MORRISBURG—ONTARIO

BOOTH MANAGER HELD UP AT POINT OF REVOLVER

Ian C. Hays, aged 16 years, giving his address as Bridgeport, Conn. appeared before Magistrate Milligan in Cornwall on Monday, charged with holding up a boy at the point of a revolver and robbing a refreshment booth of $6.00, cigarettes and chocolates. The hold-up occurred last Saturday morning at the gasoline station and refreshment booth of Mr. M. E. Hartle, just west of Cornwall. A boy named Clifford Shaver, employed by Mr. Hartle as a helper, was at the booth, and the stranger secured gas and paid for a package of cigarettes and seeing some bills in the cash box as the boy went for change, he held up the Shaver boy at the point of a revolver and secured the money. The Provincial Police were notified, and Constable Jakeman secured him at Morrisburg as he passed the post office, where the officer was on the look-out for him. The car he was driving, according to reports, had been stolen and was the property of Mr. Derosier of St. Didace, Que. The car bore a Quebec license plate, but he had other licenses in it with which to make a change if necessary. The boy stated he was on his way to Toronto.. The case was adjourned for a week.

PLAN FOR THIS

St. James United Church Choir of Ottawa, composed of fifty voices, under the excellent leadership and training of Mr. Bramwell Bailey, has received prizes as the best trained choir in the City of Ottawa. It is known as one of the best choirs in Eastern Ontario. Morrisburg had the pleasure and distinction of hearing this choir at a Sunday Service in the United Church last November, and they can now look forward to the extreme pleasure of listening to them in a week-night programme in the Music Hall on Wednesday night, October 3rd. Their programme will be varied, catering to the most fastiduous taste of Morrisburg Music Lovers in Operatic and other selections by the whole Choir and others, interspersed with comic and lighter music in solos, duetts, quartettes, Banjo and Violin Music and Elocution. Reserved seat tickets will be sold at 50 cents and may be reserved at Chalmer's Store, Saturday Sept. 29th. Other seats will be 35c. Adults, 25c, Children, including tax. Better be sure to reserve your seat, as there is sure to be an overflowing house.

WELLS—McCORMICK

Pasadena, Cal., Star-News)

A very attractive wedding was that of Miss Helen Genevieve McCormick, daughter of Mrs. Grace Giddings McCormick, of Hollywood, and Dale Edgar Wells, of Canada, (son of Mr. and Mrs. Wm. Wells, Aultsville), the marriage being solemnized at the Church of the Angels in Pasadena at 8.30 o'clock the 10th inst. Gladioli and stardust, lighted by tall altar candles, decorated the church.

The bride was lovely in a gown of ivory satin and silver lace, with which she wore a veil of tulle, held in place by a close-fitting cap of silver lace. Her shower bouquet was of gardenias and lilies of the valley.

Miss Lois McCormick, as maid of honor, was in shaded green tulle, with slippers to match, and she carried a Colonial bouquet of roses and sweet peas in the pastel shades. The attendants were Miss Eleonore Couturier, Miss Catharine Stoute and Mrs. Ernest Wiley Stout, herself a recent bride. They wore tulle gowns in pastel shades, with slippers matching, and carried old-fashioned Colonial bouquets. Little Catharine Van Patter, as flower girl, was dainty in blue taffeta, as she scattered rose petals in the pathway of the bride.

Mr. D. C. Wells, brother of the groom, acted as best man, while four hockey mates of the groom, were ushers.

Following a reception at the church, Mr. and Mrs. Wells left for an extended honeymoon.

INQUEST AGAIN ADJOURNED

The inquest into the cause of the death of Charles U. Thompson, killed in an automobile accident near Aultsville on the afternoon of Aug. 6th, when a car owned by Johile Tinkess, of Lunenburg, and driven by Mr. Thompson, collided with a car owned and driven by Miss Bertha Drummond, of Ottawa, and twice previously adjourned on account of Miss Drummond's inability to be present, was again adjourned on Tuesday for the same reason until Monday, October 1st, at the Court House, Cornwall, at 1.30 p. m. Dr. F. L. McKinnon, Ottawa, sent a letter stating that while Miss Drummond was discharged from the Civic Hospital, Ottawa, on Monday, she was not in a condition to make the journey to Cornwall to give her evidence, which is considered essential by the Coroner, Dr. C. J. Hamilton, before the jury can arrive at a satisfactory verdict.

IN MEMORIAM

In loving memory of our dear father, Louis McIntosh, whom God called home one year ago the 19th of September. We sadly miss his words of welcome and his loving smile.

MOTHER and CHILDREN

MRS. HOWARD M. CASSELMAN

The death occurred on Monday, Sept. 17th, after an illness of a few weeks' duration, at her home in Morrisburg, of an esteemed and affectionate mother, in the person of Mrs. Howard M. Casselman, in her 54th year.

Deceased, whose maiden name was Sarah E. Curry, was born in Heckston, Ont. In the year 1898 she was united in marriage to Mr. Casselman, moving to Morrisburg in 1912, where they have since resided.

She is survived by her husband: one son, John of Morrisburg; and four daughters, Lulu of Cornwall, Mrs. G. A. Younge of Ottawa, Grace and Gertrude at home. Also five brothers, Dr. B. J. Curry of Winnipeg; J. R. Curry of Toronto; J. A. Curry of Ottawa; D. H. Curry of Kemptville; A. S. Curry of Ventnor; and two sisters, Mrs. E. M. Casselman, Williamsburg; and Mrs. Martha Curry of Russell.

The funeral was held on Wednesday from the family home to the United Church, the service being conducted by Rev. E. Lawson. Interment in Fairview Cemetery.

The many floral tributes testified to the high esteem in which the deceased was held. They included:—Cresent from the family; Wreaths—Dr. and Mrs. B. J. Curry, Winnipeg; Mr. and Mrs. Geo. L. Brown; Miss F. B. Colquhoun of Cornwall; Employees of the Canada Tack & Nail Co.; Mr. Geo. Biccum and family. Basket—Mr. and Mrs. J. R. Curry, Toronto. Pillow--Employees of the Williamsburg Canal. Sprays---Mr. and Mrs. J. A. Curry, Ottawa; Mr. and Mrs. G. W. Reddick, Mr. and Mrs. Wait Robson, Mr. and Mrs. Suffell and daughter May; Mr. Carson Haggart, Cornwall; Ladies Aid of the United Church; Womens Missionary Society; Mrs. D. Ritter and Mrs. C. Beckstead; Mr. and Mrs. S. Agulnik. Broken Cross--Mr. and Mrs. Woodland. Cut Flowers--Mr. and Mrs. I. Hilliard; Mrs. G. C. Challies; Mrs. L. E. Bailey, Cornwall; Mrs. Allen Casselman and Grace; Mr. and Mrs. Geo. Bourette; Mrs. H. Beckstead; Miss G. Smith.

CELEBRATE DIAMOND ANNIVERSARY

Sunday, Sept. 16th, 1928, marked the 60th milestone in the happy wedded life of Mr. and Mrs. Jos. E. Stubbs of Morrisburg, which was fittingly celebrated at their home in the presence of members of their family, relatives and friends. The aged and esteemed couple were the recipients of many presents and messages of congratulations from local friends, as well as a large number from out of town.

The home was suitably decorated, Mr. and Mrs. Stubbs presiding at the dinner table. Both are enjoying good health and actively engaged in the discharge of their duties. They provided an interesting and happy afternoon which was enjoyed by all.

Mr. Stubbs was born in St. Lawrence County, N.Y. He is a veteran of the U.S. Civil War (1861-65). On September 16th, 1868, he was united in marriage, at Waddington, N.Y., to Miss Sarah McPherson, who was of Canadian birth, her parents residing in Hamilton, Ont. Shortly after their marriage, Mr. and Mrs. Stubbs moved to Farrans Point, Ont., where the former founded the Marble Works, in which he has been actively engaged for nearly fifty years. Two years ago Mr. and Mrs. Stubbs moved to Morrisburg, where the Marble Works, of which he is the founder, is now carried on by his son, Mr. C. C. Stubbs.

Two daughters, Mrs. P. B. McDonald of Toronto and Mrs. Ella Johnson of Farrans Point, were present at the celebration. Another daughter, Mrs. Robt. McGee of Massena, was unable to be present. Among other relatives from out of town present were Mr. and Mrs. O. C. Pitts, Osnabruck Centre; Miss Lottie Stubbs, Woodlands, and Mr. and Mrs. H. Loucks of Morewood.

FOR SALE

A 206 acre farm of good gravel and clay loam, under good state of cultivation. Will carry 30 milch cows beside young stock. Buildings in good condition, cement floor and patent stantions in cow barn. Accreteded herd of 25 milch cows. An 8-room warm house, an abundance of water, plenty of wood. Two miles from milk factory and four miles from town with two milk stations, one-half mile from school. Price $11000, small payment and balance in milk checks. Eleven miles from Ogdensburg, state and county roads. Write or see Dr. G. M. Austin, Heuvelton, N. Y.

ARTHUR FLYNN Morrisburg, On

Can the World Insure Against War?

For ten years the world's peoples have been seeking some form of peace insurance—in an anti-war agreement.

The world must have peace or it will have war. There is no middle ground.

"As a first step toward international disarmament," the Treaty of Versailles demanded perpetual disarmoment of Germany. And Germany has completely disarmed in the meaning of the treaty. But the Allies have talked peace and continued to arm, while professing good intentions.

At present, war, war debts, and preparedness for war are absorbing eighty per cent. of every people's fiscal energies. These three monsters consume us in taxes, wasting and destroying annually more than enough to abolish all the world's poverty and wretchedness.

Must we keep them always? I do not think so. We know this is true: The longer the nations postpone the renunciation of war, the nearer war comes. After ten years of peace talk, armaments again are increasing.

* * * * *

Mr. Briand, foreign minister of France, laboring to find a formula for preventing war, suggested that the United States and France unite in a treaty outlawing war for any cause as between them; the treaty to denounce aggressive war and to define aggression as an act of war by a government that had pledged itself not to go to war.

I believed this a good definition of aggression and as a member of this government's Foreign Relations Committee introduced a resolution in the Senate accepting the Briand proposal the first day that Congress met last year, but changing the phrase, "outlawing war," to "renouncing war," which I think means more. Nevertheless, my resolution has not been adopted by the Senate and has not yet come before it for a vote.

Before the Briand proposal could come before Congress the Secretary of State, Mr. Kellogg, made a counter proposal which laid aside the question of aggression and proposed that the fourteen principal nations unite in an agreement to "renounce war as an instrument of national policy."

Germany promptly accepted it outright, followed by unqualified acceptances from Italy and France. Recently Great Britain definitely accepted the Kellogg proposal.

In correspondence with Mr. Briand, Mr. Kellogg said that his proposal for renouncing war would tie no country's hands if it were attacked, nor would it prevent it from taking sides, if it saw fit, where an aggressive attack was made in violation of a treaty not to go to war.

* * * * *

Now it might be said that with these reservations the Kellogg proposal is merely another pious resolution against war and not in practical effect worth the paper it is written on.

I do not think so. I believe the Kellogg plan will prove to be the most telling action ever taken in human history to abolish war. It will mean these powers must next take up the revision of the code of war. The great merit of the Kellogg plan as a starting point is that it proposes to make several forms of war illegal. It is a long step toward other agreements and measures to be adopted later to carry out this compact.

With the Kellogg proposal adopted by the Powers, the second paragraph of the resolution I introduced last winter in the Senate is as urgent as ever. We must settle by agreement what aggression actually is, for only by so doing is it possible to make renunciation of war practical and effective. What the resolution proposed was that aggression should be defined as the act of a government in going to war, in preference to further negotiation; or, when that failed, seeking further arbitration, or appealing to the World Court for adjudication of the dispute, when that government had solemnly pledged itself to renounce war as a means of settling such disputes.

Certainly such a definition brings us much nearer to the hub of the problem. For if war is to be renounced we must have some settled procedure.

* * * * *

The complete disarmament of Germany, formerly considered the world's most warlike nation, is not generally understood in relation to what it means to general world disarmament.

Not only was the German navy destroyed and the German army disarmed and disbanded, but all munition plants in Germany were prohibited. Germany is forbidden to manufacture arms and ammunition, even to import them from abroad.

The fact declared by the peace treaty, written by the victorious Allies, is that Germany is completely disarmed simply as the first step in their own disarmament. The peace treaty was a pledge to the world of disarmament by the World Powers, and the United States is one of these Powers.

No country has ever had a greater boon thrust upon it than the Allies thrust upon Germany in requiring her perpetual disarmament. A tremendously wasteful burden was thereby lifted from the backs of her people and a formidable obstacle removed from Germany's progress as a nation. This has resulted in a surprisingly speedy rehabilitation of the country economically. By reason of this Germany has reaped the only good which has so far arisen from the war. The only good which can arise from war today is what may be gained from reducing the enormous waste of war and of preparedness for war.

* * * * *

No harm has come to Germany by reason of not being armed to defend herself from armed nations—Germany has not been attacked. Instead, Germany, absolutely helpless so far as armament is concerned, is nevertheless heard and listened to in international councils.

And another thing, Germany is not asking to be permitted to arm. She is not asking that this prohibition be lifted.

But of this we may be sure: If the other Powers do not carry out their treaty pledge to disarm themselves, the time will come when armament will come back to Germany, for no nation as great as the German people will submit quietly for any long period of time to sit at the mercy of other nations that are armed and arming.

* * * * *

The time for disarmament is here. The civilized Powers, if they are in fact civilized, will keep their promise to disarm, and the people of these countries should demand that they do so and refuse to be put off with evasions and denials.

Our government as an earnest of that opinion, sent Secretary Kellogg to Paris to a meeting of foreign ministers of the principal powers to conclude the negotiations proposing the multilateral treaty for the renunciation of war.—Arthur Capper, in "Michigan Farmer."

Britain and Japan

Leo Maxse in the National Review (London): Englishmen are conscious of the injury inflicted on British interests, as on our whole status in the Far East, by the miserable manner in which the Coalition Government of evil memory allowed itself to be bluffed out of the Anglo-Japanese Alliance by a handful of American Jingoes. But few appreciate the other aspect of the disaster, viz., the unfortunate effect it had in Japan and on Japan, who could not but imagine that our renunciation of an alliance that was equally popular in Tokio and London—because equally valuable to both countries—would be followed by some Anglo-American combination at the expense of Japan. . . . If this not unnatural apprehension has prejudiced Japanese policy and Japanese interests, it has been no less unfortunate for Great Britain, who has found herself effectively isolated, with the United States hostile, and Japan reluctant to incur any responsibility.

WHAT THEY'D BE

"The times are terrible! What will the girls be in a hundred years?"

"Angels, I hope."

The Outlawry of War

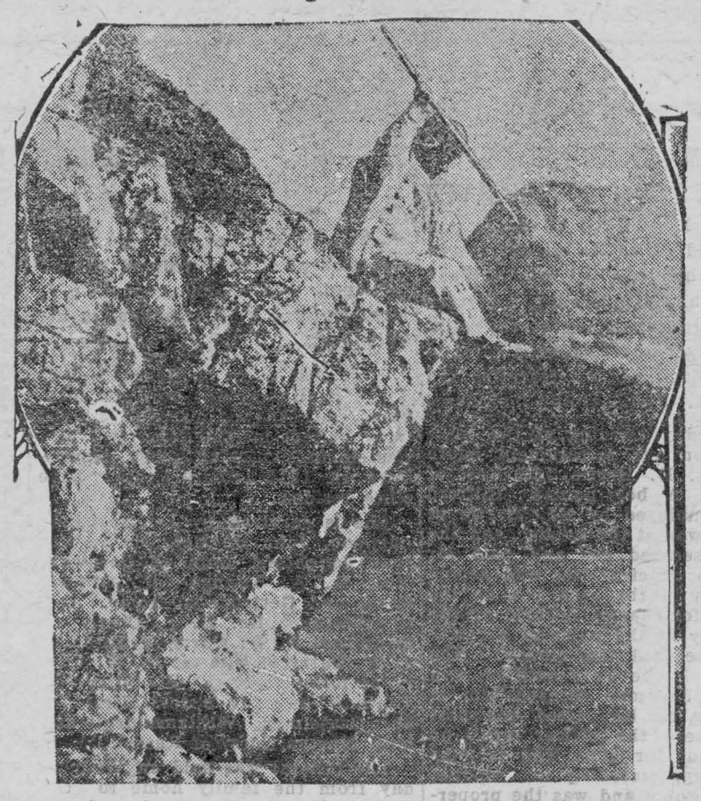

Saturday Review (London): Since the last war the area within which war is an acknowledged institution has been vastly extended. Formerly it was in two dimensions only, but since the discovery of the secret of fight it has been in three. Formerly, again, war, so far as actual violence went, was a relation between Governments and armed forces only; now the only distinction between combatant and non-combatant has broken down, and women and children in raided towns are as liable to be killed as a soldier on the battlefield, and no special guilt attaches to the killing. If the new Pact could only redeem to peace the territory since the last war has been annexed to the operations of war, it would justify its description as an outlawry of war.

American Tactics in Nicaragua

Walter Lippman in Foreign Affairs (New York): The worst thing about it (American policy in Latin America) is that it does not work. It is designed to prevent interventions and it simply makes intervention more elaborate and costly. It gives us the odor of Imperialism, and yet our intention, I believe, is not to create an empire. It involves all the nuisance of of empire without the constructive advantages of a well-managed Imperialism. We have been respecting the sovereignty of Nicaragua and intervening in her affairs for twenty years, and at the end Nicaragua has less sovereignty and more misgovernment than if we had frankly annexed Nicaragua and set out to rule it.

First Bachelor: "Is there anyhting in this affair of yours with the heiress?" Second Same: "Millions, I hope."

Fishing a La Indian

PRETTY PRELIMINARY TO THE FRIDAY REPAST

A blood Indian, with a keen eye, spearing fish from a vantage edge at Waterton Lake, National Park.

Elephant Babyhood

Tembo, the elephant, stood beneath the shade of a straggling palm tree. Beyond the occasional flapping of his absurdly large ears he made no movement, and his grey body, spotted with sunlight and shadow, was so still that he seemed more like a great statue than a living creature. . . . His mother, a mighty beast who bore long curved yellow tusks, and whose one thought was for the safety of her baby . . . watched him day and night with true maternal solicitude. He remembered how, to show her affection, she used to stroke him with her long sensitive trunk; never for a moment was he out of her sight as they roamed about the forest while she fed on the succulent leaves of trees and shrubs.

During the early hours of the days, when cold mists lay on the forest-covered mountain, she would seek some secluded clearing to avoid the constant drip, drip, drip from the mist-soaked trees, and then, as the sun burnt its way through and the welcome heat reached the cold ground, she would stand and enjoy its warmth while the baby stood between her fore-legs under her great body, which shaded him from the sun, while, with tiny trunk thrown well back over his head, he enjoyed his greakfast. When the drip from the trees had stopped, the pair would once more seek the deep shade of the forest and wander slowly and cautiously about, avoiding roadways and paths and skirting any openings where there was risk of being seen by other beings. Even when in the densest forest the thought of safety was more important than anything else, and every few minutes the mighty mother would stop feeding and stand absolutely motionless, with her great ears thrown out to catch the slightest sound. . . . It was during these periods of watching that Tembo learned his first lesson, which was to keep absolutely still while his mother listened. If he moved or made the slightest noise, he would receive a gentle smack from his mother's long trunk. If this did not produce the desired effect, he received another and far more vigorous slap, so he soon learned that under no condition must he move until the signal was given.

Several moons passed before the little fellow saw more than a passing glimpse of other elephants. Occasionally his curiosity would be excited by seeing other dwellers of the great forest—delicately made bushbuck, mighty buffalo and screaming baboons—but he was never allowed to mix with any of these. Then came the day when his mother decided to rejoin her former companions, and he was introduced to the herd who, at the time, were feeding on the shores of a beautiful forest-enclosed lake . . .

There were bathing parties in the lake, or in muddy pools that were hidden in the forest, and he used to stand on the edge, where the water was shallow, and try to imitate his elders as they sucked up the water with their trunks and sprayed their heads and backs. This was great fun and the cold water was most refreshing; but he wondered why they did not choose the heat of the day rather than the evening, as it would then have been so much more refreshing. It was a long time before he dared roll in the soft mud as the others did, but at last he tried it and found it very much to his liking. Sometimes a dry bath was the order of the day, and then the whole herd would visit some sunlit glade or hillside and dust themselves with bright red earth; and he was amused to see that this would change their color, so that instead of being grey they were all read. This made them much more easy to see in the forest, where th red was in such strong contrast to the green foliage.—Maj. A. Radclyffe Dugmore, in "African Jungle Life."

Our morals Are Not Changing

Lord Birkenhead in Nash's Magazine (London): It is, of course, possible—is it probable?—that we are entering an era where the fundamental facts of family relationship will be inverted. Will our homes be like hives, with woman supreme and man relegated to the baser duties of domestic life? These, of course, are wild ravings. Morality is still based in our Western civilization on family life; and in a family, which is a social unit, the scope for change is inconceivably small. Either our family relationships will remain fundamentally as they are to-day, or the paradoxical reverse which I have advocated above must happen. I do not think the second alternative conceivable. There remains equality, as between husband and wife, and this seems to me even more fantastic. Therefore, since I am convinced that the family as we know it will survive as the social unit, I argue that, in the main, our morals have not changed, are not changing, and will not change.

M.P.'s From Distant Lands

Members of the Empire Parliamentary Association, from the self-governing communities within the British Commonwealth, are convening in Canada this year. They should benefit much by touring across the Dominion at this time, when the harvesting is in full swing between the Great Lakes and the Rocky Mountains, and when nature's bountiful yield in other provinces is being garnered. The peregrinating M.P.'s will return with a far more comprehensive knowledge concerning the resources and institutions of Canada after having inspected public works and private industries, conferred with provincial and Dominion ministers, dinners and receptions.

While it was arranged to enable the parliamentary delegates to see as much as possible of one dominion under the British crown, the tour is also the medium for promoting mutual acquaintance and friendship between them. In addition to the Canadian members as hosts on this occasion, there are more than fifty delegates from other British parliamentary institutions. They come from Great Britain, the Irish Free State, India, Australia, South Africa, New Zealand, Newfoundland, Malta and Southern Rhodesia.

In former times, some political leaders had dreams of the assembling of one Imperial parliament in London, with representatives elected from the distant lands of the Empire. The advocates of imperial federation included statesmen of vision, but the present structure of the British Commonwealth has outgrown any such plan of centralized political authority. The cause of co-opertaion within the family of nations its served by periodical conferences of premiers and other ministers, such as the Imperial Conference of 1926. Meetings like the present tour of the Empire Parliamentary Association also serve an excellent purpose. The delegates are representative of th various parliamentary parties. Members of the Swaraj Party of India, the Nationalist Party of South Africa, Liberal, Labor and Conservative members, traveling together across Canada, must find helpful opportunities for discussnig questions and exchanging views on problems in which they are mutually interested. The Empire Parliamentary Association is obviously contributing toward the strengthening of ties within the British Commonwealth.—(Editorial in Christian Science Monitor.

Britain's Air Defence

Spectator (London): We can cozen ourselves no longer with our silver sea; a modern bomber can cross it in ten minutes. Nor is there any real defence against bombing, except more bombing. Consider the area of Greater London alone. It covers 700 square miles—a huge target which may be hit without ever being seen, by means of directional wireless, and a target, moreover, on which every hit is a bull's-eye, for it will effect its purpose of shaking the morale of our people. . . . Hitherto it has been necessary to destroy the armed forces of the enemy State. Nowadays it will be simpler to kill its women and children. That, baldly stated, is the truth about modern war.

Woman in America

Professor Madariaga in Harper's Magazine (New York): (The United States is a land of overgrown boys, where woman reigns supreme.) See the place which woman occupies in her (American) life. The Boys have hoisted her on to a pedestal of admiration. Her power and privileges flow from the position she occupies as an idealized type of humanity. In her youth, the inspirer, in her maturer years, the leader of men. First, the sweetheart of the nation, then her aunt, woman governs America because America is a land of boys who refuse to grow up.

Asquith Writes Candid Opinions

Memoirs Published Recently Reveal His Likes and Dislikes

BITTER TO SOME

Attacks by Lloyd George and Carson Show Him He is Right

New York, N.Y.—In his "memoirs and reflections," which were issued here recently by Little, Brown and Company, the late Earl of Oxford and Asquith, asserts that the "germ of the League of Nations" lay in a speech of his delivered in 1912.

Lord Asquith, who was an outstanding figure in the Liberal party of Great Britain and Prime Minister during the early years of the Great War, shows admiration in his reminiscenses for Rt. Hon. Winston Churchill, the bitterness of his feelings toward Lloyd George, his contemptuous reaction toward the Labor party when it lost power, and his high regard for Lord Birkenhead.

The speech which the Earl of Asquith asserted held the germ of the League of Nations, explained the "idea of public right." It reads in part as follows:

"It means, first and foremost, the clearing of the ground by the definite repudiation of militarism as the governing factor in the relation of states and of the future moulding of the European world. It means next, that room must be found and kept for the independent existence and free development of the smaller nationalities, each with a corporate consciousness of its own. And it means finally the substitution for force of a real European partnership based on the recognition ofequal right, and established and enforced by a common will."

Labor An "Experiment"

The memoirs devote much space to British experiment with Labor party rule and Lord Asquith's part in the election and his later disillusionment. He considered the Labor party regime merely an experiment "because there is for the moment no practicable alternative."

The book reveals the feeling which Lord Asquith entertained toward Lloyd George after the break-up of the first War Government.

The following extracts show the height of his resentment:

"Life is very different just now. We are under a government of reckless gamblers, and we drift on from one folly and wickedness to another."

"I have just been for an hour in the House listening to LL. G.—a very characteristic performance, teeming with fustian and cheered to the echo by his servile satellites. What a place it is."

"Now that Lloyd George calls me a lunatic and Carson calls me a traitor, I begin to feel sure that I must be on the right lines."

Different was Asquith's feeling toward Winston Churchill, although the latter stayed with the government with brief interludes and changes of portfolios.

Fond of Winston

"It is a pity that Winston has not a better sense of participation," he wrote. "I am really fond of him, but I regard his future with many misgivings. I do not think he will ever get to the top in English politics, with all his wonderful gifts."

The attitude of the politician towards the soldier is perhaps well presented in the following paragraph regarding French, which is inspired by the shell controversy and the ensuing newspaper campaign which led to Asquith's resignation:

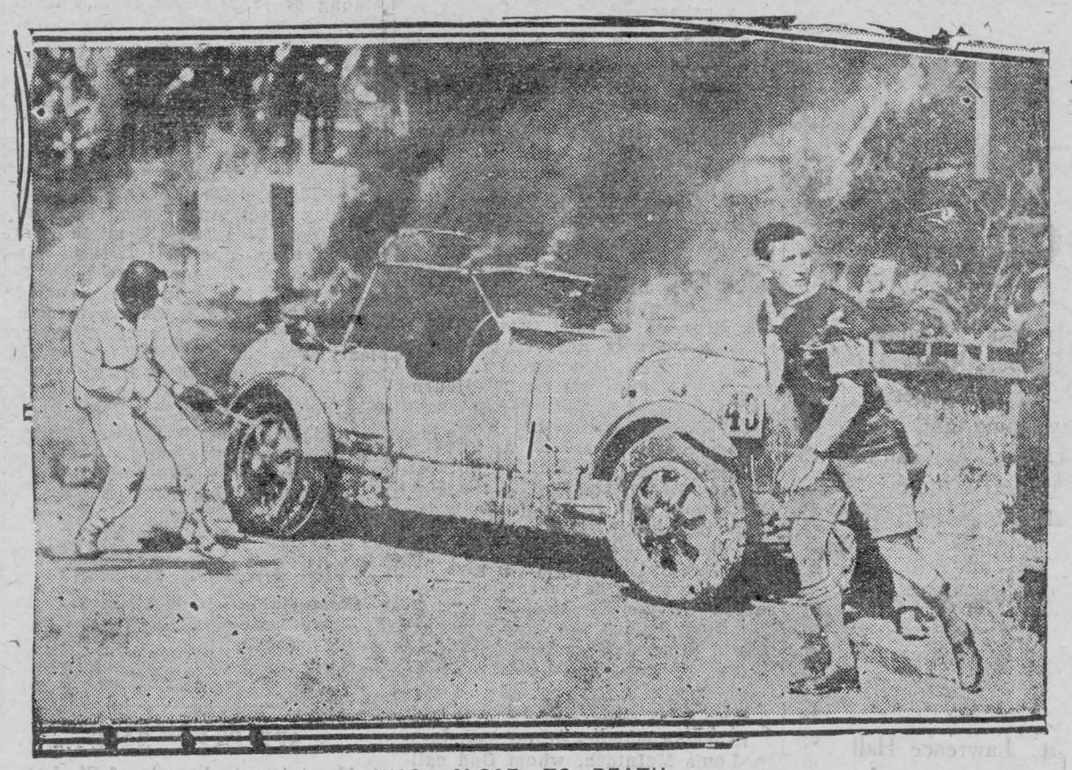

"I confess that I never knew until I read Lord French's statement that it was to him we owed the Coalition Government. Lord French's suggestion that his action in the matter had something to do with his subsequent removal from the command is hardly worthy of serious notice. He remained in full command for more than six months, and, though I heard strange rumors, I never took the pains to inquire what part he had played, or whether he had played any part, in the newspaper campaign he claims to have inspired."

Recounting the story of Churchill's irruption into Antwerp, Lord Asquith writes: "I was away, but Grey, Kitchener and Winston held a late meeting and I fancy with Grey's rather reluctant consent, the intrepid Winston set off at midnight and ought to have reached Antwerp about 9 this morning. He will go straight away and see the Belgian ministers. I have had a talk with K. this morning and we are both rather anxiously awaiting Winston's report. I do not know how fluent he is in French, but if he was able to do himself justice in a foreign tongue, the Belges will have listened to a discourse the like of which they have never heard before. I cannot but think that he will stiffen them up."

"Here, young man, you shouldn't hit that boy when he's down." "Gwan! What d'yer think I got 'im down fer?"

Exacting Publicity Agent (examining artist's drawing of crowded liner) —"Uh! Not bad—but you've got a passenger on the second deck who isn't smiling."

Close Call for Empire's Speed King

WAS CLOSE TO DEATH

When Capt. Malcolm Campbell was driving in the Tourist trophy race at Belfast his machine caught fire. He got out before being badly burned. Flames wrecked the car.

London's "Doom" From the Air

Necessity of Superior British Air Force Pointed Out by Experts

London was "wiped out"—theoretically—in a recent attack by the Royal Air Force, which staged a four-day mimic invasion and defense test, and the question of what is to be learned from such a demonstration of the helplessness of great cities in the "next war" raises keen discussion here as well as overseas. "High explosives and gas bombs will be used freely in the next conflict," says Brigadier-General Groves, secretary of the British Air League, and "it will be the aim of each side to terrorize the civilian population of the other." The London Times and other papers call for a bigger, better, and faster air force that will make an enemy slow to attack because of the danger to nerve centres of its own homeland. Liberal and Labor organs, however, discount the maneuvres as propaganda. Lloyd George takes occasion to declare that "of all the armaments that should be cut down, armament of the air is the most urgent."

British Army experts agree that the capital of the Empire is absolutely at the mercy of an air attack launched from the Continent, because in this sham battle in the air at least half the "enemy" bombers were effective. They made fifty-seven daylight raids, in nin of which they completely evaded the defense; they theoretically laid vital points in ruins, and they made all other sections uninhabitable by means of gases. Theoretically, 300 tons of bombs loaded with gas and high explosives were dropped in these maneuvres, equal, it is said, to all that the Germans dropped on England during the World War, and it is calculated that an attack from the coast would be so swift that destruction could be accomplished before defending airplane squadrons could get out of airdromes into fighting altitudes.

Considerable comment in American papers is condensed in the Baltimore Evening Sun's editorial, which says:

"John Smith, taxpayer, long ago learned that whenever military men stage a sham battle to test the defenses of a city, whether the attack be by land, by water, or by air, the defenses are going to prove inadequate. It is by convincing him that he is left practically naked to his enemies that John Smith can most easily be scared into supporting huge military expenditures.

"So we here and now make a general prophecy: The next time London is the objective of a sham battle, its defenses will prove inadequate again."

Nevertheless it is quite generally assumd by our editorial writers that, as the Washington Post declares, the results of the sham bombardment of London were ominous and "vindicated the conethtion of experts that that city—and presumably any other—will in future be utterly defenseless against this mode of warfare." The progress in aviation leads naturally to the conclusion that London is not the only "peculiarly vulnerable" city, according to the South Bend Tribune:

"Citizens of the United States have seen their traditional natural safeguards, the Atlantic and the Pacific oceans, spanned by planes. The cruising power of airplanes is increasing rapidly, and the theory held only a few years ago that planes would be important unless they had warships accompanying them to serve as fuel and supply stations is less forcible.

"The lessons to be learned from the British Royal Air maneuvers are valuable to all governments. The balance of power may rest within a generation with the nations that take a rational view of aviation."

The Chicago Tribune, which admits that the airplane and airplane bomb have been considerably improved since the armistice, sees no reason to believe that these offensive wapons will not b successfully countered by improved defensive methods. In the World War bombing never "proved a serious menace to the Allied cause or, for that matter, to the German, although all the important railroad centres in western Germany were subjected to repeated attacks from the air." Furthr, we read:

"One reason for the failure to cause permanent damage is the inability of the airplane, moving at high speed, to hit a mark; as most bombing is done at night t,he difficulty of striking the target is considerably augmented. A more fundamental reason for failure over cities lies in the nature of the target itself. A great city is a collection of a vast number of buildings. A bomb which penetrates the roof of one will eplode within four firmly built walls. It may do much damage in the building it strikes, but the damage will be strictly limited to that small area. Cities built of wood might be considerably more vulnerable from the air than the masonry cities of western Europe, but modern American buildings of steel and reinforced concrete are far better able to resist bombing than the older masonry types.

"The possibilities of destroying a civilion population in a rain of gas are easily exaggerated. The amount of gas required to maintain a lethal concentration in an area as vast as that of a modern city is so far greater than can be carried by a fleet of airplanes that the possibility of disposing of a civilian population by these means can be considered fanciful. The wors that gas bombs can accomplish is to render a limited area temporarily uninhabitable, and there is no doubt that this menace can be met by the organization of chemical units resembling fire-fighting companies, equipped with neutralizing apparatus."

Aviation in Australia

Sydney Bulletin: It is a curious paradox that in Britain, where the railways are privately owned, their most formidable competitors, the aeroplane and the motor-car, have been discouraged by the Government from entering into competition with them; whereas Australia, which has a national liability for all its railroads, and is sorry for it, leads the whole Empire in the matter of developing commercial aviation.

Moving of Grain in Full Swing

Wheat Crop Estimated as Largest in Canada's History

Winnipeg—The rush to move what is estimated as the largest wheat crop in the history of the Canadian west is on in earnest, with 2,325,759 bushels of grain marketed Tuesday at various points. The rush is earlier than ever before, railway officials said.

With threshing reported general all over the west, cutting virtually completed in Manitoba, and more rolling stock and general equipment massed at strategic points on the Prairies than ever before, indications are that the whole operations of taking off the crop and marketing it will be completed in record time.

Cutting is reported to be 75 per cent, completed in Saskatchewan and fifty per cent. in Alberta.

Interior elevators are swept clean and ready for the pouring in of the new grain. Stocks in the Lake head terminals have been reduced to 4,531,- bushels.

Reports of wheat yields are favorable on the whole and at most points the grading is high.

Winnipeg—Good harvesting weather is reported from the three Prairie Provinces and threshing is on in full swing, according to the weekly crop report issued by the Canadian Bank of Commerce. Frosts affected the crops slightly in Saskatchewan and Alberta, but on the whole excellent yields are expected. The report follows:

Manitoba—Harvesting is well advanced throughout the province. Cutting is about 90 to 95 per cent. completed and threshing operations are general. The weather is ideal. The wheat crop promises to be a satisfactory one although in some small areas which suffered from excessive moisture in July, the yields are a little below expectations. Coarse grains are turning out well with the possible exception of barley in isolated districts where the yields are somewhat below average. Harvest help is plentiful.

Saskatchewan — Good harvesting conditions have prevailed throughout the week. Cutting of wheat has proceeded without interruption and it is expected that the bulk of it will be done within the next few days. The nights have been cold and further frosts have occurred at many points. Estimates of the amount of frost damage, however, vary widely. It would seem to be undoubted that the late wheat and coarse grains generally have been quite seriously affected. It is estimated that about 15 per cent. of the crop has suffered. Very few points estimate that oats will produce better than a feed crop. Little threshing has been done so far, but operations are expected to begin within a few days. Labor appears to be sufficient at all points.

Alberta — Weather excellent for harvesting and probably 40 per cent. has been cut. Moderate frosts reported at scattered points and later crops may suffer by lowered grades and lessened yields. With continued good weather cutting will be completed and threshing general in ten days.

Man Says He Was Rescued by Bruin

Algoma Traper Relates Queer Experience in Wilderness

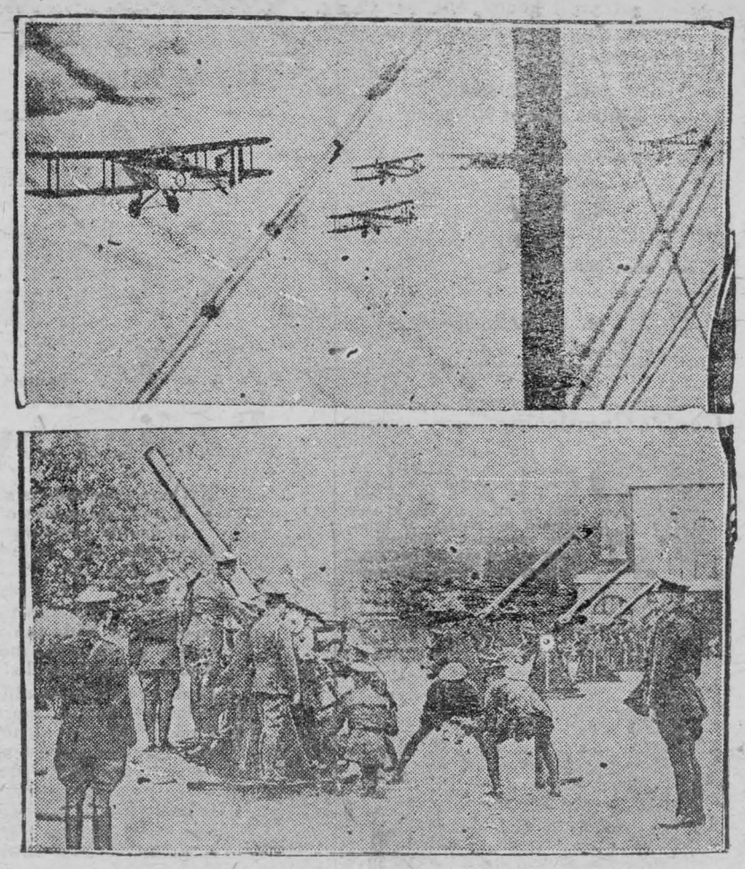

Sault Ste. Marie, nt.—A graphic tale of how an Algoma bear saved his life from the hollow interior of a huge pine stump is related by Skeffington E. Thomson, Algoma trapper, woodsman and prospector, who has just returned to the Soo from his camp in the Goulais Bay wilderness, avowing eternal friendship to the entire bruin family.

"Miles from camp," said Thomson, "I was trapped by a pack of timber wolves and sought refuge at the top of an old weather-beaten pine stump 15 feet high and about three feet through, with a hollow interior. Darkness was coming on, and I was dead tired and soon fell asleep.

"Morning came and I heard a scratching on the outside of the stump. The hole at the top darkened and some living thing—I soon discovered it was a bear—was backing down the hole. I whipped out my knife, and when old bruin came within striking distance I jabbed him in the flank, and grabbed hold of his fur.

"With a cry of pain the bear shot upwards. In a twinkling I was drawn to safety."

All Ready to Protect London

ANTI-AIRCRAFT GUNS REPELLING THE RAIDERS

How an air raid is conducted and how anti-aircraft guns come to the rescuse was demonstrated by a great mimic war at London.

Praises Radium As Cancer Cure

Times Editorial Refers to Increasing Efficacy of Treatment

Modern Methods Much More Hopeful Than Former Experiments

London—An editorial in the Times captioned "Radium and Cancer," refers to recent statements on the increasing efficacy of radium treatment and continues: "Radium if properly used can be counted upon, according to well-informed opinion, to kill the cancer cells. It is not a new discovery for as long as 1913 the efficacy of radium was disussed but the treatment achieved in those early days days was much less than hopeful, which in consequence discounted it to some extent.

"New claims now being made are based on modern methods of using radium and of bringing radium into contact with the cancer cells. What is called 'Surgery of Access" is as important as proper preparation of the needles of which the object, briefly, is to surround the cancer with points of radium so that every part will receive a lethal dose, an operation demanding a very high degree of skill on the part of the surgeon who must know where to place the tiny batteries so that the cross-fire from them will be most effective.

"He must know how to reach the areas where batteries are to be placed and also the power of the needles and the period for which they ought to be employed.

"Unhappily, this knowledge is not the only requisite for, without radium, nothing can be accomplished and the medium is lacking in sufficient quantities to meet existing needs while the study of cancer is hindered by the same want. Radium, it happens is nearly everlasting so that a donation of radium is a gift of which only the interest can be spent while the capital remains intact for many centuries and will go on saving lives year after year and ventury after century."

Alfred—"In New York a man is run over by a motor car every 20 minutes." Albert—"Poor fellow!"

Long Distance Swims Should be Prohibited

Twelve Miles Suggested as Limited for Future Races

Members of the Ontario Government strongly disapprove swimmnig "marathons" of the dimensions attempted here on Wednesday, on the ground that beyond a certain distance the contest can no longer be classed as sport, but an endurance test which imperils the health and even the lives of those participating. Premier Ferguson is inclined to consider that 12 miles, involving about five hours in the water, is the maximum which ought to be attempted, and Hon. Forbes Godfrey declares "they have got to shorten these races."

There is great danger of swimmers being injured for life, it is pointed out by the Minister of Health.

"No swim marathon should be longer than 10 miles, for men and six for women," he said. "Fifteen miles is far too much of an endurance test, too exhaustive, and proves nothing. I do not want the youth of the province to take such sport as an example of the proper kind of athletics to improve their physical condition. I have known more than one great swimmer of other years whose heart has 'blown out' at 50 years of age."

Brass and copper products produced in Canada in 1927 were valued at $24,- 54,657. This is the highest value ever recorded for the Canadian industry.

To handle Western Canada's crop this year the Canadian railways have despatched to key points on the prairies 80,000 box cars and 1,913 locomotives.

Engineer Tells of Arctic Conditions

Major Burwash Sends Message to Ottawa From Far North

Native Population and Wild Animal Life to be Studied

Ottawa—Valuable information concerning the native population of Canada's Arctic coast between the mouth of the Mackenzie River and Hudson Bay and wild life conditions was obtained by Major L. T. Burwash, exploratory engineer of the North West Territories and Yukon branch of the Department of the Interior during his trip by auxiliary schooner to the region around Boothia Peninsula. Word of the successful completion of the 1,000-mile voyage was contained in a wireless dispatch received at Ottawa from the Hudson's Bay Company's steamer, Baymaud, while calling at Cambridge Bay, Victoria Island.

Major Burwash left Ottawa in June for Edmonton en route to Aklavik in the Mackenzie River delta. At that point he took over the Department's motor schooner, Ptarmigan, a 40-foot craft which had been brought down to that point from Great Slave Lake. About August 1, he began his trip eastward along the coast, inspecting native settlements and visiting trading posts and Royal Canadian Mounted Police detachments.

On August 31, he arrived at the trading post and police detachment of Cambridge Bay on the southeast coast of Victoria Island. Replenishing his supplies at this point, he continued the next day up through Victoria Strait to the west coast of Boothia Peninsula where he will establish his winter camp in the vicinity of the magnetic pole. This winter he will travel south by dog team, making investigations around King William Island and a survey of the proposed tractor route from Cockburn Bay to Wager Bay.

In May, Major Burwash expects to proceed northward on board the Ptarmigan through Franklin Strait and Peel Sound and then eastward up Lancaster Sound to the post at Dundas Harbor, Devon Island. Major Burwash hopes to complete his work and return to Ottawa in the fall of 1929.

Sir Austin In Bermuda

Will Later Go to Havana and Will Make a Brief Stay There

Havana, Cuba.—Sir Austen Chamberlain, Great Britain's secretary of foreign relations, whose impaired health caused him to embark on an ocean voyage, is scheduled to arrive at Hamilton, Bermuda, on Sept. 12, and here Sept. 16, aboard the Ormoca, according to an official cable received at the British consulate here.

It is expected that Sir Austen, Lady Chamberlain and two children will make a stay in Havana for only the duration of the ship's stay, going to Panama and thence to San Francisco aboard the steamer President Adams. Visits at California and another at Vancouver are planned prior to embarking at Montreal for the return to London, it was made known at the British consulate.

Premier Ferguson Commends French

Writes Letter of Appreciation of Course for Ontario Teachers

THANKS TO QUEBEC

Quebec—Premier Ferguson of Ontario, greatly appreciates the French courses for Ontario teachers conducted in the Province of Quebec each Summer, and is particularly interested in the medals presented to the teachers this year, so much so that he has written the following letter to Premier Taschereau, voicing his appreciation.

"On my return there was shown to me the medals which the authorities of your province so generously presented to the Ontario teachers who took the Summer course in French at Quebec this year.

"It is needless to assure you how much my department and myself appreciate this token of appreciation and encouragement. Will you kindly convey to His Honor the Lietutenant-Governor, my thanks for the medal bestowed in his name; to your Minister of Education, Hon. Mr. David; to the superintendent, Dr. Delage and all the officials of the Department of Public nIstruction, and other persons for the courtesies and attention shown to those who attended this valuable course of instruction. Let me thank you personally, as head of the Government, for your friendliness in this, as in all other good causes, of common concern."

The Prime Minister of Quebec is also in receipt of a copy of a letter of thanks sent by the Ontario teachers to Premier Ferguson in connection with the course. This letter, sent from the Jesus-Marie convent at Sillery last month, and signed by eight of the teachers, reads:

Thanks and Appreciation

"At the close of the second Summer cshool in French held in Quebec, we, the Ontario teachers in attendance, wish to express to you our thanks and appreciation.

"To us and our pupils, French is no longer merely a subject in a text book, but a living language of the Dominion of Canada Those of us who attended last year can speak with assurance of the actual classroom value of this course.

"At Sillery, one of the finest colleges in the province, we are living in a charming an dthoroughly French atmosphere. In the dining-room, in the dormitories and in the garden, as well as the classroom, capable French teachers from the city of Quebec, are always ready to assist us in acquiring the French language in its purity and perfection.

"It is our sincere hope this course, which you have instituted and put in the competent hands of Mr. Jeanneret of the University of Toronto, will continue and become more widely known among the teachers of French in the Province of Ontario."

Samoan Home Rulers Decide on Boycott

Also Demand Substitution of Native Missionaries for White

Wellington, N.Z.—According to a despatch from Samoa, the Samoan native home rule league at a recent meeting decided to ignore the report of th League of Nations mandate commission and reinstitute a boycott on shops. There would be no picketing, however, it was decided.

The meeting also demanded that the London Missionary Society withdraw all white missionaries and substitute natives, failing which the league would establish a "Pan-Samoan" church.

The league, or "Mau," as it is termed, has been extremely active for the past week and several disturbances have occurred.

Agitation by natives of Samoa, largely sponsored by the native home rule league, was considered by the League's mandates commission last June, and the commission decided that most of the blame should be attached to C. F. Nelson, known as the "uncrowned King of Samoa," for the activities among the natives. The commission also suggested that greater firmness in future was necessary on the part of the mandatory administration under the New Zealand Government.

The "Mau" has made general complaint against the administration of native affairs, and whites in the islands complained of the prohobition of liquor and of extravagance in administration.

Bumper Potato Crop

Charlottetown, P.E.I.—A bumper potato crop throughout Prince Edward Island and the other Maritime Provinces of Canada seems assured. Potatoes are one of the chief farm products of this part of the country. They are of excellent quality and are marketed as far south as Cuba

The potato crop of Prince Edward island has in recent years been averaging about 4,000,000 cwt., Nova Scotia averages over 3,000,000 cwt. and New Brunswick over 6,000,000 cwt.

"A SMALL

LEAK

will sink a great ship." The same is true with a diseased condition in the human body. It may be scarcely noticeable at first, but in time develops into something serious.

The cause of most diseases is due to pressure on nerves where they leave the spine. This pressure prevents the nerves from carrying the normal amount of life force to the organs they supply, and disease is the result.

CHIROPRACTIC ADJUSTMENTS

release this pressure and health follows.

Telephoning on the Wing!

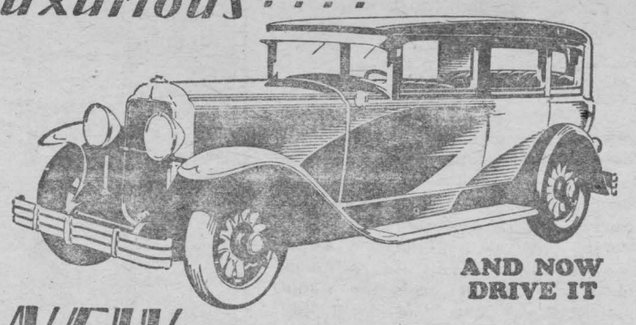

"I am told," says Major-General J. H. MacBrien, President of the Aviation League of Canada, "that Bell Telephone scientists are directing their attention to improving communication with airways and to aeroplanes in flight. Developments along such lines will be of great value in the extension of commercial aviation.

"The effort suggests to my mind the immense strides which wire and radio communication have made and how greatly modern civilization is indebted, not only to the telephone scientists and engineers who evolve the apparatus, but to the great army of telephone operatives, male and female, who make it function throughout our waking and sleeping hours for the benefit of their fellow men."

In the picture is shown the aeroplane now being used by Bell Telephone scientists in their experiments.

Longer . . . Larger . . . More Luxurious . . .

AND NOW DRIVE IT

NEW masterpiece Bodies by Fisher . . .

IN one tremendous stride, McLaughlin-Buick has overleaped old modes of car design and attained an order of beauty without parallel in the automotive world. To know the new style—to appreciate its superiority—simply see the 1929 McLaughlin-Buick with new Masterpiece Bodies by Fisher.

The world's foremost builder of automobile bodies has co-operated with the world's foremost builder of fine cars to produce the most beautiful creations ever shown. And with what results!

Dashing new lines, different from any heretofore known—longer, larger, more luxurious bodies, matchless in their grace and symmetry—gorgeous new color harmonies—the richest of upholsteries and appointments—wider rear seats providing plenty of room for three adult passengers—an ensemble of beauty and luxury that has never been equalled.

New and deeper radiator lines—new chrome-plated head-lamps and cowl-lamps—new wheel and fender design—all combine to lend incomparable poise, fleetness and distinction.

The new McLaughlin-Buick Bodies by Fisher mark the supreme achievement of the body-builders' art. To see the 1929 McLaughlin-Buick is to see the most beautiful and fashionable car of the year, as well as the most capable and comfortable.

Visit the nearest McLaughlin-Buick showroom. See the 1929 McLaughlin-Buick today! M-18-8-28G

OUR CORRESPONDENTS

WILLIAMSBURG

On Sunday evening Sept. 23 the Young Peoples' League will have full charge of the service held in that church at 7.30 The offering will go to the Missionary Department of the League. All are cordially invited to attend.

The Women's Institute met for its September meeting at the home of Mrs. M. O. Trickey's with over twenty members and several visitors present. The roll call was answered by giving a dish cloth or potholder for the bazaar which will be held later. They decided about their booth for the school fair and hope their friends of the community will again bring their donations of cakes, pies, candy, pop corn, Etc. Tea and coffee will be served, also lemonade. Mrs. Ross Beckstead gave a splendid reading on bazaars and how to conduct them. A short play was then given by the Misses Elva Marcellus, Marion Locke, Betty Colles and Ileen Trickey which was very much appreciated by the members who will look forward to having more of their plays at later meetings. Refreshments were then served and a vote of thanks extended to Mrs. Trickey for the use of her home. The next meeting will be at Mrs. Ross Beckstead's—the roll call, an apron for the bazaar.

We are pleased to report Mr. Mahlon Strader son of Mr. and Mrs. Wilbert Strader has finished his education at the Morrisburg Collegiate and left for Ottawa on Monday of this week where he will attend the Normal School.

A reception was tendered Mr. and Mrs. Waldon O'Shaughnessy in Froat's Hall on Thursday evening last. A large crowd attended and every one reported a pleasant evening.

Mr. and Mrs. Grant Casselman and children were guests of Mr. and Mrs. Ward Casselman last Sunday.

Mrs. Malcolm Beckstead spent last week visiting her daughter Mrs. Cephas Smyth.

Messrs. George Reddick of Mille Roches and John Gosman of Antwerp, N.Y. spent a few days this week at the home of Mrs. J. D. Beckstead and other relatives in this community.

A very kindly sympathy is extended to Mrs. Ezra Casselman in the death of her sister Mrs. Howard Casselman of Morrisburg.

Mrs. Mary Shannette spent last week in Ottawa visiting her daughter Mrs. Will Anderson.

Mrs. George Merkley of Chesterville is spending this week with her daughter, Mrs. George Strader.

Miss Ethel Whitteker was the guest of Miss Alice Eastwood last Sunday.

Mr. and Mrs. Jason Whitteker have returned home after spending some time in Toronto, Port Colborne and Buffalo.

Mr. and Mrs. J. C. Payne of Prinston were guests of Mr. and Mrs. R. B. Strader last Sunday.

Mr. and Mrs. Donald Barkley were guests of Mr. and Mrs. Ora McIntosh last Saturday.

Miss Meda Whitteker after spending a few days at her home here was again called to Mille Roches the latter part of last week.

Mr. Levi Casselman of Iroquois and Mrs. J. D. Deeks of Brockville were guests at the home of Mr. John F. Cosselman.

Mr. and Mrs. Will Anderson and baby of Ottawa were week end guests at the home of Mrs. Mary Shannette.

Mr. and Mrs. Lyell O'Shaughnessy were visitors at the home of Mr. Luther C. Barkley last Sunday.

STRADER HILL

Mr and Mrs. Wm. Houlehan, Mrs. Jack Mallen and children Stella and Herbert, spent the week-end with Mr and Mrs. Henry Hanson.

Mr. and Mrs. Bruce Strader and daughter Mary, Mr. and Mrs. Guy Strader and baby Donald spent Wednesday with Mr. and Mrs. Jas. Cook

Mr. and Mrs. Bernice Strader and baby Jean were guests of Mr. and Mrs. John F. Casselman on Wednesday of this week.

Mr. Jake Bouck spent Sunday afternoon at Mr. Harvey Cook's.

Mr. John F. Casselman has disposed of his fine herd of Holstein cattle.

Mr. Edwin Johnston made a business trip to Ottawa on Saturday.

Misses Luvia and Ida Merkley of Williamsburg, were guests of their aunt, Mrs. Ross Hanson on Tuesday.

Mr. and Mrs. John F. Casselman and family spent Sunday afternoon with Mr. and Mrs Orlando Cook.

Mr. Cecil Hanson has taken his departure for Toronto.

Mr. and Mrs. Henry Hanson spent Sunday afternoon with Mr. and Mrs. Ross Hanson.

Mr. and Mrs. Bruce Strader and family spent Sunday with Mr. and Mrs. J. C. Payne at Brinston.

CEDAR GROVE

Mrs Melissa Hollister, Ottawa, spent a few days here last week with her mother, Mrs. John Dafoe and other friends.

Mr. Cory Poapst of Newington spent the week-end with Mr and Mrs. Fred Dafoe.

Mr and Mrs Milton Crites and Master Elburn spent the 16th with Mr. and Mrs. Ernest Shaver, 2nd Con.

Visitors at Mr. Jack Dunbar's on Friday were Mr and Mrs. Cory Eligh of North Valley and Mr. and Mrs. John Dunbar, Grantley.

Mrs R F. Gallinger, Gallingertown spent Friday with her sister, Mrs F. McConnell.

Mrs. Fred McIntosh of Archer visited her sister, Mrs. Milton Crites, Friday.

Mr. Jas. Vance of Ottawa and Mr and Mrs. Archie McColl and baby of Montreal, were week-end guests of Mr. and Mrs. W. A. Wereley.

Messrs Simeon Empey and Howard Ward of Ottawa, spent a few days with friends in the Grove, last week.

Mrs. Alice McDonald and Miss Dorothy, of Moulinette, were guests of Mr. and Mrs. C. F. Dafoe the 16th.

Mrs. Geo. S. Dafoe spent Tuesday in Cornwall.

Mrs. Jack McConnell and daughter Marion spent Thursday with Mrs Frank McConnell.

Mr. and Mrs. Cecil Goye and children visited Mr. and Mrs. Campbell, 7th Ave., on Thursday.

R. M. D. WILLIAMSBURG

Mr. and Mrs. F. Merkley and daughters Joyce and Noma and Mrs. Ella Merkley were visiting Mr. and Mrs. Gordon Render of Iroquois.

Recent guests at the home of Miss Ella Beckstead, Mr. and Mrs. Alf Hall Mr. and Mrs. Wilburn Hall, Mr. J. Devaul, Mr. and Mrs. Jas. Casselman.

Mrs. Wm. L. Casselman and little son Billy and daughter Gertrude were visiting Mr. H. B. Henderson on Friday last.

Mrs. Katie Hall and Mrs. Joe Adams visited Mr. and Mrs. Archie Casselman on Sunday last.

Mr. and Mrs. Harold Whitteker visited Mr. and Mrs. Jas. Hanson on Sunday.

Mr and Mrs. Wm. L. Casselman and family were recent guests at Mrs. Annie Bowen's.

Recent guests at the home of Mr. C. F. Whitteker, Mr. and Mrs. C. McIntosh and family, Mr. and Mrs. Wm. Whitteker and son Howard, Mr. and Mrs. Clifford Casselman and little daughter, Mr. and Mrs. Lyle Casselman and family, Mr. and Mrs. H. B. Henderson and Miss Alma.

Mr. and Mrs. Archie Casselman and little daughter Adah spent Sunday with Mr. and Mrs. Lawrence Cartner.

Mr. and Mrs. Thos. H. Casselman spent Sunday at Mr. and Mrs. George Hess'.

Mr. and Mrs. Mahlon Casselman and family visited Mr. and Mrs. C. Casselman.

Mr and Mrs. Jas. Forsyth and daughter Helen of Finch visited Mr and Mrs. Wm. L. Casselman on Sunday.

Mr. and Mrs. Wilburn Johnson and family were recent guests at Mr and Mrs. Chas. F. Whitteker's.

Mr. and Mrs A. Casselman and daughter spent Sunday with Mr. and Mrs. Ed. Hamilton, Hainesville.

Mr and Mrs. Darcy Patrick and son Bernard visited Mr. and Mrs. T Patrick on Sunday.

Mr. and Mrs. Thos. Casselman and Mr. and Mrs. Wm. Casselman and family spent Sunday at Irena.

PAYNE VALLEY

Mr. and Mrs. Dan Campbell and family, accompanied by Mr. and Mrs. Leonard McMillan, Avonmore, spent Sunday with friends at Vankleek Hill

Mr. and Mrs. Geo. Eligh and Miss Clara Garlough, accompanied by Mrs. Guy Empey, Finch, motored to Dunbar and Chesterville on Saturday.

Mr. and Mrs. Hugh Ferguson of Avonmore, visited at Mr. Dan Campbell's last week.

Mr. and Mrs. Geo. Eligh and Miss Clara Garlough spent Sunday in Cornwall.

Mr. and Mrs Will Meldrum and son Russell spent Wednesday with friends at Northfield.

Mr Donald McIntosh of Finch and friends, Mr. Carter of Detroit and Mr. Wert of Ottawa, called at Geo. Eligh's Thursday.

Miss McKenzie of Montreal spent the week-end with her brother, Mr. John McKenzie.

Mr. and Mrs. Kenneth Cameron and son Harold and daughter Esther motored to Winchester and Morrisburg on Sunday.

Mrs. Kenneth Cameron spent Monday with Mrs. Geo. Eligh.

MAPLE VIEW

Mrs. H. Harriman and baby of Massena, who have been visiting relatives here, have returned home, accompanied by Miss Olive Harriman, who intends visiting relatives there for a few days.

Miss Ethel McMillan and Miss Gladys Armstrong spent Tuesday in Mountain.

Miss Olive Herriman and Mrs. H. Harriman and Miss Ella spent Sunday with Mr. Hilas Harriman, Boucks Hill.

Mr. and Mrs. Adam Couglar and Mrs. Elizabeth Bouck of Boucks Hill spent Sunday with Mr. and Mrs. S. Harriman.

Mr and Mrs. B A Barclay and sons spent the week-end with relatives in U. S. A.

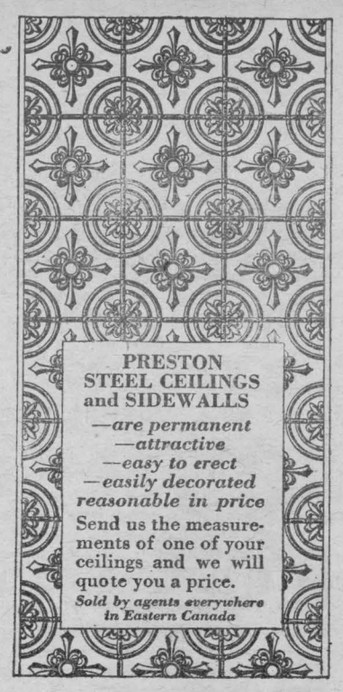

Mrs Walter Garlough and children Ethel and Billie spent the past week with her parents, Mariatown.

Mr. Will Sullivan called at Mr. Elgin Harriman's Saturday.

Mr. Leslie Wilson left for Montreal Tuesday morning.

WOOD'S PHOSPHODINE,
The Great English Preparation. Tones and invigorates the whole nervous system, makes new Blood in old Veins. Used for *Nervous Debility, Mental and Brain Worry, Despondency, Loss of Energy, Palpitation of the Heart, Failing Memory.* Price $2 per box, 3 for $5 ; Sold by all druggists, or mailed in plain pkg. on receipt of price . *New pamphlet mailed free.* THE WOOD MEDICINE CO., TORONTO, ONT.

PRESTON STEEL CEILINGS and SIDEWALLS
—are permanent
—attractive
—easy to erect
—easily decorated
reasonable in price
Send us the measurements of one of your ceilings and we will quote you a price.
Sold by agents everywhere in Eastern Canada

RE-ROOF THIS FALL *with* ECONOMY RIB ROLL GALVANIZED ROOFING—
Leave the old roof on. Nail the Economy Rib Roll Sheets right over the old wood shingles or felt.
Low in initial cost—comes in big sheets—easy and quick to lay—permanent—leak-proof—handsome in appearance. Prevents fires—increases value of property.
Made of the famous *"Council Standard"* and *"Superior"* Galvanized sheets. Write for a sample.

SPECTACULAR SUCCESS
Rewarding New Refinements in a "Successful Six"

ALWAYS a great car . . always an outstanding value . . always a "Successful Six" . . Pontiac Six now earns its right to even more spectacular success.

Sweeping new refinements in the sturdy Pontiac Six-cylinder engine . . for example, New Marvel carburetor, improved manifolding . . add new and greater smoothness to Pontiac performance.

New, smarter, smaller wheels, with larger tires, further enhance the sparkling beauty of Pontiac's "Body by Fisher".

You can drive Pontiac Six as far and as fast as you wish with perfect peace of mind and security. All of Pontiac's famous stamina is there . . and all the quality features which won Pontiac its amazing success in the past . . the famous G-M-R Cylinder-head; the foot-controlled headlights; the Lovejoy Hydraulic Shock-Absorbers, etc.

Spectacular success could not help but reward this most recent evidence of Pontiac's progressive policy.

Come in and learn why Pontiac is winning increased popularity throughout Canada. P-15-9-28C

DAN BARRY'S DAUGHTER

by MAX BRAND

BEGIN HERE TODAY

Finding the lifeless bodies of his two partners at their gold-mining camp, Harry Gloster flees southward, knowing that he will be accused of the crime. On the way Gloster saves the life of a stranger, Lee Haines, from the murderous hands of a scoundrel by the name of Joe Macarthur.

Gloster is jailed after getting into a fight with several men over a girl. Lee Haines and Joan Barry, daughter of a famous rider of the old plains, assist Gloster to escape. Haines, fatally wounded by a bullet, tells Joan the story of her father's hectic career. The sheriff plans to kill the "Captain" the huge untamable stallion ridden by Haines. Joan frees the horse from his stall and he dashes away into the darkness.

NOW GO ON WITH THE STORY

The Captain, after catapulting past, swept thound in a short circle, sent after the flying Peter a triumphant neigh, and then brought up before Joan.

Joan, looking up at the giant animal, laughed joyously. It was more beautiful than a dream to her. He had followed her through the night as a dog might have followed, and now he let her take him by the mane and lead him after the panicky Peter. For yonder stood peter on a swale of sand, neighing his dread which drew him one way and his love of his mistress which urged him in the opposite direction. So she halted Captain, then ran on to Peter.

When she had the reins of the gelding again, looking back with speechless anxiety, she saw that the Captain had not left the spot where she had stationed him. He was watching her with a high head, and Joan knew now that she could never abandon him.

With fingers trembling with her haste, she tore the saddle from Peter and then his bridle. Then, with a wave of her hand, she sent him on his way.

Dragging the trappings with her, she went back to the Captain. Under his head she dropped them in a pile and let him investigate. He was not at all pleased, it was plain to see.

First he sniffed at the saddle and bridle, rank with the sweat of Peter. He even pawed at them disdainfully, tumbling them over and over in the sand. Then he went to Joan and, swinging around behind her, he looked down over her shoulder at the gear she had brought.

What would happen when she attempted to put the saddle on his back? She was agreeably surprised. He did not stir when she lifted it high to swing it up to his withers.

And, although he swung his head around to watch the proceedings, he did not object when she drew up the cinches. They had to be lengthened, of course, for having been set for the deerlike body of Peter, they could not encompass the ample girth of the Captain.

It was done, at last, and the head strap of the bridle having been lengthened, it was fitted to the head of the stallion. And so, finally, her foot was in the stirrup and she drew herself up to her place.

It was the crucial test. But the Captain made not the slightest trouble about it. He only twisted his head around until he had sniffed at her foot in the stirrup. Then, as she loosed the reins, he straightened away at a flying gallop.

She made no attempt to guide him. But when they came to a stretch where the rooting was firm, she sent him away at full speed with a cry. And the speed increased steadily to such a point that she began to gasp for breath and then drew back on the reins.

Instantly he returned to his former pace, rocking along as before without effort, and with no wheezing or laboring for breath in spite of all his work. She swung him about and headed him for the ranch.

There was an instant change in the manner of the stallion. He fell at once to a jerky, high headed trot, and when she strove to urge him ahead faster, he shook his head in a very human denial and cut down his gait still further. Presently he was walking. She struck him with the flat of her hand on the flank, buf at that he came to a halt, and twisting halfway raound, he turned him head toward those western mountains which were his goal.

So, with her heart hammering in her throat, she began to consider what she could do. She must leave him where he was if she hoped to get back to the ranch before the morning, and if she did not arrive there, poor Buck Daniels would go half mad with anxiety.

A tinkling dissonance began to fall toward her from the sky. She raised her head and looked up. There was nothing to be seen, but now the crying grew stronger and stronger as some unseen wedge of wild geese flowed north through the upper darkness.

The thought of Buck Daniels grew dim in her mind. Still watching the stars above her, she became aware that the stallion was in motion again, that he was turning, that he was heading north again at a trot and then at a canter and then at the mile-devouring gallop. But she had no power to resist.

CHAPTER XXII.

"YOU AIN'T NO KILLER."

Three times the pursuers came upon the trail of Harry Gloster. And then they lost it, but not until the sheriffs of four counties, with their posses, had taken their fling at him, singly and united.

For one thing, it would have been a feather in any man's cap to have taken him. His record included a double killing; the suggestion, which was believed far and wide, that he was a member of the old Haines gang, and a jail break at the expense of so famous a custodian of the law as Slim Hargess. But fame was not all that would be gained by his capture.

He leaned from the saddle and studied the trail.

His career had caught the public eye. He had been near to destruction so many times that he enjoyed a charmed life. And all in the space of a comparatively few hours, the reward which was offered for his apprehension dead or alive grew by leaps and by bounds.

Any rancher who numbered his cattle by the thousand could afford to bring his name to attention by adding a few hundreds to the reward. It passed ten thousand dollars. The entire section of desert and mountains went wild with the man-hunt fever.

A slug of lead which cost a few cents would make a lucky man the possessor of a small fortune, to say nothing of a reputation which might easily lead him into office as sheriff of some unquiet county. Crack shots mounted upon their best horses literally swarmed out by the score. There was no trail too obscure for their notice. They combed the nooks and crannies.

And yet Gloster shook them off. He managed it by a clever move, although he did not at all consider it as a wise measure when he took it. He had to see Joan again, no matter at what risk, and so he doubled straight back into the region of his jail break!

He felt that it was like putting his head into the lion's mouth. And every one else seemed to feel that such a march would be the same thing. They hunted with increasing fury, but they hunted in a growing circle, the activity being on the rim while the centre of the circle was the town of Sim Hargess and the jail break. That centre was quiet. and near it, toward the ranch of Buck Daniels, came the outlaw.

The town itself was humming this morning with a new excitement of which Gloster could know nothing. For at dawn it was found that the big black stallion had been turned out of his corral—the gate had been deliberately unbarred, and it was the opinion of all that some member of the Haines gang had come down to claim the great horse.

None of this was known to Gloster himself, for he came shortly after the dawn in sight of the little ranchhouse, installed his horse near the cottonwoods, and stalked the house itself. He had hardly taken covert in a shed when Buck Daniels appeared, and uttered a shout of surprise at the sight of a trim built gelding standing near the gate of the corral and touching noses with the horses within.

After that the rancher acted like a man possessed with fear. In another moment he had thrown a saddle and bridle on a horse and was riding north and east, leaning far from the saddle and studying a trail. He dipped into a swale, and as soon as he had disappeared Gloster came from his hiding and ran to examine the marks in the sand.

It was at once apparent that Daniels was following the back trail of a horse, and it was not hard to put two and two together. Yonder was the gelding with the saddle mark still showing on his back, and Daniels had left with such haste that he had not even turned the beautiful animal into the corral.

And Gloster remembered the outline of the horse which he had seen Joan riding the night of the jail break. He could not recognize it, of course, having only seen it by starlight, but there was enough similiarity to make him feel reasonagly sure. Joan's horse had come back to the ranch without saddle or bridle, and now the rancher was following the back trail to find what had become of his girl.

So Gloster returned to the cottonwoods and took up the pursuit.

In two hours of the slow journey, he saw Daniels change his direction to north and west, and start riding with increased vigor. He himself soon came to the spot; although he was not an expert trailsman, yet it was easy enough to read the sign here. Yonder the marks of the gelding's hoofs crossed the sign of a much larger horse, as was shown by the size of the prints and the depths to which they had sunk. Here, too, was a place where the sand was raked, as if the saddle had been brushed across it.

What had happened, Gloster could not dream, unless at this point Joan had caught a fresh horse which might have been wandering loose.

(To be continued.)

The Cow

Through the deep hayfield
Where tall grasses bow,
  In and out
  And round about
Roamed the happy Cow.
Nibbling the sorrel leaves,
  Plucking at the clover,
Happiest of happy beeves
  All the world over!

"Marion! Marion!
  Teatime, Marion!"
Oh what a bother! Is she calling me?
  Mummy dear, not now!
  Can't you see that I'm a Cow?
And a Cow never comes in to tea!

—Jocelyn C. Lea in the London Spectator.

REASON ENOUGH

"How did your congregation come to ask for your minister's resignation"

"Why, one of our members played golf with him."

Rayon Production

It has been stated recently by E. L. Starr, director of the Rayon Institute, that the production of rayon for the current year is likely to exceed 111,000,000 pounds.

Government should be constructive; progressive, not reactionary. I am entirely unwilling to accept the old order of things as the best unless and until I become convinced that it cannot be made better.—Governor Alfred E. Smith.

A hollyhock more than seventeen feet tall has been raised by Mrs. Estelle DeWitt, of Alameda, Col. In addition the main stock, there are four smaller branches running up from the ground.

It is useless to cry out and protest against the decrees of Style.—Paul Poiret.

About $7,000,000 is spent each year by the Canadian Government for the promotion of the agricultural industry.

Yes! One way for a girl to keep her youth is not to introduce him to a nicer girl.

Minard's Liniment cleanses cuts, etc.

Air Mindedness

Channel Flown by 2,000 a Week; 'Planes Link London to 73 Cities

London.—Statistics just published show that Britain is rapidly becoming air-minded. Every week for the last five weeks more than 2,000 people have taken the once perilous air journey across the English Channel. This is an increase of more than 500 over the highest figures for last year.

During the busiest air week last year less than 1,500 people took advantage of the quick service from London to Paris. London now has air trips to seventy-three European cities. There are nine scheduled services each day to Paris, the first at 6 a.m., and the last at 4.30 in the afternoon.

More than 50 per cent. of the cross-Channel passengers are women and they have included the extremes in age, babies travelling from time to time as well as the septuagenarian, octogenarian and once a man of ninety.

1436.—Men's and Youths' House Coat, having shawl collar, two-piece set-in sleeves with or without cuffs, and patch pockets. Sizes 34, 36, 38, 40, 42, 44 and 46 inches breast. Size 38 requires 3¼ yards 36-inch material, and ⅝ yard contrasting, or 2 yards 54-inch. 20 cents.

Isle of Sark Reverts to Early Custom

Reverting to a law and custom of the days of Queen Elizabeth, which long has been in abeyance, Mrs. Dudley Beaumont, the Dame of Sark, one of the Channel Islands, has issued an edict that the inhabitants must pay their tithes in wheat or other grain instead of in cash.

Sark ranks as "an entirely independent feudal state within the Empire," being one of the numerous anomalous legacies of the Duchy of Normandy to the English crown, and what its Dame says is likely to go, in spite of the protests of the islanders. Her exercise of her feudal rights, however, is not purely arbitrary.

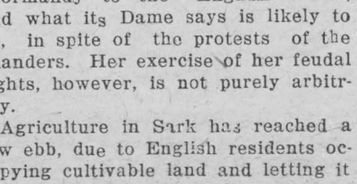

Agriculture in Sark has reached a low ebb, due to English residents occupying cultivable land and letting it run to waste. With the object of reawakening interest in agriculture, the Dame has decided to install a milling plant on the island, which formerly fed itself.

Minard's Liniment for Every Pain.

British Justice

George W. Alger in the Atlantic Monthly (Boston): England trusts her magistrates. She selects them carefully, gives them wide powers, and expects them to perform their duties in the maintenance of the dignity of English justice. . . . They have met these expectations. . . . Here in America power in criminal law is mainly vested in the amateur rather than the expert. We trust our juries, but we do not trust our courts. . . . To prevent pay judges, chosen for political reasons only, from doing wrong, we have by a patchwork of prohibitions made it impossible for good judges to act effectively.

Husband: "When I'm dead and gone you'll never get another man like me." Wife: "Well that's some consolation."

"SALADA" TEA

ORANGE PEKOE BLEND

359

"Pekoe" comes from the Chinese word "Pak-ho", meaning silver hair, which was applied to the tip leaves on the Chinese tea bush. Tip leaves are wiry in shape. In India they were more orange in colour, so were called "Orange Pekoe" (Pak-ho).

Philadelphia Has Made Back Slip

Report Declares City is Almost as Bad as Chicago

BOOTLEGGING RIFE

Grand Jury Finds Criminals in Charge of Liquor Ring

Philadelphia, Pa.—The city of brotherly love appears to have taken a long slide back toward crime conditions which prevailed in the stormy days of early 1920 when Brig.Gen. Smedley D. Butler was called in to stamp out lawlessness.

The recent series of gang killings brought conditions here before a grand jury and that body has now issued a report which characterizes Philadelphia as "almost as bad as Chicago." The grand jurors were not willing to go so far as to say that conditions here were the same as in the mid-western metropolis but their preliminary report is one of the most amazing ever issued in this part of the country.

It says that the grand jury has found that a ring of criminals, backed by powerful and wealthy interests, has gained a hold on the liquor business here, involving scores of police officials.

The ring employs the best legal talent money will obtain and operates a system of bribery, robbery, assault and murder as necessary adjuncts to its $10,000,000 liquor business, the report says.

Grave Charges.

"Without detection or apparent fear of apprehension," says the report, "this group of men has run the whole gamut of crime, openly and brazenly and with a degree of security unheard of in a decent community. Their activities constitute a menace to life and property and a threat to the preservation of law and order."

When Brig.-Gen. Butler was granted a leave of absence from the United States marines to conduct the famous "cleanup" campaign here several years ago, he found that numerous police officers were accepting small bribes to protect small bootleggers and Speakeasies.

To-day, according to the grand jury's report, the alliance between politicians and underworld leaders has grown immeasurably. Bootlegging is a major industry and bribes run into five figures.

District Attorney Monaghan, who has supervised the raiding of numerous alcohol plants announced that the records of one denaturing plant contained such entries as this:

"Chief—$10.00—cop."

The item presumably referred to the bribing of some powerful agent of the law.

It was said that $29,400 had been paid over a period of five months by this one firm alone to persons designated as policemen.

A Wasted Sympathy

Do not waste your pity, friend,
  When you see me weep as now;
Keep it to some better end.
When dry-eyed I went about
  With a leaden heart locked in
  By a silent tongue, ah! then
  Had you brought it, it had been
Sweet indeed to me; but now
  When the depths of my despair
Are upheaved and through the portals
  Of my heart come free as air,
It is useless. If you please,
  Give your thanks that to a woman
Tears are given, and be at ease.

—Winifred Howells.

I wish to correct the impression that the Mayflower sailed from Plymouth. The famous craft really sailed from Southampton, England—Mayoress Foster-Welch of Southampton.

FINANCIAL NEWS

Going Ahead

The rapid development of industries, including mining, pulp and paper, power, lumbering, iron and steel, etc., in the territories lying between the eastern and western boundaris of Northern Ontario, and notably between Sudbury and the Manitoba boundary, is changing the entire aspect of the province's timberland. International Nickel and Mond Nickel Companies are growing into huge industrial concerns, while the lead-zinc mining and smelting industry on a large scale is on the way. Add to this the immense plans of the Lake Superior Corporation, now in Canadian hands, new lumbering projects and pulp and paper enterprises recently completed and under way, and the population of the 1,000 miles is growing steadily and is bound to increase. Many thriving communications are being built up. The importance of these developments to agriculture and business in general is great.

C.P.R. Shows Increase In Traffic Receipts

August traffic receipts of the Canadian Pacific Railway showed a substantial increase over hose of the corresponding month of last year. According to the weekly statements issued by the company, the traffic receipts amounted to $19,062,000, as against $16,796,000 in August of last year, being an increase of $2,266,000, or 13 per cent.

Income from other sources in August of last year amounted to approximately $500,000. Assuming that the same amount will be shown this year, the gross earnings of the C.P.R. for August will be shown at about $19,562,000.

Motor Production Promises Records

U.S. automobile companies reporting their production in August increased the indications that the total output of he indusry during the month would exceed 350,000 units, surpassing all records, for August production shedules now are said to be 50 per cent. higher than at this time last year.

Toronto Bank Clearings Show Increase

Bank clearings in the city of Toronto for the week ended September 6th amounted to $125,425,519, an increase of $18,783,765 over the corresponding period last year and an increase of $13,608,676, as compared with the previous week of this year. Comparisons:

W'k ended	1928
Sept. 6	$125,425,519
Aug. 30	111,816,943
Aug. 23	119,318,695
Aug. 16	133,573,863
W'k ended	1927
Sept. 8	$106,641,754
Sept. 1	112,028,118
Aug. 26	114,218,945
Aug. 19	101,988,890

Mining Briefs

McIntyre is reported to have struck the south ore, near the Hollinger line, at the 2,375. The ore, as on the three levels above, is very rich, but patchy. The long end-to-end drive at the 3,875 has advanced about 1,200 feet now. An average of 42-45,000 tons monthly is being worked toward. Slightly greater tonnage may be had in temporary times. Recovery continues to be the highest in Porcupine. McIntyre is one mine that has gone up in grade, now being well over nine dollars.

Bidgood has started drilling on its new showing, 800 feet north of the Moffatt Hall line, and toward the east centre of the property. Here free gold has been found in a closely spaced series of narrow veins and veinlets of graphitic quartz, the whole probably making ore over the surface shown width of 22 feet.

Advice from Rouyn is to the effect that the drift in Amulet's "C" ore body has been driven now for a length of 65 feet. The first 20 feet is said to be massive chalcopyrite running approximately 20 per cent. copper,, the second 20 feet is high-grade chalcopyrite with a small amount of zinc, while the last 25 feet is massive zinc and chalcopyrite of about equal proportions.

It is understood that the Area drill is being moved again, and that J. C. McGregor, formerly of the Amulet and now with Mandy, has returned from the west to study the geology of this property.

Strength in Barry-Hollinger may be attributed to the fact that Mine Manager Richard Treloar, is now in the city and is expected to make some important announcements soon, states a report on the street. Another factor in the rise was a wire from the north which stated that Barry was in very rich ore in a raise from the 1,125-foot level.

Activity in Vipond comes as a result of a report which states that slashing at the 700-foot level has shown the width of the vein to be at least 17 feet. Previously reported grade was about $8.50, but the present report states that values have increased considerably.

Despite the illness of J. B. Tyrell, mine manager of the Kirkland Lake Gold, it is said that he left for the property last night and that news of development may be expected very shortly. This company is at an important stage of development, and Mr. Tyrell's theory that the two rich zones on the property converge at around 2,000 feet depth will hinge upon the results of the next few days.

A despatch from Amos states that a rich strike has been made on the Graham Bosquet property, which adjoins the Thompson-Cadillac. No further details were given. Officials of the company could not be reached at the time of writing, but official news will be forthcoming shortly.

An electrical survey has been completed on the property of Brett-Trethewey in Glifford Township. A wide mineralized zone has been traced across the property and encouraging values in copper have been obtained. The electrical survey was undertaken with the idea of determining the best point at which this might be attacked.

Indias' Claim to Status

Bombay Daily Mail: Britain now asserts that by willingly conceding the claims of the Dominion she is morally certain of their support in times of danger. If that is the right policy to be adopted towards parts of the Empire occupied by people belonging to the same race as the British, it stands to reason that that policy is even more necessary in the case of a country like India. The sooner Britain recognizes it the better would it be for the Empire.

When *your* Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant or babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

In the days of Cromwell fine quality tea cost as much as thirty dollars a pound. To-day, you only pay a few cents more for Red Rose Orange Pekoe than for ordinary tea, but you get the highest quality and greatest value. Put up in clean, bright aluminum packages.

COMPLETELY RUN DOWN

Symptoms That the Blood is Thin Should Not be Neglected.

Weak, run-down, lacking strength, energy and ambition, nervous, sleepless, poor appetite, digestion disturbed—these are the symptoms named by a great majority of people who have been benefitted by the use of Dr. Williams' Pink Pills. These tonic pills correct the condition described and if you have any of these symptoms you should give these pills a trial. Their great value in cases of this kind is shown by the statement of Mrs. James A. Tibbetts, Halifax, N.S., who says:—"I was completely run down in health. My blood was thin and watery, and my nerves so bad that I did not sleep well at night. My appetite was poor and the least exertion left me weak and trembling. When I went out I would have a severe hadache, and would have to lie down as soon as I got in the house. A friend advised me to try Dr. Williams' Pink Pills. I soon found they were helping me and by the time I had taken the sixth box I felt like a new woman, and have enjoyed good health ever. since. For this reason I can highly recommend the pills to anyone run-down or troubled with their nerves."

Not only do Dr. Williams' Pink pills help the nerves. Their main function is to enrich and increase the blood, and as the blood supplies the whole body, new life is given to the entire system. Better sleep, steady nerves, improved appetite, increased vigor—all these can be yours by taking Dr. Williams' Pink Pills. Begin them to-day. Sold by all medicine dealers, or by mail post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sweden Sends Questionnaire to Listeners

Results of First Public Referendum on Programs Is Basis of Future Efforts

Stockholm—Every license holder in Sweden has received a printed questionnaire from the state Radio Department regarding radio programs were to be answered before June 15th. So many were the responses, more than one-third of the license holders having replied, that considerable time must needs be consumed to analyze the replies. The results will, however, be ready by autumn when regular radio programs are taken up again. The extremely light nights in Sweden during the summer months interfere with reception, but this summer the programs will be more lively than they have been in past summers.

A public referendum on taste in radio programs is perhaps the first of its kind in the world. That 140,000 replies were received shows the interest of the Swedish public in radio. Radio service managed by the state, has given programs now for several years and these radio programs play an important role in the lives of many.

During the last year the radio service radiocost programs covering 2000 hours. The larger part of this radio public has never had an opportunity to hear an opera other than through radio and their first acquaintance with classic music has come to them through radio. Furthermore, the opportunity of studying languages by radio has been given them.

Therefore, the radio service believes it will be of great value to know the wishes of this vast audience and to regulate the radio programs after their desires and needs.

The questionnaires were divided in three parts: the first with the present programs and as to how they should be limited or increased. The second deals with lecture subjects and language courses. The third group asks questions about the time most suitable for listeners, etc.

A complete inventory of the interests of the Swedish people is obtained by this inquiry and, completely classified and applied, a better and more thoroughly democratic—in the best sense of that word—radio program will result.

Immigration of Miners

Melbourne Australasian: Among the countries which have coal reserves Australia is seventh. Her coal resources are estimated to be almost as great as those of Britain, whose coal and iron made it for a century the greatest manufacturing country of the world. Yet Australia has reached the astounding position when it would be profitable to leave her coal untouched, pay her miners a pension, and buy coal from abroad. By restricting the migration of farm-workers and settlers on land labor has done much to slacken the development of the Commonwealth, but it is probable that as many settlers have been lost through the inability of the coal-mining industry to absorb skilled miners who are prepared to come from Britain to work in Australian mines.

The difference between a good and a bad reputation is that the former is easily lost.

Veterinaries use Minard's Liniment.

Engines Ready for Big Airship

Trials for R-100 and R-101 to Begin January and Last Several Months

London—Five Diesel engines, each of 450 horsepower, will arrive soon for the new Air Ministry passenger airship nearing completion at the royal airship works at Cardington. These engines, being worked by a compression ignition system, carburetors and magnetos are eliminated, and two possible causes of fire avoided, while the use of heavy oil instead of petrol will also obviate this danger.

This, in fact, is one of the most notable differences between the R-100 and the R-101, which is being built by the Airship Guarantee Company at Howden. Both ships will be ready for trials in January, which occupy three to six months.

Another interesting feature of the R-101 is that she is designed to withstand the most violent vertical currents which impose severe internal stresses, and which were partly responsible for the disaster to the Shenandoah. Seven tons of water ballast are being carried in emergency bags and the load in the ship can be shifted at any moment.

The R-101 is 724 feet in length, its maximum diameter full is 132 feet and height 140 feet. Its gross lift is 156 tons and speed 70 miles an hour with a fuel capacity for 4000 miles.

Passengers will be accommodated on two decks inside the ship, containing lounges, promenade decks and sleeping cabins. A careful study has been made of weather conditions on the route to India, for which the airship is intended, and the first synoptical chart has been prepared for an area comprising the whole of Europe, Siberia, South Africa, Asia Minor and India.

MANY MOTHERS RECOMMEND THEM

Baby's Own Tablets Are Fine for Nervous, Sleepless Children.

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasant tasting little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house, for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Where Everybody's Happy

(Contributed by Pauline Tremblay)

There's a town called Don't-You-Worry,
On the banks of the River Smile,
Where the Cheer-up and Be-Happy
Blossoms sweetly all the while:
Where the Never-Grumble flower
Blooms beside the fragrant Try,
And the Ne'er-Give-Up and Patience
Point their faces to the sky.
In the valley of Contentment,
In the province of I Will,
You will find this lovely city
At the foot of No-Fret Hill;
Rustic benches, quite enticing,
You'll find scattered here and there,
And to each a vine is clinging,
Called the Frequent Earnest Prayer;
Everybody there is happy
And is singing all the while,
In the town of Don't-You-Worry,
On the banks of River Smile.

Minard's Liniment for aching joints.

Isolation or Empire?

Lord Melchett in the London Daily Telegraph: I visualize the future of Empire as a future of Imperial trade combines, with factories and research stations, not only in Britain, but in every Dominion, producing, not for millions, but for hundreds of millions of people. There can only be one answer to the question of Empire or isolation. Every day with new discoveries and advances in transport and communications, new annihilations of time and space, makes that answer more obvious and the task less difficult. On the other hand, there is no room for delay. Unless we tackle the problem with all our ability and with all our determination there is real danger of a gradual drifting apart of the great complex which so much blood and so much selfless sacrifice has helped to build. Civilization itself calls for our answer.

The most popular place for June wedding parties to go on their honeymoon—Broke! You don't need a road guide to find it.

Motion Picture City Celebrates 25 Years' Growth

Old Settlers in Hollywood Hold Picnic—Pioneer Tells How Place Was Named

Hollywood, Calif.—Twenty-five years of progress in the world's motion picture centre were commemorated here when approximately 900 early residents and pioneers gathered at Plummer Park for the annual old settlers' picnic.

Following a parade, Eugene Plummer, a resident of Hollywood since 1868, mounted on horseback and garbed in picturesque Spanish attire, led the procession to the park, which is a small portion of what was once his extensive hillside holdings.

John Day, pioneer, told of the naming of the city when he was an employee on the Wilco ranch that occupied the present site. He said:

"I planted two holly trees right at Cahuenga Pass. So Mrs. Ida Wilcox Beveridge, who owned 160 acres there, decided to call the place Hollywood. The trees died, but as for the city—well, just look at it!"

Sanford Rich, who took office in 1903 as Hollywood's first Mayor, attended, as did Carrie Jacobs Bond, a composer. She claims 21 years of residence in Hollywood. Miss Ann Sullivan, first American child born in Hollywood, was a visitor.

THE DEVIL BY THE HORNS

Truth (London): (The noise made by motor traffic in London is now almost unbearable.) I recommend those who desire to silence the devil in the car to take him first by the horns. . . . Whether by day or night, the only excuse for sounding your horn at every corner is to save the time that would be lost by slowing down. I doubt if in one case in a hundred would this trifling loss of time be of material consequence to anybody; the chief sufferers in London would be people who are in a hurry to catch trains, because, like the man who is hurrying home in the small hours, they did not start soon enough, and these people would continue to suffer in exactly the same way if there were a policeman at every corner to keep the way clear for them. The fact is that the cult of speed for its own sake has become a craze, and it is indulged at the expense of every other consideration.

The mercury's rapidly climbing
With never a hint of a stop;
Some fool has encouraged it, saying:
"There's plenty of room at the top."
—New York Sun.

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe in saying Lydia E. Pinkham's medicines have helped me wonderfully."—MRS. WM. H. BEECHTELLER, Box 143, Port Colborne, Ont.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

The charge laid by the Provincial Officer against the Morrisburg young man who was responsible for the ear of Asa Hutt taking the ditch about two miles south of Winchester the last night of the Fair, and failing to stop and return to the scene of the accident, was disposed of by Magistrate McCormick and the minimum fine of $25 and costs imposed. There was no evidence to show that the young man was under the influence of liquor.—Winchester Press.

* * *

Mr. J. Denzil Payne, son of Mr. and Mrs. Arthur payne of 261 Tacoma Ave., Buffalo N. Y., a grandson of Mrs. Jas. Mallen of Morrisburg, and a former brilliant student of the M.C.I., has distinguished himself by winning a scholarship at the Ithaca Conservatory of Music, in the study of Saxophone, which entitles him to a full year's course. In addition to Saxophone, Denzil will study Claronet. He has the best wishes of his many friends here for continued success.

Miss Mary Casselman left on Wednesday for Toronto, where she will attend University.

* * *

Mr. and Mrs. Ben McDonald of Toronto, were in town on Sunday, attending the Diamond Wedding of the latter's parents, Mr. and Mrs. Stubbs. On their return home they were accompanied by Miss Doris Stubbs.

* * *

Mr. and Mrs F. M. Devaul and family were guests or Mr. and Mrs. Fred Devaul Wednesday afternoon and evening, to celebrate Mr. and Mrs. Fred Devaul's anniversary, also their son's, Mr. and Mrs. F. M. Devaul's anniversary and his birthday. After a chicken supper music and games were played.

* * *

Mr. and Mrs. Earl Merkley returned home on Sunday from an extended motor trip through Northern Ontario and United States. Enroute they visited Peterboro, Orillia, North Bay, Cobalt, New Liskeard, Sudbury, Sault Ste. Marie. Crossing the border at Soo, Mich., they motored to St. Ignace, where they ferried across Mackinac Straits to Mackinaw City, touring along the east coast of Lake Michigan, through Indiana and Ohio to Detroit, returning by way of Windsor and London, where they spent a day with their brother, J. E. Hamilton, and also attended Toronto exhibition a couple days. Mr. Merkley reports having enjoyed some good fishing in the lakes of Northern Ontario, and reports the tourist traffic on the new Ferguson Highway as exceptionally heavy.

* * *

A very delightful reception was held during the afternoon and evening of Sept. 13th, by the Womens Missionary Society of the United Church, at the residence of Mr. and Mrs. Arthur Nash, on the 25th anniversary of their marriage. The house was beautifully decorated with ferns and a profusion of autumn flowers. Music added greatly to the pleasure of the occasion, local talent giving their services in the afternoon, and members of St. James Choir, of Ottawa, very kindly putting on the program in the evening. The reception was largely attended by friends from Morrisburg and vicinity, as well as by many from other towns. A very generous offering was made by the guests, to the funds of the W. M. S., in whose work both Mr. and Mrs. Nash have always shown the keenest interest.
