YOUR ROOF
Does it Leak ?

A leaky roof never gets better unless repaired.

If your roof cannot be repaired profiitably to you, it will pay you to have it newly covered at once.

Let us look over your roof if it leaks, and make the neccessary repairs when the weather is good.

If a new roof is needed we will tell you just what it will cost you before you start it.

Phone 48 and let us get busy.

Arthur Peake - Chestervlle.

If You Wish Winter Bloom

Anyone wishing to order bulbs for outdoor planting or pot culture for winter bloom please notify the secretary of the Horticultural Society within the next ten days, before Sept. 15th.

Former Finch Pastor Called

At a meeting of the Presbyterian congregations of Cardinal and Mainsville held at Cardinal, a unanimous call was extended to Rev. J.M. McCurlie, B.A., of Edmonton formerly of Finch, by the congregation of Cardinal and Mainsville, to succeed Rev. C.C. Salisbury, who was recently transferred to Hemmingford, Que. The call will be brought before the Presbytery of Brockville meeting in Prescott, September 11.

Consolidated School Opening

The official opening of the North Mountain Consolidated School will take place on Wednesday, Sept. 19th. at 2 p.m. It is expected that the Minister of Education, Premier Ferguson, and several officials of the Education Department, as well as several other prominent public men will be present. An afternoon of sports and a musical program is also being provided. All who are interested in education are especially invited to be present and take part in the inspection of the first school of its kind to be established in Eastern Ontario.

Arlie Marks Returns

In response to insistent requests the popular comedienne, Miss Arlie Marks, and her players will return to the Music Hall on Saturday evening next, Sept. 8th.

An entire new play entitled "Hal of the Hills" will be presented on this occasion and all new vaudeville features will be introduced between the acts.

Miss Marks and her Company won much merited praise during the two evenings of the races last week and a big audience is certain to greet this popular organization at the Music Hall on Saturday evening next. The same popular prices obtain.

Arthur Brown of Morrisburg Passes Away

Monday evening about nine o'clock death came to Arthur Brown of Morrisburg, after an illness extending over many months. In the death of Mr. Brown there passes a figure well known to the pupils of the public schools of Dundas between the years 1879 and 1906 during which time he held the position of Public School Inspector. He was born in South Crosby, Leeds county, the son of Rev. Wm. Brown, a Methodist minister, and a brother of Dr. Miles Brown of this place. Arthur Brown was educated at the Matilda and Athens grammar schools and at Belleville seminary. He began teaching school in 1867 and in 1874 became manager of the Morrisburg Herald, a post which he vacated four years later to become the inspector of public schools for Dundas, retiring in 1906. A grown up family survive.

Good Show of Flowers

Lovers of the beautiful had their innings at the first Flower show of the Horticultural Society held in the Library hall last Thursday afternoon and evening. It was a non-competitive affair, no awards being made, being in the nature of a try-out for a more pretentious show next year. There was a very large number of entries covering a wide range of the different kinds of flowers. The gladiolus has proved a very popular variety among the growers of flowers in this district, of which there were many fine specimens at the show. The attendance was not as large as the display warranted, which was no doubt accounted for by the counter attraction at the Driving Park with the second day of the fair races.

CARD OF THANKS

Mr. and Mrs. W. A. Durant and family wish to thank their many friends and neighbours for their kindness and sympathy in their recent bereavement.

More Education in our High School

The question which forces itself upon the attention of a goodly number of our citizens if the fact that whereas we have a high school in our town, it is necessary for them to send their children to other places to complete their High School education. This state of affairs is not due to lack of accommodation, lack of equipment or lack of teaching ability; but is due to lack of one teacher in our High School. With one more teacher in our school the Upper School work leading to a 1st. Class Teacher's Certificate, could be taken up here. This, however, would mean the outlay of $1700 to $2000 for another teacher's salary. To offset this outlay by our citizens there are at the present time 7 ex-pupils of our High School attending outside High Schools or Collegiates. This means at least $500 per year or a total of $3500 to $4500 per year spent by our citizens outside of the town. There are also three pupils attending our school this year whose time will be only half occupied—whereas, they should be taking Upper School work at the same time. It is estimated that had we an Upper School course in our school this year the attendance in it would be at least 12. This extra teacher would only mean a mill or two on our tax assessment and would increase the sales of our merchants etc. in town, to the extent of $2500—$3000. Can we afford to lose this business? And then of course there is the sentimental side of the boys and girls remaining have for these two extra years under our care and guidance. At this very impressional age of 16—18 it is very much to be desired. Surely we as a town can successfully compete with our neighboring towns in Dundas. We have as good men; we have as good intellect; we have as good a town. Let us speed up a little on that which will improve all these things.

Hay and Straw Pressing Law

For the convenience of hay pressers and also those interested in Dominion legislation respecting the pressing of hay and straw, together with amendments to date, the following extracts applies:

The wire to be used in the baling of hay or straw shall be of a strength and quality not below No. 14 guage, standard.

Hay and straw baled must be sound and reasonably free from weeds and other objectionable matter.

The scales used by balers shall be inspected at least once a year.

Every presser of baled hay or straw in Canada shall affix to every bale of hay or straw sold or offered for sale, a tag having thereon plainly written and legible, his name and business address, and the weight of the bale. Such tag shall be securely fastened to the bale and shall be of not less than one and one half inches in width and three inches in length.

Any presser of hay or straw who fails to attach a tag in each bale of hay or straw, as prescribed by this Act, shall on summary conviction, be liable to a fine of five dollars for each violation.

Any person who puts any foreign matter into any bale of hay intended for sale which improperly increases its weight, or which prejudically affects the quality of the bale, shall, on summary conviction, be liable to a fine not exceeding forty dollars for first offence, and for each subsequent offence to a fine not exceeding one hundred dollars.

Any person who puts any foreign matter into any bale of straw intended for sale which improperly increases its weight, or which prejudically affects the quality of the bale, shall, on summary conviction, be liable to a fine not exceeding twenty-five dollars.

Henry Ford Not One of Them

The Ford Motor Company, which for the last five years has left all advertising to be done by local dealers, has decided to spend the enormous sum of $7,000,000 on newspaper and magazine advertising throughout the country during the next year. Some people seem to be laboring under the delusion that advertising doesn't pay, but apparently Henry Ford isn't one of them.

Playing a Sure Hunch

"Prisoner at the bar," said the judge, "will you have trial by judge or jury?"

"By jury, your Honor," replied the defendant. "I'll take no chances on you."

"What!" roared the Court, "Do you mean to say that I would—"

"I don't mean t' say nothing," said the prisoner stoutly, "but I ain't takin' no chances. I done some plumbin' work for you last winter."

Catarrhal Deafness

is greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflamation and assisting Nature in restoring normal conditions.

Henry the First

Henry Ford owned the first motor car in Detroit. It made a racket and it scared horses. Also it blocked traffic. If left alone even for a minute some inquisitive person always tried to run it. Finally he had to carry a chain and chain it to a lamp post whenever he left it anywhere. And then there was trouble with the police. He got a special permit from the mayor and thus for a time was the only licensed chauffeur in America. He ran that machine about 1,000 miles through 1895 and 1896 and then sold it to Charles Ainsley of Detroit for $200.

Speed Hounds Punished

In a western Ontario town constables have been taking the license and the number plates from drivers of cars who have been guilty of driving furiously, and returning them to the department. It is really a more salutary lesson than a nominal fine. If magistrates, when aggravated cases are brought before them, would mete out punishment like this, there would be fewer motoring accidents, as fast driving is 95 per cent. cause of all trouble. A furious driver is a menace and danger to everyone on the road.

The engineers say that Sunday is their Day of Horror because of the multiplicity of automobiles. They are sure to see one or more at every crossing and the chauffeurs take chances on the narrowest margin. The other Sunday a young fellow and his girl shot across in the nick o time. The engineer turned to the frightened, ashen-faced fireman with the question in his face: "Did we hit them?" The latter replied: "We missed by a yard."

Walk and be Healthy

A prominent consulting physician of national reputation commenting upon the increasingly large number of men and women who are afflicted with nervous disorders of various kinds, states emphatically that this growing evil is largely the result of lack of proper exercise. He states that if people would walk at least two miles a day regularly they would never know what insomnia or high blood pressure means. He claims that overfeeding and under exercise are the two greatest enemies of health and happiness. He says that street cars and automobiles are the bane of modern urban life and unless this temptation to ride is overcome or properly regulated the next generation will be flabby and anaemic. There is not the least doubt that the use of good shoe leather means increased healthfulness, and therefore increased efficiency both physical and mental. "Walk and Be Healthy" is a slogan well worth keeping before the present generation. A mile a day will keep the doctor away.

One of Jack Miner's Birds

So widespread has been the interest on the experiments and achievements of Jack Miner, the well known lover of birds, that every hunter in the north or elsewhere, hopes at sometime to get a bird with Jack's markings on it. A particularly interesting case of finding a bird which had been tagged many months before has just come up, and will be of interest to all hunters, particularly those who watch the wild geese. In November, 1921, at his home in Kingsville, Jack Miner tagged a drake which had paid its annual visit to his farm. On the outside of the tag was the address, Box 48, Kingsville, while on the other side was stamped "Have faith in God." The drake was turned loose and nothing more was heard of it until two years had elapsed, when Franklin H. Warner, a resident of Fort Francis, Ontario, and keen sportsman heard of a tagged bird. He had been on the lookout for one of Jack Miner's birds and one day gave a ride to a Finlander in his motor. During the conversation the man mentioned the finding, near the Lake of the Woods, a Mallard drake with one of Jack Miner's tags on. The drake had been caught in a muskrat trap on the 24th of April on a small inland lake near the Lake of the Woods. The bird must have travelled a great distance in the two years before it came to its tragic death in this inland lake.—Rod and Gun.—It is only a short time since Mr. Miner was himself in Chesterville and told to large audiences the delightful tales of bird life on his farm.

Not To Be Compared

Ralph, aged five, was afflicted with earache and screamed frantically with pain.

"Hush, dear," said the mother, "don't cry so; it only makes it worse. Don't you remember how nice little baby brother behaved when he had the earache? He didn't make half as much fuss about it as you are making."

"What does the k-kid know 'bout ear-a-ache?" sobbed Ralph. "H-his ears ain't half as big as m-mine."—Chicago News.

One on The Butcher

The little girl carrying a leg of mutton entered the butcher's shop. Depositing the meat on the block she began meekly "Please, mother's sent the meat back."

"What's wrong with it, then?" sternly demanded the butcher.

"Dunno," continued the child

"Didn't your mother send any message concerning it?" continued the butcher.

"No; she only said, "Tell him to put it to his nose and the meat will speak for itself."

If—

"Oh, if—if—if!" exclaimed the husband. "You remind me of what the fellow, who got lost in the woods, said to his companion." "Well, what did he say?" retorted his wife. "He said, 'Now, if we had some ham, we'd have some ham and eggs, if we had some eggs.'"

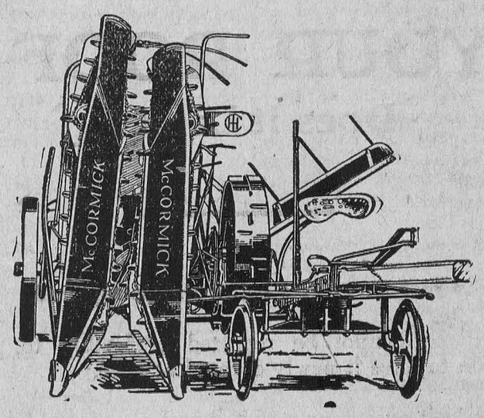
McCormick and Deering
CORN BINDERS



Cutting corn by hand is very hard work, as all men know who have tried it. In fact it is out of the question to fill a silo with hand cut corn. Yet corn stalks either green for the silo or stacked dry for fodder are the best food for cattle and horses.
The use of the McCormick or Deering Corn Binder will solve this problem You can cut and bind seven acres a day and do it much easier than by the hand method.
