HENRY'S Shorthand School Ottawa, Ont.

THIS INSTITUTION offers a superior training and thereby ensures a more successful future. It leads all others—a fact fully established by more than 625 pupils who have left other business schools to come to it—and ranks among employers as **"The School of Higher Efficiency."**

It is not surprising then that business men, in advertising for stenographers, should definitely state "Graduates of Henry's School preferred."

Get particulars about our course.

Chesterville Athletes Do Well At Cornwall Meet

Chesterville athletes took a prominent part in the Counties' competition in the Legion Track Meet in Cornwall on Monday when Hubert Harper, son of Mr. and Mrs. Willis Harper, came home with four silver cups, two challenge cups which he will retain for the year and two which are his own for keeps. In the Men's Pole Vault with a mark of nine feet eleven inches he carried off the silverware, and in the Men's High Jump proved the winner with a mark of five feet four inches. These are outstanding performances when it is understood that Hubert Harper is yet a Public school pupil in Chesterville.

The Tate boys accounted for another first and two seconds when Bill and Allan ran one, two in the Men's mile, the time being 4 mins., 58 3-5 seconds. Bill also took second place in the 440 yards.

Airplanes Doing Business

Late yesterday afternoon two 'planes operated by Leavens Bros., of Belleville, landed in a field of Tom Allen's just south of the village and sought passengers for flights, the inducement being a sight of the home town from the air. Business did not seem particularly rushing, perhaps most of us have been "up in the air" at one time or another even if not in a 'plane. A third 'plane in the county was located in a field shortly north of Morrisburg.

Formerly Lived Here Found Dead in Bed

Maurice Rosenblatt, 41 years of age, of 4147 Drolet street, Montreal, was found dead in his bed at ten o'clock, Monday morning. A doctor who was summoned examined the body and said that death had been due to a cerebral hemorhage. The morgue authorities were summoned and an inquest was held Tuesday. Police of the St. Lawrence boulevard station, under Sergeant Boisjoly, learned that Rosenblatt had been ill for over a year. His wife went to wake him up Monday and he failed to answer. She called a doctor, who ,after an examination, pronounced him dead.

(For several years Rosenblatt carried on business in Chesterville, removing to Montreal a year ago following a paralytic stroke.

Winchester Twp. Council August Session at Winchester

The August meeting of Winchester Township Council was held in the Town Hall, Winchester, on Monday, August 3rd, members all present. The minutes of the last regular and special meetings were adopted as read and signed by the Reeve.

The roads, bridges and sidewalks in the Township were again re-insured with the Globe Indemnity Company for another year.

The Clerk was authorized to notify the contractor to begin work on the Johnston-Ouderkirk Drain and to have same completed on or before October 6th, 1931.

By-Law No. 542, a bylaw for the repair and improvement of the South Morewood Drain and for borrowing on the credit of the Corporation of the Township of Winchester the sum of$3771.90 for completing the same, was read a third time and finally passed ,signed and sealed.

The Treasurer was authorized to pay the crossing allowances on the Lough Drain.

The following accounts were passed and paid:

Cutting weeds Township Roads	$188.00
Cutting Brush Township Roads	70.50
Culverts, repairs	13.47
Printing By-laws	57.50
Faulkner & Carruthers, Crushed stone road No. 7	1220.40
Wire fencing	19.65
Treasurer Twp. of Osgoode, Lough Drain	341.00
Judge Costello, Court of Revision	12.00
Stanley Cougler, Barclay Creek	10.00
Dr. McLaughlin, indigents	30.00
G. A. Merkley, Ball Drain	111.00
Sidewalks, Morewood	88.85
Total	$2162.39

The Court of Revision on assessments in the Kittle Creek and Parker Drain will be held in the Town Hall, Winchester on Friday, August 21st, at 10 a.m.

Council adjourned to meet at Chesterville on Monday, September 7th, at 10.30 a.m.

—J. Steen, Clerk.

Williamsburg Wins Again

At a social just east of Elma last night where the big attraction was a softball game between Williamsburg and Dunbar, the latter with a strengthened team fell before the 'Burg boys to the tune of 13 to 8.

PLAY AT WILLIAMSBURG

"My Old New Hampshire Home," a three-act play, will be presented by Group One of the Women's Association of Morewood United Church in Williamsburg United Church Hall under the auspices of the Ladies' Aid on Friday, August 7th, at 8.15 p.m. Admission, Adults 25c, Children 15c.

Will Tender Banquet To Hon. Geo. H. Challies

"The citizens of Morrisburg and vicinity will on Friday, August 14th, tender a banquet to Hon. Geo. H. Challies in the Music Hall, Morrisburg. This banquet will be of a non-political nature and will be held at 6.30 p.m. The gallery will be reserved for ladies and will be free. Owing to the seating capacity of the hall being limited, the number of tickets will not exceed 200, these will be available from the committee as listed below and a charge of 75c will be made.

The committee is as follows: John F. Casselman, John D. Dain, Arthur Flynn, Dr. Geo. Gorrell, John H. Meikle, and F. H. Broder.

Morewood Bride-to-be Honoured by Friends

The Misses Anna Martin, Eva Swerdfeger, Hilda Loughridge, and Louva Allison were hostesses at a shower held in honour of Miss Nona E. Loucks, an August bride-to-be, on Friday evening, July 31st, on Mr. J. B. Loughridge's lawn when the first part of the evening was spent in games and contests.

The many beautiful gifts were presented to the bride-to-be by little Edith and Dwight Swerdfeger, dressed as bride and groom. They approached the bride-elect to the strains of Lohengrin's Wedding March, played by Miss Louva Allison.

Miss Loucks thanked the guests in a few fitting words, after which the guests sang, "For She's A Jolly Good Fellow."

Lunch was served to over one hundred guests who retired after having spent an enjoyable evening.

With the Bowlers

Bowling circles have been quite active during the week, the local club entertaining four rinks from Iroquois on Friday evening in a scheduled league fixture in which the visitors were 33 points down at the end of play. Mr. Irwin Hilliard, of Toronto, who is spending the holidays at Iroquois, was among those participating in the play.

The return visit was made by three rinks last night when Chesterville was again up on the round with a margin of three points.

Chesterville's entry in the Eastern in Ottawa on Monday had a fifty-fifty break, winning two and losing two and landing outside the charmed circle of prize winners.

Hamlen and Jarvis proved the winners in Tuesday night's trophy play which took the form of doubles.

With local players competing on most of the greens east of Brockville they are convinced there are no others in quite such good shape as their own. This would be a fine time for new members to break into the game and enjoy the play for the balance of the season.

Berwick

We are sorry to hear Mrs. Wm. Elliott is a patient in the Cornwall hospital after undergoing an operation. We wish her a speedy recovery.

Miss Eva Price and little nephew, Frederick Price, of Winchester, are guests of her sister, Mrs. W. D. Munroe.

Mr. Donald McGillvary, of Ottawa, was renewing acquaintances in town on Wednesday.

Mr. and Mrs. J Meilleur visited Waddington on Sunday.

The Ladies' Association held their monthly meeting at the home of Mrs. Angus McDermid, Ashburn.

Mrs. Christena Ouderkirk spent Tuesday at Crysler the guest of relatives.

Mr. and Mrs. Xavier Meilleur and family, of Vermont, spent Monday guests of the former's brother, Mr. J. Meilleur.

Mrs. Jane Summers and Master Cameron Grant, of Cornwall, are spending a week in town.

Mrs. J. Dubois and Miss Irene Meilleur spent over Sunday with Mr. and Mrs. J. Meilleur.

Fanny: "This is a rare treat."

Ferdy: "I know, Fanny, I don't treat you very often, but please don't rub it in."

"I wonder if all men are fools?" snapped Mrs. Enpeck, during a domestic tiff.

"Certainly not," replied her "better" half. "I hear some are bachelors."

Dunbar Man's Leg Broken Gravel Pit Caves In

Last Thursday Chris. Barkley, of Dunbar, suffered a double compound fracture of his left leg above the ankle while working with a County Road repair gang in Marselis' gravel pit west of Dunbar. Chris Barkley, Bob Marselis and H. Barkley were working in the pit when the gravel caved in, completely burying Chris Barkley and covering Marselis up to the hips. H. Barkley quickly released Marselis and they rescued Chris. Barkley and rushed him to his home in Dunbar where it was found he had suffered a double fracture with the bones protruding through the flesh. A doctor was quickly in attendance and the fracture reduced.

St. Andrew's Social

Tuesday evening with perfect weather conditions a large crowd was present at the social under the auspices of St. Andrew's Presbyterian Church on the church lawn and enjoyed the good things provided by the ladies of the congregation and the excellent musical programme provided by Chesterville Band.

Mrs. Wm. Gardner, Winchester

In the death of Mrs. Wm. Gardner on Wednesday, July 29th, Winchester lost one of its oldest and most highly respected citizens. Although in her 82nd year she was active in body and bright in intellect to a surprising degree. She had resided in Winchester over 60 years. Her husband passed away in 1916. Surviving are two sons and three daughters. The funeral was held at her late home on Friday at 1.30 p.m.

By-Election Date Set

The date for the bye-lection in Dundas necessitated by Mr. Challies' elevation to the Cabinet was announced Friday night by Premier Henry as September 9th. Nominations will be held on August 29. It is predicted that the new Minister will be unopposed. Writs for the election were issued following the swearing in of the Minister.

Miss Forsythe Honoured By Finch Friends

On Wednesday evening, July 29th, some fifty or more young people, including friends and schoolmates, attended a miscellaneous shower given by Mrs. R .M. Baxter, Finch, in honour of her niece, Miss Nancy Forsythe, who became the bride of Mr. Murray Ball, of Morrisburg, on Tuesday, August 4th.

The evening was spent in the playing of games and dancing and at eleven o'clock Miss Forsythe entered the living room, which was tastefully decorated in yellow and white, and with her mother was escorted to the seat of honour by Miss Winnifred Blair. Numerous gifts were opened by Misses Helen Forsyth and Winnifred Blair and presented to the bride-elect, who fittingly thanked the donors in a few well-chosen words. Refreshments were served, after which all joined hands, encircled the bride- and groom-elect and sang "For They Are Jolly Good Fellows."

Ball Club Wins Two

Winning two ball games in one afternoon is usually considered live news and Chesterville ball tossers did that very thing Monday when in the afternoon in an exhibition game at Winchester they trimmed up the home team 13 to 12 and repeated in a twilight fixture in the Dundas County league when Morewood was turned back with a score of 13 to 2. The Chesterville team is Plantz, Lapierre, Lynch, McAvoy, Oshier, Flynn, Helmer, Clarmont and Barkley.

During the evening game a hard hit foul ball along the base line struck Cassie Cameron on the face inflicting painful bruises.

CORRECTION

On erroneous information last week it was stated in our columns that the price paid for 3.5 milk by Nestlé's Milk Prods. Co. was 85c, whereas the correct figure is 90 cents per hundred.

A new FILM

with SIX BIG POINTS OF Superiority

KODAK..DOUBLE-COATED... VERICHROME FILM

KODAK Verichrome Film, now in stock here, offers you a ready, certain means of radically improving the quality of your pictures—of giving them a striking new richness of detail. It has these six points of superiority:

1—Double-coated. Two layers of sensitive silver.
2—Highly color-sensitive. Especially to yellows and greens.
3—Halation "fuzz" prevented by colored backing on film.
4—Gives finer detail in highlights.
5—Gives finer detail in shadows.
6—Translucent, instead of transparent.

Verichrome costs but a few cents more than regular Kodak Film. Try some today.

Nation Valley

Mr. and Mrs. Eddie Summers, Port Hope, were guests of Mr. and Mrs. Archie Black.

Miss Marjorie Allison spent last week with Miss Ida Munro.

Mr. and Mrs. L. Bell, of Inkerman, were guests at the Jamieson's.

Miss Ruby Marcellus, of Connecticut, is visiting her sister, Mrs. Andrew Carruthers.

Mrs. Wm. Worwood, of Quebec City, is visiting at the home of Mrs. Agnes Munro.

Messrs. Harold Baker and Wm. Rae visited Mr. and Mrs. A. Johnston, of Madrid, N. Y.

Mr. and Mrs. Garnet McLean and Mrs. Jarvis, of Chesterville, were calling in the Valley.

Mr. and Mrs. J. A. Bogart and Miss A. Bogart visited Mr. and Mrs. Geo. C. Merkley.

Mr. and Mrs. Geo. C. Merkley and family visited Mr. and Mrs. John Froats, Morrisburg.

Mr. and Mrs. Harold Baker and Miss Jean visited the former's mother at Morrisburg.

Have you been to see Mr. Geo. C. Merkley's flower garden? We question if a finer one is to be seen on a farm anywhere in Ontario. It has meant many days hard work and planning but it is a credit to the owner and the community. Mr. Merkley has not neglected his farm to do this. He has one of the best, or has the best worked farm and crops in this district.

Dundas Member Becomes Provincial Secretary

The post of Provincial Secretary which it has been realized for some time would likely be left vacant when Cabinet re-organization took place, has fallen to Mr. G. F. Challies, M. L. A. for Dundas, to which he was sworn in on Friday afternoon by acting Lieutenant-Governor Sir William Mulock.

HON. GEO. H. CHALLIES
Newly-Appointed Provincial Secretary

Mr. Challies took up his new duties on Tuesday when he moved into the office vacated by Mr. Macaulay. He is not contemplating, he said, any drastic changes either from the policies of his predecessor or in the Department of Game and Fisheries, which he will take over at a later date.

He will carry on Mr. Macaulay's policy in the field of prison reform.

"My main aim will be to keep the department in pace with the times," Mr. Challies said. "There are always changes which can be made. Over a period of years such a thing, for example, as the administration of jails and reformatories is bound to come under changing conditions. Mr. Macaulay has already worked on this realization and I hope to be able to continue the good work which he has done."

Mr. Challies holds the distinction of being one of the first members of the Ontario Legislature to be elevated to a Cabinet post after only two sessions in the House. He succeeded George Smyth, formerly Liberal member for the county of Dundas, in the general election of 1929. It was Mr. Challies' first entrance into the provincial political arena, and his achievement of bringing the old constituency of Sir James Whitney back to the Conservative fold after a period of Liberal possession marked him as one of the outstanding younger members of the House.

Anwered Attack on Hydro

He added to his laurels during the last session when the Government was withstanding a barrage from Liberals and Progressives on the Hydro administration. A life-long student of power problems and at one time director of the power plant at Morrisburg, Mr. Challies was in a position to answer the Liberal attack. His speech in the House not only defended the Hydro policy but substantiated with facts his claims that the purchase of power for Ontario was a far-sighted move and that cost of power and lighting to the consumer was comparatively low, made him a marked man.

Mr. Challies was born at Winchester 47 years ago and was educated at Woodstock College and the Ontario College of Pharmacy, receiving the degree of bachelor of pharmacy from the University of Toronto.

In 1914 Mr. Challies was married to Miss Jean S. Gibson, daughter of M. C. Gibson, of Morrisburg. During a successful business career he became president of the Dominion Toilet Brush Company which has engaged much of his attention. He has also served as president of the Colonial Coach Lines Limited, one of the large coach groups of Ontario, and as president of the Kingston City Coach Lines Limited, operating a public conveyance in place of the street railway.

While carrying on these enterprises, he found time to develop an interest in municipal and public affairs generally. The municipal experience of Mr. Challies culminated in his being elected in 1929 reeve of Morrisburg, where he resides. In the same year he was chosen to represent the County of Dundas in the Legislative Assembly.

As a member of the executive of the Ontario Municipal Electric Association, and the Eastern Ontario Power Union, Mr. Challies has maintained a close and active interest in the power problem of Eastern Ontario. It was to the advantage of Mr. Challies that during his term of office as councillor and afterwards as reeve of Morrisburg, the municipality operated its own hydro-electric plant, and he acquired much practical knowledge from his association with the operation of this public utility service. His other public and fraternal interests have included the presidency of the Canadian Club at Morrisburg, which he was instrumental in organizing, as well as office in the Masonry and life membership in the Scottish Rite.

HOW TO KEEP HONEY

TO DETERMINE the best conditions of temperature and humidity for the storage of honey the Bee Division of the Dominion Experimental Farms put away the honey in one-half-pound jars under temperatures varying from 40 to 70 degrees. These samples had been taken from supplies gathered at eighteen Branch Farms, representative of the various producing areas over the Dominion. Daily records were kept of temperatures and humidities in the various storages, and each month the honey was examined and any physical changes observed noted. The honey was kept without being disturbed for a twelve month period. Temperatures from 40 to 50 degrees proved to be more favourable than higher temperatures, higher temperatures tending to increase darkness, flocculence and a coarser granulation in the honey. Spoilage occurred only at the highest temperature of 70 degrees, when samples were found to be fermented.

Cutting Costs

Daughter (entertaining swain in the small hours): "Has father gone to bed yet?"

Mother: "No. He's in the cellar, reading."

Daughter: "Whatever is he reading in the cellar?"

Mother: "The electric light meter."

Health Service

Prepared by the Canadian Medical Association.

SUMMER DIARRHOEA

Every year there occurrs an appalling loss of infant lives from what is commonly known as summer diarrhoea In Canada, one death in every eighty-five is that of a baby who has not reached his first birthday. Of this large number of infant deaths, a large percentage is due to diarrhoea.

The best and surest protection against this condition is breast feeding. Whenever such deaths are investigated, it is found that most of the cases have occurred amongst infants who were artificially fed. Providing the mother is healthy and that she is living a healthy life and using proper foods, her milk contains the right materials for her child. In addition, breast milk is sterile and because it is not handled, there is no danger of its becoming contaminated with germs.

There are many other good reasons why a mother should nurse her child, but the one reason that it protects against diarrhoea should be sufficient to make every mother realize what her duty is in this matter.

The baby who is artificially fed should be fed according to the directions which the family doctor gives. It will be necessary to change his feedings from time to time as he grows older. Every care must be taken to secure a safe milk and to keep it cold, clean and covered. Pasteurized milk is safe milk. If there is any question as to the purity of the milk, it should be boiled.

Diarrhoeas are due either to a faulty diet, for example, one that contains too much sugar, or to germs which later usually gain entrance into the body through contaminated milk. Diarrhoea is always a serious condition and no mother should consider herself able to deal with it; she needs the help of her doctor and she should secure his assistance without delay.

A common mistake is to think that diarrheoa is due to teething or some other similar condition. Many mothers seem to think that diarrheoa is something from which every baby suffers and that it requires no particular attention, or that it can be cured by repeated doses of castor oil.

It is just because it is not taken seriously that so many deaths occur. If, when diarrhoea does occur, proper treatment is secured promptly, then, in most cases, the serious and fatal results can be prevented. It is, of course, best to prevent the condition, but if it does occur the mother should understand that delay in securing treatment may cost the baby his life.

The baby should be breast fed. Failing that, he should be fed according to directions, and the milk should be pure and safe. If in spite of precautions trouble does occur, prompt treatment is needed.

Questions concerning Health, addressed to the Canadian Medical Association, 14 College Street, Toronto, will be answered personally by letter.

Four Are Injured In Auto Crash at Morrisburg

When the convertible cabriolet car in which they were travelling to Morriburg after attending a dance at Iroquois early Sunday morning, was crowded off the road by a truck which continued on its way, Miss Helena Meikle, aged 23, of Morrisburg, suffered a dislocated shoulder and other painful injuries, and her companions, Mr. McPherson and Miss Sharpe, of Montreal, and Stuart Meikle, a cousin, of Morrisburg, were barly cut and shaken up.

The automobile went into the ditch, smashed a telegraph pole and was badly damaged.

The accident occurred almost within the west end limits of Morrisburg on the Montreal-Toronto highway. Although the license number of the truck was not obtained, police are working in an endeavour to identify it. Miss Meikle was taken to a Brockville hospital, where she underwent an X-ray examination.

Self Service

The telegraph pole gang had come into the restaurant straight off the job and they were hungry.

"What'll you have?" asked the lady in waiting to one of the gang's biggest and toughest.

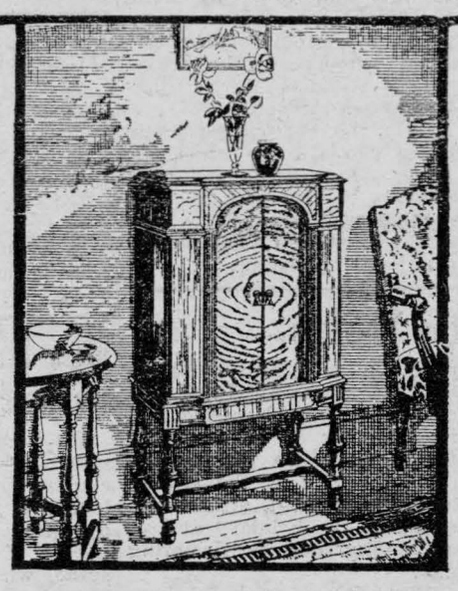

"Beef."

"How do you want it?" she persisted.

Joe waved an enormous and impatient hand. "Oh, drive in the steer and I'll bite off what I want."

Philco Sales Prove that Balanced

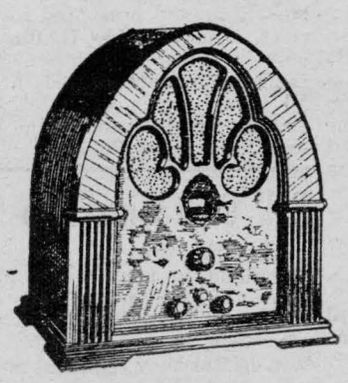

SUPERHETERODYNE

9-Tube Superheterodyne Highboy

A remarkably handsome set in American Black walnut, and Butt walnut, with Arch in "V" matched Oriental wood. Pilasters in pin stripe walnut and Quilted Maple decorations. Hand-rubbed finish. Amending Report Whitteker-Herriman Drain Accepted

Williamsburg Township Council met at Williamsburg on August 1st, members all present. The minutes of the previous meeting were read and adopted.

The amending report of the Engineer on the Herriman-Nesbitt Drain was read and adopted and the Clerk was instructed to have the necessary by-law prepared.

The Clerk was instructed to have ready for the next meeting a list of the allowances made in the Engineer's report to the ratepayers in the Kyle and Casselman branch drains.

The following accounts were passed: Arthur Reddick, cutting weeds $6.75; Jesse Duval, hauling gravel $110.00; Rufus McIntosh, hauling gravel and cutting weeds $3.75; Mel McIntosh, cutting weeds $13.30; Imperial Oil Ltd., for oil $47.88; R. F. Norval, work and repairs $5.05; P. E. Beckstead, grading Williamsburg street $6.00; J. M. Garlough, cutting weeds $8.03; Leonard Barkley, cutting weeds & other work $4.10; Roy Barkley, cutting weeds $5.65; Geo. Merkley, ditto $9.75; Wm. Irving, ditto $5.80; W. A. Carr, ditto $1.75; G. F. Barkley, ditto $7.05; Weldon Beckstead, work on road $7.00; E. M. Saddlemire, hauling crushed stone $2.25; Ralph McMillan, for wire fence $3.47; P. E. Barkley, bridge irons $2.85; Isaiah Loucks, work on roads $5.50; Alf McMahon, cutting weeds $6.55; Walter Watson, ditto $2.50; S. A. Kyle, ditto $2.50; Stanley Black, ditto $2.50; W. T. McMartin, gravel $7.00; John Carlyle, cutting weeds and other work $11.40; C. F. Marselis, for gravel $3.20; Wm. Pemberton, cutting weeds, $2.25; Hilas Herriman, work on road $2.50; Ben Bowman, for wire fence $7.90; H. A. Gallinger, cutting weeds and brush $6.75; Nathan Tupper, cutting weeds $13.35; John Bowman, ditto $5.50; J. A. Reddick, ditto and brush $20.20; Hugh McHaffie, cutting weeds $5.40; Adam McHaffie, cutting weeds and brush $12.50; James Robinson, cutting weeds and brush $5.52; Ezra McMillan, pay on sa&lary Road Supt. $62.50; James Wallace, cutting weeds $7.25; Ernie McMillan, ditto $1.35; Drury Drainage Co., progress estimate Whitteker drain $2170.00; Carman Barkley, cutting weeds on Dillabough estate $1.80; Harold Elliott, ditto $1.80; Leader Publishing Co., debenture forms Whitteker drain $5.50, advt. posting voters' lists $3.75; Municipal World, supplies $8.36; Judge F. T. Costello, expenses appeal re Casselman Award $10.60; D. H. Weir, ditto $4.80; Nathan Casselman, ditto $1.80; Aden Casselman, ditto $2.00: Angus Curran, sheep killed and damaged by dogs $19.00; Charles McMillan, ditto $66.00; Mahlon Beckstead, services sheep valuator $10.00.

The Council adjourned to meet again in Froats Hall, Williamsburg, on Saturday, September 5th, 1931, at one o'clock p.m.

—M. S. Beckstead, Clerk.

FRESH BEEF POPULARITY

THE POPULARITY of beef has a much deeper foundation than simply its appeal to the palate. Recent experiments have shown that man's natural fondness for meat is based upon a sound scientific foundation, as meat not only contains many of the elements necessary for the proper growth and development of the human body, but it supplements and improves to a great extent the value of many of the nutrients found in grains and vegetables. Beef is a very valuable source of protein, which is a tissue building and repairing food; the fat furnishes heat and energy; and the mineral salts, such as iron and phosphorus, as well as the vitamins contained in beef are in a form that is readily assimilated.

The dietic value, however, of any food depends not simply upon the nutriments which it contains, but also upon the thoroughness with which those nutriments are utilized by the system. From this point of view, beef has a particularly high food value as it is a very easily digested and completely assimilated food. Experiments have shown that over ninety-five per cent of the protein and fat of beef is digested by the body under normal conditions. There is no satisfactory substitute for beef. While certain other foods are relatively rich in protein, the losses in digestion, or in metabolism, or in both, are so great as considerably to offset the value of these foods as suitable sources of protein.

Corn Borer Nearly Beaten

Guelph Mercury. — According to Jack Miner, well-known Kingsville naturalist, the Department of Agriculture did a fine thing for the counties of Essex and Kent when it compelled the farmers to burn their cornstalks and clean fields up in general. As a result, the corn borer, which played such havoc with the corn crop in that section of the province has pretty well disappeared, and the outlook for a bumper crop in the two southern Ontario counties was never better.

Canada's High Commissioner Returns for a Visit

The five-year plan of Soviet Russia is doomed to failure, according to Hon. G. Howard Ferguson, Canadian High Commissioner in London and former Conservative Premier of Ontario. In an interview given at the Provincial Parliament Buildings he asserted that the collapse of the plan was inevitable.

The Communist committee form of organization was already being shelved, he said, in favour of the one-man type of control. Soviet youth was picking up education rapidly.

Too much dependence was being placed by the country upon the advice of imported foreign technical experts, he declared, in the rehabilitation programme of the country. "There is only one Stalin," he commented.

Russian exports to England constituted a serious problem, he said. Butter was now vieing with grain and clothing from the Soviet country in the English market. "They have a wonderful organization, but in spite of what they have been doing, I honestly believe it will topple," he said.

Greater Empire trade in the future was predicted by the former Premier. Next year excursion parties of British business men would cross the Atlantic and see what the country had to offer them, he forecast.

Mr. Ferguson is making his first trip to Canada since he assumed the duties formerly held by the late P. C. Larkin. He plans to visit every province in the Dominion before his return to England at the end of September or early in October.

Accompanied by Mrs. Ferguson, the High Commissioner intends to spend a few days on his farm at Kemptville. He also hopes to have a few days of fishing in Temagami before his trip ends.

Mrs. James Kearns Remembered in Death

Spiritual offerings received following the death of Mrs. James Kearns are as follows:

Mr. James Kearns and family, Mr. and Mrs. J. D. Murphy, Miss Marjorie Murphy, Mr. and Mrs. Thomas Kendrick, Mr. and Mrs. D. Allison, Mr. and Mrs. J. T. Kearns, Mr. and Mrs. William McDonald, Mr. and Mrs. Daniel Morearty, Mrs. Henry McMahon, Mr. and Mrs. P. J. Kirby, Mr. Hugh Masterson, Sr., Mr. W. J. Lynch and family, Mr. and Mrs. J. P. Kearns and family, Mr. and Mrs. Vincent Coyne, Mr. and Mrs. Frank McCloskey, The Catholic Women's League, Mr. and Mrs. Martin Hickson, Mr. and Mrs. Chas. Kearns and Annabel, Martin, Andy, and Jack McCadden, Miss Nancy Kearns, Mr. Terrence McCadden, Miss Nellie McDonald, Mr. and Mrs. Cornelius Kearns, Mr. Bernard Coyne and family, Mr. and Mrs. M. J. Curran and family, Mr. and Mrs. Patrick Manley, Mr. and Mrs. Ed McDonald, Mr. and Mrs. D. J. McMillan, Mr. George Servage, Mr. and Mrs. Bernard Gibbons, Mr. and Mrs. D. P. McNaughton, Mr. and Mrs. Thomas Flynn, Mr. and Mrs. Leonard Curran, Mrs. Galvin and family, Mr. and Mrs. J. L. Lisson, Mr. E. B. Lynch, Mr. and Mrs. Maurice Servage, Mr. and Mrs. James Clement,

Cut flowers were received from:—Mrs. H. McMillan, Mrs. C. J. Wert, Mrs. M. E. Curran, Mrs. B. Gibbons, Mrs. D. Allison, Mrs. H. McMahon.

Marked Contrasts Feminine Types at Ottawa Fxhibition

From the four corners of the earth will come men and women of striking contrasts, animals, fish, birds, fruits and products of all kinds for the entertainment and edification of visitors to the Ottawa exhibition. The most striking contrast of all will be that of the Ubangi women from the African wilds with the fascinating and dainty Japanese performers, the pulchritudinous water nymps or the Broadway beauties of the music and dance revue.

When beset by the Arabian slavers, the Ubangi women made themselves hideous and thereby lessened their chances of being drafted into slavery by extending their lower lips to enormous size. It is claimed that the coal-black females of the Ubangi can stretch their lips to the circumference of a large dinner plate.

A number of the Ubangi women are to be on exhibition at the midway shows of the Ottawa exhibition, and will form only one of the many new features to be seen in the pathways of bizarre sounds and sights during the six big days, August 24 to 28, inclusive.

Ottawa's midway this year will be provided by the William Glick Greater Shows, and will include 28 separate side-shows and rides, in addition to any new features which may be conceived by the showmen up to the time of the exhibition.

Many premier acts will supplement the grand stand revue in such a way as to make it the greatest outdoor show of its kind in Eastern Canada. The Kikuta Japs, a group of marvellously clever tumblers and head balancers and the sensation of New York, have been engaged to appear, and the fact that they have been booked up for two and one-half years at a stretch indicates how much in demand they are and how unique and enjoyable their act is. Beautiful girls comprise the personnel of the Billy Ritchie Water Show, a performance of skill and daring in aquatic evolutions, featured by the sensational high dive by Captain Sol. Soloman. Max Gruber will be on the bill with his jungle oddities, including an elephant, Zebra and a Great Dane, who go though all sorts of clever tricks. Mr. Gruber is noted as the first man to "gentle" a Zebra.

Bee Starr, the personality of another fine act, is a winsome girl, who is one of the wonders of the scientific world for her great feats of acrobatic strenyth. One of the thrills of the programme is promised to the thousands who will see her performing at a dizzy height over the great stage seemingly obvious of the danger, going through a gruelling exhibition of human endurance.

The Leach LaQuinlan Trio is another stellar attraction, the principals giving a wonderful exhibition of skill and strength on a thin wire stretched across the stage, while for laughs the management has been fortunate in securing the White Brothers, a splendil team of world-wide fame, whose nrrestibly funny antics have scored hits wherever they have appeared. The Frisco Seals, performing stunts of rolling, balancing objects on their noses and playing musical instruments is but another of the splendid acts of the grand stand performance.

Anyone wishing information about the exhibition or about the city, with particulars which will help to plan a visit to the Capital, will hear promptly if communciations are addressed to the manager and secretary, Herbert H. McElroy, Ottawa.

Grantley

Mr. and Mrs. Jos. Patenaude and family, of Cornwall, were guests of Mr. and Mrs. Silas Barkley last week.

Mr. and Mrs. C. McMillan and Hazel, and Mr. and Mrs. Roy Elliott spent Friday evening in Cornwall.

Mr. and Mrs. Bert McMillan were guests on Sunday of Mr. C. McMillan.

Mr. Wilbert O'Neil, of Winchester, was the guest of Miss Blanche Barkley Tuesday evening.

Guests at Mr. and Mrs. John Locke's last week, were: Mr. Alex Payment and sister Eva, Mrs. Moses Payment and children, of Cornwall, and Mr. and Mrs. Henry Hanson, of Brinston.

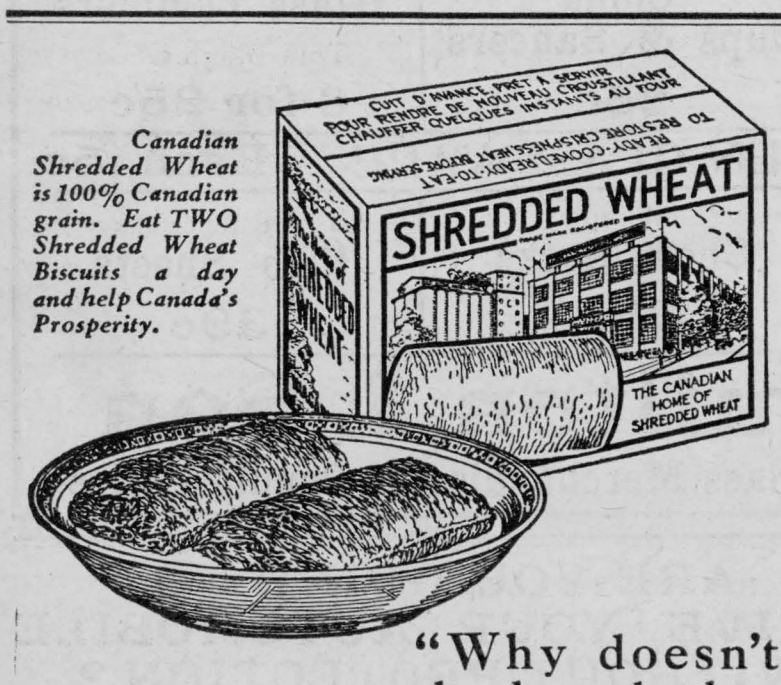

Mr. Joe Featherston and Jack Farrell spent Friday in Ottawa.

He married a spinster who owned a thousand head of fowl.

Robinson: "How came she to marry him?"

Smythe: "Just like a woman. If she can't get a man by fair means, she will by fowl."

Canadian Shredded Wheat is 100% Canadian grain. Eat TWO Shredded Wheat Biscuits a day and help Canada's Prosperity.

"Why doesn't the heat bother you?"

"My dear, it's so simple you'll laugh. I just make sure that I don't eat too much for lunch. For example, this noon I had two Shredded Wheat Biscuits covered with berries and a pitcher of half and half. That's what I call an ideal lunch. The big idea is the Shredded Wheat—it's so light, nourishing and easy to digest, it keeps me comfortable on a hot afternoon."

A-Motoring We Go

Last week the editor with Mrs. Lacey, Miss Ruth Garrow and Miss Helen Lacey enjoyed a motor trip to Boston and a three-day stay sightseeing in that city when they accompanied Miss Maude Lacey returning after her holidays. Altogether about 1150 miles were covered by motor. Crossing at Morrisburg where Ross Beckstead ushers one across the line at so much per head and a dollar for the car, the trip was made by way of Potsdam, Saranac Lake, Lake Placid, Elizabethtown and Port Henry and Westport where the crossing of the lower end of Lake Champlain was made over a toll bridge. From the bridge we went somewhat out of our way to see the city of Burlington, which takes one along the east side of the lake for a considerable distance ending the first day's run about ten miles from Burlington where the inviting appearance of a cabin camp with electric light, running water and a swimming pool in the heart of the Green Mountains looked good to us and we put up for the night. The scenery through the Green Mountains and Adirondacks was wonderful to one coming off the level stretches of Dundas, each dip, turn and rise unfolding a panorama of lake and forest-clad mountain that were constant sources of delight throughout the day.

After passing through Burlington on the morning of the second day, a slight detour was made to visit the city of Montpelier and then more or less cross-country to Lake Winnipasauke where our mid-day stop was made and an excellent meal partaken of where dining on the verandah a beautiful vista of lake and mountain stretched off for miles, with fast motor boats skimming the water and big 'planes carrying passengers to and from the resorts. We were now in the White Mountains for a short stretch before turning more directly for Boston in reaching which we passed through the cities of Manchester, Lowell, Nashua, Concord and numerous smaller towns. Within a few miles of Boston we had our evening meal, when fried clams and lobster began to be quite prominent on the bill-of-fare. About half past eight we arrived at Cambridge, a suburb of Boston, where reservations had been made at the Commander Hotel, where we were most satisfactorily housed while seeing the varied points of interest during the next three days.

The return trip was made over the Mohawk trail in the Berkshire Hills where an altitude of 2240 feet was reached, then on into New York state and the Adirondacks again, coming by way of Tupper Lake and Glen Falls to Potsdam where we began to retrace our route to Waddington.

The three days in Boston were wonderful to a rube and we would like to tell you all about them but you might think it the first time we were ever off our own main street, even at that we may fall for it in our next issue.

Spinning-Wheel, Spare Loin Cloth, Book, Only Luggage

When Mahatma Gandhi sails two weeks hence as a steerage passenger for the London Round-Table Conference he will not even have a suit case, a tooth-brush or a coat and hat. His only baggage will be two goats, a spinning-wheel, a spare loin cloth, and a copy of Thoreau's essay on "Civil Disobedience."

The goats, given him by one of his numerous admirers, will supply the milk which is his principal article of diet throughout the three weeks of the voyage and during the conference in London. The steamship company broke a long-standing rule to allow the goats to be brought along.

Miss Madeleine Slade, Gandhi's English disciple and attendant, will having charge of the goats, milking them twice a day while he watches.

So that he will be in no danger of being swept overboard while he sleeps on the third-class deck, the steamship company will build a special guardrail around Gandhi's straw mattress.

A score of Indian princes and other distinguished Indian delegates to the conference will travel in special suites but Gandhi goes as would the lowest Pariah, with a hardwood deck as his bed and the sky as his roof. If the weather gets cold he will wrap a homespun blanket around his frail frame.

CARD OF THANKS

We wish to thank our friends and neighbours for many acts of kindness and sympathy in our recent bereavement.—Jas. Kearns and family.

Nervous Lady (in hotel): "Dear me, porter, this bedroom is a tremendous height from the street. I do hope you take precautions against fire?"

Porter: "Oh, yes, mum, we take every precaution. The proprietor's got the place insured for twice what it's worth."

Mike: "Pat, there's wan thing will cure malaria—that's whiskey-an-quinine."

Pat: "Where can ye git it?"

Mike: "The whiskey-an-quinine?"

Pat: "No, malaria."

Destroy the Weeds

The Ontario Weed Control Act states :

CLAUSE 3:

Every occupant of land, or if the land is unoccupied, the owner, **shall destroy all weeds designated noxious** by the regulations as often in every year as is sufficient to prevent the ripening of their seeds.

CLAUSE 6:

In the absence of any owner or occupier, or upon refusal after notice to comply with the requirements of the Weed Control Act, **the Inspector may cause weeds coming under this Act to be cut down and destroyed,** and may charge the cost of such work against the property to be collected in the same manner as taxes.

NOXIOUS WEEDS

Bladder Campion	Canada Thistle	Burdocks
Ox-eye Daisy	Blue Weed	Stinkweed
Sow Thistle	Chicory	Tumbling Mustard
White Cockle	Docks	Wild Carrot
Wild Oats	Ragweed, common	Wild Lettuces Ribgrass

THERE IS A SEVERE PENALTY FOR ANYONE DUMPING WEEDS OR WEED SEEDS ON TOWNSHIP ROADS.

H. H. EMPEY,
Weed Inspector.

THE HAY MOW MOVEMENT

New Haven Journal-Courier

OF national societies of one kind and another this country surely has more than its share. Yet there ought to be plenty of room for the Society of Hay Mow Sleepers, a group recently organized by a number of New York and Chicago business executives.

The aims of this outfit are simple. Membership is open to men who either were brought up on farms and slept in hay mows as a matter of course or were brought up in cities and wanted to sleep in hay mows, but never did.

The club houses, naturally enough, will be barns, strategically located in various parts of the country. Each barn will contain a hay mow, and any member can gratify his passion for hay mow sleeping at any time simply by repairing to one of these club barns.

A good many devices have been brought forth in the last few years to soothe and divert the tired business man. Musical shows are staged in his honour, clambakes are arranged, summer camps have been brought into being; but could any of these really compete with a good hay mow?

Sleeping in a hay mow is, after all, one of the noblest pursuits open to mankind. In the first place, hay makes an ideal bed—soft, rustling, warm in cool weather and cool in warm weather. It is odorous with a spicy fragrance that brings sleep almost of its own efforts.

Besides the surroundings serve to increase the sleeper's enjoyment. The hay mow is dusky, quiet, secluded; and on rainy days, when the raindrops drum on the roof and the eaves drip musically, the hay mow sleeper has no cause to envy anyone on earth.

There ought to be a big place for such a club. There may be just one trouble; the organizers will probably find themselves swamped with applications.

Riverside

Mr. Willis Kinnard visited at his parental home at Crysler.

Mrs. Dan Pollock spent the week end with friends in the United States.

Mr. and Mrs. Howard Prouner, of Massena, visited with the latter's parents, Mr. and Mrs. Donald McPherson.

Mrs. R. C Bogart visited with Mrs. Archie Carruthers, Cannamore.

Mrs. Wm. McMillan, Miss Jean McMillan and Miss Lena Droppo visited with Mrs. Dan Pollock.

Mr. and Mrs. Fay M. Droppo and family, Mr. and Mrs. L. B. Shaver and family and Mrs. S. Hutt visited at the home of Mrs. R. C. Bogart.

Miss Leanna Smirle, R. N., visited with Mrs. R. C. Bogart.

Mr. and Mrs. L. Montgomery and family visited friends at Maxville.

Mrs. C. Foster is spending this week with Mrs. H. Fulton at Brockville.

Miss Gertrude McPherson visited with Mrs. H. Prunner, of Massena.

The regular meeting of the Women's Association was held at the home of Mrs. Angus McDermid, Ashburn, on Tuesday. A number from here attended.

Mrs. Alf Casselman has returned home from Kingston General Hospital much improved in health.

DO NOT DISCARD YOUR LIFE WORK

A YEAR or two ago a man who had made half a million dollars in his business in Toronto sold out, received cash and bonds, and prepared to spend the rest of his life in the way he had often dreamed of in the time he was making his fortune. He bought a little farm and laid in his stock of delphiniums and Buff Orpingtons, and in a sense put on his slippers and lit his pipe. He had all the money he wanted, and was still young enough to take a keen interest and pleasure in the life around him. But in three or four months he learned that Wrexham delphiniums were calculated to provide interest only in a couple of the months of the year, and that chickens, however charming, were kind of dumb.

The old friends of his business activities did not find their way to his farm with any great frequency. They were, in fact, trying to get enough money so that they too might retire, maybe to their White Leghorns and their dahlias, or their Wyandottes and their roses or their golf or whatever it was that provided their charming dreams while they worked. Our friend presently began to peak and pine. Having bade a formal farewell to business he was ashamed to return brazenly to it. But he was unhappy.

It happened that the greatest piece of luck he ever had, though perhaps he was unaware of it then, and may be unaware of it now unless he should happen to read this piece and identify himself, was his wife. She swiftly understood his trouble, and knew that there was but one cure for it. So she went to a friend who was in the same business which her husband had so heartily abandoned, and laid bare her heart. A few days later the friend, encountering the husband, said that for the moment he was in great difficulty, and asked him if he would consent to take an hour or so a day and help him out. The retired merchant consented with alacrity and presently and gradually was in harness again. And there he will die, and die happy, or happier than among his delphiniums and his Buff Orpintons.

GROW TREES ON LAND UNFIT FOR ORDINARY CROPS

OFFICIALS of the Ontario Forestry Branch recently spent a week examining the woodlots in Oro Township, Simcoe County, and in interviewing the owners as to the value they placed on their woodlots. It is generally agreed to-day that light, sandy land, swamps, steep hillsides, and shallow soils hould be growing trees, as these have little value for crops or pasture. The northern part of the township is largely light, sandy land. The Midland Free Press says that information gathered from the officials was of benefit to Oro and could be applied equally well to many other townships. Woodlots are useful for both fuel and timber. They help to prevent floods and erosion. They may produce maple syrup and Christmas trees. They furnish labour in Winter and add beauty to the property. The Forestry Branch will send a trained forester to look over a woodlot with the owner, and advise him on the best methods of handling for present financial returns and future growths.

"You're looking bad, old man," said an acquaintance to Browne. "What's the trouble?"

"Domestic," replied Brown briefly.

"But you always said your wife was a pearl."

"So she is. It's the mother o' pearl that's the trouble."

News and Information For the Busy Farmer

Furnished by the Ontario Department of Agriculture.

The annual convention of Canadian Florists' and Gardeners' Association takes place at the O. A. C., August 12th to 14th.

The importance of the dairy industry in the historical development of Canada is about to be recognized by the erection of a cairn on the site of the first cheese factory in Canada, which was located in Oxford County, Ontario.

Milk-Fed Bees

Tests have been made recently by the Federal Bee Division in regard to stimulative feeding for brood production. A syrup composed of sugar and milk was used in place of the usual sugar and water syrup. In an average of four colonies not only were a large number of combs covered by bees up to mid-July, but each milk-fed colony produced an average of 23 pounds more honey than the check lots.

Feeding Cattle

Flies are a great nuisance and reponsible for a part of the midsummer slump in production by dairy herds. However, poor feeding is more often responsible for the low returns. Pastures were not good early in the summer and proper measures to supplant them were not taken by many dairymen. The man with some silage left is fortunate. Where the hay crop is large, some hay may be fed where pastures are short. For the best cows a fairly liberal grain ration is also advisable. A good mixture may be made from six parts of ground oats and barley and one part oilcake meal. If farmers are to maintain the production of their cows, they must maintain their weight and that means feeding just in proportion as the pastures fail.

Ontario's Blueberry Crop

Following copious rains, a big blueberry crop is expected in the Muskoka, Parry Sound, Nipissing and Temiskaming districts. Arrangements have been made to move a large number of unemployed into the area to harvest the crop, with the prospect of three to six weeks' labour at fair wages. Consumption of blueberries is rising steadily and the market is providing an income for many a family in Northern Ontario. The Marketing Board is making a special study this year of the shipping, marketing and cold storage possibilities of this luscious wild fruit. Blueberries are easily kept in storage, retain their flavour and freshness and come out months later in splendid condition. Nearby American cities are proving to be large consumers of Ontario blueberries, while housewives generally are beginning to appreciate the value of blueberries for canning purposes.

The ease with which raw milk can become contaminated owing to unsanitary conditions was recently demonstrated in the town of Burlington, where complaints had been made regarding the milk supply in that locality. Two officials from the O. A. C. visited the district and found that the bad flavour of the milk was due to fly spray material used in the barns.

The proper fertilization of a strawberry plantation may require fall applcations of a commercial fertilizer. In September the strawberry plants are forming their fruit buds for next year's crop and during this period they require good nutritional conditions to make their best effort. Generally speaking, a light application of a good fertilizer late in August will result in a big increase in next year's crop.

Controlling Weeds

Repeated experiments have shown that summer ploughing of sod land and the subsequent cultivation of the soil until fall very materially assists in the control of weeds, especially of perennial plants such as couch grass. It has been found that ploughing the sod land in July and cultivating at ten-day intervals until the freeze-up almost entirely prevents the growth of couch grass and other weeds, whereas ploughing once in the late fall or early spring with no subsequent cultivation, has practically no effect on the weeds.

A Cow-Testing Association

In order that the dairyman may have a definite knowledge of the value of each cow in his herd, a cow-testing association has been formed in Orillia. A record of both the milk weights and the butterfat production will be obtained for each individual cow and this can be used for comparative purposes. As a result of a similar association in Wentworth County, formed about six years ago, it was found that the 30 best cows entered in the association produce an average of 11,393 pounds of milk containing 411 pounds of butterfat each, while the thirty poorest cows produced only 5,346 pounds of milk contaming 171 pounds of butterfat. The difference at prevailing prices amounted to an increased revenue of the best cows over the poorest cows of $121.00 each. It was further discovered that quite a percentage of the cattle in nearly every herd in Wentworth were not paying for the cost of their feed, let alone cost of labour, interest on investment, depreciation, etc. TheOrillia Association will aim to eliminate the boarder cow and to enable the dairyman to build up a productive herd which will return a reasonable profit over feed and labour.

O.A.C. Methods

It is interesting to note that the time for working the home orchard at the O. A. C. this year was cut down from ten to three days by using a tractor-drawn, stiff-toothed cutivator followed by a disc, instead of a plough. A system of early ploughing and early seeding of the cover crop is being followed in the orchard. The cover crop thus gets an early start and no check. Oats at the rate of two bushels per acre have been used in the past three years and these are cut just before they head out, the resultant second growth adding considerably to the amount of green matter to the acre.

Feeding Is Important

Which is the major factor in poultry production, feeding or breeding? The following interesting results were obtained with three pens of hens at the O. A. C., between November 1st, 1930, and June 1st, 1931.

The first pen was bred for egg production and the ration fed was pood. In the second pen the breeding was for other characters and the ration was very good. The third pen was bred for egg production and the ration fed was the same as that given to pen No. 2. The results were as follows for the period stated above:

Pen 1. 38 eggs per hen—high hen laid 74 eggs.

Pen 2. 34 eggs per hen—high hen laid 75 eggs. . . .

Pen 3. 94 eggs per hen—high hen laid 167 eggs.

The Minister Speaks

County and township fairs in Ontario may be reduced in number, according to plans under consideration by Hon. Thomas L. Kennedy, Minister of Agriculture. The Minister points out that in many cases government grants have been found higher than county grants to county fairs. One reason for the failure of the fairs, he believes, is the tendency to depend too much upon the government for assistance instead of getting results through their own initiative and enterprise. Reduction in the number of fairs, with government aid being apportioned more discriminately, may follow. The Minister also feels that the existing seed crops competitions should be abolished and replaced by registered seed competitions. With the free seed-cleaning policy now operative, seed competitions would do more to bolster the farming industry than the crops type of competition, he says.

Speaking on the subject of grading milk, Hon. Mr. Kennedy foresaw a time when city dwellers would demand a higher quality of milk. Steps were now being taken to clean up cattle areas and free them from disease, and the time seemed ripe to get a milk-grading organization under way. Shipment to England of a special type of Ontario-grown barley adaptable for malting purposes would be made shortly, the Minister announced. A heavy demand in England is expected for this type of barley, known as O. A. C. No. 21.

HAS IT HAPPENED TO YOU?

by **P.C.1**

In our childhood most of us learn to greatly dislike the words "don't do that," but of course when we grow up we learn that most "don'ts" have a lot of reason behind them.

However, some of us never do learn.

For example, there's the man who habitually exceeds the speed limit. I followed one of these chaps for about 3 miles yesterday on the Lake Shore Road. He didn't hit less than fifty at any time. Luckily, traffic was light. He was indignant when I waved him to stop.

"Sure, I know I was driving fast," he said, "but the road was clear and I'm in a hurry."

I had to explain to him that no man can drive a car at excessive speed and get away with it . . .always.

You see, in the city a driver runs at a much slower speed and his mind and motions are keyed to that speed. In an emergency he knows what to do, and does it instinctively.

Occasionally on the highways he "steps on it" and at the first emergency he's in trouble almost before he knows it.

No two ways about it. I know. I've seen it happen often enough. The fast driver always gets his . . . eventually, sometimes even through so simple a thing as a blowout.

Better slow down, before you get yours brother.

Well . . . I'll be seeing you.

His Majesty Constitutes Office of Governor-General

New letters patent constituting the office of the Governor-General to Canada have been issued by King George V., together with new instructions for the guidance of the Governor-General. The last time letters patent were issued was in 1905 by King Edward VII. In general the recent documents bring the office of the Governor-General into accord with the recommendations of the Imperial Conference of 1926, which were adopted by the Parliaments of the Empire at various dates since that year.

Specifically, they remove from the Government of the United Kingdom the last vestiges of control exercised by that Government over the appointment of a Governor-General to Canada, making it a direct and personal one by His Majesty on the advice of H. M. Government in Canada. Formerly in defining the powers and authority of the Governor-General, the letters patent directed His Excellency to carry such instructions "as may from time to time be given him under our sign manual and signet, or by Order-in-Privy Council, or by us through one of our principle secretaries of state." In the new issue, the last two references are eliminated.

The same deletion occurs in the document containing the King's instructions.

An archaism is removed from these instructions having reference to the grant of pardons, etc., by the Governor-General. Previously His Excellency had the authority to prescribe banishment for political offenders.

That's Facing It, Bingo!

YOU know Bingo Snow, the poor little rich boy. There's a boy just like him in your class at school, your troop of Scouts. You know how attractive he is, how fresh he can be, how rude, and indifferent.

Bingo Snow's mother sat with a telegraph blank in front of her and wondered if she knew Bingo at all. How would he behave now, with his father critically injured—perhaps dying? The doctors could not know yet. There were two of them examining him in his hospital room. Mrs. Snow had looked at his white face, with the hideous wound in the temple, the wound that could only be bandaged with a dirty rag when they took his limp body out of the awful heap of twisted, burning cars after the awful collision at Winchester. Mr. Snow had been hurried to the hospital in Boston as fast as an ambulance could bring him. Perhaps he had not come fast enough. Perhaps not even the great surgeons could save him now.

Mrs. Snow wrote this message to Bingo:

"Come home at once. Daddy's train wrecked. He is still unconscious, but we have hopes. Don't worry. Much love. Mother."

Then she returned to the corridor outside the room where her husband lay. Bingo was still in her mind. He was only ten and had never been away from home before. Had her message been gentle enough? Would he realize that his father was dying? Would he be too much frightened? Mrs. Snow wished that Camp Queechunk had a telephone. When she picked out that camp for Bingo, she was told by the Director that it existed to make manly boys. It was attended almost entirely by boys from the wealthy families—boys who were a little bit spoiled, who needed to get away from telephones, and from too indulgent fathers and mothers. Camp Queechunk consisted of two or three log houses on a lake in the Maine woods. The boys led simple, strictly disciplined lives. Mr. Archibold, the Director, didn't believe in pampering. Boys who gave no trouble had a wonderful ten weeks at camp—but boys who looked for trouble found it.

The long hours wore on. The great surgeons were fighting now—fighting with all their skill for George Snow's life. Mrs. Snow's thoughts were all with him; and yet, as the moments passed, she found herself thinking of Bingo too. A nurse came by, and put her hand on Mrs. Snow's arm, and led her gently into a vacant bedroom. "Lie on the bed,' 'advised the nurse, and brought her some smelling salts.

Mrs. Snow sat down, clutching her handbag. She looked in the bag and took out a photograph and several letters addressed to her in a sprawling hand. The nurse was off duty. She looked at the picture; she saw a fair-haired, rather arrogant-looking little boy. The nurse thought he might be a very badly spoiled little boy. And her conviction deepened when Mrs. Snow began to read his letters.

"Dear Mum and Daddy," began the first one. "This camp is fierce. We sleep on prickly old army cots and there no sheats only blankits and no plumming of any kind either. We haf to bath in the lake and the Counselor says if I doant learn to swim I cant bath. He is a big bully anyway! I guess it would be better if I came home where I can always have a good time. The big bully!!! My cot is next to a boy from Los Angels he says his father has two Swift Dart limerzines so I told him my father had three Rush Royces and I guess that will fix him. From your loving BINGO."

Mrs. Snow smiled. It was outrageous for the boy to use such language and to speak with such disrespect of the Counselor. But he wanted to come home. It was good to think that Bingo loved his home.

The nurse might have said at this point that Bingo really deserved to go to a reformatory, and not to a famous summer camp. The children of the rich have so much, and appreciate so little of it.

"To-day I had another trick put over on me," said Bingo's next letter. "I threw a potato at Dick at lunch and hit him in the eye and they made me do ground police all the P.M. The Counselor got sore at me, he is just an old bully anyway, he went to college and doesn't even know the results of the football games. I told him not to get fresh and he made me go all over the plaice with a sharp stick, and you haf to pick up all the rocks on the baseball field, even the smal ones. I guess I didnt come up here to be a labrer and if they keep on pickin on me I will tell them a few things. Daddy could buy up this old camp and not know it. I wish I was home. Your loving BINGO.'

Mrs. Snow sighed. "I am afraid George and I have been too gentle with him," she said. "But he is our only chick—all we have."

An attendant came into the room, with a telegram in a sealed yellow envelope. Mrs. Snow seized it eagerly. Perhaps it was from Bingo. Perhaps he was already on his way to her. She threw the message aside after a glance; it was from her sister in another city, expressing sympathy. Yet there was something strange about it. "Hope George and George Junior are out of danger," it said in part. George Junior was Bingo. He was in no danger. What did the sister mean? It must be a mistake. Mrs. Snow went on reading the smudged and blurry letters.

"If they think they can keep on bulying me and my bunkie mate Dick," said one of them, "we will show them. We will hike from here home if necessary, but Dick has got money for R. R. tickets."

Mrs. Snow remembered how much her husband had been troubled by that letter. He had written severely in reply, saying that he would visit the camp in a few days to investigate. It was on this trip that his train had been wrecked, only a few miles from Boston. It had collided with the southbound express.

The attendant returned with two more telegrams. The first was from the Director of Camp Queechunk:

"Your son ran away this morning with another boy. Making every effort to locate them. Will report later."

The second was from Winchester, Massachusetts:

"Won't be hoam for a few days. Have important engajmint. Bingo"

Mrs. Snow fainted. The nurse laid her gently down on the pillow and moistened her brow. Then—for the nurse was human—she picked up and examined the telegrams. Mrs. Snow had read them aloud. It was no intrusion to read them again.

"The little fiend," said the nurse. "The cowardly little rat. First he ran away from that wonderful camp, and then he was too selfish, too cowardly, to come home even when his father is so badly hurt."

She looked at Bingo's telegram again. It was marked "collect" and it came from Winchester, Massachusetts.

"That's where the wreck happened," mused the nurse. "Now I wonder if—"

She did two things. The first was to telephone for an afternoon paper. While the attendant was bringing it, she went to Mr. Snow's room, tapped on the door and questioned the doctor who opened it.

"Out of danger," answered the doctor. "Heart strong. Everything all right."

The nurse thanked him and went back to Mrs. Snow's room. Mrs. Snow had come to herself. The newspaper lay on the bureau—a late edition, with screaming headlines about the great train wreck and full lists of dead and wounded.

"I've splendid news for you," smiled the nurse. "Mr. Snow's condition is excellent. I think the doctors will soon tell you he's out of danger."

She sat down while Mrs. Snow recovered herself. She looked down the list of wounded. Suddenly she gave a little gasp. "Here it is," said the nurse, putting the paper into Mrs. Snow's hand and directing her attention to this item in the list of names:

"BINGO" A small boy on the southbound train, refusing to give any name but "Bingo," was removed to Winchester Hospital. Both ankles fractured and cut around head and shoulders. Will recover."

Mrs. Snow read this item three times. "But I don't understand!' she said at last.

"I do," replied the nurse. "He must have sent it just when he reached the hospital," she explained. "He was afraid you would worry about him. He wanted to face his pain and danger alone."

"Bingo, my wonderful boy," sobbed Mrs. Snow.

The nurse was looking at his photograph again; at the rebellious, brave little face.

"That's facing it, Bingo!" she whispered.

Mrs. Snow rose and began to put on her hat. "From now on," she said, "I think that bad little boy of mine's going to be different. I'm leaving for Winchester now—to help him keep that important engagement."

Why Eve Was Put Out

It was the first time he had ever read the lessons in church, and he was consequently feeling a little nervous.

When he came to the bottom of the page the last words were, "And Eve was," but being flurried, he turned over two pages at once and came to the description of the Ark, and to the amusement of his listeners he bellowed forth, "And Eve was—forty cubits round about."

Sunday School Teacher: "And when it rained forty days and forty nights, what happened then?"

Bright Willie: "The natives said it was very unusual."

Bump: "Has your wife learned to drive the car yet?"

Bumper: "Yes, in an advisory capacity."

THE EARNING POWER OF DEMONSTRATIONS ON FARMERS' LAND

Experimental Farms Note

ON the two hundred and eight Illustration Stations now operated by the Dominion Experimental Farms Branch, and distributed through each province of the Dominion, the principle embodied in the old adage that "seeing its believing," is being applied in a practical way. On these stations, comparative trials are made embodying the results obtained from the nearest Experimental Station. Such demonstrations embrace all phases of practical crop and livestock production, and include the introduction of new crops or varieties which had not been previously grown in the district.

In Northern Ontario, Northern Quebec and certain districts of the Maritime provinces, subject to early fall frost, the value of an early oat such as Alaska, has proven a necessity. Similarly through the medium of these stations, operating in the Prairie Provinces, comparative demonstrations and trials with Marquis, Garnet and Reward wheat have assisted in carrying these varieties into new districts, having been found superior to those formerly grown. From such demonstrations farmers have the opportunity of observing the characteristics of such verieties or crops as may be under consideration and are able to judge for themselves as to their practical value under their local conditions. Furthermore, such stations increase and multiply the seed from these desirable varieties, for sale to farmers in the community at moderate cost. During the past season, farmers operating such Illustration Stations distributed for sale 31,182 bushels of seed grain, 13,897 bushels of seed potatoes, and 16,001 pounds of grass and clover seed.

Demonstrations featuring the methods of handling and growing red clover for seed have assisted in placing this crop on a profitable crop production basis in a number of districts in Quebec, Ontario and British Columbia. When the Illustration Station was established and such demonstrations were undertaken at Aubrey, Quebec, red clover was not grown commercially and but to a limited extent for home use. Five years later, however, $80,000 worth of red clover seed was produced and sold out of this district, in a given season. This crop still is increasing, being grown as a cash crop in this district in conjunction with their dairy farming operations.

Essential and far-reaching demonstrations with respect to the use of chemical fertilizers as a supplement for manure have been carried on, particularly in the eastern provinces and British Columbia. In many of these districts farm lands had become deficient in plant food, resulting in low yields and the production of a poor quality hay from the feeders' standpoint. The use of nitrogenous fertilizers, ground limestone, lake mud, marl, superphosphate, varying amounts of potash, highly concentrated fertilizers such as nitrophoska as well as complete mixed and home prepared fertilizers, form the basis of demonstration on a farmer's own land to determine wnich ingredients are most essential to crop growth and which will most economically supplement the deficiency in plant food which exists on some farms, due to the lack of farmyard manure.

Cultural demonstrations, including the use and introduction of acclimatized red clover and alfalfa seed, have been an objective on the Illustration Stations in British Columbia. When such demonstrations were started in 1922, a crop survey showed that less than two acres of alfalfa were being grown along the Canadian National line between Smithers and McBride. Test plots were set out which later were extended to demonstration blocks. Hardy strains of red clover seed were introduced and two acres seeded on a number of farms throughout these areas for demonstration purposes, with a view to producing hardy seed for use locally. The success of these demonstrations has encouraged farmers to grow these two crops, to the extent that the individual acreages, particularly of red clover on certain farms, now approximates one hundred acres, and the production of red clover seed in the Prince George and Vanderhoof districts, has exceeded 3,500 pounds in a season. Similarily along this line, the operator of the Vanderhoof station also made up the first car of alfalfa shipped out of the Nechako Valley, and in 1927 the one at Telkwa shipped the first carload out of the Bulkley Valley.

Demonstrations carried on under practical farm conditions have a distinct educational and stimulating value in that they tend to make individual efforts more general in their application.

An Eastern potentate once asked a group of his courtiers whom they thought the greatest man, himself or his father. At first he could elicit no reply to so dangerous a question. At last a wily old courtier said:

"Your father, sire; for, though you are equal to your father in all other respects, in this he is superior to you—that he had a greater son than any you have."

He was promoted on the spot.

"OUT OUR WAY"

THERE is perhaps no more popular popular cartoonist living to-day than J. R. Williams. His "Out Our Way" cartoons are in a class by themselves, and we doubt if any man can more truthfully depict the interesting peculiarities of children, and home life.

Mr. Williams delights to depict those people who in his opinion were born thirty years too soon, and recently he pictured a mother whom, he thinks, was born thirty years too soon. She is on her knees scrubbing the floor. On one table is the evident result of hours of hard work canning fruit and vegetables. On another table is a batch of bread and half a dozen or so tasty looking pies. In the out-kitchen can be seen the coal oil lamps, and the wash tub and board. On the stove the supper is cooking. In the imaginary circle above is a vacuum cleaner, a row of cans and a can opener.

We wonder if that mother was really born thirty years too soon, so far as real happiness is concerned. We wonder, if she had her choice, would she rather cook, and bake, and wash, and scrub for a happy contented family, or would she rather get her exercise running around a field with a golf bag over her shoulder, and her mental relaxation listening to an irate bridge partner conduct a post mortem on her latest game.

Coming right down to cases, did anyone ever eat anything out of a can that could compare with something mother put up in a glass jar at home. Did anyone ever discover the knack of making a real old-fashioned "punkin" pie, or one of those real, fat juicy blueberry fellows, except mother. And home-made bread! Why the only difficulty about home-made bread was that it went too fast. The mere look of it, while it cooled, gave one a gigantic appetite.

Some of the mothers of other days may have felt that they lived thirty years too soon, bue we doubt it. Their idea of marriage was a partnership in which both partners worked. The husband earned the money and the mother did the housework and guided and guarded the lives of the children. They took a real, wholesome joy out of washing and baking for their husbands and families, and we doubt if they would have exchanged the thrill they got when a healthy boy said, "Gosh, ma, that's a real pie; c'n I have another piece?" for the doubtful glory of making 18 holes under 100, or of carrying home a silver-plated bon-bon dish from an afternoon bridge tussle.

After all, the whole thing is a matter of ideals, and a mother's conception of her duty.—Kingston Whig.

SCOTTISH CAKE

Etta Bitta Pye

SCOTIA'S own specialty, the crisp and nutty oatcake, is without a substitute—in its field, one might safely say without a peer. Here it is, the real Scottish oat cake—and a simple little variation of the mixture that is quite attractive in its own way.

- 4 cups quick-cooking oats
- 2 cups flour
- 1 teaspoon salt
- 1 teaspoon soda
- 1 egg
- 1 cup butter
- 1 cup lard or other shortening
- ½ cup sour milk

Sift together flour, salt and soda, after mixing them well; combine with the oats. Cut and rub in the fat—a combination of butter and another shortening or use a neutral white shortening entirely; beat the egg, combine with the sour milk, and add to the mixture, making a stiff dough. Roll out on a lightly floured board and cut in tiny or large triangles. Bake in a moderate oven, 350 deg. F.

Made plain, rolled thin and cut small, these crisp little oat cakes are unexcelled to serve with cheese.

Cheese Crisps—Shape thinly rolled dough with cookie cutter; sprinkle half the surface with grated cheese, fold over other half and bake.

"Drat those Pesky Flies"

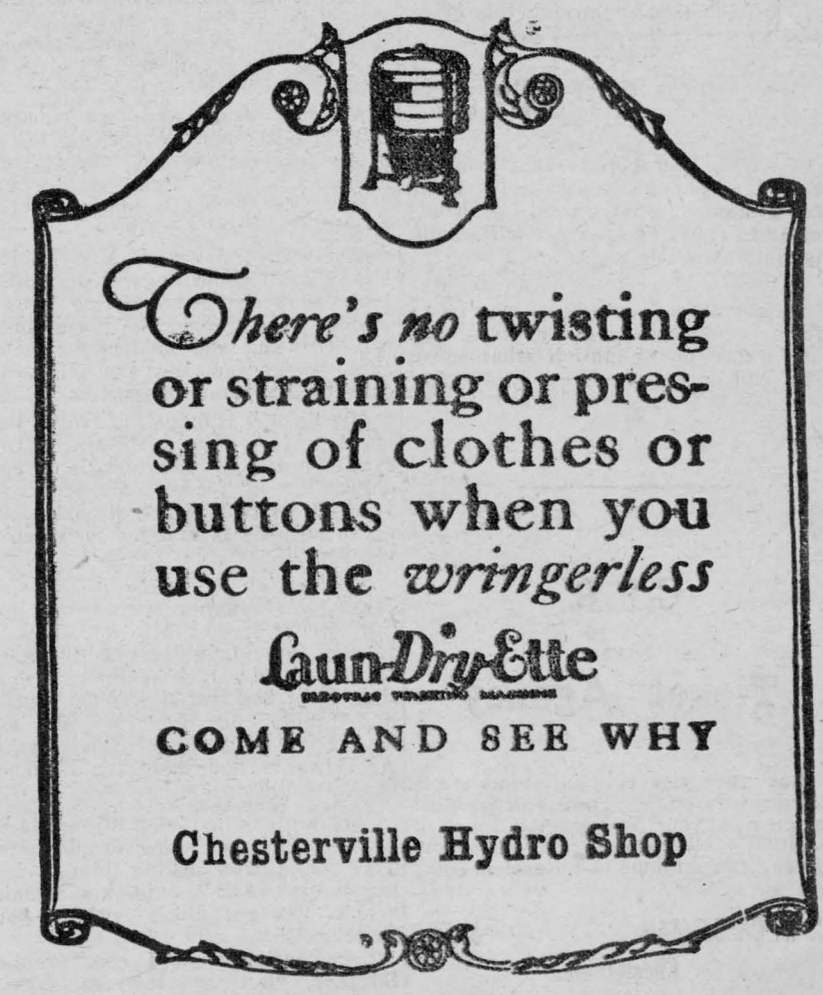

Catch them with Aeroxon—clean, convenient, hygienic—the fly catcher with the push pin and wider and longer ribbon. The glue on Aeroxon is fragrant and sweet. Good for 3 weeks' service—it will not dry.

At drug, grocrey & hardware stores.

AUTOMOBILE INSURANCE

Before placing Insurance on your car, get particulars of the new plan, where you are allowed a reduction of 20 per cent from the recent reduced rates. Discount applicable to Public Liability, Property Damage and Collision Damage.

DRIVE in SAFETY

with an Automobile Insurance Policy to protect you against the hazards of Fire, Theft, Collision, Property Damage and Public Liability.

Every Automobile Owner in Ontario should know about the new Financial Responsibility Law effective since September 1st. The new law makes necessary the abi lity to pay for damage.

In its general application, it requires that the motorist responsible for damage to person or property of others MUST PAY either personally or through insurance OR BE BARRED FROM THE ROAD.

The sensible thing to do is to carry Automobile Liability and Property Damage Insurance. It is better to have this insurance and not need it, than to need it and not have it.

HAIL
LIGHTNING
FIRE
WIND

People who depend upon their crops should not be without some kind of the above insurance.

The loss of crops and barns, sometimes dwellings, is a serious matter to all farmers.

The claims paid through this office, just recently, have been large.

We aim to satisfy our policyholders, and do our utmost on their behalf.

Possibly you believe that you are carrying enough insurance. Think for a moment what a total loss would mean to you. This, as you will admit, is quite possible.

Information regarding various forms of insurance glady given, you are under no obligation whatsoever, just call or write.

The many friends of Mrs. Mildred Franklin, of Riceville, will be glad to know that she is recovering from a serious operation in the Civic Hospital, Ottawa, she underwent about three weeks ago, and was able to return to her home this week.

Mr. Russell Hummel, of North Bay, spent a few days with Mr. Arthur Peake renewing Chesterville friendships. Russell recently has had a severe illness from which we are pleased to note he is making satisfactory recovery.

Visitors at the home of Mr. and Mrs. John Wagner within the past two weeks, were: Mr. and Mrs. S. Lewis, granddaughter, Dona Carruthers ,and Mr. Jack Wagner, of London, Ont.; Mr. and Mrs. Wm. Wagner and family, of Montreal; Mr. and Mrs. Earle Hollister, Mr. and Mrs. C. A. Edwards and daughter Florence, of Aultsville.

Mr. Sniffens had been injured in an accident and was suing for damages. The judge was asking him a few questions. "And," said his honour, "can't you get along without your crutches?"

"My doctor says I can," replied Sniffens, "but my lawyers says I can't.

Winchester Electrician Has Narrow Escape

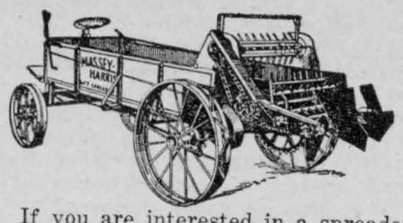

Last week when A. J. Bennett, electrical engineer at the M. F. Beach Co.'s factory, Winchester, was working at one of the poles on top of the drying kiln he accidentally came in contact with a live wire. The shock threw him from the ladder to the roof of the kiln, causing a cut in the back of his head and a bruised shoulder, besides burns on his right arm and left hand. He was attended by Drs. Hay and McKendry and at present has recovered sufficiently to resume his work.

His home is at Moose Creek, and he has only recently been employed in Winchester.

Son: "I don't know whether to be a barber or an author."

Father: "Toss for it—heads or tales."

YOU CANNOT DODGE THIS SMASHING FACT!

Goodrich Silvertowns • • road-proven in public • • cost you no more than unproven tires

GOODRICH TUBES
From $1.25 to $4.50

GOODRICH TIRES
From $4.50 to $30.00

EVERY week each car in the Goodrich Silver Fleet piles up 5,000 more miles of proof that Silvertowns can go farther. Isn't it wiser to buy tires that have shown what they can give you . . . particularly when they cost no more? Get others' prices . . . then get ours. We won't be undersold . . . and that's final.
