MORRISBURG — ONTARIO

MISS CLARA A. LOUCKS

Miss Clara A. Loucks, a lady well known and highly esteemed in her native town and surrounding community, youngest daughter of the late Mr. and Mrs. S. R. Loucks passed away at an early hour on Thursday, after an illness of several weeks' duration.

A few weeks ago, acting on the advice of her physician, Miss Loucks went to the Hepburn Hospital, Ogdensburg to undergo an operation, which when performed, revealed that there was very little hope for recovery. After undergoing treatment for a couple of weeks, she returned home, and gradually grew weaker until she peacefully passed to the great beyond.

A perfect lady at all times, under all circumstances, she inspired the respect of all, and her death, to the community, came as a public misfortune, and an irreparable loss to the home circle made desolate by her departure.

As an active member of St. James Church she will be greatly missed by the Women Guild, Girls Auxiliary and the Altar Society of which she was Secretary-Treasurer. She was a member of the Womens Institute and an active worker, in every movement pertaining to the welfare of our community. No one was more willing to aid the suffering, and when sickness and death came to her, many were the willing hands and hearts ready to assist her, upon whom rested the heavy responsibility of attempting to fight back the ravages of disease—to avert the inevitable—and in whom were united not only the devotion of friends but the untiring and watchful care of members of the family and physician. Love and skill were of no avail, however and one of the most useful lives of our community passed to its eternal reward.

She is survived by four sisters and two brothers: Mrs. Dr. Hart, Prescott; Mrs. O. F. Allison, Cobourg; Misses Etta and Minnie at home; Charles of Montreal; Jack of Montreal.

The funeral will take place on Saturday afternoon at 2.30 from the family residence to St. James Church where service will be conducted by Ven. Archdeacon Carson. Interment will take place in St. James Cemetery.

MRS. ISAIAH ROBINSON

There passed away at her home in Hoasic on August 16th, 1925, Mrs. Isaiah Robinson, in her 66th year, in the home in which she was born. Deceased had been in failing health for some time, so her passing away was not unexpected. She bore her sickness very patiently perfectly resigned to God's will knowing that he doeth all things well.

The late Mrs. Robinson was a faithful and loving wife and mother. She leaves to mourn her loss, her husband and four children, Mrs. Arthur Whitteker of Williamsburg. John of Wales, Ed. at Elma and Lydia at home; also one brother and three sisters: Herman Casselman Mrs. Joseph Robinson and Mrs. Bronell of Norwood, U.S. and Mrs. Sullivan of Dunbar.

The funeral was conducted by the Rev. J. Hurst at Elma Church. The remains were buried in the family plot, Maple Ridge Cemetery.

GOLDEN WEDDING

(The Gananoque Reporter)

A very interesting event, the golden wedding of Rev. and Mrs. Wm. Timberlake, of Montreal was celebrated at the home of Mr. and Mrs. Robert Hall, Richmond, Que., on Friday, August 14th. The guests included the family sons and daughters, with their wives and husbands and children.

On Friday at high noon the wedding breakfast was served after the wedding procession. Mrs. Timberlake wore her wedding dress, and a wedding cake of the original pattern was served. At the breakfast a present of gold was made by the family, besides other presents of cheques and gold from relatives and friends in many parts of the world. Over a hundred letters, telegrams and cablegrams of congratulations were received.

Mr. Timberlake was a former much esteemed pastor of Morrisburg Methodist Church.

THE UNITED CHURCH

Rev. Elwood Lawson, Minister

Sunday Sept. 6th—

10.30 a.m.—"The Grace of God Overcoming Heredity."

Morning Service, 11 a.m..

The Rev. J. Dugald MacKenzie, pastor will preach.

Evening service, 7 p.m.

Mr. W. T. Rogers of Brockville, Ont., will present the work of the Ontario Prohibition Union.

ACKNOWLEDGMENT

On behalf of the congregation of the Presbyterian Church of Dunbar, I wish to thank the Merchants Fire Insurance Company and their adjuster and representative Mr. James Clement for prompt and honourable settlement and payment in full of our loss of church property by the recent fire.

THOS. H. SHORT.

Signed on behalf of the Trustee Board.

MR. ROBERT WOOD

A gloom was cast over Morrisburg when the message announcing the untimely death of Mr. Robert Wood was received on Monday morning. Deceased, who was a son of Mr. and Mrs. Asa Wood of this town, was drowned while out in a row boat with a lady friend on Sunday evening, at Belleville where he had been employed during the past three years with the Frontenac Dredging Company.

The remains were conveyed to Morrisburg on the C.N.R., arriving Tuesday at 4.10 a.m. and the funeral was held from the family residence to the United Church, on Wednesday, at 2 p.m., Rev. E. Lawson officiating.

The late Mr. Wood was born in Morrisburg 31 years ago. He is survived by his parents and two brothers Bruce and Wilmot, both at home.

Out-of-town relatives attending the funeral were: Mrs. Lyle Tompkins Kemptville; Miss Russell, Port Robinson; Mr. Rankin, M.P.P., Collins Bay, Ont.; Mrs. Elmer Hutt Brockville; George Snyder, Rensseler Falls, N.Y.

The "Daily Intelligencer" Belleville, of August 31st, contains the following report of the accident:

"Robert Wood, aged 31 years of Morrisburg, was drowned in the bay just south of the lighthouse last night about 9.30 o'clock when a skiff in which he was rowing, upset. His companion, Miss Verna Crawford, aged seventeen who lives at 226 Charles street, where she is employed with Mrs. Norman Phillips, but whose home is at Tichborne Ont., narrowly escaped drowning, but was rescued by Harry Hurley, 50 Queen St., and Ward Luffman Ann street, who were boating nearby when the skiff capsized. Jack Marshall assisted in rescue work.

Woods' body was recovered at 9.30 o'clock this morning at a point ten yards from the spot where he sank after he had come up once. Claude Thompson and Gordon Duke, both workers on the dredge, recovered the body with grappling hooks which they used from a row boat. At eight o'clock, the men's hook caught in Wood's silk shirt but when they brought him up the hook slipped off and he was not again recovered until one hour and a half later. The body was brought to the Prince Edward shore and police notified. On instructions from Crown Attorney Donnan Sergeant E. A. Rae of Provincial police despatched Constable J. A. Kenny to the scene and the body was removed by Tickell and Sons' men to the mortuary. No inquest will be held.

After her rescue, Miss Crawford was taken to the dredge in the canoe. There she was supplied with dry clothing before she was taken to the police station by R. S. Arthur Harman where she made a statement.

Wood, who was a deck hand on the dredge which lies off Schuster's dock lived at Morrisburg, and shortly before the accident had rented a large skiff from a boat livery tak ing Miss Crawford for a row on the bay.

According to the statement made by the girl, they were talking together due south of the lighthouse, when without warning the boat turned completely over, throwing both of them into the water. It was dark and they both struggled calling for help.

"I hung on to the boat" the girl said. "and called for help. In two or three minutes a canoe came, but Wood had gone down. I was assisted into the canoe and brought to the dredge. I first met Wood last Thursday."

The girl has lived here two years and has been at her present place of employment for one year.

Police later drove the girl home.

Wood, whose mother lives at Morrisburg, was a veteran of the Great War and was employed with the Frontenac Dredging Company. His father is also employed with the same company but is working on their other dredge. Neither Wood nor the girl could swim.

Eye-witnesses of the occurrence state that when the boat capsized the girl shouted to Wood to hang on to the boat, after he had come up once. He sank and did not rise, disappearing before Luffman could paddle to the spot. In the meantime Hurley had paddled to the upturned boat, to the end of which the girl clung and he pulled her into his canoe. The water is about fifteen feet deep at the spot.

A motor boat which put out, picked up the skiff and dropped a buoy to mark the spot. Two boats immediately began dragging operations and at 11.45 o'clock a pillow from the boat was hooked. A few moments later another object was hooked, but it broke away from the hooks and was lost.

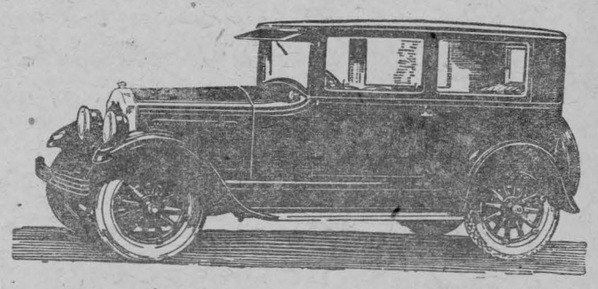

MULLIN—McLATCHIE

A quiet wedding took place Tuesday morning, Sept. 1st. at the Methodist Parsonage, Iroquois, Rev. Robinson officiating when Miss Della G., daughter of Mr. and Mrs. Andrew McLatchie of this town was united in marriage to Mr. J. Edward Mullin, only son of Mr. and Mrs. Jas H. Mullin.

After the ceremony, Mr. and Mrs. Mullin motored to Prescott and left by boat for a honeymoon trip to Montreal and on their return they will reside in Morrisburg.

Previous to her marriage a number of her relatives and friends met at the home of Miss Violet Mullin, and presented the bride with many beautiful and useful gifts.

The Success of the Coach as McLAUGHLIN-BUICK Builds It . . . . . .

EVERYONE who has seen the Coach *as McLaughlin-Buick builds it* knows why *this* Coach has received such sweeping public approval.

The McLaughlin-Buick Coach is a real closed car—built to McLaughlin-Buick's high closed-car standards. Fisher body. Graceful lines. Two wide doors enable rear seat passengers to enter or leave either door without disturbing people in front seats. DUCO finish. Different colors for each of two Coach models.

Every detail of McLaughlin-Buick power, comfort, dependability and economy is present in both Master Six and Special Six Coach models. Yet the prices are lower than you'd expect to pay for open cars of such quality.

FOR THE GAYER MOMENTS.

Clever indeed is she who wears a chiffon frock for tea, dinner or dance—for what could be lovelier or more truly smart? Lace and flowered georgette crepe charmingly unite in producing the attractive frock pictured here. The front and back are joined to a shaped yoke, which ends in the shortest of kimono sleeves. A wide and a narrow band of lace trim the lower edge of the dress, and an inverted plait is laid in at the side seams from the hip down, insuring extra width. A narrow ribbon sash ties at the back, leaving floating ends. The diagram reveals the simplicity of the design, and No. 1144 is in sizes 16, 18 and 20 years, or 34, 36 and 38 inches bust. Size 18 years (or 36 bust) requires 3½ yards of 36-inch or 40-inch material for the dress with long sleeves, or 3 yards for the dress with short sleeves, or 1½ yards of bordered material 54 inches wide, with ½ yard of 36-inch for the yoke. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Britain's Doles.

Great Britain has spent £173,530,000 on unemployment benefits since the armistice and £50,520,000 on out-of-work donations.

A barber tells us that he is finding bobbed hair a short cut to wealth.

Plowmen Pioneers.

Strong men have gone adventuring
Since Adam saw the sword,
And some have died to serve a king
And some to serve the Lord;
And some to serve their own red blood
That knew the wayward call
And answered it, and found it good,
From Wrangel to Bengal.

And we have roused good songs for lads
Who, whether young or old,
Have entered life's Olympiads
Adventuring for gold.
So have we sung the sons of war;
And so we sing them now.
But who has twanged a ballad for
The heroes of the plow?

West over prairies, through strange hills,
Calm pioneers fought on—
What? Was it gold that thewed their wills
And led to Oregon?
Long muskets hooked beneath their arms—
Afraid of none but God—
They carried plows to virgin farms;
Lean soldiers of the sod.

These were the men who saw wild grass
With creeping death astir;
Who fought red terror in the pass,
And braved the massacre.
They loved the smell of virgin soil,
The fertile feel of loam,
Yet mingled daring with their toil,
And so, at last, came home.

Their furrows down the field of years
Are straight and true and deep.
Osimple plowmen pioneers,
God rest you in your sleep!
And we who swell with lusty breath
The ballads of the brave
Will rouse a chant for noble death,
And sing it o'er your grave!

—S. Omar Barker.

Instrumental Music in Schools is Developing.

The amazingly rapid development of instrumental training in the public schools represents perhaps the most significant phrase in the evolution of public school music during the last decade.

To-day, practically every progressive music department includes in its curriculum some form of instrumental training. It is gradually taking its proper place in the general scheme of school music. Its importance is secondary only to vocal training. The latter reaching every child, must retain its undisputed supremacy as the foremost doctrine of school music.

The greatest development has perhaps taken place in the high school orchestra. Many of these organizations represent a very satisfactory standard of taste and performance. Where this standard has not been reached the fault often may be found in the fact that the teachers, fired by the ambition to present an imposing program of fine music, omitted to subject the orchestra to a systematic course in ensemble training which would have provided the necessary technical proficiency for the adequate performance of an ambitious programme. Another failing is sometimes encountered, namely, that teachers in their endeavor to avoid too difficult music, become blind to their duties as educators and present insignificant and mediocre music to the orchestra for practice and performance.

Tasmania.

Canadians who have visited Tasmania have capitulated to the charm of the Australian isle and its inhabitants. The harbor, formed by the Derwent River, has few equals. Not till 1853 did this earthly paradise cease to be a mere limbo to which convicts were consigned. A great mischief accomplished by white pioneers was the extermination of the aborigines, of whom there were but four left in 1865 and one in 1876. These people knew almost nothing, and did not even possess the art of building boats, being content to use pieces of bark tied together with grass fibre. They made no pottery; they could not use the boomerang, and mentally and manually they lived in the Paleozoic Age, with its stone implements.

Hobart has about 40,000 inhabitants and the University of Tasmania has about 200 students, the number seemingly depending on whether it rains or not. The island produces tin, copper, silver and gold, and fruit-raising, especially of apples, is of prime industrial importance.

New Ship Material.

A new ship of 6,300 tons, the first vessel built of the new material known as elastic limit steel, has been launched in England.

Minard's Liniment for Dandruff.

Kit Kennedy

BY S. R. CROCKETT.

CHAPTER XXXIX.

ENTRANCE INTO LIFE.

In due time Kit Kennedy went to Edinburgh. It was the dowie time of the year. November was just beginning. He said good-bye to his mother, who ever since she had seen the white flag flutter above the tree-tops had gone about with a little proud look on her face which Walter Mac Walter felt more than a strong man's blow.

His grandfather gave Kit his blessing. Mr. Osborne of the Kirk-on-the-Hill bestowed on him a great deal of excellent advice, adding, "But Kit, my lad, you will just hae to pay your footing like the rest of us. There is no royal road to experience any more than there is to learning."

Kit met Rob Grier at the end of Princes Street. They left their boxes at a call-office, and drifted southward looking for lodgings. The noise and stir of the city took Kit by the throat. And though from the point of view of the Strand and Fleet Street Edinburgh may be considered a quiet city, to a boy accustomed to the Black Craig of Dee it roared like Babylon.

Suddenly and quite unexpectedly they found themselves in front of the college, and here under the great gates was one Clement Sowerby, the Cairn Edward Academy lad who had tried unsuccessfully for the bursary. He was smoking a cigarette, the first that Kit had ever seen, and nursing a very big and exceedingly nobby stick under his arm.

Sowerby was the son of a comfortable tradesman in Cairn Edward, and had tried for the bursary more (as he declared) for fun" than because he seriously needed the money."

"Hey, fellows," he cried, "have you got 'digs'? Have you matriculated? What, never been inside the gates? Come along. I'll put you through."

Kit felt exceedingly lonesome walking beside such a mentor.

For though he had on his best Sunday clothes, they were already a little too short for him as to trouser leg and cuff. Somehow his limbs seemed to stretch a little farther through them each morning as he put them on.

The lads from Galloway presently found themselves in an elbowing throng of students, through which Sowerby pushed his way with the easy confidence of an old-timer.

"Here are your forms! Write your name there, and where you come from. Then put a pound note on the top, and shove the whole to that red-headed lunatic with the pen in his mouth. He'll give you your 'matric' ticket! That's all right. Now come on and let's find you 'digs.' There are some toppers near me."

But it was soon evident that the ideas of Sowerby as to "digs" and those which (from severely absolute considerations) governed Kit and Rob Grier could not by any possibility be unified.

After interviewing many landladies the two lads settled on a room high in a tall house in the Pleasance, the front of which looked down a long unlovely cross street, but the back windows upon the crags and grey pastures of Arthur's Seat. Mistress Christieson, their new landlady, was a widow whom penury had made careful and many lodgers suspicious. But from the first she took to our pair of Galloway lads. It was Kit who did the talking, and the terms as finally arranged were easy—three shillings a week each with coal and gas, no extras.

As Kit went up the stairs for the first time as a sort of householder he felt for his latchkey with a proud consequence, and blew the dust out of it as if he were blowing upon the trump of fame. A pretty girl, hearing beneath her his rushing feet, stood aside on one of the landings to let him pass. She was pulling on a worn brown glove on her small left hand; as the stalwart Kit went by she stole a glance at him.

Now the Galloway code of manners demands a salutation from wayfarer to waytarer as each crosses each in the tranquil travel of life. So Kit smiled broadly upon the pretty girl.

"It's a fine day!" he said, "but I wadna wunner gin it cam' on a wee saft!"

A faint smile flickered on the girl's face. She finished buttoning her glove with as much care as if that were her only object in life. She did not reply, and as soon as Kit had passed she began to descend.

"That's curious," said Kit to himself; "she never answered me!"

He thought the matter over in his mind. It troubled him not a little.

"Maybe the puir lassie's deaf!" he concluded within himself.

* * * * *

During these days Kit saw a good deal of Clement Sowerby, the Cairn Edward lad proving unexpectedly friendly. Bob Grier, however, could not abide him, and wanted to "thraw the puir craitur's neck." But Kit, being a natural optimist, would hear no ill of any human being, least of all of one so friendly as Clement Sowerby.

So the dapper hat, the nobby rig-out, and the curly stick appeared oftener and oftener at their joint lodgings.

Kit mentioned the matter of the pretty girl. Clement Sowerby laughed.

"Some milliner," he said; "you must get to know her—find somebody to introduce you."

"What's 'introduce'?" said Kit, to whom the word had not occurred in translations of the classics.

"Oh, your ladylady would do if she's a decent sort. I say, I've a good mind to come and lodge here myself."

Rob Grier looked up with a belligerent air, but subsided again upon his books as Sowerby added, "But really, you know, I could not stand the district; all very well to come and look you fellows up, but it wouldn't do at all to have to say "160, Pleasance" loud out in the class when the Professor asked you for your address!"

In due time Kit lifted his bursary from the secretary, and made the necessary dispositions as to fees. He was attending three classes, but at first the work was less than nothing to a pupil of the "Orra Man." He ran off the versions in a quarter of an hour, and would do another edition quite different for Rob Grier, when that hard-working student would accept of the help, which to do him justice, was not often.

Yet it would have been well for Kit if he had been kept closer to the grindstone during these first months of winter. Soon after his arrival Clement Sowerby had taken him in hand and introduced him to an outfitter, who made Kit a suit of clothes of a very different cut from those which had been the masterpiece of Tailor Byron in the village of Whinnyliggate the year but one before Kit came to Edinburgh.

The tailor tried to persuade the youth to run an account—"any friend of Mr. Sowerby's," he said with a smirk. But Kit's ingrained money sense kept him straight where so many are weak. He paid shilling by shilling on the nail, and saw that he got the largest discount too.

But there is no denying that in these days Kit did not fulfil the high promise of his start. The Professor, indeed, commended him again and again. The "Orra Man" had taught him to turn tolerable verses in the dead languages, and that being an unheard-of accomplishment among Scottish students, Kit leaped to a first place in his teacher's favor at a bound when he achieved a copy much more than tolerable. The Professor, standing up like Jove before the class, declaimed Kit's lines with a strong appreciation of their Horatian flavor. But that was Kit's Waterloo, for all unconsciously he had used the phrases of the "Orra Man." The next he gave in were hastily written, and the Professor looked disappointed.

He did not declaim the lines to the class on this occasion, but he called Kit into his retiring room, and had five minutes' talk with him, which the boy remembered all his life.

Three years afterwards he knocked a man down in the passage between the college and the museum for repeating a libellous statement about the Professor.

It was not long before Kit was "introduced" to the pretty girl. He was coming home one night along the Bridges. It was a yet, splashy night, tempestuously pleasant. The jets of the gas lamps were blown this way and that. Some had gone out. It chanced that in a quiet part of the street near the Surgeons' Hall Kit saw two or three fellows promenading arm-in-arm across the breadth of the pavement. A girl was walking quietly in front of him, but Kit had not noticed her much, for his hat was pulled low over his brow, and his coat-collar high about his neck. Suddenly, however, he heard a little cry above the whistle of the wind. The three youths had jostled the girl, and then swung round so as to enclose her in the centre of a narrow circle.

One of them had his hand about the girl's waist.

"Let me go!" Kit heard her cry.

Now Kit had no fear, and had been too much exercised in the heart of fighting among the country lads to think twice what he was doing. He was on the spot in a moment. And his strong plowman's grasp was on the throat of one, while another, surprised by a left-hander on the jaw, went staggering into the gutter. There was no fight. The three bullies contented themselves with language of the foulest, but took themselves prompely off at the sight of the glowing belt of a city policeman, who came along, testing bars and shutters leisurely as he went.

With his natural quick imperiousness Kit took the girl by the arm.

"Come along!" he said, and hurried her southward.

They had gone a couple of hundred yards when it struck Kit that he had been hasty.

"I beg your pardon," he said, "if I have been rough!"

By this we can see that Kit had been learning many things. At the same time they came to a better-lighted part of the town, and under the Bray burners Kit saw that this was the pretty girl he had passed on the landing beneath.

"Oh no," she answered, a little breathless with the haste at which Kit had dragged her along, "it is very kind of you. I was kept late at school to-night, and I never was spoken to before. My brother promised to meet me, but he must have been detained somewhere!"

The words were common words, but to Kit's country ear they seemed to be spoken with the accent of the nymphs and muses he read so much about in his shabby cream-colored German classics. He wanted to tell her so, but did not quite know how to begin.

But he did nearly as well.

"Do you know," he said, talking as like the "Orra Man" as he could, "I always look out for you on the stairs?"

"Do you?" said the girl, in apparent surprise. "Why?"

"Because," said Kit, "you put on your gloves so nicely."

In Galloway they did not put on gloves in the pretty girl's way. Even Betty tugged at a creased pair of blacks, and left half an inch unfilled at the end of the fingers. But then gloves were only of acceptation from the kirk door as far as the end of the first psalm.

The pretty girl became prettier than ever, and if Kit had looked closely he would have seen that his frankness had brought a well-defined blush to her cheek. She was inclined to pass the words off as a compliment. But the eager freshness in Kit's voice told her woman's ear, inevitable in its appreciation of sincerity, that he spoke the truth.

"You live with Mrs. Christieson above us," she answered; "my father has seen you. He will thank you for being kind to me. He does not like me coming home by myself, and he will be very angry with Dick for not meeting me."

"I cannot be angry with Dick!" said Kit.

The girl evaded this.

"Dick is thoughtless and often stays out late," she said; "but I think you are often out too. We call your friend and you Box and Cox. He is Box."

"Why?" said Kit, wishing that the foot of the stairs were a score of miles away. They were turning down the street now which led to that dismal stone turnpike where they must part one from the other.

The girl laughed a little thrilling trill of laughter.

"Because," she said, "he keeps himself shut up——"

"And why am I Cox?" said Kit, interested.

"Well, because you are not Box!"

This was far worse than Greek to Kit, whose education did not include even the commonest of farces. But he was quite satisfied, and only sighed as the girl took down her umbrella at the foot of the stair. She did it so prettily, too, with a little flirt along the pavement to shake the drops off the Fox frame knobs, and a sudden uplift of eyes in which consciousness of his admiration struggled with a desire to thank him for his kindness. But she saw too much on his face to risk many words in the dusk of the stair foot.

"I hope none went on you," she said, lamely enough, referring to the raindrops which she had shaken from her umbrella.

"Oh no, thank you," said Kit, feeling unutterably coltish and stupid. He would have liked to tell her what he thought of her—that is, in the "Orra Man's" iambics.

"I suppose I must bid you goodbye," said Kit, slowly, stammering over his words. He was just beginning his education—if he had won a bursary.

"Not unless you decide to sleep in the cellar," said the girl; "we have three stairs more to go up together."

They went up one. The pretty girl paused a moment on the landing and looked at Kit, who was following somewhat forlornly behind her.

"You haven't told me your name yet," she said—"that I may tell my father," she added hastily.

"My name is Kit—I mean Christopher Kennedy. I come from Galloway," said Kit, gratefully, hoping that she would tell him hers.

(To be continued.)

Her First Case.

Her Mother — "I see you have scraped Bobby's name off the tree where it was carved with your own. I thought you were fond of him."

Little Elsie—"That was a long time ago. I'm divorcing him now."

Gull's Transatlantic Flight.

In the records of navigation, the feat of the first gull to fly the Atlantic Ocean is an honorable one, and worthy of record. The gull, a kittiwake, was found in Newfoundland wearing a silver band upon which were inscribed the words: "Inform Witherby, High Holborn, London," and the bird has been identified as one that had been released from the coast of Northumberland by a correspondent of the London naturalist.

It is quite likely that this gull was forestalled in his great achievement by other gulls. It is a pity to have to record that the bird was shot.

Have Long Limbs.

Abnormal length of forearm, and of the leg, from the knee downward, is characteristic of the native savage race of Australia.

Women are so peculiar. They want all their clothes alike, but different.

Queer Dishes.

At a luncheon given recently in London many strange edibles appeared on the menu, among them being goose stewed in honey, chicken stuffed with pistachio nuts and dates and served with honey sauce and cherries, and pigeons stuffed with cherries.

In Sutton-in-Ashfield, Nottinghamshire, there is an hotel where roast hedgehog is a regular feature in the bill of fare. Every race has its favorite dish, and whilst they shudder over roast beef, the Chinese enjoy soups from certain kinds of birds' nests.

France breeds snails specially for the table. In Canada we marvel that anything so unclean as snails could be eaten by anyone, yet the lobster feeds on the refuse of the sea, and the pig is fed on offal, whilst snails live only on greenstuffs such as parsley, lettuce, and vine leaves.

Whale, camel, and elephant steaks were served at a zoological dinner in Paris and were greatly relished.

In India a species of ant is dried and made into a sort of curry, and in the West Indies no more tasty dish has yet been discoveredd than rats.

You can eat fried dragon-flies in the Malay Archipelago, caught by boys with branches smeared in bird-lime.

Even the octopus has its partisans among the people of the Mediterranean and in China it is dried and sold covered in flour.

Minard's Liniment for Burns.

Modern Humanity.

Research shows that what we term humanity originated away off in Asia so many thousands and thousands of years ago that it is quite impossible to even approximate the date when mankind first flooded the European continent. Always, so it seems, the great loose masses of humankind have flowed periodically through the passes of the Caucassions, only to find the expected new land filled with other masses that had poured there centuries and thousands of years ago. The fact that we date Europe from the Goths, Franks and such things means nothing except that these peoples have left better records of their wanderings than the older ones. One of the greatest outpourings of record is one 1500 B.C., when waste hordes came swarming through the passes, living in tents and caves knowing almost nothing of agriculture or any art except war, having no laws, and evidently no aim except to escape from Asia in the same manner and come across the water to what is now America, and this must have been many thousands of years ago.

It is estimated that the clothes moth lays 150 eggs and that her descendants are capable of destroying 100 pounds of wool in a year.

THE MASTER OF SCIENCE

A Story of Mystery—and Love
—Beside the Sea.

By Mark Allerton.

The appointment of Mr. Oliver Dacey as resident science master to the Boddington College for Young Ladies caused considerable excitement in that most select establishment on the sea coast. Was he young? Was he good looking? Such questions as these were more worthy of discussion than the assurance of the principal, Miss Mercer, that the newcomer had had a brilliant University career, and was a master of science.

The excitement was shared even by Marjorie Ripley. Marjorie was a junior governess in the school, and was already finding her duties irksome to the point of distraction. She disliked the type of girls who were pupils, ill-bred daughters of the new-rich. She hated class hours, when the girls were often rude to her and she dared not retaliate.

But employment had been hard enough to get, and Marjorie resolved to make the best of her job until another presented itself. It was all the fault of her uncle and guardian, who had died and left so preposterous a will.

Marjorie watched the arrival of the new master through the curtains of her bed-room window, and her pretty lips parted with an exclamation of disappointment.

"The last one was a queer enough fish, but this Mr. Dacey is positively moth-eaten. And I had hoped for the best, too!"

Apart from a stalwart, if quaintly-dressed figure, Mr. Oliver Dacey certainly did not present an appearance calculated to stir the emotions of the young ladies of Boddington College. Miss Mercer had taken note of that before engaging him. Certainly he was a tallish, well set-up man with a youthful figure, but he wore big, tinted glasses with horn rims, and he had cultivated a species of whiskers that came half-way down his cheeks.

Marjorie did not see him again until the next day, when the whole school was assembled to meet him, and to hear his inaugural lecture on "Ether." He was presented to the staff, but with Marjorie alone he shook hands, contenting himself with bowing to the others.

"Ripley, did I hear your name was? Perhaps a relation of Professor Ripley, of Wagminster?"

"No," replied Marjorie decisively. "No relation of mine is a professor."

"Doubtless you are to be congratulated," said Mr. Dacey, and began his lecture.

Coughing, and loosening his collar, he started. He read from notes, his voice rolling out ponderously.

"Ether," he said, "has been likened to an impalpable and all-prevading jelly, through which waves of light and heat are for ever throbbing, but a jelly whose rigidity is one thousand millionth of that of steel, and whose density is infinitesimal——"

He went on like that for half an hour, and even Miss Mercer found herself nodding in the sunshine. Marjorie Ripley had difficulty in controlling the obvious signs of boredom which the pupils exhibited. It was perhaps the dullest lecture that had ever been delivered in a seminary for young ladies. But Miss Mercer was well satisfied. This young man, she decided, would give tone and dignity to her establishment.

Afterwards Mr. Dacey and Marjorie met.

"Do you think I clicked?" he asked with some eagerness, adding hurriedly, "What I mean to say is, do you think my few remarks were to the liking of the audience?"

"I do not suppose" replied Marjorie frankly, "that a single one of the girls understood what you were talking about."

"No? Strange!" said Mr. Dacey. "Neither did I. I mean, who can explain the unexplainable? Who can attain the unattainable? Who can plumb the depths of the mysteries of life without getting wet behind the ears, so to speak?"

Marjorie gave a startled glance at the new master, and then, muttering something about getting ready for lunch, made her escape.

"Mad!" she decided. "He must be, anyhow, else he wouldn't have come here. It's a pity, because, in a way, he is rather nice. At least, he is a gentleman."

In his own room the master of science thrust the manuscript of his lecture into the empty grate, and set fire to it, muttering:

"The old encyclopedia is usful, after all!"

Early next morning, as was her wont when the sun was shining, Marjorie ran down to the deserted beach and bathed. It was her one opportunity of having exercise without the added duty of looking after a group of girls who hated cold water.

Her swim over, she ran to the rock on which she had left her wrap. She was about to emerge from behind this when she saw striding down the beach, Mr. Dacey, the master of science.

Marjorie hid behind her rock, while Mr. Dacey found another. In a few moments he reappeared without the macintosh which had covered his bathing suit, and also, to Marjories' amazement, without his queer side whiskers.

He ran into the sea, took a header, and in a moment was swimming, with a powerful trudgeon stroke, into the mist of the morning.

Marjorie's first feeling was one of admiration. The man was an athlete, a magnificent swimmer. And then she fell to suspecting him. Why should he wear those false whiskers? Why should he wear these atrocious horn-rimmed glasses? Marjorie, shivering a little, decided to encounter him when he came out of the sea.

She had to wait quite a long time. Mr. Dacey swam out of sight, but after a time she saw his powerful arms sending water up like pearls in the morning sunshine. Finding shallow water, he walked up the beach. Marjorie came out from behind her rock. At the sight of her Mr. Dacey showed signs of hastening back into the sea. He flushed crimson.

"Hallo! Good morning! Never expected to find anybody out at this hour," he stammered. "Wait till I get my glasses."

Marjorie waited, sternly resolved that it was her duty to the Boddington College to solve this mystery. When the science master re-appeared he was wearing his spectacles and his side-whiskers.

"Lovely morning," he said, attempting to speak cheerily.

"Quite," said Marjorie.

"Sea is ripping, isn't it?"

"Quite."

"I say, you're not cold, are you?"

"No."

These monosyllabic replies were disconcerting. Marjorie also found the situation more trying than she had anticipated. She had intended to put a plain, straightforward question to Mr. Dacey, such as: "Why do you wear false whiskers?" Now she felt that the question would be too personal. After all, why should he not wear false whiswkers if he wanted to? Perhaps he found them a commercial asset.

She started to walk back to the school, and Mr. Dacey made to accompany her. She stopped him.

"I think I would rather go back alone," she said decisively. "You see, I am supposed to bathe alone. There are rules to be observed——"

"What rot," laughed the master of science.

"As you may think. But, speaking for myself, I have no wish to break any of them and get dismissed.'

"You like your job here, then?"

"It represents my living."

The strange man in goggles and side-whiskers bowed understandingly. He seemed about to say something else, but Marjorie hurried on ahead and he followed at a discreet distance.

For Mr. Dacey, lecturer on ether, Marjorie had no liking at all, but for the man she had seen swimming in the sea she had a decided admiration. But she was worried about the whiskers and big spectacles.

Marjorie's mental equilibrium was still further agitated when, after breakfast, Miss Mercer drew her aside and told her that she feared there must be a thief in the establishment.

"Rachael Eskstein," she said, "has lost a most valuable ring. She very carelessly left it in the cloak-room after supper last night. Early this morning she went down to get it and found it gone. None of the servants were up. You are our earliest riser, Miss Ripley. You did not see this ring, did you?"

Marjorie flushed, and then went pale.

"I did not," she said. "You are not suggesting——"

"Not at all. Out of the question," said Miss Mercer hurriedly. "Only—it is very awkward for all of us. Let us hope that the ring will be found quickly."

Marjorie went away, by no means satisfied that she was not suspected of having stolen the ring. And, in her turn, she suspected Mr. Dacey. He had been up that morning as early as she. He wore false whiskers. Also horn-rimmed glasses.

All that day Marjorie tried to make up her mind whether or not to tell her suspicions to Miss Mercer, and all that day accident—or was it design?—forced meetings with Mr. Dacey upon her.

In the early evening, Marjorie, looking from her bed-room window, saw Mr. Dacey leave the house. As he strolled down the drive a station cab met him. At the sight of Mr. Dacey the occupant shouted to the driver and sprang out. Marjorie noticed with surprise that the newcomer also wore horn-rimmed spectacles and side-whiskers.

"You rotter!" he cried. "The rest of your precious gang have told me how you stole a march on me. You never sent off that wire to Miss Mercer I gave you! You're no better than a common thief!"

Marjorie gasped with horror. So it was true!

"I couldn't resist the temptation, old man," replied Mr. Dacey soothingly. "The old girl had only seen your photograph, so I made up like you. I simply had to see for myself what the prize was worth, and it's a perfect jewel. Can't you take a joke?"

"I certainly can't! It's a joke that may cost me a hundred and fifty pounds!" was the indignant reply.

"Never mind. I'll make that good. I rather reckon that I've a chance after to-day's work of winning what is worth to me far more than that."

A sudden and dramatic diversion was occasioned by the appearance of two policemen, accompanied by Miss Mercer.

"That is the man," she cried excitedly. "He is an imposter. I have searched his bag, and I find from his correspondence that he is not Mr. Oliver Dacey."

"Certainly not! I am Mr. Dacey!" cried another excited voice. "This is an abominable outrage! I was kept locked up in my rooms in Cambridge while it was being peupetrated."

"We shall hear about that later," boomed Miss Mercer. "This man is clearly the thief."

"Thief!" The eyes of the real Mr. Dacey opened wide. "You don't mean to say you've gone in for that as well, Jack?"

"A valuable ring has been stolen, and——"

The voice of a dark-haired girl intervened.

"If you pleath, Mith Merther, I have found my ring. It had dropped down the back of the locker."

Miss Mercer folded her hands in front of her.

"Kindly explain," she demanded of the imposter.

The imposter took off his glasses and his whiskers.

"I owe you an apology," he said. "I knew that my cousin, Miss Ripley, was engaged here, and when I heard that my learned friend, Mr. Dacey, had received this job, I impersonated him with the help of some friends who restrained him from keeping his appointment here.

"Until I came here I had never seen my cousin, and our correspondence hitherto has been somewhat acrimonious. She and I made up our minds that we disliked each other, simply because our guardian had left his money to us on condition that we got married. I can see now"—here the imposter smiled and bowed in the direction of Marjorie—"that he was a better arbiter of my fate than I. And now I want to have a word with my cousin."

In the shrubbery he abased himself before her.

"For all the rude things I have written to you I beg your pardon," he said. "Like you, I am not out for the marriage-for-money stakes. I have plenty of money of my own. But when I heard that dear old Oliver was coming here, and that you were here, a few bright lads and I kept him a prisoner while I took his place. I wanted to find out what you were really like. I have found out that you are like—like—— Oh, hang!" Words failed to convey his feelings. "You are adorable, Marjorie, and I want to marry you, if you will be so kind. It's up to us to carry out the old boy's wishes."

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Coal 25 Cents a Ton—In China.

Coal is worked so easily in China that in some localities it sells at less than 25 cents a ton at the mines.

Minard's Liniment for Corns and Warts

Interlude.

I have had eyes for bright things
All my life through;
Shining, clear and white things,
Radiant, too.

Wet, rainy pavements glowing,
Jewels like caught fire,
Poplar leaves gleaming, blowing,
A tall church spire;
Fishes swimming in the sea;
Flashing, silver shot;
A lake of lapis-lluzuli
Where wind stirred not.

I have had eyes for beauty—
Eyes and heart and soul;
But he who worships may not be
Long heart whole!

—Eleanor A. Chaffee.

THE ONE SURE WAY TO GOOD HEALTH

Is Keeping the Blood Pure by Using Dr. Williams' Pink Pills.

Impure, weak blood is the cause of most of the troubles that afflict people. This is the cause of the wretched feeling of languor and faintness, pains in the back and side, headaches and breathlessness, that afflict women and make her daily life a torture. To get new health and strength the blood must be enriched. What Dr. Williams' Pink Pills do in cases of this kind is told by Mrs. Augusta Emery, Woolford Station, Alta., who says:—"Living on the prairie, and knowing that there are thousands of women like myself miles away from a doctor, I want to tell them what Dr. Williams' Pink Pills have done for me. After my first baby was born I seemed to have little energy. I felt weary and run-down and unable to do even the ordinary household duties. I felt I needed a tonic and as I had long seen Dr. Williams' Pink Pills advertised I decided to try them. I got a supply and carefully followed the directions and before very long the result was wonderful. Day by day I regained my former strength and energy. The pills seemed to give me a keen appetite and I gained in weight and soon was able not only to do my work about the house but to help with many chores on the farm. For this reason I would advise women, particularly those on the prairie or the farm, to keep a supply of these pills always on hand. One trial will convince you of their worth. I have recommended them to many of my friends and never have they failed to produce good results."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Then She Pushed Him In.

She—"The river is never dark even without the moon."

He—"No; it has current enough to give it a good light."

Minard's Liniment for Aches and Pains

Robinson Crusoe's Hotel.

There will be very little hardship in store for anyone who in the future may be wrecked on Juan Fernandez, on which Alexander Selkirk, the original Robinson Crusoe, spent part of his life. The Government of Chili is proposing to erect a hotel on this "isle of romance" and to establish a regular service of passenger steamers for the benefit of Defoe's enthusiasts.

The best-loved story in the world has already given its name to a hotel in the British Isles—the Crusoe Hotel at Largo, the little Fifeshire village which claims Alexannder Selkirk as its most famous son. Largo also boasts a statue of the hero, set in the wall of the cottage which replaced his old home. This statue is a favorite subject with amateur photographers who find their way to the Fife coast during the holiday season.

It Spreads.

The inspector was paying his annual visit to the village school and was putting the children through their paces.

They did quite well until he asked them the meaning of the word "epidemic." Nobody knew, so he had to help them out.

"An epidemic is something that spreads. Now, can anybody give me an exampiel of an epidemic?"

There was a long silence.

"Can no one tell me?" asked the inspector at last. "Remember, something that spreads."

Then came a small voice: "Jam, sir."

Raising the Family.

A Negro mammy had a family of boys so well-behaved that one day her mistress asked:

"Sally, how did you raise your boys so well?"

"Ah'll tell yo'," answered Sally. Ah raise dem boys with a barrel stave, an' Ah raise 'em frequent."

Sometime! Why not this time?
RED ROSE TEA "is good tea"
The ORANGE PEKOE is extra good. Try it!

Surnames and Their Origin

VANDERLIP.

Variation—Vanderlippe.
Racial Origin—Dutch.
Source—A locality.

Here is a family name that is Dutch in its origin, but denotes a prior German residence.

Closer to the original is the form Vanderlippe, for the name is derived from the city of Lippe, in Germany.

There is a romance in names such as these, which call up pictures of ships, of overland caravans and those sturdy pioneer merchants of the Middle Ages, who half tradesmen and half soldiers, apparently started to push out, establishing trading posts and lines of mercantile communication from one country to another. It was the same force, that of comparative peace as against the annihilating wars that followed the fall of the Roman Empire that brought about the necessity for their mercantile adventures and the development of family names. Growth of population as a result of that comparative peace created the demand both for the surnames and for the merchandise.

Undoubtedly the original Vanderlips were the German merchants, members of one of the North German mercantile guilds or companies, who established and took charge of their compatriots' trading posts in Holland and Flanders.

LANSING.

Racial Origin—Dutch.
Source—A locality.

There is little about the family name of Lansing in its modern form to indicate its origin or the language in which it was developed. This is because since its adoption into the English language and its advent to this country, the prefixes it formerly bore have been dropped.

More anciently the name was Van Der Lansing, and with this form as a guide it is not difficult to trace the name directly to Holland, just as a "de" would indicate a French or Anglo-Norman origin and "von" a German or Austrian derivation.

That it was originally descriptive of the locality from which the bearer came, and possibly, but not likely, of a territory over which he ruled, is also made certain by the prefixes, which mean "of the."

The name itself, however, is generic rather than specific. It means low or flat country. As low lands or flat meadows are by no means uncommon in Holland it is easy to see that such a name might have been locally and colloquially descriptive of a great many different places, or of a great section generally; and no doubt the term was used in the middle ages in just this general sense. That is the reason the name should be regarded more likely of democratic than aristocratic origin.

Balneology.

What in the world is that? you ask It must be something remote and abstruse, something only the very learned can understand. So I thought when I read that at a medical congress the doctors there assembled had been discussing balneology. But it turns out that this is simply a long and learned name for bathing.

So when next you take your header at your favorite seaside resort you will be able to flatter yourself that you are a balneologist. The doctors laid down certain rules for bathing—you should not go into the water after a meal or when you are tired, and if it is cold you shouldn't stay in too long. We seem to have heard that before, somehow.

We are told that doctors are not very good at taking their own medicine. Perhaps, ignoring their precepts about "the therapeutic value of balneology," they went and played golf instead.

Sentence Sermons.

No Man Can Succeed—Who is willing to allow other people to do his thinking for him.

—Who has not learned the value of time fragments.

—Who will not trust other people as far as he asks to be trusted.

—Who is so smart he has to be watched.

—Who has no great objective in life.

—Who enjoys being dependent upon other people.

—Who has not learned to profit by honest criticism.

BETTER IN EVERY WAY

After Taking Lydia E. Pinkham's Vegetable Compound

Ingomar, N. S.—"I took your medicine for a run-down condition and inward troubles. I had pains in my right side so bad at times that I could not walk any distance. I saw about Lydia E. Pinkham's Vegetable Compound in the newspapers and have taken five bottles of it. I am better in every way and you can use my letter to help other women." — Mrs. ALVITA M. PERRY, Ingomar, N. S.

Nervous Breakdown Relieved

Toronto, Ontario.—"It is pretty hard to explain your feelings in nervous troubles. I felt low spirited, had pains in my head and eyes, always crying, and did not want to go anywhere. I do knitting and fancy work, and I would get irritable after a few minutes of work. I have been in Canada five years and have been this way ever since I came. I am taking Lydia E. Pinkham's Vegetable Compound and I sleep better and it seems to make me eat, and I must say I am feeling more jolly. I have great faith in in your medicine because of what it has done for my husband's sister and she recommended it to me." —Mrs. A. SMITH, 10 Burleigh Avenue, Todmorden, Toronto, Ontario.

All druggists sell this dependable medicine, and women suffering from these troubles so common to their sex should give it a trial now.

WEDDING ANNIVERSARY

On August the fourteenth, Mr. and Mrs. H. Loucks of Morewood, Ont., celebrated quietly the 25th anniversary of their wedding. Of a family of eight, all were present: Hugh H., Merrill H., Norma E., Dean H. Nona E., Alta V., Blanche I., Dora T. Their Pastor, Rev. R. Stafford. B.A., B.D., Mrs. Stafford and family, Dorothy and Lloyd, joined the happy family at Supper.

The happy couple were the recipients of many calls and messages of congratulations from near and far and there were several beautiful gifts of silver.

PARCEL POST CARRIED UP TO 15 POUNDS.

The Honourable Charles Murphy Postmaster General, announces that the postal service will now accept parcels weighing up to 15 pounds for transmission through the mails. There are a good many articles of general use slightly over the present limit of weight which it will now be possible to forward by mail, and this will be in the interest of the public and prove a real convenience which will be appreciated both by business men and the public generally. It will have particular value in cases where it is desired to forward such heavier articles to parts of the country to which the post office is practically the only means of conveyance.

The limits of size for parcels accepted for transmission by post remain as at present.

LAYING OF CORNER STONE

An event of a great deal of interest to a large number of people in Avonmore and vicinity, took place in that village on Monday; when, in the presence of over 600 people, Rev. Dr. Pidgeon of Toronto, Moderator of the General Council of the United Church of Canada laid the cornen stone for the new United Church, now under construction in that village. Underneath the stone were placed a sheet containing a list of subscribers to the new edifice, recent issues of the Cornwall Freeholder and the Cornwall Standard, and a copy of "The New Outlook," the paper of the United Church.

McCormick Deering Kerosene Tractor

THESE TRACTORS ARE EASY TO OPERATE.
"AS EASY TO DRIVE AS MY AUTOMOBILE."

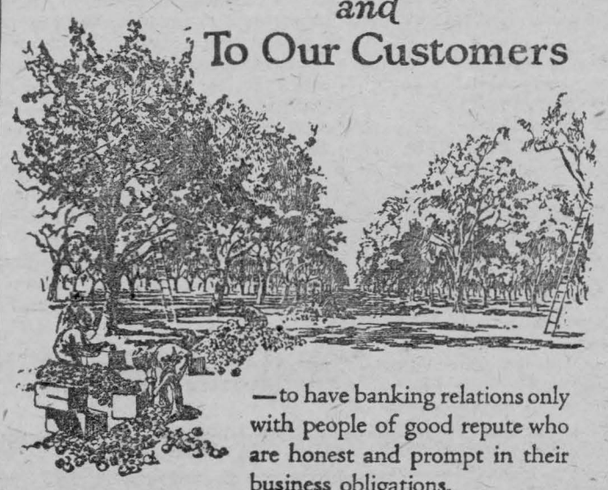

A McCormick-Deering tractor can be used to advantage by the man who needs more power than that suppplied by a stationary engine McCormick-Deering Tractors are made in two sizes, 10-20 H.P. and 15-30 H.P. For both field work and belt work they produce profitable economical power and enable their owners to get the work done on time and in season.

The 10-20 pulls two plows under average soil conditions, and is the right size power for a thresher with a 22-inch cylinder. The 15-30 pulls three plows under average soil conditions, or drives the large belt driven machine. It is the right size for a thresher with a 32-inch cylinder.

THE GARDEN'S SWAN SONG

Here Are Gorgeous Blooms That Will Lengthen the Flower Season Many Weeks.

BY AMELIA LEAVITT HILL.

The praises of "the flowers that bloom in the spring" have been so often sung that their most enthusiastic devotees can hardly grudge a few words of far less frequently voiced praise to the flowers that are at their glory during the sunset hours of the gardening year.

Indeed, it is an open question whether the delightful feeling which comes as we look upon the up-peeping head of the first crocus or daffodil is superior to that which fills us as we look upon the brave bright heads of the persistent flowers which still nod about the brown waste which once was our summer garden. But by a judicious planting of these soldier blossoms, they will make it possible for us to enjoy flowers later in the year than we had ever hoped.

Recently the writer of a most charming garden book boasted that January was the only month from which she had been unable to wrest a little bloom. Though this is an ideal which must be unattainable to those of us who live in more northern latitudes, still considerable care in planting, nursing and selection will lengthen out the flower season.

There are, of course, certain annuals which withstand the ravages of frost far better than others. The rosy morn petunia and the nicotiana will continue to bloom until actual freezing weather sets in. Occasional frosts set them back, but with every cessation of cold they take up their activities where they were forced to lay them down.

LATE BLOOMS.

The little red-and-gold French marigold and the calendula are in the same class, whereas the zinnia is particularly hardy and will make a fine showing until the most severe frost.

The strawflower — helichrysum — with its variegated red, yellow and pink everlasting blossoms not only withstands cold but may be plucked and brought into the house, where it will serve as a memory of the garden during the winter Since all these blossoms are inhabitants of the summer garden, no especial attention is necessary to secure them for autumn use, save by an original heavy sowing. They are easy of culture and will offer their services as readily in beautifying the autumn garden as they did in the more genial temperature of the earlier season.

You may, too, incorporate a "rainbow bed" by the inclusion of the gladiolus in solid plantings of its many lovely shades. These bloom three months after sowing, so that they may be had in October.

But the varieties which have been mentioned are all properly summer flowers, which only have unusual properties of withstanding the frost. Are there no distinctively late blooming plants which will turn October and even November into a season of beauty?

Indeed there are such plants. First should be mentioned the cosmos—one of the very few autumn blooming annuals. The early variety begins to bloom comparatively small, and therefore is apt to be disappointing at first. In time, as it increases in stature, it produces a most excellent effect, especially when used as a background. The late varieties are apt to be caught by frost. Like other annuals, the cosmos, though properly an autumn flower, does not bear a really cold snap as do the autumn blooming perennials.

The glory given to the garden by the many beautiful and perfect tints of the aster should not be forgotten. Some varieties of the annual aster grow to a height of between two and three feet, bearing magnificent red, pink, white and purple blossoms closely resembling the chrysanthemum. While some types bloom as early as August, there are others which do not come to perfection until late.

The perennial aster, which is native to this country and which is little more than the wild roadside aster with whose gorgeous colorings we are all familiar in crisp September and October days, has justly become very popular as a garden flower. It may be relied upon to beautify your flower beds late in the autumn with its masses of purple, mauve and white bloom.

Among perennials, the helenium is an attractive flower which will endure a considerable amount of cold. It is covered with great masses of flower heads, composed of blossoms suggestive of an all-yellow daisy with the petals cut off at the widest part, and may be had in rich golden yellow or in a very fine deep crimson. Some of its varieties resemble a mass of giant wallflowers. It is absolutely hardy.

DAHLIAS.

Unfortunately, it seems to be admired by the black aphis as much as it is by its human devotees. These pests, however, can readily be driven away by the occasional use of insecticide.

The dahlia is another autumn standby in whose favor too much cannot be said. It is to be had in varieties—show, cactus, single, pompon, peony flowered, collarette and decorative. The last of these is the type so popular in our grandmother's gardens. They may be grown in almost any soil, and though they are frequently described as "gross feeders," expert opinion ascribes a large majority of failures in their growing to over-richness in the soil, which is apt to cause the plant to run to leaves.

A three-inch layer of well-rotted manure spaded into a bed two feet deep every year, with a generous dressing of slaked lime in the alternate years, is sufficient nourishment.

The roots, or "toes," as they are called, are obtained from growers and planted just below the surface of the ground in June, though a succession of bloom may be obtained by additional plantings at earlier and later dates. June-planted dahlias will bloom from August until frost, which gives a most satisfactory length of service.

The "toes" should be set in a sunny spot where there is a good circulation of air, and at the very least two feet apart, although four feet and even more will produce the best results. The soil should be kept stirred up about them and never allowed to cake or to become hard.

Buds which appear early—any, indeed, which are visible before the plant has attained its full growth—should be pinched off so that the plant may not dissipate its strength in producing inferior blossoms.

Stout stakes should also be provided early, since the heavy growth is at the mercy of the wind. One strong stake may be used, but a better method is to employ three, connecting them by a heavy cord and tying the dahlia loosely to this support at various points.

Of course the flower of which one in especially apt to think in connection with autumn flowering plants is the chrysanthemum. There has recently been much discussion as to whether there is such a thing as a really hardy chrysanthemum. The wintering of plants with perfect safety, however, is such an easy task that it seems the part of wisdom to indulge ourselves to the full with these lovely flowers and then by taking proper precautions preserve them during the winter.

The process simply consists in lifting the plants and resetting them in boxes in the cellar or some other cool place where they will be untouched by frost. The boxes should be stationed in a spot where they will receive full sun for at least a portion of every day, and they should be surrounded on the three other sides and the top by heavy builders' paper to shut off drafts. They should be lightly watered about every three weeks.

This treatment will preserve them in a comparatively dormant condition and when at the end of the winter they are brought out into the light they will be in excellent condition.

Chrysanthemums should be given a rich and well-drained soil and set out a foot apart. When the plants attain a growth of four or five inches the middle stalk should be pinched back to three, and the resulting branches, which will spring from the centre stem, should, upon reaching four inches, be again pinched back. This will result in compact plants.

With both the dahlia and the chrysanthemum, the size of the flowers may be governed by the removal of the lateral buds, leaving the terminal buds on the various branches but pinching off the others. Such pinching and pruning should not be done after the middle of July for fear of injuring the flowers.

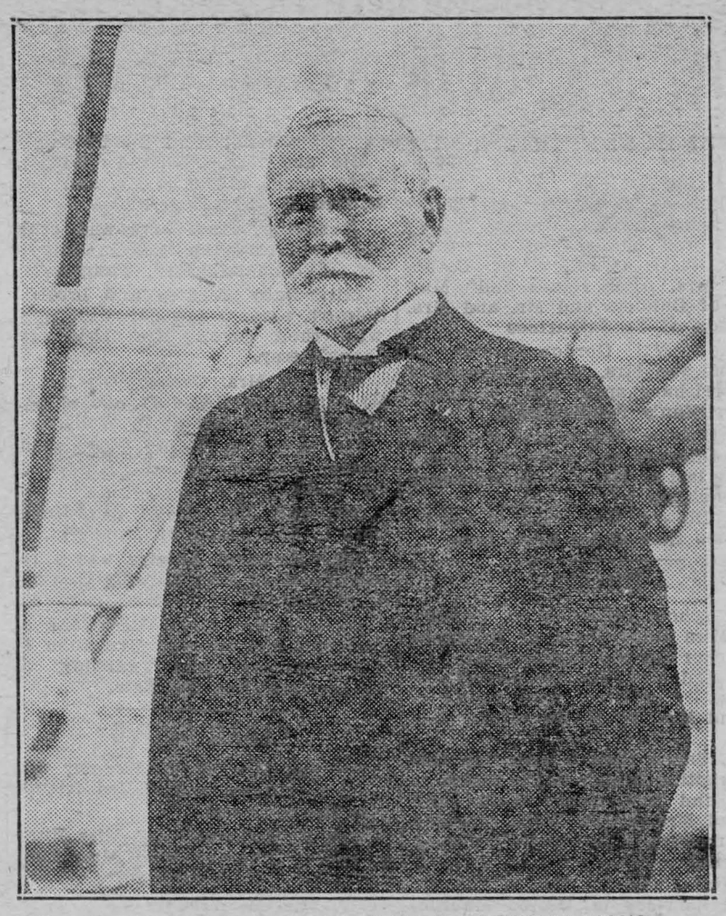

Live Stock Trade in Six Months.

The Dominion Live Stock Branch market review shows that during the first six months of 1925 compared with the same period of 1924 there was a decrease in all Canada of a thousand head in the sales of cattle. Toronto showed an increase but the other markets had a decrease. Hogs increased by 95,000 compared with last year, Toronto alone showing a decrease. Increased offerings were particularly noticeable in the West. Sheep supplies dwindled, the markets generally showing a falling off.

A feature of the export trade was the incresaed shipments of cattle to Britain, they being the largest in June for any month since the embargo was removed in 1923. Exports of calves, hogs and sheep also showed an increase compared with 1924. The trade in live hogs between Western Canada and the Pacific Coast continues good. Great Britain has more than doubled her purchases of beef, but the United States has fallen away 50 per cent. Sales of bacon increased during the six months of 1925 by 10,000,000 lbs. compared with 1924. Exports of pork have doubled and button and lamb show good gains, although the trade is still rather small.

Infectious abortion, a disease in cattle, is costing nearly as much money as bovine tuberculosis, according to a prominent doctor of veterinary medicine.

Sweet corn is easily canned, but a pressure canner gives the best results.

SENIOR DELEGATE TO THE LEAGUE OF NATIONS

Senator Raoul Dandurand, Minister of State and senior Canadian delegate to the League of Nations, photographed on board the Canadian Pacific steamship "Empress of Scotland" on his way to attend the gathering at Geneva in September. Before returning to Canada, the Senator will visit practically every capital of Europe.

YOUR NOSE EATS WHEN IT SMELLS

BY GRANDFATHER.

To understand why housewives so often claim that after cooking a nice dinner they cannot eat it, one must go away back to a somewhat old tale, but one easily explaining the strange loss of appetite.

In the Dark and Middle Ages all Europe was so steeped in ignorance and superstition that everything that happened was credited to some invisible being in the sky. Ghosts were everywhere, demons were lurking around all corners to trip the unwary, and nothing of any consequence was believed to come from natural causes.

Everything was a miracle! For a thousand years and more elfs, fairies, witches and such things kept the people busy. They had but one thought and all learning practically disappeared from every portion of the Continent—but not from Southern Spain where the Arabs or Moors were enjoying one of the highest forms of civilization ever known.

These Arabs had enormous universities where science was kept alive for the rest of mankind. They were especially inquisitive into the matter of distilling fluids. Alcohol is the name they gave the almost gaseous material which still bears the Arabian name. One dozen Arab students at that time knew more than a dozen million of the peoples who lived almost a stone's throw from them and it was a natural thing that their knowledge must sooner or later reach the interior of the mass of superstition.

When the Arabs did get into Northern lands with their alcohol and wonderful perfumes, they carried their gaseous things in bottles. When the corks were drawn the fluids escaped by evaporation. The superstitious peoples smelled the odors, saw the fluids slowly disappear from the bottles.

"Ghosts! Spirits!" they gasped. Bottles filled with spirits and held in confinement by corks. To them there was no other explanation!

And the name has stuck to this day.

But to-day we know how the spirits crawl out of the bottles in invisible atoms. We know how these atoms get into the fine membranes of our nose and lungs.

When you smell a perfume or odor of any kind you inhale millions and millions of solid atoms, so small that they cannot be seen even with a microscope. We see the atoms of smoke because the atoms are in great bunches, but when the smoke thins, in other words when the atoms separate, we cannot see them, we merely say that the "smoke disappears."

Mist and fog are the same, little clusters of atoms, the clusters being much smaller than rain drops. Even gases are solids. When gas is lighted minute atoms of coal expand and explode when they reach a certain degree of heat and the friction of the billions of explosions makes the atoms glow and give out light and heat.

In one flash of gas light millions and millions of explosions are made and each explosion means that a number of atoms have suddenly parted company.

The unexploded atoms of gas, perfumes, onions, flowers and decaying matter, in fact everything that gives forth an odor, these atoms are what we "smell".

But we do not "smell," we actually taste, we eat. The odoriferous atoms are real, they are solids. They are drawn into the nose and against the membranes which are so sensitive that they "taste" the atoms, and if those atoms are agreeable the membranes eat them. If the atoms are not suited the membranes get rid of them by forcing a fluid through the membranes and making the nose "run," the fluid carrying with it the disagreeable "odors."

Now you know why the housewife does not enjoy the meals which she has cooked, why she is not hungry after having prepared a repast. She has had enough food.

Her lungs and nose membranes have actually consumed so much of the food that her appetite has been satisfied.

Your lungs are eating day and night. They eat every good odor that comes with the air drawn into the lungs. Air is a "gas," nevertheless it is composed of billions of solid particles, numberless pieces of water, salts, nitrates, pieces of anything and everything because all the odors of the whole world are mixed in air and float around the earth until they eventually settle just like the muddy water settles at last.

When all these food-stuffs go to the lungs the little fellows known as "blood" eat what they choose and carry the digested food through the entire system.

James Brown, Indian and former football star, who is said to be the world's champion bricklayer. He puts down 36,000 daily and keeps five men busy handing them over.

PUTTING THE JELL IN JELLY

Plenty of Pectin is Essential to a Firm Jelly.

What puffs a woman up with housewifely pride more than does a row of sparkling jelly jars waiting on the kitchen shelf ready to be stored in the basement for winter use? But many jars of jelly stored to satisfy the family appetite during the fruitless season do not score as high as they might because of some error in the process of making.

The whys and wherefores of jelly making are quite simple and a few rules mastered at the beginning often saves many a glass of syrupy jell.

In the first place it is very essential to have enough pectin in your fruit juice to have it jell. This substance is found in apples and currants and some other fruits. If the fruit is over ripe this valuable jelly making substance is found in a lesser quantity.

Fruit acids also play a very important part in jelly making. These acids are the substance that give edge to the taste of fruit and fruit juices as the tartaric acid in grapes and currants, malic acid in crab apples and sour apples, and citric acid in lemons and oranges. Like pectin, acids are not so abundant in over ripe fruit so jelly made early in the fruit season or fruit juice canned at that time for making jelly during the winter months is much better.

Any fruit that is to be used for jelly making should be thoroughly washed and drained. In objecting to this washing some housewives say that the resulting juices are too watery to jell. However, it is found that the proportion of sugar used according to the pectin in the juice rather than to the water in the juice will obviate these difficulties.

In extracting the juice, transfer the clean fruit to an enamel kettle, add just enough cold water to keep the fruit from burning. Heat the fruit gradually and allow to cook over a slow fire. When the simmering point is reached mash the fruit and stir while cooking for ten minutes. Drain the juice from the pulp through fine muslin. This is known as the first extraction. By adding more water to the pulp and cooking the second and even the third time enough fruit can be extracted to make a very satisfactory jelly, if care is taken.

During the jelly making process, the boiling mass should be carefully skimmed. Most housekeepers have a jelly test which they are in the habit of using, but the one most generally used is "that point at which the boiling mass sheets off or breaks off as a portion of it is allowed to drop from the spoon. This test is more satisfactory than allowing a small portion to cool to note how it jells, because time may spell success or failure toward the end of the process."

Just when to add the sugar to the fruit juice is often puzzling to many inexperienced cooks. One thing should be remembered, that the longer the juice and sugar boil together the darker the jelly. With certain rather colorless jellies this darkening is desirable while with others it is not. To become completely dissolved the sugar should be in the juice at least ten minutes and should be added hot (not scorched) so as not to cool down the jelly making process. Rather constant stirring is essential both before and after adding the sugar to prevent burning.

Recipes Worth Trying.

Fresh grape relish is novel. Select bunches of grapes of about the same size and ripeness; they should not be overripe. Leave the grapes on the stems and pack the bunches closely into clean glass jars, but do not try to get too many in the jar, for the fruit should not be bruised. Make a syrup of one and one-half cupfuls of sugar to each cupful of white vinegar; boil for five minutes, pour over the grapes to fill the jars, and seal them. These grapes have the appearance of the fresh fruit and make an excellent relish to serve with meat or to use as a garnish for salads.

Pear Honey: Select one dozen fine Bartlett pears. Pare, cut into halves, remove the cores, and grate the pears into one quart of water. Boil gently for a half hour, then add two pounds of granulated sugar. Cook until clear and as thick as good strained honey. Add the juice of two lemons and can in half-pint or pint jars. This is an excellent spread for school luncheons. Quince honey is made in the same way, using five fine quinces, a pint of water and three pounds of sugar.

Fresh Corn Muffins will please. To make, grate enough corn from the cob to make two cupfuls, add a saltspoonful of salt, a tablespoonful of butter, the beaten yolks of two eggs, two cupfuls of milk, and three cupfuls of flour in which two teaspoonfuls of baking-powder have been well sifted. Mix thoroughly and add the beaten whites of the eggs. Have gem pans heated and greased. Half fill with the mixture and bake in a quick oven for a half hour.

Broiled Eggplant is good and wholesome. Pare, cut into quarter-inch slices, lay on a buttered broiler and cook until done. Turn often to keep from burning. Season with salt and pepper and a little melted butter.

Tomato Chowder: Pare and cut six potatoes into cubes, mince two large onions. Cut into dice two slices of fat salt pork and fry them until golden brown in the kettle in which the chowder is to be made. Add the potato and onion, a teaspoonful of salt, a saltspoonful of black pepper. Cover with boiling water, and add two sliced tomatoes. Simmer for a half hour, then add two quarts of hot milk. Let it come to a boil and add a tablespoonful of butter. Serve very hot.

Tomato and Orange Marmalade is made with yellow tomatoes. To each pound of tomatoes use one orange and one pound of sugar. Boil the tomatoes a few minutes, then add the orange pulp. Boil the orange rinds until tender, then drain and pass through a food chopper and add to the tomatoes. Add the sugar and cook until the marmalade is stiff and transparent. Pour into sterilized glasses and seal with paraffin.

Clean Seed.

In the one million bushels of seed wheat required to sow the wheat fields of Ontario each year, there are a few thousand bushels of weed seeds that grow, not to make more bread but to add to the misery and take the profits of the farmer. Clean seed is possible for all, and certainly well worth while. Buy clean seed or use a fanning mill of your own, if you can get such; failing this use a long water-tight trough and water to float the chaff, light weed seeds and light grain out. It is of course necessary to dry or partly dry the seed before sowing. This can be done by spreading in the sun for a few hours and shovelling over frequently.

Minced watercress and green onions added to cottage cheese make a very delightful change.

1123—Boys' Sailor Suit, with long sleeves, set-in pocket, with or without yoke, and long or short trousers. Sizes 4, 6, 8 and 10 years. Size 8 years requires 2¾ yards of 36-inch or 1⅞ yards of 54-inch material. Price 20 cents.

1130—Boys' Suit, having back and front yoke, box-plaits, long or short sleeves, and with straight side-closing trousers. Sizes 4, 6 and 8 years. Size 6 years requires 2¾ yards of 36-inch, or 1⅞ yards of 54-inch material. Price 20 cents.

1140—Boys' Suit, with front opening under tab, set-in pockets, long or short sleeves, and straight side-closing trousers. Sizes 2, 4 and 6 years. Size 4 years requires 1⅞ yards of 32-inch, or 1⅜ yards of 36-inch material. Price 20 cents.

Many styles of smart appeal may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number, and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

Poverty of the Soil.

B. C. O. Huron Co., writes: "Some of my soil seems rather poor. Can you tell me how it can be enriched and improved?"

Answer — Write the Dominion Chemist, who in his report for 1924 states that the employment of crushed limestone is on the increase, especially in Eastern Canada. It is evidently, he says, the most popular form of lime for soil treatment and he believes that it is destined to become the most widely used lime compound employed in general farm practice. You might also consult the district agricultural representative

There are many farmers and fruit growers who would like the birds to put in about eighteen hours a day destroying insect pests, but never peck at a cherry or a grape or a strawberry or help themselves to a few mouthfuls of grain. Do they know how much the market-basket and dinner-pail have been depleted by the loss of birds?

TOKIO AND YOKOHAMA FLOODED EIGHTY THOUSAND HOMELESS

A despatch from Tokio says:—Nearly two-thirds of Tokio was inundated as a result of thirty-six hours of rain. Thirty thousand homes are flooded, and 80,000 residents of Tokio and Yokohama are homeless. Casualties are nearly a hundred.

The homes of most foreigners, being on high ground, are not endangered, except in the colony of Akasaka, where the waters are rising.

An overflowing storm sewer sent a rushing river three feet deep past the Imperial Hotel. Water burst in[illegible]ers at the Nikkatau film theatre, [illegible]sing a panic in which a score of women were trampled.

A bluff near Hongo gave away burying several persons, and six occupants were dug out when a landslide entombed an automobile near Odawara, which city is flooded. A street car plunged twenty feet into the moat of the imperial palace when an embankment gave way; five passengers were rescued from drowning. A train overturned on the Chuwo line with many killed.

Tram service is paralyzed and an electric power plant and several factories are threatened if recently built levees north of the city should give way.

THE MARKETS

TORONTO.

Man. wheat—No. 1 North., $1.67½; No. 2 North., $1.62½; No. 3 North., $1.58½; No. 4 wheat, not quoted.

Man. oats—No. 3 CW, 51c; No. 1 feed, 49½c.

All the above on track Ft. William.

Am. corn, track, Toronto—No. 2 yellow, $1.10.

Millfeed—Del., Montreal freights, bags included. Bran, per ton, $28; shorts, per ton, $30; middlings, $36; good feed flour, per bag, $2.30.

Ont. oats—42 to 44c, f.o.b. shipping points.

Ont. good milling wheat—$1.27 to $1.30, f.o.b. shipping points, according to freights.

Barley—Malting, 76c.

Buckwheat—No. 3, nominal.

Rye—No. 2, nominal.

Man. flour, first pat., $9.30, Toronto; do, second pat., $8.80, Toronto. Pastry flour, bags, $6.30.

Ont. flour—Toronto, 90 per cent. pats., per barrel, in carlots, Toronto, $6.10; seaboard, in bulk, $6.10.

Straw—Carlots, per ton, $8 to $8.50.

Screenings—Standard, recleaned, f. o.b. bay ports, per ton, $18 to $20.

Hay—No. 2, per ton, $15; No. 3, per ton, $11 to $12; mixed, per ton, $9 to $11; lower grades, $6 to $9.

Cheese—New, large, 24 to 24½c; twins, 24½ to 25c; triplets, 25 to 25½c; Stiltons, 26 to 27c. Old, large, 28 to 29c; twins, 29 to 30c; triplets, 29 to 31c.

Butter—Finest creamery prints, 41½c; No. 1 creamery, 40½c; No. 2, 38 to 38½c. Dairy prints, 28½ to 30½c.

Eggs—Fresh extras, in cartons, 41 to 42c; loose, 39 to 40c; fresh firsts, 36 to 37c; seconds, 32 to 33c.

Dressed poultry—Chickens, spring, lb., 30 to 35c; hens, over 4 to 5 lbs., 24 to 28c; do, 3 to 4 lbs., 22c; roosters, 18c; ducklings, 5 lbs. and up, 27 to 30c.

Beans—Can., handpicked, lb., 6½c; primes, 6c.

Maple produce—Syrup, per imp. gal., $2.40; per 5-gal. tin, $2.30 per gal.; maple sugar, lb., 25 to 26c.

Honey—60-lb. tins, 13½c per lb.; 30lb. tins, 13½c; 5-lb. tins, 14c; 2½-lb. tins, 15½ to 16c.

Smoked meats—Hams, med., 32 to 33c; cooked hams, 47 to 50c; smoked rolls, 22c; cottage, 23 to 25c; breakfast bacon, 32 to 36c; special brand breakfast bacon, 38 to 39c; backs, boneless, 36 to 42c.

Cured meats—Long clear bacon, 50 to 70 lbs., $22 ; 70 to 90 lbs., $20.50; 20 lbs. and up, $19.50; lightweight rolls, in barrels, $29.50; heavyweight rolls, $24.50 per barrel.

Lard—Pure tierces, 18 to 18½c; tubs, 18½ to 19c; pails, 19 to 19½c; prints, 20 to 20½c; shortening, tierces, 14½c; tubs, 15c; pails, 15½c; blocks, 16½c.

Heavy choice steers, $8 to $8.25; do, good, $7.50 to $7.75; butcher steers, choice, $7.25 to $7.75; do, good, $6.25 to $7; do, med., $5.25 to $6; do, com., $4.50 to $5.25; butcher heifers, choice, $6.75 to $7.25; do, good, $5.75 to $6.25; do, med., $5 to $5.50; do, com., $3 to $5; butcher cows, choice $4.50 to $5.25; do, fair to good, $4 to $4.50; canners and cutters, $1.50 to $3; butcher bulls, good, $4.50 to $5.25; do, fair, $3.75 to $4; bologna, $3 to $3.50; feeding steers, good, $6 to $6.25; do, fair, $4.50 to $5.25; calves, choice, $11 to $11.50; do, med., $8.50 to $9.50; do, com., $4.50 to $5.50; milch cows, choice, $70 to $80; do, fair, $40 to $50; springers, choice, $80 to $95; good light sheep, $7 to $8; heavies and bucks, $5 to $6; good lambs, $13 to $13.25; do, med., $12.75 to $13; do, bucks, $11 to $11.25; do, culls, $10 to $11; hogs, thick smooth, fed and watered, $13.85; do, f.o.b., $13.25; do, country points, $13; do, off cars, $14.25; select premium, $2.71.

MONTREAL.

Oats—No. 2 CW, 66½c; No. 3 CW, 60c; extra No. 1 feed, 60c. Flour—Man. spring wheat pats., firsts, $9.30; seconds, $8.80; strong bakers', $8.60; winter pats, choice, $6.70 to $6.90. Rolled oats, 90-lb. bag, $3.65 to $3.75. Bran, $28.25. Shorts, $30.25. Middlings, $36.25. Hay, No. 2, per ton, car lots, $14.

Hogs, straight lots of good weight, $14; selects, $14.50; sows, $11 to $11.50.

Wanted Liner Turned Back to Port of Sailing

A despatch from New York says:—The White Star liner Olympic reached Quarantine last week several hours late due to encountering heavy seas [illegible]rst day out from Cherbourg. It was an eventful voyage.

The high seas caused much seasickness aboard the ship. Captain W. Marshall was offered $100,000 by a Syrian heiress if he would turn his ship around and go back to the French port on the second day out.

Mlle. Izzit Pasha, a pretty Syrian girl, about twenty, was the passenger who offered a fortune to Captain Marshall to swing around. She was very seasick. Her father was financial adviser to the Sultan of Turkey, who recently died and left her $5,000,000.

BANKER LOCKS BANDIT IN VAULT WITH CASH

Heroic Manager Eludes Desperado and Slams Door.

Vancouver, B.C., Aug. 28.—In an unsuccessful attempt to rob the East End branch of the Canadian Bank of Commrece, Joseph Leonard, aged 18, a sailor, was captured by the Manager, A. E. Wilson, shortly before 10 o'clock to-day. Leonard, roughly dressed, walked into the bank, and producing a heavy revolver, drove Wilson and his two assistants into the vault. He was preparing to loot the safe when Wilson dashed out of the vault and slammed the heavy door shut, thereby imprisoning the bandit with the two clerks. The police responded to a telephone call for help.

The bandit was armed with two revolvers, and while locked in the vault fired nine shots at the lock, paying no attention to the imprisoned clerks. When the police arrived, the Manager opened the vault and Leonard walked out first, holding his two revolvers by the barrels, presenting them to the officers. The guns were empty.

Leonard gained access to the bank by means of a transom during the night, and hid himself in the Manager's office. When he demanded that the vault be opened, Wilson told him it was a time lock and could not be opened until 10 o'clock.

"Then we will wait," answered the desperado.

The guns that Leonard had in his possession had been taken from a drawer of a bank desk during the night.

Forty-Eight Marooned on Drifting Ice Floe

A despatch from Montreal says:—Forty-six men and two women, marooned on a drifting ice floe 50 yards square, 60 miles from land, in a driving rainstorm which lasted ten hours. This is the story of the wreck of the Hudson Bay supply ship Bayeskimo in Ungava Bay, on July 23, as told by one of the survivors who has reached Montreal.

After the little ship had been squeezed in pack ice on her journey through the bays and inlets of the sub-Arctic, she sprung a leak and sank, carrying with her supplies for all the outposts of civilization, as well as for Eskimo settlements in a vast northern territory. Capt. J. L. Lloyd transferred his crew and passengers to the floating ice and ten hours later were picked up by the steamer Nascopie and landed at one of the trading settlements.

More Prisoners Passed Through Ontario Jails

A total of 16,375 prisoners passed through the jails of Ontario during 1924, an increase of 1,884 over the previous year, according to an annual report on prisons and reformatories. The jails started the year with 496 prisoners, and during the twelve months 15,879 were received. The largest increase was 994 for crimes against order and peace, and the next highest 719 for crimes against property. Drunks increased from 3,482 to 4,027. The cost of feeding prisoners, the report shows, varied from nine cents a head a day at Picton to 45 cents a head at Gore Bay.

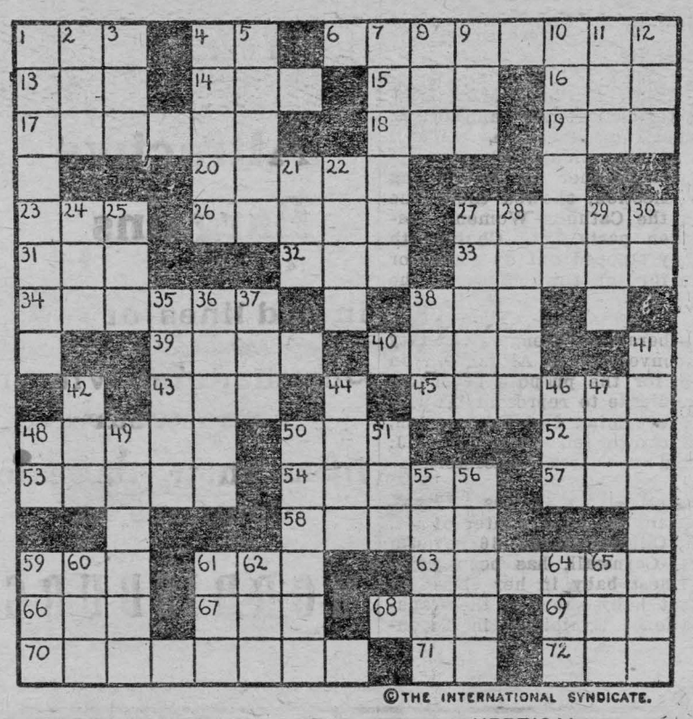

Three Months at Sea in Forty-foot Yawl

A despatch from New York says:—Three stalwart, bronzed sailors of Norway reached here after almost three months' sailing on the Atlantic in their 40-foot yawl, the Faedrenlandet, a picturesque little craft. Only the Norwegian Consulate here knew of the adventurers, who are said to be wealthy sportsmen. The little craft bore no earmarks of a rough voyage that began when she left Bergen, Norway, June 7.

SOLDIERS' MEMORIAL DECORATED BY PRINCE

H.R.H. Speaks to British Railway Workers at Buenos Aires.

A despatch from Buenos Aires says:—The Prince of Wales, after visiting British institutions in the city attended a hospital ball at the Theatre Colon Friday night.

His chief appearance was at a huge hall where British railway workers, many of them ex-service men and women, were assembled. The Prince laid a wreath on a memorial erected to employes of the railway who had been killed at the front and spoke briefly, thanking his audience for their welcome and wishing them luck.

As His Royal Highness left the hall his audience broke into "For He's a Jolly Good Fellow" and there was tremendous cheering from the crowd who packed the street outside.

The Prince was not greatly in the public eye, but interest in his activities continues unabated, and everywhere he goes a crowd gathers. At his request the quard of honor outside the Basualdo Mansion, the Prince's home here, has been removed.

His Royal Highness lunched Thursday at the Chilean Embassy, and subsequently went by special train to Hurlingham, where he played four chukkers of polo. Then, incognito, he attended the wedding reception of Lewis Lacey, the international polo player.

Hailstones So Large Man Knocked Unconscious

A despatch from Fredericton, N.B., says:—So big were the hailstones during a recent storm in Gloucester County that a man was rendered unconscious at Caraquet, according to James L. Neville, former Winnipeg and Calgary newspaper man, who returned from a visit to the north shore. Many window-panes were broken.

Guest Leaves Wooden Leg in Montreal Hotel Room

Montreal, Aug. 28.—A guest at a local hotel departed without his wooden leg, which hotel officials describe as the strangest thing ever forgotten in their hostelry. It is presumed the guest left on crutches.

Photograph showing the Bowdoin, flagship of the MacMillan expedition, being fitted with a new propeller at Hopedale, Labrador. The airplane venture has been abandoned, it is announced.

FRANCE OFFERS TO MEET GERMANY HALF-WAY IN MAKING ARBITRATION TREATIES

A despatch from Paris says:—A security pact is in sight. Final pacification of Europe depends only on careful diplomatic negotiations between Germany and France, Britain, Belgium, and Italy, and the signs are favorable.

Foreign Minister Briand has sent to Berlin a conciliatory note framed with the aid of British Foreign Secretary Chamberlain and agreed to by the other allies. It offers to meet Germany half way in making arbitration treaties so that Germany will not be exposed to unjustified attack on a technicality, and it invited Germany to negotiate for conclusion of a treaty.

Whether the negotiations are to be through ambassadors or at a conference is not mentioned in Briand's 1,500 word reply to the German note recently presented. It urges Germany to enter the League of Nations, saying the League is the only basis of durable peace, and makes plain that there will be no pact unless Germany does enter without more ado. But it states the reasons in a long homily coming from the allies as a whole and agreeing to search for a formula for arbitration treaties which will expose the country to attack only if it breaks its agreement and crosses a frontier, or, in the case of the Rhineland, if troops are moved into the neutralized zone.

It makes no concessions regarding the Rhineland occupation and repeats the pact must be subordinated to existent treaties.

BUSH FIRE MENACE IN ALGOMA AREAS

One Near Soo and Ten Reported From Blind River Section.

A despatch from Sault Ste. Marie, Ont., says:—Unless assistance in the form of rain comes to the aid of the fire fighters soon, a serious condition will undoubtedly develop in the district. The only fire close to the Sault is one at Groscap.

Some ten fires are reported from the Blind River section and about 100 men are employed fighting them. Some of the fires are serious ones. The only thing that will completely quench them after the dry weather of the past three weeks, is a good shower.

On the American side of the line the bush fire near Kinross, 18 miles south of Sault, Mich., has burned over 2,000 acres of land in the past twelve days. It took a new start only forty rods from the Village of Kinross, a place of a dozen houses, a store, a depot and a school-house. Two hundred men are employed fighting the fire there.

The fire near Barbeau threatened the new house of Wm. Atkins, but the farmers of the neighborhood joined Mr. Atkins and dug a trench around the house and thus saved it.

A despatch from Sault Ste. Marie, Mich., says:—Forest fires have reached alarming proportions in scattered sections of Northern Michigan where one village was destroyed and the town of Pellston, Emmett County, a community of more than 1,000 persons was threatened. Two smaller communities were in flames. Millstrand, a small village in Schoolcraft County, on the upper Peninsula, ignited, and in a few hours had been wiped out.

Every resident of Pellston, including women and older children, was marshalled west of the village, beating out small fires started on the outskirts.

Douglas Lake cottagers had deserted their camps, although a sudden shift in the wind saved the resort buildings, temporarily at least.

When it was seen that the flames were beyond control, the fire fighters were forced to desert their posts. Just when it was thought the resort would surely be destroyed the wind shift came and the flames turned their course away from the lake.

Hands Badly Mangled by Dynamite Cap Explosion

Cobalt, Ont., Aug. 28.—Two accidents caused by the premature explosion of dynamite caps have been reported here, the victims both Northern miners, having lost fingers in each instance. Tom Hamn is in hospital here after being hurt at the property of the London Canadian Gold mines, in Rouyn, he having made the trip for medical treatment by land, water and air. Hamn was putting the cover on a full box of caps, when an explosion occurred and two of his fingers were blonw off.

In the other case, Jim Gallagher, alone in a cabin near Larder Lake, lost all the fingers on one hand and had the other mangled in a similar mishap. Gallagher was in the cabin for two days after the accident and was so helpless that the only food he obtained was by picking up scraps from the table with his mouth. He was sent to Kirkland Lake for treatment.

New Rule Provides Death for Drivers

Washington, Aug. 28.—The death penalty could be meted out to death-car drivers under a new ruling today by Chief Justice McCoy of the District Supreme Court. He held in the case of two negro defendants, Clifton Young and Estelle Robinson, that they were properly indicted for second-degree murder for running down and killing Sister Cephas of Providence Hospital. The District Attorney hailed the ruling as opening the way for first-degree murder prosecutions and sentence to the electric chair.

St. Paul's Cathedral will hold 25,000 people.

C. N. EXHIBITION DIRECTORY

Taking "The Fountain" as the first objective it is quite simple to "find things" which are located as follows:

JUST PUT ON THE MARKET, for sale, seven beautiful river front lots, at the east end, and the prices are right get one while they last. Several medium sized dwellings for sale. Money to lend on farm security.—J. A. RIDDELL. tf

The monthly meeting of the Womens Institute will be held on September 14th the second Monday of the month, as the first Monday is a holiday. Don't forget the date. Monday Sept. 14th, at the Agricultural Office, 3 o'clock in the afternoon.—Jane Dillen, Sec.

An Order-in-Council providing for the dissolution of the Federal Parliament will be signed by the Governor-General on Tuesday next, and general elections will take place on October 26th according to confidential advices which have reached the leaders of the Liberal party at Ottawa.

Ernest Phillips, a formen officer of the customs department at Belleville, has been appointed manager of Wiser's distillery at Prescott. He has been connected with the customs staff at Prescott for the last six months.

Angus McGillis of Williamstown was selected by the Conservative party of Glengarry County as their candidate for the expected general election. It is expected that Glengarry County will be the battleground of a three-cornered fight.

The 1925 Fair was a success without parallel in the history of the Central Canada Exhibition. When the last straggler had passed through the turnstiles on Saturday night the chairman of the gates and tickets committee ,Mr. T. Sidney Kirby, announced a total attendance for the seven days of 349,200 or 42,200 greater than the previous record attendance of 307,000, made in 1922.

Mr. Crowder, aged 79 years, was found by his daughter Mrs. Alfred Jones of Mountain Township, with whom he resided, lying dead just inside the stable door, she had seen him enter a few minutes before. The call came unexpectedly to him as he had just eaten a hearty breakfast as usual and gone to the barn.

The Womens Institute realized eighty-two dollars and twenty-one cents ($82.21) on their sale of tags on days of the Fair, and wish to thank all who so graciously assisted in anyway with the campaign. This amount is to be presented to the new collegiate.

Miss Agnes McPhail, M.P., Progressive for South Grey and Dr. L. G. Campbell of Markdale, Liberal Conservative candidate, who are opposing one another in the coming Federal Election, showed their fine spirit at the Catholic Womens League garden party at Chatsworth when they stepped out on the floor together for the first dance of the evening.

The Liberals of Glengarry county met in convention at Alexandria on Saturday for the purpose of choosing a candidate to represent the riding in the coming Federal election, and the choice fell upon Arch J. Macdonald of North Lancaster.

Margaret Lillian Agnes Harps, the four-months-old daughter of Mr. and Mrs. Clifford Harps 36 Seventh St. East, Cornwall, has been judged the finest baby in her class at the recent baby show at the Canadian National Exhibition in Toronto.

YOUR CHILD

Might be the brightest in the class if he were not handicapped by defective vision.

The first duty of every parent is to determine a child's physical assets.

Eyes properly equipped to see will reduce the handicap of defective eyesight, and tends to increase the child's **health and learning** capacity.

An accurate eye examination at frequent intervals is an assurance of keen, comfortable vision.

Be sure your child's eyes are right before starting him to school again, by having them examined.

Make the appointment to-day.
