## Few Changes Contemplated In Course of Local Highway

**Delegation From United Counties Met Deputy Minister in Toronto Regarding Plans For Highway 43.**

No great changes are contemplated in the route of the new Provincial Highway, No. 43, from Kemptville to Alexandria, of which the "Ridge" road forms a part, passing through Chesterville, the Deputy Minister of Highways for Ontario, told a delegration from the United Counties who interviewed him Thursday at Queen's Park.

Surveyors have been mapping out the highway recently taken over by the Provincial department but no reconstruction is planned for this year, J. H. Fulton, of town who was a member of the delegation, told The Record on his return. The Deputy Minister said the Department hoped to eliminate as many railway crossings as possible and it was pointed out to him by Mr. Fulton how two bad crossings between Winchester and Chesterville might be done away with by continuing on east at the white crossing west of Chesterville, resulting in the highway remaining on the south side of the C.P.R. right-of-way.

Two similar crossings could be missed between Finch and Avonmore, and the result would be that the N. Y. C. at Finch would be the only railway traversed between Winchester and Alexandria.

Members of the delegation included Warden R. Bryan, of Mountain; F. H. Broder, Morrisburg; J. H. Fulton, of town; Wallace Gallinger, of Osnabruck, and Dr. J. H. Munro, Maxville.

The highways official stated the new highway will be designated as a "local" highway, and will eventually have improved pavement throughout its length. It is also reported the intention of the department is not to make the new road a through route for heavy, fast traffic from Montreal to Toronto. It had been rumoured the officials were endeavouring to do this and so keep the road along the St. Lawrence as a scenic drive.

## *Celebrate Golden Wedding Anniversary.*

MR. AND MRS. MAHLON CASSELMAN.

MR. AND MRS. Mahlon Casselman who reside on their Elm Row Farm, south of Morewood, celebrated their fiftieth wedding anniversary on Monday, April 17.

They were united in marriage by the Rev. James Edgar Hill of St. James' church, Montreal, and have resided on their present farm ever since. Mrs. Casselman's maiden name was Mary Alice Hunter, being a daughter of the late James Hunter and Mary Flood. Mr. Casselman is the son of the late William Henry Casselman and Emma Lapointe.

To this happy union were born four sons and three daughters: William of Winnipeg Frank and Arthur of Morrisburg, Earle of Windsor, and Myrtle of Chatham. Mildred and Emma are deceased.

This highly respected couple were the recipients of numerous congratulatory cards and messages, money and gifts. They received from two to five o'clock in the afternoon and from eight to ten in the evening, and were host and hostess at a banquet served to relatives and friends.

The home was tastefully decorated in gold and white streamers, white bells and beautiful spring blooms.

Following the sumptuous repast the guests were entertained with contests, solos and instrumentals.

The guests attending were Mr. and Mrs. George Griffith, of Gouverneur, N.Y.; Mr. and Mrs. M. L. Lapoint, of Perth; Mr. and Mrs. Archie Currie, Brockville; Mr. and Mrs. Elery Casselman, Iroquois; Mr .and Mrs. Frank M. Casselman, Williamsburg; Mrs. S. Whittaker, Mr. and Mrs. Bert Whittaker, Mr. and Mrs. John Whittaker, Mr. and Mrs. Eric Barkley, Mr. and Mrs. Wm. Thomas, Mr. and Mrs. Jacob McLaughlin, all of The Ninth; Mr. Aden Casselman, of Williamsburg; Mr. Bernard Coyne, Chesterville; Miss Florence McAtheron, Gouverneur, N.Y.; Mr. and Mrs. Arthur Casselman and daughter Alice May, and Mr. J. F. Casselman, of Morrisburg; Mr. and Mrs. Earle Casselman, of Windsor; Rev. J. Macaskill and daughter Mary, and Mrs. H. Bezanson, of Morewood; Miss Florence Whittaker, Miss Evelyn Marcellus, Mr. Ralph McLaughlin, and Mr. Francis Marcellus of The Ninth; Mrs. Angus McMillan, Finch; Mr. Donald Gordon, of Morewood, and Miss Myrtle Casselman, of Chatham.

## Boosts High School Rating Following Visit of Inspector

**Inspector A. V. Hooper Meets Board Of High School. — New Higher Grade Result of Improvements.**

Inspector A. C. Hooper, of the Ontario Department of Education, informed the members of the High School Board yesterday afternoon that following his inspection of the local high school on Tuesday and Wednesday, he was placing all units of the school in Grade One as he was very well pleased with the improvements made to the school during the past year and with the new rooms added for the teaching of the new boys' and girls' classes.

Chairman H. E. Wales and members of the board met Inspector Hooper at the school building yesterday afternoon and a thorough discussion of the school's affairs was enjoyed. Mr. Hooper praised the work of all members of the staff in handling the large number of pupils and while some of the forms were badly crowded he said this could not be helped but he hoped a better working arrangement might be made.

Everything in the school was given the highest rating with the exception of the lighting which he termed "cross lighting," that is, coming from two sides. The ideal is where the light comes from one side, over the left shoulder, but schools in the smaller centres are not able to comply with this regulation.

## Veteran Winchester Assessor Died Yesterday Morning

Herbert W. Empey, for 53 years a highly respected resident of Winchester village, and for more than 30 years its assessor, died at his home Wednesday morning. Mr. Empey had enjoyed good health up to last fall and worked at his trade as bricklayer and stonemason up to the age of 84 years, when he became ill. He had been troubled with his heart since that time.

Born in Dundela, Matilda township, a son of Peter Empey, he was in his 85th year. Mr. and Mrs. Empey resided in Matilda township until 1886, when they moved to Winchester village and had since made their home there. They celebrated their diamond wedding anniversary March 4 last.

Besides his wife, the former Agnes McIntosh, now in her 81st year, he leaves a daughter, Mrs. G. E. Payne, Winchester, and a granddaughter, Miss Ruth Payne. He also leaves two brothers, John Empey, Matilda, and Gordon Empey of Maxville.

The funeral is being held this afternoon at two o'clock at the house by Rev. W. D. Turner, pastor of St. Paul's Presbyterian church. Burial will be made in Maple Ridge cemetery.

Mr. Empey was a member of Loyal Orange Lodge No. 862, Winchester.

## James McMahon, Goldfield, Died on Saturday Aged 84

**Funeral Was Held at St. Bernard's Church, Finch, Monday Morning, Attended by Many Mourners.**

Early Saturday morning, the news of the death of James McMahon came as a shock to his family and the citizens of Goldfield. Although in failing health for nearly a year, he was confined to his bed about two weeks, during which time he received the last Sacrament of the Catholic church through his pastor, Rev. Father Bougie.

He was born in Limerick, south of Chesterville, on July 25, 1854, and was predeceased by his wife, Mary O'Donohue, by seven years. Of a family of five sons and seven daughters, one son, Justin, died during the influenza epidemic of 1918; a son, James, and three daughters, Margaret, Rose and Stella, reside at home; Denis, in Finch township; Sister McMahon, Hotel Dieu hospital, Cornwall; Mother M. St. Leonard, Rursuline Convent, Chatham; Mabel McMahon, R.N., of New York; Mrs. John Gauthier, of Alexandria; Charles, Moosonee, Ont.; Anna, graduate nurse, Brockville; Blanche, Civil Servie, Ottawa, and Ambrose, barrister, of King, Ont.

Mr. McMahon had been an exemplary and devoted Christian husband and father. He had always taken an active part in the educational and other enterprises of his community and municipality from the days when he drove over almost impassable roads to the nearest centre 25 miles away to transact business for his confiding fellow citizens.

The funeral took place on Monday from the family residence to St. Bernard's church at Finch, where the Holy Sacrifice of the Mass was offered by Rev. Father J .M. Foley, of St. Columban's church, Cornwall, as celebrant, assisted by Rev. Father C. Gauthier, Apple Hill, as deacon; Rev. Fr. Lefebvre, assistant pastor of Finch, sub deacon, and Rev. Father Bougie, pastor, Master of Ceremonies. Rev. Father A. L. Cameron, Glen Walter, was also present.

The body was interred in the family plot at Finch cemetery, where Rev Father Bougie officiated, assisted by Rev. Father Foley and Rev. Father Gauthier.

The pall-bearers were A. Foley, P. Foley, R. Droppo, D. Gillies, D. A. Gillies and A. Courville.

The floral and numerous spiritual offerings and the sympathy expressed bespeak the esteem that the late Mr McMahon merited in the hearts of innumerable friends.

## CONVICT ONE-THIRD OF MOTORISTS.

ONE-THIRD of the 900,000 licensed motor operators in Ontario have court convictions registered against them, A. E. Richardson, K.C., adviser to the Ontario Motor League, told the Weston-Mount Dennis Rotary Club.

The Department of Highways files shows 30,000 operators had been ordered to file proof of financial responsibility after records indicated they have been involved in accidents, he said. So far, 12,346 had failed to comply with the order. In order to reduce insurance costs he urged rigid enforcement of the Highway Traffic Act section holding an operator responsible at all times for the control of his car.

## THE COUNTRY CHURCH.

Guelph Mercury.

TIME and circumstances seem to have affected adversely the attendance at the country churches all over the province. One writer laments the fact that the rural church, within reasonable distance of the cities, is next thing to being deserted.

Not so many years ago the country churches were filled to the doors every Sunday and the people were enthusiastic in their attachment to the church, the Sunday school and other established services.

Today, the fact is sorrowfully noticed that the motor cars take the young and some of the old people past the doors of the country to the big churches in the city, and the ministers and the few who are faithful to the little church of their fathers are hurt because the old place is practically deserted.

In matters of religion, as in everything else, the lure is of the big church in the city.

## "SINK OR SWIM!"

LES HABITANTS they are act sad,
no fun in Ol' Quebec.
Bigor, it almos' makes me mad, all
t'ings they go to wreck—
I jes' retour from Montreal, where I
have heerd dem shout
"If dere must be some war at all, you
bet we sure keep out!"

I'm not quite sure what's all excite,
dis t'ing de papers say,
But anyhow I learn my drill an' keep
dose Boche away.
It's not so good when Dictateurs get
all dis worl' defied,
An' drag de great big net an' catch
les Canadiens inside.

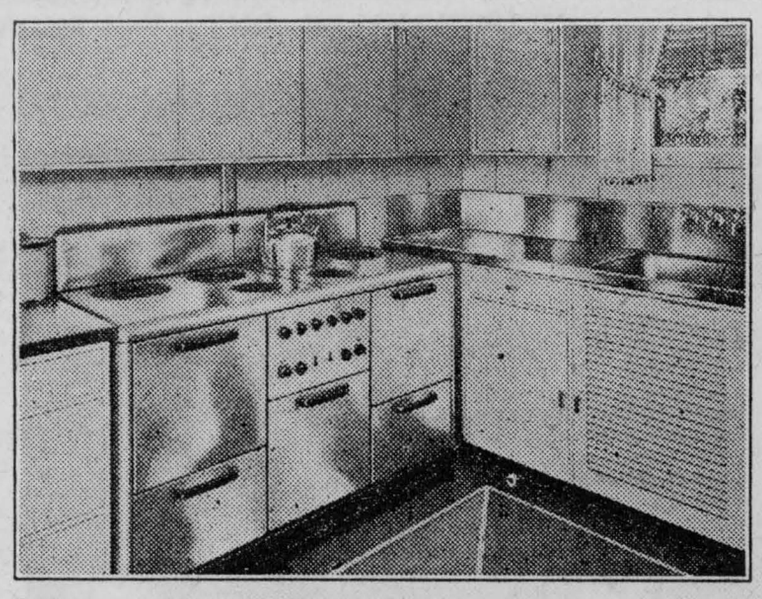

I better grind my axe se soir, an' tell
Marie not cry,
Because by heck I lose control—Democracy she's die!
If all dose Boche annex dis eart' and
try to rule de sun,
What good for me if I stay home, get
boss'd by some dam Hun?

I t'ink mebbe it's time for know jes'
what dis homme require,
It don' suit me he tramp my corn an'
set my barn on fire,
He drive my cattle off de farm, an'
kick me in de pants—
I don' like dat, so sure I'll go an' fight
for La Belle France!

Don' make mistake—some gran' Seigneur for which I have respec'
Tol' Parliament de sacred trut' about
dis Ol' Quebec,
An' Canada it knows de facts, an'
should say t'anks to him
Who make dis Empire understand'—
we all mus' sink or swim.

**Often The Case.**

"To own and to possess are not the same thing, says a prominent man of affairs. "I used to both own and possess a certain umbrella. I still own it—but somebody else possesses it."

WHERE TIME AND LABOUR ARE SAVED.

Women generally agree that work becomes a pleasure in the modern kitchen which is replete with all the latest labour and time-saving appointments and equipment. Some impression of the glistening beauty of one of these kitchens can be formed from the above illustration which shows a section of the up-to-date woman's "laboratory."

## Electric Ranges Addition to Safety As Well Improving Quality of Foods

A canary can live in an electric kitchen.

In making this observation, a representative of a well-known electric utility company pointed out that electric cooking eliminated consumption of oxygen in the kitchen. "From a standpoint of health," he stated, "use of electric ranges cannot be stressed too strongly.

"This is but one of the many important principles associated with the modern electric ranges," he continued and declared that there were many reasons why electric cookery was healthful.

He contended that it stimulated the appetite of children because of the better taste of fruits and vegetables. "Cooking at high temperatures for a long period will destroy the essential vitamins in almost any food," he stated "With electric cookery the health-giving vitamins are preserved because heating speeds are set exactly for the recipe temperatures."

This authority also claimed that broiled meats were made more healthful than fried. "And," he added, "I must say that broiling has been made easy on the new ranges.

## Economies Seen In Modern Method

**Savings Made in Different Ways By Less Meat Shrinkage and Use of Lower Cost Cuts.**

Economy of operation is one of the many important principles associated with modern electric ranges designed by leading Canadian manufacturers.

Tests have shown that 17 per cent is saved in meat purchases because of less shrinkage, while less expensive cuts can be used. He also pointed out that because of utilization of stored heat current consumption is less, national averages giving a cost of a penny per meal per person.

"The fact that the oven is completely insulated is also important," declared one appliance dealer, as he opened one of the glittering porcelain doors and pointed out this feature. "At the same time," he stated, "current is saved because it is not necessary to heat large quantities of water."

Pointing to other features of the new ranges, the dealer declared that the timer and automatic temperature control combined to eliminate waste of fuel, while the surface units put the right degree of heat where it was required.

It is estimated that the economy cooker with controlled heat and insulated receptacle represents an average saving of approximately 50 cents per month over ranges not so equipped. This cooker is recognized as an important feature, because it cooks a whole meal at once on one element without intermingling of flavours or odours. It cooks juicy joints, boiled New England dinners, baked beans, cereals, soups, vegetables and desserts and uses only the minimum of electrical current.

Looking Backward

## 20 Years Ago

From The Record Files

**Thursday, April 17, 1919.**

A daughter was born to Mr. and Mrs. T. Labre on April 13.

* * * *

Special Easter music was rendered at the morning and evening services of Trinity Methodist church, when solos were sung by Mrs. Cass and Miss Thurston, a duet by Mrs. Cass and Mr. Corner in the morning. In the evening the male quartette, Messrs. Bolster, Forward, Cass and Corner sang "The Wayside Cross" and Miss Beattie contributed a violin solo.

* * * *

Nurse A. Mackie, of Sunnyside, was reported recovering from an attack of typhoid fever.

* * * *

Ptes. Sandy MacPherson and Jos. Hunt returned to Berwick from France during the week.

* * * *

Mrs. James Rae and Mrs. William Jamieson, of Nation Valley, were in Potsdam last week attending the funeral of their brother-in-law, the late Judson Blanchard.

* * * *

T. W. Lambert was appointed village constable at the last meeting of the Village Council and given instructions to inquire into reported gambling by youths about town, and to curb speeding by automobiles.

* * * *

Stanley Boyce, of Crysler, landed a nine-pound pickerel from the Nation at Crysler on Monday.

* * * *

Mr. and Mrs. Nelson Alguire left Crysler on Monday to spend a few days in Muskoka before proceeding to California.

* * * *

Mr. J. Thompson, of Gordonville, accompanied by his daughter-in-law, Mrs. Rae Thompson, spent Sunday evening at Mr. George Smith's at Felton.

* * * *

Mrs. Anna Dempsey, of Vancouver, was the guest of her sister, Mrs. D. G. Hutt, of Maple Ridge.

* * * *

James Shaver, of Brinston, reported that a goose of his laid an egg measuring 12½ inches in circumference by 9½ inches around the other way.

* * * *

A farmer at Crysler received a cheque for over a thousand dollars for 32 hogs delivered for shipment, while another man received over nine hundred dollars for twenty-seven hogs.

## JUST BOYS.

THE TRAIT in a mother that all boys most admire is that which prompts her to proceed with the packing of a lunch basket for a picnic, although anyone can see that the clouds are gathering for a storm.

There is one complaint that the neighbours of a family of boys never make, and that is that there is nothing going on in the neighbourhood.

A boy likes best the game that involves the most hard work, and the work that requires the least exertion.

During a boy's career he encounters almost everything in the way of ailments except insomnia.

There is not much hope for the boy who pleases his mother to the extent of keeping a pair of white stockings clean all day.

If a boy had half the pride in the baby that his mother feels, he would shut it in the barn and charge three pins for admission.

**Seems Unfair.**

Man (to wife): "What do you mean by saying that I have been deceiving you for years?"

Wife: "I just found out the Government allows you $2,500 a year on your income tax for being married, and you only allow me a miserable $10 a month."

S O S

You feel like screaming—but you can't—your throat is dry—you feel as if you were choking with apprehension—your heart is pounding, pounding, pounding—what, how—when? Then from the burning chaos of your mind springs a clear, sparkling thought: "I've got to telephone for help". Before you know what's happened, all the vast organization laboriously built and rigorously maintained by your community, firemen, police, ambulances, hospitals instantly come to your aid. Yes, there's nothing like a telephone in the house—*and in emergencies it's priceless.*

● *Telephone service is widely used because it is courteous, efficient, yet surprisingly inexpensive. Nothing else yields so much for what it costs!*

## Meals Are Aided By Electric Range

**Controlled Temperature Gives Housewife Wider Fields.—Help Her Get Most Out of Her Job of Cooking.**

By Sybil Gayford Rhind.

We homemakers are in and out of our kitchens most of the day, and often more in than out. In reality the kitchen is woman's kingdom. We owe it to ourselves to make sure they are as efficiently equipped as our husband's offices.

The secret of successful homemaking is to get the best of our job instead of it getting the best of us, and that is where electricity plays such a big part. Meals must be prepared three times a day, but the wonderful electric ranges now on the market have turned this duty into a delight. It is really quite thrilling what the up-to-date electric stove is able to do.

"My dear!" exclaimed a friend the other day, "since I bought my new electric range I feel as if my fairy god-mother had waved her magic wand over me. I have so much more time to myself now. I can hardly believe it! And I'm not nearly so tired at the end of the day."

This remark is easily understood by anyone accustomed to the joys of cooking by electricity, because the new stoves do so much for us that formerly we had to do ourselves. Nowadays there is no waiting around until the oven reaches a certain temperature before lowering it, because automatic control looks after temperatures.

Electricity certainly does away with the bug-bear of washing up. No more scouring the outsides of a lot of dirty pots and pans because electric heat is a clean heat with no flame. Also, controlled heat prevents food boiling over in the oven or sticking to the bottom of saucepans. Often an entire meal can be cooked in the oven, leaving fewer pans to wash.

The economy of the new electric ranges must not be over-looked; it is a tremendous asset to the lessening of Mr. Budget's figures. It has been proved by actual tests that the average cost of a meal, cooked in a modern stove, is less than one cent a meal per person. There is also a very definite saving through reducing shrinkage of meat, doing away with cooking failures and eliminating waste of food values.

A sustained low temperature, perfectly controlled, is one of the many ways in which the modern electric stove excels. This perfectly controlled low heat is the answer to the problem of cooking the less expensive cuts of meat and having them as deliciously tender as the best under-cut steak. For an example of this type of cooking the following idea is a good one.

4 medium size shoulder, yearling lamb chops. Cut 1 inch thick.
1 medium size tin tomato juice
1 cup cold water
Bacon fat
Flour
Salt and pepper
Parsley

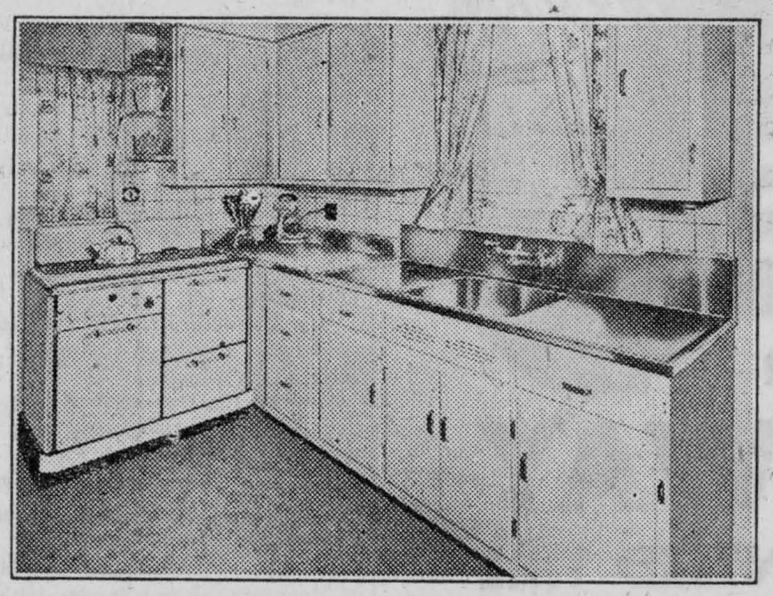

Trim off chops neatly. Shoulder chops are considerably cheaper than loin ones. Dredge with flour. Lightly grease fry pan with bacon fat, heat, brown chops slightly on both sides. Then put them in covered baking dish. Pour over meat the tomato juice diluted with the water. Season to taste. Cover with tight lid. Set oven for a sustained heat of 250 degrees and cook slowly from two hours to two and a quarter hours, depending on the size of the chops. Arrange meat on a hot platter, sprinkle lightly with chopped parsley. Remove any fat from tomato juice gravy and serve in gravy boat. Riced potatoes and buttered carrots or spinach make a nice accompaniment to this dish.

Amount given serves four generously. If more chops are required, don't forget to increase the tomato juice and water.

### GOD'S BOOK.

"Mother, I've found a dusty old thing,
High on the shelf—just look!"
"Why, that's a Bible, Tommy dear,
Be careful, it's God's own Book."
"God's Book?" the child looked up surprised,
"Then, mother, before we lose it,
We'd better send it back to God,
For you know we never use it."

"I wish I'd enough money to buy an elephant."
"What d'you want an elephant for?
"I don't. I want the money."

WOMAN'S "PRIDE AND JOY"

A modern electrical kitchen has been described as "a modern woman's pride and joy." Even a passing glance at the above illustration will reveal many reasons for this description. Flooded with brilliant sunshine, this kitchen radiates a glistening cleanliness with its gleaming monel metal working surfaces, modernistic chrome taps and other sparkling appointments. Plenty of cupboard space, close proximity of the up-to-date sink and dishwasher to the automatic electric range, and an attractive colour scheme are but a few of many reasons for the steadily increasing popularity of these kitchens.

## Black Pots Disappear From Kitchen When Electricity Used For Cooking

Grease and grime, which became embedded on the bottom and sides of pots and pans used on old old-fashioned stoves and ranges, no longer present a problem to the housewife.

Modern electric ranges have not only taken guesswork out of cooking and made it a pleasure, but they are clean, according to leading authorities. It is pointed out that electric heat is as pure and clean as sunshine, without the presence of soot, smoke and ashes, while cooking utensils do not become blackened by carbon.

Pointing to one of these modern and attractively finished ranges, one electrical dealer emphasized the fact that the entire range was porcelain which could be cleaned with a damp cloth. He directed attention to the rounded corners of the oven interior which could not hide grease or dirt, while all parts of the oven can be removed to be cleaned. The oven interior of the many ranges is dark and pebbled in appearance, stains not showing.

Referring to one of the many benefits experienced by electric range users, this dealer declared that there was less kitchen re-decoration needed in homes where they had been installed.

## Maple Syrup Dishes

TESTED RECIPES.

NOW that the new crop of maple products is on the market, the following recipes may be of interest, although it should be remembered that maple syrup and maple sugar are good at any time of the year.

### MAPLE SYRUP SAUCE.

1 cup maple syrup
1 teaspoon flour
1 teaspoon butter

This maple syrup sauce is for puddings or ice cream. Melt the butter, add the flour, cook until frothy. Slowly add syrup, and boil one minute. Serve hot or cold.

### MAPLE TRIFLE.

Crumble stale cake crumbs in four custard cups until half full. Over them pour maple syrup allowing about three tablespoons to each cup. Allow to stand 20 minutes. Then pour over a custard as follows:

1 cup milk
2 eggs
2 tablespoons maple syrup

Heat milk and syrup to the boiling point. Beat egg and one yolk until thick, add hot milk and cook in double boiler until the mixture coats the spoon. Pour over crumbs while hot. When cold, cover with a meringue made from one egg white and two tablespoons granulated sugar, and brown in a slow oven.

### MAPLE CREAM.

2½ cups maple syrup
1 tablespoon cream

Boil syrup until it hardens when dropped in cold water, then add cream, stirring until blended. Cool slightly and beat until thickened. Walnuts may be added.

### MAPLE ICE BOX CAKE.

1 tablespoon granulated gelatine
2 tablespoons cold water
2 cups milk
2 tablespoons cornstarch
½ cup sugar
2 eggs
¼ cup maple syrup
½ teaspoon vanilla
¼ cup whipping cream
1 dozen lady fingers

Soak gelatine in cold water. Heat milk in double boiler. Add sugar and cornstarch moistened with cold milk. Cook ten minutes, stirring until thickened. Add beaten eggs, and cook three minutes longer, stirring constantly. Add gelatine, maple syrup, and vanilla. When mixture begins to thicken, fold in whipped cream. Line mould with lady fingers and fill with alternate layers of cream mixture and fingers. Place in refrigerator and let stand for several hours. Unmould and garnish with whipped cream, sweetened and flavoured to taste.

## Joy of Working In Cool Kitchen

**No Waste Heat Dissipated by Heavily Insulated Electric Ranges in Today's Modern Kitchen.**

To be able to cook in a kitchen that remains cool and comfortable despite the fact that a roast is sizzling in the oven and the mercury is hitting a blistering ninety outside, is no longer a housewife's dream but a practical realization.

This fact was made clear by leading manufacturers when discussing some of the outstanding features of the modern electric range. It is pointed out that in surface cookery the utensils sit directly over the heating coils so that no heat is wasted. The insulation of the up-to-date range is such that no heat is dissipated to heat up the room, the kitchen remaining cool and comfortable while the cooking is proceeding.

Attention is also directed to the oven which is heavily insulated to keep the heat inside.

## Cedar Grove

Mr. and Mrs. Frank McConnell and grandson Carl visited Mr. and Mrs. Merton Collins, Osnabruck Centre, on Friday.

Mr. and Mrs. Fred Dafoe spent Sunday in Morrisburg the guests of Mr. and Mrs. Elmer Janack.

Miss Keitha Beckstead returned to her home on Saturday evening after spending the past month with Mr. and Mrs. C. F. Dafoe.

Mr. Arthur Brownell spent the week end in Kingston and Belleville.

Mr. and Mrs. Frank McConnell and Carl were guests of Mr. and Mrs. Garnet Gallinger of Farrans Point, Sunday. Master Carl returned home after spending the week here.

Mr. and Mrs. Ernest Marcellus and daughters Irene and Jean visited Mr. and Mrs. Frank Dafoe on Thursday.

Thinking of electric stoves—a poster was seen in London' England, recently, advertising all the wonderful things electricity does nowadays, it read—

"Don't kill your wife with work.
Let electricity do it"

"What did you shave with this morning?"
"My wife's pencil sharpener."

"What would I have to give you for just one little kiss?"
"Chloroform."

THRIFTY?

today's Electric Range

CUTS PENNIES IN HALF!

Electric Ranges make Modern Kitchens

IT HAS been proved that meals cooked on an Electric Range average *less than half-a-cent* per person for current cost. And that's just the start of your savings! You save on food bills because your Electric Range never burns or scorches, ends cooking failures — and turns "left-overs" and inexpensive meats into delicious dishes. You pay the baker less—because *anybody* can bake perfect pies and cakes the electric way. You save on redecorating expense—because electric cooking is clean, keeps your walls, ceilings and curtains spotless. It's *thrifty* to modernize your kitchen with an Electric Range.

HYDRO THRIFT PLAN

THE CHESTERVILLE HYDRO COMMISSION will wire your home for Three-Wire Service FREE if you buy an Electric Range of 6,000 Watts or More.

Northern Electric Ranges

Live better electrically...the HYDRO way

"The HYDRO THRIFT PLAN opened my eyes!"

So EASY to own an Electric Range

"HERE I'd been slaving away over an old-fashioned cook stove for years, thinking a modern Electric Range was beyond our means. Then one day the Hydro meter man told me about the Thrift Plan.

"It opened my eyes! That very evening, my husband and I selected this beautiful range. I'm so proud of it . . . and it was so easy to own on this convenient Hydro Plan."

Why don't *you* drop in at the Hydro office, or your range dealer's, and see how easily you can modernize your kitchen with the up-to-date Electric Range you've dreamed of owning? Read the Thrift Plan details below . . . then, today, come for a look at the new 1939 models—and prepare to be surprised at the *low prices!*

HYDRO THRIFT PLAN

THE CHESTERVILLE HYDRO COMMISSION will wire your Home for Three-Wire Service FREE if you buy an Electric Range of 6,000 Watts or More.

# The New Era In Agriculture

**Revolutionary Changes Are Wrought by Farm Machinery**

THE VAST CHANGES that have been effected in farming through the use of labour-saving implements and the fact that modern farm machinery is playing in reducing the farmer's costs of production, were the highlights in an address on "The New Era in Agriculture" given before the Rotary Club of Toronto last week by John Martin of the Massey-Harris Company.

**Pioneer Days Recalled In Rotary Address**

Mr. Martin, by striking contrasts of production figures, brought home to his audience the importance of agriculture in Canada, showing that the crop value of the fodder crops of Canada for 1937 amounted to $138,000,000—whereas that for the total gold production of Canada, for the same year, was $143,000,000, or "practically the same amount for fodder—just feed for horses and cattle, as for the gold production of Canada," and that "the dairy production of Ontario and Quebec alone was $157,000,000 or $14,000,000 more than for the total gold production of Canada."

"The story of the development of agriculture from the small clearings of the pioneer days to the larger acreages of today," the speaker said, "was largely the story of the introduction and development of farm implements, and Canadians had played a most important part in it."

**Exports Important to National Economy.**

"Men like the Harrises, Masseys, Wisners, Patersons, Veritys, Cockshutts, Frost and Wood, had put Canada right in the forefront of implement making in the world," he said, and told how the small plant started by Daniel Massey in Newcastle in 1847 had grown and of the amalgamation with the Harris Company in 1891. How the business spread to 52 countries of the world and spoke of it as being as firmly established in the business of a score of other countries as in its own native land.

"As a result of its export businesss, Massey-Harris," he said, "in the ten-year period from 1928-1937, spent in Canada $21,261,000 more than the total of all its sales in Canada, surely a worth-while contribution to the national economy of Canada."

**Removes Stoops From Farming.**

"One of the oldest of callings," the speaker reminded his audience, "farming had seen few changes down the ages until the coming of mechanical aids. Now changes take place with such rapidity that we do not stop to consider the transformation that has taken place." He found a ready means of recalling what farming meant in the pre-machine days by reference to those famous pictures of the great French artist, Millet, which still adorn the walls of many homes—"The Angelus," "The Gleaners," and "The Man With the Hoe," and pointed out that they all had one significant characteristic and that was the bent backs of the people working in the field.

The full import of "The Man With the Hoe" he brought home with dramatic force in the few lines he quoted from Edwin Markham's now famous poem in which he calls on—"Masters, Lords and Rulers of all Lands to straighten up this shape," but Mr. Martin added, "each step in the emancipating of the farmer from this back-breaking, brain-deadening toil has come about by the introduction of some new labour-saving machine, and thus modern farm machinery had done more than all the Masters, Lords and Rulers of all lands to straighten up this shape."

**Farm Production Costs Lowered.**

"Even with Canadian farming on a higher standard than it had ever been here or in any other part of the world it still had great problems confronting it, such the difficulties of Western Canada with soil-drifting, rust and grasshoppers; the low price that prevailed for some of its products, the disparity of farm product prices with the prices of manufactured products generally, and the problem of dwindling export markets for wheat and its consequent low price."

"But here again," the speaker said, "the agricultural engineer comes to the aid of the farmer and cited the development of the One-way-Disc seeder which combining the various operations of tillage and seeding all in one avoided too much over cultivation of the soil and left it in a matted condition which successfully resisted soil-blowing and at the same time cut the cost of tillage and seeding by at least 40 per cent.

"In the great need for concentrating on lower cost of production, the agricultural engineer had effected an adaptation of the combine method of harvesting in the new small power-take-off combines which brought the advantages of this most economical method of harvesting within the scope of the farmer of smaller acreages. A one-man outfit," Mr. Martin said, "farmers last year told him that their only out of pocket expense for operation was the cost of gas and oil which amounted to what it would have cost for the price of binder-twine alone, if they had used the binder, thresher method, saving the cost of stookers and threshing crews, and the woman of the farm was saved the ordeal of cooking for the threshing crew, etc.

"Tractors, too, had shown as great improvements, especially in the reduction of operating costs. Citing one striking example in the new tractors in the saving in oil alone, five quarts instead of 12 are now required at a filling and of only needing to change every 100 hours instead of every 30 as heretofore, saving as much as $60 a year.

"Agricultural engineering was working hand in hand with the farmer in the solution of his problems and in lowering the costs of production and so helping to put farming on a more profitable basis."

# Berwick W.I. to Present Certificates to Successful

Despite the terrible condition of the roads, 13 members and three visitors attended the Women's Institute meeting held at the home of Mrs. R. Stark of Berwick on Thursday.

The meeting opened with the Ode and prayer. The roll call, "My Favourite Vegetable and How I Serve It," brought forth many ways of cooking with carrots leading as the favourite.

The secretary gave the minutes of the last meeting and read correspondence. The Institute's first choice of the short courses was "Health Education," with "Utilization of Wool" as second.

It was decided to have an entertainment the first week of May, when members of the St. Johns Ambulance class who were successful in passing their examinations will be presented with their diplomas.

Miss Elizabeth Ruddy gave a vote of thanks to Mrs. Starke for the use of her home and to the hostess for the dainty lunch.

The Institute was pleased to have with them Mrs. Brownlee, of Finch, and her daughter, Mrs. J. Starke, of Carleton Place. Mrs. Starke is a former resident of Berwick.

The next meeting, on May 11, will be the annual with the annual chicken dinner, in the Community Hall, and all members are requested to keep the date in mind.

# Dangers of Gasoline Blasts Require Constant Precaution

**Strange Explosion and Fire in Bracebride Gas Station Points Out Another Precaution to be Taken.**

In Bracebridge, an explosion recently occurred in a gasoline service station. The vent pipe from an underground gasoline tank terminated under the eaves. Underneath the eaves were openings into the attic of the building. The vapours from the vent pipe got into the attic and accumulated there and were ignited from some undetermined cause. The resulting explosion shot a sheet of flame downward into the service station, killing a dog lying on the floor beside a radio and burning the eyebrows and the side of the face of the owner, who had just moved away from the radio. The fire developed so quickly that it could not be controlled by the chemical extinguishers, and the frame building and its contents were a total loss.

Vent pipes from gasoline tanks should extend above the roof of any buildings to which they are attached so that escaping vapours will be dissipated in the open atmosphere. Fire Chiefs are advised to check up on similar conditions under their jurisdiction so as to guard against the possibility of fire or explosion from such a cause.

# Help With Habits

EVERY modern mother knows the importance of having the children form good habits but nevertheless not every mother is successful in getting the expected results. This is usually due to the fact that purpose is left out of the programme.

**TODAY'S PARENT —By— Ellen McLoughlin Director Children's Institute**

If children form habits of putting away their toys at bedtime, or washing their hands before meals and of carrying out a hundred other minor matters of daily routine in a semi-mechanical manner, such habits will be found to have less permanent value than if their motive is made intelligible to the young child. Otherwise—as soon as the mother's control is removed the "habit" does not function. This shows that the effective stimulus for action was merely the mother's authority, not the actual purpose in view — washing the hands, taking a nap before dinner, changing wet shoes and what not.

Have you noticed that boys often have good manners while in school but not elsewhere? Their idea of behaviour is related to a place instead of a purpose. When place is the stimulus, the habit won't work in other surroundings.

Since practice is so important in habit forming, close attention should be paid to practice. If one practices what is good, he is just as apt to acquire the bad habit as the good one. If habit has any value it is that it releases the child from constant conscious attention to his tasks.

It should be remembered that it is better to prevent an undesired reaction from taking place than to punish the child after the act has occurred and the habit is thereby rendered that much stronger. Because of the automatic nature of habit reactions, the child is unable to stop himself in time from doing something he knows to be naughty even when he is aware that punishment will follow. Thus to punish after each attack of passion a child who has acquired a habit of giving way to fits of temper, may only serve to undermine the youngster's self-respect without helping him to self-control. The better plan, whenever possible, is to attack bad habits either by removing the stimulus, guarding against it or preventing an occurrance of the reaction by some strong counter-impulse.

The great antidote for bad habits is good habits. The weak point in habit-forming is desire. It does but partial good to refuse the wrong act repeatedly, leaving the desire unconquered. Help the child to visualize strongly the consequences of a habit, be they good or bad, and it will help him to cultivate a good desire or control a bad one.

**FAIRY TALES AND DAY DREAMS.**

Mrs. J.B.P.: Should a child be given fairy tales to read, or should these be kept away from him as likely to form wish-fulfilment day-dream habits?

There are different results from different types of fairy stories. Never read those with cruel or terrifying people to children at any time. Many of the oldtime fairy stories are not suitable for children. Fairy tales may have the advantage of appealing to the child's imagination, but when experience is as limited as is a child's real things also appeal to his imagination. When fairy stories are told they should be told as strictly make-believe, and their value minimized by the fact that "it didn't happen." All stories — fairy tales and others — which we read to the children, or which we give to them to read, should be chosen with great care. Recognized approved works like The Book of Knowledge contain all kinds of grand stories for children of any age, which fill the needs of cultivating the imagination and extending the mental horizon, through entertainment.

Ellen McLoughlin will answer questions of readers pertaining to parent-child relationships — no medical or legal advice. Address her in care of The Record, enclosing self-addressed, stamped envelope for a personal reply.

**The Only Way Out.**

A young Scottish woman became so stout that she offered to release her fiancé from his engagement.

"Weel," he said, "gi'e me back the ring, an' we'll say no mair aboot it."

"But I canna dae that. Ma fingers have swelled so badly I canna get it off."

"Then ye'll ha'e to marry me."

**Fun in the Kitchen.**

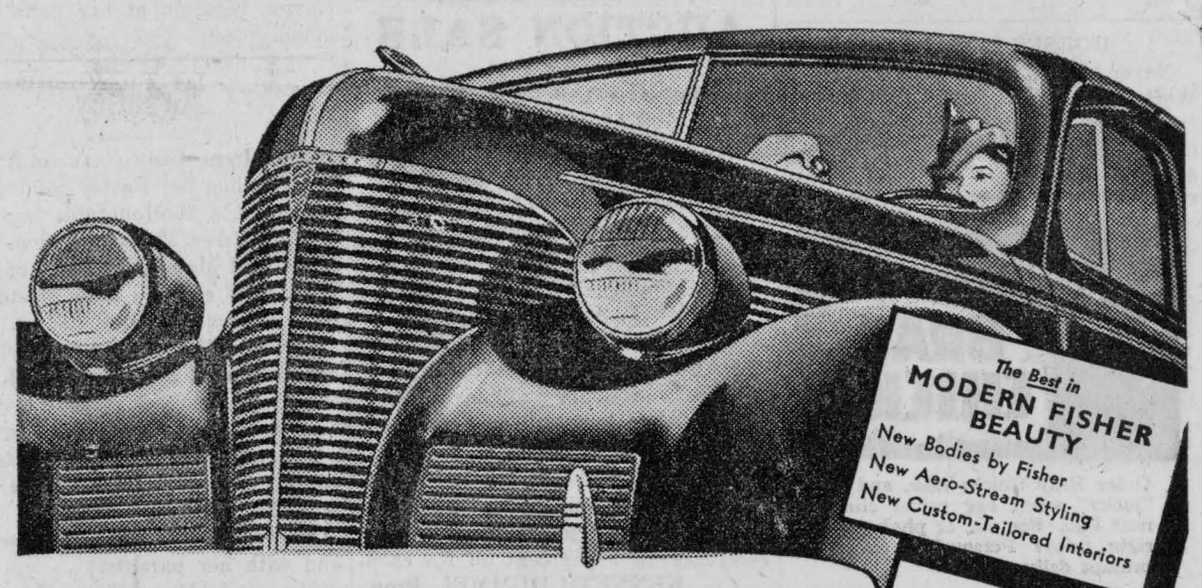

"Now I see that rubber glass is a new chemical sensation."

"Yes, and I'm looking forward to watching the cook catch a pitcher of water on the second bounce."

# In The Caisson

BIG TOM McWHORLEY, clad in brown dungarees, was talking to a group of his mates. So taken was he with his subject that he had forgotten the passing of the noon hour; his luncheon pail stood untouched beside him. His listeners, sitting in the shadow of the constructon shanty, had so far given him their attention as to stop their rough chaff. Round them rose the chaos of derricks, donkey engines and caissons that marked the birthplace of another "skyscraper."

"And I'm tellin' you," the big man declaimed, driving one huge fist into the palm of the other hand, "that this is one of the rules, the main rule, that you must observe. Keep fire out of the caisson if you hope to keep your jobs. A blafie in the 'air' in yonder," — he jerked his thumb toward the nearest caisson.—"if it gets out of control will take away more than your jobs."

He whirled toward one of the seated workers, who was listening with a half smile.

"You can grin all you want to, O'Rourke, but I saw you trying to snatch a puff of smoke this morning. You shot out the dottle of your pipe on a bit of oakum and you know as well as I do that the quick blaze scared you. You stamped it out, but maybe the next time your foot won't be quick enough. Then if it gets away from you, heaven help the sandhogs down in the bottom of the tube. And what's more, if you get out without harm, Tom McWhorley, who is telling you this will give you a marvellous beating for your benefit."

A knot of Italians,—"sandhogs" — whose daily "stint" was to peck away at the sand, clay, mud or gravel that the foundation caisson was sinking into listened eagerly, and with much gesticulation showed their approval of McWhorley's words.

When the first notes of the chime in the tower sounded the half hour, McWhorley led the way toward the air lock that opened into one of the caissons. The gang followed him. As the last man entered and closed the door of the air lock. McWhorley twisted open the valve that let in the compressed air. With a sharp hiss that gradually died away in a sigh the air pressure in the lock changed, until the foreman thought that it was the same as that in the caisson. He felt that it was then safe for the men to enter the long shaft. Then he opened the trapdoor, and the sandhogs, still chattering volubly, descended first. The light from the string of electric bulbs beside thee ladder threw their shadows on the rounded walls of the caisson.

McWhorley followed them, but he stopped with his head and shoulders above the sill.

.'There's a bit of a draft here," he declared. "O'Rourke, take a candle and some oakum and look for the leak. Mind, now, don't keep the candle burning when you're not using it."

Then he, too, dropped down the ladder. The man to whom he had spoken stood for a moment, still wearing the sneer with which he had greeted McWhorley's warning. Then, slinging a bundle of oakum over one arm and making sure that a candle end and matches were in his pocket, he started to do McWhorley's bidding.

Descending the ladder slowly, McWhorley looked up once and caught the reflection from the candle flame as the tamper passed it around the joints in the sheathing of the caisson; he watched for the first wavering that would show where the compressed air was escaping.

"O'Rourke's a good kind," he reflected, "but he is a kid, and so thinks he doesn't need to be told anything. Hello, what's that!"

Shooting downward, a blazing meteor had brushed McWhorley's jumper sleeve with a flying bit of flame. As he beat out the fire in the heavy canvas, Big Tom's first thought was, "Now O'Rourke will get his time and something else from me."

His second thought was for the safety of the three sandhogs at the foot of the caisson. What had happened up above him he knew full well. Either from pure bravado and a wish to defy McWhorley's orders, or from the desire to save himself the trouble of lighting the candle anew at each joint in the sheathing, O'Rourke had kept his light burning while he slowly clambered downward in search of the leak. While he was shifting the candle from one hand to the other the flame had touched a strand of oakum. With the excess oxygen in the compressed air to feed it, the blaze had swept through the whole bundle with the suddenness of an explosion. The tamper was scorched and, without a thought of the men below him, had dropped the whole flaming mass.

Ordinarily the incident would have ended with a laugh from the gang for the man who was singed. McWhorley knew, however, that a heavy rope mat and some bits of lumber were lying around the bottom of the shaft; and, as he feared the flaming oakum landed on the mat with a soft thud. The sandhogs straightened up and gaped at the fire that had so suddenly dropped on them; and as they looked, the fire spread to everything inflammable within reach. That was enough for the three, and even before McWhorley's shout they made a wild break for the ladder.

Meanwhile McWhorley, clinging halfway up the tube, peered down. In spite of what he had said about fire in the caisson, he thought that there was little danger; he had exaggerated the possibilities in warning his men. Now, however, as a thick puff of smoke from the burning hemp shot up and set him coughing, he realized that the situation might well become serious.

The tube was filling with strangling smoke, and McWhorley scrambled up toward the air lock. Close on his heels, as he reached it, came two of the sandhogs, coughing. O'Rourke, already there, turned to see McWhorley advancing, with his fists doubled and the light of anger shining in his eyes. But the threatened beating was delayed. A sandhog grabbed big Tom's arm and, forgetting all the English he ever knew, jabbered loudly, pointed wildly to the other Italian and himself and with frantic gestures indicated the trapdoor. The third sandhog had been caught in the smoke!

The foreman made one jump to the door. As he started to go down the ladder, he saw O'Rourke turning the valve that would release the pressure in the lock. Holding to the jamb of the door with his right hand, McWhorley shouted to the tamper to wait. At that moment the pressure in the caisson puffed a thick cloud of smoke into the lock, and in a sudden panic one of the sandhogs swung the heavy door shut.

An agonizing pain shot up McWhorley's right arm as the door shut—a pain so sharp that he reeled and nearly fell from the ladder. Around him the smoke seemed to have made a cushion, and for a moment he had an idea of sinking into it and resting until his arm stopped hurting. He tried to see what had happened, but the light in the caisson was too dim. Then suddenly the thought of the sandhog down in the tube obtruded itself on his mind again. There was no way of telling whether the man was at the bottom of the caisson or whether he was hanging limp on the ladder.

With a muttered comment on the stupidity of Italians, McWhorley started to feel his way down the ladder. The lamps alongside, burning like little red eyes through the smoke, gave no light that could aid him in the search, and he found that for some reason his aching right hand could not get a satisfactory grip on the ladder. Rung by rung he went deeper into the murk, with his eyes smarting and his lungs burning. Never had the ladder seemed so long; he had a half delirious idea that the fire had burned the bottom out of the caisson, and that he was climbing down straight into the bowels of the earth. Then his foot touched something soft.

Groping with one hand, he was able to make out that the sandhog was doubled over a rung, seemingly lifeless. To McWhorley, although he was in almost as bad plight as the sandhog the task of carrying a heavy man up the ladder did not seem impossible. His one thought was that here was the man he had come to take back to the clear air. It was almost too much for one man with an arm that was numb from finger tips to shoulder, but it had to be done anyway. The easiest way was to take the man across your shoulders—so; then hold his legs with one hand, put your foot on the next rung up, change the grip of your free hand, put your foot on the next rung, change your grip, next rung, change, up, up—

Meanwhile the men in the air lock were growing a little ashamed of the fright that had kept them from going with big Tom to save the sandhog. The two Italians were strangely quiet, and stole glances from time to time at O'Rourke, who leaned sullenly against the wall. At the sound of a faint scraping, however, they sprang into activity and opened the trapdoor. There was McWhorley, grimed with smoke, his brown clothes streaked with red, bearing the limp body of the sandhog on his shoulders. In a second they had dragged him into the air lock.

O'Rourke leaped to the valve, and in a moment the gang were carrying two unconscious men to the little emergency hospital. An ambulance clanged outside the high fence, and a white-jacketed young doctor bustled into the shack. The sandhog was not in a serious condition, but McWhorley's right thumb had been taken off at the joint as cleanly as if by the surgeon's knife.

McWhorley's eyes opened as the doctor was busy with dressings and bandages. He glanced at his wounded hand and then looke up at O'Rourke.

"O'Rourke," he whispered, "you'll have to do without the beating that I promised you for a while; but meanwhile tell those fool Italians not to shut a caisson door hereafter when a man's hand is still inside."

### Poor Dad Again.

Two modern little girls on their way home from Sunday school were solemnly discussing the lesson.

"Do you believe there is a devil?" asked one.

"No," replied the other, promptly. "It's like Santa Claus; it's your daddy."

## Morewood

Miss I. Jervis, Correspondent.

Mrs. Harry Popplewell and Mary visited for a few days with her mother, Mrs. James Andrew, of Ottawa.

The various teachers left on Sunday for their respective schools: Miss Margaret Carlyle, Ottawa; Mr. Ralph Dillabough, Ottawa; Miss Sybil Dillabough, Portland; Miss Blanche Loucks, Wales; Miss Dora Loucks, Moulinette; Miss Louva Allison, Cass Bridge; Miss Gladys Coulthart, Apple Hill; Mr. Jos. Parkin, Burnstown.

Miss Doreen Faulkner returned on Sunday after spending Easter Week with her grandparents, Mr. and Mrs. Mildren Baker, of Winchester.

Mrs. Benson Hutchinson visited for a few days with her daughter, Mrs. Peter MacLaren, of Russell.

Miss Helene Faulkner returned on Sunday after spending Easter Week with her aunt and uncle, Mr. and Mrs. Arthur Baker, of Finch.

Mrs. Wm. McQuaig and the Misses Laura and Carrie Hunter returned to Ottawa on Sunday after spending Easter Week at their home here.

Mrs. A. J. Martin and Mrs. Jean Ballantyne and Martin arrived home on Sunday after spending the winter months with Mrs. Verna Kent, Syracuse.

Miss Irene Jervis called on Miss Edith Swerdfeger on Monday afternoon. At time of writing, Miss Swerdfeger is improving after her illness.

Miss Myrtle Casselman left Tuesday for her school at Chatham after spending Easter with her parents, Mr. and Mrs. Mahlon Casselman.

Miss Irene Jervis called on Mrs. Wilson Steinberg on Monday afternoon.

Miss Jean Loughridge spent the week-end with Miss Lois Steinberg.

Mr. and Mrs. Milton Swerdfeger and daughters, of Glen Stewart, spent Sunday with Mr. and Mrs. A. B. Allison and Mr. and Mrs. Wm. Swerdfeger.

Mr. and Mrs. Harold Swerdfeger and daughter, of Morrisburg, spent Sunday with Mr. and Mrs. Wm. Swerdfeger.

### FASHION SHOW AND TEA HELD BY C. G. I. T. GROUP

The United Church Hall, Morewood, was the scene of a most interesting event Wednesday evening last when the Wanakita Canadian Girls In Training, under the leadership of Mrs. H. R. Faulkner sponsored an Easter Tea and Fashion Show, the stage setting being a modern living room.

The president, Natalie Fetterly, was chairman for a brief programme consisting of numbers by the Gordon Orchestra, C.G.I.T. Girls, novelty dance by Rebecca Hunter and Phyllis Reveller, two vocal solos by Verda Gordon, and a number by the ladies chorus composed of Mrs. Bezanson, Mrs. S. Barrington, Mrs. Wm. Fetterly, Mrs. O. V. Craik, Miss M. Macaskill, Mrs. H. R. Faulkner, with Miss E. Smith at the piano. Mrs. W. Fetterly and Mrs. Earl Gordon were the accompanists for the evening.

The latest spring styles in cotton prints, knitted suits, afternoon gowns, coats, suits, hats and accessories were modelled by Mrs. A. G. Suffel, Mrs. L. Dixon, Mrs. K. Ault, Mrs. R. MacPherson, Miss D. Porteous and Mrs. D. MacLean. Hair styles were also demonstrated. Stewart Moore acted as page boy to announce the different events. An added attraction was a display of summer shoes.

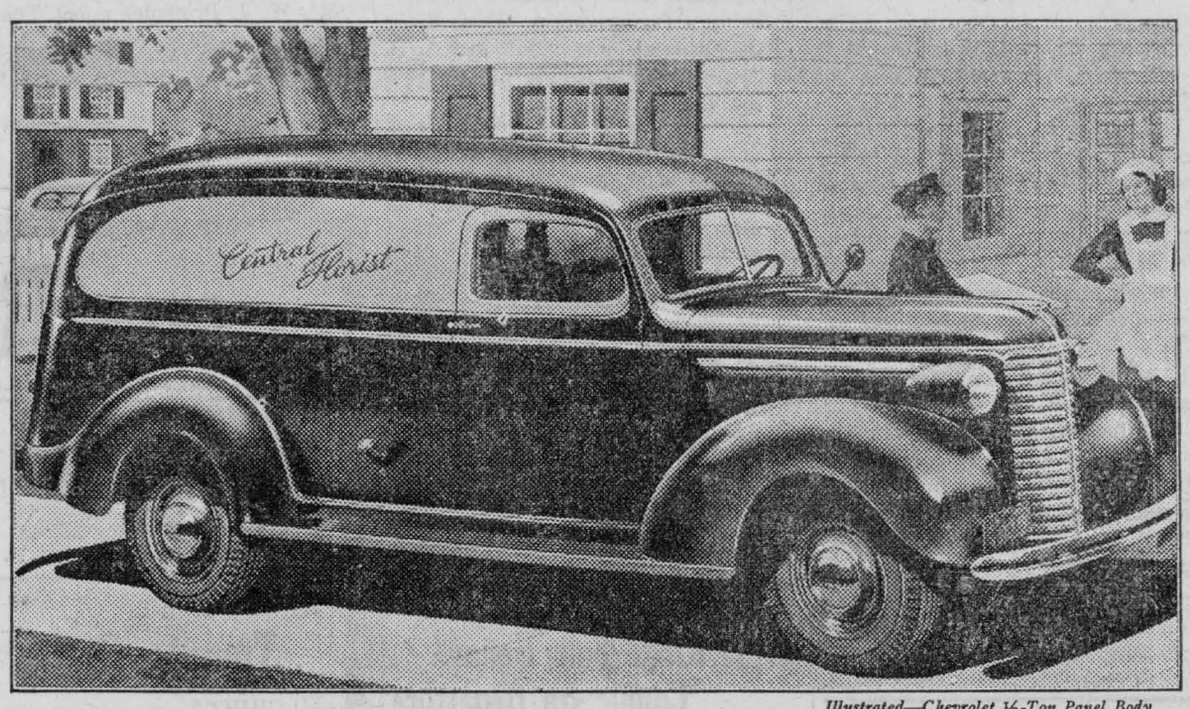

Following the fashion show, tea was served by the C.G.I.T. at tables tastefully decorated with spring flowers and Easter novelties.

## Honesty Proved Best Policy In Conduct of Any Business

**Harv. E. Henry, of Ottawa, Gives Fine Vocational Talk Before Rotary Club Members, Tuesday.**

Members of the Rotary Club of Chesterville were told where and how the styles for men's clothing are set and why they wear them, when Harv. E. Henry, of Ottawa, spoke to them Tuesday on "Honesty in Business." The business of selling men's wear is a hard game, said the speaker, because the successful dealer must be working six months ahead of the season, and he must choose the styles and patterns that are going to be worn.

With this season a month behind by reason of the late spring, Mr. Henry said there was plenty of business to be secured if the merchants go out and get it. His suggestion in tough times was to "Get down a little earlier in the morning and worker to get your share; and while the other fellow is grousing about the lack of business, get a share of his too." War scares always bring a slump, and last September's crisis was no exception.

Mr. Henry affirmed that the honest businessman did not have to revert to the misuse of the word "sale" and the misrepresentations that go with such a practice, to get his share of trade. Although he is not a Rotarian, he had found that "He profits most who serves best." He quoted instances of merchants who seldom had the article requested, but had "something just as good." They do not remain in business very long. "There is always the line that is branded," he said, "and the imitation."

Styles for men's wear are set at the Esquire Style Shows in New York City, explained Mr. Henry, and the leading manufacturers of Canada and the United States attend with the Designers Convention being held at the same time. There the colours, weaves and styles are determined and the information passed on to the merchants who must place their orders six months in advance so that the factories may have time to turn out the cloth.

The predominant colour for this fall is green, stated the speaker. "Yes, and you'll wear it, too. Men buy the new styles not perhaps because they care such a lot for them, but because it is what the other fellow is wearing."

"Why is it that the man of 40 to 50 today wears a two-button suit coat, while 15 years ago there was nothing but the three-button type?" asked Mr. Henry in referring to the style trend.

"Why do we have peaked lapels, pleated pants. Why don't we wear 14-inch cuffs today? Why are 60 per cent of the suits sold now double-breasted. A few years ago hats had a two-inch brim, but now anything less than two and three-eighths looks terrible. A few years ago it was impossible to sell a shirt with collar attached, but today 85 per cent of the shirts are of this type, and 75 per cent of this number have the new 'fused' collars."

"The policy of the successful merchant can be given in a few simple words," asserted the speaker. "They are: 'Have the right mrchandise at the right time, at the right price, and in the right quantity.'" He said he believed in the slogan "The customer's always right." "Let him have his way," he suggested, "but diplomatically guide him into the right style. Don't try to sell a customer—rather let him allow you to assist him in his selections. Be sold on your own ideas for the particular man, and stick to it; don't let him talk you out of it. Then you will wind up with both of you thinking you have won."

Mr. Henry, who was introduced by President P. S. Boyd, has had 25 years of experience in men's business, being at present manager of McKerracher-Wanless, Ltd., Ottawa. His address, being of the "vocational" type, was very instructive. Geo. J. Hunt, chairman of the vocational committee, thanked the speaker.

Notice was given of the charter night at Prescott on Tuesday, April 25, and as a result the meeting of the local club will be held on Monday. On May 2, the club will hold a "Farmer's Night" with Dr. Archibald, internationally known director of the Central Experimental Farm, Ottawa, as the speaker. Each Rotarian is expected to bring a farmer guest. Thos. Blair, of the Ottawa Rotary Club, and A. H. Fulton, of Maple Ridge, were guests at the Tuesday luncheon.

### RIDDEL—NEPHEW

A quiet wedding took place at the United church parsonage, Finch, on Saturday, April 8, at 4 p.m., when George N. Riddell, of Chesterville, son of Mr. James Riddell and the late Mrs. Riddell of Chesterville, was married to Verna Ruth, daughter of Mr. and Mrs. John Nephew, of Finch. Rev. H. M. Beach performed the ceremony.

The bride was married in a bolero frock of powder blue triple sheer with gray and blue accessories. She wore a corsage of cream Talisman roses. She was attended by her sister, Miss Beth Nephew. Harry Allison, of Chesterville, was best man.

Mr. and Mrs. Riddell left immediately for Montreal. They have taken up residence at Berwick.

## Maple Ridge Folk Honour Couple On Departure

Prior to their departure for Bourget, Que., where they will reside in future, Mr. and Mrs. Bruce Empey were tendered a farewell party at their home at Maple Ridge on Friday evening. Some fifty neighbours and friends were present, and the evening was spent in games and music.

The address to the guests of honour was read by Miss Jessie Derby, while the presentations of a walnut end and library tables were made by William Armstrong, George Scott and Colbourne Helmer.

Both Mr. and Mrs. Empey thanked their friends for the beautiful gifts.

At the close of the evening refreshments were served by Mrs. Arnold Windsor, Misses Jessie Derby and Myrtle Carkner and Wm. Armstrong, Colbourne Helmer and George Scott.

## Elma

The Woman's Missionary Society held its annual Thankoffering service on Easter Sunday evening in the Elma United church with the president, Mrs. Mahlon Beckstead, in the chair. The scriptures were read by Miss Jean Armstrong. Special Easter Anthems were sung by the choir with Mrs. Bernice Barkley presiding at the organ.

Mrs. D. McMartin and Mrs. B. Barkley sang a duet, as did also Mrs. Barkley and Mrs. R. S. Smith. Special musical items were given by Mrs. Lambkin and Mr. Fred Beckstead. A reading was given by Mrs. M. MacPherson. At the request of the society, Mrs. R. S. Smith gave a paper entitled "Personal Experiences of Missionary Work." A splendid attendance greatly encouraged the officers of the society.

Mr. Jesse E. Bigelow, who has been visiting his parents, Mr. and Mrs. H. G. Bigelow, left Tuesday evening for Boissevain, Man., where he will have charge of the Presbyterian church.

Miss Dorothy Carr, of Berwick, spent Easter week with her grandparents, Mr. and Mrs. J. A. Bogart.

## Finch

Mr. and Mrs. Alfred Feader and Madeline, of Wales, called on Mr. and Mrs. W. J. Brownlee on Sunday.

Mr. George Pink, of Belleville, had tea with Mr. and Mrs. Clarke Gourlay on Saturday.

Mr. and Mrs. John Brownell were Sunday visitors with Mr. and Mrs. George Campbell and Olive.

Mr. and Mrs. Merkley, of Cornwall, spent a day recently with Mrs. J. Merkley.

Miss Eunice Armstrong, principal of Finch High school, spent her Easter holidays at her home in Ottawa.

Mrs. Howard Wert, of Montreal, spent the week-end with her parents, Mr. and Mrs. H. Bush.

Mrs. H. Hesson and Miss Lois Hesson spent Saturday in Cornwall.

Miss Mabel Pacey, of the High school staff, spent her holidays at her home in Havelock.

Mrs. Harold Brownell and Mrs. John Brownell spent Tuesday with friends in Newington.

Miss Theresa Villeneuve spent the week-end at her home in Moose Creek.

Mr. and Mrs. James Starke and Bevas have returned to their home in Carleton Place after spending the past week with Mr. and Mrs. W. J. Brownlee.

His many friends are sorry to hear that Mr. Hiram McMonagle is very ill at his home here.

Miss Phyllis Rutley was a recent guest of Miss Hazel Shaver.

Miss Jessie Nugent, of Avonmore, took dinner on Thursday with her parents, Mr. and Mrs. John Nugent.

Mr. W. J. Brownlee spent Tuesday in Ottawa.

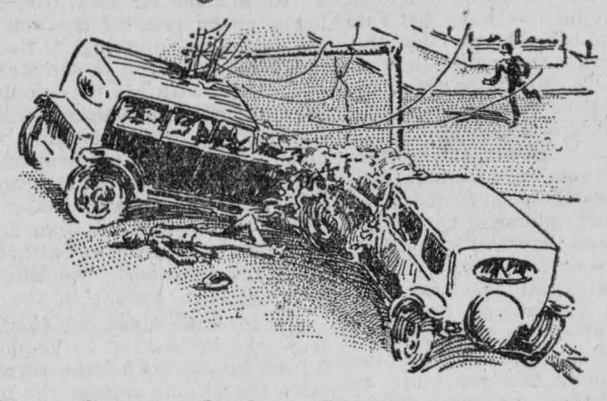

Mr. and Mrs. W. J. Brownlee and Mr. and Mrs. E. Nesbitt spent Monday in Cornwall.

Miss Jean Brownell spent the week-end at her home accompanied by Miss Eleanor McEwan.
