday. Ernest Guay, a third member of the party, was only slightly injured.

Young Rural Women To Hold Conference

Young women of rural districts will be gathering at the Agricultural College, Guelph, on May 19th, for a girls' conference lasting three days. Already more than 125 young ladies have made application to attend, it has been learned from George A. Putnam, superintendent of the Institutes Branch, Ontario Department of Agriculture. Accommodation is available for 250, and it is expected that practically that number will attend. The invitation has been extended to all young women over 16 and unmarried. A number of Women's Istitutes are aiding in sending girls.

During their conference the members of the party will live in the college residence. The programme that is being prepared with the co-operation of President Christie and Miss Cruikshank will give opportunity for the girls to discuss the best interests of their local organizations. It will have the two-fold aspect of self-improvement and service to others. Housing, clothing and nutrition specialists will speak, and others will lead in consideration of social life and community betterment.

Farmers Are Hostile

Peterboro, Ont., April 17.—Police protection has been granted the Hydro Electrict Power Commission's survey party working in this county. The party is at present surveying in the township of Otonabee where a third power line will pass through from the Ottawa River to Toronto. The hostility of the farmers against having a third line pass over their farms caused the surveyors to seek police protection. Provincial Constable David Sylvester has been detailed to protect the surveyors.

Several farmers have declared they would fight rather than let the party on their lands.

Our Ottawa Letter

OTTAWA, APRIL 22.—A cut of $37,000,000 in estimated expenditures for the current fiscal year reflects the long weeks of study and of paring practiced by the Bennet ministry. When it is considered that not more than 25 per cent of total expenditures is controllable, the extent to which economy has been carried out will be appreciated. For example, the interest on Government debt to the public cannot be cut. Nor can outlay for pensions, nor for civil government. Almost all economy must be effected at the expense of public works. Naturally, therefor, there will be some disappointment on the part of communities quite convinced that new public works are their immediate right.

The situation is that falling revenues and railway deficits and fixed charges of Government leave only two courses open. One is radical advance of taxation, and the other is economy. When the budget is brought down it will perhaps indicate that even though the strictest economy consistent with maintenance of essential services has been practiced, some re-adjutment of taxation is also necessary. Customs tariffs cannot be expected to yield more because the policy of the Government is to manufacture more of our requirements in Canada. Income tax for 1931 can scarcely produce as much as in the last year and it will not be surprising if nuisance taxes, like the sales tax, will be jacked up to provide funds. The only alternative is borrowing and Premier Bennett dislikes that kind of financing. He will have recourse to it only in extremity.

* * * *

THE opening of Parliament after Easter brought the "Red Intercontributory employment insurance. There were thirty-five in the delegation "representing the unemployed of Canada." Mr. Bennett—and later Mr. King—expressed their interest in unemployment insurance but the former assured his interviewers that no Government with which he was associated would sponsor non-contributory employment insurance, nor would there be any dole. Mr. King was less emphatic. He confessed his party had never considered non-contributory insurance. A poll of the delegates showed scarcely a single native-born Canadian and most of the delegates were from Central Europe. When some spoke of "appealing to Moscow" and of Communism Mr. Bennett told them the Government might find it possible to aid them to get to the land where they might live under Communism. There was no enthusiasm.

* * * *

ONE of the most controversial items which has arisen in recent years is the re-organization of the Department of the Interior. Handing over of natural resources to the Prairie Provinces has reduced the labour of this department by probably forty per cent. There isn't any work for several hundred employees and the Government has declined to keep on the payroll that number of guests. There has been one tremendous howl about the unfairness of the treatment. Down here at Ottawa the belief exists that every one in town has a Heaven-born right to perpetual employment by the rest of the people of Canada. The Bennett Government does not subscribe to that principle. Hence the wails.

The truth of the matter is that in 1926 the King Government announced the transfer of the resources to the Prairies Provinces. For four years it toyed with the question and in those years instead of pruning down the department and taking care of employees by transfer to other departments, it actually increased the employees from 2,068 in 1926 to 2.415 in 1930. And the employees did nothing to help themselves to new jobs. After four years or more of notice the complaint is made bitterly that it is now all heartless and sudden. No city in Canada has had the steady flow of wages enjoyed by Ottawa in the current depression, wages out of the taxes of all Canada, and now, when the Government refuses to spend public money where there is no work to be done the old town squeals like a stuck pig. In fact the town is squealing a lot more than the men and woment affected.

* * * *

A FEW MONTHS AGO the Government announced that after March 31 the fleet of private motor cars maintained for Ministers and officials would be disposed of. The bill last year for these cars was some $550,000 exclusive of gasoline and oil. The latter probably cost another $200,00 a year. Against this expenditure the Government now proposes to allow $42,000 in lieu of cars. Here is a net saving to the country of probably $700,000 a year.

Lutheran Church Sends Call

The Lutheran Church at Morrisburg, known as the oldest Protestant congregation in Ontario, has extended a call to Rev. W. A. Mehlenbacher who has been pastor of St. Paul's Lutheran church at Guelph for four years.

JOE BING, he cut ten cord o' wood
From rise to set o' sun;
He cut it, an' he piled it, too,
Yes, sir, that's w'at he done!
To cut ten cords o' wood, I vow
Is one tremendous chore—
Joe Bing cut his behind the stove
In Luscumb's grocery store.

Joe Bing, he cut eight loads o' hay,
I swan, an' raked it, too,
An' in twelve hours by the clock
He was entirely through.
He could, I guess, before he slept
Cut jes' as many more—
He cut it where he did the wood,
In Luscumb's grocery store.

Joe Bing, he ploughed four acres onct
He ploughed it good an' neat,
An' 'fore the sun had near gone down
The job was all complete.
The hosses never turned a hair,
Wa'n't tired, ner least bit sore,
He ploughed it all in one short day,
In Luscumb's grocery store.

Joe Bing, he made five dollars onct
By simply pickin' oops;
He done it all in jes' a day
With time for several stops!
He could as well a-kept it up
A dozen days or more!
Where was it done? The same old place—
In Luscomb's grocery store.

"How is your boy getting along at college?"

"He seems to have learned one thing, all right."

"What is that?"

"That it would be a disgrace for his father to die rich."

Mrs. Robert McMonagle, an old resident of Berwick village, passed away on Sunday last at the advanced age of 87 years.

Huge Wheat Movement

Opening of navigation on the St. Lawrence river has brought about the anticipated grain movement and indications are that within the next six weeks 15,000,000 bushels of grain will have been taken out of the port of Montreal. This will include the 11,000,000 bushels now in the elevators, and additional shipments that will come down from lake ports with the opening of canal navigation.

Elevator and Mill At Tweed Razed

Tweed, April 22.—An elevator and mill owned by the Tweed Milling Company here were destroyed by fire today. The fire broke out in the top storey of the elevator and burned fiercely, gutting the buildings. No estimate of the damage could be made tonight, but it was understood that the loss was covered by insurance. Overheated pulley is believed to have been the cause of the fire.

WHAT IS NEWS?

Port Elgin Times.

ONE CHIEF REASON the city newspaperman can "print all the news that is fit to print" is because he does not have to live in close daily association with his victims as does the country paperman. Another reason is he has no opportunities for close-up views of results of prying into intimate personal affairs and laying them bare to public gaze. It is no excuse to say the public demands such things. All of us want to know lots of things that are none of our business.

Services at the United church Sunday at 11 a.m., with Sunday School at ten a.m. There will be no evening service.

Ontario to Test Crossing Warning

Windsor, April 20.—A device to warn motorists and other users of highways that they are approaching a railway crossing, invented by W. J. Hyatt, of Windsor, is to be given a trial by the Ontario Department of Highways.

The device, which is of steel plates, is built into the pavement, and is so arranged that occupants of a motor car will think that the car is falling to pieces when they cross the alarm. The noise is similar to, but much louder than, that produced by the old plank bridges.

Mr. Hyatt has been advised by Premier George S. Henry, Minister of Highways, that a trial installation is to be made near Ridgetown. Patents in Canada and the United States have been secured by Mr. Hyatt, who is president of the Hyatt-Jumbo Roofing Company.

Goldfield

Miss Margaret Nephew, R.N., returned to Montreal after spending a few weeks at her home here.

Miss Maude Hummel, of Chesterville, spent a few days the guest of Mrs. A. P. MacLean.

Mr. Erroll Nephew, who has been attending college at Guelph, is home.

Mrs. Sarah Annable visited the Misses M. and K. Gillies, Finch, during the week end.

Mr. and Mrs. Wm. Robinson, of Moose Creek, visited at the home of Mr. and Mrs. John Nephew recently.

Mrs. John Beehler, of Connaught, visited her parents, Mr. and Mrs. Pat Foley, one day last week.

Miss Mina Marcellus, of Dunbar, visited at the home of Mrs. C. Gillies one day this week.

Mr. and Mrs. Dennis McMahon and family visited relatives in Connaught on Sunday.

A number of the ladies attended the shower on Tuesday afternoon at the home of Mrs. S. B. Casselman in honour of Miss Blanche Casselman, who is to be married at an early date.

Mr. and Mrs. John McMillan, of Avonmore, visited Mr. and Mrs. C. F. Warner one evening this week.

CARD OF THANKS

I wish to extend my heariest thanks to all those friends and neighbours who worked so hard to save my property from fire last week.

—Chas. McMillan.

Notice to Creditors

IN THE MATTER of the estate of THOMAS McGREGOR, late of the Township of Winchester, in the County of Dundas, farmer, deceased.

NOTICE is hereby given, pursuant to Section 51 of THE TRUSTEES ACT, R. S. O., 1927, Chapter 150, that all creditors and others having claims or demands against the estate of the said THOMAS McGREGOR, who died on or about the 28th day of DECEMBER, A. D., 1929, are required, on or before the 30th day of APRIL, 1931, to send by post, prepaid, or deliver to COLIN A. McGREGOR, Morewood, Ont., the Administrator of the estate of the said deceased, their Christian names and surnames, addresses and descriptions, the full particulars, in writing, of their claims, a statement of their account and the nature of the security, if any, held by them.

AND TAKE NOTICE that after such last mentioned date the said Administrator will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and that the said Administrator will not be liable for the said assets or any part thereof to any person or persons of whose claims notice shall have not been received by him at the time of such distribution.

DATED this 9th day of APRIL, A. D., 1931.

W. B. LAWSON,
Chesterville, Ontario.
Solicitor for the Administrator.

OPPORTUNITY !

According to a questionaire sent out by the Dept. of Agriculture there is goinig to be anenormous decrease in the number of chicks raised in Canada this year. This, together with the fact that we have a high tariff against foreign eggs, can mean only one thing —"Sky high prices for poultry and eggs ext fall and winter."

Now is the time you will have to decide if you are going tohave a flock of pullets to go in your laying house this fall. In a very short time it will be too late to take advantage of this opportunity to cash in on the high poultry and egg prices that, under the circumstances, are sure to prevail later in the season. Chicks must be started not later than April or May to make good winter layers. It is going to cost less to produce pullets this year than it ever did. Feed prices are low and we have made a substantial reduction in the prices of chicks.

Following are our prices on both Single Com W. Leghorns and Barred Plymouth Rocks.

Up to and Including	April 15th and April 22nd	April 29 and May 6th	May 13th and May 20th	May 27th and June 3rd	June 10th and June 17th
100	$ 16.00	$ 15.00	$ 14.00	$ 13.00	$ 12.00
500	12.00	70.00	65.00	60.00	55.00
1000	140.00	130.00	120.00	110.00	100.00

A limited number of week and two week old chicks at reasonable prices.

A few second hand incubators in hot air, hot water and all electric, at bargain prices.

A supply of brooder stoves, feeders, waterers, leg bands, water thermostats, incubator thermometers, etc., always on hand.

BARLEY BACON AND BEEF

Experimental Farms Note

DURING the past few years, the production of barley in Canada has increased enormously, while at the same time export demand has fallen off almost completely. The suitability of this crop to a wide variety of soil and climatic conditions, its freedom from disease and pests (for the corn borer it has no fears), together with its heavy yielding qualities, have combined to make it a desirable crop to grow in Canada, just as corn is a desirable crop to grow in certain sections of the United States. One difference is that whereas the United States corn belt is limited in area, the barley belt in Canada knows no bounds, consequently we may confidently expect to have "barley to burn" for a few years to come. This is a heartening prospect national" to Ottawa to demand nonif for no other reason than to demonstrate to Canadian feeders that we do not have to depend on Argentine and American corn.

With no export demand for barley in its raw state, the situation would be a sorry one indeed were it not that we have in Canada the facilities for manufacturing this crop into two very staple commodities, namely, bacon and beef, commodities that are in demand both at home and on the export market had we an exportable surplus. It is true that these commodities are not bringing the high prices that they once did but when the market value of barley is compared to the price that can be obtained for it by feeding it to hogs and beef cattle, it will be seen that the feeding of barley to hogs and cattle is a profitable way out.

It is a fortunate fact that barley is admirably suited to these two classes of stock. As a hog feed, it may be used in limited quantities in the growing ration and up to at least fifty per cent in the fattening ration. with the assurance that it will develop an entirely satisfactory class of bacon which is something that can not be said with the same degree of assurance concerning the feeding of corn in similar quantities. As a feed for beef cattle, barley is undoubtedly the best of our Canadian-grown coarse grains. Properly balanced by cheap-home-grown leguminous roughages, barley can be used in almost any proportion of the grain ration up to one hundred per cent with excellent results. It is not too much to expect that the increased use of barley and other coarse grains, while at their present low price level, will make for a much better quality of beef being marketed, which, in turn, will help to create a demand for more beef for the future.

For further notes on the use of barley in live stock feeding, write the Publications Branch, Department of Agriculture, Ottawa, for Pamphlet No. 127, "The Greater Use of Barley in Live Stock Feeding," and Pamphlet No. 128, "Canadian Grown Grains in Poultry Feeding."

WOOL SHORN, WOVEN, AND SUIT DONNED SAME DAY

AT 6.30 a.m. one day a man placed six sheep in the hands of shearers. They were shorn, and the wool was prepared, spun, woven and made up. At 12.58 p.m. the same day a man donned the suit of clothes made from that wool.

"And that's an American record," Sir Malcolm Campbell, the world's fastest motorist, told the Bradford Rotary Club. "although made in 1898 by a Bradford man who had emigrated to the United States. It's up to you to beat it."

Health Service

Prepared by the Canadian Medical Association.

COMMUNICABLE DISEASES

The communicable diseases are so named because they have certain characteristics in common, the most outstanding and important being that they are all spread from one person to another.

Communicable diseases are caused by living agents called bacteria, parasites or disease germs. Each disease has its particular germ. The germ of diphtheria never causes any disease except diphtheria, and so it is with others in the group.

The germs are usually passed directly from one person to another. Most of the communicable diseases from which we suffer in this country are spread in this manner. The germs leave the body in the secretions of nose, mouth and throat. In the acts of coughing, sneezing, expectorating or loud talking, these secretions are thrown out into the surrounding air, into the faces of persons who are nearby and who receive the germs in this way.

It is obvious that we should cough and sneeze only into a handkerchief, and that we should not talk directly into another person's face.

The saliva is, of course, deposited on all eating and drinking utensils which are placed in the mouth or which come into contact with the lips. If these utensils are used by another person before they have been cleansed, that person takes into his mouth the first individual's saliva, which may contain the germs of disease.

That is why it is unsafe to use common eating an drinking utensils, the common drinking-cup constituting a very real danger. It is also why dishes should be thoroughly washed after use and why there are laws requiring the sterilization of dishes in public eating-places.

You may agree that such care is reasonable, providing some person in the home is ill and that it appears sensible to be careful outside the home, but you are apt to feel, when everyone in the home is apparently well, that no particular care is necessary; that it is quite all right for everyone to use the common cup at the sink when drinking between meals.

The reason why this is not all right and why you need to take care at all time is, first of all, because it is only by remembering to be careful always, that you continue to do so when this is necessary. The second reason is that it is not possible to tell which persons have disease germs in their noses and throats. The germ is, of course, present in those suffering of the disease caused by that particular germ, but germs may also be present in persons who have recovered, and in the case of some diseases, even when the person has not been ill.

The spread of communicable diseases may, to some extent, be arrested by the control of coughs, sneezes and expectoration, and by the avoidance of common eating and drinking utensils.

Questions concerning Health, addressed to the Canadian Medical Association, 14 College Street, Toronto, will be answered personally by letter.

BITES FROM THE BACKYARD

"WELL, Ed, the whistle didn't blow," remarked Mrs. Carroll, lifting the corner of her apron to her right eye and turning toward her front door.

Ed. Carroll stood with legs spread, on the front porch of his modest home and spat out six short, crisp words. Each may be found in the most ethical and refined of dictionaries, but not even the most hectic of modern fictionists would dare submit the group as used by Ed. Carroll, to his printer.

"Six days' work this month," added the husky mechanic, "and to-day's the sixteenth. Ain't that something?"

He did not follow his wife inside. Tears always annoyed him, even though he realized they solicited pity rather than anger. Anyway, he had exhausted his comforting phrases long ago. The year 1929 had seen to that, so in 1930 he found himself sulking and brooding over what he could do to make that table of his look more like the heavily-laden piece of furniture of which he had been so proud when work was steady.

He had painted his home—with paint deposited in the cellar when times were better. He had placed new gravel on his walk. His fence had been repaired until it looked like new. Little odd jobs around the home that had been begging attention for years had all been taken care of.

He glanced at his home affectionately and then allowed his eyes to rove down the stretch of one hundred and fifty feet of vacant ground in the rear. Not quite vacant, of course! Mary had two or three pet rose bushes there, and the children had the ruins Easter bunnies had outgrown the cellar. Near the kitchen window there was a lilac bush, with a honeysuckle vine fighting for nourishment in the same spot of earth.

"Not a thing to-day, either at the factory or at home," he muttered—and then the happy thought struck him.

Why not plant that little plot of earth? He had plenty of spare time, considerable spare ground, and loads of ambition. Why not get a few seeds, hunt out the old garden fork and hoe, and turn those square feet of soil into square meals?

Suggesting the idea to Mary, he found her to be one hundred per cent in its favour.

"Fresh peas!" she exclaimed. "Think of them, right from our own garden with a bit of morning dew clinging to each pod! And some corn, perhaps Golden Bantam!"

"And a bed of lettuce near the bunny house, with radishes over there, and tomato plants running in a double row along the south fence!"

Ed. Carroll was enthused, and with him, enthusiasm meant action. Before the sun set that night, three-fourths of his garden had been spaded. Before the week had passed, those seeds that called for early planting had already begun to germinate in Mother Earth.

The entire garden was planted before his work became steady again, but the days were then long enough so that he delighted in a half hour with the hoe after dinner was over or sometimes before it was ready.

More fresh vegetables appeared upon the Carroll's table that summer than had ever appeared before. More roses blossomed in the cheeks of the Carroll kiddies than had ever blossomed before.

All in all it was an excellent idea—so excellent that fully a dozen of the Carroll neighbours determined to adopt a similar use of spare time next spring.

CUT YOURSELF A PIECE OF GLASS

SOME TIME when you have a good heavy pair of shears and a piece of sheet glass, try this experiment. Put enough water in a dish pan or wash tub so that you can have your glass, shears, and hands completely immersed. Then by holding the glass firmly in the left hand you can take the shears in the right and cut the glass in a straight line. This makes an interesting little trick and may be done with a small piece of glass in a small dish of water.

GALLOPING DOMINIOES RATTLE OUT REQUIEM

BARTESVILLE, Okla., April 20.—Toots Champ, 60, negro, squatted on his haunches and talked to a pair of "galloping dominoes."

He rattled the dice, blew gently and addressed them:

"I never did make a four, and I expect if I did I'd drop dead. Wham!" And he rolled them.

Two deuces turned up.

Toots reached for the stake, and dropped dead.

A lady visitor to an institute for the deaf and dumb had plied the official who was showing her around with so many questions that he was thoroughly weary, when she inquired, "How do you summon the poor mutes to church?" "By ringing the dumb-bells, madam!' he replied.

"They are lovely. Never had chicks like them before. They actually look weeks older than they are—thanks to Blatchford's. ***Now I wish we had used Blatchford's last year."*** **—(*Claremont, Ont., March 20, 1931.*)**

It costs only 1½ to 2½ cents to raise a chick 30 days on

Blatchford's Chick Mash

That's only 12 to 15 cents to raise a chick to 3 months — and Blatchford's builds a real foundation for a life of heavy egg-production.

No other mash costs so little as Blatchford's when figured out on the basis of the actual number of chicks raised in good health.

—

There is None just as good. Be sure to ask for Blatchford's

THE CERTIFIED SAFE CHICK-MASH Blatchford's EXCLUSIVE PROCESS

Protect your investment, avoid losing your chicks—by feeding—

Blatchford's Chick Mash

It provides plenty of all the elements needed to build all parts of the body, strongly and rapidly; ensures the best of health and supplies surplus vitality to resist disease.

—

Also Blatchford's All-in-One Chick Mash

A balanced All-Mash ration—No grain required

—

And Blatchford's Battery Brooder Mash

Especially prepared for Feeding in Battery Brooders

Here are a few of the uses of Gyproc

GYPROC fireproof wallboard is manufactured from gypsum rock. It comes in sheets that are 4 to 10 feet long, 4 feet wide and ⅜ of an inch thick. It costs little, nails and cuts like lumber, has structural strength and insulation value. It is Canada's premier material for lining all interior walls, ceilings and partitions. Ask your dealer for a Gyproc direction sheet, it gives full details.

Store ceilings	Rest rooms	Poultry houses
Basements	Offices	Farm offices
Warehouses	Partitions	Harness rooms
Barns	Garages	Sheathing
Attic rooms	Under cornice	Ceilings
Fruit cellars	Dairies	Walls
Making old rooms new	Summer cottages	Sun porches
Store windows	Factories	Covering old plaster
Dressing rooms	Kitchens	Picture theatres

When Ole Laughed

"THEY called him the Swink," was the way the old engineer, Chan Capper, began as he tilted his chair back against the wall beside the stove in the junction lunch room and looked across at me in the dim lamplight to see if I were properly attentive. "Nobody knows why unless it was a twist of Swede. Ole Anderson probably was a Swede, though I never knew.

"He was a broad-faced, blue-eyed fellow when he first turned up at the roundhouse and went to work. He wasn't much more than a boy, either, though he had shoulders under his coat that would make you think of a bale of cordage, and a chest that arched like the hoops of a barrel.

"He was almost always laughing. He laughed when the boys jollied him; he laughed when he came on for work in the black cold of a bitter winter morning; he laughed when he turned out to go home at night. I've seen him laugh when he was pulled out of his bed at two o'clock in the morning to go extra with a wrecking gang down the line to clear up a freight spill. I saw him laugh when a big lump of coal fell on his hand and took most of the flesh clean off from wrist to knuckles; that was when he got firing for me of course. And then once I saw him laugh in the teeth of the nastiest situation any man need face, and that's what I'm going to tell you about.

"I guess the only times he ever looked serious were when anyone was really civil to him. He always laughed when others made game of him, and it was only by watching for some time that I finally learned that the laugh was nothing more or less than the flash of his courage when he felt hurt, physically or mental. And when I had learned that I began to warm up towards him.

"Our old master mechanic at the north shore shops, Sam Brittle, came into the roundhouse one night in the midst of a sort of general baiting of the Swink. I could see that Sam didn't like it, and it made me feel kind of ashamed of myself for taking part in it. 'It ain't very kind, is it?' I said to the old man.

"'Kind?' he retorted. 'No. But don't talk to me about being kind to anybody. You just be fair. When the world was made there weren't any high spots built for you and me to stand on and hand down kindness to anybody. Every man that's sane has got a reason for what he does, and if he does it wrong there's a mistake somewhere. Give him a chance to get in right and you won't need to be kind. I hate that smug word!'

"It was only a few days afterwards when Eddie Carter quit and I had to have a new fireman. I asked for Swink as a sort of penance, I guess, and I got him. There were a lot of surprised wipers at the roundhouse too, for my run is one of the best on the system, and any of them would have liked to have got on with me. But Ole—well, all I can say is that he just didn't laugh. It was one of the times his wide white face was serious; and he began work without any talk at all.

"What kind of fireman was he? Well, he was what most people would call stupid, but he never forgot a thing he learned; he did what he was told, and—well, we ran all that winter together.

"It was along towards spring that the thing happened that makes this a story. You know my run is south and east of the city, and the road is elevated all the way in from the limits, with bridges over the streets. It's our right of way, but half a dozen other roads use it, and there are a good many trains to handle, going and coming. You can imagine I had a task to teach that boy what he had to know about signals and the ways of doing things. But we managed, running in and out through that Chiese puzzle of tracks in the yards and on the viaduct in all kinds of weather and between us we made out not to miss any signals that mattered. Ole learned slowly, and nobody got a chance to tease him now.

"One morning we pulled out from the down-town train shed with eight heavy vestibuled coaches behind us, with a March snow doing its best to turn early daylight into something like mud, and five minutes late to start. We ran slowly up through the yards, trying to peer out through an atmosphere in which an engine headlight looks a spot of dirty yellow, and switch lights—well, like drowned fireflies, say.

"It was ticklish enough, even though we knew that ours was the most important train moving and had right of way over everything, and that the dispatcher was looking out for us as he would for his own life—or more so. Old number ninety-one—that's the engine I had then—wasn't steaming very well, and Ole's big shoulders were heaving busily as soon as we were out of the shed. He was up on his seat very little in the down-town district, and I had no help from his eyes. But, curiously enough, it wasn't down in the yards in the dark where our crash came. It was after we had run out of the heaviest of the smoke and were nearing one of the important outlying street stations that would be almost our last stop before we broke into our fast run into the open country that we came to grief.

"It was awfully sudden; such things are always sudden of course. I had just pushed the throttle home and had my left hand on the 'air' because I was leaning out of my side window to see better for the stop when we ran out on the steel bridge over the thoroughfare. And I shall never forget how all at once without any warning a great red target-like object pushed itself out of the storm ahead and seemed to be leaping towards our pilot. I guess I was seconds recognizing the huge, round thing as a tank car, though it couldn't have been many seconds from the time I saw it till we struck. At any rate when I jammed on the 'air' and felt the check of the brakes I was not sure what it was.

"Have you any idea what happens in an engine cab when there's a head-on collision? I'll tell you. The coal in the tender rises out of its bed and leaps into the cab, and if you haven't jumped and happen to be up on the seat, it hit's you in the back and pins you against the ledge or the boiler head as it happens and holds you there. Sometimes it breaks your spine. It didn't quite break mine, but it caught me leaning out of the cab, and it packed in round me so tight that I couldn't move my legs or left arm and it was so heavy against me that I thought the window casing would cut into my breast.

"The oil tank that we struck—or that struck us, for it was being backed in on the main track through some crazy error—was travelling at a merry clip. When it hit our pilot it jumped as if it were playing a game of giant leapfrog. The jar and smash were awful, and the grinding shriek of metal on metal as that steel tank raked the top of our boiler, coming straight for my head, will be one of the sounds that will stay with me the rest of my railroading days. And when we stopped dead in the middle of the bridge the nearest end of the tank was almost over the cab.

"It was just the busy hour of the morning when everyone was going to work, and the street below was full of people. The gray tops of cars were sliding down under the bridge or slipping suddenly out, with whirring trolleys banging and flashing across wire connections. Automobiles with wet, glistening roofs were rushing up and down the snowy incline of the depressed way. Figures of people on the pavements were black through the falling snow. Lights in the shop windows were pale in the growing day.

"I saw it all in a glance, as I had seen it scores of times before, but with the first throbs of deep pain turning me a bit faint and blurring the vision a little. A sharp point of coal was digging into my back just below the shoulder blade. My left arm was bent so that I feared it would break at the elbow. And there I hung and looked out and down over the broad, rivetted truss of the bridge—a helpless thing pinched in the trap that always has its jaws open for engine men. Unless Ole was caught, I was probably the only victim. He had been standing in the gangway when the crash came, and I hoped he had jumped.

"The real horror of my situation was quick to make itself plain. The first inkling of what was to be came up to me in a sudden whiff of heat that brought the smell of burning oil. The great tank had sprung a leak, and the oil was flowing out over the hot boiler and down toward the seething blaze in our fire box. In a few moments we shoud be afire, and my chance of escape looked like one in a million.

"Steam was hissing loudly from some escape drowned most other sounds. All the space within the bridge below the tops of our drivers was misty with it, but I had not long to wait for the yellow flame. I remember the very first. It came licking up over the edge of the running board and spreading out upon its surface.

"It ran over the top of the shining pool on the board that was half snow water, but that nevertheless had enough oil in it to keep the blaze alive, and it stretched its smoking tongue out toward the cab in a way that brought fear like a chill upon me.

"I was within call of hundreds. I was directly above a thoroughfare of a great city. I might be badly, but probably was not seriously, hurt. It would not be difficult for an active man or two with scoops to release me from the coal by a few minutes of rapid work. But I had seen oil burn before, and I had seen the inactivity of a crowd of people in an emergency. I looked down and saw a hundred or more men and boys gathered in the street, looking up. I smelled the heavy odour of oil smoke and saw a murky orange colour widening under the steam down on the bed of the bridge, like a spreading stain in a fuzzy cloth. Terror made my heart leap.

"I yelled as well as I could, but with a ton or so of coal on my back, forcing my ribs into the corner of the window frame, and with the steam roaring like a big waterfall, I couldn't make any intelligible words reach the street. I howled at that gaping crowd and saw men point and stare back at me. I beckoned with my free hand and pointed at the fire, but no one stirred.

"I didn't blame them afterwards, when I found out what was happening at that time below. The oil carried fire wherever it went. It ran into the gutters along the bridge side over the street and overflowed because of the half-melted ice in them, and it dripped and streamed fire down into all the space under me. No, it would have been a decidedly unpleasant thing to try to climb up where I was!

"Of course the street cars stopped running under the blazing viaduct and the passengers thronged out to see; and people came running from everywhere and packed in from curb to curb. And after a time there were shouts and some little pushing round as if some one had decided to help me.

"But the oil wasn't waiting. It was flowing copiously down over the boiler sheeting to meet the flames, and they were leaping up over its surface and spreading like vapour. Wherever the oil flowed they ran along with it, edging the outlines of the engine like yellow piping on black. One tiny stream had found its way along the moulding outside the cab windows and was creeping toward my breast in little fits and darts, like a drop sliding on a rain-wet window-pane. There was spray too as the fire rose,—an amber spatter that came from some place where an oil stream was spouting away from the boiler,—and it sprinkled the top of the truss just under me and took the flames there till the steel seemed to be burning like wood.

"I guess you'll have to imagine how I felt as the smoke closed in round me and the flames seemed to glow like coals through it. It choked my cries down to nothing. I had nearly pulled my body apart, trying to get free, and I guess I was pretty close to the place where a man goes unconscious or crazy when above the tremendous hiss of the steam and the snapping of the fire I heard a yell right behind me.

"With an effort I turned my head, and what I saw in that most awful minute of my life was the wide, white face of Ole Anderson, peering round at me from the top of the coal-choked gangway.

"Well, he dug me out, that boy did. "The coal had knocked him off the engine, and his head was cut, but he dug me out and lifted me down and over that fire-covered bridge truss, for I was choked helpless then; and he handed me to a couple of firemen who had arrived at last and set up a ladder. He tore the ligaments of his left wrist so badly that it was disfigured for life. He cut the ends of his work-hardened fingers so that he lost the nails of two. He stood on that bridge truss, with the flames leaping greedily up his legs and burning the overalls off them, and with that spray of oil sprinkling fire on his back till his whole jumper was ablaze and searing the flesh underneath. He saved my life, but it took him three months to get over it! And he carries the scars.

"I saw him in the hospital two weeks later, for I was burned some too and couldn't get out sooner. And when I told him that I owed him my life—for the firemen would not have been in time to save it—and tried to make him understand how I felt about it, all he said was:

"'Say, Meester Capper, Ay tank it was you give me the chance. Hey?'"

FAIR SEX FIGHTS FAT WITH WHEATEN DIET

ENQUIRIES among restauranteurs in several Canadian cities suggest that the fair sex has found a new and better diet to preserve the sylph-like figure. Gone is the starvation menu—the slice of toast and the glass of water. Instead, the modern miss is slimming on whole wheat—usually in prepared biscuit form—with milk and fruit added.

The enquiries which were made of restaurant owners by the Canadian Shredded Wheat Company included "Are wheat foods of all types more popular with lady customers than five years ago?" The reply was an almost unanimous "Yes" with the rider that while breakfast is still the big cereal-eating meal, whole wheaten items are becoming increasingly popular at other meals, particularly tea.

Asked for reasons for this change, many replied that waitresses reported to them that customers had decided that whole wheat, fruit and milk was a slimming, yet nourishing diet.

It is thought by the Canadian Shredded Wheat Company that the girlies' new diet has been inspired partly by advertising but more certainly by continued medical advice through various channels empasizing the complete food value of such a diet without increasing bodily weight.

Teacher: "Abie, define the word symmetry.' '

Abie: "A symmetry is where they bury dead people."

Mischief-Making caller (to new neighbour): "Of course, when a husband says he's kept late at business, you've no proof, you know."

New Neighbour: "Oh, really? Well, my husband happens to be a radio announcer."

CREAM PIES PLEASE

By Etta Bitta Pye

PLACE a generous helping of cream pie before a hungry male and you may be sure he will approve. Chocolate cream or cocoanut cream—it makes little difference to him:

Chocolate Cream Pie.

3 squares unsweetened chocolate, cut in pieces
2½ cups cold milk
4 tablespoons special cake flour sifted
1 cup sugar
½ teaspoon salt
4 egg yolks, slightly beaten
2 tablespoons butter
2 teaspoons vanilla
1 baked 9-inch pie shell
8 tablespoons sugar
4 egg whites, stiffly beaten

Add chocolate to milk, and heat in double boiler. When chocolate is melted, beat with rotary egg beater 1 minute, or until mixture is smooth and blended. Combine flour, sugar, and salt. Add to egg yolks. Pour small amount of chocolate mixture over egg mixture, stirring vigorously. Return to double boiler and cook until thickened, stirring constantly. Add butter and vanilla. Cool. Pour into pie shell and cover with meringue made by folding sugar into egg whites. Bake in slow oven (300 degrees, F.,) 12 minutes, or until delicate brown.

Cocoanut Cream Pie.

1-3 cup special cake flour, sifted
½ cup sugar
⅛ teaspoon salt
2 cups milk, scalded
2 egg yolks, well beaten
1 cup cocoanut, southern style
1 teaspoon vanilla .
1 baked 9-inch pie shell
4 tablespoons sugar
2 egg whites, stiffly beaten
½ teaspoon vanilla

Combine flour, sugar, and salt; add milk. Cook in double boiler until thickened, stirring constantly. Pour small amount of mixture over egg yolks, stirring vigourously. Return to double boiler and cook ten minutes longer. Add cocoanut and vanilla. Cool and pour into pie shell. Fold sugar into egg whites; add vanilla. Pile lighty on cocoanut filling. Bake in slow oven (300 degrees, F.) twelve minutes, or until delicate brown.

YOUR CHILDREN AND OTHER DRIVERS

IN THESE DAYS when "safety first" is trying to gain the ascendancy over "safety last," much would be gained if we could think of other children and automobiles as we think of our own.

If we would drive past other little tots as carefully as we drive past our own, and other drivers would do the same, thousands of lives would be saved each year. Unfortunately, a child to most of us is merely a little pest who insists upon running in front of our car—that is unless he is our own child. The other fellow thinks of our child as we think of his. That is why we number our deaths by thousands instead of by twos and threes.

If I remember correctly, the statistics for last year show a few more people were killed by automobile accidents than we lost in actual combat during the World War. At any rate, the number was astonishing and far too great.

Wife: "Tomorrow is the tenth anniversary of our wedding. Shall I kill the turkey?"

Tusband: "Why, the poor bird is not to blame for it."

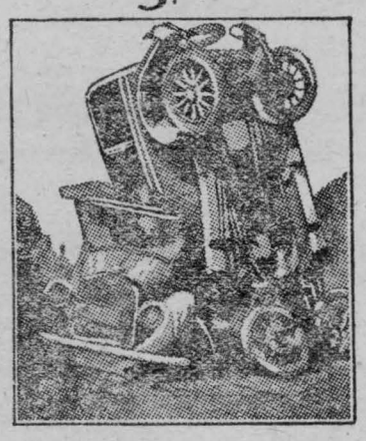
AUTOMOBILE INSURANCE

Before placing Insurance on your car, get particulars of the new plan, where you are allowed a reduction of 20 per cent from the recent reduced rates. Discount applicable to Public Liability, Property Damage and Collision Damage.

DRIVE in SAFETY



with an Automobile Insurance Policy to protect you against the hazards of Fire, Theft, Collision, Property Damage and Public Liability.

Every Automobile Owner in Ontario should know about the new Financial Responsibility Law effective since September 1st. The new law makes necessary the abi lity to pay for damage.

In its general application, it requires that the motorist responsible for damage to person or property of others MUST PAY either personally or through insurance OR BE BARRED FROM THE ROAD.

The sensible thing to do is to carry Automobile Liability and Property Damage Insurance. It is better to have this insurance and not need it, than to need it and not have it.

HAIL
LIGHTNING
FIRE
WIND

People who depend upon their crops should not be without some kind of the above insurance.

The loss of crops and barns, sometimes dwellings, is a serious matter to all farmers.

The claims paid through this office, just recently, have been large.

We aim to satisfy our policyholders, and do our utmost on their behalf.

Possibly you believe that you are carrying enough insurance. Think for a moment what a total loss would mean to you. This, as you will admit, is quite possible.

Information regarding various forms of insurance glady given, you are under no obligation whatsoever, just call or write.

Mainly About People

Mrs. Eleanor Blacklock spent the week end in Montreal.

Mr. and Mrs. W. A. Samworth, of Ottawa, spent Sunday with Mrs. I. Garrow.

Shipment of bed springs and mattresses at special low prices on sale at W. O. Dixon's. See window display.

Mrs. A. W. Reveler, of Cannamore, spent the week end with her mother, Mrs. Rhoda Fetterly, Chesterville.

Mrs. M. W. Hutt and Mrs. Stewart Smith, of Ottawa, spent a few days last week with Mr. D. G. Hutt and family.

Mr. Graham Weegar, of Queen's University, Kingston, has been spending the week with his mother, Mrs. H. W. Weegar.

Mr. J. A. Baker, Regina, Sask., is visiting his parents, Mr. and Mrs Howard Baker, Crysler, after an absence of six years.

Miss Margaret Marselis, student at Queen's University, Kingston, is visiting her parents, Mr. and Mrs. Chas. F. Marselis, Dunbar.

The Women's Institute will meet in the Library on Wednesday, April 29, at 2.30 p.m. At this meeting there will be a cup and saucer shower to replenish the stock.

Miss Pearl Swerdfeger, daughter of Mr. and Mrs. Jake Swerdfeger, Morewood, was taken to the General Hospital, Cornwall, Tuesday, where she was successfully operated on for appendicitis.

Mr. and Mrs. R. T. Good, I. L. Perrault, Mrs. A. Dempsey, of Ottawa; Mr. and Mrs. Harry Perrault, of Iroquois; Mr. and Mrs. H. Burnside, of Massena, and Mr. and Mrs. Frank Perrault, of Chesterville, were guests at the home of Mr. D. G. Hutt last Wednesday.

FLOWERS FOR MOTHERS' DAY

A truck load of potted plants, consisting of Geraniums for outdoor planting, vines and ferns, as well as fancy flowers in bloom for the home, will arrive Friday May 1st. Call and see them. Prices right.—W. O. Dixon.

Clean-Up Day Next Wednesday

The Village Council has selected Wednesday, April 29th, as Public Clean-up Day. Citizens are requested to make a thorough clean-up of their premises and the street side along their properties in advance of the 29th if convenient, in order that removal of rubbish by public conveyance may begin in the forenoon. The Township Council has warned the Village Council against depositing decayed vegetable matter or other offensive refuse on the village dump and no such matter will be removed. Kindly place refuse convenient to roadside and, if possible, put same in bags, boxes or barrels, also notify some member of the Council in case refuse should be overlooked.

—By Order of Council.

IN MEMORIAM

Munro—In loving memory of our darling baby Elburn Carson, who passed away two years ago on April 22nd, 1929.

Peacefully sleeping, rest at last,
The world's weary trouble and trials are past.
In silence he suffered, in patience he bore.
Till God called him home to suffer no more.

Inserted by Mr. and Mrs. Calvin S. Munro and Family.

IN MEMORIAM

Fraser—In loving memory of the late Frank Fraser, who passed away April 28th, 1928.

One year has passed since that sad day
God called the one we loved away;
Forget him, no, we never will,
As years roll by we love him still.
One of the best whom God could send,
A loving Father, a faithful friend;
We miss him and mourn him in silence unseen,
And dwell in memory of days that have been.
Dear is the grave where he is laid,
Sweet is the memory that never shall fade,
Loved and respected, one of the best,
May he be granted eternal rest.

—Wife and Son.

Beautiful Modern Daughter: "Well, Mother, I proposed to Jim myself tonight."

Her Mother: "You must be mad, Edith!"

Daughter: "Youre darned right I am! He turned me down."

An inspector, examining a class in religious knowledge, asked the following question of a little girl, intending it for a catch: "What was the difference between Noah's Ark and Joan of Arc?"

He was not a little surprised when the child, answering, said: "Noah's Ark was made of wood and Joan of Arc was Maid of Orleans."

"We keep down expenses with Shredded Wheat"

"I've found one way of getting better breakfasts for less money. I serve Shredded Wheat. I don't know anything else that gives so much nourishment and costs so little. It's so easy to digest that every one likes it, too—especially when I cover it with fresh fruit. Shredded Wheat is whole wheat, and with milk it contains every food element we need for growth and good health."
