CRUMBS from Graham's Loaf

Even though Merv Dickey thinks one should stay in bed and let Small Crumb face the public, here we are again. Never let it be said we shirked our duty, especially if there is hardly any excuse. The matter of ill health can only be worked so much, then, lo! we are back in harness, with "shining morning face" and "let no dogs bark."

One fine afternoon long ago another stalwart and this Crumb took on a horse. The hard way. Since then we have had a built-in excuse to keep out of hard work and lingering labours. What remains has been a certain reaction each time we meet face to face with a motorcycle. It takes on the appearance in our subconscious of a Kearney Clyde en garde with a farmer's son gules on a field of daisies.

One hears by the wind from the west that Mr Diefenbaker is all set once more. He has screamed: "Tally-ho," mounted the rusty steed of his particular brand of Toryism and taken off down wind. The old nag he is riding will probably amble him to victory at the polls. We are inclined to suggest one of those tests, though, that they worked on Dancer's Image. Any party horses that allow the old man to face the world again must have some kind of dope working for them.

It is a peculiar kind of election campaign anyway. Here in Stormont-Dundas, things are at a standstill. The only party to make an appearance is the NDP chap and he may just get ten votes in Chesterville. The Tories and Grits have appeared to come to an understanding and Lucien Lamoureux will have the honour as an independent. Let's hope things get back to normal soon after the hue and cry dies down. If it is to be the Speaker's chair for Lamoureux, then let's set him up in business and make the riding political again. It's hardly any fun watching the rest snort and roar and we must behave like little gentlemen. The NDP'er hardly excites our Castle ire.

The editor of this family journal has been suffering from fainting spells. He just learned the taxes of the town would increase by about 20-odd mills. Tha t is enough to make a mare bite her colt or curdle the milk. In spite of increased assessment, the hike has sent the rates higher than ever before in history. What price education, to mention one contributing cause?

Jack Durant suffered a grievous accident last week. His tractor flipped and pinned him and he lies in hospital with a fractured hip and leg. The business of farming is becoming more and more dangerous every year. At one time a runaway horse was a frightening thing but not nearly as dangerous as a lot of horsepower running rubber tires. We often use these columns to utter warnings about things that can harm. Remember the power of the farm machines. They can trap the unwary and cause accidents.

Failure is the line of least persistence.

A short, brisk 15-minute walk each day will burn a pound of fat a month — 12 pounds a year.

Taxes leap--

Village rates zoom, jump is 25 mills

Village taxes have taken off with a surge. Taxpayers in 1968 will be asked to ante up over 25 extra mills. This is more than double any other tax hike in recent history. In round figures the levy of N.D.D.H.S. accounts for half the increase.

The local government is having a rough time facing up to unpleasant tax increases. The auditor's figures are all in and it looks as if a record mill rate will have to be struck to pay the bills.

The bad news for public school suporters is that it will take an additional 25.40 mills to cover costs. That means a total residential tax of 113.66 mills. Last year the figure stood at 88.26. For separate school taxpayers, the residential tax will be 115.79 against last year's figure of 91.95.

The commercial rates are even higher. For public school supporters, the tax will be 126.18. In 1967 the rate was 99.77. Separate school taxpayers will find a figure of 128.55 facing them as a commercial rate as against a former rate of 103.87.

The residential increase for public school supporters comes out at 25.40 mills. Of this the central school bite accounts for 11.86 over the previous year. The commercial rate increase is 26.41 of which the high school increase is 13.18.

The next largest jump comes in the department of local government. Here the figures are also fat. There was a need to levy for a two and a half mill deficit left over from the last government and what with usual costs the figure has reached roughly nine mills of an increase. This is an increase that is breathing down the neck of the rising school costs. The public school people managed to keep within a modest mill and a half jump. The United Counties' levy was up less than three mills.

The provincial rebate, new this year, promises a bit of relief. Residential property owners will receive the sum of $61.38. This figure represents the equalized assessment on the first $2,000 of value of the residential property. The complicated rate is arrived at by the auditors using the village assessment as equalized by the province against real value. This village uses a rate of 27 percent against full value assessment. This figure is multiplied by the total mill rate for residential property owners and then multiplied again by $2,000. If the decimal point comes out right, p.s. supporters will get

U. C. W. Evening Unit of Trinity United Church meets in dining hall

On May 7 the Evening Unit of U.C.,W. held their meeting in the dining hall of Trinity United Church.

Mrs A. Gillard, the president, conducted the business session and following a welcome to the members and guests, a hymn, the T.C.W. Purpose and the Lord's Prayer were repeated in unison.

Mrs H. Belsher read the roll and minutes and a financial report was given of the money shiwers and the tea and bake sale. Members were reminded of the anniversary supper May 21, the rummage sale May 24 and an invitation to a dinner and meeting from the Lisbon Congregational Church. Mrs C. Merkley, who gave the treasurer's report, will convene the June meeting.

The worship service opened with the hymn "My faith looks up to Thee," followed by prayer and responsive reading by Mrs J. Fulton and a Scripture reading by Mrs F. Droppo. Mrs D. Hitsman presented an article, "Faith and the Fragmented World," and closed the period with the hymn "Faith of Our Fathers."

Miss Geraldine Desormeaux was kind enough to attend the meeting and run the projector to show an interesting and enlightening film of Japan. A tasty lunch was then served by the committee and a social time followed.

A visitor last week at the Nestlé (Canada) Ltd plant here was Dr F. R. Tobler, Director of Nestlé (Canada) Ltd. He had arrived from Switzerland and spent some time in Canada. He is shown here at the left with plant manager James Moonie as they discuss future production programs of the new company ready-to-serve desserts, just recently launched.—Record Staff Photo.

DIED

McELROY, William Carlyle — At York County Hospital, Newmarket, on Thursday, April 18, 1968, William McElroy, beloved husband of Helen Casselman and dear father of Roger, Don, Mary, Katherine, Robert, Nancy, David and Joan, brother of Arthur McElroy, Mrs Percy Plantz (Isobel), and Harry. Rested at the Roadhouse Funeral Home, Newmarket. Funeral services were held on Saturday, April 20. Interment was in Newmarket Cemetery.

Osnabruck District High orators highly praised

Anne Schultz and Wendy Auguston were declared champions in the junior and senior divisions, respectively in the annual public speaking finals held at Osnabruck District High School. Miss Schultz, a grade 9 student chose as her topic, Oratory, while Miss Auguston, who is enrolled in grade 12, spoke on Equallity.

Runners-up in the junior competition were Brenda Shaver and Laura Shaver. Karen Grant and Annette Brownell placed in the senior division.

The other junior speakers were Susan Aubin, Dieter Mulitize and Marvin Walross. Competing in the senior division were Marilyn Duprau, Bill Manual and Trudy Snetsinger.

The young orators were praised for the high degree of excellence of their speeches by Keith Dafoe, B.A., of the English department of Cornwall Collegiate and Vocational School; Lee Madden, B.A., head of the English department at Seaway District High School at Iroquois and Earl Jack, B.A., vice-principal of Rothwell Public School, were the adjudicators.

Oratory tabs were presented to the finalists and semi-finalists who included Steven Beddingfield, Joanna Donkers, Lori Duprau, Bill Manning, Linda Duvall, Mike Hunter and Wendy Markell.

George Hickey of ODHS who organized the competition, presented Miss Shultz and Miss Auguston with championship oratory shields. Miss Francoise Laflam-

Council meets Wednesday two councillors and reeve transact business

Village council was short a couple of members for the regular meeting Wednesday evening. General business included the passing of the supplementary by-law to rebuild Howard Street at a cost of $6,500. Councillors Coons and Allison made the motions and passed them.

Willis Cross was hired to replace Silas Curran as garbage collector. All accounts were ordered paid.

Mainly About People

Mr and Mrs Medi Godard spent the week-end in Windsor visiting with Mr and Mrs Robert Godard and family and other friends and relatives.

Mrs K. Hillis hosts Morewood W. I.

Mrs K. Hillis was hostess for the regular meeting of Morewood Women's Institute on Wednesday, May 8th. The new president, Mrs A. Stewart was in charge and opened the meeting with the Ode and Mary Stewart Collect. She also gave a reading, "The Meaning of Mother."

The roll call was answered by wearing a Mother's Day flower.

During the business period it was decided to make stockings for needy children, and the members were asked to bring to the next meeting the articles to fill them.

A presentation was made to the secretary-treasurer, the former Mrs M. Cheney, on the occasion of her recent marriage.

The president announced that the guest speaker of the evening was ill and could not be present.

A programme followed, consisting of two vocal solos by Bonnie McConnell and a poem entitled "Door to a Mother's Heart" read by Mrs M. Smirle.

The meeting closed with the singing of O'Canada, and a social hour followed under Mrs H. Stewart's committee.

4-H Forestry Club hears talk on woodlots

The fifth meeting of the Goldfield 4-H Forestry Club was held at the home of Mr Kenneth Shaver on May 9.

The meeting was opened with the 4-H pledge. Minutes of the previous meeting were read by the secretary. Roll call was answered by 15 members.

A committee was selected to make plans for the Wooderama.

The next meeting will be held at the home of Sterling Wert on June 13.

Mr Warwick gave an interesting talk on the management and care of natural woodlots and the thinning of woodlots.

Mrs Shaver served lunch following adjournment of the meeting.

"Record" ads bring results.

Holiday Monday, May 20

All places of business in the village of Chesterville will be closed May 20, Monday, in celebration of Victoria Day. The old holiday of the 24th of May is now observed on the Monday before the 24th if that date does not fall on Monday.

Householders should make note of the store closing and stock up accordingly.

The Gulf Stream can be clearly recognized from an airplane because of its distinctive colour and wave pattern.

Newington Rec. Association holds banquet for hockey players

All members of the Newington Hockey Club Organization consisting of the bantam, midget and junior teams were honoured at a banquet courtesy of the Newington Recreation Association held in the United Church hall, last Friday night.

Jack Helmer, president of the local Recreation Association was master of ceremonies during the proceedings following a very enjoyable dinner. Dutch Thompson introduced the guest speaker, Mr Gerry Brown of Cornwall, commenting that Gerry had played for several N.H.L. teams during a span of ten years, and more recently coached various Junior A teams in the Toronto area.

During his humorous and enlightening speech Gerry commented that the average salary of players in the National League today ranged between fifteen and twenty-five thousand dollars, and that to succeed as player one must possess not only the ability and fundamentals but above all the desire to win. During the presentations the members of the midget and bantam teams received crests and the junior team a cash donation towards the purchase of jackets. Dalton Cleary presented the individual awards to midget, Barry Duff - most valuable player; Garry Brownlee, most valuable player in the Bantam League; Gerry Zeran most valuable player on the bantam team and leading point getter. John Cameron presented the N. Stormont Junior Championship trophy to Captain Stephen Tait and congratulated the Newington team on their victory.

Mr Cameron also remarked that this season he would like to see a southern division of the existing league with six new teams playing out of the Long Sault arena, with an interlocking schedule with the present teams from the existing northern league and that a local referees association be implemented using all local talent.

Jim Zeran, warden of the United Counties gave praise to managers and coaches, John Gove, Junior Presley, Charlie Tait, K. MacGregor and Dave Thompson for their efforts in helping promote and making a success of local hockey.

Other members of the head table included Rev. Baugh and Mr Len Gilcrest coach of Cornwall Barils and Cornwall Jr. B. Royals.

Trophy winners at the Recreation Association dinner at Newington are shown here. From the left is Gerry Zeran, Barry Duff, Dalton Cleary, Bruce St. John, John Cameron and Stephen Tait. — Record Staff Photo.

Kenneth C. Baker

Kenneth Cameron Baker received his diploma as a biochemical technologist from Algonquin College, Ottawa. Mr Baker is son of Mr Cameron Baker and the late Mrs Baker and a grandson of Mrs O. L. King.

Reformed Church School holds annual meeting

A meeting of the Timothy Christian School Society was held in Williamsburg Christian Reformed Church Hall recently.

Plans to build a new 4-room elementary school were discussed and adopted. The building budget will amount to $50,000 of which $27,000 has been donated and $7,000 covered by interest-free loans. The remaining $16,000 will be raised through the sale of bonds.

Speaker of the evening was Albert Hengstman of Sarnia.

Local board members include secretary G. Van 't Foort and S. DeJong.

The 1889 exposition in Paris left a lasting mark on the city's skyline — the Eiffel Tower.

Garry H. Jordan

Garry Hamilton Jordan, son of Mr and Mrs Lorne Jordan, Chesterville, is a recent graduate of Algonquin College, Ottawa. He received his diploma in biochemical technology.

OPINIONS . . .
OURS AND OTHERS

Sewage stalled — something smells!

Back about 1956 sewage surveys started in Chesterville. The need for a disposal sanitary system was more than evident. The river pool was becoming a septic tank of large proportions. Village private systems had begun a seeping program until wells and water sources within the village were becoming polluted. But until 1966 the town could not afford to entertain the expenditure of the money needed to instal a sewage system. A water supply was needed first. That was provided and then after a breathing space town planners entered the frustrating mess of trying to develop a sewage system for the village.

Here it is May, 1968, and work that had preliminary approval back in early 1967 has yet to be publicly any farther ahead.

Let's look at the so-called progress again. It all began when 1966 council asked the Ontario Water Resources Commission to set up an engineering design of a partial system for the town. The OWRC pattern had become more than favourable in system construction, what with something over half the system to be paid with Province of Ontario money. This would allow the town to debenture for the rest of the system without too heavy an increase on the village debt.

Plans were drawn, approved at the government level and here and preliminary approval was issued for the final steps to be taken regarding financing.

Then in July of last year, the Province of Ontario issued a welcome statement that all sanitary sewer costs to approved works would be underwritten by the province. This would follow the pattern that allowed Chesterville to build a $322,000 water system without overloading debenture credit.

Council of 1967 immediately proposed to OWRC that the village would be glad to see the whole town serviced by sewers and asked that a total system be engineered. By this time complete plans and tentative rates had been drawn for about four-fifths of the system, if the lagoon and pumping stations was included.

OWRC accepted the direction of Chesterville council and instructed engineers J. L. Richards and Associates to proceed with the total engineering. Because this was actually only a small addition to the plans very little stood in the way of fast action on a system. Council was assured costs and final designs would be presented to them by the end of October. Then the date slid back to the end of November, then before the end of 1967.

Reeve James Brannen and some of his councillors attended on the Commission offices in February. There they got some of the same treatment.

Now correspondence was read at the last council meeting. The Hon. F. M. Cass has looked into the matter, and feels progress is being made. He notes, though, that over 200 municipalities hope to get systems, they have applications in now, and we must wait our turn.

We have been waiting since 1966.

One last note. A lagoon is supposed to be built east of the town to take care of the village waste. It will be built on land now under cultivation. It is in the township. Last August an official of Ontario Water Resources Commission presided at a hearing in Chesterville Community Hall. Present were members of the township council and others. They were asked if they would object to the construction of a sewer lagoon in the township. No objections. Engineering plans show the farm location of the lagoon.

Correspondence at the end of the year with OWRC brings out an interesting fact. The commission spokesman knows of no project to build a lagoon on the farmer's land. The farmer can go ahead and consider the land as not soon to be taken over.

This newspaper was paid to advertise the notice of the meeting. The clerk made a few notes. It was to do with a lagoon and unless the whole thing was a night out with a ghost, somebody somewhere had better look in the files.

We think the whole matter has reached a silly state of affairs. The bit about 200 other towns wanting systems is certainly right. It is also best remembered this village had the whole thing ready for approval before that great rush of applications.

Expensive public facilties

The policy to raise camping and vehicle fees in Ontario provincial campsites is just a bit too much. One would think the province was on its last financial legs with the undertaker standing by.

There was a time when the parks and streams, the bush lands and lakes of the province were available free to the people who owned them. Not any more. Coming is a levy on fishermen who will then not even be able to fish off their own docks. The farmer will pay to catch a mud pout from the river that winds through his land. Even now we pay through the nose to spend a bit of time ridding farmers' fields of groundhogs. A one dollar licence is needed for every county. Most of us who pursue the sport need three.

We have first hand knowledge of the costs of maintaining any business, either private or government. But somewhere along the line, it must be remembered recreation is a vital part of today's ratrace. Price it out of the market for the ordinary Joe and trouble will come.

We have a small suggestion. According to the Hon. Fern Guindon, chairman of the St. Lawrence Parks Commission, the parks lost $500,000 last year. Then let's stop the business of raising the rates and applying a fishing licence. Instead stop subsidizing thoroughbred horse-racing in Ontario. Instead of giving $1,500,000 to the breed this year, apply it where it will do more good, Joe Citizen. Mr E. P. Taylor and his interesting attainments in the horse racing field can get along now without provincial support.

ANN LANDERS

Dear Ann Landers. I was interested in the letter from the man who was married 48 years and said the secret of a happy married life is twin beds or separate rooms, if possible. You replied: "I agree, after 48 years twin beds or separate rooms are fine, but not much before."

I have been happily married for almost 42 years and I think separate rooms are dandy.

I am a poor sleeper and my husband is just the opposite. What's more he has a snore like the tuba in the Boston Philharmonic. I've heard women tell over bridge tables how they kick and slap their husbands to wake them up so they'll quit snoring. This makes no sense whatever.

Anyone who thinks twin beds or separate rooms will discourage romance is plumb crazy. A person who can't make it to the other bed or to the next room ought to forget it. I hope you will print my letter and eat your words. — Dayton Dolly.

Hello Dolly: Gulp, Guly Gulp!

* * * *

Dear Ann Landers: It doesn't pay to be nice to people. I will never stick my neck out again. For now, however, I need some advice.

A girl in the office was getting married. I volunteered to collect the money from 48 people. This was no small job. By the time I got the money together and the gift selected the girl had moved out of the city, so I had to mail it.

The gift was somehow lost in the mail. Unfortunately I did not think it was my fault or something. Several of them have suggested that I replace the gift at my own expense.

I do not have $96 to put toward a gift which is supposed to be from 48 people. Do you feel I am obligated to make up the loss out of my own pocket, Or should I ignore the snide remarks and refuse to handle office collections in the future?—Hurt.

Dear Hurt: I don't think you need worry about being asked to handle anything in the future. Anyone who would send a $96 gift in the mail (bought with other people's money yet) and not bother to insure it, won't get another chance.

I believe you should make up the loss personally and call it "tuition" in the school of experience.

* * * *

Dear Ann Landers: What is the feeling of individuals engaged in the healing arts in regards to widows of physicians?

A member of our bridge club lost her husband 20 years ago. He was a physician. This woman spends most of her time gong from one doctor's office to another.

We are aware that profesional courtesy exisits between physicians and their families, but when the reason for the "courtesy" passes on, is it fair for the widow to enjoy such privileges forever: Incidentally, the woman we are writing about is not hard up financially, in fact her diamonds practically blind us at the bridge table.

What do you know about this? —Akron Trio.

Dear Trio: Nothing, but I'll ask. May I hear from some physicians, please? How do you feel about treating the widows of your colleagues?

* * * *

Is alcoholism a disease? How can the alcoholic be treated? Is there a cure? Read the booklet "Alcoholism — Hope and Help." Write to Ann Landers in care of this newspaper enclosing 35c in coin plus 6c for postage and a long, self-addressed, un - stamp-envelope.

Ann Landers will be glad to help you with your problems. Send them to her in care of this newspaper, enclosing an unstamped, self-addressed envelope, plus 6c for postage.

Being Helpful

By Mrs Ella York, Chesterville

Let us be friendly, generous and kind,
May we be pure in body, soul and mind;
Let us be true, for there are those who care,
If we do these things, our love we'll share.

May we pray for strength to do our work,
And pray God's Voice to hear;
It will give us strength beyond our hopes
When we know our Lord is near.

Each day we will feel Him closer
As we talk with Him each day,
We'll gradually grow to know Him better
When we don't forget to pray.

We are servants working for Him
On this big earth here below;
With our fellows, let us tell them
Of the One who loves them so.

If we can bring some soul to Him
Our work will not be in vain;
Let us each day do what we can,
We may not get the chance again.

By F. M. Cass

This session of the Legislature drags along with interminable hours of talk on departmental estimates, much of it quite unnecessary and, indeed out of order, but with a great deal of effective opposition questioning of and comment on various items of government expenditure. The Estimates of the Department of Health were finally completed and those of the Department of Agriculture and Food given a good start.

In order that the Members can do some electioneering in the current Federal General Election the House has now begun its afternoon sittings at 2.00 p.m. and sits each night, Monday to Thursday inclusive, from 8.00 p.m. With committee meetings all morning every day, noon hour caucuses, and French classes for Members each night from 6.00 p.m. to 8.00 p.m., it is easily seen that the present schedule for Members of the Ontario Legislature is an exhausting one. Even with all this, it is most doubtful if the House can rise before the coming election without the Members being required to come back again to Queen's Park in July.

The one big Act introduced during the week was that to create the new regional municipality of Ottawa-Carleton. This is another experiment along the lines of, but not patterned after, Metropolitan Toronto. The cities of Ottawa and Eastview (soon to be Vanier City), the county of Carleton, and the Township of Cumberland make up the territorial jurisdiction of the new region, and its organization for effective operation from January 1, 1969, will be a colossal task. Shortly the chairman (or Super Mayor) will be appointed by the Government to hold office for four years, after which he will be elected by the Municipal Council. As yet there is no indication from Queen's Park as to who is to be appointed chairman, but it is to be hoped that it will be a local person with personal knowledge of the area, and its people, and problems.

All of us, of course were interested in the announcement by Prime Minister Robarts that a Select Committee of the Legislature is to be appointed to hear and report on briefs submitted to the Government on the Smith Report. Since the Committee will be composed of Members of all parties in the Legislature, this not only is rather a brave move on the part of the Government, but will ensure that every shade of interested comment on the Report will receive consideration. Since the legislation, which will result from the Smith Report, will in all probability set out the taxation pattern for many years to come, it is essential that the whole problem be given the most complete consideration. One of the Committee, namely, that property of religious organizations be subject to tax, is currently the source of much discussion everywhere. If it should be decided to tax these properties, it will have a great effect on local and small congregations with lovely and substantial church buildings, and affect most of us also.

DOLPHINS SOON MAY HERD FISH

Dolphins may soon be herding fish the same way dogs herd sheep, says Dr Paul Spong a University of British Columbia brain researcher.

Dr Spong, who has been studying dolphins at the Vancouver public aquarium, says it may be possible to train the playful mammals to find schools of fish, then ride herd on them.

"If we can enlist the dolphin's co-operation he will be of tremendous use to man," he said. "Already dolphins have been trained to perform very complex tasks.

Nearly a dozen empires seized and ruled Cyprus before it became an independent member of the British Commonwealth in 1960.

Power People—Helicopter Pilots

Helicopters patrol Hydro's thousands of miles of transmission line. Pilots fly machines slightly above and about 50 feet from lines placing their observers in an ideal position to spot potential trouble.

Ontario Hydro's helicopter pilots safeguard the 19,500 miles of transmission line linking the Commission's wide-spread generating stations. This involves regular preventative maintenance patrols by pilot-observer teams and the airlifting of men and equipment to the location of trouble if one of these vital power arteries is knocked out.

Before 1949, when line patrols took to the air, inspections were usually done on foot. It was a slow, uncertain, and costly method. Repairs in inaccessible places often took weeks. Now, at a quarter of the cost, helicopters make more frequent inspections and put observers in a much better position to spot potential trouble.

The machines save a million dollars a year on line patrol alone and many other uses have been found for them. They're used for such jobs as placing poles, stringing lines and most recently, lowering linemen to the tops of towers. Hydro 'copters have hovered over dangerous rapids to take depth soundings, ridden herd on Lake Erie ice and fought forest fires.

During spring breakup, when ground travel in the Ontario north becomes almost impossible, helicopters are often the only means of transportation for Hydro's construction and engineering forces.

Emergency and mercy flights are sometimes undertaken. Last year a 'copter assisted in the rescue of Hydro's ice-breaking tug, Niagara Queen, when she ran aground in the Niagara River a couple of miles above the falls. They've searched for bank robbers near Metro Toronto, sped an expectant mother to hospital, plucked people from rooftops during a flood, alerted occupants of a burning house and assisted in a highway accident.

The economies and usefulness of Hydro's helicopter fleet are reflected in its size—the Commission now has 12 machines.

Helicopter pilots working with their observers and other Hydro people perform many valuable services—but most important, they make sure energy keeps flowing through Hydro's vital power arteries.

Magnesium deficiency causes grass tetany

Grass tetany is a highly fatal disease of ruminants, occurring especially in lactating dairy cows after they are turned out on a grass pasture in the spring. Veterinarians with the Veterinary Services Branch, Ontario Department of Agriculture and Food, and researchers at the Ontario Agricultural College, warn farmers to keep a close eye on cattle over a year old put on pastures this spring.

The condition is caused by a lowering of magnesium in the animal's blood which results in nervous symptoms and death.

Animals with grass tetany often walk with a stiff and unsteady gait and frequently appear to stagger. This is why the disease is called "grass staggers." The affected animal progresses through symptoms ranging from muscle-twitching, inco-ordination, excitability and occasonally wild galloping. Eventually the animal will fall and go into a convulsion during which there are violent contractions of the legs, champing of the jaw and stretching back of the head.

A number of conditions affect the amount of magnesium in the plant. Early spring pasture contains less magnesium than more mature forage. Cold wet weather causes a higher incidence of grass tetany.

Lactating cows are especially vulnerable, since much of the magnesum in the cow's body is passed on to the calf through the milk.

Soil type and acid pH influence the basic amount and availability of magnesium in soils. Applications of potash fertilizers or the growth of plants on high potash soils result in a reduction of the magnesium in the plants. As the potash level of the soil increases — such as when there is a lush growth of plants — the magnesium that is taken up by the plant is lower, due to a chemical combination of calcium, magnesium and potash.

The simplest method of controlling grass tetany is by supplementing the feed with magnesium oxide at the rate of two ounces per day during the danger period. This means taking the cattle off pasture as soon as symptoms are noted in the herd.

The best sources of magnesium are feeding grade magnesium oxide and dolomitic limestone. Both can be obtained through feed mills.

Treatment of affected animals must be immediate since death may occur very quickly. Call a veterinarian as soon as possible.

HAT BEATLE CUTS 2,500 YEARS AGO

Hippie-type Indians with Beatle hair cuts lived about 2,500 years ago on the site where the Summer Olympics village is now being built.

Since excavations for the village started last may, four pyramids, 400 skeletons and 33 houses of the civilization to which the Indians belonged have been unearthed from the volcanic dust.

These finds, says Emilia Jacobs-Mueller, head of the archeologicl laboratories in Mexico City, are the oldest made in the Valley of Mexico already an archeological treasure-chest, and among the oldest in Latin America.

Some of the jade necklaces, crystal ornaments, clay earrings, trinkets and colour-engraved ceramics which have been discovered are considered by experts to be priceless.

Forage Crop Insurance now available

As a result of a successful pilot test program in two limited areas last year, the Crop Insurance Commission of Ontario announced today that forage crop insurance will be made available in all counties of Ontario.

The only areas not insurable under the plan will be the Provisional County of Haliburton and the Northern Ontario Districts.

Developed to insure a winter feed supply, the new forage plan will be of interest to both dairy farmers and beef cattle men.

Coverage will include seeded pasture, hay, hay silage, and corn silage for 70 percent of the average farm yield, against the perils of hail, wind, drought, frost, flood plant disease, insect infestation excessive rainfall and excessive moisture.

Farmers may insure on the basis of $15 $20, or $25 per ton of hay (or hay equivalent). The low rate charged for this comprehensive protection will mean forage can be insured for a little less than $1 per ton on the average farm.

Crop insurance authorities say this is the first forage insurance scheme to be developed in North America.

UNDERWATER PATROL

The French police have an underwater patrol of eighty frogmen operating along a strip of the Mediterranean coast.

It enforces skindiving regulations and hunts poachers and looters of Roman shipwrecks. The sites of the wrecks are out of bounds.

Most underwater offences are a matter of ignorance of regulations. But police say that organized underwater gangs are using high-power spearguns or carbonis gas sapsules to stun fish in prohibited fishing zones.

Mrs Geo. Shaver hosts May meeting Dixon W.I.

Mrs George Shaver was hostess for the May meeting of Dixon Women's Institute. Mrs Leo LeBlanc, president, opened the meeting with the Ode, Mary Stewart Collect and Lord's Prayer.

Nine members answered roll call with a resolution they would suggest. This brought forth some discussion and the convener of Resolutions, Mrs George Shaver, read from the handbook the proper method in handling a resolution.

Mrs Eugene Auger and Mrs Donald Sanderson will be delegates to the W.I. district annual in Avonmore May 22. A total of $80.05 was canvassed for the Cancer Society by the Institute members.

Mrs Leo LeBlanc, delegate to the 20th annual W.I. Officers' Conference in Guelph, gave a most interesting report. The theme used at the conference was "No man is an island unto himself."

Mrs Everett Small, president of F.W.I.O., in addressing the conference, said: "Man must not be self-centered and live in a little world unto himself. We must be concerned for others. What kind of a world are we becoming when people are not concerned for involved; doing nothing for your community is making it a poor others and don't want to become place to live. The Women's Institute is an island of its own, but it must be big enough to include everyone.

Dr W. A. Younge, former padre of Guelph University, in his remarks on Citizenship said: "The greatness of a country is not measured by its economic state but its people and the individual person."

The next meeting will be held at Mrs Eugene Euger's on June 5.

Slow moving vehicles danger on the road

Farm tractors were involved in 246 accidents with motor vehicles in 1967, according to statistics released by the Ontario Department of Transport.

Hal Wright, Provincial Farm Safety Specialist with the Ontario Department of Agriculture and Food, notes that many of these accidents might have been prevented if the triangular Slow Moving Vehicle signs had been used by the farm tractor operators.

The statistics show that seven farm tractor operators were killed and 48 were injured while three persons in the motor vehicles were killed and 90 were injured. Total property damage was more than $210,000.

Most of the accidents were apparently caused by carelessness or lack of courtesy on the part of the farm tractor operators, since two-thirds of all charges laid by investigating police officers were made aganst the tractor operators.

As these statstics indicate, farmers should exercise extra care when on the road with farm equipment. Mixing with faster moving car traffic creates a hazard which farmers can minimize by taking adequate precautions and using Slow Moving Vehicle signs.

IRIS BEDS

Each spring iris beds and individual iris plants should be carefully inspected and cleared of debris or dead leaves.

Horticulturists recomend a dressing of a complete fertilizer such as 5-20-20. Iris plants make a great deal of growth during the next six to eight weeks and thus require a considerable supply of plant food during this period.

Two pounds per 100 square feet should be enough to supply their needs.

TRACTOR FUEL

It has been sai dthat gasoline is liquid dynamite and certainly it is highly explosive, so t should be used carefully.

Never refuel a tractor with the engine running. A stray spark on the hot exhaust manifold could set fire to the gasoline vapors. Since they are heavier than air they will flow down over the engine. This goes for diesel fuel, too.

"Record" ads bring results.

DEPARTMENT OF HIGHWAYS, ONTARIO

NOTICE TO SUPPLIERS OF STRAW

Supply Contract No. SA-68-1383

DISTRICT - OTTAWA

ONTARIO

Sealed Tenders on forms supplied by the Department for the above Contract will be received by the District Engineer, Department of Highways, 530 Tremblay Road, Ottawa, Ontario; until:

12:00 o'Clock Noon, Local Time

MONDAY, JUNE 3rd, 1968

Specifications, Information to Bidders, Tender forms and envelopes may be obtained by calling at or by mail addressed to the District Engineer at the above mentioned address. The lowest or any Tender not necessarily accepted.

BELL LINES

by Richard R. Pearson

your telephone manager

On your next visit to Montreal I hope you will find time to visit our new Panorama of Progress in Telecommunications Please take this column item as my personal invitation to visit this "live" museum which is the story of the telecommunications business from Neanderthal Man to the present and on into the future. This fascinating tour through time opened last month in Bell Canada's headquarters building in downtown Montreal. All the many complexities of our fascinating telephone and telecommunications industry are made interesting through an Expo-lke use of sight and sound effects. Early visitors have reported that you feel as though you had walked through 50,000 years of telecommunications history. A favourite of visitors already is the life-size mockup of a 19th century chemist shop, complete with patent medicines and Victorian decor and a tiny, primitive switchboard. Did you know that many of our first central offices were in chemist shops? "Central", the young girl who tended both the shop and the switchboard in the early days, works away at the switchboard while today's visitors listen and watch. In the various sections of the Panorama you will see the early telephone models as well as a demonstration of the laser principle and a wrist watch that might one day give instant communication to anyone anywhere in the world. When you are in Montreal — maybe you are planning a trip to Man and His World this year — do stop in for a visit to our Panorama. I'm planning to do so next time that I'm in that city. It's open Monday to Friday from 9 a.m. to 4 p.m. and eloquent hostesses will be on hand to show you through 50,000 years of communications history.

"An unswerving regularity of irregularity" — that was how Mark Twain described his career. He was a river pilot, a printer, a soldier, a reporter, a miner, a lecturer, an author, a humourist, a publisher, an editors, and — unfortunately — an investor. Twain was always ready to write cheques to finance new and unusual inventions — such as a spiral hat pin, a self-pasting scrapbook, and nearly a hundred other products. But his investments never seemed to turn out right, and finally he decided he had learned his lesson. To the next stock offered him by a young inventor, he said, "absolutely and positively not." The inventor? Alexander Graham Bell.

Not long ago, in Chester, England, phones began ringing constantly for no apparent reason. When they were answered, there was nothing at the other end but an ominous silence. Finally the trouble was traced to the city zoo! A giraffe named George was contentedly licking wires stretched across his enclosure and short-circuiting all phones in the district. The telephone poles had to be rased four feet to put temptation out of George's reach. Result: a lot o happy phone subscribers and one very unhappy giraffe.

R. R. Pearson

Gerry Brown was the speaker of the evening when Recreation Association entertained the hockey players of the bantam, midget and junior leagues at Newington. From the left is Mr Brown, Jack Helmer, president of the Association, and warden of the United Counties James Zeran.—Record Staff Photo.

Historical Research topic for May meeting of Osna. W.I.

Historical Research was the topic for the May meeting of the Osnabruck Centre Women's Institute. The meeting was held at the home of Mrs Robert May.

Mrs Delbert Flintoff greeted the members. She expressed sympathy to three members, each having suffered a recent bereavement.

Roll call, "A housekeeping short cut," was answered by 20 members, with three visitors. Mrs Jennie Flegg read the minutes and gave the treasurer's rport.

Plans were made for the memorial service at Pleasant Valley Cemetery on June 16 at 2.30 p.m. Mrs John Grandaw and Mrs Jake Grandaw were appointed delegates to the district annual to be held in Avonmore on May 22.

Mrs Acil Beckstead gave the "Smile" of the evening. Mrs Lloyd Gallinger, alternate district director, gave her report of the April district executive meeting.

Miss Eva Baker read a paper on the political history of Osnabruck Township. It is interesting to note that Osnabruck Township supplied three members for the provincial parliament and three members for the federal parliament between 1808 and 1935.

Mrs John Grandaw prepared a paper, "Wanted — a Prime Minister," an account of the duties and rewards in the life of a prime minister. It was read by Mrs L. Gallinger. Mrs Gallinger also read a paper on tornados, giving an account of the number that have swept through the township in the last century.

Mrs Acil Beckstead and Mrs Chas. Bush served refreshments. The June meeting will be at the home of Mrs Robert O'Neill.

STRABERRY CULTURE FOR HOME GARDENERS

The luscious strawberry is the most popular of the small fruits and can be grown almost anywhere in Ontario. Here are a few handy tips on their care from horticulturists with the Ontario Department of Agriculture and Food.

Strawberries do best on well-drained, sandy loam soil. Good drainage is essential and ridging poorly drained soils may be of some value. Before planting, apply about 1½ pounds of 8-16-16 fertilized per 100 square feet. Scatter evenly and work in well several days before planting.

Use only healthy plants which have a well-developed crown and an abundance of cream or white roots. Use plants from the Ontario Strawberry Plant Certification Program each time a new planting is made. These plants are free of diseases which tend to reduce strawberry yields. Planting should be done as soon as the ground can be prepared. Space the plants about 24 inches apart in rows that are three to four feet apart. Dig the hole deep enough so the roots can be placed straight downward and spread out. It is extremely important that the crown should be planted level with the surface of the soil. If they are buried, they smother and rot.

During the first year, practice good weed control and keep the soil loose so that the runner plants can root readily. Remove all the blossoms the first year to encourage vigorous vegetative growth.

Some of the varieties recommended for the home garden are Grenadier Guardsman, Cavalier, Sparkle and the everbearing type Autumn Beauty. For further information, write to the Information Branch, Ontario Department of Agriculture and Food, Parliament Buildings, Toronto, for Publication 475, Small Fruits for Home Gardens.

From about the third century, B.C., soldiers were ordered to shave — not for hygienic reasons, but because whiskers gave a handhold to an enemy.

About 85 per cent of the U.S. corn crop is fed to livestock.

St. Mary's CWL elects officers

The May meeting of St. Mary's Council, Catholic Women's League was held in the school auditorium. Miss Marion Lynch, newly installed president, presided.

Plans were discussed for the Diocesan Convention to be held in Belleville on May 25th and 26. Miss Marion Lynch and Mrs J. Sommerville, will represent the membership. A great deal of enthusiasm was also shown by the members present as to ways and means of adding interest to future meetings.

Previous to the May meeting, the formal installation of officers was held in St. Mary's Church, with Father Collins, Council Director, conducting the ceremony. The officers installed for the 1968-69 period are as follows:

President, Miss Marion Lynch; secretary, Mrs Jas. Sommerville; treasurer, Mrs Richard Chambers; 1st vice-president, Mrs B. Lynch; 2nd vice-president, Mrs Rene Moss; 3rd vice-president, Mrs James Moran.

To attend service at Williamsburg United

Williamsburg I.O.O.F. Lodge No. 349, and visiting brethren, will attend Divine service in Willamsburg United Church on Sunday, May 19, at 11 a.m.

Bro. D. L. Gordon will officiate and preach the sermon. D.D.G.M. Harold E. Van Dusen, Prescott, will be present and will read the gospel.

The choir, under the leadership of Mrs M. Merkley, organist and choir director, will render appropriate music.

PLANT HARDY ANNUALS FOR EARLY BLOSSOMING

Annuals which have hardy frost-resistant seedlings may be sown outside now, say horticulturists with the Ontario Department of Agriculture and Food. The more rapid-growing flowers such as marigolds and zinnias should be left until early May so that they come through the ground after the danger of frost has past.

The soil should be well-prepared before sowing the seed. If possible, dig in some organic matter such as well-rotted manure, peat, or leaf mold. It's a good idea to add a complete fertilizer, such as 5-10-15 or 5-20-20, to improve soil fertility. Scatter it over the ground at about 2 pounds per 100 square feet and dig in well. Before planting, rake the surface well to get a fine and level seed bed.

Careful planning of the seed bed is important. Be sure that the seeds of the tallest plants are in the background, with the shortest in the foreground. Using a stick, mark out the area allotted to each kind and then scatter the seeds over the soil surface, raking it lightly. Try to cover the seeds about as deep as their own diameter for best results. Next, water the beds with a fine spray to ensure that the seeds are not washed out of the soil. Keep the seed bed moist at all times to ensure good even germination. When the seedings reach a height of two inches, thin them out to the suggested spacing. This will help produce healthy sturdy plants with good blooms.

TIPS TO KEEP LAMPS SPARKLING

Your lamps will keep their good looks and continue giving proper light if you follow these easy-care tips:

1. During your routine once-a-week housecleaning, use a soft cloth to wipe off the bulb, reflector bowl (if there is one), and lamp base. Use the soft brush attachment of your vacuum cleaner on the shade.

"Keeping the bulb and reflector clean is most important," a manufacturer says. "It's estimated that a film of dust or dirt can cut light output by 50 per cent."

2. Once a month, or oftener if needed, remove the reflector from the lamp, wash in warm, soapy water, rinse and dry thoroughly; never wash light bulbs; the water may loosen the cement holding the base to the glass.

3. To clean lamp bases, use a mild warm water soap solution on glass, pottery, marble, and onyx surfaces, then wipe dry. Wood and metal should be dusted and protected with a thin coat of wax.

Never use polishes or abrasives on metal surfaces. These surfaces are usually protected with transparent lacquer which polishes will remove. Once this happens, the metal is exposed to the tarnishing effects of the air.

4. Soiled lamp shades, with the exception of paper and parchment, can often be cleaned if you use the right procedure for each type, as follows:

Fabric: Linen, cotton, chintz, painted silk, or appliqued shades should be dry cleaned only. So should any fabric shades whose trimmings are glued instead of stitched.

Rayon and silk shades can be washed if the trimmings are stitched. First, dust the shade, then slosh it up and down in a tub of lukewarm suds.

Rinse in several clear lukewarm water rinses. Blot as dry as possible with terry towel. Then put in stiff breeze, preferably from the electric fan. Never place the damp shade in sunlight or an a radiator.

Leather: Dust with dry cloth. Apply a small amount of vaseline with a soft cloth once a month.

Plastic: Dust first, then wipe with a damp,soap cloth, followed by a cloth dampened in clear water. Then wipe entirely dry.

Letter to the Editor

Morewood, Ont.,
May 11, 1968.

The Editor,
The Chesterville Record.

Dear sir:

On behalf of the Morewood Branch of the Women's Institute, I wish to convey to you our thanks and appreciation for the publication of our meetings for the year 1967-68.

Mrs C. H. Dyer, P.R.O.

Mr, Mrs Frank Merkley mark 25th anniversary

Mr and Mrs Frank Merkley, of Chesterville, were honoured on the occasion of their 25th anniversary on Saturday, May 11, at the home of Mr and Mrs Arza Beckstead. Many friends and relatives gathered to honour and congratulate the couple.

Their son, Emerson, called from California to express congratulations.

Many beautiful gifts were received by the happy couple, including two lovely chairs, coffee table, step table, hand-painted picture and a bouquet of flowers.

Mr and Mrs Merkley thanked everyone for a wonderful evening.

Dispose of all unnecessary poisons — they have no place in the life of a child.

GOLDFIELD WEST

Spend weekend at Marcellus home

Mrs Charles Jay, Misses Lana and Carol Marcellus of Ottawa spent last weekend with Mr and Mrs Harold Marcellus.

Mrs George Smith visited recently with friends in Cornwall and Ingleside.

Mr and Mrs Donald Dillabough, Elma, and Mr Gary Dillabough and Miss Muriel Kelso of Ottawa spent Sunday at the Smith home.

Miss Noreen Foley, Ottawa, who just returned from a holiday in Miami, Florida, spent last week at her home here.

Mr and Mrs Glendon Smith and family spent Sunday afternoon with Mr and Mrs Dalton McDermid of Berwick.

We welcome Mr and Mrs Cornelius Huibregts and family to our community.

Mrs George Smith spent Friday afternoon with Mr and Mrs Fay Droppo of Chesterville.

Mr Kevin Foley, Ottawa, and Mr and Mrs Len Foley and sons, Picton, visited over the weekend with Mr and Mrs Bernard Foley and family.

The "Record": news of people you know.

O. P. P. Report

On May 10, 1968, a serious accident on Highway 2, two miles east of Morrisburg, sent two local youths to hospital. Ronald Snider, age 22, Ottawa St., Morrisburg, driver of the vehicle, was taken to Cornwall General Hospital with concussion and lacerations to the head. David Millward age 18, Augusta St., Morrisburg, was taken to a Montreal Hospital with serious head injuries. The vehicle, a 1968 Dodge convertible, had been proceeding west on Highway 2, when it apparently went out of control and rolled over several times. Damage to the vehicle was estimated at approximately $3,000. Provincial Constable L. C. Braniff is investigating.

Officers also investigated six other minor accidents. A total of 12,402 miles of highway was patrolled in 810 duty hours. During this patrol, officers laid 95 traffic charges and issued 35 traffic warnings. One person was arrested and charged with driving a motor vehicle while his ability to drive was impaired by alcohol. A Hamilton man was charged with "Public Mischief" when he produced false identification following a traffic offence on Highway 401. Investigations into occurences arising from the use of liquor produced 11 charges under the Liquor Control Act of Ontario. Officers also investigated 29 other occurences, including two minor thefts.

A total of 25 hours was spent in the courts with 105 convictions being registered.

The traffic safety offcer for Dundas County visited two schools, lecturing to 400 children on bicycle safety. To assist in this programme and possibly make the parents more aware of the laws governing the use of bicycles, a section from the Highway Traffic Act will appear periodically in this report. Section 96 (2) states: "No person rding on a bicycle designed for carrying one person only shall carry any other person thereon."

Morrisburg Safety Patrol Members for the week: Debby Delage and Gay Smith.

ELECTRIC FENCES

Wit hthe advent of grass, electric fences are in use on our farms again. These handy portable fences are quite safe and very effective when properly used.

Never make up a homemade unit to run off your hydro lines. It could be fatal.

There are electric fences on the market that are CSA and Hydro-approved.

Keep butter clean, cool and covered. Store it in the coolest part of the refrigerator, wrapped in the original wrapper. Any butter that has been partially used should be kept in a covered butter dish.

Everyone Very Welcome

Mr, Mrs Clifton Merkley celebrate 25th anniversaary

Friend, neighbours and relatives gathered in Chesterville Community Hall to spend a social evening with Mr and Mrs Clifton (Tip) Merkley on the occasion of their silver wedding anniversary.

They were married by the Rev C. R. Crommiller Williamsburg. They are the parents of seven children, Robert, Douglas, Gordon, Karen, Nancy, Billy, Philip, and a grandson, Glendon.

Dancing was enjoyed to the music of Rondell's Orchestra. At midnight Wilburn Robinson read an address from a heart-shaped guest book and on behalf of the neighbours a set of aluminum cooking utensils were presented to the couple by Earle and Glenn McMillan.

Numerous cards and gifts were received. Mr and Mrs Merkley expressed their appreciation for the kindness shown them.

The honoured guests were seated at a table centred with a three-tiered cake, beautifully decorated.

Out-of-town guests were present from Odessa, Kingston, Montreal, Malone, Ottawa and Cornwall.

MEET YOUR O.P.P.

Const. R. W. O'Brien

Constable O'Brien, a native of Cornwall, left this area at a very early age. His father, a member of the R.C.A.F. was posted throughout Canada and Europe. After attending various schools in this country, Ralph completed his education at the Department of National Defence High School in Schoenbleck, Germany. After returning to Canada, Ralph was employed by the Federal Government with the Department of External Affairs. In October 1967 he received his appointment to the O.P.P., and after a three week orientation course at the Provincial Police College in Toronto, he was posted to Morrisburg. Constable O'Brien is presently at the Ontario Police College in Aylmer on the first half of a 12-week training course, and will be engaged in traffic work when he returns.

A devout skier, he also maintains an interest in golfing and curling. Constable O'Brien, with an eye to matrimony, is single and resides in Morrisburg.

HYNDMAN

Wednesday visitors at Robinson home

Mr Dale Robinson, Brockville, Mrs Howard Robinson, Spencerville, were Wednesday visitors of Mr and Mrs Hubert Robinson.

Mr and Mrs Philip Sequin of Oxford Mills, spent Monday with their daughter Mrs Carl Grant and Mr Grant.

Mr and Mrs Sam Brown of Spencerville, were Tuesday tea guests of Mr and Mrs George Norton.

Mrs Janet Lattimore and Mrs Bert Lattimore were supper guests on Tuesday of Mr and Mrs Bert Lattimore.

The Hyndman U.C.W. Group met on Tuesday evening at the home of Mrs Lorne Conley. Mrs Donna Thorpe had the devotions. Mrs Boyle invited the group to her home for the July meeting in June as the three groups meet on June 28th at Heckston Church hall and the Hyndman Group is in charge of the meeting.

Mr and Mrs Tommy Francis, Brockville, were Saturday visitors of Mr and Mrs George Francis.

Mrs Lorna Rennick, Sheryl and Ellis, Ottawa, were Saturday dinner guests of Mr and Mrs Rozzie Rennick.

Mr and Mrs George Norton were Sunday visitors of Mr and Mrs Garnet Tompkins Millars Corners.

Mrs Tommy Francis, Brockville, Mr George Francis, Mrs Janet Lattimore Mrs George Francis, Mrs Janet Lattimore, Mrs Bert Lattimore visited Mr Bert Lattimore on Saturday afternoon, who is a patient in the Oxford Private Hospital, Kemptville.

Mr and Mrs Glen Somerville and family, Groveton, were Friday evening visitors of Mr and Mrs Cecil Somerville.

Mr and Mrs Arnott Conley and Darlene, Brockville, Mr and Mrs Gorman Alkerton, Prescott, were Sunday afternoon visitors at the Lattimore home.

Mr and Mrs Hubert Beach and family Oxford Mills, were Sunday visitors of Mr and Mrs H. Robinson.

Mr and Mrs Chester Gilmer visited his mother Mrs Robt. Gilmer, Kemptville, Sunday evening. She came home with them for a few days.

Mrs Elizabeth Linnen, Stanley and Erin, Ottawa, called on Mrs George Norton on Sunday evening.

Mainly About People

Mr and Mrs Bernard Masterson, Mr and Mrs William Masterson and Mr and Mrs Walter Beehler attended the fifteeth wedding anniversary of Mr and Mrs Joseph Shane (nee Bessie O'Neill) at Plantagenet on Saturday evening, May 11, 1968.

Mr and Mrs Bruce Moad, Mr and Mrs Clifford Moad and Miss Bessie Moad of Toronto spent the weekend with Addie and Madge Campderros, Victoria St.

Sunday guests of Mr Johnson Ouderkirk and family were Mr and Mrs Sheldon Ouderkirk and Mrs Linden Debeau and baby, of Toronto Mr and Mrs Ross Rainey and children, Kingston, Mr and Mrs Harold Ouderirk, Chesterville, Mr and Mrs Walter Ouderkirk, Ottawa.

Members of U.C.W. Seaway Valley Presbytery reminded of workshop

Members of the United Church Women in congregations of the Seaway Valley Presbyterial (Glengarry and Dundas-Grenville) are reminded of a workshop to take place June 18, at Church Centre, Montreal. A questionnaire is in the hands of all presidents concerning the frame work of UCW. The executive committee of the Montreal-Ottawa Conference urge completion of this form and early return so that it can be used as a basis of the workshop.

The conference executive met recently at Dominion-Chalmers United Church, Ottawa, when plans for the year's work were assembled.

Mrs D. J. Cooper, vice-president of Kemptville; Mrs J. M. Harrington, president, Ottawa; and Mrs E. C. Knowles, past president, Montreal, gave reports on the annual meeting of the Board of Women held in Toronto.

A number of changes have been made in the structure of Montreal-Ottawa Conference of U.C.W.. For an experimental period of two years, there are three vice-president whose areas of concern are citizenship, leadership and stewardship. Mrs D. J. Cooper is in charge of leadership.

This change in structure relates only to Conference and not to Presbyterial or local U.C.W.'s, but members are urged to watch the experiment with interest.

The Montreal-Ottawa Conference consists of four presbyterials - Montreal Presbyterial, Ottawa Presbyterial, Quebec-Sherbrooke Presbyterial and Seaway Valley Presbyterial.

Members on the conference executive for 1968-69 in the Seaway Valley besides Mrs Cooper are Mrs D. Frappier, recording secretary, Cornwall; and Mrs Clifford Larmour, Morrisburg, Seaway Valley Presbyterial president. Mrs Frappier was nominated as representative to the Board of Women. Other members are on conference committees.

Local groups which form the very foundation of the whole are working to unite all women of the congregation for the total mission of the church and to provide a medium through which they may express their loyalty and devotion to Jesus Christ in Christian Witness, study, fellowship and service.

START A COMPOST HEAP FOR A BETTER GARDEN SOIL

A compost heap containing garden refuse can be of great value to home gardeners. It offers an excellent source of valuable organic matter for improving garden soils. Horticulturists with the Ontario Department of Agriculture and Food say it provides a handy disposal place for grass clippings and leaves.

Most types of plant refuse can be used in making a compost. Included are dead foliage, grass clippings, discarded fruit and vegetables, dead annual and perennial tops as well as most weeds provided they have not set weed. Avoid using branches and twigs as they require a very long time to break down.

The best size for a compost pile should be about six feet wide and five feet high. The length will, of course, depend on the material available but provision should be made for extension. If both ends are open, the decomposed material may be removed from one end while fresh material is being added to the other. A 12-inch layer of coarse roughage, such as corn stalks or straw, should be placed in the bottom to allow air to move through the pile and give good drainage. On top of this, add a six-inch layer of green waste and sprinkle on a little lime or complete fertilizer at the rate of 250 pounds per ton of compost. The lime aids in organic matter breakdown and makes the pile odor-free. Continue building the pile in this sandwich-like fashion until the desired height has been reached. Make a depression in the top of the pile to collect water. It is extremeley important that the pile be kept moist during dry weather, so it may be necessary to water it occasionally.

The pile should be turned once or twice during the de-composition period, so that the outer portions are moved to the center, and allowed to decompose more rapidly there.

Alexander Graham Bell's early work with the deaf led logically to genetic studies on the heredity of deafness, longevity and scientific sheep breedingi.

350 boys set to take part in Metcalfe rally

Approximately 350 boys and their leaders from the Ottawa, Montreal and St. Lawrence Seaway areas are expected to take part in the third annual Tyro and Sigma - C turnout to be held at Metcalfe, Ontario, on Saturday, May 25th.

The Turnout is sponsored by the Ottawa and District Tyro and Sigma-C Leaders' Fellowship with the co-operation of the Ottawa and District Boys' Work Board. Tyro is an inter-denominational organization for boys aged 9-11 and Sigma C is for boys aged 12 - 14. The program will include a series of many varied sporting events, ending with presentation of awards and a worship service. There will be a handicraft hobby fair held in conjunction with the turnout and it is expected to draw some two hundred entries ranging from boomerangs to home cooking in seventeen different sections.

Group competition will be keen to win the H. Groh Trophy and the top individual entrant will win the Grand Championship Trophy.

LOST LEG BUT WON ANYWAY

George Baker, 43, of London, was awarded $3,120 damages for injuries to a leg he no longer has.

His left leg was broken in a traffic accident, but before his suit was heard he was shot accidentally in the same leg and it was amputated above the knee.

However, the judge allowed compensation for inconvenience he would have suffered if he still had the leg.

Drivers - watch for a red triangle with the center portion a brilliant flourescent orange. This is a Slow Moving Vehicle emblem being used by some farmers on the rear of their tractors to help reduce the more than 200 tractor-car accidents that occur each year in Ontario.

Check your farm driveway the next time you go out. Are bushes or shrubs obstructing your view of the road from the driveway entrance? If your vision is obscured, trim back some of the brush, advise Farm Safety Specialists with the Ontario Department of Agriculture and Food.

In 1885, following the collision of a steamer with an iceberg, Alexander Graham Bell wrote advocating a method of determining the location of such an object at sea by detecting an echo from it (radar).

Alexander Graham Bell was born in Edinburgh, Scotland, on March 3, 1847.

RIVERSIDE

Weekend guests at McMillan home

Mr and Mrs Donald McMillan, Oxford Mills, visited Mr and Mrs Chas. McMillan during the week end.

Mr and Mrs H. Kennedy, of Cornwall, visited at the home of Mr G. Casselman.

Mrs Alex Rutley spent Friday with her daughter, Mrs Clair Robertson.

Mr and Mrs Doug Robertson and family, Spencerville, visited during the weekend with Mr and Mrs Clair Robertson and family.

Mrs Carrie Alguire, North Valley, and Mr and Mrs B. Robinson, Williamsburg, spent Saturday with Mrs Ruth Bogart.

Mr John Stevens, Ottawa, spent a few days with Mr G. Casselman.

Mrs Neil Flegg and Robin visited her mother, Mrs L. Dame, of Finch.

GOLDFIELD

Visit mother in hospital

Miss Lillian Droppo, Mrs Arnott Empey and Mr Keith Droppo visited their mother who is a patient in General Hospital, Cornwall.

Rev W. W. McI. Craig, moderator of the Glengarry Presbytery, held a special meeting with ministers and elders in Avonmore on Wednesday evening in connection with the call to Rev Willis Sayers who has been called to the congregations of Monkland, Gravel Hill and Avonmore.

Mrs Hector Gillies and Mrs D. A. Gillies attended the May meeting of the Ladies' Aid and Women's Missionary Society of St. Luke's Presbyterian Church held in the church hall on Wednesday evening.

Rev W. W McI. Craig conducted the service in the Glen-Stor-Dun Lodge Chapel on Sunday afternoon.

Friends here of Mrs Grace McMillan are sorry to learn that she is a patient in General Hospital, Kingston.

Mrs E. G. Lillico, Mrs T. W. Johnston and children of Ottawa visited Miss Ellen Gillies and Donald Gillies and Mr and Mrs Hector Gillies on Tuesday afternoon.

Mrs Jennie McMillan of Chesterville and Mr and Mrs George Carruthers of British Columbia visited Mr and Mrs Blake Nephew.

Mrs Donald MacMillan of Ottawa, Mrs Earl Campbell and Erla Campbell called on Mr John MacMillan.

Mrs Donald MacMillan and son John MacMillan, Ottawa, visited friends in Smiths Falls.

Rev W. W. McI. Craig called on Mrs M. Empey at the Glen-Stor-Dun residence on Sunday afternoon in Cornwall.

The flowers for the Mother's Day service in St. Luke's Presbyterian Church were placed there by Miss Doris Ouderkirk in memory of her mother, Mrs Fred Ouderkirk.

Mr and Mrs Thomas Mallet were supper guests of Mr and Mrs Arthur Merkley on Thursday.

Mr and Mrs Evert Termeer viisted Mr and Mrs Bruce MacLeod and family.

Rev W. W. McI. Craig called on Mr Clifford MacRae who is spending a few days a patient in General Hospital, Cornwall.

Mr and Mrs Walter Burd attended the funeral of the late Mrs Roy Miller held at the Brownlee Funeral Home.

Mr John MacMillan and Mr Albert Montgomery spent Saturday in Cornwall.

Mrs Milton Millross and Miss Hilda Johnson of Cornwall visited Mrs Mary Beckstead and Mr Basil Gillies.

BIRDS OF PREY

Middlesex, Eng., police investigated the Great Canary Robbery. A gang stole 50 of breeder Joseph Houghton's 56 prize birds overnight.

Mr Houghton said sadly: "It took me five years to build up the stock.

Other aviaries in the area have been raided and police think it's the work of experts who re-sell the birds.

NO PLACE LIKE HOME

Joan Emmett, 44, had one of the shortest vacations ever in sunny Majorca — she paid $96 and stayed just six hours.

The Surrey, Eng., publican's wife felt homesick and boarded the first available flight home.

Clean out the medicine cabinet regularly.

GRANTLEY

Supper guests at Johnston home

Mr and Mrs Mason Robinson were recent Sunday supper guests of Mr and Mrs Edwin Johnston and attended a church service at the Presbyterian Church at Iroquois.

Mrs Gerald Cross and children, Winchester, visited on Sunday afternoon with Mr and Mrs Earle McMillan and family.

Mr and Mrs Orval Casselman and Diane spent Sunday with Mr and Mrs Clifton Merkley and family.

Mr and Mrs Don nKapp, of Brockville, Mrs Clifford Knapp and Mr and Mrs Wm. Fetterly were supper guests on Sunday with Mr and Mrs Wilburn Robinson and Hugh.

Mr and Mrs Vernon Whaley and family were supper guests on Sunday with Mrs John McMillan and Grant.

Mr and Mrs Mason Robinson were supper guests on Sunday with Mr and Mrs Bert Link, Winchester.

Mrs Roger Salmon visited Miss Donna Salmon at the Winchester Memorial Hospital Monday afternoon. We wish her speedy recovery.

Mrs Glenn McMillan, Mrs Robert Merkley and Glendon called on Mrs Rae Brown, Inkerman, on Friday afternoon.

Mr and Mrs Claude Carr called on Mrs Jas. McMillan recently.

RED CARPET TREATMENT FOR N.Z. BEES

A consignment of 30 VIBs — very important bees — recently buzzed off from Auckland to Canada.

They travelled, under intensive care, by Canadian Pacific Airline jet, destined for the Dominion Expermental station at Beaver Lodge, Alberta. There they were to be appraised for their value in restocking Canadian beekeepers' hives.

At present, most bees for Canada are imported from the United States. If the New Zealand bees prove their worth they might be instrumental in establishing a regular trade with Canada.

The bees were queens specially selected from South Island hives. Each travelled in individual compartments in a container, and each queen had six "stewardess" bees in her compartment to tend and fed her during the flight.

RUSH CITY

Returns home from hospital

We are glad to report that Willard Wereley, Newington, who was a patient in Cornwall Hospital for a few days, was able to return home much improved in health.

Mr and Mrs W. N. Eamer spent a few hours on Sunday with Mrs Frank Eamer, Cornwall.

Mr and Mrs Cecil Canham, of Newington, were tea guests with Mr and Mrs Duncan Bethune on Sunday evening.

Recent visitors with Mr and Mrs Clarence Boyd were Mr and Mrs Peter Zeran of Newington and Mr and Mrs Lionel Baker, of Crysler.

Mr and Mrs Clarence Boyd spent Thursday evening with Mrs Boyd's father who celebrated his 89th birthday at Huntington, Que.

Mr James Boyd spent Thursday evening with Mr Ian Baker, Crysler.

Miss Jean Boyd spent Thursday evening with the Misses Sandra and Kareen Zeran of Newington.

OSNABRUCK CENTRE

Visit grandmother on Sunday

Mr and Mrs Ralph Watzenboek and Janice, Ottawa, and Miss Rita Watzenboeck, Kingston, visited with their grandmother, Mrs Eva Dillabough, on Sunday.

Mrs Keith Swerdfeger and Dale called on Mr and Mrs J. W. Hume and Earl, Northfield, on Sunday.

Mr and Mrs J. A. Stewart and family visited with Mr and Mrs Rivers, Martintown.

Mr and Mrs John Brownell were among the guests entertained by Mr and Mrs Elmer Flegg, Finch, on Saturday on the occasion of Mrs Flegg's birthday.

Mr and Mrs Donald Webb and Andrew spent Sunday in Morrisburg.

Douglas Cryderman, Ottawa, spent the weekend at his home here.

In Denmark, Danish pastry is called Vienna bread.

GARDEN SLUG CONTROL

Newly transplanted annuals and succulent young perennials are prime targets of the garden slug. This small, slimy creature is one of the most destructive garden pests, warn horticulturists with the Ontario Department of Agriculture and Food.

This pest is most apparent during cold, wet weather, but can withstand long, hot, dry periods. Its sucking and chewing action can leave your plants in shreds in a matter of hours. This pest attacks most types of garden plants, and the signs are not hard to spot. Look for silvery trails along the ground, and tattered or shredded leaves.

Sanitation is the most effective means of control. Clean up all types of rubbish, and be sure to rid the garden of any weed beds or brush piles. To determine whether or not slugs are present, place a 6-inch square of moist bark near the area to be protected. Check this each morning to see if any slugs appear under it. Remove these immediately and kill them.

Baits are often used for controlling this pest. There are several commercial types now on the market, that are applied just before dusk, in small piles the size of 50-cent pieces, near the plants to be protected. Always follow the manufacturer's instructions as carefully as possible. Slug baits are also poisonous to children and pets, so extreme care must be used in their handling.

WANT FORT RESTORED

A rough-hewn schoolhouse, a warehouse and a fish cache where dried fish were stored is all that remains of a fort built at Fort St. James, B.C., in 1806.

The historical society of the northern British Columbia village is petitioning the provincal government to have the old fort restored.

Sailing under the Spanish flag, Portuguese navigator Fernandez de Quiros discovered the New Hebrides group of islands in the South Pacific in 1606.

Don't put old drugs in the garbage where children might find them.

Corn on my farm?

by
W. D. Keys
Agricultural Representative
Dundas County

Will you grow corn in 1968? A survey conducted by the Dundas Soil and Crop Improvement Association indicates that better than two-thirds of Dundas County farmers will be growing corn this year. Not only will they grow corn, but they will grow more acres of corn than ever before—probably better than 20,000 acres.

What are some of the impacts that this change will bring to our agricultural community?

* More silos will appear on farmsteads throughout the County.
* More feed per acre will be produced on the farm.
* More capital investment will be made in corn machinery and drainage.
* Corn cribs will become a common sight on many farms.
* Cash crop corn will become a more familiar term as a portion of this crop moves into the industrial market, etc.

How well do we grow corn? Our most recent report indicates that on the average, Dundas farmers produce 12 tons of corn silage per acre and 70 bushels of grain corn per acre. On the other hand, the results of our county corn crop competitions indicates that we can produce much better corn than these averages. The following factors deserve extra consideration in your growing program:

Planting

After May 10, plant as soon as the land can be prepared. Select the proper planter seed plate for your seed corn size. With adequate fertility aim for 20,000 plants per acre.

Seed Treatment

To provide protection from wireworm and seed corn maggot damage, all seed corn should be treated before planting. Lindane is effective for control of wireworms, diazinon for control of seed corn maggot. These two chemicals are available in commercially prepared mixtures. Use the amount recommended on the insecticide package and be sure to mix thoroughly with the seed.

Fertility

As a general rule, on clay, clay-loam soils, the corn crop will require approximately 100 lbs. of actual nitrogen, 60 lbs. of phosphorous and 30 lbs. of potash per acre. Various combinations of pre-plant, sideress, and planter applications of fertilizer can be used. If possible, some of the fertilizer (especially nitrogen and phosphorous) should be applied with the planter.

Weed Control

A number of chemicals are available for use in the 1968 corn crop with Atrazine being the most commonly recommended. Atrazine is available this year as 80W instead of 65W, which means that each pound of material is 15% stronger.

Many factors enter into the production of a good corn crop. The four points mentioned here—proper planting, seed treatment, adequate fertility and weed control, are a must for good production.

Several publications are available from your County Department of Agriculture and Food Extension Branch Office.

THE BIBLE TODAY..

Nearly a quarter of a million Scriptures have already been distributed in the Indian state of Gujerat since the One Million Scripture Crusade was launched in January. Gujerat with its 25 million population has the second lowest percentage of Christians in India.

The pivot of the campaign's outreach into the state is Ahmadabad, a city of 1½ million people. Its 64 cotton mills produce 25% of India's cloth. The industrial picture of 64 chimneys rising like huge spikes into a drifting smog is offset by the city's beautiful lake, parks and a renowned zoo. Here the campaign to evangelize the state was launched. Forty university and college students will gather in the city at the end of April for a period of training in Scripture evangelism, after which they will travel to all parts of the state to work and witness. Already 11 other workshops have been held in key areas to train local Christians to witness using Scriptures and Christian literature in their sphere of influence.

The Bible Society of India has produced Scriptures with attractive new covers depicting life in the state, and is providing staff to help with the training programs.

Suggested Daily Bible Readings

Sunday, May 19: Romans 11: 11-25.

Monday, May 20: Romans 12: 1-9.

Tuesday, May 21: II Corinthians 5: 7-21.

Wednesday, May 22: Galatians 2: 16-20.

Thursday, May 23: Galatians 5: 1-6.

Friday, May 24: Galatians 6: 1-10.

Saturday, May 25: Hebrews 11: 1-10.

BEES INCREASE YIELDS NEEDED FOR POLLINATION

Within 15 years, beekeeping may be reduced to a hobby in Ontario, with serious consequences to food production, according to Professor G. F. Townsend, Chairman Department of Agriculture, Ontario Agricultural College, University of Guelph. He made the prediction at a meeting of the Honey Section of the Ontario Food Council in Toronto, on April 9. Representatives of producers, packers, wholesalers and retailers of honey attended the meeting.

However, hope may be in sight for the province"s beekeepers. Professor Townsend reported that the Ontario Department of Lands and Forests has shown interest in planting black locust trees in conservation and land reclamation areas.

Experience in Romania has shown that 30,000 colonies of bees can be put in a 2,500 acre planting of black locusts, to give a yield of 100 pounds of honey per colony, about double the Ontario yield.

Changes to low or non-honey producing crops in Ontario are driving beekeepers out of business or out of the province. The Ontario beekeeper can no longer depend on farm crops for a satisfactory honey yield. Yet fewer bees could result in decreased yields of fruit, vegetables and cereals.

Birdsfoot trefoil, a poor honey-producing plant, has been expanding at a rate of 50,000 acres per year.

Corn, a non-honey producer, is fast replacing other crops at a rate of 75,000 acres per year.

Alfalfa, Ontario's only dependable source of honey, is now threatened by the alfalfa weevil, found in Ontario for the first time in 1967.

The widespread use of insecticides, particularly seven, is taking an ever-increasing toll of bees and driving the beekeeper from the cash crop areas.

Since 1941, total farm acreage in southern Ontario has decreased 16 percent.

Ontario honey producers need a more organized marketing system to combat high costs and low prices, Professor Townsend says. He suggests, however, that low honey yield is the most serious problem of Ontario beekeepers.

Some 5,000 colonies of bees now are moved into the Niagara Peninsula each year to pollinate Ontario's fruit crops. Beekeepers bring the hives from as far as 150 miles away, to the mutual advantage of fruit growers and beekeepers.

In recent years, Ontario beekeepers have been moving to Western provinces to take advantage of the present high acreages of clover and rape being grown there. As a result, Canadian honey production is up 15 million pounds in the past five years, although Ontario reached a 10-year low in 1967.

WILD OATS PROBLEM CHEMICALLY CONTROLLED

Wild oats are still a major problem on many farms in Ontario, but with the many herbicides available this weed can be controlled in most crops. Developments in chemicals during the past few years have made possible almost weed-free conditions in corn and soybeans. Similar control is also possible in most crops other than oats.

Glen Anderson, Crop Science Department, Ontario Agricultural College, suggests that farmers find their source of wild oat herbicides in plenty of time before seeding, to be sure that the chemicals will be used at the right time for the most effective control.

Special care and attention are necessary in applying all chemicals but this is particularly important when applying chemicals for control of wild oats. In all cases consult the manufacturer's directions.

The two chemicals used for wild oat control in barley and spring wheat are Carbyne (a post-emergence treatment applied when the majority of the wild oat plants are in the two-leaf stage) and Avadex BW (used either as a preplanting - incorporated or as a preemergence - incorporated treatment).

Carbyne, the postemeregence treatment, is applied at the rate of 4 to 6 ounces (active) per acre using at least 50 pounds per square inch pressure. Costs per acre range from $2.85 to $4.45 per acre for the chemical.

Avadex BW at the rate of 1¼ pounds (active) per acre in 15 to 30 gallons of water costs about $4.75 per acre. The chemical must be incorporated into the soil within two hours of application, with a disc or harrow before planting or with a harrow after planting.

For further details about crops on which these and other herbicides may be used consult Publication 75, 1968 Guide to Chemical Weed Control, available from County and District Agricultural Representative offices, or the Information Branch, Ontario Department of Agriculture and Food, Parliament Buildings, Toronto.

POPULAR HOUSE PLANT EASY-TO-GROW FERNS

Ferns vary in size from tiny moss-like growth to massive tree ferns. The most popular house plant type is the Boston fern. Horticulturists tell us that ferns are easy to grow and will give many years of pleasure with only a little care.

Most ferns require a temperature of 60 to 65 degrees F. for proper growth, and few will stand temperatures below 45 degrees F. They prefer locations away from the window during winter as they are susceptible to cold glass. Adequate light should be provided but direct sunlight should be avoided in most cases.

Repotting is done in the spring. Ferns require a compost of equal parts leaf mold, loam, and peat with sand freely added. If there is evidence of root decay, the old soil should be washed from the roots and any roots that are broken or rotting should be trimmed bacq slightly. Generally, it is best to disturb the roots as little as possible and on no account should they be overpotted. Use a pot only slightly larger than the root system.

Most ferns can be increased by diviison. This is done when growing commences in the spring. The rhizomes are cut through with a sharp knife and divided portions set in separate pots just large enough to hold the roots. Ferns are not heavy feeders but benefit from a once-monthly feeding with a balanced liquid fertilizer.

Bright labels, candy-coated pills or just candy-shaped tablets appeal to youngsters who have no knowledge of drugs. Why leave them lying around?

GARDEN FRESH RHUBARB

IF YOU HAVE RHUBARB in your garden you will soon have more than you know what to do with. I look forward to that first bit of rhubarb sauce or tangy pie made from rhubarb I pick from my own garden. There isnt any better.

NOTE. The first three recipes were prepared by food experts at Macdonald Institute, Guelph.

Fresh Rhubarb Pie

To make fresh rhubarb pie, prepare sufficient pastry for a 9-inch, 2-crust pie, using your favourite recipe. Line the plate with pastry and roll out the top crust.

Combine 1½ cups granulated sugar, 2 tablespoons grated orange rind, ¼ teaspoon salt, and 4 to 6 tablespoons of flour. Wash and cut 4 cups of rhubarb into 1-inch pieces. Place half the rhubarb in the lined pie plate; sprinkle with half the sugar mixture. Repeat with remaining ingredients. Dot with 2 tablespoons butter; cover with pastry.

Bake at 425 degrees F. for 40 minutes.

Rhubarb Strawberry Delight

1½ lbs. rhubarb (about 6 cups of 1-inch pieces)
½ cup water
Dash of salt
½ to 2/3 cup sugar
1½ cups frozen strawberries, thawed

Wash rhubarb and cut off ends. Do not peel. Cut into 1- or 2-inch pieces. Combine all ingredients in saucepan; simmer covered, about 10 minutes until tender. Stir occasionally to prevent sticking. Just before removing rhubarb sauce from the heat, add thawed strawberries. Serve warm or chilled. Four to five servings.

For a thicker sauce, omit water and place rhubarb, sugar and salt in double boiler top. Cook, covered, about 25 minutes, stirring occasionally. Continue as above.

Rhubarb Spanish Cream for Six

1 envelope unflavoured gelatine
¼ cup cold water
2 eggs, separated
1/3 cup sugar
⅛ tsp. salt
1¾ cups hot milk
1 tsp. vanilla

Soften the gelatin in cold water. Mix the egg yolks, sugar and salt and add the hot milk. Cook over boiling water until mixture coats a metal spoon. Pour over softened gelatine, stirring until it dissolves. Strain and chill. When partially set, beat mixture until foamy. Beat egg whites until stiff and beat into mixture.

Pile lightly into sherbert glasses. Top wth rhubarb sauce.

Rhubarb Meringue Pie

2 cups finely diced rhubarb
1 cup sugar
2 eggs
2 tbsps. flour
2 tbsps. water
¼ tsp. salt

Mix sugar, flour and salt; add to rhubarb. Add water and beaten egg yolks. Bake in uncooked pastry shell. When rhubarb is tender top with meringue made from the two egg whites.

To bake: Start in a hot oven, reduce to moderate and bake meringue at 300° for 20 minutes.

CARD OF THANKS

I would like to thank my neighbours and friends for their kind condolences and sympathy cards following the recent death of my brother, Vincent Cedric MacLeod.

Bruce MacLeod. 35-1

CARD OF THANKS

May I take this opportunity to thank my friends and relatives for their visits, cards and gifts while I was in Winchester District Memorial Hospital. Special thanks to the Rev J. J. Collins and the other visiting clergy, Drs H. and D. Justus and the nursing staff of second floor.

Edward Wheeler. 35-1

CARD OF THANKS

I sincerely wish to thank all my friends, relatives and neighbours for their cards, visits and treats while I was a patient in Hotel Dieu Hospital, Cornwall. Special thanks to Rev Father Danis, Father Lalonde, Dr McLeod, Finch, Dr McKeown, Dr Tallon, and also the staff on 3rd floor for excellent care.

Stanley Murphy. 35

CARD OF THANKS

We would like to take this opportunity to thank our friends, neighbours and relatives who helped to make our silver wedding anniversary such as success. Thanks for all the gifts, cards, flowers and phone calls.

Mr and Mrs Frank Merkley.

CARD OF THANKS

I wish to express my gratitude to friends and neighbours, Dr McLeod, Dr Randlett and special assisting doctor for their efforts and kindnesses to my late husband, George Walker, who passed away in Cornwall General Hospital on April 20, 1968. Special thanks to the nurses on third floor for their care and kindness.

Mrs George Walker. 35-1

CARD OF THANKS

I would like to take this opportunity to express my sincere thanks to my many friends and relatives who visited me, sent cards and gifts while I was a patient at the Cornwall General Hospital. Special thanks to Dr Gelinas and the staff on third floor.

Carol Ann Godard. 35

CARD OF THANKS

The family of the late Margaret Allan wish to thank their relatives, friends and neighbours for the many acts of kindness, spiritual and floral offerings and messages of sympathy received during their recent bereavement.

The Allen Family. 35-1

FATIGUE

Fatigue is a common feeling with most of us. It's nature's warning that our muscles have reached their limit of endurance. It's a warning to slow down or take a break and recuperate.

If you continually drive yourself so that you're always tired, you may get plenty of time to catch up on sleep in a hospital—by accident.

Cleaning time should be poison-proofing time in homes where young children live.

COMING EVENTS
