Prize Winners Announced In Annual Contest Of Chesterville Fish and Game Association

The prize awards for the best fish and deer entered in the competitions of the Chesterville Fish and Game Association were announced by the executive this past week. Competition was keen in most of the classes and many good entries are recorded. The heaviest fish of all fell to the skill of W. O. "Bill" Dixon when he boated a twenty-five pound 'lunge on the first of August. Bill went on to take the second prize for 'lunge with a twenty-one pounder. He clinched his claim to the P. J. Gilroy Trophy with a second in pickerel with nine pounds of that fine fish.

The first year of competition for the largest mudpout open to school boys saw Ray Cass land a whopper from up by Barrie's mill that copped the $5. It weighed one pound, three ounces. Robert Thom ran a close second with a catfish that was only two ounces lighter and Jack Julyan was close behind with a fourteen ouncer.

The entries in Red Deer were not as plentiful as had been hoped but some very choice venison did appear for weighing. Gord Lannin worked valiently for a couple of extra days and hit the jack-pot with a big fat buck that tipped the beam at 198 pounds. W. A. "Pat" Black came home with the second prize buck that he downed up near Killaloe. It was eleven pounds lighter than Gordie's. Wm. "Bill" Nash, Jr. connected with the best of the does and his entry shows a choice 131 pounds for some good eating.

The Association is indebted to many of the merchants and others of the village for their generous contributions towards prize list. In most cases the donation was applied as a second prize in the completion of the lists. The Association is grateful to Ernest Allison, Wm. "Bill" Barker, Keith Graham, Harry C. Hummel, Harold Keyes, George Gillard and Son, Dr. D. McLean, Harold Windsor and Len Giles. P. J. Gilroy donated the fine trophy and the miniature that is the winner's property. L. A. David did an excellent job on the signs.

The complete list of winners is as follows:

Mudpouts: 1. Ray Cass, 2. Robert Thom; Pickerel: W. H. "Joe" Dixon, 2. W. O. "Bill" Dixon; Muskellunge: 1. W. O. Dixon, 2. W. O. Dixon; Pike: 1. Ernie Summers, 2. Pat Henophy; Black Bass: 1. Wm. "Bill" Barker, 2. Jack Doering; Buck: 1. Gord Lannin, 2. W. A. "Pat" Black; Doe: 1. Wm. "Bill" Nash, Jr.

Farm Forum News

The Farm Forum broadcast last Monday night gave our four major political parties an opportunity to express their programme on social securities To the 28 Forum members meeting at Lorne Feeley's, it seemed political parties an opportunity to speaker didn't have a chance and each successive speaker 'caught a larger fish'.

Hon. Paul Martin, Federal Minister of Labour, explained the Liberal Party's Social Securities platform—old age pensions, family allowances, workmen's compensation, etc. Mr. Fleming, K.C., M.P., from Toronto gave the outline of the Progressive Conservative platform—increased old age pensions without the means test, etc. Mr. Coldwell, National leader of the C.C.F. had a prettier picture for his party, while Solon Low, National leader of the Social Creditors, easily outdid the rest with party promises. Each speaker spoke briefly on child welfare legislation, unemployment insurance, price supports, crop insurance, workmen's compensation, health insurance, hospitalization and retirement schemes.

The two outstanding stumbling-blocks to these Social Security plans are how to finance them and how to keep people working. As to finances—Santa Claus comes only once a year and then he is not too dependable a chap. If he fails, the people alone have to pay for these securities through taxes. Is it wise to extend Social Securities too far? Think it over.

New Zealand is supposed to have the highest standard of Social Security of any country in the world. According to reports presently being in our daily papers, New Zealanders receiving the benefits of these Securities, are forgetting how to work and the government is having a difficult time keeping the wheels of Industry rolling at a maximum rate, with labour which receives enough to live on, without working.

The speaker was introduced by P. J. Gilroy and thanked by L. H. Doering.

Mr. Ouderkirk stressed the need for a better understanding between the nations of the earth. He wished that the good offices of Rotary could be used to level many of the barriers that have risen between nations due to misunderstandings and mutual distrust. The speaker drew on the impressions gained in his extensive travels in the Far East and other parts of the globe when he was with the RCAF during the last war to illustrate many points in his address. In conclusion, he stressed the need for a better understanding between countries. If Rotary can be of any service in that field, it was his impression that its existence would be more than justified.

Conservation Movies Make Fine Showing

Last Tuesday night the Carling Conservation Club held their annual showing of Wild Life Films under the sponsorship of the Chesterville Fish and Game Assosciation. Major P. K. Ketcheson was in charge of the program and his address prior to the showing dealt extensively with the life and habits of the Black Bass.

In his talk, Major Ketcheson pointed out that many bass are needlessly killed each year through ignorance in knowing how to handle the fish if they are to be returned to the water. He explained that the slightest pressure on the sides of the fish is usually fatal, and that the only way to hold them is to grasp the lower jaw of the fish with the thumb and forefinger. Release the hook, holding the fish in a vertical position all the time and place it gently in the water. If a hook is lodged in the fish's throat, do not try to take it out. Just cut the line and turn him loose. In about four days, the powerful digestive juices of the fish will have dissolved the steel hook and no harm will be done.

The pictures that followed the address of Major Ketcheson were very fine. The ones dealing with Expedition Moose held the audience spellbound. The sight of the huge deer in their own surroundings, unaware of the photographer, made a vivid impression. At the end, everyone felt something of the urgent need for closely controlled conservation of the largest of the deer family.

Report Good Progress On South Nation Project

Approximately 20 representatives of Eastern Ontario municipalities on Friday heard progress reports on the work of the South Nation River Conservation Authority — a body set up under provincial Order-in-Council in 1947 to carry out flood control and conservation measures in the area covered by the watershed.

The region has a total area of 915,600 acres in the following counties: Dundas, Russell, Prescott, Grenville, Stormont, Carleton, Glengarry and Leeds.

Reports centred on the projects recommended in 1948 by the "Interim Conservation Report" for the South Nation Valley, prepared by the Ontario Department of Planning and Development.

Reeve Alexander Roger of Gloucester township, secretary-treasurer of the authority, reported that the survey of the canal area between Spencerville and Domville had been half completed while approximately 50 percent of the diamond drilling at the dam southeast of Spencerville had been finished.

The Conservation Report recommended a diversion channel from the Spencerville reservoir to the St. Lawrence river, connecting with Domville and diverting flood waters from the Brinston district.

It was estimated that flood control measures for that part of the watershed above Chesterville will cost $2,212,000 including the provision of dams and reservoirs at Spencerville, Spencerville Mill, Domville and Hyndman.

A. H. Richardson, chief conservation engineer of the Ontario Department of Planning and Development, and also chief executive officer of the authority, said that flood control work was the "most urgent" need, but not the only one.

"The Conservation Authority," he pointed out, "is set up to do all types of work that come under the heading of conservation, including land use, soil erosion, reforestation and wildlife."

There were 198,000 acres in the watershed recommended for reforestation—some in every township in the area.

He suggested a public meeting be held at some central point and that details of the conservation plans be made known to the people "so they'd know what their money is being spent for".

Mahlon Zeron, of Iroquois, was re-elected chairman of the authority and J. P. Meilleur, of Casselman, was re-elected vice-chairman. T. C. Reilly of Edwardsburg township, was named to succeed Norman Edwards of Cumberland township as a member of the executive.

Winchester District Hospital Auxiliary First Meeting New Year

The first meeting of the New Year of the Winchester District Memorial Hospital Auxiliary was held in the Town Hall on January 6th, at 8 o'clock. The president, Mrs. C. R. Robinson, presided.

After welcoming the members and visitors the president stated that the members of the Auxiliary and Hospital Board had great cause for thankfulness and called upon Mrs. George Wilson to lead us in prayer.

Mrs. Wilson offered a very beautiful prayer in gratitude to God for all the blessings we had received during the building of the hospital, on the official opening day and on donation day and asked God's continued blessings on our work.

The minutes of the last meeting were read by the secretary, Mrs. George Elliott.

The president then introduced Mr. Joyce of Kansas City, who told the Auxiliary of a very successful and profitable plan of putting on a play by amateurs of the town but there being no hall in Winchester with a stage large enough for the cast, his offer was declined.

The treasurer, Miss Nora Elliott, gave her report which showed a substantial balance after considerable expenses had been deducted.

The business arising from the minutes was then dealt with after which Mrs. C. R. Robinson and Miss Marquis, superintendent of the Memorial Hospital both voiced their appreciation to all those who so ably assistd them on the official opening day of the hospital and to all those, men and women, who so nobly came to their aid on donation day.

It was decided to accept the offer of the Cloverdale ladies to put on a play in the future, one half of the proceeds to go to the auxiliary.

Mrs. Gordon Simser had a very beautiful hand crocheted apron on display for which tickets are to be sold by the ladies of the Vancamp Unit of the Auxiliary.

The Cass Bridge Unit realized $42.20 on the beautiful doll for which tickets were sold and on the doll and doll bed donated by Miss Dorothy Servage, $43.80 was raised for the Winchester Unit.

Special thanks are due Miss Dorothy Servage for her donation and to Mr. Harry Flora who celebrated the opening of his beautifully decorated and up-to-the-minute Soda Bar by giving a complimentary afternoon tea, the proceeds of which amounted to $60.35 which he turned over to Mrs. Byers, the convener of the Ways and Means Committee of the Auxiliary.

After the President had wished all those present a very happy new year, the meeting was closed by the singing of the National Anthem.

NEW LOOK COMES TO LOCAL FAIR

At the annual meeting of the Chesterville and District Agricultural Society held in the Hydro Office on Tuesday, emphasis was given to the necessity of getting New Life into Fair Committees. It was agreed by the members that the time had come to make use of the young executive citizens of the town and surrounding country and when the list of 1949 committees is published, it will contain many new names.

1948 was only an average year for Chesterville Fair. The showing of Light Horses is rapidly becoming a rich man's hobby and the scarcity of this class at our Fair is worrying the directors. It is planned to provide high-class entertainment in front of the grandstand on Fair Day to supplement the horse classes.

Plans were made to rent sufficient tents to provide accommodation for a Township School Fair in conjunction with the Fair. It is hoped that a few "Home Economics" classes will also be added.

1949 officers are :Hon. Presidents: Thos. Allen, Angus Smith; President, H. J. Kittle; 1st Vice, A. E. Smith; 2nd Vice, H. E. Durant; Sec.-Treas., Allison Graham; Directors: Wm. Servage, Thos. Allen, Angus Smith, H. J. Kittle, A. E. Smith, H. E. Durant, Hugh Smith, Thos. McCadden, A. J. Barrie, J Howard Fulton, R. C. Dillabough, Eric Casselman.

SAFETY FIRST IS GOOD FARM RULE

During the winter months when things are not quite so busy on the farm is a good time to remedy that hazard which nearly caused an accident back in the summer. Perhaps it was a faulty trap-door or inadequately protected stairs in the barn, an unsafe bull-pen, or loose boards on the house varandah. Whatever it was, if it isn't fixed there may be a real accident this summer.

It is estimated that there were 37,200 non-fatal accidents on Canadian farms in 1947, and 30,000 of these were to men. During the same year in the United States 19,500 farm people were killed accidentally and 1,800,000 were involved in non-fatal injuries involving lost time.

Many of these accidents should not have occurred. For instance, on Canadian farms the most frequent accident is from falls, and the most frequent cause is the existence of trap-doors and inadequately protected stairs. Hand railings on open stairs, and a railing to guard every stairway opening and trap door, will prevent injurious falls. New treads to replace old worn steps on stairways may cost a little more than patching, but will probably cost less than a doctor's bill and time lost while a broken bone is mending. Patched steps give a sense of security that only too often does not exist. Plenty of light is an added precaution, and stairs in a barn are much safer when kept free from hay and chaff.

A cause of some farm accidents which is often overlooked is the use of too loose clothing. Long, loose slickers worn on a wet day can cause a stumble, or if it is windy can blow into engines or machinery which is in operation. It reduces the risk somewhat if a belt is worn with such garments.

In the ten years prior to 1946, forest fires burned up 34,000 square miles of Canada. This is an area equivalent to all of New Brunswick plus half of Nova Scotia as well.

Poor Shot

The speaker had thundered through an impassioned address.

"And," he shouted, "if a lie has passed my lips this evening may a thunderbolt from the skies fall on my head!"

As he spoke the platform collapsed in a cloud of dust, and the orator disappeared from view.

The audience sat spellbound. After a few tense moments the speaker emerged from the wreckage.

"Gosh!" exclaimed a voice from the rear of the hall, "It missed him."

SEED CORN NO. 240

Last year a considerable number of farmers were interested in growing grain corn for husking. This corn crop proved to be a great success. Several farmers' crops yielded as high as 56 bushels per acre at $1.20 - $1.33 per bushel which means a nice amount of money per acre for the use of land for one year.

This corn was sold through the Federation of Agriculture and distributed by us.

This year we can offer you the same varieties (240-255-275) but recommended No. 240 as last year, at prices prevailing at time of shipments. Leave your order early and cash in on this money making crop.

VALUABLE LEAFLET FOR CORN GROWERS

Prepared by the Ontario Corn Committee, headed by Dr. Truman Stevenson of the Dominion Department of Agriculture, Ottawa, a very valuable leaflet is available for corn growers of Ontario. The corn committee is made up of representatives of both Dominion and Ontario Department representatives.

The circular can be obtained from the Ontario Department of Agriculture, Toronto or from any local Agricultural Representative.

Under the caption "Corn Hybrids Recommended for Production in Ontario," a list of early, medium and late corn, suitable for planting in the areas designated.

On the back of the circular is a map of Ontario carefully marked with climatic zones for corn. Meteorological data has been supplied by the Ontario Research Foundation, for compilation of the zones.

"The zones outlined in the map are based on the average number of frost-free days and the total number of heat units registered during the growing season," it is explained.

Corn growers or those planning to plant corn this year are urged to secure a copy of the circular as early as possible.

Church News

MOREWOOD UNITED CHURCH

The services at Morewood United Church were conducted on Sunday by the Minister, Rev. W. J. Copsey, B.A. The subject of the morning sermon was "Our Great Mediator" based on I Tim. 2-5, "For there is one God and one mediator between God and men, the man Christ Jesus." The text contains the heart of the Protestant Christian Faith that there is but one way to salvation from sin to righteousness and that is the direct approach to the heavenly Father through His Son our Saviour Jesus Christ. No institution nor person has scriptural authority to come between the soul of man and his God. The sinner has access to the divine presence through Him who said, "I am the life, the truth and the way, no man cometh unto the Father but by Me." This is the Christian faith, let it be our practice. The anthem was "Father take my hand and lead me."

At the evening service the sermon "Jesus the Carpenter," was illustrated with lantern slides setting forth incidents in the life of Christ and his ministry, his teachings and works by the way, his death upon the cross, his resurection and ascension. Miss Ellice Smith presided at the organ.

HOW TO CARE FOR HOUSE PLANTS

Those Christmas gift plants will last longer and bloom more profusely if they are given ample sunlight; if the air is kept cool and moist; if the soil is never allowed to dry out; if they are kept out of draughts; and if insects are kept under control.

The temperature in most houses during the winter is generally too warm for most plants—particularly at night. That is probably why grandmother grew better house plants than many of us do today—her rooms were cooler at night. Night temperatures should be 60 degrees or lower, so it is worth moving a plant to the coolest room in the house at night. The exception to this is the Poinsettia which likes warm nights, never below 60 degrees, and does not relish sudden changes of temperature.

A plant needs water when the soil has dried out so that it crumbles in the hand. Most plants are best watered by standing the pot for a few minutes in a shallow pan or saucer containing an inch or two of water. The pot should be removed when the surface of the soil appears moist.

The humidity in most homes is far too low for house plants—particularly cyclamens. Humidifiers or pans of water placed on radiators will help. Standing the pots on saucers or trays of gravel which are kept moist is another way to provide humidity, but the pot itself must not stand in water.

Pyrethrum or rotenone sprays will kill aphids, white flies and redspidermites, or nicotine sulphate may be used.

Be careful to avoid leaving house plants in a draught, and if you use cooking gas, remember that all plants are most susceptible to any unburned gas which escapes into the air. It will cause both flowers and leaves to drop off.

Bitten Once

Old Gentleman: "You're an honest boy, but it was a $10 bill, not 10 ones that I lost."

Small Boy: "I know, mister, it was a $10 bill I picked up. But the last time I found one, the man who owned it didn't have any change."
