Our Column

A western paper reports the marriage of William Winter and Alberta Snow. What a matrimonial Fall there will be in the Spring.

Major J. H. Doolittle, U. S. speed flyer, flew his plane from New York to Ottawa in one hour and 48 minutes on Sunday last. This is a speedy age all right.

Observers say that bees are preparing for a long and cold winter. So are many householders, and they are taking chances with the bees that they may be wrong.

The Kid: "Pop, how soon will I be old enough to do as I please?"
The Old Man: "I don't know. Nobody has ever lived that long yet."

A tourist stopped his car on the road and asked a little country boy how far it was to Bunkville. The little boy replied, "It's 24,996 miles the way you're going, but if you turn 'round, it ain't but four."

Butter production in Canada for the first seven months of 1931 increased 25,379,726 pounds or 15.5 per cent. over the production for the first seven months of 1930. Exports of butter from January 1 to July 31, 1931, amounted to 5,149,600 pounds, or nearly 4,000,000 pounds more than the exports in the corresponding period last year.

SENDS PROTEST

The executive of the local High School Athletic Association have sent in a protest to the governors of the Meikle Cup Meet held at Cornwall a few days ago. The boys have good grounds to protest on and if a fair decision is reached, the Meikle Cup should rest in Winchester till next year.

48th Anniversary of Winchester United.

Services are Well Attended. Rev. Dr. McIntosh, Pembroke, was Special Preacher. Splendid Program Monday Evening.

(Contributed)

Unusually large congregations attended the 48th anniversary of the erection of this beautiful stone edifice. At the evening service the friends of the Presbyterian and Baptist Churches were present with their pastors, who assisted in the service.

The front of the pulpit was beautifully decorated with red geraniums, salvia and ferns, while autumn tinted leaves adorned the choir rail.

Everyone present was impressed by the splendid sermons of Rev. Geo. McIntosh, D. D., of Pembroke, who was a former Winchester boy. His morning subject, "The Church and the World," was dealt with from Matt. 13:33. He said this parable showed that our Lord was interested primarily in quality rather than quantity. The leaven was small but vitally active. The Christians are to be a creative minority, the salt of the earth, the light of the world. Only as there are more Christians like this will power return to the Church of God. The Kingdom of Heaven is like leaven in the world to-day. The true church is a group of men and women who have a vital experience of God and a living faith in Christ.

The seating capacity of the Church was taxed to accommodate the evening congregation, when Dr. McIntosh spoke on the steadying influence needed in this confusing time, taking a text from Matt. 9, where Jesus was moved with compassion when he saw the troubled people about him, like sheep without a shepherd. He said every man is to blame for his own troubles. We need steadiness in regard to the morals of our time. In reference to modern sins he said, "Pull yourselves together morally." There is a great battle between filth and decency. It is an old fight that has been waged for centuries. He urged his hearers to pull together religiously against the currents of our day. When the confusions of this day seem as though they would upset our faith, we are to look to Christ and doubt Him not, and find life at its best. The choir, under the leadership of the organist, Miss Helen Smith, made a very fine contribution, both in the leading of praise and in the rendition of a special number at each service. They were assisted by Mr. Harry McKercher of Toronto and Mrs. Ross McMillan of Avonmore. The former sang "The Stranger of Galilee," "That Sweet Story of Old," and "I came to Jesus," "Some Sweet Day" and the latter, "Abide With Me." These solos were all most effectively rendered.

Next Sunday Rev. L. H. Fisher of Western United Church, Ottawa, will preach.

On Monday evening the Annual Anniversary supper was provided by the ladies of the Church. For three hours those in charge of the tables were kept busy serving the large number present. Following the supper a splendid program was given in the auditorium of the Church, Rev. J. A. Waddell, pastor of the Church, ably filling the position of Chairman. Besides an opening anthem by the choir, several solos were given by Mr. Harry McKercher. The hearty applause of the large audience was evident of their enjoyment of these musical numbers. Greetings were brought from St. Matthias' Church by Rev. G. O. Davies, from St. Paul's by Rev W. D. Turner, from Chesterville United by Rev. R. Newman, from Williamsburg by Rev. A. M. Russell, and from Morewood by Rev. R. W. Armstrong.

The reception committee, who met the guests at the church door, was composed of Mesdames J. A. Waddell, J. H. Faith, Edwin Baker, Edwin Beach, John Hogaboam and Frank Davidson.

Mr. J. D. Stewart gave an enjoyable reading. The speaker of the evening, Dr. Geo. A. McIntosh, after giving some reminiscences, spoke on, "Life's Philosophy." He said what makes the difference in people is the spirit in which they take the experiences that come to them. Lifes Autumn can be lovelier than its Spring. A new spirit of hope and faith was instilled into the hearts of his hearers.

At the conclusion a hearty vote of thanks, moved by Mr. A. Sweet and seconded by Mr. M. Fennell, was tendered all those who contributed to the success of this Anniversary after which all joined in singing the Doxology.

LOCAL AND GENERAL

A reception in honour of Mr. and Mrs. H. Kirton Simmons-Anderson will be held at the home of Mr. and Mrs. Harry L. Flora on Saturday, Oct. 24th, from 4 to 6 and 8 to 10 p. m. to which all friends are cordially invited to attend.

Mrs. Fred Parker will serve after-noon tea on Friday, Oct. 23rd, from 3 to 6, at her home on St. Lawrence St. Price 25c.

Died at Matilda, on Monday, Oct. 12th Henry McCaslin, in his 80th year. The funeral was held from the residence of his brother, Russell McCaslin, Concession 2, Matilda, on Wednesday Oct. 14th, to the Presbyterian Church, Iroquois. Interment was made in Point Iroquois cemetery.

Mrs Susan Meredith, one of the oldest residents of Eastern Ontario, died this week at her home in the township of Bathurst, Lanark county, at the age of 106 years. The funeral was held on Friday to the old Church of England cemetery at Perth, service being conducted at the family residence.

An expert from the staff of Dr. School, M. D., the world's most noted orthopedic authority will be at the Store of A. Sweet & Co., Winchester, on Saturday, Oct. 31. Consultation and advice free.

The funeral service of Henry McCaslin was held from the residence of his brother Russell, second concession, Matilda, where he had lived for the past year, to Knox Presbyterian church, Iroquois, of which he was a consistent member. Mr McCaslin, who was in his eightieth year had spent his life time in this locality and for some months had been in failing health.

TRAIL RANGERS ORGANIZE

The Trail Ranger group under the mentorship of Rev M. Waddell organized for the fall and winter term by electing the following officers at a recent meeting: Past Chief Ranger, Sam Ault; Chief Ranger, Bruce Armstrong; Assistant Chief Ranger, George Utman; Tally, Lloyd Dixon; Cash, Sam Ault.

The boys are facing their new work in a spirit of enthusiasm and hope to make a good showing this term. They expect to have several of the prominent business men of the community speak to them on topics appropriate to their needs and relating to the times.

"THE CHALLENGE OF THE KINGDOM"

A notice bearing the above heading has just been issued under the auspices of the Dundas-Grenville Presbytery of the United Church. A series of group meetings has been arranged and will be held in these two counties during the coming week. Rev. J. C. Steed of Africa and Rev. H. L. Morrison of Kemptville will bring challenging messages. During these services the newly organized ministerial octette of the Presbytery will lead in the service of song and contribute several suitable numbers to the program. The services will be held beginning Monday, Oct. 26th, at the following points: Merrickville, Spencerville, Morrisburg, Cardinal and Winchester. The closing service will be held in the local United Church on Friday, Oct. 30th, at 8 o'clock. It is expected that representatives from Morewood, Chesterville, Elma Winchester Springs, Mountain and Hallville will participate in this special gathering on Friday, Oct 30th.

Valuable Barns Burned

Forty Head of Cattle, Horses, Etc. Are Also Consumed In Flames.

One of the finest farm barns in the United Counties, built less than two years, together with the season's crop, forty head of high grade cattle, thirty-six of which were purebred, four fine farm horses, together with a large quantity of harness, machinery, tools and other farm implements, were completely destroyed by fire on Tuesday morning about three o'clock, on the premises of Mr. Floyd Riddell, about three miles west of Winchester. How the fire started is a complete mystery. Mr. and Mrs. Riddell retired early on Monday night. Wm. Brown, who worked on the Riddell farm, had been to Winchester Monday evening and returned between ten and eleven o'clock. When he went in there was no sign of fire, no disturbance near the barn. Mrs. Riddell was awakened between two and three in the morning by the noise of the cattle and a bright light shining in the bedroom window, and when she and Mr. Riddell got outside they found the barn a complete mass of flames. The fire had evidently started in the west end, for when they first saw it, that end was caving in. The cattle and horses were unable to get out and were soon suffocated by the smoke and devoured by the flames. One horse did manage to get out, but it was so terribly burned that it had to be shot to put it out of suffering. Fortunately the wind was blowing from the southwest and thus the house and some sheds were saved. It was feared at one time that the flames would carry to the Walker barns about a quarter of a mile away, but a careful watch saved them. It is only two years ago that the old barn was destroyed. Mr. Riddell then erected a complete modern barn, equipped with every convenience, nicely painted inside and out, and considered one of the finest barns in the County. The loss will total between ten and twelve thousand dollars, and it is doubtful if there is any insurance recoverable. There was an insurance but it lapsed about the last of August. As Mr. and Mrs. Riddell were then working on the lake boats, the renewal was not attended to. Mr. Riddell says he mailed his check for the renewal on Saturday, but as it was not taken from the mail box, he had it brought to Winchester and mailed on Monday, and it is doubtful if the Company received it before the fire occurred. However, that is a point to be settled between the Company and Mr. Riddell. The loss is an almost disastrous one, and Mr. Riddell is stripped clean of all stock. Just what their plans are for the future, they cannot at present determine.

LOCAL AND GENERAL

The regular Communion service will be held in the United Church, Winchester, on Sunday, Nov. 1st, at 10 30 a. m.

Service will be held in St. Matthias' Church next Sunday at 7.30 p. m. and will be taken by the Rev. Cecil H. Roach, Curate of All Saints' Church, Ottawa.

Married on Oct. 10th, 1931, at Holy Trinity Church, Toronto, by Canon Walter S. Loucks, Clara Jane, daughter of the late Mr. and Mrs. A. J. Harrison, of Morrisburg Ont., to Ralph Parker, son of the late Mr. J. H. Burchnall and Mrs. Burchnall, of Rimby, Alta.

Reeve J. H. Ross and Assessor Herb Empey are in Cornwall to-day attending the Court of Revision held by Judge Costello on the equalized assessment for the Counties. All the villages in the United Counties and the town of Cornwall will come before the Judge to-day.

Hon. W. A. Gordon K. C. P. C Minister of Immigration, Colonization and Mines in the Dominion Government will be the first speaker at The Morrisburg Canadian Club on Thursday Oct. 29th. His subject will be Northern Ontario. The Banquet begins at 6.30 p. m.

After reconsideration in view of representations received from members of the parish at Iroquois, the Bishop of Ottawa has decided not to proceed with the appointment of Rev. J. L. Homer, rector of Iroquois as rector of St. James' Church, Morrisburg, and Mr. Homer will remain in Iroquois.

Rev. W. G. Brown, M. A., B. D., Moderator of the Presbyterian Church in Canada, who is visiting the Church from coast to coast will be at St. Paul's, Winchester, on Tuesday evening, the 3rd of November, and will give an address. A cordial invitation is extended to all the Presbyterians in the surrounding district as this will be the only opportunity of hearing the Moderator.

A LUCKY PURCHASE

J. Polowin, Ottawa, bought two small pictures in a second hand store for one dollar. He took them home and noticed that the back of one picture was loose. He removed the back and nearly died when he saw lying flat against the picture seven ten dollar bills. The bills dated back fully 40 years ago. It was a lucky purchase.

FIRE AT MORRISBURG

A fire, originating from some unknown cause, started in the storage department of Fetterly Limited, Morrisburg, dealers in Autos, Radios, etc. The place is a nest of frame buildings, and had a fire got good headway, much property would have been destroyed. Fortunately it was discovered before it had made much headway. The loss estimated at about $1000., is covered by insurance.

FIRE AT AVONMORE

Fire which caused damage estimated at $4,500 partly covered by insurance, destroyed the garage owned by Joseph W. Arbutnot at Avonmore this week. It is believed that the fire was started by an overheated battery charger, which was left on in the absence of the owner. The fire was first noticed about 10 o'clock by a neighbour, who happened to be passing and he turned in the alarm. The two-storey garage was burned to the ground and adjoining buildings slightly damaged.

WOMEN'S INSTITUTE

Entertain Members of Chesterville Branch at Splendid Meeting On Tuesday Afternoon. Hour of Meetings Has Been Changed.

An interesting meeting was held on Tuesday afternoon in the Town Hall when a large number of Chesterville members were entertained by the local Branch. Mrs. J. Singleton, presided in her usual capable manner. After the opening exercises, the roll call was responded to by giving the Christian name of your mother, the predominating name being Mary.

After the reading of the minutes and correspondence the necessary business was conducted. The Pres said that a full report of the selling of tickets for the Hope Chest would be given at next meeting. She urged the ticket sellers to continue their work. Mrs. J. Singleton was appointed a delegate to attend the Eastern Ontario Convention of Institutes to be held in Ottawa next week, Oct. 27th to 29th. A motion was carried to change the hour of our monthly meetings to 7 30 p. m.

The District President, Mrs. Hughes of Chesterville addressed the meeting, making suggestions about organizing new Institutes in rural districts, and also about beautifying the corners at the turns on the Highways. Mrs. O. Wallace presided during the program calling upon Mrs. Howard Fetterly for a lively piano solo, which put us in a receptive mood for the rest of the program.

The District Sec'y, Miss McGee, then spoke on a certain standard of good citizenship that has been raised by the Women's Institute. She said home should be a place of peace, where the spirit of love reigns. We can exercise our citizenship through the franchise. One great task we have to do as citizens is to Canadianize the foreigners. The important thing is what kind of a citizen we are. Critize to help and not hinder. Each one has a task. Miss McGee requested that we be optimistic in our work. Her address ought to inspire us all.

Miss Annie Walker contributed a solo, "Good-bye Summer" in her usual pleasing manner. Mrs. Fetterly was the accompanist. Miss Harrison's reading from the writings of Nina Moore Jamieson, was very enjoyable. Mrs. Cass moved a vote of thanks to Miss McGee, Mrs. Hughes and Miss Harrison for their assistance in the program. This was concurred in by all. After the singing of the National Anthem, refreshments were served by a committee under the convenorship of Mrs. Faith, and a social hour was spent together.

SOCIAL AND PERSONAL

Mrs Hutt, who spent the summer away has returned home.

Mrs. J. Duncanson, of Morrisburg, was a guest of Mr. and Mrs. B. F. Smith, over the week-end.

Mrs. Percy Durant received word on Monday of the passing away of her uncle, Mr. Nelson Chester of Jasper, Ontario.

Miss Pearle Mulloy and Mrs. A. A. McLaughlin are spending a few days with the former's sister, Mrs Katherine Dickson of Waddington, N. Y.

Mr. and Mrs. Harold Woods and daughter, Jean, of Ottawa, spent the holiday with the latter's mother, Mrs. J. E. Hutt. Mrs. Woods remained over till the last of the week.

Mrs. F. A. Johnstone and little sons Douglas and Ross, of Sundridge, Ont., motored down and spent Thanksgiving week with her parents, Mr. and Mrs. G. H. Summers and other relatives.

Mr. and Mrs. Thos. Edgerton wish to announce the engagement of their only daughter, Luella, to Ewart Stephen, only son of Mr. and Mrs. H. S. Carkner, marriage to take place the latter part of October.

Mr and Mrs. Andrew N. Barkley, of Elma, announce the engagement of their daughter, Hilda Edith, to Mr. William Donald McMartin, son of Mr. and Mrs. W. T. McMartin, of Chesterville, the wedding to take place the latter part of October.

70 MILES NEW HIGHWAY

The Ontario Government has announced that 70 miles of highway, connecting Madoc in Hastings County with Perth in Lanark, will be started at once and continued throughout the winter. It will connect up a highway between Toronto and Ottawa, making the distance shorter by 47 miles. Most of it will be gravel road. The Municipality will not be taxed directly, but the cost, estimated at one million dollars, will be borne 50 50 by Federal and Provincial governments.

Simmons-Anderson—Flora

The marriage was quietly solemnized recently in Scarboro Anglican Church, Toronto, by the Rev. A. W. Donner of Marguerite Muriel, only daughter of the late Mr. and Mrs. L. Flora, of Winchester, Ont., to Harry Kirton Simmons-Anderson, only son of Mr. and Mrs. H. P. Simmons-Anderson, of "Cacrabank", Worthing, Barbadoes, British West Indies.

The bride was attended by Miss Coreto Gibson, of Toranto, and Mr. H. L. Bayley, of Barbadoes, B. W. I., was best man. They will sail shortly from Halifax, N. S., on the Lady Nelson for Barbadoes, where they will take up residence.

CONTRIBUTIONS

The Treasurer of the Muskoka Hospital for Consumptives desires gratefully to acknowledge the following contributions received in Winchester by the Field Secretary of the National Sanitarium Association:—

Dr. J. McKendry $5.00, J. D. Stewart $5 00 H. L. Lee $5 00, D. Melvin $2 00, Miss R. Stenhouse $2 00. Rev. J. A. Waddell $2 00, B. F. Smith $2.00, A. Sweet $1.00, C. R. Robinson $1.00, H. Bessin $1.00, Miss Henderson $1.00, Miss Weir $1.00, Mr M. Bailey $1.00, Dr Meredith $1 00, Oscar Pierce $100, A. H. Duncan $1.00, C. Summers $1.00, Fennell & Wallace $1.00 Sundry contributions $2.25. Total $36.25.

Mr. David C. Blow Dies At Calgary

Was Fatally Wounded From Flying Bullet While Hunting Ducks. Mr. Blow Was A Native Of South Mountain.

Mr. Martin Blow of South Mountain received the following account from a Calgary paper of the death of his cousin:

"Mr. David C. Blow was fatally shot on Saturday afternoon last, while hunting ducks, when he came in line with a second shot fired at a flock of ducks by Park Oliver, farmer, of Olds. Mr Blow was 63 years of age and was a building Contractor.

Mr. Blow and his two sons had been hunting ducks on the Oliver farm. The deceased and the farmer had been friends for more than thirty years and Mr. Blow usually visited his friend during the duck season. One of the boys had been sent to frighten the ducks out of the water toward the hunters. Blow and Oliver were crouched in the long grass close together. Each fired a shot and the birds flew around low over Blow's head when Oliver shot a second time and Blow, raising his head at the same time, received the shot in the back of his skull. The coroner was called and decided an inquest was unnecessary. Mr. and Mrs. Oliver, who are old timers in the district, are driven almost to distraction as a result of the accident.

Mr. Blow was born at South Mountain and moved to Calgary 28 years ago. He is survived by his wife and two sons, Harry and Arthur of Calgary, and one daughter, Eleanor, who is attending the University at Edmonton; also four sisters, Mrs. Chas. Robinson of South Mountain, Mrs H. Richard of Toronto, Miss S. Blow of Calgary, and Mrs. Kirkby of Calgary; one brother, Earnest, of Moose Jaw, and his step-mother, Mrs. Elizabeth Blow of Calgary.

The pall bearers were all personal friends of the late Mr. Blow: Alexander Storey W. F. Ross, H Suffell. R. Robinson, A. E. Jacques and R. G. Christie. Interment was made in Bunsland cemeterry.

ROSE—SEYMOUR

A quiet wedding was solemnized at the United Church parsonage Winchester, on Wednesday Oct. 14th, at 2 o'clock, when the Rev. John A. Waddell united in marriage Miss Kathleen Viola, eldest daughter of Mr. and Mrs W. C. Seymour, of Vancamp, and Mr. Chester Rose, of Rosehaven, son of the late Mr. and Mrs. Andrew Rose. Immediately following the ceremony, the happy couple left for Ottawa and points west on their honeymoon trip. On their return they will be at home to their friends at Rosehaven where the groom is a prosperous and progressive farmer. The bride and groom, who are well known in Winchester and throughout the surrounding community, are very highly respected, and the best wishes of their many friends are extended to them for their future happiness and success.

WITH THE LONE SCOUTS

Lone Scouting continues to grow apace in Ontario, and during the past month some thirty new members were registered at Lone Scout Headquarters.

It is gratifying also to note that this month two new Troops have been added to the growing list of Regular Scout Troops which have been formed as a direct result of Lone Scout activity. These are at Maple and at Unionville. The others are located at Paris, Killaloe, Cobalt, Sault Ste. Marie, and Beamsvill .

On October 2nd, the Lone Scout Commissioner, with Commissioner Irwin and Scoutmaster Don Hutchison, of the 1st Ont. Lone Scout Troop, journeyed to Maple to attend the special meeting and present the Charter to the new Maple Troop.

There was a splendid turnout of Scouts, and the Lonies from King also attended to add their good wishes, and after a number of interesting Scout activities, the Charter was presented in the presence of a nice gathering of interested citizens of Maple.

We wish the new Maple Troop, and their Scoutmaster, Mr. Bryan, the very best of Good Scouting.

Ontario Lone Scout will be interested to learn that a new Shoulder Tape Badge has now been issued.

This reads as follow : "Ontario Lone Scouts," and is to be worn on the right shoulder by all Lone Scouts in this province. These can be obtained from Lone Scout Headquarters for 5c each.

Fire Prevention Week

Lone Scouts are urged to put aside one week during October for special work under this heading. All over Canada this Fire Prevention Week is being observed by Scouts, and the idea is to clean up and destroy all rubbish and inflammable materi around your houses, barns and in the vicinity of your premises, and in the case of Patrols, in the Villages in which they are located.

Thus before the winter sets in, everything will be cleaned up and snug, and there will be no danger of fires starting as a result of rubbish left around, or of unt ded rubbish adding to the seriousness of any fire which might occur.

Bear this in mind, Lonies! You can do lots of "Good Turns" in this way.

Lone Scout Question Box

Is there a Special Badge for Lone Scouts?—(M.L.J., Moscow).

No special badge has yet been issued to Lone Scouts in Canada, although Imperial Headquarters in London, England, have approved of a special badge for overseas Lone Scouts, which consists of a scroll bearing the words "Lone Scout" superimposed on the Fleur de Lys. Arrangements are being made to obtain a supply of these for the use of the Lone Scouts of Ontario.

Ontario Lone Scouts may be distinguished, however, by their Mauve Neckerchief and by the special shoulder tape which is mentioned in this column.

Lonies are invited to address questions on Scouting subjects to "Lone E" at Lone Scout Headquarters, 330 Bay Street, Toronto 2.

New British Income Tax Favors Bachelors

London.—Man, letters are being received daily by British newspapers from married men, protesting that the new income tax proposals favor the single man.

Married men with children appear to be worse hit than bachelors from the standpoint of increased taxes. The so-called injustices to family men become more apparent salaries over the £3,000 mark.

The following, table of the increase in tax payabl under the new rates shows a comparison between married men with no children and bachelors:

Salary	Single Man (increase of tax)	Married Men with 2 children (increase of tax)
$3,000	$111.25	$108.12
3,500	116.85	166.12
4,000	145.85	173.25
4,500	13 .00	180.00
5,000	136.50	174.25

The Tiger Tribute

A keeper at the Belle Vue Zoological Gardens, Manchester, had a narrow escape recently when he was attacked by a tigress.

Fortunately, another keeper witnessed the attack and came to the rescue. But all those who have to do with tigers aren't so fortunate.

For instance, there was a keeper at one provincial zoo who was killed, some years ago, by an elderly tiger who suddenly got tired of seeing him about. There have been similar tragedies before, but this one is likely to be remembered for a long time, because of the tribute the dead man's colleagues sent to the funeral.

It was a life-sized figure of a tiger in arum-lilies and chrysanthemums!—Answers.

Secret Winter Resort For Ocean Fish Sought

Washington.—A secret winter resort of Atlantic coast fish is sought by the United States Bureau of Fisheries.

Large schools of mackerel, sea bass, bluefish, croaker, weakfish, scup and fluke disappear every winter from their summer residence off the shores south of New England and do not return until warm weather.

Fishermen disagree on their destination. Some believe the fish migrate off shore to deeper, warmer waters, while others believe they go south in search of warmth, following the human migration to tropical climates.

The Bureau of Fisheries is seeking to solve the problem, and R. A. Nesbit, aquatic biologist of the bureau, has been cruising along the coast catching fish in nets, tagging them and returning them to the sea.

Saskatoon Expert Assumes Federal Post

Montreal.—Professor L. E. Kirk has arrived in Ottawa to take up his duties as federal agrostologist. Mr. Kirk, who is an authority on grasses, and has recently developed a drought-resisting grass for western Canada, was appointed to the post near the end of the last session on the recommendation of Robert Weir, Minister of Agriculture.

Mr. Kirk's duty will be to advise the Ministry of Agriculture on the suitability of various grasses for certain soils throughout the Dominion. He will also advise the Ministry on methods by which grasses at present growing, but not flourishing, i ncertain areas may be developed or adapted so as to grow well in their environment.

'Arctic Patrol' Ordered For Aircraft Carrier

Washington.—The aircraft carrier Langley, with its squadrons of planes, will winter in northern waters on an "arctic patrol." Operations of men and equipment will be put to test under extreme temperatures for the first time.

The Navy expects to learn valuable lessons on the effect of ice and snow on the planes, the flight deck, and the arresting gear that holds landing planes to their floating airport.

Twilight Hour

'Tis a perfect hour.
From founts of dawn the fluent autumn day
Has rippled as a brook right pleasantly
Half-way to noon; but now with widening turn
Makes pause, in lucent meditation locked,
And rounds into a silver pool of morn,
Bottom'd with clovre-fields. My heart just hears
Eight lingering strokes of some far village bell.
That speak the hour so inward-voiced, meseems
Time's conscience has but whispered him eight hints
Of revolution. Reigns that mild surcease
That stills the middle of each rural morn—
When nimble noises that with sunrise ran
About the farms have sunk again to rest;
When Tom no more across the horse-lot calls
To sleepy Dick, nor Dick husk-voiced upbraids
The sway-black'd roan for stamping on his foot . . .
And, kitchenward, the rattling bucket plumps
Souse down the well, where quivering ducks quack loud
And Susan Cook is singing.
—From "Poems," by Sidney Lanier.

Farms For Women Planned In Mexico

Mexico City. — A collective farm where women would be barred from the premises may be established near this city by the national congress of women workers and peasants. The organization adopted a resolution approving the project.

The land will be donated by the Government and a managing board will be appointed by the congress. The Department of Public Education will assign feminine experts in poultry and other classes of farming to instruct the workers.

The farm is planned as a model for similar institutions which state governments will be called upon to sponsor. Proceeds will be invested in the establishment of more farms and it is hoped that within a few years many of them will be in operation.

More Important

She planted herself firmly in front of him and gritted her teeth.

"Henry," she snapped, "you thought I didn't see you, but I did. You kissed the maid."

He paled.

"But, darling, you asked me to try to persuade her to stay another week."

Her attitude changed at once.

"Oh, Henry, tell me quick—did she promise to stay?" she asked.

American Beauty: "Oh, Harold, you English are too slow." Englishman: "Er—I'm afraid I don't grasp you." Fair One: "Yes, that's just it."

Flies and Cold, Wet Weather Spoil Grapes

PARIS.—Bad weather and cochylis flies have made it certain that there will be no overproduction of champagne this year. Indeed, they have done such a complete job that there seems likely to be no 1931 champagne at all.

When the Summer began it was thought there would be a splendid crop. Then the rain came and the sun did not come and the cochylis flies came and more rain came, and now the decision has come not to try to make any champagne. The one comfort is that there is still plenty of wine left from former years in the cellars of Rheims to supply the world without fear of a serious shortage.

Like champagne, the burgundy district also suffered badly from the cold wet summer. The only really good wines this year will be Bordeaux and Beaujolais, and even they will not have the quality of such years as 1928 and 1929. All one can say about them is that they will be better than last year.

Mexico to Aid Farm Education

Mexico City.—Intensification of agricultural education in Mexico has been promised by Ignacio Lopez Bancalari, Under-Secretary of Education. More agricultural schools are to be established in various sections of the republic and those now functioning are to receive added facilities. The Ministry of Agriculture has decided to establish a school of tropical agriculture, either in Vera Cruz of Oaxaca.

World's Tiniest Baby

Pretoria has what is believed to be the tiniest baby in the world. She was so small at birth that they did not weigh her in case the act of weighing might injure her. At fourteen days she weighed 3 lbs. She is kept wrapped up in cotton-wool and gets her nourishment through the injection of a saline and through the absorption of olive oil, applied to the skin.

His Own Views

Brimstone was about to leave the hotel after having stayed there a week.

"By the way, sir," said the manager, displaying a pack of photographs, "would you like some views of the hotel to take away with?"

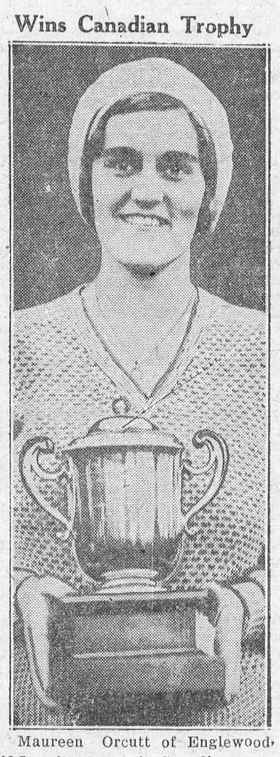
Brimstone sniffed haughtily.

"No, thank you," he replied. "I've got views of my own about this place which I'm taking away with me."

Nautilus To Be Sunk

SOUTHAMPTON, England.—Sir Hubert Wilkins sailed recently for New York. He said the submarine Nautilus in which he cruised under the polar ice would be towed to sea out of the port of Bergen and sunk after the scientific apparatus used by the expedition is removed.

Wins Canadian Trophy



Maureen Orcutt of Englewood, N.J., with women's Canadian open golf championship trophy she won recently at Rosedale Club course, Toronto, for second successive year.

BE NOBLE

Be noble! and the nobleness that lies
In other men, sleeping, but never dead,
Will rise in majesty to meet thine own.
—James Russell Lowell.

In Water 95 Hours 45 Minutes

Norris Kellam, "human cork" of Memphis, Tenn., being helped from the water after a 227-mile non-stop swim from Cairo, Ill., to Memphis. His time was 95 hours and 45 minutes. He took meals while floating on his back.

A Conquest

It is the consciousness of the identity of that which is realizing itself within and without us—the consciousness that the necessity which is the precondition of our freedom is the manifestation of the very principle that makes us free—that turns morality into religion. For it is this alone which enables us to regard the realization of the highest ends of human life neither as a happy accident, nor as a conquest to be won by the cunning of man from an unfriendly or indifferent destiny, but as the result towards which all things are working.—Caird.

Napoleon's Grapevine Saved

Paris.—Napoleon's grapevine on the Bastia Highway in Corsica has just been listed by the French Government as a historical object. In his memoirs the Emperor mentioned this grapevine, which was then owned by his family, and said that his rise in the world would not have been possible without it. It was from the products of this vine that his family drew the resources that enabled them to send the young Bonaparte to study in Paris.

The grapevine, which is called the "sposata," has been embellished with a marble tablet, placed on it by the present proprietor, Antoine Lambrischini, on which the above facts are recounted.

German Aviation Grows Safer

Berlin.—German aviation is approaching a minimum in accidents per mile flown. In 1926 cases in which pilots or passengers were injured averaged one for each 255,600 miles. This year the rate is only one for each 1,050,000 miles.

A FREE MIND

A free mind is no blessing if it be a loose mind or an empty mind. With freedom must always come the sense of responsibility, if the freedom is to be a blessing. We are not free to think what we like, but to think what is true to the best of our finding.—Dr. T. Rhondda Williams.

Leaning Tower Is Repaired

BOLOGNA.—The leaning tower of Asinelli has been reopened to the public following construction of new stairs to the top. The twelfth century structure is 320 feet high and four feet out of perpendicular.

Modern Youth

Mother—"You know, Geoffrey, Norma is nearly 17 years old, so to-day I had a frank discussion with her about the facts of life."

Father—"Ah! Did you learn anything?"

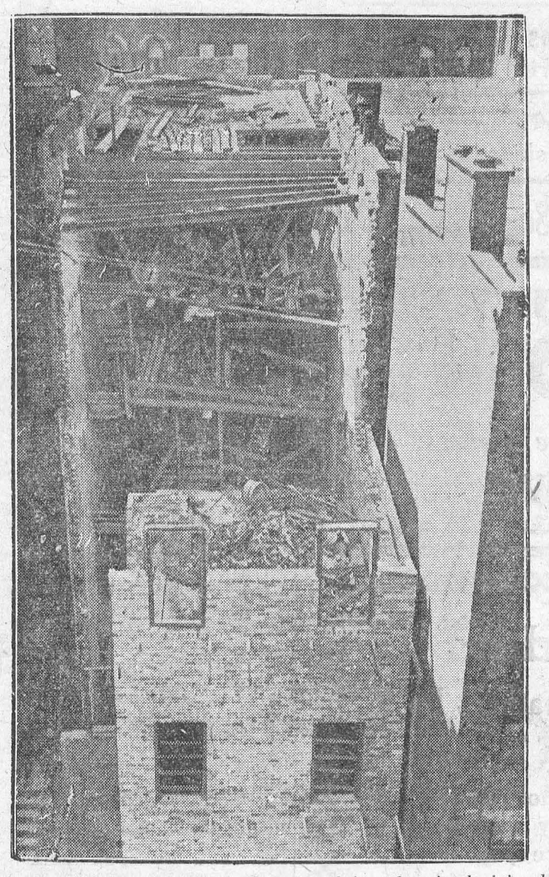
Robot Pilot Installed In Passenger Plane

Baltimore Md.—Installation of a robot pilot on a passenger airplane is now nearing completion at the plant of the B-J Aircraft Corporation here, and will soon be placed into service between New York, Baltimore and Washington.

This is the first installation to be made in a commercial passenger airplane, it was announsed. The device has been tested by the inventor and by the United States Army on experimental flights.

Human hand will be used only in the takeoff and landing of the new 18-passenger airplane. When in the air the position and speed will be regulated by small gyroscopes and controlled by a set of electric buttons. A switch places the robot in charge and relieves it of duty.—The Christian Science Monitor.

Apartment House Collapses Injuring Two



Two workmen were buried beneath debris and seriously injured when this apartment house collapsed during repair work recently.

Africa-Brazil New Plane Route

French Air Mail Plans To Start New Service in '32

PARIS.—In competition with the Zeppelin air mail which German backers announce will operate weekly between Europe and South America next year the French air-mail line, Aeropostale, has announced that a plan for completely air-carried mail will be ready by the end of 1931 and that early in 1932 planes will replace the French navy dispatch boats between Dakar, on the west coast of Africa, and Natal, Brazil.

At present Aeropostale takes seven days to carry air mail from Toulouse airport in France to Rio de Janeiro, but Montevideo and Buenos Ayres, but when planes replace the dispatch boat on the long step across the Atlantic it will be possible to deliver mail in those capitals three or four days after it is posted here.

Two seaplanes capable of carrying the quantity of air mail that is now being transported have been completed.

One belongs to Aeropostale and is being put through its final tests by the chief pilot, Mermoz, while the other is the property of the French Air Ministry.

These ships are monoplanes, Bernard seaplanes fitted with pontoons, powered by a 650-horsepower Hispano motor. They have a wingspread of twenty-four meters, with the tremendous wing surface of seventy-four square meters. The plane weighs three tons, but can carry six and one-half tons of mail.

Before the end of the year Mermoz will make the round trip by air between Dakar and Natal, and shortly thereafter the ships will be withdrawn in favor of the seaplanes. Their speed of 200 kilometers an hour contrasts favorably with the maximum 110 kilometer cruising speed of the dirigibles. The zeppelins, however, will be able to make the flights pay a profit by carrying passengers and freight. The French planes will carry only mail.

Warning

Never hunt for beauty,
Though you rise at dawn,
'Ere you lace your walking boots,
Beauty will be gone.

Sit at home and sew
And sing and scrub the floor;
You will hear shy beauty
Fumbling at your door.

Pay her no attention:
Set the table neat.
Pretend you never see her
Kneeling at your feet

Should you stop to watch her—
Let your baking go—
You will find her vanished,
Noiselessly as snow.
—Elizabeth S. Bohn in the Christian Science Monitor.

Germany Heads In Soviet Trade

Exports to Russia Mount to 58 Millions for 6 Months U.S. Stands Second, Britain Third

BERLIN.—While Germany's commercial position is such that a Franco-German economic commission is about to take it in hand, one thing seems to be on the up-grade—Germany's export trade with Russia.

In 1925 German exports to the Soviet Union were valued at 251,000,000 marks (about $56,000,000). Last year they totaled 431,000,000 (about $105,000,000 and during the first six months of this year they amounted to 262,000,000 about $58,000,000.

In other words, during an economic crisis characterized by failing exports for Germany as well as other countries (Germany's total monthly exports this year have been averaging 20 per cent. below the corresponding periods of 1930 the exports to Russia keep on climbing.

Stands First in Soviet Trade

Official Soviet figures show Germany stood first among the nations trading with the Soviet Union during the first six months of this year, the United States being second and Great Britain third. On the other hand, German exports to the Americas during the first half of this year were less than 50 per cent. of the volume for the first six months of 1929. So were the imports.

Argentina was particularly hard hit by the drop in imports, Germany buying less than one-third as much from that country as in 1929. Imports from the United States dropped almost one-half, those from Brazil and Mexico approximately one-half, while hardly a third as much was brought from Chile and Canada; but imports from Russia dropped only 14 per cent.

On the other hand, Germany is only beginning to export as much to Russia as she did before the war. Her exports to that country in 1913 were valued at 880,000,000 marks.

Credit Plays Large Part

Credit this year, moreover, plays a much larger role in Russian trade than it did before the war. Federal, state and community governments are underwriting an aggregate of 70 per cent. of the long term credits under which Russian orders are being filled by German manufacturers.

The Soviet Union has not defaulted in a payment so far, but the fact that the credits are long, and have to be underwritten by the taxpayers of Germany, is always cited against them by those who oppose "building up an anti-capitalistic regime that some day may turn its strength against us."

Gets Six Trees From One Apple

WAYNESBORO, Ga.—George W. Mobley, a business man of Waynesboro, now believes that "great oaks from little acorns grow," or words to that effect. A few years ago he was enjoying a particularly fine apple. He threw the seeds in his back yard and in due course was rewarded by having six apple trees spring up. He nursed them along to maturity, and now all of them are bearing fruit.

Educational Films

Dr. C. W. Kimmins in the Empire Review (London): The cinema is destined to occupy an ever-increasing position of importance in the education of the child, and the present type of textbook will eventually give place to one more closely associated with cinematographic requirements. Provided always that great care be taken to secure that pure diction be employed in the making of educational films, it should have a beneficial effect in raising the standard of good speech among our children.

Famous Jewel Is Presented To Museum

LONDON.—The Canning jewel, which was sold here recently by auction for $50,000, has been presented to the Victoria and Albert Museum by the American who purchased it. The donor desires to remain anonymous.

The jewel, which was formerly owned by the Earl of Harewood, derives its name from Earl Canning.

World's Grain Show Postponed

Regina, Sask.—The World's Grain Exhibition and Conference, which was to have been held in Regina in 1932, has been postponed until 1933, Robert Weir, Dominion Minister of Agriculture and chairman of the National Committee of the Grain Show, has announced.

Latest Notes From Science

New Way Found to Prevent Moths Laying Eggs—Glaciers and the Weather

Times are also bad in the insect world. But the causes of this entomological depression, unlike the economic unrest in the human world, are not hard to find. All are laid at the door of Dr. Thomas J. Headlee, entomologist of the New Jersey Agricultural Experiment Station, who has discovered that Oriental peach moths and codling moths will not lay their eggs in daylight nor in temperatures lower than 60 degrees Fahrenheit. This discovery brought into play electric floodlights controlled by ever alert electric "eyes." At dusk the lights are automatically turned on. At dawn they are switched off. But if, during the night, the temperature drops below 60 degrees the lights are turned off. Thus, conditions never favor the laying of eggs by these moths. Growers of peaches and apples are happy, but the insect world is not.

* * *

Glaciers As Barometers

A glacier can be considered as a kind of economical unit, according to W. Werenskold, the Norwegian glaciologist, in a paper read before the British Association for the Advancemtnt of Science. It is fed by snowfall in the upper parts, and it is eaten away by melting in the lower tongue. Wet and dry periods alternate. During a series of wet years the snowfall is great, there is little sunshine, the melting is diminished; as a result, the glacier grows and the tongue advances. In a dry period, with little snow and much melting, the glacier will decrease.

The Norwegian glaciers had a period of great advance in the years 1200 to 1740, when several farms were destroyed or damaged by the ice. This period terminated with three years of famine; the Summers were so wet and cold that cereals did not ripen. But even if such catastrophes are not to be expected the study of the behavior of the glaciers will lead to results of value, both to science and for practical purposes. Most of our water-power plants depend upon rivers rising in the high, snow-clad hills, and the stage of the glaciers is intimately connected with the stage of the rivers. Moreover, the glaciers act as immense barometers, registering the climatic changes.

* * *

An Aluminum Sleeping Car

A sleeping car made of aluminum is to be constructed as an experiment and will probably be exhibited at the Chicago World Fair in 1933. It is believed that a weight saving of from 30 to 40 per cent. could be effected if this light metal were used instead of the usual all-steel construction. This would reduce hauling costs considerably, but it is uncertain whether it would be sufficient to counterbalance the increased cost of building. Steel is to used for wheels, brakes, springs.

* * *

Life of Jewel Bearings

An examination into the long life of pivots and jewels has recently been undertaken by the British National Physical Laboratory. Such delicate measurements as the friction between the pivot and the jewel, as well as the torque due to the rotation, were made. Among the discoveries made was that rust is formed during the rotation and is chiefly responsible for the increase of friction during wear. Lubrication does not diminish the friction, but does, nevertheless, ncrease the life of the bearing. It was also found that the definite shape and hardness of a pivot, the relation between the direction of the hole in the sapphire, or diamond, and its crystalline axis all have an influence on prolonging the life of the bearing.

* * *

Pink Lemons

Pink lemons are one of the recent sights viewed by Californians. They had nothing to do with a deranged mind, nor were they a freak of science. They were due to one of nature's capricious little tricks. The rind, flesh and juice of this lemon are all pink, but little hope is held out of its being put on the market, although budwood from its tree has been inserted in sour orange seedlings to see if this odd variety of citrus fruit can be further propagated.

* * *

Halibut Family Secrets

The great whitebellied halibut of the North Pacific is giving up its family secrets. Ever since men began to catch this fish they have wondered, but have never been able to find out, where halibut came from, where they hatched and what stages they go through before they become real fish. Now, as a result of the work of the Canadian-American Halibut commission, these facts are available.

Discovery of the first halibut larvae ever found, queer little organisms much like an enlarged globule of tapioca with black spots for eyes and tiny beginnings of a tail, was recently announced at Victoria, B.C. From this discovery and further investigations it is expected that information will be obtained that will enable the United States and Canada to adopt scientific measures for the conservation of this great fish family. The annual Canadian catch of halibut amounts to more than 30,000,000 pounds.

Electrifying a Cucumber Bed

The electrical heating of the soil around plants, so as to hasten their growth, has been used successfully in California. The purpose of the particular experiment was to put the product on the market earlier than usual, while the price was several times higher than in the ordinary season when all crops mature and there is an overabundance of supplies.

Two exactly similar plots of ground were taken. One had insulated wires running through it about four feet apart and about eight inches below the surface. The current in the wires was regulated by a thermostat so as to maintain a temperature of about 70 degrees Fahrenheit, and the current flowed on an average of about two hours in every five. The other plot was not electrically prepared in a similar way. Cucumber seeds were planted in both areas, in rows about four feet apart.

It was found that more than one-half of the crop in the wired section had ripened and had been marketed before the first cucumber in the unheated plot had reached maturity. The net revenue obtained from the electrified plot was about $100 greater than that received from the latter.

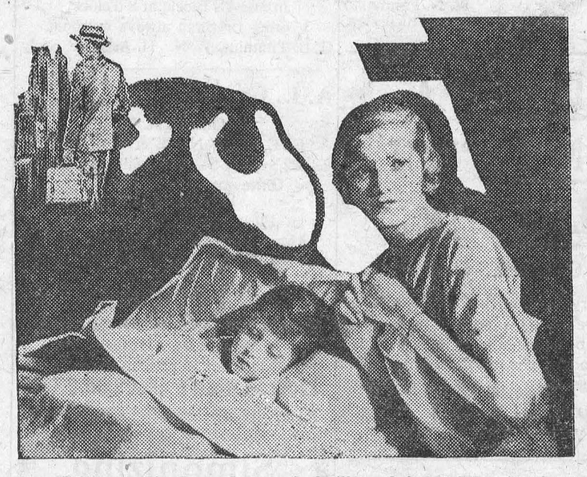
Anywhere, Anytime



"Operator! I need your help!" exclaimed Mrs. Herbert Brodie as she hurriedly told the telephone operator of her need.

"My son Billy is very sick and his father must be reached."

Bert Brodie, a commercial traveler, was known to be somewhere in the western section of the province.

However, such is the persistence of Long Distance operators that when an urgent call has to be put through and complete information about the location is lacking they "follow through" as long as there is any hope of completing the call.

Twelve cities and towns were called before Mr. Brodie was located. Within two hours he was at his boy's bedside. Upon the return of the father the boy began to show improvement. The telephone bridged the gap!

Cold Water Taps On Tropic Roads

Simla.—"Cold water for every man." This is the inscription that may be read hanging over a tap, beside a trading post on the Hindustan-Tibet road, between Simla and Mashobra, writes a correspondent of "The Christian Science Monitor." The announcement, with its implied invitation, is another evidence of the thoroughness with which the British authorities in India seek to serve wayfarers and those poorer members of the Indian and Tibetan communities whose livelihood is earned along this ancient highway. Lying far below the snow line of the Himalayas at this point, the Hindustan-Tibet road in the summer is one where water is rarely to be seen; and the boon of these unexpected wells and faucets can be readily imagined. There are other water facilities on the road, but government coupons are required to secure the water from wardens who serve it out. And for those men whose work takes them daily along the sun-baked road the advantage of the availability of this "cold water for every man" is one that can be estimated only by those who know India and Tibet.

John Bull

Mary Borden in Harper's Monthly (New York): John Bull makes a bad impression on strangers because he doesn't care what impression he makes. He is difficult to know because he doesn't want to be known. Confirmed and contented pessimist, his wants are few; one of them is to be left alone. It is not in philosophy, science or art that his genius lies, but in the conduct of human affairs. He is a practical, unconscious Socialist. He respects that queer animal, man, and his special contribution to the slow, lumbering evolution of the human race lies in that phase of civilized life most intimately connected with a natural, healthy man's needs. The Englishman has learned, among other things, the value of quiet and the high value of courtesy and how to give way to others. These are the insignia of civilized man. So is tact and a readiness to listen to another man's opinions.

100-Mile Speed on Roads

That 100 miles an hour speed soon will be common on the highways and that routes should be prepared to meet this rate was the forecast of J. E. Hale to the Society of Automotive Engineers.

Skull 20,000 Years Old Unearthed in Germany

Stuttgart. — Important prehistoric finds made in a cave near Ulm include the skull of a man from the Aurignacian period. This is the first one found in Germany, the only others in existence having been discovered in England, France and Austria. The cave, situated in the so-called Swabian Alb, was discovered by accident, and the Prehistoric Institute of conducting the excavations. In the entrance to the cave paleolithic tools and bones were found. The cave disclosed itself as a neolithic burial place, the finds including ceramics, handmills, flint weapons and the bones of mammoths, rhinoceroses, wild horses and cave bears.

The most important finds, in addition to the skull from the Aurignacian period, some twenty to fifty thousand years ago, include articles from the first millenniums following that period. Among them are ivory needles and other implements of eight different types, mammoth teeth and spearheads of bone and ivory. Of especial importance also are the remnants of carvings representing men and animals. The excavations are continuing and further important discoveries are expected.

Paper Made From Banana Leaf

Rio De Janeiro.—A process for making paper from banana leaves has been developed by Dr. Virgilio Campello, attached to the Chemical Institute of Rio De Janerio. Two factories are employed making banana-leaf paper and efforts are being made to develop a regular industry.

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

— With Castoria's regulation

When your child tosses and cries out in his sleep, it means that he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

Chas. H. Fletcher

CASTORIA

CHILDREN CRY FOR IT

Facial Expressions Now Being Studied

Declared to be Index of Emotions Rather than Character

The importance of facial expression in our everyday life—a subject under investigation by psychologists in many lands—was emphasized at the one hundredth meeting of the British Association for the Advancement of Science. In the following abstract of a paper read to the association by Rex Knight, who is a lecturer in comparative psychology in the University of Aberdeen, outlines his experiments in the study of physiognomic behavior and tells of his conclusions.

All of us are always making faces. Our thoughts, as every mother and salesman knows, are expressed by our look, as well as by our words; indeed, our look is sometimes a better guide to our mind than what we say. Every one has met shy people whose twitching faces belied the forced assurance of their speech.

The Greek philosopher, Aristole, thought that we could tell a person's character by simply noticing what animal his face most closely resembled. He compared men with lions, women with leopards, and believed that whereas people with thick bulbous noses are insensitive and brutal like pigs, those with slender hooked noses are noble and grasping like eagles, and those with sharp pointed noses are easily made angry like dogs.

Few people would now agree with these opinions, or with the views of those sixteenth-century physiognomists who regarded faces not only as outward and visible signs of their owner's virtues and vices, but also as infallible means of foretelling future events. Nevertheless, interest in the connection between our minds and our faces has persisted down to the present time, and it has been manifested by such distinguished scientists as Bell, Darwin and Spencer.

Facial Emotions

Whether the face reveals a man's general character is highly doubtful. But it is beyond dispute that it can reveal what is happening in the mind at the moment. When the irate colonel scowls, he reveals his feelings all too clearly to the trembling private. And when the small boy puckers his forehead, his teacher knows that he has not understood. The fact that faces express mental states underlay every silent film, where the joy, doubt or despair of the heroine was revealed, not by subtitles, but by close-up.

Some thoughts, feelings and desires, however, are better expressed by the face than others. It was this that led me to my experiments, for I wanted to know which mental states we most readily associate with facial expression.

I used photographs of forty facial expressions provided by two men and two women. With the help of my assistants I showed the photographs to more than 200 people, who were asked to write down what each face seemed to them to express.

There was little agreement about some of the photographs—those of faces intended to express complex and subtle mental and moral qualities. But about others there was great and significant agreement.

The results obtained from my photographs exhibit the fact that it is the instinctive mental processes, the simple, primitive emotions and desires that are most clearly expressed by the face. Anger, aggressiveness, grief, joy, disgust, fear, determination, coyness, scorn, surprise, self-satisfaction, and so on—these are the old emotions that come from man's primeval past and are rooted in his inborn nature—it is these that the face most readily and unmistakably reveals.

Professor Cyril Burt, it may be observed, reached a similar conclusion from his examination of the interview as a means of assessing a person's character. When he and his assistants attempted to asses the character of the same individual, they found that their several judgments agreed with each other only when they confined their attention to simple emotional qualities, like timidity or cheerfulness.

It is interesting to note that my experiments afforded no evidence of "feminine intuition." Among my 200 subjects, there was no significant difference between the men's and the women's judgments on the photographs. It seems, then, that if in ordinary life women read faces better than men, this is due, not to any special ability to do so, but merely to the fact that they pay more attention to them.

Another point is that young children of 4, 5 and 6 yielded results in substantial agreement with those of the adults. This shows how early we begin to rely on facial expression and on expressive behavior in general in getting to know what is in other people's minds.

Importance of Eyebrows

I carried out other experiments to show what part the different features —eyes, nose, mouth, etc.—play in facial expression. They showed, among other things, how important are the eyebrows and the mouth. One of my protographs had a depressed left eyebrow and a raised right eyebrow. When the left half was shown alone it was judged to express determination; when the right side was shown alone, it was judged to express surprise, and when the whole face was shown the results were fifty-fifty. The same thing happened with other photographs divided horizontally, in which the bottom half expressed one emotion and the top half another.

For every facial expression there seems to be a special position of each separate feature—depressed eyebrows for anger, an open mouth for surprise, a raised upper lip for disgust, a mouth turned down at the corners for superciliousness, a tilted chin for complacency, and a well-known position of the eyes for coyness. But, although this is so and although in each expression there is usually some one feature, or group of features, which dominates and characterizes the total effect, it is the whole face that counts. My experiments with composite photographs showed that my subjects' judgments were affected by all the features—the typical eyebrows and dilated nostrils of rage, for example, were counteracted by the open mouth of surprise or the tilted chin of self-satisfaction.

An interesting problem — and one much discussed by Darwin—is why does the face express the various emotions in the particular way it does? Why, for example, do we bare our teeth when we are angry, gape when we are curious and blush when we are embarrassed? But this topic lay outside my investigation.

Lines For Autumn

Something fluttered on the sill,
Brushed against the windowpane,
Yet there was no whir of wings
Nor another sound.
Trees stood tall and straight and still,
Not a blade moved on the plain,
Gone were twilight murmurings—
Silence all around,
Then one said he saw it swing
Athwart the casement. It was red.
He had seen its ruddy hue—
A comet in the grass.
And all knew how it would bring
Gaudy hordes on whispering tread,
Golden curves against the blue—
Knew these would not pass
Till new glories had been spent,
Cast on footpath and on wall,
Flung like thunder at the hill,
Swept away by gales;
Pass not as the summer went,
Quietly as first leaves fall,
But as gusty autumn will,
High on windy trails.

Carlyle W. Morgan in The Christian Science Monitor.

Big Entry List For Winter Fair

Live Stock and Agricultural Displays Higher Than Usual

A welcome and refreshing tone of confidence in Canadian agricultural conditions is sounded in the announcement by the management of the Royal Winter Fair that "prospects for entries at the Royal in all departments were never better than at the present moment."

"Exhibitors in the western provinces are most anxious to continue to display their live stock and other agricultural products," the Royal's statement goes on, "and the Dominion Government and the Provincial Governments, recognizing the advantages of the provinces continuing to occupy a prominent position at the Royal are contributing their usual financial assistance in transportation and in the selection of the live stock and agricultural products.

"There has been more than the usual number of inquiries from United States points this year and the Royal's survey of Ontario and Quebec indicates that there is considerably more live stock than usual ready for exhibition, so that we are very satisfied that the Winter Fair will open with the best and most representative live stock displays which we have ever had.

"Although general conditions last November were anything but favorable, 1930 was the Royal's record year, not only in exhibits and attendance, but the spirit of the people at the show was happier than at any previous event. We feel sure that the spirit of optimism at that time has served a very useful purpose in that it has enabled Canadians better to view recent economic adjustments with equanimity. We believe that a similar result will be secured at the forthcoming Royal Winter Fair, and be more noticeable perhaps on account of the greater contrast in conditions.

"The Royal this year is designed to commemorate its founding and inauguration ten years ago, when in the depression that followed the war it helped so signally to restore confidence to Dominion agriculture generally. Since its 'birthday' at that time it has established itself as an institution to which Canadians all over Canada have pointed with a very considerable pride.

"The Royal is entering upon its new cycle under conditions which permit it to perform a service to Canada in influencing the general outlook and state of mind of the Canadian people, apart altogether from its influence upon agriculture. The aim of the management is that everyone who visits the Royal and everyone who exhibits there shall be better equipped to meet whatever problems may cross their path in the immediate future."

Linesman—One who has a hot line.

Unnecessary Delay — A guy who waits until he's leaving for an excuse to kiss her.

Fair Catch—A visitor, male or female, who is unencumbered.

Backward Pass—Service to the guy sitting behind you.

Time Out—Varies from 9 p.m. to 4 a.m.

Safety—One who takes little sister along on a blind date.

Place Kick—Privilege enjoyed exclusively by her old man.

Snapper Back—Sheba or Sheik well versed in repartee.

Disqualified Player—Victims of halitosis.

In Play—Girlie who gets the grand rush with "cut-ins" at a football dance.

Fumble—A bashful or awkward bozo.

Downs — Condition which requires aspirin and tomato juice the next morning.

Continuously in Possession—Frantic victim who has been double crossed by a guy who promised to "break" him.

Kneeing—Unfair advantage taken by flappers.

An old Dutchman, returning to Holland, was asked by a friend what in his estimation was the strangest thing he had noticed, and he replied: "The United States has many wonderful things, but the strangest is a drink called the cocktail—and here is how they make it: They put in whiskey to make it strong, then water to make it weak; gin to make it hot and ice to make it cold; lemon to make it sour, sugar to make it sweet; then they say, 'Here's to you!' and drink it themselves."

Father—"When I was your age, son, I was glad to get dry bread to eat."

Bright Five-Year-Old—"You're much better off now that you are living with us, aren't you, Daddy?"

Bandit—"What! Only thirty cents? Been playing poker, eh?"

Victim—"No, but I've been sitting with some fellows who were!"

The handiest place to live is within your income. When the cat lays back its ears and humps its back, the smart dog knows it is time to use diplomacy. Our heart goes out to the man who joined the Navy to see the world and then spent four years in a submarine. A barking dog seldom bites, and a blustering man never fights. The book "What Every Young Man Should Know" should be changed to "What Every Young Girl Should Do." If we have to do without things we need, we just grin and bear it; it's doing without unnecessary things we want that makes us downhearted.

She—"What should I do for a sprained ankle?"

Joe—"Limp!"

Mother—"Come, Freddie, and kiss your aunt."

Freddie—"Aw, Ma, I ain't done nothin'."

Mary had a little lamb,
Given by a friend to keep;
It followed her around until
It died from loss of sleep.

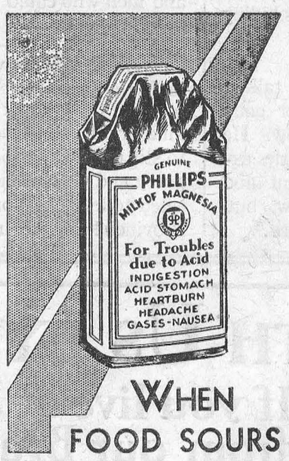
Old Lady—"Why didn't you try to keep out of prison?"

"Gangster—"I did, and they gave me three months for resisting an officer."

The only man really interested in hot air is the owner of a furnace. The penitentiaries are filled with those who got caught and the resorts crowded with those who didn't. The older friends of a girl who's about to be married often try to comfort themselves by saying they'd hate to be as crazy about a man as she is. Some travel broadens the mind, but hitch-hiking seems to enlarge nothing but the gall.

Wife—"Well, dear, have you found a job yet?"

Hubby—"Yes, my pet, you go to work to-morrow."



WHEN FOOD SOURS

ABOUT two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and harmless. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for correcting excess acids. 50c a bottle—any drug store.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior toothpaste that safeguards against acid-mouth. (Made in Canada.)

SHE HAD TO CRAWL TO BED

One stair at a time—on her hands and knees—that was how she had to do it. And when she did get to bed, her troubles were not over.

"Twelve months ago I could not sleep on account of the terrible pains in my knees, and I might say in all my joints. At night I could only crawl up to bed, one stair at a time. But since taking Kruschen Salts regularly, I have entirely lost all pains and stiffness, and, if needed, could now run upstairs two at a time. In fact, I feel 10 years younger. I shall never be without Kruschen Salts."—Mrs. A. E. D.

Do you realise what causes rheumatism? Nothing but sharp-edged uric acid crystals which form as the result of sluggish eliminating organs. Kruschen Salts can always be counted upon to clear those painful crystals from the system. The six salts in Kruschen are bound to dissolve away all traces of uric acid. And more! They ensure such perfect internal regularity that no such body poisons as uric acid are ever able to accumulate again. Prove this for yourself by buying a bottle of Kruschen.

Praises Famous Vegetable Pills For Indigestion

"Having been troubled with Indigestion and Sick Headaches for several months, I was recommended to try your famous Pills. After the first dose I was made aware of their very real tonic value."—Miss M. Croydon.

Dr. Carter's Little Liver Pills are no ordinary laxative. They are *all vegetable* and have a very definite, valuable tonic action upon the liver . . . exactly what you need to end Constipation, Acidity, Biliousness, Headaches, Poor Complexion, etc. All druggists, 25c & 75c red pkg.

THOMAS EDISON

Thomas Edison, the greatest benefactor to mankind since the days of Jesus Christ, died, peacefully, passing away at his home in West Orange, N. J., on Sunday morning last, at the age of 84 years. Thomas Edison started life as a newsboy, and travelled between Detroit and Montreal at one time. He was born in the United States, but his parents were Canadian born. As a newsboy he once was instrumental in saving the life of the child of a stationmaster, and in reward was taught telegraphy. He possessed an inventive mind. It was one of those rare gifts that come to few. With the inventive mind was a capacity for work, and determination to persevere and win out. He had many disappointments, many discouragements, but he also had a vision, and he never lost sight of it. The telegraph, the telephone, the phonograph, incandescent electric light, moving pictures, and many other great inventions owe their existence to the wonderful genius of Thomas Edison. He was, notwithstanding his great genius, a very human man. Vanity had no part in his character. He was always anxious to help others, and to his great modesty was, if anything, a drawback. He was a good man. He was not what, in these days, is known as a religious man. He thoroughly believed in Divine Intelligence. The man who does not is a fool. Thomas Edison will go down in history as one of the few, really great men of the civilized world. His body was laid at rest yesterday but his work begun will continue forever.

FLOWERS FOR THE LIVING

A story is told by the Ailsa Craig Banner concerning a poor sick woman whose suffering had made her a little morbid. In this state she made this curious request of a friend:

When I am dead and my neighbors come to my door with regret and sympathy, do not let any of them in the house, because I have lived here for years, lonely and forlorn and shut in and not one of them has dropped in to cheer and comfort me. If they offer their cars for the funeral, refuse them, because they never asked me to take a ride, though they must have known how much an invalid would enjoy getting out. Do not let them lay a flower on my coffin, for they never gave me a single bloom in life."

The Collingwood Bulletin, repeating this story, very truly says: "Now this woman's neighbors are not especially hard and heartless people. They are just busy people, engrossed in their own affairs, even as you and I. And when they hear that the poor invalid across the street is dead, they will be conscience stricken at having failed in kindness to her, and they will rush over to her house and try to atone for their neglect by heaping their tributes on her bier. We all do the same thing, and I often think that the most cynical thing in the world is that we have to die to find out what our family and friends think of us, and the esteem in which we are held in the community. The words we hungered and thirsted to hear, the love that we broke our hearts for, are only whispered into deaf ears.

Sudbury is in Ontario, and only a few hundred miles from Winchester. When, therefore, one reads that they had a sort of winter, with snow and freezing up there last week, it makes one feel that winter is "just around the corner." But not the same corner, but one very much closer than the corner they tell us prosperity is hiding behind.

Mitchell F. Hepburn may be a good talker, but he is not displaying either good sense or good judgment in his political ramblings just now. He sounds too amateurish for a leader, too little experienced to carry conviction, Discontent and discouragement will often catch at a straw, but Hepburn don't seem to be even a good straw.

NO TIME FOR CARPING CRITICISM

Hon. Mr. Price was quite all right in his request, or his statement, that the present is no time for carping criticism and senseless fault-finding by aspiring politicians who want to embarass the government and not help them in their efforts to grapple with the unemployment situation that so universally exists. When public men assail those in office and endeavor to create distrust and discontent by mere generalities and innuendo, without producing some substantial evidence or specific charges, they should be hooted from the public platform. Particularly at this present time when our governments are undoubtedly using their best efforts to grapple with a situation that has never before existed in this country, they should be given every possible co-operation and assistance. While we may not agree with their political views, no fair minded man will say that the men who compose our governments and are at present in charge of affairs, are unconcerned and indifferent to the grave situation that faces our country. They need all the encouragement and assistance it is possible to give them.

POSTAL POINTERS

Postal information of much value is published by the Post Office Dept. at Ottawa, and can be had for the asking. Besides giving rates of postage, letters, papers and parcels, it also advises how to address all mail matter. Much time, annoyance and even loss would be saved if those who do correspondence to any extent would provide themselves with envelopes with their own name and address neatly printed on the left hand corner, as advised by the P. O. Dept. Always put the stamp on the upper right hand corner. Here are a few simple rules or pointers given that should always be observed:

"Address your mail fully, clearly and without misleading abbreviations.

Place your return address in the upper left hand corner.

Never enclose coin or other hard objects in letters.

Send remittance by P. O. Money Order or Postal Note.

Properly pack parcels. Parcels are limited to 15 pounds and in size to 3½ feet in length.

Prepay postage fully. Place the stamp on upper right hand corner. Insure your parcel and register valuable letters.

Deferring mailing until last moment may cause delay, so mail early. Give your correspondent your correct address.

SHOULD BE NO FAVOURITES

The charge has been made that in the handling of the unemployment relief funds, that in some cases political favouritism has been shown, This is charged in connection with work in Northern Ontario. It is said that a man known to be a Conservative, has a much better show than the man who is known as a Liberal. Of course it is easy to make such statements and send them broadcast through partisan newspapers. After all, the men in charge of the organization and administration of the unemployment funds are only human, but no human man would debar a man seeking employment, or whose family is in need, because of his political leanings or convictions. All the same, it would better if the administration of the relief funds and the alloting of work were in the hands of men of both political parties, and men who could be trusted to do the fair and proper thing.

The Conservative Party in Quebec seems to be in the same sad predicament as the Liberal party in Ontario. Houde, who stirred the same kind of a flair in Quebec that Hepburn is trying to stir up in Ontario, has been kicked out by his party and G. E. Gault of Montreal has been selected to lead the Conservative opposition in the Provincial Legislature.

HENRY'S SHORTHAND SCHOOL, OTTAWA.

No school in Canada offers a better training, or ensures a more successful future. Henry's leads all others, and ranks among employers as "THE SCHOOL OF HIGHER EFFICIENCY"—a fact borne out by more than 600 pupils who have, since January, 1913, left other Ottawa Schools to come to it.

Therefore, it is not surprising thet business men, in advertising for stenographers should specially say, "Graduates of Henry's School preferred."

Canadian Engineer Inaugurates Radio System in New Waldorf Hotel

Paul E. Demers of the Radio Laboratory staff of the Northern Electric Company in Montreal, and well known in radio broadcasting circles throughout Canada was selected to inaugurate the centrally operated radio receiving system specially developed in the Bell Telephone laboratories, for the New Waldorf-Astoria Hotel which was opened in New York this month. Mr. Demers is here seen receiving the first "speaker" for use in his suite.

SOUTH MOUNTAIN

CHESTER—WYLIE

On Wednesday, Oct. 14th, the home of Mr. and Mrs. Jas. Wylie of VanCamp, was the scene of a quiet, but very pretty wedding, when Rev. T. F. Townsend officiated at the marriage of their eldest daughter, Jeanette, to Horace W. Chester of Cornwall.

The bride entered the drawing room on the arm of her father to the strains of Lohengrins wedding march which was played by by Mrs. (Rev.) Townsend. Miss Doris Wylie of South Mountain, sister of the bride, acted as bridesmaid, while Mr. Karl Guy of VanCamp assisted the groom. Immediately after the ceremony, dinner was served to about twenty five guests. Shortly afterwards the bride and groom left on a wedding tour. On their return they will reside at Cornwall

Mr. Scott Walker of Detroit, visited his father, Mr. Robt. Walker, last week.

Messrs Cecil Lock, Kenneth Laushway and Alex Millar, spent Saturday at Lombardy.

Much sympathy is extended to the son and daughter of the late Byron Timmins who passed away at Cornwall Hospital on Thursdap of last week.

Mrs. M. Moore left last week to spend the winter in the States with her brother, Mr. Geo. Brown.

The auction sale held by Mr. Edmund Francis on Thursday last, was a decided success. A large crowd attended and prices were good.

The many friends of Mrs. Francis Locke will be sorry to learn of her serious illness. Mrs. Wood of Mountain Station, is taking care of her.

Mr. Geo. Locke of Morrisburg, is spending sometime with his mother

Mr. and Mrs. Norman Armstrong spent Sunday with Mr. and Mrs. Chas. Armstrong.

Mrs. Geo. Locke of Morrisburg, who has been spending sometime with Mrs. Francis Locke was called home owing to her mother, Mrs. Houlahan, taking a stroke.

Mr. and Mrs. Leslie Smith of Cardinal, Sundayed with Mr. and Mrs. Levi Gates.

A large number of our citizen attended the funeral on Sunday last of Mr. Byron Timmins of Inkerman.

Mr. and Mrs. Donald Duggan and children, of Cardinal, was Sunday guests of Mr. and Mrs. Allen Suffel.

Mr. and Mrs. Anderson and children, and some friends of Gananoque, were Sunday visitors here.

Mr. W. J. Duncan of Smiths Falls, was in town Sunday.

Mr. and Mrs. M. J. Cleland, Miss Eleanor and Willie, and Mr. Lyall Ferrier, of Kingston, were guests of friends here, Sunday.

Mr. and Mrs. Donald Sullivan of Hulbert, Dr. C. Stinton and Miss Violet Berry

Mr. and Mrs. Bernard Shaver of Ottawa, Sundayed with Mr. and Mrs. Ed. Shaver.

Mr. and Mrs. Earl Mulholland of Ottawa, spent Sunday at the home of Mr. Robt. Mulholland.

Mr. E. J. Bisoop of Ottawa, was in town Saturday on business.

Miss Viola Duncan of Smiths Falls, is visiting in town this week.

Mr. and Mrs. John Murdock and family, of Brinstons, were Sunday guests of Mr. and Mrs. Robt. Murdock.

Mr. and Mrs. Wm. Cleland and Mr Asa Berry were up to Brockville, Tuesday.

MOUNTAIN

Recent guests at the home of Mr. and Mrs. S. W. VanAllen were Mr. and Mrs. George McCordick, Mrs. Joe McCordick, of North Gower, Mr. and Mrs. Andrew Logan of Kemptville, Mrs. S. Barkley of Newington is at present. The guest of her nephew Mr. E. Foster.

The R. L. K. Mission Circle met at the home of Miss Violet VanAllen on Monday night.

Mrs. J. F. VanAllen of Camden, N. Y., spent the week-end with Mr. and Mrs. S W. VanAllen.

Mr. W. J. Irving spent a few days in Montreal last week.

Mrs. Fred Beckstead spent the week-end in Ottawa

Mrs. J. Cox of Fitzroy Harbour is at present the guest of her parents Mr. and Mrs. F. Beckstead.

Mr. and Mrs. M. Foster spent Sunday at Inkerman.

Mrs. W. J. Irving, Mrs. F. R. Barriger and Miss Gladys Barriger spent Friday in Ottawa.

STRADER HILL

This community has lost one more highly esteemed resident in the person of Mr John Hanson, whose death occurred at his late residence on Thursday evening. The late Mr. J. Hanson who had been ill for some eight weeks, was born here 48 years ago. He was married 28 years ago to the former Miss Blanche Foster.

The funeral took place on Saturday afternoon from Dundela United Church where it was conducted by Rev. J. C. Eastcott. The remains were laid to rest in Brinston cemetery. The deceased was a conscientious church worker and a popular friend of the entire community. The funeral was one of the largest ever witnessed in Matilda township. Evidence of the deceased man's wide circle of friends was shown by the many floral tributes.

The late Mr. Hanson leaves to mourn his loss: his wife; one son, Cecil at home; one daughter, Beryl, at home; one brother, James, of this community.

The community extends deepest sympathy to the bereaved family.

Mr. Will Cook and family and Mr. and Mrs. Frank Hogaboam of Cass Bridge were Sunday visitors of Mr. and Mrs H. Cook.

WINCHESTER SPRINGS

Mr. and Mrs. Alfred Potter and Mr. and Mrs. Ceicle Merkley of Rochester, N. Y., visited Mr. and Mrs. George Myers a couple of days last week.

Mr. and Mrs. George Myers and Grace spent last Friday in Ottawa.

Miss Grace Myers spent the week-end visiting Miss Norma Summers of Winchester.

Mr. and Mrs. Henry Whittaker spent Tuesday with Mr. and Mrs. Aden Casselman. Miss Edna Casselman returned with them for a few days.

Mr. and Mrs. A. Casselman and Miss Jean and Olive Casselman spent Sunday at Brockville with Mrs. Rufus Casselman who is a patient in the General Hospital there.

A number of friends attended the funeral of the late Byron Timmins held at Inkerman.

Mr. and Mrs. Loran McIntosh spent Saturday in Ottawa.

Mr. Ralph Allison and son Lloyd spent one day in Ottawa coming by way of Manotick, taking tea with Mr. and Mrs George McLean.

Mr. and Mrs. T. D. Nesbitt spent one day recently with Mr. and Mrs. Wm. Steele of Toves Hill.

Mr. B. Connor of Brockville spent Sunday with Mr. and Mrs. Loran McIntosh

Mr. O. Holmes of Brockville spent Sunday with his parents here

Mrs. Mable Allison and family spent one day recently with Mr. and Mrs. Wm. Allison, Bethune Bush.

Miss Jessie McPherson of Toronto, Secretary of the Young Girls work took tea with Mr. and Mrs Lorane McIntosh Friday evening.

Mr. and Mrs Esley Pitts of Straders Hill were guests of Mr. and Mrs. Thos. Cummings Sunday.

Mr. and Mrs. G. Brown of Spencerville spent Sunday with Mr and Mrs. S. Rice Sunday.

Mrs. John Patterson is spending some time at Inkerman with Mr. Wm. Timmins.

Mr. Levia Whittaker of Williamsburg spent Sunday with Mr. Walter McIntosh.

Mr. Floyd Barcley of Brinstons spent one day recently with Mr. and Mrs. Walter McIntosh.

Mrs Earl Duff of Detroit spent one day recently with Mr. and Mrs. Fraser Bolton.

TOYES HILL

Miss Beatrice Johnson was the week-end guest of Mr. and Mrs. Floyd Barclay of Brinstons.

Mr. Delbert Harper of Ogdensburg spent Sunday at his home here.

Miss Lottie Casselman of Hosiac spent the week-end with her sister Mrs. James Casselman.

Miss Linda Steele spent a few days in the city.

Messrs. Lorne and Simon Bronson of Trenton took dinner with Mr. and Mrs. S. Coons on Wednesday.

Mr. and Mrs. Hugh Hunter, Mr. Harry Cripps and Fred Aucter of Philadelphia spent Thanksgiving with Mr. James Hunter.

Mrs. Chas. Kirkwood and son Bert spent Thanksgiving with her sister Mrs. Lloyd Robinson of Waltham, Que.

Mr. and Mrs. Geo. Carter spent one day last week with Mrs. Levi Casselman of Dixons.

Mr. Clifford Wylie spent Sunday at Waddington.

BADLY HURT BY FALL

Glen Merkley, son of Mr. and Mrs. Philip Merkley, received very painful injuries when he fell from a 20-foot roof of a house in the Boyne district.

He had just completed repairs to a chimney, and in coming down off the roof slipped on the wet shingles and fell to the ground.

He was immediately brought into town where he received medical attention. Although no bones are broken, Mr. Merkley is suffering from a severely sprained left ankle, numerous bruises and a bad shaking up, and will be confined to his bed for 10 days or two weeks.

The blue color mark is like the sterling mark on silver. It identifies the finest hard coal that has ever been brought above ground. 'blue coal' is colored at the mine with a harmless coloring that does not affect the coal in any way.

THE BLUE COLOR SAYS

• • • THIS COAL IS THE FINEST OF ALL SCRANTON ANTHRACITE

IT is such superlatively good coal that we trade-marked it for your guidance and protection when buying . . . dyed it with a harmless blue dye so that you can recognize it at a glance.

'blue coal' is not a new coal . . it is the same famous D. L. & W. Scranton Anthracite that has been a favorite in Canada for more than fifty years . . the finest coal ever brought above ground.

With 'blue coal' blazing cheerfully in your furnace, you never need to force the fire to get the degree of heat you want . . . just check the drafts, feed the coal sparingly and enjoy perfect comfort.

And 'blue coal' is the cleanest coal you ever saw . . clean in your cellar, clean in your furnace. All the impurities are washed and screened away.

So just 'phone your dealer for 'blue coal' in the size you require. The color will tell you that you are getting the greatest heating value that money can buy. You are paying for 'blue coal' comfort, so why not get it.

Beavers Conserve Lakes By Damming Streams

Quesnel, B.C.—Beaver from the Bowron Lake game sanctuary, near Barkerville, are being used by the Provincial Land Department to help restore lakes and streams in Lower Cariboo.

The first shipment of eleven beaver passed through here recently by motor truck en route to Williams Lake, where they will be released at selected spots.

Beaver in earlier days before they were trapped out conserved the water supply.

A Yorkshire Lullaby

Hoosh, loov, thi father is cooming home soon.
Softly, me darling, don't cry!
Happen he'll bring thee a scarlet balloon.
Wipe oop thi bonnie blue eye.

Gently, doy, mammy will rock thee to sleep;
Birdies are all in the nest.
Never a sprite or a goblin shall creep
Near to thee, little 'un, rest.

Close oop them peepers an' stop watching me.
Shameful the goings on here!
Darkness cooms riding out over the lea.
Hooshabye-rockabye-dear.
—P. P. Strachan, in The Christian Science Monitor.

Witticisms

It was a crowded meeting. The political candidate was doing his best to hold a rather restive audience.

Some of his remarks, however, were greeted with storms of disapproval.

Suddenly one of the hecklers at the back of the hall shouted: "Experience teaches fools!"

The candidate was equal to the occasion.

"That" he returned, "is why I ask you to profit by my experience."

At a fair in the North of England, the champion wrestler invited any of his listeners to try a fall with him. A huge miner, grinning sheepishly, accepted the invitation. Later, in the local pub, he gave this description of the bout:—

"'E got 'old of me round the middle, and then 'e got a strangle-'old and, ba goom, he twisted me into knots. There was me lyin' on me back, and ah thought something had to e done. Lookin' upwards, I sees some girt big 'indquarters, so I bit 'em hard, and, ba goom, they was my own."

"What do you mean," stormed the indignant mistress, "by telling people my husband is in prison?"

"I only repeated what I 'eard from your own lips, mum," replied the charwoman.

"What on earth do you mean?" I never said my husband was in prison."

"Well, perhaps not in so many words, but I 'eard you say as 'ow you was givin' a comin'-out party next month, and I drew my own conclusions."

An American murderer was about to meet his doom, and the prison chaplain asked him: "Is there one last favour I can do for you?".

"Yes, sir. I'm terribly afraid. Will you hold my hand while I'm in the chair?"

A prosperous estate agent had given his little girl a splendidly equipped doll's house. On his return after a week's absence, he asked her how she liked it.

"It's very nice, daddy," she said.

"But where is it?" he inquired, surprised at not seeing it in the nursery

"Oh, I rented it furnished to Cousin Betty for threepence a week."

The motorist had been in an accident and was making a short stay at the village, while his car was being repaired. On the first evening he went in to the village constable.

"When does the theatre open?" he asked.

"There is na theatre here," retorted the policeman.

"Well, cinema then."

"Na, na, there's nothin, o' that kind here."

"Good gracious, my man, have you no evening amusement then?"

"Well, sir," replied the policeman "if ye wait til eight o'clock ye'll see them shunting the goods train."

"What do you think of our mural tablets?" asked the cathedral verger.

"Waal," drawled the American visitor, "I put a penny in the box over there, but nothing came out; so I guess I didn't get a chance to try them."

Nurse entered the professor's study and said softly: "It's a boy, sir."

The professor looked up from his desk.

"Well," he said, "what does he want?"

Maid: "When would you like to be awakened, madam?"

The Haughty One: "I will ring when I wish to be awakened."

Patient (angrily): "The size of your bill makes my blood boil."

Doctor (calmly): "That will be

"I—er—er want to marry your daughter," said the nervous young suitor, as he entered her father's room.

"What!" exclaimed the father. "Marry my daughter. I'm astonished. What on earth do you mean?"

"Now, now," replied the youth, soothingly, "don't talk like that! You're prejudiced against the girl. She's all right really."

The stage-door attendant was having sharp words with a young man who had been hanging about persistently and asking for one of the actresses.

"Go away, can't you," said the doorkeeper. "I tell you Miss Daphne don't want no admirers. Can't be bothered with them."

"Bu-but," pleaded the young man, "I'm not an admirer, I'm her son."

Butcher (to lad applying for a job): "Your wages will be fifteen shillings a week. Now, my boy, what experience have you had? Can you dress a chicken?"

Applicant: "No, sir, not on fifteen bob a week."

A Scot and an Englishman were indulging in an argument about their respective countries. "Well, after all," the latter said, at last, "there is a little difference between the Englishman and the Scotsman."

"Perhaps you're right," replied the Scot; "but thank Heaven for the difference."

Problem of Water in Gasoline Solved by Master Sergeant

DAYTON, Ohio—A knotty Air Corps problem, caused by water in airplane gasoline, has been solved by an enlisted man. He is Master Sergeant David Samaran, a native of the Island of Cyprus, whose device to provide pure fuel has been adopted as standard equipment by the Air Corps.

His invention, known as an isolator or segregator, makes use of the different specific gravities of water and gasoline.

Here and There

British bees supply the best honey in the world.

Air pilots' certificates are held by 10,000 men and women in Gt. Britain.

The modern light aeroplane costs little more than the average motorcar.

Last year's total death rate and infant mortality rate in Gt. Britain were the lowest ever recorded.

Tenor voices are most often found among people who are chiefly pastoral in work and idealistic in temperament.

Among Britain's notable men who are fond of reading detective stories are Mr. Stanley Baldwin and Mr. Lloyd George.

New methods of indexing have made it possible to refer to any one of the 3,000,000 finger-prints registered in Scotland Yard in one minute.

The English Channel was first crossed by balloon in 1785, by a swimmer in 1875, by aeroplane in 1909, by motor boat in 1929, by punt in 1930, and by glider this year.

Many diseases, including smallpox, measles, psittacosis, and the common cold are caused by bacteria so small that they pass through the finest medical filter.

Marriage is the only career open to the girls of Barcelona, where all the courting is done in the presence of a chaperone. The lovers do not kiss until the engagement is announced.

Passengers travelling in English first-class corridor and sleeping cars of one railway company will be able to have hot and cold air in their compartment by turning a knob, when a new apparatus is installed.

Flying is growing rapidly. Last year the twenty-nine aviation companies flew 24,963,924 miles. France had the highest record, with Germany second, Italy third, Holland fourth and Britain fifth.

On a grain-growing farm covering nearly 150 square miles in Southern Montana there is not a single horse, all power being provided by petrol. The proprietor, who is the son of a Scot, grows more wheat and flax than any other farmer in the world.

Dogs must not be allowed to bark, motor-horns cannot hoot, and loud-speakers, gramophones, pianos, and other apparatus producing sound are banned in hotels and public places in the French town of Chambery between the hours of ten p.m. and eight a.m. by a special decree of the mayor.

Canada's national war memorial, which will cost $250,000 by the time it is completed at the end of this year, will measure sixty feet in height and fifty feet in width. It is the work of one English family, including six brothers and one sister, who have been engaged on it since 1926.

Babies who "act" in the film studios of Hollywood cannot be exposed to the intense lights for more than thirty seconds at a time, and may only be employed for four hours in any one day, including rest periods. The baby's salary is $75 a day, while the mother and nurse, who are always in attendance, are paid in addition.

Pumpkins and Pickles Pay College Tuition

KANSAS CITY, Mo.—Barter continues to be a good word in the vocabulary of the college student.

At Drury College, Springfield, Dr. William Thomas Nadal, the president is accepting pumpkins, cabbages or home canned pickles and preserves in lieu of coin of the realm for tuition money.

A cafe in Lawrence, seat of Kansas University, is accepting wheat at 45 cents a bushel for board of students.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an imported dress—lost color so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. On hearing the reason, she advised dyeing it and recommended Diamond Dyes. To make a long story short, it turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes.

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to be made so they always go on smoothly and evenly. They never spot, streak or run; and friends never know the things I dye with Diamond Dyes are redyed at all!"

Mrs. R. F., Quebec.

ISSUE No. 42—'31

What New York Is Wearing

BY ANNEBELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished with Every Pattern

Ready for school! Well I guess! It's so thoroughly smart and typically French. The front panel extends into the circular skirt at the front and makes it very easy to fashion.

Isn't the neckline smart with turnover collar and bow tie?

A fine triped woolen tweed effect in rich brown made the original, the pockets, belt and sleeve cuffs were vivid red woolen. The tie in crepe de chine matched the plain red woolen. The collar of white pique was made detachable so as to be readily laundered.

Style No. 3311 may be had in sizes 6, 8, 10, 12 and 14 years.

Size 8 requires 1⅜ yards 54-inch, with ⅜ yard 27-inch for collar and ⅜ yard 35-inch for contrasting.

Vool jersey, rayon flecked wool voile, wool challis, linen, cotton broadcloth prints and tweed-like cotton are smart.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

All Square

He was a stout man, and his feet were large in proportion. He wore stout boots, too, with broad sensibly-shaped toes. When he came into the shop to buy another pair, he had some difficulty in getting what he wanted.

A dozen pairs were shown to him.

"No, no! Square toes—I must have square toes," he insisted.

"But, sir," replied the shop assistant, "everybody is wearing shoes with pointed toes. They are fashionable this season."

"Well," said the stout man, gravely, as he prepared to leave the shop. "I'm sorry to have troubled you. But, you see, I'm still wearing my last season's feet."

Three Twos

The teacher had been explaining the different meaning of the words "to," "too," and "two," and, finally, to find out if the children had grasped the idea, she decided to give a test.

"Now, children, as quickly as you can, I want you to give me a sentence containing all three spellings."

She had scarcely finished speaking when up went a hand.

"Well, Isaac?" said the teacher, and the boy, the only Jewish child in the class, answered, glibly: "Two shillings is too much to spend."

Easy for Him

She was telling her girl friend of her great heart-break.

"Yes, Mary," she said, "when the brute proposed he said he was prepared to live on bread-and-cheese and kisses."

The other nodded knowingly.

"And you didn't take him at his word, I suppose?" she put in.

The disappointed girl nodded.

"He expected my father to supply even the bread-and-cheese," came the reply.

"We've had a lovely time playing postman," exclaimed the youngest of the family. "We gave a letter to every lady in the street."

"But where did you get the letters, dear?"

"Oh, we found 'em in your trunk in the attic, all tied up with blue ribbon."

"Your success and happiness lie within you. External conditions are the accidents of life."—Helen Keller.

THE SAVING GRACE

By Edward Woodward

"I am indulgent father, aware of the claims of youth," I said, regarding my daughter Ethel across the breakfast table.

"Marmalade, please, Mums," remarked Ethel, who is in the twenty-first year of her superiority.

"But," I persevered, removing the top from my lightly-boiled egg with the air of Mr. Justice Avory summing up, "I consider a metropolitan race meeting no place for a delicately-nurtured girl of your age on a Saturday afternoon."

"Bob ought to know better than take you," supported Agnes, my wife.

"Bob knows better than not to," smiled Ethel.

Bob is the young hot-head who dreams of leading my daughter to the altar. He possesses good looks and a racing car, so Ethel permits him to dream.

"Undesirables frequent such places and win other people's money," I continued.

"If they're lucky," retorted Ethel, and, lighting a cigarette, she picked the morning paper from the table at my side. "I shall back Paterfamilias for the three o'clock. He should bring home the washing."

I hate to have the morning paper second-hand. It annoyed me.

"Young woman," I said, "you have no sense of the gravity of life. When you were a tot—"

"Now," interrupted Ethel, "we come to the part about the youth of today never having heard shells fired in anger. Take it as said, old hero; I'm off."

She departed like the passing of a breeze. My wife sighed.

"I was hoping Ethel would accompany me to the Women's Institute Fete this afternoon," she said. "She was asked to take charge of the Fishing Pool."

"What's the fishing pool?" I asked.

"People pay a penny and try to catch an electric fish with a magnetic pin on the end of a line. If they succeed they get a prize."

"More gambling," I said, feelingly, owing to my having suffered considerable disappointment over a Derby Sweep.

"It has the saving grace of charity," said Agnes. "What shall you do with yourself this afternoon?"

"Amuse myself intellectually," I answered, somewhat tersely.

I had to visit the bank that morning, and there I met Stewart, of the Stock Exchange. He was dressed for holiday.

"Where are you going?" I asked.

"Hurst Park," he replied, with a grin.

"Didn't know you were a racing man."

"I'm not. I go for distraction and to study human nature." And Stewart moved off.

The idea of an astute business man going to a race meeting interested me; and when, reaching the station to take my train home, I observed several well-dressed people booking for Hurst Park, I decided on the spur of the moment to ascertain at first hand just what the attraction was. Agnes would be out, and so there was a good excuse for avoiding a solitary afternoon.

Never having been to a race meeting, and wishing to get the best view of the proceedings, I went into the most expensive enclosure open to the public; and as the crowd seemed very friendly amongst themselves, I soon felt lonely. I was, therefore, rather pleased when a well-turned-out gentleman came up to me and extended his hand.

"Well, I'm hanged!" he said, with effusion. "If it isn't old—Dash it, what is your name?"

"Carter," I said, taking his extended hand, considerably startled by his jovial manner.

"Of course! Of course! I can see you don't remember me. . . . Long time since the war. . . . Expect I look a bit different in mufti."

I still could not place him.

"Where was it?" I asked.

"Now guess!" There was a roguish twinkle in his eye.

"Bapaume?" I ventured.

"Guess again."

"Pop?"

"Got it," laughed the old comrade. "Major in the Worcesters, weren't you?"

"Captain in the Warwicks," I corrected.

"That's right. Don't you recall me, Major Webster. . . . Brigade Staff, you know. . . . Ha, ha! Of course you do, Carter, my boy. Come along and let's have a drink. . . . Splendid to see you again."

I felt happy at this reunion with a man with whom I had apparently fought shoulder to shoulder, but whose name and face had been washed from my memory by the ebb and flow tides of peace.

"Well," said Major Webster, when a drink had put us in easy humour. "What are you backing for the three o'clock?"

"I didn't intend—" I began.

"Nonsense," chortled Webster. "The only excuse for coming to Hurst on a Saturday afternoon is the chance of making a bit on an outsider. I'm going to make all my week's exes and a bit for charity on Argosy. . . . Have a cigar."

"Can he run fast? I asked, accepting the smoke.

"Fast enough for my purpose," laughed Webster. "You see, Carter, my friend, a man in my position has to support a good many charities, and so I just have to take a chance in these hard times. Keep a bit of sugar for the bird and pass on a percentage to a deserving cause. . . . See what I mean?"

The excitement of my surroundings affected me. I thought of my wife's remark about the Fishing Pool gamble having the saving grace of charity; she was touching me for a fat donation, and, well—

"How much are you putting on? I asked.

"Twenty pounds as he's such a snip," said Webster.

"Suppose the horse loses?" I exclaimed.

"Suppose nothing of the sort," retorted Webster. "If you want to make a bit for your local hospital a bit of good, follow my lead. Twenty quid will bring you two hundred; fifty for the sick, and a hundred and fifty for yourself."

Now I knew why the astute Stewart came to Hurst, and how Ethel managed to cut the dash she did on the small—but quite adequate—allowance I made her. I opened my note-case, and took out twenty one-pound notes, drawn from the bank that morning.

"Wise chap," said Webster. "Let's go for the lunch. Time's getting short."

There was a seething mass of humanity round the Tote.

"Here," said Webster, quickly, "give me the cash, I'm known here, and I'll get it on through the Member's Stand. . . . Meet me here after the race, and draw your winnings."

Feeling grateful to my old comrade-in-arms, I made my way to the stand and watched the race. I missed nothing from the start until the moment when Paterfamilias came cantering in far ahead of any of the other horses. Argosy appeared to have other business down the course.

I felt disgusted and disheartened. I felt vexed with Webster, and decided to go home without seeing him again. There was a train at three-thirty-five.

I felt for my watch. It wasn't there!

I put my hands in my pockets. They were empty!

My note-case had also vanished.

I hurried to the Tote to find Webster. He was not there, either.

Then I knew I'd been stung; and was wondering how on earth I should get home, when a clear young voice sounded in my ear.

"Holy smoke! Here's Pa!"

I turned and faced my daughter and her young man.

"I came to ascertain whether this place was a fit resort for you," I explained with what dignity I could assume. "It's a sink! I've been robbed!"

Ethel's clear eyes rested on the spot where my watch-chain ought to have been, and she gave a gurgle of amusement.

"Bob, my cherub," she cried. "Poor Pa has been raided."

With much mortification I recounted the story of my reunion with the "old comrade"; and Ethel and Bob enjoyed every word of it.

"Never mind, my lamb," said Ethel. "You're with true friends now. We put our undies on Paterfamilias and are rolling in the doings. Mums shall never know you've been human for once. Come and have some tea."

She led the way to the buffet with her easy care-free stride, and, following humbly in the rear, I knew exactly what my daughter was. She was the Saving Grace of Charity!—Tit-Bits.

High Tension

Grandpa was having his after-lunch sleep in the armchair, and emitting sounds that might easily have come from a cross-cut saw. As father entered the room, he saw little Billy twisting one of grandpa's waistcoat buttons.

"What are you doing?" he whispered. "You mustn't disturb grandpa, Billy."

"I'm not disturbing him, daddy," explained the child. "I was just trying to tune him in on another station."

"That was a good idea of a taxi company giving its 'safe' drivers a vacation as a reward."

"A still better idea would be to give its unsafe drivers a permanent one."

Students at the University of Edinburgh have voted to wear red gowns hereafter instead of the traditional black.

Man is not the creature of circumstances. Circumstances are the creatures of men.—Benjamin Disraeli.

"SICK HEADACHE?"

IT is not necessary to give-in to headaches. It is just a bit old-fashioned! The modern woman who feels a headache coming on at any time, takes some tablets of Aspirin and heads it off.

Keep Aspirin handy, and keep your engagements. Headaches, systemic pains, come at inconvenient times. So do colds. You can end them before they're fairly started if you'll only remember this handy, harmless form of relief. Carry it in your purse and insure your comfort while shopping; your evening's pleasure at the theatre. Those little nagging aches that bring a case of "nerves" by day are ended in a jiffy. Pains that once kept people home are forgotten half an hour after taking Aspirin! You'll find these tablets always help. In every package of Aspirin tablets are proven directions which cover colds, headaches, sore throat, toothache, neuralgia, neuritis, sciatica, and even rheumatism.

The tablets stamped Bayer won't fail you, and can't harm you. They don't depress the heart. They don't upset the stomach. So take them whenever you need them, and take enough to end the pain. Aspirin is made in Canada.

BAYER

HER LITTLE ROMANCE

And It Ended Like the Story in the Book.

By Margaret Munro.

It was a "pulsating romance" in Pamela's favorite weekly which gave her the big idea. To the author of that story, it was probably just a story which he had written, sold, and forgotten. But to Pamela Trench, living a lonely life bounded by an office chair at Messrs. Batswick & Hardman, Auctioneers, and Mrs. Humphrey's third-floor back, it was an invitation to open the door to romance.

For if the writer had been able to see through the dingy walls of No. 15 Eastern Terrace, he could not have more faithfully reproduced life as it was lived by Mrs. Humphrey's lodgers. The lonely little typist in one back room—that was Pamela; the rather nice but painfully shy young man on the floor above—that would be Derek Platt.

The worn linoleum on the stairs, and the growing layer of dust as one mounted them, telling its tale of Mrs. Humphrey's rheumatism and her staunch belief that "one couldn't expect a hotel for thirty shillings a week, bed and breakfast"—all was set down so vividly that Pamela almost imagined that the author must have sat at the Humphrey table at some time in his life.

Having described life as lived at No. 15 Eastern Terrace, in a wealth of detail, however, the author had gone on to deal with things that surely never happened in Mrs. Humphrey's boarding establishment. In that dingy house, with its dirt and drabness, he had introduced romance—a romance between the third-floor back and the room above; a romance which had turned the worn linoleum of those fourteen treads into a ladder to paradise.

As Pamela read, something deep within her stirred to life. She had always believed in romance, but never before had she believed that romance could lurk in such a house. And at that moment she realized something else—why she had been thinking so much about Mr. Platt, pitying him as the one mortal in the house who was worse off than herself.

For awhile, being a woman, she could see that her room was tidy and comfortable, a half-open door had revealed to her more than once that Mr. Platt's room was untidy and comfortless.

"Only a man would stand it," said Pamela, with the wisdom of twenty-four years. "No wonder he goes out nearly every evening!"

She looked round her room—at colourful cretonne curtains bought with money saved out of lunches, and easy-chair which had been a Christmas present from an aunt, her bookshelf in a corner, and her own pictures which had replaced the inevitable "Highland Cattle at Sunrise." And was always home a half hour and a half before Derek Platt returned, and in an hour she could transform his room from a frowsy, comfortless "bed-sitter" into something cleaner and more comforting.

Mr. Platt would think that Mrs. Humphrey had reformed, while she would have the thrill of doing something in secret for a young man who—well, she had never dared to analyse her feelings, was not even sure that one could have feelings towards someone who had only said "Good night!" half a dozen times when passing on the stairs. Anyway, she was conscious that Derek Platt was not as other men.

She started her role of fairy godmother the following evening. Hurrying back from the office, armed with soap and a brush, she boiled some water, and scrubbed the floor until the pattern of the linoleum stood out in startling relief. Then she dusted the room and cleaned the windows. And then judged the time to retire downstairs to her own room, with the knowledge of something accomplished.

Two nights later she returned armed with a clean cover for the chest of drawers, and took the old one away to be washed in the privacy of her own room.

No true romance, as is well known, ever stands still. This one was no exception. Having tasted the thrill of possessing a secret, Pamela daily discovered new tasks. She even once, greatly daring, mended some socks that were spread out, with the rest of the returned laundry, on the bed, and did not blush when she passed the owner of the socks on the stairs an hour later.

What Mr. Platt thought of it all—whether he troubled to think at all—she did not know. He still passed up the stairs to his room and downstairs again with no more than a diffident "Good-mornin.!" or "Good-night!" Yet something within her—either her mothering instinct or her sense of the dramatic—was satisfied.

It never occurred to her that her innocent deception would end. But end it did. A bunch of chrysanthemums, purchased at the local stores on her way home one autumn evening, was her undoing. She had intended to buy some for herself, but on seeing them she suddenly thought of that other room which never saw a flower. An extra shilling changed hands, and the deed was done.

She placed them in the one vase she possessed, ran up the stairs, and left them on the chest of drawers in Mr. Platt's room. It was two hours later when the sound of voices reached her through her door, and shortly after someone knocked. Outside was Mrs. Humphrey, red-faced and excited.

"The police are here!" she said importantly. "There's been a robbery—and a lot of funny things happening—in Mr. Platt's room, and they want to see you!"

Robbery! And in Derek Platt's room! The room she had been entering three evenings a week unknown to anyone! With a queer sinking feeling, she followed the wheezing Mrs. Humphrey up the stairs.

Inside the fourth-floor back stood a police sergeant and Derek Platt, looking shyer than ever at this ordeal.

"You are Miss Trench?" asked the sergeant.

She nodded.

"And you occupy the room immediately below this one?"

Again she indicated agreement.

"A very unfortunate thing has happened, Miss Trench," continued the police officer. "A watch and £5 in Treasury notes have disappeared from this room within the last twenty-four hours. Whoever stole them must have passed your door, and, although I understand you are out during the day, I must ask you whether you have noticed anyone on this floor whose conduct was at all suspicious."

"I've never seen anyone up here at all," Pamela answered truthfully.

"But you've been up here yourself!"

Mrs. Humphrey blurted out the accusation with an air of triumph. It was not difficult to realize that her pride had been hurt by certain discoveries.

"I am conducting this inquiry!" remarked the sergeant stolidly. "But seeing the question has been raised, Miss Trench, perhaps you will tell us whether you have ever entered this room in the absence of the occupier?"

There was no help for it. Keeping her eyes on the floor, alternately hot and cold, she told the story, punctuated with interruptions and indignant snorts from Mrs. Humphrey, and as she spoke she knew that something that had become very precious was lost for ever.

When she came to the night that she had risked a chill in order to clean the windows—or as much of them as she could reach by imitating a contortionist from the inside of the room—Mrs. Humphrey awoke to life.

"The window-cleaner!" she exclaimed. "He charged me for cleaning these windows only yesterday. And I saw him come up, though I didn't follow him, because of my rheumatism."

Pamela pulled up the blind.

"Well, he didn't clean them," she said. "Nor did I very well. Look! You can still see the dirt where I couldn't reach it."

Mrs. Humphrey's eyes narrowed. Her antagonism to Pamela had evaporated before this new development. Besides, if the man took watches and money from one room, he might be stealing from her next.

"Then what was he doing—up here for five full minutes?" she exclaimed.

"Better come downstairs and give me his address!" said the sergeant stolidly. "This wants looking into. I may want to see you again, miss," he added, turning to Pamela, "but it's not very likely. Had to ask you some questions, you know."

Their footsteps descended and died away. With an effort Pamela looked at Derek Platt.

"You do believe that I am innocent?" she said, a tremble in her voice.

"Of course you are! Even the policeman never doubted you. Nor would old Mother Humphrey if she hadn't been so wild at discovering your——"

"Interference," said Pamela.

He shook his head.

"Say rather your dearness at befriending a lonely stranger. How can I thank you?"

He looked very boyish and eager as he took her hand and held it. She felt romance stealing back.

"You must let me repay you somehow. Now that the police are ready to vouch for us both, couldn't we forget all about this house over a little dinner next Saturday evening?"

Pamela suddenly remembered the story which had been responsible for the big idea. It had an ending just like this.

* * *

Towards the end of the meal the following Saturday night, Pamela looked shyly at a young man who had grown surprisingly bold.

"And all the time I was trying to make your room a bit cleaner you never guessed?" she said.

"Not until I saw you buy those two bunches of flowers. Then I knew," he answered.

"You saw me?"

He nodded happily.

"I'm looking after the flower department at the stores, so I live all day surrounded by masses of them. Perhaps that's why I never noticed how cheerless my room was until you took a hand. But now, if you'll let me, I'd at least like to see that your room is never without some. May I?"

She smiled her answer across the table at him.

Back at No. 15 Eastern Terrace, after seeing the latest film, they mounted the stairs to the third floor, and neither of them noticed the worn linoleum. That stairway had become a ladder to paradise.

"And you'll promise to let me go on 'charring' for you?" asked Pamela shyly, outside her door.

"Yes, until we can afford a maid. That won't be long, either. I am going to work harder than I've ever worked before—for you!" he answered.

Romance is like that! — Answers (London).

Preparedness

Love may come like a thief at night,
Love may come like a king at noon,
But be it wrong or be it right
Or be it late or soon,
There is no heart so close but he
Can capture its security.

There'll never be so thick a lid
But he will look on what is hid;
There'll never be a room so high
But he will find it by and by.

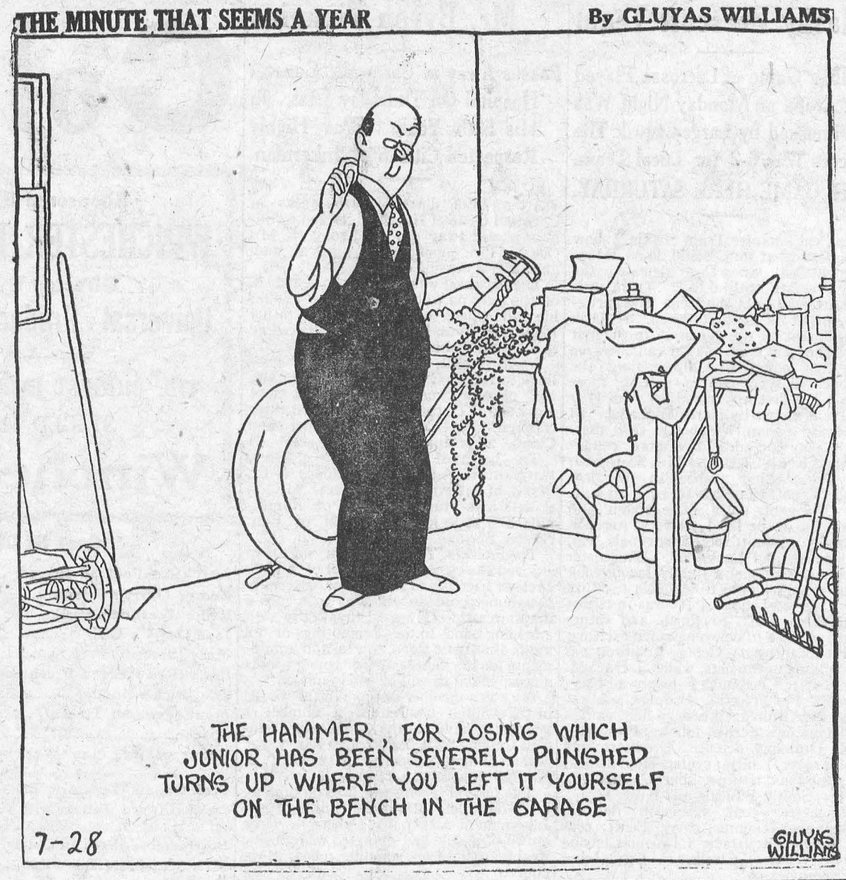
My heart, though shut in a secret place,
Wears white by night, wears rose by noon,
And scents her hair and tints her face,
For love comes late—or soon.

—Marjorie Huntoon Morrill, in the Detroit News.

Age brings wisdom; that may be why a woman will not tell her age.

THE MINUTE THAT SEEMS A YEAR

By GLUYAS WILLIAMS



Animals Chose Own Avocation

Animal World Not All Warfare—Has Dairymaids as Well As Sergeant-Majors

Have you seen the skunk artillery in action, or met the ant armies on the march?

There are those who think that hunting is about the only occupation to which wild creatures devote their lives; but it is not so, writes Craven Hill in "Answers" (London). Some of them adopt a definite "profession" just as human beings do. Thus you find among our wild neighbors soldiers, butchers, tailors, builders, dairymaids, fishermen, divers, scavengers, school masters, thieves, and even undertakers!

As examples of the "soldiers" may be cited the geese and wild ducks—who fly in a regular V formation on their long migratory journeys—and the skunk, who can be called an "artilleryman," since he will bombard his foes with an offensive-smelling fluid.

"Tailors" and "Cutters"

The best representative of the soldiering profession, however, is the ant. Amazon ants, for instance, band themselves into well-drilled armies and sometimes set out to fight against rival colonies. Raids are expeditiously carried out, the enemy "pupae" being carried off and taken home, where they are subsequently hatched by the conquerors and made to fight for them.

Butchers are represented by the red-backed shrike, known in the countryside as the "butcherbird. Having killed its victims, the shrike hangs the dead body up on a bush or tree-branch and here the food stays till the shrike is hungry enough to eat it.

Birds, of course, are the chief and obvious "builders," together with such animals as the beaver, the squirrel, and the harvest mouse.

"Tailors" are represented by the tailor-bird of India, who sews leaves together in masterly fashion for her nest. Having prepared a thread from vegetable fibres, she pierces a row of holes along the edges of the leaves she has selected. She then runs her thread through the holes as a man might thread a lace in his boot. An allied trade is that of the "cutters," represented by the leaf-cutting bees.

For the dairymaids we shall have to go to the ants again, who capture and keep plant-lice, treating the insects as a sort of cattle. The plant-lice are kept in a special gallery in the heart of the ants' nest, and the owners milk them regularly by stroking them, when the obliging "cow" produces a sweet substance known as honey-dew, of which the ant is particularly fond.

Jumbo's a Good Teacher

The prince of fishermen is the angler-fish, whose life is spent on the bottom of the sea. Having burrowed his yard-long, flat body into the sand of the sea-bed, the angler' hangs out a blue light on the end of a single tentacle, close above his mouth. Other fish, attracted by this mysterious light, come up to investigate, when the angler opens his huge maw and engulfs the prey.

Divers are perhaps best represented by the diving-beetle, which can remain under water for as much as twenty minutes. Seals, penguins, and cormorants are also expert at the game, as any Zoo visitor will agree.

One does not have to go far to find the scavengers. They exist in every country and perform a useful purpose. The best-known representatives of this age-old profession are the carrion crow, the stork, the hyena, the jackal, and the pariah dog—the three last being especially necessary in Eastern lands, where they perform the duties of a sanitary authority by eating the offal and garbage thrown outside the native villages.

Teaching is an ancient profession. With humans, as with animals and birds, it no doubt originated in the Garden of Eden. Perhaps the best example of a "schoolmaster" is the razor-bill, a bird which lines up his chicks at the water's edge and teaches his pupils to swim and dive, ducking them forcibly if they show any reluctance to learn.

In the animal world the elephant makes one of the best and most long-suffering schoolmasters. Jumbo has to teach the baby elephants for weeks before they can learn the art of picking up things with their trunks.

The Sexton's Toll

The thief, it seems probable, we shall always have with us. In the bird world it seems equally certain that he will never be totally eradicated. One of the worst of bird thieves is the osprey, who, on seeing a gull catch a fish, will pursue it for miles, finally perpetrating highway robbery by terrifying the gull so much that he drops the fish, when the osprey promptly makes off with it before it reaches the water.

In the woods the magpie and jay indulge in a less spectacular form of theft by robbing other birds' nests of their eggs when the owners are not looking.

Finally we come to the undertakers. Of these most people will think of the sexton beetle, of which there are plenty in England. Their method of burying is to dig beneath the dead body of some small bird or animal till the carcass sinks into the pit thus made. The females then deposit their eggs in the carcass and cover up the body with earth, confident that their grubs, when hatched, will have plenty of food to sustain them in the shape of the "late lamented."

It is on record that four of these sextons, working together, buried four frogs, three birds, two fish, one mole, and a couple of grasshoppers—all within the course of fifty days.

Every Little Helps

Ottawa Journal (Cons.): Suppose, instead of cluttering up the banks with more deposits which they don't know what to do with, the population of Canada spent five dollars per capita more during the next month or so than they had planned. It would mean fifty millions of dollars circulated within the Dominion and that would help start trade considerably. It is true, of course, that every one of the ten million population cannot do this. But there are those who are in a position to spend much more than the five dollars suggested. And if everybody took to heart the practical suggestion of the Minister of Trade and Commerce there is not a question that it would be a tremendous impetus to trade in the Dominion.

Too Late

The young suitor had called on his loved one for her reply.

"No, Oswald," she said, "I'm afraid that I cannot marry you."

Oswald shrugged his shoulders.

"Oh, very well, then," he returned savagely, "there are others just as good."

"Better," she retorted. "I accepted one of them yesterday."

Roofs

A country house must have a roof
with angles right,
Whimsically tilted, to shed the feignt
of night;
Pleasantly sloping, in the manner of a
hill.
Night is a long thing, solemn and
still,
Interrupted now and then by a
screech owl's cry.
Or the whispering of grasses, where
furry things creep by,
A house is, after all is said, a strange
half-human thing,
Not just a part of nature, like a bush,
or tree or spring;
And a roof that's pinioned on its back,
so that it cannot see
A friendly road, a distant barn, suffers cruelly.
Becomes a most unhappy roof, addicted to strange creaks,
To odd lugubrious murmurs, or melancholy leaks.

—Esther Pinch, in the New York Sun.

Indian Government To Make Annual Move

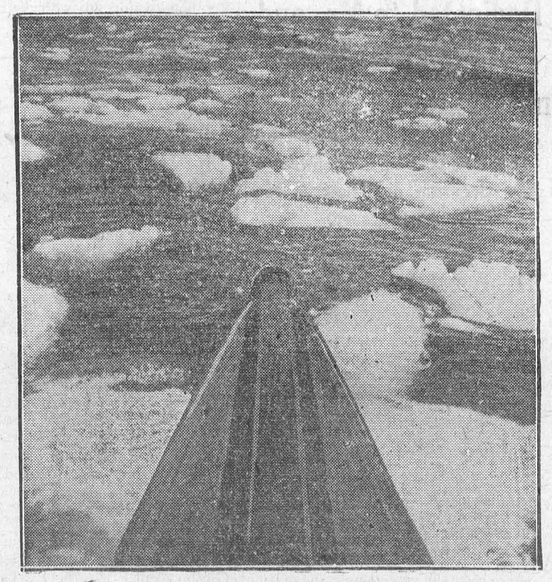
Simla.—Presently, the Government of India will be trekking once more to the plains to establish the seat of government at Delhi, the country's capital. This annual trip to and from the mountains is one that brings the Government much criticism, chiefly on the score of the expense involved in making the change. But when the criticisms are analyzed, it is generally found that those leveling the charges against the Government are invariably inclined to admit that the exodus from Delhi to Simla is necessary. Work in the plains during India's summer season is fraught with much discomfort, especially when the mercury soars to 120 in the shade, with very little shade available! It is widely conceded that the expense of the trip to the hills is more than compensated by the amount of work Britishers and Indians alike can accomplish in the cooler environment of the Himalayan ridge on which Simla is situated.—The Christian Science Monitor.

Motorcars Cross Africa Regularly

NAIROBI, E. Africa.—Through Africa by motorcar, once an achievement of note is now becoming quite commonplace. Within two days two motorcars, one from Alexandria and the other from Durban, have arrived at Nairobi.

The former carried Dr. Jizi Baum, professor of Prague University and Natural History Museum, accompanied by Herr Soit, a noted Czechoslovakian sculptor. Dr. Baum who is studying natural history in East Africa, has discovered a rare species of "water mouse," which he describes as a huge spider that has adopted aquatic life.

View of Nautilus Nosing Her Way Through the Ice



Glimpse over bow of submarine Nautilus as it doggedly plows way through ice fields of arctic in valiant attempt to reach north pole. Much of expedition had to be made under ice, a huge electric drill carving a path through the frozen subterranean spaces.

Chinese To Have Shakespeare Translated Into Own Tongue

Peiping.—Some of the most competent scholars in China are at work here translating Western clasics into the Chinese language, so that all Chinese who read may have access to the best in Occidental literature, history and science. Unlike translators of a generation ago, they are using the popular language in China, which all literate persons can read, instead of the difficult classical language, which even scholars have trouble in mastering.

The work is directed by Dr. Hu Shih, philosopher, who has settled here permanently, and money is being provided by the China Foundation, which distributes the remitted portion of the American Boxer indemnity. This Foundation has a hand in most successful cultural projects in China today. Three translators have been working for almost a year on the complete works of Shakespeare, which have never been translated into Chinese. They are first turning Shakespeare's English into Chinese prose, but may later use a sort of Chinese blank verse to suggest Shakespeare's medium.

Another scholar, sixty-five years old, has been working almost a year on Gibbon's "Decline and Fall of the Roman Empire." This scholar, Wu Kwang-chien, is the author of several textbooks in English now used in Chinese schools.

The China Foundation established a translation committee in 1930, putting Dr. Hu Shih in charge, and providing for fiftee nother members to direct the work. The task was divided into three sections: Science, history and literature.

Acquainted With the Night

I have been one acquainted with the night.
I have walked out in rain—and back in rain.
I have outwalked the furthest city light.

I have looked down the saddest city lane.
I have passed by the watchman on his beat
And dropped my eyes, unwilling to explain.

I have stood till and stopped the sound of feet
When far away an interrupted cry
Came over houses from another street,
But not to call me back or say good-bye;

And further still at an unearthly height,
One luminary clock against the sky
Proclaimed the time was neither wrong nor right.
I have been one acquainted with the night.

—From "Collected Poems," by Robert Frost.

Unique Advertising

Paris.—For about eight centuries, the rue Saint-Honore has been famous as a street for shoppers. The Merchants' Association takes a genuine pride in the street's international reputation, writes a correspondent of The Christian Science Monitor. With admirable *esprit de corps*, these business men have determined to act together in maintaining the standard of the ancient thoroughfare, and making it even better known. They have devised an ingenious publicity scheme with this in view, and are now putting it into effect. To anyone who within a stated period buys a certain amount of merchandise in the rue Saint-Honore, they will make a present of a week's stay at one of the hotels in the street, supplying a comfortable room with bath and breakfast.

Wifey — "What's the trouble, George?"

Hubby—"Hot weather."

Wifey—"Hot weather couldn't give you a black eye."

Hubby—"I got into an argument with a hasty friend about the best way to keep cool."

Lost Norwegian Dialects Are Sought in Wisconsin

Minneapolis.—Sent to America on the strange mission of locating lost dialects, two representatives of a Norwegian university are interviewing persons of Norwegian descent in Minnesota and Wisconsin communities.

It is the belief of Dr. Dirifl Arup Seip and Professor Ernst W. Selmer, of the University of Oslo, that peculiarities of their tongue, long since forgotten by their own people, still are preserved in much of their original state by descendants of immigrants to this country 100 years ago.

"Dialects in Norway have changed," Dr. Seip said, "but here they are the same, or about the same, as they were 100 years ago."

The two phonetics experts already have found twenty different dialects, of which they have made phonograph records, to be taken back to Norway and preserved for future study.

Glass Walls Installed In German School

A school with outer walls of glass and with glass cabinets for books taking the place of inner walls, in separating classrooms from corridors, has just been built for the school children of Lubeck, Germany, according to Cappel's Magazine. The ground floor has a breakfast and milk room, each classroom a bathroom, each desk in the physics department has gas, water and electrical connections, and the geography room has a projection machine by which the movements of the stars and planets are shown on the ceiling. Then there is a greenhouse in which the pupils raise plants throughout the year.

Very Polite Gentleman—"Excuse me, sir. Have I the pleasure of your acquaintance?"

Fellow-bather—"I don't think so. Why?"

Very Polite Gentleman—"Well, you see, you're — er — putting on my shirt."

Output on Farms Keeps Pace With Population

New York.—A display which shows graphically that the United States is agriculturally in about the same relative position to-day as it was sixty years ago—as the population of the country and the productivity of the farmer have each increased about 100 per cent—has just been completed by the Museum of Science and Industry in New York. Although the number of American farmers has decreased from 15.11 per cent. to 8.7 per cent. of the total population in the last sixty years scientific and mechanical discovery have enabled 10,000,000 farmers in the country to produce 144,000,000 tons of produce in 1930.

Models operated electrically, diagrams and charts on food production and distribution, from the days of the earliest agrarian populations, reproductions of plows used 5,000 or more years ago, vegetables grown in the twelfth century, England, hand operated Hindu flour mills are some of the exhibits contrasting the ancient with the scientifically improved methods of to-day at the science museum.

Big Hands and Feet Necessary for Good Golf

Big feet and big hands are the two most useful physical assets in golf. Tall, gawky "bean poles" and squat, pudgy cherubs have won golf titles, but nearly all of them had disproportionately large feet and hands. So says the Outlook and Independent.

The feet are the foundation of the golf swing. Big feet give solidity to the stance. Legs play a vital role on the tennis court, where mobility counts, but feet act as anchors in the stationary golf swing. All the golfing angels have big feet.

Similarly the hand exerts a more compelling influence than the arm on the golf stroke. Watch the top flighters in action. Note how much use they make of their hands. They are "palm and finger hitters," whereas the ordinary golfer does it all with his arms. Bobby Jones has thick wrists, abnormally big hands, fingers of tempered steel, and wears No. 9 shoes. The hands control the position of the club at impact. The wrists impart that whip-like flick which means added yardage.

Re-afforestation in Ceylon

Colombo Times of Ceylon: Year by year the forest resources of Ceylon are being steadily depleted and very little is being done to plant suitable areas with indigenous and imported trees suitable for local requirements. This failure to understand the value of re-afforestation is readily understandable, for the average politician is more concerned with the immediate future than with the requirements of posterity. Nevertheless, timber represents a valuable national asset which is being ruthlessly depreciated without any adequate provision for replacement.

World's Longest Airline Links Amsterdam-Batavia

Amsterdam, Holland.—Inauguration of regular weekly air service between Amsterdam and Batavia, a distance of 9,000 miles, said to be the longest regular air line in the world, took place here recently. The service supplants fortnightly flights started a year ago. It is planned to complete the journey in nine days.

Seven years ago the first flight from the Netherlands to the East Indies took place. Three military aviators flew to the East Indies in 17 days.

Moon

What I had waited for in the silken wind
Came over me at last. Radiant I stood
In silver. Silver the pavement's end.
Chaste every poplar, every cotton-wood.

A light in the *portales* of the hill
Opened the earth. A cricket shook the air.
On Monte Sol guitars of gold, too still
For music, said a silver prayer.

—Lynn Riggs, in "The Iron Dish."

Australian Grub Is Threatened by Fungus

BRISBANE.—Scientists are rallying to the rescue of the Cactoblastis grub, which, originally imported into Australia to destroy prickly pear, is in turn being attacked by a kind of fungus.

The Queensland Goernment is already preparing to throw open for re-settlement 11,000,000 acres of land which the Cactoblastis has cleared from prickly pear.

Meanwhile scientists are trying to evolve a method to protect the grub from the parisitic growth which already has done so much damage to the useful insect that prickly pear is starting to gain ground again in certain districts.

RUBBERS

The Rubber Season is with us again and we have a special that is sure to please you.

All rubber, 7 inch top, solid heel, snow excluding with special re-inforced back, rolled edge, pure gum foxing which protects the edges. No better rubber for hard wear. Every pair guaranteed by the maker as well as by ourselves. The price is the lowest in the trade for a No. 1 rubber

Winchester Defeats Flashy Prescott Team

Thrilling Game of Lacrosse Played at Arena on Monday Night Was Witnessed by Large Crowd. The Score Was 6-2 for Local Team. NEXT GAME HERE SATURDAY.

The local Lacrosse Team certainly showed the fans what they could do on Monday night last, when they defeated the flashy Prescott outfit 6 to 2. There was a fair attendance at the arena and excitement was at its highest pitch, as both teams fought for the honors. In the first period the local team played an offensive game that completely disorganized the visitors and succeeded in getting three goals The first was scored by John Day and the next two by Harry Williams. In the second session, Winchester still pressed the play and added two more counters when Keith Clark and Mel. Scott both beat the visiting goalie. In the final frame Prescott came out to even up matters. The game got a little rough and while some of the local players were in the cooler. Prescott scored two goals via. of Urquhart and Lockwood. Winchester came back strong and Jimmy Jacobs took a pass from Williams to make a total of six for the local squad. It was a great game from start to finish and future games promise to be even more exciting. On the local roaster George Robinson was outstanding in the nets, while J. Day, M. Scott, Keith Clark and J. Jacobs all played well. For Prescott, Urquhart, Lockwood and Graham turned in fine games.

The line-ups were as follows: Prescott—goal, Graham; defence, Urquhart and Foote; rover, Laurin; center, Hoy; attack, Lockwood and Burns; spares, Appleton, Fortier, Smith, Whiting and King.

Winchester—goal, Robinson; defence, Helmer and Williams; rover, Scott; center, McDonald; attack, J. Day and Jacobs spares, Kenney, Clarke, F. Day, Lang and Summers.

Referee, A. Quenneville; judge of play, P. Leger.

NOTES

This was Winchester's first win, but judging from the performance of their last game, they should be near the top at the end of the schedule.

Those who have not taken Box Lacrosse seriously are missing a real game. The attendance at the games has been fair, but if more people would attend just one, we are sure they would be regular patrons.

Keith Clark is just another example of "Good goods are done up in small parcels. He played smart ball against Prescott, and by the way "Cy" Helmer is coming along at top speed too.

Harry Williams is the boy to put flash in his play, and that he is effective is with out a doubt.

When finances will allow it, Manager Kellogg is going to engage a club physician and also buy a suit of armour for each of his players.

The game is naturally a rough and tumble affair, but no serious accident very often happens—as a matter of fact the rougher it is the better the fans enjoy it.

What the local team lacks is a little more polish to their play, they are weak in combination and are inclined to leave their opponent uncovered, but as they get more used to the sport this will no doubt be remedied.

Box Lacrosse is a great game, if you have not seen it, try and be present at the next contest on Saturday night. It would be worth your while just to get a glimpse of the Arena since it has been enlarged—one of the best on the circuit.

EGGS WANTED

We will pay 32c for Extras, 28c for Firsts, and 25c for Pullets and Seconds,

T. O. KEYES.

MEETING AT TOYES' HILL

The Annual meeting of the Hi-Shi-Ni Club of Toyes Hill was held at the home of Mrs. O. H. Coleman, Friday evening, Oct. 16th.

The devotional period was led by Bertha Coons with the assistance of Inez Kirkwood and Edna Johnston.

The constitution of the Club was reviewed and the officers for the ensuing year were elected as follows: Honorary Presidents, Mrs. Wm. Steele, Mrs. R. S. Peterson, Mr. and Mrs. Irwin Haggerty; Stanley Waddell; 1st Vice President and leader of the Devotional department, Gertie Hunter; 2nd Vice President and leader of the Missionary Department, Bertha Coons; 3rd Vice President and leader of the citizenship department, Linda Steele; 4th Vice President and leader of the Social department. Bruce Harper; Pianist, Ruth Harper; Editor of the Hi-Shi-Ni Gazette, Joseph Hunter. The nature of the years program and future social gatherings were discussed.

The social activities were under the supervision of Mrs. Arnold Peterson.

Dedicated to Mr. and Mrs. Aaron Sweet

The Following Poem Was Composed by Mr. F. M. Eagleson and Sent to Mr. and Mrs. Sweet on the Occasion of Their Golden Wedding Anniversary.

The air was filled with cupid's songs,
The skies were blue and sunny,
As trim and gay they sailed away
On the good ship Matrimony.
Ambition hoisted up the sail,
And Youth stood at the helm.
The Winds of Love blew from above,
And Joy filled all their realm.
When stormy waters tossed their bargue
Their faith has never faltered,
The cheerful look they always took,
Nor e'er their course have altered.
Their Hold was filled with kindly deeds
Which they dispersed with pleasure.
The cry of need they always heed,
Nor do they stoop to measure.
And now full fifty leagues they've gone,
Through every kind of weather,
The Sea of Life, as man and wife,
Thus far, they've sailed together.
How sweet the voyage must have been
Sweet, as A. Sweet could make it.
At any rate we know his mate
Was fortunate to take it.
May fortune smile upon them still,
May bright their lights keep burning,
May calm prevail as on they sail,
To Ports of No Returning.

Sudden Death of Mr. Byron Timmins

Passes Away at Cornwall General Hospital On Thursday Last, In His 59th Year. Was Highly Respected Citizen of Inkerman.

After a brief illness of two weeks in Cornwall General Hospital, Byron Timmins passed away on Thursday P. M., October 15th, in spite of all medical skill and careful nursing could do.

The deceased was born in the year 1872 on the farm on which he resided all his life and where his mother and father spent their lives, both having predeceased him a number of years ago

In April, 1901, he was united in marriage to Hattie E. Shaver of Mountain, who also predeceased him about four years ago. To this union was born three children. Mrs. Cecil Rae, Delmer and Claude, all of Inkerman.

The bereaved are his three children, two brothers, Andrew of Kamloops, B. C., W. G., of Inkerman; three sisters, Mrs. J. Powell, Mrs. Hugh Donnelly, of Kemptville, and Mrs. John Patterson of Winchester Springs.

The late Mr. Timmins was a man who enjoyed the esteem and respect of a large circle of friends and neighbours, especially the young people in whom he took such a deep interest. He was always ready with a helping hand in the promoting of all kinds of athletic work, sports, and amusements for the benefit of the young people among whom he will be sorely missed.

He was a member of the official board of the United Church for a number of years also served in the Mountain Township Council for a period of seven years, and an Honorary member of the O. Y. B. No. 127, Inkerman

The funeral service was held on Sunday afternoon, Oct. 18th, in the United church Inkerman at 2.30 p. m., where a large crowd of people had gathered many being unable to find even standing room in the church.

The service was conducted by his pastor, Rev. T. F. Townsend, B. A. B. D.

The floral tributes were beautiful, consisting of:

Wreaths—The family, Mrs. Hiram Shaver and family.

Pillow—W. G. Timming and family, Mr. and Mrs Joseph Powell and family, Community Club of Inkerman.

Sprays—Sister Ella and family, Mr. and Mrs. A. T. Allison.

The pall-bearers were: A. T. Allison, John Bailey, Ira Ennis, Wm. McMenomy Wm. Higginson, Roy Pollock.

Friends from a distance were: Dr. and Mrs. Barclay, Mr. Sam Barclay, Mr. and Mrs. Balharry, Mr. Fred Barclay, Mr. and Mrs. Eber Powell, Mr. and Mrs. C. A. Powell, Mrs. Robinson, Mr. and Mrs. Ira Shaver and daughter, Mr. and Mrs. B Shaver; all of Ottawa. Mr. and Mrs. W. Latimer, Mr. and Mrs. C. Donnelly, of Beckett's Landing. Mr. Garnett Powell of Buckingham, Mr. and Mrs Milton Barclay of Almonte, Mr. J. H. F. Timmins of Toronto. Mr and Mrs. Gilbert Davidson, Mr. and Mrs. M. Davidson and Muriel, Mr. and Mrs. George Powell and Retta, Mr. and Mrs. Thos. Johnston, Mrs R. Percival, Mr. B. Patterson and son Wesley, Mrs. H. Rennie and Russell; all of Kemptville. Also many friedds and relatives from Winchester, South Mountain and Winchester Springs were present

"Face to Face" was very beautifully rendered by Mrs. E. Brown and Mrs. T. Keyes, and Mrs. T. F. Townsend gave that very touching and sympathetic selection, "The end of the Way."

Interment was made at Knights Cemetery where many were gathered to pay their final tribute of respect to one greatly beloved and to express their sympathy with the loved ones who remain.

WHY WORRY

How often in the evening, after working hard all day,
I've sat and worried by the hour to pass the time away.
I've watched the bills parade across the playground of my mind;
I've counted how to pay them; but I always was behind.
I've known that half my investments would fail, or else would never pay,
I've felt that all my prospects would be sure to die next day,
But, looking back upon such scenes, I note—without regret—
The things I worried most about have never happened yet.

By gum, the big misfortunes that have fallen to my lot
Have never given warning, but have happened like a shot
You can guard against collision, fire, and accident by rail;
And then get struck by lightning or absorb a rusty nail
You can try to figure out how things will come up in a day;
And the first one in the morning turns them all the other way.
You can make yourself all gloomy, you can worry, fear and fret;
But the things you worry most about will not occur, I'll bet.

Now, if it's true I can't forstall my troubles and my ills,
It's simply waste of time to make whole mountains out of hills.
If I can't figure out what Life is holding in its mitt,
I ought to laugh at Life and plan what I will do to it.
I ought to sit and gaily think of new ways to succeed;
And never once to fear or care, give countenance or heed.
But how to cease this gloom, and no longer fuss or fret?
Yet, how to stop all worry—that's what makes me worry yet!

MELVINS

Mr. and Mrs. Willie Clarke and family, of Winchester Springs, spent Sunday at the home of Mr. and Mrs. Dalton Robinson.

Mr. and Mrs. J. E. Lanoue had dinner at the home of Mrs. Edwards of Winchester, on Sunday.

Show Starts at 8.15. Admission 50c, Children 25c.

WREN'S SMALL SALARY

Builder of St. Paul's Cathedral Received $20 Per Week—Work Took 35 Years.

More than 250 years ago a young architect walked among the ruins of a London church, burned down in the great fire of 1666, and as he looked skyward he visioned a great and beautiful dome that should rise above a new St. Paul's Cathedral.

Then, as he glanced downward he saw a blackened stone on which a word in Latin meaning "I shall rise again." With this stone he started building the new cathedral.

The man was Christopher Wren, whose majestic conception of St. Paul's, one of the finest examples of Renaissance architecture in England, placed him in the front rank of architects of all time.

The cathedral's great dome is the crown of London. It is really three domes, one within the other—one of vaulted stone, one of brick and one of lead and timber. On top is a stone lantern and the cross above reaches up 365 feet. The vast weight of 60,000 tons rests upon eight massive piers.

It took Wren 35 years to build St. Paul's—from 1675 to 1710. He received but little pay—$20 a week—less than even unskilled workmen now receive. Sometimes he couldn't collect his wages. And his work was difficult and dangerous. Several times weekly he stepped into a basket and was dragged up to the top of the building to see that all was going as he wished.

NATION VALLEY

Mr. Ernest Gray of Ottawa, and Miss Marion, were visiting relatives in this vicinity.

Miss Agnes Rae has returned from a ten day visit to several relatives at Reeds Mills and Vernon.

Mr. and Mrs. Wm Gutsch of Detroit, were week-end guests of Mr. and Mrs. Edgar Summers.
