MORRISBURG — ONTARIO

MR. JOHN McCORMICK
Dundas County's New Magistrate

The three United Counties were formerly under one Magistrate, but a combined population of 50,000, the Government felt, demanded more representation. Mr. John McCormick of Winchester was appointed Magistrate for Dundas County, and Mr. J. C. Milligan, former Conservative member in the Legislature for Stormont, was appointed Magistrate for the Counties of Stormont and Glengarry.

MONTGOMERY—BECKSTEAD

At the Lutheran Parsonage, Morrisburg, Ont., on May 11th, Gertrude Lillian Beckstead, daughter of Mr. and Mrs. P. E. Beckstead of Williamsburg and Arnold R. Montgomery, son of Mr. and Mrs. David Montgomery of South Mountain were united in bonds of holy matrimony, the ceremony being performed by the Rev. Jacobi. The bride was attended by her sister, Mary and Mr. Clifford Ellis acted as best man. Following the ceremony the couple left by motor for Ottawa and other points. On their return they will reside at their home near South Mountain.

CADET INSPECTION

The M.C.I. Cadet inspection will be held on the Fair Grounds, Wednesday, May 18th, commencing at 2 p.m. The citizens of Morrisburg and people of the surrounding community are cordially invited to attend.

The following is the program:—

1—Cadet Corps drawn up in line receives the Inspecting Officer with the general salute.

2—The Inspecting Officer inspects the Cadet Corps accompanied by the Company Commander.

3—The Cadet Corps marches past the saluting base—in line and in column of platoons, also close columns of platoons or column of route.

4—The Company Commander puts the Cadet Corps through four or five movements of company drill.

5—The 2nd commander, or other commending officer puts the Cadet Corps through the Rifle Drill.

6—Drill.

7—Strathcona exercises.

8—There will be two files in each of the following games:—

Roosters' fight; Stand on the Hands; Skin the Snake; Wheelbarrow Races.

9—Attack—(2 platoons) — First Aid—4 lady officers; 8 men officers.

10—Homage paid—to our Fallen Heroes—Cadets in a circle—general salute—Silence one minute.

11—M. C. I. formed by Cadets—(White flowers used in formation of letters).

12—Presentation of medals—prizes—speeches.

13—3 cheers for the King.

MISS WINNIFRED HERRIMAN HONORED

Prior to her marriage which was quietly solemnized on Wednesday evening, May 4th, at the United Church parsonage, Elma, Miss Winnifred Herriman of Boucks Hill was joyously surprised by her friends and neighbors. To the number of upwards of one hundred they came flocking into her home, and judging by the number and quality of the gifts with which she was showered, Miss Herriman must be a very popular young lady. The evening was spent in the usual way—games, music and old-time songs, intermingled with plenty of good cheer and friendly chat. Exactly at the right time Miss Herriman was addressed by Miss Gladys O'Shaughnessy, who on behalf of the assembly, expressed the esteem in which the bride-to-be is held in the community, their regrets over her departure and their good wishes for her future wedded life. Miss Herriman, deeply affected by these words of appreciation so kindly offered, replied only with the greatest difficulty, thanking her friends for this expression of good will, and cordially inviting them to visit her in her new home.

The happy evening closed with the singing of "Auld Lang Syne" and "She's a Jolly Good Fellow."

MRS. SOPHIA DEROSIER

On Wednesday, May 4th, the death occurred of Mrs. Sophia Derosier, wife of the late Jehiel Derosier.

The deceased, who was 76 years of age, was born at Cannamore, Ont., and has lived in Morrisburg for the past forty-eight years.

She is survived by four daughters Miss Martha Derosier, Mrs. Agatha Lavalee, at home; Mrs. Owen McCoy, Lennoxville, Que.; Mrs. Royal Barclay, Kennedy, Sask.; Geo. L. Derosier of Rochester and John A. Derosier of Windsor; five brothers, J. C. Norton, Cleveland, Ohio; Alfred of Cannamore; Mike of Chrysler; James of Dorset, Muskoka; three sisters—Mrs. Catherine Tivers and Mrs. E. Barry of New York Mrs. John Baker of Berwick, Ont.

The funeral service was held at St. Marys Church, Rev. Father Byrne officiating. The remains were interred in St. Marys Cemetery.

MR. BEVERLY B. TUCKER

The funeral of Mr. Beverly Baruch Tucker, of Watertown, N.Y., was held on Sunday afternoon at 1.30 from the residence of his brother-in-law, Mr. Herbert B. Wright, Brockville, to Mount Pleasant cemetery at Morrisburg where interment was made.

The religious service at the residence was conducted by Rev. Dr. R. M. Hamilton, during which Mr. G. Harold Mallory sang feelingly "Abide with Me," assisted at the piano by Mrs. Mallory. The Masonic service was also conducted at the residence.

The attendance at the funeral of sympathizing friends from all parts of the district between Brockville and Morrisburg, as well as from Watertown, N.Y., and adjacent points bespoke of the esteem in which he was held in this life and the general sorrow felt at his sudden and totally unexpected demise.

A special automobile was required to carry the great number of floral tributes which were sent by friends here and at a distance.

MRS. S. B. FELL

Diantha Cleland, widow of the late S. B. Fell, was born in the Township of Mountain on the 28th day of December 1841. She was married to Mr. Fell, also of Mountain about 1862 and they shortly afterward removed to Morrisburg. In those early days, Mr. Fell having learned the painting trade, engaged in it, and their daughter, Mrs. Neelin has in her possession a card advertising her father's work, printed by the late H. S. Kennedy, publisher of the Courier, in July 1863. Afterwards they engaged in the work of photography. For a number of years their gallery was on the spot where the Music Hall now stands. In those years Mrs. Fell was a real helpmate to her husband, doing much of the retouching, numbering and recording of the plates. Many persons have in after years sought out Mrs. Fell to secure a photo of some departed friend and such was her careful methods that they did not go away disappointed.

Old photos with the name S. B. Fell thereon may be found in all our homes and as long as they are kept and treasured the memory of Mr. and Mrs. Fell will remain with us.

It is however as a worker in the former Methodist Church that Mrs. Fell is best remembered. She filled, at one time or another, most of the offices of the Ladies' Aid. Mr. Fell predeceased his wife some nine years ago. The funeral service was conducted by Rev. E. Lawson on the fourth instant, at her late residence. Interment beside her husband in the family plot, South Mountain Cemetery.

Two children survive, Lennie, Superintendent of Education, Lead City, South Dakota, and Mrs. Ida Neelin at home.

MRS. CHAS. BOUCK

A gloom of sadness came over this vicinity on Tuesday, April 26th, when called upon to part with one of our most highly esteemed residents, in the person of Mrs. Charles R. Bouck (nee Frances Zeron). Deceased had been ill for only a few days and her sudden passing was a severe shock to her many relatives and friends.

The funeral service was held on Thursday, April 28th, at White Church. Her pastor, Rev. M. I. Robinson, spoke comforting words to the bereaved ones and to a large number of sorrowing friends who had gathered there to pay their last tribute of love and respect. Interment was made at Point Iroquois.

The late Mrs. Bouck was the daughter of Jeremiah Zeron and Emma Loucks, his wife, of Mariatown. She was born Feb. 10, 1894, at the "Old Zeron Homestead" in the 2nd Concession, Matilda. She received her high school education at Morrisburg, and later obtained her teachers' certificate at Ottawa Normal, afterwards practising her profession successfully for a number of years.

Six years ago she was married to Charles R. Bouck, who is left to mourn the loss of a loving and devoted wife. She is also survived by her father and mother, one sister, Martha, and one brother, John.

Gifted with an exceptionally keen mind, she gave willingly of her abilities both to the Church and to the community. Her kindly disposition, true worth and genial hospitality will cause her memory to be long treasured.

Fashion

A NEW BLOOMER DRESS FOR THE YOUNG MISS.

This delightful little bloomer dress, having plaits at both sides of front and back, would be charming if fashioned of flannel with contrasting material for the trim collar and wristbands finishing the fashionable long raglan sleeves. Buttons adorn the centre front closing and a belt fastening in front completes this chic frock. Bloomers made of the same material as the dress have elastic run through a casing at the top and sung kneebands finish the lower edge. No. 1331 is in sizes 2, 4, 6, 8 and 10 years. Size 6 requires 3⅛ yards 36-inch plain material, and ⅛ yard contrasting. 20 cents.

Our new Fashion Book contains many styles showing how to dress boys and girls. Simplicity is the rule for well-dressed children. Clothes of character and individuality for the junior folks are hard to buy, but easy to make with our patterns. A small amount of money spent on good materials, cut on simple lines, will give children the privilege of wearing adorable things. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS.

Write your name and address plainly, giving number and size of such patterns as you want. Enclose 20c in stamps or coin (coin preferred; wrap it carefully) for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

This Will Please the Vegetables.

Dogs are usually thought of as carnivorous or flesh-eating animals; but according to reports from London, a British veterinary surgeon named Kennard has made some interesting experiments that seem to indicate that puppies will thrive on a diet of fruit even better than on the food that they are supposed to require. His first experiment was performed on a litter of borzois. He fed half of them the customary foods given to dogs; the other half were given a diet of oranges, apples and bananas. "At the end of three months," asserts Kennard, "those fed on fruit were noticeably in advance, physically, of their brothers, and the eventual result of the experiment was that the fruit-salad pups all become first-class hounds, whereas only three of those fed on meat, fish and biscuit grew into good dogs. One of them died, and two others developed rickets."

Later the veterinarian repeated the experiment with Pomeranians. In three months the fruit-fed dogs grew almost beyond recognition into the size of large fox terriers, while the others lagged far behind. When the puppies that were fed fruit got the distemper it passed off quickly.

Didn't the doctor let the pups have a bone to sharpen their teeth on, we wonder?

Dark Ray Found to Pierce Smoke.

A dark ray, which it is said will enable the operator to pierce fog or smoke and see what is beyond, was exhibited by J. L. Baird, inventor of the televisor, in his London laboratory; the new invention is called "noctovision."

Its inventor claims it will render naval and military smoke screens useless in warfare. It may also banish the element of surprise from naval and military aerial actions, and make it possible to locate fleets in the skies or at sea.

In the presence of Admiral Mark Kerr, and others, Baird transmitted a doll's features through an artificial fog, produced by chemicals, so dense as to nearly choke his assistants.

The new ray is a sort of invisible searchlight, which it is said, has 16 times the penetration power of ordinary light through fog or smoke. The ray makes a sound when it encounters a solid object or even a ray of light. Each object produces a different sound, from which it is possible to determine its nature.

Industry.

I am the sport and passion of young minds;
I call to men bare-armed and fresh of soul,
Ready to sweat and fight and risk and dare,
To master, to excel, and to control.

I am a struggle in the dust and smoke,
Where wheels are whirling and the broad belts fly,
I am the march of mankind from the past,
To frontiers wide, adventurous and high.

I am the game of Progress, where man's art
Against the power of the Spheres is hurled.
I am the Creation carried on anew
In the beginning of a greater world.
—Herbert G. Sisson in Forbes Magazine.

Alaska's Flag Designed by 13-Year-Old Boy.

Alaska is to have an official flag, designed by a 13-year old boy.

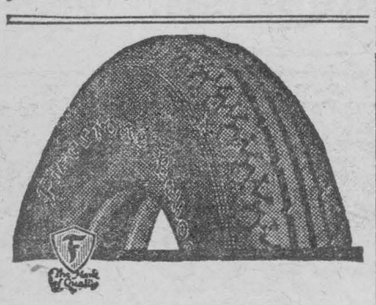

The Territorial House of Representatives has given its approval and voted $2,000 for sending Benny Benson, of Seward, the schoolboy whose design was accepted, to Paris.

The flag has eight gold stars set in a field of blue. Seven of the stars form the constellation of Ursa, or the great bear, the most conspicuous constellation in the northern skies.

Avoid Scraping Carrots.

The task of scraping carrots and the consequent staining of the hands, can be avoided if the carrots are washed, and then boiled for 15 minutes or so. The skin will then slip off easily, and the carrots may be sliced or prepared as one wishes for further cooking.

Minard's Liniment for dandruff.

THE RABBIT

BY DOUGLAS NEWTON.

PART III.

Somebody cried: "Miriam! Miriam! What is it?"

Miriam's voice came shaking, strangled: "Shiss! Shiss! Not so loud. Don't anger it."

"It? What?" demanded a voice dropped to a low note of fear. And Miriam's shaking voice called softly:

"A jararaca! In the room with me a jararaca. Oh, for God's sake save me!"

Jararaca! The mere sound of it turned them to water. It is the name of terror in those low jungle swamps. It is not merely the snake whose bite kills it is the snake that fights. It will face its enemy; it will attack.

No wonder they stood rooted there. Most of them were big men, brave men, men afraid of nothing on earth, and they would face it on fair footing. But to face an angry jararaca in that narrow, pitch-black room was beyond the nerve of any of them, even though a woman's life was at stake.

Horribly petrified they stood, then:

"Oh, it's coming near!" screamed Miriam.

They heard the frantic heave of her body on the bed—and the hiss.

The cold, sibilant hiss that seems to curdle the very spinal marrow, the hiss that hynotizes in its cold, low evil. The hiss that gave the Rabbit a paralysis of terror.

They heard him leap now, heard his half-stifled gasp of fear. They knew how he was feeling.

Val's voice, strangely thick, came: "My God, we've got to do something! That poor kid helpless in there with —with it. Got to do something."

Then somebody stepped quickly through the door of the sickroom, stepped right into the dark room where that deadly horror was lurking, angry and eager to strike. Somebody with a courage beyond any of their courage was facing the jararaca.

A match scratched, flared up.

The somebody was Calvin Boldre—the Rabbit.

The Rabbit, the man who became backboneless with panic at the mere hint of a snake. The Rabbit, who was not a real man at all!

But they weren't thinking of that. They watched with tortured anxiety those slow instants between the striking of the match and the growth of its flame. A matter of half seconds only, but it seemed eternity. They saw his outline, crouched, alert, saw that he held in his hand a billiard cue which one of them had been mending. They saw it in a flash, saw him sidestep in a flash and drop the match, and as the flame died they saw the hurtle of a long, ropelike body across the flame and the thud against some piece of furniture that told of the miss and the rattle of things flung down as the savage death-dealer turned in rage.

Sheer and horrible blackness again. The Rabbit completely out of sight—hidden in there with the jararaca. "Could snakes see in the darkness?" Helen was asking herself. Was Calvin absolutely doomed? She found her heart crying out against such a thing.

Light suddenly bursting out again from behind the door. They couldn't see Calvin Boldre, who had struck another match. He deliberately struck another match to draw his deadly foe. Then a little scream from Miriam. The swish of something through the air, the smash of something struck. A plain and powerful "Damn!" from the Rabbit.

"Got him?" cried Miriam's voice.

"Chair spoiled my stroke," said Calvin Boldre. "Keep quiet, Miriam, I'm trying again."

Again the light, again that deliberate drawing of death. A scuffle, a stamp, a shout of fear from Calvin Boldre. Then Miriam's voice screaming:

"He's got the Rabbit! Killed him! What are you all doing out there to allow—"

"Shut up, Miriam!" came Calvin Boldre's voice edgily. "He hit me, but didn't bite. I'm quite all right."

A match burst out again, but this time it wasn't held. Those on the verandah saw it soar through the air and fall to the floor. It burned there for a moment in a small flame. Only for a moment, but it was enough. The jararaca attacked it.

Against the light they saw the lunge of the sinuous body, the hammer stroke of a devilish head. Then the cue swished like lightning through the air, the ropelike neck and body was smashed into a "V" and dashed right across the room. Quiet. Then the steady light of a held match.

"I guess it's all right," said the voice of the Rabbit. "He's dead."

Then they swarmed in on him. Half a dozen flaring matches revealed that hideous broken-backed thing lying under the wall, revealed Miriam in a dead faint on her bed.

The Rabbit was looking at them, green in the face, shaking, hardly able to stand.

"Rabbit the Snake Killer," he said with his nervous, shaky smile, "I say, do you mind if I sit down? I feel rather cheap."

"My dear," said Helen to him, "we're the people who are really cheap." And as she helped him to a chair their eyes met and held, and there came into his something so wonderful that Helen was amazed at herself for ever thinking him inconspicuous.

For now she understood him as they all understood him. He had funked that pararaca, funked it with a sheer, backboneless panic quite beyond their understanding. Their own fear of the snake had been bad enough, but it was nothing beside the wringing terror that had attacked him. And yet he had been the only one of them to go in and face that terror.

Insignificant and ridiculous he might have seemed and more fearful than any of them, but he was a finer man, with a finer courage than any there.

Val admitted it. "You have us beat, Rabbit. You're a better man than any of us."

He said to Helen later: "I talked like a fool about Boldre the other day. He's a magnificent chap. We were blind not to see it."

"Yes," said Helen, with bright eyes. "Blind—but we are beginning to see."

Her brother Maurice drove all this home when he returned. Miriam had told him all about it, but Helen had to speak of it.

"Yes," said Maurice. "Thank God, Calvin was on the spot. He never fails anybody."

Maurice took Calvin Boldre so much for granted that Helen had to say:

"And yet one would never think—"

"Rot!" said Maurice curtly. "You're going by his build. He can't help the way he's made. He always has been the right stuff, all through, and a true sportsman."

"Yes," said Helen, though her brother's tone had been deliberately challenging.

"Oh, you do think that?" smiled her brother when she had refused to be drawn. "I imagined that perhaps you followed popular opinion. You know, the others thought that because he didn't play games with them or join their bush expeditions he wasn't a sportsman. As a matter of fact, it was because he was. He knows that he hasn't the physique up to their standard and so keeps in the background not to spoil their fun for them. That's real sportsmanship, I hold."

"It is, it is," cried Helen warmly, "and we were idiots not to appreciate it. But, but it's all going to be made up to him, the dear!"

"The dear!" said her brother, laughing and lifting his brows. "We're very ardent in our championship."

"Naturally," she said, blushing. "I'm championing my future husband, Maurice."

"By Jove," he cried. He looked at her and then became all smiles. "Good old sis. I feared—but no matter."

"You don't disapprove, then?"

"Disapprove? My dear thing, how can I when you've chosen the only real man on the Concession?"

(The End.)

"Come O'er the Eastern Hills."

O thou with dewy locks, who lookest down
Through the clear windows of the morning, turn
Thine angel eyes upon our western isle,
Which in full choir hails thy approach, O Spring!

The hills tell each other, and the listening
Valleys hear; all our longing eyes are turned
Up to thy bright pavilions; issue forth,
And let thy holy feet visit our clime.
—Blake.

The Whole Trouble.

They found him wandering around in a dazed condition, bearing the signs of a vigorous quarrel, a blackened eye and a gap in his front teeth.

Filled with pity, they seized him by the arms.

"Come along, old chap. Let us take you home to your wife."

He groaned piteously.

"Don't you understand?" he murmured, feebly. "That's where I got it."

The equable climate of Canada's Maritime Provinces, with its benefical degree of humidity, is noted for its healthfulness, and is one of the greatest assets of the region.

Canada's exports of paper exceed those of any other country in the world, and in the matter of newsprint paper her exports are probably greater than those of the rest of the world combined.

Treat corns with Minard's Liniment.

It is found that animals that have had a liberal diet, store up in their bodies enough vitamin A to last a long time, if they are deprived of it.

Spring Tints

Gaily colored frocks this Spring! Underthings in soft shades to match. Tint them in ordinary water—but with true dyes. Dipping will do it—in ordinary cold water—but you must have real dye to get a smooth, perfectly even tone.

Diamond dye powder is fifteen cents at any drugstore; so why do half a job with something not half so effective? And when you want the tint to be permanent, just dip in boiling water instead of cold!

The druggist has color cards and simple directions for doing perfect dyeing of all sorts of material; silk or wool; linen, cotton goods; mixed goods, or any goods at all; and exquisite tinting of dainty things. Or, send for a marvelous book of suggestions in full colors. Ask for Color Craft! Address DIAMOND DYES, Dept. N31, Windsor, Ontario.

NEW AUSTRALIAN CAPITAL OPENED BY HENRY, DUKE OF YORK

Cairn at Adolphustown

Where Sir John A. Macdonald first became a Canadian after leaving Glasgow in his youth. A cIarn is also to be erected as a Confederation recognition of the great Conservative statesman. On its face wil be a bronze tablet telling the story of the young Scot, who became a great and outstanding Canadian statesman.

KING'S MESSAGE PRESENTED BY POPULAR ROYAL SON.

Opened Monday Morning and News in Toronto Sunday Night. Australia is Hours Ahead.

Canberra, May 9.—At 11 o'clock this morning (Australian time) the Duke of York unlocked the door of Parliament House with a golden key, unveiled a statue of the King, his father, and thus inaugurated the new Federal Capital of Australia.

A Royal Commission was then read empowering the Duke to act as the King's representative and open Parliament.

In his Speech from the Throne the Duke said that to-days' historica occasion brought back vivid memories of that other May 9, 26 years ago, when the King, as Duke of Cornwall and York, opened the First Parliament of the Commonwealth. Both the King and Queen retained the happiest recollections of that great event and of their visit to Australia.

"It is, perhaps, peculiarly fitting that we should celebrate the birth of this new Capital lity just after the close of the Imperial Conference, which represents the beginning of another chapter in our Empire story.

"May this day's ceremony mark the rededication of this Commonwealth to those great ideals of liberty, fair dealing, justice, and devotion to the cause of peace for which the Empire and all its members stand."

Dame Melba sang the National Anthem.

Premier Stanley Bruce, addressing the Duke of York, emphasized Australia's loyalty to the Throne. Australia, now a nation, realized with gratitude the protection she enjoyed under the British flag. "Great though our progress has been," he said, "Australia is but on the threshold of achievement. In the future millions of the British race will people this land in numbers surpassing the Motherland. And, standing resolutely for those principles of freedom and justice on which the Empire is based, who can foretell how great a part our nation will play in the years to come?"

MOTOR CRASH KILLS LONDON BROTHERS

Street Accident Takes Pathetic Toll.

THREE INJURED AS WELL

London, Ont., May 8.—George Buckle, aged 12, and his brother, Keith, aged 3, sons of Mr. and Mrs. George Buckle, a C.N.R. trainman, of 295 Grey Street, were killed at Dundas and Waterloo streets at 3.30 o'clock this afternoon, when their father's car in which they were riding was struck by another machine driven by Alfred Benbow, an elderly man, residing at Tambling's Corners, South London. Mr. Buckle and his wife, another son, Ross, aged 6, and Miss Sarah Dunbar, a friend from St. Mary's, who was also in the Buckle automobile, were more or less injured, and were taken to Victoria Hospital for treatment, but later were able to be removed to their homes.

Benbow is being held by the police, though no charge has yet been laid. Coroner J. C. Wilson has ordered an inquest.

Spectators claimed that neither car in the accident was travelling fast. Benbow was going north on Waterloo street and Buckle west on Dundas street, when Benbow's car struck Buckle's, seemingly just nicking the back fender, but Buckle's machine was thrown toward the northwest corner of the intersection, and after skidding 40 feet, turned upside down. Both little victims were dead when they were taken from the wreckage, their heads having been smashed in contact with the pavement. Benbow is said to have told the police that he did not see Buckle's car.

VISITING DOCTOR WOUNDS FRIEND AND KILLS SELF

Montreal Hospital Sees Attempted Murder and Suicide.

MANITOBA DOCTOR THE AGGRESSOR.

Montreal, May 8.—Shooting Dr. J. F. Puddicombe of Ottawa in the neck and arm, Dr. Frank Brown of Carman, Man., to-night turned the gun on himself and committed suicide in the room of Dr. Puddicombe in the Royal Victoria Hospital here. The tragedy took place about 9 o'clock. Dr. Brown, who had been employed in Quebec with the W. I. Bishop Construction Company, had been visiting Montreal and called on Dr. Puddicombe, who is an interne of the Royal Victoria Hospital. No cause has yet been assigned for the shooting.

LIQUOR ON SALE IN NORWAY AGAIN

Numerous Customers Stand in Line to Make Purchases.

Oslo, Norway.—(A. P.) — Norway's change from dry to wet came into operation here quietly recently, when the sale of liquor in bottles began. Thirteen stores were opened at 11 o'clock in the morning and numerous customers stood in line waiting to put into effect their new found liberty.

Though police were there to keep order and prevent crowding, they found their task an easy one, for the customers were served quickly, and quickly disappeared when they had received their supplies.

Brandy and whiskey were most in demand, while wines were not so popular. The only restriction is as to the age of the purchaser, the age-limit being fixed at 21. Any amount can be bought and paid for until 5 o'clock in the afternoon.

TORNADOES ADD TO KANSAS TRIALS

Quarter Million Damage and Eleven Lives Lost.

HOUSES DEMOLISHED, MORE CRIPPLED.

Hutchinson, Kansas, May 8.—Eleven persons were known to be dead and probably a hundred or more injured as a result of tornadoes which swept northeastward through Barber, Kingman, Reno and McPherson Counties late Saturday night.

Cloudbursts that occurred along the storm's path flushed further the already swollen streams. Water stood four feet deep to-day in some low places.

Probably 800 residences along the path of the wind were damaged or demolished, while the combined damage to property will run into hundreds of thousands of dollars.

Three dead in Barber County, two more in Kingman County, one in Hutchinson and four in the Medora and Inman communities north of Hutchinson made up the toll of dead.

There were 40 injured under treatment at a hospital here to-night. About 40 others were cared for at emergency stations, and as many more elsewhere.

Property damage in the southwestern corner of McPherson County is expected to run close to $250,000.

RIDE STEALER BADLY MANGLED

Victim May Not Recover from Amputations.

London, Ont., May 8.—John Raymond, aged 26, whose home is in Montreal, was badly mangled late this afternoon when he fell from a C.P.R. freight car on which he was riding and rolled under the wheels near the Richmond street crossing here.

He was rushed to St. Joseph's Hospital, where it was found necessary to amputate the left leg below the knee, and also the right foot. In addition he is suffering from a terrible wound in the head and other hurts, and his recovery is doubtful.

Raymond stated that he had been living in Chicago and that when he received a letter stating that his mother was very ill he determined to go home to Montreal. He was beating his way, and was riding on the truss rods beneath a freight train when his strength gave out and he rolled under the wheels just as the train entered this city.

DYNAMITING THE DYKES

Illustration shows plainly how the Mississippi River bed is higher than surrounding country.

FRENCH AVIATOR FLYING ATLANTIC

Capt. Saint-Roman Heading From St. Louis, Senegal, to Brazil.

DISTANCE 1,875 MILES.

Dakar, West Africa. — Captain Saint-Roman, French aviator, left St. Louis, Senegal, at 6.30 o'clock this morning in his attempt to fly across the Atlantic in a voyage to Pernambuco, Brazil, a distance of about 1,875 miles.

Advices from St. Louis said that the aviator expected to land first at St. Paul's Rocks, about 540 miles from the coast of South America, before continuing on the Pernambuco.

Capt. Saint-Roman passed over Dakar at 7.10 a.m. and headed southwest over the Atlantic.

On Tuesday the French bureau of aeronautics announced that official sanction for Captain Saint-Roman's flight had been withdrawn because he was planning to proceed across the Atlantic without pontoons. He substituted ordinary landing gear after a pontoon was damaged, and it was pointed out by the bureau that a forced descent on the sea with such landing gear would mean disaster.

The bureau of aeronautics supplemented its first announcement with the statement that official sanction for the flight would be given if the aviator consented to reinstall pontoons.

Paris.—The possibility that Capt. Charles Nungesser, the French war ace, will hop off Friday on his attempt to conquer the Atlantic in a flight from Paris to New York, is now considered strong.

MORE BAD LUCK

Flight Plane in Mishap.

Paris.—The giant biplane in which Captains Nungesser and Coli will attempt their non-stop flight to New York had a narrow escape from destruction by fire at 3 o'clock Thursday morning, when an electric light bulb fell to the cement floor in the hangar at Villa Coublay and instantly ignited 20 litres of gasoline. One lower wing was badly burned, and only quick work of the staff of mechanics which was engaged in installation of the instruments saved the plane from catching fire. Rushing to the door of the hangar, the men yelled for help from a near-by hangar, and in less than two minutes the Levasseur machine was wheeled to safety on the landing field.

FRANCE SENDS SECOND PLANE TO BRAVE ATLANTIC WATERS

Captains Charles Nungesser and Francois Coli Leave for New York.

NO WORD OF PLANE THAT LEFT FOR BRAZIL.

Paris, May 8.—Somewhere over the waters of the North Atlantic a French aeroplane is winging its way from Paris to New York to-night. In the pilot's seat is one of the greatest heroes aviation gave to the war, Captain Charles Nungesser. Next to him is a veteran navigator, both of the sea and of the air, Captain Francois Coli.

Since they left the French coast not long after dawn this morning, not one word of them has come back to Paris. Their "White Bird" carried no wireless and the route they are probably taking is many miles north of the path steamships plow in their procession between New York and Channel ports.

Aside from their skill, Captains Nungesser and Coli are staking their fate almost entirely on their plane, its single 450,horsepower motor and enough gasoline to keep it going until to-morrow evening. To reduce weight and wind resistance and thus increase their speed, they decided to cut themselves off from the world by doing without wireless.

Wtih the same end in view, they dropped their landing gear 10 minutes after they got into the air at Le Bourget, and if all goes well the two Frenchmen expect to glide down upon the waters of New York Bay not far from the Statue of Liberty to-morrow afternoon.

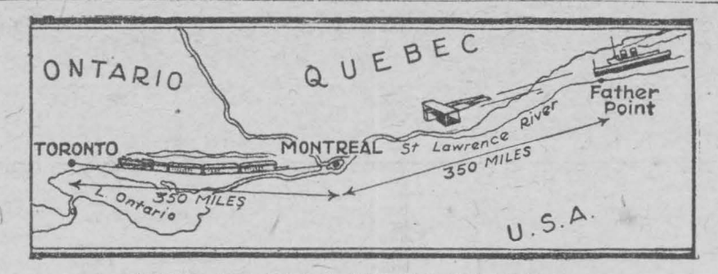

Up to noon Monday no word has been received from Capt. Saint Roman, who left St. Louis, Senegal, for Pernambuco, Brazil. All shipping in the southern waters are on the lookout for the missing aviators.

DETROIT RIVER PROJECT

Higher Bridge to Accommodate Ocean Vessels is Approved.

Washington. — Advocates of the Great Lakes-St. Lawrence waterways won a fight to-day, when the war department approved a new plan for a bridge over the Detroit river at the city of Detroit. Plans approved call for a span of 152 feet instead of 135 feet, proposed by the company constructing the bridge.

This byplay in the long-continued struggle for building the Great Lakes-St. Lawrence waterways, has been going on for some time. The city council of Detroit approved plans for a 135-foot span and everything was in readiness to erect it. C. P. Craig, of Duluth, secretary of the Waterways Association, immediately registered a protest on the ground that the bridge was not high enough to permit passage underneath of ocean going vessels contemplated by completion of the waterways project. The protest insisted that the move was designed to nullify the waterways program by placing permanent and extremely expensive obstruction to navigation. He held that to obstruct contemplated navigation was as vicious as if navigation were actually interfered with. The war department sustained Craig's stand.

WOULD ZIP MAIL THROUGH BY PLANE.

How Toronto would get its overseas mail 24 hours earlier under new Ottawa proposals is shown in this map. The postmaster-general has asked tenders for an air mail service between Father Point, P.Q., and Quebec, whereby mail from Great Britain will be landed from the British liners at Father Point and rushed by airplane to Montreal, the plane arriving 24 hours before the ship gets in. The mail bags would then speed Toronto-ward with their usual celerity of eight hours or thereabouts. In reality all Canada would benefit by the move, in which the approximate distances involved are shown.

CANADIANS BACK FROM U.S. CAN REINSTATE AFTER ONE YEAR

New Regulations at Ottawa Make it Easier for Canadians Who Naturalized in U.S. to Renew Canadian Citizenship.

A BOON TO CANADA AND BENEFIT TO CANADIANS.

Ottawa. — Repatriated Canadians who have been naturalized in the United States and have returned to Canada will find it simple to reassume the mantle of Canadian nationality in future. The governor-in-council has approved a new ruling of the state department of Canada that such returning wanderers may be re-established as Canadians after one year's residence, instead of being considered aliens and being subjected to alien naturalization regulations and having to wait five years.

Hon. Fernand Rinfret, secretary of state, recommended to the government that applications of natural born Canadians who have been naturalized in the United States, should be considered as special cases and that special certificates be issued after a residence of one year in Canada, in cases where it is shown that the applicants intend to continue residence in Canada and give evidence of this intention, not only by affidavit or statement but by the acquisition of property or otherwise.

The number of Canadians returning to Canada last year was about 50,000 though the majority had not taken out American naturalization papers. The new ruling will especially benefit Canadian businessmen sent to establish branch houses or work in branches in the United States. For business reasons they found it advisable to become naturalized, but when ultimately transferred back to Canada they found they had to wait five years before reassuming Canadian citizenship.

There is no provision under the naturalization act of 1914 and 1920, under which a certificate of naturalization may be issued on a residence of less than five years. The imperial conference is interested because anyone becoming a Canadian citizen also becomes thereby a British citizen.

The naturalization laws committee of the imperial conference of 1901 reported: "We do not think it necessary to maintain the distinction made in the act of 1870, section eight, between re-admission and naturalization. A person who has become an alien under the provision of the act must before being qualified for re-admission fulfill the same conditions as are required for naturalization. We see no sufficient reason for distinguishing between a statutory and any other alien and consider that it would tend to the simplification of the law if the provisions of section eight were repealed and not re-enacted."

There is a precedent for the new ruling, the provision for the re-naturalization of women who married aliens. Sub-section five of section two of the naturalization act provides that, "In the case of a woman who was a British subject previously to her marriage to an alien and whose husband has died or whose marriage has been dissolved, the requirements of this section as to residence need not apply (the four years clause) and the secretary of state may, if he thinks fit, grant a certificate of naturalization, although the four years residence has not been within the last eight years before the application."

Louisiana Hard Hit.

The above map illustrates the current danger point in the great Mississippi flood. Several low-lying counties on the west side of the river in the northeastern portion of the state are inundated and the deluge is rapidly spreading. The threatened zone extends as far west as Shreveport, situated on the Red River, the swelling waters of which, pouring down to add to the Mississippi torrent, are overflowing thousands of valuable acreage. The crest of the deluge is now in the Vicksburg area and is plunging southward toward New Orleans and the Gulf. The dynamited crevasse south of the Crescent City is reported to be holding the water there at a stationary level and the southern metropolis is not deemed in immediate peril.

Markets

TORONTO.

Man. wheat—No. 1 North., $1.60; No. 2 North., $1.56; No. 3 North., $1.48½, c.i.f. bay ports.

Man. oats, No. 2 CW, nominal; No. 3, not quoted; No. 1 feed, 60½c; No. 2 feed, nominal; western grain quotations in c.i.f. ports.

Am. corn, Toronto freights—No. 2 yellow, kiln dried, 95c; No. 3 yellow, kiln dried, 92c.

Millfeed—Del. Montreal freights, bags included: Bran, per ton, $32.25; shorts, per ton, $34.25; middlings, $40.25.

Ont. oats, 50c f.o.b. shipping points.

Ont. good milling wheat—$1.26 to $1.28, f.o.b. shipping points, according to freights.

Barley—Malting, 72c.

Buckwheat—73c, nominal.

Rye—No. 2, $1.00.

Man. flour—First pat., $8.40, Toronto; do, second pat., $7.90.

Ont. flour—Toronto, 90 per cent., patent, per barrel, in carlots, Toronto, $5.30; seaboard, in bulk, $5.50.

Hay, No. 2, timothy, track, Toronto, $16.55.

Cheese—New, large, 17c; twins, 17¼ to 17½c; triplets, 17¼ to 17½c; Stiltons, 20c; Old, large, 20c; twins, 20¼c. Old Stiltons, 23c.

Butter—Finest creamery prints, 43 to 44c; No. 1 do, 42 to 43c; No. 2, 41 to 42c. Dairy prints, 34 to 35c.

Eggs—Fresh extras, in cartons, 35 to 36c; fresh extras, loose, 35c; fresh firsts, 33c; fresh seconds, 29 to 30c.

Poultry, dressed—Spring chickens, 60c; chickens, 5 lbs. up, 40c; do, 4 to 5 lbs., 38c; do, 3 to 4 lbs., 35c; do, 2½ to 3½c, 34c; broilers, 1½ to 2½ lbs., 38c; hens, over 5 lbs., 32c; do, 4 to 5 lbs., 30c; do, 3 to 4 lbs., 28c; roosters, 25c; turkeys, 46 to 47c; spring ducklings, 38c.

Beans—Can. hand-picked, $3.60 to $3.90 bushel; primes, $3.45 to $3.60.

Maple products—Syrup, per imp. gal., $2.25 to $2.30; per 5 gal., $2.15 to $2.25 per gal.; maple sugar, lb., 25 to 26c.

Honey—60-lb. tins, 13 to 13½c; 10-lb. tins, 13¼ to 13¾c; 5-lb. tins, 14 to 14½c; 2½-lb. tins, 16c.

Comb honey—$4 to $5 per dozen.

Smoked meats—Hams, med., 30 to 32c; cooked hams, 43c; smoked rolls, 25c; breakfast bacon, 28 to 33c; backs, boneless, 32 to 42c.

Cured meats—Long clear bacon, 50 to 70 lbs., $21; 70 to 90 lbs., $19; 90 to 100 lbs., and up, $18; lightweight rolls, in barrels, $11.50; heavyweight rolls, $38.50 per bbl.

Lard—Pure tierces, 14 to 14½c; tubs, 15 to 15½c; pails, 15½ to 16c; prints, 16½ to 17c; shortening tierces, 13¼c; tubs, 13¾c; pails, 14¼c; blocks and tins, 16¼c.

Heavy beef steers, $8.50 to $9; do, fair, $7.50 to $8; butcher steers, choice, $8.75 to $9; do, fair to good, $7.50 to $8; butcher heifers, choice, $8.25 to $8.75; do, com., $6.75 to $7.25; butcher cows, good to choice, $6.75 to $7.50; do, fair to good, $5.25 to $6; do, com. to med., $4.50 to $5; do, canners and cutters, $2.50 to $4; butcher bulls, good to choice, $6 to $7; do, med., $5.25 to $5.75; do, bolognas, $4.50 to $5; baby beef, $8.50 to $11.00; feeders, choice, $7.00 to $7.50; do, fair, $6,25 to $6.75; stockers, choice, $6.50 to $7; do, fair to med., $5.50 to $6; springers, $80 to $110; milch cows, $75 to $90; plain to med. cows, $45 to $65; calves, choice, $10 to $12; do, med., $8 to $9; do, com., $5.50 to $6; lambs, choice $14 to $14.50; bucks, $11 to $11.50; sheep, choice, $8 to $9; do, heavies, $6 to $7.50; do, culls, $4 to $5; hogs, thick smooths, fed and watered, $9.75; do, f.o.b., $9.25; do, country points, $9; do, off cars, $10.15; select premium, per hog, $1.90.

MONTREAL.

Oats, CW, No. 2, 75c; do, No. 3, 67c. Flour, Man. spring wheat pats., firsts, $8.30; do, seconds, $7.80; do, strong bakers', $7.60; winter patents, choice, $5.90 to $6. Rolled oats, bag of 90 lbs., $3.40 to $3.50. Bran, $32.25. Shorts, $34.25. Middlings, $40.25. Hay, No. 2, per ton, car lots, $14.50.

Calves, med. .to good, $7 to $8; hogs, $10.50 and $10.75. Market slow.

NEW BASIS FOR HOGS STARTING MAY 9TH

The conference held at Ottawa on April 22 and 23, agreed upon the following method of purchase for hogs.

Price quotation shall be on the basis of 'select bacon" and "thick smooth" grades, both quotations to be given. An initial differential in price of 50c per hundred pounds was agreed upon between the above grades.

Prices will be quoted for hogs, commencing May 9th, on the weight off car (W.O.C.) basis at the public stock yards and packing plant. For example, using $10.75 as a basis:

Select bacon. Price W.O.C. $10.75 cwt.
Thick smooth " $1 per hog, under selects.
Shops and feeders, $2 per hog, under selects.
Heavies, $3 per hog, under selects.
Ex. Heavies, $2 per cwt. under selects, or $8.75 per cwt.
Sows, No. 1, $3 per cwt. under selects, or $7.75 per cwt.
Sows, No. 2, $3 per cwt. under selects, or $6.75 per cwt.
Roughs, at their value.
Stags, $6 per cwt. under selects, or $4.75 per cwt.

Salt Springs.

Although salt springs yielding weak brines are scattered over Nova Scotia and parts of New Brunswick, the first discovery of rock salt was made at Malagash by diamond drilling in 1918. Mining of this bed was begun that year and has proceeded steadily to the present.

MORRISBURG PUBLIC SCHOOL

No. enrolled, 202.
Average attendance 182.3.
Per cent. attendance 91.85.
No. days school was open—15.

Room A—Entrance Class.

Mona Marshall, Sheridan Casselman, Hugh Shennett, Genevieve McDonald, Leona Hutt, Arthur Laurin, Muriel Weegar, Helen Janack Edna Ulman, Ida Gogo, Jean Vipond, Grace Casselman, Rose Taylor, Joseph Bourette, Aden O'Shaughnessy, Darwin Stata, Marjorie Hutt, George Aikman, John Millward, Dwane Harriman, George Jenkinson, Lawrence Coligan, Jean Burkholder.

J. Clinton Fetterly, Principal.

Jr. IV Class—

Wallace Guay, Gordon Thom, Gertrude Casselman, Arlington Gamble, Wellington Hall, Craig Merkley, Raymond Empey, Audrey Daley, Lawrence Eamon, Bonnie Carson, Ruby Shennette, Clifford Gordon, Carl Phillips, Lloyd VanAllen, August Rohrig, Harry Smith, Donald Myers Ralph Hummell, Jean Meikle, Audrey Myers, Robert Merkley, Ethel Mellan, George Smith, Aaron Agulnik, Gladys Smith, Giles Harper, Fletcher Armstrong, Stella Becker, Dorothy Beckstead, George Weegar.

G. A. Foulds.

Hugr O'Malley, Helen Lawson, Arvilla Heagle, Arthur Coligan, Lenetta Harper, George McGillivray, Spencer Clark, George Tindal, Paul Heagle, Dorothy Lynch, Clara Street, Dallas Adams, Gene Roy, Teresa Empey, Lawrence Snyder, Audrey O'Shaughnessy, Gladys Aikman, Edith Beckstead, David McDonald, Leonard Laurin, Marjorie Deeks Frank Hargreaves Marion Gamble Norman Clark, Beaumont Hutt, Edith VanAllen, Eddie McKoy, Marion Cole, Gerald Hunter, Gordon Cole (absent) Ruth Robertson, Isabel Duval, Della Coir, Marian Fetterly, Gordon Foulds, Sybil Armstrong, Donalda Becksted, Robert Marshall, Lillian Janack, Helen Gamble, Herman Smith.

M. Moore.

Room D.—

Stewart Hall, Iris Tindal, Blanche Weston, Charles Weegar, Clifford Reid and Ruth Weegar equal; Patrick Myers, Willie Locke, Howard Eamon, Douglas McGillis Arthur Williams, Ross McIntyre, Jack Ford, Annie O'Malley and Winnie Devaul equal; Betty Weston, Floyd Fetterly, Alfred Gamble, Geo. Williams, Mildred Fetterly, Eileen Lynch, Gordon McKoy, Willie Gordon, Phyllis Hummell, Alice Finnie, Reginald McGillivray, Donald Beckstead, Aplin Street, Vernie Devaul, Cecil Cole, Marjorie Devaul, Grace Casselman and Dorothy Barkley, equal, Herbert Mallan, Ronald Hunter, John Stitt.

C. L. Hazell.

Sr. I Class—

George Lee, June Fetterly, Paul Laurin, Ruth Neelin, Phyllis Deeks, Vaudrey Mattice, Aldena Phillips, Mildred Wereley, Edith Taylor, Jack Hummell, James McIntyre, Harper Bass, Joe Agulnik, John McKoy, Arthur Fentiman, Lena Moyle, Margaret Mellan, Stella Mallan, Clifford Lapier, Oval Millward.

Jr. 1 Class—

Minnie Cole, Brenda Finnie, Elliott Timmins, Carman Reddick, Jennie Casselman, Greta Casselman, Grant Hutt, Harold Myers, Basil Aikman, Jack McGillivray, Nellie Dillen, Billy Coir, Geo. Jarvis.

M. Smith.

Class A—

Elinor Cross, Clara Eamon, Marie Duval, Stuart Martin, Doris Adams, Ida Mattice, Raymond Reid Basil Millward, Bill Pyke.

Class B—

Margaret Clark, John O'Malley, Percy O'Shaughnessy, Ruth Mattice, Raymond Smith, Kenneth Empey, Edmond Jarvis, Jean Duval, Jill Ford, Ross Becker.

Class C—

Donald Reddick, Frances Duval, Patricia Cochrane, Douglas Hargreaves, Earl Coir.

Class D—

Arthur McKoy, Eddie Mattice, Dorothy Bowman, Jean Hummell, Hilliard Bass, Irving Cochrane, Denzil Phillips, Luella Bass, Dalton Harriman.

Gertrude Campbell.

WILLIAMSBURG

The Council met at Williamsburg on Saturday May 7th, 1927. Members all present. Minutes of previous meeting read and adopted. The tender of John A. Reddick for the cleaning out of the Casselman drain was accepted.

The following orders and accounts were passed—

S. Salmon sawing account	$ 4.00
Leader Pub. Co. printing ac.	33.75
C.N.R. crossing gate, expenses for Feb. 1927	29.25
Globe Indemnity Co., premium road accident policy	151.00
Sawyer Massey Co., repairs for grader and crusher	70.95
Canada Ingot Iron Co., for iron sluice	27.72
Municipal World, for supplies	1.65
Ezra McMillan, pay on salary as Road Supt.	62.50
G. C. O'Shaughnessy, for cutting cedar and for 22 pieces of cedar	23.60
S. A. Kyle, winter work, G. R. Con. 6	5.00
Ross Swerdfeger, hauling tile and grading	5.50
B. G. McIntosh, grading	6.00
A. J. Casselman, cartage and express grader blade	1.40
J. A. Reddick, cutting brush and dragging	27.15
Elgar Dillabough, work, Maria town streets	8.00
Nathan Tupper, dragging and hauling cedar	23.80
Ritchie Tupper, dragging	6.75
G. F. Barkley, dragging	13.50
Fred McMillan, dragging	4.00
Mert Saddlemire, dragging	2.00
Geo. L. Barkley, paint and brushes for crusher wagons	3.50
Ward Casselman, dragging	3.60
T. C. Merkley, work on bridges and crusher wagons	8.50
Isaiah Loucks, dragging	9.00
John Bowman, dragging	2.70
Hugh McHaffie, hauling bridge cedar	4.50
G. A. Casselman, dragging	3.50
Melvin McIntosh, dragging	9.00
H. A. Gallinger, dragging	5.30
Robt. Cunningham, for bridge irons	5.00
E. R. Marselis, dragging	7.75
G. W. Colquhoun, dragging	2.00
J. E. Barkley, dragging	4.50
Geo. Hess, dragging	10.00
Nathan Tupper, work on road Con. 3	7.40
J. E. McMillan, dragging	2.25
Thos. Henderson, dragging	2.50
John Coir, work, Mariatown streets	14.60
J. G. Garlough, one brush hook	1.00
Robt. Norval, work repairing crusher	11.00
P. E. Barkley, bridge irons	2.00
Chas. Cassel, cutting brush.	10.00
F. R. Casselman, cutting brush, 1st Con.	21.60
N. McGillis, fan belt and punch	2.93
Imp. Oil Co. for oil	62.30
Frothingham & Co., for brush hooks	7.50
Isaiah Robinson, cutting brush	4.50
Wallace Gallinger, dragging E. T. L.	15.70
S. W. Allison, dragging	.90
Labon Barkley, work, Mariatown streets	77.30
Murray Styles, salary as assesor and postage	91.00

The Council adjourned to meet again as a Court of Revision on Assesment Roll and other business on Saturday June 4th, 1927, at one o'clock p.m.

M. S. BECKSTEAD, Clerk.

BEING A GOOD NEIGHBOR

Being a good neighbor involves more than just living near another. If you want to be a good neighbor you must consider your neighbor's interests as well as your own. For instance—If your neighbor cleans his yard, rakes the leaves off and burns them, or carts them away, is it fair on your part to allow the leaves and waste paper on your lot to be carried by the wind over on the lot of your neighbor. If you keep hens, and your neighbor does not, is it fair or neighborly to allow your hens to go over onto your neighbor's lot and scratch up the flowers and plants. The same applies to your dog, and also to your children. There are so many little neighborly considerations, if practiced, would make you and your neighbors such good friends. Even in making front yard improvements it is well to sometimes consult your neighbor so that there may be a combination in improvements that would be for mutual benefit. It is better to consult than to dictate, and it will make life so much pleasanter to both. Of course, if a neighbor prefers to be a nuisance, the best way to do is to treat him as such—Winchester Press.

FOR SALE

One seven-passenger car in good condition, run less than 18000 miles, offered at a bargan for quick sale. For particulars pply to

W. P. ALLISON,
Allison Poultry Farm,
ac Morrisburg, Ont.

FOR SALE

A cow for sale—part Holstein and Jersey. Apply.

WM. I. BECKSTEAD,
ap R.R. 1 Morrisburg, Ont.

FARM FOR SALE

A small farm for sale, with good buildings, on Ottawa highway, convenient to town. Apply,

JOHN SHEEHAN,
bp Morrisburg.

POULTRY HIDES & FEED BAGS

The live poultry market is high now. If any for sale. don't delay The price of hides is good also Bags, we handle any quantity. Anything you may have in our line—the top prices we pay.

J. TEVAN,

Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage. 60c. a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

BISHOP'S CONFERENCE AT MOULINETTE

The annual Bishop's Conference for the Deanery of Stormont was held in Christ Church, Moulinette, on Thursday, May 5th, and was the most enthusiastic and successful conference that has been held by the Deanery.

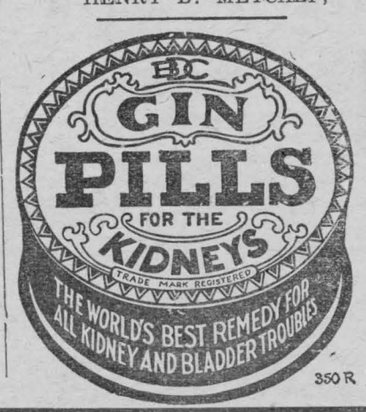

The Conference opened with the Holy Communion, the sermon being preached by the Right Rev. J. C. Roper, D D., from the text "Then the same day . . came Jesus and stood in the midst." (St. John 20.19). He presented to the Conference the thought that all Christian Life centres around the message of Easter, which prepared us for the unseen, living presence of Jesus in our midst. "Where two or three are gathered together in my name there am I", this fact is the foundation of church attendance. Sitting comfortably at home listening in by radio to a church service is not worship. It is beautiful indeed that people shut in by infirmity or sickness, and those in remote places as, for example ,in the far north, can thus have the services brought to them. It is a boon to them; they couldn't do anything else. To sit at home and listen in, instead of attending a service within reach, is a confession that such a one has no idea of what true worship really is. Christian teaching centres in a living person who reveals the Father and sends the Holy Spirit, the Comforter. Thought and conditions change but a living personality does not change; the presence of Jesus is the stability of the Church. The Church has a two-fold life of activity—love to God and love to man—and the two cannot be made one, nor can the second be placed first. The spirit of social service has brought about a tremendous change in conditions of life in the Anglo-Saxon world since 1800. Canada is far behind other countries in the care of her feeble-minded children who are capable of receiving training. Now, at last, an attempt is being made to establish a school to do this work. We must try not only to maintain the Church, but must also go out and do God's service—doing community service, bringing a new, high spirit into it that it may be ennobled and hallowed.

The congregation and the number of communicants at this service were unusually large. The congregation of Christ Church served a sumptuous repast at noon, after which the Conference reassembled for the Public Meeting at which the Bishop presided. Canon Netten, Cornwall, gave a thoughtful and impressive talk on "Church of England Principles and there Relation to the Reunion of Christendom". He stated that there is a definite trend toward the reunion of Christianity today and that the Church of England is deeply interested. The World Conference on Faith and Order, which is to assemble in Lausanne, Switzerland, in August, and to which the Bishop goes as a representative of the Church in Canada, came from within the bosom of the Church of England having been initiated by the Church in the United States.

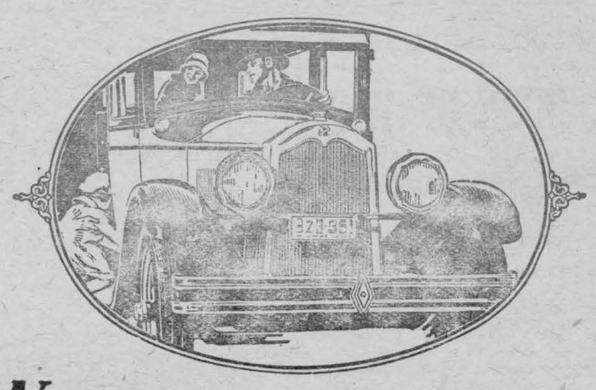

The World Call to the Church from the mission fields—Africa, India, the Far East, and the Moslem World—was reviewed by Rev. J. L. Homer, Iroquois, and Rev. C. A. Bender, Aultsville. After Mr. Homer had presented the need in China the Bishop announced that, at the urgent request of the Chinese Government, all foreigners have been withdrawn from the interior. As a result the work in the Diocese of Honan is left entirely in the hands of the Chinese, Bishop White and the last of his staff of Canadian workers having retired to the coast.

A hearty vote of thanks was tendered to the Bishop, Canon Netten, Rev. J. L. Homer, Rev. C. A. Bender, for their helpful addresses, and to the Rector and people of Christ Church for their warm welcome to the Conference and their gracious hospitality.

HENRY B. METCALF,

350 R

Not in a PRICE Class but in a VALUE Class

McLAUGHLIN-BUICK stands alone—not in its price, which it shares with others—but in its VALUE, which it shares with none.

During the past nine years the public of this continent has invested more of its automobile dollars in McLaughlin-Buick than in any other make of gear-shift car.

And McLaughlin-Buick, true to its purpose and promise, has constantly striven to improve its quality—to better its value. The economies effected through McLaughlin-Buick's volume of sales have been utilized to enrich still further the quality of the car—by such improvements as the Sealed Chassis, the Torque Tube Drive, Mechanical Four-Wheel Brakes, an Engine Vibrationless Beyond Belief and the increased luxury and refinement of McLaughlin-Buick Fisher Bodies.

McLaughlin-Buick is today, as always the ONLY car in its value-class. MF-2216

Safety on the Highways must be maintained

NEW SPEED LIMIT THRUSTS GREATER RESPONSIBILITY ON DRIVERS FOR CARE AND COURTESY.

A GREATER responsibility for alert caution rests on the motorist using the highways now that the speed limit has been raised.

In every case speed must be governed by the circumstances.

The change in the law does not to the slightest extent relieve the motorist from responsibility for careless or reckless driving. Indeed, in this respect the faster movement of traffic on the highways will thrust upon drivers a greater necessity for caution.

In villages, in heavy traffic, at cross roads or railway crossings, where adults or children are using the highway, near schools, and at curves and bridges, care must be exercised by the motorist in accordance with the circumstances. Obedience to the law and courtesy to others is expected at all times.

The raising of the speed limit in no way lessens the necessity for caution. The change in the law will not mitigate the offense of recklessness or carelessness on the part of any driver. Attention is particularly directed to the provision for cancellation of the car's license which may follow subsequent conviction for reckless driving.

The safety of the highways must be maintained. The Department hopes that motorists will realize this and will strive through carefulness and courtesy to continue to keep Ontario highways safe for all who use them.

Ontario Department of Highways

The Hon. GEO. S. HENRY, *Minister*

8B

What do you get for the price you pay?

VALUE is not a matter of price alone. It is simply *what you get for the price you pay.* Chevrolet is low in price—but not at the expense of quality. It is economical—because it is not cheaply built. It is supreme in value because it gives more of the things you want for the price you pay.

First and always, quality counts with Chevrolet. There is quality in the distinctive Fisher bodies; in the long, low lines; in the rich, lustrous Duco colors; in the smooth, powerful valve-in-head engine; in the scores of refinements, such as air cleaner, oil filter, gas strainer; in the luxury of its appointments and upholstery; in the long, resilient springs; in the easy, three-speed transmission.

The Most Beautiful Chevrolet in Chevrolet History is now selling at new and lower prices—the lowest for which Chevrolet has ever beeen sold in Canada.

Roadster	$655	Touring	$655
Sport Roadster	$730	Coupe	$780
Coach	$760	Sedan	$865
Cabriolet	$890	Landau Sedan	$930
Imperial Landau Sedan	$975

Now an Even *Greater* Car Scoring an even *Greater* Success

YOU know how all the resources of General Motors were used to make the original Pontiac Six the finest car ever introduced into the field of low-priced sixes. You know the wildfire success that resulted.

But do you know that the present day Pontiac—at its new low prices, is a new and finer six—an even greater car that is scoring an even greater success?

It offers the added appeal of new Fisher bodies—longer, lower, roomier and finished in new and striking combinations of enduring Duco.

It embodies important mechanical refinements—tilting-beam headlights with foot control, new transmission and brake levers, oil-tight universal joints and a clutch even smoother in action.

It provides in full measure those basic Pontiac qualities that took all America by storm—those qualities of stamina, economy and long life which were developed by over three years' testing on the great General Motors Proving Ground!

Small wonder that the tide of public preference is turning to the Pontiac Six—as never before to another six in the low-priced field! PF-2620

Lowe Brothers

OUTSIDE PAINT

Lowe Brothers "High Standard" Lead and Oil Paint will not only Protect, Beautify and increase the value of your home, but will save you money. High Standard is the most economical paint, figuring by the job cost, that you can buy.

By reason of the excellence of the materials used and the care exercised in its manufacture, "High Standard" covers half as much more surface than a so-called cheap paint.

High Standard is very easy to apply. It is ground so fine that it works easily under the brush, flowing out evenly and leaving no brush marks. It covers perfectly and produces a beautiful high gloss that endures for years. It fades slowly, leaving the surface in excellent condition for repainting.

High Standard is a high grade lead and oil paint made in thirty handsome shades and in all sizes.

R. H. BRADFIELD & CO.
Morrisburg, Ont.

We offer to our customers at all times, strictly quality products at reasonable prices. In first as well as last cost they are the most economical and the most satisfactory. This is particularly true of Paint Products which vary exceedingly in quality and service. We stand behind Lowe Brothers High Standard Paints and Varnishes as the best and most economical paints sold in Canada.

Lowe Brothers

Neptunite Varnishes

Are carefully prepared to withstand the element and severe exposure. They are light in color, work easily, flow freely and dry with a rich gloss. They will not turn white under the Hot Iron test and are unaffected by hot or cold water.

They produce a remarkable, beautiful, elastic finish that will stand all kinds of hard wear without cracking or chipping.

Neptunite costs no more than most good varnishes yet they last longer than most and present an extremely attractive and durable surface.

Made in all sizes and for various purposes.

Lowe Brothers

Mellotone Flat Paint

Beautiful, Economical, Sanitary, Mellotone is all these. Mellotone possess all the soft, delicate beauty of water paint, combined with the durable elements of a lead and oil paint. It is specially made for interior decoration.

Anyone can apply it according to directions. It leaves no brush marks or overlappings. Mellotone presents that perfect, flat surface that is so desirable.

Mellotone may be washed with soap and water as often as necessary without injury to its finish.

Lowe Brothers

Interior Floor Paint

Scrubbing is a thing of the past when you use Lowe Brothers Hard Drying Floor Paint. The finish produced by the floor enamel is so smooth and uniform that you can easily keep your floors clean by mopping.

Hard Drying Floor Paint is a varnish paint that dries over night with a high gloss. It is so easy to apply and so durable that its economy is assured. It covers perfectly and wears off evenly.

Comes in a variety of pleasing shades and in convenient sizes.

HOW TO GROOM A HORSE

Importance of Care is Obvious.

BY CLEMENTINE PADDLEFORD.

One of the sights I like to see is a perfectly conditioned horse cantering through brilliant sunshine. How he glistens! His coat is like burnished metal, but it is more beautiful than metal; for it is a rippling, living surface, moving to the flex and flow of the big muscles underneath. He is a grand picture, and he knows it. And I know that there is plenty of elbow grease in his stable.

Elaborate equipment is not needed to keep a horse in good coat. A wisp of hay or straw is almost as good as currycomb or bristle brush. A rumpled newspaper is a substitute for the chamois polishing cloth. In an emergency you can groom him with your bare hands, as it is done in India. But one thing you must use—and that is elbow grease.

In hot weather or cold, the aim of grooming is to put the horse in his stall warm, dry, clean and limber. In summer, grooming really begins about a mile beyond the stable. Let him walk that last mile, and he will come in dry, needing only a dab here and there with a damp sponge before you go to work with brush and cloth.

If he comes in hot, in hot weather, go over him swiftly with a sponge. Pay particular attention to mouth, nose, ears, the hollows under the jaw, the inside of the hind legs, and the dock, or fleshy part of the tail. If it is a scorching day, a bath with a hose is permissible. But this is so risky that it is not recommended to the person who is out of elbow grease. It should be done in the sun. Afterward the horse should be covered with a light blanket or walked in the sun until dry.

THE NEXT STEP.

When he is dry it is time for brushing and polishing. The old-fashioned currycomb, with saw teeth, is tabooed. It was a stupid, cruel tool. A bristle brush is better, and that should be used considerately on a thin-skinned, spirited animal. Get down into the roots of the mane and the hair on the fetlocks. Finish with a chamois cloth.

Dandruff, while always unsightly, does no great harm to the coat in winter. In summer it can be a positive torture. If you love your horse, you will see that he is free of it. The combination of sweat and dandruff is about as pleasant as the hives. Take a bristle brush or a currycomb with corrugated edges, and work at his coat with a circular motion. When the dandruff is loosened go at him with a wisp of straw which has been dampened. Be sure that it is damp, as the dandruff will then cling to the wisp.

When a horse comes in wet with rain, you will need first a scraper. It is a narrow, flexible strip of brass; and if you grasp it at both ends and draw the thin edge over his coat, you will be surprised at the amount of water it will scrape off. A shingle is a handy substitute.

Now put on a blanket and a hood. If you have no hood, you must rub his ears, neck and head until they are dry. Then you must bandage his legs, loosely but warmly. If he is very wet and the weather is very cold, an additional blanket should be put on in about twenty minutes. The moisture will be drawn to the top blanket, which can then be removed.

When he is dry, brush him thoroughly. Be sure you get all the dried mud off his belly and legs. Never wash the mud from a horse's legs unless you are prepared to dry them immediately.

FOR THE TIRED HORSE.

If the horse comes in very tired, his forelegs may be bathed from knee to foot, his hind legs from hock to foot, in water as hot as your hand will bear. Do one leg at a time. Dry it and bandage it. Rub his forelegs and knees, shoulders and thighs with weak liniment. A tired horse needs extra elbow grease and extra care for some time after he is stabled. He is susceptible at such times to a reaction—a chill or cold sweat. A cold ear is the danger signal. When you get that signal he must be rubbed again, or given an extra blanket, or both.

And then the foot! The Arabs, great horse lovers, have a short proverb in which is packed a volume of truth: "No hoof, no horse." The shiniest of coats is no good unless there is a sound foot under it. Grooming is not complete—in fact, it is a failure—unless it includes a careful examination of that most important member. Look for loose or worn shoes. Look for pebbles wedged between hoof and shoe. Look for pebbles or nails in the frog. Look for cracks in the hoof and scratches around the fetlocks. Look at the general condition of the hoof. It needs moisture, and should be washed frequently, inside and out. In hot weather, never lose a chance of putting your horse through a puddle or shallow stream. Much lameness is caused by pounding mile after mile on hard, dry roads.

The importance of this care is obvious. Whether he is used for hunting or plowing, the horse is a useful anima.l. You may neglect your household pet and suffer only in the esteem of your friends. But when you neglect your horse, you touch your pocketbook.

Press Convention at Bigwin Inn

In the choice of a convention centre there are many questions to be considered. The accommodations for the lodging of the delegates are of great importance, but also there are the factors of entertainment to be considered if the convention is to be successful from every angle. In choosing the place for the 1927 convention of the Canadian Weekly Newspapers' Association, which brings together the publishers of weekly newspapers in every section of Canada, the executive of the association considered all angles of the matter before deciding that this year's convention would be held at Bigwin Inn, in the Lake of Bays district of the Highlands of Ontario.

Here, not only will the delegates be provided with splendid hotel accommodation for themselves and their wives, but they will also find splendid facilities in the way of convention hall and committee rooms for transacting their business. From the entertainment side of the question, Bigwin Inn, located on the shore of Lake of Bays, offers to visitors every variety of land and water sports. Located in a beautiful region of lake and forest, it is an ideal holiday centre and one which is growing in popularity with each season. Every form of aquatic sport such as boating, bathing and fishing may be enjoyed, and in addition there is golf, tennis, bowling and other pursuits for those who seek these forms of diversion.

Bigwin Inn is one of the charming summer hotels of Eastern Canada and is conveniently located near Huntsville, on the Toronto-North Bay line of the National System. From Huntsville the visitor is taken by well-appointed steamboat to the Inn, and special sleeping cars operate to and from Huntsville for the convenience of visitors.

THE ONTARIO GARDEN

CONSERVING MOISTURE.

For the man who has not a convenient hose at his disposal, or for one who cannot hoe his garden two or three times a week, the mulching system has many advantages. After growth has been well started, loose straw or leaves is placed between the row and if possible between the individual plants. This is put down in a layer two or three inches deep. The mulch will not only conserve sufficient moisture to keep the plants growing but it will keep down weeds as well. Of course the plants must be thinned before the mulch is applied. Like all good things, however, it has some disadvantages. If the weather is cool the sun is prevented from penetrating the warming up the soil in which case the usual supply of nitrogen is not released. One can make up for this by applying nitrate of soda at the rate of a scant ounce to the square yard.

CONTROLLING CUT WORMS.

Cut worms will soon be getting in their evil work with newly set out flowers and vegetables. The following simple formula will save the garden from ruin: Mix bran or Paris green or white arsenic in the proportion of 25 pounds bran to one pound poison. Mix one or two quarts or cheap molasses in two gallons of water and pour the liquid over the poisoned bran. Mix thoroughly until the bait falls like sawdust through the fingers. One pint of liquid arsenic of soda may be substituted for the powdered poisons, and removes all danger to the person from poisonous dust. If the cutworms are known to be in the garden or field before planting, cultivate thoroughly to bring them to the surface and break up their resting places near the surface of the soil. A few days before planting sprinkle the ground with the poison mixture and after planting, if the pests are still numerous, put a pinch of the poison beside each plant.

KILLING CABBAGE MAGGOTS.

Each year thousand of cabbages, asters and other plants are destroyed by the cabbage maggot. This pest is a sort of plant louse which feeds on the tiny rootlets of the newly set out plant. Dipping the plants in a solution of corrosive sublimate, one ounce to 12 gallons of water, will prevent depredations. The chemical is a deadly poison and as it will eat into metal it must be mixed up in a wooden or crockery container.

HANDLING PEONIES—USEFUL ANNUALS.

Like many other flowers, peonies are often spoilt by too much attention. These plants must not be overfertilized, a little manure dug around them in the spring being sufficient. Water thoroughly during May and June when the flowers are coming along and after the blooming period, as this is when next year's buds are being formed. Often a change of location will start shy peonies into bloom. For best decorative results, cut the flowers before they are quite open and bring inside.

No annual bed is complete without a few zinnias. These are a most convenient flower. They may be planted any time from early spring until well on in June with every chance of a fine display of bloom. They may be secured in a great variety of shapes and colors, running from yellow to red and from tiny buttons to great balls of fire, rivalling the chrysanthemum. They must have lots of room, and are better transplanted once or twice before being moved to their permanent position.

Another old stand-by is the nasturtium. This annual may be grown almost anywhere, but does best in rather poor soil. It will grow very quickly and on this account is particularly in demand for screening fences and making a show in a window box. For the front of the window box or for covering fences use the trailing sorts, the dwarf type being used for rookeries, and open beds. Black plant lice will sometimes cluster under the nasturtium leaves. These will do little harm but they are unsightly. Hosing with cold water under fair pressure will usually wash these insects away.

DAHLIAS.

As a general rule Dahlias should not be planted much before the first week in May and may be continued up to the first of June. Of course in Southern Ontario one may stick the tubers in earlier, but as this is a fall flowering plant there is little to be gained by too early planting. The best soil is a sandy, well drained loam, and it must be deeply cultivated and generously fertilized. As this plant will grow to a height of five feet or more it is necessary to supply stout, tall stakes and these should be placed at the same time as the bulbs, otherwise some damage may result when driving them in beside the tubers. The tubers should be placed on their sides in holes from four inches deep in heavy clay to six inches in lighter soil. Use a little nitrate of soda to get the plants started, then mulch well, water occasionally, and if large flowers are wanted nip off three-quarters of the buds.

CONTINUOUS CROPS.

A second and third sowing of vegetables may be made with most vegetables. Lettuce, spinach, beets, onions, carrots and radishes can go in at intervals of two weeks right up to the first of July, while peas and beans can usually be planted so that one crop will follow another. This double cropping is an intensive business and means much cultivation and forcing with quickly available fertilizer such as nitrate of soda.

Crops for Sandy Soils.

Crops suitable for sandy soils, according to a Dominion Dept. of Agriculture Bulletin on Crop Rotations and Soil Management in Eastern Canada, are potatoes, turnips, field beans, rye, oats, vetches, red clover, sweet clover, and alfalfa. Where the sand is too poor for ordinary crops the growth of native grasses might be encouraged by light dressings of manure in order to prevent drifting. Alfalfa, red clover and sweet clover are always desirable crops for sandy soils if a good stand is obtainable. If the soil is acid liming may be necessary in the case of alfalfa.

I use my finger-nail scissors for trimming Baby's hair. The point turns out so there is no danger of jabbing her neck if she wiggles.—Mrs. R. E. T.

A man should never be ashamed to own he has been in the wrong, which is but saying, in other words, that he is wiser to-day than he was yesterday.—Alexander Pope.

SCREENS THAT LAST AS LONG AS YOUR HOUSE

BY PARKHURST WHITNEY.

There are two classes of screens—rustless and rusting.

Rust is the great destroyer. Every year it puts millions of square feet of screening out of use—one-fifth of all the total manufactured. It is false economy to buy a cheap screen which may rust out in a season, when a good screen made properly will last as long as the house itself.

There are five general kinds of screen cloth: Painted iron wire, galvanized and enameled iron, copper and bronze. Painted iron wire is no longer recommended, for it rusts too quickly. If you want something for only one season try black mosquito netting. Sometimes it will last two years and it costs much less than painted iron wire. Galvanized and enameled iron are practical for inexpensive house screens. They are good as long as you keep the iron covered with paint. You can count on them to last from three to five years.

The wisest buy is copper or bronze screen cloth. Barring accidents either will last a lifetime. The original cost is only a fourth to a third more than the cheaper grades.

After copper or bronze cloth has weathered it becomes almost invisible. If you want to leave it up winter and summer it can stand the wear. Until recently the copper screen cloth has been too limber to stretch taut; now it is made as rigid as any.

DISEASE-CARRYING INSECTS.

Screening comes in four sizes: 12, 14, 16 and 18 strands to an inch. Most screens, unfortunately, are made of 12-mesh wire cloth, a size too large to keep out the hungry mosquito really anxious to get in. Screen wire mesh cloth of 14-mesh is better but a little more expensive. A 16-mesh will keep out practically all the disease-carrying insects. If gnats are a pest in your part of the country get the 18-mesh. You'll need it!

Perhaps your screens are new and not mosquito-proof. You can increase their efficiency by giving the wire a coat of paint to make the meshes smaller. A special screen enamel is on the market now.

Screening is of no value if ill-fitting frames leaves gaping cracks at the window sides. Whether of wood or metal the frame must be decently made. The corners must be rigid, welded or interlocked without screws or bolts, which eventually loosen and fall out. It is well to have the frame reinforced the corners with metal angles or braces. All screens must work easily. Frames should be light and strong, not too wide but wide enough to hold the frisky screen cloth. The frame should match the trim of the window, door or porch.

Hinges and catches of hopper or bronze will last forever and will not rust and scar the window frames with stain.

VARIOUS FRAMES.

The well-made frame of wood does all that metal can with a few general reservations. A good metal frame of bronze or copper will last forever; you can't say that of wood. The metal frame is narrowed, and that leaves more room for air. But wood is cheapest and it is conveniently repaired. However, it will need it oftener. Wooden frames seldom improve the appearance of a house, though there are a few types of architecture wood suits best. The galvanized and enameled steel is fair but it takes a lot of painting. If you live in a damp climate or near the seashore the bronze or copper is the only thing to buy. Oxygen-loving steel will prove a constant rust problem. There is a product sold for bronze that is only steel bronzed over, so beware!

With the metal frames there are many fine devices for keeping the metal cloth firmly attached. Some types have a rod going through a tubular metal frame which holds the screen taut. The cloth can be put in and taken out without tools. Others have a patent fastening under the screen cloth that catches it at every point.

Why Plough to Kill the Corn Borer?

PROF. CAESAR, O.A.C., EXPLAINS.

Farmer after farmer has the firm conviction that plowing does not kill the corn borer, because they have seen them on the surface after the stubble has been plowed and they looked quite healthy. They also say that they have pulled up buried stubble and found them lying inside as happy as they could be anywhere. They say too that the borers will survive the winter in pools in the barnyard where they freeze stiff, and so, they conclude, "How can plowing possibly kill them?"

All the above statements are quite true but for all that plowing does kill the borer, but in a different way from what the farmer expected.

In nature the borers do not live underground except that they will go down in corn stalks or stubble as far as to the end of the main root. Therefore when corn fields are plowed and everything is buried they are out of their natural environment, but even so, they often remain where they are until the stubble, or weeds, or corn remnants in which they are hidden, begin to decay and grow slimy and utterly unlike what they were above ground. Then, if the ground is not frozen, as soon as the weather becomes warm they come to the surface. Here birds, ants, bettles and other enemies find and kill many of them. The rest, except for a very rare one, which happens to find and crawl into some small piece of corn or weed remnant, sooner or later die from exposure. Bear in mind therefore that in order to live, these larvae must have protection such as is afforded above ground by bits of cornstalks or of coarse weeds. Thus the more thoroughly you have plowed, the fewer hiding places will be left on the surface and the larger the percentage of borers which will be killed by their natural enemies or by the weather.

When plowing is done early in the fall, most of the borers come up before winter. When it is done late many remain in the ground until the soil warms up in the spring.

Another fact to remember is that, if the borers did not come to the surface, the delicate moths into which they transform would die, because the moths cannot work their way through the ground and live.

Experiments have proven that even the cleanest clean-up without plowing, leaves twice as many borers alive as a fair clean-up with good plowing.

There is not an entomologist in America who does not advocate plowing and in the United States there are more than twenty entomologists studying this insect.

Protection of Cabbage and Cauliflower.

It pays to protect cabbage and cauliflower from root maggot. Experiments at Cap Rouge, Que., Experimental Station for several years have shown that bichloride of mercury is effective, but as it is very poisonous great care must be taken in using it. Further, it should be carried in wooden or earthen vessels as it will eat through metal. An ounce should be dissolved in ten gallons of water or for small quantities an ordinary tablet per pint. Half a cup should be applied around each plant three or four days after they are set in the field and one or two more applications made at intervals of about a week.

Cauliflowers in particular also need protection from the weather. As a result of seven years' tests, the superintendent at Cap Rouge in his report for 1925 says "There did not seem to be much difference in the percentage of marketable plants from any of the protected lots—with leaves broken over the head, leaves tied over the head with twine, and leaves held over the head with toothpicks, but as the first mentioned method is the easiest and cheapest it is recommended."

Fertilizers for Sandy Soils.

Farm manure is the most beneficial and the most generally used fertilizer for sandy soils. In a bulletin of the Dominion Dept. of Agriculture on Crop Rotations and Soil Management in Eastern Canada it is stated that in the absence of a supply of manure a good fertilizer for corn, roots, or potatoes on sandy soil is a mixture of 75 pounds of nitrate of soda, 250 pounds of superphosphate and 75 pounds of muriate of potash per acre broadcast on the land just before planting.

In the case of potatoes, which are extensively grown on sandy soils, up to 1,500 pounds of fertilizer per acre is often used. In conjunction with manure, for potatoes, it is frequently profitable to use 200 to 400 pounds of superphosphate. For clover meadows 200 pounds of superphosphate and 50 pounds of muriate of potash might be applied early in the spring when growth is beginning. A similar dressing is good for alfalfa when the soil is not very fertile. For timothy meadows 75 to 100 pounds per acre of nitrate of soda is beneficial when applied in early spring.

THE CHILDREN'S HOUR

MRS. PEREGRINE'S COMPANY.

"I think," said Mrs. Peregrine to her husband, "the peewees are going to build in our portico this year."

"Very well," said Mr. Peregrine, "let them build. They will help to keep the insects out of the garden."

So young Mr. Pee-wee and his pretty mate, Phoebe, having thoroughly inspected the premises, concluded that the Peregrine's portico was just the place for their nest.

"For,' said Mr. Pee-wee, "I have watched for some time, and have not seen a boy about the place."

"Nor a cat," said Mrs. Pee-Wee. "Cats are nearly as bad as boys."

And so the young couple—or pair, as we should call them—built their first nest and went to housekeeping.

It was not long till Mrs. Phoebe went to sitting on five of the most beautiful little white eggs she had ever seen in her life, and Mr. Peewee brought her meals to her from the garden, which was near at hand. Sometimes he brought her a spider or cut-worm for dessert, after which he would perch on a bough of the big plum-tree near the window, and sing "Phoebe" for half an hour at a time.

But one day when Mr. Pee-wee came from the garden, he found Phoebe in a state of great excitement.

"I can't think what can be the matter with the Peregrines," she said. "There is such a commotion in the house, and Mr. Peregrine has just driven off in the light wagon with his Sunday clothes on. Do, please, take a good peep into the kitchen, and see if you can tell what it means."

Mr. Pee-wee had been very busy all the morning picking insects off a row of black-eyed peas, but he very good-naturedly perched on a tree near the kitchen window, which was open, and peeped in to see what could be the matter.

And he made quite a discovery; for Mrs. Peregrine, in a blue-ruffled dress with a sprigged calico apron tied around her plump waist, was just taking a pan of cookies out of the oven.

But that was not all.

Three rhubarb pies, and half a dozen egg-custards, yellow as gold, stood on the long dining-table to cool; while a savory odor of roast chicken pervaded the neat kitchen, and stole out through the open window to where Mr. Pee-wee sat.

"Company!" said Phoebe, as soon as her mate announced his discovery. "It's company, you may be sure; and oh, suppose it's children!"

Mrs. Phoebe had jumped to the right conclusion.

It was company, sure enough, as they discovered when Mr. Peregrine drove up to the house—a lady and—oh, horrors!—a boy.

A great, healthy, uneasy boy, who jumped out of the wagon at one bound, and went to whistling.

Mr. and Mrs. Pee-wee sat huddled together in fear and trembling, expecting every moment their retreat would be discovered.

But the boy—Jack, his name was—had caught a sight of the cookies, and other eatables with which Mrs. Peregrine had loaded the table, hurried into the house to get his dinner, and the birds breathed more freely for a little while.

The young birds were now hatched, and in spite of their fears the parent-birds went busily to work to provide food for them.

They took great care, however, to go out very early in the morning before Jack was awake, lest he should discover them.

But one morning, after breakfast, Mr. and Mrs. Peregrine and their lady visitor, Jack's mother, went out to the garden to inspect the young squash and cucumber vines, and to see how the sweet potatoes were growing.

To the consternation of the Peewees, Jack soon made his appearance, with a piece of ginger-cake in his hand, and sat down on the steps of the portico to eat it.

Some way or other, Mrs. Phoebe never understood just how it was, but one of the young birds began flopping around and fell out of the nest.

Jack, quietly eating his gingerbread, felt something drop on his head, and putting up his hand to see what it was, found it was a young bird.

Mrs. Phoebe nearly fainted with terror at beholding her nestling in the hands of a terrible boy, and Mr. Peewee flew in and out, chirping and crying in the most agonizing manner.

Jack looked up at the birds for a moment or two; then, seizing a step-ladder which stood near, he placed it under the nest and began to mount.

Mrs. Phoebe felt that her last hour had come, but she fluttered about, determined to protect her little brood as long as possible.

Jack having climbed to the top of the ladder, peered with two big, round eyes into the nest, then laid the little fluttering bird gently beside the others and descended.

After placing the ladder where he had found it, he sad down and calmly finished eating his ginger-cake.

As to Mr. Pee-wee, when his terror was over, he flew into the plum tree and sang "Phoebe" nearly twice as long as common.

"What a very good boy Jack is," thought Mrs. Phoebe smoothing her ruffled plumage. "I thought every boy in the world was wicked by nature and would rob a bird's nest when he could."

Are All Folks Crooked?

I have sold cabbage, potatoes, onions and eggs on credit to farmers for 20 miles around. Some paid by their cheque books, some forgot their money, some didn't intend to buy until they saw my signboard. All of it has been paid. When folks say the world is going bad and all folks are crooked and everyone is trying to beat me—I laugh to myself. I know better.—E. R.

Whole Meats From Walnuts.

When English walnuts are to be cracked in such a way that their halves will come out without breaking, the best method is to crack them on the side opposite the "seam" and remove the meats from the side thus opened.

MAKE CARE OF BABIES EASIER

Stomach disturbances and constipation are responsible for much of the peevishness of babies and young children. When the baby is cross or irritable the mother should not resort to so-called soothing mixtures to correct the trouble, for in the majority of cases these mixtures simply drug the child into an unnatural sleep. What is needed is a gentle laxative that will sweeten the stomach and regulate the bowels. Such a remedy is found in Baby's Own Tablets. They are easy to take and guaranteed to be entirely free from opiates and narcotics. Concerning them, Mrs. Jos. Tousaignant, Ste. Sophie, Que., writes:—"I would like all mothers to know that I feel there is no other medicine to equal Baby's Own Tablets. I always keep a box in the house and their prompt use never fails to restore my little ones to health." The Tablets are sold by medicine dealers or by mail at 25 cts. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The waters in the Canadian national parks in Western Canada offer splendid inducements to the angler. Five varieties of game trout have their habitat in the waters of the parks, namely, cut-throat, lake, Dolly Varden, bull, and brook.

OWL-LAFFS

BY O. W. L. (On With Laughter)

"Do angels have wings, mummy?"
"Yes, darling."
"Can they fly?"
"Yes, dear."
"Then when is nurse going to fly, 'cause Daddy called her an angel last night?"
"To-morrow, darling."

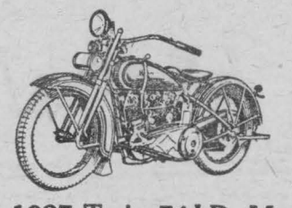

A charming young girl was dear Helen,
In her home town she was quite the belle—
She was proper, all right,
When the lamps were alight,
But out on the porch there's no telen.

A pessimist remembers that the lily belongs to the onion family; an optimist that the onion belongs to the lily family.

Love provides the first husband and life insurance the second.

Lot's wife was too inquisitive,
It proved a fatal fault,
If she hadn't turned to rubber
She'd not have turned to salt.

Too many men in burying the hatchet dig up the hammer.

The 1927 Twin 74J.D. Model

The greatest Harley-Davidson of all—at new and lowe prices—improved—refined in many details—but no radical departures from the time-tried Harley-Davidson design. Old timers and beginners alike will recognize in these 1927 Twins the last word in engineering achievement. Powerful—speedy—built to hug the road—the most dependable and satisfactory mount that ever split the wind.

VIKING CREAM SEPARATOR

RHEUMATIC MISERY

Relief Can Only Come Through Better Blood—Liniments of No Use.

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the inflamed joints swell and the patient becomes a cripple. Most treatments simply aim to keep down the pain, hence with every unfavorable condition a renewed attack follows.

To cast out rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can best be done through a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new richness and redness. Thousands have tried this treatment with beneficial results. That every sufferer from rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most hopeful means of recovery is shown by the statement of Mr. David Carroll, Pictou, N.S., who says:—"For years I was troubled with rheumatism. The pains were not continuous, but they always returned, and kept getting worse. I tried so-called electric belts and many medicines, but did not get more than temporary relief. Only those who have suffered from this trouble will realize what I suffered at times. I had begun to dispair of getting better when a friend urged me to try Dr. Williams' Pink Pills. In a short time I could feel this medicine helping me so I gladly continued taking the pills and soon found that every trace of the trouble had disappeared and there was a great improvement in my general health. It is now two years since I took Dr. Williams' Pink Pills and I have not had the least twinge of the trouble in that time. That is why I confidently recommend the pills to other sufferers."

You can get these Pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

London Exhibits Nine-Inch Hyacinth.

What is said to be the largest hyacinth in the world, "Myosotis," was the cynosure of all eyes at the show of the Royal Horticultural Society in Vincent Square, London, Eng. The bloom, a mass of Cambridge bluebells, was nine inches tall.

The hyacinth was sometimes known to the English trade as "the chimney-sweep's brush." He continued: "The development of hyacinths in England has been wonderful during recent years. Blooms measuring eight inches in height are quite common now. It is not generally known that the hyacinth, centuries ago, was a tiny wild flower. As you see, we have now hyacinths in practically every color. Perhaps brilliant orange and scarlet are the only two colors we have not yet perfected in these blooms, although we have them in shaded orange and cerise. 'King Menelik,' a deep indigo blue, is among the hyacinths being shown this year, and this is about the nearest we have got to a black hyacinth."

Hyacinths are still used largely for window-boxes—a method of decoration popular in the British Isles. In addition to hyacinths, which formed a greater part of the show, there were some beautiful exhibits of cyclamen, daffodils, narcissi, and orchids.

Sir William Lawrence exhibited a rare plant known as Halmonthus natalensis. This plant, which possesses an orange-colored flower, is a native of South Africa.

Cure for Auto Accidents.

Education is the only cure for the ever-increasing number of automobile accidents, writes Walter P. Chrysler in The Outlook.

"The more I study this whole problem," he writes, "the more convinced I am that a major part of the problem is an educational one. That this is recognized is to be found in the fact that in many of our large cities police officers are going into the schools to give blackboard talks to children about crossing streets at crossings, the necessity for observing traffic lights, the dangers of playing in crowded streets, the folly of 'Hooking-on-behind' motor cars and trucks and busses and what not. Having police officers in uniform go into classrooms has its effect.

"This practice of having the police go into the schools should be encouraged. Many cities would do well to adopt the plan. But the work of the police must be supplemented by the instruction of the parents in the home."

Mr. Chrysler also believes that the motorist needs education. He writes: "The motorist loses nothing who gives to the pedestrian the right of way. It is the courteous thing to do. And then one should remember that a pedestrian cannot exchange bumps with a motor car. I have no patience with the motorist who compels the pedestrian to run to escape injury. To be sure, there are all kinds of motorists, just as there are all kinds of pedestrians, but the decent thing to do is to permit the pedestrian to walk to the curb or across the street in safety and without hurry."

Violets, rose petals, and nasturtiums for flavoring salads are among the novelties of French cooking.

For all pain—Minard's Liniment.

THE TEETH AND THEIR CARE

Progress Made in the Prevention of Dental Disease.

Marked progress has been made during recent years in working out a programme for the prevention of dental disease. Outstanding research workers have spent their time and energy in an effort to ascertain the real causes of decay and pyorrhea and to find out how the public can successfully combat or correct these conditions. Such investigation is absolutely essential because so many people are not only suffering from tooth ache and the loss of valuable teeth but a number of systematic diseases are the result of bad mouth conditions.

It has been discovered that dental diseases are largely due to modern habits of living and that people in highly civilized countries have more tooth decay than those less highly favored. It is always difficult to persuade the public to live in accordance with natural laws and consequently, some extra protection must be provided. The research departments of the Dental Faculties of the Universities and other investigators are convinced of the necessity for and the value of this study and the large number engaged in the work gives promise of many worth-while developments.

Knowledge of any kind is of little value unless applied and a programme for the prevention of dental diseases will not be of much service to humanity unless brought to them. The logical person to educate the people in regard to mouth conditions is the dentist, but how can he bring the advantages of modern dentistry to the public unless he is himself informed.

The chief agency used by the dentists for the purpose of keeping abreast of the times is the dental convention. These meetings held once a year in the province enable the members of the dental profession to secure through essay and clinic the very latest in both knowledge and methods. The Dental Convention to be held in Toronto during this month promises to be of unusual importance because it will be the Diamond Jubilee of the Ontario Dental Association and will be a joint convention with the Canadian Dental Association. Outstanding dentists and physicians from all parts of America will be present to give essays and clinics and the meetings will be so instructive and inspiring that the vast majority of the dentists of the Province will be in attendance.

The finest thing in the world to keep your stomach in tip-top shape is 15 to 30 drops of Seigel's Syrup in a glass of water. Any drug store.

Khaki has been officially adopted for future use in the French Army, displacing the horizon blue so famous during the Great War.

Keep Minard's Liniment in the house.

Beauty culture is a very old art. Even in Ancient Rome women dieted to "reduce," wore tight corsets, and used false teeth and false hair.

RED ROSE TEA "is good tea"

102

Your grocer knows when you order RED ROSE ORANGE PEKOE you are a judge of fine tea.

A Sussex Daisy.

Where the thistle lifts a purple crown
Six foot out of the turf,
And the harebell shakes on the windy hill—
O the breath of the distant surf!—

The hills look over on the South,
And southward dreams the sea;
And, with the sea-breeze hand in hand,
Came innocence and she.

Where 'mid the gorse the raspberry
Red for the gatherer springs,
Two children did we stray and talk
Wise, idle, childish things. . . .

Oh, there were flowers in Storrington
On the turf and on the spray;
But the sweetest flower on Sussex hills
Was the Daisy-flower that day!

—Francis Thompson.

O.A.C. STRAIN BRED-TO-LAY BARRED Rocks, Tom Barron White Leghorns. Our speciality is O.A.C. Barred Rocks of the heavy type. All our flocks are headed with pedigreed cockerels from blood-tested stock and have been culled for heavy egg production. If you want Barred Rocks that are bred for egg production and also have the size, order from us and secure pure bred chicks of high quality at the price of ordinary grade stock. Prices per hundred for May, Barred Rocks $18.00, Leghorns $16.00; June, Barred Rocks, $16.00, Leghorns $14.00; express paid. 100 per cent. live arrival guaranteed. Terms, 25 per cent cash with order, balance C.O.D. Prompt shipment guaranteed. J. D. Johnson, Box 107, Fergus, Ont.

LOWER PRICES FOR HIGH QUALITY PURE Bred Baby Chicks. O.A.C. strain bred-to-lay Barred Rocks and Tom Barron White Leghorns. Our aim each year is to improve our flocks and sell high quality pure bred chicks at the lowest possible prices. This year our chicks are better than ever and prices just as low and lower than chicks of inferior quality. All our flocks are headed with pedigreed cockerels from blood-tested stock and have also been culled for heavy egg production. To improve your flock order from us and secure the best. Prices per hundred: Barred Rocks, for May $18.00, June $16.00; Leghorns, May $16.00, June $14.00; express paid. 100 per cent. live arrival guaranteed. Terms, 25 per cent. cash with order, balance C.O.D. All orders promptly and carefully filled. J. A. Tweddle, Fergus, Ont.

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—Dame WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use. C

Canadian Farmer Tells His Experience

"Les" Booth, widely known Ontario farmer, and a sick man for 20 years, suffered daily, only half alive. Now strong, robust, vigorous, credits new found health to Tanlac

Though popularly known as "Les," Mr. Booth's correct first name is George. His home is at 271 Perth St., Brockville. For the past three years he has enjoyed vigorous health but what he endured before then is best told in his own words. "For twenty years my arms, shoulders, back and hips, ached with rheumatism," said Mr. Booth. "Often I had to quit work entirely and I remember one bad spell that kept me in bed for six months.

"My case got to be so chronic that I help ran the farm. I was practically helpless. Even my wrists and hands would swell up so that I couldn't write my name. I dreaded bedtime, for I got no rest, but lay there in agony, waiting for morning. Nervous spells would seize me and I would tremble all over like a leaf. I couldn't get any benefit from my food and had to force myself to eat. My weight was far below normal.

"Three years ago I decided to give Tanlac a good trial, for nothing else had helped me. I could scarcely believe such results were possible as those Tanlac soon showed. The aching stopped, my appetite came back and I could eat heartily. My nights became more restful, too, and I slept soundly. I gained 16 pounds which I still retain, and I now work hard outdoors from 8 to 10 hours a day. *I never have an ache. It's hardly believeable!* If folks want to know what Tanlac can do, tell them to write to Les Booth, or to come and see me. I'll tell 'em."

If your health is broken from overwork or neglect, profit from Mr. Booth's experience. Try Tanlac, nature's own body builder, made from roots, herbs and barks. Your druggist has it. Over 52 million bottles sold.

Genuine BAYER ASPIRIN

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago
Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe — Accept only "Bayer" package which contains proven directions.

Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Asa Harriman of Morrisburg, Ont. has succeeded J. S. Rombough as proprietor of the Riverside Inn, on Centre Street. Possession was given May 1st. Mr. Rombough remained a few days to assist the new proprietor. The hotel is owned by Stephen Syakos, Mr. Harriman buying out the business and furnishing from Mr. Rombough. The new proprietor has been a resident of Massena for the past two years, being employed in the aluminum plant. His wife and five children have continued to live in Morrisburg, but will now move here. Before coming here, he ran a bakery in Morrisburg and previous to that conducted a rooming house in Montreal—Massena Observer.
