Attempted Burglary Monday Gilroy's Jewellry Store

Tuesday morning when P.J. Gilroy arrived to open his place of business in the Record block, he found that an attempt had been made to enter the place during the night. Evidently with a diamond or other glass cutting instrument marks were made close to the Yale lock with the idea of removing a portion about five inches square through which a hand might be inserted and the lock released. Perhaps disturbed in the job by the approach of a car or pedestrian along the street the entrance was not made. It was a daring piece of work directly opposite a street light. It is believed to have been the work of a professional burglar in an attempt to make a haul from the Christmas stock on hand.

Public School Pupils Buy War Saving Stamps

In a recent circular to the principals of the Public Schools of Dundas County, the School Inspector reports that the pupils purchased over seven hundred and fifty dollars' worth of War Savings Stamps and Certificates during the month of November. Purchases for the Autumn term to date amount to well over $1800.00. Pupils of the Morrisburg Public School made purchases of better than $100.00 during November. The rural schools which stood highest for the month of November were: Matilda, Dundela, South Mountain, Inkerman, Hess, Bouck's Hill, Ormond and Maple Ridge. In these schools purchases amounted to an average of better than one dollar per pupil for the month. If the present rate of purchase continues throughout the school year, it would be possible for the Public Schools to make purchases aggregating $7,000. The purchase of stamps and certificates is an aid to the war effort and besides a very good investment for the girls and boys, indeed, for all members of the family.

RED CROSS ROOMS CLOSED.

VERY COLD SNAP.

For a real taste of winter this week is a standout. The thermometer has seldom been above zero and had been reported on more than one morning between 15 and 20 below. It's the old-fashioned kind you have been asking for.

Two Shows Each Evening

Radio Forum News

A week ago Monday it was stormy, last Monday it was cold. When you combine the two you have perfect farm forum weather. Despite the cold and the ravages of the flu among the forum members 13 met at the home of H.R. Johnston and spent three pleasant hours of discussion. The topic was National Health Insurance. There is so much pressure being applied by Canadian people that as soon as possible the Federal Government is going to pass some health Legislation. It is the duty of the masses, the farmers and labour, to see that this legislation is practical and that it will provide the maximum protection for the least possible cost. Only if the average citizen has a general knowledge of the different schemes and can press his ideas intelligently will our views be taken into consideration. There is no better way of becoming acquainted with this important social reform than by listening to the broadcasts, forming a forum and sending in your opinions to where they will be noticed.

Next Monday night the Health scheme, as prepared by the Canadian Federation of Agriculture, will be discussed. Every farmer should listlike to attend a real live Farm Foren to this broadcast. If you would um make arrangements to be at the home of Harry Edgerton before 8.15 and meet with the members of S.S. No. 10. Bernard Masterson will be the convenor.

DON'T GIVE LIVE STOCK .. .. ICE COLD WATER

For all cattle in winter, particularly for dairy cows, a liberal supply of good clean water is necessary. And an important thing is that the chill should be taken off the water before drinking. As pointed out by W.D. Albright, Superintendent Dominion Experimental Farm, Beaverlodge, Alberta, "starey-coated, constipated cattle shivering humpbacked at icy troughs on a bleak winter day are an object of sympathy and a standing advertisement for shrunken profits." If the water is ice-cold, the animals do not drink enough water. The small amount that they do drink checks natural functions. Results are constipation, ill-thrift and sometimes indigestion.

Warm water is relaxing and substitutes in part for succulent feed. Half a pailfull of tepid water has brought many a horse around after an immersion or after a cold hard drive. Swine do poorly on ice-cold drinks. A heater in the drinking tank will not only avoid much ice chopping but will contribute decidedly to the health and comfort of the farmyard stock.

WINTER MONTHS BEST TIME TO CLEAN SEED

Often the farmer seed-grower defers his over-winter seed cleaning until late in the spring because of uncertainty as to whether his seed is going to find a market. The usual result is that he is often too busy in the spring to do a thorough job. On the other hand, the grower who has a mouse-proof room can have his seed cleaned, bagged and weighed ready for inspection later on at his leisure during the winter months. If the seed is not sold in the spring, it will keep. Grain seed is in short supply in Eastern Canada at present and so it is advisable to conserve all available seed.

For the ordinary farmer, although there are well-equipped seed cleaning points all over Canada, these facilities may be beyond his reach and he has to clean and grade his seed on the farm. While a large power unit is capable of doing a better job seed cleaning than the small fanning mill, yet satisfactory results can be obtained by the farm fanning mill. The labour of handling and cleaning seed on the farm may be considerably reduced where the layout permits the elevation of the seed from the cleaner to an overhead bin. From this bin the seed can be spouted back or the necessary second and third cleaning to make a satisfactory job.

An important feature of any seed cleaning machine, whether or not it is large or small is the combination of sieves used. The top scalding sieve should be barely large enough to let the grain through, the larger material being separated off. The size and shape of the seed being cleaned naturally determines the size of grading screens to be used. In some seasons and for some varieties, sieves of different sizes may be required. Information as to where the material for making sieves may be purchased may be obtained by applying to the nearest Dominion Experimental Station, Agricultural College, or Agricultural Representative.

MOTHER O' M'INE
By Rudyard Kipling

F I were hanged on the highest hill
Mother o' mine, O mother o' mine!
I know whose love would follow me still,
Mother o' mine, O mother o' mine!

If I were drowned in the deepest sea,
Mother o' mine, O mother o' mine!
I know whose tears would come down to me,
Mother o' mine, O mother o' mine!

If I were damned of body and soul,
Mother o' mine, O mother o' mine!
I know whose prayers would make me whole,
Mother o' mine, O mother o' mine!
