Our Column

To keep on the sunny side is no hard these days.

A really modest girl is one who hates to go out on a windy day.

There is no need to put on spectacles to discoves our own faults.

Mind your own business and you won't find so many people doing it for you.

There are a lot of people who want to make trouble who can't do anything else.

If some people used their heads as actively as they use their tongue, they would soon master self-discontent, and not trouble themselves about others.

The Press is informed that Provincial Auditors are now going over the financial affairs of the Village of Chesterville, and their work is to go back several years.

If as much thought and time were given up to "encouraging" what is right service as is wasted on "disheartening," this country of ours would be a happier spot in tomorrow!

Apple cider manufactured under the supervision of the Ontario government will be placed on sale next week, marking the inauguration of a compaign to make the people of the province cider-minded.

Messrs Fennell & Wallace have their new governmnnt-inspected and approved Power Seed Cleaner now installed and are prepared to accommodate the farmers. A large number of screens are included, and separation that is impossible with a fanning mill can now be made, and better made with this new machine.

The new Provincial Treasurer, Hon. Mr. Dunlop, has announced that the estimated deficit for the Province of Ontario for 1-31-2 is over two and a half million dollars. Not a very pleasant outlook. The more one thinks about it, the more convinced one becomes the Hon. G. Howard Ferguson is a very subtle politician and he certainly knew when to get out from under.

Speaking on the subject of publicity for a chain of retail stores, serving many smaller cities and towns, the store director of a company describes the local newspaper as "our best clerk." He explains that it sees more people, gets more of their individual time, works longer hours, and tell its story with more accuracy than any other clerk they can employ. These papers are going into the homes of the people, and are assured of their friendly attention. This is proved by the tremendous growth in importance of the press in the last few years according to this authority, who declares that to-day the news paper is the backbone of any constructive sales effort.—Collingwood Bulletin.

The Ontario "Traffic Act" is to be amended so much during the present session of the Ontario Legislature that for a while a driver will almost require an interpreter of the law to travel with him to keep him out of trouble. Hereafter it will be an offense for a pedestrian to signal a car on the highway and ask a "lift" unless it is a motor bus. Another important amendment is that garage men are required to report to proper officials when a car is brought in for repairs, its owner or driver, number etc, and if the car has marks of bullets, it must be reported. Another important amendment is that a "loafer" on the highway is just as liable to a fine as a careless driver. In other words a driver is liable for driving too slow just as he is for driving too fast. There are other important amendments, and car drivers will do well to familiarize themselves with the new rules and regulations before they travel much.

Mr. David R. Frith Dies in Vancouver

A former resident of this district, born in the Melvin Settlement 78 year's ago, Mr. David Frith of 1939 West 42nd St., Vancouver, passed away Thursday, Mar. 5th, and was buried in Ocean View Burial Park the following Monday, the funeral services being conducted by Rev. David Long. The deceased had resided in Vancouver 13 years. He is survived by a sister, Miss Emma G. Frith of Vancouver, a brother, Henry of Carnduff, Sask., a son, Lorne, and a daughter, Mrs Lydia Evans, also of Carnduff, besides two other daughters, Mrs. John Tracey of Alberta, and Mrs. Floaence Brown of Peace River.

Popular Galvin Players Returning to Winchester

Amusement lovers of this community will revel in the announcement that Mr. Lannin has secured the ever-popular Galvin Players to present another play at Lannin s Hall next Friday night, and special attention is drawn to the fact that the play selected is none other than "RITZY," the screaming comedy which this clever company presented for the week to capacity houses at the Little Theatre in Ottawa. Ottawa critics were loud in their praise of this production. E. W. Harrold of the Citizen going so far as to declare it as one of the greatest comedies and complete productions ever produced by this clever company in Ottawa.

Winchester patrons will have an opportunity to witness this outstanding production with identically the same cast at a reduction in price, and it is a safe bet that Lannin's Hall capacity will be tested next Friday night.

When You Feel A Cold Coming On!

Stop it at once by taking ZUTOO TABLETS. Remember that Grippe and Pneumonia begin with a common cold. These tablets stop the pain and fever immediately, and assist nature in throwing off the cold. Taken in the beginning, the cold is often stopped overnight.

Zutoo

FOR SALE EVERYWHERE 25c per box

LOCAL AND GENERAL

Don't forget to celebrate during Hy. Bessin's Birthday Sale which starts Tuesday, March 24th—A party of bargains.

Good fresh milk for sale at C. A. Coon's store at 6c per quart.

Service will be held in St. Matthias' Church on Sunday next at 7.30 p. m. Sunday School at 3 p. m. Evensong and Intercessions on Mondays throughout Lent at 7.30 p. m.

The Young Peoples meeting under the convenorship of Dr. Sherwood presented a very pleasing and entertaining program to the large group of young people gathered in the United Church Sunday School Rooms on Monday evening.

The devotional exercises were led by Dr. Sherwood. This was followed by an interesting paper on the Canadian poetess "Pauline Johnston," by Miss Laura Dukelow. Miss Marion Vail and Miss Carrie Servage each presented a number written by this famous anthor.

Mrs B. L Carr delighted the gathering with a recitation, "Keep agoin'."

It wa decided to have a membership contest and the following were chosen as leaders: Misses Eleanor Melvin and Miss Carrie Froats for the Blues with Messrs Harold Beach and Dwight Armstrong as leaders for the Reds

No one identified with any other Young Peoples Society will be considered eligible for membership.

MILLINERY

The ladies of the town and vicinity are cordially invited to a special two days showing of Spring hats; on Friday and Saturday, March 20th and 21st.

Misses Irving and Quart

Action to be Taken

According to the Cornwall Freeholder Crown Attorney J. G. Harkness, K. C., is still reviewing evidence taken at an inquest recently held at Winchester in connection with the death of Dilbert E. Durant, a five-year-old boy. Crown Attorney Harkness stated that further action will be taken in the case in the near futu e but did not indicate the nature of the charges to be laid.

Mrs. D. G. Hutt

On Monday night March 9th, 1931 at her late residence, Maple Ridge, there passed peacefully away into the Great Beyond, Emma Perrault beloved wife of D. G. Hutt in her 54th year.

Mrs. Hutt had been as well at bedtime on Monday night as she had been recently. She spent the evening with her family as usual but took a weak turn shortly after going to her room.

Mrs. Hutt was very highly respected in her immediate community as well as in Chesterville where with her family all have been active in th work of Chesterville United Church.

Besides her husband, one daughter and three sons mourn her loss: Mrs. D. M. Elheran, Chesterville; Otho and Aura at home; Arthur, Rochester, N. Y.; one sister, six brothers: Mrs. Anne Dempsey, Lester Perrault, Ottawa; Jas, Woodlown; Harry, Iroquois; Wm., Silver Creek, N. Y Edward, Baldwin Place, N. Y.; and Frank, Chesterville.

The funeral was largely attended Thursday afternoon. The service conducted by Rev. R. E. Newman took his text, "John 11:26th verse.

The music being led by Chesterville United Church choir. Two quartetts were rendered by the mixed quartette of the choir.

The pall bearers were four neighbours: J. W. Allison, A. H. Fulton, Geo. Smith and Fred Fawcett.

Floral tributes received: Pillow, the family; Wreaths, Mr. and Mrs. Arthur Hutt and Donold; Mr. and Mrs. J. W. Allison; United Church Choir; Sprays Mrs A. Dempsey; Miss Gertrude Weegar Mr. and Mrs. M. W. Hutt and family, Session of United Church; Mr. and Mrs. A. J. Forward.

Women's Missionary Society

The Women's Missionary Society of the United Church met on Thursday, March 12th. The President, Mrs T. O Keyes conducted the Devotional period after which excellent reports were given by the departmental secretaries. Mrs. L. D. Johnston in her report for Temperance quoted from the North China Herald as follows:

"It is a little known fact, even within the confines of the Japanese Empire, that the Emperor is an absolute teetotaler. On the Royal banquet tables not a drop of alcoholic beverage is set, and, in addition, His Majesty is also an non-smoker. This good example of the Mikado has begun to exert a benign influence over the youth of Japan, and many who have been addicted to pay homage at the shrine of Bacchus or to enjoy the fragrant weed, have eschewed the practices altogether, these young men reading in the act of His Majesty n example to them all."

Annie Walker stirred the hearts of all with her Reading entitled "A Living Sacrifice." The March Committee with Mrs. D. Bruce as convenor, presented a well-prepared and novel program. The first item "Great Ships of Misssonary History" aroused both interest and imagination. Mrs. Sherman Christie told about the first ship "Sophia Hedweg," which sailed from Denmark to India carrying two missionaries, Bartholomew Ziegenbalz and Henry Plutschan. Mrs. K. Carlyle related how the ship "Candace" took Pastor Hermannsburg to Africa. Mrs. T. McQuat repeated the story of the good ship "Hope" which sailed from Denmark to Greenland's Icy Mountains with Rev. Honz on board. The story of David Livingstone's three months voyage to Africa on board "The Georg" was related by Mrs. L. D. Johnston Mrs. John Singleton described how the wheezy 'Sarah Ann" was built by Dr. David Day for the mission work in Liberia. Mrs. Dukelow gave an account of Henry Mullenberg's voyage to America aboard the ship "Two Master," a pleasing duet by Mrs. J. Bruce and Mrs. R. Crowder gave variety to the program.

Mrs. D Bruce in reviewing the sixth chapter of the Study Book dealt with the Japanese Religious Thought and the christain message, especially stressing the work of Dr. Kagawa the great Japanese scholar and preacher and "The Kingdom of God Movement" in Japan.

A leaflet by Mrs. John Hutt entitled "Thine is the Kingdom and the power and the glory," brought this instructive and interesting program to a close.

LOCAL AND GENERAL

Born at Spencerville 79 years ago, Miss Mary Adelaide Sloan died recently in Cornwall at the home of her sister, Mrs. Patrick McCabe, after a short illness.

Since the opening of the highway between Ottawa and Morrisburg, there has been considerable traffic through here, and some very large trucks have been seen.

Rev. J. A. Waddell of the United Church has been confined to the house for the past week by ill health, but is improving and expects to be able to conduct the church services on Sunday next.

The village of Kemptville lost one of its oldest and most highly respected citizens last week when Mrs. Wesley Guy passed away at her residence. The deceased had enjoyed excellent health until Tuesday evening when, as she was returning from visiting a friend in another section of the village, she collapsed.

Watch and wait for the circular which is being printed at the Press Office announcing Hy Bessin's 1st Birthday Sale. It is a year since Hy. first rode into town, and he's going to celebrate with one of biggest sales he's ever staged. Hy. spent the early part of the week in Montreal, buying new spring merchandise which he will feature during this Anniversary Sale, which starts on Tuesday, March 24th.

Latest intelligence from Toronto brings the cheerful news that Mrs. E. Flora, who was operated on for appendicitis on Monday of last week, and whose condition for a few days was quite alarming, is now gradually improving, and if the improvement continues she will, in a few days, be fairly out of danger. Mrs. Flora's many friends will be greatly relieved as well as pleased to learn that she is now improving.

Somewhat Crowded

Owing to late demand for advertising space, we are compelled this week to hold all editorial matter and considerable news and correspondence. We hope to remedy this next week.

Clearing the Highways

With a gang of twenty or more men, two motor snow plows and the help of good mild weather, and under the direction of Mr. Joseph Robinson, Road Sup't for this section oi Highway No. 31, the road is now clear for car traffic between Morrisburg and Ottawa. In fact most of the highway is as clear as in the Summer, and while there are a few cuts through drifts, where one has to be careful if a car is coming in the opposite direction the travelling is good. For a few days the highway was blocked, the longest time all winter, and this last blocade was what the Supt. termed a 'rip-snorter."

His Sermon Broadcasted

Many listeners in had the pleasure on Sunday afternoon between five and six o'clock, of hearing a splendid sermon preached by one whose voice was familiar and who is remembered by thousands in Eastern Ontario. We refer to Rev. John Webster, for many years a Methodist minister, and who was pastor in many appointments in these parts of Ontario. Mr. Webster now lives at Syracuse, N. Y. On Sunday he celebrated his 84th birthday by preaching in one of the big city churches, and his sermon was broadcasted His voice was strong and clear, and his sermon sound and inspiring. Many in Winchester heard with delight their old pastor and friend, Rev. John Webster.

Police Court Records for Year 1931 in County of Dundas

Number of cases tried 301; cases under the Highway Traffic Act 150, (36 for reckless driving), cases under the Liquor Control Act 68, (4 intoxicated in charge of car), assaults 15, theft 13 vagrancy 7, infractions of Game and Fishery Laws 10, robbery with violence 2, smuggling 1, cases under other Ontario and Dominion Statutes 35, Total 301. Total fines and fees collected, $4580.85.

Paid to Provincial Treasurer $2069.20, Inspector of Prov. Police 965.00, Municipalities 929.00, Constables 362.80, Witnesses 117.85, Dominion Government 110.00, Crown Attorney 20.00, Justice of the Peace 7.00, Total $4580.85.

John McCormick, Police Magistrate for the County of Dundas.

Unique Incident

Families disperse and scatter to different parts of the world, sometimes seldom or never reassembling. On Feb. 20, 1931 at the home of Mr. Robert Rennick, Winchester, representatives of six different families met at supper. They were sons of five sisters and the daughter of one brother, whose parents were the late Thomas and Nancy Crant Christie, Mrs. Grant whose father was W. B. Christie, Thomas Mundle whose mother was Annie Christie, Ernest Grey whose mother was Rachel Christie, Howard Nesbitt whose mother was Elvya Christie, Eardley Coons whose mother was Nancy Jean Christie and Ward Nesbitt whose mother was Lucy Christie, also three great-grand children of W. B. Christie, Eleanor, Bettie and David Melvin, these three were great great great grandchildren of Lewis Grant, pioneer land surveyor of Ontario, and Deputy Minister of Crown Lands.

It was proposed to hold a reunion of the Grant and Christie families sometime during the coming summer.

Movies on Saturday Night

SOCIAL AND PERSONAL

Mrs. D. H. Weir, who was visiting her mother at Burford, Ont., has returned home.

Mr. Keith Munro, of the staff of writers on the Toronto Daily Star, spent the week-end guest of his mother here.

Mr. and Mrs. L. McIntosh attended the funeral of the late Mrs. Gard Hutt, held at her home at Maple Ridge.

Mr. and Mrs. Jas. McLaughlin received the sad news from New York city, March 17th, that their Nephew, Eathan McBride was run over with a truck and killed.

Miss Gladys Barrigar of Mountain was successful in passing her Piano Examination of the Toronto Conservatory of Music which was recently held at the mid winter examination held in Ottawa.

Mr. H. B. Fetterly, Supt. of the School for the Deaf at Belleville, and formerly P. S. Inspector for Dundas, was in town for Sunday and Monday, and was greeted by many of his friends here. Mr. Fetterly is looking well himself and reports his family well.

Miss Edith Stewart will receive customers for Hair dressing and Marcelling at the home of Mrs. John Haynes, Clarence Street.

The announcement is made of the marriage at Ensenada, Mexico, of Donald A. MacMillan and Irene Kerk, a cousin of J. A. McNaughton, M. L. A. for Stormont, and who has many friends in this section. The wedding took place on February 21st last.

Mr. and Mrs. A. Sweet left here on Wednesday afternoon for Atlantic City where they expect to spend a few weeks enjoying the warm sun and ocean breezes. Mr. Sweet has not been in the best of health for some time back, and his physicians advised a short vacation. Mr. and Mrs. Sweets many friends wish them a pleasant trip and safe return.

Mr. and Mrs. Ernie Shannette, of Williamsburg, who are moving from their present home, were presented with six dining room chairs and an address by their neighborhood on Monday evening last. The address was read by Miss Hess and replied to by both Mr. and Mrs. Shanette.

Berlin Establishes Rocket Flying Field

Berlin—Berlin now has a rocket flying field with an area of about two square miles, and experimenters hope the day will come when regular postal rocket service costing 37 cents for an ordinary letter can be established between here and New York, while a flying time of half an hour.

Present experiments deal with the perfection of a gas which can be developed as the rocket flies, as the creation of gas in exact volume to the rate of speed is an essential feature of determining a rocket's capacity to fall at a given destination. It is believed that mathematical exactness of line of flight can be obtained when a rocket is able to travel in the thin-air zone, six or eight miles above the earth.

References in the German press to the precision of the "Big Bertha" shells, in discussions of the possibilities of rockets, suggests the extraordinarily dangerous character of the experiments now being carried on at the Berlin rocket flying field.

Whalers estimate that the average whale can cover a distance of about 12 miles in an hour.

What New York Is Wearing

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

A chic little tailored model with the French guimpe effect that youth adores.

It's charming in pilot blue light weight woolen with lighter blue flat crepe. The belt is suede in a still deeped blue shade.

The circular skirt cut with gores, gives that flatness over the hips so modish.

The pattern also provides for long sleeves.

Style No. 2964 may be had in sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust.

It's indispensable for sports in wool jersey with pique contrast.

In printed crepe silk it is fashionable with plain crepe trim. In plain flat crepe, a contrasting shade is smart.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

Spring

The crisp coolness of the Spring night,
Winds whispering of more tropical climes,
Earth odours assailing the nostrils,
Tantalizing and vague.

Steps lighten—bent shoulders straighten
Eyes rove and mouths soften—
Some wistful, some sad;
Voices deepen with subtle meanings.

Nature—smiling and cynical
Slowly arouses herself
From her deep sleep
And inevitably leads the
Orchestra of human emotions.

—By Patricia Morgan.

Home of Browning Offered For Sale

London.—A charming old-fashioned house at No. 19 Warwick Crescent is for sale. It is the home where Robert Browning lived for 26 years, from 1861 to 1887.

There he wrote "The Ring and the Book,' and kept geese in the garden pond.

There are more people sticking to the straight and narrow path nowadays. They have to, the traffic is so heavy.—Calgary Herald.

"Weel, Jock, Ah hear ye've got married." "Aye, Donald." "An' what kind o' match did ye mak?" "Weel, Donald, to tell ye the truth, Ah didna do sae weel as Ah expected, but Ah dinna think she did either."

Sewing-machine needles which have become blunted can be sharpened by stitching a few inches through a piece of sandpaper.

An Aberdeen lady was suggesting to her husband that it was time she possessed a motor-car. "Na, na," he replied, "ye'll jist be content wi' the splendid carriage nature has given ye."

The Mistress: "But why do you want' to give notice?" The Cook: "I can't bear the new maid, mum. Why, she puts on more bloomin' swank than wot you do."

Halifax, Nova Scotia.—Nova Scotia fishermen landed during the season over 530,000 pounds of lobster, which represents a record catch. Of the total 126,800 pounds were shipped in the shell, while 2,024 cases of canned lobster were packed.

A Prayer

(The following is to be found in Chester Cathedral).

Give me a good digestion, Lord,
And also something to digest;
Give me a healthy body, Lord,
And sense to keep it at its best.
Give me a healthy mind, good Lord,
To keep the pure and good in sight,
Which seeing sin, is not appalled,
But finds the way to set it right.
Give me a mind that is not bored,
That does not whimper, whine or sigh;
Don't let me worry overmuch,
About that fussy thing called "I."
Give me a sense of humor, Lord,
Give me the grace to see a joke,
To get some happiness in life
And pass it on to other folk.

Windows

Very often do we not find that houses express the personalities of the people living within its walls? This question can best be answered by asking another. Did you ever notice the different look a house puts on when another owner or tenant dwells within? Perhaps you have had occasion to go back to your old home after a long absence. The house is occupied by strangers and as you look over the old familiar rooms somehow they are familiar no longer. It seems so different one might almost think the plan of the house had been changed.

Sometimes, even though it were our own loved home, we must admit the change is for the better. The furniture may be more suited to the different rooms, some of which are newly painted and papered. A window may be draped in a manner unthought of by you and be much more artistic, so that thinking magnanimously, we are glad the old place has blossomed out. Then again it may be everything has deteriorated. The walls are smoked up, the once carefully kept floors are scratched and dull and the rooms cold and uninviting.

So each house reflects unconsciously the personalities within. The windows smile their welcome or look dingy and forbidding and it doesn't matter if the home is large and commodious or small and commonplace, those windows with curtains plain or gay and silky, sparkle and shine, telling of the cheery housewifely care within or are dull and uninteresting. The windows are the eyes of the home.

And the personalities within that home mirror from the human eye the window of the soul. The cheerful look expresses the bright personality within and gives glimpses of thought and purpose. Character is revealed and all unconsciously we tell what we are.

These Are Good — Seafoam Candy

3 cups brown sugar, ½ cup boiling water, 1 tblsp vinegar in water. Let boil till it hairs from the spoon in a long hair. Beat the whites of 2 eggs, then beat syrup into whites of eggs. Add ½ cup nut meats if desired. (This can be made with white sugar as well when a little vanilla improves the taste).

Butterscotch Pie

Put 1 cup of milk in double boiler to scald. Combine 3 level tblsps. cornstarch and ¼ teasp. salt with ½ cup cold milk. Then add to hot milk, stirring until smooth and thick. Cook 2 tblsps. butter and 1 cup brown sugar until sugar is well mixed and bubbly but do not cook to caramel. Stir sugar into cornstarch mixture. Then add 2 yolks of eggs beaten light first diluted with a little of the hot mixture. Turn the filling into a baked pie crust and cover with a meringue of the white of the two eggs and ¼ cup white sugar. Let bake slowly 10 minutes. Serve when partly or wholly cold.

Twilight Hour Story — About Wee Chickies and Other Little Friends

Chapter 14

Do you remember about the lovely black and gold butterfly Mamma Lady found nearly frozen on the porch two mornings ago? Well, all day long it stayed on the window very quiet in its little corner. It didn't seem to be dead, but it wasn't very much alive either. So she just let it sit there because it looked so pretty. But when she came down this morning to get breakfast it was on the curtain with its wings tightly folded together. Good old Mr. Sun had kept on shining on its cold stiff little feet and dainty wings to make it well as fast as he could. But today, when Mamma Lady touched it and said "Good morning" really answered her and said "Good morning" by spreading its delicate wings out an back, out and back, out and back, slowly and gracefully. All at once it fluttered its wings and flew onto a plant in the window, then before Mamma Lady knew what it was doing it flew over onto her shoulder and stayed there while she got breakfast. I wonder if it was asking for some breakfast. It had to ask in a different way because it couldn't talk. It couldn't say "meow," like the kitty cats, or "peep, peep," like the chicks or "Bow-wow" like Rover, or "I'd like some breakfast, Mamma, please," like little girls and boys can.

However, Mamma Lady was sure it was asking for some breakfast. She looked at it very closely, but she could not see that it had a mouth. It had two big eyes alright, but she wondered how it could eat, what to feed it, for two long days since she found it was a long time, and it didn't have the yellow of the egg in its tummy, like the wee chicks had at first, either.

Then Mamma Lady thought she often used to see these dear little butterflies in the summer on lovely flowers that have honey away inside the blossom, but she never noticed how they got the honey out. Do you think, perhaps, if it liked honey it would like sugar? Well, Mamma Lady got a pinch of sugar and put a drop of water on it in a saucer on the window, then gently she lifted the butterfly off her shoulder, when it had its wings closed, and then she watched to see what it would do. I know you can never guess how it ate the sugared water. But it did drink it and it drank for a long time too, for it was pretty thirsty. This is what it did: Right in between the eyes it had a little curled up whistle, the kind that when you blow in the end the curl flies out straight, only this little curl was so very small, not any bigger around than a fine thread. Mamma Lady often noticed that curl on the butterflies, but she didn't know what it was for. Now as soon as it saw the water and sugar that little curl unfolded long and straight. It felt around for awhile with the point and then it dipped it right into the middle of the sugar and water and kept it there for a long time. Do you know what it was doing? It was sucking it up just like you do when you have an ice-cream soda and you drink up that good creamy juice through the straw. After it was through eating it grew pretty lively and started whirring its wings. Do you know what that is like? It means it stands still but makes its wings go so fast you can hardly see them. I wonder what it did that for. Just because it felt good, I suppose.

Next Week—"The Chicks Again."

Britain's Radio System Lauded

Sir Harry Brittain Says British Broadcasting Almost Ideal

London — Unprecedented support from British listeners, full business efficiency, remote parliamentary control and the entire absence of commercial motives have produced in the British Broadcasting Corporation a system as nearly ideal as human forethought can make it, Sir Harry Brittain recent declared in a recent interview. Sir Harry Brittain has been a frequent visitor to Canada and is well known as one of the organizers of the Imperial Press Conferences. He is an honorary graduate of McGill University.

According to official figures of the B.B.C., the number of licenses in Great Britain today is in excess of 3,500,000, representing at least 12 million listeners. Licenses increased at the date of 19,000 a month in 1928, 27,000 in 1929. In the last two months the net increases were. December 85,012, and January 109,109, constituting records for the past five years. Circulation of the listener's paper, the Radio Times, was one and a half millions a week, and produced a profit of $180,000 which the B.B.C. used for new equipment. The total expenditure of the B.B.C. in 1929, with 20 stations broadcasting some 70,000 hours was under $5,000,000.

Varied Programs

"Varied dual programs of the highest class are entirely satisfactory to the vast majority of listeners, and that the number of listeners has increased and is increasing today at an unprecedented rate goes to prove this," Sir Harry said. "The B.B.C. has led the way right along the line and more and more of our neighbors in other countries turn to the British national and regional programs for their enjoyment. As time goes on, a decreasing proportion of our people tune in to continental stations. The B.B.C. has never played down, there is an entire absence of commercial motives. It has given its best and that best is intensely appreciated today," he said.

"The debt which is owed to broadcasting by British music and British musicians is immeasurable, and the national mind is being ever broadened by the excellence of the addresses regularly given by leading men, each an authority in his own particular sphere," he said. "Ten years ago, on one of my many visits to Canada, travelling on the old Victorian, I took a little part as a passenger in what proved to be a successful attempt at inter-oceanic telephony. It was at that time we can date the genesis of broadcasting as we know it today. In the ensuing 10 years, the development of this great public utility service has been indeed amazing."

Canada's Opportunity

"With world examples before her, Canada has a unique opportunity to establish a national broadcasting system on the most successful lines, taking the best from well-tried experience of other lands. As an old world traveller, I am always ready to investigate foreign practice and methods to see where we can benefit by adopting from abroad more effective treatment of any subject. In many cases, this can be done to our great advantage. Canada, I know well, from coast to coast, and realize, of course, that conditions differ in such a large country, when compared with those in a thickly populated little island such as our own, but I also know that in the development of broadcasting, Canada is seeking for the best and I am convinced that she will get it.

The system as it exists here will doubtless have to be modified, and perhaps certain suitable methods of American and German practice added to quality such a system for the great areas in some of the more thinly populated provinces. Such a modification should not be difficult to evolve. I have crossed the Atlantic so many times that I feel as much at home in North America as in England. Knowing both sides, I firmly believe that as far as broadcasting is concerned this little island receives of the best, and only the very best is good enough for Canada," Sir Harry said.

Salisbury, Eng., Seeks Stones From Salisburys of America

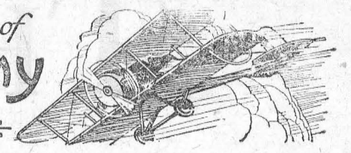
Salisbury, Eng.—Stones from every town in the world named Salisbury are to be sought for construction of a new bridge across the River Avon here. These towns will be asked to send suitably lettered stones.

Among the American towns are the Salisburys in Connecticut, Maryland, Massachusetts, Missouri, North Carolina, New Hempshire, New York, Pennsylvania and Vermont. A point may be stretched to include Salisbury Mills and Salisbury Center in New York and Salisbury Cove in Maine.

The greatest fault of a penetrating wit is to go beyond the mark.—La Rochefoucauld.

Social Geometry.—"Don't you know her? Why, she lives in the same square with you." "Yes, but she's not in the same circle."

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE



Yes Sir, that bear just poked his face out from among the bushes and looked at us. We had no gun—not even a knife. It was a great brute of a grizzly, and with her came a half-grown cub. Probably you have never seen a grizzly loose in the mountains. If you haven't, you have no idea how big one looks. This one seemed to be as big as an elephant, and she looked as mean as poison. It was growing darker every moment and in that narrow valley, shut in by the mountains, almost anything might have happened. Mrs. Grizzly is a bad one to meet at any time, but when she has a cub with her, she is not the company one would choose to meet in a lonely spot.

Meanwhile the old bear was getting nervous—sort of sniffed around a bit—and then—well, she and her cub started down to look us over.

Very likely we should have shouted and waved our arms and yelled "Shoot! Shoot!" but I never saw a grizzly that one could talk out of an idea. No siree! We did no such thing—we cut and ran pell mell for the plane. It was less than a hundred feet away but it seemed as if we would never make it. And all the time the bear and her cub were ambling briskly toward us. I reached for the petcock of the gas tank, turned it on and held my helmet under it until it was full and soused it over the wings and body of the plane. Time and time I emptied the helmet of gasoline on the plane—and every time I looked up, there were those bears coming closer and closer.

As I threw the last helmet of gasoline over the plane, I looked up, and there—just across the plane—were the bears. Believe me, girls and boys, those bears weren't sight-seeing—they were out hunting trouble—and that particular trouble was us. I tried to light a match, and did you ever try to strike a match in a hurry? The first one didn't light at all—the second broke—but the third one lighted.

I held it to the edge of the wing—and it seemed as if it would never catch fire. As it caught, the old bear was scarcely a couple of jumps back of me. Suddenly the flame flared up. Scottie and I started to run—to get away from those bears and the plane, which I knew would shortly explode.

We had hardly gone a hundred feet, when Scottie got between my feet, and down we went in a heap. Scarcely had we struck the ground when the flames reached the gas tank, and WHAM!—it blew up. For a minute the air was full of burping debris. What a sight!

It seemed like as if those bears hadn't started to run until they heard all that noise. Then it was a case of every bear for himself and never mind your neighbor. They fairly flew. The cub's legs were short and stubby, and he had to take two jumps for his Ma's one—but—as they went out of sight, they were so close together that they looked like one big bear.

Meanwhile the wreck of the old plane was burning brightly. Scottie and I hustled over to the edge of the wood and gathered up the driest wood we could find.

All night long we kept the fire blazing brightly, for a good camp fire is mighty friendly and comfortable on a bleak, chilly night when you are out in the open; but we didn't hear of those bears from the time the gas tank exploded. Each time the red blaze began to die down, Scottie would whine and pull my coat until I awakened and put on some more wood. Probably Scotties thought he saw more bears in the black shadows. Certainly he kept watch during the first part of the night. Later on he must have fallen into a deep sleep, for something began to take place which might easily have ended all our adventures then and there.

Over at the edge of the clearing a little crimson tongue of flame gradually curled up and grew larger—crept forward and spread more little curling flames like an advancing army of red-coats. But we were sound asleep and saw nothing of it. Meanwhile the dangerous little flames grew larger and spread back of us through the woods, threatening to ring us around with a wall of fire.

Sunday School Lesson

March 2. Lesson XII—The Use and Abuse of God's Gifts—Luke 12: 16-21, 41-48. Golden Text—Be not drunk with wine, wherein is excess; but be filled with the spirit.—Ephesians 5: 18.

ANALYSIS.

I. A CERTAIN RICH MAN, 12: 16-21.
II. WATCHFULNESS, 12: 41-46.
III. THE COMING OF "THE SON OF MAN," 12: 47, 48.

I. A CERTAIN RICH MAN, 12: 16-21.

V. 16. This story is not so much a parable as an illustration, but an illustration of what? There are two morals which might be drawn from it, and it is not clear which is primarily intended. First, the story illustrates the extreme uncertainty of human life; man who "knows not what a day may bring forth" is always making plans for the future; indeed some men so "live in the future" as we say, that they never enjoy today. Let us make the most and make the best of life while we have it, for we do not know how long it will be ours. But while this might be the chief meaning of the story it is not probably so. Rather, it seems we are given a picture of an entirely selfish and unspiritually minded man. He has put together enough wealth to last his own life-time, and that is all he cares about. For the future he intends to "have a good time." His idea of a good time is a life of eating, drinking and merry-making. His ideal of life, therefore, is that of one long, easy, unadventurous and selfish holiday. He had found no happiness in his work as a piece of human service; his work was a bore, and his life begins where his work ended. It has often been noted, in modern times, that men who make money very quickly and then retire to enjoy themselves, rarely live to a full age. A life that has no real, unselfish interest to feed it is apt to flicker out. Let a man, then, find his true life and happiness in faithfully and hopefully performing each day's task as it comes.

. 19. "Soul" does not mean here the higher and spiritual part of our nature, but rather the "self."

V. 20. The man has had no real love for anybody in his heart. The wealth that he has so laboriously accumulated is useless to him, and so far as he is concerned it all goes for nothing.

II. WATCHFULNESS, 12: 41-46.

The subject of this parable as of that which precedes it is "watchfulness" as a duty. Peter here asks whether the duty devolves upon everybody or only upon the disciples. The answer is that it devolves in a special way upon the disciples, for they are "stewards of the mysteries of God," and it is their task to "feed my sheep." It seems that the Church of later years understood this parable to apply to ministers and church officials. As the expectation of the immediate second coming of Christ began to fade away, and he seemed to "delay" (v. 45), there was a tendency for the church leaders both to grow lazy and self-indulgent, and also to "lord it over" their congregations. The parable is used as a warning to them.

"Temperance is not confined to the use or non-use of ardent spirits. It operates in every sphere of life. The lavishing upon self of the gifts of God is intemperance of the highest order. Therefore let us not be drunk with goods, wherein is excess, but strive to be filled with the Spirit."

III. THE COMING OF "THE SON OF MAN," 12: 47, 48.

When we speak of the duty of watchfulness, we are generally thinking of watchfulness against temptation; that is not at all the meaning here. Here is a watchfulness for "the coming of the Son of Man." What are we to understand by this? The Early Church believed that Jesus would very shortly return to inaugurate the kingdom of God in power and glory, but Jesus did not come again, at least not in the way expected. The Church as a whole today no longer expects the speedy second advent of Christ, and this teaching, therefore, presents grave perplexity to many Christian hearts. It is an essential part of the Christian hope that the kingdom of God will surey come. The day and the hour are known to God alone; but it is far from clear whether the old expectation of a physical return of Jesus to this earth on the clouds of heaven is what Jesus really meant. It is clearly suggested in the Gospel of John that the coming of the Spirit is the second coming of Christ (John 14: 18), and this may be nearer to the mind of Christ. Again, every great crisis in our own lives or in the life of the world is, or may be, a coming of the Son of man to us, if we will let him come to us in our extremity. The Church plods on its weary way with doubts and deficits and inertia. "Dare great things for God," said William Carey, "and expect great things from God." The Son of man is always coming to us, if we are watchful. If this does not exhaust the meaning of the passage, it is at least a truth we can clearly grasp.

PAVLOVA DEAD

(January 31, 1885—January 23, 1931)
(From Poetry)

Pavlova, will you dance no more?
Will the tulip shut up in the earth?
Will the swan forever fold white wings?
Will the flute go silent
And the ray full of rainbows flicker and fall?

Pavlova, your foot is lighter than the perfumes of lilies,
Brighter than the sparkle of waves,
More musical than the thrush at twilight.
Somewhere—oh, softly—

Pavlova, will you dance no more?

—Harriet Monroe.

March

By Mary Carolyn Davies

March is the month for such wonderful things!
The winds are white eagles; we feel their great wings.
March is the month when the whole earth is making,
Sleepily, drowsily, ready for waking.
April is coming, and May, and oh, soon
It will be June, June, June!

Crime in Canada Shows Increase

Convictions 24,097 in Last Year of Record—21,720 Previous Year

Ottawa.—Crime is on the increase in Canada, according to a report issued by the Dominion Bureau of Statistics on offences dealt with in the courts during 1929. Convictions for indictable numbered 24,097 in 1929 as compared with 21,720 in 1928. At the same time the pecentage of convictions to charges laid was 81.49, the highest of the decade.

All types of crime appear to be advancing in about the same degree, figures show, although numerically theft shows the greatest increase, moving up from 7,870 in 1928 to 8,777 in the year under review. Murders show an incease of from 19 to 26, manslaughter from 35 to 49, assaults of all kinds from 2,673 to 3,114. On the other hand offences against decency were reduced from 439 to 402. Burglary, shop and housebreaking increased 17 per cent. Incendiarism and other malicious acts against property increased 21 per cent., while forgery advanced by 30 per cent.

In seeking the cause of the growth in criminal tendencies, the conclusion is reached in the deport that crowded cities are one of the most important factors. "As the population increases," the report says, "not only does the number of crimes increase, but the per capita rate increases with mathematical regularity. A calculation shows that, between 1901 and 1929, crime has increased approximately as the square of the population, and in support of this it may be pointed out that the records show the crime rate in the judicial districts including the cities of Montreal, Toronto and Hamilton runs from 300 to 500 per 100,000 population, while in the rural districts the crime rate averages 90 to the 100,000.

Married persons appear to be less liable to the commission of crimes. Although they represented over 57 per cent. of the population, they are responsible for only 40 per cent. of the crime. Unmarried persons, representing slightly over 35 per cent. of the population, were responsible for 53 per cent. of the offences committed in the year under review.

Japan Holds Annual Doll Festival

Tokyo.—Two little girls, dressed in brilliant kimonas, celebrated on March 3rd what to them is the finest holiday of the year, the Hina Matsuri, in the palace where they live with their mother and father, the Empress and Emperor of Japan. The girls are the Princesses Teru and Taka. Hina Matsuri is the annual girls' doll festival of Japan.

Masters of the dollmakers' art worked for months preparing dolls for the Princesses' party. Court chamberlains arranged the dolls in ceremonial fashion and prepared for the grand dinner at which the Princesses were hosts to their relatives.

Little girls throughout the Empire also celebrated the festival and even in the remote villages parents purchased new dolls and arranged ceremonial parties. Shops throughout Japan for weeks displayed dolls for sale at prices running into thousands of yen each.

Katanga Railway Now Completed

Johannesburg, S. Af.—The completion by the Belgians of the railway through Western Katanga will bring Johannesburg four days nearer England.

Many were skeptical at one time that this line, stretching away from the Congo forests and the great copper belt of Katanga to the distant Atlantic, would be completed for many years.

Constructed by the Belgians, the Katanga railway is now virtually completed, and it is expected that the last few rails will be laid shortly and the line formally opened in May. It will then be possible to travel in comfort from Johannesburg to Lobito Bay on the Atlantic Ocean, four days nearer to England than Cape Town, from any station in the Union or Rhodesia.

Sea Gulls Know Where Dinner Will Be Spread

Poughkeepsie, N.Y.—A flock of sea gulls trained by a schoolboy to follow a ferryboat from one shore of the Hudson River to the other is attracting the interest of people a Beacon and Newburgh, cities on opposite sides of the river 15 miles south of here.

In the morning, when the boy boards the ferry at Beacon to go to school in Newburgh, the gulls are resting on the river near the boat. As the ferry pulls out, they take to the air and follow it, gathering crumbs which the youth spreads on the deck. In the afternoon, when he is ready to return home, the birds are waiting on the Newburgh side and follow the ferry across the river again.

First Movie Camera Shown at Museum

London—A curious looking apparatus with no less than 16 lenses now on view in the Science Museum, South Kensington, was the forerunner of the modern cinematograph camera. It was constructed by Louis Le Prince in Paris in the year 1887.

There is also the movie camera with one lens made by him at Leeds in the year 1888, together with two spools of celluloid with silver-natched margins used by him for developing films.

The cameras have been loaned to the museum by the inventor's daughter, Miss Marie Le Prince. Both the 16-lens and the single lens camera were electrically controlled.

How good is man's life, the mere living, how fit to employ.

Unofficial Record Set By Aviatrix

Miss Ruth Nichols Climbs to An Altitude of 30,450 Feet

Jersey City, N.J.—On March 7th Miss Ruth Nichols climbed to an altitude of about six miles above New York and Long Island and set an unofficial world record for women. The sealed barograph installed in the airplane has been sent to the Bureau of Standards in Washington for calibration.

Two altimeters in the airplane registered 30,450 and 30,350 feet, respectively, when she landed after being in the air for an hour and a half. The previous world altitude record for women was set by Miss Elinor Smith when she reached 27,413 feet a year ago. The record for military airplanes is 43,066 feet, held by Lieut. Apollo Soucek, of the United States Navy, and that for commercial airplanes, 30,457 feet, held by George Haldeman.

Dressed in a reindeer-skin flying suit, fur-lined Labrador skin boots and gloves and a helmet lined with fur, Miss Nichols climbed into her monoplane which had been especially equipped and tested for the flight, started the airplane down the runway and leaped into the air at 12.33 p.m. It was the same airplane in which she set her transcontinental speed record for women last December. Persons in the streets and at windows in Manhattan heard the shriek of the metal propeller and stopped to watch the airplane as it circled over the city before Miss Nichols wheeled into the stiff west wind and began to climb through the clouds.

The airplane made some progress toward the west, "but finally, as far as making distance over the ground was concerned," Miss Nichols said after she landed, "I found myself standing still." In 30 minutes she reached an altitude of 28,500 feet and it took 20 minutes to finish the climb.

"It was an interesting experience," she said, "I'd like to try it again. The wind was surprisingly strong. It must have been 100 miles an hour—a west wind that blew me about five miles out to sea. I dropped a few times and rose again, always trying to increase my altitude.

"Doing the last few thousand feet, it did not seem as if I was moving at all. I seemed to be staring at the same fixed point below me. The clouds appeared to be a level mass and I seldom saw the earth."

"I felt warm and comfortable throughout," she continued. "The thing that amazed me most was the ease of my experience."

Belgium Honors Soldier-Pigeon

Unveils Memorial at Brussels to 20,000 Birds Killed in Great War

Brussels, Belgium—Belgium will do honor to the 20,000 messenger pigeons killed in the Great War.

A memorial to the soldier-pigeon was unveiled on the square of the pig market where pigeon fanciers have their headquarters, recently. Prince Leopold, the French ambassador, and the famous burgomaster. Max, were among those present. A delegation also attended on behalf of Belgium's war allies, led by Britain.

Simultaneously with the unveiling, 5,000 pigeons were released from the base of the memorial.

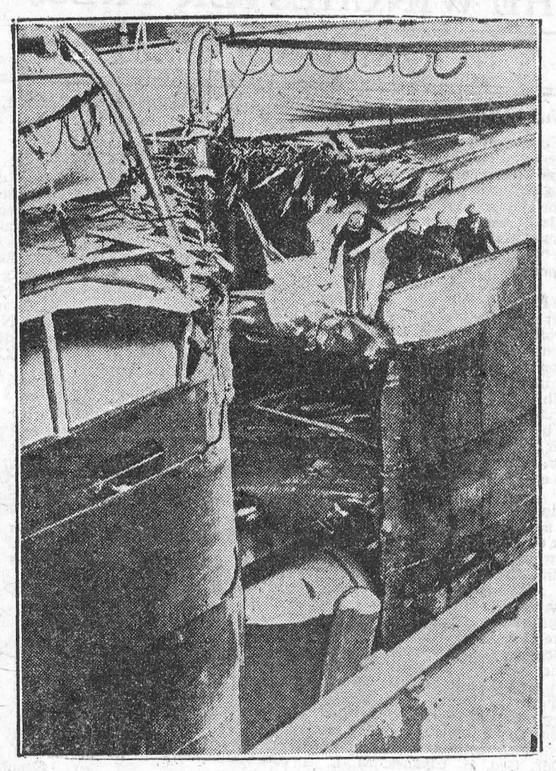
The memorial is in the form of a graceful female figure with an extended arm on which a pigeon stands with outspread wings. It has been erected by a national subscription.

Belgians, more than any other people, are pigeon lovers, M. Van Oppens, vice-president of the National Federation of Pigeon Fanciers, pointed out.

Planes Carry Food To Snowbound Astronomers

Tokyo — Five observers of the Tokyo Meteorological Observatory, snowbound in their hut at the summit of Mt. Fuji since last autumn, are being supplied fresh vegetables and fish by airplane.

Tired of a canned diet, they appealed for fresh food, and over the telephone line which links their station with the lowland they made arrangements for airplanes to drop supplies for them. They are studying high altitude air currents.



...e hole stove in the side of the British steamer William Wilberforce after collision with Norwegian steamer Bigdis at Cuxhaven, mouth of River Elbe.

Westbound Plane Sets New Record

Canadian Airways Plane Delivers Mail in Two Hours in Montreal-Toronto Trip

Toronto — Shattering the previous record by half an hour, a Canadian Airways plane carrying the mails, recently made the westbound trip from Montreal to Toronto in two hours flat.

Piloted by V. J. "Shorty" Hatton, the fast Stearman speed plane took off from St. Hubert airdrome at 9.15 a.m. and landed at Toronto airport, Dufferin Street, at 11.15, after travelling at a speed of 168 miles an hour. The time is considered particularly fast as westbound planes usually have to contend with the prevailing westerlies. The plane was favored with a fair "tail wind," the pilot stated.

The eastbound trip has been done in an hour and 40 minutes.

The weekly crop reports of the county representatives of the Ontario Department of Agriculture would indicate that the majority of the farmers have sufficient supplies of feeds to bring their livestock through the winter in good condition, A greater number of cattle will be carried over for summer marketing.

Veteran Prelate Dies in Alberta

Archbishop Grouard, Aged 91, Was Master of Dozen Indian Languages

Edmonton—Bearded patriarch of the north, Rt. Rev. Archbishop Emile Grouard, is dead after seven decades of missionary effort in Canada's frontier country. At 91 years of age, the Roman Catholic prelate succumbed on Sunday to a lingering illness at Grouard, Little hamlet in the Peace River country, named in his honor.

No living white man, it has been said, was so familiar with the Indian tribes of the north. In tending the spiritual needs of the frontier natives, Father Grouard became a linguistic expert, gaining the ability to converse fluently in a dozen different Indian dialects.

Japan Welcomes New Royal Heiress

Tokyo — The arrival of a new Princess at the Imperial Palace on March 7th caused all Japan to celebrate.

Since only male descendants of the Japanese Emperors may occupy the throne, Prince Chichibu, younger brother of Emperor Hirohito, remains as the heir presumptive of the oldest unbroken royal line in the world. The line was established in 660 B. C. and Hirohito is the 124th Emperor.

Man Impervious to High Speed In Straight Line, Say Scientists

Washington.—The theory that speed is harmful to the human system is no more true to-day, when aviation engineers look toward machines which will go 1,000 miles an hour, than it was 100 years ago when railroads first began to move at fifteen miles an hour, government scientists say.

"Man has attained speeds of over 250 miles an hour on the ground and has exceeded 350 miles an hour in the air," a statement by the Army Air Corps and the Aeronautics Bureau of the Chamber of Commerce points out. "So far as can be ascertained, there have been no bad effects manifesting themselves as a result of such rapidity. Should science develop machines which are capable of 500 or 1,000 or even more miles an hour, there is no apparent reason why man should not be able to withstand rates such as these.

"There is, however, the asumption made that flight is in a straight line. Should the line of flight vary so as to include rapid turns, then other factors dependent upon well known physical laws enter. In making a rapid turn a person subjects himself to the mechanics of the laws of centrifugal force. Just as the water in a bucket which is swung rapidly in an outward direction, so that it presses up against the bottom of the container and does not spill, the blood in the human system reacts.

"An aviator in turning rapidly has his head toward the center of the circle and the lower part of his body in the direction of the periphery. The blood from the head, due to the centrifugal force, is sent in the direction of the lower parts of the body, which are toward the outside of the circle in which he turns. The vessels in the lower part of the body, particularly the splanchnic arteries of the abdominal region, are sufficiently elastic to receive this surplus, and the aviator in making an exceedingly rapid turn causes in himself a temporary anemia of the head. The blood is withdrawn from the eyes and the brain, and he may become unconscious or may, as pilots describe it, 'go black.'

"Another element that enters in the very fast plane is the possibility of dropping too suddenly under power. In diving rapidly from an altitude of low air pressure to one of relatively high pressure another danger presents itself. The ears are particularly sensitive to very rapid changes in pressure and may readily become injured under such circumstances."

Rockefeller Views Capt. Boyd's Plane

Refuses Ride But Presents Canadian Flier With Eight Dimes

Daytona Beach, Fla. — John D. Rockefeller, Sr., came as near as he ever did in his life to taking an airplane ride last Friday—and his prospective pilot was none other than Captain J. Erroll Boyd, Canada's transatlantic flier.

With a party of friends, the aged millionaire came from his Ormond Beach home to the beach here to take a look at Captain Boyd's monoplane Columbia, holder of numerous records.

Captain Boyd took the ship from its hangar to the beach for the benefit of the oil magnate.

But Mr. Rockefeller declined with thanks to take a ride. He did, however, inspect the ship, asking numerous questions.

Mrs. John Dick of Toronto, and other members of the Rockefeller party took short hops in the plane.

"How many members of your family?" "Neighbor John," as he is affectionately known here, asked Captain Boyd, who told him.

"Well, here's a dime for your mother, another for your father, one for your wife, one each for your four children, and one for yourself," Mr. Rockefeller said as he placed the eight shiny coins in the Canadian flier's hands.

Record Early Seeding In Saskatchewan Area

Webb, Sask.—Agriculturists of this district of south-western Saskatchewan made claim on February 25th of an early seeding record for western Canada.

Fields have been bare of snow for weeks, and with mild weather prevailing for many days, land is in perfect condition for spring work.

Several farmers of the district have started cultivation and last week seed drills were at work on the farm of A. C. Thierman, near here sowing wheat.

Farmers have no recollection of wheat being seeded in February in any former year, and pioneers say it is a record for the Prairie Provinces.

This is not the only agricultural record to be shattered. In January Alberta farmers, during the sweep of the mild wave across the Prairies, concluded threshing of wheat which had been halted by unfavorable fall weather.

Owner of "Soundproof" Farm Cleared of Murder

Sydney, Australia.—Because his little farm was in the "sound shadow," or depression to which outside noises did not penetrate, a farmer was acquitted here of the murder of his father.

When his wealthy seventy-nine-year-old father was found battered to death within 200 yards of the farm, Cecil Charles, fifty-two, was arrested.

A material factor against the accused was his steadfast denial that he heard his father's cries for help although farmesr on the other side of the ridge heard them distinctly.

Then, by accident, it was discovered that the farm was in a "sound shadow." Men shouted, gelignite was exploded and bombs burst at the spot where the old man had been killed. The sounds could be heard all over the surrounding districts but not on the farm.

Easter Animals

The date of Easter depends upon the moon. It falls upon the first Sunday after the fourteenth day of the moon that happens to be reigning at the time of the spring equinox.

This is the reason why the hare is always associated with Easter. For many centuries the hare has been regarded as the symbol of the moon. The hare feeds by moonlight, and its young, unlike those of most other warm-blooded animals, are born with their eyes open. Indeed, the old fable is that the hare never closes its eyes. In the Egyptian language the word for hare meant also a period of twenty-eight days, or that of a lunar month.

Other creatures are associated with the geat festival of spring—the ass because it was upon an ass that Christ rode into Jerusalem; and the fish called the dory, for this is the creature from whose mouth the silver piece was taken, and upon either side of whose head are said to be the marks of the sacred finger and thumb.

Fortune-tellers get a share of your fortune for telling it.

Eight Planes Burn In $150,000 Blaze

Fierce Flame Consume Hangar at Winnipeg Flying Field

Winnipeg.—A fleet of seven Western Canada Airways planes and a Fairchild cabin machine, privately owned, were lost in a fire last week that totally destroyed the company's huge hangar at Stevenson Field, St. James, causing damage estimated at about $150,000.

Flames broke out following an explosion in the hangar.

More than a dozen mechanics and workers escaped from the building without injury as the blaze quickly spread. No one was seriously burned, though minor injuries were reported having been suffered by firefighters. Three automobiles standing inside the structure also were destroyed.

Started in Gas Tank?

Witnesses of the outbreak believed the blast occurred in the gasoline tank of one of the planes. Every one in the building hastily deserted as resulting flames crept along the gas-soaked floor to other machines. When the first Winnipeg fire brigade arrived eight planes were in flames, several standing just outside the hangar. Firemen were hindered from doing effective work by lack of water pressure.

Two small Laird planes, delivered only a short time ago, were among the flame-wrecked debris. The pride of the company's fleet, a large tri-motored Fokker cabin machine, also was destroyed.

Eight hundred gallons of gasoline, stored outside the building, failed to explode, though the tanks broke into flames shortly after the blaze started.

Razed in Hour

Attracted by one of the most spectacular daytime fires in years, thousands of persons milled in the vicinity as flames shot hundreds of feet in the sky. An hour after the outbreak the frame hangar had been levelled.

Air-mail services from Winnipeg were interrupted by the fire, but "only momentarily," according to officials.

New Air Line Links Mexico and Canada

International Air Express to Have Terminals at Detroit and Brownsville

A new airline, International Air Express, limited to express and passengers, is to be opened about May 1 linking Mexico with Canada. Its terminals in the United States will be at Detroit and Brownsville. The new service, it was learned here will bring the two borders within twenty-five hours of each other.

Final plans as to the route have not been announced, but the planes will make stops at St. Louis, where they will connect with the Transcontinental and Western Air Lines; Cincinnati, connecting with a division of American Airways, and Dallas and Fort Worth, Texas, and Tulsa.

At Brownsville the line will connect with Pan American Airways, Mexico City division, and at Detroit connections will be made with Canadian Airway, Ltd. The fares will approximately be rail plus Pullman tariffs.

Equipment for the new line includes several of the new model Ford tri-motors and the Northrop low-wing express and passenger planes.

When the service is opened daily service will be maintained between Brownsville and St. Louis, with rail connections for northbound passengers at St. Louis on fast night trains. Other schedules call for daily operation of planes on an all-daylight schedule between Detroit, Cincinnati and Dallas. Further details of the schedules will be announced later, it was said.

Spring Song

By Anne M. Robinson

It will soon be time for Bob White's whistle,
It will soon be time for the trilliums' bloom,
It will soon be time for the purple thistle
To go a-courting in silken plume.

It will soon be time for the grass to flurry
Its green fire over the bare hillside,
For the wild plum tree to wake and hurry
Into its blossomy veils, a bride.

It will soon be time for the winging plover
To seek his mate by a sea of blue,
It will soon be time for the four-leaf clover,
With luck and love and dreams come true!

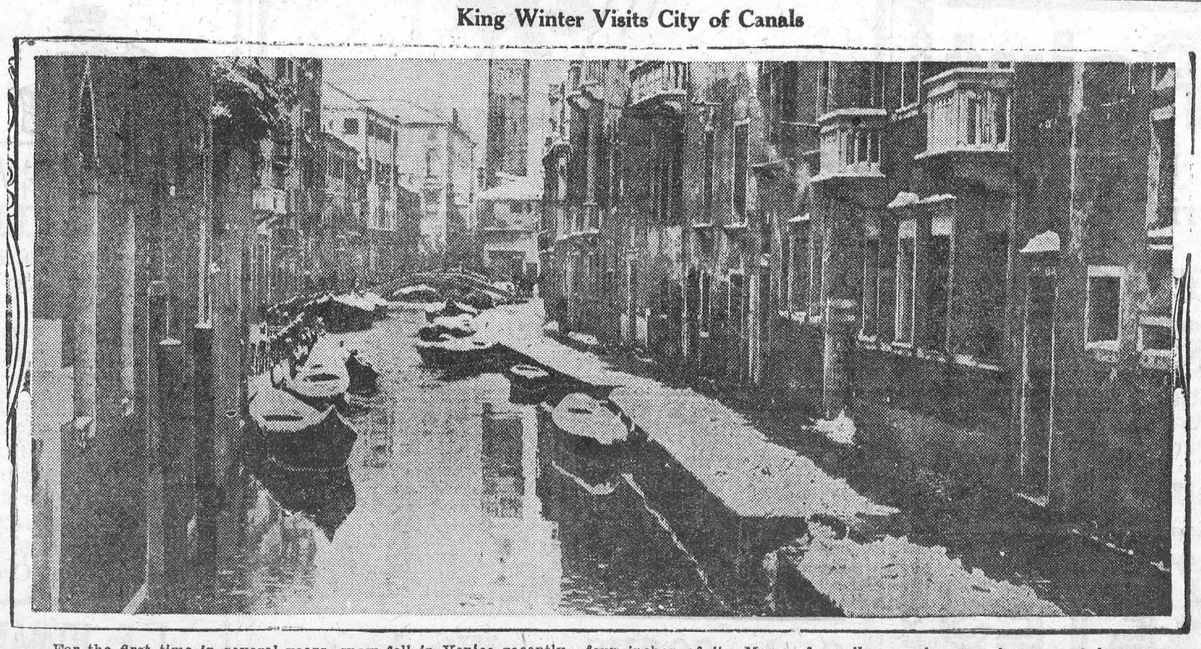
Finland Opens Building

Helsingfors, Finland — Finland's new Parliament building, which required four years for building and cost the equivalent of $2,500,000, was inaugurated recently in the presence of the chairmen and vice-chairmen of the Estonian, Swedish, Norwegian, Danish and Lettish Diets.

The courts have ruled that a college can compel its students to get vaccinated. We wish the same ruling could be extended to getting them educated.—"San Diego Union."

The total gross value of the products from the furniture factories of Canada in 1929 amounted to $44,136,176 as compared with $41,825,534 in 1928, according to a report of the Dominion Bureau of Statistics. There are 367 establishments in all, 213 being located in Ontario, 71 in Quebec, 28 in British Columbia, 24 in Manitoba and the remainder in the other provinces. Capital invested in 1929 amounted to $41,851,682 as compared with $39,829,474 in 1928.

King Winter Visits City of Canals



For the first time in several years, snow fell in Venice recently—four inches of it. Many of smaller canals were frozen, and barges and picturesque gondolas were blanketed with white.

Birthday Party of Room B

Last Friday afternoon the Susie Annable Memorial Hall of the Public School was again the scene of a very happy gathering of parents, friends and pupils when the Junior Red Cross, called the "Busy Health Boosters of Room B" had their annual Birthday Party.

These "Birthday Parties" have become very popular and eagerly looked forward to, not only by the pupils who pass through Room B, but also the parents. It is over eight years since the Junior Red Cross work began in Room B and some of the parents, although their children have passed on to higher forms, still take an interest in the work of the children and join with the friends and parents of the present class in patronizing this concert put on by Room B under the supervision of their efficient teacher, Miss Emma Gardner, who endeavors to make this not only an enjoyable but a profitable afternoon.

Just in order to give the parents and friends a chance to see how their meetings are conducted, the President, Langton Carr, called the meeting to order, first welcoming the guests to their Birthday Party. Dixon Hutt, the Secretary, then read the minutes of the last meeting in a very businesslike manner. John Christie, the Treasurer, followed with his report. The Secretary then presented the correspondence received during the month which included a letter of regret from Mr. H. B. Fetterly, M. A., of Belleville, regretting his inability to be present at their Birthday Party which he had always enjoyed when Inspector here; a letter from Mr. Geo. H. Challies, M. L. A., sending his regrets and a diagram of the floor of the Legislature which he thought the pupils would be interested in. New business was then dealt with, with promptness and despatch which would have done credit to a much older organization. This showed the training they were now receiving was fitting them to take their places later in our public affairs, and the making of good citizens.

At the conclusion of the business par , a very attractive program was then put on by the pupils which was as follo s:

The Health Rules of the Jr. Red Cross —Harold Robinson.

Play entitled "The City of Health"—By all the pupils,

Piano duett—Frances Utman and Ruth Dixon.

Dumb Bell Exercise—All the boys,

Piano Solo—Betty Melvin.

Speeches—Mr. W. J. Stewart, I. P. S., Mrs. Davies, Mrs. Cass and Rev. Mr. Davies.

Piano Solo—Ruth Dixon,

Indian Drill—"John Brown and his ten little Indians.

Piano Solo—Harold Harper,

Danish Folk Dance—8 girls,

National Anthem.

The Irish Folk Dance deserves special mention as the six little girls dressed as Irish colleens in paddy green dres-es and white pleated hats, and their gay cavaliers in white trousers and smart green coat and black toppers captivated the audience as they went through the folk dance in perfect rhythm It was very pretty.

John Brown and his ten little Indians also received much applause as they went through the Indian drill in their Indian costume, feather head-dress, tomahawks. etc.

The Danish Folk Dance was given by request by the eight little girls who gave it at the Christmas Concert, and it was again enjoyed. We would like to give each number special mention for each number deserves praise, but space will not permit.

At the noon hour the pupils of Room B had a sale of home made candy and vases and shades which they had made, and what was left they sold after the Birthday Party was over. Proceeds of the afternoon amounted to $20.27 for which the Busy Health Booster thank all who contributed to this worthy cause.

The Special Sedan

More Powerful *and always smooth*

LIKE its strong, durable chassis, the new Chevrolet's valve-in-head, six-cylinder motor is exceptionally rugged and powerful. You can depend on its sure, steady flow of power to carry you easily through sand and mud, or up the steepest grade.

And nothing less than a Chevrolet Six is so smooth, quiet and restful at all driving speeds. It takes six cylinders to give the comfort and freedom from vibration you will be quick to appreciate in this new Six.

Come for a drive in the new Chevrolet. Know the power, comfort and handling ease that may now be enjoyed *at lower cost than ever.*

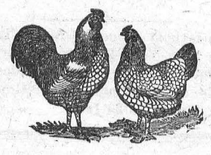
BERRYHOLM POULTRY FARM

South Mountain, Ont.



Single Comb White Leghorns

Large White Birds.
Large White Eggs.

Do you know that there is as much profit in 180 twenty-four ounce eggs as there is in 300 twenty ounce eggs. Think this over before placing yout order for chicks this yea. Our Leghorns are large birds and lay a large chalk white egg. Our males are again from eggs direct fron Hollywood Poultry Farm, Seattle, Washington, fom hens with records of over 240 eggs in one year.

Barred Plymouth Rocks

Good Market Birds.
Good Egg Production.

Our rocks this year are again mated to males from the Kemptville School Farm from hens with trap nest records of from 210 eggs up

Now is the time to decide the number of chicks you will start this year. Our incubators are running at full capacity We already have orders on our books for thousands of chicks but can as yet supply chicks for any week in April or May. Following are our prices which are $2.00 per hundred lower than previous years.

Up to and Including	April 1th	April 15th and April 22nd	April 29th and May 6th	May 13th and May 20th	May 30th and June 3rd
100	$17.00	$16.00	$15.00	$14.00	$13.00
500	$80.00	$75.00	$70.00	$65.00	$60.00
1000	$150.00	$140.00	$130.00	$120.00	$110.00

One Week Old Chicks $3.00 per hundred over the above prices. Custom Hatching at a New Low Rate.

D. LEROY BERRY

FROM OUR DISTRICT CORRESPONDENTS

Cloverdale

Mr. David Lamoureux has consented to become a citizen of Cannamore.

Mr. Edward Lamoureux and Margaret Lamoureux were the guests of Mr. A. St. Pierre of Melvins last Sunday.

Mrs. John Baker of the Boyne spent Sunday with her parents at Cloverdale.

The stork visited Cloverdale last Monday and left Mr. and Mrs. Peter Dignard a bouncing baby boy.

Mr. Jas. Hughes and Mr. Ira Docksteader attended the auction sale in Osgoode on St. Patricks day.

Mr. Abraham St. Pierre of Melvin Settlement visited the home of his sister Mrs. Eli Lamoureux last week.

The Young People of the section enjoyed a social evening at the home of Mr. and Mrs. Walter Larocque on St. Patrick's night.

Mountain

Mr. W. H. Campbell spent the week-end in Ottawa.

Miss Gladys Barrigar spent the week-end at her home here.

Mrs. R. L. Kerr spent last week visiting with friends in Ottawa.

Mrs. F. Bickstead returned home recently after spending some time in Ottawa.

The Ladies' Aid entertained their husbands recently at the Foster House. The evening was spent in music, a duet by Rev. Mr. and Mrs. Lloyd, trio Mr. and Mrs. S. W. VanAllen, Mrs. A. Bouck Quartet Rev. Mr. and Mrs. Lloyd, Miss Gladys Barriger and Mr. S. W. VanAllen. duet Miss Gladys Barrigar and Rev. A. O Lloyd, Mr. R. Bryan was also heard from in a very pleasing manner. Singing the National Anthem brought a very pleasant evening to a close.

Mr. and Mrs. Andrew Logan of Kemptville spent Sunday at the home of Mr. and Mrs. S. W. VanAllen.

The "Jolly Set" entered the home of Mrs. F. H. Barriger by way of a back entrance on Monday night, as they always come as a thief in the night, not knowing the night or the hour to expect them. The set was headed Monday night by a beautiful solo, by Sophie H. in the absence of Toots and Rosia. The usual program was put on by Gharlotte M. which was much enjoyed by all present. While lunch was being served by Het, Clarice and Tillie, the guests were entertained by Hannah and Mumsby, after which the set broke up a very pleasant evening spent together.

A Social Evening will be held in the I. O. O. F. Hall on Friday night, March 27th under the auspices of the Mission Band, a play entitled, "A Box of Monkeys."

Morewood

Mr and Mrs. Ray Dillabough and son of Russell spent Sunday with Mr. and Mrs. Emerson Faulkner.

Mr. Allan Steven visited on Friday with his brother Robert of Cannamore.

Mrs. Warren Feeley returned home after spending some time with her daughter Mrs. Harold Faulkner of Ottawa who is recovering from her illness.

Mrs. Will Durant of Chesterville spent Monday with her daughter, Mrs. Walter Steven.

Mrs. Ernest Faulkner of Gordonville called on Mr. and Mrs. Emerson Faulkner Saturday evening.

Mrs. Orrin Dillabough returned home after spending a week with Mr. and Mrs. Nathaniel Merkley of Bouck's Hill.

Miss Melba Steinberg and Miss Jean Campbell spent Saturday with Mrs. Will Crowe of Cannamore.

Mr. Merrill Loucks of Gordonville called on his mother Mrs E. Loucks Saturday evening evening.

Mrs. A. B. Ailison returned home from Ottawa where her son Harold is in the hospital and is getting along fine

Miss Mae Gardiner of Vanleek Hill is visiting with her aunt Mrs. Sidney Gardiner.

Mr. Willie Moore spent a couple of days with friends at Toy's Hill.

Morewood Womens' Institute

The regular meeting of the Womens' Institute was held on Wednesday afternoon at the home of Mrs. Vernon Fetterly with twenty four ladies present. After the business a St. Patrick's Day program was carried out. Two appropriate contests were conducted by Mrs. Myers and Mrs. Fetterley; a green contest and a tree contest. An Irish poem was read by Mrs. Myers and Mrs. Allan Swerdfeger sang an Irish song which demanded an encore. A bouquet of flowers was presented to the oldest member it being Mrs. George Bogart. The roll call was answered with an Irish Joke and the dainty lunch served by the labies of Cannamore had the green decorations ic keeping with the programme. The April meeting will be held at the home of Mrs. Ab. Dillabough.

North Mountain News

Mrs. Clarke Hyndman has returned home after spending the week in Montreal.

St. Andrew's United Church, Hallville, was linked up on March 15, and heard the Rev. J. W. Clarke preaching in Erskine Church, Montreal, from where it was broadcasted. The experiment in this church was a success.

Mr. Donald Dougall of Merrickville is visiting in this community.

Miss Elizabeth Dougall is spending some time at the home of her brother, Mr J. E. Dougall.

Miss Carrie Stewart was the guest of Mountain friends last week.

Miss Donny Latourell spent part of Saturday with her sister, Miss Helen at Mrs Kerfords.

Nation Valley

The Editor of the Press forgot a very important birthday in March. Several relatives and friends helped Mr. Geo C. Merkley to celebrate the 61st anniversary of his birthday on Friday, March 13, and not even a Friday and a 13th could spoil the eventful occasion and entertainment.

We are sorry to report Mrs. Irwin Baker and Mrs. W. Froats very ill.

Mr. and Mrs. A. Black entertained relatives from Chicago over the week-end.

Mrs. Jno. R. Baker of Morrisburg is visiting her sons in this vicinity.

We are glad to report Miss Mary Munro much improved in health since she returned from Ottawa Civic Hospital where she underwent an operation for sinus.

Miss Florence Jackson spent the week-end with Mrs. Jas. Rae.

Toves Hill

Mrs. Wm. Steele is spending some time in the city.

Messrs. Anderson Haggerty, Arnold Peterson and Eckford Johnson spent Sunday at Brockville with Mr. Herb Houlahan who is in the hospital there.

Miss Lottie Casselman of Oak Valley was the week end guest of her sister Mrs. Jas. Casselman.

Mr. and Mrs. Chas. Kirkwood and family were guests of Mr. and Mrs. Jack Fader of Winchester on Saturday.

Mr. and Mrs. Zern Harper took tea with Mr. and Mrs. T. D. Nesbitt of Winchester Springs.

Miss Ruby Johnston of Cass Bridge was the week end guest at the Steele home.

Miss Ruth Harper of Inkerman spent the week end at her home here.

Mr. and Mrs. Joe Steele spent Sunday with the latter's parents Mr. and Mrs. Arnold Hutt of Inkerman

Mrs. Arnold Peterson spent a couple of days at Brockville.

The annual birthday tea of the Hy, Shy, Ny. club was held Friday evening at the home of Mrs. John Wylie. There was a good number present. After tea a short programme was given which was enjoyed by all. The collection amounted to $15 50.

Misses Luella Strader, Luvia Merkley and Mac. Straders Hill spent Saturday evening with Mr. and Mrs. W. Henderson,

Messrs. Patrick Houlahan and P. Gannon spent Tuesday at Brockville with the formers father, Mr. H. Houlahan.

Mrs. Ida Coons and son Floyd of Winchester spent Tuesday with Mr and Mrs. Sterling Coons.

Miss Luella Strader of Strader's Hill called on Miss Louva Johnston on Saturday who has been on the sick list.

Mr. and Mrs. Chas. Hamilton of Dundela spent Monday at the home of Mr. and Mrs. Wesley Henderson.

Wincheser Springs

Mr. and Mrs. Wallie Bolten and Mrs. N. Summers were entertained to tea Sunday evening at the home of Mr. and Mrs. F. Bolten.

Mr. and Mrs. Zernie Harper of Toyshill took tea with Mr. and Mrs. T. D. Nesbitt.

Rev. Mr. Morrison of Elma took tea with Mr. and Mrs. Wilson Sunday.

Mrs. A. J. Casselman and daughter took tea Saturday evening with Mrs. Cecil McIntosh.

Mr. and Mrs. Ed. McIntosh and Master Glen Johnston spent Sunday with Mrs. Florence McIntosh.

Mrs. Ball of Kemptville is spending sometime with Mr. and Mrs. Wm. Clark.

Mr. and Mrs. Lorne Kinkaid of Winchester spent Friday with Mr. and Mrs. Clifford Robinson.

Mrs. Nehemiah Summers of Winchester is spending sometime with Mr. and Mrs. Wallie Bolten.

Mrs. Arnold Casselman, Melba and Mrs. Orren Casselman attended the Oyster Supper and quilting bee at the home of Mr. and Mrs. John Wylie on Friday evening last at Toyshill.

Mr. Oliver Rolins of Brockville visited his parents recently.

Mr. and Mrs. F. Carscadden and daughter of Ottawa, spent sometime with Mr. and Mrs. H. Munro.

Mrs. N. Summers of Winchester and Mrs. Wallie Bolten spent Tuesday with Mr. and Mrs Orren Casselman,

Mrs. Ralph Allison and son spent the week-end in Ottawa.

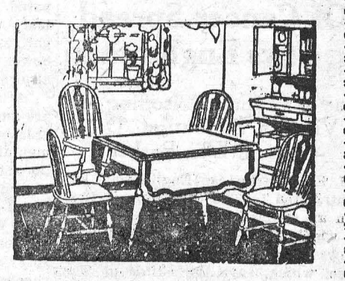
Atmosphere! Color! Harmony!

The new age calls for it, the modern woman demands it and the medical profession endorses it. Color harmony in your kitchen creates a feeling of optimism, is an antidote to the "blues" and a stimulant to the desire to "live" in the kitchen.

BEACH'S BREAKFAST SETS

Have COLOR which brightens up the kitchen on sunny days or drab days, spreading cheerfulness and joy.

Each set comprises Buffet, Drop Leaf Table and Four Chairs, and the hard-wearing colorful finish makes them an attractive and serviceable set for any breakfast room or nook. See our window display of the various colors and make your choice.



BED OUTFIT SPECIAL

Walnut finished steel bed, sagless cable springs and good quality mattress with roll edge. Size 4 feet, 6 inches. Extra Special

Twenty Vital Points in the Care of Infants

By John Burke Ingram

The beast-fed baby has a very much better chance of life and health than a bottle-fed baby.

Almost every normal mother can nurse her infant if she is patient and determined to do so. In many cases it is not easy but in almost every case, as I have said, it is possible, and a mother who loves her child should realize that the finest and best thing she can do for it is to feed it at her breast. Cows' milk is intended for the stomachs of little calves. Mothers' milk is the thing for human babies.

When the time comes to start putting baby on solid foods there again the advice of the doctor should be sought. This is such an important subject that I do not feel that I should genealize here. Now in conclusion just let me sum up the points which we have given in this article and possibly a few more.

Babies need regular feeding times.
Babies need regular sleeping times.
Babies need much air and sunshine.
Babies need water to drink.
Babies need to be kept warm.
Babies need to be kept clean.
Babies need to be simply dressed.
Babies should be nursed by the mother, if it is at all possible for the mother to do so.
Babies' food should be prescribed by the doctor; not by the neighbors.
Babies' food should not be changed too often.
Babies should have clean milk.
Babies milk should be kept cold until wanted.
Babies should not use pacifiers.
Babies should not be kissed on the mouth.
Babies should be kept off the floor, out of drafts, and away from people who have colds.
It is important to know a sick baby from a well one.
It is important to get the doctor's advice early.
Teething is not a sickness.
The baby that is well fed, has regular habtis and plenty of fresh air does not often get sick, and if sick gets well quickly.
It is easier to keep baby well than to make him well.

Modern Diet Cause Of Cancer Spread Says Englishman

Due to Chronic Poisoning and Vitamin Starvation, Declares J. Ellis Barker

J. Ellis Barker, an Englishman, has contributed to The Spectator of London an article on "Cancer and Diet," in which he explains his well-known views on the origin of malignant disease, which, says the editor of The Spectator, "have been endorsed by many medical men." He says that many cures of cancer are spontaneous. This is his article:

"From time immemorial the common people have expressed the opinion that 'cancer has something to do with our food.' Medical men and scientists should not disdain the medical ideas of the common people which are often based on age-old tradition and centuries of observation. We have learned much from folk medicine. Many of the most valuable remedies and scientific processes were discovered by observant primitive men.

"About 20,000 years ago men of the Stone Age successfully performed trepanation, taking a disk out of the skull. Anesthetics and antiseptics were used in primitive times, and vaccination and inoculation were practised thousands of years ago in India, China and Africa. Vaccination against smallpox was not discovered by Jenner, but by illiterate herdsmen. Mesmerism was practiced 2,000 years before Mesmer, and Hippocrates used sun baths, massage, open-air treatment for consumption, etc. Scientists often claim wrongfully to have initiated important medical innovations.

"The civilized and the uncivilized die of two entirely different sets of diseases. Primitive men lead healthy lives and die quickly of exposure, want, violence and dirt diseases, such as typhoid, cholera, etc., which we have largely eliminated. Civilized men die slowly of longfasting diseases after years of invalidism unknown to the primitive folk. Even tuberculosis is a disease of civilization. Primitive races are ravaged by tuberculosis, measles, syphilis, etc., after having been infected by the civilized.

A Disease of Civilization

"Cancer is purely a disease of civilization and unnatural living. It was well known to Hippocrates 2,300 years ago. If it were an inevitable disease, as we are told, it should, in the course of centuries, have spread all over the world. However, hundreds of eminent men reliable medical men practicing in the African interior have never treated a cancer case except among the white men living among the blacks. However, the primitive cancer-free Negroes become exceedingly liable to cancer if they adopt the methods of living and the diet of the civilized.

"If we study the cancer statistics of the world we find that the cancer mortality is greatest where civilization is most advanced, where methods of living are most artificial. In all countries the cancer mortality is far greater in the towns than in the country, and it is greatest in those ports where men live chiefly on heating and denaturalized foods. The cancer mortality is lowest among farmers and agricultural laborers and among the clergy who lead simple, natural lives. It is highest among the workers in the public house and restaurant business, butchers and sailors. Men engaged in these three occupations eat unduly large quantities of meat and of preserved and heating foods.

"In my books I have endeavored to show that cancer is a disease of chronic poisoning and of vitamin starvation. In the causation of cancer diet seems a most important factor. Animals and primitive men do not take devitaminized foods. They also do not touch over-hot food and drink. Their instinct protects them against it. Stomach cancer is practically unknown among them.

"In this country 10,000 people die every year of cancer of the stomach. I have investigated hundreds of cancer cases and have found that in every case of cancer of the stomach the sufferer took food and drink at the most extreme temperature. The stomach and the tube which leads from the mouth to the stomach have no pain nerves. Boiling hot drink slips so quickly over the tongue that it cannot hurt it, and constantly repeated scalding of the stomach is apt to lead to cancer.

"Animals and primitive races do not suffer from constipation. The soft, clogging and devitaminized food of civilization makes constipation universal. Sir Arbuthnot Lane and many other eminent surgeons have told us that bowel cancer is found practically only among the chronically constipated. The bowel poisons are exceedingly virulent, and the powerful purgatives habitually used weaken the bowel walls so that these poisons are absorbed into the system.

"Arsenic, aniline, tar and petroleum are among the most dangerous cancer-creating poisons. By painting experimental animals with arsenic, aniline, tar and petroleum we can produce cancer in them. Modern civilization is based on arsenic, aniline, tar and petrol. We dye our wall paper, carpets, clothes and foodstuffs with aniline. We spray with arsenic our fruit trees, and sheep are dipped in arsenic with the result that the wool of our clothes contains arsenic in minute doses. Arsenic absorption is also frequent, because arsenic is found in coal. The air of the towns is polluted with emanations from tarred roads and motor cars, and to the poisonous exhaust gases of motor cars, lead is now added. We cannot wonder that primary lung cancer has frightfully increased during the last decade or two.

"If an artificial diet is liable to cause cancer, it stands to reason that a wisely chosen natural diet should reduce the ever-increasing mortality and might be curative of cancer. Diabetes was considered a mystery disease and scientists doubted whether it was due to the over-consumption of sugar. During the war the diabetes death rate declined with the decline in sugar consumption, and in Germany it was reduced to half. In the treatment of diabetes diet is infinitely more potent than insulin. In the treatment of cancer diet may prove far more potent than the knife and radium.

Colors for British Phones

London. — The British Postoffice, which runs the telephone system, is leaving no stone unturned to round up new subscribers. An intensive publicity campaign, including the display of attractive posters in prominent places, has just been followed up by the announcement that a somewhat radical departure is impending. Instead of the monotonous dull black instruments now in use, English telephone users can choose new ones in five different colors—silver, bronze, green, ivory and mottled.

The Prince of Wales, always ready to take up something new, has ordered a number of colored telephones for his personal use, and his sister, Princess Mary, recently inspected the new models, ordering one of ivory finish.

The Postoffice, it is reported, experimented with some sixty different shades before deciding on the five to be standardized. A convenient one-piece instrument, incidentally, is now replacing the older type.

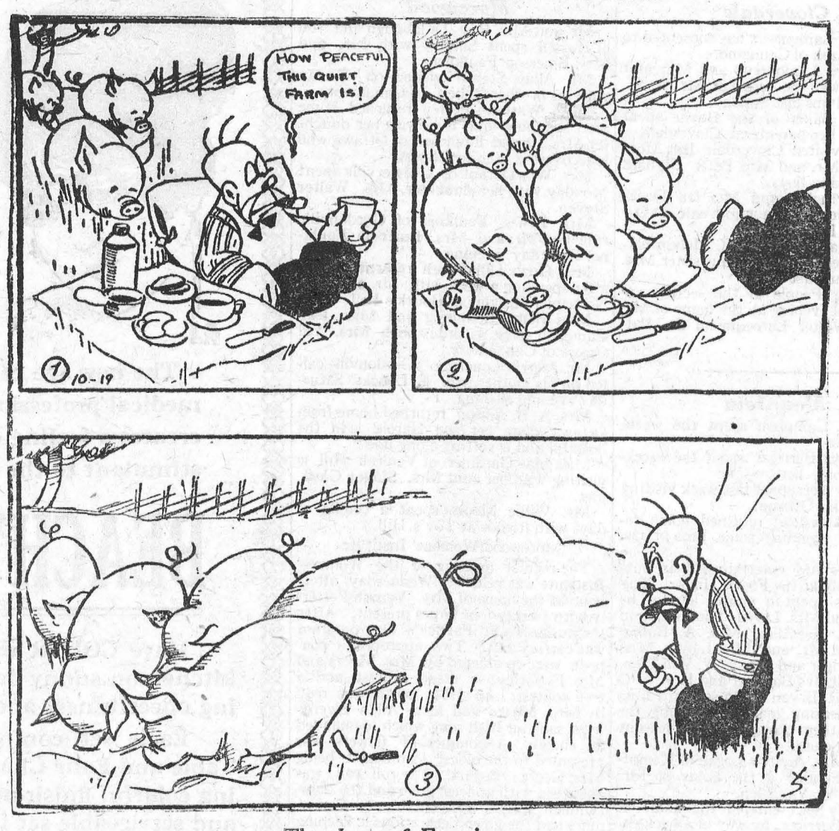
Map Wooded Tract from Air

Bangor, Me.—The value of aviation in the map-making field has been demonstrated near here. A pilot and a non-commissioned officer, using a military observation plane, mapped 4,400 square miles of almost impenetrable and hitherto uncharted woodlands in east central Maine in six months. It was said that under the old-fashioned system of ground surveying with a sextant the task would have consumed several years.

She: "What are you doing with that red lantern?" Clay: "Oh, I just found it. Some careless fellow left it beside a hole in the road."

"I'll bet you're good and tired," said the young man as he lifted his new girl out of the car after the party." "Well, anyway," replied the girl sleepily, "I'm tired."

"ADAMSON'S ADVENTURES"



The Joys of Farming.

Outdoor Sketching

Now you are ready. You loosen your cravat, hang you coat to some rustic peg in the creviced bark of the tree behind, seize a bit of charcoal from your bag, sweep your eye around, and dash in a few guiding strokes. Above is a changing sky filled with crisp white clouds; behind you, the great trunks of the many-branched willows; and away off, under the hot sun, the yellow-green of the wasted pasture, dotted with patches of rock and weeds, and hemmed in by the low hills that slope to the curving stream.

It is high noon. There is a stillness in the air that impresses you, broken only by the low murmur of the brook behind and the ceaseless song of the grasshopper among the weeds in front. A tired bumblebee hums past, rolls lazily over a clover blossom at your feet, and has his midday lunch. Under the maples near the river's bend stand a group of horses, their heads touching. In the brook below are the patient cattle, with patches of sunlight gilding and bronzing their backs and sides. . . . All nature rests. It is her noontime.

But you work on: an enthusiasm has taken possession of you; the paints mix too slowly; you use your thumb, smearing and blending with a bit of rag—anything for the effect. One moment you are glued to your seat, your eyes riveted on your canvas; the next you are up and backing away, taking it in as a whole, then pouncing down upon it quickly, belaboring it with your brush. Soon the trees take shape; the sky forms become definite ;the meadow lies flat and loses itself in the fringe of willows.

When all of this begins to grow upon your once blank canvas, and some lucky pat matches the exact tone of blue-gray haze or shimmer of leaf, a tingling goes down your backbone, and a rush surges through your veins that stirs you as nothing else . . . will ever do. Even the next day, when, in the cold light of your studio, you see how far short you have come and how crude is your best touch compared with the glory of the landscape, . . . the thrill that it gave you will linger forever.—F. Hopkinson Smith, in "Outdoor Sketching."

March Matters

During March we gain upwards of an hour of sunlight.

March's lucky stone is the bloodstone, signifying valor.

Tradition has it that Noah entered the Ark on March 17th.

Those born in March are loyal, make friendships easily, and are gifted with a high degree of physical courage.

"March" is from the Roman name for the month "Martius"; the Romans dedicated to their god of war, Mars.

March is symbolically portrayed as a man of tawny color, fierce of aspect, helmeted, and with a spade in his left hand.

It was the Emperor Numa who, by adding January and February to the calendar, deposed March from its original position as the first month of the year.

What New York

BY ANNABELLE WORTHINGTON

Illustrated Dressmaking Lesson Furnished With Every Pattern

An exceedingly smart morning dress with kimono sleeves that can be easily made in an hour or possibly two. The small cost will prove a revelation.

The fronts cross and close at the left side creating a charming slenderizing effect.

Style No. 2953 is designed for sizes 18 years, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. The 36-inch size requires 4¼ yards of 39-inch material with ¼ yard of 18-inch contrasting and 2½ yards of ribbon.

Rayon novelties, printed batiste, linen, printed dimity, gingham, men's cotton shorting and tub silk appropriate.

The tiny vestee is removable. It is merely fastened at each side with snappers. The skirt cuts in three sections and is stitched to the bodice under the removable belt.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Wilson Pattern Service, 73 West Adelaide St., Toronto.

An excellent night light can be made by packing salt round the wick of an ordinary candle, leaving just enough of the wick to light. A candle treated in this manner will give a small steady light all night.

Rearing Chicks

There may be too much dogmatism regarding the proper methods of chick feeding and rearing. Given well hatched chicks from good, vigorous, healthy parents and almost any system of feeding, where ordinary common sense is used, good results are likely to be obtained. In many instances there is too much time wasted in fussing with chicks.

Feeding tests at the Central Experimental Farm have indicated that equally good results can be obtained where a good mash is fed in hoppers kept constantly before the chicks from the time they are ready to feed —(about 48 hours)—as where regular feeding five or six times per day is practised. In conjunction with the mash feed, of course, water, milk, fine grit and oyster shell and green feed are given. When the chicks are about ten days of age a light feed of scratch grain is given daily. When the chicks are a month to six weeks of age the chick mash is replaced by growing mash and when at about two months of age, a hopper of crushed oats in addition to the growing mash is kept before them at all times. This system cuts down greatly the labor of attendance.

See that the chicks have sufficient heat to enable them to warm up any time they feel like it but avoid keeping the houses closed more than is necessary. Allow the chicks out on range as soon as weather permits.

Prevent crowding in the brooder houses by stretching pieces of wire netting across the corners and put in low roosts and encourage the chicks to use them as early as possible.

Separate the sexes and dispose of all cockerels that are not to be retained for breeders as soon as they can be satisfactorily marketed.

Good chicks to start with, given good feed, kept in clean, well ventilated not overcrowded houses on clean, fresh, green range assures strong, vigorous pullets in the fall which are the only kind that will satisfy the up-to-date, successful poultry keeper.

Talkative!

Evidently Canadians are a very talky people, due, doubt, to their spirit of friendliness. Government reports tell us that in 1929 we used the telephone more than the people of any other country in the world, our average being 1,830 conversations per telephone and 257 per capita for the year. The United States are nearest to us in this matter but they are still considerably behind. The total estimated number of calls for the year is given as 2,525,500,000. It would be very interesting to know what subject of conversation had the pre-eminence.—The New Outlook (Toronto).

Australia's sheep population this year is about 100,000,000, which is 10 times the number of human inhabitants.

The largest crocodile in captivity is in the New York Zoological Park and is about 14 feet in length. Crocodiles, gavials and alligators sometimes attain a length of 20 feet.

Bottled Milk Left in Sunlight Found to Have Abnormal Flavor

Perhaps there is a reason why Junior failed to drink all of his milk this morning. Did you yourself notice that it had a flavor that might be classified as "off?"

Possibly the answer to this question may be answered by inquiring just where milk has been standing. Did it stand in the sun for any length of time?

Recent conclusions reached by the dairy division of the University of California show that sunlight falling on bottled milk for three-quarters of an hour will give it a decidedly poor flavor, while even ten minutes in the sun will produce a noticeable effect. In contrast milk or cream placed in amber glass bottles or paraffin containers showed no noticeable effect to the same exposure.

In keeping with general radiation theories the milk in amber colored bottles showed a higher temperature after a fixed time of exposure than that in clear glass bottles and considerably more than that kept in paper containers.

Dr. C. L. Roadhouse, head of the division, said that strong sun rays shining against milk in clear bottles will undoubtedly cause oxidized flavors in the milk and that even strong indirect sunlight will influence the flavor of the milk if left exposed for several hours.

Poet of 1500's "Discovered" in Old British MSS

London.—A fifteenth century English poet, Peter Edyl, important as an imitator of Chaucer, recently was "discovered" by an American research worker in old English manuscripts, has contributed much to the knowledge of the customs and life of his time with the uncovering of his 10,000-line work on "Instructions to My Son."

The find was made by Charlton W. Laird, formerly an instructor at Drake University, Iowa, who is doing research in Europe this year on the Lydia C. Roberts Fellowship of Columbia University. Although working on a different subject, Laird was attracted by parts of the poem which he found through accident in an old manuscript in the British Museum. Continuing his search at Oxford and Cambridge Universities, he found five manuscripts containing parts of Idyl's works. He plans to extend his search further in collecting information about the poet.

Ignored in Reference Books

Because none of the manuscripts contains the complete works of Idyl, the poet has been overlooked through the centuries, Laird found. Several students of English literary history have noted at Oxford a fragment of the poem containing philosophic rhymes. Fritz Meissner, a German, worked out the manuscript tree for the four manuscripts then known. But the body of the poem itself was not touched. The usual histories or reference books ignore Idyl.

Idyl, in recording details of court life of the time, presents many interesting commentaries on customs and dress. In one instance he mentions that the women were painting their faces with yellow and purple hues.

"Peter Idyl seems to me one of the more important Chaucerian imitators," Laird said, "if not the most interesting, perhaps the most engaging as a follower of Chaucer. He signs himself Peter Idyl, armiger. I find that a Peter Idyl, Esquire, was attached to the court of Henry VI, and that at about this time he was appoined comptroller of the King's works.

Kentish Dialect Used

"Through a concidence he held he same post that Chaucer had held a generation before. The position at that time was without a salary, and he subsisted as a gauger at Sandwich, in 1440, and later as a gentleman falconer until Parliament in 1455 restored the office, and he succeeded to the emoluments and presumably to Chaucer's memories if not his paraphernalia. A year later he was succeeded, but whether because of death or the civil wars does not appear. There seems plentiful evidence that an Idyl family had connections in London and in Kent."

From available information Mr. Laird said the poem can be dated about 1450. In the poem, Idyl says:

"And if my rime be simpul to youre intent,
Hold me excused—I was born in Kent."

His dialect is Kentish, but his whole background is that of one who has moved to urban circumstances.

The praise of a young man is to be found in his fitness to "serve a prince or a king." Peter Idyl's son is given advice in the conduct of his household, warned against the fickleness of service, and a reference is made to the lands he will inherit. By his own admission, Idyl is not a craftsman in verse. He says.

"For in making I am as a yonge clerk."

"This line is probably an accurate description of him," Laird said, "as well as being confirmation for a supposition that in other things than 'making' he need make no such apology. He often hits upon good lines. He has much feeling for the accumulative force of the type of verse he employs, and he sees a situation vividly and describes it with an eye for the dramatic and with a plentitude of detail that I believe was not too common in his time. He is seldom dull and then only when his morality overcomes him. Thus he produces creditable verse, as the following:

"Ther is a fend that called is Tre slynsellis
That byddyth a man to lye and take his rest,
And though the priest and clerk rying the bellis
He seith couertly and closely, "Kepe thy rest!'
And makyth hym in his bed styll to lye
To make his morrow, slepe hanggyng in his eie."

As for artificial complexions, Peter Idyl had plenty to say to his son, such as the following two verses with some of the obsolete words changed to gain meaning:

"What sey ye now of ladys, jentyll women and other
Have they eny pride in thise days as ye suppose
Yes and she he as old as Abraham's modir (sic)
She wyll be lothe of any thyng to lose
And yet paynte hirself as fresh as a rose
Wyth mymples and tyris wrapped in pride
Yelow under yelow they covyr and hyde.

"For y' the hewte begynne to vanysh and fade
Then can they werk wyth a certeyne flowr
To purpllsh hem up wyrse than eny God made
And set oppon hem amore fresh colour
And covyr yt wyth gold the skynne to socour
That a man shall not wete where is whethir
The yelow gold or the tawny lethyr.'

He then goes on to say that times have changed so that it is hard to tell a tapser's wife from a gentlewoman because the former were dressing and painting above their status. He describes how the women went to church only to show off their array of finery.

The sixteenth century script in which the long poem is written is difficult to describe, Mr. Laird said, and consequently much remains undone.

France First in Europe In Road Mileage Ratio

France has 2.08 miles of roadway a square mile of territory, more than any other country in Europe. In total road mileage the United States leads with 3,000,000 miles of highway, and Russia, with her extensive territories, follows. Japan is third, and France fourth, with about 500,000 miles. Less than 20 per cent. of the French total is in national highways, but their mileage will be doubled this year, as the government plans to take over constantly more of the departmental and communal roads. All French national highways are paved and in excellent repair, though 60 per cent. of the departmental roads are dirt roads.

Paved highways, begun in the seventeenth century for political and military reasons, link all the important towns to Paris. Each year more tourists take their cars with them, understanding that only by motor touring may the charm of a country be really known, its out-of-the-way corners exploited, its wayside inns visited.

This year the French government is planning to appropriate an extra $37,000,000 to be expended in the next five years for the maintenance and repair of roads and bridges, and in eliminating grade crossings. This is in addition to the annual budget for roads which, for the year ending March 31, was $35,000,000.

Author: "But what have you against the play?" Producer: "The play."

Mother: "No, Johnny, one piece of pie is quite enough for you."

"Johnny: "It's funny; you say you are anxious that I should learn to eat properly, and yet you won't give me a chance to practice."

MUTT AND JEFF— By BUD FISHER

No Check Is Good On A Hat.

...al Adventure

...er if, by any choice of words ... of phrases, I can hand on ... the wonderful delight I ...n an adventure so small that ...ere seems nothing to tell.

I went further afield than usual. There are but few trees hereabouts, in the hedgerows, with here and there a spinny; and I came to a driftroad, that is a grassy highway, very old. No doubt and so little frequented that it was not worth metalling. It was full of bramble-brakes and thistle patches, and the ditches were full of willow-herb. Then I saw trees ahead of me, some of those stunted pollarded elms, which have a gnarled and personal look; and soon the driftway widened out, and I saw I was in a small hamlet, a handful of white-walled thatched cottages, with pretty gardens, a fruit tree, and some vegetable rows, and a border of old-fashioned flowers. . . .

Then I saw that among the trees stood a little old chapel, of rubble-stone smeared with plaster, and stone coigns. It had no tower, only a pretty stone belfry where there hung a bell of green bronze; the rust of the bronze had melted over the stones, which were stained a delicate green. . . . The chapel was fastened up, but peering in at a window I discerned warped oak benches, and a quaint organ, very small, with a gilded fan of pipes, and an altar at the east with sun-faded hangings. I came away from this, and took my way over a stile into fields, by the side of a considerable pool of water, full of weeds, with little fishes darting in clear spaces, and bright beetles racing in circles in a dizzy kind of dance. There was much arrowhead in the water, with green spear-shaped leaves, and white owers with a heart of dark crimson. Then on a little rising ground I saw two figures. They were looking away to the south, where a dark storm was coming up, heavy clouds of dense blackness, with lurid copper-colored spaces; and underneath it the woods and fields looked as if they were in a mist of greyish impalpable dust.

The figures were those of a very old man and a boy; the old man had put his hands up over his eyes to see the storm cloud more clearly, and the boy had imitated him. . . .

I came up with them and spoke to them. The old man was . . . upright, with a weather-worn face, cheeks like the sides of a ripe apple, and a straggling beard—such a face as you can see in an old glass window, warped and hardened by endless toil, and yet kindly and patient, with wide grey eyes. The boy was dark-skinned and graceful, a handsome shy creature. The old man talked in a high tremulous voice. He told me he was eighty-three years old, and that the boy was his grandson. The boy looked at each of us in silence as we spoke. I said that it was a lonely place, and he said "Yes," and that few people ever came there—"It is amidst the fields here," he said simply. He told me it was the hamlet of a larger village, and that the parson came over for an afternoon service on Sundays, and in rough weather not always that. . . . Then he moved away home, the boy followed him, saying, "We shall have a bit of weather on us in a minute." I stood and watched them go, the old man shuffling away, and the boy jumping about beside him, asking him many questions. They were soon lost to sight among the trees; I myself sheltered under a tough and ancient thorn-tree, which grew beside the road, while the grey slanting rain lashed the fields, and a light mist rose from the hot ground.

That was all my adventure; but it had a fine quality about it—the lonely hamlet lost in the fields, the grassy spaces, the dark trees, the chapel . . . the pool, and the swiftly racing shadow of the storm over all.—A. C. Benson in "Rambles and Reflections."

How the Alphabet Came Into Being

"Influence of mouth gesture on the development of the Alphabet," was the subject of an address by Sir Richard Paget before the anthropology section in London.

It was pointed out by Sir Richard that, just as speech appeared to have developed from pantomimic gesture, owing to an unconscious sympathy between the movement of the human hands and body with those of the human mouth and tongue, so the development of alphabets appeared to have been influenced by a corresponding sympathy of movement between the human mouth and tongue and the human hand.

If the alphabets of different nations were examined it was found that in the letters standing for the sounds of P, B. M. and W, and also those for the vowel sound U—in all of which the two lips are more or less protruded and brought together—the symbols are commonly suggestive, either of a close mouth, or of two lips closed or projected, or on the point of opening. Examples given from our own alphabet by Sir Richard were:

A, which was originally written lying on its side, suggests an open mouth facing right.

B is the profile of two lips, pointing towards the right.

E represents a mouth pointing to the right, with the tongue at mid-height, as in pronouncing the sound of e in men.

I is an elevated tongue, as in the sound of ea in eat.

L is another vertical tongue sign.

M represents two lips in profile, pointing upwards.

O is a front view of a rounded mouth.

T is a vertical tongue, touching the horizontal palate.

U and V are both pairs of protruded lips.

W is a pair of lips, like M, but pointing down instead of up.

Every letter of our alphabet, except possibly H and Q, said Sir Richard, was closely related to the shape of mouth which produces it.

High School Boards and Boards of Education
Are authorized by law to establish

INDUSTRIAL, TECHNICAL AND ART SCHOOLS

With the approval of the Minister of Education

DAY AND EVENING CLASSES
may be conducted in accordance with the regulations issued by the Department of Education.

THEORETICAL AND PRACTICAL INSTRUCTION
is given in various trades. The schools and classes are under the direction of AN ADVISORY COMMITTEE.

Application for attendance should be made to the Principal of the school.

COMMERCIAL SUBJECTS, MANUAL TRAINING, HOUSEHOLD SCIENCE AND AGRICULTURE AND HORTICULTURE are provided for in the Courses of Study in Public, Separate, Continuation and High Schools, Collegiate Institutes, Vocational Schools and Departments. Copies of the Regulations issued by the Minister of Education may be obtained from the Deputy Minister, Parliament Buildings, Toronto.

Diabetes Deaths Increase in 1930

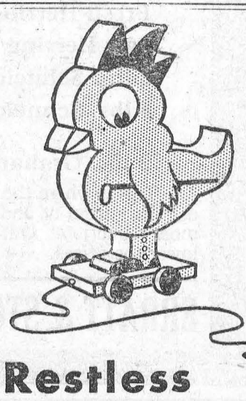
Rise in Rate During Last Decade is More Pronounced

Montreal.—The death rate for diabetes in Canada and in the United States in 1930 was the highest ever recorded. For many years an upward trend has been observed in diabetes mortality, but the rise during the last decade has been more pronounced than ever. The increasing use of insulin, says the Bureau of Statistics of the Metropolitan Life, has evidently failed to check the rise, although it has, without a doubt, prolonged the lives of thousands of diabetics.

Since the introduction of insulin, the mortality rate has declined among males up to age 45, with practically no change between 45 and 65, and a considerable rise after age 65. Among females the mortality has dropped somewhat up to age 35, has increased slightly between 35 and increased sharply after 45. The diabetes death rate in 1930 was 30.9 per cent. higher than in 1911.

Marriage is not a lottery, it's a pottery—where human clay is made into family jars.

Ishbel MacDonald, the British Premier's daughter, said in an interview in Washington; "A witty congressman gave father and me a good idea for naval disarmament at a reception. "The surest way to bring about naval disarmament," he said, "would be to build all warships by popular subscription."



Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castoria! Harmless as the recipe on the wrapper; mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given the tiniest infant—as often as there is need. In cases of colic, diarrhea or similar disturbance, it is invaluable. A coated tongue calls for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed.

ACID after meals

GET RID of your dread of pain after eating. Eat without fear of "indigestion," sour stomach, disagreeable gas or headaches.

When your food ferments, "disagrees," lies like a lump in your stomach, it's a sign of too much acid. You need not resort to crude methods—take instead an anti-acid that will correct the condition. Phillips' Milk of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes many times its volume in acid. It restores the proper alkaline balance to an acid-soaked stomach and bowels—assists these organs to function as they should.

Phillips' Milk of Magnesia is what you need when a bad breath, coated tongue, headaches, nausea or biliousness indicates an over-acid condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so liable to colds or sickness. All drugstores in the Dominion sell it in 50c bottles.

Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the name Phillips on the bottle.

APPLICATIONS Are Filled As Far As Possible in the Order in Which They Are Received.

APPLICATIONS Offering Annual Work Are Invariably Given the Preference.

HON. THOMAS L. KENNEDY, Minister of Agriculture

Owl Laffs

There was a time when the millers sold shorts. Now they can be bought only at the department stores.

"Papa left me four hundred dollars to buy a memorial stone for him after he died," said Darling Dora. "How do you like my new diamond?"

Teacher—"Johnny, if your father earned $40 a week and gave your mother half, what would she have?"
Johnny—"Heart failure."

The peculiar characteristic is the one somebody else has.

Daddy—"I greatly disapprove of young Darlington, and one particular reason is his lack of interest in his calling."
Daughter—"Why father, his calling! He calls on me seven nights a week."

"I just love these big cave men," sighed Gladful Gladys, as the guide led her through the Mammoth Cave.

Golf Definitions

Dub—"One who plays golf the way you did last year.

A Good Lie—When the last man in the foresome tells his score.

Sand Trap—A device placed in the fairway to increase the vocabulary of the player.

Fairway—The long narrow strip of grass which the ball occasionally crosses in its flight from the rough on one side to the rough on the other.

When the young mother begins to talk about lessening the risk of the baby's second summer you may know right well she has been talking to the baby's grandmother.

Girl's Dad—"So you're the young man with both feet on the ground, eh? What do you do for a living?"
Girl's Boy Friend—"I take orders from a man with both feet on the desk."

Too much time on the hands makes the feet wobbly.

What has become of the old-fashioned woman who made it a point of pride to have her wash first on the line Monday?

He—"I like your bathing suit."
She—"It doesn't take much to please you."

First Lady Bridge Player—"I say, I wish to goodness you'd hold your hand up. I can see your cards."
Second Lady Bridge Player — "All right, only you needn't be so snappy. You've been showing me yours all afternoon and I haven't complained."

It is amazing to see how much misinformation may be accumulated by one who diligently seeks it.

She—"Oh, go and commit suicide."
He—"That's the last thing I'd do."

The last word in preparedness was undoubtedly achieved by the sleighing party which hooked its sleigh on behind an ambulance. If your overcoat is too loud, wear a muffler.

Father—"Why were you kept in at school?"
Son—"I didn't know where the Azores were."
Father—"Well, in future just remember where you put things."

Women's clothes unmake the man.

Women, Elephants and Indians never forget.

Fortune does not smile on those who wait. It laughs at them.

Little Girl—"Please, have you a sheep's head?"
Facetious Butcher—"No, my dear; only my own."
Little Girl—"It won't do. Mother wants one with brains in it."

March Magic

Once more the fickle birds return
Across the sloping seas,
And strew the tender fields again
With their old melodies.

The sky is magic as the month,
Low sun, high stars between,
The icy winds have washed it clear;
But it, too, dreams of green.

The boats are breathing on the sea;
They cannot wait for men;
Some undertide has brought them word
Straight from a blue-starred fen.

Unpiloted they steal away,
No man shall see them soon,
The sea birds follow for a mile,
Then leave them to the moon.

We, too, shall steal upon the spring
With amber sails blown wide;
Shall drop, some day, behind the moon,
Borne on a star-blue tide.

Enchanted ports we, too, shall touch,
Cadiz or Cameroon;
Nor other pilot need besides
A magic wisp of moon.
—William Alexander Percy, in "Sappho in Levkas."

Wife: And don't come home so late.
Husband: I shall come home when I like. Wife: But not a minute later.

For the first time for seven hundred years Guernsey, one of the Channel Islands, is without a garrison of British soldiers.

Chapman returned from lunch and "Anyone call while I was out?" he called his new secretary into his room, asked. "Yes," replied the girl. "Smith came in about his account. He wanted it settled." "And you told him that I had left for America this morning?" said Chapman. The girl nodded and replied: "Yes; and that you wouldn't be back until this afternoon."

ISSUE No. 11—'31

Garden Talks

Article 4

Put These Vegetables on List ..

The average gardener is often bewildered by the large number of vegetable varieties offered and so for his particular benefit the following list based on expert information is offered:—Asparagus, Mary Washington, satisfactory from the standpoint of disease resistance and a good cropper; Beans, Pencil Pod Black Wax, Round Pod Kidney Wax, Stringless Green Pod with Kentucky Wonder Wax and Kentucky Green Pod as pole sorts: Beets, Early Wonder, Flat Egyptian Early and Detroit Dark Red, later; Cabbage, Golden Acre, as a round-headed first early, followed by Copenhagen Market and Enkhuizen Glory as mid-season with short stem Danish Ballhead for winter storage; Cauliflower, Snowball and Earliest Dwarf Erfurt; Carrots, Chantenay and Danvers; Corn, of the early varieties Golden Sunshine, Pickaninny, Early Mayflower, Early Market and Golden Bantam are recommended, with Stowell's Evergreen for later use; Cucumbers, Improved White Spine and Davis Perfect; Celery, for the first early Golden Plume or Wonderful, and White Plume, for early second, Paris Golden Yellow or Easy Blanching,—for winter keeping Giant Pascal or Winter Queen; Lettuce—Grand Rapids is one of the most popular leaf varieties with New York and Non-Pareil where a head sort is wanted; Muskmelons, Improved Montreal and Extra Early Knight are good varieties; as well as Golden Champlain, Miller's Cream or Osage; Onions, Yellow Globe Danvers, Red Wethersfield, Prize Taken Yellow Globe and Prize Taker Red Globe; Peas, Thomas Laxton, Laxtonian, Gradus, Little Marvel, Laxton Progress and, of course, American Wonder; Parsnip, Hollow Crown; Radish, Scarlet White Tip, French Breakfast and Scarlet Globe; Spinach, Bloomsdale and King of Denmark; Swiss Chard, Lucullus, the leafy part of this vegetable is used as a spinach while the fleshy stem may be cooked as asparagus and is delicious served with cream sauce; Tomatoes, Earliana, John Baer, Bonny Best, Chalk's Early Jewel and Livingstone's Globe, while Grand Rapids and Sunrise are two of the best forcing sorts. It should be remembered that this seed is suitable for Ontario. It is also well to remember that vegetables of the highest quality are the ones that are grown the most rapidly. The soil must be well prepared, well fertilized and well cultivated, particularly during the early stages. In small gardens it is often quite practical and very advisable to water during dry weather in order to make sure that the vegetables come on without a check.

Spring Work With Lawns

A good lawn will require a little attention every spring. There will always be bare spots to be reseeded, paths to be broken up, weeds to be taken out and fertilizer to be added. The roller should be used at this time so that the fine roots which have been heaved out of the ground by the frost will be packed into the soil again. Dig out the weeds, rake over the bare spots and reseed heavily with the very best seed procurable, Give the lawn an application of fertilizer. Well-rotted manure is good early in the spring but may be somewhat objectionable in certain places and often it results in adding more weeds. Pulverized sheep manure is recommended because this fertilizer is steamed before being put up so that all weed seeds are killed. Nitrate of Soda or a good mixed chemical fertilizer is often used as there is no objectionable odour and no unsightly appearance following the application. If the position of the lawn is open and exposed to plenty of sunlight ordinary dawn seed will do, but if shaded, select a special brand which all seed houses carry for this purpose Too much emphasis cannot be laid on good lawn seed, as this is the only kind which will result in a permanent, fine and velvety sward.

Constructing A Hot Bed

Where one plans to use a large number of those plants which must be started indoors, or where one is not in a position to purchase such plants as Petunias, Zinnias, Marigolds, Cosmos, Asters, Tomatoes, Cabbages, Cauliflowers, Head Lettuce and similar things, a hot bed is essential, The construction of such an affair is neither difficult nor expensive, and in addition to growing such plants as the above it may be used to produce early lettuce, onions, radishes and melons for the table. Secure a supply of fresh horse manure which has been turned frequently to prevent burning and store this in some sheltered spot, turning over occasionally until ready to use. The hot bed should be located where it will be convenient for the person looking after it during all sorts of weather. Preferably, it should have some shelter from north and west winds by fences, buildings or shrubbery. Select or prepare a well-drained site and make a pile of the manure eighteen inches deep when well pressed down. On top of this, place a light frame of wood any desired size and cover tightly with a window sash. The latter should slope a few inches toward the front which must be south. Cover the manure with three or four inches of fine soil. The bed will heat up rapidly at first but by the fourth day should have cooled down sufficiently for planting purposes. One can plant in rows quite close together so that a bed three by four feet will produce ample plants for the ordinary garden. In cold or stormy weather, water sparingly and only on bright days. Ventilate a little every day by raising the sash, keeping it open longer as the days grow warmer. The plants should not be removed directly from a hot bed to the field, except in very favorable circumstances, but should be hardened off for a week or two in a cold frame which is exactly the same as the hot bed without the manure.

AGENTS WANTED

Can you sell a small article that instantly relieves pain. It sells for $1.00. You get 40c. A real good income and a business of your own. You have no competition and everybody is a prospect. We want an agent in your district. Write for full information.

Sturgeons Limited, Toronto.

See Britain

London Daily Herald (Lab.): The foreigner at last is discovering Britain. In spite of bad trade, there were more Americans, more Europeans, visiting our country last year than ever before. This year all the signs predict a new record. It has been partly our own fault that this welcome invasion has lagged behind in the past. We are bad at boosting ourselves. A foolish good form has decreed that we shall rather run ourselves down. So the Briton abroad curses the British climate; but he never remembers to praise the British landscape, the loveliest and most varied in the world. He is thrilled by the historical romance of the Rhine. But he does not tell his German friends (for, likely enough, he does not know) of the "liquid history" that is the Thames.

Better have no luck than bad luck.

BLACKHEADS

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 2 oz. Peroxine Powder from your druggist. Sprinkle a little on the face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

Mizpah Mission Circle

The March meeting of the Mizpah Mission Circle was held on Wednesday the 11th inst. Mrs. Harold Singleton conducted the devotional exercises.

Arrangements were made for a Pageant entitled "Sunrise in the Garden," to be given on the Sunday following Easter week and a committee appointed to attend to the Easter thank-offering envelopes.

The third chapter of the Study Book was presented very ably by the President, Mrs. B. L. Carr. Her interesting resume and the questionnaire which followed gave all present a much clearer understanding of the Japanese people, their social life and social problems.

A pleasant half hour spent over the teacups brought to a close this very enjoyable meeting.

It was decided that the circle would meet in the future on the first Wednesday of each month.

Crowder-Barkley

A happy event took place at 3 p. m. on Wednesday, March 11th, at the home of Mr. and Mrs. Wm. Barkley, VanCamp, Ont., when their eldest daughter, Anna Maude, was united in marriage to Cecil Edgar Crowder, youngest son of Mr. and Mrs. J. E. Crowder of Inkerman. The ceremony was performed by Rev. T. F. Townsend, B. A., B. D in the presence of immediate relatives. The bride, who entered the drawing room on her father's arm, gowned in powder blue and biege silk crepe, was attended by Miss Wilma Williams, while Mr. Robert Barkley acted as groomsman. After the signing of the register and photographing of the bridal party the guests repaired to the dining room which was tastefully hung with streamers of pink and white, the table being very attractive with sweet peas and ferns. The exquisitely served dinner was presided over by the Misses Lola Crowder, Alice Barkley and Winnie Riddell.

The beautiful gifts received by the young couple testify to warm esteem with which they are held. They go to their new home at Inkerman with the good wishes of a host of friends.

Kitchen Shower

In honor of the bride of the week, about sixty guests gathered at the home of Mr. and Mrs. W. Barkley of Van Camp, Ont. on Monday, March 9th. After a social evening and many expressions of good wishes, Miss Maude Barkley was presented with a kitchen set and the following address:

Mountain, R. R. No. 1,
March 9, 1931.

Dear Maude:—

It is with a feeling of great pleasure that we, your friends, have gathered here to-night, in honor of your approaching marriage.

Your wedding day is one of the happiest days of your life. A day, which all young ladies are looking forward to with some degree of happiness, and we, one and all, join in wishing you many years of happiness and prosperity, with your your partner-in-life. Maude, we are going to miss you in our church, in our Sunday School and in our community. You have always been willing to give your best to every worth while undertaking. As you go from us to your new home may your activities be carried on with the same zeal.

We would now ask you to accept these gifts, not for their value, but for the kindly spirit that goes with them, and as you use them from time to time may they remind you of your friends and your wedding shower on March the 9th, 1931.

Signed in behalf of your neighbours and friends:—Lola Crowder, Winnie Riddell, Wilma Williams.

Union Services

Because of the illness of Rev. J. A. Waddell, his work on Sunday was taken by Rev. W. D. Turner, pastor of St. Paul's Church, when the two congregations met for the morning service to hear the splendid message given by Rev. Mr. Turner from Isaiah 6:1 and 8, on Isaiah's vision and call to service, in which the experience of Isaiah was emphasized. King Uzziah was Isaiah's ideal and when he died Isaiah could see nothing but calamity ahead for the nation. In that hour of crisis Isaiah entered the temple to worship where he meditated and then came his vision of God who became real to him and it made a new man of him. It is worthwhile to suffer loss just to be sure of God. Every life that accomplishes anything worthwhile begins with a vision. The thought of God's holiness and His hatred of sin came home to Isaiah's heart. He saw that the nation was living in sin. The result of the vision was deep conviction of sin. Isaiah's anxiety was relieved by his sin being purged away. When we feel that our sins are forgiven we are encouraged to speak. God wants men to condemn sin as did Isaiah, and to tell of His mercy and loving kindness.

The evening service was held in the United Church when Rev. W. D. Turner took for his text, I Kings, 19:9. He briefly described the encounter between the 450 prophets of Baal and the prophet Elijah, telling of Jezebel's anger when she heard that Elijah had caused all of her prophets to be slain. He said Elijah running away before the threat of a woman was hard to understand when he had been so brave before, but conscience makes cowards of us all. Elijah was the voice of God but he became a sword. This was an outrageous act, the killing of the prophets, and it destroyed the effect of what God had done on Mount Carmel. James says 'Elijah was a man of like passions." The greatest men have always had their times of weakness, and these often come after successes. Elijah fled to Beersheba but God found him there and strengthened him to go on to Mount Horeb where he hears God's voice say: "What doest thou here Elijah?" He learns there that God's cause is not furthered by the sword and that one of the greatest mistakes is trying to do away with evil by force. Faith, hope and love are the dominating forces that will win for us the victory over evil.

St. Paul's choir, under the leadership of Miss Irving, contributed a pleasing Anthem at the morning service, as also did the United choir in the evening, with Miss Smith as leader. A male quartette sang 'The Old Wayside Cross" at the evening service.

Melvin News
