Vol. XVII, No 34

MORRISBURG, ONT., FRIDAY, AUGUST 24, 1917.

THE MOST
RELIABLE CAR
MADE IS THE

Ford

The Ford, now we all know, is necessary on the farm. It is not a luxury. A Ford touring car cost prices are not yet out but can be delivered at the old price, and with \$210 you can buy an attachment which will convert any Ford car into an every duty farm and road tractor. It is guaranteed to go where other make of tractor cannot, and will also go in soft places where horses could not. It is also guaranteed to pull as much as 3 or 4 horses, on high gear, and is equipped to keep the engine cool for day and night running. Also for \$65 we can equip your Ford with Autopower attachment for doing heavy belt work, under ideal conditions, thereby saving an extra expense of \$500 for another engine to do this work. Therefore a Ford car can be equipped to do all the work on a farm for \$275 extra. Installed also on trial. It will thrash grain, press hay, run an ensilage cutter with a blower and pull a plow all day and all night—all the work on the farm for \$275 extra. It is guaranteed to plow all day without a stop and the engine will keep cooler and work easier than the standard Ford car on the road.

As we have a contract for 1918 of 114 cars for Williamsburg, Matilda and Edwardsburg and half of Augusta townships including the town of Prescott, and are real short of cars at present, (we have five orders ahead to date) which enables us to demonstrate the new tractor attachment at the present time. We had a little demonstration the 3rd of August at Morrisburg Fair and it worked fine. We expect to have it at Winchester next fair. Also expect to have you hear more about this in a near future date.

Departing Citizens Honored

On Monday evening a pleasant function took place at the home of Mr. and Mrs. S. P. Ryan, when St. Mary's Altar Society assembled for the purpose of saying farewell to Mrs. LaBelle and daughter, Annie, life-long residents of the county and highly esteemed members of the society, who, through their untiring and willing efforts, had rendered most efficient and faithful service to the church.

Early in the evening Miss I. Ryan presented Mrs. LaBelle with a hand bag and Miss LaBelle with a Club Bag as slight tokens of esteem, and Miss Mary Ryan read the following address to the latter who for a number of years had been an active member of the society.

"To Miss Annie LaBelle, Treasurer St. Marys Altar So. The members of St. Marys Altar Society have heard with deep regret of your intention to leave Morrisburg, and we desire to take advantage of this meeting to give public expression to the high esteem in which you are held, not only among the members of our own congregation, but among all classes in this community. We know that it will mean a severe trial for you to remove from your home town where you have been born and lived all your life, and where you have made so many warm friends. This step will mean for you the severing, perhaps forever, of many tender ties, and we desire to assure you that the sorrow which you must naturally feel on this occasion is fully shared by every one of us; for by your quiet, unassuming manner, your gentle, charitable, winning ways, your unobtrusive willingness to help every worthy cause, your faithfulness in the performance of every duty assigned to you, have earned the admiration and won the love of all with whom you came in contact. St. Marys Congregation has no more zealous and faithful member, and by your departure we lose one of our best workers in connection with the church. As a Sunday School Teacher, as Sacristan, and as Treasurer of the Altar Society, you have always performed these duties with such exactness and fidelity as to give the fullest satisfaction. For these and many other services we wish to offer you our most sincere thanks. We know that you leave Morrisburg with regret, and we wish to assure you that you will be accompanied to your new home by the prayers and good wishes of many sincere friends.

"In order that we may the oftener find a place in your kind thoughts we have selected as a slight token of our regard, this club bag and we ask you to accept this little gift as the simple offering of true and genuine friendship. It is insignificant in itself, and altogether incommensurate with your events; its chief worth is the esteem that prompts it and the love that accompanies it.

Signed in behalf of St. Marys Altar Society,
"Mary Ryan,
"President."

Though taken by surprise, the recipient replied in very appropriate terms thanking all present. The gift she would cherish as a token of her long and happy association with the members of St. Marys Altar Society. As an amateur actress, Miss LaBelle has proven herself superior to many professionals, winning the admiration of large audiences on the following occasions in which she took the leading role: "The Clock Maker's Hat"; "Kathleen Mavourneen" and "A Box of Monkeys". Mrs. LaBelle and daughter, who were ever willing to lend their assistance to social and charitable events had endeared themselves to all and enjoyed the respect of a host of friends among all classes of the community, including The Leader, who extend their best wishes for their future welfare in their new home.

Wanted

A quantity of rough Elm lumber for crating. Apply, Morash Foundry Co., Morrisburg.

Young Robber Liberated

A young man named O'Neil who took lodging at the Windsor Hotel on Monday night saw fit to increase his financial conditions by removing a \$5 bill and a ring valued at \$8 from one of the locked drawers of the bureau in the bedroom, which he occupied. Shortly after his departure early Tuesday morning, Mrs. Ouderkerk had occasion to visit the bureau and found that the money and ring were missing. She immediately notified her husband, Mr. H. M. Ouderkerk, who lost no time in notifying the authorities of the surrounding villages to be on the look-out. O'Neil was located in Bainsville Tuesday afternoon and was taken back to Morrisburg on the G.T.R. midnight express in charge of Constable Uren.

When arraigned before Justice Eager O'Neil stated that he had immigrated to this country from Ireland when but a young boy and had since been employed at the Hotel Dieu in Kingston. Upon making inquiries local authorities learned from those in charge at the Kingston hospital that O'Neil's statements were true and that his conduct had been exemplary. Justice Eager, taking this splendid record into consideration, liberated O'Neil after securing the stolen goods and costs.

School Fairs in Dundas and West Stormont, 1917

School Fair time is again drawing near. Perhaps in no district in Ontario are the School Fairs being supported and backed up by the people to the same extent as in the district mentioned above. The Township Councils, School Sections, and individual subscribers have made generous donations. This has made it possible to offer suitable prizes to the children as a reward for their work. The movement has a wider field of usefulness than is often credited to it, and deserves the support of all interested in the progress and educational development of the children in the Rural Schools of the County. The dates set for the School Fairs in the County are as follows:

Williamsburg Tp., Sept. 17.
Matilda Tp., Sept. 21st.
Winchester Tp., Sept. 25.
Mountain Tp., Sept. 27.
Finch Tp., Oct. 3.

Mrs. Charles W. Coir

After an illness of short duration, Mrs. C. W. Coir died on Monday, Aug. 20th, at her late home, aged 29 years.

The deceased lady, whose maiden name was Miss Nellie Tracey was born in Newboro, Ont., but had been a resident of Winnipeg practically all her life prior to coming to Morrisburg about two years ago. In the year 1911 she was united in marriage to Mr. C. W. Coir, eldest son of Mr. and Mrs. W. C. Coir and to them were born four children, three of whom survive. Besides her husband and three little children, she leaves to mourn her mother, Mrs. Tracey of Winnipeg, and two sisters, Mrs. J. D. Budd, Winnipeg, and Mrs. Thos. Johnston, Meringo, Sask.

The funeral took place on Thursday afternoon at 2 p.m. from her late residence, Gravel Road, to the Presbyterian Church, Rev. Hugh Cameron officiating. Interment in Mount Pleasant Cemetery.

A GREAT BARGAIN

The war map issued by The Family Herald and Weekly Star of Montreal is now ready for distribution. It is certainly a great map and a great help in following war news. It is greatly praised by returning officers and men. The price of The Family Herald is now \$1.25 a year, a smaller increase than was expected, and with the map given with each subscription it is cheaper than ever. The map alone would cost as much. The paper and map are given to both new and renewal subscriptions at \$1.25 a year, but the map cannot be secured otherwise. The Family Herald is the greatest family and farm paper on the Continent and a great credit to Canada.

Reasons Why You Should Buy A McLaughlin Car

1. Because—a McLaughlin Car is the most economical car on the road
2. Because—The McLaughlin springs, besides being exceptionally easy riding, make this car very easy on tires.
3. Because—The repair cost of McLaughlin Cars is less than any other car, for the reason that quality parts are used throughout. Better materials used in construction makes very few parts to buy
4. Because—The McLaughlin bodies are constructed strongly so that with rough usage over Canadian roads, they will stay tight, will not spread readily
5. Because—The upholstery is genuine leather which will get better with use.
6. Because—McLaughlin Service is unequalled on account of our now having the best experts obtainable to take care of any trouble which might occur.
7. Because—The McLaughlin is the coming car. It is being sold on a quality basis, and is leading in the better line of cars.
8. Because—McLaughlin sales and service will increase on account of this quality product, and two or three years later you will be in a better position than if you bought a car for to-day only.
9. Because—McLaughlin Cars sell at less than any other quality car.
10. Because—You believe in buying quality products in other things you will eventually believe that it pays to buy a Quality Motor Car.
11. Because—A McLaughlin will stay good in appearance and service in years to come.

Between Cousins; OR, A DECLARATION OF WAR.

CHAPTER V.—(Cont'd.)

There was a little doubt in John's tone—a doubt of which Fenella was so keenly conscious that, having given a hasty assurance, she lapsed into another spell of silence. No wonder, surely, if her father felt sceptical regarding her qualifications as an angel of consolation, seeing that she had never fairly tried her hand at the work. The part of John's children in his labors had always been as good as nil. A given number of flannel petticoats were sewed every winter, and a given quantity of soup dispensed from the Rectory Kitchen. Practically they acted as a ransom from any more intimate co-operation, and a cheap ransom too, considering the embarrassments thus escaped. That soup and flannel petticoats, though excellent things in themselves, did not necessarily represent the highest forms of charity had scarcely occurred to Fenella hitherto, though she could not help dimly understanding that in her father's eyes other forms stood higher.

That father, with his world-absorbed gaze, his undying interest in what most people seemed to consider the dull side of life, had always been to Fenella a half sacred and wholly enigmatical figure. The attraction of the enigma put a note of tenderness into the awe-struck veneration with which she regarded him. It was both mortifying and astonishing, for instance, that he should stand so completely aloof from the cult of the family beauty. He alone seemed to feel no interest in her future career. Yet, something told her that it was no want of tenderness which lay at the bottom of this strange indifference. Lately—perhaps since Ella's shadow no longer fell between them—she had begun to feel that she wanted to find out what it was that did lie at the bottom of it; and yesterday's incident had brought the desire to a head. The paths of his solitary mission had pursued her even into the ball-room. To-day's resolve was the fruit. As she walked by her father's side up the glen that was musical with the voices both of birds and of the many burns hurrying to throw themselves into the embrace of the river in the hollow, Fenella's state of mind was a mixture of self-approval and of trepidation—of self-approval because she was doing a thing which struck herself as verging on the heroic, of trepidation because, in spite of her brave words, she was a little afraid of the painful sights awaiting her, and still more afraid of the moral discomfort inseparable from any contact with these humbly-situated blood-relations. For Fenella, despite her unspoiled heart, was as deeply imbued with the importance of her own social positions as Ella herself could have wished her to be. She was quite disposed to be sympathetic, and as helpful as need be, but even the desire of pleasing her father could not dispose her to be more than condescending.

The sight of Adam's croft, perched high upon the river-bank, and in the mighty shadow of the opposite hillside, helped to quicken her misgivings. Yes; decidedly it was a little humiliating to own cousins who lodged as humbly, even though as picturesquely as this. Adam, with his thirty-five years' earnings, might well have afforded himself a slate roof, had he chosen, but out of sheer constitutional conservatism, he held on grimly to the straw thatch, and even to the dangling stones whose mission in life was to counteract the rush of winter blasts tearing down the glen from the wilderness beyond, for ever on the point of lifting the roof from the walls as readily as any hat from a human head. A chimney indeed was visible, but one of that time-honored sort which is produced by inserting a small herring-barrel, with the bottom knocked out, in the thick of the thatch. What had been good enough for his forefathers was good enough for him, Adam argued. The thatch itself was in excellent repair, and the garden patch beside the cottage carefully dug; but this and various other signs of thriftiness and method could not, in Fenella's eyes, redeem the lowliness of the abode.

"You had better wait a bit, until I inquire," said John, a little nervously, standing still before the closed door.

She watched him as he bent his head under the low-hanging door-beam, and while she waited the trepidation sharpened to anxiety. Might not Adam be dead already, and she be called upon to look upon a corpse?—Long afterwards she remembered the look of the bare hillside opposite, with the sheep wandering about among the boulders in search of the first green tufts, and the sound of the invisible river at the foot of the steep bank. All these things seemed to partake of that sense of expectation, of the fear of the sight of death which had come over her.

Then her father looked out and said, his voice mingling with that of the water:

"The night has been good, thank God! You can come in, Fenella, if you want to, but you must not stay long; he is very weak."

With somewhat accelerated heart-beats, Fenella, in turn, bent her head and followed her father through the tiny entrance and through a door to the left. The space within was so darkened that at first she could distinguish nothing but the flames upon the flagged floor, and the girdle suspended above which to judge from the smell of hot oatmeal which met her, was doubtless laden with oat-cakes.

"This way," whispered her father, taking her by the hand and leading her towards what seemed to be a sort of square cave in the wall, draped with narrow curtains.

She had stood beside it for several moments before she was able to distinguish what seemed to be a human form in the deep cupboard-bed, with a package of bandages on the pillow, which presumably was the head, and two smaller bandaged packets lying

outside the blanket—probably the hands.

"Adam," said John, bending over him; "I have come back, as I promised. You hear me, do you not?"

"Aye, I hear you," came the faint whisper from the bed, while one of the bandaged hands made a tentative movement, as though groping for something. "You're aye as good as your word."

"I'm better than my word, Adam—I haven't come alone. Fenella is with me, my youngest girl, you know. She wants to know if she can be of any help to you."

"There was more lively movement in the bed, and then, after a speechless pause, the words came almost precipitately:

"Your girl, John? Has she come in here? Is she near me now?"

"You shouldn't have brought her in without telling him," said a voice behind Fenella, speaking in a whisper that sounded angry. "The doctor said he wasn't to be excited, and this visit is no such ordinary thing."

Fenella, though she did not turn her head, supposed it was Duncan who was speaking, and wondered why he should be bitter as well as angry. "Yes, she is near you, Adam; here is her hand." And John gently pulled Fenella's half-reluctant fingers towards one of the bandaged packages.

"It is good of you—very good of you, Miss Fenella, to visit a stricken wretch—and stricken through his own fault too."

"That's a lie!" said that same deep and emphatic whisper behind Fenella.

"It's because John—because your father has a kind of affection for me that you've come, I'm thinking?"

It was evident that, even in its present weakened state, Adam's brain

DOMESTIC SCIENCE AT HOME

Sixth Lesson.—Starches and Sugars.

Starches and sugars have many properties in common, and for this reason are grouped together under the name carbohydrates. The preceding lessons have told that carbohydrates furnish heat for the body and energy to do work.

Starch is found principally in cereals, grains and vegetables. It is soluble in cold water and coagulates or thickens when dissolved in cold water and heat is applied. Applying heat causes the cell-like structure to expand and burst, thereby thickening the liquid. Dry starch when heated turns a light brown in color. This is called dextrin, and is soluble in cold water. It is the basis of British gum and is often used in making library paste. When starch is heated beyond the dextrin stage it is transformed into carbon, all the moisture being removed setting the carbon free.

Digestion of Starches.

The process of digestion with starches starts in the mouth. It is most important that all food containing starch be thoroughly masticated. Failure to chew food thoroughly will prevent the saliva from acting upon the starch and prevent the continuation of this important process in the stomach. When starch foods are thoroughly masticated the action of the saliva continues upon the food in the stomach for at least half an hour, until checked by the acidity of the gastric juices. It is for this reason many persons are unable to eat starchy foods with other food containing fruit or vegetable acids.

The stomach ferments do not act upon starch as it passes into the small intestine. The pancreatic juice and intestinal ferments complete the final changes which occur and are absolutely necessary to convert the starches into soluble sugars.

It is necessary to combine starchy foods with protein foods, as all excess starch is stored in the body in the form of fat.

Cooking Starches.

Starchy foods must be thoroughly cooked, owing to the fact that few, if

Win-the-War Recipes.

Every time cornmeal is used where wheat products were once used, we help to win the war. Have cornmeal mush for breakfast, with figs, dates or fruit for variety; use cornmeal in quiet breads, yeast breads, desserts. Omit all wheat breakfast cereals. Use rolled oats for muffins, rolls and yeast-raised bread.

Cornmeal Muffins.—One cupful sour milk, one and one-third cupfuls flour, two-thirds cupful cornmeal, one to two tablespoonfuls fat, one to two tablespoonfuls sugar, one egg, one-half teaspoonful soda, two teaspoonfuls baking powder, one-half teaspoonful salt. Mix milk, egg and melted fat and add dry ingredients well mixed.

Indian Pudding.—Three-fourths cupful cornmeal, one quart milk, one and one-half cupfuls sugar, three tablespoonfuls sugar, or one-third cupful molasses. Heat the milk. Sift in the cornmeal as in making mush. Add salt and sugar. Turn into buttered

required an explanation of the phenomenon.

"Yes; I—I was so dreadfully sorry to hear of the accident," stammered (To be continued.)

IF FOOD DISAGREES DRINK HOT WATER

When food lies like lead in the stomach and you have that uncomfortable, distended feeling, it is because of insufficient blood supply to the stomach, combined with acid and food fermentation. In such cases try the plan now followed in many hospitals and advised by many eminent physicians of taking a teaspoonful of pure bisaturated magnesia in half a glass of water, as hot as you can comfortably drink it. The hot water draws the blood to the stomach and the bisaturated magnesia, as any physician can tell you, instantly neutralizes the acid and stops the food fermentation. Try this simple plan and you will be astonished at the immediate feeling of relief and comfort that always follows the restoration of the normal process of digestion. People who find it inconvenient at times to secure hot water and travelers who are frequently obliged to take hasty meals poorly prepared, should always take two or three five-grain tablets of Bisaturated Magnesia after meals to prevent fermentation and neutralize the acid in their stomach.

The Dairy Farmer's Ten Commandments.

Mr. Charles Christodoro has issued what he calls "Ten Commandments for the Dairy Farmer" as follows:

- Keep healthy cows.
- Select good producers.
- Use only pure bred bulls.
- Feed liberally an approved ration.
- Produce the feed.
- Keep barn clean and aired.
- Keep the cows comfortable.
- Be considerate to the cows.
- Provide shade and wind protection.
- Feed and milk regularly.

Clean farming, the securing of vigorous growth in young plants and good cultivation are the best protective measures against insect attack.

TO GARNER CROP WEST NEEDS MEN

THE "IMPERIOUS URGENCY" OF
CONSERVING GRAIN YIELD.

Survey Conducted by Canadian Northern Indicates Need of 25,000 Men Along Its Lines.

The successful harvesting of the crop in Western Canada this season is what Ex-Premier Asquith of Great Britain would term "a matter of imperative urgency."

Since men began to sow grain west of the Great Lakes, there has never been so much depending upon the yield of grain in Manitoba, Saskatchewan and Alberta as there is this year.

The Canadian Northern Railway, with lines gridironing the productive sections in the west, has already concluded a survey as to labour needs, and the prospects of the wages to be paid, and has announced that 25,000 men will be required to help the farmers garner the crops in the territory it serves. The indications are that the average wages will be around three dollars a day. A further conference between the representatives of the Government, the railways and the farmers is to be held, when further details will be brought out.

The farming situation in Ontario may not permit of sending as much help as in former seasons, but nothing should be left undone on the farms and in the towns to give the western farmers the assistance of which they stand to-day in urgent need.

Morning in the Plowed Fields.

Morning in the plowed fields, while the dew is wet;
Singing till the sun comes, how can life forget!
Beauty of the fresh earth, sweetened as it lies.
Breathing out the fragrance fallen from the skies!
Mocking birds and redwings,
The killdeer and the dove—
Morning in the plowed fields
Planting dreams of love!

Second crop of hay cut, curing hour by hour;
Half a mile of daisies all in snowy flower;
Dew in every gold cup fresh as fairy lips—
Ah, the wine of this world when the morning sips!
Catbirds after cherries,
Rookery full of crows—
What men want to fight for
Heaven only knows!

Raspberries down the green lane
Scenting all the way,
Grasshops in the cornfields, crickets in the hay;
Wind among the treetops just awake, and, oh,
The sweetness of the plowed fields when the breezes blow!
Summer in a dreamland,
The farm bell far away—
Hot cornbread for breakfast,
And then get in that hay!

DOMINION FROM SEA TO SEA.

The Idea of Our Country's Name Came From the 72nd Psalm.

The British North America Act which made Canada a Dominion came into force on July 1, 1867, and that original essay in Dominion self-government has richly justified the faith and foresight of those who undertook it, says the Glasgow Herald.

The Convention sat in a room in the Westminster Palace Hotel, in London, which is now the smoking-room of the National Liberal Club. A tablet fixed in the wall records the fact that in this chamber the delegates conferred. Those who took part in the proceedings are all dead. Sir Charles Tupper was the last survivor, and he died at a ripe old age a very few years ago. The word "Dominion" was suggested by the Bible.

Sir Leonard Tilley had been reading in the 72nd Psalm "He shall have dominion from sea to sea," and thought the passage applicable to Canada.

An English farmer was recently fined seventy-five pounds for refusing to deliver his wool to a dealer named by the British war authorities.

baking dish, put dish in pan of water, and bake very slowly two and one-half to three hours. Serve with hard sauce, cream or crushed fruit.

Oatmeal Muffins.—One-half cupful cooked oatmeal or rolled oats, one egg, two tablespoonfuls fat, one and one-half cupfuls flour, two tablespoonfuls sugar, one-half teaspoonful salt, four teaspoonfuls baking powder. Cook oatmeal, using one part oatmeal to two parts water. A large proportion of water makes too soft a mush and gummy muffins. Mix milk, oatmeal, egg and melted fat. Add dry ingredients after sifting them together. Bake twenty-five to thirty minutes. This makes ten to twelve muffins.

Rye Muffins.—Two and one-half heaping tablespoonfuls each of rye and Indian meal, one tablespoonful sugar and melted butter, one tablespoonful salt, one egg, beaten; one-half teaspoonful of soda, one teaspoonful cream tartar dissolved in enough milk or water to make a drop batter. Beat well, drop by the spoon in hot fat, or bake in muffin tins.

SHELLS LIKE THUNDERCLAP

British Shrapnel Explodes More Quietly than Does German.

Writing from British field headquarters, Edward P. Bell, says:—

Listening to the explosion—continuous as I write—of British and German shrapnel shells, one notes a striking difference in the sounds produced. The British shells make a comparatively soft report, while the German projectiles make a piercing, shattering sound like that of a terrible thunderclap. Moreover, the subsequent sounds are different, those from the German shells being more sibilant in quality and greater in volume than those from the British shells.

Which shell is the more destructive I cannot say. The German has a sharper, louder report, due to the fact that it is charged not only with shrapnel bullets, but with high explosive materials. This material bursts the steel shell case so that the whistling noises following are caused by a mixture of bullets and fragments of steel.

The British shell case, on the other hand, does not burst. It remains intact and pours its bullets from the shell mouth as a shotgun pours its shot; thus perhaps the bullets are

brought to bear more effectively in a definite direction. Certainly the British must have some good reason for using the type employed.

Brother Fritz's penchant for "frightfulness" shows itself in all he does. There is probably no doubt, as regards his high explosive shrapnel shell, that he reasons that, whether it is really more destructive than the other or not, it is calculated to produce greater fright—a thing which commanders always must fight against among their troops. Happily for the British army, Tommy Atkins is about the hardest man to scare that ever wore a uniform.

Not To Be Cheated.

Little John had been extra specially good that afternoon, and father felt amiably inclined.

"Papa," piped John, "can I have a banana?"

"Yes, certainly, soonny."

"Papa, if I was twins would you give the other boy a banana too?"

"Yes, of course."

"Well, papa, you aren't going to cheat me out of another banana just because I'm all in one piece, are you?"

Success with poultry means work, and the work must be given when needed.

Redpath SUGAR

If better sugar is ever produced than the present REDPATH Extra Granulated, you may be sure it will be made in the same Refinery that has led for over half a century—and sold under the same name—REDPATH.

"Let Redpath Sweeten it."

2 and 5 lb. Cartons—
10, 20, 50 and 100 lb. Bags.

Canada Sugar Refining Co., Limited, Montreal.

BRITISH AND FRENCH MAKE FURTHER GAINS ON BELGIAN FRONT

All Objectives Captured in Ypres Region and Advance Made Near Langemarck—Les Lilas Redoubt Taken.

London, Aug. 19.—The official report from British headquarters in France Sunday night reads:

"By a successful minor operation early Sunday morning in the neighborhood of the Ypres-Poelcapelle road our line advanced to a depth of about 500 yards on a mile front, and all our objectives, including a series of strongly fortified farms, were captured at very slight loss to us. The enemy's losses were considerable. We took several prisoners. The German prisoners captured by the allies during the fighting Thursday north-east of Ypres are now ascertained to number 2,114, including officers."

The French Friday night added to the gains the allied armies have achieved last week on the Belgian front, making further progress on the road between Bixschote and Langemarck. A strong point of support east of the Steenbeke River was captured.

The French have completed their conquest of the enemy territory south of the St. Jansbeek River and the Breenbeek River, which branches off from the St. Jansbeek to the east. Two strong German redoubts, Les Lilas and Mondovi Farm, which had held out against all attacks since the beginning of the allied offensive on Thursday, have capitulated, and the French have pushed their front forward to a natural line formed by these waterways.

Les Lilas redoubt lies about a third of a mile west of the junction of the St. Jansbeek and the Breenbeek. It was a large fortification of concrete and steel, armed heavily with machine-guns. Although the garrison was small, their position was well-nigh impregnable so far as infantry attacks were concerned, and it was only when heavy artillery was brought up and concentrated on them late Friday that the Germans surrendered.

TO LOOK AFTER CANADA'S INTERESTS

Inauguration of Association in London to Promote This Country's Welfare.

A despatch from London says: Arrangements have been almost completed for the inauguration of the Canadian Association here. The executive of the new organization will be composed of the High Commissioner, Sir George Perley, the Agents-General of the several provinces, and bankers, with a few other Dominion leaders. The main object of the new association will be to watch and promote Canadian commercial and financial legislation and the social interests which have the welfare of the Empire at heart.

A careful lookout will also be kept for whoever may at any time seek to exploit Canada at the expense of the good reputation of the Dominion.

Apart from war organizations, the only body which in any way approximates to the new one is the Canada Club which formerly met for social purposes, but whose gatherings have been suspended during the continuation of the war.

SUCCESS ON RUMANIAN FRONT

Teutons Beaten in Slanic and Lake Naroc Districts.

London, Aug. 19.—There has been a considerable stiffening in the front in Rumania and also in Russia in the region of Vilna. South of Grozechti, Southern Moldavia, the Russians have made a stand against attacks of the Teutonic allies and repulsed them; and in the Slanic sector also have beaten off attempts by the invaders to take further ground. In the Lake Naroc district of the Vilna front the Germans endeavored to win Russian trenches, but their attack broke down under the Russian barrage fire.

FARMERS PROSPEROUS IN THE NORTH COUNTRY

A despatch from Cobalt says: The bush fires which for the past number of years have been more or less of a menace to the development of the North country have been conspicuous by their absence during the present Summer. Up to the present time not one fire of any importance has been reported, due no doubt to the large amount of rain, which has kept the bush green and the underbrush more abundant than is usual. In practically every instance where farmers were burned out last Summer in the big fire, rebuilding has taken place and their crops are better than ever. In a good many cases the clearing of the land was made easy by the fire, with the result that a large acreage is under crop than would otherwise have been the case.

CANADIAN TROOPS HAVE ENTERED LENS AFTER CAPTURING HILL 70

Pushed Into Western Part of Coal City—Total Prisoners Captured Almost 900. Ten Counter-Attacks Repulsed.

A despatch from the British Front in France and Belgium says: After a brilliant advance in which the Canadians captured Hill 70 and then swept on north-west of Lens, the attackers are in close grips with the Germans in the western part of Lens.

A despatch from Canadian Headquarters in France says: The taking of Hill 70 stirred the German high command as nothing else has done on this front this year. Prince Rupprecht has made frantic efforts to recapture the lost positions and a grim battle was waged throughout the day, particularly on and around Hill 70.

Ten times the enemy came on, but they seldom got close enough for fighting with the bayonet or bomb. Hour after hour these attacking troops—including the Fourth Prussian Guards, one of the elite divisions of the German army—were subjected to a faithful concentrated fire from our artillery and machine guns. Their losses were frightful.

A despatch from London says: The British made further progress east of Loos, in the Lens area Friday morning, Sir Douglas Haig announces in his official report, and the total of prisoners captured there has now reached 896.

LEADING MARKETS

Breadstuffs
Toronto, Aug. 21.—Manitoba wheat—No. 1 Northern, \$2.40; No. 2 Northern, \$2.40; No. 3 Northern, \$2.38; No. 4 white, \$2.32, nominal, store Port William.

Manitoba oats—No. 2 C. W., 76c, track Bay ports.
American corn—No. 3 yellow, nominal, track Toronto.

Ontario wheat—No. 2 Winter, per car lot, \$2.55 to \$2.60; No. 3, \$2.53 to \$2.58; according to freights outside; new crop, No. 2, \$2.30, nominal.

Peas—No. 2, nominal, according to freights outside.
Rye—No. 2, nominal, according to freights outside.

Manitoba flour—First patents, in jute bags, \$12.90; second patents, in jute bags, \$12.40; strong bakers', in jute bags, \$12.00.
Ontario flour—Winter, according to sample, \$11.20, in bags, track Toronto, prompt shipment.

Millfeed—Crude lots, delivered Montreal freights, bags included—Bran, per ton, \$36; shorts, per ton, \$45; middlings, per ton, \$47 to \$48; good feed flour, per ton, \$47 to \$48.

Hay—Extra No. 2, per ton, \$11.50 to \$12.00; mixed, per ton, \$9 to \$10, track Toronto.
Straw—Car lots, per ton, \$7 to \$7.50, track Toronto.

Country Produce—Wholesale
Butter—Creamery, solids, per lb., 37 to 38c; prints, per lb., 37 to 38c; dairy, per lb., 30 to 31c.

Eggs—Per doz., 38 to 39c.
Wholesalers are selling to the retail trade at the following prices:
Cheese—New, large, 22 to 23c; twins, 22 to 23c; triplets, 23 to 24c; old, large, 30c; twins, 30c; triplets, 30c.

Butter—Fresh dairy, choice, 35 to 37c; creamery prints, 40 to 41c; solids, 35 to 39c.
Eggs—New-laid, in cartons, 49 to 50c; out of cartons, 44 to 45c.

Dressed poultry—Spring chickens, 25 to 30c; fowl, 20c; squabs, per doz., \$4.00 to \$4.50; turkeys, 25 to 30c; ducks, Spring, 20c.

Live poultry—Spring chickens, lb., 20 to 22c; hens, 16 to 18c; ducks, Spring, 17c.
Honey—Comb—Extra fine and heavy weight, per doz., \$2.75; select, \$2.50 to \$2.75; No. 2, \$2 to \$2.25.

Beans—Prime white, \$5.50 per bush; imported, hand-picked, \$9.25 per bush; Lima, per lb., 16 to 17c.

Potatoes, on car lots, Red Star, bbl., \$5.50; North Carolinas, bbl., \$5.50; seconds, bbl., \$3.50 to \$3.75; Ontario, bag, \$2.50 to \$2.65.

Provisions—Wholesale
Smoked meats—Hams, medium, 30 to 31c; do, heavy, 26 to 27c; cooked, 41 to 42c; rolls, 27 to 28c; breakfast bacon, 33 to 36c; backs, plain, 36 to 37c; boneless, 36 to 37c.

Cured meats—Long clear bacon, 26 to 26c; per lb.; clear bellies, 25 to 26c.
Lard—Pure, tierced, tierced, 25 to 26c; tubs, 25 to 26c; pails, 25 to 26c; compound, tierced, 20c; tubs, 20c; pails, 21c.

Montreal Markets
Montreal, Aug. 21.—Oats—Canadian Western, No. 2, 80c; do, No. 3, 78c; extra No. 1 feed, 78c; Barley—Manitoba Spring, white, No. 2, \$2.40; No. 3, \$2.38; No. 4, \$2.32; No. 5, \$2.28; No. 6, \$2.24; No. 7, \$2.20; No. 8, \$2.16; No. 9, \$2.12; No. 10, \$2.08; No. 11, \$2.04; No. 12, \$2.00; No. 13, \$1.96; No. 14, \$1.92; No. 15, \$1.88; No. 16, \$1.84; No. 17, \$1.80; No. 18, \$1.76; No. 19, \$1.72; No. 20, \$1.68; No. 21, \$1.64; No. 22, \$1.60; No. 23, \$1.56; No. 24, \$1.52; No. 25, \$1.48; No. 26, \$1.44; No. 27, \$1.40; No. 28, \$1.36; No. 29, \$1.32; No. 30, \$1.28; No. 31, \$1.24; No. 32, \$1.20; No. 33, \$1.16; No. 34, \$1.12; No. 35, \$1.08; No. 36, \$1.04; No. 37, \$1.00; No. 38, \$0.96; No. 39, \$0.92; No. 40, \$0.88; No. 41, \$0.84; No. 42, \$0.80; No. 43, \$0.76; No. 44, \$0.72; No. 45, \$0.68; No. 46, \$0.64; No. 47, \$0.60; No. 48, \$0.56; No. 49, \$0.52; No. 50, \$0.48; No. 51, \$0.44; No. 52, \$0.40; No. 53, \$0.36; No. 54, \$0.32; No. 55, \$0.28; No. 56, \$0.24; No. 57, \$0.20; No. 58, \$0.16; No. 59, \$0.12; No. 60, \$0.08; No. 61, \$0.04; No. 62, \$0.00.

Winnipeg Grain
Winnipeg, Aug. 21.—Cash quotations—Wheat—No. 1 Northern, \$2.40; No. 2 Northern, \$2.40; No. 3 Northern, \$2.38; No. 4, \$2.32; No. 5, \$2.28; No. 6, \$2.24; No. 7, \$2.20; No. 8, \$2.16; No. 9, \$2.12; No. 10, \$2.08; No. 11, \$2.04; No. 12, \$2.00; No. 13, \$1.96; No. 14, \$1.92; No. 15, \$1.88; No. 16, \$1.84; No. 17, \$1.80; No. 18, \$1.76; No. 19, \$1.72; No. 20, \$1.68; No. 21, \$1.64; No. 22, \$1.60; No. 23, \$1.56; No. 24, \$1.52; No. 25, \$1.48; No. 26, \$1.44; No. 27, \$1.40; No. 28, \$1.36; No. 29, \$1.32; No. 30, \$1.28; No. 31, \$1.24; No. 32, \$1.20; No. 33, \$1.16; No. 34, \$1.12; No. 35, \$1.08; No. 36, \$1.04; No. 37, \$1.00; No. 38, \$0.96; No. 39, \$0.92; No. 40, \$0.88; No. 41, \$0.84; No. 42, \$0.80; No. 43, \$0.76; No. 44, \$0.72; No. 45, \$0.68; No. 46, \$0.64; No. 47, \$0.60; No. 48, \$0.56; No. 49, \$0.52; No. 50, \$0.48; No. 51, \$0.44; No. 52, \$0.40; No. 53, \$0.36; No. 54, \$0.32; No. 55, \$0.28; No. 56, \$0.24; No. 57, \$0.20; No. 58, \$0.16; No. 59, \$0.12; No. 60, \$0.08; No. 61, \$0.04; No. 62, \$0.00.

United States Markets
Minneapolis, Aug. 21.—Wheat—September, \$2.40; No. 2, \$2.35; No. 3, \$2.30; No. 4, \$2.25; No. 5, \$2.20; No. 6, \$2.15; No. 7, \$2.10; No. 8, \$2.05; No. 9, \$2.00; No. 10, \$1.95; No. 11, \$1.90; No. 12, \$1.85; No. 13, \$1.80; No. 14, \$1.75; No. 15, \$1.70; No. 16, \$1.65; No. 17, \$1.60; No. 18, \$1.55; No. 19, \$1.50; No. 20, \$1.45; No. 21, \$1.40; No. 22, \$1.35; No. 23, \$1.30; No. 24, \$1.25; No. 25, \$1.20; No. 26, \$1.15; No. 27, \$1.10; No. 28, \$1.05; No. 29, \$1.00; No. 30, \$0.95; No. 31, \$0.90; No. 32, \$0.85; No. 33, \$0.80; No. 34, \$0.75; No. 35, \$0.70; No. 36, \$0.65; No. 37, \$0.60; No. 38, \$0.55; No. 39, \$0.50; No. 40, \$0.45; No. 41, \$0.40; No. 42, \$0.35; No. 43, \$0.30; No. 44, \$0.25; No. 45, \$0.20; No. 46, \$0.15; No. 47, \$0.10; No. 48, \$0.05; No. 49, \$0.00.

Live Stock Markets
Toronto, Aug. 21.—Extra choice heavy steers, \$12 to \$12.55; choice heavy steers, \$10.50 to \$11; butchers' cattle, \$10 to \$10.40; do, good, \$9.50 to \$9.75; do, medium, \$8.50 to \$8.85; do, common, \$7.50 to \$7.85; butchers' bulls, \$8.50 to \$9; do, good bulls, \$7.50 to \$8; do, medium bulls, \$7 to \$7.25; do, rough, \$6 to \$6.50; butchers' cows, choice, \$8.25 to \$8.65; do, good, \$7.50 to \$7.90; do, medium, \$6.50 to \$6.85; stockers, \$6.40 to \$6.25; feeders, \$7.75 to \$8; canners and cutters, \$6.25 to \$6.25; milkers, good to choice, \$8 to \$10; do, com. and med., \$4 to \$5; springers, \$8 to \$10; do, good, \$7.50 to \$7.75; sheep, heavy, \$6 to \$7.25; yearlings, \$10 to \$11.50; calves, good to choice, \$12.50 to \$15.50.

MET TO CONSIDER CRIMES OF GERMANY.
A despatch from London says: "To consider the crimes committed by Germany and seamen of German U-boats," was the official description of the purpose of the gathering here on Friday of representatives of seamen's organizations of several allied and neutral countries. France, Italy, the United States, Canada, Australia, Holland, Belgium and the Scandinavian countries were represented by masters, mates, engineers, sailors, cooks and stewards.

PROHIBIT EXPORT OF FLOUR TO U. S.
A despatch from Ottawa says: An Order-in-Council has been passed at the instance of the Food Controller for Canada prohibiting the export of Canadian flour to the United States for the period for which the export of Canadian wheat to the United States has been prohibited, subject to the proviso that the Food Controller for Canada may issue licenses permitting the export of flour in proper cases for such export as he deems necessary and expedient.

TRADE IN JULY SHOWS INCREASE

Almost One Hundred Million Dollars Greater Than Last Year.

A despatch from Ottawa says: Canada's trade, exclusive of imports and exports of coin and bullion and of foreign merchandise shipped through Canada, increased, according to a statement by Hon. J. D. Reid, Minister of Customs, by almost one hundred million dollars in July last, as compared with July, 1916, and by nearly \$290,000,000 in the four months ended July 31st, in comparison with the like period last year. The value of merchandise entered for consumption in July, 1917, was \$90,181,595, and in July, 1916, was \$63,622,687. Goods entered for consumption in the four months of the present fiscal year amounted to \$382,100,850, as against \$249,867,867 in the like period of 1916. Exports of domestic goods reached \$177,366,148 in July last and \$507,854,674 in the four months' period. They were \$104,964,270 in July, 1916, and \$350,345,305 in the first four months of the last fiscal year.

Exports of foreign merchandise have shown a decided falling off. They were in July only \$2,850,372 and in the four months \$11,604,620 while in the same periods of 1916, they reached \$55,637,340 and \$122,627,072 respectively.

ANGLO-FRENCH WIN IN FLANDERS

Langemarck Captured and More Than 1,800 Prisoners—The French Gain Bridgehead.

A despatch from London says: Again the great Anglo-French war machine has struck the Germans in Flanders, and again it has been successful. The village of Langemarck and other important positions were captured.

More than 1,800 prisoners, including 38 officers, already have been counted by the Anglo-French forces. Some German guns also were taken.

The latest blow in the Ypres area was on a front of nine miles, and only on the extreme right were the allied forces unable to make progress. The Germans resisted stubbornly, suffering heavy losses, but on the greater part of the front they were forced to leave valuable positions in the possession of the allies.

Before the fighting between Lens and Loos had died out the French and British moved forward north of the Ypres-Menin road. Throughout Thursday bitter fighting continued. On the left the French occupied the ground between the Yser canal and Martijvaart and then drove the Germans from the important bridgehead of Dreigraachten.

TONS OF BOMBS DROPPED BEHIND GERMAN LINES.

A despatch from London says: The Admiralty announces the successful carrying out on Thursday of a series of raids by aviators of the Royal Naval Air Service, who dropped tons of bombs on military objectives in Belgium. The Ostend railway station and sidings and the Thourout railway junction were attacked. The aerodrome at Ghisteltes was bombed and several fires were observed. Attacks from the air were made on the aerodromes at Engel and Uytkerke. All the aeroplanes returned safely.

KORNILOFF STILL HAS CONFIDENCE IN ARMY.

A despatch from Petrograd says: Lieutenant-General Korniloff, the commander-in-chief, in an interview on Friday said that in consequence of the energetic measures which had been taken, the moral fighting capacity of the army had been considerably strengthened. He hoped for complete regeneration of the Russian forces.

The general predicted operations on a vast scale on the Rumanian front and also elsewhere, especially in the north, where he indicated there was a possibility of a combined land and sea action. He expressed the opinion that another winter campaign was inevitable.

DEPRECATE RETURN OF GERMAN COLONIES.

A despatch from Melbourne, Australia, says: The Senate has rejected without debate or division a motion that the time had arrived for the Imperial Government to announce a peace basis whereon the allies were prepared to negotiate.

The Senate also passed a motion deprecating the return of the German colonies.

GERMANS HALTED IN RUMANIA.

A despatch from Petrograd says: Austro-German attacks in southwestern Moldavia, especially in the region of Fokshani, have been repulsed by the Russians and Rumanians. In the region of Ocna, the Austro-Germans have made no gain, adds the official report issued on Friday by the War Office.

CANADIANS AND FRENCH MAKE GAINS; BRITISH CONSOLIDATE POSITIONS

Germans Have Ceased Counter-Attacks—2,000 Prisoners Taken and 24 Guns.

A despatch from London says: French troops in the Ypres area have progressed in the neighborhood of the River Steenbeke. On the British portion of this front, according to the official report from British Headquarters in France to-night, there have been no changes, and the Germans have ceased their counter-attack. The French and British troops have captured 24 German guns. The British War Office denied the German claim of the recapture of Langemarck.

The number of prisoners taken by the Canadians in the Loos-Lens sector has now reached a total of 1,120. The

Canadians have organized and made secure the positions captured yesterday, and have made an advance west of Lens.

Substantial progress toward the liberation of Belgium was made on Thursday. Although the gain of territory was not great, it was all to the good. But what is of much more importance is that there are now fewer Germans in Belgium than previously. The Anglo-French have now probably got two thousand prisoners in their collecting cages, whilst we know for a certainty that the enemy's dead and wounded must form an appalling total.

8,811 VETERANS IN HOSPITALS

Military Hospitals Commission Announces Over 7,000 in Convalescent Homes.

A despatch from Ottawa says: With an increase of 320 new patients added to the list of convalescents in the military hospitals in the past week the total number of men at present receiving treatment under the direction of the Military Hospitals Commission in Canada is recorded as 8,811. The number of these who are at present in convalescent homes is 7,032, with 1,104 in sanatoria for the treatment of tuberculosis, and 675 in other institutions, chiefly general hospitals.

It is announced that all returned men are now divided into five classes. Those fit for general service, or likely to be fit in a short time; those fit for service abroad, but not for general service; those fit for service in Canada; the temporarily unfit; and those waiting discharge or reclassification.

Until this time practically none in the first two classes have been returned to Canada. Those designated as temporarily unfit are those requiring medical treatment, while those fit for service in Canada are divided into three classes, those detailed for special service companies, those for special companies in C.A.M.C., and a third class for sedentary work, such as clerical positions.

HARVESTERS, READ THIS!

The best way to the harvest fields of Western Canada is by the Canadian Northern Railway. Special through trains will be operated from Toronto to Winnipeg at 9.00 a.m. on August 21st, and 10.00 p.m. on August 21st, 23rd and 30th. Also from Ottawa 10.30 p.m., August 28th. Through cars connect from Montreal and Joliette. Going dates: August 21st and August 30th, from Canadian Northern stations and agencies, Toronto and north to Sudbury and Milnet, Ont., and east to Chaffey's Locks, Ont., inclusive, including branches; from all stations on Algoma Eastern Railway, August 23rd and August 30th, from Toronto and all Canadian Northern and N., St. C. and T. Railway agencies, west and south of Toronto. August 28th. From all Canadian Northern stations in Quebec except north of St. Raymond and Riviere a Pierre. From all Canadian Northern stations and agencies in Ontario, Hawkesbury to Capreol (Pembroke and North Bay line) and Ottawa to Brockville, Elgin and Westport, inclusive; and from all New York Central R.R. stations in Canada.

The equipment will consist of electric-lighted colonist cars and lunch counter cars, especially designed to cater to the needs of large bodies of men at moderate rates. West of Winnipeg the demand for labor is great along the lines of the Canadian Northern Railway and the wages are correspondingly high. All particulars from nearest C.N.R. agent or General Passenger Dept., Montreal, Que., and Toronto, Ont.

ST. QUENTIN CATHEDRAL SET ON FIRE BY ENEMY.

A despatch from Paris says: The Germans have set fire to St. Quentin Cathedral, which is likely to be totally destroyed.

The cathedral of Church of St. Quentin, reported burning by the Germans, is one of the finest Gothic buildings in that part of France, and was erected between the twelfth and fifteenth centuries. The building has double transepts and the nave is 370 feet long and 130 feet high. It is very finely decorated and contains some handsome bas-reliefs. In the crypt of the church are buried St. Quentin and his fellow martyrs, St. Victorinus and St. Gentianus.

NEGRO BATTALION FOR BRITISH ARMY.

Chicago, Aug. 19.—The British Recruiting Mission in Chicago announced yesterday that it is attempting to raise a battalion of negroes, subjects of Great Britain in Chicago. If the effort is successful the battalion will be trained in Chicago and later attached to the British army.

The mission is also recruiting among friendly aliens. This departure was taken because of many applications from Poles and Bohemians.

GERMAN SHIPS BADLY DAMAGED

British Have Skirmish With Them in North Sea.

London, Aug. 19.—The Admiralty announces that a hostile destroyer and two mine-sweepers were damaged severely by British naval forces on Thursday. The British warships were not damaged.

The announcement follows:

"Some of our light naval forces scouting a German Bight on August 16 sighted an enemy destroyer at 9.45 a.m. Fire was opened and the enemy destroyer was chased. She was seen to be repeatedly hit and to be on fire, but she escaped through the mist over the mine field.

"Enemy mine-sweepers were sighted shortly after the sighting of the destroyer, and a heavy fire was opened on them. At least two of the mine-sweepers were seen to be very severely damaged, but, similarly with the destroyer, our ships were unable to follow them, owing to the proximity of the mine fields.

"During the engagement our vessels were attacked by a submarine, and after the action a second submarine attacked, in both cases without result. Our vessels suffered no damage whatever."

533 LIVES LOST ON NEUTRAL SHIPS

On British Merchantmen 9,748 Have Been Sacrificed.

London, Aug. 19.—The loss of life resulting from the destruction of neutral vessels during the war up to June 30, according to figures which are declared incomplete, gives a total of 533 persons. There are records here of that number, but only the neutral countries themselves are believed to have the figures of the full losses.

It was, recently announced in the House of Commons that 9,748 lives have been lost on British merchantmen during the same period. The fear of German inhumanity to neutral as well as belligerent delegates attending the seamen's conference convened here now to consider the crimes committed by U-boat commanders makes it necessary to keep their names secret, especially as some of the delegates favor a prolonged boycott of all German shipping after the war.

CHINA IS SEIZING ALL GERMAN ASSETS

A despatch from London says: The Chinese Government, a Reuter despatch from Peking says, is arranging for the prompt liquidation of the German Asiatic bank. Five officials of the Foreign Office have been appointed to take over the accounts and cash here and in the Shanghai, Canton, Tien Tsin and Hankow branches.

Chinese troops have seized Austrian concessions in Tien Tsin, according to an Exchange Telegraph despatch, and German and Austrian shipping is being seized at Canton, Amoy, Swatow, Shanghai and Nanking. The vessels include several small warships.

FRENCH AVIATOR BAGS HIS 52nd MACHINE

Paris, Aug. 19.—The renowned aviator, Capt. George Guynemer, brought down two more German machines, making 52 he has accounted for.

Guynemer visited headquarters on Friday to receive a decoration from a distinguished Rumanian general. The medal was pinned on the breast of the intrepid aviator beside numerous orders he won, including a decoration from the King of the Belgians the day before.

Deposed Czar Now in Siberia.

Petrograd, Aug. 19.—It was officially announced to-day for the first time that the new residence of the deposed Russian Emperor, Nicholas, is at Tobolsk, a Western Siberia town which recently achieved a certain dubious publicity in revolutionary Russia as the birthplace of Gregory Rasputin, the mystic monk who wielded a remarkable influence over the ex-Emperor's family up to the time of the priest's assassination in Petrograd last December.

II to Class III.—Walter Cramer, Ruth Dawley, Rudolf Dawley (Hon.) Harry Robinson, James McKenzie (Hon.) Hugh Robinson, Beatrice Courtney, Richard Pruner.

Dora E. Hanson, Teacher.

Evaporated Apple Industry

With the apple-picking season close at hand and the large quantities of apples grown in Canada, a more timely bulletin than one on the Evaporated Apple Industry, written by Mr. C. S. McGillivray, Chief Traveling Inspector of Fruit and Veg-

etable Canneries, and issued by the Department of Agriculture, Ottawa, could hardly be devised. It speaks of the old-time methods when apples were cut into sections and hung up to dry, and then, with many illustrations and drawings describes in full the progress that has been made in the process, the wholesomeness and nutritive value of the evaporated apple, the implements that can be used, and the structures that are advisable for manufacturing on a scale of different dimensions. The bulletin remarks that the industry is only in its infancy in Canada, but is of great value and importance and open to extensive development. It gives the results of many experiments and in short, in plain and explicit language, explains

very fully the operations that are necessary to bring the evaporated apple to the highest standard of commercial excellence and nutritive value. The bulletin can be had free by addressing the Publication Branch Department of Agriculture, Ottawa.

CORNWALL GENERAL HOSPITAL

This institution provides skilled nursing and care at very moderate rates to those able to pay, and without charge to indigent persons from the three United Counties, other than the Municipal Grants.

It is kept up by:
1. Fees from paying patients.
2. Grants from the Government and Municipalities.
3. Donations and Subscriptions from Churches, Corporations, Societies and Individuals, the last being the largest source of revenue.

You are Asked to Assist in this work

The nucleus of an endowment fund has been established by a legacy recently received, and parties remembering the Hospital in their wills may stipulate that bequests made by them shall go to this fund. If you would like a copy of the last Annual Report, drop a card to the Secretary, who will be pleased to send you one.

J. T. KIRKPATRICK, J. C. ALGEMER, President. Sec.-Treas.

An Important Statement

Last September we made the following statement:

"We have been requested by our Shortland and Secretarial graduates to issue a statement relative to the comparison between the enrollments and graduations."

Our records show that up to June, 1912, the number of students who entered the senior Shortland classes, but who failed to graduate, was a very considerable loss to these classes in the College. During the year 1912-13 the proportion of graduates increased, and so from year to year the year just ended shows the best record of the twenty years. History of the school, for the number failing to graduate as compared with the total enrollment has been reduced to a negligible minimum, and in the majority of these cases the student accepted a situation and would not stay to graduate.

To a great extent this is due to the fact that all Willis teachers since 1912 have been keen, enthusiastic and intelligent workers; that the atmosphere is refined and home-like; and each student knows that the Principal and all the Staff are interested in his or her individual progress.

This year is even more gratifying, for without any exception and giving everyone a due, we are able to say that the results obtained are far superior to those of any previous period in the history of Willis College.

When you combine thoroughness of training with a helpful atmosphere, you get results not otherwise obtainable.

If you are interested in a GOOD course of Shortland, Typewriting, Bookkeeping or Civil Service, write to-day for our prospectus.

Children Cry FOR FLETCHER'S CASTORIA

Enter the Bread Making Contests

at Rural School Fairs in Ontario

The Campbell Flour Mills Company's great offer of the big One-Hundred-and-Fifty-Dollar Pathe phonographs (Five of them!) and other valuable prizes, for the best loaves of bread baked with Cream of the West flour, is stirring up tremendous interest all over Ontario. Many girls are already busy at bees practising with Cream of the West flour. Last year many girls declared, "Oh, if I had only practised, I'm sure I could have won!" Don't wait another day. Decide right now! Practise, Practise, Practise with

Cream of the West Flour
the hard wheat flour that is guaranteed for bread

Every time you bake with it you find out new qualities in this flour that makes such splendid big loaves of delicious light bread. Practise!

In five districts, each comprising several counties, we will give away free to the winner of the first district prize a large cabinet phonograph. At each fair there will be given a fine list of local prizes.

Prizes Worth Trying Hard For

1st Local Prize.—"Girls' Own Annual," a great big beautifully bound, illustrated book with 800 pages of stories and articles about people, art, animals, gardens, sewing, crocheting—everything that particularly interests young girls, older girls and their mothers. This is a wonderful prize that you can treasure for years.

2nd Local Prize.—"Stories of Famous Men and Women," heavily cloth bound with gold titles, many beautiful pictures in colors, entrancing life stories of Florence Nightingale, Grace Darling, Flora MacDonald, Jenny Lind, the late Queen Victoria, and others.

3rd Local Prize.—"Britain Overseas," a big handsomely bound book with many colored pictures, interesting stories and descriptions of the colonies and the peoples of Britain's world-wide Empire.

4th Local Prize.—"The Queen's Gift Book," a book of stories, pictures and special articles by Britain's best writers; the proceeds from the sale of the book are for the benefit of disabled soldiers in England.

Note.—Unless the entries number six or more only first and second prizes will be awarded. Unless the entries number ten or more no fourth prize will be awarded.

The District Prizes.—The winner of the first prize at each local fair automatically becomes a competitor for the following District prizes.

1st District Prize.—The "Pathephone" is the name given to the fine big mahogany phonograph—offer as first prize. It will give you endless pleasure and entertainment for a lifetime. It has special reproducer attachments and needles, enabling you to play all kinds of flat disc records of no matter what make. The Pathephone reproduces band music, orchestra music, songs and funny pieces perfectly; with it goes a dozen of the famous Pathe records. Total value, \$150.00.

2nd District Prize.—Set of Dickens' Works, 13 splendidly bound volumes with many illustrations. Among the books in the set are "Oliver Twist" and "Old Curiosity Shop." These are two of the most entrancing stories ever written.

3rd, 4th, and 5th Prizes.—"Cynuck" Bread mixers. This simple, yet well-made machine, takes the hard work out of bread making. Instead of laborious kneading of the old method, you just put in the ingredients, turn the handle, and the dough is thoroughly and more evenly mixed.

Read Carefully Conditions of Contest

Every girl may compete at the rural school fair in her district, whether or not she attends school, providing that her 12th birthday occurs before November 1st, 1917, or her 19th birthday does not occur before Nov. 1, 1917. One loaf of bread must be submitted baked in pan about 7 x 5 inches and 2 inches deep, and divided into two loaves, so that they may be separated at the fair. The loaf must be baked with Cream of the West Flour. One-half will be judged at the fair. The other half of the prize loaf will be sent to Ontario Agricultural College, Guelph, to compete in the District Contests. The judging will be done by Miss M. A. Purdy, of the Department of Breadmaking and Flour Testing. The local contest at the fair will be conducted under the same rules as all the other regular contests at your fairs.

The Standard by which bread will be judged will be as follows:

1. Appearance of Loaf 15 marks
 - (a) Color 5 marks
 - (b) Texture of crust 5 marks
 - (c) Shape of loaf 5 marks
2. Texture of Crumb 40 marks
 - (a) Evenness 15 marks
 - (b) Softness 20 marks
 - (c) Color 5 marks
3. Flavor of Bread 45 marks
 - (a) Taste 25 marks
 - (b) Odor 20 marks

Important.—Each loaf must be accompanied by the part of the flour bag containing the face of the Old Miller, and an entry form must be signed by the girl and parents or guardian stating date of birth, P.O. address, and giving name of dealer from whom Cream of the West Flour was purchased. The form will state that the girl actually baked the loaf entered in the competition. The forms will be provided at the time of the fair. The decision of the judges is final. Not more than one entry may be made by each girl and not more than one local prize will be awarded to the same family.

Which District is Yours?—This list shows you which counties you compete against if you become a competitor for the District prizes:

COURT OF REVISION VOTERS' LISTS

Notice is hereby given that a Court will be held pursuant to the Ontario Voters' List Act by His Honor the Judge of the County Court of the County of Dundas, at the Town Hall, Morrisburg, on the 4th. day of September, 1917, at 1 o'clock p.m. to hear and determine complaints of errors and omissions in the Voters' List of the Municipality of Morrisburg for 1917.

F. R. CHALMERS, Clerk.

Dated, Morrisburg, August 20th 1917

DEPARTMENT OF MILITIA AND DEFENCE SALE OF HUTS

SEALED TENDERS will be received by the Commanding Royal Canadian Engineer, Military District No. 3, Barrfield Camp, Ontario, up to September 7th, 1917, for the purchase of the following huts, lately used by the St. Lawrence Canal Patrol:

Cornwall Group..... 6 huts
International Bridge Group..... 3 "
Mills Group..... 6 "
Dickinsons Landing Group..... 2 "
Farrans Point Group..... 1 "
Morrisburg Group..... 7 "
Iroquois Group..... 2 "

Separate offers must be submitted for each group. Offers may be made for one or more groups by each bidder, but the offer for each building must be stipulated.

Each tender must be accompanied by a certified cheque, equal to ten per cent of total offer made, which will be forfeited in the event of failure to complete the removal of huts and thoroughly clean up the grounds within two weeks of notification of acceptance of tender.

The Department does not bind itself to accept the highest or any tender.
The cheques will be returned to unsuccessful bidders.

CASTORIA
FOR FLETCHERS
CHILDREN

DAIRY COWS' SUMMER RATION.

By Earl W. Gage.

One of the most common mistakes in the feeding of dairy cows on the farm is that the good cows are not given a sufficient quantity of feed, above that required for their physical maintenance, to obtain the maximum quantity of milk they are capable of producing. Successful feeding of dairy cows involves the provision of an abundance of palatable, nutritious feed at a minimum cost, and feeding this in such a way as to receive the largest milk production from the feed. One successful dairy farmer defines feeding for profit as liberal feeding, or feeding to the full capacity of the cow.

From the standpoint of economical milk production, a dairy cow should not be fed more than she will consume without gaining in weight. But there are times when it is desirable to make exceptions to this. Practically all heavy milk producers lose weight in the early part of their lactation period; that is, they produce milk at the expense of their body flesh. When such cows approach the end of their milking period they normally regain the flesh they have lost, and the dairyman can well afford to liberally feed them, with the assurance that he will be repaid in the form of milk when the cows again freshen.

Pasture is the natural feed for cows, and for average conditions, with ample pasture of good grasses, or legumes in good succulent condition, good production can be secured.

Experts advise us that grain should be fed to heavy-producing cows under all pasture conditions. Variations should be made to meet different conditions and individual cows. Grain-fed cows or pasture need not contain the same percentage of protein as for winter feeding. Pasture being an approximately balanced ration, the grain ration should have about the same proportion of protein to other nutrients. The following mixtures are suggested for supplementing pasture without other roughage:

Mixture No. 1. Ground oats, 100 lbs.; wheat bran, 100 lbs.; corn meal, 50 lbs.; per cent. of digestible protein, 10.3.

Mixture No. 2. Wheat bran, 100 lbs.; corn meal, 100 lbs.; cottonseed meal, 25 lbs.; per cent. of digestible protein, 12.7.

Mixture No. 3. Corn-and-cob meal, 250 lbs.; cottonseed meal, 100 lbs.; per cent. of digestible protein, 15.5.

Mixture No. 4. Wheat bran, 100 lbs.; gluten feed, 50 lbs.; corn meal, 50 lbs.; per cent. digestible protein, 13.6.

To carry the dairy herd over a period of short pasture without falling off in milk, soiling crops are growing in favor. For this purpose, second-growth red clover, alfalfa, oats or peas are excellent. Corn is also available usually in August and September. What may be a disadvantage in the use of soiling crops is the extra labor required to cut and haul these crops from day to day, when field work is pressing hard.

The summer silo is gaining in favor in many sections. An acre of corn in the form of silage will provide succulent roughage for several cows for a season. During periods of drought, when both pastures and soiling crops fail, a silo filled with well-matured silage grown the year previous is most valuable.

In planning a summer silo, the farmer should keep in mind that its dimensions should be in relation to the number of cows fed daily. As a usual thing, under summer conditions, a cow will consume about twenty pounds of silage. Therefore, silage enough must be provided daily to prevent excessive surface fermentation.

On this basis, a summer silo for twenty cows should be eight feet in diameter; for thirty cows, ten feet; and for forty cows, twelve feet. As eight feet is about the minimum diameter of a silo for best results, a summer silo is most applicable for twenty or more cows.

Silage helps the dairyman supply his herd with succulence in winter as well as in summer. It helps to keep the cows healthy and productive in the winter when green feed is lacking and dairy prices are highest.

Inferior cows lower herd profits, but they can be detected by individual milk and butter records. Low yields mean small profits or more often actual losses.

Hogs

Dusty feeding floors or sleeping quarters cause the pigs to cough much of the time. The floors should be swept or flushed off with water every day.

Take no chances with a sick hog. Act quickly. Get a veterinarian or a trained man immediately. Use the telephone or send to town at once. Only prompt action will stop hog cholera losses. Every hog saved will help win the war.

Feeding unpasteurized whey from the factory to calves or pigs is an excellent way to spread tuberculosis.

Breeding ewes require at least twelve square feet of floor space in the shed.

Skim milk and grain can be fed to much better advantage to hogs than to mongrel dairy calves.

Rape seeded at the last cultivation of corn will furnish abundant nitrogenous feed for hogs in fall.

The only way to improve the hog on the farm at the lowest cost is by using pure-bred males on well selected sows.

A pig that has been stunted in the early stages of its life should never have a place in the breeding herd.

The hog makes a mature product quicker than any four-legged animal, and in these strenuous times should be the mainstay in our efforts to increase meat supplies.

It is not best to treat grain with formaldehyde if it is to be fed, but in case seed grain is left it may be fed with safety a few days after treatment, as the formaldehyde evaporates quickly.

OAC

THE ONTARIO AGRICULTURAL COLLEGE GUELPH.

Young Man--- If you can't go to War Go to College

LEARN to increase your earning capacity on the farm.

LEARN business methods.

LEARN how to produce better crops and better stock.

LEARN to grow good fruit, better poultry and the best of everything.

September to April at the College
April to September at Home.

Public school education is sufficient for admission.

College Opens September 21

President.

WHEN THE THRESHING MACHINE COMES

To Assist The Housewife in Her Task of Preparing Meals For the Harvesters.

Not so much what to serve as what not to serve needs to be considered in preparing meals for threshing crews. Variety must be worked into all meals rather than into one meal. One error that we women too often make is the custom of serving more than one kind of dessert. Another, is the duplication of the same type of food as, potatoes, rice and spaghetti, all of them starch foods which should be substituted one for the other, not all served at one meal.

The menus given here can be modified to suit local conditions.

The use of the fireless cooker is strongly recommended for cereals and such foods as need long, slow cooking.

The evening meal should be anticipated and everything prepared in the morning that can be so prepared thus saving strength, time and fuel.

Cookies, cake, salad dressing, beet pickles and other items may be prepared the day before the first meals are served.

Breakfast: Fruit, cereal, creamed dried beef, poached eggs, potato cakes, hot biscuit, jelly, coffee or milk. Dinner: Pork, apple sauce, rice, boiled beans, boiled cabbage, fresh onions, corn bread, bread, caramel-custard ice cream, coffee or milk. Supper: Cold sliced pork, fried potatoes, baked beans, cottage cheese, corn bread, bread, baked apples, whipped cream, tea or milk.

Immediately after breakfast put the beans on to cook and when parboiled once, divide and prepare half for baked beans and allow the remainder to cook with the pork until tender. Make cottage cheese.

Caramel-custard ice cream is made by combining three cups of milk, two eggs or four yolks, one and one-half cupful sugar (one-half caramelized) and making a steamed custard. When this is cooled, add three cupfuls cream and freeze. This may be made early in the morning and packed.

The baked apples should be prepared during the morning. Extra rice should be cooked and all that is left from dinner should be put into a pan and molded ready to slice for breakfast.

Put breakfast cereal in fireless cooker after supper.

Breakfast: Fruit, cereal, minced ham, scrambled eggs, creamed potatoes, hot biscuit, jelly, coffee or milk. Dinner: Boiled dinner, horse-radish sauce, lettuce, corn bread, jelly, tapioca pudding, coffee or milk. Supper: Corned-beef hash, poached eggs, greens, sliced tomatoes, corn-bread, fruit, cake, tea or milk.

The boiled dinner should be started early in the morning. The tapioca pudding should be made soon after breakfast and thoroughly chilled.

For the boiled dinner wipe carefully a piece of well corned beef, plunge into boiling water and let simmer four or five hours until the meat is tender. A piece of salt pork from which the

rind has been removed may be added and the two cooked together. About one and one-half hours before time for serving prepare carrots, turnips and beets. Add the turnips and carrots to the stock and after the meat is tender remove until nearly time to serve. Cook the beets separately, using some of the meat stock to cover them. Prepare onions and cabbage, and parboil each separately to take away some of the strong flavor. Cook the onions separately in the meat stock and after the cabbage has been parboiled put it in the kettle with the turnips and carrots. About one-half hour before serving add pared potatoes. The meat may be returned to the kettle to be reheated. Serve the onion and beets in separate dishes. Place the meat in the center of a large platter and arrange the vegetables attractively about it.

Horse-radish sauce is made by soaking one-half cupful of soft bread crumbs in milk. Drain and mix with one-half cupful of well-drained horse-radish. Whip one-half cupful cream and fold in carefully the mixture of bread crumbs and horse-radish. The greens should be soaked and thoroughly washed ready to cook in the evening. Boil potatoes for breakfast the following morning.

Put breakfast cereal in fireless cooker before bedtime.

Breakfast: Fruit, cereal, bacon, eggs, fried rice, muffins, syrup, coffee or milk. Dinner: Baked ham, gravy, boiled potatoes, creamed peas, fried apples, radishes, bread, lemon pie, iced tea or milk. Supper: Cold sliced ham, mustard, potato salad, buttered beets, pickles, bread, preserves, baked custard, tea or milk.

At dinner time cook extra potatoes for the evening and breakfast the following morning. Cook the beets which may be reheated and buttered for the evening meal. Prepare the baked custard.

At night, put breakfast cereal in fireless cooker. Mix and mold biscuit for breakfast. Keep in the refrigerator over night. Bake as usual in the morning.

TORONTO COLLEGE OF MUSIC

The Toronto College of Music reopens Tuesday, September 4th. The excellent work done by this College under the direction of the distinguished master musician, Dr. Torrington, makes it an important factor in the musical education of Canada. A copy of the Calendar being mailed to any address sent in, gives full information of the College Course of Instruction and Examinations.

Fruit juices and stewed fruits are safest for small children.

A crop of corn has 25 to 30 per cent. greater feeding value when put in the silo than when fed as dry fodder.

Mothers and daughters of all ages are cordially invited to write to this department. Initials only will be published with each question and its answer as a means of identification, but full name and address must be given in each letter. Write on one side of paper only. Answers will be mailed direct if stamped and addressed envelope is enclosed. Address all correspondence for this department to Mrs. Helen Law, 233 Woodbine Ave., Toronto.

Knitter:—Bright colored cretonne is perhaps the most popular material for a knitting-bag, though goods of all sorts from khaki to silk can be used.

Cut a seven-inch circle of cardboard for the bottom and cover on both sides with plain sateen. Cut cretonne a yard and a quarter by 16 inches, seam up and join to the circle. Cover four or five-inch embroidery hoop with ribbon and to this attach a band one and one-half inches wide by eight long, sewing the lower end of the band across the seam of the bag near the bottom. This bag is roomy and can be easily closed by gathering up the top and slipping through the ring, and conveniently carried by slipping the band over the arm. It may be lined with plain sateen like the bottom. Khaki colored liner makes a serviceable bag.

B.H.:—It is very difficult to remove paint, but you might try turpentine or benzine.

B.B.:—The only safe and permanent cure for superfluous hair is treatment by electrolysis. This can be given only by an expert.

Housewife:—As you will notice in the splendid course in Domestic Science now appearing in the Household Department, there are five types or groups of foods:

1. Foods depended upon for mineral matter, vegetable acids and body-regulating substances, such as fruits and succulent vegetables.

2. Foods depended upon for protein, such as milk, eggs, meat and dried legumes.

3. Foods depended upon for starch, such as cereal breakfast foods, flours, meals and foods made from them.

4. Foods depended upon for sugar, such as sugar, molasses, syrups,

honey, jams, thick preserves, dried fruits, sweet cake and desserts.

5. Foods depended upon for fat, such as butter, cream, salad oil and other table fats, lard, suet and other cooking fats and oils, salt pork and bacon.

In order that the meals may supply all the needed nutritive elements, must make sure that all groups are well represented; not necessarily at every meal, but when the family diet is considered day by day and week in and week out. Quantities should vary, particularly of the energy-yielding foods, for persons engaged in different pursuits necessitating different amounts of exercise. The heavier the work the more food is needed. In planning meals in accordance with the method here suggested, choose only a few dishes and make sure that the different groups are represented in the daily fare.

Foods in groups 1 and 3 are less expensive, as a rule, than those in group 2, and for this and other reasons should be used freely as the basis of the diet, with sufficient amounts of foods from groups 2, 4 and 5 to round out the meals. Remember that the materials used in cooking, or served with foods (flour, eggs, milk, fat, sugar, etc.), add their food value to the diet. Remember, also, that it is not necessary to supply all the types of food at every meal, providing enough of each is supplied in the course of the day. For example, if the foods which are depended upon for nitrogen (meat, eggs, milk, etc.) are found in abundance at breakfast and dinner, it is not necessary to include them at supper or lunch, or if a person prefers a light breakfast he may leave out the nitrogen-rich food and perhaps some of the other foods in the morning and make up for it at the noon and evening meals.

Poultry

Egg eating is a habit frequently started by a broken egg in the nest.

To prevent: Have dark nests; keep nests clean, and avoid feeding egg shells. Change of pens will sometimes stop the habit.

Mark the pullets this fall so that you will know just how old your hens are. A leg band on the right leg one year and on the left leg the next will assist in culling the flock.

If your chicks are not doing well something is wrong. Look out for lice, and for worms in the intestines.

Two-year-old hens had better be sent to the market. They seldom pay for their feed if kept over a third season.

Supplement the regular feeds of the hens with a wet mash—fed crumbly. Feed all the chicks will clean up before going to roost, but none should be left in the trough, for it will sour.

Chickens will do better if not compelled to pick their living with the old fowl. There will also be less trouble from lice.

A growing chick will not thrive on short rations. If the right kind of food is fed, there is little danger of overfeeding, especially if given plenty of range.

Fresh or Rotted Manure.

Perhaps one of the most remarkable results obtained in our experiments with fertilizers—has been the discovery that, as far as ordinary farm crops are concerned, fresh and rotted manure, applied at the same rate, have given practically equal yields.

The explanation for this is not easy to find, since rotted manure, weight for weight, is very considerably richer in plant food than fresh manure. It probably lies in the better inoculation of the soil with desirable micro-organisms for the assimilable forms by the fresh manure and the greater warmth set up by its fermentation in the soil affecting beneficially the crop in its early stages.

Forked lightning is due to the dividing of the flash by certain objects it approaches.

Horse Sense

Care of Horse's Hoofs.

The hoof is more exposed to wear and tear than any other portion of the horse's body. The hoofs correspond to the claws of other creatures. The outside is of hard, dense, compact, insensible horn in thin layers. The inner hoof is supplied with blood vessels and nerves, indicating sensitive-ness.

If nails are directed wrongly in shoeing and penetrate this sensitive part of the horse's foot, they cause pain, inflammation and possibly lock-jaw and death.

If the hoofs dry up or become brittle there are many remedies, but none better than nature. The dew is cooling and softening and will heal hoofs much better than bathing in hard water.

Many horse owners laugh at the idea of nature taking care of the hoofs. They are wrong.

Travelling on hard, dry roads, standing on dry floors, bathing with hard water are all destructive to the hoof. If you must help nature it is beneficial to fill the hollow of the foot or the cavity of the shoe with one part tar oil and two parts whale oil, which will feed the hoof. A brittle hoof must have, in any case, food and the proper moisture.

The horse's hoof is made up of hidden springs, self-acting pulleys and cushions ever soft. These all have to be watched.

It is an exception to find an 8-year-old horse with a healthy set of hoofs. Nearly all are brittle, shelly-dished or the frogs are cut away or the heels are high and inelastic.

I've heard owners complain or blame the smith. But in the majority of cases it's the treatment the horses get in the stable that is to blame. The horses are left to stand all year around on a dry, hard floor or in the manure or be washed in hard water or driven barefooted on gravel roads. Overfeeding or anything that injures the horse's general health also affects the hoofs.

The best way to help others is to help them to help themselves.

The Doings of the Duffs.

Putting Pep and Punch
into the daily job during the hot days is a matter of physical and mental fitness—and this comes from foods that supply the greatest amount of real nutriment with the least tax upon the digestive organs. Cut out meat and potatoes and eat **Shredded Wheat Biscuit** with sliced bananas or other fruits and green vegetables. Strengthening and nourishing.

Made in Canada.

WESTERN CROP MUST BE SAVED

Insistent Call for Men From Prairie Wheat Fields.

The crop in Western Canada is rapidly approaching the harvest stage. In some places, indeed, cutting has commenced already. But the insistent call for harvest help will be general throughout Manitoba, Saskatchewan and Alberta within the next few days.

Save the crop! is the urgent appeal from the leaders in all the Allied countries. In Canada, the young men of adventurous tendencies in the towns and villages of Ontario, who have been unable to go to the trenches, will be contributing a very real service to the cause by helping grain growers of the Prairie Provinces gather the wheat upon which so much of the success of war operations depends.

The rates to the west are low, and the wages, because of the high level of the price of wheat, are certain to be good, if not high. Moreover, there is always the possibility that the harvester, "doing his bit," may locate a farm in the west and settle permanently there.

To many young men and those more mature, in every small town in Ontario, including our own, this appears as a great opportunity to serve the country in a practical way. A pleasant, long-distance train journey, and a visit to the invigorating west, are added attractions. But the crop must be saved!

A MARKED CONTRAST.

Between British and German Headquarters in France.

An American arriving in London after a visit to British headquarters in France spoke of the contrast between the latter and German headquarters, where, during the earlier stages of the war, he happened to find himself.

"The contrast," he said, "is almost beyond description. At the German front, when I was there, it was one incessant business of heel-clicks and sword-clanks! No relaxation of any kind, ramrod stiffness everywhere and always a sense of restriction, as though you were shut up in an ice-chest!"

"A short time ago I had the pleasure of visiting the British general headquarters. 'G. H. Q.' is absolutely a jolly place. No flap, no slide, no heel-clicks, and never a sign of a refrigerator machine to be seen anywhere throughout the whole show. Sir Douglas Haig was a human man, and no more.

"Genial, friendly, with a handshake that strikes a glow into you, blue eyes full of good humor and fun, as keen to see a joke as to fix up a tactical point, a ready and fluent tongue, and a way with him that, after five minutes in

his company, makes you feel that you have known him as a real friend for years. He is perfectly frank and astonishingly modest.

"Naturally, his 'boys,' as the staff is familiarly known, love him, and would waltz through Hades gladly enough for him. They are all sorts and sizes, and all ages; but they are all tarred with the same brush of good nature, good fellowship and brotherliness. I was billeted with them one night, and it was the most glorious night's fun I have ever had in a peculiarly mixed and varied existence."

THE SISTER OF A SOLDIER.

She may not follow forth with him When wide the flag's unfurled, But he will take her cheery smile Halfway across the world. Halfway across the world he'll hear The word he caught at going; Her brave good-by, as proud and clear As any bugle blowing.

She'll keep the home lights gleaming fair. The hearth flame brightly burning, Please God—he'll be returning. The old house sweet against the day—She cannot strike the marching pace, But when he's out of sight She steps into his empty place, And stays behind to fight!

THE FIRST LINE OF DEFENSE

Pure blood is the body's first line of defense against disease. Strong, healthy blood neutralizes the poisons of invading germs, or destroy the germs themselves. That is why many people exposed to disease do not contract it. Those whose blood is weak and watery and therefore lacking in defensive power are most liable to infection. Everybody may observe that healthy, red-blooded people are less liable to colds and the grippe, than pale, bloodless people. It is the bloodless people who tire easily, who are short of breath at slight exertion, who have poor appetites, and who wake up in the morning as tired as when they went to bed. While women and girls chiefly suffer from bloodlessness the trouble also affects both boys and men. It simply affects girls and women to a greater extent because there is a greater demand upon their blood supply.

To renew and build up the blood there is no remedy can equal Dr. Williams' Pink Pills. They tone up the entire system, make the blood rich and red, feed and strengthen starving nerves, increase the appetite, put color in the cheeks, give refreshing sleep and drive away that unnatural tired feeling. Plenty of sunlight and wholesome food will do the rest.

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

The Best Part.

Auntie was trying to teach her spoilt nephew to be unselfish. "Did you do as you were told, Billy, and give your little brother the best part of the apple?"

"Yes, aunt," said the bright youngster. "I gave him the seeds. He can plant 'em, and have a whole orchard himself!"

Lachute, Que., 25th Sept., 1908. Minard's Liniment Co., Limited.

Gentlemen,—Ever since coming home from the Boer war I have been bothered with running fever sores on my legs. I tried many salves and liniments; also doctored continuously for the blood, but got no permanent relief, till last winter when my mother got me to try MINARD'S LINIMENT. The effect of which was almost magical. Two bottles completely cured me and I have worked every working day since.

Yours faithfully, JOHN WALSH.

TURKEY'S SHINING STONE.

Prophetic Piece of Marble Keeps Ottomans Confident of Victory.

Perhaps the most remarkable of all the Constantinople "prophecies," recently discussed, is connected with the "Shining Stone" in the Mosque of St. Sophia. This is a slab of translucent marble, brought from Persia, which has been fixed in the west side of the gallery.

It emits rays of dazzling brilliancy during times of national prosperity or religious triumphs of Islam, but becomes black and opaque, however cloudless the skies, when disaster threatens the Ottoman Empire or the faith.

It has never hitherto been seen darkened, though the Sultan's armies have frequently been defeated and the power of Islam seemed to suffer eclipse. Thus this prophetic stone proves to believing Moslems that, however fate may frown in the present war, the real victory remains with them.

The Respectful Tommy.

A very tall, thin lieutenant reported in Flanders to a Canadian battalion commanded by a bald, elderly colonel. After a few days he approached his commander and asked permission to air a grievance.

"I wish you would use your influence, sir, to restrain my platoon from referring to me as 'Legs,'" he said.

"Sure, my lad; sure," replied the colonel solemnly, "if you'll use yours to stop my whole battalion calling me 'Old Baldy.'"

Minard's Liniment Cures Colds, Etc.

Across a Thousand Years.

"I desire to live worthily all my days so that after my death I may leave to others a record of work well done."

Across a thousand years of struggle and sorrow floats this message from the heart of Alfred, our greatest Saxon king, a Saxon, simple and earnest, and with a flavor of green meadow land and wild light fragrance in what he said and did, says the London Daily News. I think he was not only England's, but the world's greatest king, this man whom a crown did not corrupt, and who toiled under its heavy weight to give England clocks, and learning, and some kind of liberty.

CHOLERA INFANTUM

Cholera Infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded stomach complaints. Concerning them Mrs. Fred Rose, South Bay, Ont., says: "I feel Baby's Own Tablets saved the life of our baby when she had cholera infantum and I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Keep down weeds in the garden. Weekly cultivations keep the soil loose, friable and aerated and conserve moisture.

MURINE Granulated Eyelids. Sore Eyes, Eyes Inflamed by Sun, Dust and Wind quickly relieved by Murine. Try it in your Eyes and in Baby's Eyes. No Smearing, Just Eye Comfort. Murine Eye Remedy At Your Druggist's or by Mail, 50c per bottle. Murine Eye Salve, in Tubes 50c. For Book of the Eye—Free. Ask Murine Eye Remedy Co., Chicago.

Teacher—"Why did the Normans and Saxons fight at Hastings?" Pupil—"That's where they happened to meet, ma'am."

MONEY ORDERS.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

To prevent a nail splitting a piece of wood push the nail first through a cake of hard soap.

Minard's Liniment Cures Distemper.

Make an inventory of foods and household supplies. This should reveal any waste, extravagance or carelessness. Get rid of the non-essentials. What is not necessary, sell or give to a relief association.

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—It's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority. For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug does the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.

CLIMBED STAIRS ON HER HANDS

Too Ill to Walk Upright. Operation Advised. Saved by Lydia E. Pinkham's Vegetable Compound.

This woman now raises chickens and does manual labor. Read her story: Richmond, Ind.—"For two years I was so sick and weak with troubles from my age that when going up stairs I had to go very slowly with my hands on the steps, then sit down at the top to rest. The doctor said he thought I should have an operation, and my friends thought I would not live to move into our new house. My daughter asked me to try Lydia E. Pinkham's Vegetable Compound as she had taken it with good results. I did so, my weakness disappeared, I gained in strength, moved into our new home, did all kinds of garden work, shoveled dirt, did building and cement work, and raised hundreds of chickens and ducks. I cannot say enough in praise of Lydia E. Pinkham's Vegetable Compound and if these facts are useful you may publish them for the benefit of other women."

—Mrs. M. O. JONSTON, Route D, Box 190, Richmond, Ind.

ISSUE NO. 34—17.

DE. F. H. TORRINGTON, Musical Director COLLEGE RE-OPENS SEPT. 4 Send for Illustrated Calendar

A FISH THAT CAN CLIMB.

Inhabits Dutch East Indies and Climbs Trees as High as Thirty Feet.

There is only one kind of fish in the world that can climb a tree. It is a "goby," and is found in great numbers on the Island of Ceram, in the Dutch East Indies.

Along the sea beaches of that island, close to the water's edge, grow huge trees which are in themselves odd enough, inasmuch as the roots start out of the trunk eight or ten feet above the ground and grow downward to meet the marshy soil in the form of flying buttresses.

The gobies which infest the shallows along shore, making burrows in the muddy bottom for refuge against enemies, are quite at home out of the water, and on land are able to hop about with great agility, their long pectoral fins serving the purpose of arms, while their tails are operated like springs.

When the mud flats are dry these fishes may be seen skipping over them by hundreds in pursuit of tiny crustaceans left behind by the tide. They climb the trees, sometimes as high as thirty or even forty feet, to catch insects.

Treat a man like a brute, and he will behave like one.

GET RID OF Pimples

Quickly, Easily and Cheaply by Using Cuticura

The Soap to cleanse and purify, the Ointment to soothe and heal. Nothing better for all skin and scalp troubles, as well as for every-day toilet purposes.

Sample Each Free by Mail With 32-p. Skin Book. For samples address post-card: "Cuticura, Dept. N, Boston, U. S. A." Sold throughout the world.

Doctors Tell Why They Prescribe Bon-Opto. Explain How It Strengthens Eyesight Remarkably In a Week's Time In Many Instances.

Has Seen Eyesight Improve from 75 to 100% in a Remarkably Short Time.

Boston, Mass.—Victims of eye strain and other eye weaknesses, and those who wear glasses, will be glad to know that Doctors and Eye Specialists now agree there is real hope and help for them. Many whose eyes were failing say they have had their eyes restored and many who once wore glasses say they have thrown them away. One man says, after using Bon-Opto: "I was almost blind. Could not see to read at all. Now I can read everything without my glasses, and my eyes do not hurt any more. At night they would pain dreadfully. Now they feel fine all the time. It was like a miracle to me."

A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can read even fine print without glasses." Another who used it says: "I was bothered with eyestrain caused by overworked, tired eyes which induced fierce headaches. I have worn glasses for several years, both for distance and work, and without them I could not read my own name on an envelope or the typewriting on the machine before me. I can do both now, and have discarded my long distance glasses altogether. I can count the fluttering leaves on the trees across the street now, which for several years have looked like a dim green blur to me. I cannot express my joy at what it has done for me."

It is believed that thousands who wear glasses can now discard them in a reasonable time, and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses.

Kept Tramps Away.

"Don't you want to hire a feller to keep the tramps away, Mrs. Subbubs?" asked the small boy.

"How can a little fellow like you keep the tramps away?" demanded Mrs. Subbubs.

"Easy enough," replied the boy. "I kin eat up all the pie and cake an' things wot's left over."

"He only is advancing in life whose heart is getting softer, whose blood warmer, whose brain quicker, whose spirit is entering into living peace."—L. Ruskin.

Minard's Liniment Cures Diphtheria.

Some folks think that they have not hoed their corn unless they make a big mound of earth about every hill. A lot of work to no purpose. Level cultivation, with a cultivator that does not dig too deeply, will cause the roots of the corn plant to strike deeper, and keep the corn from blowing over or suffering from drought.

In an ancient Buddhist monastery in Korea wooden blocks, believed to be the oldest printing blocks in the world, have recently been discovered.

DODD'S KIDNEY PILLS FOR ALL KIDNEY DISEASES, GRAVEL, RHEUMATISM, BRISTLE DISORDER, DIABETES, BACKACHE, ETC. 23 THE PRO

Dr. Howard James, late of the Manhattan State Hospital of New York and formerly Assistant Physician Brooklyn State Hospital, says:

"Iron is absolutely necessary to enable your blood to change food into living tissue. Without it, no matter how much or what you eat, your food merely passes through you without doing you any good. You don't get the strength out of it, and as a consequence you become weak, pale and sickly looking. Just like a plant trying to grow in a soil deficient in iron. A physician friend remarked to me (after having been on a six weeks' course of Nuxated Iron), 'Say, Doctor, that stuff is like magic.'"

If you are not strong or well you owe it to yourself to make the following test: See how long you can work or how far you can walk without becoming tired. Next take two five-grain tablets of nuxated iron three times per day for one week. Then test your strength again and see how much you have gained. From my own experience with Nuxated Iron, I feel it is

Investigate the kitchen and those who work in the kitchen. Stop all leaks. It is just as scientific to use and serve foods rightly as it is to learn how to find the range of the enemy.

Nuxated Iron Makes Strong, Vigorous, Iron Men and Beautiful Healthy Rosy Cheeked Women

See! That there stuff (Nuxated Iron) acts like magic. It certainly puts the glinger of youth into a man

such a valuable remedy that it should be kept in every hospital and prescribed by every physician in this country." Nuxated Iron, recommended above by Dr. James, is for sale by all good druggists on an absolute guarantee of success and satisfaction or your money refunded.

Doctors Tell Why They Prescribe Bon-Opto. Explain How It Strengthens Eyesight Remarkably In a Week's Time In Many Instances.

"Bon-Opto Is Hastening the Eyeglassless Age in Respected Boston."

also used it and we are agreed as to its results. In a few days, under my observation, the eyes of an astigmatic case were so improved that glasses have been discarded by the patient.

Eye troubles of many descriptions may be wonderfully benefited by the use of Bon-Opto and if you want to strengthen your eyes, go to any drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and let it dissolve. With this liquid in the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start, and inflammation and redness will quickly disappear. If your eyes bother you even a little it is your duty to take steps to save them now before it is too late. Many hopelessly blind might have saved their sight if they had cared for their eyes in time.

NOTE—A city physician to whom the above article was submitted, said: "Yes, Bon-Opto is a remarkable eye remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. I have used it very successfully in my own practice on patients whose eyes were strained through overwork or mist glasses. I can highly recommend it in case of watery, itching, smarting, itching, burning eyes, red lids, blurred vision or for eyes inflamed from exposure to smoke, sun, dust or wind. It is one of the very few preparations I feel should be kept on hand for regular use in almost every family. Bon-Opto is not a patent medicine or secret remedy. It is an ethical preparation, the formula being printed on the package. The manufacturers guarantee it so strengthen eyesight 50 per cent in one week's time in many instances, or refund the money. It is dispensed by all good druggists, including general stores; also by G. Tamblin and T. Eaton & Co., Toronto.

A Call to Your Grocer will bring a package of

Mr. and Mrs. P. O. Berkley have the sympathy of the community in the death of their only son, Master Claude Victor, who died at the Cornwall General Hospital on Tuesday, Aug. 21st., following an operation for appendicitis. The funeral takes place today (Friday) at 1 p.m. from the family residence. Interment in Fairview Cemetery.

Rev. Aden McIntosh and Mrs. McIntosh after spending a couple of weeks with his father returned to their home in Lancaster, Pa., on Monday.

Mr. and Mrs. Robert Henderson of Kingston are spending a couple of weeks' holidays with the former's mother, Mrs. Warren Henderson.

"Winnipeg Free Press"—Harold Murphy, for the past two years one of the teachers in the Linwood school, St. James, has enlisted with the Army Medical corps. He donned the uniform the first time today and has joined his unit at the St. Charles camp. He is the son of Lewis Murphy, one of the proprietors of the St. James Leader.

A farmer claims to have found a cure for potato bugs by ten years' experimenting in Colorado. His plan is to plant one or two grains of flax seed in each hill of potatoes. He says that the bugs will shun it every time, and that for ten years he has been thus successful in raising potatoes where others have failed. The proposed remedy is simple and costs very little to try.

A delegated Liberal Convention for the purpose of nominating a Candidate for the Federal Constituency of Dundas will be held at the Music Hall, Chester ville on Wednesday, August 29, at 10 o'clock a.m. A public meeting will be held at the same hall on the same day at one o'clock p.m. Addresses will be delivered by Hon. G. W. Kyte, M.P., Hon. E. M. McDonald, M.P., and the Candidate.

Mr. T. W. Brock, Field Secretary of the Ontario Organization of Resources Committee was in town on Wednesday and Thursday organizing a local committee to co-operate in carrying on the work of securing the conservation, utilization and organization of the resources of Ontario.

A lawn Social under the auspices of the Riverside Red Cross Group will be held on Mr. Allan Lavis' lawn on Wednesday evening, August 29th. The lawn will be beautifully illuminated and decorated, and a good program is being prepared, including instrumental and vocal solos and selections by the High School Orchestra. Mr. and Mrs. Amos Duval were officially notified this week that their son, Pte. Kenneth Duval was suffering from the effects of gas poisoning and admitted to general hospital at Comiers on Aug. 13th. This cancels the first telegram which stated that Pte. Duval had died from the effects of gas.

Wanted

Ladies wishing to secure rooms in private home with a lady apply for further particulars at this office.

Boarders or Roomers

Comfortable front room with Electric Lights and Bath at reasonable rates. Apply Leader Office.

OGDENSBURG FAIR

Ottawa, Ont., Aug. 15.—Sergeant Major E. F. Morgan of the Governor General Foot Guards has been granted permission to give exhibitions at the Ogdensburg Fair. The exhibition with a sword is a thrilling one of the dare-devil variety. He cuts a potato through on the neck of a young lady, severing it without the slightest injury, immediately following the cutting in two of a triangular bar of lead, an inch thick. He is known as the champion swordsman of the world and permission is only granted for him to exhibit in hopes of stimulating recruiting across the river.

For the first time in many years running races are to be held at Ogdensburg and large crowds are sure to be attracted from this side. These will be given in addition to their regular large program of harness events. There is also a large program of free attractions in front of the grandstand. The Steamer Riverside will leave Morrisburg, Wednesday, Thursday and Friday at seven-thirty a.m., Iroquois, eight-thirty and Cardinal, nine-thirty. Return leave Ogdensburg at five-thirty. Fare fifty cents. Remember the date, Sept. 5-6-7.

Morrisburg, Ont.

AT THE STAR THEATRE AUG. 24th & 25th

The greatest mystery story ever filmed, founded on the famous novel "The Voice on the Wire," written by Eustace Hale Ball.

This is a real mystery, unguessable. The solution is hidden from the most shrewd "Solver of Plots," and baffles all, with its cloaked figure, its disconnected telephone, its rivalry between the chief of police and a scientific investigator, and a fascinating love theme.

The Voice on the Wire is written in 15 episodes and will be shown every Friday and Saturday nights. Don't miss the first story starting August 24th.

Morrisburg Branch — B. A. HERRING, Manager.

THERE ARE PICKLING SPICES AND PICKLING SPICES

Unless you know all about spices maybe you could not tell the difference. Will you let us tell you the difference?

The Best have 16 — Sixteen — Ingredients, no less. The second grade stuff has 8 or 10 spices only instead of the full complement.

Our staff can demonstrate that the pickling spices we offer has all sixteen component spices. It is indisputable the best. Look for the platter on the counter, the little platter with the big meaning.

You are going to pickle your vegetables soon. Now is the time. We have the goods.

You want vinegar too, and to save you steps why not buy the vinegar at the same store. We have Wilson's XXX Cider and spirits vinegar.

Guaranteed Absolutely Pure
