GOLDEN JUBILEE, W.M.S. KNOX CHURCH

The Women's Missionary Society of Knox Presbyterian Church, Morrisburg, met on Friday afternoon, September 27th, to celebrate the 50th anniversary of their organization, and to honour the memory of those faithful women, who in the early days had carried on the work of this Missionary Society so efficiently. A splendid program had been prepared.

The Women's Missionary Societies from Iroquois and Winchester were present, and brought greetings, and also representatives from the sister societies in Morrisburg, as follows: Mrs. Myers on behalf of the Church of England; Miss Jane Smith on behalf of the United Church; Mrs. Arthur Casselman on behalf of the Lutheran Church.

Letters were also read from absent members: Mrs. M.C. Gibson of California, and Mrs. R.E. Gibson of Belleville, the only charter members living. Mrs. Denesha, a charter member, sent greetings early in the year, but ere they were read, she had passed to her reward. Letters from Miss Cameron of Ottawa, and Mrs. Duncanson of Highgate, Ontario, were read.

After the devotional exercises, which were taken by Mrs. J.A. Farlinger and Mrs. J. Burkholder, Mrs. J.H. Meikle gave a very hearty welcome to visitors and all those who had gathered with the Society.

An interesting "History of our Society" for the last 50 years, was read by Mrs. McGillis. The Mission Band took part, and sang very sweetly "Forward Through the Ages". Mrs. (Rev.) Turner, of Winchester, the new Presbyterial president, honoured the gathering by being present as guest speaker. Her address was not only inspiring but informative, as she spoke of the work of the Society in China, in India, in Japan, in British Guiana, and of the work in Canada. She said that the first Missionary Society organized in 1864 in Montreal, raised the first year one thousand dollars, and down through the years they had grown, having Women's Missionary Societies from coast to coast, and last year the givings were two hundred thousand dollars. Mrs. Turner also brought greetings from the Brockville Presbyterial.

Two very beautiful solos were sung by Mrs. Connor and Miss Frances Smith.

A very happy part of the program then took the place, the presentation of a Life Membership Certificate to Miss A. Boyd, who for many years has evinced a deep interest in the work, and an "In Memoriam" taken through the Society by Mrs. Sheets and Mrs. Wright, in memory of their mother, Mrs. Dillabough, who was a charter member of this Society. A gold Life Membership Pin was presented to Mrs. J.H. Meikle as a slight token of appreciation of her 17 years as Treasurer of the Society.

A special jubilee offering was taken, and before the closing hymn was sung, a cordial invitation was extended to all present to remain and have tea, which was served in the Lecture Room. A beautiful golden birthday cake was a feature of the tea.

Mrs. Jenkins Burkholder presided.

WILLIAMSBURG RACES

Under the auspices of the Williamsburg Athletic Association, another successful harness race meet, the last of the season, was held on Wednesday afternoon, with a large attendance. A slight mix-up occurred in the 2.27 class, when Rosa Bunter was crowded, and collided with another sulky, throwing the driver off and causing a runaway. The sulky was badly smashed, but otherwise no serious damage was done.

Bedford Grattan set a new track record of 2.10 for Williamsburg race track.

The results were as follows:

Free-For-All

Bedford Grattan (Turcott, Mattawa)	1	1	1
Harwah (Wells, Aultsville)	2	2	3
Arthur Guy (Caldwell, Iroquois)	3	4	2
Tony Mack (McDonald)	4	3	4

Time: 2.10, 2.13¼, 2.14.

2.20 Class

Junie R. (Baker)	4	4	4
June Volo (Wmsbg. Stables)	1	1	1
Rex. Jr. (Zeron)	5	3	5
Sir Kirk (Telfour)	2	2	2
Helena Harvester (J. Ross, Winchester)	3	5	3

Time: 2.11, 2.15, 2.17.

2.27 Class

Glen Grattan (Turcott, Mattawa)	2	2	2
Charity Sauns (Williamsburg Stables)	1	1	1
Scarlet Sage (Thompson)	3	3	3
Joe Marque (Casselman)	4	4	4

Time: 2.16, 2.16, 2.16¼.

2.27 Class

Darky Rex (J. Zeron, Morrisburg)	4	4	5
Rosa Bunter (J. Thompson, Mountain)	2	2	4
Liberty Todd (H. VanAllen, Morrisburg)	1	1	1
Private Marque (R. Thompson Iroquois)	3	5	2
Marjory Grattan (McDonald)	3	3	3

Times: 2.17, 2.17¼, 2.18.

Running Race—1st, Jack Hill; 2nd, S. Barkley; 3rd, Wilfred Marcellus.

YOUNG MEN'S BIBLE CLASS FORMED IN UNITED CHURCH

A Young Men's Bible and Study Class has been formed in the United Church in Morrisburg. The class meets with the Sunday School, and then adjourns to the Parsonage for the lesson period. All the young men of the Church are invited to attend this class. The officers elected at its last meeting are as follows:

President—Mr. Trevor Allison.
Vice-Pres.—Mr. Darwin Stata.
Sec'y-Treas.—Mr. Herbert Coons.
Other Members of Executive—Mr. Wilfred Larmour, Mr. Arthur Colquhoun.

The leader of the group is Rev. R.D. Smith.

PATRICK MYERS

"Pat" Myers (as he was popularly known), son of Mr. and Mrs. Harry I. Myers, died at the home of his parents, Morrisburg, at 11 a.m. Thursday, after a lingering illness extending over more than 5 years.

Deceased was, normally, a brilliant young citizen, with an amiable disposition, and characteristics which won for him the universal admiration of the people of this community.

With little hope of recovery, this courageous young chap, three years ago, on the advice of his physician, underwent, at the Royal Victoria Hospital, Montreal, one of the most critical operations ever attempted by surgical scientists, that of removing a large tumor from his brain.

For a time, it was thought the operation had been successful, but before many months had passed, it became apparent to hopeful relatives and friends, that human efforts, already exhausted to avert the inevitable, would fail. Deceased was sinking gradually, particularly during the last year, until symptoms similar to those which preceded the operation, proved fatal.

Although not unexpected, his death has caused sincere sorrow among his legion of friends. To the grief-stricken family circle, there extends at least one ray of comfort—that the love and devotion of faithful parents, manifest throughout the illness of deceased, was such as to elicit the esteem and respect of the whole commmunity.

Harry Arnold Patrick Myers was born in Morrisburg on March 20th, 1917. He was educated in the Public School and Collegiate Institute here, and was exceptionally bright, with an outlook for a promising future.

In an act of bravery in 1929, he distinguished himself by risking his life in the rescue of one of his associates, Donald Swayne, from drowning in the tailrace at the Morrisburg Power Plant. In the winter of the same year, this performance was suitably recognized, when in the Morrisburg Arena, Patrick Myers was presented with the certificate of the Royal Canadian Humane Association.

Deceased is survived by his parents; three sisters and two brothers, namely: Mrs. Wilfred Zeron, Morrisburg, Mrs. Frank Covington, of Cardinal; Mrs. Arnold Merkley, Ottawa; Donald, of the S.S. Delaware, and Harold Myers, at home.

The funeral service, conducted by Rev. S.B. Holmes, will be held in St. James Anglican Church on Sunday, at 2.30 p.m., after which the remains will be placed in the family plot, Mount Pleasant Cemetery.

MRS. M. E. LAVIS

Mrs. Mary Emeline Lavis, native of the Township of Williamsburg, and widow of the late William I. Lavis, died at her home, Morrisburg, on Saturday, Sept. 28th, after an illness extending over a period of two years.

Deceased, whose maiden name was Mary Emeline Casselman, daughter of the late Jesse and Catherine Casselman, was born in 1854, and lived practically her whole life in Morrisburg. Her husband predeceased her 27 years ago.

The late Mrs. Lavis was a devout and active member of the United Church, a woman of strong christian character, patient, loving and self-sacrificing, whose actions were guided by her conscience. Friends and even strangers felt the charm of her rare courtesy and joyous, sunny temperament. Only the members of the household, however, upon whom, in earlier days, she exercised the influence of her earnest and careful culture of mind and nature, fully realized her high ideals, she having survived the members of her family circle, with the exception of one son, Fred E., of Montreal, who will ever cherish the memory of a loving and sympathetic mother. She will also be greatly missed by her brothers and grandchildren, namely: Messrs Melvin and Jesse I. Casselman, of Riverside; Misses Gwyneth, Barbara and Joan Lavis, daughters of Mr. F.E. Lavis, Montreal, and Master Douglas Lavis, son of the late W.J. Lavis of Grimsby, Ont.

The funeral services were conducted at her late residence on Monday Sept. 30th, by Rev. R.D. Smith pastor of the United Church. Interment was made in the family plot in Fairview Cemetery.

As evidence of the high esteem in which Mrs. Lavis was held, a profusion of beautiful floral offerings from friends in Morrisburg, Montreal, Ottawa and Brockville, were placed on the casket.

RED TAG FOR THE RECKLESS

The Ontario Government in despair over the failure of its laborious efforts to stop the massacre on our roads should get some help in that direction. This column begs to suggest that it offers $1,000 for the most practical idea which will reduce the number of deaths and accidents. And as a start this column begs to submit that the best thing to do it to bring home to the reckless driver that he is thought by fellow drivers to be a menace. That should get under his skin, and make him more careful if anything will. How can this be done? By making a convicted driver wear a red tag attached to his car when he drives. — Sault Star.

READY FOR UNUSUAL CRIME

A report on the administration of criminal justice adopted by the Canadian Bar Association at its Winnipeg convention a few days ago, urged an increase in the maximum penalty for kidnapping and allowing the punishment to include whipping. The maximum penalty for kidnapping in Canada is imprisonment for 25 years. — Sarnia Canadian Observer.

TROUBLE-MAKERS

If it was possible to put to sleep for a period of years all the militarists who are to be found in almost every land, how much more pleasant and secure this old world would be! — Brockville Recorder.

DEFENCE OF WEEDS

The Duluth Herald says a world of weary tillers of the soil will be only too glad to believe Dr. Charles Thom, of the United States Department of Agriculture, who tells an agricultural meeting in England that weeds save rich topsoil by preventing erosion and, after death ,enrich the soil they occupied. This seems part of the concerted effort by scientists and some statesmen to conceive mankind that such old virtues as hard work and saving are now vices, because they are anti-social in causing overproduction. Dr. Thom's cheery message will not be so impressive, however, to those who have seen what weeds can do to the most promising garden in a two weeks' vacation by the owner. — Brandon Sun.

WILL ROGERS' WHOLESOME HUMOR

It was not the humor that some confuse with wit, and that laughs at people; it was the humor that had sensibility in it, and kindness, that laughs with people. He can show man his own absurdity, but he himself was made to seem absurd, too, and it was the sort of showing which saved all of us from the commission of pompous sins. There was always more love than contempt in it. And there was gravity behind the jest. With that gay raillery there was droll, wholesome philosophy, insight, acute perception, the flash of mind that threw light on folly, that made pomposity and undue seriousness seem lovably absurd. Of bitterness and bile, of the wit that cuts and sears, he knew nothing. — Ottawa Journal.

SMALL THINGS THAT COUNT

The humble and diversified needs of the world's consumers are thus giving rise to considerable industrial activity in one British centre which has attained celebrity for the production of souvenirs and novelties and similar activity is probably to be noted elsewhere. It is not always the big, expensive things that lead to the largest amount of employment. Small and comparatively valueless articles are possibly in greater demand, particularly in time of financial stringency, and the industrial community which is able to supply them profits from the situation. — Brockville Recorder and Times.

LOOK FIRST !

The first fatal hunting accident has been reported from the North woods and from now till the end of the hunting season there will unfortunately in all probability be a recurrence of these sad stories. All the warnings that can be delivered seem fruitless where men who shoot first and look afterwards take their guns in hand and go into the woods. And yet nine hundred and ninety-nine out of every thousand hunting accidents could be prevented by the observance of about five rules or precautions, every one of them so simple as to be elementary, so obvious that one would think a child with a popgun would recognise their importance. If every hunter would only stop to think over the few simple precautions that are all he has to observe in order to make our woods quite safe, these tales of cruel and senseless killings and maimings would not have to be told. — Montreal Star.

OTTAWA THE BEAUTIFUL

We are always enthusiastic when we read that something more is being added to the long list of Ottawa attractions.

Like all Canadians who have had the opportunity of watching the Capital grow in both size and beauty, we appreciate its qualities and never begrudge the spending of national funds for this purpose.

Ottawa is the heart of the nation, and it is only fitting that Governments, not matter what their party stripe, should take a keen interest in Capital development and plan long years ahead. — Windsor Star.

NO TIME FOR SHORT CUTS

Taken as a whole, the Dominion's industrial and agricultural condition must certainly be taken as improving. This improvement is far from rapid and doubtless it tests the patience and steadfastness of the people, but it is sustained and natural. It should encourage optimism and continued faith in the unspectacular methods as exemplified in the British recovery program; and it offers no justification for resorting to rash experimentalism. Canada is travelling up the hill to prosperity and there is no need for her to take chances by attempting dangerous short cuts.— St. John Telegraph-Journal.

LONG LIFE

The problem is not to postpone death, but to prolong the period of vigorous life, in other words, to double the years of youth and shorten the period of exhausted, enfeebled old age. Youth, not longer lives, is what we all crave. It is doubtful if the average person could live more than two centuries without committing suicide. Try to sit through the same stage production ten times — and see how the show bores you. — Welland Tribune.

PROCESS OF EVOLUTION

In a changing world, the bus, the truck and the airplane have come to the front because man finds them desirable and useful. It is not likely, therefore, that man will turn back and cast them aside in order to increase the revenues of the railways. This fact might as well be accepted as a starting point. Motor vehicles and airplanes are part of the evolutionary process. — Regina Leader-Post.

DOING SOMETHING ABOUT NOISE

It is a distinctly encouraging sign that municipal representatives in large cities are at last doing something about noise. The most noise is unnecessary. Its toleration is a sure indication that collectively people have not yet fully developed as social beings. Preventable noise, in other words, betrays an imperfect social sense. — Ottawa Citizen.

WHITE ELEPHANTS

The big, luxurious liners are no doubt good advertising for the lines to which they belong, but shipping companies cannot live on prestige alone. After all it is the balance sheet that matters, and it is tragic to see such beautiful craft as the Normandie laid up all winter because it is uneconomical to operate her with a large percentage of the accommodation unoccupied. — St. Thomas Times-Journal.

THE EMPIRE

PLAYING THE GAME

"The game for the game's sake," was proclaimed by Mr. S. S. Dean, president of the New Zealand Rugby Union, when speaking of what really is the sporting mission of the All Black team to Great Britain this year. Because of the friction that has clouded some international games in recent years, Mr. Dean's reference to the essence of the thing is timely. There is no implication that touring teams from New Zealand in the past have failed in this respect. Quite the reverse in the case, but it is well that the fathers of all games should take the opportunity to remind players, particularly the younger ones, that victory is not everything. — Auckland, N.Z., News.

DRAKE'S OWN GAME

There is something in bowls which appeals to the English temperament. It is an unhurried and companionable game, and by no means a pastime for elderly men only. Today it is being playe by thousands of people of all ages, including women, who have their own association, and are taking up the game with enthusiasm. Perhaps its popularity lies in the friendliness of its surroundings. Bowls is mainly an amateur game, and it is played on greens of that velvety texture which is the dream of every lover of gardens and lawns —and that means nearly every Englishman. — London Daily Mail.

PRIME MINISTERS' CORRIDOR

At Falconbridge Park on Saturday, Mr. W. W. Hughes planted an oak tree in the Prime Ministers' Corridor, making the sixth young tree that has been placed in position to represent a Prime Minister of Australia.

Mr. Hughes, pointing to the gum trees in the valleys and on the mountains said: "Those clumps of towering gums—look at them! Where in all the world shall we find their equal? Some day there will arise among us a poet who will write prettily and powerfully of our flowers and of our trees; and with the poet, I hope, will come a protector of our trees. We have squandered lavishly an inheritance of priceless value, but the time has come when we have got to plant and grow more trees. As these young trees grow, they will remind every passer-by that the work of the Empire-builder, like the work of the oak and the eucalypt, never ceases." — Sydney Morning Herald.

EARTHQUAKES IN EGYPT?

There have been two bad shocks in Cairo in recent years, both of which rocked the six-storey buildings which were then the highest. What would happen today if anything slightly more severe rumbled below our local crust is more than our imagination can scope with. Companies which make out policies against damage by earthquake in Egypt run the risk of a very heavy call on their finances. Only one hotel (at Port Said) is reputed to be earthquake-proof. Curiously enough, most of this country's tallest buildings appear to be very narrow, which, from the architectural point of view, is asking for trouble. One of the first-fruits of a violent shock in Egypt would be a hasty revision of the building laws. —Cairo Sphynx.

Il Duce Taps Out His Key Note To Forces

Premier Mussolini listens intently as radio operator explains workings of field set during maneuvers in Brenner Pass. He later tapped out a message to his forces in the field.

The Week In Ottawa

OTTAWA.—The election campaign is getting hot. The Prime Minister is in full stride via the radio and the response to his series of half hour broadcasts has been gratifying. He is now headed for the West but will come East again before the campaign ends within four weeks' time.

There is plenty of speculation among the various political wiseacres as to the outcome of the voting on October 14. Varied are the predictions which are not lacking in a cry for National government. Even Mackenzie King has called the shot. He predicts that Mr. Bennett will advocate national government during his speaking tour. That remains to be seen.

Mainly, however, the Conservative strategians place reliance upon the performance, policies and campaigning capacities of the Prime Minister. He has gone into the campaign with a vigour which, despite his illness last winter, is comparable with that 1930. His four broadcasts will be developed in detail on the hustings and will not be lacking in appreciative response from the thinking public.

What appeal the proposed retirement on a species of pension of workers at sixty or thereabouts will carry appears to be problematical. While the criticisms are plentiful and the difficulties, constitutional and otherwise, of great magnitude, at least the idea is commended as being definite and specific and having the force of an idea which, if not new, is relatively so.

The huge undertaking of debt conversion can be accomplished only after much co-operative effort and legislative sanction. The definite trend of times is toward lessening the burden of carrying charges. This scheme would develop it on most encompassing lines to include all public indebtedness—federal, provincial, municipal and, simultaneously, to embrace the financially embarrassed home dweller.

While the campaign, which soon will develop rapidly, is conceded now to have elements of obscurity, it is believed that well before the end of four weeks the situation will be very much clarified. The prospects will better be appraised in the light of the meetings, East and West, the receptions accorded party leaders and the response which is indicated. Very likely, the campaign may lose some of t amiability, and some persons and things, so far largely ignored, may come in for some critical attention with consequences upon the outcome.

So far as the campaign has gone, it is reported that there is evidence of less rigidity in ordinary party adherence with very large but slightly demonstrative meetings. There is about a million new voters to whom particular appeals are being directed. What is very conceivable is that any idea of uncertainity of the outcome may cause a swing to the major political party whose chances, as the election approaches, are considered more likely to ensure stability of government.

The Electric Shock Hazard

In this age of electricity, the latest hazard added to life on the farm is electrical shock. The passage of electrical current of considerable voltage through a man causes paralysis of the higher nerve centres, entailing the stoppage of breathing. The failure of the normal tests for life should not be taken as evidence of death. Persons have been resuscitated after hours of effort although ordinary signs of life were absent. In cases where the contact was of short duration and where artificial respiration has been applied without delay there is a better chance of recovery. Although, in reality, resuscitation from electrical shock is a case for the medical man, or at a pinch for those men of the power and telephone companies, well trained in the art of artificial respiration, there are certain things that every body can do. In shock accidents the victim is usually thrown clear of the live wire or apparatus, but if such is not the case the obvious thing to do is to clear him at once from contact the greatest care being taken that the helper himself is insulated from contact. Notwithstanding the fact that success in resucitation decreases in hot summer months, warmth is of great assistance. The patient should be wrapped in warm blankets and hot water bottle supplied. A person partially shocked should be made to lie down, and it is a point to be remembered that, owing to lack of tone of the blood vessels, it may be fatal to allow a resuscitated patient to sit up or stand. Artificial respiration of course, is of the greatest importance. Efforts in artificial respiration should be and should be taught in all districts, kept up for at least four hours until the patient breathes or until the signs of the onrush of rigor mortis are definite.

English Oysters

Observes the Manchester Guardian —"English oyster in these days have only an academic interest to most of us. This year again we hear that there is a prospect that prices may come down in the future. Within five years, they say, oysters may be cheap if nothing happens to the health of the spat that is so plentiful this year.

Recently inquiries at two eminent restaurants revealed that the price is 8s a dozen—in one case the same as last year, in the other case 2s less. This is for the Whitstable natives, but even the oysters from what used to be thought the humbler regions of the Roach and the Crouch are to cost about the same price. The Duchy of Cornwall oysters, which seven years ago were selling in the Duchy's shop in Waterloo Bridge road at 3s, are now 6s.

I could not live in peace if I put the shadow of a wilful sin between myself and God.—George Eliot.

WHEN BARN WALLS GET FROST-COVERED

With a Cold Wall It Is Difficult To Prevent Frosting

In many barns the walls get frost crusted in cold weather, due either to lack of insulation in the walls, lack of proper ventilating system, or both. With a cold wall it is difficult to prevent frosting, even with reasonably good venlation, and farmers are just beginning to realize the importance of proper stable insulation.

The chief objection to the masonry stable wall, whether of concrete, concrete blocks, hollow tile, orr stone is its being cold and subject to frost on the inside, unless proper insulation is provided for. The air spaces in concrete blocks and hollow tiles help to some extent, but are not enough to prevent trouble from frosting. A double wall or a wall with a complete air space is one of the simplest methods of overcoming this trouble, provided the air space is filled with insulation or with some material to stop air circulation inside the air space.

To get anything like the real value of any double wall construction, the two walls must be as nearly wind and water-tight as possible and the air pace must be filled with something that will stop air circulation transferring heat from one wall to the other and which will not transfer the heat itself.

Double Wall and Windows

The eventual solution of the double wall problem will probably be a thoroughly waterproofed insulation board which can be built right into the concrete or concrete block or clay block double wall.

It is, of course, possible to make a single masonry wall warm and comfortable, either by putting furring strips on the inside and then lathing and plastering with two coats of cement, or by fastening pasterboard or insulating board to the inside of the wall and then plastering.

It pays to have double windows for dairy barns. They will cost a few dollars for the preliminary cost, but will help a great deal in keeping the stable dry and will prevent the glass coating over all Winter long and cutting off the greater part of the sunshine. Many prefer double glazed sash, with two sheets of glass about half an inch apart in the same sash. Where a good ventilating system is in use and the windows do not need to be opened, storm sash are quite frequently used. Either type is necessary.

FASHION FLASHES

Period influences, including the familiar Renaissance and Greek, and the newer military and peasant, are decidedly a force in molding the new styles. . . . Luxurious fabrics expressed in rich brocades and a greater endorsement of jewelled trimming that makes jewleled buttons more important, color and large sleeves, establish the Renaissance theme. . . More pleats, for day and evening and more drapery, reflect the Greek impetus. . . In military interpretations, everything that is representative of this dashing type of costume asserts itself; braid, including gold and white, frogs, tassels, brass buttons, broad shoulder, fitted lines, narrow fur edges, and capes. . . . . Peasant influences, revived recently through shirred and gathered lines, are pertinently indicated for the present in embroideries, an inevitable approach to brightening up the black dress.

Draped lines, because they are so insistently exhibited in Paris evening dresses, justly separated discussion. It is to the point to realize that, despite the many different expressions of the draped skirt, insistence is apparent on maintaining a slim silhouette, with most draperies described as being near the hem or at the knees. Even when they fall from the shoulders, the slim silhouette is defined, and, in fact, the draperies are referred to as "vertical pillars" that only tend to emphasize the slim body lines.

Big sleeves and broad shoulders both as reflections of period influences and conspicuous as the chief expression of silhouette that produces any deviations from natural, slim outlines. Sleeve fullness is mostly at the top in puffs and seamings that emphasize width, but wrists are sometimes fitted in long cuffs, fitted over the hand, as well as sometimes bloused, the latter occasionally in bishop effect.

The afternoon dress with street length skirts that may be said to be poaching on evening fashion preserves is one of the most important types that will be unmistakably a prominent development in new collections. Metals are the first decision on these but velvets and even crepes or satins are to be considered, particularly if the last two are made with bodices that are somewhat decollete as to neckline, or done in a way that suggests a "dinner dress" style. The metals are tailored.

Two-piece types are good, in the simpler types, and those of more formal character, introducing embroideries for the latter. The basque-like fitted line above the waistline and the suggestion of a flare to the peplum give this style a newer look.

Ornamental touches besides the aforementioned braid family and colored embroideries, make much of glittering accents, such as sequins, metals and even jewellery stones. The latter are tremendously important in buttons, reviving for that "touch of color" carved jade, coral, lapis lazuli and turquoise. Gold bands are a type by themselves.

Back fullness in some daytime skirts, particularly the afternoon models that embrace circular cut, is within the picture of slim lines generally emphasized. Front fullness is the other version, and cited particularly in present styles for the effects on waistlines — that is, definitely drawing them up to a higher line at front.

Satin dresses in dark colors or black for dinner wear, just because they offer a contrast to the metals, velvets and other rich fabrics that are prevalent in more formal styles.

Tailleurs re minuit — played up in velvet and metals, but particularly velvet. This formal suit is long skirted, in French presentations, but consideration of it in a street length may be more practical, in view of the new feeling for afternoon dresses of evening type.

Tunics Again !

Very charming and practical for fall days, is this tunic dress of warm-rust colored silk that looks like woolen. It uses jade green for its collar and self-covered buttons.

Cut on the lines of a coat frock, it includes all the tailored smartness in such models.

Easy as A, B, C to make it.

Style No. 2935 is designed for sizes 14, 16, 18 years, 36, 38 and 40-inches bust. Size 16 requires 4⅛ yards of 39-inch material with ⅝ yard of contrasting and ⅝ yard of 35-inch lining for skirt.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of pattern wanted. Enclose 15c in stamps or coin (coin preferred; wrap it carefully) and address your order to Wilson Pattern Service, 73 West Adelaide Street, Toronto.

SCOUTING

A brother to every other Scout, without regard to race or creed

Holland made a bid at the recent International Scout Conference for the next World Scout Jamboree, which will be held in 1937. Decision will be announced early in November.

* * *

Members of St. Faith's Church Scout Troop of Edmonton, as winners of the Alberta junior first-aid shield, were presented with the shield and individual medals by Lt.-Gov. Walsh at a gathering in Masonic Temple.

* * *

A party of Rover Sea Scouts from Cambridge University sailed in a small schooner to take part in the World Rover Scout Meet in Sweden. They went by way of the Kiel Canal, through Germany, where they were given a most friendly reception.

* * *

The 51st Toronto Sea Scouts were presented by Vice-Commodore T. K. Wade of the Royal Canadian Yacht Club with a portable shed, which the boys turned into a combination boat-house and clubhouse on a site at Ashbridge's Bay. The troop owns two boats.

* * *

The 2nd World Rover Meet, or international gathering of Rover Scouts held in Sweden in July, was attended by young men from 24 different countries. Canada was represented by a patrol of five, from different parts of the Dominion.

* * *

"The danger of boys of adolescent age becoming discouraged because of inability to find employment is greatly lessened by Scout training," said Lord Baden-Powell in an address during his recent visit to Canada. "Scouting builds up a boy's character, enabling him to stand up against misfortune, and to look beyond himself," declared the Chief Scout.

* * *

Delegates from 24 countries attended the 8th Biennial International Conference of Scout Leaders held in the Parliament Buildings at Stockholm, Sweden, in August. The assembly was opened by H.R.H. Prince Gustaf Adolf, President of the Swedish Scout Union, and was addressed by Lord Baden-Powell.

* * *

An interesting feature of the annual fall fair at Lloydminster, Sask., this year was the model camp erected by the 1st Lloydminster Scout Troop. Various forms of camp cooking, fires, beds, wash-stands, incinerators, etc., were shown, and attracted considerable attention. The Scouts also operated a checking tent, a messenger service and an information bureau.

* * *

500 boys from the distressed areas of Monmouthshire and South Wales were given a free ten days' Scout camp outing in Devonshire this summer. The outing was made possible through the co-operation of the King George Jubilee Trust Fund, Major Ralph Raynor, the owner of the property, and the local Scoutmaster. The boys, non-Scouts, who had never been camping before, came in batches of 250.

HAVE YOU HEARD

"A centipede was happy quite, until
a frog in fun
Said: 'Pray, which leg comes after
which?
This raised her mind to such a
pitch,
She lay distracted in the ditch considering how to run."

BURLEY TOBACCO MARKETING SCHEME

The Burley Tobacco Marketing Scheme has been officially approved upon the recommendation of the Dominion Marketing Board. The scheme relates to the marketing of burley tobacco grown in the Province of Ontario, and is, in most respects, similar to the Flue-Cured Tobacco Marketing Scheme.

There has been a lack of coordinated action in marketing which has led to most unsatisfactory returns to the producer, according to the Dominion Marketing Board, and it is believed that improved conditions will result from the operation of the scheme. By a system of crop appraisal and the providing for negotiations between producers and buyers it is contemplated that price stabilization will be achieved.

The local board will consist of fifteen members representing Burley Associations, packers and manufacturers. There is a Provisional Board named to hold office until the Local Board is elected in October. The Head Office of the local Board will be in Chatham, Ont.

5,966 Novels

Library At Wallaceburg Presents Report For Two Months

Wallaceburg — During July and August Wallaceburg book readers took out a total of 5,966 novels from the public library, Miss Della Gibb, librarian, reported at a recent meeting of the library board.

The two months saw 4,987 fiction editions removed. Fifty-four books on general arts were taken; 23 on philosophy; 14 on religion; 268 on sociology; 234 on natural science; 45 on useful arts; three on fine arts; 69 on literature or philology; 36 on history 71 on travel; 16 on biography, and 146 books of reference.

The total receipts for the two months amounted to $22.61. Twenty-eight new applications were granted; 76 applications renewed, and 102 cards cancelled. During July there were ,1276 borrowers, and during August 2,179. The books kept in circulation through repair totaled 314, and the books added to the library, 13.

Canada's Prairie Provinces

Ottawa, Canada—Great progress in agricultural development has been witnessed in the Prairie Provinces of Canada during the last 35 years. During the years 1901 to 1931 the area of occupied farm land in the prairie region increased from 15 million acres to 110 million acres, or more than sevenfold. In 1901 the Prairie Provinces contained 24.3 per cent of the total occupied farm acreage in the Dominion and by 1931 this acreage had increased to 67.3 per cent. of the total. In the same period the improved farm acreage increased from 18.5 per cent. to 69.8 per cent. and the field crop acreage from 18.2 per cent. to 69.1 per cent. The decade 1901 to 1911 witnessed the greatest expansion, due to the rush of homesteaders into Saskatchewan and Alberta. Occupied farm land increased from 15 million acres to over 57 million acres. Of the improved land in the Prairie Provinces in 1931, 67 per cent. was in field crops.

Farming in the Prairie Provinces comprises four more-or-less distinct types—wheat growing, mixed farming, dairying (usually associated with mixed farming), and ranching. Wheat growing predominates in southwestern and central Alberta, throughout the whole of Saskatchewan except the northern, and eastern fringe and the dry belt, and in southern Manitoba, although in the latter area, the proportion of other cereals and forage crops is growing rapidly. Mixed farming is found in northern and western Alberta and in the northern and eastern parts of both Saskatchewan and Manitoba—in other words over practically the whole of the park belt. Mixed farming is also the dominant type in the irrigated districts. The greatest development in dairying has occurred in eastern Manitoba, northeastern Saskatchewan and northwestern Alberta. Ranching is practically confined to the dry area in southwestern Saskatchewan and southeastern Alberta and to a strip of land extending from the international boundary northward along the foothills to beyond Calgary.

Another View On Abyssinia

With correspondents writing daily their impressions of Abyssinia, the reader has collected a more or less jumbled picture. Therefore, it is with a distinct sense of relief that one reads the first-hand testimony of one who is, so far as can be judged, a truth-seeking witness. Mr. Dadiclac Farago, a young Hungarian journalist, was asked by his chief if he could be ready to leave at ten days notice to act as war correspondent in the obviously imminent war.

He arrived at the capital settling in a hotel where the bathroom contained every possible requisite for a bath except water.

He writes of his first visit to the law courts:

"Executioners entered and held a glowing iron on the thief's forehead. the swindler was bound hand and foot and laid on the ground. Then the real work began. Brandishing hippopotamus whips, a metre long, they came down once, twice—twenty-five times, until full justice had been done. The liar's ankles were tied loosely together with a chain, and so he had to stay until the end of his sentence. Hundreds of these offenders are to be seen in the streets, hopping along.

When bandits become particularly active in the provinces, a punitive expedition may be dispatched to the infested area to hang everyone it can catch, regardless of guilt or innacence.

Everywhere, with one immensely important exception, Mr. Farago found corruption, laziness, crafty stupidity, obstruction, ignorance and delay. The exception was the Emperor himself, Haile Selassie, King of Kings, Lion of Judah. He is cultured and enlightened, the personification of the modern Abyssinia that he is trying, against almost overwhelming odds, to create. He is unique. And he is desperately, and tragically, alone. Nothing can happen without the Emperor. Everything must be planned, organized, and carried out by him.

Amidst the thousands of screaming beggars, servants, parasites, soldiers, and lazy ministers, amidst decaying buildings and gorgeous gilded halls, the Emperor of Abyssinia leads a lonely life. He is the most hard-working citizen in the country, rising at 4 a.m. and receiving the first interviewers of the day an hour later.

And he has several powerful enemies. The first of these is the Force of Tradition which, in every country and in every century, is a deadweight of inertia. There are always diehards who believe that what was good enough for their fathers will be good enough for their children. There is a strong Conservative wing among the lesser Abyssinian chiefs who regard the Emperor, with his new-fangled ideas and his dangerous desire to abolish slavery, as a sort of home-grown Bolshevik.

Then there is the Church.

And as if that was not enough for any man to face, a new enemy is massing all the blessings of civilization—bombs, gases, tanks, chemicals, and shells—upon his frontiers.

Mr. Farago in sizing up the chances of the two armies has some very clear cut views:

Italy's capacity to defeat the Abyssinians is aided by the lack of rifles and ammunition at the disposal of the Negus and the appalling difficulties of transportation owing to the almost complete absence of roads. There are also a number of chieftains who will undoubtedly go over to Italy, leaders of tribes which are not, strictly speaking, Abyssinian at all. Again the Emperor has no medical equipment and no doctors. "We are all going out to die," said a cultured Abyssinian to Mr. Farago.

On the other side of the picture are some of the difficulties which the Italians will encounter. Grim, waterless places. Mr. Farago took a trip to see these two provinces for himself and here is his description:

"Ogaden looks as if it had already been rent by war. There are deep ruptures n the ground that look like natural trenches, but are only the result of the perpetual drought . . . sand desert follows on stony desert, bush on steppeland . . . in these pitiless surroundings live fierce men and wild beasts.

There is ample opportunity for ambush among the rocks and cactus and the whole province is ideal for guerrilla warfare of the savage and merciless type that the Spanish peasantry employed with such deadly effect against the French invaders in the Peninsular War. And if the Abyssinians can be persuaded by their shrewd military adviser, General Virgin, of the Swedish Army, to adopt this form of tactics, Italy's task will be impossible.

THE PSYCHOLOGY OF FELLOWSHIP

For those with grievous troubles, the friendly atmosphere opens the gates for relieving mental pressures. It gives men a chance to get problems "off their chests" and thereby obtain a new grasp on themselves. We have all seen this work out: we seldom, if ever, stop to realize how psychologically sound and how humanly important it is. —Dr. Amos O. Squire, former chief physician at Sing Sing prison.

Queen Victoria's Voice Survives in Message to King

Writes the Manchester Guardian:—"Some time in the eighties a Mr. Gouraut, agent of the Edison-Bell Company, introduced the first phonograph into England. Queen Victoria consented to allow her voice to be recorded, and chose for the subject of her speech a message of goodwill to the Emperor Menelik of Abyssinia. This was dispatched to Abyssinia by special courier, with the instruction that when the Emperor had heard it it was to be destroyed.

A few days ago a record of this message was discovered in the storerooms of the company in London. It was covered with fungus, and so far only the words "the goodwill of my people" can be heard. It is hoped, however, that by a careful system of cleaning and electrical amplification the whole message will be audible. If this is achieved the sound will then be transferred from its old-fashioned cylinder to a modern disc record.

An official of the Edison-Bell Company said last week: "Three cylinders of every speech were always made on the old phonographs, and we thought that all three of Queen Victoria's message had been destroyed. However, one has been found — presumably the one which Gouraut kept in his possession, since all traces of the one sent to Abyssinia and Queen Victoria's copy have been lost. We are waiting now to hear what the whole message reveals. We cannot say whether the record will be sold to the public, in view of the Queen's command that it should be destroyed when the Emperor had heard it."

There could not be a more appropriate moment than the present to hear an English Sovereign's message to Abyssinia.

In the same old record-box in which Queen Victoria's record lay records of the voices of Florence Nightingale, Disraeli, and Gladstone have also been found. Florence Nightingale is speaking on nursing and on cancer.

It is recorded in the official documents of the Edison-Bell Company that Mr. Gouraut introduced the phonograph at a dinner in London at which many celebrites were present. Among others, Gladstone and Disraeli were asked to record their voices. Disraeli spoke of "the possibilities of this marvellous speech-carrier," but Gladstone was so eloquent in his prefactory remarks that before he had begun his set speech for recording the cylinder on the phonograph was seen to be finished. Mr. Gouraut, however, was not put off by this, and called on him the next morning. He found him in bed, whence Gladstone recorded a message of thanks to Mr. Edison-Bell for enabling him to record "the relic of an organ the employment of which has been overstrained."

Records have also been discovered of the voices of General Booth and Lord Rosebery, although it is not yet known that these are in good enough condition for amplifying and recording.

The company hope that they may find other records made late last century, as there are still parts of their storerooms unexplored.

It is not fit the public trusts should be lodged in the hands of any till they are first proved and found fit for the business they are to be entrusted with. — Mathew Henry.

The contemplation of celestial things will make a man both speak and think more sublimely and magnificently when he descends to human affairs.—Cicero.

Canada's Fisheries Show Improvment

OTTAWA, Canada. — In common with others, Canada's extensive fishing industry suffered as a result of the recent world-wide trade recession, but statistics for 1934 indicate that the tide had turned and some betterment was under way. Persons employed in the fishing industry in 1934 numbered 83,396 compared with 79,548 in 1933 a gain of 5 per cent. Capital investment in plant, gear, and equipment in use in the industry rose from $40,914,057 to $43,377,531, an increase of 6 per cent. Marketed value of the production from inland fisheries showed an increase of about 18 per cent., amounting to $4,780,585 compared with $4,063,358 in 1933. Marketed value of the sea fisheries production was 26 per cent more than in 1933, amounting to $29,341,386 compared with $23,433,588.

The biggest single gain in marketed value in 1934 was $3,166,600, recorded by the salmon fishery. Most of this gain, or $2,998,000 was accounted for by the increased output of canned salmon in British Columbia. The cod fishery, mainly an Atlantic coast fishery, contributed an additional $728,800 to the marketed value. Lobsters accounted for an extra $'45,400 and the returns from British Columbia's pilchard industry were greater by nearly $472,500. Many other varieties in both sea and inland fisheries also made substantial gains in marketed values.

Veteran Tram Driver Says Women Are Bad Pedestrians

Halifax—After watching traffic from street car cabs for 42 years, grey-haired Thomas McLaughlin has come to the conclusion that women make worse pedestrians and automobile drivers than men.

"The men are better drivers," he says. "A woman gets all muddled up when anything goes wrong."

About women pedestrians:

"They will go across the street regardless. Men are more cautious. The women seem more independent. But, of course, children take the cake. You have to watch for them every minute."

The veteran tram driver should know. Since 1893 he has travelled 2,2500,000 miles to nowhere in particular, averaging around 150 miles a day. He does considerably less than that now on Route No. 2 here—82.72 miles a day.

News And Information For The Busy Farmer

Furnished by the Ontario Department of Agriculture.

Storing Poultry Meats

Experiments are being conducted at the Central Experimental Farm, to determine the optimum storage temperature of poultry meats and the most satisfactory method of packing them. hTe information thus obtained should prove valuable to those placing poultry on local or export markets. At present it is recommended that commercially packed dressed poultry should not be held longer than two or three weeks at temperatures above 32 degrees F.

Storing Potatoes

When going into storage, potatoes should be as dry as possible. All diseased or damaged tubers should be storted out. The best storage temperature is from 33 degrees to 35 degrees F. Storing potatoes in the basement of a dwelling house is not, as a rule, satisfactory, owing to the difficulty of providing proper ventilation. Many thousands of bushels of potatoes are lost each year through storing in faulty cellars, closely constructed bins, and where the temperature is too high.

Handling Eggs

Eggs should be collected at least once daily, and during very cold and very warm weather, collections should be made at non and night to avoid freezing or heating. The eggs should be taken at once to a cool cellar, where there is a fairly uniform low temperature. It may be advisable to open one or two windows and substitute screens covered with cheesecloth to carry off odour or excessive moisture. Dirty eggs should be cleaned with coarse sandpaper, but not washed. Stains may be removed with a little vinegar on a clean cloth. Washing eggs destroys the protective coating and lowers the grade.

Current Crop Report

Threshing operations have been slower than usual, due to the bulkiness of the harvest. Canners are now competing a satisfactory pack of corn and tomatoes. Fodder corn is being cut, the yield is above average. Late potatoes give poor promise. Recent tests show a reduced sugar content in the sugar beet crop, but the tonnage is expected to be well above that of last year. Early varieties of apples, while smaller than usual, are a good yield. Later kinds are patchy and yields will be light. Plums are being shipped to Great Britain in large quantities. The pear crop is below normal. A large percentage of an exceptionally good tobacco crop has been safely harvested. It is estimated that the yield for the Norfolk area will be around 30,000,000 pounds, with the quality on the whole well above average.

Crop Proddction

The Department gives the total production of spring wheat in 1935 as 1,867,000 bushels, as compared with 1,803,000 bus. in 1934. The oat harvest will yield 87,224,000 bus an increase of 5,698,000 bus. over last year. The average yields are slightly in advance of 1934, that of sprin gwheat being 18.9 bus. per acre, as against 18.7 last year, and an average of 19.6 ror the past decade, and of oats, 36.7 bus. compared with 34.1 in 1934, an average of 34.8 for a ten-year period. As for barley, during the last 10 years, the crop has averaged 15,945,000 bushels. hTe production this year, the report says, will be 17,050,000 bushels, an advance of 2,308,000 over last year. A near-record crop of hay and clover is reported. The weather and other factors have, however, brought, in some sections, grains to too rapid maturity, and have adversely affected the late potato yield and root crops, as well as the sugar beet and tobacco production.

The Time for Culling

According to most practical poultrymen, culling should be a continuous and constant process. All the birds that are poor doers, either hens or pullets, should be eliminated before they become seriously ill, and used as market birds. In chicks these can be determined by slow growth, small shanks, shallow heads, narrow backs, etc. Hens that stop laying early should be culled out. Those which show evidences of anaemic qualities should be culled out. Every bird that is doing poorly should be culled out for the mere fact that, if not culled out, it is liable to contract disease more easily than those that are doing well.

Hens should be culled out from the middle of May on. Those which stop laying the last of May and during June, July and August certainly should be eliminated and those which lay into September, October and November should be kept for breeders. If you want next year 50 breeders in a general way, keep the 50 that stopped laying the last. Of course, always cull for disease.

Cull the Poultry Flock

Poultryme are advised to cull their pullets before putting them in the laying pen for the winter. All undeveloped pullets should be prepared for market, as they would make poor producers. Birds which appear to be unthrifty should also be removed. If yearling hens are to be kept over to serve as breeders in the following spring, and no trapnest records are available, cull out all birds which are early moulters, those showing yellow shanks or beak those showing coarseness in the head and those possesing hardness or excessive fullness in the abdominal regions. The best layers are the late moulters, which wil be found in broken or ragged feather at this season. They will possess clean-cut heads, bright, prominent eyes, lack of yellow pigment in beak, legs or flesh colour, and above all, they will have abdomens which are soft and pliable. Rely on these late layers for your future breeders.

Transplanting Trees

When trees die after transplanting, the cause may often be ascribed to lack of sufficient care on the part of the transplanter. Trees and shrubs should be dug out as carefully as possible so as to retain a large proportion of the roots. The more roots there are, the greater the chance the plant has of living. The roots should not be allowed to become dry from the time of digging until the trees are in ground again. They may be protected from drying in tranit by protecting them with wet moss or wet sacking. If the roots of evergreens, especially pines, become dry even for a short time, the trees are almost sure to die. When planting, a hole should be dug, large enough so that the roots may be spread out and not crowded or doubled up. The hole should also be deep enough so that the tree will be one or two inches deeper than it was in the woods or nursery. If the soil is at all poor, it should be discarded if possible, and the hole filled with good soil which should come in close contact with the roots and be trodden down. Manure should not be put in the hole with the soil, as it may burn the roots or make the soil so loose that it will dry out easily.

1700 DEAD AND WOUNDED AS WARFARE DECLARED IN ETHIOPIA

An announcement today said 100 houses at Adigrat and 15 at Adowa where Ethiopia crushed the Italians forty years ago, were destroyed. Casua'ties were unknown, the announcement said, but it was believed the Italians occupied the entire town of Adowa.

Fighting was reported under way near Adowa. The Reuter's correspondent said Italians were retreating in that section under cover of their aeroplanes.

(Italian officials in Rome admitted an advance, but denied towns had been bombed. The Exchange Telegraph Agency in London reported 1,700 persons had been killed and wounded in the bombardment of Adowa).

The Ethiopian Government said women and children were killed in the bombardment, and a Red Cross hospital was made the target of bombs.

Ethiopians said they believed inhabitants were not warned of the attack, and that it was intended to invite reprisals on Italians in this country in an attempt to justify an Italian invasion.

The Government announced that a battle is in progress in Agame Province, between Eritrea and Adowa.

You'll like this sturdy little stove. It meets practically every cooking need in kitchens, cottages, home laundries, dairies; in fact, any place where clean, quick cooking heat is required. Carry and use it anywhere. It makes and burns its own gas from untreated motor fuel. Lights instantly with a clean, blue-gas cooking flame. Available in Maroon Brown baked enamel or Soft Green porcelain finish. Priced surprisingly low.

MR. HENRY O'SHAUGHNESSY

The death occurred on Monday, September 30th, 1935, of a well known and highly respected citizen of Williamsburg, in the person of Mr. Henry O'Shaughnessy, at his home there.

Mr. O'Shaughnessy, an only child of the late Mr. and Mrs. Henry O'Shaughnessy, was born near Williamsburg sixty-two years ago. His parents died while he was quite young, and his uncle, Mr. Adam O'Shaughnessy of Elma, raised him to manhood. Following his marriage to Miss Elizabeth Warren of Elma, they resided on a farm near Elma for several years. Later disposing of his farm, they moved to Massena, N.Y., where they lived for a few years prior to their coming to Williamsburg about three years ago to reside.

Deceased, who had not enjoyed good health for the past few months, gradually became weaker and passed away on the above date.

A man of genial temperament and kindly nature, he had many friends in this district, and his death is deeply regretted.

The funeral service on Wednesday afternoon, attended by a large circle of relatives and friends, was held from his late residence to the United Church in Williamsburg, thence to the family plot in the cemetery at Massena, N.Y., for burial. The service was conducted by his pastor, Rev C.A. Adey. During the service, by request, Miss Helen Becker rendered a solo, "How Beautiful Heaven Must Be," and the choir in attendance, in addition to the hymns, sang "The Old Rugged Cross," with Mrs. Jas. McMillan presiding at the organ.

In addition to his widow, he is survived by one son, Fred O'Shaughnessy of Massena, N.Y., and one daughter, Mrs. Harold Carkner of Massena, N.Y., also four grandchildren.

The pall bearers, all close neighbours of the deceased, were Messrs Orlin P. Becker, Hugh Thompson, George Buchan and Saxon Casselman.

The sympathy of a large circle of friends is extended to Mrs. O'Shaughnessy and family in their sad bereavement.

MRS. W.J. BELL DIES OF BURNS

Editha Maude Johnston, wife of Prof. W.J. Bell, principal of Kemptville Agricultural School, and one of the most beloved women in Eastern Ontario, passed away Tuesday afternoon at the Ottawa Civic Hospital from burns suffered on Sunday at her home in Kemptville, when her clothing caught fire as she was lighting the furnace. Mrs. Bell was found unconscious on the lawn at her home, near a door leading from the basement, her clothing charred, and her body terribly burned. She was found by her husband, whom she had told earier in the day that she intended to light the furnace. She was immediately rushed to the hospital, but from the first little hope for her recovery was held.

Mrs. Bell was a lovable woman, and during her 18 years residence at Kemptville won a host of friends in Eastern Ontario. At many gatherings held at the agricultural school since its establishment, Mrs. Bell was always an excellent hostess.

She was 60 years of age and was born near Orangeville, Ont. For some time prior to her marriage 30 years ago, she was librarian in Toronto, and when the Kemptville Agricultural School was first established and her husband received the appointment of principal, she took up residence with him in Kemptville, and has resided there since.

In addition to her husband, she leaves two daughters, Mrs. (Dr.) William Gordon, at present in England, and Miss Frances Bell, of Kemptville; and two sisters, Mrs. Griggs, of Toronto, and Mrs. Simpson of Orangeville. News of the sad affair was cabled to Mrs. Gordon, who sailed for home at once.

The funeral service was held on Wednesday afternoon at St. Paul's Presbyterian Church, Kemptville, and the funeral was held Thursday morning, the body being taken to Toronto, and thence to Forest Lawn cemetery, Orangeville, where burial was made.

MR. ALBERT JOHNSTON

The death occurred at the home of his nephew, Leonard Bateman, Mariatown, on Thursday evening, Sept. 26th, of Albert Johnston, in his 77th year. Deceased was born April 20th, 1859, near Brinston, a son of the late John Johnston and Sarah Steinburg. For a number of years he resided at Stampville, and on failing health three years ago, took up residence with his nephew, Mr. Leonard Bateman, and Mrs. Bateman, where he has since made his home. His sudden death came as a great shock to his many friends.

He leaves to mourn his loss his only brother, John Johnston of Brinston; several nieces and nephews including: Mr. and Mrs. Leonard Bateman, Miss Iva Keck ofCardinal, Miss Alice Keck, Dixons Corners, Percy and James Keck of Brinston.

The remains rested at the home of his nephew until Saturday morning, Sept. 28th, when they were removed to Wallace's Funeral Home, Brinston, where a service was held at 2 p.m., conducted by Rev. E.C. Lacey of Brinston United Church. The choir furnished music, Mrs. Chas. Strader and Mrs. C.E. Collison singing a duet. A number of friends from Morrisburg, Stampville and Brinston attended the service.

The pall bearers were Messrs C.B. Carter, Harold Coyle, L. Duvall and Mr. Cramer of Mariatown; Mr. H. Shaver and Mr. Chas. Janack, of Stampville.

Floral offerings included a wreath from Mr. and Mrs. Leonard Bateman and Dorothy; sprays from Mr. C.B. Carter, Mr. and Mrs. Earle Carter, Mr. and Mrs. H. Coyle.

Interment was made in Brinston cemetery.

MR. T. C. MERKLEY

Mr. Thomas Chesley Merkley, a highly respected and lifelong resident of Boucks' Hill, passed away at the Cornwall General Hospital on Friday last, Sept. 27th. After an illness extending over a year, Mr. Merkley was removed to the hospital on Wednesday for observation and treatment, but passed away on Friday. He was a son of the late Henry Merkley and his wife, Nancy P. Barkley, and was born at Boucks Hill on March 15th, 1857. He had spent his entire lifetime in the district where he was born, and for several years served as a member of Williamsburg Township Council. Mr. Merkley was also a member of the Canadian Order of Foresters.

The funeral was held on Monday afternoon from his late residence to the United Church, Williamsburg, where his pastor, Rev. C.A. Adey, conducted the service. The choir was in attendance, with Mrs. James McMillan presiding at the organ. During the service, Misses Rose Hill and Helen Becker rendered a duet, "Sometime We'll Understand."

On Feb. 9th, 1881, Mr. Merkley married Miss Ellen Louise Fetterly, who survives, with three daughters: Mrs. Albert Barkley of Wausau, Wis. Mrs. Roy Watson of Madrid, N.Y. and Mrs. Wm. Carr of Williamsburg, and one son, Stephen Sharp Merkley of Madrid. Also surviving are two sistetrs, Mrs. Julia Barrigar of Chesterville, and Miss Nancy Merkley of Winchester; one brother, Mr. Abram Merkley, Chesterville; eleven grandchildren and four great grandchildren. Mr. Merkley was predeceased by one sister, Hannah Merkley, and six brothers: Michael, Joseph Sydney, Collin, Peter and Nathaniel Merkley.

The high esteem in which Mr. Merkley was held was made evident by the beautiful floral tributes from Mr. and Mrs. Albert Barkley and children, Mr. and Mrs. Stephen Merkley, Mrs. Roy Watson, Mr. and Mrs. Wm. Carr, Mrs. Wesley Reddick and Mrs. Sophia Starbird.

Four grandchildren acted as pall bearers, namely, Hadwin Merkley, Dwane and Emerson Carr, and Basil Watson.

Among the friends who attended the funeral, were: Mr. and Mrs. Jas. Hess, Mrs. Cecil Hess, Kemptville; Mr. Ed. Barkley and son, South Mountain; Mr. and Mrs. Wesley Reddick, Mrs. Geo. Froats and Mrs. Ellen Lane, Aultsville; Mr. Elmer Sullivan, Mr. Morley Sullivan and Mrs. Graham, Hulbert; Mr. John R. Fetterly and Mrs. Sophia Starbird, Morrisburg; Mr. and Mrs. Chas. McCain of Fort Covington, N.Y.

Following the funeral service, the remains were conveyed to Madrid, N.Y., for burial.

MORTGAGE SALE

Pursuant to an order of the Supreme Court of Ontario, dated the 21st day of September, 1935, and to the Power of Sale contained in two certain Mortgages which will be produced at the time of Sale, there will be sold by Public Auction, at the Law Office of Irwin Hilliard, K.C., Morrisburg, Ontario, on Friday, the 25th day of October, 1935, at two o'clock in the afternoon, the following lands and premises, namely:

ALL AND SINGULAR those certain parcels or tracts of land and premises situate lying and being in the Township of Williamsburg in the County of Dundas, and being composed of, **firstly**, the West Half of the east Half of Lot number Four in the Second Concession, containing fifty acres more or less; and **Secondly**, the East Half of the 2½ acres of the North end of the North West Quarter of Lot Three in said Second Concession as fully described in the said Mortgages.

Upon said lands are a dwelling house and barn.

The soil is clay loam.

The property is situate not far from King's Highway Number 2.

TERMS—15 per cent of the purchase money to be paid down on the day of Sale to the Vendor's Solicitor, and the balance within 30 days thereafter without interest.

The property will be offered for sale SUBJECT TO A RESERVED BID.

Further particulars and conditions will be made known on day of Sale and on application to the undersigned.

Morrisburg, September 25th, 1935.

IRWIN HILLIARD, K.C.,
Solicitor for the Mortgagee.

dc

WORLD SERIES BASEBALL

The world series baseball games are now in full swing at Navin Field, Detroit, home of the American League champs, Detroit Tigers.

In the two contests played to date, each of the contending teams, the Tigers and the Chicago Cubs, have taken one fall. The Cubs won the first on Wednesday, 3-0. The Tigers came back yesterday with an 8-3 win over the National Leaguers. To the two successful pitchers goes the major share of the credit. In the series opener, Lon Warneke, of the Cubs, held the Bengals well in check whilst his teammates pounded the famous "Schoolboy" Lynwood Rowe for two runs in the first inning and a homer, by Frank Demaree, in the ninth. Yesterday, on the other hand, little Tommy Bridges, 150-lb. mound ace of the Tigers, allowed only six hits by the Chicagoans, while the Tigers did a little fancy hitting themselves. Besides Bridges, yesterday's stars were Charlie Gehringer, who drove in 3 runs and scored twice himself, and Hank Greenberg, who smacked a homer into the open stands off left field, scoring Gehringer ahead of him.

Today's pitchers will be: Tigers, Eldon Auker; Cubs, Bill Lee.

25th WEDDING ANNIVERSARY OBSERVED

Miss Cassie Whitteker and Mr. James Whitteker were hostess and host recently at a delightfully arranged surprise dinner party at the honour of their twenty-fifth wed- Herman E. Whitteker, Cornwall, in honor of their twentwy-fifth wedding anniversary. The 12 o'clock dinner table was centered with a beautifully decorated wedding cake, and adorned with pink tapers in silver holders.

Mr. Whitteker is a son of Mr. Herman J. Whitteker of Williamsburg, and the late Mrs. Whitteker, while Mrs. Whitteker was formerly Miss Jean McNeil of Oxford Mills.

The guests of honor were the recipients of a beautiful bouquet of cut flowers, being a gift from their daughter and son, Miss Cassie and Mr. James Whitteker. They also received many messages of congratulations from relatives and friends.

Among the guests were Mr. Whitteker's father, Mr. Herman J. Whitteker, the Misses Meda and Sarah A. Whitteker, and Mr. David L. Collison, all of Williamsburg.

"THE *Value* OF YOUR TELEPHONE IS JUST WHAT YOU MAKE IT"

The GREEN GHOST

by Stuart Martin

SYNOPSIS

Maud Barron awakes with a premonition of disaster. She hears padding footsteps. Rushing into her father's study she finds him dead.

Dr. Sidney Foster, a friend, is joined by Detective "One Eye" Uttock, a mulatto, who has never lost a man.

Maud Barron and Hughes return to England. Dr. Foster gives Maud his address in case of need. He receives a telegram informing him "The Ghost" has reappeared.

"I will take over your case," he said, in his professional manner, "and I do not doubt that we shall be able to put an end to these disturbing visitations. For the meantime your best plan is to get as much rest as possible, and don't let it worry you."

He waited for a little longer, and then intimated that he would write out a prescription which one of the servants was to take to a chemist.

He strolled out to the front of the house. He did not intend any elaborate scrutiny of the place just then, nor did he have the opportunity for it, for as he was walking slowly along the gravel path he heard footsteps coming round the corner of the house. William Hughes appeared next moment.

He did not seem surprised at meeting Foster, and the latter was glad to see that his manner was more possible than it was at their last meeting.

"I heard you were up seeing Miss Barron, doctor. How do you find her?"

"Very much upset and not in a condition to be disturbed, Mr. Hughes."

"You think she takes these nightmares seriously?"

"They are not nightmares, Mr. Hughes."

"You won't make me believe otherwise, doctor, with all your seriousness. Look here, man, just think it out in a commonsense way. Her father had the same delusions—"

"He died because of them, anyway, and there was the photographic print to show."

"Oh, well, that print never meant much. I won't insist on my point of view that he killed himself. It doesn't matter much now, does it? But it looks as if Maud has taken on his pet delusion, and I am very sorry about it."

"I regret I cannot discuss with you what is, in some respects; a problem for my profession."

At that Hughes's eyes gleamed, but he mastered whatever emotion stirred him and with some deliberation lit a cigarette.

"You will at least give me credit for having Miss Barron's health one of my chief concerns," he said in a low tone. "She and I will be married as soon as possible."

"I was not so well informed as to know that," said Foster, wincing a little. "But I congratulate you."

"I do not intend to go into matters that do not concern you, Foster, except to mention it. But you will see that under the circumstances I have a right to make my views known. You have been sent for; and now that you have made your call I do not see there is any need for you to stay. If we want you again we shall let you know."

Sidney Foster's face went a shade pale at that, but he kept his balance well.

"I am again sorry that I cannot accept your suggestion, Mr. Hughes. I have been asked to take this case over, and I have given my word to do so."

"Indeed!" Hughes flung out sharply. "But we have a doctor already. I myself engaged one this morning."

"But I repeat that I have been asked to take the case and have accepted it."

Foster's Evening Stroll

Foster passed on, biting his lip, and as he turned the corner of the house he felt the eyes of Hughes boring his back with all the intensity of open antagonism.

So now the gauntlet had been thrown down. He and Hughes could not work together unless there was some radical change in circumstances; but his own position was a delicate one and he knew that he would in future be constantly on his guard to steer a course that would avoid a rupture.

Had Hughes any hold on Maud Barron? How did it come about that this secretary could talk so confidently about marrying her within so short a time since the murder of her father? Why was it that Maud Barron had asked him to come and help her now the green ghost had appeared once more? Was it that she had no confidence in Hughes. If so, why was she marrying him?

The questions drummed into Foster's brain with hammer strokes. He drew out his watch and saw that there was still some time before dinner. His mind went back to One-eye, the mulatto detective, and the similarity of the situation over in Jamaica. If this was a case of devilish Voodooism in quiet Surrey then One-eye ought to know that the manifestations were at work again. Foster walked swiftly along the drive and went out to the main road. He boarded a 'bus going towards Surbiton and at the post office there sent off a short cable to One-eye informing him of the position. He left the wording in such a way that the mulatto might deem it worth while to come to England, for there was no detective in Britain who would, or could, bring such knowledge to bear as the mulatto possessed. Then he returned to Shirley.

He had still half an hour or so to employ before dinner, and he employed it by examining the precincts of the house, carefully watching for footprints, but there was not a sign. The only marks he observed were two small holes, about two inches in diameter, as if the high heel of a lady's shoe had been planted in the soft earth. But these two holes were at a distance from each other of about seven feet.

Directly under Maud Barron's bedroom window, however, a flower lay broken and crushed into the earth. It had been pressed by a weight into the ground. Foster bent down to examine it. He saw that a little loose mould had been carried to the path and lay in a tiny heap. In the middle of the heap was a small dent similar to the two holes he had already noted. "The gardener has been using a flower stick," he thought; and to make sure he went round and found the gardener in one of the hothouses. But the gardener said that he had not touched the flower border, nor had he been using any sticks in that position. As for the broken flower he looked at it scornfully.

(To Be Continued.)

No Words are Found

Mary Constance Fowler in Spirit

Never to step upon the fragrant shore
The far eye follows as the vessel drifts,
Is to have known what lies there little more
Than birds know further than the pinion lifts.
Only in loving may the heart know love
Their countless words, who sing, are mourning tales
Of dim-remembered dreams, where shadows move.
Unknown to day; and daylight telling fails
Yes, spell out color in a blind man's hand,
An for the deaf turn color into sound;
Do these. There are no words, though they are sand,
To tell love to the loveless. None are found.
And to be loved, not loving, is but to know
The sun is heat upon the lids, not light.
Therefore the smile is secret, the tongue is slow
And falters, seeking words to translate sight.

In Wrong Pew

A minister consented to preach during his vacation in the country at an Episcopal church. When he arrived at the church on Sunday morning the sexton welcomed him and said: "Do you wish to wear a surplice, sir?"

"Brother," replied the minister, "I am a Methodist. What do I know about surpluses? All I know is about deficits."

Mose Good Provider

Judge: "Mose, is your wife dependent upon you?"

Mose: "She sho is, jedge. If I didn't go out and get de washin's she'd starve plum to death."

Gable and Young

One of Jack London's best known books, "The Call of the Wild", now comes to the screen and has every known element to appeal to every movie fan. Clark Gable and Loretta Young are perfectly cast and Buck, the dog, will win everyone.

THE WORLD'S SIXTH POULTRY CONGRESS

The preliminary announcement of the World's Poultry Congress which meets in Berlin next year has just Ebeen published. Congress sessions will be held in the "Opera Kroll" and will be officially opened on July 24th by Chancellor Adolf Hitler.

During the Congress the afternoons will be devoted to excursions to places of interest within the city of Berlin and outside. At the close of the Congress the delegates will attend the opening ceremonies of the Olympic Games and then take a week's tour through rural Germany, including a trip down the Rhine. A six weeks' trip is being arranged for Canadians when France, Switzerland and Belgium also will be visited on the Continent, and a few days in England on the way home.

So far the following countries have definitely decided to participate: Canada, Argentina, Australia, China, Czecho-Slovakia, Great Britain, Ecuador, Esthonia, Haiti, Holland, Hungary, Italy, Mexico, Norway, Southern Rhodesia, Sweden, Switzerland and the United States.

Improving Poor Pasture Fields

Both grass and soil from pastures that have been grazed for a number of years without manure or phosphate applications will show a deficiency of phosphorus. Even if most of the droppings of grazing animals are returned to the pasture there is a net loss of phosphorus in the production of live stock and their products. This continued removal of phosphorus, never very abundant in the soil, soon becomes a limiting factor in the growth of desirable pasture crops, particularly the legumes. The failure of legumes, and particularly white clover, due to phosphorus deficiency, contributes further to the thinning of the grasses dependent upon the legumes for nitrogen.

Superphospate (acid Phosphate) is the first fertilizer material to use and the one most likely to pay through stimulation of both legumes and grasses. Application of 300 to 500 pounds of 20 percent. superphospate per acre or its equivalent is recommended and should last from three to five years.

Commercial nitrogen in addition to superphosphate, applied at the rate of 150 to 200 pounds per acre as soon as growth starts in the Spring, will advance grazing from one to two weeks. To avoid burning the tender leaves, apply when the pasture is dry.

Under conditions where very few desirable pasture plants remain it may be better to plow, fertilize, and reseed the land with an adapted pasture mixture than to depend upon fertilizers alone for rejuvenation.

APPLE COLOUR CHART

There has been a steady demand for the apple colour chart prepared recently by the Horticultural Division, Central Experimental Farm, Ottawa, to assist in the harvesting of McIntosh and Fameuse apples at the proper stage of maturity. This chart may be obtained free on application to the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

ANECDOTES

This story of Mark Twain and the old lady in the Pullman should not be let die—says Cyril Clemens (in "Mark Twain Wit and Wisdom," a splendid collection of 154 stories and anecdotes about the famous humorist who was born one hundred years ago, come November 30 next):

Exhausted to the point of extinction by a very full day in Chicago, Mark boarded the night train for New York and retired to his berth at once for (as he fondly thought) a long night of blissful repose; but just as he was slipping over the border-line between waking and sleeping he heard an old lady's voice wistfully soliloquizing and telling herself how thirsty she was, with the regularity and persistence of the ticking of a clock.

"Oh, I am so thirsty!"

* * *

At last, unable to bear the nuisance any longer, Mark got up in his nightclothes and groped his way the length of the cold, dark car to where the drinking water was kept. Filling a glass, he carried it back to the elderly victim of loquacity and thirst. This good deed done and a payment in heart-felt thanks from the old lady duly pocketed, Mark got back into his berth and pulling the blankets up over his head with a deep sigh of relief and content snuggled down to sleep. But just as the sandman was bending over him a now all-too-familiar and accursed voice began to exclaim and kept it up at minute intervals the rest of the night:

"Oh, I was so thirsty!"

* * *

And here is Irvin S. Cobb's contribution to Mr. Clemens' collection:

A young reporter called one morning as the great humorist lay reading and smoking in bed, and announced that he would like his life-story for his newspaper: Mark Twain took a draw on his pipe and commenced:

"Well, in the days of King George the Third when I was a young man I used to . . ."

"Pardon me, right there," interrupted the reporter. "I know that you are not a spring chicken, but how could you possibly have been living during the time of George the Third?"

"Fine, young man," retorted Mark, smilingly offering the young man a cigar, "I heartily congratulate you. You are the first and only reporter I have ever met in my whole life who corrected a mistake before it appeared in print."

By the way, Cyril Clemens is president of the International Mark Twain Society and a relative of the beloved humorist whose real name was, of course, Samuel L. Clemens.

* * *

Although John Philip Sousa earned a lot of money from his musical compositions, he sold the publication rights of the famous "Washington Post" march—of which millions of copies have been sold — for a mere $35.

"I had no adequate idea of the value of my composition," he explained, "and sold the 'Washington Post' and several others for $35 apiece, and I was also to furnish three arrangements, one for piano, one for orchestra, and one for band!"

* * *

Sousa once had an amusing experience during a visit to Venice with his wife, where they had the delight of hearing Castiglioni's band play "The Washington Post." He relates it in this memoirs, "Marching Along." At the close of the piece Mr. and Mrs. Sousa entered a music store near the bandstand and inquired for "the piece the band had just played." A clerk went over to the bandstand and on his return handed out an Italian edition of "The Washington Post, by Giovanni Filipo Sousa."

* * *

Sousa was much impressed, and after examining it, said to the clerk:

"Who is this Giovanni Filipo Sousa?"

"Oh, he is one of our most famous Italian composers."

"Indeed! I am very interested to hear it. Is he as famous as Verdi?"

"Well, perhaps not quite as famous as Verdi; he is young yet, you see."

"Have you ever seen him?"

"I do not remember, Signor."

* * *

At that point Sousa turned to his wife and said to the clerk:

"Then let me introduce you to his wife: This is Signora Sousa!"

And Mrs. Sousa, in turn, observed:

"Permit me to introduce my husband, Signor Giovanni Filipo Sousa the composer of 'The Washington Post'"

There was much explanation and laughter and then the clerk nobly offered to charge Sousa only the wholesale price for a pirated copy of his own march!

Design for Living

Enough of joy to balance pain,
Something to lose, something to gain.
Someone to love, some one to care,
A simple faith to mold in prayer,
A sense of peace, of sweet content,
To greet the night when day is spent.

Your Handwriting Tells Your Real Character!

By GEOFFREY ST. CLAIR
(Graphologist)
All Rights Reserved.

Recently I seem to have been receiving more letters than usual asking whether I can tell just when marriage might be expected. I would like to be able to answer questions of this kind, but it is quite outside the scope of my work. Questions having to do with fortune-telling are entirely beyond my sphere of influence or advice.

If you ask me to tell you what kind of disposition you have, or your boy friend or girl friend — then I can help you there. Graphology also shows whether a writer is reserved and sensitive, or spontaneous and ardent; greedy and selfish or kindhearted and generous; broadminded and tolerant or narrow-minded and partial; refined and cultured or purely physical-minded and material, and in fact it will reveal the characteristics that go to make up what you are and cause you to act in the way that you do.

Graphology, allied to psychology, plus a smattering of common sense and some knowledge of human nature, will help you immensely in solving the problems that daily confront so many of us.

But it will NOT tell your fortune, nor is it able to pierce the veil that hides Tomorrow from Today. It is based on scientific foundations, and whilst we do not claim infallibility for it, no do I myself claim that all the delineations I make are entirely beyond criticism, at the same time there can be no doubt that it is a tremendous power for good, and a power, moreover, that most people cannot afford to ignore, if they are anxious to make the most of themselves. I have evidence in the form of hundreds of letters that express the gratitude of the writers for helpful advice and guidance. And what has helped so many others, has, I suggest, a message for you, too, if you see it in the right way.

This might also be an opportune time for me to reiterate once more that the advice I give in cases of personal problems is not necessarily final and arbitary. I often have letters from readers of my articles or listeners-in to my radio broadcasts, telling me definitely that they will do whatever I advise. In some cases [redacted] has to do with a choice between two men for a suitable husband for a girl who writes me, and it is a tremendous responsibility to have to shoulder. I am not afraid to give advice when it is asked for or appears to me necessary, but I would like to say that any advice I give is rendered with a view to giving you a new point of view on your problems. If you ponder over it and use it as a basis for finding out the truth for yourself, then the advice will have served its true purpose.

Can Mr. St .Clair give you a new slant on your own character? Perhaps he can reveal some unusual angles about your friends, too. Send speciments of the writing you would like analysed, stating age in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope, to: Geoffrey St. Clair, Room 421, 73 Adelaide Street West, Toronto, Ont. Your letter will be replied to as quickly as is possible in view of the volume of mail that is continually arriving. And your letter will be strictly confidential.

FARM ACREAGE IN GREAT BRITAIN

Occupied Agricultural Land In England and Wales 30,370,000 Acres.

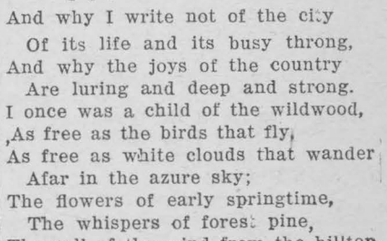
The total area of agricultural land occupied in England and Wales in June, 1935, was 30,359,000 acres, compared with 30,454,000 acres in 1934, a reduction of 84,000 acres or 0.3 per cent. according to a report just issued by the British Ministry of Agriculture. The area returned as under crops and grass was 24,984,000 acres, a decrease of 82,000 acres or 0.3 per cent. Contrary to the general trend in recent years, the total area of rough grazings at 5,422,000 acres showed a small decrease of 2,000 acres compared with the previous year. For the first time since 1918 the steady decline in the arable area has been arrested and there was an increase upon the area in 1934 of 144,000 acres (1.6 per cent.) to 9,394,000 acres; the total arable area is now rather larger than 1932. This increase was due almost entirely to the expansion in the area under clover and rotation grasses. On the other hand the area actually under crops, excluding clover and rotation grasses, at 6,775,000 acres showed a decline of 62,000 acres or 0.9 per cent. on 1934. A further substantial reduction of 15.9 per cent. to 286,000 acres occurred in the area of bare fallow. This was the lowest figure returned under bare fallow for several years. For the second year in succession there was a reduction in the area of permanent grass amounting to 227,000 acres, representing 1.4 per cent, the acreage under permanent grass of 15,554,000 acres being very little more than in 1930.

The total area under cereals declined by 41,300 acres or 1 per cent. to 4,094,600 acres, increases in wheat, oats and rye being more than counter-balanced by a substantion reduction in the acreage of barley and a smaller decrease and there was again a reduction in the area under roots, a small increase in the acreage under turnips and swedes. After a substantial increase in the previous year the sugar beet acreage in 1935 showed a moderate decline. There was a small decline in the area under the four principal vegetables, but a further net increase in the acreage devoted to fruit. The acreage of hops was unchanged.

The Love of Nature

You ask why I write of Nature,
Of bird and blossom and bee;
You ask why the ways of the wildwood
Bring joy to the heart of me—
And why I write not of the city
Of its life and its busy throng,
And why the joys of the country
Are luring and deep and strong.
I once was a child of the wildwood,
As free as the birds that fly,
As free as white clouds that wander
Afar in the azure sky;
The flowers of early springtime,
The whispers of forest pine,
The call of the wind from the hilltop
Were pleasure that all were mine.
The robin securely nesting
On a beam in the old log-shed,
The swallows from homes on the barn eaves
Showing their shining heads.
Where friends and dear companions
To the little country child,
Whose spirit was shy, like the birdling's
That flew through the forest wild.
And when the summer waning
Brought autumn's tender days,
When fields and woods alluring
Were bathed in yellow haze.
The painted leaves, slow drifting
To earth in the sunlight gleams,
The purple haze on the hilltops
Filled life with the joy of dreams.
So must I write of Nature,
So must I sing her praise,
With her I walked and wandered
In the freedom of childhood days.
And in the picture before me
Of tree and blossoming sod,
Of lake and stream and hill top
I can see the hand of God.

—H. B. A.



NO PEP?

When you feel like a log and your muscles tire easily, it's more than likely that wastes that shouldn't be in your body are sending out poisons into your blood. At times like these, take a bubbling, bracing glass of Andrews Liver Salt each day till the trouble clears up. Then take an occasional glass—once or twice each week—and you'll stay perfectly fit. Get Andrews now. Small tin, 35c; Large tin, 60c; Extra large bottle, 75c. Proprietors, Scott & Turner, Ltd., Newcastle-upon-Tyne, Eng. 45

Woman's World

By Mair M. Morgan

No other meat available to the Canadian housewife can claim as much distinction as lamb. Its distinction lies not only in its delicacy of flavor and nutritive value, but also in the great variety of dishes which rely on lamb for their foundation.

Lamb may be enjoyed during every month of the year by every member of the family, from the youngest child to the oldest adult, and in many cases is allowed to invalids whose diet excludes other meats. The question of economy is an important item in these days of abbreviated budgets and the practical housewife who buys her lamb by the quarter will find her meat costs are considerably reduced.

The leg is considered the prime cut for roasting and slicing cold. The shoulder is a less expensive roast but lacks nothing in flavor and nutrition. Chops are choice for grilling, and neck, chuck, rack and flank are best for stews and fricassees. The lamb entree when it is served with such vegetables as creamed or glazed turnips, glazed carrots, spinach, cauliflower, green peas, and potatoes in any form, and trimmed with such dainty relishes as mint jelly, caper sauce, mint sauce, spiced conserves and pickles, need not give place for splendor to any other type of meat.

Here are a few simple, yet attractive and out-of-the-ordinary ways of serving fresh lamb:

Neck Pot Roast

Buy about 4 inches of lamb neck. Brown 1 finely-cut onion 1 cup tomatoes, and 2 tablespoons bacon fat, seared well on both sides.

Wash and scrape carrots, cut in pieces 2 inches long, and add to the pot roast.

Cook in an iron pan or roasting pan until the meat is tender. You may have to add more tomatoes or a little later.

Roast will require about 15 minutes of cooking to the pound.

Boiled Leg Of Lamb

Wipe meat with a clean damp cloth and remove any excess fat. Put in a kettle and cover with boiling water. Boil 15 minutes and drain off water. Cover again with boiling water and bring quickly to the boiling point. Cover kettle, set aside and simmer until tender.

Serve with mint jelly or mint sauce.

Casserole Of Lamb

Wipe 1 lbs. of fresh lamb from forequarters, cut meat in small pieces, put in hot frying pan and turn frequently until seared and browned on all sides.

Cover bones with 1 cup cold water and heat slowly to boiling point.

Put lamb in baking dish, add stock strained from bones and bake 20 minutes in hot oven.

All 1 carrot, cut in fine strips, 2 large potatoes, diced, 2 small onions, 1 teaspoon Worcestershire sauce, and cook until tender.

Sprinkle with chopped parsley and serve from casserole.

Lamb Chops Viennese

Place lamb chops in a baking pan or casserole. Cover with canned tomatoes, season with a bit of onion, salt and pepper, and bake in a moderate oven until well done.

These are deliciously tender and have quite a different flavor.

HOME DRIED FRUITS AND VEGETABLES

The three methods of home-drying fruits and vegetables, namely, by sun, by artificial heat, and by air blast, are dealt with in the bulletin on the subject issued by the Dominion Department of Agriculture. The sun drying method is the least expensive but requires bright, hot days, and a breeze. Its climatic conditions are satisfactory, sun drying is also the most successful method. The fruit and vegetables must be washed and cut into pieces about one-quarter of an inch thick. If cut too thin the pieces are difficult to handle and if too thick they do not dry quickly.

A wire screen over which cheese cloth has been spread makes a good drying tray, but the cheese cloth must not be allowed to touch the products about to be dried. One layer of the product should be spread and turned over once or twice during the day. The trays should be removed indoors before sunset or during the d....ay if the atmosphere is damp.

For drying by artificial heat, the warming oven or the ordinary oven may be used, or a rack may be made to suspend over the top of the range. In using this method care must be taken that the temperature is not too high at first, otherwise the surface of the fruit or vegetables will be hard while the interior will still be juicy. The temperature should begin at about 110 degrees and may be increased to 150 degrees.

Air blast drying is the quickest method but it is difficult to regulate the process as the product may become dry outside too quickly. In air blast drying a current of air is created by an electric fan with or without artificial heat. In the oven method, the fan may be used to complete the process more quickly, by using it during the last half-hour of drying.

ODDLY CUT SANDWICH APPEALS TO CHILD

A good way to get children to eat sandwiches is to cut the bread in fancy shapes with sharp-edged cooky-cutters. Then you'll see glasses of milk disappear as if by magic when accompanied by heart, diamond, half moon and animal sandwiches.

With a glass of milk certain sandwiches make a full meal. Ham and olive sandwiches are on this list. For them, take:

One cup chopped cooked ham, 1 tablespoon olive oil, 2 teaspoons lemon juice, 1-4 teaspoon made mustard, 6 olives (stuffed), 1 tablespoonful minced parsley.

Grind Ham With Olives

Put ham, olives and parsley through fine knife of food chopper. Add oil, lemon juice and mustard to make moist enough to spread. Put between thin slices of buttered whole wheat bread.

Another excellent sandwich for this meal is made of white bread with orange marmalade filling. For this filling use one cup orange marmalade 1-2 cup nut meats cut very fine, 4 tablespoons grated cheese.

Add cheese to marmalade and mix smooth. Add nuts and put between thin slices of buttered white bread.

These salmon sandwiches are good:

One cup flaked salmon, 3 hard cooked eggs, 4 tablespoons minced sweet pickle, 2 tablespoons butter, 2 tablespoons lemon juice, 1-2 teaspoon salt, drop onion juice, few grains white pepper.

Put fish, pickle and eggs through food chopper and add to butter which has been melted. Season with salt, pepper and onion juice and add lemon juice to make moist. Spread between thin clices of buttered whole wheat bread.

Minced Chicken Filling

A fine way to use chicken left from Sunday dinner is to take one cup minced chicken, 1 cup minced celery, salt, pepper, 2 drops onion juice, mayonnaise; mix chicken and celery and season with salt, pepper and onion juice. Moisten with mayonnaise and put between thin slices of buttered white bread.

Or instead of mayonnaise use whipped cream for moistening if chicken is well seasoned.

Chopped nut meats — almonds, walnuts or pecans — combine well with chicken, too.

SANDWICH FILLINGS

Minced chicken with shredded lettuce moistened with lemon juice and oil.

Finely chopped prunes combined with peanut butter and made moist with cream.

Finely chopped dates combined with cottage cheese.

Nuts and raisins chopped and moistened with cream.

Shredded lettuce and finely chopped hard cooked eggs made moist with cooked salad dressing. Cook the eggs for thirty minutes in water just at the boiling point.

HOT MILK SPONGE CAKE

1 cup sifted cake flour
1 teaspoon baking powder
3 eggs
1 cup sugar
2 teaspoons lemon juice
6 tablespoons hot milk

Sift flour once, measure, add baking powder, and sift together three times. Beat eggs until very thick and light and nearly white (10 minutes). Add sugar gradually, beating constantly. Add lemon juice. Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn at once into ungreased tube pan and bake in moderate oven (350 degrees F.) 35 minutes, or until done. Remove from oven and invert pan 1 hour or until cake is thoroughly cold. This cake may also be baked in two very lightly greased 8x8x2-inch pans in moderate oven (350 degrees F.) 25 minutes; or in a 12x8x3-inch loaf pan 30 minutes.

SEASONAL MENUS

Nowadays the Canadian menu reveals a tendency to drift away from the old-fashioned heavy meals with their hearty meats and rich desserts.

The old idea seemed to be to see how many dishes the cook was capable of producing in one meal. Potatoes, macaroni and rice might all figure in the same dinner without thought of food value. Our menus are made with attention to a balanced diet and we are careful not to repeat foods of the same type.

The following dinner menus are interesting, seasonal and perfectly balanced:

Menu No. 1

Stewed chicken in rice border, creamed onions, tomato and lettuce salad, raspberries Valencia, vanilla wafers, milk, coffee.

Tender young chickens are disjointed and simmered gently until tender. One cup chicken stock is combined with 1 cup cream and the liquid is thickened with 1 tablespoon butter rubbed to a smooth paste with 1 tablespoon flour. This is brought to the boiling point and poured over the chicken arranged in a border of steamed rice.

Cut head lettuce in slices and arrange with alternating slices of peeled tomatoes. Serve with French dressing.

Raspberries Valencia, or strawberries Valencia, is a delicious mixture of fruit and vanilla ice cream. Our grandmothers loved the combination of strawberries and orange and one of the favorite old desserts was known as oranged strawberries.

To prepare the dish, mix canned berries and sliced oranges with a little flavoring and put in a ring mold of vanilla ice cream. Sprinkle grated orange rind over the top and serve with raspberry sauce.

Menu No. 2

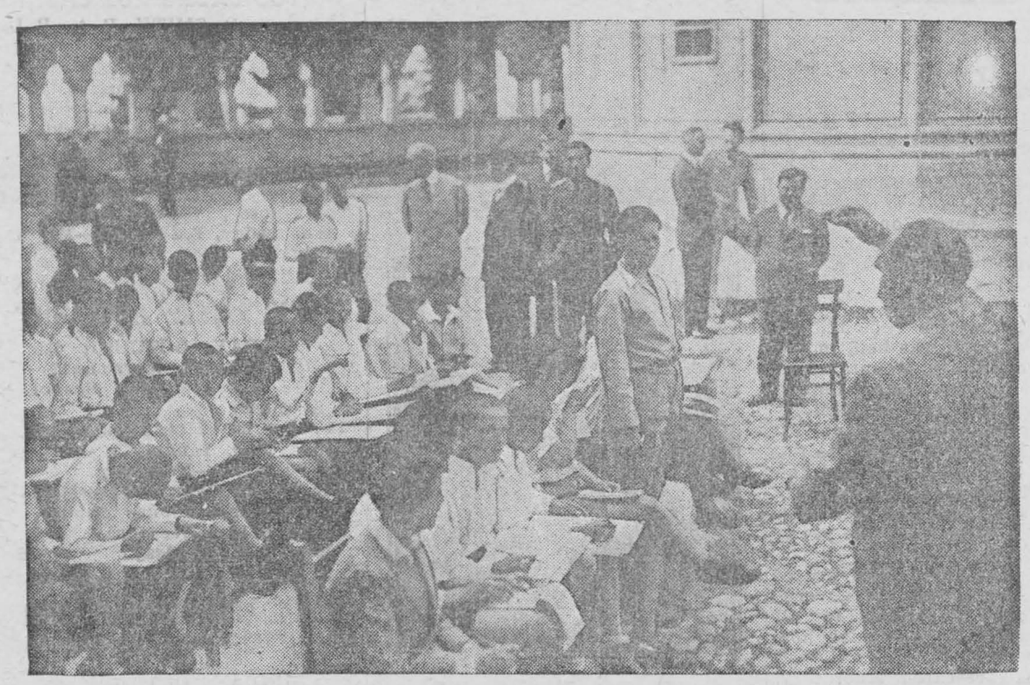
Braised calf's liver, stuffed baked tomatoes, Parker House rolls, jellied cabbage salad, peach up-side-down cake.

Braise the liver with carrots and onions, adding white wine and plenty of salt, pepper, allspice, thyme, bay leaf and parsley for seasoning.

The tomatoes are stuffed with a mixture of cooked macaroni, tomato pulp and cheese. The combination proves a pleasant contrast with the spicy meat dish.

Fresh peaches are used for the up-side-down cake which is made with a sponge cake batter.

Crown Prince Takes Second Rank



Crown Prince Michael of Romania, taking his third year high school flnai examinations with pupils from other schools. Prof. Sacsu is conducti ng the test.

SUNDAY SCHOOL LESSON

LESSON I — October 6
ISAIAH PORTRAYS THE SUFFERING SERVANT—
Isaiah 52 : 13—53 : 12;
John 19 : 17—37.
PRINT Isaiah 53 : 1-12.
GOLDEN TEXT—With his stripes we are healed. Isaiah 53 : 5.

THE LESSON IN ITS SETTING

Time and Place—Isaiah prophesied in the second half of the eighth century B.C., and this particular prophecy was probably written between 720 and 710 B.C. The Apostle John wrote his Gospel toward the close of the first century A.D. The particular events recorded in the portion assigned to this lesson occurred on Friday, April 7, A.D. 30, in the city of Jerusalem, immediately outside the wall of the city.

"Who hath believed our message? and to whom hath the arm of Jehovah been revealed?" The arm of Jehovah is an emblem of divine power, particularly the manifestation of such power in and through the Messiah (51 : 9; 52 : 10).

"For he grew up before him as a tender plant." A reference to the youth of the Lord Jesus, expounded more fully by Luke (Luke 2 : 52). "And as a root out of a dry ground." The dry ground is the existing state of the enslaved and degraded nation. He grows up in obscurity and lowliness, not as a Prince royal on whom the hopes and eyes of a nation are fixed, and all whose movements are chronicled in the Court Gazette or Circular. "He hath no form nor comeliness; and when we see him, there is no beauty that we should desire him." A literal interpretation of these words would almost lead us to regard the Saviour as positively unattractive in appearance, but the prophet is referring rather to his state of moral abasement than to his outward aspect.

"He was despised, and rejected of men." Passages in which the Hebrew word here translated men is used in the same sense are Prov. 8 : 4 and Psalm 141 : 4, and, in both these instances, persons of rank are signified. "A man of sorrows, and acquainted and grief." The Hebrew idiom means sorrow of heart in all its forms, revealing Christ as one whose chief distinction was that his life was marked by constant painful endurance. "And as one from whom men hide their face he was despised; and we esteemed him not." Instead of meeting him with the joyful gleam of their eyes, responding to his grace and help, men turned from him as one looks the other way to avoid the eye of a person whom he dislikes, or, as one shrinks from an object of loathing.

"Surely he hath borne our griefs." The word griefs here in the margin is translated sicknesses, and many people have assumed from this phrase that the atonement which Christ made for our sins also included deliverance from our diseases. "And carried our sorrows; yet we did esteem him stricken." This verb stricken means to be afflicted with a hateful, shocking disease, and particularly, with the plague of leprosy (Gen. 12 : 17; Job 19 : 21; Lev. 13 : 3, 9, 20). "Smitten of God, and afflicted." The latter verb describes one suffering terrible punishment for sin.

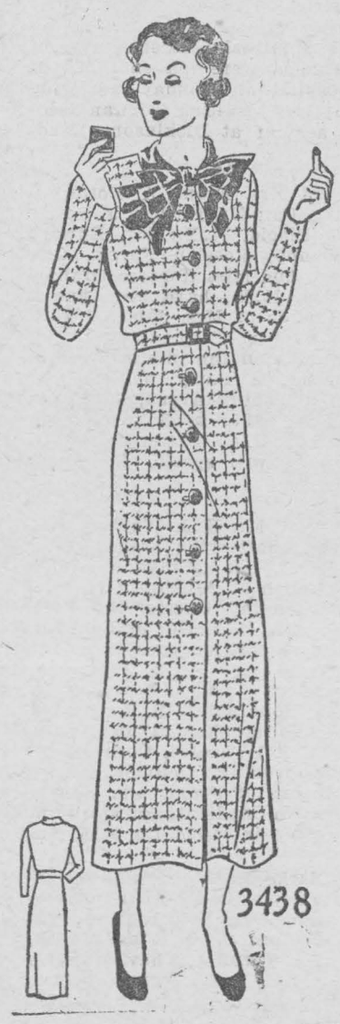
"But he was wounded for our transgressions." Literally, this should read, he was pierced for our sins. "He was bruised for our iniquities." The word here translated bruised means, literally, crushed, and the phrase means that he was crushed by the heavy burden which he took upon himself. "The chastisement of our peace was upon him." That is, the chastisement which leads to peace was borne by him. He made peace through the blood of his cross (Col. 1 : 20). "And with his stripes we are healed." This goes beyond justification and hints at the regenerating, sanctifying grace in the souls of the justified.

"All we lke sheep have gone astray; we have turned every one to his own way." Sheep need a shepherd to guide them and men, in a far deeper way, need the leading of God in the way everlasting. "And Jehovah hath laid on him the iniquity of us all." If God has laid my iniquities on Christ, then they are no longer on me. Were I to say the judge passed sentence on a criminal, and that he is now under sentence of death, every one would understand what I meant. In like manner, every one out of Christ has the sentence of God's condemnation resting upon him. But when a sinner believes in the Lord Jesus, receives him as his Saviour and Master, he is no longer under condemnation.

"He was oppressed." This verb denotes harsh, cruel, and arbitary treatment, such as that of a slave-driver toward those who are under him (Ex. 3 : 7; Job 3 : 18) and is nowhere employed of God's action towards men. "Yet when he was afflicted, he opened not his mouth." For a fulfillment of this in the life of Christ, see Matt. 27 : 12-14; 26 : 62; Mark 15 : 5; Luke 23 : 9; John 19 : 9; I Peter 2 : 23. "As a lamb that is led to the slaughter, and as a sheep that before its shearers is dumb, so he opened not his mouth."

"By oppression and judgment he was taken away." The idea prominent in the verb translated taken away is that of being snatched or hurried away, and the word here translated prison means generally violent constraint. Hostile oppression and judicial persecution were the circumstances out of which he was carried away by death. "And as for his generation, who among them considered that he was cut off out of the land of the living for the transgression of my people to whom the stroke was due?" This is a very difficult passage and has been variously interpreted. There may be, as suggested by Bishop Lowth, a prophetic allusion to the custom which prevailed among the Jews in the case of trials for life to call upon all who had anything to say in favor of the accused, to come and declare it or plead on his behalf.

Coat-type Dress



There uuually is something exceedingly smart about dresses with buttons from neck to hem—especially when they are carried out in neat woolens or wooly silk weaves!

The material for this delightful dress is a new wooly-silk mixture in cranberry colouring with shirtmaker collar, bow and self-covered buttons of grey blue crepe. It's so simple to sew!

Style No. 3438 is designed for sizes 14, 16, 18 years, 36, 38 and 40-inches bust. Size 16 requires 3½ yards of 39-inch material with ⅝ yard of 39-inch contrasting.

HOW TO ORDER PATTERNS

Write your name and address plainly, giving number and size of pattern wanted. Enclose 15c in stamps or coin (coin preferred; wrap it carefully) and address your order to Wilson Pattern Service, 73 West Adelaide Street, Toronto.

* * *

The home of Mr. and Mrs. Hugh Shaw, Elma, was the scene of an enjoyable event, when a reception was held for Mr. and Mrs. Hugh McMillan, the latter formerly Miss Roma Clarke of Montreal, whose marriage recently took place there. A large number of friends were present, and Rev. H.K Woodwark read an address of welcome to the young couple. The presentation of a china cabinet, an all-wool reversible blanket and a purse of money was made by Messrs Reginald Barkley, Graham McPherson, Burton Becksted and Donald McMartin.

* * *

A quiet wedding was solemnized in St. Andrew's Presbyterian Church, Ottawa, on Tuesday, Oct. 1st, by Rev. W.H. Leathem, D.D., when Rev. A.G. Cameron, D.D. of Desteronto, was united in marriage to Mrs. Helen Gillies. Before leaving for Winnipeg, where they are to be the guests of Major (Dr.) H. Mack and Mrs. Cameron, Rev. Dr. and Mrs. Cameron were entertained at dinner by Mr. and Mrs. F.D. Stata of Morrisburg. The guests included Mrs. M.O. Goodell, mother of the bride; Mrs. O.B. Beckstead and Mrs. A. Boyd.

* * *

One of the season's most fashionable weddings took place at the home of Mr. and Mrs. Geo. C. Merkley, Nation Valley, Wednesday afternoon, when their eldest daughter, Emma Lenora, was united in marriage to Mr. Harry Holmes, son of Mr. and Mrs. Albert E. Holmes, of Winchester Springs. The ceremony was performed by Rev. R.C. Tait, under a canopy of silk streamers, extending from a silver star and wedding bell to corner baskets of blue salvia and dusty miller. After a wedding trip to North Bay, Mr. and Mrs. Holmes will take up residence in Winchester Springs.

REV. R. B. McAMMOND SPEAKER AT UNITED CHURCH

At the morning service in the United Church last Sunday, the preacher was the Rev. R.B. McAmmond, who with Mrs. McAmmond has recently returned from West China, where he has served as a Missionary for the past 29 years. Mr. and Mrs. McAmmond have been visiting his sister, Mrs. I. Hilliard.

Mr. McAmmond in very graphic way, pictured the changes that have taken place in China within his knowledge of that land. He described China as "leaping out of the past into the present, breaking the old shackles of superstition and realizing a new found liberty".

On Tuesday evening, he addressed the Y.P. League on the influence of Gen. Chang Kai Shek—a Christian who is moulding the life of China and furthering the New Life Movement, founded on christian principles.

The meeting was in charge of the President, Miss Alice Cameron, and Mr. Wilfred Larmour.

THE RT. HON. R. B. BENETT
Prime Minister of Canada
Who will speak in Cornwall on Tuesday, Oct. 8th, at 8.15 p.m.

FINCH STUDENTS CAPTURE MEIKLE CUP AT MEET

Finch High School gained prominence in athletic circles at Winchester on Monday, when its team captured the Meikle Cup, which is up for competition each year among the high schools of Dundas, Stormont and Glengarry.

D. McIntosh and S. Dickey were outstanding on the Finch team, while Nairn Boyd collected all of Winchester's points unassisted. Cornwall Collegiate obtained the second largest number of points, but had no individual stars.

Out of a total of 52 points, Finch captured 23, Cornwall 20, Winchester 17 and Maxville and Morrisburg each 5. The results of the Meikle Cup events were as follows:

100 yd. dash—Nairn Boyd, Winchester; D. McIntosh, Finch; L. Stidwell, Cornwall. Time, 10 secs.

Mile race—P. Seymour, Cornwall; W. Tullock, Cornwall; O. Hoople, Finch. Time, 5.5 3-5 min.

Broad Jump—Nairn Boyd, Winchester; S. Dickey, Finch; D. McIntosh, Finch. Distance, 19 ft. 1 in.

Girls' 75 yard dash—G. Brown, Cornwall; A. Pechie, Maxville; G. McIntosh, Maxville. Time, 10 secs.

Boys' high jump—G. Dickey, Finch; D. McIntosh, Finch; N. Boyd, Winchester. Height, 5 ft. 2 in.

Boys' 120 yds. hurdles—N. Boyd, Winchester; J. Bonneville, Cornwall; A. Rohrig, Morrisburg. Time, 15 secs.

Boys' 440 yds.—D. McIntosh, Finch; H. Coons, Morrisburg; G. Bray, Cornwall. Time, 54 secs.

Open Events.

Jr. boys' 100 yard dash—D. Ouderkirk, Finch; R. Cass, Winchester; I. Hitsman, Maxville. Time 11½ secs

Girls' 75 yard dash—A. Pechie, Maxville; M. McIntosh, Finch; F. Burns, Cornwall. Time, 11 secs.

Girls' high jump—Margaret McKellican, Maxville; C. Carroll, J. McLean, Chesterville. Height, 4 ft. 8 in.

The officials at the meet were: Referee, W.J. Stewart, I.P.S.; starter, M. Scott; scorer, F. Erle Helmer; secretary of events, T. Hawkins; announcer, J.L. Dixon; time-keepers, R.M. Elliott, J.W. Ault and Dr. J.A. Bean; judges: F. Hamblin, Avonmore; A. Lafore, Chesterville; J.H. Muir, Cornwall; E. Kennedy, Finch; F.C. Beaupre, Iroquois; G. Power, Morrisburg; L. Huot, Maxville, and E.J. Spinks, of Winchester.

Following the sports, the athletes and officials were entertained at a banquet held in St. Paul's hall, Winchester, and presided over by Mr. John McCormick, a member of the high school board.

During the banquet, the presentation of the Meikle Cup was made by W.J. Cass to D. McIntosh, captain of the Finch team, while the presentation of medals for the open events was made by Principal E.J. Spinks to D. Ouderkirk, Finch, and Misses Margaret McKellican and A Pechie, of Maxville.

The reply to the presentation address was made by Miss Elma Kennedy, physical instructress of the Finch athletic team. Other addresses were given by W.J. Stewart, I.P.S. and Rev. W.D. Turner, both of Winchester.

RE NEW WATER PUMPS

I wish to draw the ratepayers' attention to the new pumps at the local waterworks pumping station.

Now, the Council had an engineer make a test on these pumps at different times, and his report was handed in to the Council. It showed that these pumps would not prove satisfactory here, under our water conditions.

Whereas nothing has been done about getting rid of these pumps, I moved at different meetings of the Council, a motion to notify the Smart-Turner Co. of Hamilton, to take these pumps out. This company has not, and did not, carry out their contract on these pumps—another white elephant on our hands. And besides, these are not the pumps we require. What we need is a pump to connect on the hydrant, which is a force pump to force the water from the hydrant to where it is needed. These new pumps that are a failure have cost the town plenty. The waterworks cost has been considerable, due to the strenuous pressure on our water mains by running all the pumps at the time the tests were made.

I can get no support on this matter at all, so far.

Your obedient servant and councillor,

ARNOLD M. JARVIS.

MISS CATHERINE BLONDIN

A former resident of Morrisburg, in the person of Miss Catherine Blondin, passed away at Waddington, N.Y., on October 1st, funeral services being conducted in St. Mary's Church, Waddington, on Thursday, by Rev. Fr. D.F. O'Reilly. The remains were brought to Morrisburg, and interred in St. Mary's Cemetery, Rev. Fr. R.J. Coyle officiating at the grave.

The pall bearers were Messrs John Lismond, Robert Welch, William Hepburn and Gilbert Jardine, all of Waddington.

Deceased was born in May, 1853, in Moose Creek, Ont., and came to Morrisburg with her family, when a child. About 65 years ago she went to Waddington, where she resided until her death.

She was a sister of the late Martin, John and Alexander Blondin, who predeceased her several years ago. She leaves to mourn, one sister, Miss Josephine Blondin, Cornwall.
